110. Introduction to Technology Management and Economics for Engineers. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Fundamental principles of micro-level (individual, firm, and industry) and macro-level (government, international) economic and technological interplay as they relate to technology management. How individuals, firms, and governments impact successful commercialization of high technology products and services. Letter grading.

87. Introduction to Engineering Disciplines. (4) Lecture, four hours; discussion, four hours; outside study, four hours. Introduction to engineering as a professional opportunity for freshman students by exploring differences between engineering disciplines and functions engineers perform. Development of skills and techniques for academic excellence through team process. Investigation of national need underlying current effort to increase participation of historically underrepresented groups in U.S. technological work force. Letter grading.

95. Internship Studies in Engineering. (2 to 4) Tutorial, two to four hours. Limited to freshmen/sophomores. Internship studies course supervised by associate dean or designated faculty members. Further supervision to be provided by organization for which students are doing internship. Students may be required to meet on a regular basis with instructor and provide periodic reports of their experience. May not be applied toward major requirements. Normally, only 4 units of internship are allowed. Individual contract with associate dean required. P/NP grading.

98. What Students Need to Know about Careers in Engineering. (2) Seminar, two hours. Introduction to skills and aptitudes that most engineers require in their careers and description of big picture of engineering careers. Integrative work to relate specific skills and techniques of engineering courses to real world of engineering and roadmap of extracurricular activity that strengthens skills needed to achieve good jobs and achieve career success. P/NP grading.

Upper Division Courses

M101. Principles of Nanoscience and Nanotechnology. (4) (Same as Materials Science M105.) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced prerequisites: Chemistry 20, and Electrical Engineering 1 or Physics 1C. Introduction to underlying science encompassing structure, properties, and functionality of nanoscale systems. New phenomena that emerge in very small systems (typically with feature sizes below few hundred nanometers) explained using basic concepts from physics and chemistry. Chemical, optical, and electronic properties, electron transport, structural stability, self-assembly, templated assembly and applications of various nanostructures such as quantum dots, nanoparticles, quantum wires, quantum wells and multilayers, carbon nanotubes. Letter grading.

112. Laboratory to Market, Entrepreneurship for Engineers. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Critical components of entrepreneurship: finance, marketing, human resource, and accounting disciplines as they impact management of technology commercialization. Topics include intellectual property management, team building, market forecasting, and entrepreneurial finance. Students work in small teams studying technology management plans to bring new technologies to market. Students select from set of available technology concepts, many generated at UCLA, that are in need of plans for movement from laboratory to market. Letter grading.

113. Product Strategy. (4) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Introduction to current management concept of product development. Topics include product strategy, product platform, and product lines; competitive strategy; vectors of differentiation, product pricing, first-to-market versus fast-follower; growth strategy, growth through acquisition, and new ventures; product portfolio management. Case studies, class projects, group discussions, and guest lectures by speakers from industry. Letter grading.

180. Engineering of Complex Systems. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Designed for juniors/seniors. Holistic view of engineering discipline, covering lifecycle of engineering, processes, and techniques used in industry today. Multidisciplinary systems engineering perspective in which aspects of electrical, mechanical, material, and software engineering are incorporated. Three specific case studies in communication, sensor, and processing systems included to help students understand these concepts. Special attention paid to link material covered to engineering curriculum offered by UCLA to help students integrate and enhance their understanding of knowledge already acquired. Motivation of students to continue their learning and reinforce lifelong learning habits. Letter grading.

183EW. Art of Engineering Endeavors. (4) (Formerly numbered 183.) Lecture, four hours; discussion, three hours; outside study, five hours. Limited to sophomore/junior/senior engineering students. Professional and ethical considerations in practice of engineering. Impact of technology on society and on development of moral and ethical values. Exploring practical and ethical implications of engineering, legal, biological, and other issues created by new technologies. Emphasis on research and writing within engineering environments. Writing and revision of about 120 pages total, including research essays and one team-written research report. Readings address technical issues and writing forms. Satisfies engineering writing requirement. Letter grading.

185EW. Art of Engineering Endeavors. (4) (Formerly numbered 185.) Lecture, four hours; discussion, three hours; outside study, five hours. Designed for juniors/senior engineering students. Nontechnical skills and experiences necessary for engineering career success. Importance of group dynamics in engineering practice. Teamwork and effective group skills in engineering environments. Organization and control of multidisciplinary complex engineering projects. Forms of leadership and qualities and characteristics of effective leaders. How engineering, computer sciences, and technology relate to major ethical and social issues. Societal demands on practice of engineering. Emphasis on research and writing in engineering environments. Satisfies engineering writing requirement. Letter grading.

Special Courses in Engineering. (4) Seminar, four hours; outside study, eight hours. Special topics in engineering for undergraduate students taught on experimental or temporary basis, such as those taught by visiting faculty or in special visiting faculty courses. May be repeated for credit with topic or instructor change. Letter grading.
Graduate Courses

200. Program Management Principles for Engineers and Professionals. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students in engineering process courses. Coverage of key elements: systems requirements and flow down, product development cycle, functional analysis, system synthesis and trade studies, budget allocations, risk management metrics, review and audit activities and documentation. Letter grading.

201. Systems Engineering. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Practical review of major elements of system engineering process. Coverage of key elements: system requirements and flow down, product development cycle, functional analysis, system synthesis and trade studies, budget allocations, risk management metrics, review and audit activities and documentation. Letter grading.

202. Reliability, Maintainability, and Supportability. (4) Lecture, four hours; outside study, eight hours. Requisite: course 201. Designed for graduate students with one to two years work experience. Integrated logistic support (ILS) is major driver of system life-cycle cost and one key element of system engineering activities. Overview of engineering disciplines critical to this function — reliability, maintainability, and supportability — and their interactions using probabilistic theory. Topics also include fault detections and isolations and parts obsolescence. Discussion of 6-sigma process, one effective design and manufacturing methodology to ensure system reliability, maintainability, and supportability. Letter grading.

203. System Architecture. (4) Lecture, four hours; outside study, eight hours. Requisite: course 201. Designed for graduate students with B.S. degrees in engineering or science and one to two years of work experience in a selected domain. Art and science of architectural introduction to architectural methodology — paradigm and tools. Principles of architecting through analysis of architecture designs of major existing systems. Discussion of selected elements of architectural practices, such as representations models, design processes, and architecture frameworks. Examination of professionalization of system architecture. Letter grading.

215. Entrepreneurship for Engineers. (4) Formerly numbered 210.) Lecture, four hours. Limited to graduate engineering students. Topics in starting and developing high-tech enterprises and intended for students who wish to complement their technical education with introduction to entrepreneurship. Letter grading.

299. Capstone Project. (4) Activity, 10 hours. Prepa- ration: completion of minimum of four 200-level courses in online M.S. program. Project course that satisfies UCLA final comprehensive examination requirement of M.S. degree in Engineering. Project is complet- ed under individual guidance from UCLA Engineering faculty member and incorporates advanced knowledge learned in M.S. program of study. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Semi- nar, to be arranged. Preparation: apprentice personnel environment and course, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit.

471A-471B. Engineer in General Environment. (3-3-1.5) Lecture, three hours (courses 471A, 471B, 471C) and 90 minutes (course 471C). Limited to Engi- neering Executive Program students. Influences of hu- man relations, laws, social sciences, humanities, and fine arts on development and utilization of natural and human resources. Interaction of technology and soci- ety past, present, and future. Change agents and substi- tution to S/U or letter (471A) grading; In Progress (471B) and S/U or letter (471C) grading.

472A-472D. Engineer in Business Environment. (3-3-1.5) Lecture, eight hours (courses 472A, 472B, 472C) and 90 minutes (course 472D). Limited to Engi- neering Executive Program students. Language of business for engineering executive. Accounting, fi- nance, business economics, business law, and mar- keting. Laboratory in organization and management problem solving. Analysis of actual business problems of firm, community, and nation, provided through coop- eration and participation with California business cor- porations and government agencies. In Progress (472A, 472C) and S/U or letter grading (credit to be given on completion of courses 472B and 472D).

473A-473B. Analysis and Synthesis of Large-Scale Systems. (2-2-1) Lecture, two and one-half hours. Limited to Engineering Executive Program students. Problem area of modern industry or government is selected as class project, and its solution is synthesized using quantitative tools and methods. Project also serves as laboratory in organization for goal-oriented technical group. In Progress (473A) and S/U (473B) grading.

495A. Teaching Assistant Training Seminar. (4) Formerly numbered 495B.) Seminar, four hours; out- side study, eight hours. Preparatory: appointment as teaching assistant. Limited to graduate engineering students. Seminar on communication of engineering principles, concepts, and methods, preparation, organ- ization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grad- ing.

495B. Supervised Teaching Preparation. (2) (Same as English Composition M495E.) Seminar, two hours. Required of all teaching assistants for Engineer- ing writing courses not exempt by appropriate depart- mental or program training. Training and mentoring, with focus on composition pedagogy, assessment of student writing, guidance of revision process, and spe- cialized writing problems that may occur in engineering writing contexts. Practical concerns of preparing stu- dents to write course assignments, marking and grad- ing essays, and conducting peer reviews and confer- ences. S/U grading.

495C. Supervised Teaching Preparation. (2) (Same as English Composition M495F.) Seminar, one hour. Requisite: course M495B. Required of all teaching assistants in their initial term of teaching Engineer- ing writing courses. Mentoring in group and individ- ual meetings. Continued focus on composition pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may oc- cur in engineering writing contexts. Practical concerns of preparing students to write course assignments, marking and grading essays, and conducting peer reviews and confer- ences. S/U grading.

S01. Cooperative Program. (2 to 6) Tutorial, to be ar- ranged. Preparation: consent of UCLA graduate advis- or and graduate dean, and host campus instructor, de- partment chair, and graduate dean. Used to record en- rollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.
English can provide excellent preparation, including law, administration, business, teaching, media, and entertainment.

Within the B.A. degree in English, qualified students may elect a concentration in creative writing. The department also offers a Bachelor of Arts degree in American Literature and Culture. When selecting courses to fulfill requirements for the majors, students are expected to choose those that best reflect their own interests and simultaneously contribute toward a coherent program in literary studies.

A graduate program leading to the Master of Arts degree is available for students who wish to continue the study of literature at an advanced level. A parallel program continues to the Ph.D. degree. Because the Ph.D. program may require five years or more, it is intended only for qualified students who are seriously committed to advanced literary scholarship and, in some cases, to a career in college or university teaching.

The Bachelor of Arts degree in English has an interdisciplinary dimension. Students may elect a concentration in creative writing workshops in a single genre. The creative writing concentration consists of three requirements as the major, with the exception that one breadth course must be taken from the creative writing area (English 136, 137, 138), and both electives must be creative writing workshops (courses 136, 137, 138).

Students who have completed the Entry-Level Writing requirement before taking any courses in English (other than English Composition A or 2). For further information regarding Entry-Level Writing, see the Undergraduate Study section of this catalog.
than three workshops in any one creative writing genre. Students planning to select this program should contact the departmental counselor for further details.

American Literature and Culture B.A.

Students are expected to meet with the undergraduate counselors and undergraduate faculty adviser to plan and follow a course of study that incorporates their interests and goals with the fulfillment of requirements for the degree.

Preparation for the Major

Required: English Composition 3, English 4W or 4HW or 4WS, 10A, 10B, 10C taken in the stated sequence (each course is a requisite for the next course). A grade of C or better is required in each course.

Transfer Students

Transfer applicants to the American Literature and Culture major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English composition course, one English critical reading and writing course, one year of English literature survey courses, and two years of one foreign language or a combination of foreign language and foreign literature courses.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Ten 4- or 5-unit upper division courses, including five in American literature selected from English 166A through 167B, 170A, 170B, 170C, 172C through 177, two of which must be devoted to literature written before 1900 (courses 166A through 167B, 170A, and M104A, 175, 176, 177 when treating a pre-1900 topic); one seminar from 183A, 183B, 183C, 191A, 191B, 191C, or when treating American topics, 180, 181A, 181B, 182E, 182F, M101D, M101F; two American race, ethnicity, gender, and sexuality courses from M102A, M102B, M104A through 106 (also 100, M101B, M101C, M101D, 103, M107A, M107B, 108, 109 when treating American topics or figures); and two courses from 100 through 199 or from courses pertaining to American culture offered by other departments (of those courses applied toward the major from outside the Department of English, both must usually come from one department or program and appear on a list of approved courses for the major). Each course applied toward requirements for the major must be at least 4 units and be taken for a letter grade.

Honors Program Admission

The honors program is open to departmental majors with a 3.5 departmental and a 3.25 overall grade-point average. Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. Students should apply by Winter Quarter of the junior year. For application forms and further information, contact the departmental counselor.

Requirements

All honors students are required to take English 120 or 121 (may fulfill one of three required breadth courses) no later than Winter Quarter of the junior year and one seminar from the English M180 through 191E sequence, preferably before the senior year. Students in the creative writing concentration are required to have completed one or been accepted into their third workshop in a single genre prior to or concurrent with enrollment in course 191H. In Spring Quarter of the junior year, students must take course 191H (may fulfill one of two electives for the major). During Fall and Winter Quarters of the senior year, they take courses 198A and 198B, in which they write a thesis under the direction of a faculty member (198B may fulfill the second of two electives for the major). The thesis determines whether they receive highest honors, honors, or no honors.

English Minor

The English minor is designed for students who wish to enhance their major program with the benefits of intensive study of English language and literatures, including a better understanding and appreciation of literatures in English and improvement in critical thinking, reading, and writing skills.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed English 10A with a grade of C or better, and have satisfied the English Composition 3 requirement and completed English 4W. Students must file a petition to declare the minor by meeting with a student affairs officer in the Undergraduate Counseling Office, 149 Humanities Building, (310) 825-1389. This allows them priority enrollment in many upper division courses.

Required Lower Division Courses (10 units): English 10B and 10C, with grades of C or better.

Required Upper Division Courses (25 units): Five courses selected from English 100 through M191E, including one course in literatures in English written before 1700 (see course lists 1a and 1b under English B.A., The Major, above) and one other course in literatures in English written before 1850 (see course lists 1a, 1b, and 1c under English B.A., The Major, above). A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in another department or program.

At least 15 upper division units applied toward the minor must be taken in residence during the regular academic year (excluding Summer Sessions) at UCLA. Transfer credit is subject to department approval; consult the undergraduate counselors before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnit.ucla.edu/gasa/college/pgmintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of English offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in English.

English

Lower Division Courses

4HW. Critical Reading and Writing (Honors). (5) Lecture, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays. Satisfies Writing II requirement. Letter grading.

4W. Critical Reading and Writing. (5) Lecture, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays. Satisfies Writing II requirement. Letter grading.

4WS. Critical Reading and Writing (Service Learning). (5) Lecture, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of six papers, with minimum of 15 to 20 pages of revised writing. Service learning component includes minimum of 20 hours service with agency involved in issues of public advocacy and social justice. Satisfies Writing II requirement. Letter grading.

10A. Literatures in English to 1700. (5) Lecture, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Survey of major writers and genres, with emphasis on tools for literary analysis such as close reading, argumentation, historical and social context, and critical writing. Minimum of three papers (three to five pages each) or equivalent required. P/NP or letter grading.

10B. Literatures in English, 1700 to 1850. (5) Lecture, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW, 10A. Survey of major writers and genres, with emphasis on tools for literary analysis such as close reading, argumentation, historical and social context, and critical writing. Minimum of three papers (three to five pages each) or equivalent required. P/NP or letter grading.

10C. Literatures in English, 1850 to Present. (5) Lecture, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW, 10A, 10B. Survey of major writers and genres, with emphasis on tools for literary analysis such as close reading, argumentation, historical and social context, and critical writing. Minimum of three papers (three to five pages each) or equivalent required. P/NP or letter grading.
20. Introduction to Creative Writing. (4) Lecture, four hours. Preparation: submission of creative or expository writing to course coordinating committee. Enforced requisites: satisfaction of Entry-Level Writing requirement, English Composition 3 or 3H. Designed to introduce fundamentals of creative writing. Emphasis either on nonfiction or drama, depending on wishes of instructor(s) during any given term. Readings from assigned texts and weekly writing assignments required. P/NP or letter grading.

M40. Structure of English Words. (5) Same as Linguistics M101. Lecture, four hours; discussion, one hour. Introduction to structure of English words of classical origin, including most common base forms and rules by which alternate forms are derived. Students may expect to achieve substantial enunciation of their vocabulary while learning about etymology, semantic change, and abstract rules of English word formation. P/NP or letter grading.

M50. Introduction to Visual Culture. (5) Same as Film and Television M50. Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: satisfaction of Entry-Level Writing requirement. Study of how visual media, including Adyg, Bing, still and moving images, and narrative films, influence contemporary aesthetics, politics, and knowledge. P/NP or letter grading.

80. Major American Authors. (5) Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to English majors or students with credit for any course in 170 series. Introduction to chief American authors, with emphasis on poetry, narrative prose, and short fiction of such writers as Poe, Dickinson, Emerson, Whitman, T. S. Eliot, and Hemingway. P/NP or letter grading.

Lower Division Seminars: Special Topics in English. (5 each) Seminar, three hours. Limited to 15 students. Content varies; see department counselor for information. Enforced requisite: English Composition 3 or 3H. Topics include: Romantic Literature; American Literature; African American Literature; Contemporary American Fiction; Modern and Contemporary Poetry; Post-Civil Rights Literature; American Texts in World Contexts; Women's Literature; Science Fiction; African American Writers of the 20th Century; African American Women Writers; American Women Writers of the 20th Century; Shakespeare, the Modern Mind; and Black Writing in the 20th Century. P/NP or letter grading.

88A-88Z. Upper Division Courses

91B. Introduction to Drama. (5) Formerly numbered 95B. Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Examination of representative plays; readings may range from Greek to modern drama. Emphasis on critical approaches to dramatic text; student project issues may include dramatic form, special uses of language in drama, methods of evaluation. P/NP or letter grading.

91C. Introduction to Fiction. (5) Formerly numbered 95C. Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Introduction to prose narrative, its techniques and forms. Analysis of short and long narratives and of critical issues such as plot, characterization, setting, narrative voice, realistic and nonrealistic forms. P/NP or letter grading.

97H. Honors Seminar for Freshmen and Sopho- more. (4) Seminar, three hours. Enforced requisite: English Composition 3 or 3H. English 4W or 4WH. Required of limited to 15 students. Recommended for lower division students who anticipate entering English honors program during their junior year. Content varies; see departmental counselor for information. P/NP or letter grading.

Upper Division Courses

100. Introduction to Ethnic Studies. (5) Not the same as course 100 prior to Fall Quarter 2011. Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introduction to academic study of race and ethnicity, with primary focus on literature. Through examination of institutions that form understanding of race—citizenship, nationalism, class, gender, and labor—interrogation of how we come to think of ourselves and others as having race, and effects of such racialized thinking. Course is not about any particular racial or ethnic group, but rather highlights creation of ethnic categories and their effects on cultural production. P/NP or letter grading.

M101A. Premodern Queer Literatures and Cultures. (5). Not the same as course M101A prior to Fall Quarter 2011.) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M101A and Women's Studies M105A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of discrete period of queer literature from beginning to circa 1850. Works by such writers as Sarah Moore, Patricia Morrisson, and Thomas Gray may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M101B. Queer Literatures and Cultures, 1850 to 1970. (Formerly numbered M101A.) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M101B and Women's Studies M105B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of discrete period of queer literature and culture from circa 1850 to 1970. Works by such authors as Walt Whitman, Radclyffe Hall, Gertrude Stein, Virginia Woolf, Langston Hughes, Tennessee Williams, Henry Blake Fuller, and James Baldwin may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M101C. Queer Literatures and Cultures after 1970. (5) Formerly numbered M101B. Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Recommended for instructional credential candidates and for students interested in issues (race, gender, language, cultural identity and form and structure) and aesthetic issues, including evaluative criteria, followed by close critical analysis of selection of representative poems. P/NP or letter grading.

M101D. Studies in Queer Literatures and Cultures. (5) Formerly numbered M101C. (Same as Lesbian, Gay, Bisexual, and Transgender Studies M101D and Women's Studies M105D.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Variable specialized study in queer literatures and cultures, with an emphasis on focus on particular problem or issue in terms of its relationship to queer cultures and writings. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M102A. Historical Survey of Asian American Liter- ature. (5) (Same as Asian American Studies M112A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of Asian American literature either produced for orThematically reflecting pre-1980 period. Issues include immigration, diaspora, generational conflict, appropriations of cultural traditions, ethnicgender formation, interethnic dynamics, and social movement. Works by such authors as Edith Eaton, Younghee Kang, Carlos Bulosan, Hisaye Yamamoto, John Okada, Maxine Hong Kingston. P/NP or letter grading.

M102B. Contemporary Asian American Litera- ture and Criticism. (5) Not same as course M102B prior to Fall Quarter 2011.) (Same as Asian American Studies M112B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of post-1980 Asian American literature that explores key literary and critical issues, such as racialized experiences and activism, cultural work and immigrant labor, kinship and sexuality, minority and Orientalism, and methodology. May be repeated for credit with topic or instructor change. P/NP or letter grading.

103. Jewish Literature. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of literature of Jewish writers in and beyond America, with a focus on encounter of Jewish ethical ideals and social values with contemporary environment. P/NP or letter grading.

M104A. Early African American Literature. (5) (Same as Afro-American Studies M104A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introductory survey of African American literature from 18th century through World War I, including oral and written forms (ballads, spiritual, songs, prose, essays), by authors such as Phillis Wheatley, Frances Harper, Frederick Douglass, Harriet Jacobs, Charles Chesnutt, Booker T. Washington, and Pauline Hopkins. P/NP or letter grading.

M104B. African American Literature from Harlem Renaissance to 1960s. (5) (Same as Afro-American Studies M104B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introductory survey of 20th-century African American literature from New Negro Movement of post-World War I period to 1960s, including oral materials (ballads, blues, speeches and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Nella Larsen, E. Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, Gwendolyn Brooks, and Ralph Ellison. P/NP or letter grading.

M104C. African American Literature of 1960s and 1970s. (5) (Same as Afro-American Studies M104C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introductory survey of African American literary expression from late 1950s through 1970s. Topics include the rise of Black Power movement of 1960s and emergence of black women's writing in early 1970s, with focus on authors such as Lorraine Hansberry, Amiri Baraka, Nikki Giovanni, Alice Walker, Toni Morrison, Issac Ruel, Audre Lorde, and Marshall, and Ernest Gaines. P/NP or letter grading.
M104D. Contemporary African American Literature. (5) (Same as Afro-American Studies M104D.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introductory survey of African American literature from 1980s to present covering range of genres, with emphasis on diversity of perspectives and voices that have emerged over past 30 years or so. Authors may include Toni Morrison, August Wilson, Octavia Butler, Anna Deavere Smith, June Jordan, Charles Johnson, and Rita Dove. P/NP or letter grading. 

M104E. Topics in African American Literature and Culture. (5) (Same as Afro-American Studies M104E.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Lecture course provides opportunity to cover African American literature from wide range of theoretical, historical, format, and thematic perspectives. Topics may include African American autobiography, 20th-century African American literature and film, black diaspora literature, postmodern African American fiction, Afro-Futurism, and African Americanastic fiction. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M105A. Early Chicana/Chicana Literature, 1400 to 1920. (5) (Same as Chicana and Chicano Studies M105A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicana literature from poetry of Triple Alliance and Aztec Empire through end of Mexican Revolution (1920), including oral tradition (poetry, corridos, testimonios, folklore, novels, short stories, and drama) by writers such as Nezahualcoyotl (Hungry Coyote), Cabaza de Vaca, María Amparo Ruiz de Burton, Eusebio Chacón, Daniel Venegas, and Lorena Villegas de Mañón. P/NP or letter grading.

M105B. Chicana/Chicana Literature from Mexican Revolution to El Movimiento, 1920 to 1970s. (5) (Not same as course M105B prior to Fall Quarter 2011.) (Same as Chicana and Chicano Studies M105B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicana literature from 1920s through Great Depression and World War II, ending with Chicana/Chicana civil rights movement. Oral and written narratives by writers including Conrado Espinoza, Jovita González, Chefas Jaramillo, Angelico Chávez, Mario Suárez, Oscar Acosta, and Evangelina Vigil. P/NP or letter grading.

M105C. Chicana/Chicana Literature since El Movimiento, 1970s to present. (5) (Formerly numbered M105C.) (Same as Chicana and Chicano Studies M105C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicana literature since 1970s, with particular emphasis on how queer and feminist activism as well as Central and South American migration have shaped 21st-century Chicana/o, Latina/o, gay, lesbian, queer, and feminist Chicana/o cultures. Oral, written, and graphic narratives of poetry, and drama by writers including John Rechy, Gloria Anzaldúa, Los Broz Hernández, Ana Castillo, and Dagoberto Gilb guide exploration of queer and feminist Chicana/o, Reagonista, immigration, immigration, and emerging Latina/Latino majority. P/NP or letter grading.

M105D. Introduction to Latina/Latino Literature. (5) (Same as Chicana and Chicano Studies M105D.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of U.S. Latina/Latino literature and introduction to its major critical trends, with emphasis on groups of Caribbean, Mexican, South American, and Central American origin. Representative works read in relation to such topics as relationship between Latina/Latina populations and U.S. cultural sphere, struggle for self-determination, experiences of exile and migration, border zones, enclaves and language, mes-tizaje and its impact on cultural production. P/NP or letter grading.

M105E. Studies in Chicana/Chicana and/or Latina/Latino Literature. (5) (Same as Chicana and Chicano Studies M105E.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Variable topics course to give students broad introduction to issues and themes in Chicana/Chicana and/or Latina/Latino literature. Topics include border, immigration, revolution, language, gender, and sexualities of diaspora, among others. May be repeated for credit with topic or instructor change. P/NP or letter grading.

106. Studies in Native American and Indigenous Literatures. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of Native American and/or transnational indigenous literary and cultural expressions. Topics may include oral traditions and histories, decolonization and sovereignty, identity and place in comparative perspectives, and multiple genres and forms such as novel, poetry, drama, visual arts, dance, song, and film. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M107A. Studies in Women's Writing. (5) (Formerly numbered M107C.) (Same as Women's Studies M107A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Focus on women writers that may include historical, regional, national, or thematic emphases, with possible topics such as authorship, self-writings, gender, and genre. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M107B. Studies in Gender and Sexuality. (5) (Same as Women's Studies M107B) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Examination of literary and cultural production through lens of gender and sexuality. Depending on instructor, emphasis may be historical, regional, national, comparative, or thematic. May be repeated for credit with topic or instructor change. P/NP or letter grading.

109. Topics in Race, Ethnicity, Gender, and Sexualitity Studies. (5) (Not same as course 109 prior to Fall Quarter 2011) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of literary, cultural, and/or cinematic texts produced by people from different ethnic and religious backgrounds and providing comparative cultural perspectives on living in multilingual societies. May be repeated for credit with topic or instructor change. P/NP or letter grading.

110. Interracial Encounters. (5) (Formerly numbered 178BS.) Lecture, four hours; discussion, one hour (when scheduled). P/NP or letter grading.

111A. Topics in Biblical Literature. (5) (Formerly numbered 108BC.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Recommended: course 111A or 111B. Study of topics in Hebrew Bible and/or New Testament. May be repeated for credit with topic or instructor change. P/NP or letter grading.

112A. Oral Tradition. (5) (Formerly numbered 111A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of myth, dramatic origins, oral epic, folktale, song, and story. P/NP or letter grading.

112B. Celtic Mythology. (5) (Formerly numbered 111D.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Celtic traditions of modern Ireland, Scotland, and other Celtic countries, with attention to colonial and postcolonial issues and folkloristic methods. P/NP or letter grading.

113A. History of English Language. (5) (Formerly numbered 121.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of early textual materials pertaining to Celtic peoples and their stories, with emphasis on techniques of mythological analysis. P/NP or letter grading.

112C. Survey of Medieval Celtic Literature. (5) (Formerly numbered 111E.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Knowledge of Irish or Welsh is helpful. General course dealing with Celtic literature from earliest times to 14th century. P/NP or letter grading.

112D. Celtic Folklore. (5) (Formerly numbered 111F.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to oral and written forms. May be repeated for credit with topic or instructor change. P/NP or letter grading.

113B. Introduction to Structure of Present-Day English. (5) (Formerly numbered 122.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Introduction to techniques of linguistic description as applied to pronunciation, vocabulary, and parts of speech. P/NP or letter grading.

114. Lyric Histories. (5) (Not same as course 114 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Exploration of lyric poetry in English across centuries. Topics may include historical evolution of aesthetic forms, changing concepts of dramatic personae, matter of literary influence, and complex relationship of individual lyric speakers with their social and historical contexts. May be repeated for credit with topic or instructor change. P/NP or letter grading.

115A. American Popular Literature. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Examination of such popular styles and genres as sentimental literature, sensation fiction, dime novels, crime stories, pornography, science fiction, supernatural tales, Hollywood novels, and other kinds of mass literary expression. P/NP or letter grading.

115B. British Popular Literature. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Readings in literature of British masses, from 18th-century beginnings to contemporary novels. Emphasis on social and cultural aspects of literature. P/NP or letter grading.

115C. Literature for Children and Adolescents. (5) (Formerly numbered 111C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of historical backgrounds and development of types of children's literature, folklore and oral tradition, criticism, illustration,
and bibliography and/or analysis and evaluation of literature intended mainly for students in junior and senior high school grades. P/NP or letter grading.

115D. Detective Fiction. (5) (Formerly numbered 117.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of detective fiction and topics in literary and critical theory. P/NP or letter grading.

115E. Science Fiction. (5) (Formerly numbered 116.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of science fiction and speculative literature. P/NP or letter grading.

116A. Experimental Fiction. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Overview of literatures involving digital technology, such as hyperfiction, hypertexts, critical theory, and interpretation. Topics may include Marxian, structuralism, poststructuralism, and theories of narrative, and may not be repeated for credit. P/NP or letter grading.

116B. Introduction to Electronic Literature. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of electronic literature in English dealing with exploration, settlement, and emergent cultural awareness of Western U.S. P/NP or letter grading.

118A. Interdisciplinary Studies in Literature. (5) (Formerly numbered 109.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of literature in English in relation to other disciplines such as sciences, history, politics, philosophy, music, photography, visual studies, psychology. May be repeated for credit with topic or instructor change. P/NP or letter grading.

118B. Literary Theory. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Investigation of relationship to literature to other more or other arts, including musical theory, popular music, jazz, painting, photography, other visual arts, sculpture and other plastic arts, performance art, dance, architecture. Topics vary and may include not only English literature but foreign literature in translation. May be repeated for credit with topic or instructor change. P/NP or letter grading.

118C. Studies in Visual Culture. (5) (Formerly numbered 118.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of visual images (photography, film, video) and their relation to literary and/or popular culture. Topics include adaptation, visual analysis, word and image, image and culture, film and visual culture. May be repeated for credit with topic or instructor change. P/NP or letter grading.

119. Literary Cities. (5) (Not same as course 119 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Exploration of place of literary imagination in making of cities, with focus on questions of PPNP exchange, development, migration, urban rebellion, and style. Topics may include meaning of urban space and time, city as urban village or cosmopolitan hub, segregated dystopia or postmodern future, tourism, and migration in making of cities. May be repeated for credit with topic or instructor change. P/NP or letter grading.

120. History of Aesthetics and Critical Theory. (5) (Formerly numbered 140A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. Investigation of texts and ideas in history of aesthetics, critical theory, and interpretation from Greeks through 18th century. Readings may include Greek philosophers, Biblical hermeneutics, Hume, Descartes, Kant, Schiller, and Hegel. May not be repeated for credit. P/NP or letter grading.

121. Modern and Contemporany Aesthetics and Critical Theory. (5) (Not same as course 121 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. Investigation of some dominant trends in 19th- and 20th-century aesthetics, critical theory, and interpretation. Topics may include Marxian, psychanalyses, structuralism, poststructuralism, and theories of narrative, and may not be repeated for credit. P/NP or letter grading.

122. Keywords in Theory. (5) (Not same as course 122 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. Recommended: courses 120, 121. Taking its model from Raymond Williams’ classic vocabulary of culture and society, investigation of fundamental theoretical concepts, or key words, that have developed in the intellectual disciplines to shape literary and cultural studies. Consideration of lexical development of such keywords; how they alter and enrich assumptions about textuality, readers, and authority. Enforced requisite: courses 10A, 10B, 10C. Recommended: courses 10A, 10B, 10C. Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. P/NP or letter grading.

123. Theories of History and Historicism. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. Recommended: courses 120, 121. Exploration of theories of history and historicist approaches to literary texts. Investigation of how theorists negotiate between abstract concepts of history and situated historical narratives, how histories are constructed, troped, and given authority, how histories constitute past and present in relationship to each other to stabilize tradition or induce change, and complex ways that literary texts operate within and on their historical contexts. May be repeated for credit with topic or instructor change. P/NP or letter grading.

124. Theories of Religion. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. Recommended: courses 120, 121. Examination of relationship between literary and religious practices and traditions. Topics may include legacies of monotheisms, theories of sacrifice, sacrament, gift, and mystical traditions, as well as history of allegory and theological approaches to reading. Selected topics may address literary applications of religious categories as treated in cultural anthropology, philosophy, and critical theory. May be repeated for credit with topic or instructor change. P/NP or letter grading.

125. Violence in Cultural Theory and Literature. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Study of violence in literary, philosophical, religious, and psychological texts. How literature justifies that theorization of political traditions, as well as history of allegory and theological approaches to reading. Selected topics may address literary applications of religious categories as treated in cultural anthropology, philosophy, and critical theory. May be repeated for credit with topic or instructor change. P/NP or letter grading.

126. Feminist and Queer Theory. (5) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M126.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Recommended: courses 102, 103, or 104. Investigation of key concepts and debates in study of gender, sexuality, and kinship, with focus on their interrelated significance for making of culture. Readings to be interdisciplinary. Emphasis may be on impact of changing ideas of gender and sexuality on specific historical cultures. May be repeated for credit with topic or instructor change. P/NP or letter grading.

127. Performance, Media, and Cultural Theory. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. Recommended: courses 120, 121. Examination of concepts and modes of performance, culture, and media, broadly construed. Evaluation of different modes of inquiry are demanded in advanced courses, as well as their interaction, in various intellectual traditions, including fields of cultural studies, performance studies, literary analysis, and film theory. May be repeated for credit with topic or instructor change. P/NP or letter grading.

128. Postcolonial and Transnational Theory. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. Recommended: courses 120, 121, 130, 131. Enforced requisite: courses 10A, 10B, 10C. Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. May not be repeated for credit with topic or instructor change. P/NP or letter grading.

129. Topics in Genre Studies, Interdisciplinary Studies, and Critical Theory. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. May not be repeated for credit with topic or instructor change. P/NP or letter grading.

130. Introduction to Postcolonial Literatures. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. May not be repeated for credit with topic or instructor change. P/NP or letter grading.

131. Studies in Postcolonial Literatures. (5) (Formerly numbered 169B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: course 10A, 10B, 10C. May not be repeated for credit with topic or instructor change. P/NP or letter grading.

132. Culture and Imperialism. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. May not be repeated for credit with topic or instructor change. P/NP or letter grading.

133. Transatlantic Literatures and Cultures. (5) (Formerly numbered 133 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: courses 10A, 10B, 10C. May not be repeated for credit with topic or instructor change. P/NP or letter grading.
Nationalism and Transnationalism. (5) Not same as course 134 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Examination of how critical frameworks of nation and migration, transnationalism and globalization, and traditional nationalist and postcolonial analysis of literary works, especially American, consider the particular relationship between literature and national identity. Other topics include nation building in relationship to regional identities as well as discourses of national expansion, diaspora, resettlement, and exile and foundational narratives of nation in relationship to representations of mobility. Genres may include epic, romance, travel narrative, novel, and autobiography. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Literature of America. (5) Not same as course 135 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Survey of literatures of Americans, with emphasis on complex ways in which letters of North America, Central America, South America, and Caribbean forge distinctly American perspectives on global affairs. Spans literature from age of encounter to 19th-century U.S. American revolution and Latin American independence movements and beyond. Explores topics as empire, colonialism, slavery, transnational dynamics, and cross-cultural transformations among indigenous, European, and African civilizations. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Creative Writing: Poetry. (5) (Formerly numbered 133.) Seminar, three or four hours. Enrolled students of English Composition 3 or 3H, English 4W or 4HW are allowed to enroll in writing of poetry, with practice in standard forms and meters and study of techniques. Classroom discussion based on student work. Enrollment in more than one section per term not permitted. May be repeated for maximum of 15 units. No more than 10 units may be completed with same instructor. P/NP or letter grading.

Creative Writing: Short Story. (5) (Formerly numbered 134.) Seminar, three or four hours. Enrolled students of English Composition 3 or 3H, English 4W or 4HW. Three average-length stories to be completed each term. Some stories may, with instructor’s consent, be substantial revisions of other stories presented. Classroom discussion based on stories presented. Enrollment in more than one section per term not permitted. May be repeated for maximum of 15 units. No more than 10 units may be completed with same instructor. P/NP or letter grading.

Creative Writing: Screenplay. (5) Seminar, three hours. Enrolled students: English Composition 3 or 3H, English 4W or 4HW. Introductory workshop in writing of screenplays, with practice in writing of personal screenplays. Readings to be in screenplay form and theory as well as published screenplays. Weekly writing assignments, student critiques, and experiments in performance. Students expected to complete one full treatment and first 10 pages of one feature. Enrollment in more than one section per term not permitted. May be repeated for maximum of 15 units. No more than 10 units may be completed with same instructor. P/NP or letter grading.

Individual Authors. (5) (Formerly numbered 110.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled students: English Composition 3 or 3H. Specialized study of work of one single poet, dramatist, prose writer, or novelist. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Chaucer: Canterbury Tales. (5) (Formerly numbered 141A.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Intensive study of Chaucer’s works, including Canterbury Tales. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Chaucer: Troilus and Criseyde and Selected Minor Works. (5) (Formerly numbered 141B.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Intensive study of Troilus and Criseyde and selected minor works of Chaucer, such as Book of the Duchess, House of Fame, Parliament of Fowls, etc. P/NP or letter grading.

Early Medieval Literature. (5) (Formerly numbered 150A.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Major poetry and prose of early medieval Britain, including animal epic, secular works, knights’ lives, and travel literature. Texts and topics include Beowulf, Vikings, poems on women, Bede, and King Alfred. P/NP or letter grading.

Later Medieval Literature. (5) (Formerly numbered 150B.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Reading and historical explication of major writers of later medieval literature. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Drama to 1576. (5) (Formerly numbered 150.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. English drama from its Latin and Anglo-Norman roots to opening of first public playhouse. P/NP or letter grading.

Medieval Romance and Literatures of Court. (5) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Investigation of medieval court culture, exploring concepts of nobility, royalty, and power in range of genres: romance, courtly epic, lyric, debate, and satire. Texts may include Beowulf, Laos of Marie de France, Sir Gawain and Green Knight, Pearl, and Malory’s Morte Arthure. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Medieval Literatures of Devotion and Devissent. (5) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Exploration of devotional genres and their complex relationships with traditions of dissent in medieval English culture, encompassing hagiography, vision, conversion narratives, heretical dispute (when and Lollard manifest and translations. Texts may include Dream of Rood, South English Legendary, Ancrene Wisse, Piers Plowman, Lollard writings, macro-plays, Wakefield cycle, Showings of Julian of Norwich, and Book of Margery Kempe. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Medieval Story Cycles and Collections. (5) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Exploration of medieval story cycles and story collections as narrative forms. Medieval story cycles engage in complex literatue across medieval cultures, periods, genres, and languages, while story collections often stage art of storytelling within narrative frame to exhibit about powers of literary product. May be repeated for credit with topic as gathered of Matter of Britain, Matter of Rome, or Matter of France, also Malabigoni, manuscript collections such as Aucunchel manuscript or Exeter book, framed narratives such as Decameron, Canterbury Tales, 1001 Nights, and Gower’s Confessio Amantis, or collections of ex elems, legends, and diacts. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Medieval Histories, Chronicles, and Records. (5) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Exploration of medieval history writing traditions and medieval histories survive in every language of medieval Britain, including Latin, Old English, Welsh, Irish, Anglo-Norman French, and Middle English. Multilingual ubiquity of history writing points to pressures of history on history writing — histories are always shaped by political, cultural, linguistic, and textual pressures. May be repeated for credit with topic as gathered histories, chronicles, material records, and historiographically engaged texts. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Cultures of Middle Ages. (5) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Interdisciplinary survey of particular medieval societies, with special emphasis on complex interactions between different ethnic and cultural traditions of medieval world. Examination of processes of intercultural encounter and transmission: classical or patrician traditions into medieval culture, crusade, travel literature, and literature of contact zones, including interactions between Celtic, Arabic, and Norse societies, and discussions between Pagans, Jews, Christians, and Muslims. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Medievalisms. (5) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Exploration of postmedieval production of Middle Ages as period for scholarly study, technical premodern other to modern and contemporary, and academic and commodity continually reinvented by postmedieval writers, artists, and popular media. Topics may include 19th-century production of medieval studies and its links to nationalism, notable medievalists and their work, and uses of Middle Ages in popular culture from Umberto Eco to Tolkien, Robin Hood, Arthur, and Merlin. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Shakespeare: Poems and Early Plays. (5) (Formerly numbered 142A.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Intensive study of selected poems and early plays, with topics, and tragedies through Hamlet. P/NP or letter grading.

Shakespeare: Later Plays. (5) (Formerly numbered 142B.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Intensive study of representative problem plays, major tragedies, Roman plays, and romances. P/NP or letter grading.

Topics in Shakespeare. (5) (Formerly numbered 142C.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Study of major works of Milton, with emphasis on Paradise Lost. P/NP or letter grading.

Literatures of English Renaissance and Early Modern Period. (5) (Formerly numbered 151.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Study of major works in their cultural context. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Theatrical Renaissance: Early Modern Texts and Performances. (5) (Formerly numbered 152B.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Topics may include professional and amateur performances in court, cities, churches, and countryside of varied sorts of texts — masques, religious drama, secular drama, charivari — alongside examination of tests, performers, and performance spaces from 1509 to 1642. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Renaissance Worlds. (5) (Not same as course 154 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Study of major works in their cultural context. May be repeated for credit with topic or instructor change. P/NP or letter grading.

Renaissance Subjects. (5) (Not same as course 155 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enrolled requisites: courses 10A, 10B. Discussion of limitations of personhood in early modern period, with attention to issues such as personal voice, relations of privacy/community, bodily/soulselves, others/as, as impacted by quotients such as gender, sexuality, race, and eth-
nicity as they are understood in period from 1500 to 1700. May be repeated for credit with topic or instructor change. P/NP or letter grading.

156. Devotion and Dissent. (5) Not same as course 156 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Examination of religious thought and practice with Reformation and Counter-Reformation enterprises in early modern period and consideration of how various types of writing — prayers, prayer books, sermons, historical chronicles, essays, treatises, apologists, biographies, etc. — reflect and address religious ferment of era. Coverage of either broad historical range such as from Henry VIII’s break with Rome to execution of Charles I or one specific topic such as women’s spirituality, philosophical exegesis, and the devotional literature of the late Renaissance and early modern period. May be repeated for credit with topic or instructor change. P/NP or letter grading.

157. Translation and Innovation in English Renaissance and Early Modern Period. (5) Not same as course 157 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of major works of English literature written in English or Latin and translated into English from Latin and Greek in relation to literatures of antiquity and continental Renaissance. Topics may include epic tradition, forerunners of novel, Renaissance humanisms, literature of love, monsters, representations of nature, Ovidian transformations. May be repeated for credit with topic or instructor change. P/NP or letter grading.

159. Topics in Literature, circa 1500 to 1700. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of periods and topics. May be repeated for credit with topic or instructor change. P/NP or letter grading.

160A. Literature of Restoration and Earlier 18th Century. (5) Formerly numbered 154.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of major works or works as literary documents and as products of Restoration and earlier 18th-century thought. P/NP or letter grading.

160B. Literature of Later 18th Century. (5) Formerly numbered 155.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of major works as literary documents and as products of later 18th-century thought. P/NP or letter grading.

161A. Poetry in English to 1850. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Considers poetry across genres and throughout period. Topics may include rise of satire, verse forms including Pindaric ode, mock-epic, and verse-epistle, questions of literary identity, and poetry’s role in politics, empire, and gender. May be repeated for credit with topic or instructor change. P/NP or letter grading.

161B. Drama in English to 1850. (5) Formerly numbered 156.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Survey of drama in English until 1850. May be repeated for credit with topic or instructor change. P/NP or letter grading.

161C. Novel in English to 1850. (5) Formerly numbered 157.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Survey of novel across novella to 1850. May be repeated for credit with topic or instructor change. P/NP or letter grading.

162A. Earlier Romantic Literature. (Formerly numbered 161.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Intensive study of writings by Blake, Wollstonecraft, W. Wordsworth, Coleridge, and Austen, with collateral readings from such authors as Godwin, Burke, Paine, St. Clair, Moore, Peacock, Landon, H. Hermsen, and Prince. P/NP or letter grading.

162B. Later Romantic Literature. (Formerly numbered 162.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Exploration of relationships among and between different revolutionary currents — political, economic, and aesthetic — in British Romantic period, developing readings of literary texts that situate them in revolutionary context out of which they emerged, and to which they contributed in turn. Recovery of sense of how literary and extra-literary texts emerged in common relationship; development of broader understanding of nature, Romanticicism and itself. Readings from work of Blake, Wordsworth, Coleridge, Southey, Austen, Byron, Keats, Wollstonecraft and others. May not be repeated for credit. P/NP or letter grading.

163B. Transatlantic Romanticism. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Transatlantic studies have been central in generating new conceptual frameworks for thinking through complex issues related to interconnectedness of Atlantic rim cultures. With focus on ways in which cultures, ideologies, and political identities are reworked and reinscribed by transatlantic movement of peoples, ideas, and cultural artifacts, expansion of notions of Romanticism to include transatlantic perspectives that understand early 19th-century poems, criticism and fiction (Milton, Blake, Wollstonecraft) as phenomenon. May not be repeated for credit. P/NP or letter grading.

163C. Jane Austen and Her Peers. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of major works written in English during early 19th century. Focus on evolution of genre in relation to cultural, social, political identities and the connections and developments of the period. May be repeated for credit with topic or instructor change. P/NP or letter grading.

164.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Introduction to American literatures of discovery, exploration, contact, and settlement, with emphasis on genres that express distinctive political identities and religious visions. P/NP or letter grading.

166B. American Literature, 1877 to 1832. (5) Formerly numbered 170B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of American fiction (both novels and short stories) from Revolution through early republic, with emphasis on genres that reflect systematic attempts to create representative national literature and attention to American literary and political developments. P/NP or letter grading.

166C. American Literature, 1832 to 1865. (5) Formerly numbered 171A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Historical survey of American literatures from Jacksonian era to end of Civil War, including emergence of new forms of American literary culture, political currents — political, economic, and aesthetic influences — and the development of American Romanticism. May be repeated for credit. P/NP or letter grading.

167A. American Poetry to 1900. (5) Formerly numbered 174A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of American poetic traditions and the role of the poet in American society through the period of 19th century. Includes mainly works that have been considered central in American literature and peripheral spaces were transformed beyond recognition in this period. Particular attention to representation of American ethnic, gender, and postcolonial perspectives. P/NP or letter grading.

167B. American Fiction to 1900. (5) Formerly numbered 173A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Study of American fiction (both novels and short stories) from its beginnings to early 19th century. P/NP or letter grading.

168. Major American Writers. (5) Not same as course 168 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Broad survey of representative American writers across several centuries, designed to give concise account of broad narrative of American literary development. May be repeated for credit. P/NP or letter grading.

169A. American Poetry, 1776 to 1832. (5) Formerly numbered 170A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B. Broad survey of representative American poets and their poems from Revolution through early republic. May be repeated for credit. P/NP or letter grading.
169. Topics in Literature, circa 1700 to 1850. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of American drama and the Continental influence from 1850 through World War II. P/NP or letter grading.

170A. American Literature, 1865 to 1900. (5) (Formerly numbered 171B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Historical survey of American literature from turn of century to end of World War II. P/NP or letter grading.

170B. American Literature, 1900 to 1945. (5) (Formerly numbered 172A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of American poetry, mostly by living authors, with emphasis on emergent issues and poetic forms. May be repeated for credit with topic or instructor change. P/NP or letter grading.

170C. American Literature since 1945. (5) (Formerly numbered 172B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Development of English poetic genres in relation to significant movements such as modernism, postmodernism, and others working in modes of realist and naturalist novel, lyrical and vernacular prose, and poetry. P/NP or letter grading.

171A. Later 19th-Century Poetry. (5) Not as course 171A prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of American literature from turn of century to end of World War II. P/NP or letter grading.

171B. 20th-Century British Poetry. (5) (Formerly numbered 165.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of American poetry from begin-ning of 20th century, including writers such as Howells, James, and T. S. Eliot. P/NP or letter grading.

172A. Drama, 1850 to 1945. (5) (Formerly numbered 167.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of American drama from turn of century to turn of 20th century. P/NP or letter grading.

172B. Drama, 1945 to Present. (5) (Formerly numbered 168.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of drama in English, with its principal continental influences, since World War II. P/NP or letter grading.

172C. American Drama. (5) (Formerly numbered 176.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of American drama from its beginning to present day. Periodical history may vary with instructor. May be repeated for credit with topic or instructor change. P/NP or letter grading.

173A. American Poetry, 1900 to 1945. (5) (Formerly numbered 174B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of American poetry since end of World War II. P/NP or letter grading.

173B. American Poetry since 1945. (5) (Formerly numbered 174C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of American poetry since beginning of 20th century to end of World War II. P/NP or letter grading.

173C. Contemporary American Poetry. (5) (Not as course 181C prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Examination of literatures from or about this time peri-od. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

174A. American Fiction, 1900 to 1945. (5) (Formerly numbered 173B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of American novels and short stories from beginning of 20th century to end of World War II. P/NP or letter grading.

174B. American Fiction since 1945. (5) (Formerly numbered 173C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of American novels and short stories since end of World War II. P/NP or letter grading.

174C. Contemporary American Fiction. (5) (Not as course 174C prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of American novels and short stories, mostly by living authors, with emphasis on emergent issues and aesthetics. May be repeated for credit with topic or in-structor change. P/NP or letter grading.

175. American Nonfictional Prose. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. Study of American nonfictional prose, autobiographies, travel narratives, and other. May be repeated for credit with topic or instructor change. P/NP or letter grading.

176. Hemispheric American Literature. (5) (Not as course 176 prior to Fall Quarter 2011.) Lecture, four hours; discussion, one hour (when sched-uled). Enforced requisites: courses 10A, 10B, 10C. Study of American literature from hemispheric rather than nation-based perspective. His-tonic breadth in study of American literature while pos-ing such crucial theoretical issues as emergence of U.S. Empire or relationship between North America and global south, including Africa, Latin America, and Caribbean. May be repeated for credit with topic or in-structor change. P/NP or letter grading.

177. Interdisciplinary Studies of American Culture. (5) (Formerly numbered 178A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. May be repeated for credit with topic or instructor change. P/NP or letter grading.

179. Topics in Literature, circa 1850 to Present. (5) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisites: courses 10A, 10B, 10C. May be repeated for credit with topic or instructor change. P/NP or letter grading.

180. Topics in Literature. (5) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

181A. Topics in Genre Studies. (5) (Not same as course 181A prior to Fall Quarter 2011.) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

181B. Topics in Interdisciplinary Studies. (5) (Not same as course 181B prior to Fall Quarter 2011.) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

182A. Topics in Medieval Literature. (5) (Formerly numbered 181A.) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

182B. Topics in Renaissance and Early Modern Liter-ature. (5) (Formerly numbered 181B.) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

182C. Topics in 18th-Century Literature. (5) (For-merly numbered 181D.) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

182D. Topics in Romantic Literature. (5) (Formerly numbered 181E.) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

182E Topics in 19th-Century Literature. (5) (For-merly numbered 181F.) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

183A. Topics in Colonial American Literature. (5) (Formerly numbered 182A.) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

183B. Topics in 19th-Century American Literature. (5) (Formerly numbered 182B.) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

183C. Topics in 20th- and 21st-Century Literature. (5) (Formerly numbered 181G.) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

184. Topics in Imperial, Transnational, and Post-colonial Studies. (5) (Not same as course 184 prior to Fall Quarter 2011.) Seminar, three or four hours. Enforced requisites: courses 10A, 10B, 10C. Consult Schedule of Classes for subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

190H. Honors Research Colloquia in English. (1) Seminar, one hour. Enforced corequisite: course 198A or 198B. Designed to bring together students under-taking supervised tutorial research for departmental
honors in seminar setting with one or more faculty members to discuss their own work in progress and critical readings related to honors projects. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

M191A. Topics in African American Literature. (5) (Formerly numbered M179A.) (Same as Afro-American Studies M179A.) Seminar, three or four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in African American literature. Topics may include Harleimi Renaissance, African American Literature in Nadir, Black Women’s Writing, Contemporary African American Fiction, African American Poetry. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M191B. Topics in Chicana/Chicano and/or Latina/ Latino Literature. (5) (Formerly numbered M179B.) (Same as Chicana and Chicano Studies M139.) Seminar, three or four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in Chicana/Chicano and/or Latina/Latino literature. Topics include labor and literature; Chicana/Chicana visions of Los Angeles; immigration, migration, and exile; cultural geography and externality change; Chicana/Chicana journalism; literary New Mexico; specific literary genres. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M191C. Topics in Asian American Literature. (5) (Formerly numbered M179C.) (Same as Asian American Studies M191F.) Seminar, three or four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in Asian American literature. Topics may include genres (autobiography, novel, poetry, short fiction, or drama); specific nationalities within Asian American community; themes of transnational migration; interdisciplinary, or intrafamilial negotiation; and gender and queer politics. Reading, discussion, and development of culminating project. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M191D. Topics in Queer Literatures and Cultures. (5) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M191D and Women’s Studies M191D.) Seminar, three or four hours. Enforced requisite: English Composition 3 or 3H. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M191E. Topics in Gender and Sexuality. (5) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M191E and Women’s Studies M191E.) Seminar, three or four hours. Enforced requisite: English Composition 3 or 3H. Consult Schedule of Classes for author, period, genre, or subject to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

191H. Honors Research Seminars: English. (5) Seminar, three hours. Enforced requisite: course 140A or 140B. Open only to students who are eligible and apply for honors program in English. Introduction to research techniques and study of various approaches and applications of critical methodology as it relates to interpretation and evaluation of texts. Development and presentation of proposals for honors projects. Consult undergraduate adviser. May be repeated for credit. Letter grading.

193. Colloquia and Speakers’ Series Undergraduate Seminars: English. (1) Seminar, one hour. Limited to undergraduate students. Discussion of current critical literature and/or creative readings by writers, artists, and scholars. Engaged in greater depth of literary topics and creative work presented through sponsored forums, speakers’ series, and colloquia. May be repeated for credit. P/NP grading.

195. Community or Corporate Internships in English. (4) Tutorial, to be arranged. Limited to juniors/seniors. Internship in community agency, education, museum, or art venue, or business. Students meet on regular basis with instructor and provide periodic written reports of their experience. May require analysis and evaluation determined by supervising faculty member. May be repeated for credit. Individual contract with supervising faculty member required. P/NP grading.

195CE. Community and Corporate Internships in English. (4) Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Learning. Students complete written assignments, attend biweekly meetings with graduate student coordinator, and write final research paper. Faculty supervisor and graduate student coordinator construct series of reading assignments that examine issues related to internship site. May be repeated for credit with consent of Center for Community Learning. Individual contract with supervising faculty member required. P/NP grading.

197. Individual Studies in English. (2 to 5) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study with scheduled meetings to be arranged between faculty member and student. Assigned reading and discussion or field experience of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

198A-198B. Honors Research in English. (5-5) Tutorial, four hours. Limited to juniors/seniors. Development and completion of honors thesis under direct supervision of faculty member. May be repeated for credit. Individual contract required. In Progress (198A) and letter (198B) grading.

199. Directed Research or Senior Project in English. (2 to 8) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual literary research and creative projects under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

201A. Criticism and Interpretation from Classical Era to Renaissance. (4) Lecture, three hours. Examination of major texts in history of critical theory and interpretation from pre-Socrates to Descartes, including classical literary theory, ancient Greek thought, and pre-Christian and Christian thought. S/U or letter grading.

201B. Aesthetics and Criticism from Enlightenment to Decadence. (4) Lecture, three hours. Continuation of course 201A, proceeding from neoclassical and Enlightenment critical theory through Victorian and decadent aesthetic and literary criticism. Readings may include texts by Rousseau, Dryden, Pope, Hume, Kant, Schiller, the Schlegels, Coleridge, Hegel, Schelling, Arnold, Pater, Wilde, and Nietzsche. S/U or letter grading.

201C. Developments and Issues in Modern Critical Thought. (4) Lecture. Three hours. Study of major figures and ideas in modern and contemporary critical theory. Readings vary year to year but may include such figures as Freud, Durkheim, Saussure, Heidegger, Shklovsky, Benjamin, Adorno, Levi-Strauss, Lacan, Barthes, Derrida, Deleuze, Fanon, Foucault, Irigaray, Lyotard, Bourdieu, and Bhabha. S/U or letter grading.

203. Computers and Literary Research. (4) Lecture, four hours. Prior knowledge in this area is not required. Practice in using computer programs for analysis of literary style, content, and authorship. S/U or letter grading.

M205A. Studies in Oral Tradition: History and Methods. (4) (Same as Scandinavian M271.) Seminar, three hours. Exploration of scholarly and literary attempts to study, define, analyze, promote, and/or appropriate oral traditions, from Homer and ancient Greece to origins of vernacular literatures, European romantic rediscovery of oral tradition, 20th-century heuristic models of oral composition, and modern-day electronic media and popular verbal genres, such as jokings and rapping. S/U or letter grading.

M205B. Collecting Oral Tradition. (Same as Scandinavian M272.) Seminar, three hours. Description and evaluation of various modern approaches to collecting and documenting oral tradition as text, performance, and sociocultural event. Consideration of approaches ranging from written transcription and textualization to audio and video presentation. S/U or letter grading.

M205C. Studies in Oral Traditional Genres. (4) (Same as Scandinavian M273.) Seminar, three hours. Exploration in depth of variety and history of, and scholarship on, particular oral traditional genre (e.g., ballad, song, epic, proverb, riddle, folktale, legend) or set of closely related oral traditional genres. S/U or letter grading.

211. Old English. (4) Lecture, four hours. Study of Old English grammar, lexicography, phonology, and pronunciation to enable students to read Old English silently and aloud. Reading of as much of more interesting Old English prose and poetry as can be read in one term. S/U or letter grading.

212. Middle English. (4) Lecture, four hours. Requisite course 211. Detailed study of linguistic aspects of Middle English and of representative examples of better prose and poetry. S/U or letter grading.

215. Paleography of Latin and Vernacular Manuscripts, 900 to 1500. (4) (Same as Classics M218, French M210, and History M218.) Lecture, three hours; discussion, two hours. Introduction to history of Latin and vernacular manuscript book from 900 to 1500 to (1) train students to make informed judgments with regard to place and date of origin, (2) provide training in accurate reading and transcription of later medieval scripts, and (3) examine manuscript book as witness to changing society that produced it. Focus on relationship between Latin manuscripts and vernacular manuscripts with regard to their respective presentation of written texts. S/U or letter grading.

230. Workshop: Creative Writing. (2 to 4) Lecture, two to four hours. Preparation: submission of writing samples in poetry, fiction, or drama. May be repeated but may not satisfy more than one of nine courses required for first qualifying examination nor any of five courses required for second qualifying examination. S/U or letter grading.

240. Studies in History of English Language. (4) Lecture, four hours. Individual seminars dealing with any single historical period from Old English period to present or development of one particular linguistic characteristic (phonology, syntax, semantics, dialectology) through various periods. May be repeated for credit. S/U or letter grading.

241. Studies in Structure of English Language. (4) Lecture, four hours. Topics in various aspects of structure of modern English, especially syntax and semantics. May be repeated for credit. S/U or letter grading.

242. Language and Literature. (4) Lecture, four hours. Application of linguistics to literary analysis. Individual seminars dealing with one historical period (medieval and Renaissance, neoclassical, or 19th century and modern), specific authors, or contributions of specific groups of linguists to literary analysis. May be repeated for credit. S/U or letter grading.

244. Old and Medieval English Literature. (4) Lecture, four hours. Studies in poetry and prose of Old and medieval English literature; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

245. Chaucer. (4) Lecture, four hours. May be repeated for credit. S/U or letter grading.

247. Shakespeare. (4) Lecture, three hours. May be repeated for credit. S/U or letter grading.

251. Romantic Writers. (4) Lecture, three hours. May be repeated for credit. S/U or letter grading.

252. Victorian Literature. (4) Lecture, three hours. Studies in English poetry and prose of Victorian period; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

253. Contemporary British Literature. (4) Lecture, three hours. May be repeated for credit. S/U or letter grading.

255. Contemporary American Literature. (4) Lecture, three hours. Studies in contemporary American poetry and prose; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

256. Studies in Drama. (4) Lecture, three hours. Studies in drama as genre from its beginning to present; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

257. Studies in Poetry. (4) Lecture, three hours. Studies in various themes and forms of poetry from Old English to present; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

258. Studies in Novel. (4) Lecture, three hours. Studies in evolution of genre from its beginning to present; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

259. Studies in Criticism. (4) Lecture, three hours. May be repeated for credit. S/U or letter grading.

260. Studies in Literature and Its Relationship to Arts and Sciences. (4) Lecture, three hours. Studies in interrelationships of literature, art, and sciences; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

M260A. Topics in Asian American Literature. (4) (Same as Asian American Studies M256A.) Seminar, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. May be repeated for credit. S/U or letter grading.

261. Studies in Chicana/Chicano Literature. (4) Seminar, three hours. Intensive research and study of major themes, authors, and issues in Chicana/Chicano literature and culture. Examination of political, aesthetic, economic, and cultural context that emerges in Chicana/Chicano discourse; limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

262. Studies in Afro-American Literature. (4) (Same as Afro-American Studies M200E.) Lecture, four hours. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit. S/U or letter grading.

263. Celtic Literature. (4) Lecture, three hours. Preparation: knowledge of one ancient or modern Celtic language (Irish, Welsh, Old Irish, or modern Celtic languages, chiefly Irish and Welsh); limits of investigation set by individual instructor. May be repeated for credit. S/U or letter grading.

264. Studies in Rhetoric. (4) Lecture, three hours. Special topics in classical and modern rhetoric, including substantial practice in rhetorical analysis of literary texts. May be repeated for credit. S/U or letter grading.

265. Postcolonial Literatures. (4) Seminar, three hours. Study of aesthetic, historical, and social backgrounds to literatures of former British colonies that became independent after 1947. General issues related to way imperialism, colonialism, and postcolonialism have helped shape and have been shaped by literature in English. May be repeated for credit. S/U or letter grading.

M266. Cultural World Views of Native America. (4) (Same as American Indian Studies M200B.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey from secondary sources of interdisciplinary methodology. All approaches taken from literary analysis, social anthropology, folklore, linguistics, and ethnomusicology. May be repeated for credit with instructor and topic change. Letter grading.

272. Current Issues in Teaching English. (4) Seminar, four hours. Focus on one of variety of topics of special current interest. May be repeated for credit. S/U or letter grading.

M299. Directed Individual Study. (2 to 4) Tutorial, to be arranged. Limited to students preparing for first qualifying examination or engaging in intensive directed research project. May not be applied toward any course requirement for degree. Consult graduate counselor to enroll or obtain information. S/U or letter grading.

599. Ph.D. Dissertation Research. (4 to 8) Tutorial, to be arranged. Limited to Ph.D. students unable to enroll in seminars in their fields or to students concurrently enrolled in such seminars. (Exception to this rule must be requested by petition.) S/U grading.

### Box 951772

UCLA
School of Public Health

## The Department of Environmental Health Sciences

The department offers M.S. and Ph.D. degrees in Environmental Health Sciences and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in environmental health sciences (see Public Health Schoolwide Programs). In addition, a unique doctoral degree (Doctor of Environmental Science and Engineering — D.Env.) is offered by the interdepartmental Environmental Science and Engineering Program which is administered through the department. The interdepartmental Molecular Toxicology Program also offers a Ph.D. degree.

## Graduate Study

## Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasalibrary/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduation Degrees

- The Department of Environmental Health Sciences offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Environmental Health Sciences.

## Environmental Health Sciences

### Upper Division Courses

**100. Introduction to Environmental Health.** (4) Lecture, three hours; discussion, one hour. Preparation: one year each of chemistry, physics, and biology. Basic principles of environmental health and their potential impact on human health. Environmental health policies and their implications for public health. May be repeated for credit. Concurrently scheduled with course C125. P/NP or letter grading.

**C125. Atmospheric Transport and Transformations of Airborne Chemicals.** (4) Lecture, four hours. Preparation: one year each of calculus, one course each in physics, organic chemistry, and physical chemistry. Designated for science, engineering, and public health students. Role of regional or long-range transport, and atmospheric lifetimes and fates of airborne chemicals in phenomena such as photochemical smog. Acid deposition, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds. Concurrently scheduled with course C225. P/NP or letter grading.

**C135. Environmental Policy for Science and Engineering.** (4) Lecture, four hours. Limited to seniors and graduate and graduate students. Examination of theoretical underpinnings of several major types of regulatory policy, as well as practical issues involved in implementing and enforcing performance standards and permitting. May be repeated for credit. Concurrently scheduled with course C235. P/NP or letter grading.

**C140. Fundamentals of Toxicology.** (4) Lecture, four hours. Preparation: one course each in biology, organic chemistry, and biochemistry. Essential aspects of toxicology, with emphasis on human species. Absorption, distribution, excretion, and biotransformation. May be repeated for credit. Concurrently scheduled with course C240. Letter grading.

**C152D. Properties and Measurement of Airborne Particles.** (4) Lecture, four hours. Preparation: one year each of chemistry, physics, and mathematics. Basic theory and application of aerosol science to environmental health, including properties, behavior, sampling, and measurement of aerosols and quantitative problems. Concurrently scheduled with course C252D. P/NP or letter grading.

**C157. Risk Assessment and Standard Setting.** (4) Seminar, four hours. Requisite: course C140. Epidemiology 100. Designed to provide students with opportunity to review scientific basis for association of selected occupational and environmental exposures with disease. Special emphasis on critical evaluations of literature. Attention specifically to interface of science and regulatory standards. Concurrently scheduled with course C257. P/NP or letter grading.

**C164. Fate and Transport of Organic Chemicals in Aquatic Environment.** (4) Lecture, four hours. Requisite: course C140. Designed to provide students with understanding of processes and mechanisms that influence the mobility and persistence of organic chemicals in aquatic environments. Concurrently scheduled with course C264. P/NP or letter grading.

**C166. Environmental Microbiology.** (4) (Same as Civil Engineering M166L.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course Civil Engineering 153. Microbial metabolism and its metabolic capabilities, microbial genetics and its potentials, growth of microbes and kinetics of growth, microbial ecology and diversity, microbiology of wastewater treatment, probing of microbes, public health microbiology, pathogen control. Letter grading.

**M166L. Environmental Microbiology and Biotechnology Laboratory.** (1) (Same as Civil Engineering M166L.) Laboratory, two hours; outside study, two hours. Concurrently scheduled with course M166. General laboratory practice within environmental microbiology, sampling of environmental samples, classical and modern molecular techniques for enumeration of microbes from environmental samples, techniques for determination of microbial activity in environmental samples, laboratory setups for studying environmental biotechnology. Letter grading.

**C180. Principles of Nanobiological Interactions and Nanotoxicology.** (4) Lecture, four hours. Requisite: basic understanding of biology and chemistry at level required for admission to University of California at undergraduate level in environmental, physical, or natural sciences. Introduction to commonly used vocabulary in nanoscience required to appreciate biological interactions and potential toxicity of nanomaterials. Discussion of synthesis and physical-chemical characterization of engineered nanomaterials. Development of understanding of unique properties of engineered nanomaterials and how these properties contribute to biological interactions. Relation of properties of engineered nanomaterials to their potential for transport, reactivity, uptake, and toxicity in natural environments and in body. Concurrently scheduled with course C280. P/NP or letter grading.

**197. Individual Studies in Environmental Health Sciences.** (2 to 4) Tutorial, four hours. Limit to juniors/seniors. Individual intensive study, with schedule of meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.
Graduate Courses

200C. Case Studies in Environmental Health Sciences. (2) Lecture, two hours. Requisites: courses C200A, C200B. Environmental and public health challenges of 21st century are changing so quickly and are so interdigitated with social, resource, economic, and global issues that it becomes necessary for environmental health professionals to be able to operate comfortably within contextual boundaries and under pressures of real-time decision making. Examination of headlines of last 12 months that offer examples of managing change and crisis. Letter grading.

203. Seminar: Ecotoxicology. (2) Seminar, two hours. Discussion of various topics in ecotoxicology. Topics vary from term to term and include aspects of environmental health, toxicology, and ecology. May be repeated for credit. S/U grading.

204. Seminar: Exposure Assessment. (2) Seminar, two hours. Discussion of various topics in exposure asessment. Topics vary from term to term and include aspects of environmental health, toxicology, and ecology. May be repeated for credit. S/U grading.

205. Environmental Health Sciences Doctoral Seminar. (2) Seminar, two hours. Limited to environmental health sciences doctoral students. Presentation of current research of environmental health sciences doctoral students. May be repeated for credit. S/U grading.

207. Introduction to Geographic Information Systems. (4) Lecture, two hours; laboratory, two hours. Introduction to geographic information systems (GIS), including use of GIS software, mapping, geocoding, and data analysis. S/U or letter grading.

208. Built Environment and Health. (4) Lecture, three hours; discussion, one hour. Limited to public health majors. Multidisciplinary, the course provides a multidisciplinary course on built environment and health and breaking down silos. U.S. and other developed, as well as developing, countries are facing increasing lethal and costly epidemics of acute and chronic diseases related to land use and built environment decisions. While hazards presented by air and water pollution are well recognized for acute, infectious, and toxicological illnesses, there is increasing recognition of hazards presented by building and community designs that fail to recognize human health. Land use and built environment decisions are age group and geographic and racial minority. Impacts range from very acute (motor vehicle trauma) to long term (obesity, cancer, heart disease). Decisions have as their bases economic, financial, and social factors, as well as public health, and other factors. Analysis of each factor and related disease endpoints. S/U or letter grading.

209. Practical Applications in Environmental Health Sciences. (2) Lecture, two hours. Enforced requisites: courses C200A, C200B. Description of many leading environmental and occupational health problems that environmental health practitioners face today, conducted as series of lectures, assignments, handson-field projects, to help students develop skills necessary to integrate concepts across disciplines in field of environmental health. May satisfy some requirements needed to qualify for Registered Environmental Health Specialist (REHS) certification. S/U or letter grading.

211. Epidemiological Methods in Violent Injury. (4) (Same as Epidemiology M252.) Lecture, four hours. Requisites: Epidemiology 200A, 200B, and 200C (or 100). Description and critical evaluation of epidemiological methods in approaches to understanding incidence risk factors and prevention strategies of violence and violence-related injury. Letter grading.

214. Children’s Environmental Health: Prenatal and Postnatal. (4) Lecture, four hours. Preparation: one year each of chemistry and biology. Examination of how environmental exposures to chemical, physical, and biological agents during period of maturation (from fertilization to adulthood) cause pathophysiological perturbations in homeostasis at any stage during life. Letter grading.

220. Public Health Microbiology. (4) (Same as Epidemiology M225.) Lecture, four hours. Preparation: introductory microbiology. Requisites: Epidemiology 200A, 200B, and 200C (or 100). Corequisite: course M225L. Role of public health laboratory is to support testing needs of programs. To successfully fulfill this role, laboratory must provide information based on most sensitive and specific technologies available. Coverage of common infectious disease agents of public health importance and definition of impact of molecular biology on disease detection and epidemiology in modern public health laboratory. S/U or letter grading.

225. Atmospheric Transport and Transformations of Airborne Chemicals. (4) Lecture, four hours. Preparation: one year of calculus, one course each in physics, organic chemistry, and physical chemistry. Designed for science, engineering, and public health students. Role of regional or long-range transport, and atmospheric physics, chemistry, and geophysics. Impacts of pollutants in phenomena such as photochemical smog, acid deposition, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds. Concurrently scheduled with course C125. S/U or letter grading.

225S. Atmospheric Transport and Transformations of Airborne Chemicals. (3) (Formerly numbered 225S.) Lecture, four hours. Limited to course; only for graduate, nonthesis, students. Examination of theoretical underpinnings of several major types of regulatory policy, as well as practical issues involved in implementing and enforcing each. Emphasis on interactions and interrelationships, which takes forms from various disciplines and viewpoints. Focus on traditional command and control regulation (including self-executing performance standards and permitting), market-based regulatory approaches (such as emissions trading), remediation, and emerging regulatory approaches such as management-based regulation and alternatives assessment. Issues of compliance and enforcement. Concurrently scheduled with course C125S.

C240. Fundamentals of Toxicology. (4) (Formerly numbered 240C.) Lecture, four hours. Preparation: one course each in biology, organic chemistry, and biochemistry. Essential aspects of toxicology, with emphasis on human species. Absorption, distribution, excretion, biotransformation, as well as basic toxicologic processes and organ systems. Concurrently scheduled with course C240L. Letter grading.

M242. Toxicodynamics. (Same as Molecular Toxicology M242.) Lecture, one hour; discussion, one hour. Preparation: undergraduate biology and chemistry courses. Requisite: course C240. Examination of range of factors on mechanisms and outcomes. Focus on understanding of toxins, dose-response, genetics, toxicodynamics. Student presentation of papers selected by instructor on various aspects of toxic mechanisms, including free radical mechanisms, mechanisms of cell death, metal toxicity/toxicology, intracellular pH and calcium regulation, stress and adaptive pathways, DNA repair/mutagenesis, carcinogenesis, and teratogenesis. Discussion of various papers. S/U or letter grading.

M245. Laboratory in Toxicological Methods. (2) (Same as Molecular Toxicology M245 and Pharmacology M245C.) Lecture, one hour; laboratory, four to five hours. Survey of essential techniques used in study of toxic substances. Experiments conducted within known toxicant to demonstrate its effect at molecular, cellular, and tissue levels. Presentation of principles of techniques and methods of data analysis in discussion session prior to laboratory. Letter grading.

M246. Molecular Toxicology. (4) (Same as Molecular Toxicology M246.) Lecture, four hours. Enforced requisite: course C240. Fundamental aspects of toxicology required for deep understanding of toxicological processes, with research-oriented outlook. Dissemination of information about important molecular toxicological topics to make students think about them from research perspective. Students will identify and select research areas of molecular toxicology, how to most optimally extract important information from research papers, how to critique papers, how to formulate alternative hypotheses for data in papers, how to formulate ideas for future research, and how to express their ideas effectively in oral settings. Letter grading.

250D. Industrial Hygiene Practice. (2) Seminar, two hours. Requisites: courses C200A, C200B. Presentation of topics that are relevant to current practice of occupational health. Topics include discussions of regulatory framework, risk assessment and risk communication, new legislation, and emergent occupational health issues. S/U grading.

C252D. Properties and Measurement of Airborne Particles (Practical). (4) Lecture, two hours; laboratory, two hours; outside study, two hours. Preparation: one year each of chemistry, physics, and calculus. Basic theory and application of aerosol science to environmental problems, including properties, behavior, sampling, and measurement of airborne particles and quantitative problems. Concurrently scheduled with course C252D. S/U or letter grading.

C252F. Industrial Hygiene Measurements Laboratory. (3) Laboratory, three hours. Corequisites: courses C252D, C252E. Limited to industrial hygiene majors. Laboratory methods for collection and measurement of gases, the analysis of gases, aerosols, and reaction products found in occupational environment. S/U or letter grading.
252G. Industrial and Environmental Hygiene As-
se ssment. (4) Lecture, one hour; discussion, two hours; laboratory, two hours; outside study, four hours. Requisites: courses C200A, C200B, C252D, C252E, C252F. Environmental and industrial hygiene sampling and assessment via walk-through surveys, lectures, chemical field measurements, laboratory calibration, and analyses and reports, with emphasis on chemical, physical, and ergonomic hazards. Letter grading.

253. Physical Agents in Work Environment. (2 to 4) (Formerly numbered 253A, 253B.) Lecture, two hours; laboratory, two hours. Preparation: one year of physics. Physics, measurement methods, health effects, and control methods for radiation (ionizing and nonionizing), noise, and thermal stress in workplace environment. S/U or letter grading.

255. Control of Airborne Contaminants in Industry. (4) Lecture, two hours; laboratory, two hours. Preparation: one year of physics. Requisites: course C252D. Principles and applications of control technology to industrial environments, including general and local exhauster ventilation, air cleaning equipment, and respiratory protection. S/U or letter grading.

256. Biological and Health Surveillance Monitoring in Occupational/Environmental Health. (4) Lecture, three hours; discussion, one hour; assignments, three hours. Preparation: knowledge of biological monitoring and health surveillance to assess occupational and environmental exposures to organic and inorganic chemicals and physical factors. Letter grading.

C257. Risk Assessment and Standard Setting. (4) (Formerly numbered 257F, 257G.) Seminar, four hours. Requisites: courses C240, 251, Epidemiology 100. Designed to provide students with opportunity to review scientific basis for association of selected occupational and environmental exposures with disease. Special emphasis on critical evaluations of literature. Attention specific to interface of science and regulatory standards. Concurrently scheduled with course C157. S/U or letter grading.

258. Identification and Analysis of Hazardous Wastes. (4) Lecture, three hours; discussion, one hour; laboratory, one hour; one field trip. Requisites: course C252E. Biostatistics 100A. Designed to define, identify, label, and quantify hazardous wastes and how workers should be protected. Provides critical understanding of all analytical aspects of hazardous wastes, health aspects, and regulation and practice of handling hazardous wastes. Letter grading.

259A. Occupational Safety and Ergonomics. (4) Lecture, four hours. Overview of most frequent and severe occupational exposures, their distribution, causation, analysis methods, and control approaches, including work-related musculoskeletal disorders, falls, machinery, chemicals and physical agents. Special emphasis on critical evaluations of literature. Letter grading.

259G. Field Observation, and Facility De-
sign. (3) Lecture, three hours. Requisite: course 259A. Introduction to application of fire sciences, engineering, and management principles to prevention, suppression, emergency response, and control of fire and explosion damage and injury. Letter grading.

261. Chemical Behavior of Aquatic Systems. (4) Lecture, three hours. Requisites: courses C250A, C200B, C200C, Environment 20B. Mathematically based, fundamental chemistry of ocean waters, rivers, groundwater, and water treatment systems. Topics include thermodynamics of natural waters, acids and bases, carbon dioxide cycle, solubility product, pH and redox, and application of these concepts to water and wastewater treatment. S/U or letter grading.

C264. Fate and Transport of Organic Chemicals in Aquatic Environment. (4) (Formerly numbered 264E.) Lecture, four hours. Preparation: bachelor's degree in science, engineering, geophysics, chemistry, biology, or public health. Evaluation of how and where and in what form and concentration organic pollutants are distributed in aquatic environments. Study of mass transport mechanisms moving organic chemicals between phases, biological degradation and accumulation, and chemical reactions. Effect of humic substances on these processes. Concurrently scheduled with course C164E. S/U or letter grading.

M270. Work and Health. (4) (Formerly numbered 270J.) (Same as Community Health Sciences M278.) Lecture, three hours; practicum, one hour. Recommended preparation: graduate-level methods/statistics course, basic epidemiology. Designed for graduate students. Exploration of impact of work on physical and psychological health in context of newly emerging discipline. Focus on psychosocial models; measurement (including hands-on experience), contextual factors (gender, ethnicity, social class), and how work stressors can be ameliorated. S/U or letter grading.

C280. Principles of Nanobiological Interactions and Nanotoxicology. (4) Lecture, four hours. Preparation: basic understanding of biology and chemistry at level required for admission to University of California at undergraduate level in engineering, physical, or natural sciences. Introduction to commonly used vocabulary in nanoscience required to appreciate biological interactions and potential toxicity of nanomaterials. Discussion of plant- and animal-cell behavior and characterization of engineered nanomaterials. Development of understanding of unique properties of engineered nanomaterials and how these properties contribute to biological interactions. Examination of properties of engineered nanomaterials to their potential for transport, reactivity, uptake, and toxicity in natural environments and in body. Concurrently scheduled with course C180. S/U or letter grading.

296A-296N. Research Topics in Environmental Health Sciences. (2 each) Seminar, two hours. Advanced study and analysis of current topics in environmental health sciences. Emphasis on current research and literature in research specialty of faculty member teaching course. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, one hour. Preparation: one year of training and experience as teaching assistant, associate, or fellow. Teaching apprenticeship as teaching assistant or fellow. Teaching apprenticeship as teaching assistant or fellow. Letter grading.

400. Field Studies in Environmental Health Sciences. (2 or 4) Fieldwork, to be arranged. Field observation and studies in selected community environmental health organizations. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. degree. Nine units may be applied toward 44-unit minimum total required for M.P.H. degree. Letter grading.

401. Environmental Measurements. (4) Lecture, two hours; laboratory, four hours. Requisites: courses C200A, C200B, C200C, Environmental Health Sciences. In-depth methods for laboratory and field applications to assess quantity of environmental pollutants in air, food, and water, and to assess degree of exposure to such factors as noise and radiation. Letter grading.

405. Operations and Management of Public Health Laboratories. (4) Lecture, four hours. Preparation: bachelor's degree in science, engineering, or public health, at least one microbiology, environmental microbiology, and inorganic toxicology courses, and one public health laboratory course. Designed for master's and doctoral students. Principles of operations and management of public health laboratories and role of laboratory play in public health infrastructure. Basic knowledge of microbiology assumed. Topics include assays and tests performed by public health laboratories, quality control, and leadership principles. S/U grading.

410A. Instrumental Methods in Environmental Sciences. (4) Lecture, four hours; discussion, two hours; other, two hours. Preparation: one year each of physics, chemistry, and biology. Theory and principles of instrumental methods through lectures and group discussions. Letter grading.

410B. Instrumental Methods Laboratory in Environ-
mental Health Sciences. (4) Lecture, one hour; discussion, one hour; laboratory, four hours. Preparation: one year each of physics, chemistry, and biology. Measurement of current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.

415. Health Hazards of Industrial Processes. (4) Lecture, two hours; field trips, four hours. Requisite: course 252E. Industrial and occupational hazards and occupational health hazards that arise from them. Letter grading.

451. Water Quality and Health. (4) Lecture, three hours; discussion, one hour. Requisites: courses C200A, C200B, 401. Preparation: one year of training and experience as teaching assistant or fellow. Preparation: one year of training and experience as teaching assistant or fellow. Preparation: one year of training and experience as teaching assistant or fellow. Letter grading.

470. Environmental Hygiene Practices. (2) Lecture, two hours. Requisites: courses C200A, C200B, C200C, Epidemiology 100. Field methods and principles of environmental sanitation as applied to sanitarians. Topics include theory, code enforcement, and inspection procedures for applicable environmental topic areas. S/U or letter grading.

M471. Improving Worker Health: Social Move-
ments, Policy Debates, and Public Health. (4) (Same as Community Health Sciences CM470 and Urban Planning M470.) Lecture, three hours; fieldwork, two hours. Examination of intersection between work, health, and environment, analysis of social causes of health disparities, investigation of historical trends and social movements, interpretation of current policy debates, and development of innovative interventions. S/U or letter grading.

495. Teacher Preparation in Environmental Health Sciences. (2) Seminar, two hours. Preparation: 18 units of graduate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

Irwin H. Suffet, Ph.D. (Environmental Health Sciences)
Richard Turco, Ph.D. (Atmospheric and Oceanic Sciences, Institute of the Environment and Sustainability)
Arthur M. Winer, Ph.D. (Environmental Health Sciences)

Scope and Objectives

The UCLA Environmental Science and Engineering (ESE) Program was founded in 1973 by Nobel laureate Dr. Willard Libby, who perceived a need to train environmental scientists, engineers, and policymakers in a more interdisciplinary manner than is afforded by traditional Ph.D. programs. After three decades, Dr. Libby’s vision has in fact been realized with the evolution of the program from an experimental approach into a key component of the overall effort to train environmental professionals at UCLA.

To date the program has awarded the Doctor of Environmental Science and Engineering (D.Env.) degree to over 200 students, and UCLA remains unique in the country in awarding such a degree. Many graduates have gone on to occupy critical positions in environmental research, remediation, and policy throughout the major environmental agencies in California and the nation. Other graduates have risen to senior positions in private sector companies conducting environmental research and remediation. Still other graduates are applying scientific solutions to environmental problems at national laboratories such as Oak Ridge and Lawrence Livermore Laboratories and at research institutes such as the RAND Corporation.

Although many participating interdepartmental faculty members are from the College of Letters and Science and the Henry Samueli School of Engineering and Applied Science, the program is administered through the School of Public Health where a core faculty is based in the Department of Environmental Health Sciences. No undergraduate major or master’s degree is offered.

The program is designed to train multidisciplinary professionals with an appropriate balance of breadth and specific skills, based on a strong master’s-level foundation in science or engineering discipline. The curriculum consists of formal coursework across a full spectrum of relevant physical, biological, social, and engineering disciplines, as well as interdisciplinary research training through nine-month problems courses. Because the D.Env. degree is not a specialized research degree in the manner of a Ph.D., the usual extended research training period in residence at UCLA associated with a Ph.D. is replaced by an 18- to 36-month internship approved by doctoral committee and program director. Requirements for the D.Env. degree include completion of core courses in each of the following graduate degree requirements.

Associate Professors
Onyebuchi A. Arah, M.D., Ph.D.
Pamina M. Gorbach, M.H.S., Dr.P.H., in Residence
Kamyrar Kalantar-Zadeh, M.D., Ph.D., in Residence

Assistant Professors
Joelle M. Brown, Ph.D., in Residence
Shenhaz K. Hussain, M.D., Ph.D., in Residence
Anne W. Rimoin, Ph.D.

Adjunct Professors
O. George W. Berlin, Ph.D.
Marc Gultery, Ph.D.
James R. Greenwood, Ph.D., M.P.H.
Scott Haldeman, M.D., Ph.D., F.R.C.P.
Mia Hashibe, Ph.D.
Paul A. Simon, M.D., M.P.H.
Marc A. Strassburg, Dr.P.H.
Nathan D. Wong, Ph.D.
Zunyou Wu, Ph.D.

Adjunct Associate Professors
Sydney Maureen Harvey, Ph.D.
Peter R. Kerndt, M.D., M.P.H.
Jack D. Sahl, Ph.D.
Vontanak Saphonn, Ph.D.

Adjunct Assistant Professors
Julia N. Bailey, Ph.D.
Brian D. Bradbury, M.A., Ds.C.
Chun Chao, Ph.D.
Birn Y. Goldstein, Ph.D.
Nina T. Hapariva, Ph.D., M.P.H.
Paul T. Hsu, Ph.D., M.P.H.
Marian Javanbakht, Ph.D.

Mark A. Malek, Ph.D.
Roberta M. Malmgren, Ph.D.
Shira C. Shafir, Ph.D., M.P.H.
Lisa V. Smith, M.S., Dr.P.H.

Visiting Professor
Zunyou Wu, M.D., Ph.D., M.P.H., M.S.

Scope and Objectives

Epidemiology has been defined as the study of the distribution and determinants of disease and injury in human populations. Epidemiologists study variations of disease in relation to such factors as age, sex, race, occupational and social characteristics, place of residence, susceptibility, exposure to specific agents, or other pertinent characteristics. Also of concern are the temporal distribution of disease, examination of trends, cyclical patterns, and intervals between exposure to causative factors and onset of disease. The scope of the field extends from study of the patterns of disease to the causes of disease and to the control or prevention of disease. What distinguishes epidemiology from other clinical sciences is the focus on health problems in population groups rather than in individuals.

Epidemiology is a young field with constantly expanding boundaries. The range of activities that may be at least partly epidemiologic includes determination of the health needs of populations, investigation and control of disease outbreaks, study of environmental and industrial hazards, evaluation of preventive or curative programs or treatments, and evaluation of the effectiveness and efficiency of intervention or control strategies. Many tools of epidemiology are borrowed from other fields such as microbiology, immunology, medicine, statistics, demography, and medical geography.

There is a growing core of purely epidemiologic methodology that includes not only statistical methodology and principles of study design, but a unique way of thinking that is beyond the rote memorization of rules. The contribution of epidemiology to any study involving groups of people is being increasingly recognized and demanded.

Epidemiologists may work in many settings, including international health agencies, state and local health departments, federal government agencies and health programs, health maintenance organizations, colleges and universities, and numerous research projects privately and publicly sponsored.

The objectives of the Department of Epidemiology fall into three broad categories — research, teaching, and community service. Degrees offered include the M.S. and Ph.D. in Epidemiology, and, through the School of Public Health, degrees of- other characteristics, place of residence, and social characteristics, place of residence, susceptibility, exposure to specific agents, or other pertinent characteristics. Also of concern are the temporal distribution of disease, examination of trends, cyclical patterns, and intervals between exposure to causative factors and onset of disease. The scope of the field extends from study of the patterns of disease to the causes of disease and to the control or prevention of disease. What distinguishes epidemiology from other clinical sciences is the focus on health problems in population groups rather than in individuals.

The objectives of the Department of Epidemiology fall into three broad categories — research, teaching, and community service. Degrees offered include the M.S. and Ph.D. in Epidemiology, and, through the School of Public Health, the M.P.H. and Dr.P.H. with a specialization in epidemiology (see Public Health Schoolwide Programs).

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaatlibrary/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Epidemiology offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Epidemiology.

Epidemiology

Upper Division Courses

100. Principles of Epidemiology. (4) Lecture, two hours; discussion, four hours. Preparation: one full biological sciences course. Not open for credit to students with credit for course 200A, 200B, or 200C. Introduction to epidemiology, including factors governing health and disease in populations. Letter grading.

197. Individual Studies in Epidemiology. (2 to 8) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. As-signed reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

200A. Methods I: Basic Concepts and Study Designs. (6) Lecture, six hours; discussion, four hours. Enforced requisite or corequisite: Biostatistics 100A. Introduction to basic concepts, principles, and methods of chronic and infectious disease epidemiology. Letter grading.

200B. Methods II: Prediction and Validity. (6) Lecture, six hours; discussion, four hours. Enforced requisite: course 200A. Biostatistics 100A, 100B. Introduction to basic concepts, principles, and methods of chronic and infectious disease epidemiology. Letter grading.

203. Topics in Theoretical Epidemiology. (2) Lecture, two hours. Selected topics from current research areas in epidemiologic theory and quantitative methods. Topics selected from biologic models, epidemiologic models, problems in inference, model specification problems, design issues, analysis issues, and confounding. May be repeated for credit with consent of instructor. S/U grading.

M211. Statistical Methods for Epidemiology. (4) (Same as Biostatistics M211 and Statistics M250.) Lecture, four hours. Preparation: two terms of statistics (such as Biostatistics 100A, 100B). Requisites: courses 200B, 200C. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in courses 200B and 200C and introduction of new topics, including principles of epidemiologic analysis, trend analysis, smoothing and sensitivity analysis. S/U or letter grading.

M212. Statistical Modeling in Epidemiology. (4) (Same as Biostatistics M209.) Lecture, four hours. Preparation: two terms of statistics (three terms recommended). Recommended: course M204 or M211. Principles of modeling, including meanings of models, a priori model specification, translation of models into explicit population assumptions, model selection, model diagnostics, hierarchical (multilevel) modeling, S/U or letter grading.
M216. Applied Sampling. (4) (Same as Statistics CM248.) Lecture, three hours; discussion, one hour. Designed for upper division and graduate students in social or life sciences and those who plan to major in Statistics. Topics include methods of sampling from finite populations, sources of sampling and estimation bias, and methods of generating efficient and precise estimates of population characteristics. Practical applications of sampling methods via lectures and hands-on laboratory exercises. S/U or letter grading.

M218. Questionnaire Design and Administration. (4) (Same as Community Health Sciences M218) Lecture, four hours. Requisites: courses 200B and 200C, or Community Health Sciences 211A and 211B. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questions. Letter grading.

220. Principles of Infectious Disease Epidemiology. (4) Lecture, three hours; discussion, one hour. Requisite: course 100 or 200C. Designed for upper division and graduate students in public health. Understanding problems and roles of epidemiology in workplace settings and public health. Letter grading.

221. Arthropods as Vectors of Human Diseases. (4) Lecture, four hours. Requisites: courses 200A, 200B, and 200C (or 100). Comprehensive overview of their role in disease transmission and vector/host relationships, and spectrum of diseases carried by arthropods for graduate students, public health professionals, and medical doctors seeking information on global prevalence of arthropod-borne diseases. Letter grading.

223. Biology and Ecology of Human Parasitic Diseases. (4) Lecture, four hours. Information on all aspects of parasitic organisms causing human disease, including their morphology, biology, means of diagnosis, and diseases they cause. From epidemiological perspective, special emphasis on way in which parasites maintain themselves in nature and manner in which organisms are transmitted to people. Letter grading.

224. Zoonotic Diseases and Public’s Health. (4) Lecture, four hours. Examination of wide variety of infectious disease agents (viruses, bacteria, and protozoan and helminth parasites) causing diseases in individuals and populations. Emphasis on how these diseases exist in natural environment, how they are transmitted to humans, and methods for their prevention and control. Letter grading.

225. Public Health Microbiology. (4) (Formerly numbered 225.) (Same as Environmental Health Sciences 225L.) Lecture, four hours. Preparation: introductory microbiology. Corequisite: course 225L. Role of public health laboratory is to support testing needs of program. To successfully fulfill this role, laboratory must provide information based on most sensitive and specific technologies available. Coverage of common infectious disease agents of public health importance and definition of impact of molecular biology on disease detection and epidemicology in modern public health laboratory. S/U or letter grading.

225L. Public Health Laboratory. (4) (Formerly numbered 225L.) (Same as Environmental Health Sciences 225L.) Lecture, two hours; laboratory, two hours. Preparation: introductory microbiology. Corequisite: course 225L. Public health laboratory techniques for detection and identification of pathogenic microorganisms. S/U or letter grading.

226. Global Health Measures for Biological Emergencies. (4) (Formerly numbered 226.) (Same as Ecology and Evolutionary Biology M226.) Lecture, four hours; laboratory, two hours. Preparation: introductory microbiology. Corequisite: course 226L. Mitigation of bioterrorism falls outside traditional public health programs and public health graduate education. Because of seriousness of such threats, it is important that individuals trained in public health understand possible responses. Letter grading.

227. AIDS: Major Public Health Challenge. (4) Lecture, four hours. Requisites: courses 200A, 200B, and 200C (or 100), Biostatistics 100A or 110A. Presentation of epidemiologic, biologic, psychological, and societal characteristics of AIDS and HIV-1 infection. Discussion of policy implications and intervention strategies. S/U or letter grading.

228. Biology of HIV. (4) Lecture, three hours. Preparation: two biology courses. Requisites: course 100, Biostatistics 100A. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Often considered to be the most significant cause of morbidity and mortality in both developing and developed world. Examination of etiologic agents of food poisoning and factors specific to foods that allow them to become agents of disease transmission. S/U or letter grading.

229. Epidemiology of Foodborne Illnesses. (4) Lecture, four hours. Requisites: courses 200A, 200B, and 200C (or 100), Biostatistics 100A. Focus on epidemiologic aspects of etiology and development of foodborne diseases. Examination of biologic agents of food poisoning and factors specific to foods that allow them to become agents of disease transmission. S/U or letter grading.

230. Epidemiology of Sexually Transmitted Diseases. (4) Lecture, four hours. Requisites: courses 200A, 200B, and 200C (or 100). Sexually transmitted diseases; medical/biologic aspects, epidemiology of control in developed and developing countries. S/U or letter grading.

231. Principles of Control of Infectious Diseases. (2) Lecture, two hours. Requisites: courses 200A, 200B, 200C, 220. Comprehensive study of tools for control of infectious diseases and application of these tools in public health programs to achieve epidemiologic impact on disease, reduction, elimination, or eradication. Letter grading.

232. Methods in STIVH Epidemiology. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Introduction to range of different methodologies used to collect data and conduct analysis on reproduct epic mic epidemiology topics, including methods that produce quantitative data and methods that produce qualitative data, with emphasis on use of methods appropriate for challenging and sensitive research topics such as sexual behavior, abortion use, and sexual abuse. Letter grading.

233. Communicable Disease Epidemiology in Corrections. (2) Lecture, two hours. Requisites: courses 200A and 200B (or 100). Overview of communicable disease epidemiology, public health program, and research issues specific to correctional population in U.S. Introduction to basic concepts and methodology of communicable pathogens such as mental health, homelessness, and community reintegration. Legal and ethical issues related to healthcare among incarcerated and potential effects on community health. S/U or letter grading.

240. Cardiovascular Epidemiology. (2) Lecture, two hours. Topics include definition, pathogenesis, descriptive epidemiology of risk factors, strategies for prevention, lipoprotein metabolism, and epidemiology of diabetes, hypertension, and chronic lung disease. Letter grading.

244. Research Methods in Cancer Epidemiology. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100), Biostatistics 100A. Biologic, quantitative, and administrative considerations in epidemiologic cancer research. Hypothesis specification and choice of study design. Uses of descriptive epidemiology, cohort studies, case control studies, and illustrated cancer diagnosis and control. Means of identifying subjects and controls. Design of instruments. Sources of bias and confounding. S/U or letter grading.

247. Epidemiology of Injuries in Elderly. (2) Lecture, two hours. Requisite: course 100. Description of frequency of, risk factors for, and possibilities of preventing injuries in elderly populations. Comparison of injury patterns (e.g., falls) in younger versus older populations. Emphasis on methodologic issues of studying elderly people. S/U or letter grading.

248. Psychiatric Epidemiology. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Introduction to basic concepts and research methods in psychiatric epidemiology. Topics include case definition, study design, instrumentation, and epidemiology of selected psychiatric disorders. Letter grading.

249. Genetic Epidemiology I. (2) Lecture, two hours. Preparation: at least one course in epidemiology, biostatistics, and genetics. Basic concepts in emerging field of genetic epidemiology. Focus on genetic study of complex diseases, determining genet-ic contributions to disease, identifying genes, and characterization of interactions with environmental factors. S/U or letter grading.

251. Epidemiology of Noninfectious Conditions. (4) Lecture, four hours. Requisites: courses 200A, 200B, and 200C (or 100), Biostatistics 100A. Pertinent epide-miology methods for study of noninfectious diseases, including that from motor vehicle crashes, occupational exposures, falls, and other major external causes, that focus on research approaches, data sources, analytical techniques. Substantial attention to related sub-problem areas presented for critical review. Letter grading.

253. Acute Traumatic and Chronic Repetitive Injury. (4) (Formerly numbered 213.) Lecture, four hours. Preparation: introductory biostatistics and epidemiology courses. Review of all aspects of contemporary nutrition sciences that require application of epidemiologic principles and methods, ranging from food-poison outbreak investigation to evidence-based regulatory assessment of health claims for foods. Experience in actual world of collecting, analyzing, and interpreting data related to nutrition and health or disease outcomes. S/U or letter grading.

254. Nutritional Epidemiology I. (4) (Formerly numbered 254.) (Same as Community Health Sciences M251.) Lecture, two hours; discussion/laboratory exercise, one hour. Preparation: introductory biostatistics and epidemiology courses. Review of all aspects of contemporary nutrition sciences that require application of epidemiologic principles and methods, ranging from food-poison outbreak investigation to evidence-based regulatory assessment of health claims for foods. Experience in actual world of collecting, analyzing, and interpreting data related to nutrition and health or disease outcomes. S/U or letter grading.

255. Keeping Children Safe: Causes and Prevention of Pediatric Injuries. (2) (Same as Community Health Sciences M255.) Lecture, two hours. Discussion/laboratory exercise, one hour. Preparation: introductory biostatistics and epidemiology courses. Review of all aspects of contemporary nutrition sciences that require application of epidemiologic principles and methods, ranging from food-poison outbreak investigation to evidence-based regulatory assessment of health claims for foods. Experience in actual world of collecting, analyzing, and interpreting data related to nutrition and health or disease outcomes. S/U or letter grading.

257. Advanced Nutritional Epidemiology. (2) Lecture, one hour; discussion, one hour. Preparation: intermediate biostatistics and epidemiology courses. Requisite: course 254 or 295. Preparation: for doctoral students interested in doing epidemiologic research. Methodological aspects of research in nutritional epi-
demography. Topics include why and how to conduct validation studies, adjustment for energy intake, correction of methodological problems related to genetic polymorphism, biochemical markers, gene-nutrient interaction in chronic diseases. Theoretical as well as practical aspects. S/U or letter grading.

**M258. Epidemiology of Obesity, Diabetes, and Related Disorders** (Formerly numbered 258.) (Same as Pathology M258.) Lecture, four hours. Preparation: basic biochemistry, epidemiology, molecular biology, physiology, and statistics courses. Survey of entire landscape of nutritional, biochemical, and genetic aspects of obesity and diabetes and their microvascular and macrovascular complications. Review of descriptive and analytical epidemiology of these seemingly distinct yet interrelated disorders, including so-called metabolic syndrome. Study of distributions and determinants of these disorders in Westernized populations to appreciate how and why these epidemics occurred. Through case studies students learn process of generating etiologic hypotheses that can be tested using modern molecular epidemiologic methods. Techniques of epidemiologic studies. Analysis of real data sets that include both genotype and phenotype information, with emphasis on examination of various gene/environment interactions. S/U or letter grading.

**259. Disaster Epidemiology.** (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100), Community Health Sciences 295. Introduction to epidemiologic methodology to study disasters and their health outcomes, including loss estimation, risk factor assessment, intervention, and evaluation. Letter grading.

**260. Environmental Epidemiology.** (2 or 4) Lecture, three hours. Requisites: courses 200A, 200B, and 200C (or 100). Environmental epidemiology methods applied to evaluation of human health consequences of environmental hazards. Topics include air pollution, pesticides, drinking water contaminants, use of GIS. Review of recently completed environmental studies published in peer-reviewed literature. S/U or letter grading.

**261. Occupational Epidemiology.** (4) Lecture, two hours; discussion, box-hygiene. Requisites: courses 200A, 200B, and 200C (or 100). Methodological considerations, approaches, and limitations in epidemiologic studies of occupational and environmental hazards. Focus on integration of industrial hygiene principles and epidemiologic methods to improve exposure assessment protocols and exposure analyses for occupational/environmental health studies. S/U or letter grading.

**265. Epidemiology Methods in Occupational and Environmental Epidemiology.** (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Introduction to epidemiology methods applied to evaluation of human health consequences of occupational and environmental hazards, including study design, exposure assessment techniques, and common methods encountered in research focused on assessing adverse health effects resulting from occupational and environmental exposures. Topics include clusters, meta-analysis, and psychological and development, illustrated by case studies, with focus on techniques to critically evaluate and interpret current literature. Letter grading.

**266. Global Health and Tropical Medicine.** (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Review of current research contained in recent medical literature. May be repeated for credit. S/U or letter grading.

**267. Methodologic Issues in Reproductive Epidemiology.** (2) Seminar, two hours. General discussion of methodologic issues important to epidemiologic studies of reproductive outcomes, including fertility, low birth weight, prematurity, birth defects, infertility, orthopedic problems, and perinatal mortality. Approaches to study design and exposure assessment and identification of potential sources of bias illustrated through review of recent studies published in literature and with particular focus on occupational and environmental exposures and birth cohorts. S/U or letter grading.

**268. Introduction to Pharmacoeconomics.** (2) Lecture, two hours; discussion. Requisites: courses 200A, 200B, and 200C (or 100). Pharmacoeconomics is application of epidemiologic knowledge, reasoning, and methods to study of effects and uses of drugs. Survey of contemporary roles of pharmacoepidemiology in drug development and public health, with historical background of its evolution and projections of future prospects. S/U or letter grading.

**270. Behavioral Epidemiology.** (2) Lecture, two hours. Requisite: course 100 or 200A. Introduction to range of different methodologies used to collect data and conduct analyses on behaviors studied in epidemiologic research. Emphasis on how to design and interpret data on behaviors that can be associated with disease outcomes, including methods to collect survey data (i.e., design of questionnaires, interviewing techniques, and methods to collect and analyze qualitative data, e.g., ethnographic interviews, focus groups, systematic observations). Overview on epidemiology of key behavioral factors such as lifestyle, health behaviors, and sexual behaviors. S/U or letter grading.

**271. Assessing Validity of Complementary and Alternative Healthcare Procedures.** (2) Lecture, two hours. Emphasis on the role of complementary and alternative healthcare procedures, with special emphasis on disorders in field of neurology. Focus on methods of analyzing clinical and experimental research published in journals that provide support or refute claims made by practitioners of these procedures. Primary procedures include acupuncture, chiropractic, manipulation, massage, and herbal remedies. Letter grading.

**272. Social Epidemiology.** (4) (Same as Community Health Sciences M272.) Lecture, two hours; discussion, one hour. Requisite: course 100. Relationship between sociological, cultural, and psychosocial factors in the development of new health-related epidemics and mortality. Emphasis on lifestyles and other socio-environmental factors associated with general susceptibility to disease and subsequent mortality. Letter grading.

**273. Responsible Conduct of Research in Global Health.** (2) Lecture, one hour; discussion, one hour. Requisite: Community Health Sciences 200. Introduction to fundamental principles of public health ethics, current ethical procedures, guidelines, and requirements, and ethical issues facing public health professionals working in developing countries. History of public health issues, unique ethical issues of research in developing countries, analysis of ethical implications of informed consent, responsibility to study community, mechanisms of study approval, role of funders, and role and responsibilities of review boards. S/U or letter grading.

**276. Connecting Epidemiologic, Medical, and Mathematical Aspects of Infectious Diseases.** (4) Lecture, four hours. Requisites: Biostatistics 100A, 100B, 200A, 200B, 200C, 220. To deepen and further integrate knowledge on infectious diseases, focus on small number of them to enable in-depth study. Each to be presented and discussed with emphasis on historical development, understanding: epidemiology, immunology and molecular basis, and epidemiologic and mathematical analysis. Letter grading.

**293. International HIV/AIDS Seminar.** (2) Seminar, two hours. Requisites: courses 200A, 200B, and 200C (or 100) and/or 260. Introduction to demands that go beyond pure science, with focus on issues such as risk communication, political influence (and ethics) of oversight panels and external review groups on presenting results and conclusions, and interest of government agencies. S/U or letter grading.

**296. Epidemiology and Policy of Occupational and Environmental Health.** (2) Letter, two hours. Requisites: courses 200A, 200B, and 200C (or 100) and/or 260. Introduction to demands that go beyond pure science, with focus on issues such as risk communication, political influence (and ethics) of oversight panels and external review groups on presenting results and conclusions, and interest of government agencies. S/U or letter grading.

**297. Topics in Population Genetics and Nutrition.** (2) Seminar, three hours. Preparation: basic courses in biochemistry, epidemiology, molecular biology, physiologic, and statistical genetics, and applications of selected topics to nutrition and social problems. S/U or letter grading.
ist events. Practical application of principles of epidemiology and public health in preparing for smallpox or other communicable disease. Letter grading.

410. Management of Epidemiologic Data. (2) Lecture, two hours. Data management for various epidemiologic study designs, confidentiality concerns; data management systems; introduction to mainframe computer programs. S/U or letter grading.

411. Research Resources in Epidemiology. (2) Lecture, one hour; discussion, one hour. Instruction and practical experience in use of varied bibliographic aids and sources of information, building of reference files, and presentation of research findings for publication. Letter grading.

412. Public Health Surveillance. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Principles of scientific writing and communication. Approaches to developing effective written, oral, and visual presentations of epidemiologic research findings. Communication issues arising in conduct of research, including informed consent process. S/U or letter grading.

413. Methods of Scientific Communication. (2) Lecture, two hours. Requisites: courses 200A, 200B, and 200C (or 100). Principles of scientific writing and communication. Approaches to developing effective written, oral, and visual presentations of epidemiologic research findings. Communication issues arising in conduct of research, including informed consent process. S/U or letter grading.

414. Practical Epidemiologic Investigations. (2 or 4) Lecture, one or two hours; laboratory, one or two hours. Requisites: courses 200A, 200B, and 200C (or 100). Practical approaches to epidemic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings. Letter grading.

415. Epidemiology for Developing Countries. (4) Lecture, four hours. Requisites: courses 200A, 200B, and 200C (or/and 100). Biostatistics 100A. Practical use of epidemiology, microcomputers, and spreadsheet models for estimating morbidity and mortality, developing intervention or prevention strategies, and setting program priorities in Third World settings. Letter grading.

M418. Rapid Epidemiologic Surveys in Developing Countries. (4) (Same as Community Health Sciences M418.) Lecture, four hours. Requisites: courses 200A, 200B, and 200C (or/and 100). Biostatistics 100A. Presentation of how to do health surveys in Third World countries. Practical assistance for planning and organizing surveys, including use of microcomputers to develop and test questionnaire, select sample, process and analyze data, and prepare final report. Letter grading.

420. Field Trials in Developing Countries. (4) Lecture, four hours. Requisite: course 100 or 200A or 200B. Introduction to practical concepts and issues in conducting epidemiologic field research in developing countries, including formulating research questions, study site selection, ethical considerations, and logistics of data and specimen collection. S/U or letter grading.

495. Teacher Preparation in Epidemiology. (2) Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum course requirement. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 12) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

598. Master's Thesis Research. (2 to 8) Tutorial, to be arranged. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research. (2 to 12) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

---

**Scope and Objectives**

Ethnomusicology involves the study of all kinds of music from all over the world, using a variety of disciplinary perspectives. The Department of Ethnomusicology, the largest and first of its kind in a U.S. university, offers courses that cover the music of virtually every region of the world and of many ethnic groups in the U.S., as well as courses on jazz, popular music, and film music. Most courses combine an interest in music as an art form with questions about how musical and art practice relate to other aspects of culture, society, politics, and economics. Courses are also available on the philosophy and aesthetics of music and the study of music perception and cognition using experimental methods. In addition to academic courses, the department offers performance ensemble courses in jazz and several world and American music traditions. At the undergraduate level most of the performance courses are open to nonmajors, and many academic courses target nonmajors; prior knowledge of music is not expected or required. The Department of Ethnomusicology is aligned with the Departments of Music and Musicology and aspires to promote productive collaboration between performance and scholarship, a cross-cultural global understanding of the art of music, and preparatory training for a broad range of careers in music for students graduate.

The undergraduate major in Ethnomusicology is offered with two concentrations: one in jazz studies and one in world music with emphases in general world music, performance/composition, public ethnomusicology, and scholarly research. Admission requires an audition/interview. The major provides students with a wide-ranging liberal arts education in music. At its core, this includes (1) comprehensive knowledge of music cultures of the world, (2) understanding of the interrelationship of music, society, and culture, (3) grounding in the basics of Western music theory and musicianship, and (4) the experience of playing in one or several musical ensembles from various traditions around the world. The concentration in jazz studies seeks to produce students who emerge as outstanding and well-rounded jazz musicians with a strong academic foundation, and to prepare students to enter professional careers in the music world, as well as graduate study in various aspects of music such as composition, arranging, film...
The Major
Jazz Studies Concentration — Composition Emphasis
Required: Ethnomusicology M110A, M110B, M111, C122A, C122B, C122C, 125A, 125B, 125C, 127A, 127B, 127C, 129A, 129B, 129C, 163, 183, 6 units of course 161T and/or 177, one 4-unit upper division elective course selected from ethnomusicology, music, or music history, one additional course selected from Ethnomusicology C124, 164, or C165, and one capstone senior recital or project (course 186).

Jazz Studies Concentration — Performance Emphasis
Required: Ethnomusicology M110A, M110B, M111, C122A, C122B, C122C, 127A, 127B, 127C, 129A, 129B, 129C, 183, 12 units of course 161T and/or 177, 12 units of course 171, one 4-unit upper division elective course selected from ethnomusicology, music, or music history, and one capstone senior recital or project (course 186).

World Music Concentration
Required: Ethnomusicology 175 or 181, 183; 12 units from courses 161A through 161Z and/or 162; and a minimum of eight courses (32 to 36 units) from one of the four ethnomusicology emphases (required courses/units vary per emphasis): (1) general world music, (2) performance/composition, (3) public ethnomusicology, or (4) scholarly research. See the departmental counselor for the list of courses for each emphasis.

Emphases (32 to 36 units minimum): To select an emphasis, students who entered the program as freshmen must submit an application to the department in the Fall Quarter of their third year in the program. Students who entered as transfers must select their emphasis during Spring Quarter of their first year of training at UCLA. The application must include (1) an up-to-date transcript, (2) a concise statement by the students explaining why the emphasis has been selected and how it will prepare them for their career goals, and (3) the approval of a faculty member who is a specialist in the emphasis. Students who decide on the general world music emphasis do not need to submit an application:

General World Music (for students interested in general training in world music): In addition to the lower and upper division core requirements, a minimum of eight 4-unit courses is required. Four 4-unit courses must be selected from one of the following groupings — (1) Americas and Europe, (2) Africa and Asia, (3) popular music and jazz, or (4) aesthetics, politics, psychology, technology. Students may complete the remaining four courses with other upper division ethnomusicology courses listed under this emphasis, with courses from other emphases, or with Ethnomusicology 188, 197E, or 197S courses. Performance/Composition (for students interested in a career in performance and/or composition): Students who select this emphasis must have a 3.5 grade-point average in departmental lower division core courses and a cumulative 3.0 GPA at the time of application. In addition to the lower and upper division core requirements, a minimum of eight 4-unit courses is required. Students must take four 4-unit courses in this emphasis and a minimum of four 4-unit courses in the general world music emphasis. In addition, they must fulfill the capstone final project requirement (4 units) through a public recital (performance). Students must enroll in Ethnomusicology 199 (2 units) and pass a recital permission jury. Instrumental and vocal performers must present a portion of their recital performance, and composers must present excerpts from their recital scores in front of two faculty members. Students also enroll in Ethnomusicology 186 (2 units) during the term in which they perform their recital or their composition(s) are performed.

Public Ethnomusicology (for students interested in careers in the music industry, the music business, archiving, or arts administration): Students who select this emphasis must have a 3.5 grade-point average in departmental lower division core courses and a cumulative 3.0 GPA at the time of application. In addition to the lower and upper division core requirements, a minimum of eight 4-unit courses is required. Students must take four 4-unit courses in this emphasis and an additional two 4-unit courses in the general world music emphasis. Students must fulfill the capstone internship requirement, which consists of three terms (8 units minimum) of Ethnomusicology 195B, in an institution approved by the faculty sponsor. Students must write a final research paper (at least 10 pages) at the completion of each internship.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Ethnomusicology offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Ethnomusicology.
Ethnomusicology

Lower Division Courses

5. Music Around World. (5) Lecture, four hours; discussion, one hour; outside study; 10 hours. Overview of world’s musical traditions by selecting one or two case studies from each of nine musical world regions: Pacific, East Asia, Southeast Asia, South Asia, Middle East, Africa, Europe, Latin America, and U.S. and Canada. P/NP or letter grading.

M7A-M7B-M7C. Introduction to Music: History, Culture, Creativity. (5-5-5) (Same as Music M10A-M10B-M10C.) Lecture, four hours; laboratory, three hours. Preparation: placement examination. Course M7A is enforced requisite to M7B, which is enforced requisite to M7C. Students must receive grade of C or better to proceed to next course in sequence. Introduction to study of music from three complimentary perspectives: its history, relation to culture, and creative structuring. Lectures from musicologists, ethnomusicologists, and composers/theorists combined with small sections in which students develop wide range of musicianship skills. Organized around broad ideas (performance, multimedia, time, place, and more) where creative and cultural implications are explored through analysis and discussion of broad repertoire of musical works spanning historical and cultural traditions. Compositional exercises, production of short compositions, and short papers dealing with historical and cultural issues required. Letter grading.

10A-10B-10C. World Music Theory and Musician- ship. (2-2-2) Lecture, two hours; discussion, four hours; laboratory, two hours; outside study, seven hours. Course 10A is requisite to 10B, which is requisite to 10C. Limited to Ethnomusicology and World Arts and Cultures majors. Introduction to and participation in musical systems of selected world cultures through aural and written notations, vocal and instrumental skills, melodic and rhythmic dictation, improvisation, and composition. Letter grading.

11A-11B-11C. World Music Systems and Structures. (5-5-5) Lecture, four hours; discussion, four hours; outside study, seven hours. Requisite: course 10C. Course 11A is requisite to 11B, which is requisite to 11C. Limited to Ethnomusicology majors. Students must receive grade of C or better to proceed to next course. Advanced study and analysis of musical systems and aesthetic concepts from selected world cultures through aural and written notations, vocal and instrumental skills, melodic and rhythmic dictation, improvisation, and composition. Letter grading.

15. American Blues. (5) Lecture, four hours; discussion, three hours. Impact of ethnicity, race, gender, and other social processes on American music in late 20th century; use of creativity and music in and contemporary social processes. P/NP or letter grading.

20A-20B-20C. Musical Cultures of World. (5-5-5) Lecture, four hours; discussion, one hour; outside study, 10 hours. Traditional and popular musics from many different countries, with introduction to basic ethnomusicological concepts and development of listening and analytical skills. P/NP or letter grading.

25. Global Pop. (5) Lecture, four hours; discussion, one hour. Development of world music or world beat, including its meaning and importance to contemporary culture as well as its history and impact. P/NP or letter grading.

30. Music and Media. (5) Lecture, four hours; discussion, one hour. Exploration of ways music is mediated to people by industry, technologies, and corporations. Survey of leading theorists of media and exploration of case studies. P/NP or letter grading.

35. Blues, Society, and American Culture. (5) Lecture, four hours; discussion, one hour. Sociocultural history and survey of blues music tradition from its roots in African musical and dance cultures through emergence in African American oral culture, with emphasis on philosophical underpinnings and social and political impact of blues and its influence on development of country, jazz, gospel, rhythm and blues, rock, hip-hop music, and other media. P/NP or letter grading.

40. Music and Religion. (5) Lecture, four hours; discussion, one hour. Survey of nature, role, and power of music in religious rituals around the world, covering music and ritual of Hinduism, Buddhism, Judaism, Christianity, Islam, and syncretic religious practices in America such as African American gospel music, Brazilian Candomble, Cuban Santeria, and Haitian Voudou. Letter grading.

45. Music of Bollywood and Beyond. (5) Lecture, four hours; discussion, one hour; outside study, 10 hours. History and development of South Asian film scores in their filmic context, especially omnipresent songs that most distinctly characterize this genre. P/NP or letter grading.

50A-50B. Jazz in American Culture. (5-5) Lecture, four hours; discussion, one hour. Course 50A is not requisite to 50B. Survey of development of jazz in American culture. Discussion of different composition-al-performance techniques and approaches that distinguish different sub-styles of jazz from one another, as well as historical and theoretical topics that shaped development of jazz from its early years through modern jazz. Important historical social issues (segregation, Depression, World Wars), musical developments that intersect with history of U.S. and jazz music. P/NP or letter grading.

50A. Late 19th Century through 1940s. 50B. 1940s to Present. Letter grading.

71. Instruction in Jazz Performance. (2) Studio, six hours. Limited to Ethnomusicology jazz studies majors. Knowledge of jazz repertoire, concepts, and techniques gained through private lessons on specific instruments and voice. Students meet weekly with instructor to demonstrate their performance skills and receive assessment of their progress in learning material. May be repeated for maximum of 12 units. Letter grading.

M87. Special Courses in Music. (5) (Same as Music M89 and Music History M87.) Lecture, four hours; discussion, four hours. Limited to undergraduate Ethnomusicology, Music, and Music History majors. Study and analysis of current and special topics in ethnomusicology, music, and music history taught by resident and visiting faculty members. May be repeated for credit with topic and instructor change. Letter grading.

91A-91Z. World Music Performance Organization. (Formerly numbered CM110A-CM110B.) Lecture, four hours; discussion, one hour. Survey of world music performance organizations and practices in contemporary societies. Eclectic presentation of diverse and perhaps most important bodies of music ever produced in U.S. Covers many contributions of other art forms, and uses of music by shamans, musical structures, and use of indigenous music in creating nationalist and popular idioms. Letter grading.

M108A-108B. Music of Latin America. (5-5) Lecture, four hours; discussion, one hour. Course M108A is not requisite to 108B. Survey of traditional and contemporary musical culture. P/NP or letter grading.

M108A. Mexico, Central America, and Caribbean Isles. (Same as Chicana and Chicano Studies M108A.) 108B. Latin South America.

M109. Women in Jazz. (4) (Same as Afro-American Studies M109 and Women's Studies M109.) Lecture, four hours; discussion, one hour. Exploration of women's contributions to world and American popular music from 1880s to present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

M110A-M110B. African American Musical Heritage. (5-5) (Formerly numbered CM110A-CM110B.) Lecture, three hours; Music of Duke Ellington, his life, and far-reaching influence of his efforts. El- lington’s music, known as “Ellingtonia,” is one of largest and perhaps most important bodies of music ever produced in U.S. Covers many contributions of other art forms, and uses of music by shamans, musical structures, and use of indigenous music in creating nationalist and popular idioms. Letter grading.

M111. Ellingtonia. (4) Lecture, four hours; discussion, one hour. Survey of world music performance organizations and practices in contemporary societies. Eclectic presentation of diverse and perhaps most important bodies of music ever produced in U.S. Covers many contributions of other art forms, and uses of music by shamans, musical structures, and use of indigenous music in creating nationalist and popular idioms. Letter grading.

M113. Music of Brazil. (4) Lecture, four hours; outside study, eight hours. Designed for junior/senior Ethnomusicology majors in public ethnomusicology emphasis. How music industry functions and how products are created, marketed, and consumed. Basic information on production of recordings and legal issues faced by musicians and producers who use music in their work. P/NP or letter grading.

M106B. Contemporary North American Indian Music. (4) Lecture, three hours; discussion, one hour. Contemporary Native American musical expressions, including popular styles (folk, country, rock), intertribal Indian musical genres (powwow), syncretic religious music, and traditional/historic Pan-Indian music. P/NP or letter grading.

107. South American Indian Music. (4) Lecture, four hours; outside study, eight hours. Native South American traditional music and its role in indigenous societies. May include related music: speech and song, use of music by shamans, musical structures, and use of indigenous music in creating nationalist and popular idioms. Letter grading.

M108A-108B. Music of Latin America. (5-5) Lecture, four hours; discussion, one hour. Course M108A is not requisite to 108B. Survey of traditional and contemporary musical culture. P/NP or letter grading.

M108A. Mexico, Central America, and Caribbean Isles. (Same as Chicana and Chicano Studies M108B.) 108B. Latin South America.

M109. Women in Jazz. (4) (Same as Afro-American Studies M109 and Women's Studies M109.) Lecture, four hours; discussion, one hour. Exploration of women's contributions to world and American popular music from 1880s to present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

M110A-M110B. African American Musical Heritage. (5-5) (Formerly numbered CM110A-CM110B.) Lecture, three hours; Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington’s music, known as “Ellingtonia,” is one of largest and perhaps most important bodies of music ever produced in U.S. Covers many contributions of other art forms, and uses of music by shamans, musical structures, and use of indigenous music in creating nationalist and popular idioms. Letter grading.

CM112. African American Music in California. (4) (Same as Afro-American Studies CM112A.) Lecture, four hours. Historical and analytical examination of African American music in California, including history, migration patterns, and music styles that determined their impact on development of African American music in California. Concurrently scheduled with course CM212. P/NP or letter grading.

113. Music of Brazil. (4) Lecture, three hours. History of Brazilian music and its many unique and some reference to Portuguese antecedents. P/NP or letter grading.
117. American Popular Music. (4) Lecture, four hours; discussion, one hour. Survey of history and characteristics of American popular music and its relationship to American culture, with emphasis on 20th-century popular music and its major composers, including comparison between traditional pre-1950 popular music and trends in post-1950 popular music. P/NP or letter grading.

118. Development of Rock. (5) Lecture, four hours. Examination of historical and stylistic development of rock from 1950s to present, with attention to its sociocultural and political implications for American society and beyond. P/NP or letter grading.

119. Cultural History of Rap. (5) Same as Afro-American Studies M107.) Lecture, four hours; discussion, one hour. Introduction to development of rap music and hip-hop culture, with emphasis on musical and verbal qualities, philosophical and political ideologies, gender representation, and influences on cinema and popular culture. P/NP or letter grading.

120A-120B. Development of Jazz. (4-4) Lecture, four hours; discussion, one hour. Introduction to jazz; its historical background and its development in U.S. P/NP or letter grading.

121. Cross-Cultural Perspectives in Jazz. (4) Lecture, four hours. Exploration of assimilation and retention of jazz from U.S. in various countries, with particular emphasis on cultural and social features that form basis for new jazz-ethnic music blends. P/NP or letter grading.

C122A-C122B-C122C. Jazz Styles and Analysis. (4-4-4) Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology, Music, and Music History majors. Analysis of jazz styles and repertoire intended for students with music backgrounds. Concurrently scheduled with courses C222A-C222B-C222C. Letter grading.

C122E. Early Jazz to Swing Era. C122F. Bebop to Avant-garde. C122G. Jazz since Sixties.

123. Music of Bebop. (4) Lecture, three hours. Study of jazz bebop tradition, including analysis of compositions and song forms, styles of improvisation, and developments from 1940 to present. P/NP or letter grading.

124. Electric Music of Miles Davis. (4) Lecture, four hours; outside study, eight hours. Enforced requisite: course 11C. Careful examination of artistic body of Miles Davis’ electric music (1967 to 1991). Influences and imperatives that fueled his daring move from acoustic jazz to electric music. Examination of Davis’ complex relationship with music industry as his art moved through periods of multidimensional growth and evolutionary development. Much detail to his use of contemporary jazz, funk, rhythm and blues, rock, southern and west African, Brazilian, European avant-garde, Cuban, Indian, flamenco, and ambient music. Concurrently scheduled with course C224. Letter grading.

125A-125B-125C. Jazz Composition and Arranging. (2-2-2) Lecture, two hours; outside study, four hours. Examination of various aspects of jazz composition. Differentiation between improvisation and notated composition. Exploration of various years of development in arranging, and introduction to basic arranging concepts. Letter grading.

125A. Early Jazz to Swing Era; 125B. Bebop to Avant-garde; 125C. Jazz since Sixties.

126A. Introduction to Jazz Arranging and Orches- tration. (2) Seminar, two hours. Requisite: course 129C. Study and practice of skills used in arranging and orchestrating music in jazz idiom. Students create and orchestrate their own arrangements. Study of specific instruments and their unique use and application in jazz (jazz notation and theory, transposition, woodwind doublings, brass mutes, etc.). Writing for smaller ensembles, culminating with arrangements to be read by one UCLA Jazz Combo. Letter grading.

126B. Jazz Arranging and Orchestration. (2) Seminar, two hours. Requisite: courses 126A, 126B, 129C. Continuation of concepts from course 126A, with focus on full sectional writing and in-depth score analysis. Culminates with arrangements to be read by UCLA Jazz Orchestra I. Letter grading.

126C. Advanced Jazz Arranging and Orchestration. (2) Seminar, two hours. Requisites: courses 126A, 126B, 129C. Continuation of concepts from course 126B, with focus on contributions of noteworthy arrangers/orchestrators. Culminates with arrangements to be read by UCLA Jazz Orchestra I.

129A. Basic jazz harmonic constructions, as well as melodic, rhythmic, and harmonic concepts, and how to apply those elements to personal efforts in improvisations. 129B. Requisite: course 129A with grade of C or better. Medium-level jazz harmonic constructions. 129C. Requisite: course 129B with grade of C or better. Advanced-level jazz harmonic constructions.

150. Culture of Peking Opera; 150A. Elements of Peking Opera; 150B. As Anthropology M142R and World Arts and Cultures M136.) Lecture, three hours. Requisite: course 20A or 20B or 20C or Anthropology 9 or 33 or World Arts and Cultures 20. Aesthetics of jazz from point of view of worthy arrangers/orchestrators. Letter grading.

150C. History of Chinese Opera. (5) Lecture, four hours; outside study, eight hours. Designed for under-graduate Ethnomusicology, Music, Music History, and World Arts and Cultures majors. Survey of music from China’s border regions and neighboring countries: traditional and modern Peking opera and its relation to Cantonese and other genres. P/NP or letter grading.

150D-150E-150F. Studies in Chinese Instrumental Music. (4-4-4) Lecture, three hours; laboratory, one hour. P/NP or letter grading. 150B. Study of literature, major sources, paleography, theory, and philosophy of Chinese music, including transcription and analysis. 150C. Comprehensive study of Chinese musical instruments, classification system, specific musical notation, and use in context of Chinese society.

151. Music on China’s Periphery. (4) Lecture, four hours; outside study, eight hours. Designed for under-graduate Ethnomusicology, Music, Music History, and World Arts and Cultures majors. Survey of music from China’s border regions and neighboring countries: technical musical characteristics and important concepts related to traditional and modern styles from Mongolia, Uighurs of Xinjiang, Tibet, Tibet-Burman peoples, Hmong, and indigenous peoples of Taiwan. Concurrently scheduled with course C259. P/NP or letter grading.

160. Survey of Music in Japan. (4) Lecture, three hours. Survey of main genres of Japanese traditional music, including gagaku, Buddhist chant, Biwa music, Koto music, Shamisen music, and music used in various theatrical forms, P/NP or letter grading.

161A-161Z. Advanced World Music Performance Organizations. (2 each) Activity, three hours; outside practice, three hours. Limited to Ethnomusicology majors. Advanced study of traditional vocal and instrumental world music. May be repeated for credit without limitation. Letter grading.

163. Pathways to Composition. (4) Lecture, four hours. Enforced requisite: course 11C. Fresh new approaches to composing music for both beginning and experienced composers, while looking at pieces from jazz, popular, electronic, and world music repertoires to gain perspective and skills. Group composition exercises, with improvisation as potent composition tool. Exploration of compositions in myriad of styles to see how different composers develop melodic phrases into musical statements. Observation of how composers create sense of dramatic flow, with composition of student pieces based on these concepts. Study of various composers’ use of musical language and techniques and call and response, and element of surprise to keep student compositions fresh and dynamic. Writing of compositions based on prosodic and graphic images by interweaving musical ideas with concepts from visual art, drama, and film. Letter grading.

164. World Music Composition. (4) Lecture, three hours; laboratory, three hours; outside study, six hours. Prerequisites: courses 11A, 11B, 11C. Limited to Ethnomusicology majors. Examination in composition using variety of Western and non-Western musical systems. Final project required. Letter grading.

C165. First-Year Composition. (4) Lecture, four hours; outside study, eight hours. Enforced requisite: course 11C. Evaluation of important musical concepts and approaches to enable students to develop greater technical proficiency and understanding. Ways composers of jazz, European classical, and other musical genres have successfully approached use of extended compositional forms. Examination of way in which world music traditions have intersected with jazz and other types of music to create new musical languages. Use of concepts, structural paradigms, and inspiration from literature, visual arts, and other sources to develop compositions. Concurrently scheduled with course C270. Letter grading.

C169. Music, Science, and Technology. (4) Lecture, four hours; laboratory, four hours; outside study, four hours. Individual contract with supervising faculty member required. Letter grading.

170. Acoustics. (4) Lecture, four hours; discussion, one hour. Techniques of pure research, basic and theoretical in science and empiricism, experimental semiotics and aesthetics, acoustics, model building. Concurrently scheduled with course CM286. Letter grading.

171. Instruction in Advanced Jazz Performance. (2) Laboratory, one hour. Preparation: advanced performance ability as demonstrated by audition. Study of jazz repertoire and techniques for specific instruments and voice. May be repeated for maximum of 12 units. Letter grading.

172A. Cognitive Psychology of Music. (4) Lecture, four hours; discussion, one hour. Designed for nonmajors. Examination of psychology of music, historical background and broad field of study, including use of music as stimulus, tests and measurements, and related phenomena. Tuning systems, consonance and dissonance, tone quality. Lecture, demonstration, and discussion; tours of institutional collections and acoustical research facilities. Letter grading.

176. Psychology of Film Music. (4) Lecture, four hours; outside study, eight hours. Exploration of music in film, animation, and dance through lens of cognitive psychology, with focus on interpretation of film music relative to model of musical meaning. Concurrently scheduled with course C276. Letter grading.

177. Jazz Combo. (2) Activity, two hours; laboratory, four hours. Small group performance of various styles in ensembles of three to 10 musicians. Minimum of 12 units required for jazz studies concentration students. May be repeated for maximum of 18 units. Letter grading.

181. Anthropology of Music. (4) Lecture, four hours. Designed for Ethnomusicology, Music History, and Anthropology majors. Cross-cultural examination of use of music in context of social behavior and how musical patterns reflect patterns exhibited in other cultural systems, including economic, political, religious, and social structures. P/NP or letter grading.

182. Music Industry. (4) (Formerly numbered C182.) (Same as Music CM182 and Music History CM186.) Lecture, four hours; discussion, one hour; outside study, seven hours. Limited to Ethnomusicology, Music, and Music History majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM288. Letter grading.

183. Study of Ethnomusicology. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 10A, 10B, 10C, 20A, 20B, 20C. Designed for Ethnomusiciology majors. Introduction to history of field, basic fieldwork and analysis methods, and current issues in research. Letter grading.

C184. Public Ethnomusicology. (4) Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology majors. How music industry functions and how products are created, marketed, and consumed. Techniques of pure research, basic and theoretical in nature, contrasted with those of applied research, practical and policy-oriented in approach. Concurrently scheduled with course C286. Letter grading.

186. Senior Recital or Project. (2) Tutorial, one hour. Limited to seniors. Final project for students who, with approval from their faculty advisers, perform one-hour recital or have performed in one-hour recital. Organization and arrangement of rehearsals and performances. Letter grading.

188. Special Courses in Ethnomusicology. (4) Lecture, four hours; outside study, eight hours. Selected topics in Ethnomusicology Consult Schedule of Classes for topics and instructors. May be repeated for credit. P/NP or letter grading.

193. Journal Club Seminars: Ethnomusicology. (2) Seminar, two hours; outside study, four hours. Limited to undergraduate students. Reading and discussion of writings on subjects in ethnomusicology. May be repeated for credit. P/NP grading.

195A. Community or Corporate Internships in Ethnomusicology. (2 to 4) (Formerly numbered 195.) Tutorial, six to 12 hours. Limited to juniors/seniors with minimum cumulative 3.0 grade-point average. Internship in supervised setting in community agency or private business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.

195B. Community or Corporate Internships in Public Ethnomusicology. (2 to 4) Tutorial, six to 12 hours. Limited to seniors in public ethnomusicology emphasis. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide weekly reports of their experience. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP grading.

196. World Music Teaching Practicum. (4) Seminar, two hours; fieldwork, three hours; outside study, seven hours. Limited to junior/senior Ethnomusicology majors. Study and practice of teaching world music repertoire. Placement in schools, labs, or non-musical settings. Concurrently scheduled with course CM288. Letter grading.

197E. Individual Studies in Ethnomusicology. (2 to 4) Tutorial, one hour; outside study, five to 11 hours. Preparation: 3.0 grade-point average. Limited to seniors. Individual intensive study in ethnomusicology, with scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter resulting in final research project required. May be repeated for maximum of 8 units. Individual contract required. Letter grading.

197F. Individual Studies in Ethnomusicology. (4) Tutorial, four hours; fieldwork, five to 11 hours. Preparation: 3.0 grade-point average. Limited to seniors. Individual intensive study in ethnomusicology, with scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter resulting in final research project required. May be repeated for maximum of 8 units. Individual contract required. Letter grading.

Graduate Courses

C200. Audiovisual Archiving in 21st Century. (4) Seminar, three hours. Designed for Ethnomusicology majors. Examination of history, present state, and future of audiovisual archives, with specific focus on ethics, copyright, contracts, fieldwork, preservation, and access and issues related to technology, space, budgets, and staffing. Concurrently scheduled with course C100. S/U or letter grading.

201. History of Ethnomusicology. (4) Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Basic literature and schools of thought in field of ethnomusicology from late 19th century to 1980s. Letter grading.

202. Current Issues in Ethnomusicology. (4) Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Current issues, basic literature, and schools of thought in field of ethnomusicology from 1980s to present. Letter grading.

C204. Aesthetic and Philosophical Foundations in Systems Musicology. (4) Seminar, three hours; outside study, nine hours. Limited to Ethnomusicology majors. Comprehensive overview of critical approaches to aesthetics in systematic musicology. Exploration of aesthetic, theoretical, and philosophical aspects of music, including music history, culture, and society. Concurrently scheduled with course C178. Letter grading.

205. Seminar: Information Technology and Research Skills. (4) Seminar, three hours. Limited to graduate ethnomusicology students. Lecture, demonstration, and practice. Basic skills for research on and about music that is essential to student careers as ethnomusicologists, specifically information technology skills, acoustics, and representational tools for nontlinguistic acoustic phenomena. Basic understanding of acoustics, ability to represent sounds in various graphic forms appropriate to them, and ability to locate and organize information sources related to field of ethnomusicology. Letter grading.

206. International Perspectives with Ethnography. (4) Seminar, three hours. Designed to show how theory and primary research cannot exist without each other, and how various authors have integrated theoretical writings and their own ethnographic or historical data. Reading of several recent ethnographies, mostly about music and possibly historical studies, in tandem with theoretical writings that inform arguments of these books. Letter grading.

208. Seminar: Latin American Music. (4) Seminar, three hours. Review of bibliographic, methodological, and philosophical bases of musical research in Latin America, working from both general and specific perspectives. Exploration of research problems and investigations on specific musical cultures and distinct genres of musical expression. S/U or letter grading.

CM212. African American Music in California. (4) (Same as Africana Studies CM212A.) Lecture, four hours. Historical and analytical examination of African American music in California, including history, migration patterns, and urbanism to determine their impact on African American music in California. Concurrently scheduled with course CM112. S/U or letter grading.

C222A-C222B-C222C. Jazz Styles and Analysis. (4-4-4) Lecture, three hours; outside study, two hours; laboratory, one hour. Designed for Ethnomusicology, Music, and Musicology majors. In-depth analysis of jazz styles and repertoire intended for students with music backgrounds. Concurrently scheduled with course C222A-C222B-C222C. Letter grading. C222A. Early Jazz to Swing Era; C222B. Bebop to Avant-garde; C222C. Jazz since Sixties.

C224. Electric Music of Miles Davis. (4) Lecture, four hours; outside study, eight hours. Limited to graduate students. Careful examination of artistic body of Miles Davis’ electric music (1967 to 1991). Influences and impact for music making from acoustic to electric to jazz to electric music. Examination of Davis’ complex and challenging relationship with music industry as his art moved through periods of multidimensional growth and evolutionary development. Much detail to his use of contemporary jazz, funk, rhythm and blues, rock, southern and west African, Brazilian, European avant-garde, Cuban, Indian, flamenco, and ambient music. Concurrently scheduled with course C124. Letter grading.

230. European Musics: Politics, Identities, Nationalisms. (4) Seminar, three hours; outside study, nine hours. Designed for graduate students. European classical, popular, and traditional musics, with particular attention to way in which music mirrors, negotiates, and contests ideas about and practices of national and other forms of identity, ideas developed in other domains of discourse and practice such as philosophy, history, literature, art, and folklore. Examination of way musicians, ordinary people, and politicians have used music to affect political processes involved in contesting and resolving tensions created between and among these identity formations. Historical period coverage primarily from 19th and 20th centuries, with examples from all over European continent. Letter grading.

C233A-C233B. Electric Music of Indonesia. (0-0-4) Discussion, one hour. Review of literature on European traditional and popular music, with special attention to modern issues and processes. May be taken twice for credit with different emphases. In Progress C233A, C233B and letter (C233C) grading.

C236B. Music of Africa. (4) Lecture, four hours; outside study, eight hours. Introduction to music of various African cultures and regions. Through readings, lectures, viewing of films, and analysis of music, students gain greater understanding of diverse musical traditions found on African continent and become more cognizant of contributions that people of Africa have made to world music. Concurrently scheduled with course C136B. Letter grading.

240. Music of Arabic-Speaking Near East. (4) Lecture, three hours. Requisite: course 228 or course in ear training, analysis, and theory. Comparative study of music of Iran and other related areas, including Turkey, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technique, and practice. Emphasis on improvisation, and 20th-century trends. Concurrent participation in Near East performance ensemble (course 91N) required. S/U or letter grading.

241. Music of Iran and Other Non-Arabic-Speaking Communities. (4) Lecture, three hours. Requisite: course 282 or course in ear training, analysis, and theory. Comparative study of music of Iran and other related areas, including Turkey, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technique, and practice. Emphasis on improvisation, and 20th-century trends. Concurrent participation in Near East performance ensemble (course 91N) required. S/U or letter grading.

251. Music of Indonesia. (4) Lecture, three hours; outside study, nine hours. Requisite: course 20C. Emphasis on music and related performing arts of Java, Bali, and other Indonesian islands. Concurrent participation in one Indonesian performance group (course 91B or 91H) required. S/U or letter grading.

256A. Music in China. (4) Lecture, four hours. Requisite: course 20C. Required for all Ethnomusicology majors. Survey of traditional, popular, and Western-influenced music currently widespread in China, including musical analysis of different genres; examination of contexts in which they exist. Investigation of profound effect of Confucian and Communist ideologies on music. Concurrently scheduled with course C156A. Letter grading.

259. Music on China’s Periphery. (4) Lecture, four hours; outside study, eight hours. Designed for graduate Ethnomusicology, Music, Musicology, and World Arts and Cultures majors. Survey of music from China’s major ethnic minorities, with emphasis on musical characteristics and important contextual issues related to traditional and modern styles from Mongolia, Uighurs of Xinjiang, Tibet, Tibet-Burman peoples of the Himalayas, and indigenous peoples of Taiwan. Concurrently scheduled with course C159. S/U or letter grading.

M261. Gender and Music in Cross-Cultural Perspective. (4) (Same as Women’s Studies M261.) Seminar, three hours. Designed to foster in-depth understanding of gender in study of music as culture. Topics range from ethnography of gender and sexuality, (de)codification of messages of resistance, and gender and politics of popular music. Limited to Ethnomusicology majors. S/U or letter grading.

262. Musical Ethnography. (4) Seminar, three hours; outside study, nine hours. Examination of selected book-length ethnographies, most published in last 10 years, as both literary genre and research procedure. S/U or letter grading.

263. Perspectives in Popular Music Research. (4) Seminar, three hours. Investigation of theoretical paradigms, issues, and research processes of popular music, with emphasis on world music genres, local/global markets, mass mediation, appropriation and aesthetics of style, ethnographic methods, and impact of popular music around the world. Limited to Ethnomusicology majors. S/U or letter grading.

264. Urbanism and Music. (4) Seminar, three hours; outside study, nine hours. Theoretical and methodological issues in study of city as cultural entity that affects and is affected by music making. S/U or letter grading.

265. Religion and Music. (4) Seminar, three hours; outside study, nine hours. Cross-cultural examination of role of musical expression as spiritual medium and as artistic expression in world religions. S/U or letter grading.

266. Charles Seeger’s Life and Thought. (4) Seminar, three hours; outside study, nine hours. Charles Seeger’s (1886 to 1979) major writings and influence on ethnomusicological methods and research. Charles Seeger encouraged students to consider music from all over European continent. S/U or letter grading.

267. Music and Ecstasy. (4) Seminar, three hours; outside study, nine hours. Relationship between music and consciousness in different world cultures and role music plays in ecstatic experiences. Phenomena include trance, spirit possession, shamanism, religious ecstasy, mysticism, and artistic inspiration. S/U or letter grading.

268. Modernity and Musical Experience. (4) Seminar, three hours; outside study, ten hours. Limited to graduate students. Examination of subject-centered musical ethnography to account for fragmented musical experience in modern world. Consider-
eration of local and world musics in relation to modernity, postmodernity, globality, notions of self and subject, power, and media images. Letter grading.

C269. Music, Science, and Technology. (4) Lecture, four hours; laboratory, four hours; outside study, four hours. Designed for Ethnomusicology, Music, and Musicology majors. Application of science and technology for creation and dissemination of music. Introduction to tools and techniques such as CD mastering, digital sampling, recording, and music synthesis, as well as scientific principles underlying such technologies. Concurrently scheduled with course C169. Letter grading.

C270. Selected Topics in Composition. (4) Lecture, four hours; outside study, eight hours. Limited to graduates. Examination of important musical concepts and approaches to enable students to develop greater compositional technique and understanding. Ways composers of jazz, European classical, and other musical genres have successfully approached use of extended compositional forms. Examination of way in which world music traditions have interfaced with jazz and other types of music to create new musical languages. Use of concepts, structural paradigms, and inspiration from literature, visual arts, and other sources to develop student compositions. Concurrently scheduled with course C165. Letter grading.

271. Seminar: History of Styles of Music. (6) Seminar; three hours. Requisite: course 170. Selected topics in acoustics, including laboratory methodologies and practical applications. Topics include Western and non-Western musical systems, psychoacoustics, and methods of spectral analysis. May be repeated once for credit. S/U or letter grading.

273. Seminar: Psychology of Music. (6) Seminar, three hours. Selected topics in psychology of music, including recent findings in brain research, musical perception, learning, cognition, memory, therapy, affect, meaning, and measurement. May be repeated once for credit. S/U or letter grading.

275. Seminar: Aesthetics of Music. (6) Seminar, three hours. Specific topics in Western and non-Western aesthetic thought, including value, meaning (semiotics), historical development of theoretical perspectives and critical theory, and interpretation. May be repeated once for credit. S/U or letter grading.

276. Psychology of Film Music. (4) Lecture, four hours; outside study, eight hours. Exploration of music in film, animation, and dance through lens of cognitive psychology, with focus on perception and interpretation of film music relative to model of musical meaning. Concurrently scheduled with course C176. Letter grading.

279. Seminar: Systematic Musicology. (4) Seminar, three hours. Requisite: course 170. Exploration of specific topics in general field of systematic musicology covering disciplines such as anthropology, acoustics, aesthetics, music perception, philosophy, organology, sociology, and experimental approaches. May be repeated for credit. S/U or letter grading.

280. Teaching World Music and Music Appreciation. (4) Seminar, three hours. Preparation: two ethnomusicology courses or concurrent enrollment in course 20A, 20B, or 20C. Designed for ethnomusicology and musicology graduate students. Practical overview of current pedagogical philosophies and texts used in teaching introductory music survey courses, specifically music appreciation and general world music. Letter grading.

281A-281B. Seminars: Field and Laboratory Methods in Ethnomusicology. (6-8) Seminar, three hours; laboratory, two hours. Requisites: courses 201, 202. Fieldwork concepts and methods using technical equipment, conducting interviews, dealing with ethical issues, and designing research projects. S/U or letter grading.

285. Seminar: Comparative Music Theory. (6) Seminar, three hours. Comparative study of codified music theories of select cultures — Western and non-Western — considered in themselves and as expressions of their societies. Theory considered as science of music; its place between cultural values and artistic practice in different civilizations. S/U or letter grading.

286. Public Ethnomusicology. (4) Lecture, four hours; outside study, eight hours. Designed for ethnomusicology majors. How music industry functions and how products are created, marketed, and consumed. Techniques of pure research, basic and theoretical in nature, contrasted with those of applied research, practical and policy-oriented in approach. Concurrently scheduled with course C184. Letter grading.

CM288. Music Industry. (4) Formerly numbered C288S. (Same as Music CM292 and Musicology CM288.) Lecture, four hours; discussion, one hour; outside study, eight hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM182. Letter grading.

289. Research Design and Grant Writing in Ethnomu- sicology. (4) Seminar, three hours; outside study, nine hours. Design of dissertation research proposal, locating and applying for dissertation fieldwork grants, organizing and presenting advanced academic proposals with sophisticated industry functions and professional writing skills. S/U or letter grading.

291. Ethnomusicology Colloquium Series. (1) Research group meeting, one hour. Limited to graduate ethnomusicology students. Introduction to new trends and issues in discipline of ethnomusicology in effort to strengthen ties and community within department. Topics vary from term to term and consist of presentations by guest lecturers, faculty members, and students. May be repeated for credit. S/U grading.

292A-292Z. Seminars: Special Topics in Ethnomu- sicology. (4 each) Seminar, four hours. Designed for graduate students. Utilization of special interests and expertise of regular and visiting faculty; topics of current interest presently offered in ethnomusicology program. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495A. Teaching Apprentice Practicum. (2) Eight two-hour weekly seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Ethnomusicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching ethnomusicology and systematic musicology at college level. May not be applied toward degree requirements. S/U grading.

495B. Teaching with Technology. (2) Seminar, three hours; outside study, three hours. Limited to graduate ethnomusicology students. Training in presentation, spreadsheet, web design, and digitization software, and its application in classroom and in preparation of electronic teaching portfolio. S/U grading.

596. Directed Individual Studies. (2, 4, or 6) Tutorial, to be arranged. Only 4 units may be applied toward M.A. minimum course requirements. S/U or letter grading.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations. (2 or 4) Tutorial, to be arranged. May be repeated for credit. S/U grading.

598. Guidance of M.A. Thesis. (4, 8, or 12) Tutorial, to be arranged. May be repeated for credit. S/U grading.

Françoise Lionnet, Ph.D. (Comparative Literature, French and Francophone Studies)
Mitchell B. Morris, Ph.D. (Musicology)
Michael E. Shin, Ph.D. (Geography)

Scope and Objectives

The European Studies major equips students to appreciate the richness of European cultures, societies, and languages that are fundamental to the understanding of modern Europe. The strongly pan-European program provides the opportunity to study this region from the vantage points of several disciplines in the humanities and social sciences.

The major aims to break down the traditional distinctions between the eastern and western blocs in light of important internal and global transformations and the rise of the European Union pertaining to cultural, economic, political, and social structures that are happening in Europe today.

Undergraduate Study

The European Studies major is designated a capstone major. Students complete either a variable topics seminar or directed research in European studies. Through their capstone work, students engage in in-depth analysis of selected topics in European studies, demonstrate a critical understanding of issues relevant to modern Europe, perform scholarly research and presentations on selected topics, and engage with other students in a seminar setting.
European Studies B.A.

Capstone Major

The B.A. degree in European Studies is based on four principles: (1) students acquire proficiency in a modern European language other than English, (2) students examine European societies and civilization in depth from a pan-European and regional perspective, in addition to the traditional national focus that language instruction typically provides, (3) they do so from an interdisciplinary point of view, taking courses in at least five different academic departments/programs, and (4) they take lower division courses to acquire a broad introduction to European heritage and upper division courses to study modern Europe in greater detail from the 19th century on.

Preparation for the Major

The preparation for the major consists of 24 to 30 units of foreign language, 8 units of humanities and arts courses, and 16 units of social sciences courses as follows:

Foreign Language (24 to 30 units): Students prepare for the major by studying one modern European language other than English — the declared foreign language — through the intermediate level. The relevant language departments are French and Francophone Studies (French), Germanic Languages (Dutch, German, and Yiddish), Italian, Scandinavian Section (Danish, Finnish, Norwegian, and Swedish), Slavic Languages and Literatures (Czech, Hungarian, Lithuanian, Polish, Romanian, Russian, Serbian/Croatian, and Ukrainian), and Spanish and Portuguese.

In most cases, courses 1, 2, 3, 4, 5, 6, or the equivalent fulfill the requirement. The total number of units may vary according to the selected language. Students should complete the lower division foreign language requirement by the end of their sophomore year. If students wish to study a modern European language not taught in full by any UCLA department, they should consult with the academic counselor about how to fulfill the language requirement.

Humanities and Arts (8 units): (1) One course in literature or civilization taught in a language department to be selected from Dutch 10, English 90, French 12, 14, 14W, 41, 60, German 50A, 50B, 56, 58, 59, 60W, 61A through 61D, 62W, Italian 42A, 42B, 46, 50A, 50B, Portuguese M35, Romanian 90, Russian 25, 25W, 30, 90A, 90B, 90BW, Scandinavian 40, 50, 50W, Slovak 90, Spanish M35, 42, 60A, 60C, or Yiddish 121A; (2) one course from Art History 54, Classics 10, 20, 30, 42, 51A, 51B, Comparative Literature 1A, 1B, 1C, Music History 3, 66, 68, Philosophy 1, 5, 6, or 8.

Social Sciences (16 units): (1) Two courses from two different departments selected from Economics 1, 2, 5, Geography 4, Information Studies 10, 20, Political Science 10, 20, 50, Sociology 1, 10, Statistics 10, 12; (2) two courses from one of the following series: History 1A, 1B, and 1C, or 2B, 2C, and 2D, or 3A, 3B, and 3C. Variable topics courses such as History 97C may also be applied toward the history requirement after consultation with the academic counselor.

To enter the major, students must have completed all preparation for the major requirements with an overall grade-point average of 2.5 or better. After satisfying the preparation requirements, students may declare the major in consultation with the academic counselor.

Transfer Students

Transfer applicants to the European Studies major with 90 or more units should complete as many of the following introductory courses as possible prior to admission to UCLA: two years of a modern European foreign language other than English, one language department course in European literature or civilization or one course in a European country’s literature or civilization, one course in a humanities and arts department with focus on Europe, two courses from two different social sciences departments that must have a distinct methodological or European content, and two European history courses.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

The major consists of European Studies 101 and 11 additional upper division courses with substantial modern European content in at least five different departments/programs, with no more than four courses in any one department/program, as follows:

Humanities and Arts (16 units): (1) One course taught in a modern European language other than English, with instruction and reading assignments in that language, to be selected from Dutch 131, French 109, 114A through 120, German 115, 116, 154, 160 through 166, 169 through 174, Italian 103A, 103B, 103C, 113 through 120, Portuguese 120A, 120B, C124, C126 through C129, Russian 108, 130A, 130B, 130C, 140A through 140D, 150, Spanish 120, Yiddish 131A, or 131B; (2) two courses with a pan-European or regional focus from Art History 110C, M110D, Philosophy 118, Scandinavian C141A, C144A, C145A, C145B, C146A, C147A, C147B, 155, 156, 161 (one course from the list of courses in item 1 may be applied); (3) one course with either a pan-European or regional focus from item 2 or a national focus selected from Art History 110A, 110B, Dutch 113, English 115B, French 137, German 102, 103, 104, Italian 110, 115B, Polish 152B, Russian 120 through 128, or Scandinavian 157.

Social Sciences (16 units): (1) One modern European history course from History 120A through 120D, 121D, 121E, 121F, 122F, 123B, 123C, 131A, 134B, 134C, 135C; (2) two courses with a pan-European or regional focus from Economics 181B, Geography 152, 183, Political Science 111C, 127A, 153A, 153B, 156B, Sociology M166 (one course from the list of courses in item 1 may be applied); (3) one course with either a pan-European or regional focus from item 1 or 2; (a) a national focus selected from History 124C, 125C, 125D, 127C, 127D, 128B, Political Science 128B, 152A, 152B, 152C, 156A.

Electives (12 units): One course from any approved humanities course list, one course from any approved social sciences course list, and a capstone research seminar or capstone directed research (European Studies 191 or 199) under the supervision of a faculty member, or a 195 internship course related to Europe.

Variable topics courses such as History 191C may be applied toward any of the above course requirements when they are relevant for the course category. Contact the academic counselor for more information.

European Studies Minor

Through an interdisciplinary curriculum, the European Studies minor offers students a modern and pan-European understanding of the region. It breaks down the traditional distinctions between the eastern and western blocs in the light of important internal and global transformations that are happening in Europe today.

To enter the minor, students must be in good academic standing (minimum 2.0 grade-point average) and have completed all lower division minor courses with a minimum overall GPA of 2.0.

Required Lower Division Courses (8 units): One humanities course on European literature or civilization selected from Comparative Literature 2C2, 4CW, Dutch 10, English 90, French 12, 14, 14W, 41, 60, German 50B, 56, 58, 59, 61A, Italian 42A, 46, 50A, 50B, Portuguese M35, Romanian 90, Russian 25, 25W, 30, 90A, 90B, 90BW, Scandinavian 40, 50, 50W, Slavic 90, Spanish M35, or 42 and one social sciences course selected from History 1A, 1B, 1C, 2B, 2C, 2D, 3A, 3B, or 3C. Students must have a minimum overall 2.0 grade-point average.

Required Upper Division Courses (20 units): European Studies 101, 191; one humanities course with a pan-European focus selected from Art History 110C, M110D, Central and East European Studies 126, Comparative Literature 126, Ethnomusicology 133, Film and Television 106B, Scandinavian C141A, C145A, C145B, C146A, C147A, C147B, 155, 156, 161, C180; one social sciences course with a pan-European focus selected from Geography 152, History 120A, 120B, 121D, 121E, 121F, 122F, 123A, 131A, 134B, 134C, 135C, M182D, Political Science 111C, 127A, 153A; one additional course from either the humanities or social sciences list above.

No more than two upper division courses (8 to 10 units) may be applied toward both this minor and students’ majors. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.
Study in Europe
European Studies majors and minors are highly encouraged to study abroad in Europe. Students can travel to Europe through a variety of programs with various lengths (summer or during the academic year). More information about travel abroad programs is available through the UCLA International Education Office, B300 Murphy Hall, (310) 825-4995, ideo@international.ucla.edu. See http://www.ideo.ucla.edu.

European Studies
Upper Division Courses
101. Introduction to European Studies. (4) Seminar, three hours. Designed for European Studies majors. Interdisciplinary seminar that introduces students to central topics, themes, and concepts of European studies, including individual and state, cultural life, economic relations, nationalism, and international relations. Letter grading.

191. Variable Topics Research Seminars: European Studies. (4) Seminar, three hours. Research seminar on selected topics in European studies. Reading, discussion, and development of culminating paper. May be repeated for credit with topic change. Letter grading.

193. Colloquia and Speaker Series: European Studies. (1) Seminar, two hours. Limited to undergraduate students. Introduction to current scholarship in field of European studies. Attendance at selected presentations with required response papers. May be repeated for credit. P/NP grading.

199. Directed Research in European Studies. (4) Tutorial, to be arranged. Limited to senior European Studies majors. Supervised individual research under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. Letter grading.

Family Medicine
Upper Division Course
199. Directed Research in Family Medicine. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Scope and Objectives
The purpose of the Film, Television, and Digital Media Department is to develop in its students a scholarly, creative, and professional approach to film, television, and digital art forms. The aim of the department is to train graduates who will eventually make original contributions in their chosen field.

The department offers an undergraduate minor in Film, Television, and Digital Media, an undergraduate program leading to the Bachelor of Arts in Film and Television, and graduate programs leading to the Master of Arts, Master of Fine Arts, and Ph.D. degrees in Film and Television.

For current or specific information about the programs and faculty members, see http://www.tft.ucla.edu/programs/ftvdm.

Undergraduate Study
The Film and Television major is a designated capstone major. Undergraduate students are required to complete one departmentally sponsored internship course as well as coursework related to the senior thesis concentration area. All courses, including capstone senior thesis projects, involve work shopping individual projects. Group participation in the creation and production of each student's project is core to the curriculum. Specific student learning objectives vary based on concentration area.

Film and Television B.A.

Capstone Major
The undergraduate Film and Television major encourages development of a personal vision that incorporates creative, practical, intellectual, and aesthetic values. Within the context of a liberal arts education, the program provides a broad background in the field and in the diversity of film and television practice, including courses in history and theory, critical thinking, animation, screenwriting, and the fundamentals of film, video, and television production.

Students are admitted for Fall Quarter only. Admission is highly competitive, and only a limited number of students can be accepted each year.

Prior to entry, students are expected to complete at least 90 quarter units (60 semester units) with a 3.0 grade-point average or better and the general education requirements of the School of Theater, Film, and Television. Applicants are also required to submit two letters of recommendation and a portfolio of original written work consisting of (1) a personal essay, (2) a critical essay on a film or major television program, and (3) a creative writing sample. For more specific information on admission requirements, see http://www.tft.ucla.edu/programs/ftvdm.

Due to curriculum changes, students in the Theater major are no longer allowed to change their major to Film and Television at the end of their sophomore year.

Preparation for the Major

Required: Film and Television 106A, 106B or 106C, 110A, and one theater course (history, literature, or production).

The Major

Required: Film and Television 100, 115, 123, 130, 154, 155, 163, 185; one cinema and media studies elective (not previously taken as preparation for the major) from 106A, 106C, 107, 108, 112, 113, 114, M117; one course from C132 or 134; one capstone departmentally sponsored internship (course 195) and one capstone senior thesis project (course 199); and a senior concentration (at least 20 units) from one of the following areas: (1) film production — courses 175A, 175B, 178, (2) television and video production/narrative — courses 165, 176A, 176B, (3) television and video production/documentary — courses 176A, 176B, 186, (4) screenwriting — courses 135A, 135B, 135C, (4) animation — courses 181A, 181B, 181C, (5) cinema and media studies — courses 106A, 106B, 106C, 107, 108, 110C, 112, 113, 114, M117.

Students should be mindful of the exigencies inherent in filmmaking and be prepared to meet the additional demands of time and costs.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasas/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Film, Television, and Digital Media offers Master of Arts (M.A.), Master of Fine Arts (M.F.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Film and Television.

Film and Television

Lower Division Courses

M50. Introduction to Visual Culture. (5) Same as English M50.) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: satisfaction of Entry-Level Writing requirement. Study of how visual media, including advertising, still and moving images, and narrative films, influence contemporary aesthetics, politics, and knowledge. P/NP or letter grading.

72. Production Practice in Film, Television, and Digital Media. (2 to 4) Lecture, three hours; laboratory, three hours. Exploration of research, analysis, and conceptualization of dramatic narrative and laboratory experience in one or more various aspects of contem-
porary production and postproduction practices for entertainment media, including theater, film, video, and digital media. May be repeated for maximum of 8 units. Letter grading.

Upper Division Courses

100. Undergraduate Symposium. (1 or 2) Laboratory, three hours. Limited to Film and Television majors. Structure and function in which undergraduate majors meet on regular basis to discuss curricular issues, meet with faculty, and have exposure to array of guest speakers from within film industry. May be repeated for maximum of 3 units. Letter grading.

101. Story and Style: Theory and Practices of Filmmaking. (5) Lecture, three hours; screenings, three hours. Systematic analysis of how filmmakers use sound and image to tell stories on screen. Viewing of selected films as case studies to understand relationship of theory to practice and to develop skills in critical thinking, analytical writing, and strategies for creating original film and video productions. P/NP or letter grading.

106A. History of American Motion Picture. (6) Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of American motion picture development as art form and as medium of mass communication. May be repeated once for credit with consent of department and topic change. Letter grading.

106B. History of European Motion Picture. (6) Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of European motion picture both as developing art form and as medium of mass communication. May be repeated once for credit with consent of department and topic change. Letter grading.

106C. History of African, Asian, and Latin American Film. (6) Lecture/screenings, eight hours; discussion, one hour. Critical analysis of film and industry cinema, avant garde) with specific investigative of selected directors working in various genres and modes of production (e.g., silent cinema, industry cinema, avant garde) with specific investigation of African, Asian, Latin American, and Mexican films. Letter grading.

107. Experimental Film. (6) Lecture/screenings, eight hours; discussion, one hour. Study and analysis of unconventional developments in motion pictures. P/NP or letter grading.

108. History of Documentary Film. (6) Lecture/screenings, eight hours; discussion, one hour. Critical survey of American television history from its inception to present. Examination of interrelationships between program forms, industrial paradigms, social trends, and culture. Starting with television's hybrid origins in radio, theater, and film, contextualization, viewing, and discussion of key television shows, as well as Hollywood films that comment on radio and television. Consideration of television programs and series in terms of sociocultural issues (consumership, lifestyle, gender, race, national identity) and industrial practice (programming, policy, regulation, business). Letter grading.

110A. American Television History. (5) Lecture/screenings, five hours; discussion, one hour. Critical survey of American television history from its inception to present. Examination of interrelationships between program forms, industrial paradigms, social trends, and culture. Starting with television's hybrid origins in radio, theater, and film, contextualization, viewing, and discussion of key television shows, as well as Hollywood films that comment on radio and television. Consideration of television programs and series in terms of sociocultural issues (consumership, lifestyle, gender, race, national identity) and industrial practice (programming, policy, regulation, business). Letter grading.

110C. World Media Systems. (4) Lecture/viewing, four hours; discussion, one hour. Requisite: course 110A. Global analysis of internal and external broadcasting services, with emphasis on their motives, origins, technologies, and programming. Special attention to political, economic, and regulatory constraints and common world media issues. P/NP or letter grading.

M111. Women and Film. (6) (Same as Women’s Studies M111.) Lecture, eight hours; discussion, one hour. Historical issues and critical approaches to women and cinema that may include authorship, stardom, female genres, and images of women in Hollywood cinema, alternative cinema, and independent cinema from silent era to present. Letter grading.

112. Film and Social Change. (6) Lecture/screenings, eight hours; discussion, one hour. Development of documentary style and of Activist films in relation to and as force in social development. Letter grading.

113. Film Authors. (6) Lecture/screenings, eight hours; discussion, one hour. In-depth study of specific film author (director or writer). May be repeated once for credit with consent of department and topic change. P/NP or letter grading.

113A. Film Directors: Hitchcock and His Influence. (5) Lecture/screenings, five hours; discussion, one hour. Study of selected films, as Hitchcock’s and influence, he has had on other filmmakers. Lectures and screenings of Hitchcock films in first seven weeks, with coverage of films that are closely patterned after Hitchcock’s in last three weeks. P/NP or letter grading.

113B. Film Authors: Women Filmmakers. (5) Lecture, five hours; discussion, one hour. Consideration of contributions to world cinema made by women directors, with focus on women directors working in various eras and modes of production (e.g., silent cinema, industry cinema, avant garde) with specific investigations of several auteurs, specifically Dorothy Azner, Jane Campion, and Cheryl Dunye. P/NP or letter grading.

114. Film Genres. (5) Lecture/screenings, five hours; discussion, one hour. Study of specific film genre (e.g., Western, gangster cycle, musical, silent epic, comedy, social realism). May be repeated once for credit with consent of department and topic change. P/NP or letter grading.

115. Stylistic Approaches for Moving Image: Theory and Practice. (6) Lecture, four hours; discussion, one hour. Survey of major directors and movements to examine dynamics of cultural constructions and visual thinking, including narrative, narrative, and story structure. Letter grading.

116. Film Criticism. (4) Lecture, four hours; laboratory, to be arranged. Study of and practice in film criticism. P/NP or letter grading.

M117. Chicanos in Film/Video. (5) (Same as Chicano and Chicana Studies M114.) Lecture/screenings, five hours; discussion, one hour. Goal is to gain nuanced understanding of Chicano cinema as political, socioeconomic, cultural, and aesthetic practice. Examining representation of Mexican Americans and Chicanos in four Hollywood genres — silent “greaser” films, social problem films, Westerns, and gang films — that are major genres that account for films about or with Mexican Americans produced between 1908 and 1980. Examination of recent Chicano-produced films that subvert or signify on these Hollywood genres, including: Zoot Suit, Ballad of Gregorio Cortez, Bakers Dozen, and Born in East L.A. Consideration of shorter, more experimental work that critiques Hollywood image of Chicanos. Guest speakers include both pioneer and up-and-coming filmmakers. P/NP or letter grading.

125. Acting for Film and Television. (4) Studio, six hours. Project(s) in film and video acting. May be repeated twice for credit. P/NP or letter grading.

126. Media and Ethnicity. (4) Lecture, four hours. Utilization of media as tool for social impact and uses of media on contemporary American ethnic communities. Role and techniques of media influence besides community utilization and production. P/NP or letter grading.

CM129. Contemporary Topics in Theater, Film, and Television. (2) (Same as Theater CM129) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated twice for credit. Concurrently scheduled with course CM229. P/NP or letter grading.

C132. Screenwriting Fundamentals. (2) Formerly numbered 128A. Lecture, one hour. Corequisite for graduate students enrolled in course 431. Not open for credit to students with credit for course 133 (or former course 130B). Examination of screenwriting fundamentals: structure, character and scene development, conflict, locale, theme, history of drama. Review of authors such as Aristotle. Concurrently scheduled with course C430. P/NP or letter grading.

133. In-Depth Introduction to Fundamentals of Screenwriting. (4) (Formerly numbered 130B) Lecture, one hour; discussion, one hour. Not open for credit to students with credit for former course 130B or 135B. Structural analysis of films and development of professional screenwriters’ vocabulary for constructing, deconstructing, and reconstructing their own work. Screenings of selected films and selected film sequences in class and by assignment.

134. Intermediate Screenwriting Workshop. (4) (Formerly numbered 130C) Seminar, three hours. Problems in film and television writing. P/NP or letter grading.

135A-135B-135C. Advanced Screenwriting Workshops. (8-8-8) Laboratory, three hours. Concurrently scheduled with course CM229. P/NP or letter grading.

C142. Digital Imagery and Visualization. (4) Lecture, three hours; laboratory, three hours. Introduction to and hands-on investigation of techniques of digital still imaging and aesthetics of digital image, in context of examining dynamics of cultural constructions and visual thinking, including narrative, narrative, and story structure. Concurrently scheduled with course C242. Letter grading.

C143. Moving Digital Image. (4) Lecture, three hours; laboratory, three hours. Investigation of different ways of creating and manipulating linear moving images (digital video) on desktop computers, exploring both creative and theoretical aspects of this production environment. May be repeated twice for credit. Concurrently scheduled with course C243. Letter grading.

C144. Interactive Multimedia Authoring. (4) Lecture, three hours; laboratory, three hours. Introduction to expressive and aesthetic potential of interactive digital media and its theoretical issues. Exploration of methodologies and tools for media integration, interface design, and interactive audiovisual construction. Students conceive, produce individual interactive multimedia projects. May be repeated once for credit. Concurrently scheduled with course C244. Letter grading.

gy, and sociopolitical consequences. May be repeated once for credit. Concurrently scheduled with course C245. Letter grading.

146. Art and Practice of Motion Picture Producing. (4) Lecture, three hours. Exploration of role of producer as both artist and business person. Comparative analysis of screenplays and completed films. Emphasis on artistic and economic aspects of production in industrial context, both independent and studio. Screenings viewed outside of class and on reserve at Powell Library. Letter grading.

C148. Advanced Digital Media Workgroup. (4) Discussion, four hours; laboratory, two hours. Designed for students with previous laboratory course experience, course provides opportunity to create large-scale digital media works with advanced software tools and techniques in small process-oriented, creative workshop environment. May be repeated once for credit. Concurrently scheduled with course C248. Letter grading.

C149A-C149B. Music in Film: Another Way to Tell Stories. (4 lecture/4 lab hours. Course C149A is requisite to course C149B. Exploration of concepts and issues that drive creation and use of music in film. Through lecture/discussion and practical assignments, examination of the relationship between filmmaker and composer. Viewing of noteworthy examples and following of collaboration of filmmakers with composers, with weekly sessions dedicated to temping, creation and development of new scores, studio visits, and creative/conceptual dialogue between musician and filmmaker. Preparation of film ready for temping by end of first term and ready for scoring at beginning of second term. Concurrently scheduled with courses C455A-C455B. Letter grading.

150. Cinematography. (4) Lecture, three hours; laboratory, three hours. Requisites: courses 100, 185. Limited to Film and Television majors. Introduction to image control in motion picture photography through exposure, lighting, and selection of film, camera, and lens. Supervised projects in photography to complement material covered in lecture. Letter grading.

151. Introduction to Experimental Filmmaking. (4) Lecture, three hours; laboratory, to be arranged. Limited to Film and Television majors. Techniques of image manipulation, design, and art direction. Production and completion of film (no more than three minutes) using 16mm nonsync sound film. May be repeated twice for credit. Letter grading.

152. Film and Television Sound Recording. (4) Lecture, three hours; laboratory, to be arranged. Limited to Film and Television majors. Introduction to principles and practices of film and television sound recording, including supervised exercises. P/NP or letter grading.

C152C. Digital Audio Postproduction. (4) Lecture, three hours; laboratory, three hours. Limited to department majors. Through discussion, demonstrations, and laboratory assignments, exploration of digital audio tools and procedures available to today’s filmmakers. Coverage of many technical, equipment, and software step-by-step, with emphasis on creative process. Concurrently scheduled with course C452C. Letter grading.

153. Motion Picture Lighting. (4) Lecture, three hours; laboratory; three hours. Requisites: courses 100, 150, 185. Limited to Film and Television majors. Introduction to principles and tools of lighting used in visual storytelling through lectures, discussions, and screenings. Creative lighting techniques covering topics such as people, environment, spatial relationships, movement, color, special effects, and continuity. Letter grading.

154. Film Editing. (4) Lecture, three hours; laboratory, to be arranged. Requisites: courses 100, 185. Limited to Film and Television majors. Introduction to artistic and technical problems of film editing, with practical experience in editing of image and synchronous sound. Concurrently scheduled with course C154B. Advanced Film Editing. (4) Lecture, three hours; laboratory, one hour. Preparation: submission of rough cut of existing project or proposal to edit work of another director. Requisites: courses 100, 154, 185. Limited to Film and Television majors. Postproduction phase with advanced knowledge of organization and operation of postproduction process. Students may also propose to edit significant scene given to them by instructor. Concurrently scheduled with course C454B. Letter grading.

155. Introduction to Digital Media and Tools. (4) Lecture, six hours; laboratory, one hour. Requisites: courses 100, 185. Limited to Film and Television majors. Instruction and exercises in basic concepts and software of virtual production environments and digital postproduction tools. Letter grading.

163. Directing Cameras. (4) Laboratory, eight hours. Requisites: courses 100, 185. Limited to Film and Television majors. Investigation of expressive potential of image within and beyond narrative from directorial perspective. Experiments with working methodologies that stimulate visual creativity and positioning image as fundamental element of cinematic expression. Letter grading.

164. Directing Actors. (4) Laboratory, four hours. Excursions in analysis of script and character and purpose of directing actors. Emphasis on eliciting best possible performance from actors. May be repeated twice for credit. P/NP or letter grading.

165. Advanced Narrative Television Directing. (4) Laboratory, six hours; laboratory, three hours; fieldwork, four to six hours. Limited to Film and Television majors. Supervised excursions in television multicamera direction, with emphasis on creative use of cameras, sound, composition, and communication with those in front of and behind camera. May be repeated twice for credit. Letter grading.

C168. Creative Location Film Production. (8) Lecture, four hours; discussion, four hours; laboratory, to be arranged. Limited to directing or producer’s program students. Problems of location, production, directing, and cinematography in various real-life practical locations. Practical application of solving problems and communication within limitations of production experience. Concurrently scheduled with course C468. Letter grading.

C170A. Introduction to Digital Effects. (4) Lecture, three hours; laboratory, to be arranged. Introductory study of digital effects production, with specific focus on motion graphics, compositing, effects processing, and title sequences. Concurrently scheduled with course C470A. Letter grading.

175A-175B. Undergraduate Film Production. (8 to 10) Requisites: courses 100, 185. Limited to Film and Television majors. P/NP or letter grading. 175A. Lecture, four hours; laboratory, eight hours. Writing, preproduction, and production for short film. 175B. Lecture, three hours; laboratory, eight hours. Completion of postproduction (editing, creation of sound tracks) for short film begun in course 175A. 175A-175B. Advanced Undergraduate Video Production (8 to 8) Discussion, three hours; laboratory, to be arranged. Requisite: course 185. Limited to Film and Television majors. Instruction and production of video production (no more than 20 minutes), including its writing, production, and editing. Letter grading.

M177. Film and Television Acting Workshop. (2) (Same as Theater M178.) Lecture, six hours; laboratory. Preparation and instruction in four-hour video documentaries. Completion of series of exercises from conceptualization through postproduction, culminating in production of short documentary. Letter grading.

186A. Introduction to Documentary Production. (4) (Formerly numbered 186B.) Lecture, three hours; laboratory, three hours; fieldwork, four to six hours. Requisites: course 186A, which is requisite to 186C. Limited to Film and Television majors. Introductory viewing and discussion of selected documentaries and instruction in various production skills necessary to create video documentaries. Completion of series of exercises from conceptualization through postproduction, culminating in production of short documentary. Letter grading.

186B. Intermediate Documentary Production Workshop. (4) Lecture, three hours; laboratory, three hours; fieldwork, four to six hours. Requisite: course 186A. Limited to Film and Television majors. Intermediate viewing and discussion of selected documentaries and instruction in various production skills necessary to create video documentaries. Completion of series of exercises from conceptualization through postproduction, culminating in production of short documentary. Letter grading.

186C. Advanced Documentary Production Workshop. (4) Lecture, three hours; laboratory, three hours; fieldwork, four to six hours. Requisites: courses 186A and 186B. Limited to Film and Television majors. Advanced viewing and discussion of selected documentaries and instruction in various production skills necessary to create video documentaries. Completion of series of exercises from conceptualization through postproduction, culminating in production of short documentary. Letter grading.

181B-187B-187C. Producing and Directing Remote Multicamera Production. (4-6-6) Lecture/laboratory, three hours (additional hours to be arranged). Letter grading. 187A. Professionally oriented lecture/laboratory. Directed workshop course to provide disciplined planning, responsible leadership, and organizational and problem-solving skills required in deadline remote production. Emphasis on clarity of vision, story telling, effective execution of pitch, preproduction, shoot, and editorial. 187B-187C. Instruction and su-
perceived productions of remote experience, with focus on development and execution of concept. Experience closely patterned after professional experience and working with talent, production venues, and production logistics of remote on-location video programs.

188A. Special Courses in Film, Television, and Digital Media. (4) Lecture, three hours; discussion, one hour. Special topics in film, television, and digital media for undergraduate students taught on experimental or temporary basis. May be repeated for credit. P/NP or letter grading.

188B. Introduction to Art and Technique of Filmmaking. (4) Lecture, four hours; discussion, one hour. Students acquire understanding of practical and aesthetic challenges undertaken by artists and professionals in making of moving picture and television. Examination of film as both art and industry: storytelling, sound and visual design, casting and performance, editing, finance, advertising, and distribution. Exploration of some ways it can operate. Letter grading.

188C. Design and Experimental Digital Film Production. (4) Lecture, three hours; discussion, one hour. Students conceive, write, polish, shoot, and edit short experimental or documentary projects. Experimentation with image, sound, and montage; examination of scenes from feature films and experimental short subjects. By end of term, students complete a short film or series of shorts with titles and sound track. P/NP or letter grading.

188D. Film Editing: Overview of History, Technique, and Practice. (4) Lecture, three hours. Practical application of film editing techniques, how they have evolved, and continue to evolve. Examination of history of editing, as well as current editing trends, terminology, and workflow. P/NP or letter grading.

188E. Digital Cinematography. (4) Lecture, three hours; discussion, one hour. Thorough film industry from late 1990s to present. Multifaceted industry with interrelated organizational, technological, demographic, narrative, ideological, and aesthetic foundations. Hollywood industry model versus independent model by contradictory forces of stability and change, continuity, and innovation. Examination of emergence of new paradigms of the changing industry and distribution, styles, and modes of address as they are developed by new generation of filmmakers and targeted at new kinds of audiences that are increasingly younger and more global, as illustrated by Hollywood's new star directors: David Fincher, Steven Soderbergh, Paul Thomas Anderson, Quentin Tarantino, Alexander Payne, Wes Anderson, George Clooney, Sofia Coppola, and others. P/NP or letter grading.

188F. Hollywood Now! (6) Lecture and screenings, eight hours; discussion, one hour. Hollywood film industry from late 1990s to present. Multifaceted industry with interrelated organizational, technological, demographic, narrative, ideological, and aesthetic foundations. Hollywood industry model versus independent model by contradictory forces of stability and change, continuity, and innovation. Examination of emergence of new paradigms of the changing industry and distribution, styles, and modes of address as they are developed by new generation of filmmakers and targeted at new kinds of audiences that are increasingly younger and more global, as illustrated by Hollywood's new star directors: David Fincher, Steven Soderbergh, Paul Thomas Anderson, Quentin Tarantino, Alexander Payne, Wes Anderson, George Clooney, Sofia Coppola, and others. P/NP or letter grading.

188G. Asian Action Films. (6) Lecture and screenings, eight hours; discussion, one hour. Historical, cultural, and critical survey of action film genre from Hong Kong, Taiwan, Japan, and South Korea. Recent global popularity of Hong Kong action films created new genre that combines themes of American action film, emphasizing spectacle over narrative, with philosophies and action styles of Eastern Asian cultures that produce these films. Exploration of circulation of national-popular traditions within international contexts. Study of more enduring, exciting subgenres and national specialties of genre that has dominated cinematic production and achieved success beyond Asia, including kung fu and other martial arts films, yakuza or gangster films, and flying swordman films. How gender and race shape action narratives, as illustrated by Bruce Lee, Jackie Chan, and Michelle Yeoh. Examination of issues of industry and authorship, and producers/directors such as Shaw Brothers, Seijun Suzuki, Tsui Hark, King Hu, and John Woo.

188I. Writing for Animation Series. (5) Lecture, three hours. Introduction to craft and business of writing animation for television. Overview of history of animation produced specifically for this medium, along with its many varying models. Model has evolved radically over past five decades, as have types of shows that have been created. Designed to put shows in historical perspective, with eye toward where industry is going, and challenges in technology and continuing (and growing) scrutiny of outside forces such as corporations and FCC. Letter grading.

188J. Disney Feature: Then and Now. (5) Lecture, three hours; discussion, three hours. Study and analysis of Disney's animated features. Evaluation of why Disney's animated features have dominated until recently and ramifications of this dominance on animation and society. Letter grading.

188K. Visual Effects. (4) Lecture, three hours. Nearly every film employs some form of visual effects, whether in reconstructing backdrop of history, creating futuristic or fantasy world, or simply fixing weather or production problems. Discussion of evolution of visual effects, as well as problems and blessings inherent in constantly evolving technology. Top visual effects consultancies and challenges of current and past grading.

188M. Film and Television Directing. (4) Lecture, two hours. Through discussions, screenings, demonstrations, and guest lectures, students develop understanding of narrative, visual, and aural storytelling in both short films and television. Letter grading.

188N. History of Animation in American Film and Television. (5) Lecture, six hours. Survey of art of animation in America from its precursors to origins to recent films of Disney, Pixar, DreamWorks, GHIL, and others. Place of animation in pop culture, racial imagery and ethnic stereotypes, growth of art form, and how it reflects American cultural values. Letter grading.

193A. Film Curatorship. (4) Lecture, two hours; discussion, two hours; laboratory, four hours. Study of principles and techniques of film curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to film archival-library design for research and teaching. P/NP or letter grading.

193B. Television Archival. (4) Lecture, two hours; discussion, two hours; laboratory, four hours. Study of principles and techniques of television curatorial and research, including but not limited to acquisition, cataloging, storage, retrieval systems. Special attention to application of new technology, equipment, and program materials to television archival-library design for research and teaching. P/NP or letter grading.

194. Internship Seminars: Film, Television, and Digital Media. (2 to 6) Seminar, three hours; laboratory, three hours. Preparations of individual original research projects in film and/or television history and analysis designed to be presented atFilm/DVD viewing. May be repeated for credit. Semester credit only. P/NP or letter grading.

195. Corporate Internships in Film, Television, and Digital Media. (2 to 6) Tutorial, two hours; fieldwork, 14 or 20 hours. Corequisite: course 195. Open to juniors/seniors who are interning in film or television industry and to nonmajors. Nonmajors must complete application in Internship Office, 203 East Melnitz Building, to be considered. Consideration of contemporary industry issues and practices. May be repeated for credit. P/NP or letter grading.

195. Corporate Internships in Film, Television, and Digital Media. (2 to 6) Tutorial, two hours; fieldwork, 14 or 20 hours. Corequisite: course 195. Open to juniors/seniors who are interning in film or television industry and to nonmajors. Nonmajors must complete application in Internship Office, 203 East Melnitz Building, to be considered. Corporate internship in supervised setting in business related to film and television industry and to nonmajors. Supervised individual research or investigation under guidance of faculty mentor. Cumulating paper or project required. May be taken for maximum of 8 units. Individual contract required. P/NP or letter grading.

Graduate Courses

200. Seminar: Bibliography and Methods of Research in Film and Television. (6) Seminar, three hours; laboratory, four to six hours (additional screenings and/or video laboratory required). Designed for graduate students. Examination and study of research methods, techniques, and resources related to film and television research, including development of computer skills for preparation of bibliographies, online database searching and retrieval and, when appropriate, use of computer/video/disc technology for research. Letter grading.

201. Seminar: Media Industries and Cultures of Production. (6) Seminar, three hours; film screenings, three hours. Theory and method in study of media industries, with focus on cultures of production (production world as cultural form). Investigation of ways production practice itself is sociological, institutional, cultural, and critical practice. Letter grading.

202. Seminar: Media Audiences and Cultures of Consumption. (6) Seminar, three hours; film screenings, three hours. Critical study of the role of television and electronic media and examination of theoretical approaches to culture and audience research. Consideration of issues of cultural taste, consumption, style/lifestyle, identity, and relationships between audience, industry, and mass-marketed images/commodities. Letter grading.

203. Seminar: Film and Other Arts. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Study of interrelationships between film and fine arts, or performing arts, or literature, with emphasis on ways these other arts have influenced film. May be repeated twice for credit. S/U or letter grading.

204. Seminar: Visual Analysis. (6) Seminar, three hours; film screenings, two to four hours. Study of visual analysis (or textual analysis), using DVD accessing features, as approach to learning what makes film great and distinct art form. Exploration of role of visual style in narrative fiction filmmaking to attempt to understand some ways it can operate. Letter grading.

205. Seminar: DVD for Film History and Analysis. (6) Seminar, three hours; laboratory, three hours. Preparation of individual original research projects in film and/or television history and analysis designed to be presented at Film/DVD viewing. May be repeated for credit. Semester credit only. P/NP or letter grading.

206A. Seminar: European Film History. (6) Seminar, three hours; film screenings, four to six hours. Requisite: course 106B. Designed for graduate students. Studies in selected historical movements such as expressionism, socialist realism, surrealism, neo-realism, New Wave, etc. May be repeated twice for credit. S/U or letter grading.

206B. Seminar: Selected Topics in Film History. (6) Seminar, three hours; laboratory, three hours. Preparation of individual original research projects in film and/or television history and analysis designed to be presented at Film/DVD viewing. May be repeated for credit. Semester credit only. P/NP or letter grading.

206C. Seminar: American Film History. (6) Seminar, three hours; film screenings, four to six hours. Preparation of individual original research projects in film and/or television history and analysis designed to be presented at Film/DVD viewing. May be repeated for credit. Semester credit only. P/NP or letter grading.

206D. Seminar: Silent Film. (6) Seminar, three hours; film screenings, four to six hours. Discussion of silent film from its beginning in 1895 to transition to sound cinema in 1927 to 1930. Film viewings discussed in terms of genre, national cinema, formal developments, and directors. Readings on film historical and theoretical issues. Letter grading.

207. Seminar: Experimental Film. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies in form, style, politics, and history of experimental, innovative, avant-garde, and minority film and video. Letter grading.
208A. Seminar: Film Structure. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate and advanced undergraduate students. Study of meaning and signification, both fictional and nonfictional, and of role of structure in motion picture. S/U or letter grading.

208B. Seminar: Classical Film Theory. (6) Seminar, three hours; film screenings, four hours. Study of principal topics and lines of inquiry that charactexize theoretical writings of Arneil, Eisenstein, Bazin, Kracau- er, etc. Letter grading.

208C. Seminar: Contemporary Film Theory. (6) Seminar, three hours; film screenings, four to six hours. Required course 208B. Designed for graduate students. Study of development of ideas and methods of film theory through contemporary writings. S/U or letter grading.

209A. Seminar: Documentary Film. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Nonfictional film and its relation to contemporary culture. S/U or letter grading.

209B. Seminar: Fictional Film. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Film as fiction and its relation to contemporary culture. May be repeated once for credit. S/U or letter grading.

209D. Seminar: Animated Film. (4) Seminar, three hours; laboratory, three hours. Required for graduate students. Study of animated film: its historical development, structure, style, use, and relation to contemporary culture. S/U or letter grading.

210. Seminar: Contemporary Broadcast Media. (4) Seminar, three hours (additional hours as required). Designed for graduate students. Study of issues raised by recent developments in television and radio, commercial and public, associated with innovations in satellite, cable, and cartridge systems. S/U or letter grading.

211B. Seminar: Historiography. (4) Seminar, three hours. Limited to Film and Television Ph.D. candidates. Examination of function and methods of writing film and television history as seen in works of key historians in U.S. and Europe. S/U or letter grading.

217A. Seminar: American Television History. (6) Seminar, three hours; screenings, four hours. Critical survey of U.S. television industry from its inception to present. Examination of programming and changes within industry by considering range of technological, economic, aesthetic, social, and cultural dimensions. Letter grading.

217B. Seminar: Selected Topics in Television History. (6) Seminar, three hours; screenings, three hours. Advanced critical seminar, with focus on specific topic or area (historical period, industry, programming, genre, or social formation) in domestic or international television. Letter grading.

218. Seminar: Culture, Media, and Society. (6) Seminar, three hours; screenings/discussion, four hours. Emphasis on discourse of other(s). Theorization of otherness is presented in terms of how culture enters into politics of representation and representa- tion of politics through metaphors of “difference” without opposition, “the difference without identity,” and/or “the identity without ethnocentrism.” Examina- tion of how women, national minorities, and Third World peoples have been rendered others; place of cinematic representation and decommu- nization of others is positioned vis-a-vis mainstream critical discourse. Letter grading.

219. Seminar: Film and Society. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate and advanced undergraduate students. Study of role of society in film and television and is affected by social behavior, belief, and value systems; consideration in role of media in society. May be repeated once for credit. S/U or letter grading.

220. Seminar: Television and Society. (6) Seminar, four hours; screenings/discussion, three hours. Des- ignated for graduate students. Study of ways television forms affect and are affected by social behavior, belief, and value systems, study of technological and eco- nomic aspects of medium. May be repeated once for credit. S/U or letter grading.

221. Seminar: Film Authors. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Study of works of outstanding creators of films. May be repeated twice for credit. S/U or letter grading.

222. Seminar: Film Genres. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Study of works of such genres as Western, gangster, war, sci- ence fiction, comedy, etc. May be repeated twice for credit. S/U or letter grading.

223. Seminar: Visual Reception. (6) Seminar, three hours; film screenings, three hours. Aesthetic, psycho- logical, physiological, and phenomenological ap- proaches to television as they relate to ways in which viewers experience and see film, television, and digital media. Letter grading.

224. Computer Applications for Film Study. (6) Lecture, three hours; film screenings, three hours. Sur- vey of computer applications relevant to film study, principally computer-aided systems and image capture technology. S/U or letter grading.

225. Seminar: Videogame Theory. (6) Seminar, three hours; laboratory, three hours. Videogame theo- ry, with exploration of nature of medium, rather than looking at history, industrial practice, social effects, or any other of many interesting questions that games also raise. Acknowledgment of roots in film, television, and media studies and investigation of emerging vid- eogame field. S/U or letter grading.

229. Contemporary Topics in Theater, Film, and Television. (2) Same as Theater CM229. Lecture, two hours; screenings, two hours. Limited to junior/sea- son and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, pro- duction, and performance. Overview of individual con- tributions in collaborative effort; examination of distinct- liveness and interrelations among these arts. Individu- al units include participation of leading members of theater, film, and television students. May be re- peated twice for credit. Concurrently scheduled with course CM129. S/U or letter grading.

234. Moving Digital Image. (4) Lecture, three hours; laboratory, three hours. Investigation of different ways of conveying narratives through moving imagi- nary (digital video) on desktop computers, exploring both creative and theoretical aspects of this production en- vironment. Students conceive and produce number of short projects. Concurrently scheduled with course C142. Letter grading.

248. Advanced Digital Media Workshop. (4) Dis- cussion, four hours; laboratory, two hours. Designed for students with previous laboratory course experi- ence. Course provides opportunity to create larger-scale digital media projects. Emphasis on advanced techniques and tools in small process-oriented, creative workshop environment. May be repeated once for credit. Concurrently scheduled with course C148. Let- ter grading.

249. Digital Revolution. (4) Lecture, four hours; dis- cussion, one hour; laboratory, one hour. Comprehen- sive survey to introduce students to emerging digital technologies, result in new media, and their artistic, economic, and social implications. Topics include digi- tal editing, digital previsualization, multimedia, World Wide Web, interactive television, and virtual reality. Letter grading.

270. Seminar: Film Criticism. (6) Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Study of key aesthetic questions of analysis and evaluation in relation to central works of motion picture criticism. May be repeated once for credit. S/U or letter grading.

271. Seminar: Television Criticism. (6) Seminar, four hours; screenings/discussion, three hours. Des- ignated for graduate students. Analysis of major forms of television production and criticism it has elicited. May be repeated once for credit. S/U or letter grading.

273. Seminar: Contemporary Film and Television Critics. (6) Seminar, three hours; laboratory, four hours. Limited to Film and Tele- vision Ph.D. candidates. Study and practice of analytic and critical response, with emphasis on contemporary film and television. S/U or letter grading.

276. Seminar: Non-Western Films. (4) Seminar, three hours (additional hours as required). Designed for graduate students. Analysis of major forms of film and television production and criticism it has elicited. S/U or letter grading.

283A. Developing Comedy Series. (4) Seminar, three hours. Basic tenets of writing comedy series and contemporary industry production and business practices. Development of original show concepts and pitch for review and feedback by class, industry, and guests. Letter grading.

283B. Writing Television Comedy Scripts. (4) Semi- nar, three hours. Examination of basics of half-hour pil- lot format, style, and content and learning of principles
agreements, union agreements, music, copyright, etc., necessary to understand film and television industry. S/U or letter grading.

288B. Strategy. (4) Lecture, three hours. Course 288A is not requisite to 288B. Examination of business realities of industry, with focus on techniques for analyzing behavior, making strategic decisions, and overcoming writer-producer and producer-writer, or director. Assignments designed to assist students in articulating and achieving their goals and to help them effectively transition from classroom to their careers in entertainment industry. S/U or letter grading.

289C. Independent Spirit: Creative Strategies for Financing and Distributing Independent Features. (4) Lecture, three hours. Course 289B is not requisite to 289C. Development of independent or specialty films. Topics include film finance, production, marketing, distribution, agents, and new technology, with emphasis on applying this knowledge to individual student projects. S/U or letter grading.

290A. Research and Development I. (4) Seminar, three hours. Forum for roundtable strategy sessions and mock story meetings with instructor, students, and various industry luminaries. Students must make concrete weekly progress on thesis project and adapt strategy based on feedback received. Development of marketing and business strategies for story idea set up in course 290A. S/U or letter grading.

290B. Research and Development II. (4) Seminar, three hours. Forum for roundtable strategy sessions and mock story meetings. Students must make concrete weekly progress on thesis project and adapt strategy based on feedback received. Development of marketing and business strategies for story idea set up in course 290A. S/U or letter grading.

290C. Research and Development III. (4) Seminar, three hours. Final stages of thesis preparation for evaluation. Guidance provided by instructor on how to effectively present selected project. Requirements include industry-related book reports, script analysis, pitching selected concept, weekly research to understand marketplace, accumulation and updating of data, and justifying project in terms of feasibility referred to illuminate potential consequences of each transaction. Negotiation strategy exercises. S/ U or letter grading.

291A. Studios versus Independents: Navigation Process. (4) Lecture, three hours. Tools necessary for producer to navigate Hollywood entertainment industry. Topics discussed through lectures and guest speakers include impact of difficulty to navigate relationships between art and commerce in craft of filmmaking, rapid advance of new technologies, diverse new means for producing films to be presented for review by class and instructor to begin identifying potential thesis projects. S/U or letter grading.

291B. Feature Film Marketing. (4) Lecture, three hours. Three-hour course. Course 291A is requisite to 291B. Examination of various industry professionals. S/U or letter grading.

291C. Feature Film Distribution and Exhibition. (4) Lecture, three hours. Course 291B is requisite to 291C. Investigation of philosophy, structure, and major players that make up entertainment industry, with emphasis on film distribution and exhibition. Through lectures, readings, and guest speakers, exploration of interrelated arenas of production, marketing, business affairs, media, and impact of international market on distribution and exhibition of studio releases. S/U or letter grading.

292A. Overview of Network Television Management. (4) Lecture, three hours. Designed to expand basic understanding of network and cable television business. Examination of role of showrunner, executives from networks and production companies, packaging agents, and studio responsibilities for developing and promoting projects. S/U or letter grading.

292B. Who Produces Television? Showrunner, Nonwriting Producer, and Executive, or Agent? (4) Lecture, three hours. Course 292A is not requisite to 292B. Three-hour course. To help producers, as well as screenwriters and directors, focus on networking opportunities and to develop strategies to bring their feature and television projects to marketplace. Study case documents (scripts) from current or recently produced projects provided. S/U or letter grading.

293C. Running Shows: Producing for Broadcast and Cable. (4) Lecture, three hours. Course 292B is not requisite to 293C. Exploration of role of writers-producers or showrunners in creating television shows. Development of story ideas, presentation of writer-producers' or showrunners' work to networks and production companies, packaging agents, and staff writers and to develop concrete tools of producers. Training of next generation of nonwriting network and studio development executives whose job it is to assist writers/producers in highly collaborative process of creating, developing, producing, and scheduling television programming. S/U or letter grading.

294A. Contracts and Negotiation. (4) Lecture, three hours. Survey of range of contracts involved in studio productions, including literary submission and option agreements, artist employment, director employment, writer collaboration agreements, coproduction agreements, music agreements, music rights, exposure to a range of industry professionals. S/U or letter grading.

295A. Art of Presentation. (4) Lecture, three hours. Cultivation of skills needed for students to present themselves and their project goals with clarity and precision. Students will write and deliver presentations designed to enhance student ability to deliver convincing arguments on range of topics. S/U or letter grading.

295B. Advanced Film and Television Producing for Producers. (4) Lecture, three hours. Course 295A is not requisite to 295B. Designed to help producers, as well as screenwriters and directors, focus on networking opportunities and to develop strategies to bring their feature and television projects to marketplace. S/U or letter grading.

296A. Role of Talent Agencies. (4) Lecture, three hours. To help producers, as well as screenwriters and directors, focus on networking opportunities and to develop strategies to bring their feature and television projects to marketplace. S/U or letter grading.
and detail of legal rights and responsibilities of each. Exercises require students to represent rights holders in series of 33-hour lawsuits. Requisites: courses 417, 418. Limited to graduate film and television students. Advanced study of principles of cinematography, with emphasis on exposure, lightin, and selection of film, camera, and lenses. Concurrently scheduled with course C118. Letter grading.

417. Lighting for Film and Television. (4) Lecture, two hours; laboratory, six hours. Limited to graduate film and television students. Students conceptualize, research, write, shoot, and edit projects to completion. May be repeated twice for credit. Letter grading.

418. Cinematography and Directing. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Requisites: courses 417, 418. Limited to graduate film and television students. Supervised filming of short dramatic projects on sound stage and at locations that explore complexity of process, emphasizing balance and collaboration essential to both directing and photography in its varied technical, production, and creative aspects. Letter grading.

419. Advanced Cinematography. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Requisites: courses 417, 418. Limited to graduate film and television students. Advanced study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses. S/U or letter grading.

423A. Direction of Actors for Film and Television. (4) Lecture, four hours; laboratory. Preparation: first film project. Limited to graduate film and television students. Required of all production majors shooting fiction productions. Exercises in analysis of script and character development. One-hour course, 6 to 12 weeks of practical experience. Letter grading.

423B. Advanced Direction of Actors for Film and Television. (4) Studio laboratory, six hours. Requisite: course 423A. Limited to graduate film and television students. Advanced study and practice of directing actors before camera. Emphasis on developing technicalities to immediately enhance communication between director and actor on set in order to maintain continuity from shot to shot. S/U or letter grading.

431. Introduction to Film and Television Screenwriting. (4) Lecture, three hours. Limited to graduate film and television students. Introductory course in problems of film and television screenwriting. S/U or letter grading.

C146. Intermediate Cinematography. (4) Lecture, two hours; laboratory, four hours. Requisites: courses 100, 150, 185. Intermediate study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses. Concurrently scheduled with course C118. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U or letter grading.

400. Film Image Design Laboratory. (4) Lecture, two hours; laboratory, six hours. Limited to graduate film and television students. Conception and design of non-narrative forms. Unifying theory and practice, presentation of approach to viewing great films of past that empowers filmmakers to use their own personal style for telling stories on screen. Letter grading.

402A. Lecture, six hours; laboratory, six hours. Limited to graduate film and television students. Production of 10- to 15-minute fic- tion film of one section. Production of short documentary. Requisites: courses 408A, 408B. Limited to graduate film and television students. Production of 10- to 15-minute fiction film or experimental film, video, or multimedia project. Production of advanced individual documentary film or video projects. S/U or letter grading.

435. Advanced Writing for Short Film and Television Screenplays. (4) Discussion, three hours. Requisite: course 50C. Limited to graduate film and television students. Conception, development, and writing of dramatic film script to be produced as advanced or thesis project. Letter grading.

437. Nontheatrical Writing for Film and Television. (4) Discussion, three hours. Limited to graduate film and television students. Advanced study and practice of techniques and skills of in-depth research and presentation. Writing of film and television essays, with emphasis on research and preproduction. May be repeated for maximum of 16 units. S/U or letter grading.

451. Advanced Design for Film and Television. (4) Laboratory, to be arranged. Limited to graduate film and television students. Advanced study and practice of techniques and skills of design for motion pictures and television. Art direction for advanced workshop production. May be repeated for maximum of 12 units. S/U or letter grading.

452A. Film and Television Sound Recording. (4) Lecture, three hours; laboratory, four hours. Limited to graduate film and television students. Principles and practices of film and television sound recording, including supervised exercises. S/U or letter grading.

462B. Advanced Film Workshop. (4) Lecture, four hours; studio, eight hours. Supervised exercises in studio music recording techniques, with emphasis on special requirements for motion pictures and television. S/U or letter grading.

C452C. Digital Audio Postproduction. (4) Formerly numbered 452C. Lecture, three hours; laboratory, three hours. Limited to departmental majors. Through discussion, demonstrations, and laboratory assignments, exploration of digital audio tools and procedures available to today's filmmakers. Coverage of many technical equipment, and software step-by-step, with emphasis on creative process. Concurrently scheduled with course C452A. Letter grading.

453. Postproduction Sound Design. (2 to 4) Lecture, three hours. Designed to give film students insight into world of postproduction sound and to provide knowledge and experience for future work in their projects. Exploration of all areas of postproduction sound design from editing to final mixing. How to effectively use sound design to enhance storytelling capability of films, evaluate music choices, pick composer, music edit, create sound design to enhance story points, discover design opportunities, and select right sound effects. How to edit dialogue, prep for Automatic Dialogue Replacement, and Foley sessions, supervise final sound mix. Screening of numerous film clips to provide examples of postsound choices that demonstrate effective use of sound design. S/U or letter grading.

454A. Advanced Film Editing. (4) Lecture, three hours; laboratory, to be arranged. Preparation: submission of rough cut and/or copy of screenplay. Limited to film and television students in postproduction phase of thesis or advanced project. Organization and operation of postproduction process. Letter grading.

C454B. Advanced Film Editing. (4) Lecture, three hours; laboratory, one hour. Preparation: submission of rough cut of existing project or proposal to edit work of another director. Requisites: courses 100, 154, 185. Limited to film and television students in postproduction phase with advanced knowledge of organization and operation of postproduction process. Students may also propose to edit significant scene given to them by instructor. Concurrently scheduled with course C154B. Letter grading.

454C. Advanced Film Editing: Postproduction Pathways. (2 to 4) Lecture, three hours; laboratory, two hours. Limited to departmental majors. Through discussions, demonstrations, outside speakers, and laboratory assignments, demystification of ever-changing world of postproduction. Students plan, schedule, and budget their postproduction pathway in preproduction. May be repeated for credit. Letter grading.

C455A-C455B. Music in Film: Another Way to Tell Stories. (4-4) Lecture, three hours. Course C455A is requisite to C455B. Exploration of concepts and issues that drive creation and use of music in film. This lecture/discussion and practical assignments, examination of deep collaboration between filmmaker and composer. Viewing of noteworthy examples and following in-class film screenings, optional weekly sessions dedicated to temping, creation and development of new scores, studio visits, and creative/ conceptual dialogue between musician and filmmaker. Preparing students for postproduction with an emphasis on the postproduction process, with an emphasis by end of first term and ready for scoring at beginning of second term. Concurrently scheduled with courses C149A-C149B. Letter grading.

459A-459B. Directing for Film and Television. (4-4) Lecture, three hours; laboratory, to be arranged. Directed to graduate film and television students. Analysis and exploration, with specific scenes, of differences and many similarities in directorial approach to same literary material in theater, film, and television. Letter grading.

C468. Creative Location Film Production. (8) Lecture, four hours; discussion, four hours; laboratory, to be arranged. Directed to limited or producer's program students. Problems of location, production, direction, and design, with emphasis on practical locations. Practical application of solving problems and communication within limitations of production experience. Concurrency scheduled with course C168B. Letter grading.

C470A. Introduction to Digital Effects. (4) Lecture, three hours; laboratory, to be arranged. Introductory study of digital effects production, with specific focus on motion graphics, compositing, effects processing, and title sequences. Concurrently scheduled with course C170A. Letter grading.

472. Commercials. (4) Lecture, four hours. Limited to M.F.A. students. Designed to give students opportunity to explore one very specific kind of filmmaking. Through exploration of advertising, students gain knowledge about what kind of work is salable in American and European markets to work within distinct confines of commercial genre. Letter grading.

475. Film I. (8) Discussion, three hours; laboratory, to be arranged. Designed for graduate students. Study of basic techniques of television and video production, including completion of one or more projects. S/U or letter grading.

476. Video I. (8) Discussion, three hours; laboratory, to be arranged. Designed for graduate students. Study of basic techniques of television and video production, including completion of one or more projects. S/U or letter grading.

478. Video II. (8) Discussion, three hours; studio, to be arranged. Requisites: courses 185, and 405 or 476. Designed for graduate students. Group experience in video production with each member rotating on crew work in production of individual or collective projects. S/U or letter grading.

480. Timing for Animation. (4) Lecture, three hours; laboratory, three hours. Process of animation timing through lectures and assignments. Letter grading.

482A-482B. Advanced Animation Workshops. (4 or 8 each) Lecture, three hours; studio, to be arranged. Requisites: courses 181A, 181C, 482A. Advanced organization and integration of various creative arts used in animation, resulting in production of complete animated film. May be repeated for maximum of 16 units. S/U or letter grading.

483A-483B-483C. Advanced Computer Animation. (4 to 8 each) Lecture, six hours; laboratory, four hours. Concurrently scheduled with course 181B. Course 483A is requisite to 483B, which is requisite to 483C. Creation and production of complete and original advanced computer animated film. Letter grading.

484A-484B. Visual Thinking and Organization for Animation. (4-4) Lecture, six hours; laboratory, four hours. Concurrently scheduled with course 181B. Course 484A is requisite to 484B. Systematic approach to analyzing and communicating two-dimensional and three-dimensional form and applying traditional compositional approaches to animation. May be repeated for maximum of 16 units. Letter grading.

485. Legal Issues in Animation. (4) Lecture, three hours; laboratory, three hours. Examination of legal issues in animation, including copyright, contracts, constitutional issues in animation, competition rights, employer/employee relationships, and representation in animation. S/U or letter grading.

486. Directed Individual Study: Preparation to Advance to Candidacy for M.F.A. in Production. (2 to 4) Tutorial, four to eight hours. Limited to M.F.A. production program students. Specialized development and organization of proposed thesis project prior to advancement to candidacy. Should be taken before student plans to advance to candidacy. S/U or letter grading.

488B. Advanced Interactive Animation. (4 to 8) Lecture, six hours; laboratory, to be arranged. Requisite: course 488A. Organization and integration of various creative arts used in animation and interactive animation to form completed project of selected interactive topic. May be repeated for maximum of 16 units. Letter grading.

489A. Computer Animation in Film and Video. (4 to 8) Lecture, six hours; laboratory, four to eight hours; direction, four to eight hours. Concurrently scheduled with course 181B. Designed film. Requisites: courses 181A, 181C. Instruction in and supervised production of computer animation. May be repeated for maximum of 16 units. Letter grading.

489B. Production in Computer Animation. (4 to 8) Lecture, six hours; laboratory, four to eight hours. Requisite: course 489A. Instruction in creation, preparation, and production of complete and original computer animation film or tape. May be repeated for maximum of 16 units. Letter grading.

495A. Practice of Teaching Film and Television. (2) Seminar, three hours. Required of all teaching assistants and associates in critical studies program. Orientation and preparation of graduate students who have responsibility to assist in teaching undergraduate courses in department; discussion of problems common to teaching experience, and development of skills in dealing with students and associates in critical studies program. Orien-

495B. Teaching with Technology in Film and Media Studies. (2) Seminar, three hours. How to use appropriate technology to become more effective teaching assistants. Pedagogical impact of tools, including course management software, presentation technolo-
gies, and Internet. Discussion of technological resources available on campus. Use of unfamiliar tools to gain confidence in ability to incorporate new technologies in teaching. S/U grading.

496. Practice of Teaching Film and Television. (2) Discussion, two hours. Required once of all teaching assistants and associates in department. Orientation and preparation of graduate students who have responsibility to assist in teaching undergraduate courses.
**FOREIGN LITERATURE IN TRANSLATION**

### Scope and Objectives

The following courses offered in the departments of language and literature do not require reading knowledge of any foreign language.

### Foreign Literature in Translation

#### Course List

**Afrikaans (Germanic Languages)**
- 40. From Oppressed to Oppressor and Beyond: Literature in Afrikaans from Prepartheid to Postapartheid Era in English Translation

**Ancient Near East (Near Eastern Languages)**
- 150A-150B-150C. Survey of Ancient Near Eastern Literatures in English

**Arabic (Near Eastern Languages)**
- 150. Classical Arabic Literature in English
- 151. Modern Arabic Literature in English

**Armenian (Near Eastern Languages)**
- 150A-150B. Survey of Armenian Literature in English
- 152. Modern Armenian Drama as Vehicle for Social Critique

**Asian (Asian Languages)**
- 151. Buddhist Literature in Translation

**Central and East European Studies (Slavic Languages)**
- 126. Coldwar Central European Culture

**Chinese (Asian Languages)**
- 150A. Lyrical Traditions

**Classics**
- 40W. Reading Greek Literature: Writing-Intensive
- 41W. Reading Roman Literature: Writing-Intensive

**Comparative Literature**
- All undergraduate courses

**Czech (Slavic Languages)**
- 155. Survey of Czech Literature from Middle Ages to Present

**Dutch (Germanic Languages)**

Scope and Objectives

The Department of French and Francophone Studies is a major West Coast center for the study of French. In recent decades French critical thought has maintained a dominant position in the Western world. The department seeks to give its students not only a background in the various fields of French and Francophone studies, but also opportunity to relate literary, linguistic, and cultural study to examination of the critical intellectual questions of our time.

The undergraduate lower division program is designed to provide practical competence in French after one year and thorough basic knowledge of the language after two years.

The undergraduate upper division program is chiefly devoted to perfecting linguistic skills and to the study of French and Francophone culture and literature. Courses in linguistics and business French are also offered. Students graduating with a Bachelor of Arts in French should be fully fluent in French and possess a thorough background in French and Francophone literature and culture. Both Bachelor of Arts degrees lead to graduate studies in French.

The graduate program offers both M.A. and Ph.D. degrees and comprises training in the various fields of French and Francophone culture, literature, and thought, as well as in literary criticism, analysis, and theory. A number of courses in linguistics and stylistics are also offered.

Undergraduate Study

If students have taken French elsewhere, they must take a placement test administered by the department. Depending on the results of the placement test or with recommendation of an instructor, they may be permitted to enroll in a course of study at a more advanced level.

Requisites to all upper division courses taken in partial fulfillment of the French majors are French 6, 12, or equivalent. Courses 105 through 109 are not sequential and may be taken in any order, provided the requisites for each course are fulfilled.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in French grammar and/or composition.

French B.A.

Preparation for the Major

Required: French 1, 2, 3, 4, 5, 6, 12, or equivalent. Students normally take course 6 before undertaking course 12. Students who receive a grade of A in course 5 may enroll in course 12 concurrently with course 6, with consent of the instructor.

Transfer Students

Transfer applicants to the French major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of French and one French literature course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Two plans are offered by the department:

Plan I: French/Francophone Studies in Literature and Culture

Required: French 100, 101, two courses from 114A, 114B, 114C, and seven 4-unit courses in French and Francophone literature and/or culture selected from upper division offerings in the department in language, civilization, literature, or the arts. One upper division elective course from outside the department may be substituted in the major program with consent of the undergraduate advisor. Each course must be taken for a letter grade.

Plan II: Interdisciplinary French/Francophone Studies

Required: French 100, 101, one course from 114A, 114B, or 114C, four upper division elective courses in French and Francophone studies, and four upper division elective courses in fields relevant to French and Francophone studies to be selected from outside the department in consultation with the undergraduate...
adviser. Each course must be taken for a letter grade.

Plan II, with emphasis on French and Francophone culture, is a core program in French allowing for individual selection of relevant courses in related fields such as humanities, social sciences, women's studies, and linguistics. It is strongly advised that students who intend to pursue advanced degrees begin preparation for the language requirements at the undergraduate level.

If students’ knowledge of French exceeds the preparation usually received in courses preparing for the major and if they demonstrate the requisite attainment in French 100 or 101, they may substitute for those courses in grammar and composition an equivalent number of upper division courses in the French and Francophone Studies Department in consultation with an adviser. All prospective French majors who are native or quasi-native speakers of French must see the undergraduate adviser before beginning upper division work in the major.

All majors must complete a minimum of nine courses of appropriate upper division work in the UCLA French and Francophone Studies Department. Freshmen and sophomores may take up to two courses taught in English, selected from French 164 through 167, in fulfillment of major requirements (if taken in the junior or senior year, these courses count as electives). A maximum of 8 units of course 199 may be applied toward the elective requirements for the major if approved in advance by the undergraduate adviser. Students must maintain a C average in upper division major courses in order to remain in the French major.

Coursework taken on a Passed/Not Passed basis is not acceptable in any area of the major program.

It is recommended that students intending to major in French consult the undergraduate adviser before enrolling in upper division courses.

French and Linguistics B.A.

Preparation for the Major

Required: French 1, 2, 3, 4, 5, 6, 12, or equivalent, Linguistics 20, completion of the sixth term of one other foreign language or the third term in each of two other foreign languages. Students normally take course 6 before undertaking course 12. Students who receive a grade of A in course 5 may enroll in course 12 concurrently with course 6, with consent of the instructor.

Transfer Students

Transfer applicants to the French and Linguistics major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of French, one French literature course, and one introduction to linguistics course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: French 100, 101, 104, one course from 114A, 114B, or 114C, two courses from 105, 107, 108, 109, 110, one upper division French elective course, and Linguistics 103, 110, 120A, 120B. Each course must be taken for a letter grade.

It is strongly advised that students who intend to pursue advanced degrees begin preparation for the language requirements at the undergraduate level.

If students’ knowledge of French exceeds the preparation usually received in courses preparing for the major and if they demonstrate the requisite attainment in French 100 or 101, they may substitute for those courses in grammar and composition an equivalent number of upper division courses in the French and Francophone Studies Department in consultation with an adviser. All prospective French and Linguistics majors who are native or quasi-native speakers of French must see the undergraduate adviser before beginning upper division work in the major.

All majors must complete a minimum of nine courses of appropriate upper division work in the UCLA French and Francophone Studies Department. Freshmen and sophomores may take up to two courses taught in English, selected from French 164 through 167, in fulfillment of major requirements (if taken in the junior or senior year, these courses count as electives). A maximum of 8 units of course 199 may be applied toward the elective requirements for the major if approved in advance by the undergraduate adviser. Students must maintain a C average in upper division major courses in order to remain in the French and Linguistics major.

Coursework taken on a Passed/Not Passed basis is not acceptable in any area of the major program.

It is recommended that students intending to major in French and Linguistics consult the undergraduate adviser before enrolling in upper division courses.

Honors Program

The department encourages those students in the French majors with initiative and independence of mind who desire an enriched individualized course of study to apply for the honors program.

The honors program is designed for French majors who have fulfilled their lower division requirements and have a 3.5 departmental grade-point average. Students whose GPA falls between 3.3 and 3.5 should submit a composition from an advanced language or literature course to the honors committee. If the work submitted meets with approval, students are admitted to the program.

To graduate with departmental honors, students must complete a minimum of two honors projects in the context of nonhonors upper division courses (French 115 and above) taken for honors credit. They must do an honors project (a research paper of 12 to 15 pages) in addition to the regular course requirements. An honors contract must be signed before the end of the third week of the term. After completing the project, students fill out a completion form.

On the basis of their coursework and field of interest, students are expected to formulate a research topic they wish to pursue in greater depth. They take course 198 where they receive regular personal supervision from a faculty member in the research methodology, and writing of their approximately 30- to 35-page honors thesis (honors projects and the honors thesis are not to be confused).

Students may begin the honors program toward the end of their junior year or during their senior year. Students are allowed to enroll in graduate courses with the consent of the instructor but cannot use those courses to replace an honors project. Departmental honors are recorded on the final transcript if students fulfill all requirements for the program. They may submit their final honors thesis for the departmental prize.

French Minor

To enter the French minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (8 units):

French 6 or equivalent and one course from 12, 14, 41, or 60.

Required Upper Division Courses (20 units):

French 100 or 101, and four additional departmental courses in language, culture, or literature to be selected in consultation with an undergraduate counselor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of French and Francophone Studies offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in French and Francophone Studies.

French

Lower Division Courses

1. Elementary French. (4) Lecture, five hours. P/NP or letter grading.
2. Elementary French for Graduate Students. (3) Lecture, three hours. Preparation for GSFLT or other language examinations. Passing grade does not imply satisfaction of language requirements. S/U grading.

Other courses may substitute for those courses in grammar and composition an equivalent number of upper division courses in the French and Francophone Studies Department.
2. Elementary French. (4) Lecture, five hours. Enforced requisite: course 1 with grade of C— or better. P/NP or letter grading.

3. Elementary French. (4) Lecture, five hours. Enforced requisite: course 2 with grade of C— or better. P/NP or letter grading.

5. Intermediate French. (4) Lecture, four hours. Enforced requisite: course 4 with grade of C— or better. P/NP or letter grading.

7. Intensive First-Year French. (12) Lecture, 15 hours. All-in-French intensive language program equivalent at first year of college French and designed to develop basic language skills. Additional work in language and media laboratory required. Offered in summer only. P/NP or letter grading.

8. Intensive Second-Year French. (8) Lecture, 10 hours; media laboratory, three hours. Enforced requisite: course 7. Intensive course equivalent to first two terms of intermediate French and designed to improve proficiency in reading, writing, and speaking. Offered in summer only. P/NP or letter grading.

10A-10D. French Conversation. (2 each) Discussion, three hours. Enforced requisite: course 3 with grade of B or better. P/NP or letter grading.

14. Introduction to French Culture and Civilization in English. (5) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 14-A. Study of contemporary French institutions and issues in cultural, political, and socioeconomic realms. Satisfies Writing II requirement. Letter grading.

41. French Cinema and Culture. (5) Lecture/screenings, five hours; discussion, one hour. Introduction to French culture and literature through study of films of cultural and literary significance. P/NP or letter grading.

60. French and Francophone Novel. (5) Lecture, three hours; discussion, one hour. Study of literary masterpieces produced by writers from France and Francophone world (Canada, Africa, Caribbean, etc.) from 17th to early 21st century. P/NP or letter grading.

Upper Division Courses

104. Theory and Correction of Diction. (4) Formerly numbered 105.) Lecture, three hours. Enforced requisite: course 6. Study of individual sounds (vowels, consonants, and semi-vowels), including rhythm, intonation, and phrasing, and of learning sound —spelling correspondences to help sight read accurately. Thorough study of symbols of International Phonetic Alphabet (IPA) to give students tools to work on pronunciation systematically. Standard French serves as model, with examination of sounds and various dialects that are spoken in Francophone world to improve listening comprehension and pronunciation. P/NP or letter grading.

112. Medieval Foundations of European Civilization. (6) Lecture, three hours; discussion, two hours. Medieval texts, culture, social structure, and political history as they lay bases of Europe in modernity. P/NP or letter grading.

114A. Medieval and Renaissance Literature. (5) Lecture, three hours. Requisite: course 12. Masterpieces of medieval and Renaissance literature, including examples of epic (La Chanson de Roland), romance (Christien de Troyes’ Yvain), and Renaissance prose and poetry (including Marot, Du Bellay, Ronsard, Ra- belais, Marguerite de Navarre, and Maupassant). P/NP or letter grading.

114B. 17th and 18th Centuries. (5) Lecture, three hours. Requisite: course 12. Study of major works of classicism and Enlightenment, including those by Racine, Pascal, La Fayette, La Fontaine, La Rochefoucauld, Diderot, Voltaire, and Rousseau. P/NP or letter grading.

115. Studies in Medieval French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of medieval French culture and literature, including lyric poetry and narrative romance, history of mediev warfare, comedy, and class structures. May be repeated for credit with topic change. P/NP or letter grading.

116. Studies in Renaissance French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of Renaissance French culture and literature, including a Pèlerin and 16th-century poetry, linguistic and poetic revolution, and poetic language, and late 17th-century French humanism. May be repeated for credit with topic change. P/NP or letter grading.

117. Studies in 17th-Century French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of 17th-century French culture and literature, including theater, philosophers, moralists, novelists, and cultural, political, social, religious, and courtly aspects. May be repeated for credit with topic change. P/NP or letter grading.

118. Studies in 18th-Century French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of 18th-century French culture and literature, including sentimental novel, theater, philosophers, and rhetorical writings. May be repeated for credit with topic change. P/NP or letter grading.

119. Studies in 19th-Century French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of 19th-century French culture and literature, including Romanticism, generation of 1848, naturalism and symbolism, and genres and trends from 1885 through World War I. May be repeated for credit with topic change. P/NP or letter grading.

120. Studies in 20th-Century French Culture and Literature. (4) Lecture, three hours. Taught in French. Study of 20th-century French culture and literature, including early 20th-century writers, surrealism, literature from 1915 to 1945, post-World War II literature, existentialism, and new novel, theater, and poetry. May be repeated for credit with topic change. P/NP or letter grading.

121. Studies in Francophone Cultures and Literatures. (4) Lecture, three hours. Taught in French. Study of Francophone cultures and literatures, including works by poets, playwrights, and novelists from Caribbean, North Africa, Quebec, and sub-Saharan Afrika, immigrant narratives, and colonialism and postcolonial studies. May be repeated for credit with topic change. P/NP or letter grading.

130. Contemporary French and Francophone Cultures. (4) Lecture, three hours. Requisite: course 12 or 100. Taught in French. Study of contemporary France and Francophone world (Canada, Quebec, Belgium, government, institutions, and cultural economic, social, and political issues. May be repeated for credit with topic change. Letter grading.

131. French and Francophone Theater. (4) Lecture, three hours. Taught in French. Through plays of 20th century, analysis of struggles of individuals and social groups in contexts that are historical, political, philosophical (existentialism, absurd), and cultural (colonialism and conformism). P/NP or letter grading.

137. French and Francophone Intellectual History. (4) Lecture, three hours. Requisite: course 12 or 100. Taught in French. Exploration of themes that address particular problem of French literature, civilization, or ideas. May be repeated for credit with topic change. P/NP or letter grading.
138. Contemporary French Theory. (4) Lecture, three hours. Requisite: course 12 or 100. Taught in French. Study of French thinkers (Barthes, Baudrillard, Cixous, Derrida, Foucault, Irigaray) and major concepts in contemporary French thought, with attention to its influence on and application to literary and nonliterary discourse. May be repeated for credit with topic change. P/NP or letter grading.

139. Paris: Study of French Capital. (4) Lecture, three hours. Requisite: course 12 or 100. Taught in French. Textual and visual exploration of historical and imaginary (re)constructions of Paris, beginning with its earliest history and gradual formation of this great urban complex in maps from Renaissance to 20th century. Study of city's streets and quarters, traffic and transportation, multiple layers of past, present, and future, and flâneurs and insurrectionists through wide range of literary and critical texts. Readings cover mainly 19th and 20th centuries — Honoré de Balzac, Chuquet Baudelaire, Emile Zola, Marcel Proust, Louis-Ferdinand Céline, and others. P/NP or letter grading.

M140. Women's Studies in French Literature. (4) (Same as Women's Studies M140.) Lecture, three hours. Exploration of views of women in French literature as author, character, symbol, etc. P/NP or letter grading.

141. French Cinema. (4) Lecture, three hours. Study of French and Francophone filmmakers in generic, thematic, and sociocultural aspects. May be repeated for credit with topic change. P/NP or letter grading.

142. Francophone Cinema. (4) Lecture, three hours. Study of Francophone (Africa, Caribbean, postcolonial communities in France) cinema and cinematographers in generic, thematic, and sociocultural aspects. May be repeated for credit with topic change. P/NP or letter grading.

143. Francophone Culture in English. (4) Lecture, three hours. Study of Francophone cinematographers in generic, thematic, and sociocultural aspects. May be repeated for credit with topic change. P/NP or letter grading.

145. French and Francophone Theater in Translation. (4) Lecture, three hours. Through plays of 20th century, analysis of struggles of individuals and social groups in contexts that are historical, political, philosophical (existentialism, absurd), and cultural (colonialism and conformism). May be repeated for credit with topic change. P/NP or letter grading.

151. Directed Research or Senior Project in French. (2 to 4) Tutorial, three hours. Requisite: junior/senior French majors with 3.5 departmental and 3.25 overall grade-point averages. Individual contract required. P/NP or letter grading.

191A. Variable Topics Research Seminars in Translation. (4) Seminar, three hours. Research seminars on topics to be announced each term. Topics include major writers, genres, cultural movements, or theoretical practices. Reading, discussion, and development of culminating project. May be repeated for credit with consent of major adviser. P/NP or letter grading.

191B. Variable Topics Research Seminars. (4) Seminar, three hours. Taught in French. Research seminars on topics to be announced each term. Topics include major writers, genres, cultural movements, or theoretical practices. Reading, discussion, and development of culminating project. May be repeated for credit with consent of major adviser. P/NP or letter grading.

198. Honors Research in French. (4) Tutorial, three hours. Limited to junior/senior French majors with 3.5 departmental and 3.25 overall grade-point averages. Development and completion of honors thesis or comparable theoretical project. May be repeated for credit. Individual contract required. Letter grading.

Graduate Courses

201. Techniques of Literary Analysis. (4) Lecture, three hours. Practicum in critical analysis of literary texts, including explication de texte. S/U or letter grading.

202. Cultural Studies. (4) Lecture, three hours. Introduction to theoretical approaches to popular and mass culture, and to postcolonial and Francophone cultures. Topics include emergent disciplines and theories such as sociology and structuralism, city, revolution, avant-garde strategies, media, diaspora during postwar modernization, Algerian War, May 68, and beyond. Theorists include Barthes, de Certeau, Bourdieu, Baudrillard, Lacan, Lyotard, Ross, Rey Chow, Virilio. S/U or letter grading.

203. Contemporary Francophone Literature. (4) Lecture, three hours. Study of Francophone (Africa, Caribbean, Vietnamese, or Quebec literatures and cultures) with specific attention to issues of cultural contact, language, colonialism, anti-colonialism, nationalism, resistance and representation, and postcolonial theory. S/U or letter grading.

204. Studies in Autobiography. (4) Lecture, three hours. Introduction to theories of autobiography and subjectivity, and to genre of autobiography in literatures in French across centuries. Topics include early modern approaches to self-writing, Rousseau and emergence of modern self, women's autobiography in France and Francophone world. Theorists may include Georges Gusdorf, Philippe Lejeune, Paul de Man, Jacques Derrida, Helene Cixous, Michel Foucault, Pierre Bourdieu, Toril Moi. S/U or letter grading.

206. Studies in History of Ideas. (4) Seminar, three hours. Particular problems in French literary and philosophical thought. May be repeated for credit. S/U or letter grading.

208. Studies in Literary Criticism. (4) Seminar, three hours. Readings in literary criticism, theory, and literature from any period of French literature. May be repeated for credit. S/U or letter grading.

209. Studies in Literary Genre. (4) Seminar, three hours. Advanced research and study of literary genres such as poetry, drama, fiction, autobiography, or performance and of theory of these genres. S/U or letter grading.

M210. Paleography of Latin and Vernacular Manuscripts, 900 to 1500. (4) (Same as Classics M210, English M215, and History M218.) Lecture, three hours; discussion, two hours. Introduction to history of Latin and vernacular manuscript book from 900 to 1500 to (1) train students to make informed judgments when evaluating place and date of origin, (2) provide training in accurate reading and transcription of later medieval scripts, and (3) examine manuscript book as witness to changing society that produced it. Focus on relationship between Latin manuscripts and vernacular manuscripts with regard to their respective presentation of written texts. S/U or letter grading.

215. Studies in Middle Ages. (4) Seminar, three hours. Examination of nature of cross-cultural, cross-linguistic, and cross-religious text comparisons for medieval literature and culture, and to postcolonial and Francophone cultures. S/U or letter grading.

220. 20th Century. (4) Lecture, three hours. Overview, both historical and analytical, of 20th-century French literature set in context of several key critical topics that interrogate canonical interpretation. Letter grading.

M270. Seminar: Literary Theory. (5) (Same as Asian M270, Comparative Literature M294, English M270, German M270, Italian M270, Scandinavian M270, and Spanish M294.) Seminar, three hours. Advanced interdisciplinary seminar to explore philosophical, historical, and theoretical foundations of literary theory as well as current issues in literary and cultural studies. S/U or letter grading.

296. Research Methods and Writing. (2) Seminar, two hours. Advanced study of research methods in literary and cultural analysis and in critical theory. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

M299. Research Resources for European Studies. (2) (Same as German M299, Information Studies M299, Italian M299, Slavic M299, and Spanish M299.) Lecture, two hours. Essentials of library research strategy and effective searching in key print and online resources for European and Russian studies. Through combination of lecture, online demonstration, and hands-on activities in and outside class, students understand how to efficiently use library and databases. S/U or letter grading.

370. Teaching French in Secondary School. (4) Lecture, three hours; discussion, one hour. Required of all candidates for general secondary instructional credentials in French. Preparation for regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.
Freshman General Education Clusters

Brenda Stevenson, Ph.D. (History)
Keith D. Stolzenbach, Ph.D. (Civil and Environmental Engineering, Institute of the Environment and Sustainability)

Matthew Norton Wise, Ph.D. (Center for Society and Genetics, History)

Scope and Objectives

Available to entering freshmen only, cluster courses are an option for satisfying general education requirements. Clusters are yearlong, collaboratively taught, interdisciplinary courses that focus on a topic of timely importance, such as the global environment or interracial dynamics. The courses are taught by some of UCLA’s most distinguished faculty members and seasoned graduate students. During Fall and Winter Quarters, students attend lecture courses and small discussion sections and/or laboratories. In Spring Quarter, the same students enroll in one of a number of satellite seminars dealing with topics related to the cluster theme.

Freshman clusters are designed to strengthen the writing, quantitative reasoning, critical thinking, and information literacy skills that students need to excel at UCLA. At the conclusion of the entire yearlong cluster, students complete over a third of their general education course requirements and fulfill the Writing II requirement. Cluster students are eligible for three terms of honors credit, with the Spring Quarter seminar providing Honors Collegium credit.

For the current cluster course offerings and general education credit, refer to http://www.college.ucla.edu/ge/clusters/.

General Education Clusters

Lower Division Courses

M1A-M1B-M1CW. Global Environment. (6-6-6) (Same as Environment M1A-M1B-M1CW). Course M1A is enforced requisite to M1B, which is enforced requisite to M1CW. Limited to first-year freshmen. Letter grading. M24A-M24B-M24CW. Work, Labor, and Social Justice in U.S. (6-6-6) (Same as Labor and Workplace Studies M1A-M1B-M1CW). Course M24A is enforced requisite to M24B, which is enforced requisite to M24CW. Limited to first-year freshmen. Letter grading. M24A-M24B. Lecture, three hours; discussion, two hours. Exploration of ways in which work has been transformed over last century, impact of this transformation on working people, and role of labor movement as force for social justice. M24CW. Special Topics. Seminar, three hours. Enforced requisite: course M24B. Topics include labor law/history, gender, race, and workplace. Satisfies Writing II requirement.

25A-25B-25CW. Politics, Society, and Urban Culture in East Asia. (5-5-5) Course 25A is enforced requisite to 25B, which is enforced requisite to 25CW. Limited to first-year freshmen. Letter grading. 25A-25B. Lecture, three hours; discussion, two hours. Comprehensive exploration of historical evolution of popular East Asian urban culture and interrelationship of East Asian politics, social life, and economic and urban cultural expression. 25CW. Special Topics. Seminar, three hours. Enforced requisite: course 25B, and English Composition 3 or 3H or English as a Second Language 3. In-depth examination of issues in historical and contemporary East Asian popular culture. Satisfies Writing II requirement.

30A-30B-30CW. Never-Ending Stories: Multidisciplinary Perspectives. Course 30A is enforced requisite to 30B, which is enforced requisite to 30CW. Limited to first-year freshmen. Letter grading. 30A-30B. Lecture, three hours; discussion, two hours. Exploration of depth of particular mythological traditions, aspects of storytelling, role of myth in culture, society, and/or art, and contributions of various disciplines to study of myth. 30CW. Special Topics. Seminar, three hours. Enforced requisite: course 30B, and English Composition 3 or 3H or English as a Second Language 3. Topics may include myth and modern art (including literature, music, and film), myth and ritual, oral tradition and orality, and political ideology, myth and science, hero and trickster, and myths of creation. Satisfies Writing II requirement.

60A-60B-60CW. America in Sixties: Politics, Society, and Culture, 1954 to 1974. (6-6-6) Course 60A is enforced requisite to 60B, which is enforced requisite to 60CW. Limited to first-year freshmen. Letter grading. 60A-60B. Lecture, three hours; discussion, two hours. Interdisciplinary exploration of U.S. society from Brown versus Board of Education (1954) to resignation of Nixon versus Board of Education (1974). Topics include civil rights, Great Society, anti-Vietnam war movement, political and artistic countercultures, and changes in technology, law, and media. 60CW. Special Topics. Seminar, three hours. Enforced requisite: course 60B. In-depth examination of political and cultural issues affecting U.S. society from 1954 to 1974. Satisfies Writing II requirement.

70A-70D. Evolution of Cosmos and Life. (6 each) Course 70A is enforced requisite to 70B, which is enforced requisite to 70CW or 70DW. Limited to first-year freshmen. Letter grading. 70A-70B. Lecture, three hours; discussion, two hours. Exploration of causes and mechanisms of globalization as well as its consequences. Critical examination of globalization theories, international institutions of trade finance, governance, and overall impact of globalization on human society. 70B. Special Topics. Seminar, three hours. Enforced requisite: course 70A. In-depth examination of cross-sectional of classical and modern social theories and debates that shape them. 70CW. Special Topics. Seminar, three hours. Enforced requisite: course 70B. In-depth examination of political and cultural issues affecting U.S. society from 1954 to 1974. Satisfies Writing II requirement.

70A-70D. Evolution of Cosmos and Life. (6 each) Course 70A is enforced requisite to 70B, which is enforced requisite to 70CW or 70DW. Limited to first-year freshmen. Letter grading. 70A-70B. Lecture, three hours; discussion, two hours. Exploration of causes and mechanisms of globalization as well as its consequences. Critical examination of globalization theories, international institutions of trade finance, governance, and overall impact of globalization on human society. 70B. Special Topics. Seminar, three hours. Enforced requisite: course 70A. In-depth examination of cross-sectional of classical and modern social theories and debates that shape them. 70CW. Special Topics. Seminar, three hours. Enforced requisite: course 70B. In-depth examination of political and cultural issues affecting U.S. society from 1954 to 1974. Satisfies Writing II requirement.

70A-70D. Evolution of Cosmos and Life. (6 each) Course 70A is enforced requisite to 70B, which is enforced requisite to 70CW or 70DW. Limited to first-year freshmen. Letter grading. 70A-70B. Lecture, three hours; discussion, two hours. Exploration of causes and mechanisms of globalization as well as its consequences. Critical examination of globalization theories, international institutions of trade finance, governance, and overall impact of globalization on human society. 70B. Special Topics. Seminar, three hours. Enforced requisite: course 70A. In-depth examination of cross-sectional of classical and modern social theories and debates that shape them. 70CW. Special Topics. Seminar, three hours. Enforced requisite: course 70B. In-depth examination of political and cultural issues affecting U.S. society from 1954 to 1974. Satisfies Writing II requirement.

Scope and Objectives

Available to entering freshmen only, cluster courses are an option for satisfying general education requirements. Clusters are yearlong, collaboratively taught, interdisciplinary courses that focus on a topic of timely importance, such as the global environment or interracial dynamics. The courses are taught by some of UCLA’s most distinguished faculty members and seasoned graduate students. During Fall and Winter Quarters, students attend lecture courses and small discussion sections and/or laboratories. In Spring Quarter, the same students enroll in one of a number of satellite seminars dealing with topics related to the cluster theme.

Freshman clusters are designed to strengthen the writing, quantitative reasoning, critical thinking, and information literacy skills that students need to excel at UCLA. At the conclusion of the entire yearlong cluster, students complete over a third of their general education course requirements and fulfill the Writing II requirement. Cluster students are eligible for three terms of honors credit, with the Spring Quarter seminar providing Honors Collegium credit.

For the current cluster course offerings and general education credit, refer to http://www.college.ucla.edu/ge/clusters/.
both life and physical sciences. Examination of evolu-
tion of universe, galaxy, solar system, and Earth in
course 70A; focus on evolution of life in course 70B.
70CW. Special Topics in Life Sciences. Seminar, three
hours. Enforced requisite: course 70B. Not open for
credit to students with credit for course 70DW. Exam-
ination in depth of various issues of evolution in cos-
mos from life sciences perspective. Satisfies Writing II
requirement. 70DW. Special Topics in Physical Sci-
ces. Seminar, three hours. Enforced requisite: course
70B. Not open for credit to students with credit for
course 70CW. Examination in depth of various issues
of evolution in cosmos from physical sciences perspec-
tive. Satisfies Writing II requirement.

71A-71B-71C. Biotechnology and Society. (5-5-
5) Course 71A is enforced requisite to 71B, which is
enforced requisite to 71CW. Limited to first-year fresh-
men. Letter grading. 71A-71B. Lecture, three hours;
discussion, two hours; laboratory, two hours. Explora-
tion of methods, applications, and implications of bio-
technology and of ethical, social, and political implica-
tions as well as biological underpinnings. 71CW. Spe-
cial Topics. Seminar, three hours; laboratory, five
hours. Enforced requisite: course 71B, and English Com-
position 3 or 3H or Eng-
lish as a Second Language 36. Topics include in-depth
examination of ethics and human genetics, bioweap-
ons and biodefense, sex and biotechnology. Satisfies
Writing II requirement.

72A-72B-72CW. Sex from Biology to Gendered So-
ciety. (6-6-6) Course 72A is enforced requisite to 72B,
which is enforced requisite to 72CW. Limited to first-
year freshmen. Letter grading. 72A-72B. Lecture, three
hours; discussion, two hours. Examination of many
ways in which sex and sexual identity shape and are
shaped by biological and social forces, ap-
proached from complementary perspectives of anthro-
pology, biology, medicine, and sociology. Specific top-
ics include biological origins of sex differences, inter-
sex, gender identity, gender inequality, homosexuality;
sex differences, sex/gender and law, and politics of sex
research. 72CW. Special Topics. Seminar, three hours.
Enforced requisite: course 72B. Topics may include
politics of reproduction, sexuality, sexual identity, social
construction of gender, and reproductive technologies.
Satisfies Writing II requirement.

80A-80B-80CW. Frontiers in Human Aging: Bi-
omedical, Social, and Policy Perspectives. (6-6-6)
Course 80A is enforced requisite to 80B, which is en-
forced requisite to 80CW. Limited to first-year fresh-
men. Letter grading. 80A-80B. Lecture, three hours;
discussion, two hours. Examination of aging process
from vantage points of multiple disciplines, including
biology, psychology, sociology, ethics, and public poli-
cy. Study of biomedical and biological aging and psy-
chological, social, and ethical implications of phenom-
ena. 80CW. Special Topics. Seminar, three hours.
Enforced requisite: course 80B. In-depth examination
of gender and aging, cellular aging, cancer, and aging of
brain. Satisfies Writing II requirement.

97A. Cluster Colloquium: Variable Topics. (1) (For-
merly numbered 97A-97Z) Seminar, one hour. Vari-
able topics course designed for students who have
completed one GE cluster. Study, through small-group
discussion and projects, of selected topics related to
one cluster theme or topic. Consult Schedule of Class-
es for topics and instructors. May be repeated once for
credit. P/NP grading.

Professors
John A. Agnew, Ph.D.
Judith A. Carney, Ph.D.
Michael R. Curry, Ph.D.
Jared M. Diamond, Ph.D.
C. Cindyl Fan, Ph.D.
Susanna B. Hecht, Ph.D.
Glen M. MacDonald, Ph.D.
Marilyn N. Raphael, Ph.D.
David L. Rigby, Ph.D.
Allen J. Scott, Ph.D.
Laurence C. Smith, Ph.D.
Michael C. Stopper, Ph.D.
Stanley W. Trimble, Ph.D.
Yongkang Xue, Ph.D.

Professors Emeriti
Charles F. Bennett, Jr., Ph.D.
William A.V. Clark, Ph.D.
Gary S. Dunbar, Ph.D.
J. Nicholas Entin, Ph.D.
Gerry A. Hale, Ph.D.
Antony R. Orme, Ph.D.
Melissa Savage, Ph.D.
Werner H. Tejqiung, Ph.D.
Benjamin E. Thomas, Ph.D.
Norman J.W. Thrower, Ph.D.
Hartmut S. Walter, Ph.D.

Associate Professors
Stephen A. Bell, Ph.D.
Thomas W. Gillespie, Ph.D.
Gregory S. Koen, Ph.D.
Yongwei Sheng, Ph.D.
Michael E. Shin, Ph.D.

Assistant Professors
Daniela F. Cusack, Ph.D.
Lisa Kim Davis, Ph.D.
Liebra B. Faier, Ph.D.

Scope and Objectives
Geography is the study of the natural world and
how humans have changed it. It examines the physical
Earth and life on it, looking at the world’s diverse cultures and economies and at
the environmental problems they produce.

Geography addresses many issues about the
contemporary world. Some are local, such as
documenting the development of ethnic neigh-
borhoods within Los Angeles. Others are
regional, such as determining the best locations
for nature reserves in California. Many are
global, such as the study of climate change
and how they affect climates, culture and re-
source issues in developing countries, and the
impact of information technologies on people in
different places.

The work of geographers often takes them out
of the classroom into the field to collect infor-
mation on topics that range from the settlement
of new immigrants to the distribution of endan-
gered species, the erosion of shorelines, and
the location of high-tech businesses. On other
occasions, geographers work in laboratories,
using techniques such as the computer analy-
sis of satellite photographs, which are then
processed with the computer modeling of
shifts in global vegetation patterns and the
distribution of human populations. Research
is also conducted in libraries and archives, pro-
bing documentary sources on human interaction
with the natural world and how that world is
imagined.

Geography graduates have a wide variety of
career opportunities because of their combina-
tion of geographical/environmental perspec-
tives and technical skills. UCLA geography stu-
dents have gone on to become university scholars, school teachers, members of govern-
mental and nongovernmental planning, devel-
oment, and conservation agencies, business
executives, lawyers, and specialists in geo-
ographical information analysis for government
and private business. Because of its sophisti-
cated focus on the relationship of the global to
the local, geography is particularly useful for
those who wish to pursue careers with an inter-
national focus.

The department has one of the top programs in
the U.S. and offers two undergraduate majors
that lead to the Bachelor of Arts degree: Geog-
raphy and Geography/Environmental Studies. The Geography major combines a broad back-
ground in the field with specific tracks. The Geog-
raphy/Environmental Studies major focuses
on the impact of humans on the natural envi-
ronment. Also offered is an undergraduate mi-
nor in Geospatial Information Systems and
Technologies.

The department also offers M.A. and Ph.D. de-
grees. Student research projects are con-
ducted in collaboration with a faculty adviser
and advisory committee. Graduate students
work in most major areas of geography and on
projects around the world. Graduate alumni of
the department have teaching positions at
many leading universities in the U.S. and
abroad.

Undergraduate Study

Geography B.A.

The Geography major allows students to com-
bine a broad background in the field with more
specific interests and career goals. Students
can select classes in several areas of geogra-
phy such as urban, economic, cultural, environ-
mental, physical, or biogeography. They should
consult with the undergraduate adviser to plan
a program suitable to their personal objectives.

Preparation for the Major

Required: Three courses (15 units) as follows:
1) Geography 1 or 2, 3 or 4 or 6, and Statistics 12.
Each course must be taken for a letter grade.

Transfer Students

Transfer applicants to the Geography major
with 90 or more units must complete as many
of the following introductory courses as possi-
ble prior to admission to UCLA: one physical
gerography or biogeography course, one cul-
tural geography or economic geography
course, and one statistics course.

Refer to the UCLA Transfer Admission Guide
at http://www.admissions.ucla.edu/prospect/
adm_tr.htm for up-to-date information regarding
transfer selection for admission.

The Major

Required: Eleven upper division geography
courses (44 units minimum), each taken for a
letter grade.
Geography/Environmental Studies B.A.

The major in Geography/Environmental Studies develops and deepens students’ understanding of environmental issues; it explores problem-solving approaches from an interactive people/nature viewpoint and involves analysis of social, physical, and biotic environmental systems. The major’s uniqueness lies in its emphasis on its geographical perspective of human impacts on natural systems, as well as of implications of global change on local and regional human systems.

Preparation for the Major

Required: Geography 1 or 2, 3 or 4 or 6, 5, and Statistics 12. Each course must be taken for a letter grade. Students are strongly advised to complete all preparation for the major courses before beginning upper division work in the major.

Transfer Students

Transfer applicants to the Geography/Environmental Studies major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one physical geography or biogeography course, one cultural geography or economic geography course, one people and ecosystems course, and one statistics course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Eleven upper division geography courses, each taken for a letter grade, that must be distributed as follows: (1) natural systems core — two courses from 100, 101, 102, 103, 104, 105, 108, 111, 112, M127; (2) human systems core — two courses from 118, 133, 134, 138, 140, 142, M146, 147, 148, 150, 151, M153, 155, 159A; (3) environmental studies cluster — four courses from M106, M107, M109, 110, 113, 114, M115, 116, 120, 121, 122, 123, 124, 125, 126, M127, M128, 129, M131, 132, 135, 136, M137, 159C, 159D, 159E; (4) procedures — two courses (8 units) from 100A (2 units), 101A (2 units), 105A (2 units), 162, 163, 167, 168, 169, 170, M171, 172, 173, 177; and (5) regions — one course from 136, 139, 152, 156, 158, 180, 181, 182A, 182B, 183, 184, 185, 186, 187.

Geography/Environmental Studies majors are advised to complete the required courses in the natural and human systems cores before taking courses in the environmental studies cluster.

Honors Program

The honors program is designed for Geography and Geography/Environmental Studies majors who are interested in completing a research project that culminates in an honors thesis.

To qualify for graduation with departmental honors, students must have a cumulative grade-point average of 3.5 or better in all upper division geography courses and a 3.0 overall GPA. They must enroll in Geography 198A and 198B in two consecutive terms and earn grades of A– or better. They may elect to work with one or two faculty sponsors. Students are awarded highest honors, honors, or no honors based on an evaluation of the thesis by the faculty sponsor(s). Contact the undergraduate advising office for further information.

Computing Specialization

Majors in Geography and Geography/Environmental Studies may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61 with a minimum grade of C in each course (Mathematics 32A and 32B are also highly recommended), and (3) completing at least two courses from Geography 104, 167, 168, M171. Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Geography Minor

The Geography minor is designed for students who wish to deepen and/or broaden their major program of study with a distinctive yet flexible program of courses encompassing the relationship between environment and society. The minor allows students to develop a coherent strategy for understanding and explaining the manner in which people and the Earth interact.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in the Geography Department Advising Office, 1255 Bunche Hall, (310) 825-1166. Courses should be selected in consultation with the departmental adviser.

Required Lower Division Courses (10 units):

Two courses from Geography 1, 2, 3, 4, or 5.

Required Upper Division Courses (20 units):

Any five upper division geography courses.

No more than 8 units may be applied toward both this minor and a major or minor in another department or program, and at least three of the five upper division courses must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval.

Each minor course must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

Geospatial Information Systems and Technologies Minor

The Geospatial Information Systems and Technologies minor is designed to provide students with a strong background in the use, application, and development of geospatial/environmental research techniques and methods.

To enter the minor, students must be in good academic standing, have completed Geography 7 with a grade of C or better, and file a petition in the Geography Department Advising Office, 1255 Bunche Hall, (310) 825-1166. For majors in Geography or Geography/Environmental Studies, only two upper division courses may overlap between the major and this minor.

Required Lower Division Course (5 units): Statistics 12.

Required Upper Division Courses (24 units minimum): Geography 167, 168, 169, and any three courses selected from 154, 162, 163, 166, 170, M171, 172, 173, and 199 (4 units with approval of the faculty adviser). Each upper division course must be completed with a grade of C or better.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in the minor. Successful completion of the minor is indicated on the transcript and diploma.
Graduate Study
Official, specific degree requirements are de-
tailed in Program Requirements for UCLA Graduate
Degrees. Most programs are available at the Graduate
Division website, http://www.gdnet.ucla.edu/
gsaa/library/pgmrqintro.htm. In many cases, more
detailed guidelines may be outlined in an-
nouncements, other publications, and websites of
the schools, departments, and programs.

Graduate Degrees
The Department of Geography offers Master of
Arts (M.A.), Candidate in Philosophy (C.Phil.),
and Doctor of Philosophy (Ph.D.) degrees in
Geography.

Geography

Lower Division Courses
1. Earth’s Physical Environment. (5) Lecture,
three hours; laboratory, two hours. Study of Earth’s physical
environment, with particular reference to nature and
distribution of landforms and climate and their signifi-
cance to people. P/NP or letter grading.

2. Biodiversity in a Changing World. (5) Lecture,
three hours; discussion, two hours. Biogeographic ex-
ploration of plant and animal diversity and conserva-
tion issues and concepts around the world. Study of physical,
biotic, and human factors responsi-
ble for evolution, persistence, and extinction of species and
ecological communities. Analysis of effects of hu-
man activity. P/NP or letter grading.

3. Cultural Geography. (5) Lecture, three hours;
discussion, two hours. Introduction to cultural
geography of modern world, with examination of key concepts of
space, place, and landscape as these have changed and been shaped by connections between societies
and their natural environments. Examples from variety of
landscapes and places since 1800 and especially from Los Angeles region. P/NP or letter grading.

4. Globalization: Regional Development and
World Economy. (5) Lecture, three hours; discussion,
one hour. Economic geography explores spatial distribution of all forms of human productive activity at number of
global scales — local, regional, national, and
global. Key theme is impact of increasingly powerful
global economic forces on organization of production.
P/NP or letter grading.

5. People and the Earth’s Ecosystems. (5) Lecture,
three hours; laboratory, two hours. Exploration of ways in
which human activity impacts natural environment and
how modification of environment can eventually have significant consequences for human activity. Ex-
amination, using case studies, of real environmental
problems that confront us today. P/NP or letter grading.

6. World Regions: Concepts and Contemporary
Issues. (5) Lecture, three hours; discussion, two hours.
Interdisciplinary and historical approach to modern peoples, their differences in wealth or poverty, and
their local origins of food production. Brief introduction to physical geography and biogeography of each
region. Discussion of each region’s peoples, languages,
foods, prehistories, and histories. P/NP or letter grad-
ing.

7. Introduction to Geographic Information Sys-
tems. (5) Lecture, three hours; laboratory, two hours.
Designed for freshmen/sophomores. Introduction to fundamental principles and concepts necessary to carry out sound geograph-
ic analysis with geographic information systems (GIS). Reinforcement of key issues in GIS, such as geo-
graphic coordinate systems, map projections, spatial
analysis, and visualization of spatial data. Laboratory exercises use database query, manipulation, and spa-
tial analysis to address real-world problems. P/NP or letter grading.

Upper Division Courses
100. Principles of Geomorphology. (4) Lecture,
three hours; reading period, one hour. Requisite:
course 1. Recommended: course 100A. Study of pro-
cesses that shape the world’s landforms, with empha-
sis on weathering, mass movement, fluvial erosion,
transport, deposition; energy and material transfers;
and changes in landforms. P/NP or letter grading.

101. Coastal Geomorphology. (4) Lecture, three
hours; reading period, one hour. Requisite: course 1.
Recommended: course 101A. Study of origin and de-
velopment of coastal landforms, emphasizing past and present
processes, sediments, stratigraphic sequences, sediment
transfers, and such features as beaches, estuaries, la-
goons, deltas, wetlands, dunes, seaciffs, and coral
reefs, together with coastal zone management. P/NP
or letter grading.

110. Population and Natural Resources. (4) Le-
cure, three hours; reading period, one hour. Designed
for juniors/seniors. Examination of debate about envi-
ronmental change and ability of the planet to maintain
a growing population. Exploration and evaluation of
basic demographic processes in context of food pro-
duction, energy use, and environmental degradation.
Discussion of major debates about use of resources in
countries, in context of increasing population in developing coun-
tries and decreasing population in Western countries. P/NP or letter grading.

111. Forest Ecosystems. (4) Lecture, three hours;
field trips. Requisite: course 2. Recommended: course 105. Field
and laboratory investigations into role of water in geo-
graphic processes and impacts on landscape. Students solve
problems using database query, manipulation, and spatial
analysis. P/NP or letter grading.

112. Analytical Animal Geography. (4) Lecture,
two hours. Designed for sophomores. Focus on current issues in
animal geography and concepts necessary to carry out sound geograph-
ic analysis with geographic information systems (GIS).
P/NP or letter grading.

113. Humid Tropics. (4) Lecture, three hours;
field trips. Designed for juniors/seniors. Examination of humid
tropics, with emphasis on rainforests, their ecological
principles, and historical impact on human societies.
P/NP or letter grading.

116. Population and Natural Resources. (4) Le-
cure, three hours; reading period, one hour. Designed
for seniors. Examination of debate about envi-
ronmental change and ability of the planet to maintain
a growing population. Exploration and evaluation of
basic demographic processes in context of food pro-
duction, energy use, and environmental degradation.
Discussion of major debates about use of resources in
countries, in context of increasing population in developing coun-
tries and decreasing population in Western countries. P/NP or letter grading.

119. Human Impact on Biophysical Environment:
What Science Has Learned. (4) Same as Environ-
ment M107. Lecture, three hours; discussion, one hour.
Designed for sophomores. Examination of his-
tory, mechanisms, and consequences of interactions between
humans and environment, with emphasis on role
of science in explaining role of humans in increas-
ing climate impact, with emphasis on the last three million
years, including evidence for glacial and interglacial
oscillations, historic changes, paleogeographic recon-
struction, external and internal forcing mechanisms,
and human implications. P/NP or letter grading.

120. Tropical Climatology. (4) Lecture, three hours;
in-depth exploration of development of tropical climate,
with special reference to hurricanes, ENSO, and mon-
soons. Examination of human interaction with tropical climate, with focus of impacts of past and present
processes, hydrodynamic processes, sediment trans-
fers, and such features as beaches, estuaries, la-
goons, deltas, wetlands, dunes, and seaciffs, together
with coastal zone management. P/NP or letter grading.

122. Analytical Animal Geography. (4) Lecture,
two hours. Designed for sophomores. Focus on current issues in
animal geography and concepts necessary to carry out sound geograph-
ic analysis with geographic information systems (GIS).
P/NP or letter grading.

123. Analytical Animal Geography. (4) Lecture,
two hours. Designed for sophomores. Focus on current issues in
animal geography and concepts necessary to carry out sound geograph-
ic analysis with geographic information systems (GIS).
P/NP or letter grading.

132. Globalization: Regional Development and
World Economy. (5) Lecture, three hours; discussion,
two hours. Biogeographic exploration of plant and animal diversity and conserva-
tion issues and concepts around the world. Study of physical,
biotic, and human factors responsi-
ble for evolution, persistence, and extinction of species and
ecological communities. Analysis of effects of hu-
man activity. P/NP or letter grading.

133. Tropical Climatology. (4) Lecture, three hours;
in-depth exploration of development of tropical climate,
with special reference to hurricanes, ENSO, and mon-
soons. Examination of human interaction with tropical climate, with focus of impacts of past and present
processes, hydrodynamic processes, sediment trans-
fers, and such features as beaches, estuaries, la-
goons, deltas, wetlands, dunes, and seaciffs, together
with coastal zone management. P/NP or letter grading.

146. Applied Climatology: Principles of Climate
Impact on Natural Environment. (4) (Same as Atmo-
spheric and Oceanic Sciences M166.) Lecture, three
hours; discussion, one hour. Designed for juniors/se-
niors. Exploration of knowledge and tools to solve complex problems in contemporary applied climatolo-
y, including current practices, influence of climate on
environment, and human influence on changing cli-
mates. P/NP or letter grading.

155. Environmentalism: Past, Present, and Fu-
uire. (4) (Same as Environment M132 and Urban Planning M165.) Lecture, three hours; discussion, one hour.
Exploration of history and origin of major environ-
mental ideas, movements or countermovements they
spawned, and new and changing nature of modern en-
vironmentalism. Introduction to early environmental
movement, how rise of modern sciences reshaped environ-
mental thought, and how this was later transformed by late-19th-century ideas and rise of American conservation
movement. Review of origins of environmental
thought and contemporary environmental
issues as they relate to broader set of questions about nature of development, sustainability, and equity
in environmental debate. Exploration of issues in broad
context, including global climate change, rise of pandemics, deforestation, and environmental justice impacts. (Same as Urban Planning M150.) Lecture, three hours; discussion, one hour. City landscapes and their representation in Europe, the U.S., and California. Survey of specific concept or method of landscape study each week, with detailed discussion of its expression in American and Californian geography. P/NP or letter grading.

M146. Feminist Geography. (4) (Same as Women's Studies M146.) Lecture, three hours; discussion, one hour. Critical engagement of gender as concept of geographic inquiry. Geographies, analysis of feminist geographic theory and methods, landscapes of gender, challenges of representing gender. Spaces of femininity, masculinity, and sexuality. P/NP or letter grading.

147. Social Geography. (4) Lecture, three hours; discussion, one hour. Study of spatiality of social differences such as race, class, gender, age, sexuality, locality. Critical explorations of identity, social categories, and spatial structures. Importance of space and place in social life. P/NP or letter grading.

M149. Transportation Geography. (4) (Same as Urban Planning M150.) Lecture, three hours. Required: course 3 or 4. Designed for juniors/seniors. Study of geographical aspects of transportation, with focus on characteristics and functions of various modes and on complexities of intra-urban transport. P/NP or letter grading.

M151. Historical Geography of Modern World. (4) Lecture, three hours; reading period, one hour. Required: course 5 or 6. Designed for juniors/seniors. Study of geographical aspects of transportation, with focus on characteristics and functions of various modes and on complexities of intra-urban transport. P/NP or letter grading.

152. Cities of Europe. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Urbanization of Europe, growth of city systems and internal spatial structure, functions, and geographic problems of urbanization. Field projects, city field trips to European cities. Participation attention to historical development and landscapes of capital cities such as Rome, Paris, and Berlin. P/NP or letter grading.

M153. Parks, Societies and Their Lessons for Our Own Future. (5) (Same as Anthropology M158Q and Honors Collegium M152.) Lecture, two hours; discussion, two hours. Examination of modern and past tribal and band societies, with emphasis on non-Western societies (Native Americans, New Guineans, and others) that met varying fates, as background to examination of how modern state societies are coping or failing to cope with similar issues. P/NP or letter grading.

154. Images of Earth: World from Above. (4) Lecture, three hours. Use of maps, charts, diagrams, and other images to show how Earth has been represented through ages, how they have been influenced by current ideas of how they function, and how they themselves influence course of events. P/NP or letter grading.

155. Industrial Location and Regional Development. (4) Lecture, three hours. Requisite: course 4 or Economics 4, 18 or 19. Designed for juniors and seniors. Study of origins, growth processes, internal structure and pattern, interactions, and environmental and spatial problems of the Los Angeles metropolitan area. P/NP or letter grading.

157. Korean Urban Experience. (4) Lecture, three hours; reading period, one hour. Designed for juniors and seniors. Study of origins, growth processes, internal structure and pattern, interactions, and environmental and spatial problems of the South Korean city. P/NP or letter grading.

158. Special Studies. (1-5) Seminar, one hour. Enforced requisite: consent of department and working with existing models. P/NP or letter grading.

159A. Problems in Geography, (4 each) Discussion, three hours; discussion, three hours. Preparatory: completion of three courses in a concentration. Limited to seniors. Seminar course in which students carry out independent research projects developed from courses within a concentration. P/NP or letter grading.

159B. Spatial Demography and Social Processes in the City, V. Culture and Environment.- The Modern World; 159D. Physical Geography; 159E. Biogeography.

Procedures

162. Glacier Environments of California's High Sierras. (4) Fieldwork, 10 hours; discussion, four hours. Introduction to alpine glacial environment through three hours of introductory lecture followed by intensive seven-day field trip to California's High Sierras. Students carry out laboratory exercises, as well as data collection for research projects designed around their individual interests. Presentation of additional evening lectures, using presentation facilities at Sierra Nevada Aquatic Research Laboratory (SNARL). Offered in summer only. P/NP or letter grading.

163. Field Analysis in Biogeography. (4) Fieldwork, eight hours. Requisites: courses 2, 5, 108, 112. Examination of the fundamental concepts and architecture of programming. Coverage of geographic information systems (GIS), and programming in GIS environment. Topics include the use of geographic information systems (GIS), and programming in GIS environments.
mental change. May be repeated for credit. Concurrently scheduled with course C296A. P/NP or letter grading.

195. Community or Corporate Internships in Geography. (4) Tutorial, four hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

198A-198B. Honors Research in Geography I, II, (4-4) Tutorial, to be arranged. Preparation: 3.5 grade-point average overall, at least five upper division geography courses with 3.5 grade-point average. Limited to juniors/seniors. Thesis or comprehensive research project under direction of instructor and completion of honors thesis or comprehensive research project under direct supervision of one or two faculty members. May be repeated for maximum of 16 units. Individual contract required. Letter grading.

199. Special Studies. (2-8) Tutorial, to be arranged. Limited to juniors with B average in major or seniors. May be repeated for maximum of 16 units. P/NP or letter grading.

Graduate Courses

Environment

200. History and Paradigms of Geomorphology. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Preparation: courses 201, 103, 105, M107. Requisite: course 100. Analysis of geomorphic theories since the scientific revolution, with emphasis on catastrophism, uniformitarianism, glacial theories, isostasy and eustasy, evolution and cyclicality, thermodynamics and mechanics, quantification, and current paradigms. View of each theme in its contemporary place.

201. Coastal Geomorphology Seminar. (4) Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100, 101. Discussion of selected topics pertaining to geomorphic processes and responses observable in the coastal zone. May be repeated for credit.

202. Fluvial Geomorphology Seminar. (4) Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100 and 105, or Civil Engineering 150. Discussion of selected topics pertaining to action of running water in shaping the physical landscape. May be repeated for credit.

203. Glacial Geomorphology Seminar. (4) Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100, 103. Discussion of selected topics pertaining to action of snow and ice in arctic and alpine environments. May be repeated for credit.

204A and 204B. Climatic Geomorphology. (4) Lecture, three hours; laboratory, one hour. Preparation: first year of calculus and acquaintance with Fortran IV. Requisite: course 104. Courses must be taken in sequence. Introduction to tools and concepts of environmental physics of relevance to natural and man-made landscapes. Such basic intellectual, mathematical, and computer programming tools are of special concern to physical geographers, ecologists, and architects.

205. Seminar: Climatology. (4) Discussion, three hours; reading period, one hour. Requisites: courses 204A, 204B, 204C. Selected topics. May be repeated for credit.

206. Introduction to Biophysical Modeling of Land Surface Processes and Land/Atmosphere Interactions. (4) (Same as Atmospheric and Oceanic Sciences M206.) Lecture, two hours; laboratory, one hour; discussion, one hour; reading period, one hour. Designed for graduate students. Presentation of introductory knowledge for graduate students to understand nature, principles, and scope of biophysical modeling of land surface processes, including ideal canopy model, radiation, heat and CO2 fluxes transfer, and satellite data application. Laboratory sessions included. S/U or letter grading.

207. Regional Climate and Terrestrial Surface Processes Seminar. (4) Seminar, three hours. Designed for graduate students. Physical concepts and basic principles of land-surface/groundwater interactions. Exploration of topics in terms of regional and global perspective and implications. Human activities cause changes in land cover, water, and energy balances. Some regions, in particular, appear to be “hot spots.” Regions to be studied in detail. S/U or letter grading.

208. Advanced Biogeography: Plants. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Requisites: courses 108, and 110 or 116. Intensive review and analysis of physical and cultural factors influencing plant distributions.

212. Advanced Biogeography: Animals. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 112. Intensive review and analysis of biological and cultural factors influencing animal distributions. S/U or letter grading.

213. Seminar: Biogeography. (4) Discussion, three hours; reading period, two hours. Requisite: course 208 or 212. Related research projects growing out of course 208 or 212. May be repeated for credit.

215. Quaternary Studies: Physical Aspects. (4) Discussion, three hours; reading period, two hours; fieldwork, three hours. Preparation: at least one course from 200 through 205 or one appropriate graduate course in atmospheric and oceanic sciences or Earth and space sciences. Analysis of changing physical environment of Quaternary period. May be repeated for credit.

217. Quaternary Studies: Ecological Aspects. (4) Discussion, three hours; reading period, two hours. Requisites: courses 202 or 204A, 204B, and 204C or 208 or 212 or one appropriate graduate course in anthropological, botany, Earth and space sciences, or zoology. Analysis of ecological aspects of environmental change during Quaternary period. May be repeated for credit.

218. Advanced Medical Geography. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 118. In-depth study of selected topics in medical geography and intense review of recent research.

223. Seminar: Humid Tropics. (4) Seminar, three hours; reading period, two hours. Designed for graduate students. Selected topics. Biophysical and cultural complexes of the humid tropics, with emphasis on problems related to human settlement and livelihood. May be repeated for credit. S/U or letter grading.

228. Human Security and Environmental Change. (4) Seminar, three hours. Discussion of impact of environmental change on food, water, and physical security of human populations and societies’ adaptations to environmental changes. Topics vary from year to year. S/U or letter grading.

229. Resource-Based Development. (4) (Same as Urban Planning M234C.) Discussion, three hours. Recommended preparation: Urban Planning 234A. Study of economic development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of state, corporations, and local groups, and environmental and social impact of its development. Letter grading.

Human Geography

231. Terminology and Theory in Political Economy: Deconstruction and Reconstruction of Approaches in Research, Writing, and Practice. (4) Discussion, three hours; reading period, three hours. Designed for deconstruction of oft-used terms in intellectual discourse with goal of making assumptions more explicit, analysis more concise, and use of theory to inform practice (and vice versa) more successful. Construct a more concise and useful terminology to inform theoretical inquiry and research practice. S/U or letter grading.

232. Advanced Cultural Geography. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 133. Lectures and discussions around specific aspects of development of cultural landscape in different geographic environments.

233. Seminar: Cultural Geography. (4) Seminar, three hours; reading period, two hours. Discussions on particular topics in cultural geography. Content may vary from year to year. May be repeated for credit. S/U or letter grading.

234. Environment and Subsistence in Indigenous Cultures. (4) Seminar, three hours. Discussion on subsistence and management of environmental issues in indigenous cultures. Topics vary from year to year.

235. Seminar: Social Geography. (4) Seminar, three hours; reading period, one hour. Process of doing socio-cultural geography entails conceptualizing, adapting, and reformulating social and critical theories of space, subject, and power. Examination of this process in considering theoretical concepts of social space and current research.

237. Seminar: Historical Geography. (4) Seminar, three hours; reading period, two hours. Theory and practice of historical geography in North America and Europe. May be repeated for credit. S/U or letter grading.

240. Advanced Political Geography: Geopolitics. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Intensification and principles of geopolitics. Selected regions used as examples of differing techniques of study in geopolitics. S/U or letter grading.

241. Seminar: Political Geography. (4) Discussion, three hours; reading period, two hours. Requisite: course 240. Related research projects growing out of course 240. May be repeated for credit.

249. Seminar: Economic Geography. (4) Discussion, three hours; reading period, one hour. Requisite: course 248. Related research projects growing out of course 248. May be repeated for credit.

250. Urban Systems. (4) Lecture, two hours; discussion, one hour; reading period, one hour. General study of hierarchy of urban places, including diffusion within urban hierarchy and theories to account for location and distribution of cities. S/U or letter grading.

251. Seminar: Urban Geography. (4) Discussion, three hours; reading period, two hours. Requisite: course 250. Related research projects growing out of course 250. May be repeated for credit.

Procedures

260. Advanced Field and Laboratory Analysis in Geomorphology. (4) Laboratory/workfield, 10 hours. Preparation: two courses from 200, 201, 202, 203, 215. Designed for graduate students. Examination of advanced field and laboratory procedures used in contemporary geomorphic research, with emphasis on scientific design, instrumentation, and data evaluation.

262. Advanced Field Analysis: Biogeography. (8) Fieldwork, 10 hours. Observation, measurement, and analysis of biogeographic phenomena, including identification and evaluation of biotic populations and communities, and the techniques and methodologies used to understand and modify the physical and social impact of the human activity.

268. Advanced Projects in Geographic Information Systems (GIS)/Remote Sensing. (4) Discussion, one hour; laboratory three hours. Recommended prerequisite: course 169 or 170 or Earth and Space Sciences 150. Familiarity with a GIS or image processing package expected. Individualized research projects conducted on UNIX platforms within a structured course environment. All aspects of a modest but original project, in-
Core Courses

297A. History of Modern Geography. (4) Lecture, three hours; reading period, one hour. Evolution of field of geography in 19th and 20th centuries, with emphasis on professionalization of geography and its emergence as modern academic discipline. S/U or letter grading.

297B. Physical Basis of Geography. (4) Lecture, three hours; reading period, one hour. Critical evaluation of formative influences, paradigm shifts, and present challenges of physical geography, illustrated from historical developments and changing research frontiers in geomorphology, climatology, oceanography, hydrology, and soils. S/U or letter grading.

297C. Evolution, Ecology, Environmentalism, and Roots of Modern American Geography. (4) Seminar, three hours; reading period, one hour. Discussion of how contemporary development of modern concepts of evolution, ecology, and environmentalism influenced, and were influenced by, development of modern geography as academic discipline. S/U or letter grading.

299A. Statistical Methods for Geographic Research. (4) Lecture, three hours; laboratory, two hours. Requisite: course M171. Use of linear models, discriminant functions, and factor analysis to analyze problems in geography. S/U or letter grading.

299B. Geographic Data Visualization and Analysis. (4) Lecture, three hours; laboratory, two hours. Requisites: course M168, Statistics 12. Development of broad base of knowledge and set of skills that foster conduct of high-quality geographic data analysis. S/U or letter grading.

299C. Qualitative Methods and Methodology. (4) Seminar, three hours; laboratory, two hours. Examination of definition and use of qualitative methodology and methods in social-cultural geographic research. Exploration of relationship between methodology and epistemology; review of range of research methods and techniques, including interviewing and focus groups, observation, action research, ethnography, and interpretation of material culture, and consideration of ethical and practical issues of conducting qualitative research. S/U or letter grading.

299D. Research Design in Geography. (4) Lecture, four hours. Introduction to logic of geographic inquiry. Topics include questions surrounding philosophy of science, research design issues, and range of methodologies available to and implemented by geographers to enable students to evaluate geographic literature critically. S/U or letter grading.

299E. Remote Sensing of Environment. (4) Formerly numbered 269.) Laboratory, three hours; independent study, two hours. Requisite: course 167. Study of aerial photographs and other remote sensing images as tools for geographical research. Particular attention to analysis of landscapes and interpretation of interrelationships of individual features in their physical and cultural complex. S/U or letter grading.

Scope and Objectives

The Department of Germanic Languages offers an extraordinary array of courses in languages, literatures, and cultures. This broad range of studies offers training in specialized fields such as film, linguistics, folklore, and critical theory. Courses prepare students for a variety of careers, including law, business, international relations, academic professions, and publishing.

Undergraduate majors earn a Bachelor of Arts degree. The graduate program offers Master of Arts and Ph.D. degrees. Refer to the Scandinavian Section later in this catalog for information about the degrees in Scandinavian studies.

At all levels of study various specializations are possible. Language, literature, and culture studies are available in Afrikaans, Dutch, and Icelandic, in addition to German. The program also provides opportunity for study, work-study, and internships in a German-speaking country or in a country related to the course of study.
Undergraduate Study

Grammar/Composition Courses
No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Afrikaans, Dutch, German, and Yiddish grammar and/or composition. Students with demonstrated preparation may be permitted to transfer to a more advanced course with consent of the instructor.

German B.A.
The German major is designed for students who seek a solid grounding in the German language, an introduction to the study of linguistics, literature, and cultural studies, and the opportunity to determine their own area of focus.

Preparation for the Major
Required: German 1, 2, 3, 4, 5, 6, or equivalent. Students who have completed one year of college-level German language courses should enroll in course 4. Students who are in doubt as to their level of language proficiency or who are native speakers should consult the language program supervisor.

Transfer Students
Transfer applicants to the German major with 9 or more units must complete the following introductory courses prior to admission to UCLA: two years of German.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: German 140 (or 141), 152, 153, 158, six upper division German courses (at least two of which must be at the 150 level or above), and two upper division courses that may be in German or in another Germanic language or in related fields such as history, linguistics, music, philosophy, and political science. Each course must be taken for a letter grade.

Honors Program
To qualify for graduation with departmental honors, students must earn a cumulative grade-point average of 3.6 or better in upper division German courses and a 3.3 overall GPA, and complete German 199 with a grade of A. Contact the departmental honors adviser for procedures, special arrangements, possible exceptions, and other information.

German Minor
To enter the German minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (8 units): German 5 and 6 or equivalent.

Required Upper Division Courses (20 units): German 152, 153, and any three German courses (excluding German literature in translation).

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Germanic Languages Minor
To enter the Germanic Languages minor, students must have an overall grade-point average of 2.0 or better.

Required Upper Division Courses (28 units): Seven courses in any of the following languages and literatures: Afrikaans, Dutch, German (excluding German literature in translation), Scandinavian languages, Yiddish.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Germanic Languages offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Germanic Languages and a Master of Arts (M.A.) degree in Scandinavian (see Scandi-

Graduate Degrees
The Department of Germanic Languages offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Germanic Languages and a Master of Arts (M.A.) degree in Scandinavian (see Scandinavian Section).

Dutch

Lower Division Course
10. Contemporary Dutch Society and Culture: Beyond Rembrandt, Cheesem, and Wooden Shoes. (5) (Formerly numbered 100.) Lecture, three hours. Lectures and readings in English. Country known as Holland, or more correctly, The Netherlands (in Dutch: Nederland) has played crucial role in both American history and American current events. It was first country to set up official diplomatic relations with U.S. (in 1782) and is major investor in U.S. and staunch ally of its foreign policy. Piercing of tourist aura surrounding The Netherlands by actively comparing and contrasting contemporary Dutch culture and society with contemporary American culture and society. How life would be different growing up in The Netherlands. Letter grading.

Upper Division Courses
103A-103B. Elementary Dutch. (4-4) Lecture, four hours; language laboratory. Course 103A is requisite to 103B. Introduction to standard language of Netherlands and one of three standard languages of Belgium. Practice in grammar, listening, speaking, reading, and writing. P/NP or letter grading.

104A-104B. Accelerated Dutch. (6-6) Lecture, four hours; discussion, one hour; laboratory, two hours. Covers material in courses 103A, 103B, 103C in two terms rather than three. Letter grading.

113. Modern Dutch and Flemish Literature in Translation. (4) Lecture, three hours. Readings and analysis of works by selected authors of Netherlands and northern (Flemish) Belgium such as Soon, Claus, Couperus, Herrmans, Mulisch, Multatuli, and Reve and selected poets such as Campert, Gezelle, Gorter, Klos, Lucbott, Nijhoff, van Ostaijen, and Vroman. Letter grading.

131. Introduction to Modern Dutch Literature. (4) Discussion, three hours. Requisite: course 103B or 120. Selected works of literature of Nether-lands and northern (Flemish) Belgium from mid-1850s to present, including novels by such writers as Multatuli, Couperus, Herrmans, Mulisch, and Reve and poetry by such groups as symbolist Beweging van Tachtig and post-War Beweging van Vijftig. P/NP or letter grading.
German

Lower Division Courses

1. Elementary German. (4) Lecture, five hours; laboratory, one hour. P/NP or letter grading.
2. Elementary German for Graduate Students. (4) Lecture, four hours. Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.
3. Elementary German. (4) Lecture, five hours; laboratory, one hour. Enforced requisite: course 1. P/NP or letter grading.
4. Intermediate German. (4) Lecture, four hours. Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.
5. Intermediate German. (4) Lecture, four hours; laboratory, one hour. Enforced requisite: course 3. P/NP or letter grading.
6. Intermediate German. (4) Lecture, four hours; laboratory, one hour. Enforced requisite: course 5. P/NP or letter grading.
7. Elementary German: Intensive. (12) Lecture, 15 hours; laboratory, five hours. Intensive basic course in German equivalent to courses 1, 2, and 3. P/NP or letter grading.
9. German Conversation. (3) Lecture. Three hours. Enforced requisite: course 3. Conversation course designed for intermediate and advanced students who wish to improve their spoken command of German. Topics of current student interest to be used as basis for conversation. P/NP or letter grading.

10. Directed Research or Senior Project in Dutch. (4) Tutorial, to be arranged with faculty member who directs study (see department for I.D. number). May be repeated once. S/U grading.
11. Preparation for Ph.D. Qualifying Examinations. (4) Tutorial, to be arranged with faculty member who directs study (see department for I.D. number). S/U grading.

Upper Division Courses

100. German History and Culture before 1500. (5) Formerly numbered 100A.) Lecture, three hours; discussion, one hour. Taught in English. Development of German culture and society from beginning to 1500 as represented in literature, art, and architecture. P/NP or letter grading.
101. German History and Culture, 1500 to 1914. (4) Formerly numbered 100B.) Lecture, three hours; discussion, one hour. Taught in English. Study of German culture and society as represented in literature, art, music, and architecture from Reformation and invention of printing to start of World War I. P/NP or letter grading.
102. War, Politics, Art. (5) Formerly numbered 100C.) Lecture, three hours; discussion, one hour. Taught in English. Analysis of interrelationship between politics, social conditions, and arts with respect to war. World Wars I and II and German history to be used as model for principal questions of society and philosophical thinking. P/NP or letter grading.
103. German Film in Cultural Context: Early German Film. (4) Formerly numbered 102A.) Lecture, two hours; discussion, one hour. Taught in English. Survey of German film between 1919 and 1945. Analyzing the sociological and stylistic development of film from silent Expressionist films to Nazi propaganda and entertainment films. Film discussions enhanced by interactive media. Letter grading.
104. German Film in Cultural Context, 1945 to Present. (4) Formerly numbered 102B.) Lecture, two hours; discussion, one hour. Taught in English. Survey of German film since 1945 in its thematic and stylistic development. Did German filmmakers after World War II and Holocaust, economic recovery, Cold War and division of Germany, reunification, and growth of minority communities? Film discussions enhanced by interactive media. Letter grading.
105. Tristan, Isolde, and History of Heterosexuality. (4) Formerly numbered 110A.) Lecture, three hours. Taught in English. German, French, and English versions of Tristan and Isolde from Middle Ages to 20th century. Particular attention to relation between representation of heterosexual love in each text and contemporaneous ideas about human sexuality. P/NP or letter grading.
106. Bargaining with Devil. (4) Lecture, three hours. Taught in English. Investigation of how devil’s pact has served as metaphor for human desire to transcend limits of power, human knowledge, and artistic achievement. Readings and viewings include Book of Genesis, historical documents from witchcraft trials, Goethe’s Faust, romantic stories and fairy tales, and Rosemary’s Baby. Letter grading.
107. Love and Sex in German Literary Tradition. (4) Formerly numbered 110B.) Lecture, three hours. Taught in English. Study of major literary works that address issues of idealized desire, emotional/sexual boundaries, and development of sexual identity. Letter grading.
108. Nietzsche and Critique of Western Culture. (4) Formerly numbered 110.) Lecture, two hours; discussion, one hour. Taught in English. Readings that focus on Nietzsche’s critique of Christianity, master/slave dynamic, and reciprocal relation between poetry and philosophy. German majors required to complete reading in German. Letter grading.
109. Jewish Question and German Thought. (4) Formerly numbered 112.) Lecture, three hours. Taught in English. Analysis of works that represent process of Jewish assimilation, disenfranchisement, and extermination, including authors such as Mendelssohn, Heine, Kafka, Paul Celan, Nelly Sachs, Anne Frank, and others. Letter grading.
110. Special Topics in Modern Literature and Culture. (4) (Formerly numbered 116.) Lecture, three hours. Taught in English. Content varies with instructor and may include works by authors such as Thomas Mann, Rilke, Kafka, Brecht, Christa Wolf, and others. May be repeated for credit. Letter grading.

111. Thomas Mann, Hesse, Böll, and Grass: German Writers in English. (Formerly numbered 117.) Lecture, three hours. Taught in Eng.-

112. Feminist Issues in German Literature and Culture. (Formerly numbered 118.) Lecture, three hours. Taught in English. Analysis of major issues in German feminism today (e.g., status, creative work, and reception of women writers in various periods such as Romanticism, Fascism, and/or divided/unified Germany). Letter grading.

113. German Folklore. (Formerly numbered 120.) Lecture, three hours. Taught in English. Survey of various folklore genres in cultural context, including legends, proverbs, and cultural enactments such as carnival. Letter grading.

114. Fairy Tales and Fantastic. (Formerly numbered 122.) Lecture, three hours; discussion, one hour. Taught in English. History and reception of folklore collections in Europe, with particular attention to ideology and influence of Grimms' tales. Interpretation of selected tales and their transformations and appropriation in literature, film, advertising, and pedagogy. P/NP or letter grading.

115. 19th-Century German Philosophy. (Formerly numbered 145.) Lecture, three hours; discussion, one hour. Taught in English. German philosophy, which may generally be characterized as philosophy that takes activity rather than passive subsistence to be fundamental nature of all things, is one of Germany's greatest gifts to humanity. Exploration of first half of two-century history of German philosophy — period from Kant to Nietzsche, including Hegel, Kierkegaard, and Marx. Letter grading.

116. 20th-Century German Philosophy. (Formerly numbered 147.) Lecture, three hours; discussion, one hour. Taught in English. German philosophy, which may generally be characterized as philosophy that takes activity rather than passive subsistence to be fundamental nature of all things, is one of Germany's greatest gifts to humanity. Exploration of second half of two-century history of German philosophy — period from Nietzsche through Habermas, including Heidegger, Gadamer, Jaspers, and Frankfurt School theologians. Letter grading.

117. German Exile Culture in Los Angeles. (Formerly numbered 114.) Lecture, three hours. Taught in English. Cultural and historical exploration of exile as site of creative activity for German writers and other artists during and after World War II. General questions of cultural migration and cultural transfer to be thematized. P/NP or letter grading.

140. Language and Linguistics. (4) (Formerly numbered 150.) Lecture, three hours. Taught in Eng. Language and Linguistics, with emphasis on structure of modern standard German and English, phonetics, phonology, morphology, syntax, semantics and pragmatics. Other topics include diachronic, spatial, and social variation of German (i.e., its historical development, dialectology, and sociolinguistic dimensions). Letter grading.

141. Current Topics in Germanic Linguistics. (4) (Formerly numbered 170.) Lecture, three hours. Enforced requisite: course 152. Taught in English with German proficiency required. In-depth investigation of one topic in field of Germanic linguistics, such as phonetics and phonology, morphology and syntax, semantics and pragmatics, social and spatial variation (i.e., sociolinguistics and dialectology of German), or history of German. May be repeated for credit. Letter grading.

C142. Linguistic Theory and Grammatical Description. (4) (Formerly numbered 172.) Lecture, three hours. Enforced requisite: course 140 or Linguistics 20. Taught in English with German proficiency required. Problems in structure of Dutch and German, considered from theoretical frameworks such as sign-oriented linguistics, functional linguistics, diachronic grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concurrently scheduled with course C238. Letter grading.

150. German Play Production Act I. (4) (Formerly numbered 153.) Lecture, four hours. Taught in German. Exploration of second half of German plays (readings variable) and to different types of drama and drama theory. Reading, discussion, and analysis of plays in detail, practice in performing roles in class, and writing of short responses in German. May be repeated for credit. Letter grading.

151. German Play Production Act II. (5) (Formerly numbered 119B.) Lecture, four hours. Taught in English. Enforced requisite: courses 3 (enforced), 150. Taught in German. Staging of German play. Students responsible for various aspects of theater production, including acting and technical jobs (costumes, sets, and programs). Intensive pronunciation practice. Two public performances take place at end of term. May be repeated for credit. Letter grading.

152. Conversation and Composition on Contemporary German Culture and Society I. (4) (Formerly numbered 130A.) Lecture, three hours. Requisite: course 6. Taught in German. Structured around themes as they emerge in contemporary German texts ranging from newspapers, novels, to contemporary popular culture. Students will analyze, with emphasis on speaking and writing proficiency. P/NP or letter grading.

153. Conversation and Composition on Contemporary German Culture and Society II. (4) (Formerly numbered 130B.) Lecture, three hours. Requisite: course 6. Taught in German. Structured around themes as they emerge in contemporary German texts ranging from newspapers, novels, to contemporary popular culture. Students will analyze, with emphasis on speaking and writing proficiency. P/NP or letter grading.

154. Business German. (4) (Formerly numbered 130.) Lecture, three hours. Taught in German. Professional language course that teaches German business administration, practices, and correspondence, with attention to cultural nuances. Ongoing development of student proficiency is aided by assignments which include reading via newspaper articles and Internet. P/NP or letter grading.

155. Advanced German Language through Cultural History and Current Affairs. (4) (Formerly numbered 134.) Lecture, three hours. Taught in English. Enforced requisite: course 152 or 153. Taught in German. Advanced German language course that juxtaposes cultural history with current events to teach complex speaking and writing skills of international business. Readings may include selections from Luther, Heine, Freud, and current authors. Students create their own interactive media presentations. Letter grading.

156. Advanced Practical Translation. (5) (Formerly numbered 136.) Lecture, three hours. Taught in German. Enforced requisite: course 155 with grade of B or better. Taught in German. Advanced German to English translation of literary, journalistic, and sociocultural texts. Work in technique of translation.

157. Contemporary German Cinema: Advanced Conversation and Composition. (4) Lecture, three hours. Taught in German. Development of advanced speaking and writing skills in essay writing in German by considering issues of style, structure, grammar, and vocabulary. Introduction to contemporary German cinema to expose students toSlice of German contemporary film history, with focus on notion of boundary. Examination of different types of boundaries and borders (e.g., physical borders between countries; boundaries created by various political ideologies; boundaries of race, class, and gender; boundary between memory and experience), ways in which people cross them, and their reasons for these transgressions. Analysis of movies to better understand various cinematic techniques. P/NP or letter grading.

158. Introduction to Study of Literature. (4) Lecture, three hours. Taught in German. Introduction to most important terms and resources of literary analysis to help students develop and improve skills in close reading. Critical reading of literary texts, development of research techniques, acquire familiarity with basics of literary and cultural analysis, different literary forms, and in pursuit of literary and cultural study. Letter grading.

160. Introduction to German Poetry. (4) (Formerly numbered 140A,) Lecture, three hours. Enforced requisite: course 152 or 153. Taught in German. Close reading of representative examples of German lyric poetry from early as well as recent literary periods, including systematic consideration of poetic conventions and forms, diction, imagery, symbolism, and metrics. Letter grading.

161. Introduction to German Drama. (4) (Formerly numbered 140B,) Lecture, three hours. Enforced requisite: course 152 or 153. Taught in German. Analysis of selected dramatic genres (e.g., tragedy, comedy, one-act play, lyric drama, lyric theater, historical drama, etc.), including systematic review of dramatic forms, techniques, and subgenres. Texts selected from both contemporary and earlier periods. Letter grading.

162. Introduction to German Narrative Prose. (4) (Formerly numbered 140C,) Lecture, three hours. Enforced requisite: course 152 or 153. Taught in German. Analysis of selected narrative genres (e.g., short story, novella, fairy tales, etc.), including systematic review of narrative forms, techniques, and subgenres. Texts selected from both contemporary and earlier periods. Letter grading.

163. Project of Enlightenment. (4) (Formerly numbered 154.) Lecture, three hours. Enforced requisite: course 152 or 153. Taught in German. Topics in Enlightenment literature, social history, and culture. Works by Goethe, Lessing, Schiller, Kant, Mozart, and others. Letter grading.

164. Introduction to 19th-Century Studies. (4) (Formerly numbered 144.) Lecture, three hours. Enforced requisite: course 152 or 153. Taught in German. Presentation of major texts from Romanticism to realism. Works by Kleist, Büchner, Heine, Fontane, and others. Letter grading.

165. Introduction to Modern Literature. (4) (Formerly numbered 146.) Lecture, three hours. Enforced requisite: course 152 or 153. Taught in German. Analysis of selected modern works written between 1890 and 1945, including texts by authors such as Thomas Mann, Kafka, Rilke, Brecht, and others. Letter grading.

166. Introduction to German Literature. (4) (Formerly numbered 148.) Lecture, three hours. Enforced requisite: course 152 or 153. Taught in German. Analysis and discussion of German, Austrian, Swiss, and ex-East German literature. Emphasis on understanding the nature of作品 by Heinrich Böll, Günter Grass, Friedrich Dürrenmatt, Elfriede Jelinek, and Christa Wolf with view to their specific political and cultural context. Letter grading.

169. Studies in German Literature before 1750. (4) (Formerly numbered 152.) Lecture, three hours. Enforced requisite: course 152 or 153. Taught in German. Readings and analysis of major works from Middle Ages to baroque. Letter grading.

170. Goethe. (4) (Formerly numbered 154.) Lecture, three hours. Enforced requisite: course 152 or 153. Taught in German. Reading and discussion of representative works (except Faust) from Goethe's early period through maturity and old age. Letter grading.

171. Goethe's Faust. (4) (Formerly numbered 156.) Lecture, three hours. Enforced requisite: course 152 or 153. Taught in German. Detailed interpretation of Goethe's major work, Parts I and II, with general consideration of other treatments of Faust theme in European literature. Letter grading.

172. Romanticism. (4) (Formerly numbered 158.) Lecture, three hours. Enforced requisite: course 152 or 153. Taught in German. Reading and analysis of major works by German Romantics, including Friedrich Schlegel, Novalis, E.T.A. Hoffman, and Eichendorff. Letter grading.
173. Advanced Study of Modern Literature. (4) (Formerly numbered 160.) Lecture, three hours. En- forced requisites: course 152 or 153. Taught in German. Literature after 1945 in German-speaking countries, including issues such as national borders, ethnic identity, gender relations, and commer- cialization of culture. Letter grading.

174. Advanced Study of Contemporary Literature and Culture. (4) (Formerly numbered 162.) Lecture, three hours. Enforced requisites: course 152 or 153. Taught in German. Most readings in German; some theoreti- cal readings in English. Exploration of issues sur- rounding immigration and intercultural identity in Ger- many since 1960, with focus on period after 1990. Ex- amination of various cultural spaces, practices, and standpoints as staged in literary and nonliterary texts, with emphasis on constructions of ethnicity, nation, race, class, and gender. Analysis of several political and cultural debates that dominated media and public discussions in Germany and Europe for several weeks. Discussion of several literary texts by Turkish German and other minority/intercultural writers. Examination of hip-hop minority music and culture as voices in political debates. Exploration of contemporary controversies around Islam in Germany. Reading of several theoreti- cal pieces that examine relationships between immi- gration, globalization, culture, and identity. P/NP or let- ter grading.

175. Intercultural Germany: Literature, Politics, Mi- gration, and Culture. (4) Lecture, three hours. Taught in German. Most readings in German; some theoreti- cal readings in English. Exploration of issues sur- rounding immigration and intercultural identity in Ger- many since 1960, with focus on period after 1990. Ex- amination of various cultural spaces, practices, and standpoints as staged in literary and nonliterary texts, with emphasis on constructions of ethnicity, nation, race, class, and gender. Analysis of several political and cultural debates that dominated media and public discussions in Germany and Europe for several weeks. Discussion of several literary texts by Turkish German and other minority/intercultural writers. Examination of hip-hop minority music and culture as voices in political debates. Exploration of contemporary controversies around Islam in Germany. Reading of several theoreti- cal pieces that examine relationships between immi- gration, globalization, culture, and identity. P/NP or let- ter grading.

176. Readings in Middle High German Literature. (4) Lecture, three hours. Selected readings from 1500 to 1700, with introduction through context. Use of pre- modern Germanic languages and secondary literature. Letter grading.

204. Early Modern German Literature. (4) Lecture, three hours. Selected readings from 1500 to 1700, with introduction through context. Use of pre- modern Germanic languages and secondary literature. Letter grading.

206. Weimar Classicism. (4) Lecture, three hours. Reading and interpretation of major works of German Classicism. May include problems in reception of clas- sicism by later authors and cultural theorists. Letter grading.

207. Romanticism. (4) Lecture, three hours. Analysis of selected works and theories of German Romantics such as Friedrich Schlegel, Novalis, and Hoffmann, with attention to relationship between Romanticism and other periods. Letter grading.

209B. 19th-Century Drama. (4) Lecture, three hours. Analysis of selected plays and their reception from Kleist to Wagner. Discussion of political, social, and cultural drama, Volkstheater, and other forms. Letter grading.

210A. Naturalism, Symbolism, and Expressionism. (4) Lecture, three hours. Analysis of selected works poetry, drama, prose), of late 19th century, from Haupt- mann to Kafka. Discussion of sociological spectra and pluralism of styles and forms. Letter grading.

210B. 20th-Century Novel to 1945. (4) Lecture, three hours. Prose works in first half of 20th century as they express war experience, crisis of consciousness, and cultural conflicts between wars, as well as innovations in narrative technique. Letter grading.

211. Postwar Literature. (4) Lecture, three hours. Study of major works by German-speaking authors writing since World War II. Examination of issues such as identity crises, nationalism and divided Germany, gender expectations, and social-political attitudes. Let- ter grading.

212. Contemporary Literature and Culture. (4) Lecture, three hours. Analysis of current cultural issues and their relation to literary production and interpreta- tion. Topics may include areas such as feminism, post- colonialism, postmodernism, and contemporary theo- ries of textuality. Letter grading.

213. Topics in Literature and Film. (4) Lecture, four hours. Focus on two different modes of cultural representation, examination of topics in German litera- ture and film from Weimar Republic to present. Study of media theory, feminist film theory, and interrelation- ships between film, literature, and social history. Letter grading.

217. History of German Language. (4) Discussion, three hours. Historical survey of development of stan- dard literary German language from time of Indo-Euro- pean ur German to Proto-Germanic, West Germanic, medieval period, Reformation, baroque period, and Enlightenment until its final codification at end of 19th cen- tury. S/U or letter grading.

232. Old High German. (4) Discussion, three hours. Introduction to earliest phases of German literature, with readings in Old High German. Letter grading.

C238. Linguistic Theory and Grammatical Descrip- tion. (4) Lecture, three hours. Enforced requisites: course 140 or Linguistics 20. Taught in English with German proficiency required. Problems in structure of Dutch and German, considered from theoretical frame- works such as sign-oriented, formal lin- guistics, discourse grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concur- rently scheduled with course C142. Graduate students meet as group, additional hour each week and write research papers of greater length and depth. Let- ter grading.

251. Seminar: Germanic Linguistics. (4) Seminar, three hours. Current topics in synchronic or diachronic lin- guistics, such as specific issues in generative gram- mar, sociolinguistics and dialectology, or language contact. Letter grading.

252. Seminar: Historical and Comparative Ger- manic Linguistics. (4) Seminar, three hours. Topics selected from field of historical German phonology and syntax according to needs and preparation of students enrolled (e.g., West Germanic problematic and classifications of Germanic languages, Old High German influential verbal and nominal morphology, proto-Germanic syn- tax). S/U or letter grading.

256. Seminar: Enlightenment. (4) Seminar, three hours. Selected topics in cultural, literary, and philo- sophic history. May include modern critiques of En- lightenment thought. Letter grading.

257. Seminar: Age of Goethe. (4) Seminar, three hours. Selected topics in literature and culture between 1775 and 1832, with special emphasis on work of Goethe and Schiller as it relates to philosophic texts such as Hegel’s Phänomenologie des Geistes or as it relates to historical events such as French and Ameri- can Revolutions. Letter grading.

258. Seminar: Romanticism. (4) Seminar, three hours. Discussion of specific author or topic from Ro- mantic period, possibly in close connection with course 208. Critical review of secondary works. S/U or letter grading.

260. Seminar: Modern Period. (4) Seminar, three hours. In-depth analysis of one particular issue in pre- 1945 German literature and culture. Letter grading.

261. Seminar: Contemporary Literature. (4) Semi- nar, three hours. In-depth analysis of one particular is- sue in post-1945 German literature and culture. Letter grading.

262. Seminar: Germanic Folklore. (4) Seminar, three hours. Detailed investigation of some special as- pects of Germanic folklore, with emphasis on problems of theory and method in analysis of folkloric material. Letter grading.

263. Seminar: Literary Theory. (4) Seminar, three hours. In-depth analysis of one particular issue in pre- 1945 German literature and culture. Letter grading.

M264. Topics in Communicative, Cognitive, and Functional Approaches to Linguistic Analysis. (4) (Same as Applied Linguistics M262.) Seminar, three hours. Requisite: course C142 or C238. Readings, dis- cussion, analyses, and validation procedures within sign-based linguistics, cognitive grammar, and dis- course-functional approaches to language. Consider-
Yiddish

Upper Division Courses

101A. Elementary Yiddish. (4) Lecture, four hours. Introduction to grammar; instruction in listening, speaking, reading, and writing skills. P/NP or letter grading.

102B-102C. Intermediate Yiddish. (4-4) Lecture, three hours. Requisite: course 102A. Course 102B is requisite to 102C. Grammatical exercises, reading and linguistic analysis of texts, conversation. P/NP or letter grading.

121C. Special Topics in Yiddish Literature in English Translation. (4) Lecture, three hours. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of wide range of 19th- and 20th-century literature. P/NP or letter grading.

130. Introduction to Yiddish Culture and Language through Film. (4) Lecture, three hours. Introduction to Yiddish language and culture, with focus on classic Yiddish films and documentaries as integral tools for accessing culture associated with this heritage language. Viewing and discussion to gain deeper understanding and appreciation of complexity and scope of Yiddish culture and in particular of annihilated Yiddish civilization of 20th century. These films represent most accessible way available to hear Yiddish spoken in fluent, natural manner. P/NP or letter grading.

131C. Special Topics in Yiddish Literature. (4) Lecture, three hours. Requisite: course 131A or 131B. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of wide range of 19th- and 20th-century literature. P/NP or letter grading.

197. Individual Studies in Yiddish. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study or more specialized investigation of topics in Yiddish, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

596. Directed Individual Study or Research. (4) Tutorial, three hours. To be arranged with faculty member who directs study or research. Required research paper must be filed with department chair. S/U grading.

597. Comprehensive Examination or Ph.D. Qualifying Examinations. (4) Tutorial, three hours. To be arranged with faculty member who directs examination preparation. S/U grading.

598. Research for and Preparation of M.A. Thesis. (4 to 12) Tutorial, three hours. To be arranged with faculty member who directs research for and preparation of thesis. S/U grading.

GERONTOLOGY

Interdisciplinary Minor
College of Letters and Science
UCLA
A265 Murphy Hall
Box 951571
Los Angeles, CA 90095-1571
(310) 825-3223
fax: (310) 206-1275
e-mail: kmcjunkin@college.ucla.edu

Scope and Objectives

The worldwide expansion of the older adult population ensures that issues regarding aging will dominate our environmental, economic, social, political, psychological, and medical concerns and endeavors well into the twenty-first century. The undergraduate minor in Gerontology (1) introduces students to the field, (2) prepares them for advanced academic work, (3) lays the groundwork for careers involving a burgeoning aging population, (4) contributes to increased public awareness of issues regarding aging, and (5) helps students plan more effectively for their own futures as they and their families become older.

Undergraduate Study

The Undergraduate Council of the UCLA Academic Senate suspended admissions to the Gerontology minor effective Fall Quarter 2009. Continuing and transfer students were permitted to declare the minor by the end of Fall Quarter 2009. Students currently in the minor are not affected by the admissions suspension.

Gerontology Minor

To enter the Gerontology minor, students must have an overall grade-point average of 2.0 or better.

Required Upper Division Courses (28 units):
Gerontology M140 and six courses from M104C, M104D, M104E, M119O, M119X, M150, Community Health Sciences 90, Psychology M117J, 124G, 195A (only 8 units may be applied toward the minor; fieldwork placements must be approved by the chair of the minor), Women's Studies 185 (only when the special topic is women, health, and aging).

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Gerontology Upper Division Courses

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) (Same as Social Welfare M104C and Women's Studies M104C) Lecture, four hours. Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity. Letter grading.
M104D. Public Policy and Aging. (4) (Same as Social Welfare M104D.) Examination of theoretical models and concepts of the policy process, with application to aging policy. Description of decision-making processes that affect policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting aging policy. Description of history of concepts and theories about aging that affect aging policy. Description of history of key aspect of social gerontology. P/ NP or letter grading.

M104E. Social Aspects of Aging. (4) (Same as Social Welfare M104E.) Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around a key aspect of social gerontology. P/ NP or letter grading.

M119O. Psychology of Aging. (4) (Same as Psychology M119O.) Required. Psychology 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at end stages of life. Some alterations that occur represent improvement, others are detrimental. Examination of impact of aging process on mental phenomena and exploration of ways in which positive changes can be maximally utilized and impact of detrimental alterations minimized. P/ NP or letter grading.

M119X. Sociology and Behavioral Neuroscience of Aging. (4) (Same as Psychology M119X.) Lecture, three hours. Designed for juniors/seniors. Biologic mechanisms of aging process and its terminal phase, death, have been increasingly studied in recent years. Establishment of what is known experimentally about biology and behavioral neuroscience of aging and evaluation of theories developed to account for this knowledge. P/ NP or letter grading.

120. Sex and Aging. (4) Lecture, three hours. Sexuality in aging from psychological, physiological, physical, and psychosocial perspectives, with emphasis on differences between females and males concerning physical and social changes that occur with aging and how this impacts on emotional well-being and human sexual response. P/ NP or letter grading.

M140. Introduction to Study of Aging. (4) (Same as Social Welfare M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/ NP or letter grading.

M142SL. Intergenerational Communication across Lifespan. (4) (Same as Social Welfare M142SL.) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. What do you say to your parents in conversation? How do you talk to your grandparents? Does your baby talk well to another as group? How do you communicate well with boss who is 30 years older than you? Individuals of all ages interact with one another, and their interactions have significance throughout their lives. Introduction to psychological, intergenerational, and societal issues related to intergenerational communication across lifespan. Letter grading.

M150. Sociology of Aging. (4) (Same as Sociology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, experience, and response to aging in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social worlds of aged; caregiving relations and institutions; professions concerned with aged and aging.

195. Community or Corporate Internships in Gerontology. (4) Internship (appreciation community setting), eight hours. Requisites: courses M119O or M119X, M140. Limited to juniors/seniors. Internship in applications of gerontology in supervised setting in community agency or business. Students meet on regular basis with sponsor and provide periodic reports of their experience. Cummulating report required. May be repeated for credit, but only 8 units may be applied to degree with approval of minor chairman. Individual contract with supervising placement sponsor required. Information and contracts may be obtained from Gerontology Advising Office, 8631 Franz Hall. P/ NP or letter grading.

196. Research Apprenticeship in Gerontology. (2 to 4) Tutorial, three hours per week per unit. Requisites: courses M119O or M119X, and M140. Limited to juniors/seniors. Entry-level research apprenticeship with practical applications of gerontology through research under guidance of faculty mentor. Individual contract required. Information and contracts may be obtained from Gerontology Advising Office, 8631 Franz Hall. P/ NP or letter grading.

199A. Directed Research or Senior Project in Gerontology. (2 to 4) Tutorial, to be arranged. Requisites: courses M119O or M119X, and M140. Limited to juniors/seniors. Supervised individual research under guidance of gerontology faculty mentor. Cummulating paper required. May not be repeated for credit. Individual contract required. Information and contracts may be obtained from Gerontology Advising Office, 8631 Franz Hall. Letter grading.

199B. Guided Research or Senior Project in Gerontology. (4) Tutorial, to be arranged. Requisites: courses M119O or M119X, and M140. Limited to juniors/seniors. Supervised individual research under guidance of gerontology faculty mentor. Cummulating paper required. May be repeated for credit. Individual contract required. Information and contracts may be obtained from Gerontology Advising Office, 8631 Franz Hall. P/ NP grading.

Amy B. Ziegart, Ph.D. (Public Policy)

Scope and Objectives
The Global Studies major provides undergraduate students with a rigorous interdisciplinary education in the principal issues confronting today’s globalized world. The curriculum features three thematic pillars that capture the principal dimensions of the unprecedented depth and breadth of interconnections among nation-states, ethnic and religious groups, and individuals. Culture and society courses concentrate on the tensions between local ways of life with deep historical, linguistic, ethnic, and religious roots and the larger processes of transculturation in contemporary cultures and multiple identities, fueled by the communication of ideas and the movement of people all around the world. Governance and conflict courses focus on challenges to the nation-state from forms of governance above (regional and global forms of governance) and below (autonomy and secessionist movements) and from security threats beyond inter-state warfare (ethnic conflict, terrorism, civil wars). Markets courses address the interactions among global, regional, national, and sub-national economic processes and market dynamics, their effects on different societies with respect to economic growth, poverty, inequality, and the interactions among market forces, political institutions, and public policy.

The curriculum draws on insights from disciplines across the humanities and social sciences to give students the theoretical and methodological skills and knowledge base necessary to understand this complex and rapidly changing world.

Undergraduate Study
The Global Studies major is a designated capstone major. As students progress through the major, they move from a set of broad themes, theories, and perspectives to a more specialized focus about which they develop a specific research expertise and write a thesis. In completing the capstone, students should demonstrate an appropriate mastery of a specialized area of global studies and a critical understanding of current scholarly concerns, literatures, and debates. They should also be able to identify and analyze primary sources and use those sources and appropriate scholarly literature to design and carry out a research project.

Global Studies B.A.
Capstone Major
Admission
Admission to the Global Studies major is by application only and is highly competitive, with only a limited number of students admitted each year. To be eligible to apply, UCLA students must have completed all nonlanguage preparation for the major courses and one modern foreign language equivalent to level 3 by the end of the term in which they are applying. Any remaining language courses may be completed after students have been accepted to the major. Each preparation for the major course must be taken for a letter grade, and the UC grade-point average for all preparation courses must be a minimum of 3.25. In addition, students must have earned a grade of B or better in Global Studies 1. The application period is once per year, and students must apply no later than the end of Fall Quarter of their junior year.

Meeting the above minimums does not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration.

Global Studies Premajor
Incoming freshman and transfer students may be admitted as Global Studies premajors on acceptance to UCLA. Global Studies premajors must apply for the major at the end of Fall Quarter of their junior year.
year; they are not automatically accepted into the major.

**Preparation for the Major**

*Required: Global Studies 1 with a grade of B or better; one statistics course selected from Political Science 6, 6R, Statistics 10, 11, or 12; demonstrated proficiency equivalent to level 6 at UCLA in one modern foreign language; and five additional courses as follows: (1) one culture and society course selected from Anthropology 9, Comparative Literature 1C or 2C, 1D or 2D, Ethnomusicology 25, Geography 3, 6, History 1B, 2B, or World Arts and Cultures 20; (2) one government and conflict course selected from History 22, Political Science 10, 20, 30, 50, 50R, or Sociology 1, and (3) one markets course selected from Economics 1, 2, or Geography 4. The remaining two courses, taken from two separate categories, may be selected from the three lists above. One course from the following list may be applied toward the cultural category: Asian 70C, French 14, 14W, Italian 42A, 42B, Near Eastern Languages 50C, Russian 90B, 90BW, Spanish 42, 44. A minimum grade-point average of 3.25 is required in these courses.

**Transfer Students**

Transfer applicants to the Global Studies pre-major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one modern world history course, one major world region languages and cultures course, one international politics course, one macroeconomics or microeconomics course, one statistics course, and demonstrated proficiency equivalent to level 3 at UCLA in one modern foreign language. Transfer students must apply for the major by the end of Fall Quarter of their junior year.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

**The Major**

After successful completion of Global Studies 100A and 100B, students are expected to attend a summer Global Learning Institute at one of several locations around the world in which they enroll in Global Studies 110A and 110B. During their senior year, students must also take four capstone courses — Global Studies 191 and 194 in Fall Quarter, followed by 199A and 199B. Courses 199A and 199B culminate in a capstone senior thesis of 35 to 50 pages.

**Global Studies Minor**

The Global Studies minor offers students a multidisciplinary curriculum in the humanities and social sciences through which they can explore the complex and multifaceted interconnections that characterize the contemporary world. The minor is designed to complement and enrich studies in their major.

To enter the minor, students must (1) be in good academic standing (minimum 2.0 grade-point average), and (2) have completed Global Studies 1 and one course in two of the following three categories: (a) culture and society — Anthropology 9, Asian 70C, Comparative Literature 1C or 2C, 1D or 2D, Ethnomusicology 25, French 14, 14W, Geography 3, 6, History 2B, Italian 42A, 42B, Near Eastern Languages 50C, Russian 90B, 90BW, Spanish 42, 44, World Arts and Cultures 20, (b) government and conflict — History 22, Political Science 10, 20, 30, 50, 50R, Sociology 1, and (c) markets — Economics 1, 2, Geography 4.

After completing Global Studies 100A and 100B, Global Studies minors are highly encouraged to participate in a summer Global Learning Institute at one of several locations around the world. The courses offered, Global Studies 110A and 110B, may be applied toward any two of the elective categories (culture and society, governance and conflict, and markets).

No more than two upper division courses (8 to 10 units) may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.
Scope and Objectives

The field of health services examines the organization and financing of various activities to prevent and treat disease. This includes programs in both the public and private sectors at all levels — local, state, and federal.

Faculty members come from such diverse fields as economics, management, law, statistics, operations research, planning, medicine, history, sociology, and political science. These diverse backgrounds are harmonized by their devotion to the analysis of problems in the financing and delivery of health services, with a focus on populations rather than individual patients.

The Department of Health Services offers both practice-oriented and research-oriented graduate programs. The primary professional degree, the Master of Public Health (M.P.H.), includes training in various aspects of health administration, such as policy formulation, health planning, organization, and management. For more advanced professional work, the Dr.P.H. degree offers education in the full scope of public health services and prepares candidates for leadership in community health work at all jurisdictional levels. For information on the M.P.H. and Dr.P.H. and concurrent degree programs, see Public Health Schoolwide Programs.

For those interested in careers in research and teaching, the department offers M.S. and Ph.D. degrees in Health Services. These programs maintain close ties with related activities in the Schools of Dentistry and Medicine, including the Robert Wood Johnson Clinical Scholars Program, the Program in Prevention, and the Cancer Control Division. The RAND/UCLA Center for Health Policy Study and the RAND/UCLA Center for Healthcare Financing Research afford opportunities for joint activities with the RAND Health Sciences Program. Graduates of the academic degree programs pursue careers in universities, as well as in public and private agencies involved in health services research and health policy analysis.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasas/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Health Services offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Health Services.

Health Services

Upper Division Courses

100. Health Services Organization. (4) Lecture, four hours; discussion, one hour. Preparation: 4 units of social sciences. Structure and function of American health care system; issues and forces shaping its future. P/NP or letter grading.

C121. Tobacco: Prevention, Use, and Public Policy. (4) Lecture, four hours. Designed for juniors/seniors. Study of tobacco use and its health consequences, including interplay of historical, biological, sociocultural, political, and economic forces with knowledge, attitudes, and behavior choices of individuals. Introduction to prevention interventions, cessation interventions, anti-tobacco efforts in U.S., and international trends in tobacco use. Concurrently scheduled with course CM221. Letter grading.

140. Foundations of Maternal and Child Health. (4) Seminar, four hours. Introduction to field of maternal and child health, with focus on major issues affecting health and well-being of children and families over life course. Emphasis on health, prevention, and supportive programs at different stages of child's life; application of life course health development framework to understanding health disparities and implications for policy and practice. Letter grading.

197. Individual Studies in Health Services. (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

200A-200B. Health Systems Organization and Financing. (4 to 6 each) Lecture, four to six hours; discussion, two hours. Limited to graduate health services students. In-depth analysis of health systems in U.S. using relevant theories, concepts, and models. S/U or letter grading.

M202. Qualitative Research Design and Methodology for Indigenous Communities. (9) (Same as American Indian Studies M202 and Nursing M221.) Seminar, three hours. Introduction to some key theoretical themes in American Indian studies and exploration of methods that can be used to incorporate them in research on American Indian cultures, societies, languages, and other issues. Quantitative methods (design, appropriate use), with emphasis on qualitative research methods, ethics, and special considerations in conducting research in American Indian country. Design of research and exploration of feasibility of re-searching topics. Letter grading.

M204A-M204B-M204C. Seminars: Pharmaceutical Economics and Policy, (1-1-2) (Same as Economics M204L-M204M-M204N.) Seminar, three hours every other week for three terms. Requisites: course M236, Economics 201A, 201B, 201C. Limited to graduate public health and economics students. Various topics in economics of pharmaceutical industry, including...
rates of innovation, drug regulation, and economic impact of pharmaceuticals. In Progress (M204A, M204B) and S/U or letter (M204C) grading.

205. Pharmacological Policy. (4) Lecture, three hours. Policy issues pertaining to pharmaceutical sector. Topics include determinants of expenditures on drugs, price setting in industry, health insurance coverage for pharmaceuticals, and research and development process. Letter grading.

207. Current Topics in Health Services: Practice and Policy Perspectives. (2) Formerly numbered 207A-207B-207C.) Seminar, two hours. Required of Dr.P.H. students. Examination and discussion of current health services topics in various practice sectors, with focus on organizational leadership and direction in addressing these issues. Journal club discussions of relevant scientific literature, presentations of dissertation work by advanced Dr.P.H. students, and interactive lectures and discussions on current policy issues. Letter or pass/fail grading.

215A. Healthcare Quality and Performance Management. (4) Lecture, four hours; preparation: completion of summer internship requirement. Management and operations of individual units and organizations of American healthcare system. Exploration of ways in which they actually function and how to ensure their quality and effectiveness. Examination of roles, activities, and daily challenges of managers and how these challenges can best be met on day-to-day basis. Emphasis on applied practice with intent being improvement of student managerial competencies and on development of skills to manage operational processes in delivery of health services, primarily directed to improving quality, efficiency, profitability, performance, and quality of healthcare services. Quality improvement (QI) techniques such as performance measurement, rapid cycle testing, breakthrough series, and interorganizational collaboration benefit quality and productivity. Letter grading.

CM221. Tobacco: Prevention, Use, and Public Policy. (4) (Same as Community Health Sciences M223.) Lecture, four hours; discussion, two hours. Prerequisites: courses 100 and 200A; open to juniors/seniors and graduate students. Study of tobacco use and its health consequences, including interplay of historical, biological, sociocultural, political, and economic forces with knowledge, attitudes, and behavior choices of individuals. Introduction to prevention interventions, cessation interventions, anti-tobacco efforts in U.S., and international trends in tobacco use. Concurrently scheduled with course C121. Letter grading.

225A-225B. Health Services Research Design. (6-6) Lecture, four hours; laboratory, two hours. Limited to departmental M.S. and Ph.D. students. Letter grading.

225A. Introduction to scope of health services research, conceptualization and design of health services research, choice and assessment of measures for such research, and methods for studies involving direct data collection. Broad overview to conducting health services research, alternative research paradigms, building conceptual models of what students are trying to study, designing and testing measures, and direct data collection issues of survey and questionnaire design, sampling, community engagement, and research ethics. 225B. Prerequisite: course 225A. Development of conceptual models for health services research, identification of primary data sources, study design, and its operationalization through regression models.

226A-226B. Readings in Health Services Research. (2-2) Seminar, two hours. Limited to departmental M.S. and Ph.D. students. Introduction to research literature in health services research, including literature on key conceptual models, classic empirical studies, and current research illustrating cutting-edge methods or findings. In Progress (M204A) and S/U grading.

232. Leadership Capstone Seminar. (2) (Not same as course 234.) Fall. Offered every two years. Seminar, two hours. Preparation: completion of summer internship requirement. Designed for graduate students completing their master’s training in health management and health policy. Examination of leaders and leadership in healthcare and other organizations to provide broad introduction to literature on skills, behaviors, and characteristics of organizational leaders. Relationship and importance of vision, values, change, strategy, and communication. Identification of characteristics of successful leaders. Students evaluate their own leadership style and identify opportunities for further development. Letter grading.

233. Health Policy Analysis. (4) (Same as Community Health Sciences M252.) Lecture, three hours. Requisites: courses 100 or 200A, M236, M287. Conceptual and practical analysis of health policy, emphasizing role of analysis during various phases of lifecycle of public policy. Letter grading.

234. Health Services Organization and Management Theory. (4) (Same as Community Health Sciences M252L.) Lecture, four hours; preparation: two upper division social sciences courses. Requisite: course 100. Application of contemporary organization and management theory to systems that provide personal healthcare services. Environmental characteristics, microeconomic issues, organizational design, and empirical investigation of leadership characteristics of successful leaders. Students evaluate their own leadership style and identify opportunities for further development. Letter grading.

235. Law, Social Change, and Health Policy. (4) (Same as course C121.) Lecture, four hours; discussion, two hours. Preparation: two upper division social sciences courses. Requisite: course 100. Legal issues affecting policy formulation for environmental, preventive, and curative health service programs. S/U or letter grading.

236. Microeconomic Theory of Health Sector. (4) (Same as Public Policy M236.) Lecture, four hours. Prerequisites: courses 100, M232, M242. Determinants of health, economics of lifecycle of public policy. Letter grading.

237A. Special Topics in Health Services Research Methodology. (4) Seminar, two hours. Prerequisites: courses 100 or ongoing research projects by faculty and students, with discussion to determine relevant methodological and policy issues, as well as to offer constructive criticism. S/U or letter grading.

238. Health Services Research Standards. (4) Seminar, two hours. Prerequisites: courses 200A, 200B, M422, Biostatistics 100A, 100B. Designed for graduate students. Participation of students in critical review and discussion of selected papers dealing with course topics, including small and large area variations in care, and development and implementation of clinical guidelines. Emphasis on implications for health policy. Letter grading.
M249L. Ethical Issues in Public Health. (2 or 4) (Same as Community Health Sciences M249L.) Lecture, two hours (M.P.H. day program) or four hours (M.P.H. for Health Professionals). Requisites: courses 200A, 200B. Case conferences, based on real-life experience, focus on ethical issues in health services organization and practice. Understanding ethical issues related to conflict of interest, quality of care, health insurance selection, choice of drugs, reproductive rights, AIDS, and resource allocation. Letter grading.

249M. Review of Current Health Services Management Literature. Lecture, three hours. Designed to help students remain current on recent developments in health services management and to place these current developments in proper context of academic research and public policy. Letter grading.

249N. Accessing, Analyzing, and Presenting Healthcare Management Data. (2) Lecture, two hours. Designed to provide first-year M.P.H. health professional students with scientific review process, systematic literature review and organizational aspects of implementing evidence-based practice and set of tools and methods to apply evidence base to improving healthcare quality. Letter grading.

249O. Tobacco and Public Policy. (4) Lecture, four hours. Information and analysis of principal issues in tobacco control. As administrators, researchers, and activists in field of tobacco control, professionals in all specialties must understand that public health should be fully informed on strategies to combat worldwide tobacco epidemic. Letter grading.

249Q. Editorial Board Apprenticeship. (2) (Same as Psychiatry M210.) Seminar, two hours. Designed for postdoctoral fellows and advanced Ph.D. students. Participation in peer review process for academic journal, Health Psychology, with consideration of interface between behavioral science, health, and medicine. Reading and discussion of submissions and advising of editor on suitability for full review. S/U or letter grading.

249R. Cancer Prevention and Control Research. (2) Seminar, two hours. Limited to graduate students. Presentations by faculty members and outsiders, as well as students, on research topics in cancer prevention and control as well as career development issues such as grant writing. Scientific review process, systematic literature review and funding sources, writing grants, and publishing findings. S/U or letter grading.

260A-260B. World Health. (2-2) Lecture, two hours. Designed for graduate students. Overview of world health, with emphasis on healthcare outside the U.S. Key areas include burden of infectious diseases, health economics, and impact of healthcare policy on healthcare delivery. In Progress (260A) and letter (260B) grading.

265. Challenges in Clinical Health Services Research. (4) Lecture, four hours. Requisites: courses 200A, 200B. Designed to prepare students for challenges of navigating data for healthcare management, as well as written and oral presentation of those results. Letter grading.

289. Healthcare Disparities. (4) Seminar, three hours. Limited to graduate students. Exploration of ways to eliminate and reduce disparities in healthcare. Emphasis on understanding history of disparities in U.S. to understand current state of disparities, and on effective strategies for addressing them, such as increasing insurance coverage and delivery of culturally competent healthcare. Examination of sociological models that explain disparities in healthcare and evaluation and expansion on these models. Letter grading.

290. Evolving Paradigms of Prevention: Interventions in Early Childhood. (4) (Same as Community Health Sciences M237.) Seminar, three hours; fieldwork, one hour. Designed for graduate students. Introduction to use of early childhood interventions as means of preventing adverse health and development outcomes. Concepts of developmental vulnerability, approaches to assessment, models of service delivery, evaluation and cost-benefit issues, funding, and other policy issues. Letter grading.

401. Public Health Informatics. (4) Lecture, three hours. Preparation: general familiarity and understanding of basic information technologies. Recommended requisites: courses 251. Introduction to field of public health informatics and examination of impact of information technology on practice of public health. Entire process, from systems conceptualization and design to project planning and development to system implementation and use. Letter grading.

M411. Issues in Cancer Prevention and Control. (4) (Same as Community Health Sciences M411.) Lecture, four hours. Designed for juniors/seniors and graduate students. Introduction to causes and characteristics of cancer epidemic, cancer control goals for nation, and how to make use of summer internship. Overview of political science learned earlier to be used to analyze problems with existing medicare program and to develop specific options for reforming features of program to accomplish cancer control goals. Conceptualization/preparation, development of possible strategies for addressing those challenges. Letter grading.

286. American Political Institutions and Health Policy. (4) Lecture, three hours; discussion, one hour. To effectively understand healthcare policy, one must understand the political process, from the point of view of the system itself. Exploration of aspects of health services policy process, including effect of political structure and institutions; economic and social factors; interest groups; classes, and social movements; media and public opinion; and other factors. Letter grading.

288. Role and Impact of Technology on Health Services. (4) Lecture, four hours. Examination of role and impact of technology on health services in the U.S. Focus on particular topics in cancer prevention and control in federal agencies, professionals in all specialties. Review of current health services management literature and interactive case discussions, introduction to interactive discussion, one hour. Requisites: courses 200A and 200B, or Community Health Sciences 210. Examination of roles of health policy experts in implementing evidence-based practice and set of tools and methods to apply evidence base to improving healthcare quality. Letter grading.

M287. Politics of Health Policy. (4) (Same as Community Health Sciences M287.) Lecture, three hours; discussion, one hour. Requisites: courses 200A and 200B, or Community Health Sciences 210. Examination of roles of health policy experts in implementing evidence-based practice and set of tools and methods to apply evidence base to improving healthcare quality. Letter grading.

M428. Child and Family Health Program Community Leadership Seminar. (2) (Same as Community Health Sciences M428.) Seminar, two hours. Designed for graduate students. Examination of characteristics of community-based organizations (CBOs) and role of leadership in decision-making process involved in major issues facing maternal and child health in Los Angeles County. Focus on specific leadership competencies that are or should be employed by organizations effective in shaping maternal and child health programs and policies (or any population-level policies and programs). Leaders from CBOs in Los Angeles meet with students, comment on their practice experiences, and underscore community leadership concepts demonstrated by those CBOs. S/U or letter grading.

430. New Developments in E-Health and Internet. (4) Lecture, four hours. Introduction of new technologies in healthcare e-commerce/Internet/new media arena, with emphasis on general background, review of applicable law and regulation, and discussion of organizational and managerial issues dealing with successful use and implementation of technologies. S/U or letter grading.

431. Organizational Behavior and Human Resources in Health Care Organizations. (4) Lecture, four hours. Managerial skills and behaviors applied to components of organizations at several levels: individual, interpersonal, group, intergroup, and system. Core human resources skills required by managers. Unique features of health services organizations stressed as applications are presented. Letter grading.

432. Management of Healthcare Delivery Organizations. (4) Seminar, four hours. Preparation: summer internship. Summer internship required. Leadership and managerial issues encountered by healthcare delivery organizations, including unique financial characteristics of healthcare facilities, third-party reimbursement, cost finding and rate setting, operational and capital budgeting, auditing, and risk management. S/U or letter grading.

436. Healthcare Financial Management. (4) Lecture, two hours; discussion, three hours; courses 234, 436A, 436B. Application of financial management and accounting principles to healthcare facilities, including unique financial characteristics of healthcare facilities, third-party reimbursement, cost finding and rate setting, operational and capital budgeting, auditing, and risk management. S/U or letter grading.

438. Issues and Problems of Local Health Administration. (4) Lecture, three hours. Preparation: one healthcare services course. Requisite: course 100, Epidemiology 100. Overview of administrative issues currently affecting public health departments, including public health programs during fiscal constraint, quality improvement, interagency relationships and partnerships, and political and public interactions. Letter grading.

439. Dental Care Administration. (4) Lecture, three to four hours. Requisite or corequisite: Biostatistics 100A, Epidemiology 100. In-depth examination of several specific dental care policy issues: manpower, rela-

tionship of treatment to disease, national health program strategies, and evaluation mechanisms. Letter grading.

440A. Healthcare Information Systems and Technology. (4) Lecture, four hours. Preparation: completion of summer internship. Provides strong foundation in health information technology (HIT) for those working in healthcare field with emphasis on development of knowledge and skill to plan, manage, and implement HIT systems in healthcare delivery organizations with clinical and business partners and evolving HIT spaces. Background and evolution of HIT; how it is planned, implemented, and managed; and how it can be productively used by healthcare delivery organizations, external research organizations, regulatory organizations, providers, and patients/consumers. Fundamentals of technology, electronic medical records (EMR), electronic health records (EHR), personal health records (PHR), meaningful use, interoperability, and health information exchanges (HIE). Letter grading.

440B. Health Information Systems: Organization and Management. (4) Lecture, two hours; laboratory, three hours. Requisite: course 440A. Health and administrative research using clinical records. Principles of planning for routine and special studies. Individual investigation in methods of obtaining and processing data to meet needs of programs in institution and agency. Introduction to principles of medical auditing and analysis of medical and health services. S/U or letter grading.

M449A-M449B. Child Health, Programs, and Policies. (4-4) (Same as Community Health Sciences M436A-M436B.) Lecture, four hours. Requisite: course 100. Course M449A is required to M449B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially children. Letter grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

599. Doctoral Dissertation Research. (2 to 12) Tutorial, to be arranged. May not be applied toward any degree or course requirements. May be repeated for credit. S/U grading.
discovery, but from a comparison of their own tradition and experience with those of others. It is only by studying the history of other civilizations and cultures that we can hope to gain perspective on our own.

The course offerings in history at UCLA are designed to bring about an understanding of the forces that have shaped the many cultures of this country and the world. UCLA has one of the largest, most distinguished, and most diverse history faculties in the country. Its main emphasis is on the many aspects of social history, but intellectual, cultural, and political history are also strongly represented.

Of all undergraduate majors, History is probably the most flexible and far-reaching. Leading to a Bachelor of Arts degree, it is excellent preparation for a wide variety of careers — law, teaching, business, the communications media, public services, and medicine.

The graduate program leads to the Ph.D. degree in History (a master's degree may be earned in the process of completing Ph.D. requirements). Traditionally, the M.A. and Ph.D. in History have led to careers in high school, college, and university teaching. Increasingly, they are also being put to use in government service, international business, museum and archival work, and journalism.

Undergraduate Study

The History major is a designated capstone major. Undergraduate students take a capstone seminar in which they demonstrate mastery of a specialized area of history and a critical understanding of current scholarly concerns, literature, and debate, then design and complete a research project using those primary sources and literature.

History B.A.

Capstone Major

The History Department’s undergraduate program consists of 16 courses in history (six lower division — the Preparation for the Major, including the premajor requirements; 10 upper division — the Major). Each course must be taken for a letter grade.

Preparation for the Premajor and Major

Required for the Premajor: Three courses, including two in Western civilization (History 1A, 1B, 1C) or two in world history (courses 20, 21, 22), and one course from 96W or 97A through 97G.

After completing the three courses with a minimum grade-point average of 2.0, students should petition to enter the major at the undergraduate counselor’s office in 6248 Bunche Hall.

Required for the Major: Three additional lower division history courses.

Transfer Students

Transfer applicants to the History major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one semester or two quarters of history of Western civilization or world history, one historical practice course, and three additional lower division history courses.

Transfer credit for the premajor courses is subject to department approval. Transfer students should consult the undergraduate counseling office before enrolling in any courses for the major.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: At least 10 upper division history courses, including (1) two courses in U.S. history, (2) two courses in non-Western history from the same area (i.e., Latin America, Asia, Near East, Africa), (3) two courses in European history or in history of science, and (4) one capstone seminar from the History 191 series.

The requirements for U.S., non-Western, and European history may be fulfilled with either upper or lower division courses, but majors are required to take a minimum of 10 upper division history courses.

There is no language requirement for the major; however, students wishing to enter the honors program or planning to do graduate work in history are urged to pursue language study early in their undergraduate careers.

Advanced Placement Credit in History

Effective Fall Quarter 2002 for entering freshmen, no course credit is granted for any AP history courses.

Honor Program

The honors program is designed for History majors who are interested in completing a yearlong research project that culminates in an honors thesis. A 3.5 departmental grade-point average is required for admission. To graduate with departmental honors, students must have a cumulative or overall GPA of at least 3.0 in all University-level coursework and at least a 3.5 GPA in all coursework required for the major.

The honors thesis must be completed in three terms, on the basis of work carried out in History 198A, 198B, and 198C. The honors thesis must be completed in three terms, on the basis of work carried out in History 198A, 198B, and 198C. Students must register their intention to undertake an honors thesis early in their undergraduate careers. When students register for honors, they must provide the undergraduate affairs vice chair with a two-paragraph description of their thesis project, which must be approved in writing by the faculty member who agrees to act as their adviser. The undergraduate affairs vice chair must also approve the proposed project in writing.

The faculty adviser is primarily responsible for guiding the thesis work to its completion and assigns grades for the honors courses after the thesis is complete. The honors thesis should be 40 to 60 pages in length and be based on primary source material. Determination of the level of honors awarded (no honors, honors, or highest honors) is made by the undergraduate
affairs vice chair, acting in conjunction with the honors committee, at the end of the term in which the thesis is completed.

History of Science and Medicine Minor

The History of Science and Medicine minor is designed for students who wish to augment their major, perhaps in one of the sciences, with a series of courses that analyze the historical growth, impact, and significance of science and medicine in Western and world culture. The minor consists of a choice of lower division courses that expose students to overviews of science and medicine in large time periods or to specific thematic concerns. Upper division courses offer more focused and often smaller classes that explore crucial episodes or areas with a more rigorous and sophisticated content and methodology.

To enter the minor, students must be in good academic standing (2.0 grade-point average), have completed 45 units and at least one lower division course in the history of science or medicine for a letter grade, and file a petition with the minor adviser in 6265 Bunche Hall.

Required Lower Division Courses (12 units): Three courses from History 2B, 2D, 3A through 3D, Philosophy 8.

Required Upper Division Courses (20 units): Five courses from Anthropology 182, 183, History 179A through 180C, any upper division Honors Collegium courses with history of science or history of medicine content, Neurobiology M168 (or Physiological Science M168), Philosophy 124.

Each year certain undergraduate seminars in the History 191 sequence are designated as applicable to the upper division minor requirements. Students may also petition to have other relevant courses, including those from other departments, applied toward the upper division requirements.

At least one upper division course, to be selected and approved in consultation with the undergraduate or faculty adviser, must involve writing a research or interpretative paper of significant length and intellectual content. No more than one upper division course may be applied toward both this minor and a major or minor in another department or program. Transfer credit for courses may be subject to departmental approval.

One course may be taken on a Passed/Not Passed basis; each of the other minor courses must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasas/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of History offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in History.

History

Lower Division Courses

1A-1B-1C. Introduction to Western Civilization. (5-5-5) Lecture; three hours; discussion; two hours. Broad, historical study of major elements in Western heritage from the world of the Greeks to that of the 20th century, designed to further beginning students’ general education, introduce them to ideas, attitudes, and institutions basic to Western civilization, and acquaint them, through reading and critical discussion, with representative contemporary documents and writings of enduring interest. P/NP or letter grading.

1A. Ancient Civilizations, Prehistory to Circa A.D. 843; 1B. Circa A.D. 843 to Circa 1715; 1C. Circa 1715 to Present

1A1-1B1-1C1. Introduction to Western Civilization (Honors). (5-5-5) Lecture; three hours; discussion; two hours, Honors sequence parallel to courses 1A, 1B, 1C. P/NP or letter grading.

1AH-1BH-1CH. Introduction to Western Civilization, Prehistory to Circa A.D. 843 (Honors); 1BH. Circa A.D. 843 to Circa 1715 (Honors); 1CH. Circa 1715 to Present (Honors).

2A. Power, Ethics, and Technological Change. (4) Lecture, three hours; discussion, two hours. Examination of historical and theoretical relationships between ethical behavior, corporate power, and technological change. Topics include engineering practice and business profits, gender and engineering cultures, product liability and consumer safety, and engineering and computer ethics. Historical case studies include Three Mile Island, Chernoby, the DC-10, and Challenger Disaster. P/NP or letter grading.

2B. Social Knowledge and Social Power. (5) Lecture, three hours; discussion, two hours. History of social knowledge and social power in the 19th and 20th centuries. Everyday ideas and practices about human nature, common sense, and community and relation of those practices to social thought, social engineering, and social science. Themes include development of social knowledge, social activism, social movements, and religion demonstrate its rising intellectual and practical significance. P/NP or letter grading.

2C. Religion, Occult, and Science. (5-5) Lecture, three hours; discussion, two hours. P/NP or letter grading.

2C1. Religion, Occult, and Science. (5-5) Lecture, three hours; discussion, two hours. P/NP or letter grading.

2C2. Religion, Occult, and Science. (5-5) Lecture, three hours; discussion, two hours. P/NP or letter grading.

2C3. Religion, Occult, and Science. (5-5) Lecture, three hours; discussion, two hours. P/NP or letter grading.

2D. Science, Magic, and Religion. 1600 to Present. (5) Lecture, three hours; discussion, two hours. Science and religion as historical phenomena that have evolved over time, state of their respective historical developments and interactions. P/NP or letter grading.

2E. Science, Magic, and Religion. 1600 to Present. (5) Lecture, three hours; discussion, two hours. P/NP or letter grading.

2F. Science, Magic, and Religion. 1600 to Present. (5) Lecture, three hours; discussion, two hours. P/NP or letter grading.

3A-3B-3C. Introduction to History of Science. (5-5-5) Lecture, three hours; discussion, two hours. History majors may not apply these courses on science general education requirements. P/NP or letter grading.

3A. Scientific Revolution. (5) Lecture, three hours; discussion, two hours. Survey of beginnings of physical sciences involving transformation from Aristotelian to Newtonian cosmology, mechanization, natural world, rise of experimental science, and origin of scientific societies. P/NP or letter grading.

3B. History of Science from Newton to Darwin. (5) Lecture, three hours; discussion, two hours. How Western cosmologies became part of Enlightenment campaign for reason and of culture of an Industrial Revolution. New social science and evolutionary debates about science and religion demonstrate its rising intellectual and practical significance. P/NP or letter grading.

3C. History of Modern Science, Relativity to DNA. (5) Lecture, three hours; discussion, two hours. Ranging from starting new physics of relativity and the quantum as religious, such as sacred acts, places, words, and persons in their varied historical contexts. Development of student skills in critical thinking, analyzing documents, and making persuasive arguments based on historical evidence. P/NP or letter grading.

3D. Themes in History of Medicine. (5) Lecture, three hours; discussion, two hours. Exploration of medical thought and practice of early modern medicine, medicine for the poor, and changing populations. P/NP or letter grading.

4. Introduction to History of Religions. (5) Lecture, three hours; discussion, two hours. Comparative study of eight major religious traditions, with emphasis on their beginnings and subsequent decisive changes in their respective historical developments and interactions. Equips students with intellectual tools necessary for thinking analytically, empathetically, and comparatively about fascinating human phenomena identified as religious, such as sacred acts, places, words, and persons in their varied historical contexts. Development of student skills in critical thinking, analyzing documents, and making persuasive arguments based on historical evidence. P/NP or letter grading.

8A. Colonial Latin America. (5) Lecture, three hours; discussion, two hours. General introduction to Latin American history from contact period to independence (1490s to 1820s), with emphasis on convergence of Native American, European, and African cultures in Latin America; issues of ethnicity and gender; development of colonial institutions and societies; and emergence of local and national identities. Readings focus on writings of Latin American men and women from the period studied. P/NP or letter grading.

8AH. Colonial Latin America (Honors). (5) Lecture, three hours; discussion, two hours. Honors course parallel to course 8A. P/NP or letter grading.

8B. Political Economy of Latin American Underdevelopment, 1750 to 1930. (5) Lecture, three hours; discussion, two hours. Interaction of pre-capitalist and modern modes of social organization in Latin American history. Themes include: transformation of colonial institutions and societies; and emergence of local and national identities. Readings focus on Latin American men and women from the period studied. P/NP or letter grading.

8BH. Political Economy of Latin American Underdevelopment, 1750 to 1930 (Honors). (5) Lecture, three hours; discussion, two hours. Honors course parallel to course 8B. P/NP or letter grading.

8C. Latin American Social History. (5) Lecture, three hours; discussion, two hours. Historical and contemporary perspective of role of ordinary people in Latin American society. Each lecture/film session centers on a major Latin American movement suggestive of a theme in social history. P/NP or letter grading.
8CH, Latin American Social History (Honors). (5) Lecture, three hours; discussion, two hours. Honors course parallel to course 8C. P/NP or letter grading.

10A-10BH, History of Africa (Honors). (5-5) Lecture, three hours; discussion, two hours. P/NP or letter grading.

10D, History of the Near and Middle East. (5) Lecture, three hours; discussion, two hours. Introduction to history of Middle East from rise of Islam to the present day. P/NP or letter grading.

105A-105B-105C, History of the U.S. and Its Colonial Origins. (5-5-5) Lecture, three hours; discussion, two hours. Examination of earliest civilizations of Asia, North Africa, and Europe — Mesopotamia, Egypt, Israel, India, China, Greece, and Rome — from development of settled agricultural communities until about A.D. 500, with focus on rise of cities, organization of empires and states, writing and growth of bureaucracy, varieties of religious expression, and linkage between culture and society. P/ NP or letter grading.

105D. Assyrians. (4) Same as Ancient Near East M104D. Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to history of Assyrian culture and its impact on the world. P/NP or letter grading.

105G, African History. (5) Same as Ancient Near East M104G. Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of political and cultural institutions of ancient Egypt and ideas on which they were based. P/NP or letter grading.

105H, Southeast Asian History. (5-5) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of specific historical themes from world historical perspective. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

108. Sophomore Seminars: History. (4) Seminar, three hours. Limited to maximum of 20 lower division students. Readings and discussions designed to introduce students to current research in discipline. Fulfilling project may be required. P/NP or letter grading.

11A-11B. History of China. (5-5) Lecture, three hours; discussion, two hours. History of China from earliest times to late 18th century. P/NP or letter grading.

11A-11B, History of China (Honors). (5-5) Lecture, three hours; discussion, two hours. Honors sequence parallel to courses 11A, 11B. P/NP or letter grading.

12, World History to A.D. 600. (5) Lecture, three hours; discussion, two hours. Examination of earliest civilizations of Asia, North Africa, and Europe — Mesopotamia, Egypt, Israel, India, China, Greece, and Rome — from development of settled agricultural communities until about A.D. 500, with focus on rise of cities, organization of empires and states, writing and growth of bureaucracy, varieties of religious expression, and linkage between culture and society. P/ NP or letter grading.

21. World History, Circa 600 to 1750. (5) Lecture, three hours; discussion, two hours. Outline of world history from rise of Islam to start of Industrial Revolution, structured around a broad chronological narrative of salient developments. Use of thematic and comparative approaches, with certain recurring themes and institutions that modulate from culture to culture. Reading of variety of contemporary accounts to look at way people perceived cultures outside their own. P/NP or letter grading.

22, Contemporary World History, 1750 to Present. (5) Lecture, three hours; discussion, two hours. Broad examination of developments from mid-18th century (1750) to the present day. Examination, through lecture and discussion, of global implications of imperialism, total war, nationalism, cultural change, decolonization, changes in women’s rights and roles, and eclipse of world communism. Designed to introduce students to historical study, help them understand issues and dilemmas facing the world today, and prepare them for more in-depth work in history of specific regions or countries of the world. P/NP or letter grading.

88GE, Junior Colloquium: Special Topics in History. (4) Same as Ancient Near East M104GE. Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of topics not covered in regular courses. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

95A, Survey of U.S. History. (4-4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of social, political, and economic development of the United States from earliest times to the present day. P/NP or letter grading.

95B, History of the World Pre-Industrial Revolution. (4-4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of social, political, and economic development of the world before the Industrial Revolution. P/NP or letter grading.

96W. Introduction to Historical Practice. (5) Seminar, three hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 3E. Not open for credit to students with credit for course 10B or 10BW. Course is parallel to 10B. P/NP or letter grading.

96R, Historical Research Methods and Strategies. (1) (Formerly numbered 95.) Seminar, one hour. Development of competency with identifying, locating, critically evaluating, and using primary materials and secondary sources. Use of various research techniques. Flow of information in variety of disciplines, how to approach research problems systematically, how to access and evaluate information in a variety of formats, and how to formulate effective searches and search in electronic databases and on the Internet. P/NP or letter grading.

97A. Introduction to Historical Practice: Variable Topics. (4 each) Seminar, three hours. Discus- sion course designed for no more than 15 students. Introduction to study of history, with emphasis on historical theory and research methods. Variable topics courses; con- sult Schedule of Classes for topics to be offered in specific term. P/NP or letter grading.

97F, Medieval History; 97C, European History; 97D, U.S. History; 97E, Latin American History; 97F, Near Eastern History; 97G, East Asian History; 97I, History of Science and Technology; 97L, Jewish History; 97M, History of Religion; 97T, Jewish History; 97N, Southeast Asian History; 97I, Indian History; 97O, World History.

Upper Division Courses

100. History and Historians. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of historiography, including intellectual processes by which history is written, results of these processes, and sources and development of history. Attention also to representative historians. P/NP or letter grading.

101. Topics in World History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of specific historical themes from world historical perspective. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

102. Explorations in Psychoanalysis and History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of recent writings in field of psychohistory. P/NP or letter grading.

103A-103B. Ancient Egyptian Civilization. (4-4) Same as Ancient Near East M103A-M103B. Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. M102A, World Perspective. Historical archaeology requires appreciation of historical context of broad perspectives, and material culture. Thematic emphasis, with exploration of breadth of discipline both in Old World and Americas. M102B, American Perspective. Emphasis on historical archaeology in North America, particularly to some practical applications. P/NP or letter grading.

104A. History of Ancient Mesopotamia and Syria. (4) Same as Ancient Near East M104A. Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Political and cultural institutions of ancient Egypt and ideas on which they were based. P/NP or letter grading.

104D. Assyrians. (4) Same as Ancient Near East M104D. Lecture, three hours. Overview of Assyrian cultural history from its origins to end of Neo-Assyrian period (circa 612 B.C.E.), with focus on rise, mechanisms, and decline of Neo-Assyrian Empire, which at its peak ruled ancient Near East from Zagros to Egypt. P/NP or letter grading.

105A. Survey of Middle East, 500 to Present. (4-4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Background and circumstances of rise of Islam, creation of Islamic Empire, and its development. Rise of Dynastic Successor States and Modern Nation States. Social, intellectual, political, and economic development. P/NP or letter grading. M105A, 500; 105B, 1300 to 1700; 105C, 1700 to Present.
106A. Premodern Islam. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of early development of Islam with special attention to doctrine of nature of God, human responsibility, guidance, revelation and religious authority, duties of believers, ritual, law, sectarian movements, mysticism, and popular religion. P/N or letter grading.

Emergence of modern Islamic movements, and transformation of meaning and function of religion in society. P/NP or letter grading.

107A-107B-107C. Armenian History. (4-4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. 107A. Armenia in Ancient and Medieval Times, 2nd Millennium B.C. to A.D. 11th Century; 107B. Armenia from Cilician Kingdom through Periods of Foreign Domination and National Struggles, 11th to 19th Centuries; 107C. Armenia in Modern and Contemporary Times, 19th and 20th Centuries. Armenian question and genocide, national republic, Soviet Armenia, and dispersion.

107D. Introduction to Armenian Oral History. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of oral traditions and their significance. Techniques of Armenian oral history; preinterview, interview, and postinterview procedures; methods of compilation and evaluation. Field assignments, interviews, and preparation of oral papers based on interviews. P/NP or letter grading.

107E. Caucasus under Russian and Soviet Rule. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of political, economic, social, and cultural history of Caucasus region since 1801. Georgian, Armenian, and Azerbaijani response to Russian and Soviet rule; nationality question and Soviet national republics. P/NP or letter grading.

108A. History of North Africa from Islamic Conquest. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of political, social, economic, and religious history of Islamic Maghrib from Muslim conquest in 7th and 8th centuries C.E. until 1578. P/NP or letter grading.

108B. History of Islamic Iberia. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of political, social, economic, religious, artistic, and literary history of Islamic culture in Western Europe. P/NP or letter grading.

M108C. Culture Area of Maghrib (North Africa). (4) (Same as Anthropology M171P and Arabic M171.) Lecture, three hours. Designed for juniors/seniors. Introduction to North Africa, especially Morocco, Algeria, Tunisia, and Libya, also known as Maghrib or Tamazgha. Topics include changing notions of person, tribal, ethnic, linguistic and religious identities; colonialism; gender and legal rights, changing representations of Islam, and religions in region's public spaces. P/NP or letter grading.

109A. Early Modern State in Mediterranean. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Emergence of phenomenon called early modern state in Ottoman Empire from 1450 to 1700. Exploration of main themes and developments in politics and economy of early modern Mediterranean. P/NP or letter grading.

C109C. Israeli Legal History. (1 to 5) Lecture, three hours. Israel is settler society inspired by utopian ideology but based on war and violence. Like U.S., Israel is imperfect democracy committed to notions of equality yet divided along class, gender, and ethnic lines. Legal system plays role in shaping identity, framing political discourse, and mediating social conflicts. How do law and society interact in Israel and how can Israeli experience illuminate themes common to both jurisdictions? Introduction to Israeli history and legal history, with focus on three periods: late Ottoman, British mandate, and first two decades after Israeli independence. Topics include legal reforms in late Ottoman period, reception of English law after British conquest, law and national identity, postindependence legal change and constitutional structure. How do law and land influence, political ideologies on commercial law, gender, religion, and law, role of courts in shaping historical memory (Holocaust). Concluding examination will be scheduled with course CM209. P/NP or letter grading.

M110A-M110B-M110C. Iranian Civilization. (4-4-4) (Same as Ancient Near East M110A-M110B-M110C and Iran M110A-M110B-M110C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of history and civilization of ancient Iran from rise of Elam to end of Sassanian dynasty — Elamite civilization and Mede, Achaemenid, Arsacid, and Sassanian Empires. Emphasis on ancient Iran, but may be offered for early Islamic period. P/NP or letter grading.

110D. History of Modern Iran, 1500 to Present. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Iran as distinct national unit, demystifying Iranian history and distinguishing its peculiarities, Safavid Empire, economy, imperialism, modernity, construction of Iranian state, religion and political ideologies in early modern and modern periods. P/NP or letter grading.

111A-111B-111C. Topics in Middle Eastern History. (4-4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading. 111A. Pre-modern. Examination of major issues in history of Middle East. 111B. Early Modern. Examination of Istanbul in Ottoman period (1453 to 1923); relationship between history and literary imagination and view of history as dialogue between past and present; scholarly debate over urban and modern Middle East; introduction to corpus of theories (world economy paradigm) through discussion of Ottoman port cities. 111C. Modern. Middle East underwent widespread social, economic, and cultural changes during 19th century that propelled society, at least portions of society and aspects of its social/cultural life, in entirely new direction. Examination of those changes to understand exactly what modernity meant for region.

112A-112B-112C. History of Ancient Mediterranean World. (4-4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. 112A. Survey of history of ancient East from earliest times to foundation of Persian Empire. 112B. History and institutions of Greeks from their arrival to death of Alexander. 112C. History and institutions of Rome from founding of city to death of Constantine.

112D. History and Monuments of Rome: Field Studies. (4) Fieldwork, three hours. Enforced corequisite: course 112B. Examination of history, art, and monuments of ancient Rome through daily lectures and field walks to museums and archaeological sites. Part of UCLA Summer Travel Program. P/NP or letter grading.

112E. History and Monuments of Rome: Field Studies. (4) Fieldwork, three hours. Enforced corequisite: course 112C. Examination of history, art, and monuments of ancient Rome through daily lectures and field walks to museums and archaeological sites. Field trips outside Rome to Pompeii, Hadrian's Villa, and ancient Ostia. Some attention to monuments and churches of medieval and Renaissance Rome in their historical context. Part of UCLA Summer Travel Program. P/NP or letter grading.

113A-113B. History of Ancient Greece. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. 113A. Rise of Greek City-State. Emphasis on aristocratic and democratic developments within the context of Greek Wars. 113B. Classical Period. Clash between Athens and Sparta, consequent rise of Macedonia, and aftermath of Alexander the Great.

114A-114B. History of Rome. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading. 114A. To Death of Caesar. Emphasis on development of Roman Republic and on constitutional and social struggles of late republic. 114B. From Death of Caesar to Time of Constantine. Early empire treated in more detail, supplemented by survey of social and economic changes in 3rd century. Transformation of Classical World. Exploration of un- derstanding of traditional forms of Jewish culture in modern age, particularly those that challenge tradition- al forms of Jewish religious culture (e.g., laws, customs). P/NP or letter grading.

183A-183B. Third Reich and Jews. (4-4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

183C. History of Anti-Semitism. (4) (Same as Jewish Studies M183C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exploration of dynamic and millennia-old interaction of Jews with great world cultures. Creative adaptations that have lent Jewish culture its distinct and various forms. P/NP or letter grading.

184A. Jewish Civilization: Encounter with Great World Cultures. (4) (Same as Jewish Studies M184A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Explo- ration of dynamic and millennia-old interaction of Jews with great world cultures. Creative adaptations that have lent Jewish culture its distinct and various forms. P/NP or letter grading.

184B. History of Anti-Semitism. (4) (Same as Jewish Studies M184B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Surveys of origins and historical development of anti-Semitism. P/NP or letter grading.

184C. American Jewish Experience. (4) (Same as Jewish Studies M184C.) Lecture, three hours; discus- sion, one hour (when scheduled). Designed for juniors/seniors. Experience of Jews in America, both historical and contemporary. P/NP or letter grading.

184D. History of State of Israel, 1948 to Present. (4) (Same as Jewish Studies M184D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of history of State of Israel from 1948 to present. P/NP or letter grading.

185A. History of Religions: Myth. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Nature and function of myth in history of religion and culture. Example is selected from nonliterate as well as from other Asian and Euro- pean traditions. P/NP or letter grading.

185B. Religions of South and Southeast Asia. (4) Lecture, three hours; discussion, one hour (when scheduled). Required course 4 or 185A. Designed for juniors/seniors. Topics vary from year to year and include religion of Veda; Brahmanism; (later) Hinduism. Consult Schedule of Classes for specifics. May be tak- en independently for credit. P/NP or letter grading.
185C. Religions of South and Southeast Asia. (4) Lecture, three hours; discussion, one hour (when scheduled). Requires: course 4 or 185A. Designed for seniors. Topics vary from year to year and include Buddhist in India; religions of Java and Bali; nonditec traditions of India and Southeast Asia. Con- sult Schedule of Classes for specifics. May be taken in- dependently for credit. P/NP or letter grading.

M185D. Religions of Ancient Near East. (4) Same as Ancient Near East M185D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Systematic study of the origins of Early Christianity from the origins to circa 160 C.E., stressing its continuity/dis- continuity with Judaism, various responses to Jesus of Nazareth, writings produced during this period, move- ment of encounters with its religious, social, political, and intellectual world, and methods of research. P/NP or letter grading.

186A. History of Early Christians. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Rich variety in religious practice and thought in Mediterranean world of 1st century C.E. as in context of developing Christian movement. Topics include Pharaohs, Qur- an, Buddha, Brahman, Confucius, traditional Greek and Roman religions, mysteries, astrology, magic, ghost- nism, and emperor worship. P/NP or letter grading.

186C. Jesus of Nazareth in Historical Research. (4) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Topics announced in Schedule of Classes and include ancient Germanic cults; Renaissance mysticism; mystics of low countries; goddesses; religion in secular age. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

188A. Global Feminism, 1850 to Present. (4) (Same as Women's Studies M186A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for seniors. Studied by significant post-Enlightenment historical evaluations, students are led into thmselves knowledge (in translation) of various multilayered sources for reconstruction of life, teaching, and initial impact of Jesus of Nazareth in his social, economic, political, and religious contexts. P/NP or letter grading.

189A. Christian Movement. (4) Same as Political Science M194DC and Sociology M195DC.) Seminar, four hours. Limited to 20 students enrolled in UC Washington Center programs. Designed for seniors. Study of problems of modern economics in the study, with scheduled meetings to be arranged be- tween student and instructor. Letter grading.

190A. Honors Research in History. (4) Tutorial, to be arranged. Course 190A is required. P/NP grading.

190C. Community and Corporate Internships in History. (4) Tutorial, three hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with in- structor and provide periodic reports of their experi- ence. May be repeated for credit. Individual contract with supervising faculty member required. P/NP grading.

190CE. Community and Corporate Internships in History. (4) Tutorial, to be arranged; fieldwork, eight to ten hours. Limited to juniors/seniors. Internship in corpo- rate, governmental, or nonprofit setting coordinated through Center for Social Theory and Research. Individuals complete weekly written assignments, attend biweekly meetings with graduate student coordinator, and write final research paper. Faculty sponsor and graduate student coordinator construct series of reading assign- ments that examine issues related to internship topic. May be repeated for credit with consent of Center for Community Learning. Individual contract with supervising faculty member required. P/NP grading.

191A. Historical Research. (4) Lecture, three hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between student and instructor. Assigned readings and tangible evidence of mastery of subject matter re- quired. May be repeated for credit. Individual contract required. P/NP or letter grading.

191B. Medieval Historical Research. (4) Tutorial, to be arranged. Course 191B is requisite to 198B, which is requisite to 198C. Limited to juniors/seniors. Development- of honors thesis or comprehensive research proj- ect under direct supervision of faculty member. May be repeated for maximum of 16 units. Individual contract required. Letter grading.

191C. Honors Research in History. (4) Tutorial, to be arranged. Requisite: course 191A. Limited to juniors/ seniors. Completion of honors thesis. Course 191A. Comprehensive research project under direct supervi- sion of faculty member. May be repeated for maximum of 16 units. Individual contract required. In Progress (credit to be given only on completion of course 198C).

191F. Directed Research in History. (4) Tutorial, three hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. History majors limited to 8 units. In- dividual contract required. P/NP or letter grading.

Graduate Courses

200A-200U. Advanced Historiography. (4 each) Seminar, three hours. May be repeated for credit. 200A. Ancient Greece; 200B. Ancient Rome; 200C. Medieval; 200D. Europe; 200H; 200L. Latin America; 200M. Near East; 200N. India; 200L. China; 200M. Mediterranean and the Islamic World; 200Q. History of Religion; 200R. Theory of History; 200S. Jewish History; 200T. Korean; 200V. Southeast Asia; 200W. Latin America; 200X. Africa; 200Y. Japan;

200N. Advanced Historiography: American Indian Peoples. (4) Same as American Indian Studies M202A.) Lecture, 90 minutes; seminar, 90 minutes. Introduction to culture-histories of North American Indi- ans and review of Indian concepts of history. Stereo- typical approach to content and methodologies related to Indian past that is interdisciplinary and multicultural in its scope. Letter grading.

200Y. Advanced Historiography: Application of Economics to History. (4) Discussion, three hours.

200Z. Advanced Historiography: Chicano. (4) Dis- cussion, three hours. Graduate survey of leading litera- ture on Chicano history. Focus on methodological and theoretical approaches in the field.

201A-201U. Topics in History. (4 each) Seminar, three hours. Graduate courses involving reading, lect- turing, and discussion of selected topics. May be re- peated for credit. When concurrently scheduled with course 191, undergraduates must obtain consent of in- structor to enroll. S/U or letter grading. 201A. Ancient Greece; 201B. Ancient Rome; 201C. Medieval; 201D. Early Modern Europe; 201E. Modern Europe; 201F. Russia/Eastern Europe; 201G. Britain; 201H. U.S.; 201J. Latin America; 201K. Near East; 201L. India; 201M. China; 201N. Japan; 201O. Africa; 201P. Sci- ence/Technology; 201Q. History of Religions; 201R. Theory of History; 201S. Jewish History; 201T. Arme- nia and Caucasus; 201U. Southeast Asia; 201V. Psy- chohistory.

202A-202B. Seminars: Comparative Modern Eco- nomic History. (4-4) Seminar, three hours. Course 202A is requisite to 202B. Designed for graduate stu- dents. Study of problems of modern economics in the 19th and 20th centuries. Topics include industrialization, growth, demography, development, and economic change. In Progress (202A) and letter (202B) grading.

202A-202B. Social Theory and Comparative History. (4-4) (Same as Political Science M291A- M291B and Sociology M296A-M296B.) Seminar, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensi- tive history, following program of Center for Social The- ory and Comparative History. Each course may be tak- en independently for credit. S/U or letter grading.

2023A-M202B. Social Theory and Comparative History. (4-4) (Same as Political Science M291A- M291B and Sociology M296A-M296B.) Seminar, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensi- tive history, following program of Center for Social The- ory and Comparative History. Each course may be tak- en independently for credit. S/U or letter grading.

203C. Theories in Cultural History. (4) (Same as Sociology M292C.) Lecture, three hours. Introduc- tion to social, linguistic, semiotic, or other new interpre- tive theories and practices developed in other fields and applied to historical material. Letter grading.

207. Seminar: Ancient Mesopotamia. (Topics. (Same as Ancient Near East M250.) Seminar, three hours. Selected topics on political, social, and intellectual his- tory of ancient Mesopotamia. May be repeated for credit.

CM209. Israeli Legal History. (1 to 5) (Same as Law M336.) Lecture. Three hours. Israeli is settler society in- spired by utopian ideology but based on war and vio- lence. Like U.S., Israel is imperfect democracy commit- ted to notions of equity yet divided along class, gen- der, and ethnic lines. Law plays role in shaping identity, framing political discourse, and mediating social con- flicts. How do law and society interact in Israel and how can we understand the experience of ordinary citizens from both jurisdictions? Introduction to Israeli history and le- gal history, with focus on three periods: late Ottoman,
British mandate, and first two decades after Israeli in- dependence. Topics include legal reforms in late Otto- man period, reactions to English law after British con- quest, law and national identity, postindependence leg- al change and continuity, formalism and rights discourse, ethnic conflict and land law, influence of po- litical ideologies on commercial law, gender, religion, and law, role of courts in shaping historical memory (Holocaust). Concurrently scheduled with course C109C. S/U or letter grading.

211A-211B. Seminars: Armenian History. (4-4) Seminar, three hours. Course 211A is requisite to 211B. In Progress (211A) and letter (211B) grading.

212. Methods in Armenian Oral History. (4) Semi- nar, three hours. Uses and techniques of Armenian oral history; preinterview, interview, and postinterview procedures; methods of compilation and evaluation. Field assignments, interviews, and summaries and/or paper based on interviews. S/U or letter grading.

214. Topics in Asian Literature. (4-4) Discussion, three hours. Graduate seminar utilizing world-historical perspective to examine variety of broad themes in human history. Topics vary annually. Letter grading.

215A-215B. Seminars: Ancient History. (4) Semi- nar, three hours. Course 215A is requisite to 215B. In Progress (215A) and letter (215B) grading.

216A-216B. Seminars: Byzantine History. (4) Semi- nar, three hours. Course 216A is requisite to 216B. In Progress (216A) and letter (216B) grading.

217. Sources and Handbooks of Medieval History. (4) Seminar, three hours. Preparation: reading knowl- edge of German or French. Introduction to types of medieval source materials and the handbooks needed to use them. M218. Paleography of Latin and Vernacular Manu- scripts, 900 to 1500. (4) (Same as Classics M218, English M215, and French M210.) Lecture, three hours; discussion, two hours. Introduction to history of Latin and vernacular manuscript book from 900 to 1500 to (1) train students to make informed judgments with regard to place and date of origin, (2) provide training in accurate reading and transcription of later medieval scripts, and (3) examine manuscript book as witness to changing society that produced it. Focus on relationship between Latin manuscripts and vernacular manuscripts with appropriate respect to their representa- tion of written texts. S/U or letter grading.

221A-221B. Seminars: Medieval History. (4-4) Seminar, three hours. Course 221A is requisite to 221B. In Progress (221A) and letter (221B) grading.

225. Colloquium for Graduate Students in Modern European History. (4) Seminar, three hours. Normally limited to and required of all modern European- an history graduate students. Introduction to topics, methods, and historiography of modern European his- tory.

226A-226B. Seminars: Italian Renaissance. (4-4) Seminar, three hours. Course 226A is requisite to 226B. In Progress (226A) and letter (226B) grading.

227A-227B. Seminar in World History. (4-4) Seminar, three hours. Course 227A is requisite to 227B. In Progress (227A) and letter (227B) grading.

229A-229B. Seminars: Early Modern European History. (4-4) Seminar, three hours. Course 229A is requisite to 229B. In Progress (229A) and letter (229B) grading.

M230A-M230B. Seminars: Modern European Histo- ry. (4-4) (Same as Art History M241A-M241B, Sem- inar, three hours. Course M230A is requisite to M230B. May be repeated for credit with consent of adviser. In Progress (M230A) and letter (M230B) grading.

231A-231B. Seminars: Modern European Intellec- tual and Cultural History. (4-4) Seminar, three hours. Course 231A is requisite to 231B. In Progress (231A) and letter (231B) grading.
American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

266A-266B. Seminars: Colonial Latin American History. (4-4) Seminar, three hours. Course 266A is requisite to 266B. In Progress (266A) and letter (266B) grading.

268A-268B. Seminars: Recent Latin American History. (4) Seminar, three hours. Course 268A is requisite to 268B. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of interdisciplinary nature. In Progress (268A) and letter (268B) grading.

275A-275B-275C. Colloquia: African History. (4-4-4) Seminar, three hours. Designed for all entering and continuing graduate students in African history. Source identification, methodology, historiographical and critical traditions, historical interpretation, approaches to teaching, and research design. Forum for critical discussion of dissertation prospectuses and work in progress. Each course may be taken independently for credit. S/U or letter grading.

280. China Studies: Discipline, Methods, Debates. (2) (Same as Chinese M202.) Seminar, two hours. Introduction to study of China as practiced in humanities and social science disciplines. S/U grading.

282A-282B. Seminars: Chinese History. (4-4) Seminar, three hours. Course 282A is requisite to 282B. In Progress (282A) and letter (282B) grading.

285A-285B. Seminars: Japanese History. (4-4) Seminar, three hours. Course 285A is requisite to 285B. In Progress (285A) and letter (285B) grading.

286. Japan in Age of Empire, (4) (Same as Anthropology M276 and Asian M292.) Seminar, three hours. Designed for graduate students. Since late 19th century, Japan expanded its empire into East and Southeast Asia. Coverage of that period and array of anthropological studies conducted in Japan's colonies and occupied areas in this hardly explored area of study of colonialism. S/U or letter grading.

288A-288B. Seminars: South Asia. (4-4) Seminar, three hours. Course 288A is requisite to 288B. In Progress (288A) and letter (288B) grading.

289A-289B. Seminars: Southeast Asia. (4-4) Seminar, three hours. Course 289A is requisite to 289B. In Progress (289A) and letter (289B) grading.

291A-291B. Seminars: Jewish History. (4-4) Seminar, three hours. Course 291A is requisite to 291B. Studies in intellectual and social history of Jewish people from ancient times to modern period. In Progress (291A) and letter (291B) grading.

293A-293B. Seminars: History of Religions. (4-4) Seminar, three hours. Course 293A is requisite to 293B. In Progress (293A) and letter (293B) grading.

294A-294B. Western Science, Religion, and Political Economy, 1600 to 1830. (4-4) Seminar, three hours. Study of the science integrated within matrix of religious belief commonplace in early modern Europe and, to a lesser extent, in American colonies. Examination of relationship of both cultural matrices to political and economic change. S/U or letter grading.

295. Theories of Scientific Change. (4) Seminar, three hours. Historical and philosophical perspectives on science, focusing on rationality of scientific change and logic and psychology of scientific discovery. Readings and seminar-style discussions of such authors as Popper, Kuhn, To/min, Lakatos, Holton, Buchdahl, Feyerabend, and others.

M296. History of Statistics. (4) (Same as Statistics M296.) Seminar, three hours. History of statistics ranging over vast and diverse territory. Development of mathematical methods; philosophical, political, and social issues that were linked to their emergence and use. S/U or letter grading.

297A-297B. Seminars: History of Science. (4-4) Seminar, three hours. Course 297A is requisite to 297B. In Progress (297A) and letter (297B) grading.

298. Interdisciplinary Studies in 17th and 18th Centuries. (4) (Same as English M298.) Discussion, four hours. Topics vary according to participating faculty. May be repeated for credit. S/U or letter grading.

299. Interdisciplinary American Studies. (6) (Same as English M299.) Discussion, four hours. Research proposal, discussion, and papers on common theme, team-taught by faculty members from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students. (4) Tutorial, three hours. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians’ work, help students improve their own writing. May be repeated once. S/U grading.

495. Teaching History. (4) Seminar, to be arranged. Designed for graduate students. Required of all new teaching assistants. Lectures, readings, discussions, and practice teaching sessions within the structure of a seminar. Students receive unit credit toward full-time equivalence but not toward the nine-course requirement for M.A. degree. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean; and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Studies. (1 to 8) Limited to graduate students. Individual directed reading arranged with professor. M.A. candidates may take this course only once. Number of times Ph.D. candidates may take this course is subject to consent of graduate studies committee. S/U or letter grading.

Undergraduate Study

The UCLA Academic Senate approved the dismantlement of the interdepartmental program and major in History/Art History effective Spring Quarter 2009. Students already admitted to the major have until the end of Spring Quarter 2013 to complete the requirements for the B.A. degree. Students interested in combining courses in history and in art history may consider a major in one of the two academic disciplines and a minor in the other, or a double major in History and in Art History.

History/Art History B.A.

Lower division history and art history courses may be applied toward the general education requirements; a course taken to satisfy the American History and Institutions requirement may be applied toward the history section of the interdepartmental major. Each course must be taken for a letter grade.

Students wanting to confer with a counselor regarding program planning and major requirements should contact the History/Art History counselor at (310) 825-3992.

Preparation for the Major

Required: History 1A, 1B, 1C; two courses from Art History 50, 51, 54, 57; one course from Art History 55A, 55B, 56A, 56B.

Transfer Students

Transfer applicants to the History/Art History major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one year of history of Western civilization, two art history courses in ancient, Renaissance and baroque, medieval, or modern art, and one non-Western art history course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.
The Major

Required: One course from History 97A through 97O or 100; one course from 191A through 191O or 197; and courses as indicated in the following groups:

Group F: Two art history elective courses selected from the above lists. Students may also take Art History 100, C103A, C103B, C103C, 127, 197, 199 to meet this requirement

Honors Program

The honors program is designed for History/Art History majors who are interested in carrying out an independent research project that culminates in an honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All junior and senior History/Art History majors who have completed a minimum of four upper division art history courses with a grade-point average of 3.5 or better and an overall GPA of 3.0 or better are eligible to apply. Consult the art history undergraduate counselor for more information.

To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the major and an overall GPA of 3.0 or better, and (3) complete Art History 198A and 198B with grades of A– or better.

To qualify for graduation with highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the major and an overall GPA of 3.65 or better, and (3) complete Art History 198A and 198B with grades of A.
14. Interaction of Science and Society. (4) Seminar, three hours. Examination of interaction of science and society, effects of this interaction on history, development of societies, evolution of revolutionary ideas as modeled in Galileo, Darwin, and others, and selected contemporary issues such as genetic engineering and war against infectious diseases. P/NP or letter grading.

15. Acting Myth. (4) Seminar, three hours. Interdisciplinary approach to literature and acting through study of texts and mythologies from a variety of Indo-European and Near Eastern cultures; students learn acting techniques in directed scenes from the texts. P/NP or letter grading.

16. Science of Singing Voice. (5) Seminar, three hours; discussion, one hour. Study of different historical approaches to program delivery; one-hour lab; examination of different voice-production techniques. Study of students’ own vocal productions as well as recorded samples of famous singers. P/NP or letter grading.

18. Trial of Socrates. (5) Seminar, three hours. Examination of life and times of Socrates and trial that led to his execution, including in-class staging. P/NP or letter grading.

20. What Is This Thing Called Science?: Nature of Modern Science. (5) Lecture, three hours; discussion, one hour. Exploration of difference between science and other systems of knowledge; study of history and philosophy of science; examination of the role of objective knowledge. P/NP or letter grading.

21W. Rise and Fall of Modernism. (6) Seminar, three hours; writing laboratory, two hours. Enforced requisites: English Composition 3 or 3H or English as a Second Language 36. Study of early and mid-20th-century’s attempt to construct significance in a general climate of disillusionment by way of literature, literary criticism, and other intellectual movements. Satisfies Writing II requirement. Letter grading.

23. Political Dissonance Today and in Ancient Greece: Trial and Death of Socrates in Its Classical and Legal Context. (5) Seminar, three hours. Study of trial and death of Socrates by examining its relevance today to legal treatment of dissent and civil disobedience in the U.S. and to variety of contemporary theories and strategies of dissent. Introduction to Greek legal system, values that animated that system, theories and strategies of dissent. Introduction to and Legal Context. (5)

27. Theories of Exchange: Social Life of Gifts and Commerce. (5) Seminar, three hours. Examination of challenge of reconciling work and family commitments for working people of both genders, with particular emphasis on recent changes in labor force participation, on ways in which gender and class lines affect time allocation, and on public policy options that might support work-family balance. Focus on use of the U.S., with look at how other advanced industrial societies — specifically Western Europe and Japan — address these issues. P/NP or letter grading.

32. Language, Performance, and Culture. (5) Seminar, three hours. Examination of the relationship between language and other mental abilities and behaviors. Examination of how these issues. P/NP or letter grading.

42. Negotiating Conflict in Diverse Cultures. (5) Seminar, three hours; fieldwork, one hour. Exploration of art and science of negotiations in addressing campus and community conflicts, with focus on positions and interests of disputants, cultural and political context of disputes, and tactics and skills to address conflicts. P/NP or letter grading.

45W. Writing about Life Sciences. (5) Seminar, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H or English as a Second Language 36. Experiences in writing arts; study includes writings such as William Faulkner, Allen Tate, Flannery O’Connor, Thomas More’s classical text to recent ecological and feminist utopian texts, with purpose of uncovering social, intellectual, and cultural approaches underlying quest for a more perfect society. P/NP or letter grading.

50W. Writing Science. (6) Seminar, four hours. Enforced requisites: English Composition 3 or 3H or English as a Second Language 36. Study and practice of science writing in general, an activity that integrates sophisticated understanding of science with human tradition of writing arts; study includes writings by journalists and scientists on variety of topics. Satisfies Writing II requirement. Letter grading.

51. Music and Society. (5) Seminar, four hours. Minimal experience reading music desirable but not required. Analysis of Western art music, with focus primarily, but not exclusively, on music of late-18th through early-20th centuries through multiple analytical prisms: sociological, historical, political, and musical. P/NP or letter grading.

53. American Folk Music, Protest, and Identity. (5) Seminar, three hours. Study of American folk music as prism to investigate more general relationships among cultural boundaries such as musical genres and social constructions of race/nation, class, generation, and gender. P/NP or letter grading.

54. Improvisation and Acting Techniques. (5) Seminar, four hours. Development of acting improvisational techniques based on knowledge in which students find themselves immersed within characters. Students prepare midterm and final scenes to be fully memorized and performed, as well as study acting techniques. P/NP or letter grading.

55. Culture and History of Utopias. (4) Seminar, four hours. Study of major utopian writings from Thomas More’s classical text to recent ecological and feminist utopian texts, with purpose of uncovering social, intellectual, and cultural approaches underlying quest for a more perfect society. P/NP or letter grading.

56. Language as Window to Mind. (5) Lecture, four hours; discussion, one hour. Study of topics in language and mind, including language acquisition in children, language representation in brain, relationship between language and other mental abilities, and autonomous nature of language as system of knowledge. P/NP or letter grading.

57. Language, Performance, and Culture. (5) Lecture, three hours. Mixture of lecture and discussion on topic of language and its relationship to performance and culture in 19th and 20th centuries. Study of theories such as Saussure, Saevy Cawell, Judith Butler, and others, playwrights such as Wilde, Stein, and Samuel Beckett, and films such as “His Girl Friday” and “Monkey Business.” P/NP or letter grading.

58. Time in Society and History. (5) Seminar, four hours. Examination of concept of time from sociological, philosophical, anthropological, and physical perspectives, including study of how cultures have perceived time, how societies have organized themselves with time, how groups have clashed over time’s definition and measurement, and how academics in various disciplines have perceived time. P/NP or letter grading.

59. Writing, Language, Performance, and Culture. (5) Seminar, four hours. Writing of major utopian writings from Thomas More’s classical text to recent ecological and feminist utopian texts, with purpose of uncovering social, intellectual, and cultural approaches underlying quest for a more perfect society. P/NP or letter grading.
62. Community and Self-Interest in History of American Culture. (6) Seminar, three hours. Examination of historical origins of frequently contradictory values that inform American thought and culture; hierarchy and equality, institutional constraints and voluntarism, collective sense of mission and belief in autonomous individual. P/NP or letter grading.

64. Neuroscience and Psychology of Art and Biology of Aesthetics. (5) Seminar, three hours. Interdisciplinary approach to study of premise that beauty, whether of faces, art works, or other subjects, is processed by innate neurophysiological processes and universal psychological phenomenon. P/NP or letter grading.

67. Structure of Physical Reality. (4) Lecture, three hours; discussion, one hour. No special mathematical knowledge required. Course in modern physics, including videos and practical demonstrations, Zen stories, and discussions of what Eastern and Western religions and philosophy in general have to say about forces of nature. Topics include quantum mechanics, microcosm of atoms, and elementary particle physics and philosophical implications. P/NP or letter grading.

69. Artificial Life and Evolutionary Design: Theory and Practice in Multidisciplinary Modeling. (5) Seminar, five hours. No special mathematical or computer knowledge required. Study of artificial life, artificial intelligences, and evolutionary computation through both literature on simulations and practical engagement in simulations themselves. P/NP or letter grading.

70A. Genetic Engineering in Medicine, Agriculture, and Law. (5) Lecture, three hours; discussion, two hours. Not open to students with credit for Life Sciences 3 or 4 or Microbiology 7. Historical and scientific study of genetic engineering in medicine, agriculture, and law, including examination of social, ethical, and legal issues raised by new technology. P/NP or letter grading.

70AL. Gene Discovery Laboratory. (5) Seminar, three hours; discussion, one hour. Examination of current status of its current study in laboratories around the world and its role in assessing the early evolution of the universe. P/NP or letter grading.

71. Cross-Cultural Approaches to Media History and Culture. (5) Seminar, three hours. Examination of media, media history, and media culture from cross-cultural perspective, one that demands redefinition of media and understanding of art in cross-cultural context. P/NP or letter grading.

73. Elementary Particles in the Universe. (4) Lecture, two hours; discussion, 90 minutes. No special mathematical knowledge required. Examination of elementary particle physics, including status of its current study in laboratories around the world and its role in assessing the early evolution of the universe. P/NP or letter grading.

77. Writing Numbers. (5) Seminar, four hours. Not open to students with credit for introductory statistics. Whether it be to convince about lack of government support for arts, or global warming, or risks of living in hurricane-prone areas, statistical literacy promotes effective citizenship and social power. How to read narratives (in media, academic journals, etc.) supported by statistical data with critical eye, how to research and assess integrity of such claims and can be understood as new persuasive articles supported by statistical data. P/NP or letter grading.

80. Genomics and Boundaries of Self. (5) Seminar, three hours. Study of impact that knowledge of entire human genome sequence has on our concepts of ourselves as individuals and our place in biological universe. P/NP or letter grading.

81. Eastern Christianity in Comparative Perspec- tive: History, Doctrine, Culture. (5) Lecture, two hours; discussion, two hours. Exploration of philosophical and metaphysical beliefs of Eastern Christianity, comparing and contrasting Eastern churches to those that dominate in the West and examining how Eastern Orthodoxy continues to develop within broader Judeo- Christian tradition. P/NP or letter grading.

82. Community and Labor Development from Ground Up. (4) Lecture, three hours; discussion, one hour. Introduction to practical applications of community-oriented efforts in Los Angeles area, with projects from Community Outreach Partner- ship Center within School of Public Policy and Social Research. P/NP or letter grading.

83W. Political Science Literature. (6) Seminar, four hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or SH or English as a Second Language 36. Examination of relationship among politics, rhetoric, and literature in study of litera- ture from classical times to the present, broadening into general discussions of development of political discourse in Western thought, particularly conflict between logic and rhetoric in practice of practical business of living. Satisfies Writing II requirement. Letter grading.

84. Conflicts between Languages. (5) Seminar, three hours; discussion, one hour. Examination of phonetic and sociolinguistic whys and hows of situations in three countries abroad and discus- sion of various aspects of minority languages in the U.S. P/NP or letter grading.

86. Psychology of Fear. (5) Seminar, three hours; discussion, one hour. Examination of phobias, including inquiry into how people are distressed by intense fear, examination of structures and processes of irrational fears, and discussion of courage and fear reduction strategies. P/NP or letter grading.

87. Issues in American Foreign Policy: Methodology of Assessment. (4) Lecture/debate, three hours; discussion, one hour. Exploration in debate format of ways in which foreign policy issues are perceived, evaluated, and acted upon. P/NP or letter grading.

96. Cultural Knowledge, Industrial Growth, and Social Policy. (5) Lecture, three hours; laboratory, two hours. Examination, using nanotechnology, of both benefits and risks to economy and society when new technologies are in process of development. P/NP or letter grading.

97. Issues in American Foreign Policy: Methodology of Assessment. (4) Lecture/debate, three hours; discussion, one hour. Exploration in debate format of ways in which foreign policy issues are perceived, evaluated, and acted upon. P/NP or letter grading.

98. Religion of the Middle East: Conflict and Compromise. (5) Seminar, three hours; discussion, one hour. Examination of the validity of religious missionary activities in the Middle East with a focus on the Jewish, Christian, and Islamic traditions. P/NP or letter grading.

99. Nature of Knowledge and the Modern World. (5) Seminar, three hours; discussion, one hour. Examination of the relationship and history of science, technology, and society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of repre- sentation as they pertain to race, ethnicity, gender, and sensuality P/NP or letter grading.

100. Psychology of Women. (4) Laboratory, two hours. Development of broader and deeper under- standing of information access and retrieval within UCLA Library by utilizing subject specialists and subject-specific collections (print and electronic) within so- cial and behavioral sciences disciplines. Course as- sists students who plan to be involved with major re- search projects or intend to undertake honors theses or comprehensive 199 projects. P/NP grading.

101. Information and Research in Social and Be- havioral Sciences. (2) Lecture, two hours. Development of broader and deeper understanding of information access and retrieval within UCLA Library by utilizing subject specialists and subject-specific collections (print and electronic) within social and behavioral sciences disciplines. Course as- sists students who plan to be involved with major re- search projects or intend to undertake honors theses or comprehensive 199 projects. P/NP grading.

101G. Graduate School Preparation. (2) Seminar, three hours; laboratory, two hours. Examination, using nanotechnology, of both benefits and risks to economy and society when new technologies are in process of development. P/NP or letter grading.

102. Culture, Media, and Los Angeles. (6) (Same as Afro-American Studies M102 and Asian American Studies M160.) Lecture, four hours; screenings, two hours. Screening for juniors and seniors. Study of the media and its influence on society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of repre- sentation as they pertain to race, ethnicity, gender, and sensuality P/NP or letter grading.

103. Scientific Knowledge, Industrial Growth, and Social Policy. (5) Lecture, three hours; laboratory, two hours. Examination, using nanotechnology, of both benefits and risks to economy and society when new technologies are in process of development. P/NP or letter grading.

105. Popular Comic Book Culture: A History. (6) Seminar, three hours; discussion, one hour. Examination of the relationship and history of science, technology, and society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of repre- sentation as they pertain to race, ethnicity, gender, and sensuality P/NP or letter grading.

106. Imaginary Women. (4) Seminar, three hours; discussion, one hour. Examination of the relationship and history of science, technology, and society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of repre- sentation as they pertain to race, ethnicity, gender, and sensuality P/NP or letter grading.

108. Transnationalism, Diasporas, and Homeland-Hystrad Politics. (5) Seminar, three hours. Examination of debates about transnationalism, global mi- gration, and diaspora communities in the 20th and 21st centuries, with focus on the U.S., including compara- tive perspective. P/NP or letter grading.

109. Language, Meaning, and the Making of Poet- ry. (4) Seminar, three hours; workshop, one hour. In words of the augur professor, “Semiological warfare against the purveyors of semantic entropy.” In context of the development of contemporary poetry, study of history of philosophic and poetic discourse on lan- guage and its potentials, including social and political implications. P/NP or letter grading.

110. Maxist and Post-Maxist Approaches to Cultural Studies. (4) Seminar, four hours. Examination of Maxist and post-Maxist approaches to study of culture, including classical texts, theoretical and empirical works, and the Maxist roots of postmodernism. P/NP or letter grading.

111. Stress and Coping. (4) Seminar, four hours. Ex- amination of research and theory on stress and coping, with emphasis on physical and mental conse-
quences of stress and moderators of both social support and personality in coping strategies. P/NP or letter grading.

M114. Architecture from Los Angeles: Work of Frank Gehry, Thom Mayne, and Greg Lynn. (5) Seminar, three hours. Within last 30 years, body of architectural work originating in Los Angeles but reaching world both in material construction and aesthetic influence has emerged. Study of works of three seminal architects — Frank Gehry, Thom Mayne, and Greg Lynn. Site visits and hands-on practice in how to read architectural plans and how to use computers and modeling in architectural study and design. P/NP or letter grading.

M116. Art Alive: Art and Improvisation in Museums. (4) (Same as Theater M187.) Seminar, four hours. Offered in collaboration with Los Angeles County Museum of Art, and UCLA’s Interdepartmental失效。Interpretation of art selections through acting, dialogues, movement, and music. Research into history and art history and production of collaborative performance piece required. P/NP or letter grading.

M117. Resistance to Evil: Organized Resistance to Nazis in Occupied Europe. (4) Seminar, three hours. Resistance is not a moral or philosophical issue, but a sociological one. What makes resistance possible are specific historical circumstances and social relations that enable ordinary men and women to oppose their oppressors. Examination of this premise through analysis of organized resistance to Nazi occupation in Europe. P/NP or letter grading.

M119. Nuclear Weapons: Critical Decisions. (4) (Same as Environment M165, Public Policy M116, and Political Science M139A.) Lecture, three hours. Examination of critical decisions regarding nuclear weapons, starting with President Roosevelt’s decision to build atomic bomb and ending with current policies on containing Iran and on avoiding nuclear catastrophe. Letter grading.

M120. Art and Performance: Interdisciplinary Approach to Collections of Getty Center. (4) (Same as Theatre on African continent, including relationship between internal war and transborder conflict, historic

121. Psychoanalysis before Freud, and a Little After. (5) Lecture, three hours; discussion, one hour. Drawing from objects in five major collections at Getty Museum, focus on five parallel historical periods in which political, social, and aesthetic philosophy of age is examined in musical and dramatic performance. Letter grading.

122. Violence Against Women in Cross-Cultural Perspective. (4) Seminar, three hours. Exploration of sources of violent acts against women in different societies. Topics include wife beating, female sexual slavery, female infanticide, dowry deaths, female genital “circumcision,” rape, and emerging global human rights responses to these issues. P/NP or letter grading.

123. War and Peace in Africa. (4) Seminar, four hours. Investigation into main causes and forms of warfare on African continent, including relationship between internal war and transborder conflict, historic

124. Midwifes, Mothers, and Medicine: Perspectives on History of Childbirth. (4) Seminar, three hours. Using examples from history and anthropology, examination of variety of practices associated with childbearing and childbirth. Addressing such themes as shifting roles among birthing women, midwives, and medical men and cultural meanings of birth. P/NP or letter grading.

125. Culture and Ethics. (4) Seminar, three hours; fieldwork, three hours. Interactive participatory study of interactions between citizenship, leadership, and service, including both theoretical work in classroom and practical work in service organizations in the field. P/NP or letter grading.

126S/L. Latinos, Linguistics, and Literacy. (5) Formerly numbered M128.) (Same as Applied Linguistics M127S/L, Chicana and Chicano Studies M170S/L, and Spanish M172S/L.) Seminar, four hours; field project, four to six hours. Recommended required: Spanish 100A. In-depth study of various topics related to literacy, including different definitions of literacy, programs for adult learners, literacy and gender, approaches to literacy (whole language, phonics, Freire’s liberation pedagogy), history of writing systems, and more. Letter grading. Required field project involving Spanish-speaking adults in adult literacy programs. P/NP or letter grading.

130. How Cold War Was Played. (4) Lecture/discussion, three hours. Examination of what prompted the Cold War, why it lasted so long, what its impact was on political and socioeconomic systems of two main protagonists, and what its legacy has become. P/NP or letter grading.

133. Practice and Ethics of Ethnographic Fieldwork. (5) Seminar, three hours. Examination of ethics and practices of ethnographic fieldwork. This is not field method course but one intended to convey rich knowledge that can produce in many disciplines and kinds of ethical issues raised in doing fieldwork. P/NP or letter grading.

135. Narrative in Mass Communication. (6) Seminar, four hours. Examination of narrative as primary function of mass media, beginning with social, psychological, cultural, and rhetorical functions of storytelling and basic elements of narrative, then applying these to study of film, television, and print media. P/NP or letter grading.

137. Political Satire: Offensive Art. (5) Seminar, three hours. Study of political satire in several societies and variety of genres, including review of sociopolitical conditions that act to foster or constrain satire. P/NP or letter grading.

138. Disease and Human Condition. (5) Seminar, four hours. Examination of the nature, causes, and consequences of human diseases and functional impairment and human responses to these diseases. P/NP or letter grading.

140. Dominants and Subordinates in Social Psychology of Privilege and Oppression in Public Education. (8) Lecture, four hours; discussion, one hour; seminar, three hours. Study of social amnesia and temporary inequalities in contemporary American public school, showing how such entrenched inequalities tend to become permanent. Field component included. P/NP or letter grading.

143. Latino Immigration History and Politics. (4) (Same as Chicana and Chicano Studies M124.) Lecture, four hours. Overview of immigration in 20th century, examining social, political, and economic contexts out of which different waves of Latin American immigration to U.S. has occurred. Letter grading.

144. Stigma: Anthropology of Dangerous Other. (4) Seminar, three hours. In cross-cultural perspective, analysis of apparently common causes and consequences of diverse forms of social inequality in which culturally ascribed stigma is common factor. P/NP or letter grading.

148. Simulating Society: Exploring Artificial Communities. (5) (Same as Sociology M118.) Seminar, three hours; computer simulation, one hour. Examination of social behavior through computer simulations of behavior in artificial communities. P/NP or letter grading.

150. Formal Modeling and Simulations in Social Sciences. (4) (Same as Anthropology M166 and Human Computer Complex M100.) Lecture, three hours. Exploration of different approaches to modeling empirical phenomena of concern to social sciences. Topics include utility models, learning models, decision models, group competition models, and evolutionary models. Use of multilayered computer simulations and group exercises that explore interaction among individuals interacting according to models for behavior. Discussion of advantages and drawbacks of more traditional mathematical modeling. Review of alternative forms of representations of history, among individuals and groups, and simulation studies. Required field project involving history, and issues related to verification of simulations. P/NP or letter grading.

151. American Jews and Israel in Mutual Perspective. (4) Seminar, three hours. Examination of relationship between Israel and Jews in the U.S., with emphasis on locating the two communities in Jewish historical and political context of this relationship. Offered mutually with parallel course at Tel Aviv University, including shared bulletin board and chat room. P/NP or letter grading.

152. Past Societies and Their Lessons for Our Own Future. (5) (Same as Anthropology M158Q and Geography M158Q.) Lecture, four hours. Examination of two hours. Examination of modern and past tribal and band societies (Amazonian Indians, Kalahari San, New Guineans, and others) that met varying fates, as background to examination of how modern state societies are coping or failing to cope with similar issues. P/NP or letter grading.

153. International Flash Points. (5) Seminar, three hours. Discussion of international confrontations in current international affairs, including North and South Korea, India and Pakistan, Israel and Palestinians, Iraq, Colombia, and Congo and Rwanda. P/NP or letter grading.
154. Interpreting Performance: Examination of Social, Historical, and Cultural Models for Performing Arts. (5) Same as Theater M112.) Lecture, two hours; discussion, two hours. Examination of nature of performance in theory and practice and of social, historical, and cultural contexts in which performance traditions have developed; at approximately designated performances/events required. P/NP or letter grading.

155. International Relations of Middle East. (4) (Same as Political Science M132B.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for seniors/juniors. Role of great powers in Middle East, with emphasis on American, Soviet, and West European policies since 1945. P/NP or letter grading.

157. Mediterranean World since Roman Empire. (5) Seminar, three hours. Introduction to study of Mediterranean world over long period from fall of Roman Empire to present day, focusing on discussion of key research journals and important research articles in humanities and social sciences. Weekly research reports and presentations by McNair research students. Presentations by program faculty members and other leading researchers. May be repeated for credit. P/NP grading.

158. Critical Vision: History of Art as Social and Political Commentary. (5) Formerly numbered 29.) Same as Chemistry M117.) Lecture, four hours, activity, two hours. Exploration of structures and their geometric underpinnings, with examples and applications from architecture (space frames, domes, biology (enzyme complexes, viruses), chemistry (symmetry, molecular cages), design (tiling), engineering (space filling), and physics (crystal structures) to effect working knowledge of symmetry, two-dimensional patterns, and three-dimensional solids. P/NP or letter grading.

159. Paintings Performed: Bringing Art to Life. (5) Seminar, six hours. Interdisciplinary study in art, art history, improvisational acting techniques, and performance art. Study of paintings and sculptures from variety of genres and periods in galleries of J. Paul Getty Center Museum, integrating scholarly research, writing, creative enterprise, and music and performance enhances understanding of art in holistic way. P/NP or letter grading.

193A. Journal Club Seminars: McNair Research Scholars. (2) Seminar, two hours; discussion, one hour. Limited to McNair research students. Study of key research journals and important research articles in humanities and social sciences. Weekly research reports and presentations by McNair students. Presentations by program faculty members and other leading researchers. May be repeated for credit. P/NP grading.

193B. Journal Club Seminars: Arts and Humanities Summer Research Program. (2) Seminar, one hour; discussion, one hour. Limited to McNair research students. Study of key research journals and important research articles in humanities and social sciences. Weekly research reports and presentations by McNair research students. Presentations by program faculty members and other leading researchers. P/NP grading.

193C. Journal Club Seminars: Mellon Mays Undergraduate Research Scholars. (2) Seminar, one hour; discussion, one hour. Limited to Mellon Mays undergraduate research students. Study of key research journals and important research articles in humanities and social sciences. Weekly research reports and presentations by Mellon Mays students. Presentations by program faculty members and other leading researchers. P/NP grading.

193D. Directed Honors Studies. (4) Tutorial, two hours. Preparation: minimum of 4 units completed in Humanities Collegium with grade of B or better, overall UCLA grade-point average of 3.0 or better. Special research/writing tutorial with director of one Honors Collegium course to pursue in greater depth significant topics from one colloquium course. May be repeated for credit. P/NP or letter grading.

Interdisciplinary Minor

HUMAN COMPLEX SYSTEMS

Interdisciplinary Minor

College of Letters and Science

UCLA

341 Haines Hall

Box 951553

Los Angeles, CA 90095-1553

(310) 825-2055

fax: (310) 206-7933

e-mail: dread@anthro.ucla.edu

Dwight W. Read, Ph.D., Chair

Faculty Committee

Susanne Lohmann, Ph.D. (Political Science, Public Policy)
Human social systems are complex because humans conceptualize, communicate, and construct. Human social systems are shaped not only by factors extrinsic to the individuals making up the social systems, but also by the humans embedded within them. Humans are agents who analyze, reflect on, affect, shape, modify, and construct the social systems of which they are a part.

Students in the Human Complex Systems minor learn ways of thinking that help them make sense of and move effectively in today’s world—a world that is complex, information-rich, and prone to fast and furious change. They develop analytical skills and learn methodological tools that are relevant for the workplace in the emerging techno-economy. Students who seek to enter graduate school are well prepared by virtue of participating in some of the most exciting and novel research programs linking the frontiers of the social sciences with computer science, life sciences, humanities, management, public policy, and media arts.

Undergraduate Study

Human Complex Systems Minor

To enter the Human Complex Systems minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (12 units minimum): Three courses, including one from Mathematics 2, Statistics 10, 11, 12, 13, or 14 and two from Anthropology 7, 8, 9, 33, Economics 1, 2, Geography 3, 4, any lower division history course, Political Science 110, 120, 30, 50, Sociology 1, 10, 24 (courses may be from the same department or from different departments).

Required Upper Division Courses (20 units minimum): Five courses selected from the following: (1) two core courses from Anthropology 131, Communication Studies 154, Human Complex Systems M130 or Management M118A, Political Science 146G, Sociology 111, (2) two method courses (Human Complex Systems M100/100L and 110), and (3) one elective course in Anthropology 131 (unless taken as part of the core), M186, 186P, Communication Studies 154 (unless taken as part of the core), Geography 142, 148, Human Complex Systems 120, M130 or Management M118A (unless taken as part of the core), Political Science M115A, M142D, 146G (unless taken as part of the core), 164, Public Policy 102, C119, Sociology 111 (unless taken as part of the core), or M118; other courses may be applied by petition, and students may petition to apply Human Complex Systems 197 at the same time the contract is signed.

No more than two courses (8 to 10 units) may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Human Complex Systems

Lower Division Courses

1G. Emerging Issues in Complex Systems Science. (2) Lecture, two and one half hours. Presentation of current complexity science, particularly in human social and organizational dynamics, but also including aspects of arts, humanities, and natural sciences. Introduction to readings relevant to human complex systems and current faculty members and researchers who teach and advise in programs. P/N P or letter grading.

M10A. Introduction to Complex Systems Science. (5) (Formerly numbered 10A.) (Same as Engineering M142D.) Lecture, four hours with laboratory, three hours. Introduction to complex systems, complexity science goes beyond traditional mathematics and statistics in its use of multigenent computational models that better capture these complex, adaptive, and self-organizing phenomena. Letter grading.

Upper Division Courses

M100. Formal Modeling and Simulations in Social Sciences. (4) (Same as Anthropology M186 and Honors Collegium M150.) Lecture, three hours. Exploration of different approaches to modeling empirical phenomena of concern to social sciences. Topics include utility models, learning models, decision models, group competition, and evolutionary models. Use of multiple-output models and group exercises to explore emergent behaviors among individuals interacting according to models for behavior. Discussion of advantages and drawbacks of more classic analytical modeling. Review of alternative forms of formal representations of hypothesized processes and issues related to validation of simulations. P/NP or letter grading.

M100L. Modeling and Simulations Laboratory. (1) Laboratory, one hour. Designed for Human Complex Systems minor students. Discussion of observational techniques and engagement in live group simulations as a means to understand the structure and process of how coherent behavior and complexity emerges from interactions between individual agents, such as formation of social and political movements. First-hand experience in observing interactional patterns and system dynamics, such as how individuals come to play leadership roles, how alliances and pairing occur in groups, and how culture (lasting patterns of interaction and belief) form. Letter grading.

100L. Modeling and Simulations Laboratory. (1) Laboratory, one hour. Designed for Human Complex Systems minor students. Discussion of observational techniques and engagement in live group simulations as a means to understand the structure and process of how coherent behavior and complexity emerges from interactions between individual agents, such as formation of social and political movements. First-hand experience in observing interactional patterns and system dynamics, such as how individuals come to play leadership roles, how alliances and pairing occur in groups, and how culture (lasting patterns of interaction and belief) form. Letter grading.

110. Artificial Culture: Experiments in Synthetic Anthropology. (5) Lecture, two hours; laboratory, four hours. Prior programming experience not required. Hands-on introduction to artificial culture — the theory, design, and practice of constructing highly interactive computer simulations of human social worlds. Informed and critical look at revolutionary new sciences of complexity: multiple agencies, simultaneous causation and evolutionary emergence embodied in computational description, and understanding and explanation of human complex systems. Students design their own populations of artificial agents, create social and physical environments in which they live, and study consequences of counterfactual what-if scenarios. May be repeated for credit. Letter grading.

120. Artificial Life, Culture, and Evolution. (5) Lecture, two hours; laboratory, four hours. Prior programming experience not required. Hands-on introduction to artificial life and evolutionary computation as they contribute to philosophy and practice of artificial culture, description, understanding, and explanation of human complex systems through computer simulations. Informed and critical look at evolution, origin, and emergence of physical, biological, and cultural processes from perspective of revolutionary new sciences of complexity. Students design, modify, and experiment with interactive simulations featuring cellular automata, algorithmic patterning, and evolutionary and genetic programming. May be repeated for credit. Letter grading.

M130. Complexity Science for Social Systems. (4) (Same as Management M118A.) Lecture, four hours. Limited to juniors/seniors. Introduction to (1) complexity science as applied to social behavior and (2) agent-based computational modeling. Use of complexity science to bridge old and new conceptions of social science. Newtonian science, neoclassical economics, and old-style approaches to social science all build on assumptions that all basic agents comprising phenomena (atomic particles, molecules, organisms, people, groups, firms) are homogeneous and go forward in time under equilibrium conditions interspersed with occasional disequilibrium periods. Letter grading.

M140D. Diversity, Disagreement, and Democracy: Can’t We All Just Get Along? (4) (Same as Political Science M115D.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Can’t we all just get along? Study of diversity, disagreement, and democracy. Diversity covers individual differences, cultural differences, and human universals; groupism, factionalism, and identity politics; multiculturalism and one-world ethics. Disagreement includes moral, ideological, and party-political disagreement; resolvable and irresolvable kinds of disagreement; groupthink and group polarization; herdng and information cascades. Democracy stands for political mechanisms of information aggregation; political mechanisms to resolve differences, or to keep peace among people with irresolvable differences; emergence and spread of democracy, liberty, and rule of law. Letter grading.

M145. Ethics and Governance. (4) (Same as Political Science M115A and Public Policy M122.) Lecture, three or four hours; discussion (when scheduled). Designed for juniors/seniors. Study of applied ethics and governance, taking case-based approach, mixing normative and positive perspectives. Is action X morally right or wrong? What would a right action look like? More general question: whether action X is morally right or wrong? How do governance structures influence how people reason about whether action X is morally right or wrong? How can we design governance structures that encourage people to act ethically, contribute to public goods, and lead productive and fulfilled lives? P/NP or letter grading.

M193P. Journal Club Seminars: Human Complex Systems. (1) (Same as Anthropology M193P) Seminar, one hour. Limited to undergraduate students. Discussion of current readings in discipline. May be linked with speaker series. May be repeated for credit with topic change. P/NP grading.

197. Individual Studies in Human Complex Systems. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned readings and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.
199. Directed Research in Human Complex Systems. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**Scope and Objectives**

The graduate Human Genetics Program prepares students for careers as independent laboratory researchers with a firm grasp of the developments in biological and medical research. The rapidly evolving field of human genetics now incorporates genetic, biochemical, cell biological, and developmental studies of both humans and model organisms to tackle biomedical problems important for human health and disease. Areas of study include both Mendelian and non-Mendelian hereditary diseases, genomics and mapping, bioinformatics, developmental biology, neurogenetics, sex determination, cyto genetics, human malformation, and chromatin structure and function. Laboratory research is emphasized. Conceptual approaches to medically related biological problems are employed, frequently with the aid of automation and advanced imaging techniques, toward the goal of disease prevention, control, and eradication methods such as gene therapies. Coursework acquaints students with the most current literature and trains students in critical thinking, experimental design, and the ability to anticipate future developments.

Graduate study leading to a Ph.D. degree is emphasized. Under special circumstances, M.S. candidates are considered after consultation with faculty members and the chair.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gcdn.ucla.edu/gasaalibrary/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Graduate Degrees**

The Department of Human Genetics offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Human Genetics. An M.D./Ph.D. program is also offered.

**Human Genetics**

Upper Division Courses

CM122. Mouse Molecular Genetics. (2) Same as Microbiology CM122.) Lecture, two hours; discussion, one hour; outside study, eight hours. Concurrently scheduled with course CM222. P/NP or letter grading.

CM124. Computational Genetics. (4) (Same as Computer Science CM124.) Lecture: three hours; discussion, one hour; outside study, eight hours. Concurrently scheduled with course CM224. Letter grading.

CM144. Genomic Technology. (4) Lecture: three hours; discussion, one hour. Requisite: Life Sciences 4. Survey of key technologies that have led to successful application of genomics to biology, with focus on theory behind software and experimental and their current applications. Concurrently scheduled with course C244. P/NP or letter grading.

CM156. Human Genetics. (4) (Same as Microbiology CM156 and Molecular, Cell, and Developmental Biology CM156.) Lecture: three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256. Letter grading.

199. Special Studies in Human Genetics. (2 to 8) Tutorial, to be arranged. Students select instructor among eligible research faculty and carry out independent research project under instructor supervision. P/NP or letter grading.

**Graduate Courses**

M203. Stochastic Models in Biology. (4) Same as Biostatistics M203.) Lecture, four hours. Requisite: Mathematics 170A or equivalent experience in probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and variety of other biological and medical disciplines. S/U or letter grading.

M207A. Theoretical Genetic Modeling. (4) Same as Biostatistics M207A and Biostatistics M227.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 115A, 131A, Statistics 100B. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetic experiments, DNA sequencing analysis, and molecular phylogeny. S/U or letter grading.

M207B. Applied Genetic Modeling. (4) Same as Biostatistics M207B and Biostatistics M237.) Lecture, three hours; laboratory, one hour. Requisites: Biostatistics 110A, 110B. Methods of computer-oriented human genetic analysis. Topics include statistical methodology underlying genetic analysis of both quantitative and qualitative complex traits. Laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements M207A; students may take either and are encouraged to take both. S/U or letter grading.

210. Topics in Genomics. (2) Seminar, two hours. Survey of current biological theory and technology used in genomic research. Topics include genomic technologies, functional genomics, proteomics, statistical genetics, bioinformatics, and ethical issues in human genetics. S/U grading.

M211. Mathematical and Statistical Phylogenetics. (4) (Same as Biostatistics M211 and Biostatistics M223.) Lecture, three hours; discussion, one hour. Requisites: Biostatistics 110A, 110B, Mathematics 170A. Theoretical models in molecular evolution, with focus on phylogenetic techniques. Topics include evolutionary tree reconstruction methods, studies of viral evolution, phylogeography, and coalescent approaches. Examples from evolutionary biology and medicine. Laboratory for hands-on computer analysis of sequence data. S/U or letter grading.

CM222. Mouse Molecular Genetics. (2) (Same as Microbiology CM222.) Lecture, two hours. Requisite: Life Sciences 4. Emphasis on use of mouse genetic approach to studying fundamental biological questions. Topics include mouse genome and functional genomics, mutagenesis screening and cloning of disease genes, transgenesis and its application in developmental biology, stem cell biology, and modeling human genetic disorders. Reading materials include original papers and reviews. Concurrently scheduled with course CM224. P/NP or letter grading.

CM224. Computational Genetics. (4) (Same as Computer Science CM224.) Lecture, three hours; discussion, one hour; outside study, eight hours. Preparation: one statistics course and familiarity with any programming language. Designed for undergraduate and graduate engineering students, as well as students from biological sciences and medical school. Introduction to current quantitative understanding of human genetics and computational interdisciplinary research in genetics. Topics include introduction to genetics, hu-

390 / Human Genetics
man population history, linkage analysis, association analysis, association study design, isolated and admixed populations, human structural variation, model organisms, and genotyping technologies. Computational techniques include those from statistics and computer science. Concurrently scheduled with course CM124. Letter grading.

M229S. Seminar: Current Topics in Bioinformatics. (4) (Same as Computer Science M229S.) Seminar, four hours; outside study, eight hours. Designed for graduate engineeringstudents, as well as students from other schools, departments, and programs. Introduc- tion to current topics in bioinformatics, genomics, and computational genetics and preparation for computational interdisciplinary research in genetics and genomics. Topics include genome analysis, regulatory genomics, association analysis, association study design, isolated and admixed populations, population history, linkage analysis, and association technologies. Computational techniques include those from statistics and computer science. May be repeated for credit with topic change. Letter grading.

236A. Advanced Human Genetics A: Molecular Aspects. (4) Lecture, three hours. Recommended preparation: prior knowledge of basic concepts in molecular biology and genetics. Advanced topics in human genet- ics, including variability in inherited traits, and the role of population genetics and relevant techn- ologies. Topics include genomic technologies, human genome, mapping and identification of disease-causing mutations, transcriptomics, proteomics, functional genomics, and stem cells. Reading mate- rials include original research articles and reviews or book chapters. Letter grading.

236B. Advanced Human Genetics. (4) Lecture, four hours. Recommended preparation: introductory statis- tics knowledge equivalent to Biostatistics 110A, Statis- tics 100A, or 110A and general genetics knowledge equivalent to Ecology and Evolutionary Biology 121 or Molecular, Cell, and Developmental Biology 144. Advanced topics in human genetics related to complex genetic traits and common diseases, with emphasis on bioinformatics and mathematical modeling. Reading mate- rials include original research papers and reviews. S/U or letter grading.

C244. Genomic Technology. (4) Lecture, three hours; discussion, one hour. Required preparation: introductory sta- tistics knowledge equivalent to Biostatistics 110A, Statistics 100A, or 110A and general genetics knowledge equivalent to Ecology and Evolutionary Biology 121 or Molecular, Cell, and Developmental Biology 144. Advanced topics in human genetics related to complex genetic traits and common diseases, with emphasis on bioinformatics and mathematical modeling. Reading mate- rials include original research papers and reviews. S/U or letter grading.

M252. Seminar: Advanced Methods in Computa- tional Biology. (2) (Same as Bioinformatics M252 and Chemistry M252.) Seminar, one hour; discussion, one hour. Designed for advanced graduate students. Ex- amination of computational methodology in bioin- formatics and computational biology through presentation of current research literature. How to select and apply methods, from computational and mathematical ma- chines to problems in bioinformatics and computational biology; development of novel methodologies. S/U or letter grading.

M255. Mapping and Mining Human Genome. (3) (Same as Pathology M255.) Lecture, three hours. Ba- sic molecular genetic and cytogenetic techniques of gene mapping. Selected regions of human genomic map scrutinized in detail, particularly gene families and clusters of genes that have remained linked from mouse to human. Discussion of localizations of dis- ease genes. S/U or letter grading.

CM256. Human Genetics. (4) (Same as Microbiol- ogy CM256 and Molecular, Cell, and Developmental Bi- ology CM256.) Lecture, three hours; discussion, two hours. Required: Life Sciences 3, 4. Application of genetic principles in human populations, with empha- sis on human chromosome analysis, population genetics, and family studies. Lectures and readings in literature, with focus on current questions in fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Letter grading.

M260A. Introduction to Bioinformatics. (4) (Same as Bioinformatics M260A, Chemistry CM260A, and Computer Science CM221.) Lecture, three hours; dis- cussion, one hour. Enforced requisites: Biostatistics 100A or 110A or Mathematics 170A or Statistics 100A or 110A, and Computer Science 180 or Program in Computing 50 with grade of C– or better. Introduction to bioinformatics and methodologies, with emphasis on concepts and inventing new bioinformatic methods. Focus on sequence analysis and alignment algo- rithms. S/U or letter grading.

M278. Statistical Analysis of DNA Microarray Data. (4) (Same as Biostatistics M278.) Lecture, three hours. Requisite: Biostatistics 200C. Instruction in use of sta- tistical tools used to analyze microarray data. Structure coverage to analytical protocol and responsible might follow when working with microarray data. S/U or letter grading.

282. Human Genetics Seminar and Journal Club. (2) Seminar, one hour; discussion, one hour. Limited to graduate students. Participation and presentation in weekly journal club meeting whose topics reflect those of talk in Human Genetics Seminar Series during fol- lowing week. Journal club presentation required. S/U or letter grading.

596. Directed Individual Study and Research. (2 to 12) Tutorial, to be arranged. Individual study or re- search for graduate students. May be repeated for credit. S/U grading.

597. Preparation for M.S. Comprehensive Exami- nation or Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged. Individual study for M.S. com- prehensive examination or Ph.D. qualifying examina- tions. May be repeated for credit. S/U grading.

INDO-EUROPEAN STUDIES

Interdepartmental Program College of Letters and Science UCLA

100 Dodd Hall Box 951417 Los Angeles, CA 90095-1417 (310) 825-4117 fax: (310) 206-1903 http://www.humnet.ucla.edu/pies/home.html

H. Craig Melchert, Ph.D., Chair
Faculty Committee
Vyacheslav V. Ivanov, Ph.D. (Slavic Languages and Literatures)
Stephanie W. Jamison, Ph.D. (Asian Languages and Cultures)
Joseph F. Nagy, Ph.D. (English)
Christopher M. Stevens, Ph.D. (Germanic Languages)
Brent H. Vine, Ph.D. (Classics)

Scope and Objectives

The prime aim of the interdisciplinary Indo-Eu- ropean Studies Program is the integral study of Indo-European culture, based on comparative linguistics, archaeology, social structure, and religion. The Ph.D. in Indo-European Studies is offered with two alternative major emphases: Indo-European linguistics and Indo-Iranian or other specialized language area studies.

Graduate Study

Official, specific degree requirements are de- tailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in an- nouncements, other publications, and websites of the schools, departments, and programs.

Graduate Degree

The Indo-European Studies Program offers Candidate in Philosophy (C.Phil.) and Doctor of Philosophy (Ph.D.) degrees in Indo-European Studies.

Indo-European Studies

Lower Division Courses

M20. Visible Language: Study of Writing. (5) (Same as Asian M20, Near Eastern Languages M20, South Asian M20, and Southeast Asian M20.) Lecture, three hours; discussion, one hour. Consideration of concrete means of language representation in writing systems. Earliest representations of language known are those of Near East dating to early 4th millennium B.C. While literate civilizations of Egypt, Indus Valley, China, and Mesoamerica left little evidence of corresponding earli- est developments, their antiquity and, in case of China and Mesoamerica, their evident isolation mark these centers as loci of independent developments in writing. Basic characteristics of early scripts, assessment of modern alphabetic writing systems, and presentation of conceptual basis of semiotic language representa- tion. Origins and development of early non-Western writing systems. How Greco-Roman alphabet arose in 1st millennium B.C. and how it compares to other mod- ern writing systems. P/NP or letter grading.

M70. Origin of Language. (5) (Same as Communica- tion Studies M70 and German M70.) Lecture, three hours; discussion, one hour. Theoretical and method- ological issues surrounding origin of language. Topics include evolutionary theory, evolution of man, how lan- guage is organized in brain, and science of language, including physiology of speech, phonetics, and com- parative reconstruction. Letter grading.

Upper Division Courses

131. European Archaeology, Neolithic to Bronze Age. (4) Lecture, four hours. Survey of European cul- tures from beginning of food-producing economy in 7th millennium B.C. to beginning of Bronze Age in 3rd mil- lennium B.C. P/NP or letter grading.

132. European Archaeology: Bronze Age. (4) Requi- site: course 131. Survey of European cultures from around 3000 B.C. to the period of destruction of the Mycenaean culture about 1200 B.C. Aegean area and rest of Europe.

M150. Introduction to Indo-European Linguistics. (5) (Same as Linguistics M150.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requi- site: Linguistics 1 or 20. Indo-European languages (ancient and modern), including their relationships, chief characteristics, writing systems, and sociolinguis- tic contexts; nature of reconstructed Indo-European proto-language and proto-culture. One or more Indo- European languages may be investigated in detail. P/NP or letter grading.

C160. Indo-European Comparative Mythology and Poetics. (4) Seminar, three hours. Preparation: famil- iarily with at least one ancient Indo-European lan- guage. Comparison of major Indo-European mytholo- gies and poetic traditions and reconstruction of their common sources. Topics include deities and their names; symbolic systems in social context; myths, folk
M168. Introductory Hittite. (4) (Same as Ancient Near East M168.) Lecture, two hours; recitation, one hour. Recommended preparation: knowledge of language with case system. Introduction to Hittite grammar by series of graded lessons covering morphology and syntax, followed by readings of selected texts from variety of genres in transliteration. P/NP or letter grading.

199. Special Studies. (2 to 8) Tutorial, to be arranged. P/NP or letter grading.

Graduate Courses

M230A-M230B. Old Iranian. (4-4) (Same as Iranian M230A-M230B.) Lecture, four hours. Studies in grammar and texts of Old Persian and Avestan. Comparative considerations. Only course M230B may be repeated for credit. In Progress (250A) and S/U or letter (250B) grading.

250A-250B. European Archaeology. (4-4) Seminar, three hours. Studies in ancient European archaeological materials and their relationship to Near East, Western Siberia, and Central Asia. May be repeated for credit. In Progress (250A) and S/U or letter (250B) grading.

C250. Indo-European Comparative Mythology and Poetics. (4) Seminar, three hours. Preparation: ability to read original sources in at least one ancient Indo-European language. Comparison of major Indo-European mythological and poetic traditions and reconstruction of their common sources. Topics include divinities and their names; symbolic systems in social context; myths, folk narratives, belief systems; relations with other traditions; literary continuations of mythopoeic material. Concurrently scheduled with course C160. S/U or letter grading.

INFORMATION STUDIES

Graduate School of Education and Information Studies

Gregory H. Leazer, D.L.S., Chair

Professors
Christine L. Borgman, Ph.D. (Presidential Professor of Information Studies)
Johanna R. Drucker, Ph.D. (Martin and Bernard Breslauer Professor of Bibliography)
Anne J. Gilliland-Swetland, Ph.D.
Leah A. Lievrouw, Ph.D.
Beverly P. Lynch, Ph.D.
Mary Niles Maack, D.L.S.
John V. Richardson, Ph.D.

Professors Emeriti
Marcia J. Bates, Ph.D.
Howard A. Besser, Ph.D.
Harold Barko, Ph.D.
Robert M. Hayes, Ph.D.
Russell Shank, D.L.S.
Elaine Svenonius, Ph.D.
Diana M. Thomas, Ph.D.
Virginia A. Walter, Ph.D.

Associate Professors
Clara Chu, Ph.D.
Jonathan Furner, Ph.D.
Christopher M. Kelty, Ph.D.
Gregory H. Leazer, D.L.S.
Ellen J. Pearlstein, M.A.

Assistant Professors
Jean-François Blanchette, Ph.D.
Steven Ricci, M.A., Ph.D.
Ramesh Srivinvasan, Ph.D.

Lecturers
Murtha Baca, Ph.D.
Stuart Biegel, J.D.
Keri S. Botello, M.A., M.S.
Lynn Boyden, M.L.S.
David Cappoli, M.L.S.
Andra M. Darlington, M.L.I.S.
Loretta M. Gaffney, M.S.
Esther S. Grassian, M.L.S.
Joan Kaplowitz, Ph.D.
Julie Kwan, M.S.
Victoria McCargar, M.L.I.S.
Stacey Meeker, M.L.I.S.
Cynthia L. Mediavilla, Ph.D.
Luz H. Mendes, M.L.I.S.
Mary E. Menzel, M.L.I.S.
Eva Mitnick, M.L.S.
Alma Ortega, M.L.I.S., M.A.
Ward Smith, M.L.I.S.

Visiting Assistant Professor
Susan M. Allen, Ph.D.

Scope and Objectives

The Department of Information Studies has one of the top-ranked programs of its kind in the country and has developed an international reputation in the areas of information policy, information-seeking behavior, user interface development, archives, preservation, and cataloging. Whether students choose to pursue a master's degree or a Ph.D., they graduate with a broad understanding of both theory and practice.

Students with master's degrees go on to careers as librarians, archivists, and information professionals in a variety of organizational settings. The Ph.D. focuses on the preparation of scholars in the field.

For information about the department and programs, see http://is.gseis.ucla.edu.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Information Studies offers the Master of Library and Information Science (M.L.I.S.) degree and the Doctor of Philosophy (Ph.D.) degree in Information Studies.

One concurrent degree program (Library and Information Science M.L.I.S./Management M.B.A.) and one articulated degree program (Library and Information Science M.L.I.S./Latin American Studies M.A.) are also offered.

Information Studies

Lower Division Courses

20. Introduction to Information Studies. (5) Lecture, five hours. Designed for undergraduate students. Examination of information technology in society, including Internet, World Wide Web, search engines (e.g., Google, Yahoo, Lycos), retrieval systems, electronic publishing, and distribution of media, including newspapers, books, and music. Exploration of many of these technological, social, cultural, and political aspects in which they exist, and how social relationships are changing. Letter grading.

30. Internet and Society. (5) Lecture, five hours. Designed for undergraduate students. Examination of information technology in society, including Internet, World Wide Web, search engines (e.g., Google, Yahoo, Lycos), retrieval systems, electronic publishing, and distribution of media, including newspapers, books, and music. Exploration of many of these technological, social, cultural, and political aspects in which they exist, and how social relationships are changing. Letter grading.

Upper Division Courses

139. Letterpress Laboratory. (1) Laboratory, one hour. Hands-on printing experience in letterpress shop designed to give students in information studies, design, or other disciplines understanding of printing process. Basic instruction provided, and students work on group project for duration of term. P/NP grading.

180. Special Topics in Information Studies. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Selected topics or issues related to social, cultural, economic, or political aspects of information and information systems. Consult Schedule of
Classes for topics and instructors. May be repeated once for credit with topic change. P/NP or letter grading.

199. Directed Research in Information Studies. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. Letter grading.

Graduate Courses

200. Information in Society. (4) Lecture, two hours; discussion, two hours. Examination of processes by which information is created, interpreted, disseminated, organized, used, and preserved. Topics include history of communication technologies, evolution of literacy, development of information professions, and social issues related to information access. Letter grading.

201. Ethics, Diversity, and Change in Information Professions. (4) Lecture, two hours; discussion, two hours. Service learning course that serves as forum to discuss, learn, and understand ethical challenges of multicultural information society that shape societal, professional community, and individual views and impact professional practice, decision making, and public policy. S/U grading.

208. Scholarly Communication and Bibliometrics. (4) Lecture, four hours. Preparation: one inferential statistics course. Survey of current theory, method, and empirical studies at intersection of scholarly communication and bibliometrics, seeking to understand flow of ideas through published record, whether in print, electronic form, or other media. Letter grading.

210. Design of Library and Information Services. (4) Lecture, two hours; discussion, two hours. Principles and methods for planning and designing user-driven library and information services. Principles and methods for assessing information needs of designated populations and for designing services that meet those needs. Letter grading.

M225. Latin American Research Resources. (4) Same as History M265 and Latin American Studies M260.) Discussion, three hours. General and specialized materials in fields concerned with Latin American studies. Library resources provide experience and competency required for future bibliographic research and research methodology as basis for advanced research results. S/U or letter grading.

227. Information in Culturally Diverse Communities. (4) Lecture, four hours. Issues in provision of information services in multilingual and multicultural society. Understanding role of information institutions in promoting cultural diversity and preserving ethnic heritage. Letter grading.

228. Measurement and Evaluation of Information Systems and Services. (4) Lecture, two hours; discussion, two hours. Preparation: one research methods course. Recommended: one library automation course. Information systems and services from points of view of their cost and effectiveness in meeting desired objectives. Review of principles of costing. Study of information literacy in information systems and services. S/U or letter grading.

M229B. Africana Bibliography and Research Methods. (4) Same as African Studies M229B.) Discussion, four hours. Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library systems, computerized databases, and computerized databases. S/U or letter grading.

M229C. Introduction to Slavic Bibliography. (2) (Same as Slavic M229C.) Lecture, two hours. Introduction to digital library culture. Four-hour section for humanities and social sciences. Emphasis to be determined by requirements and background of enrollees. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and Eastern European library materials; Slavic and Eastern European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of online databases; compilation of bibliographies. S/U grading.

233. Records and Information Resources Management. (4) Lecture, three hours. Introduction to records management in corporate, government, and other organizational settings; including analysis of organizational information flow, classification and filing systems, records retention scheduling, records inventory, confidentiality, and ethics; and image management technology, and litigation support. Letter grading.

236. Historical Bibliography. (4) Lecture, four hours. Requisites: courses 200, 435. History of library formats (books, broadsides, magazines, newspapers, song sheets, etc.), relation to material characteristics of production, distribution, and readership in their social, political, and economic context. Emphasis varies but is usually on developments prior to 1800. Attention to historical, and research methods. Library Historical aforementioned eras of the American, and Histoire du livre approaches. Letter grading.

M238. Environmental Protection of Collections. (4) (Same as Conservation M240.) Lecture, two hours; laboratory, two hours. Requisite: course 432. Review of environmental and biological agents of deterioration, including light, temperature, relative humidity, pollution, insects, and fungi. Emphasis on monitoring to identify agents and understanding sensitivities, along with protective measures for collections. Letter grading.

239. Letterpress Laboratory. (1) Laboratory, two hours. Hands-on printing experience in letterpress shop designed to gain shop experience in book design, letterpress printing, digital libraries, scholarly communication, and other restraints on access to information. Letter grading.

240. Management of Digital Records. (4) Lecture, four hours. Preparation: one research methods course. Emphasis on long-term management of digital administrative, information, communications, imaging, or research systems and records. Topics include electronic recordkeeping, enterprise and risk management, systems analysis and design, metadata development, data preservation, and technological standards and policy development. Letter grading.

245. Information Access. (4) Lecture, two hours; discussion, two hours. Emphasis on networked ontologies, with focus on problem solving. Provisions fundamental knowledge and skills enabling information professionals to link users with information. Emphasis on social structure of selected fields; information-seeking behavior of user groups; communication with users; development of search strategies using print and electronic sources. Letter grading.

246. Information-Seeking Behavior. (4) Lecture, three hours. Emphasis on information-seeking behavior and influences, both individual and social, associated with human beings needing, using, and acting on information. Topics include information theory, human information processing, information flow among social and occupational groups, and research on information needs and uses. Letter grading.

251. Seminar: Specialized Literatures. (4) Seminar, four hours. Requisite: course 245. Exposure to major literatures across spectrum of disciplines in three broad areas: (1) arts and humanities, (2) social sciences, (3) natural sciences. Students become familiar with knowledge structures; emphasis on reference and information sources for scholarly research. Letter grading.

M253. Medical Knowledge Representation. (4) (Same as Biomedical Engineering M226.) Seminar, four hours; outside study, eight hours. Designed for graduate students. Issues related to medical knowledge representation and its application in healthcare processes. Topics include data structures used for representing knowledge (conceptual graphs, frame-based models), different data models for representing spatio-temporal information, rule-based implementations, current statistical methods for discovery of knowledge (data mining, statistical classifiers, and hierarchical classification), and basic information retrieval. Review of work in constructing ontologies, with focus on problems in implementation and definition. Common medical ontologies, coding schemes, and standardized clinical vocabularies (SNOMED, CPT) Letter grading.

M254. Medical Information Infrastructures and Internet Technologies. (4) (Same as Biomedical Engineering M227.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Introduction to networking, communication, and information infrastructures in medical environment. Exposure to basic concepts related to networking at several levels: low-level (TCP/IP, services), medium-level (network topology), and high-level issues (Intranets, Web-based services) implementations. Commonly used medical communication protocols (HL7, DICOM) and current medical information systems (HIS, RIS, PACS). Advents in networking (such as wireless) and health sys-

277. Information Retrieval Systems: User-Centered Designs. (4) Lecture, two hours; discussion, two hours. Emphasis on design implications of interactions between users and features of automated information systems and interfaces that are specific to information-seeking process. Emphasis on search strategies, user-computer interaction, and use of thesauri and other vocabularies. Letter grading.

279. Seminar: Information Systems. (4) Seminar, four hours. Preparation: at least one course from 246, 272, 274, 276, 277, 280, 283. Content varies from term to term to allow emphasis on specialized topics such as vocabulary control, file design, indexing, classification, text processing, measurement of relevance, evaluation of information systems, and social and policy issues related to information technology and services. Letter grading.

280. Social Science Research Methodology for Information Studies. (4) Lecture, four hours. Understanding nature, uses, and practices of research appropriate to information studies. Identification of research problems and design and evaluation of research methods. Emphasis on inquiry methodology and empirical research. S/U or letter grading.

285. Introduction to Research Design and Methodology. (4) Seminar, four hours. Designed for Ph.D. students. Introduction to research traditions in library and information science: quantitative/qualitative social science methods, ethnographic/field approaches, and historical methods. Discussion of philosophical foundations of research, formulating research questions, and designing appropriate research studies. Letter grading.

289. Seminar: Special Issues in Information Studies. (2 to 4) Seminar, two to four hours. Identification, analysis, and discussion of critical intellectual, social, and technological issues facing the profession. Topics may include the role of technology in information literacy, electronic networks, youth at risk, information literacy research problems and design and evaluation of research. Letter grading.

290. Research Seminar: Information Studies. (1 to 2) Seminar, one to two hours. Emphasis on recent contributions to theory, research, and methodology. May be repeated for credit. S/U grading.

291A. Doctoral Seminar: Theoretical Traditions in Information Studies. (4) Seminar, four hours. Nature of information studies — ontological, epistemological, and social aspects of information and information-related artifacts, agents, contexts, institutions, practices, processes, values, and relationships. In-depth analysis of several analytical frameworks that can be used to analyze social, cultural, and political roles of information institutions and professionals who direct them. Letter grading.

298A. Doctoral Seminar: Research Methods and Design. (4) Formerly numbered 291B.) Seminar, four hours. Survey of quantitative, qualitative, and historical research designs. Ethical issues, conceptualization of research goals, literature review, experimental, survey, field, and evaluation research; data analysis. Letter grading.

298B-298C. Special Topics in Methodology of Information Studies. (4-4) Seminar, four hours. Enforced requisite: course 298A. Topics include anthropological fieldwork methods, archival methodology, bibliographical studies, textual analysis, discourse analysis, historical methodology, information visualization, network analysis — bibliometrics, informetrics, scientometrics, social network analysis. Letter grading.

M299. Research Resources for European Studies. (2) (Same as French M299, German M299, Italian M299, Slavic M299, and Spanish M299.) Lecture, two hours. Essentials of library research strategy and effective searching in key print and online resources for European and Russian studies. Through combination

438A. Seminar: Advanced Issues in Archival Science — Archival Appraisal. (4) Seminar, four hours. Requisite: course 431. Evaluation and examination of contributions of key figures in development of archival appraisal theory; identification and evaluation of distinctive movements in archival appraisal; identification of cultural, political, sociological, and technological movements that can have impact on appraisal methodologies. Letter grading.

438B. Seminar: Advanced Issues in Archival Science — Archival Access and Systems. (4) Seminar, four hours. Requisite: course 431. Exploration of archival description and access systems in the U.S. and their development since World War II; data collection; access tools and implications of these issues in development of online archival access systems. Letter grading.

448. Information Literacy Instruction: Theory and Practice. (4) Lecture, four hours. Identification of problem in user education/bibliographic instruction theories and methodologies, and trends in information formats. Examination of variety of user education/bibliographic instruction theories and methodologies, and materials of user education. S/U or letter grading.

457. Health Sciences Librarianship. (4) Lecture, four hours. Health sciences information resources and services, management of health sciences information resources and services, health sciences environment and policies, information systems and technology. Letter grading.

464. Metadata. (4) Lecture, four hours. Introduction to variety of metadata provided for digitized and other electronic information resources. Introductory theory and practice designing and applying metadata. S/U or letter grading.

473. Information Technology and Libraries. (4) Lecture, four hours. Overview of major components of library automation: circulation control, acquisitions and serials, public access, and user interfaces systems and data conversion. Relationships among various automation entities, including internal library automation, networks and vendors (such as bibliographic utilities, regional networks, and online services), and automation of parent organizations (universities, municipalities, corporations, and government agencies). Developments in standards for information processing and new information technologies. Letter grading.

497. Fieldwork in Libraries or Information Organizations. (4 or 8) Fieldwork, 12 or 24 hours depending on nature and complexity of project. Fieldwork experience may include research, library, archival, or other information setting. Fieldwork experiences may include opportunities in state, national, and international institutions. S/U grading.

498. Internship. (4) Discussion, to be arranged. Supervised professional training in a library or information center approved by internship coordinator. Minimum of 120 hours per term. May be repeated twice. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Directed special studies in fields of bibliography, librarianship, and information science. Variable conference time depending on nature of study or complexity of research. S/U grading.

Professors
Richard F. Ambrose, Ph.D.
Daniel T. Blumstein, Ph.D.
The IloES offers creative, multidisciplinary academic programs and courses that address the full complexity of current environmental problems and sustainable solutions. The Bachelor of Science degree in Environmental Science is an innovative dual-component degree program for students seeking a challenging and invigorating science curriculum. The first component, the Environmental Science major, provides students with disciplinary breadth in several areas important to environmental science. The second component, a minor or concentration in one of seven environmental science areas, provides students with focused disciplinary depth in an area of their choosing. The minor in Environmental Systems and Society is defined as the simultaneous consideration of human population, the environment, and the need to restore ecological function to sprawling urban settlements in a manner that supports economic growth and that is socially just and equitable.

The first component, the Environmental Science major, requires completion of lower division requirements grounded in basic natural sciences, a six-course upper division environmental science requirement reflecting the disciplinary breadth of environmental science, two social sciences/humanities courses, participation in an ongoing environmental science colloquium, and completion of an environmental science practicum. The second component is a minor or concentration in one of seven environmental science areas, each associated with a particular department. With assistance from IloES staff, students must formally apply to and be accepted by the associated department to receive the minor.

Preparation for the Major

Required: Chemistry 14A, 14B, and 14BL (or 20A, 20B, and 20L), Earth and Space Sciences 1 (required for the Earth and environmental science minor) or Environment M10, Life Sciences 1, 2, Mathematics 3A and 3B or 31A, and 31B, Physics 6A and 6B (or 1A and 1B), Statistics 12 or 13.

For the atmospheric and oceanic sciences and environmental engineering minors, Chemistry and Biochemistry 14C (or 30A), or Mathematics 3C (or 32A) and Physics 1C (or 6C) are also required.

For the conservation biology minor, Chemistry and Biochemistry 14C (or 30A), Life Sciences 1, and 3 are also required.

For the Earth and environmental science minor, Chemistry and Biochemistry 14C (or 30A) or Physics 1C (or 6C), Earth and Space Sciences 1, and one course from 5, 13, 15, or 61, and Mathematics 3C (or 32A) are also required.

For the environmental health concentration, Chemistry and Biochemistry 14C (or 30A) and Life Sciences 3 are also required.

For the environmental systems and society minor, two courses from Chemistry and Biochemistry 14C or 30A, Life Sciences 3, Mathematics 3C or 32A, and Physics 1C or 6C are also required.

For the geography/environmental studies minor, two courses from Chemistry and Biochemistry 14C or 30A, Life Sciences 3, Mathematics 3C or 32A, and Physics 1C or 6C, plus Geography 5 and one course from 1, 2, 3, 4, or 6 are also required. Students should take these courses before enrolling in upper division courses.

Each course applied toward requirements for preparation for the major must be passed with a grade of C— or better. Students receiving a grade below C— in two courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

Transfer applicants to the Environmental Science major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two general chemistry courses with laboratory for majors, two general biology courses.
with laboratory for majors, two calculus courses, and two calculus-based physics courses.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

The major consists of four requirements: environmental science, social sciences/humanities, practicum/colloquium, and minor or concentration, as follows:

Environmental Science Requirements

Required: One course from each of the following six core environmental science areas. No more than two courses may be from any one department.

1. An atmospheric and water science course from Atmospheric and Oceanic Sciences 101, 103, M105, 130, Earth and Space Sciences C132, 153, or Geography 105;
2. A climate science course from Atmospheric and Oceanic Sciences 102, Geography 102, 104, M106, or M131;
3. A course in Earth and Space Sciences 101, C113, 119, 135, 139, 150, Environmental M127, Geography 100, 101, or M107;
4. An ecology and conservation biology course from Ecology and Evolutionary Biology 100, 109, 116, 151A, 154, Environmental M121, Geography 111, or 113;
5. An environmental management course from Environment M134, M155, 160, 166, or Public Policy C115;
6. A pollutant sources, treatment, fate, and transport course from Atmospheric and Oceanic Sciences 104, Chemical Engineering C118, Civil and Environmental Engineering 153, 154, M166, Environmental Health Sciences 100, C125, C152D, or C164.

Social Sciences/Humanities Requirements

Required: (1) One humans and environment course from Environment M132, M133, M137, M153, Geography M128, 135, M137, 145, 150, M153, 156, or Philosophy 125; (2) One policy and politics course from Environment 138, M155, M161, M162, M164, or 166.

Practicum/Colloquium Requirements

Required: Four terms of Environment 170 and three capstone practicum courses (180A, 180B, 180C).

Minor and Concentration Requirements

No more than two of the courses below may be applied toward both these minors and concentrations and a major or minor in another department or program. Successful completion of a minor is indicated on the transcript and diploma.

For the atmospheric and oceanic sciences minor, at least two courses from Atmospheric and Oceanic Sciences 101, 102, 103, 104 and up to five courses from Atmospheric and Oceanic Sciences C110, C115, 130, 145, C160, C170, Chemistry and Biochemistry 110A are required. One course may be taken on a Passed/Not Passed basis.

For the conservation biology minor, Ecology and Evolutionary Biology 100, 116 (or Environment 121), and four to six courses from 101, 103, 105, 109, 111, 112, 114A, 122, 129, 151A, 154, 176, 180A are required.

For the Earth and environmental science minor, five courses from Earth and Space Sciences 101, 112, C113, 139, 150, 153 are required.

For the environmental engineering minor, Civil and Environmental Engineering 153 and five courses from 151, 154, 155, 156A, M166, Chemical Engineering C118, Environmental Health Sciences C125, C164 are required.

For the environmental health concentration, Environmental Health Sciences 100, C135, Epidemiology 100, and three courses from Chemistry and Biochemistry 153A, Environmental Health Sciences C125, C140, C152D, C157, C164, 203 are required.

For the environmental systems and society minor, seven courses from Environment M109, M111, 121, 122, M130, M132, M133, M134, M135, M137, 138, M153, M155, 160, M161, M164, 166 are required.

For the geography/environmental studies minor, three courses from Geography M106, M107, M109, 110, 113, M115, 116, 120, 121, 122, 123, 124, 125, 126, M127, M128, M129, M131, 132, 135, 136, M137, 159C, 159D, 159E, and any two additional upper division geography courses (except those from the preceding list and courses 194 through 199) are required.

Each course applied toward requirements for the major, except Environment 170, must be taken for a letter grade. Students must maintain an overall grade-point average of 2.0 (C) or better in all courses applied toward the major.

Honors Program

The honors program provides exceptional students an opportunity for advanced research and study, under the guidance of a faculty member, that leads to the completion of an honors thesis or research project. To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division coursework in the major and an overall GPA of 3.0 or better, (3) complete at least 8 units of Environment 198 taken over at least two terms, and (4) produce a completed satisfactory honors thesis. The honors thesis or research project is in addition to the requirement of the completed practicum in environmental science project. Consult the student affairs officer for further information.

Environmental Systems and Society Minor

The Environmental Systems and Society minor is designed for students who wish to augment their major program of study with courses addressing the relationships between environmental science and associated social and political issues. The minor seeks to impart a deeper understanding of environmental systems related to air, land, and water resources, providing a basis for sound professional decision making.

To enter the minor, students must be in good academic standing (2.0 grade-point average) and file a petition at the Institute of the Environment and Sustainability, 300 La Kretz Hall, (310) 206-9193.

Required Lower Division Courses (8 units): At least two courses from Astronomy 3, Atmospheric and Oceanic Sciences 1, 2, 3, Earth and Space Sciences 1, 15, 16, 20, Ecology and Evolutionary Biology 10, 13, 25, Environment M1A, M1B, M10, 14, Geography 1, 2, 5.

Required Upper Division Courses (20 units): At least five courses from Environment M109, M111, 121, 122, M130, M132, M133, M134, M135, M137, 138, M153, M155, 160, M161, M164, 166.

No more than 8 units may be applied toward both this minor and any other major or minor program, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer or substitution of credit for any of the above is subject to institute approval; consult an academic adviser at the institute before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Environment

Lower Division Courses

M1A-M1B-M1CW. Global Environment. (6-6-6)
(Same as GE Clusters M1A-M1B-M1CW) Course M1A is enforced requisite to M1B, which is enforced requisite to M1CW. Limited to first-year freshmen. Letter grading. M1A-M1B. Multidisciplinary Perspective I, II, Lecture, three hours; discussion, two hours. Human effects on Earth’s ecosystem and social and technological solutions to environmental pollution and overpopulation. History and ecology in lectures; laboratory exercises included in discussions. M1A and M1B, Special Topics. Seminar, three hours. Enforced requisite: course M1B. Examination of specialized environmental topics such as air and water, global warming, and feeding Earth’s population. Satisfies Writing II requirement.

M10. Introduction to Environmental Science. (4)
(Same as Atmospheric and Oceanic Sciences M10) Lecture, three hours; laboratory, one hour. Limited to undergraduate students. Introduction to environmental science as discipline and as way of thinking. Discussion of critical environmental issues at local and global scales. Fundamentals of physical, chemical, and biological processes important to environmental science. Laboratory exercises to augment lectures. Letter grading.

12. Sustainability and Environment. (4) Lecture, three hours; discussion, one hour. Introduction to sustainability with emphasis on environmental component, including Earth’s physical, chemical, and biological processes as related to resource demands and management. Examination of application of scientific methods in helping to understand and solve sustainability problems. Case studies illustrating how natural and social scientists work on environmental sustainability issues. Focus on global climate change, biodiversity, pollution, and water and energy resources presented in context of creating sustainable human society that is environmentally sound, economically viable, and socially just and equitable. Letter grading.
Upper Division Courses

M109. Human Impact on Biophysical Environment: What Science Has Learned. (4) (Same as Geography M109.) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of history, mechanisms, and consequences of interactions between humans and environment. Exploration in depth of the major environmental problems described in M105, including deforestation, desertification, and greenhouse gas increase and ozone depletion) and four major subjects (soil, biodiversity, water, and landforms). P/NP or letter grading.

M113. Los Angeles Watershed. (4) Lecture, three hours; discussion, one hour. Overview of how varying scales of influence from atmosphere/climate, basin hydrology, major urban development, wetland growth, and wetlands loss, coastal water circulation, and coastal biogeochemistry affect water resources in Los Angeles. Letter grading.

M114. Soil and Water Conservation. (4) (Same as Geography M110.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Systematic study of processes of and hazards posed by erosion, sedimentation, and related techniques needed to conserve soil and maintain environmental quality. Scope includes agriculture, forest engineering, mining, and other rural uses of land. P/NP or letter grading.

121. Conservation of Biodiversity. (4) Lecture, three hours; discussion, one hour. Open to students with credit for Ecology and Evolutionary Biology 116. Examination of interrelation of natural biotic and human systems. Description of distribution of biodiversity and the issues and challenges that maintain it. Course analysis of various levels of threats and multidimensional challenges required for mitigating threats. Letter grading.

122. International Integrated Coastal Management. (4) Lecture, three hours. Course is one of most complex and interesting environments because of interactions among several ecosystems. Coast is often densely populated, and population growth, therefore socioeconomic conflicts are common. Sewage and industrial pollution, overfishing, and poorly planned development often threaten health of environment. Integrated coastal management (ICM) offers framework for resolving conflicts in manner that allows sustainable development. Focus on how ICM is being used in U.S. and around world to solve pressing ecological and socioeconomic problems. Letter grading.

123. Coastal Ecology in Southern Thailand. (5) Lecture, three hours; fieldwork, five hours. Interrela-
tion between coastal and marine organisms and environment, including physical, chemical, biologi-
cal, and geological environment; population ecology of marine organisms; application of ecological the-
ories to marine resource management; human im-
pacts on marine environments; global environmental change; marine and coastal zone management and conservation. Emphasis on tropical coastal habitats and ecology of Thailand and Southeast Asia. Offered in summer only. Letter grading.

M127. Soils and Environment. (4) (Same as Ecology and Evolutionary Biology M127 and Geography M127.) Lecture, three hours; discussion, one hour; field trips, two hours. Soils and environmental impli-
cations: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. P/NP or letter grading.

M130. Environmental Change. (4) (Same as Geog-
raphy M131.) Lecture, three hours; reading period, one hour. Examination of natural factors producing environmental changes over past two million years. How present landscape reflects past conditions. Effects of environmental change on people. Consideration of stability and change, and degree to which environmental modification. Focus on impact of natural and anthropogenic changes on forests. P/NP or letter grading.

M131SL. Gender and Sustainability: Local-Global Connections. (5) (Formerly numbered M131SL) Lecture, three hours; service learning, two hours. Introdu-
tion to gender and development (GAD) theories, anal-
ytical approaches, and applied case studies in context of local-global sustainability and environmental issues, with focus on knowledge, roles, relationships, needs, practices, and strategies of women vis-a-vis men. In-
vestigation of gender and sustainability dimensions of food system, including agribusiness, community-sup-
pported agriculture, farmers’ markets and cooperatives, fair trade and certification, genetically engineered foods, food supply, food safety, and nutrition, and related student-advocated issues. Integration of variety of student-centered learning modes. Volunteering with community/community service organization required. Graduate P/NP or letter grading.

M132. Environmentalism: Past, Present, and Fu-
ture. (4) (Same as Geography M115 and Urban Plan-
ning M165,) Lecture, three hours; discussion, one hour. Exploration of history and origin of major environ-
mental challenges, movement that shaped and spawned, and new and changing nature of modern environ-
ment. Introduction to early ideas of environment, humanistic, and anthropocentric environmental thought, and how this was later transformed by 19th-century ideas and rise of American conservation movements. Review of politics of American environ-
ment and thought and contemporary environment. Address questions as they relate to broader set of questions about nature of development, sustainability, and equity in environmental debate. Exploration of issues in broad context, including global climate change, rise of pan-
 zdemics, deforestation, and environmental justice im-
pacts of war. Letter grading.

M133. Environmental Sociology. (4) (Same as Soci-
ology M115.) Lecture, three hours; discussion, one hour. Relationship between society and environment. Analysis in detail of interrelations between social fac-
tors (such as class, race, gender, and religion) and envi-
rionmental factors (such as pollution, waste disposal, sustainability, and global warming). P/NP or letter grading.

M134. Environmental Economics. (4) (Same as Econ-
omics M134.) Lecture, three hours. Requisites: Economics 41 or Statistics 12 or 13, and Economics 101 may be waived with consent of instructor). Intro-
duction to major ideas in natural resources and envi-
rionmental economics, with emphasis on design-
ing incentives to protect environment. Highlights important role of using empirical data to test hypotheses about pollution’s causes and consequences. P/NP or letter grading.

M135. California Sustainable Development: Eco-
nomic Perspective. (4) (Same as Public Policy M149 and Urban Planning M163.) Lecture, three hours. Ex-
amination of specific environmental challenges that Cal-
ifornia faces from an economic perspective, using with special emphasis on incentives of polluters to re-
duce their pollution and incentives of local, federal, and state governments to address these issues. Focus on measurement and empirical hypothesis testing. P/NP or letter grading.

M137. Historical Geography of American Environ-
ment. (4) (Same as Geography M137,) Lecture, three hours. Requisites: two years of high school foreign language and four years of history, or consent of instructor. Exploration of systematic changes in natural environment in U.S. during histor-
ical time, with emphasis on interplay between and among natural factors of climate, soils, vegetation, and land use, human factors of settlement, economic activity, technology, and cultural traits. P/NP or letter grading.

138. Effective Methods of Social Change. (4) Le-
ture, three hours; discussion, two hours. Introduction to methods at the intersection of multiple perspectives, including social entrepreneurs, innovators, and visionaries. Review of traditional methods of activism and new the-
ories of nonviolent social change. Case studies of suc-
sessful organizing in the face of social, economic, cur-
ing diseases, overcoming poverty, and addressing oth-
er problems of social injustice as well as reviewing actual strategies and methods for social change in 21st century. Challenges that social and community activists face today, including strategic planning, team management, networking, negotiation, and fund-raising. P/NP or letter grading.

M153. Introduction to Sustainable Architecture and Community Planning. (4) (Same as Architecture and Urban Design CM153,) Lecture, three hours. Re-
lationship of built environment to natural environment throughout time and space, with emphasis on sustainable design of buildings and planning of communi-
ties. Emphasis on energy efficiency, renewable energy, and appropriate use of resources, including water, materials, and land.

M155. Energy in Modern Economy, (4) (Same as Physics M155.) Lecture, three hours. Requisites: Mathematics 3A and 3B (or 3A and 3B), Physics 1A and 1B (or 6A and 6B), Statistics 12 or 13. Examina-
tion of physics of energy, energy demands, energy de-
velopment, and role that energy plays in our economy, par-

157. Energy, Environment, and Development. (4) (Same as Political Science M157.) Lecture, three hours. Requisites: Mathematics 3A and 3B (or 3A and 3B), Physics 1A and 1B (or 6A and 6B). Introduction to basic energy concepts and exami-
nation of role of various energy sources, energy con-
version technologies, and energy policies in modern life. Analysis of implications of current patterns of ener-
gy production and consumption for future economic and environmental well-being. Integration of concepts and methods from physical and life sciences, engi-
neering, environmental science, economics, and public policy. Basic quantitative skills provided to analyze and critique technical, economic, and policy choices to ad-
dress challenge of balancing economic growth and en-
vironmental sustainability. P/NP or letter grading.

160. Topics in Environmental Economics and Pol-
icy. (4) Seminar, three hours. Requisite: Statistics 12 or 13, or consent. Examination of intersection of environmental econom-
ics and policy, with focus on testing policy-relevant environmental hypotheses using economics research approach. Invited scholars present research aimed at understanding and addressing questions as they relate to broader set of questions about climate change, pollution, and transportation. P/NP or letter grading.

M161. Global Environment and World Politics. (4) (Same as Political Science M161.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: Political Science 20. Politics and policy of major global environmental issues such as climate change, integrating law, policy, and political science perspectives. P/NP or letter grading.

M162. Land Use and Development. (4) (Same as Urban Planning M162.) Lecture, four hours. Examina-
tion of institutional and historical evolution of land use in U.S. and California, and how land-use policies have evolved in different parts of U.S. and some recent trends in urbanization. Relationship of state-level land-
use policies and politics and ways in which localities plan, environmental, social, and equity aspects of dif-
ferent patterns of urbanization and likely trends into fu-
ture. Letter grading.

163. Business and Natural Environment. (4) (Formerly numbered 188A,) Lecture, three or four hours; discussion, one hour (when scheduled). Analysis of various levels of threats and multidimen-
sional challenges required for mitigating threats. Letter grading.

14. Ocean Environment. (5) Lecture, three hours. In-
roduction to scientific studies of oceans, with emph-
isis on ecosystems and environmental issues. P/NP or letter grading.
166. Leadership in Water Management. (4) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Examination of water quality and water supply issues, including interactions between scientific, technological, management, and policy issues. Invited experts, scholars, and practitioners discuss relevant issues such as pollution, climate change, and water infrastructure. Emphasis on solutions involving integrated water supply and wastewater systems. Leadership development through writing instruction and negotiations and media training. P/NP or letter grading.

170. Environmental Science Colloquium. (1) Seminar, 90 minutes; one field trip. Limited to undergraduates. Study of current topics in environmental science, including participation in weekly colloquium series and field trips. May be repeated for credit. P/NP grading.

180A. Practicum in Environmental Science. (4) Lecture, and Laboratory; Discussion M139B. Laboratory, three hours. Enforced requisite: Statistics 12 or 13. Limited to Environmental Science majors who have completed 40 or more units of preparation for major courses, including statistics, and 15 or more units of upper division courses toward major or minor requirements. Examination of case studies and presentation of tools and methodologies in environmental science, building on what students have been exposed to in other courses. Letter grading.

180B-180C. Practicum in Environmental Science. (5-5) Laboratory, four hours; field trips. Enforced requisite: course 180A. Course 180B is enforced requisite to 180C. Limited to Environmental Science majors. Investigation of various aspects of one environmental case study presenting actual multidisciplinary issue. Particular emphasis on developing skills towards making contributions as professionals in this field. Work may involve site investigations, original data collection and analysis, mapping and geographic information systems, and environmental policy and law issues. Course may be defined and conducted with collaboration of local agency or nonprofit institution. Letter grading.

184. Basics of Satellite Oceanography. (4) Lecture, two hours; discussion, one hour; computer laboratory, three hours. Remotely sensed data collected since late 1970s provide oceanographers with large volume of information on state of surface of world ocean, including sea surface temperature, chlorophyll, sea surface height anomalies, and wave color properties measured by optical sensors. Multidiscipline information enables comprehensive monitoring of both physical and biological properties of ecosystems in different ocean regions. P/NP or letter grading.

185A. Education for Sustainable Living Program Spear Series. (1) (Formerly numbered 185.) Lecture, two hours. Analysis of principles of sustainability through series of lectures by world-renowned faculty members, authors, environmentalists, and progressive thinkers, with required student response papers. May be repeated for credit. P/NP grading.

185B. Education for Sustainable Living Program Action Research. (2) Lecture, two hours; fieldwork, four hours. Investigation of issues of campus sustainability, including energy efficiency, transportation, waste stream management, sustainable food practices, and more by student research teams to generate coalition of student researchers that, together with faculty members and UCLA staff, strive to make UCLA more sustainable community. May be repeated for credit. Letter grading.

185C. Education for Sustainable Living Program Action Research Leader. (3) Seminar, two hours; fieldwork, six hours. Students lead research teams to investigate issues of campus sustainability, including energy efficiency, transportation, and waste stream management, sustainable food practices, and more to generate coalition of student researchers that, together with faculty members and UCLA staff, strive to make UCLA more sustainable community. May be repeated for credit. Letter grading.

186. Comparative Sustainability Practices in Local/Global Settings. (4) Fieldwork, four hours. Guided fieldwork and comparative analysis used to assess local sustainability practices and policies in diverse regional or international settings. Emphasis on comparing role of local and regional culture, geography, economic climate, and governmental policies on sustainability awareness and practices. Use of observations, interviews, and unobtrusive measures to document and analyze role and influence of local/global context on sustainability behavior of individuals, small businesses, and other institutions in everyday life. Letter grading.

188A-188B. Special Courses in Environment. (2-4) (Formerly numbered 188.) Lecture, three hours (course 188A) and two hours (course 188B). Departmentally sponsored experimental or temporary courses, e.g., such as those taught by visiting faculty members. May be repeated for credit with topic change. P/NP or letter grading.

190. World Civilians. (1) Seminar, one hour. Limited to undergraduate students. Discussion of readings selected from current literature of field. May be repeated for credit. P/NP grading.

190. World Civilians. (1) Seminar, one hour. Limited to undergraduate students. Discussion of readings selected from current literature of field. May be repeated for credit. P/NP grading.

193. Journal Club Seminars: Environment. (1) Seminar, one hour. Limited to undergraduate students. Discussion of readings selected from current literature of field. May be repeated for credit. P/NP grading.

199. Directed Research in Environment. (2 to 4) Tutorial, two hours. Preparation: submission of written proposal outlining study or research to be undertaken. Limited to junior/senior Environmental Science majors. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. Must be taken for at least two terms and for total of at least 8 units. May be repeated for credit. Individual contract required. Letter grading.

Professors Emeriti

R. James Barnard, Ph.D.
Camille Brown, Ed.D.
Bryant J. Cratty, Ed.D.
Glen H. Egstrom, Ph.D.
Gerald W. Gardner, Ph.D.
Margaret E. Haberle, Ph.D.
Valerie V. Hunt, Ed.D.
Jack F. Keogh, Ed.D.
Marjorie E. Latchaw, Ph.D.
Wayne W. Massey, Ph.D.
Ben W. Miller, Ph.D.
Allan J. Tobin, Ph.D. (Eleanor L. Leslie Professor Emeritus of Neuroscience)

Associate Professors

Rachelle H. Crosbie, Ph.D.
Mark A. Frye, Ph.D.
Stephanie A. White, Ph.D.

Assistant Professors

David W. Walker, Ph.D.
Xinshu Grace Xiao, Ph.D.

Adjunct Professors

Larry Faller, Ph.D.
William C. Whiting, Ph.D.

Adjunct Associate Professor

Nasser A. Farahbakhsh, Ph.D.

Scope and Objectives

The cornerstone of the physiological science curriculum is vertebrate physiology, with emphases on integrative functions. The research and educational programs focus on integrative physiology at several levels of organization, from molecules to living organisms, microscopic structures to macroscopic organization, and cellular properties to organ functions. Students receive comprehensive instruction in all areas of physiological science, while elective courses reflect faculty research expertise, including developmental neurobiology, gene regulation/neural development, cellular neurobiology, molecular neurobiology, neuromuscular physiology, neuroendocrine physiology, cardiovascular physiology, diet and degenerative disease, auditory and visual behavior, biomechanics of rehabilitative medicine, muscle cell biology, inflammatory cell biology, vascular biology, cardiovascular electrophysiology, neuromotor control, and social control of neuronal plasticity.

Applicants interested in pursuing graduate study may apply directly to the interdepartmental Molecular, Cellular, and Integrative Physiology Ph.D. Program (http://www.mcip.ucla.edu) or the interdepartmental Neuroscience Ph.D. Program (http://www.neuroscience.ucla.edu).
Undergraduate Study

Physiological Science B.S.

Preparation for the Major

Life Sciences Core Curriculum

**Required:** Life Sciences 1, 2, 3, 23L; Chemistry and Biochemistry 1A, 14B, 14CL, 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4A, 4AL, or 6A, 6B, and 6C, or 6AH, 6BH, and 6CH.

To enter the Physiological Science major, students must complete Chemistry and Biochemistry 1A, 1B, or 1C, or 20A, 20B, or 30A, Life Sciences 1, 2, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, and Physics 1A or 6A, with a minimum grade of C in each course and a grade-point average of 2.5 or better in all before Fall Quarter of their third year. Repetition of more than one of these nine preparation courses results in denial of admission to the major. After successful completion of the courses, students must contact the Undergraduate Advising Office to declare the major.

For all preparation courses, students must complete each course with a grade of C or better. Repetition of more than one preparation course results in dismissal from the major.

Transfer Students

Transfer applicants to the Physiological Science major with 90 or more quarter units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus is strongly recommended but not required for admission.

Transfer credit for UCLA Extension coursework and for any departmental courses is subject to prior approval by the department; consult the undergraduate counselor before enrolling in any courses for the major.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

The Major

**Required:** Physiological Science 107, 111A, 111B, 111L, Chemistry and Biochemistry 153A, 153L.

A total of five upper division physiological science electives is required. Eight units of course 199 or 4 units each (8 units total) of courses 198A and 198B, for students in the departmental honors program, may be applied toward the elective requirement. One 200-level graduate course may be applied toward the elective requirement with departmental approval. Courses 189HC, 191H, 192, 193, 195, 196, and graduate courses at the 300, 400, or 500 level may not be applied toward the elective requirement.

Each required and elective course must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major. A grade of C or better is required in Physiological Science 107 and 111A to enroll in course 111B. If students fail to meet these requirements, they may be dismissed from the major.

Honors Program

The honors program provides exceptional students with the opportunity for individual research culminating in an honors thesis. Requirements for admission include a 3.0 overall grade-point average and a 3.2 GPA in the life sciences core curriculum. After completion of all requirements and with the recommendation of the faculty adviser, the undergraduate affairs committee confers departmental honors at graduation.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, [http://www.gdnet.ucla.edu/graddiv/gradpro.htm](http://www.gdnet.ucla.edu/graddiv/gradpro.htm). In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree

The Department of Integrative Biology and Physiology offers the Master of Science (M.S.) degree in Physiological Science.

Physiological Science

**Lower Division Courses**

3. Introduction to Human Physiology. (5) Lecture; three hours; laboratory, two hours. Not open to Physiological Science majors. Courses 3 and 5 may be taken independently, concurrently, or in either sequence. Understanding of human body, its organization from molecular to cellular to tissues and organs, and how component parts function in integrated manner to permit life as we know it. P/NP or letter grading.

5. Issues in Human Physiology: Diet and Exercise. (5) Lecture; three hours; discussion, 30 minutes; laboratory, 90 minutes. Not open to Physiological Science majors. Basic introduction to principles of human biology, with special emphasis on roles that exercise and nutrition play in health, and prevention and management of such illnesses as hypertension, diabetes, and heart disease. P/NP or letter grading.

13. Introduction to Human Anatomy. (5) Lecture; four hours; laboratory, five hours. Not open to Physiological Science majors. Structural survey of human body, including skeletal, muscular, nervous, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examination of human cadaver specimens. Letter grading.

90. Introduction to Physiological Science. (2) Lecture; one hour; discussion, one hour. Limited to freshmen/sophomores. Introduction to current topics in physiological science by a team of departmental faculty members. P/NP grading.

Upper Division Courses

100. Experimental Statistics. (4) Lecture, four hours. Introduction to statistics with emphasis on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. P/NP or letter grading.

CM102. Basic Human Biology for Biomedical Engineers I (4) (Same as Biomedical Engineering CM102.) Lecture, three hours; laboratory, two hours. Preparation: human molecular biology, biochemistry, and cell biology. Not open for credit to Physiological Science majors. Broad overview of basic biological activities and organization of human body in system (organ/tissue) to system basis, with particular emphasis on molecular basis. Modeling/simulation of functional aspect of biological system included. Actual demonstration of biomedical instruments, as well as visits to biomedical facilities. Concurrently scheduled with course CM204. Letter grading.

111A-111B. Foundations in Physiological Science. (6-6) Lecture, four hours; discussion, two hours. Letter grading. 111A. Requisites: course 107, Chemistry 14C or 30B, Life Sciences 1, 2, 3, 4, 23L, Physics 15 or 6B or 2CH. Students must receive grade of C or better to proceed to next course in series. Introduction to principles of muscular and neural physiology, including factors controlling membrane excitability, neuronal circuits, sensorimotor regulation, special senses, cortical functions, and neuronal plasticity. 111B. Requisites: course 111A, Chemistry 14D or 30B. Students must receive grade of C or better to proceed to next course in series. Introduction to principles of systems physiology, including endocrinology, transport physiology, and cardiovascular and pulmonary physiology.

111L. Physiological Science Laboratory. (3) Laboratory, four hours. Requisites: courses 111A and 111B, with grades of C- or better. Required of Physiological Science majors. Designed to illustrate physiological principles studied in courses 111A, 111B. Letter grading.
124. Molecular Biology of Aging. (4) Lecture, three hours. Enforced requisites: Chemistry 153A, Life Sciences 2, 3, 4. Discoveries of new science of aging biology, with examination of aging as plastic trait modulated by genes and physiological processes. Discussion of how these findings integrate with both nutritional and lifestyle factors to impact and complex and profound relationship between underlying aging process and diseases of aging. Topics include dietary restriction, mitochondrial, insulin/IGF signaling, and link between tumor suppression and organismal aging. Letter grading.

125. Molecular Systems Biology. (4) Lecture, three hours; discussion, one hour. Enforced requisites: Life Sciences 2, 3, 4, 23L. Quantitative description of molecular systems that underlie myriad phenotypes in living cells. Topics include various -omics fields and high-throughput technologies, network biology, and synthetic biology. Introductory lectures on biomolecular networks, emerging bioinformatic approaches, and systems modeling integrated with discussions of their applications in disease-related research. Review of recent literature to gain overall perspectives about new science of systems biology. Letter grading.

126. Biological Clocks. (4) Lecture, three hours; discussion, one hour. Requisites: courses 111A and 111B, or M180A and M180B. Most organisms, including humans, exhibit circadian rhythms in physiology and behavior. In many cases these rhythms are generated from within organisms and are called circadian rhythms. Biological basis of these daily rhythms or circadian oscillation of molecular and cellular, and system-level organization of these timing systems. Temporal role of these variations in maintaining homeostasis and rhythms of body and impact on nervous system. Concurrently scheduled with course C226. Letter grading.

133. Exercise Physiology. (5) Lecture, three hours; laboratory, two hours. Requisite: course 111B. Physiological reserves and adaptations to acute and chronic exercise. Letter grading.

144. Neural Control of Physiological Systems. (5) Lecture, four hours. Requisite: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C244.

145. Neural Mechanisms Controlling Movement. (5) (Same as Neuroscience M145.) Lecture, four hours. Requisite: course 111A or M180A or Neuroscience M101A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Letter grading.

146. Principles of Nervous System Development. (4) Lecture, four hours. Requisites: courses 107 (or Neuroscience 102) and 111A (or M180A or Neuroscience M101A). Examination of construction of vertebrate nervous system, and beginning development of specific neural circuits in auditory pathway, ganglia, cerebellum, hippocampus, and neocortex. Letter grading.

147. Neurobiology of Learning and Memory. (5) Lecture, four hours; research demonstration, one hour. Requisite: course 111A or M180A. Changes in central nervous system that accompany learning, with emphasis on cellular mechanisms. Letter grading.

148. Neuronal Signaling in Brain. (4) (Same as Neuroscience M148.) Lecture, three hours; discussion, one hour. Requisites: courses 111A or M180A or Neuroscience M101A (or Neuroscience M101B or Chemistry 153A). Consideration of brain function, with focus on cellular physiology and functional roles of neurotransmitters, neuropeptides, and transmitter system, and regulation of intercellular interactions. Letter grading.

149. Mechanisms of Major Human Diseases. (4) Lecture, three hours. Requisites: courses 111A, 111B (111B may be taken concurrently). Integration of principles gained through basic science curriculum with presently understood mechanisms of selected human diseases. Progressive development of these diseases presented in terms of changes in cell biology and function, and changes in regulation of intercellular interactions. Letter grading.

152. Dissection Anatomy. (4) Lecture, two hours; laboratory, six hours. Requisite: course 111B. Departmental application required. Study and dissection of upper and lower extremities of human cadavers; dissection of thorax and abdomen limited to musculature and neurovascular supply.

154. Cellular Communication and Regulation of Physiological Processes. (4) Lecture, three hours. Requisite: limited to seniors/seniors. Signal transduction concepts, with focus on role of receptors, G proteins, and intracellular messengers such as cyclic AMP and calcium. Requisite: course 111A or M180A or Neuroscience M101A. Examination of biochemical and physiological processes, including stimulus-secretion coupling, vascular smooth muscle contraction, and role of growth factors in cell proliferation. Contemporary scientific research articles used as basis for material presented. Students required to present journal article for discussion. Letter grading.

155. Development and Structure of Musculoskeletal System. (4) Requisite: course 111B. Development, histogenesis, and organization of musculoskeletal soft tissues. Integration of knowledge of muscle and connective tissue structure and function on each of these levels to understanding organization and physiological behavior of the intact system.

156. Comparative Animal Physiology. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 2, 3, 4, 23L. Physiological functions and regulation of cardiovascular system, with emphasis on molecular and cellular regulation of cardiovascular functions and whole organism levels of various animals to range of environmental conditions. Major topics include neural and muscular stimulation, and function, intercellular communications, endocrine physiology, and thermoregulation. Examination of wide variety of vertebrates and invertebrates to understand how animals solve physiological challenges presented by physical environment. Letter grading.

158. Ideas and Experiments in History of Physiology. (4) (Same as Neurobiology M168.) Lecture, three hours. Interaction of concepts and experimental techniques in physiology from the early 19th to latter 20th centuries, including accumulation of hormones, nutrition and vitamins, brain, spinal cord, and peripheral nervous system, as well as development of physiology as scientific discipline. Discussion of week-end readings and presentations by students. Letter grading.

173. Anatomy and Physiology of Sense Organs. (4) Lecture, three hours; discussion, one hour. Requisites: courses 111A, or M180A and M180B, or Molecular Cell and Developmental Biology M175A-M175B-M175C. Structure and function of sense organs. Adoption of quantitative and comparative approach to provide insight into evolution of sense organs in both invertebrates and vertebrates. Letter grading.

177. Neuroethology. (5) Lecture, four hours; discussion, two hours. Requisite: course 111A or M180A. Physical properties of animal signals and physiological mechanisms underlying their use in communication. Topics include classical neurological models: acoustic and vibration communication in vertebrates, sound localization in owls, electrosensory and electrocortical communication in electric fish, and neurobiology of birdsong. Letter grading.

M180A-M180B-M180C. Neuroscience: From Molecules to Mind. (5-5-5) (Same as Molecular, Cell, and Developmental Biology M175A-M175B-M175C. Neuroscience: From Molecules to Mind.) Lecture, four hours; discussion, 90 minutes. P/NP or letter grading.

M180A. Cellular and Systems Neurosciences. (5) Lecture, four hours; discussion, 90 minutes. Requisites: Chemistry 14C or 30A (14C may be taken concurrently), Life Sciences 2, Physics 1B or 18B or 68 or 6BH. Not open for credit to students with credit for Physiological Sciences 111A. Enforced requisites: majors only, a grade of C- or better is required to proceed to Physiological Sciences 111B. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

M180B. Molecular and Developmental Neuroscience. (4) Lecture, four hours; discussion, one hour. Requisites: courses 111A or M180A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A-M101B-M101C, and Psychology M171A-M171B-M171C.) Lecture, four hours; discussion, 90 minutes. P/NP or letter grading.

M180A. Cellular and Systems Neurosciences. (5) Lecture, four hours; discussion, 90 minutes. Requisites: Chemistry 14C or 30A (14C may be taken concurrently), Life Sciences 2, Physics 1B or 18B or 68 or 6BH. Not open for credit to students with credit for Physiological Sciences 111A. Enforced requisites: majors only, a grade of C- or better is required to proceed to Physiological Sciences 111B. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

M180B. Molecular and Developmental Neuroscience. (4) Lecture, four hours; discussion, one hour. Requisites: courses 111A or M180A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Psychology M117A or Psychology 115, Life Sciences 3, 4) may be taken concurrently. Introduction to molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton,
and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. Pr/ NP or letter grading.

180C. Behavioral and Cognitive Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisite: course 111A or M180A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Psychology M115). Neurological mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

M181. Biological Bases of Psychiatric Disorders. (4) (Same as Molecular and Developmental Biology M181, Neuroscience M130, Psychiatry M181, and Psychology M171J.) Lecture, three hours. Requisite: course 111A or M180A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Psychology M171A) or Psychology M115. Underlying brain systems involved in psychiatric symptoms and neurological disorders, including schizophrenia, depression, bipolar disorder, obsessive-compulsive disorder. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments. P/NP or letter grading.

191H. Honors Seminars: Current Topics in Physiology. (4 Seminar.) Four hours. Requisites or corequisites: courses 198A, 198B. Limited to neuroscience and physiological science honors program students. Designed for juniors/seniors and required of departmental honors students. Presentation of primary paper from physiology literature. Reading and critical evaluation of current research literature. Presentation of student laboratory research hypothesis, approach, and results in form of oral and poster presentations. Letter grading.

192. Practicum in Systems Anatomy for Undergraduate Assistants. (3) Seminar, two hours; additional hours in laboratory setting, to be arranged. Requisite: course 107. Limited to juniors/seniors. Training and supervised practicum in systems anatomy for undergraduate assistants. Consult Undergraduate Office for further information. May not be applied toward elective requirements and may not be repeated for credit. Departmental application required. P/NP or letter grading.

193. Journal Club Seminars: Physiological Science. (2) Discussion, one hour. Requisites: courses 111A and 111B. Corequisite: course 193. Limited to junior/senior physiological science honors program students. Additional course to provide further research opportunities. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

Graduate Courses

M200. Advanced Experimental Statistics. (4) (Same as Biostatistics M220.) Lecture, four hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. SU or letter grading.

M202. Cellular Neurophysiology. (4) (Same as Neurobiology M200F and Neuroscience M202.) Lecture, three hours; discussion, two hours. Requisites: course 111A (or M180A or Physics 6B). 166. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Letter grading.

CM203. Basic Human Biology for Biomedical Engineers I. (4) (Same as Biomedical Engineering CM203.) Lecture, three hours; laboratory, two hours. Preparation: human molecular biology, biochemistry, and cell biology. Not open for credit to Physiological Science majors. Broad overview of basic biological ac- tivities and organization of human body in system (organ/tissue) to system basis, with particular emphasis on molecular basis. Modeling/simulation of functional aspect of biological system included. Actual demonstration of biomedical instrumentation and techniques to biomedical facilities. Concurrently scheduled with course CM102. Letter grading.

211. Exercise Cardiovascular Physiology. (4) Attention to cardiovascular adaptations to acute exercise as well as adaptations associated with regular exercise training. Letter grading.

M215. Molecular and Cellular Foundations of Physiology. (5) (Same as Molecular, Cellular, and Integrative Physiology M215.) Lecture, three hours; discussion, two hours. Applications of fundamental molecular and cellular approaches to systems level questions. Basic foundation for study of major physiological systems, with emphasis on levels of organization from molecular to macroscopic. Letter grading.

C226. Biological Clocks. (4) Lecture, three hours; discussion, one hour. Requisites: courses 111A and 111B, or M180A and M180B. Most organisms, including humans, exhibit daily rhythms in physiology and behavior. In many cases these rhythms are generated from within organisms and are called circadian rhythms. Biological basis of these daily rhythms or cir- cadian oscillations. Exploration of molecular, cellular, and system-level organization of these timing systems. Temporal role of these variations in maintaining homeostatic mechanisms of body and impact on nervous system. Concurrently scheduled with course C126. Letter grading.

M227. Neuroendocrinology of Reproduction. (4) (Same as Neurobiology M227.) Lecture, three hours; discussion, one hour. Preparation: undergraduate level science and chemistry courses, molecular, cellular, and developmental aspects of neuroendocrine and repro- ductive organs, with emphasis on feedback regulato- ry mechanisms between hypothalamic-pituitary and gonadal functions and on functional integration of neuro- endocrine-reproductive axis at cellular and molecular lev- els. Letter grading.

235. Advanced Dynamical Systems Modeling of Physiological Processes. (5) Lecture, four hours; laboratory, two hours. Examination of art of making and evaluating dynamical models of physiological sys- tems and of dynamical principles inherent in physiological systems. Letter grading.

C237. Growth and Adaptation in Cardiovascular System. (4) Lecture, three hours; requisites: course 111B. Discussion of principles of operation of cardio- vascular system with emphasis on physiological function and on functional integration of the cardiovascular system. Letter grading.

241. Neural Plasticity and Repair. (4) Lecture, four hours. Preparation: basic neuroscience background. Progress in basic and clinical science of neuroplasticity provides new insight to understand mechanisms of cell repair and strategies to promote neural healing. Focus on physiological, molecular, and anatomical basis govern- ing synaptic processes in brain disorders and their clinical implications. Letter grading.
C244. Neural Control of Physiological Systems. (5) Lecture, four hours. Requisite: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C141.

245. Neural Mechanisms Controlling Movement. (5) Lecture, four hours. Requisite: course 111A or M180A or Neuroscience M101A. Examination of central nervous system organization required for production of movement control such as locomotion, masti- cation, and swallowing. Letter grading.

250A. Muscle Dynamics. (4) Lecture, four hours. Integrated study of electrical and dynamic parameters of muscle in movement, including topics in length-tension, force-velocity interrelationships; critical analysis of electromyographic and digital computer techniques. Letter grading.

C250B. Musculoskeletal Mechanics. (5) Lecture, three hours. Requisite: course 107, Physics 6A. Introduction to biomechanical analysis of human musculoskeletal system. Examination of cinematographic, force platform, and digital computer techniques to characterize and analyze the kinematic and kinetic components of movement. Topics include biomechanics, biodynamics, and modeling. Concurrently scheduled with course C250A. Letter grading.

M255. Seminar: Neural and Behavioral Endocrinology. (2) (Same as Neurobiology M255 and Psychology M294.) Seminar, one hour; discussion, one hour. Topics include the interrelationships between the endocrine system and other systems of the body, especially the brain. Requisite: consent of instructor. Letter grading.

255. Seminar: Neural and Behavioral Endocrinology. (2) (Same as Neurobiology M255 and Psychology M294.) Seminar, one hour; discussion, one hour. Topics include the interrelationships between the endocrine system and other systems of the body, especially the brain. Requisite: consent of instructor. Letter grading.

263. Neural Mechanisms Controlling Rhythmic Movements. (4) (Formerly numbered M263.) Lecture, four hours. Requisite: course M145. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn. S/U or letter grading.

270A-270B-270C. Modern Concepts in Physiology. (4-4-4) Lecture, two hours; discussion, two hours. Study and evaluation of primary research literature. Study of foundations of modern techniques in physiologic research, analysis of research design. Letter grading. 270A. Requisite or corequisite: course 111A. Foundation for experimental study of organization and function of nervous system and cellular basis of neural action. 270B. Requisite or corequisite: course 111B. Foundation for experimental study of musculoskeletal, cardiovascular, and respiratory systems. 270C. Requisite or corequisite: course 111C. Foundation for experimental study of general issues and mechanisms in neuroendocrine function.

M290. Seminar: Comparative Physiology. (2) (Same as Ecology and Evolutionary Biology M290.) Seminar, two and one-half hours. Discussion of specific topics in comparative physiology of animals. Topics vary from year to year. Prerequisites: one year of college general biology, one year of college general science, and one year of college psychology, neuroethology, or behavioral physiology. S/U or letter grading.

291A-291B-291C. Seminars: Cardiovascular Function and Adaptation. (2 to 4 each) Seminar, two to four hours. Selected topics on cardiovascular function and adaptation. Students required to present two-hour seminar. Letter grading.

292. Evolution and Development of Auditory Systems. (2 or 4) Seminar, two hours. Discussion of specific topics related to evolution, embryology, morphogenesis, cytodifferentiation, and onset of function of auditory system, with special attention to centrifugal pathways. Emphasis on primary literature sources as well as current methodological approaches. Two-hour seminar presentation required for 2 units; seminar paper and two-hour seminar presentation required for 4 units. S/U or letter grading.

293A-293B-293C. Seminars: Musculoskeletal Function and Adaptation. (2 to 4 each) Seminar, one hour. Requisites: courses 138, 260. Selected topics on musculoskeletal mechanisms of movement, mechanical aspects of exercise, and mechanics of connective tissue. Students required to present two-hour seminar. S/U or letter grading.

294. Recent Advances in Neurophysiology. (1) Seminar, one hour. Requisite: Life Sciences 2 or undergraduate degree in science. Critical examination and discussion of recent data and publications that focus on synaptic function. Student presentations, readings, and participation in discussions required. S/U grading.

295A-295B-295C. Seminars: Cellular Neurobiology. (2 to 4 each) Seminar, two to four hours. Topics include synthesis, cellular integration, synaptic processing, central nervous system function, and learning. Students required to present two-hour seminar. S/U or letter grading.

297. Muscle Cell Biology. (2 to 4) Seminar, two hours. Selected topics in muscle cell biology. Students required to present two-hour seminar. May be repeated for credit. S/U grading.

298. Seminar: Nervous System Development. (1 to 2) Seminar, two hours. Selected topics in developmental neurobiology, such as neuronal migration, axonal guidance, gene expression, and synaptogenesis. Weekly primary literature student presentations. One-hour seminar presentation on assigned weekly reading required of all students; students enrolled for 2 units must also complete written analysis of additional primary literature papers. May be repeated for credit. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of current and former faculty members. S/U grading.

459. In-Service Practicum for Teaching Assistants in Physiological Science. (2) Seminar, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students. (2 to 8) Tutorial, to be arranged. To enroll for letter grade, petition signed by faculty sponsor, graduate adviser, and graduate affairs committee chair must be submitted prior to end of second week of class. Eight units may be applied toward degree requirements for M.S. or Ph.D. degree, provided that students enroll in two different 4-unit S/U courses in different laboratories under supervision of different mentors. Term paper required for letter grading. S/U or letter grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 16) Tutorial, to be arranged with faculty member serving as student’s comprehensive examination chair or Ph.D. committee chair. May not be applied toward M.S. or Ph.D. course requirements. May be repeated as necessary. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 16) Tutorial, to be arranged with faculty member serving as student’s thesis committee chair. May not be applied toward M.S. course requirements. May be repeated as necessary. S/U grading.

599. Research for and/or Preparation of Ph.D. Dissertation. (2 to 16) Tutorial, to be arranged. May not be applied toward Ph.D. course requirements. May be repeated as necessary. S/U grading.

Scope and Objectives

The International Development Studies major provides an opportunity for interdisciplinary study of the critical issues of the developing world, such as poverty, human rights, global health, civil war, economic growth, and global inequality. The curriculum is intended to familiarize students with some of the more important political, economic, social, and cultural realities of the developing regions of the world, such as Asia, Eastern Europe, Africa, the Middle East, and Latin America. The broad intellectual goal
of the program is to help students understand why there are such vast socioeconomic disparities between the wealthier and poorer regions of the world and what the broader implications of these disparities are. An understanding of these issues is indispensable for both practical and scholarly purposes. While encouraging the acquisition of theoretical and conceptual knowledge, the program is equally concerned with its practical application to global realities. The program, therefore, encourages field experience involving travel, study, and/or work in regions in the developing world.

**Undergraduate Study**

**International Development Studies B.A.**

**Admission**

Admission to the International Development Studies major is by application only. To be eligible to apply, students must have first completed all nonlanguage preparation courses and the foreign language courses through at least level 3 (elementary level). Any remaining language courses may be completed after students have been accepted to the major. Each preparation for the major course must be taken for a letter grade, and students must have a UC grade-point average of 2.0 or better in those courses. The application period is once per year, and students must apply no later than the end of Fall Quarter of their junior year. Meeting the above minimums does not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration.

**International Development Studies Premajor**

Incoming freshman and transfer students may be admitted to the International Development Studies premajors on acceptance to UCLA. Premajor students must apply for major standing at the end of Fall Quarter of their junior year; they are not automatically accepted into the major.

**Preparation for the Major**

**Required:** (1) Two courses from Economics 1, 2, Geography 4; (2) one statistics course from Economics 41, Political Science 6, 6R, Statistics 10, or 12; (3) three social sciences/area studies courses, each from a different category, selected from (a) Anthropology 9, (b) Geography 3, 5, 6, (c) Global Studies 1, (d) History 8A, 8B, 8C, 9A, 9D, 9E, 10B, 10BW, 11B, 22, Latin American Studies 97A, Southeast Asian Studies 1, (e) Political Science 20, 50, 50R, (f) Sociology 1, (g) Women’s Studies 10; and (4) demonstrated proficiency in one modern foreign language equivalent to level 6 at UCLA. Each course must be taken for a letter grade.

**Transfer Students**

Transfer applicants to the International Development Studies premajor with 90 or more units must complete the following introductory courses prior to admission to UCLA: two introductory macroeconomics, microeconomics, and/or economic geography courses; one statistics course; three courses, each from a separate category, selected from sociocultural anthropology, cultural or economic geography, cultural area studies, world history, comparative politics, and introductory sociology; and demonstrated proficiency equivalent to level 3 at UCLA in one modern foreign language. Transfer students must apply for the major by the end of Fall Quarter of their junior year.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

**The Major**

Each course must be taken for a letter grade. Students must earn a grade of C or better in International Development Studies 100A, M100B, and 150; no more than one of these three courses may be repeated. All three core courses must be taken prior to the senior seminar 191 course.

**Required:** (1) International Development Studies 100A, M100B, 150, 191; (2) one research methodology course from Anthropology 131, 139, M186, Asian American Studies 103, 104A, 105, M108, 142A, 142D, 187A, 191A, Chicano and Chicano Studies M119, 123, 129, Economics 103, Education C126, Geography 163, Honors Collegium M150, Human Complex Systems M130, Management M118A, Political Science 170A, Sociology 106A, 110, 113, Statistics 112, Urban Planning M122, Women’s Studies 110A; (3) three social and critical theory courses, each from a different department, from Anthropology 130, 150, 152, 153P, 161, 167, Economics 111, 112, Environment M132, M133, M161, Geography 110, M115, 121, M128, 132, 133, 140, 142, 148, 155, 157, Political Science 122A, M122B, 124A, 150, 167A, 167D, 168, Sociology 101, M115, 116, 182, 183, 184, 191D, Urban Planning 121, CM166, Women’s Studies 168; (4) two regional courses, either from the same or separate developing regions of the world (East Asia and East Central Asia, Eastern Europe and West Central Asia, Latin America and Caribbean Basin, Middle East and North Africa, South and Southeast Asia and Pacific Islands, Sub-Saharan Africa) and one disciplinary elective listed below:

**Eastern Europe and West Central Asia:** Anthropology 175R, Central and East European Studies 126, Czech 155, History 107C, 107E, 120A through 120D, Polish 152, Political Science 128B, 156A through 156D, Romanian 152, Russian 120, 121, 122, 125, 126, M127, 131, Serbian/Croatian 154, Slavic 125, Women’s Studies M127

**Honors Program**

Majors who have completed International Development Studies 100A, M100B, and 150 and who have a 3.5 grade-point average in all courses offered for the major are eligible to formally apply for the honors program. In addition to completing all courses required for the major, students must take courses 198A, 198B, and 198C, in which they research, write, and present an honors thesis. To receive honors at graduation, students must have at least a 3.5 GPA in courses applied toward the major (including 198A, 198B, 198C) and an overall GPA of 3.0. Highest honors are awarded to students who complete the major (including courses 198A, 198B, 198C) with a 3.75 GPA and who produce an exceptional thesis.

**Study Abroad**

International Development Studies majors are highly encouraged to study abroad in developing areas of the world. Students can do so through a variety of programs with various lengths (summer or during the academic year). More information about travel abroad programs is available through the UCLA International Education Office, B300 Murphy Hall, (310) 825-4995, ieo@international.ucla.edu. See http://www.ieo.ucla.edu.
International Development Studies

Upper Division Courses

100A. Introduction to Development Studies: Economic Development and Culture Change. (4) Lecture, three hours; discussion, one hour (when scheduled). Preparation: some beginning experience in social sciences at college level. Designed for juniors/seniors. Broad historical and theoretical introduction to liberal and Marxist traditions in development studies, with focus on state, market, culture, ideology, and politics of professional knowledge. Balance of general trends and positions with selected case studies in developing nations. Letter grading.

M100B. Introduction to Development Studies: Political Economy of Development. (4) (Same as Political Science M167C.) Lecture, three or four hours; discussion, one hour. Requisite: Economics 1 and 2, and one elementary statistics course. Economic analysis of developing countries. Issues underlying causes of underdevelopment and process of development. Topics include population growth, poverty, inequality, inflation, fiscal and monetary policy, and alternative development strategies. Letter grading.

188. Special Courses in International Development Studies. (4) Seminar, three hours. Program-sponsored experimental or temporary courses on selected contemporary topics in international development taught by visiting instructors or affiliated faculty members. May be repeated for credit with topic change. P/NP grading.

191. Variable Topics Research Seminars: International Development Studies. (4) Seminar, two hours; practicum, to be arranged. Limited to juniors/seniors. Supervised intensive directed research program in which students conduct interdisciplinary research under guidance of faculty mentor. Culminating paper required. May be applied toward major via petition. May not be repeated. Individual contract required. Letter grading.

199. Directed Research in International Development Studies. (4) Tutorial, to be arranged. Limited to junior/senior International Development Studies majors. Supervised intensive directed research program in which students conduct interdisciplinary research under guidance of faculty mentor. Culminating paper required. May be applied toward major via petition. May not be repeated. Individual contract required. Letter grading.

Scope and Objectives

The Islamic Studies Interdepartmental Program encompasses the broadest cultural concerns in the study of Muslim societies of the past and present. It provides opportunities for study of the major cultures, languages, literatures, legal theories, medical systems, artistic practices, and religious traditions of the populations of regions where Islam has had, or continues to have, the greatest impact. Within a broad interdisciplinary framework of the humanities, social sciences, and professional schools (e.g., law, public health, the arts), students are expected to acquire knowledge of several different aspects of Muslim societies and to develop skills in cultural analysis, out of which they construct individualized curricula that prepare them to carry out original research.

The Master of Arts and Ph.D. degrees in Islamic Studies are designed primarily for students pursuing academic careers. The degree programs also provide useful for students who plan to live or work in predominantly Muslim areas or those whose careers may be enhanced by a knowledge of Muslim people, languages, and institutions.

Graduate Study

The Graduate Council of the UCLA Academic Senate suspended admissions to the Islamic Studies M.A. and Ph.D. programs effective Fall Quarter 2009.

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Islamic Studies Program offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Islamic Studies. A concurrent degree program (Islamic Studies M.A./Public Health M.P.H.) is also offered.

Islamic Studies Graduate Course

200. Introduction to Islamic Studies. (4) Seminar, three hours. Introduction to various disciplines and methods employed in study of Islamic histories, cultures, and societies, with special emphasis on methodologies and current theories and how they may be used and combined by Islamic studies students. Content varies each year. Letter grading.

Scope and Objectives
Italian art and letters provide an invaluable key to understanding many facets of European civilization. Examined in its own right or studied comparatively, Italian culture offers unmatched rewards. The UCLA faculty views transmitting the Italian language as inseparable from transmission of the culture, so students consider in depth virtually all aspects of Italian civilization. After their linguistic initiation, ideally a year abroad, students may pursue advanced studies in the department exclusively and through a wide range of interdisciplinary programs.

Bachelor of Arts degrees are offered in Italian and in Italian and Special Fields. Graduate study leads to the Master of Arts degree in Italian (with specializations in literature and language) and to the Ph.D. (literature specialization).

Undergraduate Study

Italian B.A.

The program of studies leading to the Bachelor of Arts in Italian consists of two distinct phases: preparation in the language and study of the literature and culture. While literature courses constitute the bulk of the program, good knowledge of the language is requisite to most upper division literature courses credited toward the major in Italian. The uniqueness of Italian is stressed at all levels of study. Detailed information on programs and specific degree requirements is available from the department.

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 42C, 46, 50A, or 50B.

Transfer Students

Transfer applicants to the Italian major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Italian and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Eleven upper division Italian courses, including 100, 103A, 103B, one medieval to 18th century course from 113 through 118, one Enlightenment to contemporary course from 119 through 125, and six elective courses from 113 through 191. With consent of the undergraduate adviser, students may substitute up to one each of Italian 195 and 199A and an upper division elective course from outside the department.

 Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor.

Italian and Special Fields B.A.

Students with special interests or professional goals may select the Italian and Special Fields major, with coursework divided between Italian and a collateral field. Study programs fulfilling requirements for the major have been developed with the departments and programs listed below.

Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor.

Transfer Students

Transfer applicants to the Italian and Special Fields major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Italian and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

Anthropology Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Anthropology 8 or 9, and 33.

The Major

Required: Italian 100, 103A or 103B, 180, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; five courses from Anthropology 111, 112, M115A, M115B, C115R, 130, 133Q, 135A, 135B, 135C, 135S, 135T, 139, M140, 141, 143, 150 through M154Q, 161, 182, 183 selected in consultation with the undergraduate adviser.

Art History Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; Art History 50 or 51, 54, 57.

The Major

Required: Italian 100, 103A or 103B, 195, and four courses from 113 through 191 selected in consultation with the undergraduate adviser; six courses from Art History M102F, M102G, M102H, 105A through 105D, 105F, 106A through 106D, C109A, 109C, 110A, 110B, 110F, 127, 150D selected in consultation with the undergraduate adviser.

Classics Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Classics 10 or 20, 40W or 41W, and Greek 1, 2, 3 or Latin 1, 2, 3, or equivalent.

The Major

Required: Italian 100, 103A or 103B, 180, 195, and two courses from 113 through 191 selected in consultation with the undergraduate adviser; Greek 100 or Latin 100, one course from Classics 141 through 197, and one course from Greek 101A through 133 or Latin 101 through 133 (graduate seminars may be substituted for upper division author courses) selected in consultation with the undergraduate adviser.

English Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; English Composition 3, English 4W; 10A, 10B, 10C.

The Major

Required: Italian 100, 103A or 103B, 195, and four courses from 113 through 191 selected in consultation with the undergraduate adviser; four courses from English 100, M101A through 119, 121, 140A through 182C selected in consultation with the undergraduate adviser.

Film and Television Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, 46.

The Major

Required: Italian 100, 103A or 103B, 121, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; six courses from Film and Television 106A, 106B, 106C, 107, 108, 110A, 110C, 112 through 116, 193A selected in consultation with the undergraduate adviser.

French Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; French 1, 2, 3, 4, 5, 6, 12 or 14.

The Major

Required: Italian 100, 103A or 103B, 195, and four courses from 113 through 191 selected in consultation with the undergraduate adviser; one course from French 114A, 114B, 114C, and three courses from 115 through 142 selected in consultation with the undergraduate adviser.

History Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; one course from History 1A, 1B, 1C, 88.

The Major

Required: Italian 100, 103A or 103B, 180, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; six courses from History 100, 102, 119A through 119D, 121A through 123B, 128A, 128B, 131A through M133B selected in consultation with the undergraduate adviser.

Linguistics Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 6, Linguistics 20, and six terms of a second Romance language or Latin or equivalent.

The Major

Required: Italian 100, 103A or 103B, 180, 195, and two courses from 113 through 191 selected in consultation with the undergraduate adviser; Linguistics 103, 110, 120A, 120B, and one course from M146, M150, 165A, 165B, 170
selected in consultation with the undergraduate adviser.

**Music History Field**

**Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, Music History 2A, 2B, 26A, 26B, 26C. *Recommended:* Music 20A, 20B, 20C.

**The Major**

*Required:* Italian 100, 103A or 103B, 191, and four courses from 113 through 191 selected in consultation with the undergraduate adviser; five courses from Music History 126A, 126B, 126C, 135A, 135B, 135C, 191A through 191G selected in consultation with the undergraduate adviser.

**Philosophy Field**

**Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; one course from Philosophy 1 through 31.

**The Major**

*Required:* Italian 100, 103A or 103B, 191, and four courses from 113 through 191 selected in consultation with the undergraduate adviser; Philosophy 100A, 100B, 100C, and three courses from M101A through 185 selected in consultation with the undergraduate adviser.

**Political Science Field**

**Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Political Science 10, 20.

**The Major**

*Required:* Italian 100, 103A or 103B, 191, and four courses from 113 through 191 selected in consultation with the undergraduate adviser; six courses from Political Science M111A through 113A, 116A through 119, 137A, 137B, 139, 153A, 155, 167A selected in consultation with the undergraduate adviser.

**Portuguese Field**

**Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Portuguese 1, 2, 3, 25, M42 or M44 or 46.

**The Major**

*Required:* Italian 100, 103A or 103B, 180, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; three courses from Portuguese 120A through 191 selected in consultation with the undergraduate adviser.

**Spanish Field**

**Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Spanish 1, 2, 3, 4, 5, 25 (or equivalent as determined by placement test), 42 or 44.

**The Major**

*Required:* Italian 100, 103A or 103B, 180, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; one course from Spanish 120A or 120B and three courses from 122 through 161 selected in consultation with the undergraduate adviser.

**Theater Field**

**Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B.

**The Major**

*Required:* Italian 100, 103A or 103B, 122, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; one course from Theater 101A, 101B, 101C and five courses from 105, 111A, Classics 143A, English 150A, 150B, 150C, 172B selected in consultation with the undergraduate adviser.

**Women's Studies Field**

**Preparation for the Major**

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; Women's Studies 10.

**The Major**

*Required:* Italian 100, 103A or 103B, M158, 195, and three courses from 113 through 191 selected in consultation with the undergraduate adviser; Women's Studies 110A or 110B, and five additional upper division courses from any of the women's studies course lists selected in consultation with the undergraduate adviser.

**Study in Italy**

Students are encouraged to spend up to one year in Italy either to (1) study with an education abroad program or (2) study in an Italian university. They are also urged to take advantage of summer language workshops and study programs, including UCLA's own programs in Italy and Los Angeles. For additional information, contact the Education Abroad Program, B300 Murphy Hall, or the Summer Sessions Office, 1147 Murphy Hall.

**Honors Program**

**Admission**

The honors program provides exceptional students an opportunity for advanced research and study, under the guidance of a faculty member, that leads to the completion of an honors thesis. Majors in Italian and in Italian and Special Fields with an overall grade-point average of 3.25 and a 3.5 GPA or better in Italian courses are eligible to participate in the honors program. Applications should be made during the last term of the junior year or early in the senior year. Consult the department adviser for more information.

**Requirements**

To qualify for graduation with honors, Italian majors must complete all requirements for the major, one additional upper division (Italian 102A and above) or graduate-level (with consent of the instructor) course in which they write a 10- to 12-page research paper in Italian, and Italian 199A in the last term of the senior year in which they write an additional 20- to 25-page thesis in Italian on a subject expanding on one or more of the upper division courses they have taken. The thesis is written under the guidance of a departmental faculty member.

To qualify for graduation with honors, Italian and Special Fields majors must complete all requirements for the major and Italian 199B in which they write a 40- to 50-page thesis in either English or Italian that combines their two disciplines of study. The thesis is written under the guidance of a departmental faculty member.

Successful completion of the honors program is indicated on the transcript and diploma.

**Italian Minor**

To enter the Italian minor, students must have an overall grade-point average of 2.0 or better.

**Required Lower Division Courses (12 units):**

Italian 5, 6, and one course from 42A, 42B, 46, 50A, 50B.

**Required Upper Division Courses (20 units):**

Italian 100 and four additional Italian courses. Three of the four courses must be taught in Italian.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Graduate Degrees**

The Department of Italian offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Italian.

**Italian Lower Division Courses**

1. Elementary Italian — Beginning. (4) Lecture, five hours. P/NP or letter grading.

1G. Special Reading Course. (4) Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement. S/U grading.

2G. Special Reading Course. (4) Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement.

8A-8B-8C. Italian Conversation. (2-2-2) Seminar, three hours. Enforced requisite for course 8A: course 2; for 8B: course 3; for 8C: course 4. Each course may be repeated once for credit. P/NP or letter grading.

9. Intensive Italian. (12) Lecture, 20 hours. Intensive language program equivalent to first year of college Italian (courses 1, 2, 3) and designed to develop basic language skills. Offered in summer only. P/NP or letter grading.

42A-42B-42C. Italy through Ages in English. (5-5-5) Lecture, four hours; discussion, one hour. P/NP or letter grading.

42A. Early Modern Italy. Survey of Italy’s unique contribution to Western civilization in development of culminating project. May be repeated once for credit. P/NP or letter grading.

42B. Modern and Contemporary Italy. Cultural and political developments from 16th century to present. Topics include Beccaria and opposition to death penalty and absolutism; Garibaldi, Italian Risorgimento, national liberation, and unification; Lombaro and criminality in new Italy; Mussolini and Fascism; Gramsci and Communism; Italian Catholicism; Berlusconi and media; migration and today’s multiethnic Italy. Assigned works include relevant literature and memoirs, music, and film, from futurist and fascist art, and organized crime fiction and film.

42C. Food and Literature in Italy. Profile of Italian history and culture through analysis of gastronomic and literary texts. Special emphasis on late Middle Ages, Renaissance, and Risorgimento.

46. Italian Cinema and Culture in English. (5) Lecture/ screenings, five hours; discussion, one hour. Special topics in Italian culture as reflected and reinforced by the nation’s prime artform, stressing aesthetics and ideology of film. Films on Italian history, and cinematic arts. Rotating topics include sex and politics, comedy, integration, family networks, and neorealism. P/NP or letter grading.

50A-50B. Masterpieces of Italian Literature in English. (5-5) Lecture, four hours; discussion, one hour. P/NP or letter grading.

50B. Middle Ages to Baroque. Leading philosophical, religious, and sociopolitical issues in Europe examined in authors such as St. Francis, Dante, Boccaccio, Petrarch, Lorenzo de’ Medici, Machiavelli, Castiglione, Ariosto, and Tasso. 50B. Enrichment for students of Italian language program equivalent to first year of college Italian.

114A-114B. Middle Ages. (4-4) Lecture, three hours. Enforced requisite: course 100. Taught in Italian. P/NP or letter grading. 114A. Dante’s La Divina Commedia. (4) Lecture, three hours. Enforced requisite: course 100. Taught in Italian. P/NP or letter grading. 114B. Tradition of Love from Sacred to Profane. Study of major love poets of all time (Dante, Dolce Stil Novo poets, and Petrarca) caught between courtly and religious codes. P/NP or letter grading.

118. Italian Enlightenment. (4) Lecture, three hours. Enforced requisite: course 100. Taught in Italian. Study of philosophical and political prose, satiric poetry, and drama in 18th century, with focus on Voltaire, Swift, Goldoni, Vico, Metastasio, Serpi, and Affieri. P/NP or letter grading.

120. Modern and Contemporary Literature. (4) Lecture, three hours. Enforced requisite: course 100. Taught in Italian. Analysis of novels, short fiction, poetry, and drama in connection with modern and contem- porary history, politics, and society. Authors may include D’Annunzio, Aleramo, Pirandello, Ungelette, Montale, Pasolini, Ortese, Morante, Ginzburg, Calvino, Fo, Eco, Celati, and Tabucchi. P/NP or letter grading.

121. Italian Theater. (4) Lecture, three hours. Enforced requisite: course 100. Taught in Italian. Study of works for stage from Renaissance to present, includ- ing examples of opera and questions pertaining to acting, staging, and performance. May include texts by Machiavelli, Aretino, Affieri, Gozzi, Goldoni, Verdi, Puc-cini, d’Annunzio, Amelia Rosselli, Dacia Maraini, Dario Fo, and Franca Rame. P/NP or letter grading.

122. Italian Theater. (4) Lecture, three hours. Enforced requisite: course 100. Taught in Italian. Study of works for stage from Renaissance to present, includ- ing examples of opera and questions pertaining to acting, staging, and performance. May include texts by Machiavelli, Aretino, Affieri, Gozzi, Goldoni, Verdi, Puc- cini, d’Annunzio, Amelia Rosselli, Dacia Maraini, Dario Fo, and Franca Rame. P/NP or letter grading.

123. Modern Italian Cultural Studies. (4) Seminar, three hours. Enforced requisite: course 100. Taught in Italian. Reading, research, and writing on various cul- tural topics of modern and contemporary Italy. En- cration of contemporary Italian food culture, fashion and design, photography and visual arts, mass media, politics, music, and sports. P/NP or letter grading.

124. Food and Literature in Italy. Three hours. Enforced requisite: course 100. Taught in Italian. Profile of Italian history and culture through analysis of gastronomic documents and literary texts, with special emphasis on late Middle Ages, Renaissance, and Risorgimento. Examination of relation of food and health sciences through analysis of Regina Sante- tis, authored by various medical doctors of Salienian Schools and Platina’s Il piacere onesto e la buona sa- lute. P/NP or letter grading.

125. Italian through Opera. (4) Lecture, three hours. Enforced requisite: course 6. Taught in Italian. Introduction to traditional Italian opera as means of appreciating cul- ture of Italy. Traditional operas are means of appreciating culture of Italy. Art form of opera, and study of Italian lan- guage at advanced level through reading of libretti. Six masterworks of Italian opera tradition — Il Barbiere di Siviglia, La Traviata, La Bohéme, Pagliacci, and La Traviata — offer culturally authentic contexts to learn about operas, their characters, plots, settings, and themes. Exploration of various historical, political, and cultural issues raised in each opera. P/NP or letter grading.

140. Italian Novella from Boccaccio to Basile in Translation. (4) Lecture, three hours. Analysis of de- velopment of Italian novella in its structure, historical context, and folk material. Special emphasis on how Italian novella influenced other European literatures. P/NP or letter grading.

150. Modern Fiction in Translation. (4) Lecture, three hours. Select issues in 20th-century thought traced in writers of international fame, with focus on contemporary novel and stories of several important writers, such as Umberto Eco’s The Name of the Rose, Pasolini’s The Ragazzi, Pirandello’s The Late Mattia Pascal, and Cal- vino’s The Cosmocismica. P/NP or letter grading.

M158. Women, Gender, and Sexuality in Italian Cul- ture and Literature in Translation. (4) Lecture, three hours; discussion, one hour. Analysis of gender roles, images of femininity and masculinity, patriarchy, myths of Madonna and Latin lover, condition of women in Italian society through history, politics, literature, film, and other media. Italian majors required to read texts in Italian. P/NP or letter grading.

180. History of Italian Language. (4) Lecture, three hours. Enforced requisite: course 100. Taught in Italian. Main forces that have shaped literary or standard Italian and specific ways in which language has evolved. Tracing of its changing relations with other Eu- ropean languages and influences of other languages; its growth and development throughout history; events in the cultural life of the nation; changes in creative expression, and other cultural phenomena. P/NP or letter grading.

191. Variable Topics Research Seminars: Italian Studies. (4) Seminar, three hours. Research seminar will focus on themes connected with Italian literature topics covered in regular departmental undergraduate courses. Reading, discussion, and de- velopment of culminating project. May be repeated once for credit. P/NP or letter grading.

195. Community or Corporate Internships in Italian. (4) Tutorial, three hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with in- structor and provide periodic reports of their experi-
ence. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

198. Honors Research in Italian. (4) Tutorial, one hour. Limited to juniors/seniors. Development and completion of significant research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

199A. Directed Research in Italian. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199B. Directed Research in Italian and Special Fields. (2 to 4) Tutorial, to be arranged. Limited to senior Italian and Special Fields majors. Supervised individual research or investigation under guidance of faculty mentor. Tutorial in which paper (20 to 25 pages) is to be written in either Italian or English that requires students to unify and synthesize their experience of combining two disciplines of study. Individual contract required. P/NP or letter grading.

Graduate Courses

201. Bibliography and Methods of Research. (4) Lecture, three hours; discussion, one hour. S/U or letter grading.

205A-205B. Studies in Criticism. (4-4) Lecture, three hours. History, theory, and practice of criticism. S/U or letter grading. 205A. Brief History of Literary Criticism. Presentation, discussion, and application of basic currents of criticism from stylistics to structuralism. 205B. Discussion of Modern Critical Approaches. Presentation, discussion, and application of contemporary approaches from structuralism to deconstruction, new historicism, and feminist criticism.

210. Studies in Early Italian Literature. (4) Lecture, three hours. Topics include origins of Italian language and study of early texts. Scuola Siciliana and early poetry of Central and Northern Italy, and Dolce Stil Novo. S/U or letter grading.

221A-221E. Studies in 20th-Century Literature. (4 each) Lecture, three hours. S/U or letter grading: 221A. Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of 20th-century literature, with coverage of authors such as D’Annunzio, Verga, Marinetti, and Pirandello. S/U or letter grading; 221B. Contemporary Poetry. (4) Lecture, three hours. Analysis of legacy of major two figures in Italian poetry from World War II — Ungaretti and Montale. Thorough examination of movements and individual poets active in the 1960s and 1970s. S/U or letter grading.

221C. 20th-Century Narrative to World War II. (4) Lecture, three hours. Assessment of turn-of-the-century narrative pattern (Gabriele D’Annunzio) and analysis of radical innovations brought about by such towering figures as Pirandello, Svevo, Bernari, Marinetti, etc. S/U or letter grading.

221D. 20th-Century Narrative since World War II. (4) Lecture, three hours. In-depth exploration of some major works that portray Italian literature famous throughout the world, with special emphasis on study of formalistic modes adopted by the neo-avant-garde. S/U or letter grading.

221E. Pirandello and Contemporary Theater. (4) Lecture, three hours. Thorough reading of theatrical texts, accompanied by analysis of how the plays have been realized on stage by important directors such as Stre- hler, Ronconi, and the playwrights/actors themselves. Emphasis on ritualistic implications of the theatrical performance. S/U or letter grading.

222A-222B. Comparative Romance Historical Grammar. (4-4) Formerly numbered M222A-M222B. (5) Lecture, three hours. Each course may be taken independently for credit. S/U or letter grading. 222A. Phonology. Principal sound changes from late Latin to main Romance dialects. 222B. Morphology and Syntax. Prime morpho-syntactic changes occurring between late Latin and main Romance dialects.

223. Structures of Modern Italian. (4) Lecture, three hours. Descriptive analysis of basic features of standard Italian from phonological, morphological, and syntactic perspectives. S/U or letter grading.

224. Italo-Romance Dialectology. (4) Lecture, three hours. Differentiation of late spoken Latin into myriad varieties spoken in Italy and consideration of language types (e.g., Sardinian, Ligurian, Friulian, and Franco-Provenzal). Consideration of present-day sociolinguistics pressures. S/U or letter grading.

225. Cultural History of Italian Language. (4) Lecture, three hours. Historical survey of development of Italian language from medieval times to unification of country in 1861. Questione della lingua, general acceptance of Florentine speech, and its evolution into national language. S/U or letter grading.

230A-230B. Folk Traditions in Italian Literature. (4-4) Lecture, two hours. S/U or letter grading.

250A-250D. Seminars: Dante. (4 each) Seminar, three hours. S/U or letter grading.

255A-255B. Seminars: Baroque. (4-4 Seminar, three hours. S/U or letter grading.

256A-256B. Seminars: 18th Century. (4 Seminar, three hours. S/U or letter grading.

257A-257B. Seminars: Romanticism. (4 Seminar, three hours. S/U or letter grading.

258A-258B. Seminars: Contemporary Italian Literature. (4-4 Seminar, three hours. S/U or letter grading.

260A. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature. (4) Lecture, three hours. Open to undergraduate students with consent of instructor. Consideration of the Italian cinema compared with other European countries’ and Hollywood’s cinema, with focus on its development from its origins through Fascist times to neorealism, its legacy, different genres, and contemporary scene. S/U or letter grading.

260B. Women in Italian Culture. (4) Lecture, three hours. Designed for graduate students. Conditions of women within Italian society, with concentration on specific works produced by women and/or representing women’s conditions in either medieval/Renaissance or contemporary time. S/U or letter grading.

260C. Studies in Italian Cinema. (4) Lecture, three hours. Designed for graduate students. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental graduate courses.

M299. Research Resources for European Studies. (2) (Same as French M299, German M299, Informa- tion Studies M299, Slavic M299, and Spanish M299.) Lecture, two hours. Essentials of library research strategy and effective searching in key print and online resources for European and Russian studies. Through combination of lecture, online demonstration, and hands-on activities in and outside class, students understand how to efficiently use library and databases.

Labor and Workplace Studies

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employed as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495A-495B-495C. Teaching Italian at College Level. (2 to 4 each) Seminar, to be arranged. S/U grading. 495A. Study methods in preparation for teaching Italian at college level, with emphasis on teaching proficiency-oriented instruction. May not be applied toward M.A. course requirements. 495B. Continuation of course 495A; study of contemporary issues in Italian language pedagogy. 495C. Effective uses of technology in foreign language classroom. Project-based seminar in which students develop materials for classroom instruction as well as an electronic teaching portfolio.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC, S.U. grading.

596. Directed Individual Studies. (2 to 12) May be repeated twice for credit. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) S/U grading.

Frank T. Higbie, Ph.D., Chair
Faculty Committee
Christopher L. Erickson, Ph.D. (Management)
Frank T. Higbie, Ph.D. (History)
Sanford M. Jacoby, Ph.D. (Management)
Jacqueline Leavitt, Ph.D. (Urban Planning)
Ching Kwan Lee, Ph.D. (Sociology)
Karen J. Orren, Ph.D. (Political Science)
Christopher C. Tilly, Ph.D. (Urban Planning)
Abel Valdezuela, Jr., Ph.D. (Chicana and Chicano Studies, Urban Planning)

Scope and Objectives
The Labor and Workplace Studies minor offers an opportunity to learn about the workplace and the social, political, and economic forces that influence it. The program emphasizes the institutions of the labor market, public policy, employment relations, unions, and working-class movements. It also explores issues of race, class, and gender in the workplace. The interdisciplinary approach gives students exposure to disciplines in addition to their own majors; students should plan to take courses from multiple departments, as disciplinary breadth is encouraged.

The program is intended for students who wish to gain an in-depth understanding of the broad array of issues related to labor and the workplace. Students are encouraged to plan, with the faculty adviser and minor coordinator, either a coherent integration of courses according to a thematic or subtopical investigation or, alternatively, a comprehensive survey of the main issues involved in the study of labor and the workplace.

Undergraduate Study
Labor and Workplace Studies Minor

The Labor and Workplace Studies minor augments study in a traditional field. Students are required to complete both a departmental major and this minor. The faculty adviser certifies completion of the program.

To enter the minor, students must be in good academic standing (2.0 grade-point average or better), have completed 45 units, and file a petition and meet with the faculty adviser and minor coordinator at the Center for Labor Research and Education, 1103E Ueberroth Building, (310) 206-0812, Lsminor@irle.ucla.edu. Students are encouraged to meet early with the faculty adviser and minor coordinator to declare the minor and design a coherent program of coursework.

Required Courses (28 units minimum): Seven courses, with no more than two lower division courses (8 units), selected from Afro-American Studies M173, Asian American Studies M113, M116, Chicana and Chicano Studies M125, M127, M128, 129, Economics 150, 151, History 141B, 146A, 146B, any labor and workplace studies course, course, Management 180, Political Science 116A, 142C, Psychology M137E, Public Policy 141, 144, 145, Sociology 157, M163, 171, 173, Women's Studies M137E, M163. Students may petition, prior to enrollment, to apply other topical courses with substantial labor and workplace studies content.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in another department or program. No more than 8 units may be applied toward both this minor and a major in another department or program.

Each minor course must be taken for a letter grade, and students must have a minimum grade of C (2.0) in each and an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Labor and Workplace Studies
Lower Division Courses

M1A-M1B-M1CW. Work, Labor, and Social Justice in U.S. (6-6-6) (Same as GE Clusters M24A-M24B-M24CW) Course M1A is enforced requisite to M1B, which is enforced requisite to M1CW. Limited to first-year freshmen. Letter grading. M1A-M1B. Lecture, three hours; discussion, two hours. Exploration of ways in which work has been transformed over last century, impact of this transformation on working people, and role of labor movement as force for social justice. M1CW. Special Topics Seminar, three hours. Enforced requisites course of M1B. Topics include labor law/history, gender, race, and workplace. Satisfies Writing II requirement.

Upper Division Courses

M114C. African American Political Thought. (4) (Same as Afro-American Studies M114C and Political Science M180A.) Lecture, three or four hours; discussion, one hour (when scheduled). Intensive introduction to African American political thought, with focus on major ideological trends and political philosophies as they have been applied and interpreted by African Americans. Debates and conflicts in black political thought, historical contest of African American social movements, and relationship between black political thought and major trends in Western thought. P/NP or letter grading.

M115. Asian American Social Movements. (4) (Same as Asian American Studies M115.) Lecture, three hours. Designed for juniors/seniors. Examination of several dimensions of Asian American social movements, including grassroots, mass movement character, political and social visions, and social and political relevance to current issues. How movement participants linked struggle for change with own personal transformation and growth. P/NP or letter grading.

M117. Negotiation. (4) (Same as Communication Studies M117.) Lecture, four hours. Art and science of negotiation in securing agreements between independent parties. Theory and practice that underlies successful negotiation. Experiential course in which students learn broad array of negotiation skills, including identifying one’s own (and others’) communication style, identifying and incorporating components of successful negotiation, and resolving conflict between parties. Letter grading.

M119. Asian American and Pacific Islander Labor Issues. (4) (Same as Asian American Studies M119.) Lecture, three hours. Examination of historical and contemporary labor issues in Asian and Pacific Islander American communities, with emphasis on key role that Asian and Pacific Islander American students can play in supporting labor struggles of low-income immigrants or other labor issues. Letter grading.

M121. Issues in Latina/Latino Poverty. (4) (Same as Chicana and Chicano Studies M121 and Urban Planning M140.) Lecture, four hours. Examination of the analysis and extent of urban and rural poverty and contemporary Latina/Latino population in U.S. Special emphasis on anti-poverty policies of government in Latino communities and social planning and economic development strategies. Attention also to literature underclass. Letter grading.

M123. Chicano/Latino Community Formation: Critical Perspectives and Oral Histories. (4) (Same as Chicana and Chicano Studies M119.) Lecture, four hours. Exploration of historical formation and development of Chicano/Latino communities in 20th century, with focus on labor, immigration, economic structures, electoral politics, and international dimensions. Letter grading.

M125. U.S./Mexico Relations. (4) (Same as Chicana and Chicano Studies M125.) Lecture, four hours. Examination of complex dynamics in relationship between Mexico and U.S., using political economy approach to study of asymmetrical integration between advanced industrial economies and developing countries. P/NP or letter grading.
M127. Farmerworker Movements, Social Justice, and AFL-CIO. (4) (Same as Chicana and Chicano Studies M127.) Lecture, four hours. Designed for junior/seniors. Historical and social context of farmworker organizing, including its multiracial origins and its influence on fight for equality of working women. Specific focus on organizing, strategy of Farm Workers and Farm Laborers Organizing Committee, and their relationship to AFL-CIO, other unions, and their influence on Chicano Movement. Letter grading.

M128. Race, Gender, and U.S. Labor. (4) (Same as Chicana and Chicano Studies M128.) Lecture, four hours. Designed for juniors/seniors. Introduction to history and organization of labor movement in U.S. and North America. Discussion of race, class, and gender issues raised within movement, and various strategies for social change and economic justice pursued through organized labor and other means. Letter grading.

M144. Women's Movement in Latin America. (4) (Same as Chicana and Chicano Studies M144 and Women's Studies M144.) Lecture, four hours. Course on women's movements and feminism in Latin America and Caribbean to examine diverse social movements and locations from which women have launched political and gender struggles. Discussion of forms of feminism and women's consciousness that have emerged out of processes of rights movement, environmental struggles, labor movements, Christian-based communities, peasant and rural organizing, and new social movements that are concerned with race, sexuality, and class. Through comparative study of women's movements in diversity of political systems as well as national and transnational arenas, including resistance to historical conditions and political conditions that give rise to women's resistance, as well as major debates in field of study. P/NP or letter grading.

M149. Media: Gender, Race, Class, and Sexuality. (9) (Same as Communication Studies M149 and Women's Studies M149.) Lecture, four hours; activity, one hour. Limited to junior/senior Communication Studies and Women's Studies majors and Labor and Workplace Studies minors. Examination of manner in which media culture induces people to perceive various dominant and dominated and/or colonized groups of people. Ways in which women, gay, lesbian, bisexual, transgendered, racial, and ethnic marginalized people, classes, relay situations, and other subaltern or subordinate groups are presented and often misrepresented in media. Focus on employment and application of communications and feminist theories for understanding ideological nature of stereotyping and political representations through use of media, guest presenters, class discussions, and readings. Introduction to theory and practice of cultural studies. Letter grading.

160. Research Group or Internship Seminars: Labor and Workplace Studies. (5) Seminar, three hours. Enforced corequisite: course 195. Designed for undergraduate students who are part of research group or internship. Discussion of research methods and current literature in field of study. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

M166. Research on Immigration Rights, Labor, and Higher Education. (4) (Same as Asian American Studies M166A and Chicana and Chicano Studies M166A.) Seminar, three hours. New immigrant rights movement, with particular focus on “chicanismo.” Overview of history of immigrant rights movement and examination of development of coalition efforts between labor movement and immigrant rights movement nationally and locally. Special focus on issue of immigration students in higher education, challenges facing undocumented immigrant students, and legislative and policy issues that have emerged. Students conduct oral histories and research on immigration and immigrant rights, write poetry and spoken word about immigrant experience, and work to collectively develop student publication on immigrant students in higher education. P/NP or letter grading.

M166B. Research on Immigration Rights, Labor, and Higher Education. (4) (Same as Asian American Studies M166B and Chicana and Chicano Studies M166B.) Seminar, two hours. Two-hour discussion seminar on immigration and civic engagement. Expansion of research conducted by students in course M166A involving oral histories, research on immigration/labor/higher education, and evaluation of legislation and policies impacting undocumented students. Letter grading.

M170. Improving Worker Health: Social Movements, Policy Debates, and Public Health. (4) (Same as Community Health Sciences CM170.) Lecture, three hours; fieldwork, two hours. Examination of intersection between work, health, and environment, analysis of social causes of health disparities, investigation of historical trends and social movements, interpretation of current policy debates, and development of innovative interventions. P/NP or letter grading.

M172. Free Speech in Workplace. (4) (Same as Communications M172.) Lecture, three hours. Focus on concept of freedom of expression in workplace and how First Amendment, case law, and federal and state statutes affect one’s ability to speak at work. Conflict between discrimination law and ability to speak freely at work as well as meaning and limits of academic freedom. P/NP or letter grading.

M173. Nonviolence and Social Movements. (4) (Same as Afro-American Studies M173 and Chicana and Chicano Studies M173.) Lecture, three hours; discussion, one hour. Overview of nonviolence and its impact on social movements both historically and in its present day manifestation in contemporary society, featuring lectures, conversations, films, readings, and guest speakers. Exploration of some historic contributions of civil rights struggles and role of nonviolent action throughout U.S. history. Examination of particular strategies and tactics of nonviolent movements as they impact social change organizing in Los Angeles. P/NP or letter grading.

M175. Agitational Communication. (4) (Same as Communication Studies M175.) Lecture, four hours; discussion, one hour (when scheduled). Theory of agitation; agitation as force for change in existing institutions and political society. Intensive study of selected agitational movements and technique and content of their communications. Letter grading.

M176. Visual Communication and Social Advocacy. (4) (Same as Communication Studies M176.) Lecture, four hours. Visual communication reaches diverse audiences in communicating major social and political topics. Cartoons, posters, murals, and documentary photography have had powerful world impact. Survey of all four genres of visual communication as features of modern mass media. Letter grading.

M180. Southern California Regional Economy. (4) (Same as Urban Planning CM180.) Lecture, three hours. Introduction to regional economy, with emphasis on Los Angeles area and its labor market composition, and review of conflicting portrayals depicting dynamics of region. Two all-day bus tours of key economic regions and guest lectures by regional economists. Letter grading.

188. Special Courses in Labor and Workplace Studies. (4) Seminar, four hours. Program-sponsored experimental or temporary courses, such as those that are not part of regular offerings. May be repeated for credit. P/NP or letter grading.

194. Research Group Seminars: Labor and Work- place Studies. (4) Seminar, 90 minutes. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field of labor studies or of research of faculty members and/or students. May be repeated for credit. P/NP or letter grading.

195A. Community or Corporate Internships in Labor and Workplace Studies. (5) (Formerly numbered 195.) Tutorial, one hour; internship, 15 hours. Enforced corequisite: course 180. Limited to juniors/seniors. Internship in supervised setting in community agency, labor union, or other organization concerned with work and employment issues. Placement to be arranged by instructor. Students meet on regular basis with instructor and provide periodic written reports on their experience. May be repeated for credit. Individual contract with supervising faculty member required. Offered in summer only. P/NP or letter grading.

195B. Community or Corporate Internships in Labor and Workplace Studies. (2 to 5) Tutorial, to be arranged; internship, up to 15 hours. Limited to juniors/seniors. Internship in supervised setting in community agency, labor union, or other organization concerned with work and employment issues. Placement to be arranged by instructor. Students meet on regular basis with instructor and provide periodic written reports on their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

199. Directed Research in Labor and Workplace Studies. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Scope and Objectives
UCLA has been in the forefront of U.S. universities with significant teaching and research interests in Latin American studies for more than 50 years. More than 100 faculty members from 22 departments and professional schools regularly offer a broad range of courses with an emphasis on Latin America. These course offerings in the humanities, social sciences, fine arts, and professional fields provide students a unique opportunity to focus on Latin America, a region of growing importance.

The Latin American Studies Program offers the Bachelor of Arts and Master of Arts degrees. In the undergraduate major students develop a program combining language and methodological training with interdisciplinary studies in one of three areas: arts and humanities, social sciences, or ecology and environment. At the graduate level, students pursue more specialized coursework and interests, culminating in an interdisciplinary research study. Cooperative degree programs with the UCLA Schools of Education and Information Studies, Management, Public Health, and Public Affairs provide the opportunity to combine the M.A. in Latin American Studies with a master’s degree in a professional field.

Undergraduate Study
Latin American Studies B.A.
Undergraduate studies of the Latin American region are designed to serve the needs of students desiring a general education focused on the Latin American cultural region and those preparing for advanced academic study of Latin America.

Students must complete all preparation courses with a C (2.0) in each course.

Foreign Language Requirement
Majors must show proficiency in two Latin American languages — the primary language through the advanced level (Spanish 25 and 27, or Portuguese 25 and 105) and the secondary language through the intermediate level (Portuguese 3, 102B, or Spanish 5). An indigenous language of Latin America (i.e., Quechua) may be substituted for the secondary language.

Transfer Students
Transfer applicants to the Latin American Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: advanced Spanish and one year of elementary Portuguese, or advanced Portuguese and intermediate Spanish, two Latin American history courses, and additional coursework in the area of concentration.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospectadm_tr.htm for up-to-date information regarding transfer selection for admission.

Course Limitations
Students may not take more than 8 units of Latin American Studies 199 for letter-grade credit nor more than 8 units in any single term. No course taken on a Passed/Not Passed basis may be applied toward the B.A. degree requirements. In order to register in a 199 course, students must have advanced junior standing and an overall grade-point average of 3.0, or senior standing.

Core Areas for the Major
Students select one of three core areas as the focus of their major: arts and humanities, social sciences, or ecology and environment. Requirements for each core area are listed below.

Core I: Arts and Humanities
Preparation
Required: Two courses from History 8A, 8B, 8C; Latin American Studies 97A (or 191 with department consent); Spanish 44; Art History 55B or Ethnomusicology 91K, and Dance 6 or 8.

Core Area
Required: Ten upper division courses from the approved list of Latin American courses distributed as follows:

Core Concentration: Five courses as listed below in either the literature and folklore field or the linguistics field selected from Portuguese or Spanish, or in the fine arts field selected from art history or ethnomusicology. Only one course from the electives list within the arts and humanities core area may be applied toward the core concentration.

Theory and Methods: One course from theory and methods within the core concentration field.

Internal Breadth: Four additional courses from the arts and humanities core area but outside the core concentration field. No more than two of these may be electives.

External Breadth
Required: From the approved list, six upper division courses outside the arts and humanities core area distributed as follows: at least two courses in social sciences (e.g., history) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either social sciences or ecology and environment. No more than three external breadth courses may be electives.

Approved Undergraduate Courses
(1) Literature and Folklore Field
History 160A, Portuguese 130A, 130B, C132, C133, C134, C135, 141, Spanish 120A through 120D, 137, 139, 140, 142, 143, 144A, 144B, 144C, 147, 149, 151B, 161, 191A, 191B, 198

Theory and Methods
Portuguese 197, Spanish 119A, 119B, 119C, 197, World Arts and Cultures 122

(2) Fine Arts Field

Theory and Methods
Art History 197, Ethnomusicology 180, 183, 197E, Film and Television 199, World Arts and Cultures 199

(3) Linguistics Field

Theory and Methods
Linguistics 103, 110, 120A, 120B, M146, 165A, 165B, 170, 197, Portuguese 197, Spanish 197

(4) Arts and Humanities Electives
Chicana and Chicano Studies 142, 147, Ethnomusicology M110A, M110B, Film and Television 112, Latin American Studies 191, 199, Theater M103C, World Arts and Cultures 131

Core II: Social Sciences
Preparation
Required: Two courses from History 8A, 8B, 8C; Latin American Studies 97A (or 191 with department consent); Economics 1 and 2, or 100; Statistics 10.

Core Area
Required: Ten upper division courses from the approved list of Latin American courses distributed as follows:

Core Concentration: Five courses as listed below in one of the five fields (anthropology and sociology or economics or geography or history or political science). Only one course from the electives list within the social sciences core area may be applied toward the core concentration.

Theory and Methods: One course from theory and methods within the core concentration field.

Internal Breadth: Four additional courses from the social sciences core area but outside the core concentration field. No more than two of these may be electives.

External Breadth
Required: From the approved list, six upper division courses outside the social sciences core area distributed as follows: at least two courses in arts and humanities (e.g., fine arts) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either arts and humanities or ecology and environment. No more than three external breadth courses may be electives.

Approved Undergraduate Courses
(1) Anthropology and Sociology Field
Anthropology 114P, 114Q, 114R, 173Q, 174P, 179, Sociology 186

Theory and Methods
Anthropology C114S, 115P, C115R, 136Q, 139, M140, M186, 199, Sociology 112, 199
Approved Undergraduate Courses

Ecology and Environment
Community Health Sciences 132, Geography 121, M128, 133, 142, 181, 182A, 182B, 199

Theory and Methods
Anthropology M186, Geography M171

Electives

Latin American Studies Minor

The interdisciplinary program leading to the Latin American Studies minor allows students to choose from a broad range of course offerings in various departments to develop professional and methodological skills with area expertise.

To enter the minor, students must have an overall grade-point average of 2.0 or better and have completed 45 units.

Required Lower Division Courses (8 units): History 8A or 8B or 8C or Latin American Studies 97A, Spanish 25 or Portuguese 25.

Required Upper Division Courses (20 units): Five courses selected from the approved list of Latin American studies courses in at least two of the following fields: (1) arts and humanities (art history, ethnomusicology, folklore, Spanish and Portuguese), (2) ecology and environment (geography, public health), (3) social sciences (anthropology, economics, history, political science, sociology). If the social sciences field is selected, at least two courses must be taken in that field. No more than 4 units of course 199 may be applied toward the minor, and at least three upper division courses (12 units) must be taken in residence at UCLA.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Study in Latin America

Latin American Studies majors and minors are highly encouraged to study abroad in Latin America. Students can travel to Latin America through a variety of programs with various lengths (summer or during the academic year). More information about travel abroad programs is available through the UCLA International Education Office, B300 Murphy Hall, (310) 825-4995, ieo@international.ucla.edu. See http://www.ieo.ucla.edu.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Latin American Studies Program offers the Master of Arts (M.A.) degree in Latin American Studies.

Latin American Studies

Lower Division Course

97A. Introduction to Latin America. (4) Lecture, three hours. Interdisciplinary freshman/sophomore survey course designed as introduction to modern Latin America. P/NP or letter grading.

Upper Division Courses

191. Variable Topics Research Seminars: Latin American Studies. (4) Seminar, four hours. Advanced interdisciplinary research seminars for juniors/seniors. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

199. Special Studies in Latin American Studies. (4 or 8) Tutorial, to be arranged. Limited to juniors/seniors. Intensive directed research program in which students conduct interdisciplinary research or complete internship with international agency or program dealing with Latin America. Faculty sponsorship and written reports required. May be repeated for credit. P/NP or letter grading.

Graduate Courses

M200. Latin American Research Resources. (4) (Same as History M265 and Information Studies M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

205. Latin Americanist Scholarship. (4) Lecture, three hours. Panoramic introduction to methods and issues in various disciplines that study Latin America, with guest lecturers from various fields. (Latin American Studies core course.)

M250A. Indians of South America. (4) (Same as Anthropology M272.) Lecture, three hours. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

250B. Interdisciplinary Seminar: Latin American Studies. (4) Seminar, three hours. Problem-oriented seminar on critical areas stressed in University's cooperative programs in Latin America.

250C. Interdisciplinary Topics in Latin American Studies. (4) Reading knowledge of Spanish or Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature.

M262. HIV/AIDS and Culture in Latin America. (4) (Same as Community Health Sciences M250.) Seminar, three hours. Exploration of cultural, political, and public health context for people living with and at risk for HIV/AIDS and their families in Latin America. Public health aspects, including epidemiology, morbidity concerns and community interventions, medical anthropological study of experience of those impacted, and grass-roots responses, as well as political/economic context addressing poverty and structural violence. Letter grading.

M264. Latin America: Traditional Medicine, Shamanism, and Folk Illness. (4) (Same as Anthropology M264 and Community Health Sciences M284.) Lecture, three hours. Recommended preparation: Community Health Sciences 132, bilingual English/Spanish skills. Examination of role of traditional medicine and shamanism in Latin America and exploration of how indigenous and mestizo groups diagnose and treat folk illness and Western-defined diseases with variety of health-seeking methods. Exploration of art, music, and ritual and case examples of religion and healing practices via lecture, film, and audioclip. Letter grading.

M268A-M268B. Seminars: Recent Latin American History. (4) (Same as History M268A-M268B.) Seminar, three hours. Course M268A is requisite to M268B. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of interdisciplinary nature. In Progress (M268A) and letter (M268B) grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Use to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

506. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. May be repeated, but only 4 units may be applied toward the minimum graduate course requirement. S/U or letter grading.

507. Preparation for A.M. Comprehensive Examination. (4) Tutorial, to be arranged. Ordinarily taken only during term in which student is being examined. S/U grading.

508. Research for and Preparation of M.A. Thesis. (4) Tutorial, to be arranged. Only 4 units may be applied toward minimum graduate course requirement. S/U grading.

Lara Stempel, J.D.

Scope and Objectives
The UCLA School of Law is designed to produce lawyers who are well-prepared for the various private and public roles that are assigned to members of the legal profession. The school pioneered clinical teaching, is a leader in interdisciplinary research and training, and is at the forefront of efforts to link research to its effects on society and the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

The law school is unique in that it also offers students an opportunity to specialize in five specific areas of law: business law and policy; critical race studies; entertainment and media law and policy; law and philosophy; and public interest law and policy.

The school offers a three-year curriculum leading to the J.D. degree and two advanced degrees — Master of Laws (LL.M.) and Doctor of Juridical Science (S.J.D.).

Professional Study
The School of Law offers the Juris Doctor (J.D.), Doctor of Juridical Science (S.J.D.), and Master of Laws (LL.M.) degrees.

The undergraduate courses offered by the School of Law are designed for undergraduate students only. For information about the legal curriculum of the School of Law, see http://www.law.ucla.edu/home/.

Law, Undergraduate

Upper Division Courses

156. American Political Thought Seminar. (3) Seminar, nine hours. Examination of American political thought from founding to writings of Abraham Lincoln. Readings include Locke’s Second Treatise of Government, Federalist Papers, and writings of Thomas Jefferson, James Madison, and Alexander Hamilton. Seminar, 13 hours. Examination of consumer bankruptcy policy with one architect of 1978 Bankruptcy Code. Discussion of debt payment in ancient Babylon where spouses and siblings could be sold into slavery for nonpayment of relative’s debt. Examination of bankruptcy in U.S. history and analysis of heart of consumer bankruptcy policy, such as when debtors should be released from debt and when property debtors should keep, and how debtors can put together repayment plans. P/NP or letter grading.

163A. International Human Rights Colloquium. (3) Formerly numbered 163.) Lecture, four hours. Introduction to basic principles of business law, such as how law applies to various business entities, duties and liabilities of corporate officers and directors, and as how law applies to various business entities, duties and liabilities of corporate officers and directors, and shareholder derivative suits. American legal system and constitutional provisions. Topics include introduction to case analysis, reading cases, examining precedent and stare decisis, separation of powers, and statutory interpretation. P/NP or letter grading.

180. Special Topics in Law. (4) Lecture, four hours. Topics of special interest to undergraduate students. Specific subjects may vary each term depending on particular interest of instructors or students. May be repeated for credit. P/NP or letter grading.

184. Introduction to Legal Education. (4) Lecture, four hours. Preliminary introduction to legal pedagogy and overview of American legal system. Analysis of appellate and U.S. Supreme Court cases and legislative materials to develop foundational law school skills and become familiar with principles of both scholarly and practice-oriented legal analysis. Topics include introduction to case analysis, reading cases, examining precedent and stare decisis, separation of powers, and statutory interpretation. P/NP or letter grading.

185. Corporate Mock Trial. (4) Lecture, four hours. Preliminary introduction to basic principles of business law, such as how law applies to various business entities, duties and liabilities of corporate officers and directors, and shareholder derivative suits. American legal system and constitutional provisions. Topics include introduction to case analysis, reading cases, examining precedent and stare decisis, separation of powers, and statutory interpretation. P/NP or letter grading.

187A. Legal History Colloquium. (3) Seminar, two hours. Corequisite: course 193. Reading of scholarly papers prepared by school faculty members and other scholars in fields of legal history, economics, and political science. Preparation of critiques and discussion of issues in seminar setting with author of papers. P/NP or letter grading.

187B. Politics and International Law Colloquium. (3) Seminar, two hours. Corequisite: course 193. Limited to College Honors students. Lectures on alternative theoretical approaches (including realism, institutionalism, and constructivism) to understand relationship between international law and American foreign policy. Reading of scholarly papers prepared by school faculty members and other scholars in fields of legal history, economics, and political science. Preparation of critiques and discussion of issues in seminar setting with author of papers. P/NP or letter grading.

187C. Politics and International Law Colloquium. (6) Seminar, two hours. Corequisite: course 193. Limited to College Honors students. Lectures on alternative theoretical approaches (including realism, institutionalism, and constructivism) to understand relationship between international law and American foreign policy. Reading of scholarly papers prepared by school faculty members and other scholars in fields of legal history, economics, and political science. Preparation of critiques and discussion of issues in seminar setting with author of papers. P/NP or letter grading.

199. Directed Research in Law. (1 to 6) Tutorial, three hours per week per unit. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culuminating scholarly paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Scope and Objectives

Although lesbian, gay, bisexual, and transgen- der studies has only recently found a place in university curricula, the field actually represents the intersection of two traditions that have existed for thousands of years. The better known is the learned tradition, which, at least since the end of the ancient world, has been overwhelming- ly hostile. Medieval theology condemned the sodomite, nineteenth-century medicine pathol- ogized the invert, and until very recently psychi- atrists felt called on to “cure” the homosexual. For at least as long, however, women and men attracted to others of their own sex have kept alive another affirmative tradition, a knowledge of their past that sustained them, often in the face of overwhelming official hostility. The guests at Plato’s Symposium looked back to Achilles and Patroclus; women-loving-women in early twentieth-century Paris remembered Sappho.

After the birth of the modern gay liberation movement in 1969, this underground knowl- edge came out of the closet and found a public
voice sufficiently strong to mount a sustained challenge to the official teachings concerning minority sexualities and genders. This challenge led to a dramatic increase in research on same-sex desire and cross-gender phenomena, most of it the work of scholars without academic affiliations. Inspired by these accomplishments, students and faculty at colleges and universities eventually mustered the courage to address similar topics, thereby transforming — partly by assimilation, partly by contestation — the previously hostile learned tradition. This originally rather disparate work gradually coalesced into lesbian, gay, bisexual, and transgender studies, which, over the last 20 years, has developed into an academic discipline of remarkable breadth and vitality. The field embraces work in genetics and cultural studies, literature and anthropology, the health sciences, history, and the visual arts. It ranges from archival research to the elaboration of queer theory, from the analysis of constitutional law to questions of public health, from the study of identical twins to the study of popular culture.

Although the initial focus in lesbian, gay, bisexual, and transgender studies is usually on minority sexualities and genders, it is impossible to study them in any meaningful way without raising questions about sexuality and gender in general. And those questions cannot be responsibly answered without considering class, race, ethnicity, history, political economy, and the construction of scientific knowledge. Thus lesbian, gay, bisexual, and transgender studies, which may at first seem to concern the private practices of a small number of people, inevitably lead to the much larger study of sexuality, gender, and culture. It represents an important vantage point from which to investigate the social construction of gender and sexual identity, social control of behavior, changing definitions of the family, and the place of sexual and gender expression in the public and private spheres. Because of the kinds of questions asked, lesbian, gay, bisexual, and transgender studies is the site of some of the most exciting work being done today on the relation of culture, gender, and sexuality.

UCLA’s minor in Lesbian, Gay, Bisexual, and Transgender Studies provides the opportunity to study sexuality from a variety of interdisciplinary perspectives. Interdisciplinarity is assured by requiring students to take at least one course in each of the life sciences, social sciences, and humanities. In addition, seniors in the minor are expected to do an internship in a specialized area of the most exciting work being done today on the relation of culture, gender, and sexuality.

Undergraduate Study

Lesbian, Gay, Bisexual, and Transgender Studies Minor

To enter the Lesbian, Gay, Bisexual, and Transgender Studies minor, students must have an overall grade-point average of 2.0 or better.

Required Upper Division Courses (32 units)

Lesbian, Gay, Bisexual, and Transgender Studies M114, 195, and six additional courses, including at least one each in the humanities, life sciences, and social sciences, to be selected from the approved list of courses available in the program office each term. Students may petition to apply a related course not on the list toward the six-course requirement if they can show that lesbian, gay, bisexual, or transgender issues represent a significant part of the course content. Students are strongly urged to keep in close contact with advisers in the program office who can help them plan their course of study.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Lesbian, Gay, Bisexual, and Transgender Studies Upper Division Courses

M101A. Premodern Queer Literatures and Cultures. (B.) (Not as course as M101A prior to Fall Quarter 2011.) (Same as English M101A and Women's Studies M105A) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of discrete period of queer literature from antiquity to circa 1850. Works by such writers as Sappho, Plato, Marlowe, Shakespeare, and Thomas Gray may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M101B. Queer Literatures and Cultures, 1850 to 1970. (5) (Formerly numbered M101A.) (Same as English M101B and Women's Studies M105B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of discrete period of queer literature and culture from circa 1850 to 1970. Works by such authors as Walt Whitman, Radclyffe Hall, Gertrude Stein, Virginia Woolf, Langston Hughes, Tennessee Williams, Henry Blake Fuller, and James Baldwin may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M101C. Queer Literatures and Cultures after 1970. (5) (Formerly numbered M101B.) (Same as English M101C and Women's Studies M105C) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Examination of cultural production, specifically literature, produced by queers after Stonewall rebellion in New York in 1969, widely regarded as origins or beginning of modern lesbian and gay rights movement in U.S. Readings and films by such authors as Andrew Holleran, Leslie Feinberg, Achy Obejas, Essex Hemphill, Audre Lorde, Cheryl Dume, and Alison Bechdel may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M101D. Studies in Queer Literatures and Cultures. (5) (Formerly numbered M101D.) (Same as English M101D and Women's Studies M105D) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Variable specializations in queer studies and cultures. Topics focus on particular problem or issue in terms of its relationship to queer cultures and writings. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M107B. Studies in Gender and Sexuality. (5) (Same as English M107B and Women's Studies M107B) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Examination of literary and cultural production through lens of gender and sexuality. Depending on instructor, emphasis may be historical, regional, national, comparative, or thematic and include other intersectional vectors of identity and representation such as race and ethnicity. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies. (5) (Same as Women's Studies M114) Lecture, three hours; discussion, one hour. Introduction to study of sexual and gender diversity of the world in the present and should have an enhanced understanding and appreciation both of the sexual and gender diversity of the world in which they live and of the complex ways in which sexuality and gender interact with other categories of identity and practice.
20th century, with focus on lesbians, gay men, and members of other sexual minorities as creators, performers, and critics. Enforced requisites: English M147A. Psychology of Lesbian Experience. (4) (Same as Psychology M147A and Women’s Studies M147A.) Lecture, two hours; discussion, one hour. Requisite: course M114 or Psychology 10 or Women’s Studies 10. Designed for juniors/seniors. Review of research and theory in psychology and women’s studies to examine various aspects of lesbian experience, impact of heterosexism/stigma, gender role socialization, minority status of women and lesbians, identity development within a multicultural society, changes in psychological theories about lesbians in sociohistorical context. P/NP or letter grading.

150. Speaking Out: Public Speaking on Lesbian, Gay, Bisexual, and Transgender Issues. (1) Discussion, two hours. Interdisciplinary course designed to teach leadership and public speaking skills on lesbian, gay, bisexual, and transgender issues. Sexual identity development, personal growth, and lesbian, gay, bisexual, and transgender history intersect with public speaking and leadership skills. Topics include sexual identities, family, leadership, and public speaking performance. P/NP or letter grading.

M167. Contested Sexualities. (4) (Same as Women’s Studies M167.) Lecture, three hours; discussion, one hour. One-hour discussion and seminar. Enforced requisites: Composition 3 or 3H. Consult Schedule of Classes for the core curriculum and for instructors. May be repeated for credit with instructor consent. P/NP or letter grading.

187. Selected Topics in Lesbian, Gay, Bisexual, and Transgender Studies. (4) Lecture, four hours; discussion, three hours. Study of selected topics in gay, lesbian, bisexual, and transgender issues. Sexual identity development, personal growth, and lesbian, gay, bisexual, and transgender history intersect with public speaking and leadership skills. Topics include sexual identities, family, leadership, and public speaking performance. P/NP or letter grading.

LIFE SCIENCES

College of Letters and Science
UCLA
2305 Life Sciences
Box 951606
Los Angeles, CA 90095-1606

fax: (310) 825-8290
e-mail: lscore@lifesci.ucla.edu
http://www.lscore.ucla.edu

Frank A. Laski, Ph.D., Chair

Scope and Objectives

Students who wish to study life sciences have a choice of eight majors, all of which lead to a Bachelor of Science degree: Biology, Ecology, Behavior, and Evolution, and Marine Biology (Ecology and Evolutionary Biology Department), Microbiology, Immunology, and Molecular Genetics (Microbiology, Immunology, and Molecular Genetics Department), Molecular, Cellular, and Developmental Biology (Molecular, Cellular, and Developmental Biology Department), Neuroscience (Neuroscience Interdepartmental Program), Physiological Science (Integrative Biology and Physiology Department), and Psychology Department. This choice reflects the diversity of undergraduate instruction in life sciences at UCLA. Despite this diversity, all of these majors require a common core of introductory courses that forms the foundation for any study of life sciences and that is required for more advanced courses in each major. The common core includes courses in chemistry, physics, and mathematics, as well as introductory courses in evolution and biodiversity, cellular and organismal biology, molecular biology, and genetics. During the first two years, students may also gain experience in a research laboratory through the Student Research Program. For more information on each major, see the individual department listings in this section of the catalog. For additional information on the life sciences core curriculum, see http://www.lscore.ucla.edu.

Students considering one of the life sciences majors are encouraged to declare a major as early as possible, even in their first year. In this way, they are identified by the life sciences advising offices and receive important curricular information on each major. The Marine Biology and Psychobiology majors may require some courses in addition to the life sciences core curriculum as part of the preparation. Consult the course requirements for both majors.

Undergraduate Study

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4, 23L; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or replications of the same course, are subject to dismissal from the major.

Transfer Students

Transfer applicants with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. Second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

Undergraduate Research Consortium in Functional Genomics

The Undergraduate Research Consortium in Functional Genomics (URCFG) offers a sequence of laboratory-intensive courses designed for undergraduate students committed to pursuing research. The innovative partnership between UCLA and the Howard Hughes Medical Institute (HHMI) was formed through a major award to Professor Utpal Banerjee. The HHMI Professors Program seeks to engage leading scientists in transmitting the excitement and values of scientific research to undergraduate education. The goal of the URCGF is to emphasize the importance for academia and industry of research in the fields of medicine and biotechnology.

Sponsored by the Life Sciences Core, the URCGF provides undergraduate students from any UCLA major with the opportunity to learn biological research techniques early in their educational careers and within a structured institutional environment. Students devote between one and four terms to the study of biological research in genetics, bioinformatics, and functional genomics. The training emphasizes research concepts in basic science such as the model organism and in advanced research techniques such as electron microscopy.

Students participate in one structured lower division course — Life Sciences 10H — which is limited to 30 students per term and is offered every term. After satisfactorily completing course 10H and with instructor consent, stu-
Life Sciences

Lower Division Courses

1. Evolution, Ecology, and Biodiversity. (5) Lecture, three hours; laboratory, two hours; one field trip. Introduction to principles and mechanisms of evolution by natural selection; population, behavioral, and community ecology; and biodiversity, including major taxa and their evolution, ecological, and physiological relationships. P/NP or letter grading.

2. Cells, Tissues, and Organs. (4) Lecture, three hours; discussion, 75 minutes. Enforced requisite: course 2 or 3. Corequisites: course 23L (students must take 23L concurrently with course 3 if they do not plan to take course 4). Introduction to the basic principles of cell structure, organization of cells into tissues and organs, and principles of organ systems. Letter grading.

3. Introduction to Molecular Biology. (4) Lecture, three hours; discussion, 75 minutes. Enforced requisites: course 2, and Chemistry 14C or 30A. Corequisite: course 23L (students must take 23L concurrently with course 3 if they do not plan to take course 4). Introduction to the basic principles of biochemistry and molecular biology. Letter grading.

4. Introduction to Molecular Biology (Honors). (5) Lecture, two and one-half hours; discussion, 90 minutes; movie section, two and one-half hours. Enforced requisites: course 2, and Chemistry 14C or 30A. Honors course parallel to course 3, but at a more advanced level. Letter grading.

5. Genetics. (5) Lecture, three hours; discussion, 75 minutes; movie section, two and one-half hours. Corequisites: Chemistry 14A (or 20A), 14C (or 30A). Enforced corequisite: course 23L. Principles of Mendelian inheritance and chromosomal basis of heredity in prokaryotes and eukaryotes, recombination, biochemical genetics, mutations, DNA, genetic code, gene regulation, genes in populations. Letter grading.

10H. Research Training in Genes, Genetics, and Genomics. (6) Lecture, 90 minutes; laboratory, six hours; computer laboratory, 90 minutes. Enrolled to 200 students. Basic training in biological research, including techniques in genetics, model organism, bioinformatics, functional genomics, electron microscopy. Part of Undergraduate Research Consortium in Functional Genomics sponsored by Howard Hughes Medical Institute Professors Program. Letter grading.

15. Life: Concepts and Issues. (5) Lecture, three hours; discussion, two hours. Introduction to important concepts and issues in the field for non-life sciences majors. Topics include chemistry of life, genetics, physiology, evolution, and ecology — all explored in lecture and debates, with a writing component. P/NP or letter grading.

23L. Introduction to Laboratory and Scientific Methodology. (2) Laboratory, three hours; discussion, one hour. Enforced requisite: course 2. Must be taken concurrently with either course 3 or 4. Introductory life sciences laboratory designed for undergraduate students. Opportunity to conduct wet-laboratory cutting-edge bioinformatics laboratory experiments. Students work in groups of three conducting experiments in areas of physiology, metabolism, cell biology, molecular biology, genotyping, and bioinformatics. Letter grading.

71SL. Classroom Practices in Elementary School Science (Small Seminar) 100HA. Seminar, 90 minutes; lab work on three days a week for three hours. Introduction for prospective science teachers to high school science. Pairs of students are placed in local high school classrooms to observe, participate, and assist mentor teachers in instruction. Introduction to inquiry-based learning practices, national and California standards, reading and learning differences in children and cognitive ability of elementary-age children as it relates to introduction of concepts, curricular planning, classroom management, and learning assessment. P/NP grading.

72SL. Classroom Practices in Middle School Science. (2) Seminar, 90 minutes; fieldwork, three hours. Enforced requisite: course 71SL. Introduction for prospective science teachers to middle school science. Pairs of students are placed in local middle school classrooms to observe, participate, and assist mentor teachers in instruction. Discussion of learning in middle school science, cognitive development of students at this level, and best means to teach appropriate science concepts at this level. P/NP grading.

73SL. High School Science. (2) Seminar, 90 minutes; service learning fieldwork, three hours. Enforced requisite: courses 71SL and 72SL. Introduction for prospective science teachers to high school science. Pairs of students are placed in local high school classrooms to observe, participate, and assist mentor teachers in instruction. Discussion of learning in high school science, cognitive development of students at this level, and best means to teach appropriate science concepts at this level. P/NP grading.

97. Variable Topics in Life Sciences. (1 to 4) Seminar, one hour. Preparation: enrollment in Life Sciences laboratory designed for undergraduate students. Topics include electron microscopy, other light microscopies, immunohistochemistry. Part of Undergraduate Research Consortium in Functional Genomics sponsored by Howard Hughes Medical Institute Professors Program. Letter grading.

130. Science Classroom Observation and Participation. (1) Seminar, one hour. Preparation: completion of three mathematics and/or science courses at level required of science majors. Observation, participation, and assisting in science classes at elementary, middle, and secondary schools. May be repeated for credit. P/NP grading.

192A. Undergraduate Practicum in Life Sciences. (4) Seminar, two hours. Requisite: course 2 or 3. Limit- ed to sophomores/juniors/seniors. Training and supervised practicum for advanced undergraduate students in courses related to life science. Light microscopes, oral presentation skills and assist in preparation and presentation of materials and development of programs under guidance of faculty members. May be repeated once for credit. Letter grading.

Graduate Course

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

The goal of linguistics is the enrichment of knowledge about the nature, grammar, and history of human language. Linguistics is a theoretical discipline, akin to philosophy, anthropology, and cognitive psychology. It is important for prospective students to understand that studying linguistics is not a matter of learning to speak many languages. Linguistics courses draw examples from the grammars of a wide variety of languages, and the more languages linguists know about in depth (as distinct from possessing fluency in the use of them), the more likely they are to discover universal properties. It is also possible to pursue these universal aspects of human language through the intensive in-depth study of a single language. This accounts for the high proportion of examples from English and familiar European languages found in linguistics courses and research publications.

The core areas of linguistic theory are phonology (with its roots in phonetics), morphology, syntax, and semantics. A grammar is a system of rules that characterize the phonology, morphology, syntax, and semantics of a natural language. The properties of grammars are the central focus of linguistic theory.

Because language is central to all humanistic disciplines, as well as to several social sciences areas, it is studied from many points of view. Linguistics itself cannot be said to recognize a single optimal approach to the subject. Hence, the courses provide a variety of approaches that reflect the diversity of the field.

The Linguistics Department has consistently been ranked among the very best linguistics departments in the country. It offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees.

Undergraduate Study

The majors described below are of two types: (1) a major that concentrates entirely on general linguistics and (2) several majors that combine the basic courses of the general program with a language concentration or other related fields. The combined majors in conjunction with instructional certification programs are especially appropriate for students who have non-university teaching careers as goals.

A 2.0 grade-point average in linguistics courses is required for all Linguistics Department majors.

Linguistics B.A.

The Linguistics major is designed for students with an exceptional interest in and aptitude for the study of languages and linguistics. It enables undergraduates to gain substantial familiarity with several languages and types of linguistic structure and to become conversant with the historical study of language and formal theories of linguistics.

Preparation for the Major

Required: Linguistics 20; two of the following: Philosophy 31, Psychology 10 or 100A, one cultural anthropology course; completion of the equivalent of the sixth term of one foreign language and the third term of a second foreign language.

Students who complete an advanced language course are considered to have completed the equivalent of whatever courses are requisite to that one (e.g., if students complete French 100, they have automatically satisfied the requirement of the sixth term of work in one language). Students are required to complete at least the equivalent of the third term in a language other than those in the Romance, Slavic, or Germanic families. This requirement may be satisfied either as part of or in addition to the language requirement described in the preceding paragraph.

Transfer Students

Transfer applicants to the Linguistics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, two courses from symbolic logic, introductory psychology or psychological statistics, or cultural anthropology, and two years of one foreign language and one year of a second foreign language (at least one year must be in a language other than those in the Romance, Slavic, or Germanic families). Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Eleven upper division courses as follows: Linguistics 103, 110, 120A, 120B or 127; two courses from 114, 120C, 170; Anthropology M140 and either C144 or M145; one course from Anthropology 141, 142A, 143, or Sociology M124A; and two upper division electives from Anthropology 141, 142A, 143, C144, M145, the 130 series (one course only), the 170 series (one course only), Sociology M124A, M124B. Linguistics 165A and 165B (or 200A and 200B with grades of A in 120A and 120B respectively and consent of instructor) are recommended for students planning to pursue graduate work in linguistics.

Linguistics and Anthropology B.A.

Preparation for the Major

Required: Completion of the equivalent of the sixth term in either Chinese, Japanese, or Korean; Linguistics 20; one cultural anthropology course; either Chinese 50, Japanese 50, or Korean 50, as appropriate; completion of the equivalent of the third term of a second foreign language.
Transfer Students
Transfer applicants to the Linguistics and Asian Languages and Cultures major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of either Chinese, Japanese, or Korean, one introduction to linguistics course, one cultural anthropology course, one Chinese, Japanese, or Korean civilization course, and one year of a second foreign language.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Linguistics and Computer Science B.A.

Preparation for the Major

Required: Linguistics 20, Computer Science 31, 32, 33, 35L, Mathematics 31A, 31B, 61 or 180, Philosophy 31, completion of the sixth term in one foreign language or the third term in each of two foreign languages.

Transfer Students
Transfer applicants to the Linguistics and Computer Science major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, two calculus courses, one symbolic logic course, four computer programming courses, and two years of one foreign language or one year in each of two foreign languages. One discrete structures course is recommended.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Eleven upper division courses as follows: Linguistics 103, 120A, 120B, 120C, 165A or 165B, 180, 185A, Computer Science 131, 132, 161, 181.

Linguistics and English B.A.

Preparation for the Major

Required: Linguistics 20, English 4W or 4HW, 10A, 10B, 10C, Philosophy 31, completion of the equivalent of the sixth term of one foreign language and the third term of a second foreign language.

Transfer Students
Transfer applicants to the Linguistics and English major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, one critical reading and writing course, one year of English literature survey courses, one symbolic logic course, and two years of one foreign language and one year of a second foreign language.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

Linguistics and French B.A.

Preparation for the Major

Required: Linguistics 20, French 1, 2, 3, 4, 5, 6, 12, completion of the equivalent of the third term of a second foreign language.

Transfer Students
Transfer applicants to the Linguistics and French major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of French, one introduction to linguistics course, one French literature course, and one year of a second foreign language.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

Linguistics and Philosophy B.A.

Preparation for the Major

Required: Linguistics 20, Psychology 10, 85, 100A, 100B, completion of the equivalent of the sixth term of one foreign language and the third term of a second foreign language. Program in Computing 10A is strongly recommended.

Transfer Students
Transfer applicants to the Linguistics and Psychology major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, one introduction to psychology course, one introduction to cognitive science course, one psychological statistics course, one psychology research methods course, and two years of one foreign language and one year of a second foreign language. One introduction to programming course is strongly recommended.
Transfer selection for admission. Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Eleven upper division courses (six in linguistics and five in psychology) as follows: Linguistics 103, 120A, 120B, 130, 132, and one upper division elective in linguistics (multiple-listed courses may not be applied). Linguistics C135 or 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) is strongly recommended. Also required are Psychology 120A, 121, 133B, and two electives to be selected from 115, 116, M117C, 118, M119L, 124A, 124B, 124C, 124E, 130, 133C, 133E, 133F, 186A, 186B.

Linguistics and Scandinavian Languages

B.A.

Preparation for the Major

Required: Linguistics 20, Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, completion of the equivalent of the third term of a second foreign language.

Transfer Students

Transfer applicants to the Linguistics and Scandinavian Languages major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of either Swedish, Norwegian, or Danish, one introduction to linguistics course, and one year of a second foreign language.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Eleven upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper division elective in linguistics, two courses from Scandinavian 105, 106, 107 (or one of these courses twice), 197 (in a topic related to Scandinavian linguistics, under the direction of a Scandinavian or Linguistics faculty member), and three upper division electives in Scandinavian.

Linguistics and Spanish B.A.

Preparation for the Major

Required: Linguistics 20, Spanish 1, 2, 3, 4, 5, 25 or 27, 42, 44, completion of the equivalent of the third term of a second foreign language.

Transfer Students

Transfer applicants to the Linguistics and Spanish major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of Spanish, one Spanish composition course, one Spanish civilization course, one Spanish American civilization course, one introductory to linguistics course, and one year of a second foreign language.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A (or 165B), one additional upper division course in linguistics, Spanish 100A, 100B, M118A (or 160), 119, and two additional upper division Spanish courses.

Honors Program

Honors in linguistics are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 189A and 198B or in 199. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Computing Specialization

Students in any of the linguistics majors (except Linguistics and Computer Science) may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Program in Computing 10A and 10B and 10C (or Computer Science 31 and 32), Linguistics 180, 185A, Mathematics 61. Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Linguistics Minor

The Linguistics minor is designed for students where training in linguistic analysis could be an enhancement to their major programs and to students who are interested in language(s) but do not have time in their undergraduate programs to pursue multiquarter language sequences. In addition, the minor provides students with a way to design “custom” joint degree programs with linguistics where the Linguistics Department does not have an existing joint degree program combining linguistics and another field.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Course (5 units): Linguistics 20.

Required Upper Division Courses (27 to 30 units): Six courses, which must include Linguistics 103, 120A, 120B, two elective courses selected from 104 through 165B, and an additional elective linguistics course, which may be upper or lower division.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Linguistics offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Linguistics.

Indigenous Languages of the Americas

Lower Division Courses

17. Intensive Elementary Quechua. (12) Formerly numbered Quechua 17. Lecture, 15 hours; laboratory, five hours. Intensive course equivalent to courses 18A, 18B, 18C. Language of Incas and its present-day dialects, as spoken in Andean South America. Offered in summer only. Letter grading.

18A-18B-18C. Elementary Quechua. (4-4-4) Formerly numbered Quechua 18A-18B-18C. Lecture, five hours. Course 18A is enforced requisite to 18B, which is enforced requisite to 18C. Language of Incas and present-day Quechua language, as spoken in Andean South America. P/NP or letter grading.

Upper Division Courses

119A-119B-119C. Advanced Quechua. (4-4-4) Formerly numbered Quechua 119A-119B-119C. Lecture, five hours. Requisite: course 18C. Course 119A is requisite to 119B, which is requisite to 119C. Readings in Quechua. Dialectal and stylistic variation. Discussions mainly in Quechua. P/NP or letter grading.

191. Variable Topics Research Seminars: Indigenous Languages. (2 or 4) Formerly numbered Quechua 191. Seminar, three hours. Research seminars on selected topics on various indigenous languages. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

Graduate Course

596. Directed Studies in Quechua. (1 to 8) Formerly numbered Quechua 596. Tutorial, to be arranged. Requisites: courses 119A, 119B, 119C. Directed individual study or research in Quechua. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

Linguistics

Lower Division Courses

1. Introduction to Study of Language. (5) Lecture, three hours; discussion, one hour. Summary, for general undergraduates, of what is known about human language; unique nature of human language, its structure, its universality, and its diversity; language in its...
social and cultural setting; language in relation to other aspects of human inquiry and knowledge. P/NP or letter grading.

2. Language in the U.S. (5) Lecture, four hours; discussion, one hour. Survey of languages of the U.S. (American Indian languages, oldest immigrant languages, ethnic and regional varieties of English, and newest arrival languages) and social and political aspects of American language use. P/NP or letter grading.

4. Language and Evolution. (5) Lecture, four hours; discussion, one hour. Basic concepts and tools of evolutionary theory and linguistics relevant to how organisms with linguistic abilities evolved, and how particular languages, as cultural artifacts, survive and change socially.

5. World Languages. (5) Lecture, four hours; discussion, one hour. Introduction to linguistic diversity of world and to such core areas of linguistics as study of sound production (phonetics and phonology), word formation (morphology), and sentence formation (syntax). Structural characteristics of world languages and methods of classifying languages into families and types. Detailed discussion of representative languages with audiovisual illustrations to acquaint students with distinctive features of several key language families. Discussion of such linguistic concepts as pidgins and creoles, unrelated languages, language contact, and language endangerment, together with related sociopolitical issues. P/NP or letter grading.

6. Out of Mouths of Babes. (4) Lecture, six hours. How children acquire language, most complex of human cognitive achievements. Look at amazing linguistic abilities of infants and their first perception and production of speech sounds, then investigation of how children learn words and rules for producing and understanding sentences. Language acquisition in special populations such as children acquiring sign languages, bilingual children, and people acquiring language beyond critical period. Focus mainly on English, with consideration of other languages. Offered in summer only. P/NP or letter grading.

M10. Structural Linguistics. (5) Same as English M40.) Lecture, four hours; discussion, one hour. Introduction to structure of English words of classical origin, including most common base forms and rules by which alternate forms are derived. Students may expect to achieve substantial enrichment of their vocabulary while learning about etymology, semantic change, and abstract rules of English word formation. P/NP or letter grading.

88A-88B. Lower Division Seminars. (4-4) Seminar, three hours. Limited to freshmen/sophomores. Variable topics; consult Schedule of Classes. College of Letters and Science, or department for topics to be offered in specific term. May be repeated for credit. P/NP or letter grading.

97. Variable Topics in Linguistics. (1 to 4) Seminar, three hours; fieldwork, two hours. Variable topics offered by departmental faculty members. May be repeated for credit with topic change. P/NP or letter grading.

Upper Division Courses

103. Introduction to General Phonetics. (5) Lecture, four hours; discussion, one hour. Enforced requisite: course 20 with grade of B– or better. Phonetics of variety of languages and phonetic phenomena that occur in languages of the world. Extensive practice in perception and production of such phenomena. P/NP or letter grading.

105. Morphology. (5) Lecture, four hours; discussion, one hour. Requisite: course 104. In linguistics, morphology is study of word structure. Morphological theory seeks to answer questions such as how should words and their component parts (roots, prefixes, suffixes, vowel changes) be classified crosslinguistically? how do speakers store, produce, and process complex words (with affixes, compounds)? how do speakers know how to produce correct word forms even when they have not previously heard them? how do speakers know that particular words are well-formed or ill-formed? is there principled distinction in traditional division between inflection and derivation? how can we best account for variation in forms that are same (e.g., root in keep/kept even though vowels are different)? can we formulate crosslinguistic generalizations about word structure? P/NP or letter grading.

110. Introduction to Historical Linguistics. (5) Lecture, four hours; discussion, one hour. Requisites: courses 20, 103, 120A or 120B. Methods and theories appropriate to historical study of language, such as comparative method and reconstruction. Sound change, grammatical change, semantic change. P/NP or letter grading.

111. Intonation. (4) Lecture, two hours; laboratory, two hours. Requisites: courses 20, 103, 120A or 120B. Recommended: course 104 or 204A. Survey of intonational theory for English and other languages, with particular emphasis on phonological models of intonation. Laboratory equipment used for recording and analyzing intonation and studying the intonation systems of some languages. P/NP or letter grading.

114. American Indian Linguistics. (5) Lecture, four hours; discussion, one hour. Strongly recommended preparation: course 20. Survey of genetic areal, and typological classifications of American Indian languages; writing systems for American Indian languages; American Indian languages in social and historical context. One or more languages may be investigated in detail. P/NP or letter grading.

M115. Survey of African Languages. (4) (Same as African Languages M187.) Lecture, four hours. Requisites: courses 20 and 103A or 103B. Study of the distribution and classification of African languages and their phonological and grammatical structures; elementary practice in several languages. P/NP or letter grading.

120A. Phonology I. (5) Lecture, four hours; discussion, one hour. Requisites: courses 20, 103. Introduction to phonological theory of words, underlying forms, derivations, justification of phonological analyses. Emphasis on practical skills with problem sets. P/NP or letter grading.

120B. Syntax I. (5) Lecture, four hours; discussion, one hour. Requisite: course 120A with grade of B– or better. Course 120A is not requisite to 120B. Descriptive analysis of morphological and syntactic structures in natural languages; emphasis on insight into nature of such structures rather than linguistics formalization. P/NP or letter grading.

120C. Semantics I. (5) Formerly numbered 125.) Lecture, four hours; discussion, one hour. Requisite: course 120B. Survey of most important theoretical and descriptive claims about nature of meaning. P/NP or letter grading.

127. Syntactic Typology and Universals. (5) Lecture, four hours; discussion, one hour. Requisite: concurrent enrollment. Study of essential similarities and differences among languages in grammatical devices they use to signal the following kinds of concepts: relations between nouns and verbs (case and word order), negation, comparison, existence, possession, causation, interrogation, reflexivization, relativization, attribution (adjectives), time (tense and aspect), and backgrounding (subordination). Data from a range of languages presented and analyzed. P/NP or letter grading.

C128A-C128B. Romance Syntax: French. (4-4) Lecture, four hours. Preparation: some knowledge of French (or one Romance language). Enforced requisite: concurrent enrollment with course C128A. C128A and C128B. Structure of French language, with emphasis on properties of construction not found in English. Concurrently scheduled with course C128A-C128B. P/NP or letter grading.

130. Language Development. (5) Lecture, four hours; discussion, one hour. Requisites: courses 20, 120A, 120B. Survey of research and theoretical perspectives on language acquisition. Focus on children’s initial learning of language and development of phonology, morphology, syntax, and word meaning. P/NP or letter grading.

132. Language Processing. (5) Lecture, four hours; laboratory, one hour. Requisites: courses 103, 120A, 120B. Central issues in language comprehension and production, with emphasis on how theories in linguistics inform processing models. Topics include word understanding (with emphasis on spoken language), parsing, and error modalities of sentence production, and computation of syntactic structure during production. P/NP or letter grading.

C135. Neurolinguistics. (5) Lecture, four hours; discussion, one hour. Requisites: courses 20, 120A, 120B, 130. Examination of relationship between brain, language, and linguistic theory, with evidence presented from atypical language development and language disorders in the mature brain. Topics include methodologies to investigate normal and atypical hemispheric specialization for language and children and adults with acquired and/or congenital language disorders. Concurrently scheduled with course C235. P/NP or letter grading.

C140. Bilingualism and Second Language Acquisition. (5) Lecture, four hours; discussion, one hour. Requisites: courses 20, 120A, 120B. Course for graduate and advanced undergraduate students. Study of childhood bilingualism and adult and child second language (L2) acquisition, with focus on understanding nature of L2 grammar and grammatical processes underlying L2/bilingual acquisition. Discussion of neurolinguistic and social aspects of bilingualism. Concurrently scheduled with course C244. P/NP or letter grading.

M146. Language in Culture. (5) (Same as Anthropology M140.) Lecture, three hours; discussion, one hour; fieldwork, two hours. Requisite: course 20 or Anthropology 33. Study of language as aspect of culture; relations of language and culture and classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology. P/NP or letter grading.

M150. Introduction to Indo-European Linguistics. (5) (Same as Indo-European Studies M150.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: course 1 or 20. Indo-European languages (ancient and modern), including their relationships, chief characteristics, writing systems, and sociolinguistic contexts; nature of European proto-language and proto-culture. One or more Indo-European languages may be investigated in detail. P/NP or letter grading.
160. Field Methods. (5) Seminar, four hours; individu- al or group sessions, one to two hours. Requisites: courses 103A, 103B. Analysis of language un- known to members of class from data elicited from na- tive speaker of that language. P/NP or letter grading.

165A. Phonology II. (5) Lecture, four hours; discus- sion, one hour. Requisite: course 120A. To be taken in term following completion of course 120A or as soon as possible thereafter. Further study in phonological theory and analysis: autosegmental theory, syllable structure, metrical theory, interface of phonology and grammar. P/NP or letter grading.

165B. Syntax II. (5) Lecture, four hours; discussion, one hour. Requisite: course 120B. To be taken in term following completion of course 120B or as soon as possible thereafter. Recommended for students who plan to do graduate work in linguistics. Form of grammars, word formation, formal and substantive universals in syntax, relation between syntax and semantics. P/NP or letter grading.

165C. Semantics II. (5) Lecture, four hours; discus- sion, one hour. Requisite: course 120C. Recommend- ed for students who plan to do graduate work in lin- guistics. Further study in relevant logics, relations be- tween sentences, lexical semantics, tense and aspect, adverbs, modality and intensification. P/NP or letter grading.

170. Language and Society: Introduction to Socio- linguistics. (4) (R) fulfills 20-20 course. Study of pat- terned covariation of language and society; social dia- lects and social styles in language; problems of multi- lingual societies.

175. Linguistic Change in English. (5) Lecture, four hours. Requisites: courses 110D, 120A, 120B. Princi- ples of linguistic change as exemplified through de- tailed study of history of English pronunciation, lexicon, and syntax. P/NP or letter grading.

M175A. Japanese Phonology and Morphology. (4) (Same as Japanese CM122.) Lecture, three hours; discussion, one hour. Recommended preparation: two or more years of Japanese. Survey of Japanese phon- etics, phonology, and morphology. Letter grading.

185A. Computational Linguistics I. (5) Lecture, four hours; laboratory, one hour. Requisites: courses 120B, 180, Program in Computing 10B (or Computer Science 32). For students who wish to pursue research of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. P/NP or letter grading.

185B. Computational Linguistics II. (5) Lecture, four hours; laboratory, one hour. Requisite: course 185A. Extensions of basic language processing techniques to natural language processing. Recent models of syn- tactic and semantic representation, participation of English speakers, attention to their linguistic sophistication and psycho- logical plausibility. P/NP or letter grading.

191A. Variable Topics Research Seminars: Lin- guistics. (2 or 4) Seminar, three hours. Research seminar on selected topics. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

191B. Variable Topics Research Seminars: Lin- guistics. (2 or 4) Seminar, three hours. Research seminar on selected topics. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. P/NP or letter grading.

192A-192B. Undergraduate Practicum in Linguis- tics. (4-2) Seminar, seven hours (course 192A) and six hours (course 192B). Limited to juniors/seniors. Participation of faculty mentor, master’s level un- dergraduate students to assist in linguistics courses. Students assist in preparation of materials and devel- opment of innovative programs under guidance of facul- ty mentors and teaching assistants. May not be ap- plied toward course requirements for any Linguistics Department major. Individual contract required. Infor- mation and contracts may be obtained from Linguistics Department. P/NP or letter grading.

197. Individual Studies in Linguistics. (2 to 4) Tuto- rial, four hours. Requisite: course 1 or 20. Limited to ju- niors/seniors. Individual intensive study, with sched- uled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

198A. Honors Research in Linguistics I. (4) Tutori- al, to be arranged. Preparation: 3.5 grade-point aver- age. Requisite or corequisite: course 165A (or 200A) or 165B (or 200B). Recommended: completion of both courses 165A and 165B (or 200A and 200B) before or during term in which course 198A is taken. Limited to juniors/seniors. Development of honors thesis or com- prehensive research project on linguistic topic selected by student and approved by instructor. Fulfillmen- t of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

198B. Honors Research in Linguistics II. (2) Tutori- al, to be arranged. Requisite: course 198A. Limited to juniors/seniors. Completion of honors thesis or com- prehensive research project begun in course 198A un- der direct supervision of faculty member. Consult pro- fessor in charge to enroll. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Lin- guistics. (4) Tutorial, to be arranged. Limited to senior Linguistics majors. Supervised individual research or investigation of linguistic topic selected by student un- der guidance of faculty mentor. Submission of admi- nistering paper re- quired. Consult professor in charge to enroll. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

200A. Phonological Theory I. (4) Preparation: gradu- ate linguistics student or grade of A in course 120A or equivalent course in phonology. Courses 200A and 201 form two-course survey of current research in pho- nology theory. Introduction of phonology with mor- phology and syntax, syllable structure, stress.

200B. Syntactic Theory I. (4) Preparation: graduate linguistics student or grade of A in course 120B or equivalent course in syntax. In-depth introduction to selected topics: representation of un- derlying structure of predicates, arguments, and grammatical re- lations. Topics include levels of representation, X-bar theory, case theory, thematic roles, the lexicon, gram- matical function-changing rules, head-complement re- lations.

200C. Semantic Theory I. (4) Lecture, four hours. Requisite: course C180 or C208. Overview of current results and research methods in linguistic semantics. Topics include generalized quantifiers and semantic universals; predicate-argument structure; binding and prononominalization, formal semantic inter- pretation, syntax and LF, tense, ellipsis, and focus. Let- ter grading.

201A. Phonological Theory II. (4) (Formerly num- bered 201.) Lecture, four hours. Requisite: course 200A. Continuation of course 200A. Second course in two-course survey of current research in phonological theory. Topics include sound changes (tone, tiers, phonological structure), feature theory, underspecification, prosodic morphology, S/U or letter grading.

201B. Syntactic Theory II. (4) (Formerly numbered 206.) Lecture, four hours. Requisite: course 200B. In- depth introduction to selected topics in theory of move- ment processes and topics selected from following ar- eas: WH movimiento and related rules, subjacency and other constraints on movement; ECP and related con- ditions on distribution of empty categories; resumptive pronoun constructions; parametric variation in move- ment constructions; LF WH-movement; filters; recon- struction; parasitic gaps; barriers theory; control theo- ry; null subject parameter. S/U or letter grading.

204A. Experimental Phonetics. (4) (Formerly num- bered 204.) Lecture, three hours. Requisite: course 103. Use of laboratory equipment to investigate articu- latory and acoustic characteristics of speech. S/U or letter grading.

204B. Speech Production. (4) Lecture, three hours; laboratory, one hour. Requisite: course 104 or 204A. Survey of topics in speech production research, es- pecially as related to linguistic phonetics. Topics include physiology of vocal tract and models of speech produc- tion and articulatory/acoustic relations. Emphasis on use of laboratory methods such as acoustic transducers, electromagnetic articulography, static and electropalatogra- phy, electromagnetic articulography, and imaging tech- niques. S/U or letter grading.

209A. Computational Linguistics I. (5) Lecture, four hours; laboratory, one hour. Survey of recent work on natural language processing, including basic syntactic
linguistics, psycholinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements. Meets with course 258A. Course 201, 202, 203, or 204A may be required. Specialized topics in phonetics and phonology. May be repeated once for credit. S/U grading.

258A. Topics in Phonetics and Phonology II: Proseminar. (2) Seminar, three hours. Requisite: course 256A. Specialized topics in phonetics and phonology. May be repeated once for credit. Letter grading.

258B. Topics in Language Variation II: Proseminar. (2) Seminar, two hours. Requisite: course 257A. Special topics in language variation. May be repeated once for credit. Letter grading.

259A. Topics in Linguistics II: Proseminar. (4) Seminar, four hours. Requisite: course 258A. Individual presentations on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May be repeated once for credit. Letter grading.

259B. Topics in Linguistics II: Proseminar. (2) Seminar, two hours. Requisite: course 258A. Specialized topics in language variation. May be repeated once for credit. Letter grading.

260A-260B-260C. Seminars: Phonetics. (2 or 4 each) Seminar, three hours. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

261A-261B-261C. Seminars: Phonology. (2 or 4 each) Seminar, three hours. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

263A-263B-263C. Seminars: Language Variation. (2 or 4 each) Seminar, three hours. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

264A-264B-264C. Seminars: Special Topics in Linguistic Theory. (2 or 4 each) Seminar, three hours. Special topics may include child language, neurolinguistics, psycholinguistics, sociolinguistics, etc. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

265A-265B-265C. American Indian Linguistics Seminar. (1 or 4 each) Seminar, two hours; fieldwork, four hours. Presentation of research on American Indian linguistics. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 1 or 4 units. May be repeated for credit. S/U grading.

303. Computational Phonetics. (2 or 4 each) Extensive practice in production, perception, and transcription of sounds from wide range of languages. Course schedules will vary depending on the specific teaching assistants for 2 units. May be repeated for credit. S/U grading.

411A-411B. Research Orientation. (2-2) Designed for graduate students. Sequence of lectures by department faculty to acquaint new graduate students with research directions and resources of department and elsewhere on campus. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

422. Practicum: Phonetic Data Analysis. (3) Designed for graduate students. Workshop in examination of phonetic data, such as sound spectrograms, oscillographic records, and computer output. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

444. M.A. Thesis Preparation Seminar. (4) Student presentations, two hours. Student presentations of proposed topics for M.A. theses, with discussion and criticism by other students and faculty. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

495. College Teaching of Linguistics. (2) Seminar, to be arranged. Designed for graduate students. Required of all new teaching assistants. Seminars, workshops, and apprentice teaching. Selected topics, including curriculum development, various teaching strategies, and their effects, teaching evaluation, and other topics on college teaching. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

569A. Directed Studies. (1 to 8) Preparation: completion of all undergraduate deficiency courses. Directed individual study or research. May be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

569B. Directed Linguistic Analysis. (1 to 8) Preparation: completion of M.A. degree requirements. Intensive work with native speakers by students individually. May be repeated for credit. S/U grading.

597. Preparation for M.A. Comprehensive and Ph.D. Qualifying Examinations. (1 to 8) Preparation: at least six graduate linguistics courses. May be taken only in terms in which students expect to take comprehensive or qualifying examinations. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

598. Research for Ph.D. Dissertation. (1 to 16) Preparation: advancement to Ph.D. candidacy. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.
Subramaniam Ramanarayanan, Ph.D.
Guillaume Y. Roels, Ph.D.
Richard E. Saouma, Ph.D.
Jenessa R. Shapiro, Ph.D.
Suzanne B. Shu, M.Eng., M.B.A., Ph.D.
Jason A. Snyder, Ph.D.
Steven A. Spiller, B.A., Acting
Geoffrey A. Tate, Ph.D.
Miguel M. Unzueta, Ph.D.
Nico Voigtlander, M.Sc., Ph.D.
Liu Yang, Ph.D.
Maia J. Young, Ph.D.
Robert Zeithammer, Ph.D.

Senior Lecturers
Ariella D. Herman, Ph.D.
Robert S. Spich, Ph.D.

Lecturers
Stephen D. Cauley, Ph.D.
Gonzalo Freexes, J.D.
Julie Ann Gardner-Treloar, M.B.A.
Peter Guber, LL.M.
Jane Guerin, J.D.
Gordon L. Klein, J.D.
Danny S. Litt, M.B.A.
David S. Ravetch, M.A.
Eric H. Sussman, M.B.A.

Adjunct Professors
William M. Cockrum, M.B.A.
Jeffrey A. Dubin, Ph.D.
Janis S. Forman, Ph.D.
Robert F. Foster, M.B.A.
George T. Geis, Ph.D.
Peter S. Pao, Ph.D.
James R. Stengel, M.B.A.

Adjunct Associate Professor
Robert M. McCann, Ph.D.

Adjunct Assistant Professors
Anike M. Audenaert, M.A.
Jason C. Hsu, M.Sc., Ph.D.
Andres Terech, Ph.D.

Scope and Objectives
The John E. Anderson Graduate School of Management at UCLA offers a variety of programs leading to graduate degrees at the master’s and doctoral levels. These include an academic (M.S.) and professional (M.B.A.) master’s and a Master of Financial Engineering (M.F.E.), as well as an Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management and a three-year Fully Employed M.B.A. Program for emerging managers. The school also offers a part-time dual Executive M.B.A. degree with the National University of Singapore (NUS) Business School that prepares participants for top positions in organizations around the world. A Ph.D. in Management is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.

The school offers an undergraduate minor in Accounting and several undergraduate courses in management. Enrollment in these courses, although open to all University students who have completed the requisites, is limited. The school limits the number of courses taken by undergraduate students to 11.

Undergraduate Study
Accounting Minor
The Accounting minor provides students with a comprehensive accounting background; admission is competitive and based on overall UCLA grade-point average, grade-point average in preadmission courses, and the grades in Management 1A and 1B. Decisions on admission to the minor are made by the Anderson School Accounting Area. Applications are accepted in Fall, Winter, and Spring Quarters. Nontransfer students must apply subsequent to completing 90 units. Transfer students must apply after completing two academic quarters (excluding Summer Sessions) at UCLA.

To enter the minor, students must (1) have a minimum cumulative UCLA grade-point average of 3.2, (2) complete all required preadmission courses with a minimum course grade-point average of 3.2, and (3) receive grades of B or better in Management 1A and 1B. Repeition of more than one preadmission course or of any preadmission course more than once results in automatic denial of admission to the minor. Satisfying these requirements does not guarantee admission to the program, as only a limited number of students are admitted each year. For further information, see http://www.anderson.ucla.edu/x25205.xml.

Required Preadmission Courses (31 units minimum): Economics 1, 2, any statistics course offered or considered transferable to UCLA, Management 1A and 1B (former course 100 taken at UCLA may be substituted), Mathematics 3A or 31A, 3B or 31B or 31E, one Writing II course. If Management 1A and 1B are not taken at UCLA, students must complete courses 120A and 122.

Required Upper Division Courses (36 units): Management 120A, 120B, 122, 127A, and three courses from 107, 108, 109, 123, 124, 126, 127B, 127C, 128, 130A.

Transfer credit for any of the above courses is subject to department approval and is considered only for the preadmission courses. Only one preadmission and one upper division course repeat is allowed.

Each preadmission and upper division course must be taken for a letter grade; if taken on a Passed/Not Passed basis, it cannot be applied toward the minor program. Each management course must be completed at UCLA with a grade of C or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/programintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.
Graduate Degrees

The John E. Anderson Graduate School of Management offers Master of Science (M.S.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Management, the Master of Business Administration (M.B.A.) degree, and the Master of Financial Engineering (M.F.E.) degree. The school also offers the Executive M.B.A. Program (EMBA) and the M.B.A. for the Fully Employed (FEMBA).

Management

Lower Division Courses

1A-1B. Principles of Accounting. (4-4) Lecture, three hours; discussion, one hour. Not open to freshmen. P/NP or letter grading. 1A. Introduction to financial accounting principles, including preparation and analysis of financial transactions and financial statements. 1B. Students define, prepare, and present their own research projects with guidance of professional school faculty mentor. Letter grading.

Upper Division Courses

107. Business Communications. (4) Process and discipline of effective spoken presentations. Examination and application of classical and contemporary thinking on substance, structure, and delivery of messages. Elements of graphic presentation of data and presentation technology. Students design and deliver informative and persuasive presentations on key management issues. Critique of all efforts; certain efforts to be videotaped for review. P/NP or letter grading.

M118A. Complexity Science for Social Systems. (4) (Same as Human Complex Systems M130.) Lecture, four hours. Limited to juniors/seniors. Introduction to (1) complexity science as applied to social behavior and (2) agent-based computational modeling. Use of complexity science to bridge old and new conceptions of social science. Newtonian science, neoclassical economics, and old-style approaches to social science all build on assumptions that all basic aspects comprising phenomena (atomic particles, atoms, molecules, organisms, people, groups, firms) are homogeneous and go forward in time under equilibrium conditions interspersed with occasional disequilibrium periods. Letter grading.

122. Management Accounting. (4) Lecture, three hours. Requisite: course 1B. Analysis of summarization of accounting data, trend analysis, and techniques of management decision making. P/NP or letter grading.

123. Auditing. (4) Lecture, three hours. Requisite: course 120B. Specialized auditing concepts and techniques including audit planning, analytical procedures, audit reports; joint-product costing; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis. P/NP or letter grading.

126. Financial Statement Analysis. (4) Lecture, four hours. Requisite: course 120B. Comprehensive study of concepts and procedures used to interpret and analyze financial statements. P/NP or letter grading.

127A. Tax Principles and Policy. (4) Lecture, three hours. Requisite: course 120B. Examination of federal income tax problems encountered by individuals and other entities in analyzing business, investment, employment, and personal decisions. Special emphasis on role of tax rules in capital transactions and decision making. P/NP or letter grading.

127B. Corporate and Partnership Taxation. (4) Lecture, three hours. Requisite: course 120B. Recommended: course 127A. Study of tax issues arising in formation, operation, and termination of corporations and partnerships. Special emphasis on closely held enterprises, including S corporations. P/NP or letter grading.

127C. International Taxation. (4) Lecture, three hours. Recommended requisite: course 127A. Study of two principle areas of international taxation from U.S. regulatory perspective: taxation of American citizens and companies conducting business in international arena (outbound transact.); and taxation of foreign nationals and companies who invest or conduct business in the U.S. (inbound transactions). P/NP or letter grading.

128. Special Topics in Accounting. (4) Lecture, three hours. Requisite: course 120A. Analysis of special topics in public accounting, such as audit and fraud examination, mergers and acquisitions, public-company status and going-public process, role of partner, serving as a refresher course for general accounting students. Discussion of a case study of current interest in accounting profession. P/NP or letter grading.

130A. Basic Managerial Finance. (4) Lecture, three hours. Requisite: course 1B, one statistics course. Study of financial decision making by business firms, with emphasis on applications of economic and accounting principles in financial analysis, planning, and control. Extensive use of problems and cases to illustrate varied analytical techniques employed in decision making. P/NP or letter grading.

130B. Advanced Managerial Finance. (4) Lecture, three hours. Requisite: course 130A. Analysis of capital budgeting and working capital management. Review of long-term financing through security markets and leasing. Decision-making under uncertainty, including use of cash flow concepts, interest rates, and security-price-making forces; construction of personal investment programs.

150. Elements of Industrial Relations. (4) Prerequisite: course 130A. Principles underlying investment analysis and policy; salient characteristics of governmental and corporate securities; policies of investment companies and investing institutions; relation of investment policy to money markets and business fluctuations; security price-making forces; construction of personal investment programs.

155. Elements of Real Estate and Urban Land Economics. (4) Examination of the decision making of investors as related to logical forces shaping cities and influencing real estate market functions and land uses. Emphasis on decision making as it relates to appraising, building, financing, managing, marketing, and using urban property.

180. Special Topics in Management. (4) Lecture, four hours. Topics of special interest to undergraduate students. Specific subjects may vary each term depending on particular interest of instructors or students. May be repeated for credit. P/NP or letter grading.

182. Leadership Principles and Practice. (4) Knowledge and skills leading to effectiveness in interpersonal relations. Understanding oneself as a leader and others as individuals and as members of working groups. Understanding of group process, including group leadership. Lectures and "sensitivty training" laboratory.

195. Community or Corporate Internships in Management. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Internship in a community agency or business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.
Graduate Courses

199. Directed Research in Management. (2 to 8) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation of selected research topics under the guidance of a faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

201A. Business Forecasting: Turning Numbers into Knowledge. (4) Discussion, three hours. Prepar- ration: familiarity with linear regression. Examination of one approach to analytical thinking, combining numerical and textual data into carefully formulated alternative models. Data studied include macroeconomic variables (growth, inflation, unemployment, interest rates, and exchange rates), industry data, and firm data. Letter grading.

203A. Economics of Decision. (4) Discussion, three hours. Preparation: basic probability theory. Basics of single-person decision theory and introduction to non-cooperative game theory. Examination in some detail of von Neumann/Morgenstern expected utility theory. Other topics in decision theory include subject ex- pected utility theory and decision rules from expected utility behavior. S/U or letter grading.

206B. Market Power, Mergers, and Antitrust. (4) Lecture, three hours. Requisite: course 405. Topics in applied industrial organization, including merger policy, differentiated product demand, market power, and Department of Justice and Federal Trade Commission Merger Guidelines. Examination of issues in antitrust based on the problems which can arise with emphasis on prac- tice and measurement. S/U or letter grading.

207. Resource Administration of Nonmarket Activ- ities. (4) Seminar, three hours. Requisite: course 405. Examination of behavior of managers in profit vs. not- for-profit sectors to determine critical variables that ex- plain observed differences in behavior. Use of method- ology of microeconomics, particularly utility maximiza- tion.

208. Public Services and Private Functions. (4) Requisites: courses 405, 406. Sources and uses of federal, state, and local revenues and their impact on public and private resource allocation. Examination of proper roles of government in the provision of public goods and services.

209A-209B. Elements of Economic Organization. (1 to 6 each) (Formerly numbered M209.) Same as Law M229. (Lecture, three hours. Preparation: familiarity with basic principles of accounting and valuation. Course M209A is enforced requisite to 209B. Advanced course in business organization and structure of business transactions and allocation of control, risk, and return. Topics include venture capital investments, debt and loan agreements, employment agreements, distribution and marketing agreements (including franchising), motion picture production/finance/distribution agreements, and joint ventures. Assigned reading and focus on documents that incorporate terms of business transactions of deals. In Progress (M209A) and S/U or letter (209B) grading.

210A. Mathematical Programming. (4) Discussion, three hours. Preparation: linear algebra. Comprehen- sive development of major computational meth- ods of linear programming, with applications to a vari- ety of areas. S/U or letter grading.

210B. Applied Stochastic Processes. (4) Discus- sion, three hours. Preparation: probability theory at lev- el of Electrical Engineering 131A or Mathematics 170A or Statistics 100A. Topics include Poisson processes, renewal theory, Markov chains, and Markov decision processes, with emphasis on problem formulation, de- cision making, and characterization of optimal policies. Specific applications include traditional operations re- search topics (inventory, queueing, maintenance, reli- ability), as well as several in microeconomics (search and research) and in letter and letter grading.

210C. Network Flows and Integer Programming. (4) Discussion, three hours. Preparation: linear pro- gramming. Survey course to (1) lay foundations for more advanced study of graphs, network flow models, and integer programming models and their applica- tions, (2) establish connections between these techni- cal foundations and real problems drawn from many areas of management, and (3) build professional skills needed to apply these tools. S/U or letter grading.

211A. Nonlinear Mathematical Programming. (4) Discussion, three hours. Requisites: course 210A, Mathematics 170A or 171A, and 100A. Topics in classical and numerical methods of optimization for situations where models must be nonlinear, with special emphasis on case of “convexity.” Topics include classical approaches to optimization, theoretical aspects of optimization, and development of strategies and survey of currently available comput- er software. S/U or letter grading.

211B. Large-Scale Mathematical Programming. (4) Discussion, three hours. Requisite: course 210A. The- ory, methods, and applications of optimization for situa- tions where models are large and have special struc- ture, as is often the case in real applications. Focus on ways of exploiting special structures with combinator- al, multidimensional, and optimization software. S/U or letter grading.

212B. Decision Sciences Models II. (4) Lecture, four hours. Requisites: course 407. Broad survey of nonlinear, time-staged, and probabilistic models for managerial decision making. Application areas include finance, marketing, facilities design, production, and energy systems. S/U or letter grading.

213B. Statistical Methods in Management. (4) Dis- cussion, three hours. Requisite: course 402. Introduction to parameter and interval estimation, simple and multiple linear regression and correlation, fixed, ran- dom, and mixed effects analysis of variance models and nonparametric statistics, all as they apply to man- agement studies. S/U or letter grading.

214. Managerial Decision Making. (4) Dis- cussion, three hours. Preparation: working knowledge of differential and integral calculus of several variables, basic probability theory, and univariate mathematical statistics. Introduction to use of multivariate models in management research to organize and represent infor- mation; interpretation of coefficients from multivariate exploratory models (e.g., principal axes and factor analysis models); survey of multivariate statistical proce- dures (e.g., multiple discriminate analysis, multivari- ate analysis of variance, canonical correlation, and confirmatory factor models). S/U or letter grading.

215. Managerial Decision Analysis. (4) Lecture, three hours. Introduction to principles of rational judgment and choice, common behavioral biases of managers and consumers, and corrective tools and procedures, drawing heavily on disciplines of psychology and be- havioral economics. Topics include decision structur- ing, chance processes, forecasting, confidence, likeli- hood judgment, risk perception and risk-taking, deci- sion under uncertainty, multiattribute decision making, and mental accounting, intertemporal choice, alloca- tion decisions, organizational decision making, choice architecture, happiness, and well-being. S/U or letter grading.

215. Negotiations Analysis. (4) Discussion, three hours. Series of negotiation exercises to foster devel- opment of students' negotiation skills and experience. Use of economic and game-theoretic concepts in de- brief to gain insight and develop framework for finding the broad negotiation principles applicable. S/U or let- ter grading.

216A. Simulation of Modeling and Analysis. (4) Discussion, three hours. Preparation: probability theory, mathematics 406, 407, or Statistics 100A. Topics include computer simulation models for managerial decision making under uncertainty or complex dynam- ics, with emphasis on simulation methodology such as design, validation, operating procedures, and interpre- tation of results. Application areas include finance, marketing, and production. S/U or letter grading.

217A. Decision Analysis. (4) Lecture, three hours. Requisite: course 402. Managerial decision making occurring in multifocal or multidimensional, areas of control of events over which no individual has any control or it can be about what other individuals will do. Framework provided for structuring and analyzing such decisions, with introduction of frameworks such as product design, marketing, production, and strategic decisions. S/U or letter grading.

217B. Game Theory. (4) Discussion, three hours. Requisites: course 213B. Univariate Box/Arrow analysis, transfer functions, and intervention analysis. Relationship between econometric and time-series models, Granger causality, multiple time-series analy- sis. New computer applications in modeling and forecasting. S/U or letter grading.

218. Public Services and Private Functions. (4) Lecture, three hours. Preparation: knowledge of multiple linear regression and correlation, fixed, random, and mixed effects analysis of variance models and nonparametric statistics, all as they apply to man- agement studies. S/U or letter grading.

218A. Business Forecasting: Turning Numbers into Knowledge. (4) Discussion, three hours. Prepar- ration: familiarity with linear regression. Examination of one approach to analytical thinking, combining numerical and textual data into carefully formulated alternative models. Data studied include macroeconomic variables (growth, inflation, unemployment, interest rates, and exchange rates), industry data, and firm data. Let- ter grading.
218A. Selected Topics in Decisions, Operations, and Technology Management. (1 to 4) Discussion, three hours. Newly developing topics of interest to Ph.D. students. Topics have included reliability and optimal maintenance theory, large-scale distribution/inventory systems, and Markovian decision processes under uncertainty. May be repeated for credit. S/U or letter grading.

221A. Principles of Management. (4) Lecture, three hours. Requires: course 403. Use of basic microeconomics to answer what information is needed to make managerial decisions, what incentives are needed to motivate managers, and how information should be recorded to facilitate both. Essential for careers in consulting, private equity, and general management. S/U or letter grading.

224. Business Law for Managers and Entrepreneurs. (4) Lecture, three hours. Introductory course that uses practical approach to teach students to recognize and manage legal issues. Topics include contract law, litigation process and alternatives, intellectual property law, business formation, corporate law, employment law, collateralized lending, and bankruptcy reorganizations. How to deal with potential legal issues before they become serious problems. S/U or letter grading.

225. Special Advanced Topics in Accounting. (4) Lecture and cases, three hours. Requires: course 403. Examination of advanced topics in accounting that arise in business combinations and international accounting practices, including principles underlying consolidated financial statements, treatment of unconsolidated subsidiaries and affiliate investments, translation of foreign exchange and, valuation of derivatives for hedging exchange risk. S/U or letter grading.

229A. Special Topics in Accounting. (4) Lecture, three hours. Designed for Ph.D. students. Examination in depth of topics of current concern in accounting, such as application of information economics and principal-agent model to accounting.

229X and 229Z. Accounting Workshops. (1-1-2) Discussion, two hours. Designed for Ph.D. students. Intended to develop ability to critically evaluate research in fields relevant to study of accounting. Papers presented in colloquium format by leading scholars in accounting. Active participation and intellectual inter-change encouraged through discussion of papers during colloquium. May be repeated for credit. S/U grading.

230. Theory of Finance. (4) Lecture, three hours. Requires: course 408. Primary focus on valuation of corporate liabilities and other securities under uncertainty. Capital asset pricing model presented rigorously and counter-examples and problems of market pricing such as arbitrage pricing theory and option pricing model, using empirical evidence. Secondary focus on analysis of problems in corporate finance such as optimal financing decisions and role of the market for corporate control. S/U or letter grading.

231A. Topics in Corporate Finance. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Identification of fundamental issues through use of cases. Application of financial theory and financial techniques to business problems, using written reports and classroom discussion. S/U or letter grading.

231B. Nonprofit Sector Financial Policy. (4) Lecture, three hours. Requires: courses 408, 430. Identifying and solving financial problems for all types of nonprofit organizations, with attention to funds accounting, budgeting and control, investment decision making, capital structure, and sources of funds for nonprofit organizations. Use of cases. S/U or letter grading.

231C. Corporate Valuation. (4) Lecture, three hours. Requires: courses 230, 403, 408. Preparation: training in econometrics to answer what information is needed to make managerial decisions, what incentives are needed to motivate managers, and how information should be recorded to facilitate both. Essential for careers in consulting, private equity, and general management. S/U or letter grading.

231D. Takeovers, Restructuring, and Corporate Governance. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

232A. Market and Credit Risk Management. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Theory and practice of financial institutions and stock exchanges. Main topics include deposit insurance and regulation, international banking, bank microstructure, and investment banking. S/U or letter grading.

232C. International Financial Markets. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

232D. International Financial Markets. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

232E. International Financial Markets. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

232F. Behavioral Finance. (4) Lecture, three hours. Requirements: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

233A. International Financial Markets. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

233B. Financial Institutions. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

233C. Financial Institutions. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

233D. Financial Management of Multinational Corporations. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

233E. Financial Management of Multinational Corporations. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

233F. Financial Management of Multinational Corporations. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

234A. International Financial Markets. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

234A. International Financial Markets. (4) Lecture, three hours. Requires: courses 230 (or 430), 408. Examination of issues faced by entrepreneurs who are setting up new firms, as well as decisions of private equity partnership managers and investors. How transactions are structured and why investors and entrepreneurs choose certain contractual arrangements. Development of understanding for institutional context of private equity finance. Time also devoted to leveraged buyouts. S/U or letter grading.

Management / 429
folio choice, standard discounted cash flow approaches, and no-arbitrage framework for valuing financial securities. Basic paradigms of asset pricing, such as capital asset pricing model (CAPM), arbitrage pricing theory (APT), and Fama-French Three-Factor model. Development and illustration of dynamic portfolio selection and optimization approaches. Brief introduction to number of important asset classes such as equities, corporate bonds, real estate, and venture capital. S/U or letter grading.

237G. Computational Methods in Finance. (4) Lecture, three hours. Limited to Master of Financial Engineering Program students. Quantitative and computational tools used in finance, including numerical techniques such as implementation of binomial and trinomial option pricing algorithms for computing derivative prices and hedge ratios, simulation-based algorithms for pricing American options, and numerical solution of partial differential equations that appear in financial engineering. S/U or letter grading.

237H. Quantitative Asset Management. (4) Lecture, three hours. Limited to Master of Financial Engineering Program students. Application of state-of-art quantitative techniques to asset management problems. Analysis of portfolio, asset class, and sector models in depth, portfolio optimization and construction, and dynamic strategies such as pairs trading, long-term and short-term momentum trades, and mean reversion to understand financial anomalies. Major forms of asset management structures such as mutual funds, hedge funds, exchange traded funds (ETFs), special investment vehicles, and some primary types of trading strategies used by these organizations. S/U or letter grading.

237K. Introduction to Credit Markets. (4) Lecture, three hours. Limited to Master of Financial Engineering Program students. Introduction to building and implementation of credit models for use by financial institutions and quantitative analysis of corporate debt securities and in-depth introduction to credit derivatives markets. Discussion of structured credit products such as both cash and synthetic collateralized debt obligations. S/U or letter grading.

237M. Special Topics in Financial Engineering. (2 to 4) Lecture, three hours. Limited to Master of Financial Engineering Program students. In-depth examination of problems or issues in one area of current concern in financial engineering. May be repeated for credit with instructor change. S/U or letter grading.

238. Special Topics in Finance. (4) Lecture, three hours. Requisites: courses 230 (or 430), 408. Selected topics in finance theory, empirical studies, and financial policy. May be repeated for credit with instructor change. S/U or letter grading.

239A. Theory of Exchanges under Uncertainty. (4) Lecture, three hours. Primarily designed for Ph.D. students, but well-prepared master's students may find course useful in their preparation. Focuses on theory of exchange developed as introduction to the theoretical literature on pricing of capital assets. S/U or letter grading.

239B. Theory of Investment under Uncertainty. (4) Lecture, three hours. Primarily designed for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. Foundations of theory of firm capitalization and investment decisions, with special attention to questions of exchange and allocative efficiency. S/U or letter grading.

239C. Empirical Research in Finance. (4) Lecture, three hours. Preparation: 408 in econometrics. Primarily designed for Ph.D. students, but well-prepared master’s students may find course useful in their career preparation. In-depth study of empirical research in field of finance, statistical methodologies applied to test market efficiency, and asset pricing theory. S/U or letter grading.

239D. Ph.D. Seminar: Corporate Finance. (4) Seminar, three hours. Designed for Ph.D. students. Advanced study of corporate finance with emphasis on empirical analysis and applications of empirical research. May be repeated for credit with instructor change. S/U or letter grading.

239X-239Y-239Z. Finance Workshops. (1-1-2) Discussion, 90 minutes. Designed for Ph.D. students. Intended to develop ability to critically evaluate finance research. Papers presented in colloquium format by leading scholars in finance. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U grading.

240D. Operations Strategy: Theory and Practice. (4) Discussion, three hours. Requisite: course 410. Definition and scope of operations strategy. Integrated framework for assessing crucial fit between operational strategies and corporation’s strategic positioning. Cases used to illuminate strategic issues in both manufacturing and nonmanufacturing situations. Object of practicum, or applied strategy aspect of course, to provide students with skill in identifying operationally appropriate business processes and metrics required to implement enterprise’s strategic position. S/U or letter grading.

240F. Global Supply Chain Management. (4) Lecture, three hours. Requisite: course 410. Business environment today is characterized by globalized operations, intense competition, rapid technological change, and short product life cycles. Consequently, firms can no longer afford to operate in isolation. In many industries, competition has moved beyond the national and regional level. Provides understanding of strategic, tactical, and operational issues in supply chain management, with generative attention to emerging digital economy. S/U or letter grading.

241A. Technology Management. (4) Lecture, three hours. Requisites: courses 410, 411A, 411B. Management of high-technology industries, technology creation, and utilization of technology and knowledge assets. Research and product development, product and technology research, network structures, high-technology markets, competition, and technology strategies. Case examples from sectors such as computing, telecommunications, e-business, medical devices, nanotechnology, advanced transportation systems, and electronics. S/U or letter grading.

242B. Models for Operations Systems Design. (4) Discussion, three hours. Requisite: course 242D. Designed for Ph.D. students. Survey of research literature on models for design of manufacturing and service systems, including long-range forecasting, operational
economies, capacity, location, facilities, processes/technology, work, and work structures. S/U or letter grading.

243B. Inventory Theory. (4) Discussion, three hours. Requisite: course 210B. General discussion of inventory models, with emphasis on characterizing form of optimum policies and efficient computational methods. Determination of optimum order-up-to level, economic lot size, and continuous-time models. S/U or letter grading.

244X-244Y-244Z. Research in Decisions, Operations, and Technology Management. (1-1-2) Lecture, three hours. Designed for first- and second-year Ph.D. students in decisions, operations, and technology management. Emphasis on recent developments and application of specialized knowledge. Topics vary each term and have included strategy for information-intensive industries, empirical research in operations research, and analytical methods of operation research, introduction to management in information economy, and models for medical management. May be repeated for credit with topic change. S/U or letter grading.

246A. Management in the Information Economy. (4) Lecture, three hours. Designed for M.B.A. and Ph.D. students. Studies of advanced subjects of current interest in decisions, operations, and technology management. Emphasis on recent developments and application of specialized knowledge. Topics vary each term and have included strategy for information-intensive industries, empirical research in operations research, and analytical methods of operation research, introduction to management in information economy, and models for medical management. May be repeated for credit with topic change. S/U or letter grading.

246C. Management in Public and Private Nonprofit Sectors. (4) Designed for graduate students. Examination of roles and management systems of the three sectors of U.S. society: unique aspects and managerial issues of public and private nonprofit organizations and of their political, social, and technical environments. Financial, marketing, and operational considerations and evaluation, control, and ethical issues of service delivery systems.

247A. Environment of the Art World. (4) Consideration and analysis of political, social, economic, and environmental forces in American society as they affect existence and development of arts institutions in the U.S. Exploration of present policies and trends and potential future developments.

247B. Role of Management in Artistic Decision Making. (4) Designed for Ph.D. students. Study of criteria of decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value systems of arts organizations.

248A. Management in the Entertainment Industry. (4) Discussion, three hours. Requisites: courses 403, 405, 406, 408, 420. Examination of financial and strategic aspects of transactions and company management in the entertainment industry. Topics include organizational behavior and decision making in creative companies; trends in industry structure and competitive economics; accounting issues; institutional and private investment in motion pictures; theatrical distribution, international and ancillary marketing, and developments in technology, work, and work structures. S/U or letter grading.

249A. Special Topics in Public and Private Nonprofit Management. (4) Studies of advanced subjects of current interest in public/not-for-profit management. Emphasis on recent developments and application of specialized knowledge. Topics vary each term. May be repeated for credit with topic change.

249B. Special Topics in Arts Management. (4) Examination of current issues in management of artistic organizations. Relevant combinations of lectures, discussions, case studies, and team research projects.

M250A. Labor Relations: Process and Law. (4) (Same as Public Policy 2522.) Lecture, three hours. Designed for Ph.D. students in management of collective bargaining process; labor-management agreement, administration of the contract, labor-management relations, union structure and goals, and influence of external labor markets on labor relations. S/U or letter grading.

250C. Behavioral Foundations of Human Resource Management. (4) Requisite: course 250B. Topics include development and training; human resource accounting; behavioral foundations of participating management; compensation, productivity, and satisfaction; designing reward systems; and evaluation of organizational effectiveness. Emphasis on understanding, predicting, and influencing human behavior in organizations.

250D. Thesis, One to Three. (1-3) Lecture, one to three hours. Acquisition of strategies that enhance adaptive planning and real-time judgment, based on findings from brain studies and cognitive research. Design of tools to respond to uncertainties and to address situations where intense pressures of time and cost are present. Letter grading.

251. Managing Human Resources. (4) Management of people in organizations, designed for managers as well as personnel specialists. Organized at three related but distinct levels of analysis: (1) day-to-day utilization of people as organizational resources to achieve organizational objectives; (2) personnel management and analysis of methods of operation research, introduction to management in information economy, and models for medical management. May be repeated for credit with topic change. S/U or letter grading.

252A. Management of Employee/Management Participation. (4) Design for providing understanding of systems of employee/management participation around the world (apart from traditional collective bargaining systems). Specific concepts such as worker participation in decision making, industrial democracy, joint consultation, workers' councils, profit sharing.

253. International Political Economy. (4) Lecture, three hours. Examination of political, legal, and social institutions that define modern capitalism and government relations around the world. Analysis of major domestic policy options that nations are pursuing in response to economic globalization and internationalization. Effects on countries that are being formed as result of globalization, including NAFTA, and to nongovernmental organizations created to deal with special problems such as global environmental crises. Letter grade.

254. Pay and Rewards in Organizations. (4) Lecture, three hours. Systematic treatment of pay (compensation) and rewards in organizations, with emphasis on the foundation for outcomes of organizational pay and reward systems and practices that are shaped by strategic, labor market, and motivational considerations. Specific topics include variable compensation, fringe benefits, employee ownership, stock option plans, and noncompensation rewards; compensation and rewards for performance and in entrepreneurial and public organizations; fringe benefits, executive compensation; and international and comparative compensation/reward practices. S/U or letter grading.

255. Comparative Industrial Relations. (4) (Same as Public Policy CM231.) Lecture, three hours; outside study, nine hours. Requisite: course 405 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resource systems of selected developed countries. In addition to discussing possible frameworks for analyzing human resource systems, examination of institutions and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts. S/U or letter grading.

256. Leadership and Ethics. (4) Lecture, three hours. Series of real-life business situations that pose complex problems of leadership and ethics, so students develop better understanding of how they can successfully address business situations that define their leadership and ethical positions. Letter grading.

257. Human Resource Management in Creative and Nonprofit Sectors. (4) Designed for graduate students. Examination of management theory and practices in industries where primary product is creative or intellectual (e.g., arts, entertainment, education, high technology, journalism). Consideration of incorporation of work design, employee influence, systems, and business strategies in human resource management. Interpersonal and group process for managing human behavior.

258. Research Seminar: Human Resources and Organizational Behavior. (1 to 4) Seminar, two hours. Designed for Ph.D. students. Examination in depth of problems or issues of current concern in human resource management and organizations, and emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit. S/U or letter grading.

259A. Individuals and Groups in Organizations. (4) Lecture, three hours. Designed for graduate students. Doctoral-level survey of classic and emergent theories and research in the area of social behavior in organizations, with focus on micro-level topics related to individual and interpersonal processes within organizations. Exploration of how individual behaviors, cognitions, and perceptions are affected by organizational context, structure, and culture. S/U or letter grading.

259B. Advanced Studies in Human Resource Management. (4) Lecture, three hours. Designed for graduate students. Doctoral-level survey of research literature assessing how organizations utilize human resources to enhance individual, group, and organizational effectiveness. Current theory and research in psychology, anthropology, organization behavior, and economics, including topics such as careers, participation, negotiations, and technology/work systems. S/U or letter grading.

259C. Markets and Organizations. (4) Seminar, three hours. Designed for Ph.D. students. Doctoral-level survey of major organizational behavior, with focus on macro-level organizational topics related to study of organizations and organizational environments. Topics may include demography, organizational change, organizational structure, and networks. Letter grading.

260A. Market Assessment. (4) Lecture, three hours. Requisites: courses 411A, 411B. Development of framework for strategic marketing planning based on customer behavior, market segmentation, product positioning, product life cycle, market...
responsiveness, and competitive reaction. Within this framework, development of key elements in annual marketing plans. Letter grading.

263A. Consumer Behavior. (4) Lecture, three hours. Requisites: courses 411A, 411B. Study of nature and determinants of consumer behavior. Emphasis on influence of sociopsychological factors such as personality, small groups, demographic variables, social class, and culture on formation of consumers' attitudes, consumption, and purchasing behavior. S/U or letter grading.

264A. Market Research. (4) Lecture, three hours. Requisites: courses 411A, 411B. Designed for prospective users of research results rather than for specialists in research. Marketing research is aid to management decision making. Development of problem analysis and design of cost-effective methods of marketing research, with increased sensitivity to limitations of marketing data. Letter grading.

264B. Regression with Applications in Marketing and Finance. (4) Lecture, three hours. Requisites: courses 411A, 411B. Designed for prospective users of research results rather than for specialists in research. Marketing research is aid to management decision making. Development of problem analysis and design of cost-effective methods of marketing research, with increased sensitivity to limitations of marketing data. Letter grading.

265A. New Product Development. (4) Lecture, three hours. Requisites: courses 411A, 411B. Examination of new product development (NPD) process with objectives of learning key tools and methods and applying them to case studies, exercises, and course project. Products viewed through three lenses: quantifiable rational attributes, appeal due to emotional characteristics, and cost/technology competitive tradeoffs. NPD process also investigated through five key phases: ideation, concept generation and selection, detailed design, prototyping and testing, and ramp-up and product launch. Coverage of mass customization, parallel prototyping, and creativity. Letter grading.

267. One-to-One Marketing. (4) Lecture, three hours. Requisites: courses 402, 411A, 411B. Use of notion of "customer lifetime value" as an organizing principle and application to one-to-one marketing context. Frameworks and analytical tools for interacting with customers and learning about their preferences as they evolve through four stages: (1) customer acquisition, (2) initial post-promotion purchasing, (3) mid-maturity purchase and transaction behavior, and (4) customer attrition or switching to other product lines. S/U or letter grading.

268. Selected Topics in Marketing. (4) Lecture, three hours. Requisites: courses 411A, 411B. Study of selected areas of marketing knowledge and thought. Specific subjects vary each term depending on particular interests of instructor and students. Individual projects and reports. May be repeated for credit. S/U or letter grading.

269A. Theory in Marketing. (4) Serves as mechanism to introduce students to development of marketing thought. Issues pertaining to general topic of theoretical development and testing. Prepares students for conducting theoretically grounded research in marketing.

269B. Research in Marketing Management. (4) Discussion of nature and determinants of consumer behavior. Emphasis on influence of sociopsychological factors such as personality, small groups, demographic variables, social class, and culture on formation of consumers' attitudes, consumption, and purchasing behavior. S/U or letter grading.

269C. Quantitative Research in Marketing. (4) Discussion, three hours. Designed for Ph.D. students in management and related fields. Students are assumed to have good background in marketing principles and to be familiar with probability, statistics, mathematical programming, and econometrics. Review of a range of quantitative models as applied in marketing research. S/U or letter grading.

269D. Behavioral Research in Marketing. (4) Seminar, three hours. Designed for Ph.D. students who are conducting research in consumer behavior or related areas. Empirical research in consumer behavior surveyed and critically evaluated from theoretical as well as practical perspectives. S/U or letter grading.

269E. Special Research Topics in Marketing. (4) Designed for Ph.D. students. Advanced selected topics in consumer behavior and related areas. Recent research in area of one or two topics in current research and theory. May be repeated for credit.

269X-269Y. Workshops: Marketing. (1-1-2) Discussion of research presented. May be repeated for credit. S/U or letter grading.

271C. Emerging Technologies. (4) Lecture, three hours. Special topics in new and emerging technologies such as mobile computing, cloud computing, and visualization. Assessment of industrial opportunities and impacts. Topics vary. May be repeated for credit. S/U or letter grading.

272B. Workshop: Information Systems Research. (4) Seminar, three hours. Designed primarily for Ph.D. students. Examination in depth of problems or issues of current concern in information systems theory and practice. Topics vary. May be repeated for credit. S/U or letter grading.

274X-274Y. Current Research in Information Systems. (1-1-2) Seminar, two hours. Limited to Ph.D. students. Year-long sequence associated with Information Systems Colloquium. Students to attend presentations of current research and state-of-art developments in information systems field. Study and discussion of research presented. May be repeated for credit. S/U or letter grading.

M277A-M277B. Real Estate Finance Law. (1 to 8 each) (Formerly numbered M278C.) (Same as Law M209.) Lecture, three hours. Course M277A is enforced requisite to M277B. Concentrated study of law governing financing of land transactions from both national and California perspectives. Topics include California deed of trust, installment land contracts and other mortgage substitutes, assignments of rents, receiverships, prepayment, foreclosure, priorities, California antideficiency legislation, impact of borrower bankruptcy on mortgage lenders, construction lending, future interests, and California antideficiency legislation. In Progress (269X, 269Y) and S/U or letter grading.

M277A-M277B. Real Estate Financing. (4) Lecture, three hours. Requisites: courses 408, 430. Investor-oriented course in which real estate and business trends are evaluated to address real estate investment opportunities. Use of current financial, economic, and investment theories and techniques to real estate investment opportunities in case studies and short case problems to illustrate development of investment strategies. S/U or letter grading.

M278. Urban Real Estate Financing and Investing. (4) Lecture, three hours. Requisites: courses 408, 430. Analysis of money, capital, and mortgage markets to determine potential availability and costs of mortgage
money from alternative sources. Evaluation of various sources of funds to determine factors influencing decisions to make mortgage loans. Examination of all types of lending instruments, particularly mortgage instruments, and mortgage-based securities for their impacts on real estate investment decisions. S/U or letter grading.

279A. Cases in Real Estate Investments. (4) Lecture, three hours. Requisites: courses 408, 430. Development of understanding of principal issues involved with real estate investment and finance. Topics include real estate financial analysis and valuation in value of contexts (single and multifamily residential, commercial/industrial, shopping center, and hotel properties), real estate taxation, real estate law, development processes, security, REITs, and leasing and workout of troubled properties. S/U or letter grading.

279B. Entrepreneurial Real Estate Development. (4) Lecture, three hours. Requisites: courses 278A (or 278A), 408, 430. Introduction to various aspects of real estate development from perspectives of entrepreneur and investor. Coverage of all types of developments, including single family, multifamily, hotel, office, retail, and industrial. Industry guest speakers to help reinforce principles taught. Real estate development simulation and group presentations to panels of investors included. S/U or letter grading.

280A. Research Philosophies, and Methodology in Human Systems. (4) Discussion, three hours. Designed for Ph.D. students. Survey of seminal studies of human systems, including individual, group, and intergroup behavior, and organization behavior. Consideration of objectivist and subjectivist philosophies of science and their implications for related methodologies, including experimentation, field studies, case approaches, and a range of analytic and prescriptive procedures in data collection. Emphasis on existing literature, philosophy of science, and concepts. May be repeated for credit. S/U or letter grading.

280B. Personal and Professional Development. (4) Discussion, three hours. Designed for Ph.D. students. Provides setting where students may explore their own professional values and approaches in process of testing and learning values and standards in applied behavioral sciences and human systems development. S/U or letter grading.

280C. Research Design in Human Systems Studies. (4) Discussion, three hours. Designed for Ph.D. students. Process of designing studies of human systems, including choice of research topics. Actively involves students in preparation of research proposals for research papers and Ph.D. dissertations. May be repeated for credit and for letter grading.

281A. Sociotechnical Systems. (4) Designed for graduate students. Introduction to systems concepts and view of work organizations as interacting social and technological systems open to forces from the surrounding environment. Focus on developing sociotechnical systems analytic approach and understanding advantages of this approach for designing and managing organizations.

281B. People in Organizations. (4) Designed for graduate students. Introduction to different philosophical perspectives for understanding human behavior. Theories and concepts important for understanding human behavior. Special attention to knowledge about satisfaction, motivation, and productivity in organizations.

282. Task and Team Processes. (4) Lecture, three hours. Requisite: course 281A or 281B. Structures, processes, and interrelations of work groups in sociotechnical systems. Emphasis on understanding how group processes interact with physical/technical environment. Impacts practical knowledge of task group functioning through class exercises and field observations. Consideration of team concepts and project group functioning. S/U or letter grading.

284A. Organization Design. (4) Lecture, three hours. Requisite: course 281A or 281B. Survey of organizational design theories and methods, including bureaucratic, participative, and cognitive models. Development of specific methods ranging from microdesign of jobs to macrodesign of total organizational systems. Special emphasis on sociotechnical differentiation and integration models. S/U or letter grading.

284B. Organization Development. (4) Discussion, three hours. Designed for graduate students. Analysis of effects of organizational and managerial practices on individual self-fulfillment and systems effectiveness. Theories of control and action research methods in organization development. Theory merged with practice through seminar discussions of field observations. S/U or letter grading.

284C. Management of Entrepreneurial Organizations. (4) Lecture, three hours. Issues involved in developing and managing entrepreneurial organizations. Topics include organizational growth, managerial tools, strategic planning, team development, control systems, leadership, and cultural management. Examination of transitions that individuals must make as organizations grow. S/U or letter grading.

285A. Leadership, Motivation, and Power. (4) Discussion, three hours. Designed for graduate students. Theoretical and practical approaches to influencing and motivating people. Relative effectiveness of various leadership styles, different motivation theories, and power tactics from managerial point of view. Use of experience-based learning methods to aid diagnosis and understanding of one’s own influence styles. S/U or letter grading.

285B. Managerial Interpersonal Communication. (4) Discussion, three hours. Designed for graduate students. Interpersonal and personality factors affecting managerial communication and modes of communication in one-to-one, group, and large-systems settings. Opportunities offered to deepen understanding of one’s own communication styles and skills, considering verbal, nonverbal, personal, and cross-cultural aspects. S/U or letter grading.

286. Negotiations Behavior. (4) Discussion, three hours. Presentation of theoretical principles and concepts of negotiation and communication through lectures and readings, with focus primarily on improving practical negotiating skills through experiential learning (i.e., negotiations simulations). Participants learn not only to enhance their individual abilities in dyadic and group situations, but also to analyze contexts for most effective application of these skills. S/U or letter grading.

287. Groups and Their Facilitation. (4) Discussion, three hours. Development and experiential understanding of dynamics of small group training and its facilitating, including “sensitivity” basic groups, group counseling, self-help groups, small groups, and community in major organizational tensions. Analysis of relevant theory, research findings, and case studies. S/U or letter grading.

288A. Selected Topics in Behavioral Science. (4) Discussion, three hours. Designed for graduate students. Theories of human behavior fundamental to study of individual, group, organizational, and cultural behavior. Exploration in depth of selected theoretical positions, extending and consolidating behavioral science knowledge and application. May be repeated for credit. S/U or letter grading.

288B. Current Issues in Sociotechnical Systems and Organization Design. (4) Discussion, three hours. Designed for graduate students. Current topics in analysis and design of organizations as sociotechnical systems engaged with various technologies and environments. Development of approaches emanating primarily from Europe, the Orient, and the U.S. In-depth comparisons of selected job and organizational design cases. May be repeated for credit. S/U or letter grading.

288C. Selected Topics in Human Systems Studies and Organizational Behavior. (4) Discussion, three hours. Designed for graduate students. Psychological and social psychological aspects of human behavior and performance in modern organizations. Communication models, empirical findings, and applications of such topics as attitudes and values, cognitive and perceptual processes, behavioral conflict, and individual change processes. May be repeated for credit. S/U or letter grading.

288D. Current Issues in Human Systems Change and Development through Consulting. (4) Discussion, three hours. Current perspectives and methods of enterprises (mainly in the U.S.) involving development of new products or process, and development of new business opportunities and starting a business.

288E. Proseminar: Behavioral and Organizational Development Colloquium. (4) Discussion, three hours. Designed for graduate students. Series of presentations by scholars and practitioners in behavioral and organizational sciences, with focus on integrative themes or major issues in the field. Designed to provide dialogue among students and faculty on significant topics, controversies, and leading-edge ideas. May be offered in one or successive terms and may be repeated for credit. S/U or letter grading.

M292A. Research and Development Policy. (4) (Also Public Policy M292A.) Lecture, three hours. Examination of research and development as process and as element of goal-oriented organization. Factors affecting invention and innovation; transfer of technology; behavior of research and development (as element of science, technology, and organizational goals; assessing of and forecasting technological futures. S/U or letter grading.

M292B. Growth, Science, and Technology. (4) (Also Public Policy M292B.) Lecture, three hours. Economic growth and change. Role of advances in science and technology, and actions of maximizing innovators and factors impinging on their behavior. How macroeconomic (fiscal, monetary, foreign exchange policies) influence productivity, and transform nature of and population of firms in existing industries. S/U or letter grading.

292C. Comprehensive Planning in Public Sector. (4) Evolving modes of planning under complexity, with particular emphasis on public sector. Development of policy through standard setting, bargaining, and regulating governing relationships; reality and value judgments; social and technical dimensions of alternatives; and social and technological forecasting.

293A. Political Environment of American Business. (4) Lecture, three hours. Evaluation of certain critical changes in political and economic structure of the American political system. Designed to provide clearer understanding of principal features of American politics, especially as they influence business enterprise.

293C. Ethical Considerations in Business. (4) Lecture, three hours. Examination of a range of ethical considerations in business decisions involving the individual, corporation, society, and international business. Analysis of cases for classroom presentation and discussion.

295B. Small Business Management. (4) Exploration of crucial aspects in managing small business enterprises. Emphasis on identification and analysis of characteristics of prospets for small firms and as context for exploring new business opportunities and starting a business.

295C. Corporate Entrepreneurship. (4) Inquiry into nature of entrepreneurial and effective implementation of entrepreneurial strategies in large industrial enterprises. Emphasis primarily on managerial features at identified, development, and exploitation of entrepreneurship and management of new product or process development, and effective new venture management in a corporate context.
295D. Business Plan Development. (4) Lecture, three hours. Fundamentals of developing effective written business plans for sales, marketing, product or service, operations, financials, and management and staffing functions of new startup businesses. S/U or letter grading.

296A. International Business Management. (4) Discussion, three hours. Comparative study of practices of international management with emphasis on development and implementation of managerial issues of policy and action within context of a multinational corporation, with emphasis on problems of adaptation to different sociocultural, legal, economic, and political environments. Required reading for student to prepare research paper presented in colloquium format by leading scholars in management strategy and policy. Active participation and interpersonal interchange encouraged through discussion of papers in sessions prior to and during colloquium. May be repeated for credit. S/U grading.

295E. Seminar: Neuroeconomics. (4) Seminar, three hours. Discussion and research papers related to graduate students. Analysis and discussion of research on cognitive and neural bases of decision making. S/U or letter grading.

298X-298Y. Management Strategy and Policy Workshops. (1-1-2) Discussion, three hours. Designed for Ph.D. students. Conducted as colloquia with emphasis on the methodology and direction of major research projects. Designed to stimulate research in management strategy and policy. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to and during colloquium. May be repeated for credit. S/U grading.

299R. Research Methods in Management. (4) Discussion, three hours. Designed for Ph.D. students. Provision of support for research projects and proposal papers related to research for requirement. Quarterly meetings to discuss expectations of research committee and Doctoral Office. Students must enroll the term in which they are submitting their research paper. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel must attend as assistant to an instructor while teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

400. Mathematics for Management. (4) Lecture, three hours. Limited to graduate students. General mathematics review for M.B.A. students. Fundamental mathematics, including topics from algebra, differential calculus, and other mathematics, linear and exponential functions, probability, and statistics; applications, including economic theory, finance, time value of money, inventory management, linear programming, and probability. S/U grading.

401A-401B. Managerial Problem Solving. (3-3) Discussion, three hours. Use of international business simulation and series of complex multicasted cases to learn to apply M.B.A. core disciplines in real-world, globally focused business problems. In Progress (401A) and letter (401B) grading.

402. Data and Decisions. (4) Lecture, three hours. Topics include probabilities, random variables (expectation, variance, covariance, normal random variables), decision trees, estimation, hypothesis testing, and multiple regression models. Emphasis on actual business problems and data. Letter grading. S/U or letter grading.

404. Information Systems. (4) Lecture, three hours. Overview of information systems in organizations from perspective of system and user. Managerial and strategic uses of information systems. Technologies that underlie these systems, and ways such systems are developed and managed. S/U or letter grading.

408. Foundations of Finance. (4) Lecture, three hours. Introduction to managerial finance. Topics include time value of money, discounting and present value, evaluation of bond valuations, fixed income securities, construction of optimal portfolios, capital budgeting, and weighted average cost of capital. Letter grading.

410. Operations Technology Management. (4) Lecture, three hours. Requisites: courses 402, 403, 405. Principles and decision analysis related to effective utilization of factors of production in manufacturing and non-manufacturing activities for both intermittent and continuous systems. Production organizations, analytic methods and tools, facilities design, and design of control systems for production operations. Letter grading.

411B. Marketing Management II. (4) Lecture, three hours. Requisite: course 411A. Examination of analytical and creative decision-making in product and resource management to allocate resources to elements of marketing mix. Topics include market sizing based on diffusion of innovation and trial-and-repeat processes, customer preference measurement and market segmentation techniques, and optimal marketing resource allocation across products and customers. Letter grading.

412. Management of Organizations. (4) Lecture, three hours. Preparation: completion of first-year core program. Integrative approach to theory and practice of management in complex organizations, emphasizing functional roles in designing organizational structures, creating and maintaining planning and control information, incentive systems, different patterns of human interaction such as strategies and systems tend to produce. Letter grading.

413A. Managerial Computing. (4) Lecture, three hours. Individual computing in support of strategic analysis, decision-making, and resource management. Use of personal productivity tools, such as Excel and VBA, and network resources for data access. Emphasis on hands-on exercises. S/U or letter grading.

413B. Advanced Topics in Managerial Computing. (4) Lecture, three hours. Enforced requisite: course 413A. Advanced topics in individual computing in support of strategic analysis, decision-making, and management communication. Emphasis on hands-on exercises. S/U or letter grading.

421A-421B. Management Communications I, II. (2-2), Lecture, three hours. Key attributes, knowledge, skills, and strategies necessary to succeed communica-
tively in workplace. Examination of business presen-
tation and use of interpersonal communication. Use of interpersonal communication skills. Lectures, experien-
tial activities, video analyses, and student activities supplemental by extensive individualized coaching by professors. In Progress (421A) and S/U or letter (421B) grading.

422. Analysis and Communications. (4) Discus-
sion, three hours. Designed for graduate students. Study and practice of oral and written management communications, including audience analysis, persuas-
ion, revising and editing, presentation of technical in-
formation, and uses of computer technology. Orga-
nized around writing and speaking exercises. Per-
sonal attention to students’ written communications and oral presentations.

430. Corporate Finance. (4) Lecture, three hours. Required. Preparation: completion of two terms of calculus and its relationship to the community and society in the context of business. Economic, financial, and political environment by comparing and contrast-
ing the U.S. and important historical and cultural as-
psects of a destination country. May be repeated for cred-
it. Letter grading.

440. International Preorientation. (1) Lecture, six hours. Limited to international students in M.B.A. pro-
gram. Intensive communication workshop that meets six times (Saturdays included) per week for three weeks. Basic listening, speaking, writing, and working/ leadership teams for case analysis, cold call participation, preparation of written assignments. Introduction to terms and career resources. May not be applied toward M.B.A. degree. Offered in summer only. S/U grading.

444A-444B. Applied Management Research: Two-
Quarter Plan, (4-4) Fieldwork, four hours. Must be taken in second year (or its equivalent for part-time stu-
dents). Supervised study of an organization, including establishment of client/consultant relationships, identi-
fication of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. In Progress (444A) and S/U or letter (444B) grading.

445. Applied Field Research. (8) Fieldwork, eight hours. Must be taken in second year (or its equiva-
lent for part-time students). Supervised study of an organization, including establishment of client/consult-
tant relationships, design of study and collection and analysis of data, development and reporting of implementable recommendations. Letter grading.

451. Fieldwork in Organizational Development. (2 to 12) Fieldwork, to be arranged. Requisite: course 284B. Supervised practical fieldwork in organizational development consultation in interpersonal, group, in-
tergroup, total organization, and interorganizational setting. Letter grading.

452. Fieldwork in Technical Assistance for Minority Business Enterprise. (1 to 4) Preparation: comple-
tion of first year of master’s program. Supervised field work experience and other formalized technical assistance for business firms and manage-
ment in ethnic communities; seminars and other shared learning experiences in transmitting business administrative knowledge to the urban ghettos, and rural areas.

453. Fieldwork in Arts Management. (4 to 12) Su-
 pervised field experience and practical work in all phases of an arts organization (pictorial, performing, or community), concentrating on its managerial problems and its relationship to the community and society in general.

454. Fieldwork in Organizations. (4) Fieldwork, to be arranged. Preparation: completion of two terms of M.B.A. program. Supervised, nonpaid practical experi-
ence or fieldwork in an organization as an intern or fel-
low. Execution of predetermined assignment(s) pursu-
ant to a defined program of study which may include formal coursework. May not be repeated for credit. S/U or letter grading.

455E. International Exchange Program. (2 to 16) Lecture, 30 hours; discussion, 10 hours. Students at-
tend to four M.B.A.-level classes at institutions with exchange agreements with Anderson School. Some courses may be taught in local language. In addition to learning subject matter of courses, intent is to provide opportunity for students to enhance their knowledge of region while exchanging ideas and views with their peers at that institution. S/U or letter grading.

457. Fieldwork in Investment Management. (4) Dis-
cussion, three hours. Use of academic theories learned in a practical experience by managing a port-
folio started with donated funds. Mirrors situations ex-
perienced by typical money management firms and in-
cludes investment strategy, asset allocation, security analysis, and organizational issues. S/U or letter grading.

458. International Studies. (4) Lecture, three hours; presentations, site visits, and discussion, 20 hours. Preparation: completion of first-year core courses in Fully Employed M.B.A. Program. Taught in English. Com-
prehensive one-week program in one foreign country with five lectures at UCLA before and/or after trip. Courses taught in collaboration with faculty members from partner institutions in that country. Attendance at presentations by government offi-
cials and business executives in destination country. Exploration of domestic operations in desti-
nation country through site visits, study of economy and political environment by comparing and contrast-
it with U.S. and important historical and cultural as-
psects of destination country. May be repeated for cred-
it. Letter grading.

459E. International Exchange. (2 to 4) Lecture, three hours; discussion and site visits, 20 hours. Prepa-ation: completion of first-year core courses in Fully Employed M.B.A. Program. Taught in English. Com-
prehensive one-week program in one foreign country. Cours-
es taught by faculty members from partner institutions in desti-
nation country. Topics vary but are tailored to M.B.A. curriculum. Exposure to local business practic-
is, visiting companies, and exploration of local cultural and historical sites. S/U or letter grading.

460A-460B. Managing Finance and Financial 
Emerging Enterprises. (2-2) Lecture, three hours. Course 460A is enforced requisite to 460B. Designed for second-year graduate students. Emphasis on financ-
ial, control, and investment issues confronting rapidly growing firms. Concepts, related models, and applica-
tions; capital budgeting, capital structure, and corpo-
rate governance. S/U or letter grading.

461A. Leadership Foundations I. (2) Lecture, two hours. Limited to Executive M.B.A. Program students. Focus on individual problem-solving and decision-
making skills. Alternative conceptual frameworks pre-
sented for augmenting diagnostic and decision-making skills of individuals. Use of readings, cases, decision simulations, and discussions to explore areas of chart-
ing job and career progression, working with others, and shaping work culture. S/U or letter grading.

461B. Leadership Foundations II. (1) Lecture, one hour. Limited to Executive M.B.A. Program students. Continuation of focus on development of leadership strengths and weaknesses, with emphasis on interpersonal problem solving and decision making and team design and develop-
ment. Readings, cases, decision simulations, peer coaching, and discussions. In Progress grading (credit to be given only on completion of course 461C).

461C. Leadership Foundations II. (1) Lecture, one hour. Limited to Executive M.B.A. Program students. Continuation of course 461B. Further exploration of leadership strengths and weaknesses, with emphasis on individual peer coaching, conflict management, in-
dividual goal assessment. Readings, cases, decision simulations, peer coaching, and discus-
sions. S/U or letter grading.

461D. Leadership Foundations III. (1) Lecture, one hour. Limited to Executive M.B.A. Program students. Continuation of course 461C. Facilitation of self-evalu-
ation of leadership strengths and weaknesses, with emphasis on career development, social networks, and organizational design. Readings, cases, decision simulations, peer coaching, and discussions. S/U or letter grading.

461E. Leadership Foundations IV. (1) Lecture, one hour. Limited to Executive M.B.A. Program students. Continuation of course 461D. Preparation: completion of course 461E. Supervision of course 461D. Preparation of leadership strengths and weaknesses, with emphasis on individual leadership and organizational change. Readings, cases, decision simulations, peer coaching, and discussions. S/U or letter grading.

ed. Topics include traditional antitrust regulations, new trends in antitrust, private versus government antitrust, securities regulation, environmental regulations, and a business firm’s optimal response to regulation.

463. Data Analysis and Management Decisions un-
der Uncertainty. (4) Lecture, four hours. Limited to Executive M.B.A. Program students. Survey of statistical methods for evaluating corporate per-
formance and use of accounting information for inter-
nal planning and control.

465A. Quantitative Methods for Managers. (2) Tuc-
key, four hours. Limited to Executive M.B.A. Program students. Survey of modeling approaches to manageri-
al planning and decisions. Emphasis on ability to rec-
ognize situations where models can be used advanta-
geously, to work effectively with model building special-
ists, and to make good use of models once they have been developed. S/U or letter grading.

465B. Game Theory. (2) Lecture, two hours. Limited to Executive M.B.A. Program students. Conceptual frameworks for thinking about and making busi-
dess decisions. Examination of interactions between firm and parties external to it through lens of game theory. Framework based on ideas underlying game theory, such as recognizing the strategic nature of strong play-
ers, getting away from win-lose mindset, importance of added value of players, anticipating other players’ re-
sponses and their own actions. Letter grading.

466A. Financial Policy for Managers. (4) Lecture, four hours. Limited to Executive M.B.A. Program stu-
dents. Modern financial management deals with deci-
sion making under uncertainty for corporate financial management, portfolio investment decisions, financial institutions, and international financial management. Focus on learning sound theoretical tools and applying them in casework. S/U or letter grading.

466B. Advanced Financial Policy for Managers. (4) Lecture, four hours. Limited to Executive M.B.A. Pro-
gram students. Modern financial management deals with decision making under uncertainty for corporate fi-
ancial management, portfolio investment decisions, financial institutions, and international financial manage-
ment. Focus on learning sound theoretical tools and applying them in casework. S/U or letter grading.

467. Management Issues in Information Systems. (4) Limited to Executive M.B.A. Program students. Growing role of information systems in the corporation and how they change ways of doing business. Exam-
iples from airlines, health, computer, communications, distribution, and publishing industries. Strategic, orga-
nizational, and societal implications.

468. Macroeconomics and Economic Forecasting. (4) Lecture, four hours. Limited to Executive M.B.A. Program students. Macroeconomic theory and its ap-
plication to business forecasting. Major economic indi-
cators and their historical description of the U.S. economy; theoretical tools that business economists use to analyze impacts of monetary and fiscal policy; macroeconomic techniques applicable to business decisions. S/U or letter grading.

469. Management of Human Resources. (4) Limited to Executive M.B.A. Program students. Introduction to major issues of labor resource management, including personnel management, labor economics, labor law, and labor relations — accomplished by examining some major concepts, theories, and research related to each of these topic areas, as well as some practical problems for managers posed by each.

470A. Introduction to Strategic Management Research. (2) Fieldwork, two hours. Limited to Executive M.B.A. Program students. Further research and analysis of strategic issue facing selected company and identified in course 470B. Preparation of final reports and evaluation of student efforts by corporate personnel. S/U or letter grading.

470B. Strategic Management Research. (4) Fieldwork, four hours. Limited to Executive M.B.A. Program students. Preparation of strategic overview of selected company entailing collection and analysis of primary and secondary data, including (but not limited to) interviews of corporate executives, corporate financial and marketing data, industry reports, and customer and competitor interviews and surveys. In Progress grading (credit to be given only on completion of course 470C).

470C. Strategic Management Research. (4) Fieldwork, four hours. Limited to Executive M.B.A. Program students. Further research and analysis of one strategic issue facing selected company and identified in course 470B. Presentation of final reports and evaluation of student efforts by corporate personnel. S/U or letter grading.

470D. Seminar: Policy Analysis. (2) Seminar. Two hours. Limited to Executive M.B.A. Program students. Site visit to selected company, presentation of final reports, and evaluation of student efforts by corporate personnel. S/U or letter grading.

471A-471B. Management Practicum. (2-2) Lecture, three hours. Two-term individual or group (three to five students) project on global strategic issues designed to allow students to employ and enhance concepts learned in classroom. In Progress (471A) and letter grading (471B).

472A. Marketing Strategy and Policy. (4) Lecture, four hours. Limited to Executive M.B.A. Program students. Strategic marketing decisions, including development of marketing objectives and strategies and implementation of these strategies through pricing, channel, promotion, and new product decisions. S/U or letter grading.

472B. Customer Information Strategy. (4) Lecture, four hours. Limited to Executive M.B.A. Program students. Exploration of innovation and marketing of products and services to customers. Use of creativity tools, customer research, and marketing science to create value and allocate resources so as to maximize revenues and profits that result. S/U or letter grading.

473A. Managerial and Organizational Processes. (2) Lecture, four hours every other week for 13 weeks. Limited to Executive M.B.A. Program students. Analysis of strategic and operating policies and decisions for systems that produce goods and services. Examination of effectiveness of comprehensive planning, inventories, scheduling of resources, distribution systems, and system location. Comprehensive operating problems.

476. Competitive Strategy and Business Policy. (4) Limited to Executive M.B.A. Program students. Study of general management task of forging a competitive and corporate strategy. Emphasis on economics of business and corporate strategy, including methods of organizational and strategic analysis to determine relationship of organizational design and strategic analysis to determine relationship of organizational with its environment. In Progress grading (credit to be given only on completion of courses 470B and 470C).

470. Operations and Technology Management: Systems, Strategies, and Policies. (4) Limited to Executive M.B.A. Program students. Study of general management task of forging a competitive and corporate strategy. Emphasis on economics of business and corporate strategy, including methods of organizational and strategic analysis to determine relationship of organizational design and strategic analysis to determine relationship of organizational with its environment. In Progress grading (credit to be given only on completion of courses 470B and 470C).

477. The Manager and Business/Society Relationships. (4) Limited to Executive M.B.A. Program students. While organizations may, to some extent, choose their immediate environments, there are broad environmental factors and trends that affect most, if not all, organizations. Examination of current environmental trends in key areas of government regulation, labor relations, international trade, basic economic structure, and social responsibility.

478. Selected Topics in Management. (2 to 4) Seminar, ninety minutes to three hours. Limited to Executive M.B.A. Program students. Examination of selected problems and issues in an area of current concern in management. S/U or letter grading.

480. Corporate Governance. (4) Lecture, three hours. Foundations for members of corporate boards of directors to understand their responsibilities, hone their skills, and learn to improve their practices. Topics include legal and moral duties as directors, risk management, managing top management team of corporation. Letter grading.

481. Contemporary Issues in Business: Services Marketing and Customer Asset Management. (4) Lecture, three hours. Designed for prospective users of research results rather than for specialists in research. Market research is aid to management decision making. Development of problem-analysis skills, providing knowledge of concepts and methods of marketing research, with increased sensitivity to limitations of marketing data. Letter grading.

482. Negotiations Behavior. (4) Lecture, three hours. Presentation of theoretical principles and concepts from psychology, sociology, and economics through lectures and readings, with focus primarily on improving practical negotiating skills through experiential learning (i.e., negotiations simulations). Participants learn not only to enhance their individual abilities in dyadic and group situations but also to analyze contexts for most effective application of these skills. Letter grading.

483. Management of Technology and Innovation. (4) Lecture, three hours. Problems of managing technological innovation in Asia. Topics include incorporation of technological consideration into strategy, adoption of technological innovation, promoting innovation through organizational design and leadership, e-business, and m-business. Letter grading.

484. Asian Business Environment. (4) Lecture, three hours. Theoretical issues related to analysis of countries’ economic, political, and social conditions. Topics include political risk analysis, demographics, urbanization. Application to scenario planning in Asia-Pacific region/countries. Letter grading.

485. Corporate Entrepreneurship. (4) Lecture, three hours. Managerial efforts aimed at identification, development, and implementation of new ventures or process innovations, management of new product or process development, and effective new venture management in context of large corporations in manufacturing and service industries. Development of awareness and understanding of range, scope, and complexity of issues related to creation of organizational environment that is supportive of entrepreneurial endeavors, and insight concerning effective implementation of technological and organizational innovations in corporate setting. Letter grading.

486. Strategic Leadership and Strategic Implementation. (4) Lecture, three hours. Designed to address several fundamental aspects of leading complex organizations, with emphasis on important tasks of developing well-aligned, high-performance organizations and on challenges of leading change in organizations.

Enables students to develop organized point of view on strategic leadership and to increase their awareness of the challenges as leaders. Letter grading.

501. Cooperative Program, (2 to 8) Preparation: consent of UCLA AGSM graduate advisor and assistant dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

506. Research in Management. (1 to 8) Directed individual study or research. May be repeated. S/U or letter grading. Limited to Executive M.B.A. Program students.

507. Preparation for Qualifying Examinations. (4 or 12) Preparation for master’s comprehensive examination or Ph.D. qualifying examinations. S/U grading.

**Capstone Major**

The ABET-accredited materials engineering program is designed for students who wish to pursue a professional career in the materials field and desire a broad understanding of the relationship between microstructure and properties of materials. Metals, ceramics, and polymers, as well as the design, fabrication, and testing of metallic and other materials such as oxides, glasses, and fiber-reinforced composites, are included in the course contents.

**Materials Engineering Option**

**Preparation for the Major**

Required: Chemistry and Biochemistry 20A, 20B, 20L; Computer Science 31 (or another programming course approved by the Faculty Executive Committee); Materials Science and Engineering 10, 90L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C (or Electrical Engineering 1).

**The Major**

Required: Chemical Engineering 102A (or Mechanical and Aerospace Engineering 105A), Civil and Environmental Engineering 101 (or Mechanical and Aerospace Engineering 101), 108, Electrical Engineering 100, Materials Science and Engineering 104, 110, 110L, 120, 130, 131, 131L, 132, 143A, 150, 160, Mechanical and Aerospace Engineering 181A or 182A; two laboratory courses (4 units) from Materials Science and Engineering 121L, 141L, 143L, 161L; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; one capstone design course (Materials Science and Engineering 140); and three major field elective courses (12 units) from Chemical Engineering 114, Civil and Environmental Engineering 130, 135A, Electrical Engineering 2, 123A, 123B, 124, Materials Science and Engineering 111, 121, 122, 151, 161, 162, Mechanical and Aerospace Engineering 156A, 166C, plus at least one elective course (4 units) from Chemistry and Biochemistry 30A, 30AL, Electrical Engineering 131A, Materials Science and Engineering 170, 171, Mathematics 170A, or Statistics 100A.

For information on University and general education requirements, see the College and Schools section earlier in this catalog.

**Materials Science and Engineering**

**Lower Division Courses**

10. Freshman Seminar: New Materials. (1) Seminar, one hour; outside study, two hours. Preparation: high school chemistry and physics. Not open to students with credit for course 104. Introduction to basic concepts of materials science and new materials vital to advanced technology. Microstructural analysis and various material properties discussed in conjunction with such applications as biomedical sensors, pollution control, and microelectronics. Letter grading.

90L. Physical Measurement in Materials Engineering. (2) Laboratory, four hours; outside study, two hours. Various physical measurement methods used in materials science and engineering. Mechanical, thermal, electrical, magnetic, and optical techniques. Letter grading.

104. Science of Engineering Materials. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: Chemistry 20A, 20B, 20L, Physics 1A, 1B. General introduction to different types of materials used in engineering designs: metals, ceramics, plastics, and composites, relationship between structure (crystals and microstructure) and properties of technological materials. Illustration of their fundamental differences and their applications in engineering. Letter grading.

M105. Principles of Nanoscience and Nanotechnology. (4) (Same as Engineering M101.) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: Chemistry 20, and Electrical Engineering 1 or Physics 1C. Introduction to underlying science encompassing structure, properties, and fabrication of technologically important nanoscale sys-
tems. New phenomena that emerge in very small systems (typically with feature sizes below a few hundred nanometers) explore the basic concepts of physics and chemistry. Chemical, optical, and electronic properties, electron transport, structural stability, self-assembly; templated assembly and applications of various materials such as quantum dots, nanoparticles, quantum wires, quantum wells and multilayers, carbon nanotubes. Letter grading.

110. Introduction to Materials Characterization A (Crystal Structure, Nanostructures, and X-Ray Scattering). (4) Lecture; four hours; discussion; one hour; outside study, seven hours. Requisite: course 104. Modern methods of materials characterization; fundamentals of crystallography, properties of X rays, X-ray scattering; powder method. Laser method; determination of crystal structures; phase diagram determination; high-resolution X-ray diffraction methods; X-ray spectroscopy and materials characterization procedures. Letter grading.

110L. Introduction to Materials Characterization A Laboratory. (2) Laboratory, four hours; outside study, two hours. Requisite: course 104. Experimental techniques and analysis of materials through X-ray scattering techniques; powder method, crystal structure determination, high-resolution X-ray diffraction methods, and special projects. Letter grading.

111. Introduction to Materials Characterization B (Electron Microscopy). (4) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisites: courses 104, 110. Characterization of microstructure of materials by transmission electron microscopy; reciprocal lattice, electron diffraction, stereographic projection, direct observation of defects in crystals, replicas; scanning electron microscopy; emissive and reflective modes; chemical analysis; electron optics of both instruments. Letter grading.

C112. Cultural Materials Science II: In Vitro Microscopy and Microanalysis. (4) Lecture, three hours; laboratory, two hours; study, seven hours. Requisites: courses 104, 110 (or Chemistry 113A). Process of extracting and analyzing cultural materials for study of their morphology, microstructure, and composition by applying in vitro optical, chemical, and instrumental methods. Topics include optical and electron microscopy, X-ray and electron spectroscopy, X-ray diffraction, infrared spectroscopy, chemical spot tests, and chromatography. Hands-on experience through object-based problem-solving approach. Practical skills acquired on sampling and sample preparation methods and application on analysis of microparticles and artifacts for characterization of organic and inorganic compounds. Concurrently scheduled with course CM212. Letter grading.

120. Physics of Materials. (4) Lecture, four hours; discussion, three hours; study, seven hours. Requisites: courses 104, 110 (or Chemistry 113A). Introduction to electrical, optical, and magnetic properties of solids. Free electron model, introduction to band theory and Schrödinger wave equation. Crystal bonding and lattice vibrations. Mechanisms and characterization of electrical conductivity, optical absorption, magnetic behavior, and electrical properties, and p-n junctions. Letter grading.

121. Materials Science of Semiconductors. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 120. Structure and properties of elemental and compound semiconductors. Electrical and optical properties, defect chemistry, and doping. Electronic materials analysis and characterization, including electrical, optical, and ion-beam techniques. Heterostructures, band-gap engineering, development of new materials for optoelectronic applications. Letter grading.

121L. Materials Science of Semiconductors Laboratory. (2) Lecture, four hours; discussion, three hours; laboratory, two hours; outside study, three hours. Corequisite: course 121. Experiments conducted on materials characterization, including measurements of contact resistance, and thin film bi-axial modulus and CTE. Letter grading.

122. Principles of Electronic Materials Processing. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 104. Description of basic semiconductor materials for device processing; preparation and characterization of silicon, III-V compounds, and films. Discussion of principles of CVD, MOCVD, LPE, and MBE; metals and dielectrics. Letter grading.

130. Phase Relations in Solids. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 104, and Chemical Engineering 101. Phase diagrams, equilibria, phase transitions, and crystal structures. Phase diagram determination, transition temperature, and entropy phase diagrams, glass transitions. Letter grading.

131L. Diffusion and Diffusion-Controlled Reactions Laboratory. (2) Laboratory, two hours; outside study, five hours. Requisite: course 131. Design of heat-treating cycles and performing experiments to study interdiffusion, growth of intermediate phases, and grain growth. Letter grading.

133. Ancient and Historic Metals: Technology, Microstructures, and Surface Analysis. (4) Lecture, two hours; laboratory, 90 minutes. Processes of extraction, alloying, surface patination, metallic coatings, corrosion, and microstructure of ancient and historic metals. Techniques used in the past and present to study interdiffusion and phase composition, and applications of these methods. Letter grading.

140. Materials Selection and Engineering Design. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 132, 150, 160. Explicit guidance among myriad materials available to the design engineer. Properties and applications of steels, nonferrous alloys, polymeric, ceramic, and composite materials. Selection, treatment, and serviceability emphasized as part of successful design. Project grading. Letter grading.

141L. Computer Methods and Instrumentation in Materials Science. (2) Laboratory, four hours. Preparation: knowledge of BASIC or C or assembly language, and some experience with Science and Engineering interfaces. Interface and control techniques, real-time data acquisition and processing, computer-aided testing. Letter grading.

143A. Mechanical Behavior of Materials. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 104, Mechanical and Aerospace Engineering 101. Plastic flow of metals under simple and complex stress conditions and their rate-dependent behavior; dislocations, fracture, microstructural effects, mechanical and thermal treatment of steel for engineering applications. Letter grading.

143L. Mechanical Behavior Laboratory. (2) Laboratory, four hours. Requisite: course 143A. (May be taken concurrently). Methods of characterizing mechanical behavior of various materials; plastic and elastic deformation, fracture toughness, fatigue, and creep. Letter grading.

150. Introduction to Polymers. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Polymerization mechanisms, molecular weight and distribution, chemical structure and bonding, structure crystallinity, and morphology and their effects on physical properties. Glassy polymers, spring polymers, elastomers, adhesives. Fiber forming polymers, polymer processing technology, plasticization. Letter grading.

160. Introduction to Ceramics and Glasses. (4) Lecture, four hours; discussion, seven hours. Requisites: courses 104, 130. Introduction to ceramics and glasses being used as important materials of engineering, processing techniques, and unique properties. Examples of design and control of properties for certain specific applications in engineering. Letter grading.

161L. Laboratory in Ceramics. (2) Laboratory, four hours; preparation: at least a C in course 132. Concurrent course 160. Processes of extraction, alloying, surface patination, metallic coatings, corrosion, and microstructure of ancient and historic metals. Techniques used in the past and present to study interdiffusion and phase composition, and applications of these methods. Letter grading.

162. Electron Microscopy. (4) Lecture, four hours; outside study, eight hours. Requisites: course 104, Electrical Engineering 1 (or Physics 1C). Utilization of microscopy in ceramic and thin film technology; high-resolution X-ray spectroscopy; design with ceramics. Letter grading.

163. Ancient and Historic Metals: Technology, Microstructures, and Surface Analysis. (4) Lecture, two hours; laboratory, 90 minutes. Processes of extraction, alloying, surface patination, metallic coatings, corrosion, and microstructure of ancient and historic metals. Techniques used in the past and present to study interdiffusion and phase composition, and applications of these methods. Letter grading.

CM180. Introduction to Biomaterials. (4) (Same as Biomedical Engineering CM180.) Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: course 104, or 130. Evolution of biomaterials, development of new materials for medical applications and regenerative medicine. Letter grading.
Graduate Courses

211. Electron Microscopy. (4) Lecture, four hours; outside study, eight hours. Requisite: course 111. Essential features of electron microscope, geometry of electron microscope, associated electronic, mechanical, and dynamical theories of electron diffraction, including anomalous absorption, applications of theory to defects in crystals. Moore fringes, direct lattice resolutions, Lorentz microscopy, laboratory applications of contrast theory. Letter grading.

CM212. Cultural Materials Science II: In Vitro Microscopy and Microanalysis. (4) (Same as Conservation M212.) Lecture, three hours; laboratory, two hours. Preparation: general chemistry, or inorganic and organic chemistry. Methodology of sampling and microanalysis of cultural materials for study of their morphological and chemical compositions using techniques in vitro optical, chemical, and instrumental methods. Topics include optical and electron microscopy, X-ray and electron spectroscopy, X-ray diffraction, infrared spectroscopy, chemical spot tests, and chromatography. Hands-on experience through object-based problem-solving approach. Practical skills acquired on sampling and sample preparation methods of cultural materials from thin sections and whole objects using optical instruments for characterization of organic and inorganic compounds. Concurrently scheduled with course C112. Letter grading.

M215. Petrology and Conservation of In-Situ Archaeological and Cultural Materials. (4) (Same as Conservation M236.) Seminar, two hours; laboratory, three hours. Requisite: courses M215 (or Art History M203F or Conservation M250) and M216 (or Conservation M216). Deterioration processes (both natural and man-made) in in-situ and ex-situ archaeological and cultural decorative surfaces (mainly rock art, wall paintings, polychrome sculpture, decorative architectural elements, and mosaics) and on solutions to mitigate, prevent, or arrest decay mechanisms based on nondestructive, preventive, passive, and remedial solutions (latter based on minimum intervention). Sessions include holistic approaches for preservation of archaeological sites; hydrology of sites; origin and damaging effects of salts; biodegradation; chemical and mechanical weathering; earthquakes, frost, flooding, and vandalism; structural repairs, grouting, cleaning, and desalination; sheltering and insulation, long-term fixating, consolidation, and protective surface treatments. Letter grading.

M215. Techniques and Materials of Archaeological and Cultural Materials: In Situ and Ex Situ Architectural Decorative Surfaces. (4) (Same as Art History M203F and Conservation M250.) Seminar, two hours; laboratory, three hours. Requisite: course M216 or C112 or Conservation M210. Recommended: Conservation M215. Recommended for graduate conservation and art history students. Principles of archaeological conservation of in situ and ex situ monumental archaeological and cultural materials, with focus on rock art, wall paintings, decorative architectural elements, and mosaics, through study of their constituent materials and techniques in context of their geographical and chronological occurrence, technological development, and conservation history, and physical location. Lectures, seminars, and case-study presentations, museum and site visits, hands-on laboratory experience, and independent research that incorporates literary survey of archaeological and cultural materials and their aging characteristics. Science and application methods of traditional organic and inorganic systems and introduction of novel technology based on biomimetic processes and nanostructured materials. Letter grading.

221. Science of Electronic Materials. (4) Lecture, four hours; outside study, eight hours. Requisite: course 144. Introduction to physical, chemical, and mechanical properties of conservation materials (employed for preservation of archaeological and cultural materials) and their aging characteristics. Science and application methods of traditional organic and inorganic systems and introduction of novel technology based on biomimetic processes and nanostructured materials. Letter grading.

222. Growth and Processing of Electronic Materials. (4) Lecture, four hours; outside study, eight hours. Requisite: course 120. Study of major physical and chemical principles affecting properties and performance of semiconductor materials. Topics include bonding, carrier statistics, band-gap engineering, optical and transport properties, novel materials systems, and characterization. Letter grading.

223. Materials Science of Thin Films. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 120, 130, 131. Thermodynamics and kinetics that affect semiconductor growth and device processing. Special emphasis on fundamentals of growth (bulk and epitaxial), heteroepitaxy, implantation, oxidation, and etching. Letter grading.

224. Deposition Technologies and Their Applications. (4) Lecture, four hours; outside study, eight hours. Examination of physics behind majority of modern thin film deposition technologies based on vapor phase transport, chemical vapor deposition (CVD), plasma enhanced chemical vapor deposition processes. Letter grading.

226. Si-CMOS Technology: Selected Topics in Materials Science. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Recommended preparation: Electrical Engineering 221B. Requisites: courses M214, 131, 120, M221, and 222. Selected topics in materials science from modern Si-CMOS technology, including technological challenges in high k/metal gate stacks, strained FETs, SOI and bulk technologies, FETs, source/drain engineering including transient-enhanced diffusion, nonvolatile memory, and metallization for ohmic contacts. Letter grading.

243A. Fracture of Structural Materials. (4) Lecture, four hours; outside study, eight hours. Requisite: course 143A. Elastic and plastic behavior of crystals, geometry, mechanics, and interaction of dislocations, mechanisms of yielding, work hardening, and other strengthening. Letter grading.

250B. Advanced Composite Materials. (4) Lecture, four hours; outside study, eight hours. Preparation: B.S. in Materials Science and Engineering. Requisite: course 151. Fabrication methods, structure, and properties of advanced composite materials. Fiber, resin-

252. Organic Polymer Electronic Materials. (4) Lecture, four hours; outside study, eight hours. Preparation: knowledge of introductory organic chemistry and polymer science. Introduction to organic electronic materials with emphasis on materials chemistry and processing. Topics include conjugated polymers; highly doped, highly conducting polymers; applications as processable metals and in various electrical, optical, and electrochemical devices. Synthesis of semiconductor polymers for organic light-emitting diodes, solar cells, thin-film transistors. Introduction to emerging field of electronic organic. Letter grading.

270. Computer Simulations of Materials. (4) Lecture, four hours; outside study, eight hours. Introduction to modern methods of computational modeling in materials science. Topics include basic statistical mechanics, classical molecular dynamics, and Monte Carlo methods, with emphasis on understanding basic physical ideas and learning to design, run, and analyze computer simulations. Use of examples from current literature to show how these methods can be used to study interesting phenomena in materials science. Hands-on computer experiments. Letter grading.

271. Electronic Structure of Materials. (4) Lecture, four hours; outside study, eight hours. Preparation: basic knowledge of quantum mechanics. Recommended requisite: course 200. Introduction to modern first-principles electronic structure calculations for various types of modern materials. Properties of electrons and interatomic bonding in molecules, crystals, and liquids, with emphasis on practical methods for solving Schrödinger equation and using it to calculate physical properties such as elastic constants, equilibrium structures, binding energies, vibrational frequencies, electronic band gaps and band structures, properties of defects, surfaces, interfaces, and magnetism. Extensive hands-on experience with modern density-functional theory code. Letter grading.

272. Theory of Nanomaterials. (4) Lecture, four hours; outside study, eight hours. Strongly recommended requisite: course 200. Introduction to properties and applications of nanoscale materials, with emphasis on understanding of basic principles that distinguish nanoscale structures (with feature size below 100 nm) from more common micro-structured materials. Exploration of new phenomena that emerge only in very small systems, using simple concepts from quantum mechanics and thermodynamics. Topics include structure and electronic properties of quantum dots, wires, nanotubes, and multilayers, self-assembly on surfaces and in liquid solutions, mechanical properties of nanostructured metamaterials, molecular electronics, spin-based electronics, and proposed realizations of quantum computing. Discussion of current and future directions of this rapidly growing field using examples from modern scientific literature. Letter grading.

CM280. Introduction to Biomaterials. (4) Same as Biomedical Engineering CM280. Lecture, three hours; discussion, two hours; outside study, seven hours. Requisite: courses 104, or Chemistry 20A, 20B, and 20L. Engineering materials used in medicine and dentistry for repair and/or restoration of damaged natural tissues. Topics include relationships between material properties, suitability to task, surface chemistry, processing and treatment methods, and biocompatibility. Concurrently scheduled with course CM180. Letter grading.

282. Exploration of Advanced Topics in Materials Science and Engineering. (2) Lecture, one hour; discussion, one hour; outside study, four hours. Researchers from leading research institutions around world deliver lectures on advanced research topics in materials science and engineering. Student groups present summaries of topics prior to lecture. Class discussions follow each presentation. May be repeated for credit. S/U grading.

296. Seminar: Advanced Topics in Materials Science and Engineering. (2) Seminar, two hours; outside study, four hours. Advanced study and analysis of current topics in materials science and engineering. Discussion of current research and literature in research specialty of faculty members teaching course. May be repeated for credit. S/U grading.

298. Seminar: Engineering. (2 to 4) Seminar, to be arranged. Limited to graduate materials science and engineering students. Seminars may be organized in advanced technical fields. If course is over-subscribed, any elective may be arranged. May be repeated with topic change. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

596. Directed Individual or Tutorial Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate materials science and engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination. (2 to 12) Tutorial, to be arranged. Limited to graduate materials science and engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate materials science and engineering students. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate materials science and engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

599. Research and Preparation of Ph.D. Dissertation. (2 to 16) Tutorial, to be arranged. Limited to graduate materials science and engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

Scope and Objectives

Gauss has called mathematics the “Queen of the Sciences.” It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics provides courses of study that introduce students to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.

Undergraduate Study

Admission

Students entering UCLA directly from high school who declare one of the five mathematics majors offered by the department at the time they apply for admission are automatically admitted to that major.

UCLA students who wish to enter one of the mathematics majors must have a minimum grade of C– in each preparation for the major course completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed major courses must also average at least 2.0. Students with 60 or more units of credit must have completed at least 12 units of calculus to enter any of the mathematics majors.

Transfer students must have a minimum grade of C in the equivalent of each preparation for the major course completed. Those transferring with 60 or more quarter units of credit must have completed at least 12 quarter units of calculus to enter any of the Mathematics Department majors.

Preliminary Examination in Mathematics

If students wish to enroll in Mathematics 1, 3A, or 31A, they must pass the Mathematics Diagnostic Test. The examination may be taken at any one of several times, including all sessions of the New Student Orientation program. It is also given several times during the academic year. For specific dates and test locations, refer to the Schedule of Classes or the departmental website at http://www.math.ucla.edu/ugrad/diagnostic.shtml, or contact the Mathematics Student Services Office, 6356 Math Sciences.

Mathematics Upper Division Courses

Mathematics 115A, 131A, 132, 142, 151A, and 164 are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

Program in Computing Courses

Program in Computing 1 is designed for students who wish a broad, general introduction to the topic of computing and computation, but who have no prior experience in computing.

Courses 10A, 10B, and 10C provide an extensive introduction to programming, using the C++ language. Courses 15, 20A, 20B, 20C, 30, 40A, 40B, and 60 are of interest to Letters and Science majors who are completing a specialization in Computing or who are planning to take upper division courses in computer science. These students should seek the advice of their major department.

Undergraduate Majors

The department offers five majors: Mathematics, Applied Mathematics, Mathematics of Computation, Mathematics/Applied Science, and Mathematics for Teaching. The department also participates in the Mathematics/Economics Interdepartmental Program, which offers a Mathematics/Economics major, and in the Mathematics/Atmospheric and Oceanic Sciences Interdepartmental Program, which offers a Mathematics/Atmospheric and Oceanic Sciences major.

The Mathematics major is designed for students whose basic interest is mathematics; the Applied Mathematics major for those interested in the classical relationship between mathematics, the physical sciences, and engineering; the Mathematics of Computation major for individuals interested in the mathematical theory and the applications of computing; the Mathematics/Applied Science major for those with substantial interest in the applications of mathematics to a particular outside field of interest; and the Mathematics for Teaching major for students planning to teach mathematics at the high school level. As part of the Mathematics/Applied Science major, the department offers programs for students interested in the fields of actuarial science, mathematics/history of science, and medical and life sciences.

Each course taken to fulfill any of the requirements for any of the mathematics majors must be taken for a letter grade.

Mathematics B.S.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Physics 1A, Program in Computing 10A, and two courses from Chemistry and Biochemistry 20A, 20B, Economics 11, Life Sciences 1, Philosophy 31, 32, Physics 1B, 1C, 6B, 6C. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.
Transfer Students
Transfer applicants to the Mathematics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one calculus-based physics (mechanics) course, one C++ programming course, and two courses from general chemistry for majors, economics, symbolic logic, and calculus-based physics.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Mathematics 110A, 110B, 115A, 120A, 131A, 131B, 132, and at least five elective courses from 106 through 199 and Statistics 100A through 102C. The 12 courses must be passed with a minimum overall grade-point average of 2.0.

Applied Mathematics B.S.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Physics 1A, 1B, Program in Computing 10A, and one course from Chemistry and Biochemistry 20A, 20B, Physics 1C. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

Transfer Students
Transfer applicants to the Applied Mathematics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, two calculus-based physics courses, one C++ programming course, and one course from general chemistry for majors or calculus-based physics.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Mathematics 115A, 131A, 131B or 132, 151A, 151B, and six courses from 106 through 199 and Statistics 100A through 101C; three upper division computer science courses (12 units). The 14 courses must be passed with a minimum overall grade-point average of 2.0.

Mathematics of Computation B.S.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Physics 1A, 1B, Program in Computing 10A, 10B, 10C, and one course from Chemistry and Biochemistry 20A, 20B, Physics 1C. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

Transfer Students
Transfer applicants to the Mathematics of Computation major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one discrete structures course, two calculus-based physics courses, three programming courses, and one course from general chemistry for majors or calculus-based physics.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Eleven Mathematics Department courses, including Mathematics 115A, 131A, 131B or 132, 151A, 151B, and six courses from 106 through 199 and Statistics 100A through 101C; three upper division computer science courses (12 units). The 14 courses must be passed with a minimum overall grade-point average of 2.0.

Mathematics/ Applied Science B.S.

The Mathematics/Applied Science major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major in that students, in consultation with a faculty advisor, design their own program. They may also select one of the established programs: actuarial plan, mathematics/history of science plan, or medical and life sciences plan. In the past, Mathematics/Applied Science majors have combined the study of mathematics with fields such as atmospheric and oceanic sciences, biochemistry, biology, chemistry, economics, geography, physics, psychology, and statistics.

Students interested in designing an individual program should meet with the undergraduate adviser, 6356 Math Sciences, during their sophomore year. A proposed program is drawn up, then forwarded to the mathematics/applied science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

Additional preparation, varying with the individual program, may be required.

Transfer Students
Transfer applicants to the Mathematics/Applied Science major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors and one C++ programming course. Additional courses are required for each concentration plan.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Fourteen courses, seven in the Mathematics Department selected from Mathematics 106 through 199 and seven upper division courses in a related field selected from one or two other departments. The seven Mathematics Department courses must be passed with an overall grade-point average of 2.0, as must the seven courses outside mathematics.

At least five of the courses from the related discipline must be taken after the program has been approved. Students are not admitted to the major if they have 135 or more units by the time they plan to enter the program.

Actuarial Plan

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1, 2, 11, Program in Computing 10A. Each course must be taken for a letter grade. The economics preparation for the major courses (Mathematics 31A, 31B, Economics 1, 2, and 11) are calculated separately from the mathematics preparation for the major courses (Mathematics 32A, 32B, 33A, 33B, and Program in Computing 10A). The economics preparation courses must be completed with a minimum overall 2.5 grade-point average and a C or better in each course. The mathematics preparation courses must be completed with a minimum overall 2.0 grade-point average and a C– or better in each course.

Repetition of more than one economics preparation course or of any economics preparation course more than once results in automatic dismissal from the major.

The Major

Required: Eight mathematics courses, including Mathematics 115A, 131A, 131B, 170A, 170B, 172A, 172B, 172C, 174; three outside courses, including Statistics 100B, 100C, and one course from Economics 101 through 199B. Each course must be taken for a letter grade. Transfer credit is subject to department approval; consult an undergraduate counselor before enrolling in any courses for the major.

To graduate, the eight Mathematics Department courses must be passed with an overall grade-point average of 2.0, as must the three courses from the Economics and Statistics Departments.
Mathematics/History of Science Plan

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, and three courses from History 2B, 2D, 3A through 3D.

The Major

Required: Eight mathematics courses, including Mathematics 106, 115A, 131A, 134, 170A, and three courses from 110A through 199; six outside courses to be selected from History 179A through 180C, Philosophy 124, Physiological Science M168, and any upper division Honors Collegium course with history of science/medicine content.

Medical and Life Sciences Plan

Preparation for the Major

The Major

Required: Seven mathematics courses, including Mathematics 115A, 134, 151A, 170A, 170B, and two courses from 110A through 199 and Statistics 100B through 101C; six outside courses, including Neuroscience M101A, M101B, and M101C, and three courses from Biomathematics 110, 160, Biostatistics 100A, Chemistry and Biochemistry CM160A, Computer Science CM186, Ecology and Evolutionary Biology C119, 133, 135, Physiological Science 100, 135, and any additional upper division course from these fields with consent of the administering department and the Mathematics Department.

Mathematics for Teaching B.S.

The Mathematics for Teaching major is designed primarily for students planning to teach mathematics at the high school level. It provides exposure to a broad range of mathematical topics, especially those appropriate for the prospective teacher. Students planning to pursue graduate studies in mathematics or related fields are encouraged to enter the Mathematics, Applied Mathematics, or Mathematics of Computation major.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Physics 1A or 6A, Program in Computing 10A, and two courses from Chemistry and Biochemistry 20A, 20B, Physics 1B, 1C, 6B, 6C, Program in Computing 10B through 97. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

Transfer Students

Transfer applicants to the Mathematics for Teaching major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one discrete structures course, one C++ program, and three courses from calculus-based physics, general chemistry for majors, and computing.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Mathematics 105A, 105B, 105C, 106, 110A or 117, 115A, 120A or 123, 131A, 170A or Statistics 100A, Statistics 100B, one course from Mathematics 110B through 191H or Statistics 100C, one course from Mathematics 131B through 136, one course from 142 through 167.

Honors

Honors Courses

The department offers a lower division honors sequence in calculus and upper division honors sequences in algebra and analysis. The sequences are intended for students (not necessarily mathematics majors) who desire a broad, comprehensive introduction to these topics.

Honors Program

Students majoring in Mathematics, Applied Mathematics, and Mathematics of Computation who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. They may apply any time after completing four courses from the calculus sequence or from upper division mathematics courses with an overall grade-point average of 3.6 or better. The program entails taking a specified sequence of courses as part of the major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper division and graduate mathematics courses.

Students completing the program are awarded honors at graduation; if they demonstrate exceptional achievement (i.e., at least a 3.8 GPA in upper division mathematics courses taken for the major), they are awarded highest honors. Consult the department for further information.

Computing Specialization

Majors in Mathematics, Applied Mathematics, Mathematics/Appplied Science, or Mathematics for Teaching may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major and (2) completing Mathematics 61 or 160. Program in Computing 10A, 10B, two courses from 10C; 15, 20A, 20B, 30, 40A, 60, and at least two courses from Mathematics 149 through 159, with a minimum grade of C– in each course and a combined grade-point average of at least 2.0. Students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

Subject Matter Preparation Program for Single Subject Credential in Mathematics

Students interested in obtaining a single subject secondary school credential in mathematics should consult with a departmental counselor regarding the requirements for a waiver from the Mathematics California Subject Examination for Teachers (CSET), which is required by the California Commission on Teacher Credentialing. Students should meet with a departmental counselor as early in their undergraduate careers as possible because the program does require additional courses beyond the major requirements. For additional information on teaching credential requirements, consult the Department of Education at (310) 825-8328.

Mathematics Minor

The Mathematics minor is designed to provide students with the opportunity to widen their background and general comprehension of the role of mathematics in various disciplines.

To enter the minor, students must have an overall grade-point average of 2.0 or better and meet with the undergraduate mathematics adviser in the Student Services Office, 6356 Math Sciences.

Required Lower Division Courses (12 units):

Mathematics 32A, 33A, 33B.

Required Upper Division Courses (20 units):

At least five courses (20 units) selected from Mathematics 106 through 199.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnets.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Mathematics offers the Masters of Arts in Teaching (M.A.T.) degree and Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Mathematics.

Mathematics

Lower Division Courses

1. Precalculus. (4) Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Prerequisite: successful completion of Mathematics Diagnostic Test. Function concept, Linear and polynomial functions and their graphs, applications to optimization. Inverse, exponential, and logarithmic functions. Trigonometric functions. P/NP or letter grading.
2. Finite Mathematics. (4) Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics consisting of algebra, matrices, Gauss/Jordan method, combinatorics, probability, Bayes theorem, and Markov chains. P/NP or letter grading.

3A. Calculus for Life Sciences Students. (4) Lecture, three hours; discussion, one hour. Preparation: three and one-half years of high school mathematics (including trigonometry). Requisite: successful completion of Mathematics Diagnostic Test (score of 36 or better) or course 1 with a grade of C– or better. Not open for credit to students with credit in another calculus sequence. Techniques and applications of differential calculus. P/NP or letter grading.

3B. Calculus for Life Sciences Students. (4) Lecture, three hours; discussion, one hour. Requisite: course 3A with a grade of C– or better. Not open for credit to students with credit for course 31B. Techniques and applications of integral calculus, introduction to differential equations and multivariable differential calculus. P/NP or letter grading.

3C. Probability for Life Sciences Students. (4) Lecture, three hours; discussion, one hour. Requisite: course 3B with grade of C– or better. Elementary probability, probability distributions, random variables, and limit theorems. P/NP or letter grading.

31A. Differential and Integral Calculus. (4) Lecture, three hours; discussion, one hour. Preparation: three and one-half years of high school mathematics (including some coordinate geometry and trigonometry). Requisite: successful completion of Mathematics Diagnostic Test (score of 36 or better) or a grade of C– or better. Differential calculus and applications; introduction to differential equations and multivariable differential calculus. P/NP or letter grading.

31AX. Workshop in Differential Calculus. (1) Discussion, one hour. Corequisite: course 31A. Supplementary techniques and applications for solving problems in differential calculus. Limits of investigation set by individual instructor. P/NP grading.

31B. Integration and Infinite Series. (4) Lecture, three hours; discussion, one hour. Requisite: course 31A with grade of C– or better. Not open for credit to students with credit for course 3B. Transcendental functions; methods and applications of integration; sequences and series. P/NP or letter grading.

31BH. Integration and Infinite Series (Honors). (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 31A with grade of B or better. Honors courses parallel to course 31B. P/NP or letter grading.

31BX. Workshop in Integral Calculus. (1) Discussion, one hour. Corequisite: course 31B. Supplementary techniques and applications for solving problems in integral calculus. Limits of investigation set by individual instructor. P/NP grading.

31E. Calculus for Economics Students. (4) Lecture, three hours; discussion, one hour. Requisite: course 31A with a grade of C– or better. Not open for credit to students with credit for course 3B, 3C, or 31B. Calculus for applications to economics. Partial differentiation, implicit functions, exponential and logarithmic functions, extrema, optimization, constrained optimization. P/NP or letter grading.

32A. Calculus of Several Variables. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 31A with grade of C– or better. Introduction to differential calculus of several variables, vector field theory. P/NP or letter grading.

32AH-32BH. Calculus of Several Variables (Honors). (4-4) Lecture, three hours; discussion, one hour. Enforced requisite for course 32AH: course 31A with grade of B or better; for 32BH: courses 31B and 32A with grades of B or better. Honors sequence parallel to courses 32A, 32B. P/NP or letter grading.

32B. Calculus of Several Variables. (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 31A and 32A, with grades of C– or better. Introduction to integral calculus of several variables, line and surface integrals. P/NP or letter grading.

33A. Linear Algebra and Applications. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 3B or 31B or 32A with grade of C– or better. Introduction to linear algebra: systems of linear equations, matrices, matrix algebra, linear independence, subspaces, bases and dimension, orthogonality, least-squares meters consisting, eigenvalues and eigenvectors, matrix diagonalization, and symmetric matrices. P/NP or letter grading.

33AH. Linear Algebra and Applications (Honors). (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 3B or 31B or 32A with grade of B or better. Honors course parallel to course 33A. P/NP or letter grading.

33B. Differential Equations. (4, 4) Lecture, three hours; discussion, one hour. Enforced requisite: course 31B with grade of C– or better. Highly recommended: course 33A. First-order, linear differential equations; second-order, linear differential equations with constant coefficients, easier and learning differences in systems. P/NP or letter grading.

33BX. Workshop in Infinite Series and Differential Equations. (1) Discussion, one hour. Corequisite: course 33B. Supplementary techniques and applications for solving problems in infinite series and differential equations. Limits of investigation set by individual instructor. P/NP grading.

61. Introduction to Discrete Structures. (4) Lecture, three hours; discussion, one hour. Corequisites: courses 31A, 31B, 32A, 32B, 33A, 33B. Not open for credit to students with credit for course 180 or former course 113. Discrete structures commonly used in computer science and mathematics: logic, set theory, number representations, permutations and combinations, graphs and trees, induction, Boolean algebras. P/NP or letter grading.

71SL. Classroom Practices in Elementary School Mathematics. (2) Seminar, three hours; fieldwork, three hours. Introduction for prospective mathematics teachers to field of elementary education and teaching and learning of mathematics in elementary school classrooms. Pairs of students are placed in local elementary school classrooms to observe, participate, and assist mentor teachers in instruction. Introduction to inquiry-based learning practices, national and California standards, assessment, grading, and research-based pedagogy needed for teaching key mathematics topics in middle school. P/NP grading.

72SL. Classroom Practices in Middle School Mathematics. (2) Seminar, 90 minutes; fieldwork, 90 minutes. Introduction to professional standards and current research for teaching middle school mathematics. May be taken independently for credit. P/NP or letter grading.

103A. Mathematics and Pedagogy for Teaching Middle School Mathematics. (2) Seminar, 90 minutes; fieldwork, 90 minutes. Requirements: courses 31A, 31B, 32A, 33A, 33B, with grades of C– or better. Mathematical knowledge and research-based pedagogy needed for teaching key number topics in middle school. Introduction to professional standards and current research for teaching middle school mathematics. May be taken independently for credit. P/NP or letter grading.

103C. Mathematics and Pedagogy for Teaching Secondary School Mathematics. (2) Seminar, 90 minutes; fieldwork, 90 minutes. Requirements: courses 31A, 31B, 32A, 33A, 33B, with grades of C– or better. Mathematical knowledge and research-based pedagogy needed for teaching key topics in middle school. Introduction to professional standards and current research for teaching middle school mathematics. May be taken independently for credit. P/NP or letter grading.

105A. Mathematics and Pedagogy for Teaching Secondary School Mathematics. (4) Lecture, four hours; fieldwork, 30 minutes. Corequisites: courses 101A (or 110) or 117, 120A (or 123) and 131A, with grades of C– or better. Course 105A is requisite to 105B, which is requisite to 105C. Mathematical knowledge and research-based pedagogy needed for teaching key geometry topics in secondary school, including axiomatic systems, measure, and geometric transformations. Introduction to professional standards and current research for teaching secondary school mathematics. Letter grading.

105B. Mathematics and Pedagogy for Teaching Secondary School Mathematics. (4) Lecture, four hours; fieldwork, 30 minutes. Requisites: courses 105A, 110A (or 117), 120A (or 123), and 131A, with grades of C– or better. Mathematical knowledge and research-based pedagogy needed for teaching key topics in secondary school; professional standards and current research for teaching secondary school mathematics. Letter grading.

Upper Division Courses

General and Teacher Training

100. Problem Solving. (4) Formerly numbered 192.) Lecture, three hours. Requisite: course 31A with grade of C– or better. Problem-solving techniques and mathematical topics useful as preparation for Putnam Examination and similar competitions. Continued fractions, inequalities, modular arithmetic, closed form evaluations, sums and products, combinatorial geometry, rational functions and polynomials, other nonroutine problems. Participants expected to take Putnam Examination. P/NP grading.

103A-103B-103C. Observation and Participation: Mathematics Instruction. (2-2-2) Formerly numbered 330.) Seminar, one hour; fieldwork (classroom observation and participation), two hours. Requisites: courses 31A, 31B, 32A, 33A, 33B. Course 103A is enforced requisite to 103B, which is enforced requisite to 103C. Observation, participation, or tutoring in mathematics classes at middle school and secondary levels. May be repeated for credit. P/NP (undergraduates) or S/U (graduate students).

103A. Mathematics and Pedagogy for Teaching Middle School Mathematics. (2) Seminar, 90 minutes; fieldwork, 90 minutes. Requisites: courses 31A, 31B, 32A, 33A, 33B, with grades of C– or better. Mathematical knowledge and research-based pedagogy needed for teaching key number topics in middle school. Introduction to professional standards and current research for teaching middle school mathematics. May be taken independently for credit. P/NP or letter grading.

103B. Mathematics and Pedagogy for Teaching Middle School Mathematics. (2) Seminar, 90 minutes; fieldwork, 90 minutes. Requisites: courses 31A, 31B, 32A, 33A, 33B, with grades of C– or better. Mathematical knowledge and research-based pedagogy needed for teaching key topics in middle school. Introduction to professional standards and current research for teaching middle school mathematics. May be taken independently for credit. P/NP or letter grading.

105A. Mathematics and Pedagogy for Teaching Secondary School Mathematics. (4) Lecture, four hours; fieldwork, 30 minutes. Requisites: courses 101A (or 110) or 117, 120A (or 123), and 131A, with grades of C– or better. Course 105A is requisite to 105B, which is requisite to 105C. Mathematical knowledge and research-based pedagogy needed for teaching key geometry topics in secondary school, including axiomatic systems, measure, and geometric transformations. Introduction to professional standards and current research for teaching secondary school mathematics. Letter grading.

105B. Mathematics and Pedagogy for Teaching Secondary School Mathematics. (4) Lecture, four hours; fieldwork, 30 minutes. Requisites: courses 105A, 110A (or 117), 120A (or 123), and 131A, with grades of C– or better. Mathematical knowledge and research-based pedagogy needed for teaching key topics in secondary school; professional standards and current research for teaching secondary school mathematics. Letter grading.

105C. Mathematics and Pedagogy for Teaching Secondary School Mathematics. (4) Lecture, four hours; fieldwork, 30 minutes. Requisites: courses 105A, 110A (or 117), 120A (or 123), and 131A, with grades of C– or better. Mathematical knowledge and research-based pedagogy needed for teaching key topics in secondary school; professional standards and current research for teaching secondary school mathematics. Letter grading.
106. History of Mathematics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 31A, 31B, 32A. Roots of modern mathematics in ancient Babylonia and Greece, including place value number system; development of algebra through Middle Ages to Fermat and Abel, invention of analytic geometry and calculus. Selected topics. P/NP or letter grading.

Algebra, Number Theory, and Logic

110A-110B. Algebra. (4-4) Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 110A, 110B.

110C. Algebra. (4) Lecture, three hours; discussion, one hour. Requisites: courses 110A, 110B. Field extensions, Galois theory, applications to geometric constructions, and solvability by radicals.

111. Theory of Numbers. (4) Lecture, three hours; discussion, one hour. Requisites: courses 110A or 117, 115A. Divisibility, congruences, Diophantine analysis, selected topics in theory of primes, algebraic number theory, Diophantine equations.

114C. Computability Theory. (4) (Formerly numbered 114A.) Lecture, three hours; discussion, one hour. Requisite: course 110A or 113A or Philosophy 135. Effectively calculable, Turing computable, and recursive functions; Church/Turing thesis. Normal form theorem; universal functions; unsolvability and undecidability results. Recursive and recursively enumerable sets; relative recursiveness, polynomial-time computability. Algorithmic hierarchy. P/NP or letter grading.

114L. Mathematical Logic. (4) Lecture, three hours; discussion, one hour. Requisite: course 110A or 131A or Philosophy 135. Introduction to mathematical logic, aiming primarily at completeness and incompleteness theorems of Gödel. Propositional and predicate logic; syntax and semantics; formal deduction; completeness, compactness, and Lowenheim/Skolem theorem. Formal number theory; nonstandard models; Gödel incompleteness theorem. P/NP or letter grading.

M114S. Introduction to Set Theory. (4) (Same as Philosophy 113S.) Lecture, three hours; discussion, one hour. Requisite: course 110A or 131A or Philosophy 135. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

115A-115B. Linear Algebra. (5-4) P/NP or letter grading. 115A. Lecture, three hours; discussion, two hours. Requisite: course 33A. Techniques of proof, abstract vector spaces, linear transformations, and matrices; determinants; inner product spaces; eigenvalue theory. 115B. Lecture, three hours; discussion, one hour. Requisite: course 115A. Linear transformations, conjugate spaces, duality; theory of a single linear transformation, Jordan normal form; bilinear forms, quadratic forms; Euclidean and unitary spaces, symmetrical, skew-symmetrical, and orthogonal linear transformations, polar decomposition.

115AH. Linear Algebra (Honors). (5) Lecture, three hours; discussion, two hours. Requisite: course 33A with a grade of B+ or better. Honors course parallel to course 115A. P/NP or letter grading.

115AX-115BX. Workshops in Linear Algebra. (1-1) Discussion, one hour. Corequisite for course 115AX: course 115A; for 115BX: course 115B. Supplementary techniques and applications for solving problems in linear algebra. Limits of investigation set by individual instructor. P/NP grading.

115HX. Workshop in Linear Algebra (Honors). (1) Discussion, one hour. Corequisite: course 115AH. Honors course parallel to course 115AX. P/NP grading.

116. Mathematical Cryptology. (4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Not open for credit to students with credit for Program in Computing 116. Introduction to mathematical cryp-
tology using methods of number theory, algebra, probability. Topics include symmetric and public-key cryptographic systems, one-way functions, signatures, key exchange, groups, primes, pseudoprimes, primarily the Fermat and quadratic reciprocity theorems, factoring, rho method, RSA, discrete logs. P/NP or letter grading.

117. Algebra for Applications. (4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Not open for credit to students with credit for course 1110A. Integers, congruences, fields, applications of finite fields; polynomials; permutations, introduction to groups.

Geometry and Topology

120A-120B. Differential Geometry. (4-4) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 115A, 115B. Course 120A is required to be followed by 120B. Curves in 3-space, Frenet formulas, surfaces in 3-space, normal curvature, Gaussian curvature, congruence of curves and surfaces, intrinsic geometry of surfaces, isometric geometry, Gauss/Bonnet theorem, P/NP or letter grading.

121. Introduction to Topology. (4) Requisite: course 113A. Metric and topological spaces, completeness, connectedness, functions, continuity, homeomorphisms, topological properties.

123. Foundations of Geometry. (4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Axioms and models, Euclidean geometry, Hilbert axioms, neutral (absolute) geometry, hyperbolic geometry, Poincaré model, independence of parallel postulate.

Analysis

131A-131B. Analysis. (4-4) Lecture, three hours; discussion, one hour. P/NP or letter grading. 131A. Requisites: courses 32B, 33B. Recommended: course 115A. Rigorous introduction to foundations of real analysis, real numbers, point set topology in Euclidean space, functions, continuity. 131B. Requisites: courses 33B, 115A, 131A. Derivatives, Riemann integral, sequences and series of functions, power series, Fourier series.

131AH-131BH. Analysis (Honors). (4-4) Lecture, three hours; discussion, one hour. Requisites for course 131AH: courses 32B and 33B, with grades of B or better. Requisites for course 131BH: sequences parallel to courses 131A, 131B, P/NP or letter grading.

131AX. Analysis Techniques. (1) Lecture, one hour. Requisite: course 33B. Corequisite: course 131A. Review of elementary techniques of mathematics and their applications to topics in analysis, such as geometric and algebraic constructions, least upper bound axiom, etc. P/NP grading.

131C. Topics in Analysis. (4) Lecture, three hours; discussion, one hour. Requisites: courses 131A, 131B. Advanced topics in analysis, such as Lebesgue integral, integration on manifolds, harmonic analysis. Content varies from year to year. May be repeated for credit by petition.

136. Partial Differential Equations. (4) Lecture, three hours; discussion, one hour. Requisites: courses 33A, 33B. Linear partial differential equations, boundary and initial value problems; wave equation, heat equation, and Laplace equation; separation of variables, eigenfunction expansions; selected topics, as method of characteristics for nonlinear equations.

Applied Mathematics

142. Mathematical Modeling. (4) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Introduction to fundamental principles and spirit of applied mathematics. Emphasis on manner in which mathematical models are constructed for physical problems. Illustrations from many fields of endeavor, such as physical sciences, biology, economics, and traffic dynamics.

143. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Foundations of Newtonian mechanics, kinematics and dynamics of a rigid body, variational principles and Lagrange equations; calculus of variations, variable mass, related topics in applied mathematics.

146. Methods of Applied Mathematics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Central themes for the course include: asymptotic analysis, integral transforms, Green's functions, and calculus of variations. Selected applications from control theory, optics, dynamical systems, and other engineering problems.

446 / Mathematics

167. Mathematical Game Theory. (4) Lecture, three hours; discussion, one hour. Requisite: course 115C. Quantitative modeling of strategic interaction. Topics include extensive and normal form games, background probability, lotteries, mixed strategies, pure and mixed Nash equilibria, strategic form games, bargaining: emphasis on economic examples. Optional topics include repeated games and evolutionary game theory. P/NP or letter grading.

170B. Probability Theory. (4) Lecture, three hours; discussion, one hour. Requisite: course 170A or Statistics 100A or 110A. Probability distributions, random variables and vectors, expectation. P/NP or letter grading.

171. Stochastic Processes. (4) Lecture, three hours; discussion, one hour. Requisites: courses 33A, 170A (or Statistics 100A or 110A). Markov chains, continuous-time Markov chains, renewal theory. P/NP or letter grading.

172A. Introduction to Financial Mathematics. (4) Lecture, four hours. Requisites: courses 32B, 33B. Designed to provide understanding of fundamental concepts of financial mathematics and how those concepts are applied in calculating present and accumulated values from various streams of cash flows as basis for future use in reserving, valuation, pricing as well as for the mathematical management of investment, income capital budgeting, and valuing contingent cash flows. Letter grading.

172B. Actuarial Models I. (4) Lecture, four hours. Requisites: courses 170A and 170B (or Statistics 100A and 100B). Designed to provide understanding of the theoretical basis of certain actuarial models and application of those models to insurance, pensions, and other financial risks. Letter grading.

172C. Actuarial Models II. (4) Lecture, four hours. Requisite: course 172B. Theoretical basis of certain actuarial models and application to insurance, pensions, and other financial risks. Letter grading.

173B. Casualty Loss Models II. (4) Lecture, four hours. Enforced requisite: course 173A. Construction of parametric loss models and introduction to credibility theory that provides tools to utilize collected information, such as past loss information, to predict future outcomes. Use of simulation to model future events. Letter grading.

Discrete Mathematics

180. Combinatorics. (4) (Formerly numbered 113.) Lecture, three hours; discussion, one hour. Enforced requisites: courses 32B, 33B. Permutations and combinations; generating functions, combinatorial designs, graphs and trees, with applications including games of complete information. Combinatorial existence theorems, Ramsey theorem. P/NP or letter grading.

182. Algorithms. (4) Lecture, three hours; discussion, one hour. Requisite: course 3C or 32A. Graphs, greedy algorithms, divide and conquer algorithms, dynamic programming, network flow. Emphasis on design of efficient algorithms useful in diverse areas such as bioinformatics and allocation of resources. P/NP or letter grading.

184. Topics in Combinatorics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 61 (or 180), 115A. Introduction to combinatorics, including several independent topics selected to illustrate various techniques to obtain combinatorial results. Gems of modern combinatorics to be showcased. May be re-peated for credit. P/NP or letter grading.

Special Studies

190A-190O. Seminars: Current Literature. (1 each) Seminar, one hour. Designed for undergraduate students. Readings and presentations of papers in mathematical literature under supervision of staff member. One-hour presentation required. P/NP grading.

190A. Number and History of Development of Mathematics.
190B. Algebra.
190C. Geometry.
190D. Logic.
190E. Topology.
190F. Analysis.
190H. Differential Equations.
190I. Functional Analysis.
190J. Applied Mathematics.
190K. Probability.
190L. Dynamical Systems.
190M. Mathematics.
190N. Combinatorics.
190O. Cryptography.

191. Variable Topics Research Seminars: Mathematics. (4) Seminar, three hours. Variable topics research course in mathematics that covers material not covered in regular mathematics upper division curricu-lum. Reading, discussion, and development of culmi-nating project. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

191H. Honors Research Seminars: Mathematics. (4) Seminar, three hours; discussion. May be applied toward upper division credit. Additional topics in mathematics. Content varies from year to year. May be repeated for credit by petition. P/ NP or letter grading.

195. Community Internships in Mathematics Educa-tion. (4) Tutorial, to be arranged. Limited to juniors/ seniors. Internship to be supervised by Center for Community Learning and Mathematics Department. Students meet on a regular basis with instructor, provide periodic reports of their experience, have assigned readings on mathematics education, and complete final paper. May not be repeated and may not be applied toward major requirements. Individual contract with supervising faculty member required. P/NP grading.

197. Individual Studies in Mathematics. (2 to 4) Tutorial, three hours per week per unit. Limited to juniors/seniors. At discretion of chair and subject to availability of resources. Individual intensive study of topics suitable for undergraduate course credit but not specifically offered as separate courses. Scheduled meetings to be arranged between faculty member and student. Approval of reading and tangible evidence of mastery of subject matter required. May be repeated for maximum of 12 units, but no more than one 197 or 199 course may be applied toward upper division courses required for majors offered by Mathematics Department. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Mathe-matics. (2 or 4) Tutorial, three hours per week per unit. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Scheduled meetings to be arranged between faculty member and student. Culminating report required. May be repeated for maximum of 12 units, but no more than one 197 or 199 course may be applied toward upper division courses required for majors offered by Mathematics Department. Individual contract required. P/NP or letter grading.

Graduate Courses

Teacher Preparation

201A-201B. Topics in Algebra and Analysis. (4-4-4) Preparation: bachelor's degree in mathematics. Designed for mathematics/education program students. Important ideas of algebra, geometry, and calculus leading effectively from elementary to modern mathematics. Approaches to number system, point sets, geometric interpretations of algebra and analysis, integration, differentiation, series and analytic functions. May not be applied toward M.A. degree requirements.

202A-202B. Mathematical Models and Applica-tions. (4-4) Preparation: bachelor's degree in mathe-matics. Designed for mathematics/education program students. Development of mathematical theories describing various empirical situations. Basic characterizing postulates; development of a logical structure of theorems. Modern topics such as operations research, linear programming, game theory, learning models, models in social and life sciences. May not be applied toward M.A. degree requirements.

203. Master's Linear Algebra. (4) Lecture, four hours; discussion, one hour. Rigorous treatment of fundamental results of pure and applied linear algebra over fields. Applications to contemporary research. Preparation for linear algebra portion of UCLA Mathemat-ics Basic Examination that is required of M.A. and Ph.D. students. S/U or letter grading.

204. Master's Analysis. (4) Lecture, four hours; dis-cussion, one hour. Rigorous treatment of fundamental results of analysis. Applications to contemporary re-search. Preparation for analysis portion of UCLA Mathemat-ics Basic Examination that is required of M.A. and Ph.D. students. S/U or letter grading.

Number Theory

205A-205B-205C. Number Theory. (4-4-4) Lecture, three hours. Requisites: courses 210A, 246A. Algebraic number theory, including ideal theory, valuations, lo-cal and global fields, class-field theory, analytic number theory, L-functions and class number formulas, and modular forms. S/U or letter grading.

207A-207B-207C. Topics in Number Theory. (4-4-4) Lecture, three hours. Adele analysis on GL(1) and GL(2), especially Hecke and Hecke theory, automorphic representations. Special values of L-functions and p-adic L-functions, arithmetic theory of modular forms, advanced topics in analytic number theory. Artin reciprocity, especially of modular curves. S/U or letter grading.

M209A. Cryptography. (4) (Same as Computer Science M224A.) Lecture, four hours. Requisite: course M209A. Consideration of advanced cryptographic protocol design and analysis. Topics include non-malleable and zero-knowledge proofs; zero-knowledge arguments; concurrent and non-black-box zero-knowledge; IP=PSPACE proof, stronger notions of security for public-key encryption, including chosen-ciphertext security; secure multi-party computation; dealing with dynamic adversary; non-malleability and composability of secure protocols; software protection; threshold cryptography; identity-based cryptography; private information retrieval; protection against man-in-the-middle attacks; voting protocols; identification protocols; digital cash schemes; lower bounds on use of cryptographic primitives, software obfuscation. May be repeated for credit. S/U or letter grading.

210A-210B-210C. Algebra. (4-4-4) Requisites: courses 110A, 110B, 110C. Students with credit for courses 110B and/or 210B receive M.A. credit only for courses 210B and/or 210C. Group theory, including theories of Sylow and Jordan/Holder/Schreier; rings and ideals, factorization theory in integral domains. 210A covers modules over principal ideal rings, Galois theory of fields, multilinear algebra, structure of algebras.

211. Structure of Rings. (4) Requisite: course 210A. Radical, irreducible modules and principal rings, rings and algebras with minimum condition.

212. Homological Algebra. (4) Requisite: course 210A. Modules over a ring, homomorphisms and tensor products of modules, functors and derived functors, homological algebra in triangulated categories.

213A-213B. Theory of Groups. (4-4) Requisite: course 210A. Topics include representation theory, transfer theory, infinite Abelian groups, free products and presentations of groups, soluble and nilpotent groups, and free groups and Hecke algebras.

214A-214B. Introduction to Algebraic Geometry. (4-4) Requisite: course 210A. Basic definitions and first properties of algebraic varieties in affine and projective space: irreducibility, dimension, singular and smooth points. More advanced topics, such as sheaves and their cohomology, or introduction to theory of Riemann surfaces, as time permits.

216. Further Topics in Algebraic Geometry. (4) Requisites: courses 214A, 214B. Closer examination of areas of current research in algebraic geometry. Variable content may include algebraic surfaces, Abelian varieties, invariant theory, Hodge theory, or geometry over finite fields. May be repeated for credit by petition.

M217. Geometry and Physics. (4) (Same as Physics M236.) Lecture, three hours. Interdisciplinary course on topics at interface between physics quantum fields and superstrings and mathematics of differential and algebraic geometry. Topics include supersymmetry, index theory, Seiberg/Witten theory, conformal field theory, Calabi-Yau manifolds, mirror symmetry and duality, integrable systems. S/U grading.

218B. Discrete Mathematics: Algebraic Methods. (4) (Formerly numbered 218.) Lecture, three hours. Basic algebraic methods in combinatorics and tensor product methods, eigenvalues of graphs and their application, combinatorial Nullstellensatz and Chevalley/Warning Theorem. Example to Bollobas construction of a chromatic number of unit circle graph of Euclidean space, explicit constructions of Ramsey graphs, other topics. S/U or letter grading.

218C. Topics in Discrete Mathematics. (4) Lecture, three hours. Examination of variety of methods, approaches, and techniques that were developed in last 30 years in discrete mathematics. Topics may include extremal problems for graphs and set systems, Ramsey theory, additive number theory combinatorial geometry, topological methods in combinatorics, entropy and other tools from information theory, discrete harmonic analysis and its applications to combinatorics and the theory of Banach spaces. Topics vary from year to year. May be repeated for credit with consent of instructor. S/U or letter grading.

Logic and Foundations

220A-220B-220C. Mathematical Logic. (4-4-4) Lecture, three hours. Requisite: course M114S. Fundamental methods and results in mathematical logic, using mathematical methods to reason about existence or nonexistence of proofs and computations in many different settings. Topics include compactness theorem, saturation of models, completeness and incompleteness of first-order theories, undecidability of arithmetic in models and degrees of unsolvability, recursion in Baire space, Zermelo/Fraenkel axioms, universe of constructible sets, and theories of the universe. S/U grading.

221A. Generalized Descriptive Set Theory. (4) Lecture, three hours. Preparation: knowledge of basic theory of topology and measure theory, of sections of real analysis. Topics include theorems, enriched languages, soft model theory, and simplicial homology. S/U or letter grading.

221B. Topics in Descriptive Set Theory. (4) Lecture, three hours. Discussion, one hour. Manifolds, tangent vectors, smooth maps, tangent bundles and vector bundles in general, vector fields and integral curves, Sard theorem on measure of critical values, embedding theorem, transversality, degree theory, Lefshetz fixed-point theorem, Euler characteristic, Ehresmann theorem that proper submersions are locally trivial fibrations. S/U or letter grading.

225A. Algebraic Topology. (4) Lecture, three hours. Topology, homotopy, homology, and covering spaces, singular homology and cohomology theory, axioms of homotopy theory, Mayer/Vietoris sequence, Poincare duality, Thom isomorphism, characteristic classes, Thom spaces, fibrations revisited from viewpoint of de Rham cohomology, Riemannian metrics, gradient, volume forms, and interpretation of classical integral theorems as aspects of de Rham theory for differential forms. S/U or letter grading.

225B. Algebraic Topology. (4) Lecture, three hours. Topics may include homology theory and characteristic classes, homology and cohomology of standard spaces, cell complexes and cellular homology, de Rham theorem on isomorphism of de Rham differential-form cohomology and singular cohomology with real coefficients. S/U or letter grading.

225C. Algebraic Topology. (4) Lecture, three hours. Discussion, one hour. Basic concepts of homotopy theory and fundamental groups, covering spaces, singular homology and cohomology theory, axioms of homotopy theory, Mayer/Vietoris sequence, calculation of homology and cohomology of standard spaces, cell complexes and cellular homology, de Rham theory on isomorphism of de Rham differential-form cohomology and singular cohomology with real coefficients. S/U or letter grading.

226A-226B. Differential Geometry. (4-4-4) Lecture, three hours. Requisite: course 225A. Manifold theory; connections, curvature, torsion, and parallelism. Riemannian manifolds; completeness, submanifolds, current curvature. Geodesics, conjugate points, variational methods, Myers theorem, nonpositive curvature. Further topics such as pinched manifolds, integral geometry, Kahler manifolds, symplectic spaces.

233. Partial Differential Equations on Manifolds. (4) Lecture, three hours. Requisites: courses 226A, 251A. Topics may include Lagrangian operator on a Riemannian manifold, eigenvalues, Atiyah/Singer index theorem, heat kernel and asymptotic expansion, harmonic functions, function theory on manifolds, Green's function, heat equation, minimal hypersurfaces, hyperbolic equations, wave equations, analytic solutions.

234. Topics in Differential Geometry. (4) Lecture, three hours. Requisites: courses 226A, 226B. Complex and Kahler geometry. Hodge theory, homogeneous manifolds and symmetric spaces, finiteness and con-
verge theorems for Riemannian manifolds, almost flat manifolds, closed geodesics, manifolds of positive scalar curvature, manifolds of constant curvature. Topics vary from year to year. May be repeated for credit by petition.

235. Topics in Manifold Theory. (4) Lecture, three hours. Requisites: courses 225A, 225B. Emphasis on low-dimensional manifolds. Structure and classification of manifolds, automorphisms of manifolds, submanifolds (e.g., knots and links). Topics vary from year to year. May be repeated for credit by petition.

236. Topology. (4) Lecture, three hours. Requisites: courses 225A, 225B. Decomposition spaces, surgery theory, group actions, dimension theory, infinite dimensional topology. Topics vary from year to year. May be repeated for credit by petition.

237. Topics in Algebraic Topology. (4) Lecture, three hours. Requisites: courses 227A, 227B. Fixed-point theory, fiber spaces and classifying spaces, characteristic classes, generalized homology and cohomology theories. Topics vary from year to year. May be repeated for credit by petition.

238A-238B. Dynamical Systems. (4-4) Lecture, three hours. Requisites: course 246A. Preparation: prior graduate preparation in one-year analysis courses. Topics include qualitative theory of differential equations, bifurcation theory, and Hamiltonian systems; differential dynamics, including hyperbolic theory and quasiperiodic dynamics; ergodic theory; low-dimensional dynamics. S/U or letter grading.

Analysis and Differential Equations

251B-251C. Topics in Partial Differential Equations. (4-4) In-depth introduction to topics of current interest in partial differential equations or their applications.

254A-254B. Topics in Real Analysis. (4-4) Requisites: courses 245A, 245B, 245C, 246A, 246B, 246C. Selected topics in analysis and its applications to geometry and differential equations. Topics vary from year to year. May be repeated for credit by petition.

Functional Analysis

255B-255C. Topics in Functional Analysis. (4-4) Requisites: course 255A. Topics include Banach algebras, operators on Banach spaces and Hilbert spaces, semigroups of operators, linear topological vector spaces, and other related areas.

256A-256B. Topological Groups and Their Representations. (4-4) Lecture, three hours. Requisites: course 255A. Topological groups and their basic properties; Peter-Weyl theorem; their representations. Duality and Fourier analysis on locally compact abelian groups. Induced representations, Pontryagin duality. Representations of special groups, e.g., Lorentz, Galilean, etc.; Projective representations. Representations of totally disconnected groups. S/U or letter grading.

Applied Mathematics

266D-266E. Applied Differential Equations. (4) Requisites: courses 265A, 265B. Topics in linear and nonlinear partial differential equations, with emphasis on energy estimates, numerical methods, and applications to fluid mechanics. Additional topics include dispersive waves, reaction-diffusion problems, and applications to fluid mechanics.

270B-270C. Computational Linear Algebra. (4-4) Lecture, three hours. Requisites: courses 115A, 151A, 151B, Program in Computing 10A. Direct, fast, and it-
erative algorithms, overdetermined systems; singular value decomposition, regularization, sparse systems, algebraic approach to problems. 

271A. Tensor Analysis. (4) Requisite: course 131A. Algebra and calculus of tensors on n-dimensional manifolds. Curvilinear coordinates and coordinate-free methods. Covariant differentiation. Green/Stokes theorems for differential forms. Applications to topics such as continuum and particle mechanics.

Probability and Statistics

275A-275B. Probability Theory. (4-4) Requisite: course 245A or 265A. Connection between probability theory and real analysis. Weak and strong laws of large numbers, central limit theorem, conditioning, ergodic theory, martingale theory.

275E. Stochastic Particle Systems. (4) Lecture, three hours. Requisite: course 275C. Interacting particle systems, including contact process, stochastic ising model, and exclusion processes; percolation theory, S/U or letter grading.

Special Studies

285A-285N. Seminars. (4 each) Seminar, three hours. No more than two 285 courses may be applied toward M.A. degree requirements except by prior consent of graduate chair. Topics in various branches of mathematics and their applications by means of lectures and informal conferences with staff members. S/U or letter grading.

285A. History and Development of Mathematics.
285B. Number Theory.
285C. Algebra.
285D. Logic.
285E. Geometry.
285F. Topology.
285G. Analysis.
285H. Differential Equations.
285I. Functional Analysis.
285K. Probability.
285L. Dynamical Systems.
285M. Combinatorics.

290A. History and Development of Mathematics.
290B. Number Theory.
290C. Algebra.
290D. Logic.
290E. Geometry.
290F. Topology.
290G. Analysis.
290H. Differential Equations.
290I. Functional Analysis.
290J. Applied Mathematics.
290K. Probability.
290L. Dynamical Systems.
290M. Mathematics.
290N. Combinatorics.
290O. Cryptography.

Program in Computing
Lower Division Courses

1. Introduction to Computers and Computing. (4) Lecture, three hours; laboratory, one hour. Not open for credit to students with credit for course 15 or 10A; may not be taken concurrently with courses 15 or 10A. Fundamentals of computers and computing; editors,
450  /  Mathematics/Atmospheric and Oceanic Sciences

15. Software Tools for Information Management. (1) Lecture, one hour; laboratory, two hours. Preparation: some familiarity with computers. Not open for credit to students with credit for course 1; may not be taken concurrently with course 1. May be taken by students with credit for more advanced courses. Introduction to spreadsheets and databases in laboratory setting. P/NP or letter grading.

16. Computer System Organization. (1) Lecture, two hours; laboratory, two hours. Recommended requisite for students with no prior computing experience: course 1. May be taken concurrently with course 1. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

Robert G. Fovell, Ph.D., Chair
Faculty Committee
Christopher R. Anderson, Ph.D. (Mathematics)
Robert G. Fovell, Ph.D. (Atmospheric and Oceanic Sciences)
J. David Neelin, Ph.D. (Atmospheric and Oceanic Sciences)
Peter Peterson, Ph.D. (Mathematics)

Scope and Objectives

The Mathematics/Atmospheric and Oceanic Sciences B.S. degree program is designed for students who have an interest in and talent for both subjects. Students completing the major are well-qualified for graduate study in the most demanding graduate programs in atmospheric sciences, ocean sciences, or applied mathematics. Postgraduate training leads to employment at a professional level in academia, government, or private enterprise. Opportunities outside academia include environmental agencies, consulting companies, and governmental agencies such as NASA, National Oceanic and Atmospheric Administration (NOAA), National Center for Atmospheric Research (NCAR), Department of Energy (DOE), and the military, the Air Force and Navy in particular.

Graduates of the program are employed by private and public weather products firms, consulting companies, public utilities, and as science teachers at the elementary and secondary levels.

Undergraduate Study

The Mathematics/Atmospheric and Oceanic Sciences major is a demanding capstone major. Students acquire experience in conceiving and executing research projects designed to evaluate hypotheses and complete an individual project or thesis selected with the assistance of the program advisers and faculty men-

spreadsheets, file manager; machine organization and computer hardware; Internet; software applications. P/ NP or letter grading.

15. Software Tools for Information Management. (1) Lecture, one hour; laboratory, two hours. Preparation: some familiarity with computers. Not open for credit to students with credit for course 1; may not be taken concurrently with course 1. May be taken by students with credit for more advanced courses. Introduction to spreadsheets and databases in laboratory setting. P/NP or letter grading.

16. Computer System Organization. (1) Lecture, two hours; laboratory, two hours. Recommended requisite for students with no prior computing experience: course 1. May be taken concurrently with course 1. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

Scope and Objectives

The Mathematics/Atmospheric and Oceanic Sciences B.S. degree program is designed for students who have an interest in and talent for both subjects. Students completing the major are well-qualified for graduate study in the most demanding graduate programs in atmospheric sciences, ocean sciences, or applied mathematics. Postgraduate training leads to employment at a professional level in academia, government, or private enterprise. Opportunities outside academia include environmental agencies, consulting companies, and governmental agencies such as NASA, National Oceanic and Atmospheric Administration (NOAA), National Center for Atmospheric Research (NCAR), Department of Energy (DOE), and the military, the Air Force and Navy in particular.

Graduates of the program are employed by private and public weather products firms, consulting companies, public utilities, and as science teachers at the elementary and secondary levels.

Undergraduate Study

The Mathematics/Atmospheric and Oceanic Sciences major is a demanding capstone major. Students acquire experience in conceiving and executing research projects designed to evaluate hypotheses and complete an individual project or thesis selected with the assistance of the program advisers and faculty men-
tor. The topic should reflect integrative application of mathematics to atmospheric and oceanic sciences. Students are expected to prepare a significant independent piece of work that applies knowledge gained in their coursework in a new and unique way.

Mathematics/Atmospheric and Oceanic Sciences B.S.

**Preparation for the Major**

**Required:** Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Physics 1A, 1B, 1C, Program in Computing 10A, and two courses selected from Atmospheric and Oceanic Sciences 1, 2, 3, 5, Physics 4AL and 4BL are recommended but not required. Chemistry and Biochemistry 14A and 14B (or 20A and 20B) may also be required, depending on atmospheric and oceanic sciences upper division course selection. Each course must be taken for a letter grade and must be passed with a grade of C– or better, and students must have a minimum overall grade-point average of 2.0 for the courses.

**Transfer Students**

Transfer applicants to the Mathematics/Atmospheric and Oceanic Sciences major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one introductory course as possible prior to admission to UCLA: two years of calculus for majors, one C++ programming course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** Six mathematics courses, including Mathematics 115A, 131A, 134, and three elective courses selected from 115B, 131B, 135, 136, 142, 151A, 151B, 170A, 170B, of which must be 115B, 131B, 151B, or 170B; six atmospheric and oceanic sciences courses, including three core courses selected from Atmospheric and Oceanic Sciences 101, 102, 103, 104, M105, and three elective courses selected from the five listed above (if not taken to satisfy the core requirement) or from C110, C115, M120, 125, 130, 145, C160, C170, 180.

One capstone senior projects/thesis course, Atmospheric and Oceanic Sciences 199, taken for a minimum of 2 units, is also required. An individual project or thesis to be selected with the assistance of the program advisers and a faculty mentor must be completed.

No more than one course may be applied toward both this major and a major or minor in another department or program.

**Mathematics/Economics**

**Interdepartmental Program**

**College of Letters and Science**

UCLA

6363 Math Sciences

Box 951555

Los Angeles, CA 90095-1555

(310) 206-1286

fax: (310) 206-6673
e-mail: ugrad@math.ucla.edu

http://www.math.ucla.edu/ugrad/mathecon.shtml

Don M. Blasius, Ph.D., Chair

**Faculty Committee**

Don M. Blasius, Ph.D. (Mathematics)
Moshe Buchinsky, Ph.D. (Economics)
Russel E. Caflisch, Ph.D. (Mathematics)
Kathleen M. McGarry, Ph.D. (Economics)
Robert F. Brown, Ph.D. (Mathematics)
Marek G. Fycza, Ph.D. (Economics)
Sebastien Roch, Ph.D. (Mathematics)
William R. Zame, Ph.D. (Economics, Mathematics)

**Scope and Objectives**

In recent years economics has become increasingly dependent on mathematical methods, and the mathematical tools it employs have become more sophisticated.Mathematically competent economists, with bachelor's degrees and with advanced degrees, are needed in industry and government. Graduate programs in economics and finance programs in graduate schools of management require strong undergraduate preparation in mathematics for admission.

The Mathematics/Economics B.S. degree program is designed to give students a solid foundation in both mathematics and economics, stressing those areas of mathematics and statistics that are most relevant to economics and the parts of economics that emphasize the use of mathematics and statistics. It is ideal for students who may wish to complete a higher degree in economics.

**Undergraduate Study**

**Mathematics/Economics B.S.**

**Preparation for the Major**

**Required:** Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Economics 1, 2, 11, Program in Computing 10A, one Writing II course. Each course must be taken for a letter grade. The economics preparation for the major courses (Mathematics 31A, 31B, Economics 1, 2, and 11) are calculated separately from the mathematics preparation for the major courses (Mathematics 32A, 32B, 33A, 33B, 61, and Program in Computing 10A). The economics preparation courses must be completed with a minimum overall 2.5 grade-point average and a C or better in each course. The mathematics preparation courses must be completed with a minimum overall 2.0 grade-point average and a C– or better in each course. Students must receive a C or better in the Writing II course.

Repetition of more than one economics preparation course or of any economics preparation course more than once results in automatic dismissal from the major.

**Transfer Students**

Transfer applicants to the Mathematics/Economics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one introduction to discrete structures course, one microeconomic theory course, one macroeconomics course, and one C++ programming course.

Transfer credit for any of the above is subject to department approval; consult an undergraduate counselor before enrolling in any courses for the major.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** Six mathematics/statistics courses, including Mathematics 115A, 131A, 170A or Statistics 100A, 170B or Statistics 108B, and two courses from Mathematics 131B, 164, 174; five economics courses, including Economics 101, 102, 103, and two additional courses from 106E through 199B. Each course must be taken for a letter grade. Transfer credit is subject to department approval; consult an undergraduate counselor before enrolling in any courses for the major.

To graduate, the six Mathematics Department courses must be passed with an overall grade-point average of 2.0, as must the five courses from the Economics Department, with grades of C– or better in Economics 101 and 102.

**Honors Program**

Students who wish to graduate with departmental honors should apply for admission to the honors program in the Mathematics Department Student Services Office. They may apply any time after completing the preparation for the major courses with an overall grade-point average of 3.5 or better.

To qualify for honors at graduation, students must (1) complete Mathematics 110BH or 131BH, and 115AH, (2) prepare a senior thesis acceptable to the departmental honors committee, (3) present the thesis in Economics 198A and 198B, and (4) complete the major requirements with at least a 3.5 GPA in the mathematics and economics courses. Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

**Computing Specialization**

Students may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the major and (2) completing Mathematics 61 or 180, Program in Computing 10A, 10B, two courses from 10C, 15, 20A, 20B, 30, 40A, 60, and at least two

Neil B. Morley, Ph.D.
Robert S. Shafer, Ph.D.
Ronaldo Szilard, Ph.D.

Scope and Objectives

The Department of Mechanical and Aerospace Engineering offers curricula in aerospace engineering and mechanical engineering at both the undergraduate and graduate levels. The scope of the departmental research and teaching program is broad, encompassing dynamics, fluid mechanics, heat and mass transfer, manufacturing and design, nanoelectromechanical and microelectromechanical systems, structural and solid mechanics, and systems and control. The applications of mechanical and aerospace engineering are quite diverse, including aircraft, spacecraft, automobiles, energy and propulsion systems, robotics, machinery, manufacturing and materials processing, microelectronics, biological systems, and more.

At the undergraduate level, the department offers accredited programs leading to B.S. degrees in Aerospace Engineering and in Mechanical Engineering. At the graduate level, the department offers programs leading to M.S. and Ph.D. degrees in Mechanical Engineering and in Aerospace Engineering. An M.S. in Manufacturing Engineering is also offered.

Undergraduate Study

The Aerospace Engineering and Mechanical Engineering majors are designated capstone majors. Within their capstone courses, Aerospace Engineering students are exposed to the conceptual and design phases for aircraft development and produce a structural design of a component, such as a lightweight aircraft wing. Mechanical Engineering students work in teams in their capstone courses to propose, design, analyze, and build a mechanical or electromechanical device. Graduates of both programs should be able to apply their knowledge of mathematics, science, and engineering in technical systems; design a system, component, or process to meet desired needs; function as productive members of a team; identify, formulate, and solve engineering problems; and communicate effectively, both orally and in writing.

Aerospace Engineering B.S.

Capstone Major

The ABET-accredited aerospace engineering program is concerned with the design and construction of various types of fixed-wing and rotary-wing (helicopters) aircraft used for air transportation and national defense. It is also concerned with the design and construction of spacecraft, the exploration and utilization of space, and related technological fields.

Aerospace engineering is characterized by a very high level of technology. The aerospace engineer is likely to operate at the forefront of scientific discoveries, often stimulating these discoveries and providing the inspiration for the creation of new scientific concepts. Meeting these demands requires the imaginative use of many disciplines, including fluid mechanics and aerodynamics, structural mechanics, materials and aeroelasticity, dynamics, control and guidance, propulsion, and energy conversion.

Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L; Computer Science 31; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Physics 1A, 1B, 1C, 4A, 4B, 4L.

The Major

Required: Mechanical and Aerospace Engineering 101, 102, 103, 105A, 107, 150A, 150B, 150F, 154S, 155 or 161A or 169A, 157A, 157S, 164A, 171A, 182A; two departmental breadth courses (Electrical Engineering 100 and Materials Science and Engineering 104) — or one if both of these courses are taken as part of the technical breadth requirement, students must select a replacement upper division course or courses from the department — except for Mechanical and Aerospace Engineering 156A — or, by petition, from outside the department; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; two capstone design courses (Mechanical and Aerospace Engineering 154A, 154B); and two major field elective courses (8 units) from Mechanical and Aerospace Engineering 105D, 131A, 131AL, C132A, 133A, 133AL, 150C, C150S, 150R, 153A, 155 (unless taken as a required course), 161A (unless taken as a required course), 161B, 161C, 161D, 162A, 163A, 166C, M168, 169A (unless taken as a required course), 171B, 172, C175A, 181A, 182B, 182C, 183.

For information on University and general education requirements, see the College and Schools section earlier in this catalog.

Mechanical Engineering B.S.

Capstone Major

The ABET-accredited mechanical engineering program is designed to provide basic knowledge in thermodynamics, fluid mechanics, heat transfer, solid mechanics, mechanical design, dynamics, control, mechanical systems, manufacturing, and materials. The program includes fundamental subjects important to all mechanical engineers.
Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L; Computer Science 31; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Mechanical and Aerospace Engineering 94; Physics 1A, 1B, 1C, 4AL, 4BL.

The Major

Required: Electrical Engineering 110L, Mechanical and Aerospace Engineering 101, 102, 103, 105A, 105D, 107, 131A or 133A, 156A, 157A, 162A, 171A, 182A, 183; two departmental breadth courses (Electrical Engineering 100 and Materials Science and Engineering 104 - if one or both of these courses are taken as part of the technical breadth requirement, students must select a replacement upper division course or courses from the department — except for Mechanical and Aerospace Engineering 166A — or, by petition, from outside the department); three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; two capstone design courses (Mechanical and Aerospace Engineering 162B, 162M); and two major field elective courses (8 units) from Mechanical and Aerospace Engineering 131A (unless taken as a required course), 131AL, C132A, 133A (unless taken as a required course), 133AL, 134, 135, 136, CM140, 150A, 150B, 150C, C150G, 150P, 150R, 153A, 155, 157A, 161A, 161B, 162A, 163A, 163C, M168, 169A, 171B, 172, 174, C175A, CM180, CM180L, 181A, 182B, 182C, 184, 185, C186, C187L.

For information on University and general education requirements, see the College and Schools section earlier in this catalog.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees; available at the Graduate Division website, http://www.gdnvnet.ucla.edu/gasla/library/pgmrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Mechanical and Aerospace Engineering offers the Master of Science (M.S.) degree in Manufacturing Engineering, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Aerospace Engineering, and Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Mechanical Engineering.

Mechanical and Aerospace Engineering

Lower Division Courses

94. Introduction to Computer-Aided Design and Drafting. (4) Lecture, two hours; laboratory, four hours. Fundamentals of computer graphics and two- and three-dimensional modeling on computer-aided design and drafting systems Studying modern data acquisition and more online computer systems to design and display various objects. Letter grading.

Upper Division Courses

103. Elementary Fluid Mechanics. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Required: Mathematics 32B, 33A, Physics 1B. Introductory course dealing with application of principles of mechanics to flow of compressible and incompressible fluids. Letter grading.

105A. Introduction to Engineering Thermodynamics. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Required: Chemistry 20B, Mathematics 32B. Phenomenological thermodynamics, irreversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems. Letter grading.

107. Introduction to Modeling and Analysis of Dynamic Systems. (4) Lecture, four hours; discussion, one hour; laboratory; two hours; outside study, five hours. Required: Computer Science 31, Electrical Engineering 100 (enforced); Introduction to modeling of physical systems, with examples of mechanical, fluid, thermal, and electrical systems. Description of these systems, their behavior, stability, oscillations, impulse response, convolution, frequency response, first- and second-order system transient response analysis, and numerical solution. Nonlinear differential equation descriptions with discussion of equilibrium solutions, small signal linearization, large signal response. Block diagram representation and response of interconnections of systems. Hands-on experiments reinforce lecture material. Letter grading.

131AL. Thermodynamics and Heat Transfer Laboratory. (4) Laboratory, eight hours; outside study, four hours. Required: courses 131A, and 157 or 157S. Experimental study of physical phenomena and engineering systems, including modern data acquisition and processing techniques. Experiments include studies of heat transfer phenomena and testing of cooling tower, heat exchanger, and internal combustion engine. Students take and analyze data and discuss physical phenomena. Letter grading.

133A. Engineering Thermodynamics. (4) Lecture, discussion, four hours; outside study, six hours. Required: courses 132A, and 157 or 157S. Experimental study of power conversion and heat transfer processes in gas turbines, steam turbines, and combustion engines. Experiments include studies on various objects. Letter grading.

133AL. Power Conversion Thermodynamics Laboratory. (4) Laboratory, eight hours; outside study, four hours. Required: courses 133A, and 157 or 157S. Experimental study of power conversion and heat transfer processes in gas turbines, steam turbines, and combustion engines. Experiments include studies on various objects. Letter grading.

134. Design and Operation of Thermal Hydraulic Power Systems. (4) Lecture, three hours; laboratory, three hours; outside study, six hours. Required: courses 133A, 133AL. Thermal hydraulic design, maintenance and operation of power systems, gas turbines, steam turbines, centrifugal refrigeration units, absorption refrigeration units, compressors, valves and piping systems, and instrumentation and control systems. Letter grading.

135. Fundamentals of Nuclear Science and Engineering. (4) Lecture, two hours; outside study, six hours. Required: courses 131A, 133A. Thermal hydraulic design, maintenance and operation of power systems, gas turbines, steam turbines, centrifugal refrigeration units, absorption refrigeration units, compressors, valves and piping systems, and instrumentation and control systems. Letter grading.

137. Advanced Thermodynamics. (4) Lecture, discussion, four hours; outside study, six hours. Prior knowledge in engineering thermodynamics and fluid mechanics preferred. Letter grading.

139. Introduction to Biomechanics. (4) Same as Biomedical Engineering CM140. Lecture, four hours; discussion, two hours; outside study, six hours. Recommended: course 105D. Biomechanics of human body; skeletal and muscle functions. Conventional uses. Letter grading.

CM140. Introduction to Biomechanics. (4) Same as Biomedical Engineering CM140. Lecture, four hours; discussion, two hours; outside study, six hours. Recommended: course 105D. Biomechanics of human body; skeletal and muscle functions. Conventional uses. Letter grading.

150B. Aerodynamics. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 129A, 130A. Thermodynamic properties of gases, aircraft jet engine cycle analysis and component performance, component matching, advanced aircraft engine topics. Letter grading.

150R. Rocket Propulsion. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 103, 150A. Thermodynamic properties of gases, aircraft jet engine cycle analysis and component performance, component matching, advanced aircraft engine topics. Letter grading.

150C. Combustion Systems. (4) Lecture, four hours; outside study, eight hours. Enrollment required: courses 103, 150A. Chemical thermodynamics of ideal gas mixtures, premixed and diffusion flames, explosions and detonations, combustion chemistry, high explosives. Combustion processes in rocket, turbine, and internal combustion engines; heating applications. Letter grading.

151G. Fluid Dynamics of Biological Systems. (4) (Formerly numbered 150G.) Lecture, four hours; outside study, seven hours. Enrollment required: courses 103, 150A. Thermodynamic properties of gases, aircraft jet engine cycle analysis and component performance, component matching, advanced aircraft engine topics. Letter grading.

152. Mechanical Engineering Laboratory. (4) Laboratory, eight hours; outside study, four hours. Requisites: courses 101, 102, 105A, 105B, 150A, 150B, 150C. Analytical mechanics of rigid bodies. Euler equations, motion of rotating bodies, oscillatory motion, normal coordinates, linear systems and vibrations. Letter grading.

156A. Advanced Strength of Materials. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enrollment required: courses 101, 182A. Not open to students with credit for course 166A. Concepts of stress, strain, and failure. Stress in loaded beams with symmetric and asymmetric cross sections. Torsion of cylinders and thin-walled structures, shear flow. Stresses in pressure vessels, pressuritization, rotating shafts. Curved beams. Contact stresses. Strength and failure, plastic deformation, fatigue, elastic instability. Letter grading.

157. Basic Mechanical Engineering Laboratory. (4) Laboratory, eight hours; outside study, four hours. Enrollment required: courses 101, 103, 105A, 105B, Electronic Engineering 100. Methods of measurement of basic quantities and performance of basic experiments in area of fluid mechanics/aerodynamics, as well as hands-on experience with design of experimental programs and use of modern experimental tools and techniques in field. Letter grading.

157F. Mechanical and Aerospace Engineering Laboratory. (4) Laboratory, eight hours; outside study, four hours. Enforced requirements: courses 101, 103, 105A, 105B. Experimental design of rocket propulsion systems and associated component performance. Control and command of primary transducers, computer-aided data acquisition, signal processing, and data analysis. Performance of experiments to enhance understanding of basic physical, chemical, and mechanical phenomena in area of fluid mechanics/aerodynamics. Letter grading.

161C. Spacecraft Design. (4) Lecture, four hours; outside study, eight hours. Enforced requisite: course 154S. Classical preliminary design of aircraft, including weight estimation, performance and stability, and control consideration. Term assignment consists of preliminary design of low-speed aircraft. Letter grading.

161D. Space Technology Hardware Design. (4) Lecture, two hours; laboratory, three hours; outside study, seven hours. Requisites: course 154S, 154V, 155A. Spacecraft design. Analytical methods for modern spacecraft design. Emphasis on design for reliability and integrity. Students work in groups of three or four, with each student responsible primarily for one subsystem and for integration with whole. Letter grading.

161E. Space Technology and Rocket Propulsion. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: courses 103, 105A, 105B. Rocket engines, propulsion system design, and component performance for credit to students with credit for both courses 150R and 161R. Letter grading.

162. Mechanical Engineering Design I. (4) Lecture, two hours; laboratory, four hours; outside study, six hours. Requisites: courses 94, 156A, 162A, 163, Electrical Engineering 110L, Mechanical Engineering 110L. Introduction to computer-aided design. Use of modern design software packages for spacecraft and rocket system design. Laboratory modules include CAD design, analysis, computer-aided design, and mechanical design for team project. Letter grading.

162E. Mechanical Engineering Design II. (4) Laboratory, four hours; outside study, eight hours. Requisite: course 162D. Limited to seniors. Second of two mechanical engineering capstone design courses. Students design a project that builds upon work started in course 162D, with the aid of a CAD design laboratory, CAD analysis laboratory, and mechanical design laboratory. Design theory, design tools, economics, marketing, manufacturability, quality, intellectual property, design for manufacturability, design for safety and reliability, and design for social impact. Students conduct hands-on design, fabrication, and testing. Letter grading.

163A. Introduction to Computer-Controlled Machines. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 154S, 154V, 155A. Modeling of computer-controlled machinery, including electrical, mechanical, and control systems. Letter grading.

163B. Analysis of Flight Structures. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 101, 182A. Not open to stu-
students with credit for course 156A. Introduction to two-dimensional elasticity, stress-strain laws, yield and fatigue. Examination of torsion of thin-walled cross sections: shear flow, shear-lag; combined bending torsion of thin-walled, stiffened structures used in aerospace vehicles; elements of plate bending theory. Block exams. Letter grading.

166C. Design of Composite Structures. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 156A or 166A. History of composites, stress-strain relations for composite materials, bending and extension of symmetric laminates, failure analysis, design examples and design studies, buckling of composite components, non-symmetric laminates, micromechanics of composites. Letter grading.

172. Control System Design Laboratory. (4) Laboratory, one hour; design, two hours; outside study, five hours. Co-requisite: course 157A or Electrical Engineering 141. Application of frequency domain design techniques for control of mechanical systems. Successful control designer requires students to formulate performance specification for control problem, experimentally identify mechanical systems, and develop uncertainty descriptions for design models. Exploration of issues concerning model uncertainty and sensor/actuator placement. Students implement control designs on flexible structures, rate gyro, and inverted pendulum. Detailed reports required. Letter grading.

174. Probability and Its Applications to Risk, Reliability, and Decision Analysis. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: Mathematics 33A. Introduction to probability theory; random variables, distributions, functions of random variables. Properties of probability measures, reliability, redundancy, complex systems, stress-strength mod-

els, fault tree analysis, statistical quality control by vari-
ables and by attributes, acceptance sampling. Letter grading.

C175A. Probability and Stochastic Processes in Dynamical Systems. (4) Lecture, four hours; outside study, eight hours. Enforced requisites: courses 107, 182A. Probability spaces, random variables, stochastic sequences and processes, expectation, conditional expectation, Gaussian/Markov sequences, and minimum variance estimator (Kalman filter) with applications. Concurrently scheduled with course C271A. Letter grading.

CM180. Introduction to Micromachining and Microelectromechanical Systems (MEMS). (4) (Same as Biomedical Engineering CM150 and Electrical Engineering CM150.) Lecture, four hours; discussion, one hour; outside study, seven hours; outside study, eight hours. Requisites: Chemistry 20A, 20L, Physics 1A, 1B, 1C, 4AL, 4BL. Corequisite: course CM180L. Lecture to micromachining technologies and microelectromechanical systems (MEMS). Methods of micromachining and how these methods can be used to produce variety of MEMS, including microstructures, microsensors, and microactuators. Methods used to produce variety of MEMS, including microstructures, microsensors, and microactuators. Student work on developing prototypes of desired MEMS devices. Concurrently scheduled with course CM280A. Letter grading.

CM180L. Introduction to Micromachining and Microelectromechanical Systems Laboratory. (2) (Same as Biomedical Engineering CM150L and Electrical Engineering CM150L.) Lecture, one hour; laboratory, four hours; outside study, one hour. Requisites: CM180. Hands-on introduction to micromachining technologies and microelectromechanical systems (MEMS) laboratory. Methods of micromachining technologies and methods used to produce variety of MEMS, including microstructures, microsensors, and microactuators. Students go through process of fabricating MEMS device. Concurrently scheduled with course CM280L. Letter grading.

181A. Complex Analysis and Integral Transforms. (4) Lecture, four hours; outside study, eight hours. Enforced requisite: course 182A. Complex variables, analytic functions, conformal mapping, contour integrals, singularities, residues, Cauchy integrals; Laplace transform: properties, convolution, inversion; Fourier transform: properties, convolution, FFT, applications in dynamics, vibrations, structures, and heat conduction. Letter grading.

183. Introduction to Manufacturing Processes. (4) Lecture, three hours; laboratory, four hours; outside study, four hours. Enforced requisite: course CM104. Manufacturing fundamentals. Materials in manu-

184. Introduction to Geometry Modeling. (4) Lecture, four hours; laboratory, four hours; outside study, four hours. Requisites: course 94, Computer Science 31. Fundamentals in curve and surface modeling, parametric spaces, blending functions, conics, splines and Bezier curve, coordinate transforma-
tions, algebraic and geometric form of surfaces, analytical properties of curve and surface, hands-on experience with CAD/CAM systems design and implementation. Letter grading.

185. Introduction to Radio Frequency Identification and Its Application in Manufacturing and Supply Chain. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 162B or 162D (enforced). Computer Science 31. Manufacturing today requires assembling of individual components into assembled products, shipping of such products, and eventually use, maintenance, and recycling of such products. Radio frequency identification (RFID) circumvents problems associated with assembling, and eventual recycling of products allowing them to be tracked automatically as they move through the manufacturing and supply chain process. RFID tags have memory and store data that allows an individual product status to be stored, transmitted and delivered. Data can then be forwarded by reader to enterprise software in the form of RFID data. Study of how RFID is being utilized in manufacturing, with focus on automotive and aerospace. Letter grading.

C186. Applied Optics. (4) (Formerly numbered 186.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 182B. Fundamental principles of optical systems. GEometric optics and aberration theory. Diffraction and interference. Fourier optics, beam optics. Propagation of light, Snell’s law, and Huygen principle. Refraction and reflection, Plane waves, spherical waves, and image formation. Total internal reflection. Polarization, polarizers, and waveplates. Lenses and aberrations, lens laws and formation of images, resolution and primary aberrations. Simple optical instruments, still cameras, shutters, apertures. Design of telescopes, microscope design, projection system design. Basic phase, chemical, and biological principles related to these techniques, top-down and bottom-up (self-assembly) nanofabrication, nanochar-
acterization (AEM, SEM, etc.), and optical and electrochemical biosensors. Students encouraged to create their own ideas in self-designed experiments. Concurrently scheduled with course C286L. Letter grading.

C187L. Nanoscale Fabrication, Characterization, and Biodetection Laboratory. (4) Lecture, two hours; laboratory, two hours; outside study, eight hours. Multi-disciplinary course that introduces laboratory tech-
niques of nanoscale fabrication, characterization, and biodetection. Basic physical, chemical, and biological principles related to these techniques, top-down and bottom-up (self-assembly) nanofabrication, nanocharacterization (AEM, SEM, etc.), and optical and electrochemical biosensors. Students encouraged to create their own ideas in self-designed experiments. Concurrently scheduled with course C287L. Letter grading.

188. Special Courses in Mechanical and Aerospace Engineering. (2 to 4) Lecture, two to four hours; outside study, four to eight hours. Special topics in mechanical and aerospace engineering for under-
graduate students taught on experimental or tempo-
rary basis such as those organized by and visit-
ing faculty members. May be repeated once for credit with topic or instructor change. P/NP or letter grading.

194. Research Group Seminars: Mechanical and Aerospace Engineering. (2 to 4) Lecture, two to four hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field. Student presentation of proj-
eces in research specialty. May be repeated for credit. P/NP or letter grading.
Graduate Courses

235A. Nuclear Reactor Theory. (4) Lecture, four hours; outside study, eight hours. Requisites: currently scheduled with course C132A. Letter grading.

235G. Microscopic Energy Transport. (4) Lecture, four hours; outside study, eight hours. Requisite: course 105D. Heat carriers (photons, electrons, phonons, molecules) and their energy characteristics, statistical properties of heat carriers, scattering and propagation of real heat carriers, transport equations, derivation of classical laws from Boltzmann transport equations, deviation from classical laws at small scale. Letter grading.

239B. Seminar: Current Topics in Transport Phenomena. (2 to 4) Seminar, two to four hours; outside study, eight hours. Requisites: courses 250A, 250B, 250C. Molecular and chemical description of equilibrium and nonequilibrium factors and high-temperature gas flows, chemical thermodynamics and statistical thermodynamics for calculations, equilibrium flows of real gases, vibrational and chemical rate processes, nonequilibrium flows of real gases, and computational fluid dynamics methods for nonequilibrium hyperthermal flows. Letter grading.

239G. Special Topics in Nuclear Engineering. (2 to 4) Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change. S/U grading.

239H. Special Topics in Fusion Physics, Engineering, and Technology. (2 to 4) Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change. S/U grading.

252A. Stability of Fluid Motion. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Instabilities that can become unstable and lead to turbulence of secondary motions. Linear stability theory; thermal, centrifugal, and shear instabilities; boundary layer instability. Nonlinear aspects: sufficient conditions, linear and nonlinear instabilities, supercritical states, transition to turbulence. Letter grading.

252D. Combustion Rate Processes. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Basic concepts of fluid mechanics: molecular collisions, distribution functions and averaging, semianalytical and ab initio potential surfaces, trajectory calculations, statistical reaction rate theories. Practical examples of large-scale chain mechanisms from combustion chemistry of several elements, etc. Letter grading.

253A. Advanced Engineering Acoustics. (4) Lecture, four hours; outside study, eight hours. Advanced topics in engineering acoustics, including plane wave propagation, spherical wave propagation, stationary wave propagation, propagation in bounded media, Ray acoustics; attenuation mechanisms in fluids and solids. Letter grading.

255A. Advanced Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 155, 169A. Variational principles and Lagrange equations. Kinematics and dynamics of rigid bodies; procession and nutation of spinning bodies. Letter grading.

255B. Mathematical Methods in Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 255A. Concepts of stability, state-space interpretation; stability determination by simulation, linearization, and Lyapunov direct method; the Hamiltonian as a Lyapunov function; nonautonomous systems; averaging techniques; methods of nonresonance analysis; parametric excitation and nonlinear resonance. Application to mechanical systems. Letter grading.

M256A. Linear Elasticity. (4) (Same as Civil Engineering M230A.) Lecture, four hours; outside study, eight hours. Requisite: course 156A or 166A. Linear elastostatics. Cartesian tensors; infinitesimal strain tensor; Cauchy stress tensor; strain energy; equilibrium equations; linear constitutive relations; plane elasticity problems; holes, corners, inclusions, cracks; three-dimensional problems of Kelvin, Boussinesq, and Cerruti. Introduction to boundary integral equation method. Letter grading.

M256B. Nonlinear Elasticity. (4) (Same as Civil Engineering M230B.) Lecture, four hours; outside study, eight hours. Requisite: course M256A. Kinematics of deformation; stress; spatial coordinates; deformation gradient tensor; nonlinear and linear strain tensors; strain displacement relations; balance laws, Cauchy and Piola stresses. Cauchy equations of motion, balance of linear momentum; constitutive relations; elastic, hyperelasticity, thermoplasticity, linearization of field equations; solution of selected problems. Letter grading.

262. Mechanics of Intelligent Material Systems. (4) Lecture, four hours; outside study, eight hours. Recommended requisite: course 166C. Constitutive relations for electro-magneto-mechanical materials. Fiber-optic sensor technology. Micro/macro analysis, including classical lamination theory, shear lag theory, concentric cylinder analysis, hexagonal models, and calculation of homogenization techniques as they apply to active materials. Active systems design, inch-worm, and bimorph. Letter grading.

263A. Analytical Foundations of Motion Controlers. (4) Lecture, four hours; outside study, eight hours. Recommended requisites: courses 163A, 294. Theory of motion control for modern computer-controlled machine tool systems. Design of feedback control systems; machine kinematics and dynamics; multi-axis control of machine tools; coordination routines for robotic systems; design and analysis of trajectory planning and analysis; geometry-speed-sampling time relationships. Letter grading.

263B. Spacecraft Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 255A. Recommended requisites: courses 163A, 294. Theory of motion control for modern computer-controlled machine tool systems. Design of feedback control systems; machine kinematics and dynamics; multi-axis control of machine tools; coordination routines for robotic systems; design and analysis of trajectory planning and analysis; geometry-speed-sampling time relationships. Letter grading.

271B. Stochastic Estimation. (4) Lecture, four hours; outside study, eight hours. Requisite: course 271A. Linear and nonlinear estimation theory, orthogonal projection lemma, Bayesian filtering theory, conditional mean and risk estimators. Letter grading.

M270A. Linear Optimal Control. (4) Lecture, four hours; outside study, eight hours. Requisite: course M270A or Electrical Engineering M240A. Existence and uniqueness of solutions to linear quadratic (LQ) optimal control problems for continuous-time and discrete-time systems, finite-time and infinite-time problems; Hamiltonian systems and optimal control, algebraic and differential Riccati equations; implications of optimality and stability; controllability, observability, realizability, and detectability. Letter grading.

M270B. Optimal Control. (4) (Same as Chemical Engineering M280A and Electrical Engineering M240B.) Lecture, four hours; outside study, eight hours. Requisite: course 171A or Electrical Engineering 141. State-space methods for linear, time-invariant (LTI) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvectors and eigenvalues, singular values, Cayley/ Hamilton theorem, Jordan forms; matrix equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with Kalman filter and estimation techniques. Letter grading.

270B. Linear Optimal Control. (4) Lecture, four hours; outside study, eight hours. Requisite: course M270A. Advanced study of topics in linear quadratic (LQ) optimal control problems for continuous-time and discrete-time systems, finite-time and infinite-time problems; Hamiltonian systems and optimal control, algebraic and differential Riccati equations; implications of optimality and stability; controllability, observability, realizability, and detectability. Letter grading.

271A. Probability and Stochastic Processes in Dynamical Systems. (4) (Formerly numbered 271A.) Lecture, four hours; outside study, eight hours. Enforced requisites: courses 107, 182A. Probability spaces, random variables, stochastic processes and expectations, conditional expectation, Gaussian/Markov processes, and first-order linear differential equations. Markov chains; stationarity and ergodicity; martingales and conditional independence; Kalman filter with applications. Concurrently scheduled with course C175A. Letter grading.

271B. Stochastic Estimation. (4) Lecture, four hours; outside study, eight hours. Requisite: course 271A. Linear and nonlinear estimation theory, orthogonal projection lemma, Bayesian filtering theory, conditional mean and risk estimators. Letter grading.

M270A. Linear Optimal Control. (4) Lecture, four hours; outside study, eight hours. Requisite: course M270A or Electrical Engineering M240A. Existence and uniqueness of solutions to linear quadratic (LQ) optimal control problems for continuous-time and discrete-time systems, finite-time and infinite-time problems; Hamiltonian systems and optimal control, algebraic and differential Riccati equations; implications of optimality and stability; con-
Topics selected from process control, differential games, nonlinear estimation, adaptive filtering, industrial and automation ideas in a user-friendly manner. Letter grading.

273A. Robust Control System Analysis and Design. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 171A, M270A. Graduate-level introduction to analysis and design of multivariable control systems. Multivariable loop-shaping, performance requirements, model uncertainty representations, and robustness covered in detail from frequency domain perspective. Structured singular value and its application to controller synthesis. Letter grading.

275A. System Identification. (4) Lecture, four hours; outside study, eight hours. Methods for identification of dynamical systems from input/output data, with emphasis on identification of discrete-time (digital) models of sampled data systems. Comparison of continuous-time models. Models identified include transfer functions and state-space models. Discussion of applications in mechanical and aerospace engineering, including robotics, micro-electromechanical systems (MEMS) devices, and acoustic ducts. Letter grading.

277. Advanced Digital Control for Mechatronic Systems. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Requisites: courses 171B, M280A. Design and analysis of control systems that generate coordinated oscillations. Topics include neuronal information processing through action potentials (spike train), central pattern generator, coupled nonlinear oscillators, optimal gaits (periodic motion) for animal locomotion, and entrainment to natural oscillations via feedback control. Letter grading.

CM280A. Introduction to Micromachining and Microelectromechanical Systems (MEMS). (4) (Same as Biomedical Engineering CM250A and Electrical Engineering CM250A.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Chemistry 20A, 20L, Physics 1A, 1B, 1C, 4A, 4L. Corequisite: course CM280L. Introduction to micromachining technologies and microelectromechanical systems (MEMS). Methods of micromachining and how these methods can be used to produce variety of MEMS, including microstructures, microsensors, and microactuators. Students design microfabrication processes capable of achieving desired MEMS device. Concurrently scheduled with course CM190. Letter grading.

M280B. Microelectromechanical Systems (MEMS) Fabrication. (4) (Same as Biomedical Engineering M282L and Electrical Engineering M242A.) Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisite: course CM180 or CM280A. Advanced discussion of micromachining processes used to construct MEMS components. Topics include lithographic, deposition, and etching processes, as well as their combination in process integration. Materials issues such as chemical resistance, corrosion, mechanical properties, and residual/intrinsic stress. Letter grading.

CM280L. Introduction to Micromachining and Microelectromechanical Systems (MEMS) Laboratory. (2) (Same as Biomedical Engineering CM250L and Electrical Engineering CM250L.) Lecture, one hour; laboratory, four hours; outside study, one hour. Requisites: Chemistry 20A, 20L, Physics 1A, 1B, 1C, 4A, 4L. Corequisite: course CM280A. Hands-on applications in micromachining technologies and microelectromechanical systems (MEMS) laboratory. Students go through process of fabricating MEMS device. Concurrently scheduled with course CM180L. Letter grading.

281. Microstructures. (4) Lecture, four hours; outside study, eight hours. Basic science issues in micro domain. Topics include micro fluid science, microscale heat transfer, mechanical behavior of microstructures, as well as dynamics and control. Letter grading.

M282. Microelectromechanical Systems (MEMS) Device Physics and Design. (4) (Same as Biomedical Engineering M252 and Electrical Engineering M252.) Lecture, four hours; outside study, eight hours. Introduction to MEMS design. Design methods, design rules, sensing and actuation mechanisms, microsensors, and microactuators. Designing MEMS to be produced with both processes. Computer-aided design for MEMS. Design project required. Letter grading.

283. Experimental Mechanics for Microelectromechanical Systems (MEMS)/(4) Lecture, four hours; outside study, eight hours. Methods, techniques, and philosophies being used to characterize microelectromechanical systems for engineering applications. Material characterization, mechanical/material properties, mechanical characterization. Topics include fundamen- tals of crystallography, anisotropic material properties, and behavioral characteristics. Considerable emphasis on emerging experimental approaches to assess design-relevant mechanical properties. Letter grading.

285. Interfacial Phenomena. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 103, 105A, 105D, 182A. Introduction to fundamental physical phenomena occurring at interfaces and application of their knowledge to engineering problems. Fundamental concepts of interfacial phenomena, including surface tension, capillary waves, surfactants, shockwaves, and interfacial dynamics, interfacial forces, interfacial hydrodynamics, and dynamics of triple line. Presentation of various applications, including wetting, change of phase (boiling and condensation), forms and emulsions, microelectromechanical systems, and biological systems. Letter grading.

C286. Applied Optics. (4) Lecture, four hours; discussion, one hour; outside study, eight hours. Requisite: course 171A. Advanced topics in linear systems. System inversion-based digital control algorithms and robustness properties, Youla parameterization of stabilizing controllers, previewed systems, compensator synthesis, and learning and control, and adaptive control. Real-time control investigation of topics to selected mechatronic systems. Letter grading.

287. Nanoscience and Technology. (4) (Same as Electrical Engineering M257.) Lecture, four hours; outside study, eight hours. Enforced requisite: course CM280A. Introduction to fundamentals of nanoscience and technology. Basic physical principles, quantum mechanics, chemical bonding and nanostructures, top-down and bottom-up (self-assembled) nano fabrication; nanocharacterization; nanomaterials, nanoelectronics, and nanobiotechnology. Introduction to new knowledge and techniques in nano areas to understand scientific principles behind nano devices. Letter grading.

C287L. Nanofabrication, Characterization, and Biodetection Laboratory. (4) Lecture, two hours; laboratory, two hours; outside study, eight hours. Multidisciplinary course that introduces laboratory techniques of nanofabrication, fabrication, and biodetection. Basic physical, chemical, and biological principles related to these techniques, top-down and bottom-up (self-assembled) nanofabrication; nanocharacterization (AEM, SEM, etc.), and optical and electrochemical biosensors. Students encouraged to create their ideas in self-designed experiments. Concurrently scheduled with course C187L. Letter grading.

288. Laser Microfabrication. (4) Lecture, four hours; outside study, eight hours. Requisites: Materials Science 104, Physics 17. Science and engineering of laser microfabrication of advanced materials, including semiconductors, metals, and insulators. Topics include fundamentals in laser interactions with advanced materials, transport issues (therma, mass, chemical, carrier, etc.) in laser microfabrication, state-of-art optics and instrumentation for laser microfabrication, applications such as rapid prototyping, surface modifications (physical/chemical), microfabrication for three-dimensional MEMS (microelectromechanical systems) and data storage, up-to-date research activities. Student term projects. Letter grading.

294. Computational Geometry for Design and Manufacturing. (4) Lecture, four hours; outside study, eight hours. Requisite: course 184. Computational geometry for design and manufacturing, with special emphasis on curve and surface theory. Geometric modeling of curves and surfaces, B-splines and NURBS, composite curves and surfaces, computing methods for surface design and manufacturing, student research topics in computational geometry for CAD/CAM systems. Letter grading.

295B. Internet-Based Collaborative Design. (4) Lecture, four hours; outside study, eight hours. Preparation: courses 94, 184. Exploration of advanced state-of-the-art concepts in Internet-based collaborative design, including software environments to connect de-
597B. Preparation for Ph.D. Preliminary examinations. (2 to 16) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 12) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 16) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

**MEDICINE**

David Geffen School of Medicine

UCLA

37-120 Center for the Health Sciences

Box 951736

Los Angeles, CA 90095-1736

(310) 280-6275

http://www.med.ucla.edu

**Chairs**

Alan M. Fogelman, M.D. (William S. Adams Professor of Medicine and Castera Professor of Cardiology), Executive Chair

Jan H. Tillisch, M.D., Executive Vice Chair

Mary C. Terenti, M.D., Executive Vice Chair, Academic Affairs

Robert K. Oye, M.D., Executive Vice Chair, Clinical Services

Dennis J. Slamov, M.D. (Bower Professor of Medical Oncology), Executive Vice Chair, Research

**Scope and Objectives**

The principal goal of the Department of Medicine is to educate students in the expert diagnosis and compassionate management of human illness. Building on the biochemical, physiological, and behavioral foundations of the preclinical experience, students are taught in formation acquisition through history taking, physical examination, and laboratory evaluation; information synthesis through achieving a differential diagnosis and evaluative plan; and medical decision making for continued evaluation and therapy. Students are encouraged and guided in developing a caring physician/patient relationship.

Instruction in the department is provided in all four years of medical school, with the third and fourth years constituting a continuum of clinical experience. Students become integrated into a ward team and have significant ambulatory care experiences. They apply and extend their clinical skills, medical knowledge, and judgment in the care of patients assigned to them under the immediate supervision of house officers and attending staff.

The department offers a broad range of advanced clinical clerkships in general and subspecialty ambulatory and hospital-based internal medicine at all the major affiliated centers.

For further details on the Department of Medicine and a listing of the courses offered, see http://www.medstudent.ucla.edu.

**Medicine**

Upper Division Courses

M160A. Health Outreach and Education for At-Risk Populations. (4) (Same as Public Health M160A.) Lecture, four hours; optional field observations. First in series of courses to explore prevention of disease in at-risk populations, clinical services and referrals for disadvantaged, and effects of low socioeconomic status on academic achievement, career, and family. Lectures by faculty and practitioners, with field visits. P/NP or letter grading.

M160B. Health Outreach and Education for At-Risk Populations. (4) (Same as Public Health M160B.) Lecture, two hours; discussion, two hours. Required: course M160A. Second in series of courses to explore prevention of disease in at-risk populations, clinical services and referrals for disadvantaged, and effects of low socioeconomic status on academic achievement, career, and family. Lectures by faculty and practitioners, discussion groups, and field activities including health education. P/NP or letter grading.

M160C. Health Outreach and Education to At-Risk Populations. (4) Formerly numbered 190C.) Seminar, two hours; fieldwork, six to eight hours. Requires: courses M160A, M160B. Processes involved with designing, delivering, and assessing community health education programs, under supervision of professional staff. P/NP or letter grading.

180. Special Topics in Medicine. (4) Lecture, four hours; discussion, one hour. Medical topics of special interest to undergraduate students. Specific subjects may vary each term depending on particular interest of instructors and students. Topics may include East/West medicine and global medicine. May be repeated for credit with topic or instructor change. P/NP or letter grading.

199. Directed Research in Medicine. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or inves-tigation under the guidance of a faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

**Graduate Courses**

M215. Interdepartmental Course: Tropical Medicine. (2) (Same as Pathology M215 and Pediatrics M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis is on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

M256. Interdisciplinary Response to Infectious Disease Emergencies: Medicine Perspective. (4) (Same as Community Health Sciences M256, Nursing M259, and Oral Biology M256.) Lecture, three hours; discussion, one hour. Designed to instill in professional students ideas of common emergency health problems and coordinated response, with specific attention to bioterrorism. Examination of tools to help students prevent, detect, and intervene in infectious disease emergencies. Interdisciplinary sessions also attended by students in Schools of Dentistry, Nursing, and Public Health during weeks two through five. Letter grading.

M260A-M260B. Methodology in Clinical Research I, II. (4-4) (Same as Biostatistics M260A-M260B.) Lecture, four hours. Recommended preparation: M.D., Ph.D., or dental degree. Requires: Biostatistics 170A, 265A. Course M260A is requisite to M260B. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmaco-kinetics. S/U or letter grading.
M260C. Methodology in Clinical Research III. (4)
(Same as Biomathematics M260C.) Discussion, four hours.
Recommended preparation: M.D., Ph.D. or dental degree.
Presentation of principles and practices of major disciplines underlying clinical research methodology,
such as biostatistics, epidemiology, pharmacokinetics.
S/U or letter grading.

M261. Responsible Conduct of Research Involving
Humans. (2) (Same as Biomathematics M261.)
Lecture, two hours; discussion, two hours.
Preparation: completion of one basic course in protection of human research subjects through Collaborative Institutional
Training Initiative. Discussion of current issues in responsible conduct of clinical research, including reporting of research, basis for authorship, issues in genetic research, principles and practice of research on humans, conflicts of interest, Institutional Review Board (IRB), and related topics. S/U or letter grading.

M263. Clinical Pharmacology. (2) (Same as Bio-
mathematics M263 and Psychiatry M263.) Lecture,
two hours. Preparation: completion of professional health sciences degree (M.D., D.D.S., D.N.Sc.,
or Ph.D.). Overview of principles of clinical pharmacology, especially as they relate to clinical and translational medicine and to advances in contemporary medicine such as targeting, gene therapy, and genomics. Letter grading.

M270C. Advanced Modeling Methodology for
Dynamic Biomedical Systems. (4) (Same as Biomed-
eering M296A and Computer Science M296A.) Lecture, four hours; outside study, eight hours.
Preparation: Electrical Engineering 141 or 142 or Mathematics 115A or Mechanical and Aerospace En-
eering 171A. Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems. Con-
trol system, multicomponent, noncompartmental, and input/output models, linear and nonlinear. Empha-
sis on model applications, limitations, and relevance in biomedical sciences and other limited data environ-
ments. Problem solving in PC laboratory. Letter grad-
ing.

M270D. Optimal Parameter Estimation and Experi-
timent Design for Biomedical Systems. (4) (Same as Biomathematics M270, Biomedical Engineering
M296B, and Computer Science M296B.) Lecture, four hours; outside study, eight hours. Preparation: course M220C. Estimation methodologies and model parameter estimation algorithms for fitting dynamic system models to biomedical data. Model discrimination methods. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on optimal sampling schedule design for kinetic models. Exploration of PC software for model building and optimal experiment de-
sign via applications in physiology and pharmacology. Letter grading.

M270E. Advanced Topics and Research in Bio-
medical Systems Modeling and Computing. (4)
(Same as Biomedical Engineering M296C and Com-
puter Science M296C.) Lecture, four hours; outside study, eight hours. Preparation: course M270C. Re-
commended: course M270D. Research techniques and experience on special topics involving models, modeling methods, and model/computing in biological and medical sciences. Review and critique of literature. Re-
search problem searching and formulation. Approac-

M290A-M290B. Child Abuse and Neglect. (2-2)
(Same as Community Health Sciences M245A-
M245B-M245C, Dentistry M300A-M300B-M300C, Ed-
Nursing M290A-M290B-M290C, and Social Welfare
M202F-M203G-M203H.) Lecture, two hours. Course
M290A is requisite to M290B. Intensive interdisciplinary study of child physical and sexual abuse and neg-
lect, with lectures by faculty members of Schools of Dentistry, Law, Medicine, Nursing, and Public Health and Departments of Education and Psychology, as well as by relevant public agencies. Letter grading.
Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

**Transfer Students**

Transfer applicants to the Microbiology, Immunology, and Molecular Genetics major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

Students intending to major in Microbiology, Immunology, and Molecular Genetics may seek counseling and petition to enter the major in the Student Affairs Office, 1602B Molecular Sciences.

**The Major**

**Required:** Four foundation courses (Chemistry and Biochemistry 153A, Microbiology, Immunology, and Molecular Genetics 101, 103L, 185A); five focus elective courses selected from Chemistry and Biochemistry 153L, Microbiology, Immunology, and Molecular Genetics 102, 106, 107, 123, 132, CM156, 168, 198C, 199, Molecular Cell, and Developmental Biology 138, 165A; and at least 8 units of general elective courses selected from Biostatistics 100A, Chemistry and Biochemistry 103, 110A, 113B, 114A, 153B, 153C, 156, CM180A, CM161A, 171, 172, C179, C181, Ecology and Evolutionary Biology 121, 135, 137, 162, Epidemiology 100, Human Genetics C144, Life Sciences 100HA, Molecular Cell, and Developmental Biology 100, 138, M140, C141, 143, 144, 165A, 168, 172, 187A, Neuroscience M101A, M101B, M101C.

Each major course must be taken for a letter grade of C– or better, and students must have a minimum overall grade-point average of 2.0 or better in the major.

**Honors Program**

Overall grade-point averages of 3.2 and 3.5 in the preparation for the major and major respectively are required to apply for departmental honors. In addition students must have junior standing and the sponsorship of a faculty advisor from the department. The core of the program consists of Microbiology, Immunology, and Molecular Genetics 198A, 198B, and 198C research, culminating in a thesis. If the thesis is accepted by the honors committee and students complete all major requirements with a GPA of at least 3.5, they are awarded the bachelor's degree with departmental honors. The department also offers an honors seminar course each Winter Quarter that is required for the honors program. For further information, contact the Student Affairs Office, 1602B Molecular Sciences.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, [http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm](http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm). In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Graduate Degrees**

The Department of Microbiology, Immunology, and Molecular Genetics offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Microbiology, Immunology, and Molecular Genetics.

**Microbiology, Immunology, and Molecular Genetics**

**Lower Division Courses**

5. **Science of Memory and Learning.** (4) Lecture, seven hours. Nature of intelligence, overview of brain structure, study of memory systems, including memory retrieval, context of memories with emotion, sleep, and memory. Survey of metacognition and performance of learning. Offered in summer only. P/NP or letter grading.

6. **Microbiology for Nonmajors.** (4) Lecture, four hours. Not open for credit to students with credit for course 101 or Life Sciences 2. Designed for non-science students; introduction to biology of microorganisms (bacteria, viruses, protozoa, algae, fungi), their significance as model systems for understanding fundamental cellular processes, and their role in human affairs. P/NP or letter grading.

7. **Developments in Biotechnology.** (4) Lecture, three hours; demonstration/laboratory, one hour. Recommended preparation: course 6 or Life Sciences 2. Survey of recent developments in biotechnology, with emphasis on use of single-cell organisms. Review of basic principles of microbiology as they apply to biotechnology and examination of wide variety of topics, including alternate energy sources, pollution, cleanup, genetic fingerprinting, genetic engineering, and agricultural and food microbiology. P/NP or letter grading.

10. **Medical Microbiology for Nursing Students.** (4) Lecture, three hours; discussion, one hour. Requisite: Mathematics 3A or 31A. Limited to nursing majors. Introduction to biology of microbial pathogens, their role in development of human immune response, and presentation of symptoms and disease caused by microbial infections. Letter grading.

12. **Biological Threats to Society: Bioterrorism and Emerging Infections.** (4) Lecture, four hours. Examination of biological threats to American society. Coverage of biological weapons going back to first attempts to use microbes or toxins as weapons, and of emerging infections. Introduction to basic biology to understand infectious disease. P/NP or letter grading.

20. **Prenursing Medical Microbiology.** (4) Lecture, four hours; discussion, one hour. Requisite: Mathematics 3A or 31A. Investigation of medical microbiological life, with emphasis on bacterial pathogens from host, as well as pathogen, perspective. Role of pathogens in development of human immune response, presentation of symptoms and disease caused by microbial infections, and diagnosis and treatment of microbial infections. Offered in summer only. Letter grading.

**Upper Division Courses**

100L. **Microbiology Laboratory for Professional Students.** (4) Lecture, 75 minutes; laboratory, three hours. Requisites: Life Sciences 3, 4, with grades of C– or better. Recommended corequisite: course 101. Limited to nonmajors. Experimental techniques of microbiology, and three-dimensional cryo-electron microscopy; and atomic force and other scanning probe microscopy modalities. Practical experience in research provided while working collaboratively on interdisciplinary experiments and projects. Students should leave with ability to draw analogies between disciplines and choose most appropriate method to analyze problems within context of new topics. Letter grading.

105. **Biological Microscopy.** (4) Lecture, four hours; laboratory, three hours (five weeks only). Requisite or corequisite: Physics 1C or 6C. Introduction to modern microscopy technologies used in biochemistry, medicine, microbiology, and nano research. Basic image formation principles of microscopy, methods for sample preparation, imaging, data acquisitions, and three-dimensional reconstruction and visualization. Fluorescence, confocal, and super-resolution light microscopy; transmission electron microscopy, electron tomography, and atomic force and other scanning probe microscopy modalities. Practical experience in research provided through five carefully designed electron microscopy laboratory modules. P/NP or letter grading.

106. **Molecular and Genetic Basis of Bacterial Infections.** (4) Formerly numbered C106.) Lecture, three hours; discussion, one hour. Requisite: course 101. Biological and genetic properties of bacteria that afford potential for pathogenicity, Epidemiology and transmission of disease; chemotherapy and drug resistance. Regulation of virulence factors. Letter grading.

120. Advanced Techniques in Microbiology. (4) (Formerly numbered C120.) Lecture, one hour; laboratory, six hours. Prerequisite: course 102L (or course 101L or 102L) with grade of C or better. Introduction to current recombinant techniques. Experiments include PCR, cloning, and other recombinant techniques. Laboratory: appropriate to answer such questions. Concurrently scheduled with course CM222. P/NP or letter grading.

158. Microbial Genomics. (4) Lecture; three hours; discussion, one hour. Prerequisites: course 101, Chemistry 153A. Evolution, biodiversity, and sequencing of genomes; bacterial and viral genomes; bioinformatics; gene knockouts; genetic disease genes, transgenesis and its application in developmental genomics, mutagenesis screening and cloning of genetic approaches to studying fundamental biological principles. Concurrently scheduled with course CM222. P/NP or letter grading.

C122. Mouse Molecular Genetics. (2) (Same as Human Genetics CM122.) Lecture, two hours. Prerequisite: Life Sciences 4. Emphasis on use of mouse genetic approach to studying fundamental biological questions. Topics include mouse genome and functional genomics, and modeling human genetic disorders. Reading materials include original papers and reviews. Concurrently scheduled with course CM222. P/NP or letter grading.

123. Advanced Analysis and Comparative Genomics. (4) Lecture, two and one half hours; computer laboratory, six hours. Prerequisite: course 103L or Molecular, Cell, and Developmental Biology 187A with grade of B- or better. Participation in discovery-based research experience, working as research team to analyze microarray data and perform bioinformatic techniques involving variety of online databases. Investigation of cellular pathways and structures as means to discover novel genes and genetic variation in classical systems. Results of high-quality annotation efforts may lead to publication in peer-reviewed science journal. Part of DOE Joint Genome Institute Undergraduate Research in Microbial Genomes Annotation education program. Offered in summer only. Letter grading.

CM133. Frontiers in Biotechnology. (2) (Same as Chemical Engineering CM133.) Lecture, two hours. Prerequisites: Chemistry 153A and 153B, or Life Sciences 3 and 4, with grades of B or better. Integration of science and technology; role of biotechnology in conjunction with pharmaceutical, agricultural, and other key industries, therapeutics, crop improvement, devices, and other industry sectors. Academic research leading to licensing and development that turn research breakthroughs into marketable products. Stages of product discovery and development. Staged financing and growth: private offerings, public offerings, deals, collaborations, outsourcing, intellectual property, regulation, pricing, profits, risks, public perception. Building all value, exit strategies, mergers and acquisitions. Concurrently scheduled with course CM233. P/NP or letter grading.

C134. Ethics and Accountability in Biomedical Research. (2) Seminar, two hours. Designed for graduate students and undergraduates who have credit for life sciences or biological studies. Course 199B is a required offered laboratory course. Responsibilities and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, disclosure, animal subject welfare, human subject protection, and areas in which investigational goals and certain societal values may conflict. Concurrently scheduled with course CM198. P/NP grading.

CM156. Human Genetics. (4) (Same as Human Genetics CM156 and Molecular, Cell, and Developmental Biology CM156.) Lecture, three hours; discussion, two hours. Prerequisite: Life Sciences 4. Emphasis on use of mouse genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in literature, with focus on current questions in fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM222. P/NP or letter grading.

191H. Honors Research Seminars: Microbiology, Immunology, and Molecular Genetics. (2) Seminar, two hours. Prerequisite for corequisite: course 198A or 198B or 198C. Limited to senior microbiology, immunology, and molecular genetics honors program students. Discussion of current research literature, with focus on thesis topics areas that students are working on as part of departmental honors requirements. One-hour presentation of student thesis research and current literature associated with it required. May be repeated for credit. Letter grading.

193A. Journal Club Seminars: Microbiology, Immunology, and Molecular Genetics. (1) Seminar, one hour. Limited to undergraduate students. Discussion of readings selected from current literature in microbiology, immunology, and molecular genetics. Letter grading.

193B. Journal Club Seminars: Microbiology, Immunology, and Molecular Genetics. (1) Seminar, one hour. Limited to undergraduate students. Discussion of readings selected from current literature in microbiology, immunology, and molecular genetics. Letter grading.

194A. Research Group Seminars: Microbiology, Immunology, and Molecular Genetics. (1) Seminar, one hour. Designed for undergraduate students who are part of research group in department family laboratory. Discussion of research from current literature in field of research or for research faculty members or students. May be repeated for credit. P/NP grading.

194B. Research Group Seminars: UC LEADS and NIH/MARC. (2) Seminar, two hours. Limited to students in UC LEADS and NIH/MARC programs. Analysis, discussion, review, and critique of current papers in biomedical sciences disciplines, utilizing skills necessary for effective oral communication and effective use of software such as PowerPoint for oral presentations. May be repeated for credit. Letter grading.

197. Individual Studies in Microbiology, Immunology, and Molecular Genetics. (2 to 4) Tutorial, four hours. Limited to junior/senior level students in UC LEADS and NIH/MARC programs. Directed independent research project under guidance of departmental faculty mentor. Guided research course to be taken in conjunction with course 188A, followed by continuation research course 179B. Technical aspects of independent research project vary depending on specific laboratory; however, all students learn how to apply scientific method: propose hypothesis, identify experiments to address hypothesis, perform experiments, and analyze results. How to record information from experimental activities into laboratory notebooks and to write research proposals. Letter grading.

197B. Advanced Independent Research in Microbiology, Immunology, and Molecular Genetics. (4) Laboratory, 12 hours. Prerequisites: Life Sciences 3, 4, and 0.3 premajor and/or major grade-point average, and at least one term of prior experience in same laboratory in which 179A research is to be conducted. Corequisite: course 188A or Molecular, Cell, and Developmental Biology 188A. Designed for undergraduate students who are interested in pursuing inquiry-based and hypothesis-driven research experience in laboratory of departmental faculty mentor. Guided research course to be taken in conjunction with course 188A, followed by continuation research course 179B. Technical aspects of independent research project vary depending on specific laboratory; however, all students learn how to apply scientific method: propose hypothesis, identify experiments to address hypothesis, perform experiments, and analyze results. How to record information from experimental activities into laboratory notebooks and to write research proposals. Letter grading.

185A. Immunology. (5) Lecture, three hours; discussion, 90 minutes. Prerequisites: Life Sciences 3, 4. Recommended prerequisite or corequisite: Chemistry 153A. Not open for credit to students with credit for course 261. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cellular immune reactions. Letter grading.

188A. Special Computer Seminar: Microbiology, Immunology, Infectious Disease, and Molecular Genetics. (2) Seminar, two hours. Corequisites: course 179A or Molecular, Cell, and Developmental Biology 179A. Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit with topic change. P/NP or letter grading.

188C. Special Courses in Microbiology, Immunology, and Molecular Genetics. (4) (Formerly numbered 199A.) Tutorial, 12 hours. Preparation: minimum 2.5 grade-point average in premajor and major. Supervised individual research project under guidance of departmental faculty mentor. Copy of report describing research must be filed with Student Affairs Office by end of term. May be repeated for credit. Individual contract required. Letter grading.

199. Directed Research in Microbiology, Immunology, and Molecular Genetics. (4) (Formerly numbered 199A.) Tutorial, 12 hours. Preparation: minimum 2.5 grade-point average in premajor and major. Supervised individual research project under guidance of departmental faculty mentor. Copy of report describing research must be filed with Student Affairs Office by end of term. May be repeated for credit. Individual contract required. Letter grading.

Graduate Courses

208. Molecular Biology of Animal Viruses. (4) Lecture, three hours. Preparation: courses in general biochemistry and general microbiology, including virology. Recommended for advanced undergraduate students, majors in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Coevolution of animal viruses, including viral structure, virus-cell interaction, viral replication, and viral oncogenesis. Special emphasis on understanding molecular mechanisms in coinfection.

M229. Molecular Mechanisms of Host/Pathogen Interaction. (4) (Same as Pathology M229.) Lecture, two hours; discussion, two hours. Requisites: Biological Chemistry 254A through 254D. Molecular mechanisms of microbial interactions with eukaryotic host cells that result in disease or pathogen survival. Topics include pathogenesis of common viruses, bacteria, fungi, and parasites, basis of toxin-mediated cellular mechanisms of microbial interactions with eukaryotic host cells. Letter grading.

CM233. Frontiers in Biotechnology. (2) (Same as Chemical Engineering CM233.) Lecture, two hours. Requisites: Chemistry 153A and 153B, or Life Sciences 3 and 4, with grades of B or better. Integration of science and business in biotechnology. Coevolution with pharmaceutical, agricultural, and other key industries, research, development, devices, and other industry sectors. Academic research leading to licensing and founding of companies that turn research breakthroughs into marketable products. Staged research and development. Staged financing and growth: private offerings, public offerings, deals, collaborations, outsourcing. Intellectual property, regulation, pricing, profits, risks, public perception, Building value exit strategies, mergers and acquisitions. Concurrently scheduled with course CM133. S/U or letter grading.

C234. Ethics and Accountability in Biomedical Research. (2) Seminar, two hours. Designed for graduate students and undergraduates who have credit for life sciences or biomedical individual studies 199 course. Responsibilities and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, disclosure, animal subject welfare, human subject protection, which investigator ethics, and certain societal values may conflict. Concurrently scheduled with course C134. S/U grading.

M240. Cytokines and Reproductive Biology. (2) (Same as Molecular, Cell, and Developmental Biology M240.) Lecture, 59 minutes; discussion, one hour. Overview of current progress on research in cytokines and other immune system molecules in reproductive biology. S/U or letter grading.

242. Seminar: Microbial Molecular Genetics. (2) Seminar, two hours. Student and instructor presentations and critical discussion of newly emerging concepts in prokaryotic and/or eukaryotic molecular genetics. Exposure to graduate student research topics in areas in which research is being conducted in laboratories and certain societal values may conflict. Concurrently scheduled with course CM134. S/U or letter grading.

CM256. Human Genetics. (4) (Same as Human Genetics CM256.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Application of genetic principles in human populations, with emphasis on cytogentic, biochemical genetics, population genetics, and family studies. Lectures and readings in literature, with focus on current questions in fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Letter grading.

M261. Molecular and Cellular Immunology. (4) Lecture, four hours. Requisites: Biological Chemistry 254A through 254D. Strongly recommended corequisite: course 298. Comprehensive course for graduate students and selected undergraduate students covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented by course 298 seminar, with focus on reading and analysis of primary research articles. Oral presentation required. S/U or letter grading.

262A-262B-262C. Seminars: Current Topics in Immunobiology of Cancer. (2-2-2) Seminar, two hours. Designed for graduate students (or undergraduate students with consent of instructor). Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. Each course may be repeated for credit. S/U or letter grading.

270. Seminar: Molecular Immunology Seminar, two hours. Designed for graduate students. Discussion and student presentations of recent work in molecular virology, including viral gene expression and function. S/U grading.

C274. Advanced Topics in Molecular Parasitology. (2) Lecture, two hours. Requisites: Life Sciences 3, 4. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines. Concurrently scheduled with course C174. Letter grading.

296. Seminar: Advanced Research Topics in Microbiology, Immunology, and Molecular Genetics. (1 to 4) Seminar, two hours; research group meeting, one hour. Limited to departmental graduate students. Advanced study and analysis of current topics in microbiology, immunology, and molecular genetics. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

298. Current Topics in Microbiology, Immunology, and Molecular Genetics. (2) Seminar, two hours. Strongly recommended corequisite: course 298. Presentation of student oral critiques and participation in discussions on applied topics. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Preparation for Teaching Microbiology in Higher Education. (2) Seminar/discussion/laboratory, two hours. Designed for graduate students. Study of problems and methodologies in teaching microbiology, including workshops, seminars, apprentice teaching, and peer observation. S/U or letter grading.

MIDDLE EASTERN AND NORTH AFRICAN STUDIES

Interdepartmental Program
College of Letters and Science

UCLA
10357 Bunche Hall

Claudia Rapp, D.Phil., Chair

Faculty Committee
Osman M. Galal, M.D., Ph.D. (Community Health Sciences)
Sharon E. Gerstel, Ph.D. (History)
Nouri Gana, Ph.D. (Comparative Literature)
Niles S. Green, Ph.D. (History)
Gill Z. Hochberg, Ph.D. (Comparative Literature)
Michael G. Morony, Ph.D. (History)
Claudia Rapp, D.Phil. (History)
Willeke Z. Wendrich, Ph.D. (Near Eastern Languages and Cultures)

Scope and Objectives
The major and minor in Middle Eastern and North African Studies (MENAS) offer in-depth knowledge and specialized study of this geographic region, its peoples, and its cultures from the end of antiquity to the present. The program also explores the role and influence of this rich cultural heritage around the world. A strong foundation in history is complemented by a wide selection of courses from art history, geography, Near Eastern languages and cultures, political science, and sociology.

The graduate major in this discipline is called Islamic Studies. For details, see the program by that name earlier in this section.

Undergraduate Study
Middle Eastern and North African Studies B.A.

Preparation for the Major

Required: The first-year course in Arabic, Armenian, Hebrew, Persian, or Turkish, or the equivalent level of proficiency as determined by admission into a second-year language course (other languages may be substituted by petition); History 9D; and three lower division courses (at least 12 units) with Middle Eastern or North African content selected from Anthropology 8, 9, Comparative Literature 1A, 1B, 1C, 1D, Economics 1, 2, Ethnomusicology 20B, 91L, 91N, Geography 3, History 20, 21, 22, Near Eastern Languages 50A, 50B, 50C, Political Science 20, 50, Sociology 1.

To enter the major, students must be in good academic standing (minimum overall 2.0 grade-point average) and have completed 45 units and the requirements for the Preparation for the Major.
Transfer Students

Transfer applicants to the Middle Eastern and North African Studies major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one course in Middle Eastern and North African history and three additional courses with relevant content (eligibility of courses to be determined at the introductory counseling meeting).

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: At least 11 upper division courses as follows: (1) three courses at the intermediate or advanced level or the equivalent in the Middle Eastern language taken in lower division, or the equivalent level of proficiency as determined by an examination administered by the department offering the language, (2) History 105A, 105B, 105C, and (3) five elective courses, including courses in three different departments and two courses in a single department, to be selected from Anthropoloy 176, Art History 104A, 104B, 104C, 105E, Economics 111, 112, Ethnomusicology 161L and 161N (both must be taken to equal one 4-unit course), French 121, 160, Geography 187, History, 108A, 116A, 116B, 164B, 164C, 167B. Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Middle Eastern and North African Studies

Upper Division Courses

191A-191B. Variable Topics Research Seminars: Middle Eastern and North African Studies. (4-4) Seminar, three hours. Research seminars on selected topics in Middle Eastern and North African studies. Reading, discussion, and development of culminating project. May be repeated for credit with topic change. Ph/NP or letter grading.

Hsian-Rong Tseng, Ph.D.

Assistant Professors

Steven J. Bensinger, V.M.D., Ph.D.

Heather R. Christofk, Ph.D.

Timothy R. Donahue, M.D.

Thomas G. Graeber, Ph.D.

Pei Keng, Ph.D.

Huiying Li, Ph.D.

Kwang-Fu Shen, Ph.D.

Michael Van Dam, Ph.D.

Adjunct Professors

James R. Heath, Ph.D.

Barbara A. Levey, M.D. (Rosalinde and Arthur Gilbert Foundation Endowed Professor of Interdepartmental Clinical Pharmacology)

Srinivasar T. Reddy, Ph.D.

Jide Tian, M.D.

Adjunct Associate Professors

Melsheng Jiang, Ph.D.

Jing Liang, M.D., Ph.D.

David B. Stout, Ph.D.

Joy A. Umbach, Ph.D.

Adjunct Assistant Professors

Heather D. Agnew, Ph.D.

Roy Dournani, L.L.D.

Tove Olafsson, Ph.D.

Johannes Czernin, M.D.
Scope and Objectives

The Department of Molecular and Medical Pharmacology has basic and clinical components in which students have opportunities to develop intellectually and experimentally in basic biological sciences placed in the context of human disease. The department conducts integrative teaching and research programs that begin with molecular interactions and extend to studies of diseases and their treatment in humans. Departmental investigators study the biochemistry and pharmacology of drugs, gene expression and its regulation, signal transduction processes, cell-to-cell communication, viral replication and pathogenesis, autoimmune disease, neuronal development and plasticity, and integrated organ functions using techniques of chemistry and structural biology, DNA microarrays, molecular and cellular biology, transgenic and chimeric mice, and cellular and organ imaging. Organic synthesis, genetic engineering, and imaging techniques such as confocal fluorescent and cryoelectron microscopy, autoradiography, and positron emission tomography (PET) are extensively employed. The imaging techniques are available in the Crump Institute for Molecular Imaging, Ahmanson Biological Imaging Clinic, and UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, which are affiliated with the department. The goal of the education program is to provide faculty members and students the opportunity to examine the molecular and clinical basis of disease and the mechanisms of drugs in their treatment, as well as to visualize the changes in the disease state with procedures that monitor the molecular basis of cellular and organ function.

The graduate program seeks to prepare students for these interdisciplinary activities with a basic foundation in genetics, molecular and cellular biology, and pharmacology during their first year in residence. The second year is spent in the laboratory and in elective courses selected to reflect each student's interests, background, and requirements for the research undertaken. Numerous opportunities for interaction with other departments, institutes, and programs are provided through interdisciplinary coursework and many collaborative research activities.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasasa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Molecular and Medical Pharmacology offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Molecular and Medical Pharmacology. The department also offers two M.D./Ph.D. programs concurrently with the School of Medicine. One is the Medical Scientist Training Program (MSTP) in which candidates are medical students that have been accepted into MSTP by the School of Medicine in order to qualify. The second is the Special Training and Advanced Research (STAR) Program in which candidates are post-M.D. housestaff (interns, residents, or fellows) who have been accepted into the STAR Program by its selection committee in order to qualify.

The department, together with the Division of Laboratory Animal Medicine, offers Ph.D. or postdoctoral training combined with residency training for veterinarians (with D.V.M. or D.V.M./Ph.D. degrees) in the Veterinary Investigator in Scientific Training and Advancement (VISTA) program.

Note: There is no degree program in pharmacy at UCLA.

Molecular and Medical Pharmacology

Upper Division Courses

191A. Drugs: Mechanisms, Uses, and Misuse. (Same as Molecular Toxicology M110A.) Lecture, four hours (seven weeks); discussion, four hours (three weeks). Requisites: Life Sciences 2, 3. Course M110A is requisite to 110B. Introduction to pharmacology and toxicology for undergraduate students, emphasizing drug development and mechanisms of action of drugs and toxic agents.

110B. Drugs: Mechanisms, Uses, and Misuse. (4) Lecture, four hours (seven weeks); discussion, four hours (three weeks). Requisites: course M110A, Life Sciences 2, 3. Introduction to pharmacology for undergraduate students, emphasizing principles underlying mechanism of action of drugs, their development, control, rational use, and misuse. Letter grading.

194. Research Group or Internship Seminars: Cross-Disciplinary Scholars in Science and Technology Project. (4) Seminar, two hours; discussion, two hours. Limited to Cross-Disciplinary Scholars in Science and Technology (CCST) students. Communication and collaborative skills, specifically in interdisciplinary research settings and introduction to research project design and proposal process. Students submit written CSST project proposal and give oral presentations of proposal and of UCLA internship research results. May be repeated for credit. Letter grading.

195. Directed Research in Molecular and Medical Pharmacology. (2 to 8) Tutorial, three hours per week per unit. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Special studies in pharmacology, including either reading assignments or laboratory work or both, designed for proper training of students. Capping paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

200. Introduction to Laboratory Research. (4 to 8) Laboratory, eight to 16 or 16 to 20 hours. Individual projects in laboratory research for beginning graduate students. At end of each term students submit to their supervisor reports covering research performed. Pharmacology graduate students must take this course three times during their first two years in residence. S/U or letter grading.

203. Medical Pharmacology. (2) Lecture, zero to two hours; discussion, zero to two hours. Requisites: courses 211A, 211B. Series of lectures and presentations designed to illustrate principles of pharmacology in a clinical context, and solution of practical therapeutics by reference to pharmacokinetics, mechanisms of action, and disposition of drugs. S/U or letter grading.

M205A. Introduction to Chemistry of Biology. (4) (Same as Chemistry CM205A.) Lecture, three hours; discussion, one hour. Enforced requisite: Chemistry 153A with grade of C– or better. Introduction to chemical biology. Topics include chemical biology, utility of synthesis in biochemical research, peptide mimetics, designed reagents for cellular imaging, natural product biosynthesis, protein engineering and directed evolution, cell biology of metals, imaging metal ions in cells, metal-containing drugs. S/U grading.

M205B. Issues on Chemistry/Biology Interface. (2) (Same as Chemistry CM205B.) Lecture, one hour. Requisite: course M205A. Selected talks and papers presented by training faculty on solving problems and utilizing tools in chemistry and molecular biology on chemistry/biology interface (CBI). S/U grading.

211A-211B. Principles of Pharmacology. (4-2) Lecture, three to eight hours; discussion, zero to nine hours. Preparation: mammalian physiology, biochemistry. Systematic consideration of principles governing interaction between drugs and biological systems and of principal groups of drugs used in therapeutics. Particular attention on modes of action, pharmacokinetics, and disposition to provide a scientific basis for their rational use in medicine. S/U or letter grading.

M234C. Laboratory in Toxicological Methods. (2) (Same as Environmental Health Sciences M245 and Molecular Toxicology M245.) Lecture, one hour; laboratory, four to five hours. Survey of experimental techniques used in study of toxic substances. Experiments conducted within known toxic to demonstrate its effects at molecular, cellular, and tissue levels. Presentation of principles of techniques and methods of data analysis at discussion session prior to laboratory. Letter grading.

237. Research Frontiers in Cellular and Molecular Pharmacology. (6) Lecture, six hours; laboratory, five hours total. Detailed examination of principles of pharmacology and mechanisms of drug action at organismal, tissue, cellular, and molecular levels, with emphasis on receptors, receptor/effector coupling, neurotransmitters, cardiovascular pharmacology, autonomic and central nervous system pharmacology. Letter grading.

M241. Introduction to Chemical Pharmacology and Toxicology. (6) (Same as Molecular Toxicology M241.) Lecture, six hours; preparation: organic and biological chemistry. Designed for molecular and medical pharmacology students. Introduction to general principles of pharmacology. Role of chemical properties of drugs in their distribution, metabolism, excretion, and modes of action. S/U or letter grading.

M248. Introduction to Biological Imaging. (4) (Same as Biomedical Engineering M248 and Biomedical Physics M248.) Lecture, three hours; laboratory, one hour; outside study, seven hours. Exploration of role of biological imaging in modern biology and medicine, including imaging physics, instrumentation, image processing, and applications of imaging for range of modalities. Practical experience provided through series of imaging laboratories. Letter grading.

251. Seminar: Pharmacology. (2) Seminar presented by students, faculty, and guest lecturers on a variety of topics. S/U grading.

M252A. Molecular Mechanisms of Human Diseases I. (4) (Same as Molecular, Cellular, and Integrative Physiology M252A.) Lecture, four hours. Preparation: prior satisfactory molecular biology coursework.
Molecular Biology Seminar II. (2) (Same as Molecular, Cellular, and Integrative Physiology M252B.) Seminar, two hours. Corequisite: course M252A. Reading, review, and discussion of primary research literature addressing fundamental concepts and methodologies in modern biology, with particular emphasis on implications and relevance to human diseases of topics presented in course M252A. Letter grading.

S257. Introduction to Toxicology. (4) (Same as Pathology M257.) Required coursework: course M241. Biochemical and systemic toxicology, basic mechanisms of toxicology, and regulation of organismic systems. S/U or letter grading.

M258. Pathologic Changes in Toxicology. (4) (Same as Pathology M258.) Designed to give students experience in learning normal histology of tissues which are most targeted by toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system). S/U or letter grading.

261. Institute for Molecular Medicine Seminar Series: Analysis and Discussion. (2) Seminar, one hour. Corequisite: course 251. Limited to graduate students. In-depth evaluation of Institute for Molecular Medicine (IMED) Seminar speakers, with focus on scientific approach and rationale, experimental methods, novel and pioneering findings (past and present), relevant background information on speakers and their institute, and presentation style and communication strengths. Discussion on characteristics that define and shape leaders in given fields. Students host lunch- es with seminar speakers, lead discussions to deconstruct all aspects of seminar presentations, and submit write-ups for online Wiki-postings on seminar-specific scientific topics. S/U grading.

M262A. Molecular Mechanisms of Human Diseases II. (4) (Same as Molecular, Cellular, and Integrative Physiology M262A.) Lecture, four hours. Preparation: prior satisfactory molecular biology coursework. Corequisite: course M262B. Fundamental concepts and methodologies in modern biology, with emphasis on implications and relevance to human disease and integration of biology with mechanisms underlying disease development and applications in therapy as they apply to neurological, cardiovascular, and metabolic diseases. Letter grading.

M262B. Molecular Mechanisms of Human Diseases II. (2) (Same as Molecular, Cellular, and Integrative Physiology M262B.) Seminar, two hours. Corequisite: course M262A. Reading, review, and discussion of primary research literature addressing fundamental concepts and methodologies in modern biology, with particular emphasis on implications and relevance to human diseases of topics presented in course M262A. Letter grading.

286. Business of Science: Exploring Entrepreneurship Seminar. (1) Seminar, one hour. Limited to graduate students. Introduction to principles of business and entrepreneurship in technology sectors. Basic business skills and knowledge required to effectively perform in commercial environment and within academic environment that is increasingly involved in industry partnerships. Exploration of entrepreneurship, particularly formation and operation of new business ventures. Presentations by and questioning of successful technology entrepreneurs. Significant aspects of identifying and evaluating new venture opportunities, development of financial, legal considerations, and entry and exit strategies presented and examined through critical discussion. Development of new venture feasibility analysis by students for product of their choice. S/ U or letter grading.

288. Gene Therapy. (4) Lecture, three hours; discussion, one hour. Introduction to basic concepts of gene therapy, wherein treatment of human disease is based on transfer of genetic material into an individual. Discussion of molecular basis of disease, gene delivery vectors, and animal models. Letter grading.

291. Special Topics in Pharmacology. (4) Lecture, four hours. Examination in depth of topics of current importance in pharmacology. Emphasis on contributing special interest to advanced Ph.D. candidates and faculty. Letter grading.

293. Nitric Oxide Chemistry, Biochemistry, and Physiology. (2 or 4) Lecture, two or four hours. Basic chemistry, biochemistry, and physiology of nitric oxide and related species, with emphasis on understanding novel mechanisms of nitrogen oxide function as both a physiological and pathophysiological agent/messenger. S/U or letter grading.

298. Seminar: Current Topics in Molecular and Medical Pharmacology. (2) Limited to pharmacology, ACCESS program, and interdepartmental Molecular Biology M252B program students. Students may participate in discussions on assigned topics. S/U or letter grading.

375. Teaching Apprenticeship Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

Molecular Biology Graduate Course

298. Current Topics in Molecular Biology. (2) Students present/seminar, two hours. Students present oral critiques and participate in discussions on assigned topics. S/U grading.

Scope and Objectives
The revolution in modern biology that began with the elucidation of the structure of DNA by Watson and Crick in the 1950s has had a profound effect not only on biological research, but on the way biology is taught as a subject. The field of biology spawned by this discovery, generally called molecular biology, has provided an entirely new framework within which to approach questions in cell and developmental biology. The specializations, both technical and conceptual, demanded by this field have led to the growth of molecular biology and its related disciplines into an essentially separate branch of scientific inquiry.

Students who complete the requirements for the Bachelor of Science degree in Molecular, Cell, and Developmental Biology are exceptionally well prepared to pursue careers in cellular and subcellular biological research, biomedical research, or medicine or allied health fields. The degree combines essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as in-depth exposure to key topics in molecular, cell, and developmental biology. The Ph.D. degree provides opportunity for advanced concentrated study and requires independent and innovative research that ultimately results in publishable dissertation materials.

Undergraduate Study
Molecular, Cell, and Developmental Biology B.S.
The Bachelor of Science degree in Molecular, Cell, and Developmental Biology (MCDB) is designed especially for students who intend to go on to postgraduate work in biology or medicine and for students aiming for entry-level positions in biotechnology-related fields. Students are exposed to basic biological and molecular concepts underling recent technical advances in molecular, cell, and developmental biology of animals and plants. Areas of emphasis include cell biology, immunology, molecular biology, plant biology, developmental biology, and neurobiology, among others.

Preparation for the Major
Life Sciences Core Curriculum
Required: Life Sciences 1, 2, 3, 4, 23L; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving grades below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students
Transfer applicants to the Molecular, Cell, and Developmental Biology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required Courses: Chemistry and Biochemistry 153A; one course from Molecular, Cell, and Developmental Biology 104, 150L, 187A, 198B, 198C, 199B, 199C, or Microbiology, Immunology, and Molecular Genetics 103L; one developmental biology course from Molecular, Cell, and Developmental Biology 138 or C141; one cell biology course from M140 or 165A; and one molecular biology course from 144 or 165B.

Electives: At least 20 upper division elective units, of which at least 10 must be in courses offered by the department. Any upper division departmental course, except Molecular, Cell, and Developmental Biology 100, 187B, 187C, 190A, 190B, 190C, 192A, 192B, 193, 194A, or 199, may be selected. The following courses outside the department may be taken to satisfy a maximum of 10 units in this category: Biostatistics 100A or Statistics 100A, Chemistry and Biochemistry 153C, 153L, 154, 156, C159A, C159B, CM160A, Ecology and Evolutionary Biology 110, 121, 162, 162L, Human Genetics C144, Microbiology, Immunology, and Molecular Genetics 100L, 101, 102, 103L, 105, 106, CM133, 158, 168, C174, 185A, Physiological Science C126, 166, Society and Genetics 102W.

Credit for a maximum of two upper division developmental biology courses from Molecular, Cell, and Developmental Biology 138, C141, and 143 may be applied toward the major. Due to content overlap, students with credit for both courses 165A and 165B cannot receive major credit for course M140.

A maximum of 4 units of approved seminar course credit may be applied toward the elective requirement. A maximum of 12 units of Molecular, Cell, and Developmental Biology 198A through 198D or 199A through 199D may be applied toward the major. Credit for 199 courses from other departments may not be applied except by petition.

Any single course may be applied toward only one category within the major (e.g., course C141 may be applied toward the required or elective category but not toward both).

Each course applied toward requirements for preparation for the major and the major must be taken for a letter grade. Majors must earn a C– or better in each preparation for the major course, and at least a 2.0 (C) average in all courses applied toward the major.

Honors Program
Admission
The honors program provides exceptional Molecular, Cell, and Developmental Biology majors with the opportunity to do research culminating in an honors thesis. Junior and senior majors who have completed all university-level coursework, including all preparation courses and requirements for the major with an overall grade-point average of 3.0 or better and a 3.5 GPA or better in the required major courses, may apply for admission to the honors program. Students must have the sponsorship of an approved faculty adviser.

For further information and application forms, students should consult the Student Affairs Office, 2128 Life Sciences, early in their educational planning. Completed applications should be submitted at least two weeks prior to the term in which students plan to begin the honors program.

Requirements
The core of the program consists of at least one approved undergraduate seminar course from Molecular, Cell, and Developmental Biology 191 and three research courses (12 units minimum) from 198A, 198B, and 198C, culminating in a thesis.

To qualify for graduation with honors, students must satisfactorily complete all requirements for the honors program and the major and obtain at least an overall 3.0 grade-point average and a 3.5 GPA or better in coursework required for the major. On recommendation by the faculty sponsor and with approval of the thesis by the departmental honors committee, students are awarded no honors, departmental honors, or highest departmental honors.
Molecular, Cell, and Developmental Biology

Lower Division Courses

40. AIDs and Other Sexually Transmitted Diseases. (5) Lecture, three hours; discussion, one hour; experiential service learning, one hour. Biology of HIV blended with socioeconomic problems associated with AIDS. Discussion of contemporary public health approaches to characterizing and addressing of HIV epidemics, as well as of other sexually transmitted diseases. P/NP or letter grading.

50. Stem Cell Biology, Politics, and Ethics: Teasing Apart Issues. (5) Lecture, three and one-half hours; discussion, 90 minutes. Developmental biology of various types of human stem cells. Important functional differences between embryonic, hematopoietic, and adult stem cells, as well as differences in their biomedical potentials. Discussion of history of debate surrounding embryos, as well as various social, ethical, political, and economic aspects of stem cell research. P/NP or letter grading.

60. Biomedical Ethics. (5) Lecture, three hours; discussion, one hour. Examination of importance of ethics in research and exploration of how and why bioethics is relevant to reproductive screening, policy formation, public regulation, and law. Provides foundation in traditional ethics, consideration of subcategories of bioethics, neuroethics, and eugenics, and how to apply ethics to contemporary issues in research and technology. P/NP or letter grading.

70. Genetic Engineering and Society. (4) Lecture, three hours; discussion, two hours. Designed for nonmajors. Not open to students with credit for Life Sciences 3 or 4. Basic principles of genetic engineering. Overview of genetic engineering techniques and relationship of genetic engineering to medicine, agriculture, and society. Emphasis on specific genetic engineering applications to generate discussion on its use in society. Letter grading.

80. Green World: Plant Biology for Now and Future. (5) Lecture, two and one-half hours; laboratory, two hours. Designed for nonmajors. Basic principles of plant biology and introduction to techniques for manipulating plants for improved agriculture, sources of renewable clean energy, reclamation of deforested and nutritionally depleted soils, and biological factories to produce biodegradable plastics, antibodies, and other commodities. Underexploited agriculture crops also featured. P/NP or letter grading.

100. Introduction to Cell Biology. (5) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Corequisite: Chemistry 153A. Not open for credit to Molecular, Cell, and Developmental Biology majors or to students with credit for course M140 or 14B. Introduction to cellular structure, function, and organization of cell, including humans, is controlled by ensembles of neurons, including worms and flies. How do worms decide whether something is good or bad? How do prey detect predators? Scientists now ask these questions. Concurrently scheduled with course CM156 and Microbiology CM156. Lecture, two and one-half hours; laboratory, eight hours. Enforced prerequisite: course C150. Recommended preparation: course 104. Designed for and limited to Molecular, Cell, and Developmental Biology majors for priority pass and first pass. Gene mapping and detection and analysis of genetic variants by means of inheritance patterns. Letter grading.

155. Human Genetics. (4) Same as Human Genetics CM156 and Microbiology CM156. Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Application of genetic principles in human populations, with emphasis on cyto genetics, biochemical genetics, population genetics, and family studies. Lectures and readings in literature, with focus on current questions in fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Letter grading.

162. Genetic Control of Animal Behavior. (5) Lecture, three hours; discussion, one hour. Enforced prerequisites: Life Sciences 4, two upper division molecular, cell, or developmental biology or neuroscience courses. How do worms decide whether something smells good or bad? What happens to brain of fruit fly when it is exposed to alcohol? How does fish embryo decide whether to respond to touch by swimming leisurely or rapidly escaping? Behavior of animals, including humans, is controlled by ensembles of neurons that together form neural circuits. Understanding how these circuits work is unifying goal of neurobiology. Physiological techniques have been used in past to investigate logic of neural circuits. Scientists now ask how genes make neural circuits work and use variety of cutting-edge genetic and molecular techniques. Survey of recent primary literature that applies these approaches to three models: olfaction in nematode worms, alcohol-induced behavior in fruit flies, and motor responses in zebralish. Letter grading.

165A. Biology of Cells. (5) Lecture, three hours; discussion, one hour. Requisites: Chemistry 14D or 30B, Life Sciences 3. Not open for credit to students with credit for course 100 or M140. Neurobiology. Introduction to cellular structure and function, with focus on each individual cellular organelle, as well as interaction of cells with extracellular environment and with other cells. Material presented in context of expected of scientists to incorporate concept of scientific method and
recent advances in cell biology research. Exposure in discussions to recent scientific articles that directly relate to the lecture topics leads to useful literature assignments. 165B. Molecular Biology of Cell Nucleus. (5) Lecture, three hours; discussion, two hours. Requisites: course 156A, Chemistry 14D or 30B, Life Sciences 3, 4. Continuation of course 165A. Molecular biology of eukaryotic cells, with focus on structure, organization, replication, and repair of eukaryotic genome; eukaryotic gene expression, including transcription, translation, and transport; cell cycle and cancer. Study of advanced specialized topics to allow integrated approach to molecular cell biology. Material presented in context of experimental questions and answers to incorporate concept of scientific method and recent advances in cell biology dissemination. Exposure to professional literature that currently relates to information examined in lectures. Letter grading.

168. Stem Cell Biology. (5) Lecture, three hours; discussion, one hour. Enforced requisites: courses 138, 165A. Strongly recommended: courses 143, 165B (or Microbiology 132). State-of-art education of embryonic and adult stem cells and how pluripotent/multi- potent cells can be used to treat congenital defects, diseases, or injury in humans. Review of current knowledge of human and mouse embryonic stem cells and how they develop into various tissue types. Discussion of adult stem cells in hematopoietic and other organ systems to provide examples of tissue-specific stem cells and their impact in human disease. Examination of various model organisms as examples of how advances in cell biology have uncovered fundamental principles in stem cell biology. How advances in cell and molecular biology and tissue engineering are used in stem cells in regenerative medicine. Ethical and legal issues related to stem cell research. Letter grading.

172. Genomics and Bioinformatics. (5) Lecture, three hours; discussion, one hour. Requisite: course 144 or course 145B or Molecular Biology 122. Bioinformatics is study of complete repertoire of molecules in cells. Topics include human and yeast genomes and genetic approaches to study of function of individual genes. Studying genomics algorithms of computational biology. Study relationship between nucleotide and protein sequences and their reconstruction of their evolution, use of microarray technologies to measure changes in gene expression, analysis of microarray data including clustering and promoter analysis, proteomics topics including protein expression and interactions, epigenetic study of DNA methylation and chromatin modification, and systems biology, or computational approaches to integrating varied genomic data to gain more complete understanding of cellular biology. Letter grading.

C174A-C174D. Advanced Topics in Cell and Molecular Biology. (2-4) Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Recent developments in fields of molecular, cell, and developmental biology. Concurrently scheduled with courses C222A-C222D. Letter grading.

C174A. Molecular Evolution. (2) Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current developments in field of molecular evolution emphasis on evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data. Letter grading.

C174B. Molecular Biology of Cell Nucleus. (2) Lecture, two hours. Requisites: courses 100 or C139 or M140, 144. Regulation and function of cell nucleus regulation of cell metabolism. Structure/function relationships, nuclear-cytoplasmic exchange, DNA replication and gene expression. Letter grading.

M175A. Cellular and Systems Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisites: CHE 101A and 101B (or CHEM 101A and 101B) or PHYS 2, Physics 1B or 18B or 6B or 6BH. Not open for credit to students with credit for Physiological Science 111A. For Physiological Science majors only. Grade of C— or better is required to proceed to Physiological Science 111B. Cellular, neuropsychology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

M175B. Molecular and Developmental Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requi- sites: CHE 101A and 101B (or CHEM 101A and 101B) or PHYS 2, Physics 1B or 18B or 6B or 6BH. Not open for credit to students with credit for Physiological Science 111A. For Physiological Science majors only. Grade of C— or better is required to proceed to Physiological Science 111B. Cellular, neuropsychology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

M175C. Behavioral and Cognitive Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requ- sites: CHE 101A and 101B (or CHEM 101A and 101B) or PHYS 2, Physics 1B or 18B or 6B or 6BH. Not open for credit to students with credit for Physiological Science 111A. For Physiological Science majors only. Grade of C— or better is required to proceed to Physiological Science 111B. Cellular, neuropsychology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

179A. Advanced Independent Research in Molecu- lar, Cell, and Developmental Biology. (4) Laboratory. 12 hours. Requisites: Life Sciences 3, 4, 3.0 prema- tor and major grade-point average, and at least one term of prior experience in same laboratory in which 179A research is to be conducted. Corequisite: course 188A or Microbiology, Immunology, and Molecular Genetic 157A. Enrolled undergraduate students who are interested in pursuing inquiry-based and hypo- thesis-driven research experience in laboratory of departmental faculty mentor. Guided research to be conducted in course 188A, followed by continuation research course 179B. Technical as- pects vary depending on specific laboratory; however, all students learn how to apply scientific method: pro- pose hypothesis, identify experiments to address hy- pothesis, perform experiments, and analyze results. How to record information from experimental activities into laboratory notebooks and to write research pro- posals. Letter grading.

179B. Advanced Independent Research in Molecu- lar, Cell, and Developmental Biology. (4) Laboratory. 12 hours. Requisites: Life Sciences 3, 4, 3.0 prema- tor and major grade-point average, and at least one term of prior experience in same laboratory in which 179A research is to be conducted. Corequisite: course 188A or Microbiology, Immunology, and Molecular Genetic 157A. Enrolled undergraduate students who are interested in pursuing inquiry-based and hypo- thesis-driven research experience in laboratory of departmental faculty mentor. Guided research to be conducted in course 188A, followed by continuation research course 179B. Technical as- pects vary depending on specific laboratory; however, all students learn how to apply scientific method: pro- pose hypothesis, identify experiments to address hy- pothesis, perform experiments, and analyze results. How to record information from experimental activities into laboratory notebooks and to write research pro- posals. Letter grading.

179C. Advanced Independent Research in Molecu- lar, Cell, and Developmental Biology. (4) Laboratory. 12 hours. Requisites: Life Sciences 3, 4, 3.0 prema- tor and major grade-point average, and at least one term of prior experience in same laboratory in which 179A research is to be conducted. Corequisite: course 188A or Microbiology, Immunology, and Molecular Genetic 157A. Enrolled undergraduate students who are interested in pursuing inquiry-based and hypo- thesis-driven research experience in laboratory of departmental faculty mentor. Guided research to be conducted in course 188A, followed by continuation research course 179B. Technical as- pects vary depending on specific laboratory; however, all students learn how to apply scientific method: pro- pose hypothesis, identify experiments to address hy- pothesis, perform experiments, and analyze results. How to record information from experimental activities into laboratory notebooks and to write research pro- posals. Letter grading.

180A-BB. Special Courses in Molecular, Cell, and Developmental Biology. (2-2) Seminar. Two hours each term. Corequisites: courses 179A or 179B or Microbiology 179A; for 188B: course 179B or Microbiology 179B. Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit with topic change. Letter grading.

180C. Special Courses in Molecular, Cell, and Developmental Biology. (4) Lecture, five hours. Requi- sites: courses 104 or course 105L, or 184, 184. Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit with topic change. Letter grading.

190A-190B-190C. Joint Research Colloquia. (1-1-1) Seminar. Two hours each term. Corequisites: courses 198A or 198B or 199C or 199B or 199B. Limited to ju- niors/seniors. Designed to bring together students un- dertaking supervised tutorial research in model sys- tems. Discussion and presentation of student research work or related work in discipline to encourage more sophisti- cated understanding of most current topics in research fields of students or fields using related model organ- isms. P/NP or letter grading.

190A. Plant Model Systems; 190B. Invertebrate Model Systems; 190C. Vertebrate Model Systems.
191. Variable Topics Research Seminars: Molecular, Cell, and Developmental Biology. (2) Seminar, two hours. Limited to junior/senior Molecular, Cell, and Developmental Biology majors. Intended for students with strong commitment to pursue graduate studies in molecular, biochemical, physiological, and biomedical fields. Weekly variable topics course discussion, and preparation and presentation of paper selected from current literature. May be repeated once for credit. P/NP or letter grading.

192A. Undergraduate Practicum in Molecular, Cell, and Developmental Biology. (4) Seminar. Three hours; discussion, one hour. Limited to junior/senior Molecular, Cell, and Developmental Biology majors. Training and supervised practicum for advanced undergraduate students. Students assist in preparation of materials and development of innovative programs under guidance of faculty members in small course settings. Consult Undergraduate Office for further information. May not be applied toward course requirements for Molecular, Cell, and Developmental Biology major. May be repeated once for credit. P/NP or letter grading.

192B. Undergraduate Practicum: CityLab. (2) Seminar, two hours. Limited to juniors/seniors in any life sciences major. Course 192A must be taken for at least two terms and for total of at least 8 units. Individual contract required. In Progress (199A) and letter (199B) grading. Students may elect to enroll in additional research through courses 199C and 199D (letter grading). Report on progress must be presented to department each term 199A through 199D course is taken.

Graduate Courses

M220. Cell, Developmental, and Molecular Neurobiology. (6) Formerly numbered CM220. (Same as Neuroscience M200B.) Lecture, six hours. Fundamental topics concerning cellular, developmental, and molecular neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotropic factors. Letter grading.

C222A-C222D. Advanced Topics in Cell and Molecular Biology. (2 each) Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Recent developments in fields of molecular, cell, and developmental biology. Concurrently scheduled with courses C174A-C174D. Letter grading.

C222A. Molecular Evolution. (2) Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current developments in fields of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data. Original research proposal required. Letter grading.

C244. Molecular Basis of Vascular Biology. (4) Lecture, four hours. Requisites: Life Sciences 3, 4. Developmental and physiological aspects of vascular biology. Presentation and discussion of key questions of vascular biology with mechanistic viewpoint. Major emphasis on experimental approaches and current research in field. Introduction to several model systems along with presentation of specific topic. Basic information provided as to how this information is obtained. Student must use variety of experimental approaches and model organisms. Letter grading.

C288. Prokaryotic and Eukaryotic Gene Systems. (2) Lecture, two hours. Presentations concerning current areas of research in prokaryotic and eukaryotic gene regulation, organization, transcription, and translation. S/U or letter grading.

M230B. Structural Molecular Biology. (4) Same as Chemistry M230B. Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Selected topics from principles of biological structure; structures of globular proteins and RNA; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

M230D. Structural Molecular Biology Laboratory. (2) (Same as Chemistry M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, computer filtering, three-dimensional reconstruction from electron micrographs, and model building. S/U or letter grading.

C234. Genetic Control of Development. (4) Same as Genetics C234. Seminar, two hours. Recent developments in fields of molecular developmental biology, including problems in oogenesis and early embryogenesis, pattern formation, axis determination, nervous system development, cellular morphogenesis and cell-cell and cell-matrix interactions. S/U or letter grading.

C239. Molecular Basis of Plant Differentiation and Development. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 3, 4. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underpinning these processes. Syntopy of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C141. Preparation and ability to function in a research environment, in addition to other coursework, required of graduate students. Letter grading.

C240. Cytokines and Reproductive Biology. (2) (Same as Microbiology M240.) Lecture, 90 minutes; discussion, one hour. Overview of current progress on research in cytokines and other immune system molecules in reproductive biology. S/U or letter grading.

242. Topics in Neurobiology. (4) Lecture, three hours; discussion, one hour. Recent developments in fields of molecular, cell, and developmental biology with mechanistic viewpoint. Major emphasis on experimental approaches and current research in field. Introduction to several model systems along with presentation of specific topic. Basic information provided as to how this information is obtained. Student must use variety of experimental approaches and model organisms. Letter grading.

C250. Plant Communication. (4) Lecture, three hours; discussion, one hour. Preparation required: Life Sciences 3, 4. Most people think of plants as static organisms, yet they live in world of symbiosis and community. Plants change atmosphere, enrich soil, and communicate with insects, bacteria, and each other — Earth’s ultimate symbiote. Just as science has revealed over time misconceptions about how things work at deeper level, science now recognizes that beyond obvious need to grow above-ground biomass for fuel production, we must better understand how to make biomass in sustainable manner. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of natural compounds in plant/microbe, plant/plant, and plant/herbivore interactions; synthesis of defense, defense of plant, molecular mechanisms and responses to microbial infections. Concurrently scheduled with course C150. S/U or letter grading.

254. Seminar: Plant Morphogenesis. (2) Seminar, two hours. S/U or letter grading.

255. RNA Editing. (4) Lecture, two hours; discussion, one hour. Preparation: knowledge of molecular biology and molecular genetics. Discussion of diverse set of novel RNA modification phenomena known as RNA editing. Topics include U insertion/deletion, RNA editing in trypanosome mitochondria, C to U substitution editing in apo B mRNA and plant mitochondria, C insertion editing in Physarum mitochondria, etc. Discussion of mechanism, function, and evolution of these phenomena. S/U or letter grading.

CM256. Human Genetics. (4) Same as Human Genetics CM256 and Microbiology CM256. Lecture, three hours; discussion, one hour. Preparation: Life Sciences 3, 4. Application of genetic principles in human populations, with emphasis on cytogenetics, bio-
chemical genetics, population genetics, and family studies. Lectures and readings in literature, with focus on current questions in fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students and letter grading.

266A-266B-266C. Seminars: Development, Stem Cells, and Disease Mechanisms. (2-2-2) Seminar, two hours. Limited to graduate students. Advanced courses based on research papers on fundamental cellular mechanisms governing development and disease. Disease results from genetically determined or acquired deficits in cell and molecular processes; analysis of these processes in context of normal development indicates ways of dealing with corresponding disease. S/U grading.

M272. Stem Cell Biology and Regenerative Medicine. (4) (Same as Pathology M272.) Lecture, two hours; discussion, two hours. Designed for graduate students. Presentation of current knowledge of embryonic and adult stem cells and factors that regulate their growth and development. Major emphasis on how advances in cell and molecular biology and tissue engineering can be applied to use of stem cells in regenerative medicine. Bioethical and legal issues related to stem cell research. S/U or letter grading.

276. Seminar: Molecular Genetics. (2) Seminar, two hours. Topics vary each term. S/U or letter grading.

278. Seminar: Molecular Genetics of Development. (2) Seminar, two hours. Designed for graduate students. Topics vary from year to year, with focus on establishment of position and pattern during embryogenesis by interaction of signal transduction systems and transcription factors. S/U or letter grading.

283. Seminar: Topics in Cell Biology. (2) Seminar, two hours. Discussion of various topics on biology of eukaryotic cells. Topics vary from year to year and include bioenergetics, motility, organelle DNA, membrane structure and function, oncogenic transformation, nuclear organization and function. S/U or letter grading.

284. Seminar: Structural Macromolecules. (2) Seminar, one hour; discussion, three hours. Presentation and discussion of current topics in extracellular active structural macromolecules — their synthesis, structure, and roles in cell and developmental biology. Letter grading.

286. Seminar: Plant Development. (2) Seminar, one hour; discussion, two hours. Preparation: one plant physiology course and at least one advanced undergraduate or graduate plant development or biochemistry course. Seminar on specific topics in plant development. Content varies each term. S/U grading.

289. Current Topics in Plant Molecular Biology. (2) Discussion, one hour, three hours. Review of recent research developments in field of plant molecular biology. Opportunities for graduate students to discuss individual research work. S/U grading.

295. Seminar: Molecular, Cell, and Developmental Biology. (2) Seminar, two hours. In-depth surveys of recent developments in molecular, cell, and developmental biology research. Reading and presentation of primary research articles to learn to critically evaluate research papers and to organize and present seminars on specific research topics. S/U or letter grading.

297. Advances in Molecular Analysis of Plant Development and Plant/Microbe Interactions. (2) Discussion, two hours. Recent advances in plant molecular biology, with emphasis on control of gene expression both during plant development and in plant/microbe interactions. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeESHIP under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Preparation for Teaching Molecular, Cell, and Developmental Biology in Higher Education. (2) Seminar, two hours. Designed for graduate students. Study of problems and methodologies in teaching molecular, cell, and developmental biology, including workshops, seminars, apprentice teaching, and peer observation. S/U grading.

597. Preparation for M.A. Comprehensive Examinations or Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged. May not be applied toward M.A. or Ph.D. course requirements. S/U or letter grading.

Mark A. Frye, Ph.D. (Integrative Biology and Physiology)

David L. Glanzman, Ph.D. (Integrative Biology and Physiology, Neurobiology)

Thomas J. O’Dell, Ph.D. (Physiology)

James G. Tidball, Ph.D. (Integrative Biology and Physiology, Neurobiology, and Medicine)

Yibin Wang, Ph.D. (Anesthesiology, Physiology)

Nancy L. Wayne, Ph.D. (Physiology)

Scope and Objectives

Physiology is the study of the functional processes that collectively constitute life. The studies usually employ quantitative analyses of normal life processes, of pathological defects in normal life processes, of model systems to clarify and test basic physiological principles, and of functional specializations of organisms that have evolved under the influence of differing selective forces. Thus, physiology contributes importantly to advances in knowledge both in the basic biological sciences and in biomedical sciences and provides an essential foundation for the practice of medicine.

The primary objective of the interdepartmental Molecular, Cellular, and Integrative Physiology Program is to train a new generation of physiologists who apply modern knowledge in molecular and cellular biology and systems physiology to important questions in organismic function. Students learn to conceptualize physiological questions across several levels of organization and to understand how research strategies incorporating each of the levels of analysis can be formulated. This approach to physiology education is responsive to the need for physiologists who can intellectually and technically span disciplines related to physiology that are typically separated.

Coursework consists of formal instruction in the most current information in molecular biology, cell biology, and the molecular and cellular foundations of physiology. In addition, students identify an area of emphasis in biophysics, cellular and molecular biology, or integrative/comparative physiology in which additional studies are pursued. The heart of the program, however, is the research that leads to the dissertation, which is performed under the guidance of a faculty mentor. The program faculty includes more than 60 professors in the David Geffen School of Medicine and College of Letters and Science. Collectively they have been recently ranked by the National Research Council in the top five in the U.S. for their quality as an academic faculty.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree

The Molecular, Cellular, and Integrative Physiology Program offers the Doctor of Philosophy (Ph.D.) degree in Molecular, Cellular, and Integrative Physiology.

Molecular, Cellular, and Integrative Physiology

Graduate Courses

M200G. Biology of Learning and Memory. (4) (Same as Neurobiology M200G, Neuroscience M220, and Psychology M208.) Lecture, four hours. Molecular, cellular, circuit, systems, neuroanatomy, theory, and models of learning and memory. Cross-disciplinary focus on learning and memory to provide integrative view of subject that emphasizes emerging findings that take advantage of novel groundbreaking models. Letter grading.

M215. Molecular and Cellular Foundations of Physiology. (5) (Same as Physiological Science M215.) Lecture, three hours; discussion, two hours. Application of molecular and cellular approaches to systems level questions. Basic foundation for study of
major physiological systems, with emphasis on levels of organization from molecular to macroscopic. Letter grading.

249. Seminar: Pathogenic Mechanisms in Muscle Disease. (2) Seminar, two hours. Recent advances have been made in genetic identification of molecular basis of muscle disease, and some mechanisms involved have been elucidated. Focus on muscle diseases in which substantial mechanistic information has been obtained, including particular cellular locations and diseases associated with those locations. Topics include Duchenne muscular dystrophy, congenital muscular dystrophy, limb girdle dystrophy, Ullrich myopathy, and other forms of genetically inherited muscle disease. S/U grading.

M252A. Molecular Mechanisms of Human Diseases II. (4) (Same as Pharmacology M252A.) Lecture, four hours. Preparation: prior satisfactory molecular biology coursework. Corequisite: course M252B. Fundamental concepts and methodologies in modern biology, with emphasis on implications and relevance to human disease and integration of biology with mechanisms underlying disease development and applications in therapy as they apply to cancer biology, infectious disease, and modern biological approaches. Letter grading.

M252B. Seminar: Molecular Mechanisms of Human Diseases II. (2) (Same as Pharmacology M252B.) Seminar, two hours. Corequisite: course M252A. Reading, review, and discussion of primary research literature addressing fundamental concepts and methodologies in modern biology, with particular emphasis on implications and relevance to human diseases of topics presented in course M252A. Letter grading.

M252A. Molecular Mechanisms of Human Diseases II. (4) (Same as Pharmacology M252A.) Lecture, four hours. Preparation: prior satisfactory molecular biology coursework. Corequisite: course M252B. Fundamental concepts and methodologies in modern biology, with emphasis on implications and relevance to human disease and integration of biology with mechanisms underlying disease development and applications in therapy as they apply to neurological, cardiovascular, and metabolic diseases. Letter grading.

M262A. Molecular Mechanisms of Human Disease II. (2) (Same as Pharmacology M262A.) Seminar, two hours. Corequisite: course M262A. Reading, review, and discussion of primary research literature addressing fundamental concepts and methodologies in modern biology, with particular emphasis on implications and relevance to human diseases of topics presented in course M262A. Letter grading.

290A-290B-290C. Tutorials. (4-4-4) Tutorial, two hours. Discussion, analysis, and critique of original research literature. Letter grading. 290A. Cellular and Molecular Physiology; 290B. Biophysics; 290C. Integrative and Comparative Physiology.

296. Research Seminar. (2) Seminar, to be arranged. Review of literature, discussion of original research, and analysis of current topics in molecular, cellular, and integrative physiology. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 10) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

597. Preparation for Ph.D. Qualifying Examinations. (2 to 10) Tutorial, to be arranged. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 10) Tutorial, to be arranged. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

Curtis D. Eckhert, Ph.D. (Environmental Health Sciences)
Hilary A. Godwin, Ph.D. (Environmental Health Sciences)
Oliver Hankinson, Ph.D. (Pathology and Laboratory Medicine)
David E. Krantz, M.D., Ph.D. (Psychiatry and Biobehavioral Sciences)
Robert H. Schiestl, Ph.D. (Pathology and Laboratory Medicine)

Scope and Objectives

Faculty from a variety of departaments and schools at UCLA, including Biological Chemistry, Chemistry and Biochemistry, Environmental Health Sciences, Epidemiology, Medicine, Molecular and Medical Pharmacology, and Pathology and Laboratory Medicine, have joined forces to create an interdisciplinary graduate program in Molecular Toxicology that is administered through the School of Public Health. Specialties within the program include, but are not limited to, neurotoxicology, nanotoxicology, immunotoxicology, reproductive and developmental toxicology, genetic toxicology, toxicokinetics and metabolism, genetics and molecular biology, carcinogenesis, and environmental toxicology. There is a particular emphasis on mechanisms of toxicity, since it is now widely accepted that understanding mechanisms will provide the means for accurately determining risk.

New chemicals have been the basis for most of the technological developments during the past century, and there is no question that society has reaped enormous benefits from the creation and growth of the chemical industry. However, major health and environmental problems have also been the legacy of the synthesis of new chemical species. The discipline of toxicology, which seeks to characterize and elucidate the mechanisms of the problems related to exposure of chemical agents, has also developed from a purely descriptive to a mechanistic science whose objective is to understand the basis of toxicity action, predict the toxicity of new chemical entities, and protect organisms from them. Toxicology has used the basic disciplines of chemistry, biochemistry, and cell biology to advance understanding of toxicological phenomena, and the growth of the sophistication of toxicology has paralleled the increase in knowledge derived from the basic chemical and biological sciences.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree

The Molecular Toxicology Program offers the Doctor of Philosophy (Ph.D.) degree in Molecular Toxicology.

Molecular Toxicology

Upper Division Courses

M110A. Drugs: Mechanisms, Uses, and Misuse. (4) (Same as Pharmacology M110A.) Lecture, four hours (seven weeks); discussion, four hours (three weeks). Requisites: Life Sciences 2, 3. Introduction to pharmacology and toxicology for undergraduate students, emphasizing drug development and mechanisms of action of drugs and toxic agents. Letter grading.

197. Individual Studies in Molecular Toxicology. (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

211A-211B-211C. Molecular Toxicology Seminars. (1-1-1) Seminar, one hour twice per month. Seminar series which alternately features outside speakers and members of UCLA molecular toxicology community (students, postdoctoral fellows, and faculty) and deals with topics relevant to molecular toxicology. In Progress (211A, 211B) and SU (211C) grading.

M241. Introduction to Chemical Pharmacology and Toxicology. (6) (Same as Pharmacology M241.) Lecture, six hours. Preparation: organic and biological chemistry. Designed for molecular and medical pharmacology students. Introduction to general principles of pharmacology. Role of chemical properties of drugs in their distribution, metabolism, excretion, and modes of action. S/U or letter grading.

M242. Toxicodynamics. (2) (Same as Environmental Health Sciences M242.) Lecture, one hour; discussion, one hour. Preparation: undergraduate biology and chemistry courses. Requisite: Environmental Health Sciences C240. Examination of recent literature on mechanisms of toxicity or toxicodynamics. Student specialization in the study of toxicity or toxicodynamics.
presentation of papers selected by instructor on various aspects of toxic mechanisms, including free radical mechanisms, mechanisms of cell death, metal toxicity, homeostasis, intracellular pH and calcium regulation, stress and adaptive pathways, DNA repair/mutation, carcinogenesis, and teratogenesis. Discussion of various papers. S/U or letter grading.

M245. Laboratory on Toxicological Methods, (2) (Same as Environmental Health Sciences M245 and Pharmacology M234C.) Lecture, one hour; laboratory, four to five hours. Survey of experimental techniques used in study of toxic substances. Experiments conducted with known toxins to demonstrate its effects at molecular, cellular, and tissue levels. Presentation of principles of techniques and methods of data analysis at discussion session prior to laboratory. Letter grading.

M246. Molecular Toxicology, (4) (Same as Environmental Health Sciences M246.) Lecture, four hours. Examination of fundamental aspects of toxicology required for deep understanding of toxicological processes, with research-oriented outlook. Dissemination of information about both new and classic toxicological topics to make students think about them from research perspective. Students learn about cutting-edge research areas of molecular toxicology, how to most optimally extract important information from research papers, how to critique papers, how to formulate alternative hypotheses for data in papers, how to formulate ideas for future research, and how to express their ideas effectively in oral and written formats. Letter grading.

296A-296G. Research Topics in Molecular Toxicology. (2 each) Research group meeting, two hours. Advanced study and analysis of current topics in molecular toxicology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

296A. Chemical Toxicology.
296B. Molecular Carcinogenesis.
296C. Teratogenesis.
296D. Molecular Topics in Boron Biology.
296E. Germ Cell Cytogenetics/Genetic Biomarkers.
296F. Genetic Toxicology.
296G. Laboratory Analysis.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, four hours. May be repeated toward degree course requirements. May be repeated for credit. S/U or letter grading.

597. Preparation for Ph.D. Qualifying Examinations. (2 to 12) Tutorial, four hours. May be repeated toward degree course requirements. May be repeated for credit. S/U grading.

599. Ph.D. Dissertation Research. (8 to 12) Tutorial, to be arranged. Individual guided studies under direct faculty supervision. May not be applied toward degree course requirements. May be repeated for credit. S/U or letter grading.

Leah A. Lievrouw, Ph.D. (Information Studies)
Ellen J. Pearlstein, M.A. (Information Studies)
Steven Ricci, M.A., Ph.D. (Film, Television, and Digital Media, Information Studies)

Scope and Objectives

The Moving Image Archive Studies Program M.A. is an interdepartmental degree program offered jointly by the Department of Information Studies in the Graduate School of Education and Information Studies and the cinema and media studies faculty of the Department of Film, Television, and Digital Media in the School of the Theatre, Film, and Television. The program is an intensive, specialized two-year course of study consisting of graduate seminars, directed studies, and an extensive practicum program, as well as special topic screenings, guest lectures, and technical demonstrations. The program is also affiliated with the UCLA Film and Television Archive.

The goal of the program is not merely training, but a broad education grounded in historical, critical, and theoretical study. The subject matter encompasses the aesthetics and history of film and television, the cultural responsibilities of selection and curatorship, access and programming for the public, collection management, cataloging and documentation, and technical aspects of preservation and restoration. Seminars and practica are taught by a combination of UCLA faculty members, academic scholars, top-level preservationists, and other archive specialists.

The program recognizes that traditional models of archival work have been redefined in recent years to emphasize moving image preservation as an ongoing process of activities along a continuum that includes curatorship, laboratory preservation, storage management, cataloging, and access. The program encourages familiarity with all these closely related archival functions and provides opportunities for specialization within them.

A key goal is to link theory with practice. The program embraces hands-on practice in archives, libraries, studios, and laboratories in the Los Angeles area, as well as nationally and internationally.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaalibrary/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree

The Moving Image Archive Studies Program offers the Master of Arts (M.A.) degree in Moving Image Archive Studies.

Moving Image Archive Studies

Graduate Courses

200. Moving Image Archiving: History, Philosophy, Practice. (4) Seminar, four hours. Introduction to historical development of moving image archives. Critical analysis of archival policies regarding collection development, access, exhibition, cataloging, preservation, and restoration. Introduction to principle models and methodologies of moving image archive practices from 1938 establishment of International Federation of Film Archives to the present, addressing practices such as collection development of classical, national, regional, and nonmainstream materials (small gauge formats, independent and amateur productions, new media); changing role of technology in preservation and restoration; ethics of moving image restoration; cataloging standards and documentation systems; classical and alternative models of archive administration and funding; cultural impact of public programming; research and publication supported by moving image archives; access, education, and archival productions. S/U or letter grading.

210. Moving Image Preservation and Restoration. (6) Seminar, four hours. Critical analysis of distinct models for archival preservation and restoration of moving image media. Examination and evaluation of current preservation standards, procedures, and duplications. Discussion of critical preservation problems such as nitrate deterioration, color fading, vinegar syndrome, and irreversible prints. Exploration of case studies of specific restoration projects through critical before and after studies, with focus on crucial ethical issues embedded within each technical and aesthetic decision facing restorers. Of special interest is question of whether it is possible and appropriate to speak of particular schools and/or philosophies of restoration. Range of key issues addressed, such as identification of original versus subsequent and multiple versions and theoretical and practical distinctions between different types of restoration. S/U or letter grading.

220. Archaeology of Media. (4) Seminar, four hours. History of moving image technologies. Examination of relationship between technological evolution and forms of moving image expression. Lectures combined with extensive presentations of full range of analog, video, and digital image types to train students to develop discerning eye required for professionals working in 21st-century moving image archive. In addition to study of specific technical developments such as new gauges, formats, color processes, aspect ratios, films stocks, and projection systems, exploration of larger economic and industrial forces behind them. Study of aesthetic consequences of specific production and exhibition innovations by examining different types of images, genres, and narratives that accompany and influence passage of new technologies. S/U or letter grading.

230. Moving Image Cataloging. (4) Seminar, four hours. Introduction to methodologies and standards specific to moving image cataloging. Discussion and
debate of continued application of Library of Congress subject headings and genres to cataloged moving image materials. Exposure to variety of indexing languages used today within online environments and practical training in application of cataloging principles to motion pictures and television programs. Survey of general theories and alternate documentation practices at work within field as well as specific cataloging rules established by FIAF for local and national moving image archives. Discussion of important issues of public access, exploring various methods and protocols for making collection-related information available through secondary and nonsystematic channels such as study guides, collection profiles, Websites, stand-alone databases, and exhibition catalogs. Letter grading.

240. Archival Administration. (4) Seminar, four hours. Day-to-day administration of moving image archives involves complex set of interrelated activities, including donor relations, deposit agreements, and application of copyright law; collection identification and cataloging; storage, conservation, and preservation of moving image materials; budget planning, fundraising, and grant writing; staff training and supervision; programing, education initiatives, and Internet access. Analysis of interrelationship between administrative policies, budgets, human resources, and overall archival goals. Through discussions with working archival professionals, exploration of these essential tasks with particular attention to rapidly changing paradigms brought about by migration of media into digital realm. S/U or letter grading.

250. Access to Moving Image Collections. (4) Seminar, four hours. Survey and analysis of policies and procedures used to provide access to moving image collections. Identification and exploration, through lecture and discussion, of three distinct modes of public access: traditional access, public exhibition, and public access, S/U or letter grading.

298. Special Topics in Moving Image Archive Studies. (2 to 4) Seminar, two to four hours. Variable topics related to scholarship and practice in moving image archive studies. Letter grading.

498. Individual Directed Studies: Practicum in Moving Image Archiving. (2 to 8) Tutorial, 12 hours. Hands-on experience at entry professional level in archive, library, information center, or media laboratory supervised by one archivist or other appropriately qualified professional and one program faculty member. S/U grading.

596. Directed Individual Study or Research. (2 to 6) Tutorial, four hours. Study or research in areas or subjects not offered as regular courses. S/U or letter grading.

Christopher Hanulik, B.M.
Douglas H. Masek, D.M.A.

Adjunct Associate Professors

Christoph Bull, D.M.A
Mark C. Carlson, Ph.D.
Jennifer Judkins, Ph.D.
Jennifer L. Snow, D.M.A.
Peter F. Yates, D.M.A.

Adjunct Assistant Professor

Judith I. Hansen, B.A.

**Scope and Objectives**

The Department of Music provides undergraduate and graduate training in Western classical music, with concentrations in composition, music education, and performance. Jazz performance is also offered at the graduate level. The department is aligned with the Departments of Ethnomusicology and Musicology and aspires to promote productive collaboration between performance and scholarship, a cross-cultural global understanding of the art of music, and preparation for and execution of their senior recitals. Through preparatory and execution of their senior recitals, students demonstrate a level of proficiency appropriate for their role in the recitals and their understanding of performance practices appropriate to the repertory being performed, as acquired in previous coursework and through research. Students also display their ability to assemble an effective program in terms of pacing and variety and demonstrate requisite stage presence along with an ability to communicate with their audience in performance.

**Music B.A.**

**Capstone Major**

**Admission**

All applicants for admission and change of major are required to pass an audition in their principal performing medium.

**Preparation for the Major**

**Required (for all concentrations except music education):**

Music 20A, 20B, 20C, with grades of C or better; 12 units from courses 60A through 65; two years (12 units) of performance organizations utilizing students’ major instruments (courses C90A through 90N and C90Q through 90S), as assigned by the chair or designated faculty member. In addition, students are required to take one college year — or at least one course at level three — of French, German, Italian, or Spanish, which may be used to fulfill the school language requirement.

**Music Education:**

Music 20A, 20B, 20C, with grades of C or better; 12 units from courses 60A through 65; three years (18 units) of performance organizations utilizing students’ major instruments (courses C90A through 90N and C90Q through 90S), as assigned by the chair or designated faculty member; Ethnomusicol-
og 20A or 20B or 20C. In addition, students are required to take one college year—or at least one course at level three—of French, German, Italian, or Spanish, which may be used to fulfill the school language requirement.

The Major
Required (for all concentrations): Music 120A, 120B, 120C, 140A, 140B, 140C, with grades of C or better, and courses selected from one of the concentrations listed below.

Composition: A minimum of 41 upper division units, including Music 104A or 104B, 106A, 106B, 116, 123A, 123B, 123C, and 127B, and at least 8 elective units selected from courses 104A or 104B (if not already taken), 117, C118A, C118B, additional terms of 123A, 123B, 123C, 124A or 124B or 124C (if not already taken), 197. Ethnomusicology 111, 136A, C136B, 146, C156A, 156B, 157, 158A, 158B, 158C, 160, 170, 181. A capstone senior recital, to be preceded by one capstone scoring course (Music 124A or 124B) and to include at least 30 minutes of original music, is also required (exceptions by petition only).

Music Education: A minimum of 37 upper division units, including Music 101A, 100B, 100C, 110, 111A, 111B, 114A, 114B, 114C, 114G, 114H, 114I; 114D and 114F (or 119); and three courses from 160A through 165. During each term in which students take private lessons, they must participate in a performance organization for a letter grade, utilizing their major instruments (courses C90A through 90N and C90Q through 90S), as assigned by the chair or designated faculty member. A capstone senior recital, that may be held as early as Fall Quarter of the junior year, is also required.

Performance: Twelve units in performance instruction from Music 160A through 165 (including junior and senior recital requirements); 4 units of chamber ensembles (Music C175); 4 units of elective courses from 106B, 116, 117, C118A, C118B, 197. Ethnomusicology M108A, 108B, 120A, 120B, 121, 170, Music History 130, 135A, 135B, 135C, 191A through 191G; and one upper division elective course in music. During each term in which students take private lessons, they must participate in a performance organization for a letter grade, utilizing their major instruments (courses C90A through 90N and C90Q through 90S), as assigned by the chair or designated faculty member.

Theory: Six courses selected in consultation with a faculty adviser.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasasa/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Music offers the Master of Music (M.M.) degree, Doctor of Musical Arts (D.M.A.) degree, and Master of Arts (M.A.) Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Music.

Music Lower Division Courses
1A-1B. Fundamentals of Music. (4-4) Lecture, three hours; discussion, two hours. Designed for nonmusic majors. P/NP or letter grading.
1A. Introduction to elements of music: pitch and rhythm symbols, meter and time signatures, notation, scales, intervals, and chord structure. Required: course 1A. Diatonic harmony; four-part writing, including inversions, seventh, secondary dominants, and modulation; organization of melody and accompaniment; simple analysis; sight- singing and ear training.
4A-4B. Basic Musicianship. (2-2-2) Studio, three hours. Class instruction in elementary ear training and keyboard skills. P/NP or letter grading.
5. Beginning Voice Class. (2) Studio, four hours; outside practice and preparation, two hours. Not open to voice majors. Fundamentals of singing techniques, including vocal mechanism, posture and breathing, musical warm-ups, optimal vocal production, diction, and performance delivery to be put into practice in classroom study, vocal exercises, and performances. Final recital with piano accompaniment required. May be repeated for maximum of 12 units with a grade of C in each course. Letter grading.
7. Understanding Movie Music. (4) Lecture, four hours; outside study, eight hours. Musical experience helpful, but not required. Brief historical survey of film music, with strong emphasis on recent development; Japanese animation, advertising, and MTV, as well as computer tools and digital scoring methods. Designed to inspire and inform those interested in movie music. Offered in summer only. P/NP or letter grading.
8G. Graduate Piano Sight-Reading. (2) Studio, two hours; preparation, two hours. Limited to graduate students. Designed to enable entering graduate students remedy entrance deficiencies, to be cleared by examination. May be repeated. S/U grading.
M10A-M10B-M10C. Introduction to Music: History, Culture, Creativity. (5-5-5) Same as Ethnomusicology M7A-M7B-M7C and Music History M10A-M10B-M10C. Lecture, four hours; laboratory, three hours. Preparation: placement examination. Course M10A is enforced requisite to M10B, which is enforced requisite to M10C. Students must receive grade of C or better to proceed to next course in sequence. Introduction to study of music from three complimentary perspectives: its history, relation to culture, and creative structuring. Lectures from musicologists, ethnomusicologists, and composers/theorists combined with small sections in which students develop wide range of musicianship skills. Organized around broad ideas (performance, multi-velocity, time, place, and more) where creative and cultural implications are explored through analysis and discussion of broad repertoire of musical works spanning historical eras and global cultures. Compositional exercises, production of short compositions, and short papers dealing with historical and cultural issues required. Letter grading.
15. Art of Listening. (5) Lecture, three hours; discussion, one hour; outside study, 11 hours. Acquisition of listening skills through direct interaction with live performance, performances, recordings. Relationship of listening to theoretical, analytical, historical, and cultural frameworks. Music as aesthetic experience and cultural practice. P/NP or letter grading.
20A. Music Theory I. (3) Lecture, four hours. Preparation: passing score on departmental examination. Course 20A is enforced requisite to 20B, which is enforced requisite to 20C. Students must receive grade of C or better to proceed to next course in sequence. Theory: species counterpoint through fifth species; description of triads and inversions. P/NP or letter grading.
20B. Music Theory II. (3) Lecture, four hours. Enforced requisite: course 20A with grade of C or better. Theory: diatonic harmony through secondary dominants and diminished sevenths; modulations to dominant and relative keys; writing of four-part chorales; style composition in baroque dance forms; introduction to figured bass notation. P/NP or letter grading.
20C. Music Theory III. (3) Lecture, four hours. Enforced requisite: course 20B with grade of C or better. Theory: chromatic harmony; harmonic development of tonality, 1800 to 1850; appropriate analysis and style composition. P/NP or letter grading.
60A-65. Undergraduate Instruction in Performance (2 each) Studio, one hour. Limited to Music majors (all freshmen/sophomore majors, and junior/senior majors not in performance specialization). Individual instruction. Students must perform in one practice each quarter. Courses are assigned by applied instructor in Fall and Winter Quarters and by jury examination in Spring Quarter. May be repeated for credit. P/NP or letter grading. 60A. Violin; 60B. Violin. 60C. Cello; 60D. String Bass; 60E. Harp; 60F. Classical Guitar; 60G. Viola da gamba; 60K. Lute. 61A. Flute; 61B. Oboe; 61C. Clarinet; 61D. Bassoon; 61E. Saxophone; 62A. Trumpet; 62B. French Horn; 62C. Trombone; 63D. Tuba; 63E. Percussion. 64A. Piano; 64B. Organ; 64C. Harpsichord; 65. Voice.
80A. Beginning Keyboard. (4) Laboratory, five hours; preparation/practice, seven hours. Simple keyboard skills together with basic aspects of music theory and its practical application to keyboard: sight-reading, tonality, chords, scales, cadences, simple compositions, and improvisations. Offered in summer only. P/NP or letter grading.
80B. Intermediate Keyboard. (4) Laboratory, five hours; preparation/practice, seven hours. Enforced requisite: course 80A. Review of basic keyboard concepts, with focus on developing comprehensive keyboard musicianship related to sight-reading, composing, improvising, analysis of form, study of musical terms and notations, chords, scales, cadences, transposing, and ear training. Offered in summer only. P/NP or letter grading.
80F. Beginning Guitar Class. (4) Laboratory, five hours; preparation/practice, seven hours. Introduction to guitar techniques, accompanying, and arranging for guitar; coverage of note reading and tablature. Offered in summer only. P/NP or letter grading.
80V. Vocal Technique for Beginners. (4) Laboratory, six hours; preparation/practice, six hours. Voice instruction for singers at beginning to intermediate level. Exploration of fundamentals of vocal technique, including overview of basics of proper breath control, resonance, care of voice, diaphragm, and interpretation. Begin- ning vocal repertoire used as vehicle for understanding these concepts. Offered in summer only. P/NP or letter grading.
80W. Woodwind Technique for Beginners. (4) Lab- oratory, six hours; preparation/practice, six hours. Woodwind instruction designed to give students knowledge of fundamental concepts and techniques of saxophone, clarinet, oboe, bassoon, and flute. Offered in summer only. P/NP or letter grading.

M87. Special Courses in Music. (5) Same as Ethnomusicology M87 and Music History M87. Lecture, four hours; discussion; four hours. Limited to under-graduate Ethnomusicology, Music, and Music History majors. Study and analysis of current and special topics in ethnomusicology, music, and music history
taught by resident and visiting faculty members. May be repeated for credit with topic and instructor change. Letter grading.

90A. UCCLA Chorale. (2) Activity, four hours. Prepara-
tion: audition. Select mixed ensemble of no less than 15 voices performing choral music appropriate for concert chorus ensemble, with emphasis on music after 1700. May be repeated with consent of instructor. May be concurrently scheduled with course C480. P/NP or letter grading.

90B. University Chorus. (2) Activity, two hours. Prepar-
aid. audition. Mixed choirs of 50 to 150 voices performing medium- and concert-length choral works from baroque to present. University Chorus performs only as part of Choral Union, large chorus made up of all choral ensembles. May be repeated for credit without limitation. P/NP or letter grading.

90C. Chamber Singers. (2) Activity, three hours. Prepara-
tion: audition. Select mixed ensemble of 16 to 20 voices performing chamber music of all periods, with emphasis on Renaissance and baroque mu-
sic. May be repeated for credit without limitation. P/NP or letter grading.

90D. Opera Workshop. (2) Activity, six hours. Prepara-
aid. rehearsal. Rehearsal and performance of scenes and complete operas, as well as repertoire, stage movement, and foreign language diction coaching. May be repeated for credit without limitation. P/NP or letter grading.

90E. Symphony Orchestra. (2) Activity, four hours. Prepara-
aid: audition. Group performance of symphonie literature, as well as orchestral accomplishment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C481. P/NP or letter grading.

90F. Symphonic Band. (2) Activity, two hours. Prepara-

90G. Wind Ensemble. (2) Activity, four hours. Prepara-
aid: audition. Group performance of concert litera-
ture for wind ensemble. May be repeated for credit without limitation. May be concurrently scheduled with course C482. P/NP or letter grading.

90L. Music Theater Workshop. (2) Activity, six hours. Prepara-
aid: audition. Rehearsal and performance of scenes and complete musical theater productions, in-
cluding repertoire and stage movement coaching. May be repeated for credit without limitation. P/NP or letter grading.

90M. Marching and Varsity Bands. (2) Activity, four hours. Preparation: audition. Group performances of special band arrangements for football and basketball games as well as special events. May be repeated for credit without limitation. P/NP or letter grading.

90N. Jazz Band, three hours. Prepara-
aid: audition. Group performance of jazz and pop-
ular music in ensembles of 20 to 30 instruments. May be repeated for credit without limitation. P/NP or letter grading.

90P. Alexander Technique. (2) Lecture, four hours; outside preparation and practice, two hours. Limited to Music majors. Introduction to principles of Alexander technique. Study of musician's postural attitude at in-
strument. Designed to help instrumentalists and vocalists prevent injuries and performance and may be repeated with consent of instructor. Letter grading.

90Q. PIANO/Keyboard Accompaniment. (2) (For-
merly numbered 90Q.) Activity, four hours; outside study, two hours. Study with large ensembles, instrumen-
talists, and/or vocalists in role of accompa-
nists. Performance includes, but is not limited to, les-
sions, rehearsing, performance programs, master classes, concerts, auditions, juries, and recital-
s. May be repeated for credit without limitation. Con-
currently scheduled with course C484. P/NP or letter grading.

90R. Guitar Accompanying. (2) Activity, four hours; outside study, two hours. Collaboration with instrumen-
talists and/or vocalists in role of accompanists. Perfor-
mane includes, but is not limited to, lessons, rehears-
as, special studio performance projects, master class-
es, concerts, auditions, juries, and recitals. May be repeated for credit without limitation. P/NP or letter grading.

90S. Harp Accompanying. (2) Activity, four hours; outside study, two hours. Collaboration with instrumen-
talists and/or vocalists in role of accompanists. Perform-
ance includes, but is not limited to, lessons, rehears-
as, special studio performance projects, master class-
es, concerts, auditions, juries, and recitals. May be repeated for credit without limitation. P/NP or letter grading.

90T. Early Music Ensemble. (4) (Same as Music History C190T.) Activity, four hours. Preparation: audi-
tion. Group performance of Western vocal and instru-
mental music from historical periods prior to 1800. Early
-study may be used at instructor's discretion. May be repeated for credit without limitation. P/NP or letter grading.

Upper Division Courses

100A-100B-100C. Music in American Education. (4-4-4) Lecture, four hours; laboratory, one hour. Re-
um, and literature for elementary and secondary schools in American education. Each course may be taken independently for credit. Letter grading. 100A. General Music; 100B. Choral Music; 100C. Instrumental.

104A. Modal Counterpoint. (3) Lecture, three hours. Requir-
e: course 120C (accelerated section). In-depth exploration of styles and techniques of counterpoint of 13th and 16th centuries through writing and analysis of important forms of period, including species, canon, free counterpoint, canunt, firmus, point of imitation, motet, ricercare, etc. Letter grading.

104B. Special Topics in Counterpoint. (3) Lecture, three hours. Requisites: course 120C (accelerated sec-
tion). In-depth exploration of polyphonic styles and tex-
tures since 1750, with emphasis on late-19th- and 20th-century modes of expression, through writing and analysis. Letter grading.

106A. Orchestration I. (4) Discussion, three hours. Requisites: courses 120C (accelerated section), 123C. Ranges and characteristics of instruments, with exer-
cises in scoring. P/NP or letter grading.

106B. Orchestration II. (4) Discussion, three hours. Requisites: courses 106A, 120C (accelerated section), 123C. Scoring and analysis for ensembles and full or-
chestra. P/NP or letter grading.

110. Learning Approaches in Music Education. (4) Lecture, four hours; laboratory, one hour; outside study, eight hours. Introduction to concepts and skills central to teaching music. Exploration of three modes of music learning: learning through notation, oral transmission, and imitation. Study of improvisation and communal composition using clarinet and guitar. Evaluation of ex-
periences in context of major learning theories. Letter grading.

111A. Technology in Music Education I. (1) Labora-
tory, three hours. Requisite or corequisite: course 20A. Provides music educators with tools and knowledge necessary to use appropriate computer hardware and software for purposes of music education, including music composition, arranging, and scoring, with emphasis on applications that are appropriate for use in public and/or private schools for levels K-12 and higher education. Activities include fa-
miliarization with computer systems and software, computer-assisted music notation and publication, and development of basic sequencing techniques. Letter grading.

111B. Technology in Music Education II. (1) Lab-
ortory, three hours. Requisite: course 111A. Introduc-
tion to instructional uses of computers in music class-
rooms, with emphasis on practical information neces-
sary to intelligent music educators to implement microcomputers in schools, including training in ar-
ranging, multimedia production, and classroom in-
struction techniques. Additional topics include teacher-
based, administrative, instructional, and educational develop-
ment techniques. Letter grading.

112. Guided Field Experiences in Music Education. (1) Field studies, three hours. Initial field experiences for students preparing to teach and earn single subject certification in music. Novice teachers work under di-
rect guidance of UCLA music education faculty mem-
bers and practicing public school instructor to develop and maintain a teaching assignment in K-12 settings. P/NP grading.

114A-114L. Study of Instrumental and Vocal Techni-
iques. (1 each) Studio, three hours. Requisite or corequisite: course 20A. Applied studies in basic per-
formance techniques and tutorial materials. Each of course 114A through 114L is offered as either P/NP or letter grading. Letter grading.

114A. Advanced Choral Conducting. (2) Formerly numbered 119A.) Lecture, one hour; studio, two hours. Requisites: courses 116, 117. Conducting ba-
sics, baton technique, beat patterns, dynamics, score preparation and analysis. May be repeated once for credit. Concurrently scheduled with course C218A. P/NP or letter grading.

118A. Advanced Choral Conducting. (2) (Former-
ly numbered 118A.) Lecture, one hour; studio, two hours. Requisites: courses 116, 117, 118A. Vocal and choral pedagogy, vocalizing and warm-up tech-
niques, and rehearsal and audition techniques. May be repeated once for credit. Concurrently sched-
uled with course C218B. P/NP or letter grading.

119. Vocal Techniques for Music Education. (2) Lab-
oratory; three hours; outside study, three hours. In-
troduction to art of teaching voice, including anatomy of singing instrument, biomechanics of singing, diag-
nosis and correction of faults, health and care of voice, and instrumental techniques. Letter grading.

120A. Music Theory IV. (4) Lecture, four hours; dis-
cussion, four hours. Preparation: passing score on de-
partmental first-year examination. Requisite: course 20C with grade of C (2.0) or better. Theory: baroque counterpoint including counterpoint and canons, modal harmony including development of harmony from 1850; analytical projects; style composition. Musicianship: advanced score reading; advanced harmonic dictation (diatonic and chromatic); keyboard harmonization of modulating melodies; elementary score reading. P/NP or letter grading.

120B. Music Theory V. (4) Lecture, four hours; dis-
cussion, four hours. Requisite: course 120A with grade of C (2.0) or better. Theory: advanced chromatic har-
mony including development of harmony from 1850; analytical projects; style composition. Musicianship: advanced score reading; advanced harmonic dictation; preparation for departmental examination. P/NP or letter grading.

120C. Music Theory VI. (4) Lecture, four hours; dis-
cussion, four hours; laboratory, one hour. Requisites: course 120B with grade of C (2.0) or better. 20th-cen-
tury harmonic language, including nonfunctional har-
mony, polytonality, free atonality, serialism, and mini-
malism. P/NP or letter grading.

121. Special Topics in 20th-Century Music. (4) Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. In-depth study of certain aspects of 20th-century music ranging from minimalism and schools to ideological or stylistic concerns. May be repeated once for credit. P/NP or letter grading.

476 / Music

123A-123B-123C. Composition. (4-4-4) Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Course 123A is requisite to 123B, which is requisite to 123C. Designed for composition students and others. Contextual composition in smaller forms, including style composition and 20th-century techniques. Each course may be repeated once for credit, but first year must be taken in sequence. P/NP or letter grading.

124A. Scoring for Symphony Orchestra. (4) Discussion, three hours. Requisites: courses 106B, 120C (accelerated section), 123C. Practical activities in scoring for symphony orchestra. Preparation and production of parts. Each partial may include percussion. At least one reading by UCLA Philharmonia Orchestra scheduled. Letter grading.

124B. Scoring for Wind Ensemble. (4) Discussion, three hours. Requisites: courses 106B, 120C (accelerated section), 123C. Practical activities in scoring for large wind ensembles. Preparation and production of scores. Each partial may include percussion. At least one reading by UCLA Wind Ensemble scheduled. Letter grading.

124C. Scoring and Arranging for Choral Ensemble. (4) Discussion, three hours. Requisites: 106B, 120C (accelerated section), 123C. Practical activities in scoring and arranging for choral ensembles, including a capella as well as choral with instruments. Preparation and production of score and parts. At least one reading by UCLA Chorale or other choral group scheduled. Letter grading.

M131. Development of Latin Jazz. (4) Same as Ethnomusicology M131.) Lecture, four hours; discussion, one hour. Historical survey of major works from music theater, early forms to 1900; 1900 to 1920; 1920 to 1945; 1945 to present. Enforced requisite: course C404A, 64A, 64B, or 164C. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by past masters.student may be concurrently scheduled with course C267. P/NP or letter grading.

174. Vocal Diction. (2) Lecture, two hours; outside study, four hours. Designed for Music majors. Sounds of language as applied to singing, including use of International Phonetic Alphabet, translation of art song texts, and application to student’s current vocal repertoire. Background in each language encouraged. P/NP or letter grading.

175. Chamber Ensembles. (2) Activity, two hours. Preparation: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to ensembles. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be concurrently scheduled with course C267. P/NP or letter grading.

176. Electronic Music Composition. (4) Lecture, three hours; laboratory, three hours. Preparation: advanced experience and accomplishment in serious composition (art music), two years of music theory, Limited to majors. Experiences in electroacoustic orchestration, meta-pitch composition, notation software (Sibelius), sequencing and scoring software (Logic), text collages (ProTools), and final project. May be concurrently scheduled with course C226. P/NP or letter grading.

177. Gluck Chamber Ensembles. (2) Studio, two hours. Preparation: audition. Advanced chamber ensembles who, after rehearsing and being coached on core amount of repertoire, play in outreach settings around Los Angeles community. May be repeated for credit without limitation. Concurrently scheduled with course C477. P/NP grading.

188. Special Courses in Music. (4) Lecture, three hours; outside study, nine hours. Special topics in music. May be concurrently scheduled with course C225. P/NP or letter grading.

195. Community or Corporate Internships in Music. (2 or 4) Tutorial, six hours. Limited to juniors/seniors. Internship in subject area or community agency or business. Students meet on regular basis with supervising instructor and submit periodic reports of their work experiences. May be repeated for maximum of 8 units. Individual contract with supervising faculty member required. P/NP grading.

197. Individual Studies in Music. (2 or 4) Tutorial, one hour. Preparation: 3.0 grade-point average. Limited to seniors. Individual study of music, with scheduled meetings to be arranged between faculty member and student. Tangible evidence of mastery of subject matter (research project) required. May be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

Graduate Courses

M201. Repertory and Analysis. (2) (Same as Musicology M201.) Seminar, two hours. Requisite or corequist: Musicology 202. In-depth study of repertory through readings and analysis. Specific topics vary. May be repeated for credit. S/U grading.

202. Analysis for Performers. (4) Lecture, three hours; outside study, nine hours. Designed for graduate music performance students. Students perform music using performance techniques and approaches required of professional performers, including phrase structure, harmonic rhythm and prolongation, small and large forms, theories of musical coherence, and understanding of styles. Letter grading.

203. Notation and Performance. (4) Lecture, three hours; outside study, nine hours. Designed for graduate music performance students. Students perform music using performance techniques and approaches required of professional performers, including phrase structure, harmonic rhythm and prolongation, small and large forms, theories of musical coherence, and understanding of styles. Letter grading.

218A. Advanced Choral Conducting. (2) Lecture, one hour; studio, two hours. Requisites: courses 116, 117, C218A. Vocal and choral pedagogy, vocalizing and warm-up techniques, diction, and rehearsal and audition techniques. May be repeated once for credit. Concurrently scheduled with course C118A. Letter grading.

218B. Choral Techniques and Methods. (2) Lecture, one hour; studio, two hours. Requisites: courses 116, 117, C218A. Vocal and choral pedagogy, vocalizing and warm-up techniques, diction, and rehearsal and audition techniques. May be repeated once for credit. Concurrently scheduled with course C118B. Letter grading.

222. Speculative Music Theory. (4) Discussion, three hours. Designed for graduate music students. Techniques of tonal coherence studied through analysis and compositional exercises in styles of given period. May be repeated once for credit. May be concurrently scheduled with course C118A. Letter grading.

225. Historical and Philosophical Foundations of Music Education. (4) Discussion, three hours. Designed for graduate students. Development of music education in U.S. according to established schools of thought. May be concurrently scheduled with course C115. May be repeated once for credit. May be concurrently scheduled with course C225. P/NP or letter grading.

226. Electronic Music Composition. (4) Lecture, three hours; laboratory; three hours. Preparation: advanced experience and accomplishment in serious composition (art music), two years of music theory. De-
signed for graduate students. Limited enrollment. Exercises in electroacoustic orchestration, meta-pitch composition, notation software (Sibelius), sequencing, and film scoring software (Logic), text collages (ProTools), and final project. May be concurrently scheduled with course C176. S/U or letter grading.

254. Advanced Music Analysis: Pre-Tonal Music. (4) Seminar, three hours. Designed to provide graduate composition students with in-depth exposure to complex aspects of sonata alLEGRO forms of the late Middle Ages through the end of baroque era. Exploration of analytical techniques and methods not commonly used in analysis of works of tonal and post-tonal periods, and approaches to musical structures used by composers before modern tonal harmonic syntax had fully developed. Letter grading.

256. Advanced Music Analysis: Post-Tonal Music. (4) Seminar, three hours. Designed for graduate music students. Discussion of theoretical approaches to and analysis of selected works of 20th or 21st century. Analysis of assigned pieces using various theoretical approaches discussed and presentation of analyses in class. Letter grading.

260A. Seminar: Composition for Motion Pictures and Television. (6) Seminar, three hours; laboratory, three hours. Practical experience in composing for commercial movies. Difference between underscore and source music and discussion of surrealistic effect when underscore is供应商. Exploration of the use of visual cues in montages. Study of three principal areas of filmmaking — production, postproduction, and digital production. Examples from classic movies and discussion of their soundtracks and cues used to provide a backdrop for visual elements. Students will learn the basics of using the software needed to prepare a film for the final cut. Separate cues involve dialogue, melodrama, comedy, chase, memory montage, and tension. Letter grading.

260B. Seminar: Composition for Motion Pictures and Television. (6) Seminar, three hours; laboratory, three hours. Focus on tasks of completing one entire score for television episode or original student film. Discussion of recent television shows. Composition of one or more short cues and short cues to someone else’s song required. Term assignment involves student orchestra recording to picture, designed to approach actual conditions of completing professional Hollywood assignment, from spotting to scoring. Letter grading.

261A-261J. Problems in Performance Practices. Problems: (4 or 464B or 464C). In-depth study of selected topics in performance through analysis, historical and comparative studies, and actual performance by participants. May be concurrently scheduled with course C167. S/U or letter grading.

270A-270G. Seminars: Music Education. (6 each) Seminar, three hours. May be repeated for credit without limitation. Letter grading.

270H. History. (4) Seminar, three hours; discussion, one hour; outside study, seven hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music in emerging digital world of arts, including training in arranging and multimedia production. Letter grading.

271. Music and Electronic Technology. (4) Lecture, four hours; media laboratory, one hour. Designed for graduate music performance students. Survey of music and its place in emerging digital world of arts, including training in arranging and multimedia production. Letter grading.

270F. Instrumental Literature; 270G. General Topics. (4) Seminar, three hours; laboratory, two hours; discussion, one hour; outside study, seven hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on the musical create, performed, listened to, and evaluated today. Historical approach taken, beginning with music published in 18th century and continuing through representation on TV and popular music today. Letter grading.

290. Composition Forum. (2) Seminar, two hours. Weekly sessions rotate around composers of a range of mediums, including large ensemble vocal and/or instrumental works, chamber music, electronic music, and film/television, as guest lecturers. Letter grading.

292. Seminar: Special Topics in Music. (4) Seminar, three hours. Exploration of topics in music through variety of approaches that may include projects, performances, readings, discussions, research papers, and oral presentations. Topics announced in advance. May be repeated for credit. S/U or letter grading.

303. Introduction to Orff Schulwerk. (2) Lecture, 10 hours; discussion, five hours; laboratory, 15 hours. Designed for teachers of music, church musicians, and music therapists who have had little or no previous experience with Orff Schulwerk. Introduction to Orff Schulwerk, including history, philosophy, and teaching processes of this approach to music instruction for children. Offered in summer only. S/U or letter grading.

351. Conducting. (4-4-4) Lecture, 10 hours; discussion, five hours; laboratory, 15 hours. Designed for graduate students and performers. S/U or letter grading.

331A-331B-331C. Orff Schulwerk Training Courses. (4-4-4) Lecture, 10 hours; discussion, five hours; laboratory, 15 hours. Requisite: course 330. Course 331A is requisite to 331B, which is requisite to 331C. In-depth courses in teaching of Orff Schulwerk approach to music instruction for children. Students are eligible for certification at that level through American Orff Schulwerk Association. Offered in summer only. S/U or letter grading. S331A. Level I (Beginning); S331B. Level II (Intermediate level); S331C. Level III (Advanced).

331. Conducting for High School and College Band/Wind Ensemble Teachers. (2) Lecture, 25 hours. Comprehensive view of current trends in band/ wind ensemble programs, including nonverbal communication, conducting, and rehearsal techniques. Study of new of recently published literature and discussions of administration of wind/band ensemble programs. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

332. Marching Band in Secondary Education. (2) Lecture, two hours. Study of contemporary marching band curriculum as component of music curriculum in secondary education, including current approaches, practices, and problems associated with marching bands, as well as historical perspective. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

401. New Music Forum. (2) Lecture/laboratory, two hours. Course designed for students in study abroad program in music at UCLA. Interactive course in preparation and performance of premiere work especially composed for graduate performer or performers by graduate composers. Letter grading.

450. Keyboard Skills for Pianists. (2) Activity, two hours; outside study, four hours. Applied music course with focus on necessary skills for piano performance. Areas include sight reading, score reading, transposition, figured bass, harmonization, improvisation, score reduction, and ensemble issues. Concurrently scheduled with course C150. Letter grading.

455. Instrumental and Piano Duo Repertoire. (2) Activity, two hours; outside study, four hours. Performance-based course that develops repertoire and experience in collaborative performance for pianists and instrumentalists. Activities include music preparation, weekly rehearsals, regular coaching, and performance for concerts. Offered in summer only. S/U or letter grading.

455A. Vocal Repertoire Interpretation. (2) Activity, two hours; outside study, four hours. Performance-based course that develops repertoire and experience in collaborative performance for pianists and instrumentalists. Activities include music preparation, weekly rehearsals, regular coaching, and performance for concerts. Offered in summer only. S/U or letter grading.

455B. Vocal Repertoire Interpretation. (2) Activity, two hours; outside study, four hours. Performance-based course that develops repertoire and experience in collaborative performance for pianists and instrumentalists. Activities include music preparation, weekly rehearsals, regular coaching, and performance for concerts. Offered in summer only. S/U or letter grading.

469. Instrumental Pedagogy. (4) Lecture, three hours; outside study and preparation, nine hours. Preparation: advanced proficiency on one musical instrument. Designed for graduate music students. Study of art of teaching musical instruments, including discussions of philosophy of teaching, learning process itself, and teaching of musical interpretation. Individualized study of various considerations, such as physical/technical aspects and pedagogical repertoire, peculiar to teaching student's primary instrument. Letter grading.

470. Opera Studio for Graduate Students. (4) Laboretory, six hours. Designed for graduate students. Performance techniques and repertoire for graduate students in opera. S/U or letter grading.

471. Vocal Pedagogy. (4) Lecture, three hours; discussion, one hour. Preparation: advanced proficiency in voice for graduate music students. Study of teaching techniques for voice, including thorough investigation of vocal mechanism and its use, plus study of noted teachers of past and present. Further emphasis on practical teaching experience in class. Letter grading.

472. Master Class in Opera. (6) Studio, three hours; outside study, 15 hours. Limited to graduate performance students. Intensive study and preparation of opera literature. May be repeated for credit. S/U or letter grading.

475. Master Class in Conducting. (6) Studio, three hours; outside study, 15 hours. Limited to graduate performance students. Intensive study and preparation of musical literature in specialized field of conducting. May be repeated for credit. S/U or letter grading.

C477. Gluck Chamber Ensembles. (2) Studio, two hours. Preparation: audition. Advanced chamber ensemble who, after rehearsing and being coached on core amount of repertoire, play in outreach settings around Los Angeles community. May be repeated for credit without limitation. Concurrently scheduled with course C177. S/U grading.

C480. UCLA Chorale. (2) Activity, four hours. Preparation: audition. Designed for M.M. and D.M.A. students. Select mixed ensemble of 50 to 60 voices performing choral music appropriate for concert choral ensemble, with emphasis on music after 1700. May be repeated for credit without limitation. May be concurrently scheduled with course C90A. Letter grading.

C481. Symphony Orchestra. (2) Activity, four hours. Preparation: audition. Group performance of symphonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C90E. Letter grading.

C484. Piano/Keyboard Accompanying. (2) Activity, four hours. Outside study, two hours. Collaboration with large ensembles, instrumentalists, and/or vocalists in role of accompanists. Performance includes, but is not limited to, lessons, rehearsals, special studio performance, master classes, concerts, auditions, juries, and recitals. May be repeated for credit without limitation. Concurrently scheduled with course C90Q. Letter grading.

C485. Chamber Ensembles. (2) Activity, two hours. Preparation: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to ensembles. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be concurrently scheduled with course C175. Letter grading.

495. Introductory Practicum for Teaching Apprentices in Music. (2) Eight-week two-hour seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Music Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

496. Technology Seminar. (2) Seminar, two hours; laboratory, one hour; outside study, three hours. Introduction to departmental and campuswide technology resources, exploration of applications of technology in education, and development of means of using technology to assess and document teaching competence. S/U grading.

596A. Directed Individual Studies in Orchestration and Composition. (2, 4, or 6) Tutorial, to be arranged. Only 4 units may be applied toward M.A. or M.M. degree requirements. May be repeated for credit. S/U or letter grading.

596C. Directed Individual Studies in Music Education. (2, 4, or 6) Tutorial, to be arranged. Only 4 units may be applied toward M.A. or M.M. degree requirements. May be repeated for credit. S/U or letter grading.

596D. Directed Individual Studies in Performance Practices. (2 to 12) Tutorial, to be arranged. Only 4 units may be applied toward M.A. or M.M. degree requirements. May be repeated for credit. S/U or letter grading.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations. (2 or 4) Tutorial, to be arranged. S/U grading.

598. Guidance of M.A. Thesis. (4, 8, or 12) Tutorial, to be arranged. Only 4 units may be applied toward degree requirements. May be repeated for credit. S/U grading.

599. Guidance of Ph.D. or D.M.A. Dissertation. (4, 8, or 12) Tutorial, to be arranged. May be repeated for credit. S/U grading.

---

**Scope and Objectives**

The Department of Musicology provides students with a broad understanding of the history and culture of music. Courses cover virtually every period, style, and genre, including jazz and other popular musics. The department is aligned with the Departments of Ethnomusicology and Music and aspires to promote productive collaboration between performance and scholarship, a cross-cultural global understanding of the art of music, and preparatory training for a broad range of careers in music after students graduate.

Music history appeals to undergraduate students with musical backgrounds whose interests and principal career goals lie in areas other than professional performance. The undergraduate program prepares students for graduate programs in music and related fields and offers training within the broader context of the humanities.

The graduate program offers courses leading to the M.A. and Ph.D. degrees. It is designed to equip students to pursue careers not only in teaching but also in other areas that require bibliographical skills and training in research methodologies. The department provides teaching and research assistantships each year for qualified students.

**Undergraduate Study**

The Music History major is a designated capstone major. Undergraduate students who are not pursuing departmental honors must complete a senior thesis that demonstrates the skills and expertise they have acquired in earlier coursework. Students are expected to conceive and execute a project that identifies and engages with a problem within a specialized topic, identify and analyze appropriate primary sources and musical scores, and have a working knowledge of scholarly discourse relative to a specialized topic. Students present their work to other students and discuss and critique the work of their peers.

Music History B.A.

Capstone Major

Admission
The Music History program assumes that students have some musical background before entering UCLA. Although auditions are not required, prospective majors should be sufficiently competent on an instrument or in voice to participate in a performance group, as required by the program.

Preparation for the Major
Required: Music History M10A, M10B, M10C, 12W, and 6 units (three terms) of performance organizations selected from Ethnomusicology 91A through 91Z, Music 90A through 90M, Music History 28A through 28C, or CM90T. Enrollment in Music History M10A, M10B, and M10C requires taking the Music Theory Placement Examination administered by the Music Department.

Transfer Students
Transfer applicants to the Music History major with 90 or more units must complete one year of music theory prior to admission to UCLA. Experience in music performance is strongly recommended. Transfer students are required to take Music History 12W at UCLA.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Music History 125A through 125F, 187; one course from 160 through 185 or from 191A through 191G or 191P; one additional 4- to 5-unit upper division elective course in ethnomusicology, music, or music history (enrollment may be limited; check with the department or instructor); and one capstone research colloquium (course 190) and one capstone seminar (course 191T). Students may enroll in lessons from the Music Department, if instructors are available.

Each course toward the major must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable).

Honors Program
The honors program is designed for Music History majors who wish to carry out an extended independent research project that culminates in a departmental honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All junior and senior Music History majors who have completed a minimum of four upper division music history courses with a departmental grade-point average of 3.7 or better and an overall GPA of 3.0 or better are eligible to apply. Normally, the thesis must be completed during Fall Quarter of the senior year.

To qualify for graduation with departmental honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.7 or better in upper division courses in the department and an overall GPA of 3.0 or better, and (3) complete at least one quarter of Music History 198 (2 units) with a grade of A– or better on the resulting thesis.

To qualify for graduation with departmental highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.9 or better in upper division courses in the department and an overall GPA of 3.65 or better, and (3) complete at least one quarter of Music History 198 (2 units) with a grade of A or better on the resulting thesis.

Music History Minor
The Music History minor provides undergraduates with an overview of music history and the study of music. Students may select from a wide variety of undergraduate courses that range through the history of European and American music.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition with the department in 2443 Schoenberg Music Building. For further information, contact the department at (310) 206-5187.

Required Lower Division Courses (10 units):
Two music history courses with grades of C or better.

Required Upper Division Courses (21 to 25 units):
One course from Music History 160 through 185, one additional upper division music history course, and three additional upper division ethnomusicology, music, or music history courses (minimum 12 units). Enrollment in some courses may be limited; check with the department or instructor.

No more than two courses may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasal/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Musicology offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Musicology.

Music History Lower Division Courses

2. Introduction to Classical Music. (5) Lecture, four hours; discussion, one hour. Survey of music of Western classical tradition, with emphasis on historical context, musical meanings, and creation of tradition itself. P/NP or letter grading.

3. History of Rock and Roll. (5) Lecture, four hours; discussion, one hour. Analysis of forms, practices, and meanings of rock and roll music, broadly conceived, from its origin to present. Emphasis on how this music has reflected and influenced changes in sexual, racial, and class identities and attitudes. Letter grading.

4. Film and Music. (5) Lecture, four hours; film viewing, two hours. History of music and cinema, particularly ways music is used to produce meaning in conjunction with visual image. P/NP or letter grading.

5. History of Electronic Dance Music. (5) Lecture, four hours; discussion, one hour. Survey of groove-based electrified dance music from its origins in 1960s’ pop and soul to present, covering disco, house, techno, ambient, rave, and jungle; the development of technology, musical structures, psychoactive drugs, and club cultures to induce altered states of musical consciousness; promise (versus reality of) political and spiritual transformation; electronic dance music as new art music. P/NP or letter grading.

6. American Popular Song. (4) Lecture, four hours. American popular music before advent of rock and roll in 1950s, with special emphasis on song tradition of Tin Pan Alley. P/NP or letter grading.

M10A-M10B-M10C. Introduction to Music History: Culture, Creativity. (5-5-5) ( Formerly numbered 10A-10B-10C.) (Same as Ethnomusicology M7A-M7B-M7C and Music M10A-M10B-M10C.) Lecture, four hours; laboratory, three hours. Preparation: placement examination. Course M10A is enforced requisite to M10B, which is enforced requisite to M10C. Students must receive grade of C or better to proceed to or complete course in sequence. Introduction to study of music from three complimentary perspectives: its history, relation to culture, and creative structuring. Lectures from musicologists, ethnomusicologists, and composers. Offered with small sections in which students develop wide range of musicianship skills. Organized around broad ideas (performance, simultaneity, time, place, and form) where creative and cultural implications are explored through analysis and discussion of broad repertoire of musical works spanning historical eras and global cultures. Compositional exercises, production of short compositions, and short papers dealing with historical and cultural issues are required. Letter grading.

12W. Writing about Music. (5) Lecture, four hours; laboratory, one hour. Enrolled to request: English Composition 3 or 3H or English as a Second Language 36. Emphasis on learning specific skills, incorporating technical description, historical contextualization, subjective reaction, and certain stylistic conventions necessary in writing about music. Satisfies Writing II requirement. Letter grading.

60. American Musical. (5) Lecture, four hours; discussion, 90 minutes. Survey of American musical in 20th century, beginning with its roots in operetta, vaudeville, and Gilbert and Sullivan, and focusing on its connections to politics, technology, film, opera, and variety of popular musical styles, including Tin Pan Alley, jazz, and rock. P/NP or letter grading.
Upper Division Courses

125A-125F. Music, History, and Culture. (5 each) (Formerly numbered 246B-262C and 125A-125F.) Lecture, four hours; discussion, one hour. Course 125A is requisite to 125B, which is requisite to 125C; course 125D is requisite to 125E, which is requisite to 125F. Course 125A may be repeated for credit. May be repeated for credit with topic and instructor change. Letter grading.

164. Selected Topics in African American Popular Music of 1960s, including Civil Rights Movement, counterculture, black nationalism, capitalism, and separatism, and larger dimensions of African American experience as mediated through groove-based music. P/NP or letter grading.

160. Selected Topics in American Musical. (5) Seminar, two hours. Enforced corequisite: attendance, but not enrollment, in course 66 lecture. Exploration of ways in which specific approaches and attitudes to past shape music history, composition, and performance, with special focus on folk music and early music revivals. Letter grading.

168. 1968. (5) Seminar, two hours. Enforced corequisite: attendance, but not enrollment, in course 66 lecture. Exploration of central themes and events of 1968 as they crystallize or are brought out by events of 1968 to understand 1968 not as one iconic year, but rather to use it as lens for observing cultures of music and music-making in 1960s. Letter grading.

173. Malaysian, Gay, Bisexual, Transgender, and Queer Perspectives in Pop Music. (5) Same as Lesbian, Gay, Bisexual, and Transgender Studies M135B. Lecture, four hours; discussion, one hour. Analysis of gender ideologies in several musical cultures; representations of gender, body, and sexuality by both male and female musicians; contributions of women to Western art and popular musics; methods in feminist and gay/lesbian theory and criticism. Letter grading.

140. Music, Media, and Consumer Society. (4) Lecture, four hours. Consideration of impact of recording technologies (gramophone, tape recorder, Walkman, sampler, broadcast media, radio, television, MTV, Internet), and global capitalism (record labels, advertising, Muzak) on way we consume and are consumed by music. How music functions and malfunctions on representation of everyday life. Letter grading.

152. Selected Topics in Music of Mozart. (5) Seminar, two hours. Preparation: ability to read music and engage in melodic, harmonic, and formal analysis. Enforced corequisite: attendance, but not enrollment, in course 62 lecture. Limited to Music History majors and minors. Intensive discussion of selected pieces by Mozart and of certain topics important to fuller understanding of his contributions to musical culture of Enlightenment, as well as contemporary culture. Letter grading.

136. Music and Gender. (5) Same as Women's Studies M136. Lecture, four hours; discussion, one hour. Analysis of gender ideologies in several musical cultures; representations of gender, body, and sexuality by both male and female musicians; contributions of women to Western art and popular musics; methods in feminist and gay/lesbian theory and criticism. Letter grading.

135C. History of Opera. (5) Lecture, four hours; discussion, one hour. In-depth look at specific works of Ludwig van Beethoven's music in greater depth. Letter grading.

135A. Baroque and Classical Periods; 135B. Romantic Period; 135C. 20th Century.

156. Musicology / 481 CM186. Music Industry. (4) (Same as Ethnomusicology CM182 and Music CM182.) Lecture, four hours; discussion, one hour; outside study, seven hours. Limited to Ethnomusicology, Music, and Music History majors. Examination of influence of music industry on way music is created, performed, listened to, and used today. Historical approach taken, beginning with early music publishing and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM181.

187. Precapstone Course for Music History Majors. (2) Seminar, two hours. Limited to Music History majors. Student preparation for completing capstone course during Fall Quarter of senior year. Topics in methodology, methods of research in music in culture, critical evaluation and use of scholarly resources, development of bibliographies, formulation of theses, and writing about music. Taken in Spring Quarter of junior year. P/NP grading.

188. Special Courses in Music History. (4) Lecture, four hours. Special topics in music history for undergraduate students taught on temporary basis. Consult Schedule of Classes for topics and instructors. May be repeated for credit. P/NP or letter grading.

190. Research Colloquia in Music History. (1) Seminar, one hour. Designed for senior Music History majors. Designed to bring together students undertaking supervised tutorial research. Students may work with one or more faculty members to share their work with their peers, as well as act as interlocutors for other course members. Students expected to present their work and to discuss and defend it at oral examination by others at similar stage of development. P/NP grading.

191A-191G. Junior Variable Topics Research Seminars: History of Music. (4 each) Seminar, three hours. Designed for junior Music History majors. Special aspects of music of each period studied in depth. Reading, discussion, and development of culminating project. May be repeated for credit. Letter grading.

191A. Middle Ages; 191B. Renaissance; 191C. Baroque; 191D. Classic; 191E. Romantic; 191F. 20th Century Records, Stax, and other rhythm and blues, funk, and soul music centers of production. Relationships between musical forms and cultural issues of 1960s, including Civil Rights Movement, counterculture, black nationalism, capitalism, and separatism, and larger dimensions of African American experience as mediated through groove-based music. P/NP or letter grading.
Musicology

Graduate Courses

200A. Introduction to Music Scholarship. (6) Seminar, three hours. Designed for graduate musicology, ethnomusicology, and music students. Introduction to history of different fields of music scholarship (with strong focus on musicology) and to selected debates in those fields. Practical tools for research, logic and structure of arguments, critical thinking and critique, historiography, rhetoric and voice, and archival and ethnographic research. Introduction to practical written forms such as abstract, grant proposal, paper/book proposal, and review. Letter grading.

200B. Critical, Cultural, and Social Theory. (6) Seminar, three hours. Designed for graduate musicology, ethnomusicology, and music students. Introduction to issues surrounding music as social, cultural, and historical practice, with strong emphasis on critical, cultural, and social theory. May include introduction to sociological, materialist, cultural, postcolonial, poststructural, gender, race, and sexuality studies, and Eastern and Western music students. S/U grading.

200C. Music Aesthetics, Analysis, and Philosophy. (6) Seminar, three hours. Designed for graduate musicology, ethnomusicology, and music students. Exploration of selected philosophical, aesthetic, and/or analytical perspectives on music to gain insight into selected historical and philosophical approaches to phenomena of music and to acquire skills in analyzing and interpreting a variety of repertoires. Letter grading.

221. Seminar: Analytical/Repertoire Topics. (4) Seminar, three hours. Required or corequisite: course 200A. Specific topics vary from year to year. May not be applied toward M.A. or Ph.D. degree requirements. May be repeated for credit. S/U grading.

245. Seminar: Historical Topics. (4) Seminar, three hours. Required for graduate musicology students. Coverage of analytical topics that vary from year to year. May be repeated for credit. Meets with course 246; concurrent enrollment in both courses not allowed. Letter grading.

246. Seminar: Analytical/Repertoire Topics. (4) Seminar, three hours. Required or corequisite: course 200A. Specific topics vary from year to year. May not be applied toward M.A. or Ph.D. degree requirements. May be repeated for credit. Meets with course 245; concurrent enrollment in both courses not allowed. S/U grading.

250. Seminar: Theoretical Topics. (4) Seminar, three hours. Designed for graduate musicology students. Coverage of theoretical topics that vary from year to year. May be repeated for credit. Meets with course 251; concurrent enrollment in both courses not allowed. Letter grading.

251. Seminar: Theoretical Topics. (4) Seminar, three hours. Required or corequisite: course 200A. Specific topics vary from year to year. May not be applied toward M.A. or Ph.D. degree requirements. May be repeated for credit. Meets with course 250; concurrent enrollment in both courses not allowed. S/U grading.

256. Seminar: Historical Topics. (4) Formerly numbered 260. Seminar, three hours. Designed for graduate musicology students. Coverage of historical topics that vary from year to year. May be repeated for credit. Meets with course 256; concurrent enrollment in both courses not allowed. Letter grading.

261. Topics in Performance Practice. (4) Formerly numbered 261F. Seminar, three hours. Designed for graduate students. Investigation of primary source readings in performance practices across history of Western music; analytical reports and practical applications in class demonstrations. May be repeated for credit. Letter grading.

265. Seminar: Topics in Musicology. (6) Seminar, three hours. Designed for graduate students. Specific topics vary from term to term. May be repeated for credit. Letter grading.

M288. Music Industry. (4) Same as Ethnomusicology CM288 and Music CM282. Lecture, four hours; discussion, one hour; outside study, seven hours. Limited to Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course CM186. Letter grading.

296. Research Topics in Musicology. (2 to 4) Seminar, two to four hours. Preparation: consultation with instructor. Designed for graduate musicology students. Advanced study and analysis of current topics in musicology. Discussion of current research and literature in relevant specialty of musicology. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, one hour. Preparation: application and approval of credit. Teaching apprentice in Music or Musicology Department. Limited to graduate students. May be repeated for credit. S/U grading.

C490T. Early Music Ensemble. (4) Activity, four hours. Preparation: audition. Group performance of Western vocal and instrumental music from historical periods prior to 1800. Early instruments may be used at instructor’s discretion. May be repeated for credit without limitation. May be concurrently scheduled with Music History CM186 and S/U grading.

495. Introductory Practicum for Teaching Apprentices in Musicology. (2) Eight weekly two-hour seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Music or Musicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

596. Directed Individual Studies in Musicology. (2, 4, or 6) Tutorial, to be arranged. Limited to graduate students. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 or 4) Tutorial, to be arranged. Preparation: completion of all M.A. or Ph.D. course and language requirements. Limited to graduate students. S/U grading.

Guizel Kuruglo, Ph.D.
Abeer Mohamed, Ph.D.
Jeremy D. Smoak, Ph.D.

Adjunct Assistant Professors
Hans Barnard, M.D., Ph.D.
David G. Hirsch, M.A.

Scope and Objectives
The mission of the Department of Near Eastern Languages and Cultures is the discovery, interpretation, dissemination, and preservation of human values created over a period of five or more thousand years in an area that was the cradle of all civilization.

The department offers instruction in the major modern and ancient languages of the Near East: Akkadian, ancient Egyptian, Arabic, Armenian, Berber, Coptic, Hebrew, Persian, and Turkic. To meet increasing demands for a knowledge of this area and its past and present, it treats each language in a wide perspective — as a means of communication, as a vehicle of a cultural heritage, as a research tool for the area, and as an object of research itself.

Undergraduate majors may be taken in Ancient Near Eastern Civilizations, Arabic, Hebrew, Iranian Studies, and Jewish Studies. M.A. and Ph.D. programs are offered in Ancient Near Eastern Civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, and Turkic.

Courses in the department prepare students for careers in government, foreign trade, teaching abroad, journalism abroad, archaeology, and further academic work involving the area.

Undergraduate Study
The department offers the Bachelor of Arts degree in five fields: (1) Ancient Near Eastern Civilizations, (2) Arabic, (3) Hebrew, (4) Iranian Studies, and (5) Jewish Studies. In each of these fields students must meet the requisites and take the courses prescribed. Their adviser assists in selecting a plan of study developed around their interests.

Students may combine their major with one in another department (double major) to enhance their educational opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career and in consultation with program advisers in both majors.

Ancient Near Eastern Civilizations B.A.
There are four options for a major in Ancient Near Eastern Civilizations: (1) Mesopotamia, (2) Egypt, (3) Near Eastern archaeology and cultures, and (4) biblical studies.

Preparation for the Major
Requisite for all options: Near Eastern Languages M20 or 50A; requisites for options 1, 2, and 3: German 1, 2, 3 (French 1, 2, 3 may be substituted); requisites for option 4: Hebrew 1A, 1B, 1C. Majors in all four fields are encouraged to continue their language study beyond the requisite levels.

Transfer Students
Transfer applicants to the Ancient Near Eastern Civilizations major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one civilization course for all options, one year of German or French for the options in Mesopotamia, Egypt, and Near Eastern archaeology and cultures, and one year of Hebrew for the biblical studies option.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Majors in all four options are required to take 14 upper division courses selected in consultation with the program adviser.

Majors selecting option 1 (Mesopotamia) are required to take 14 courses as follows: four language courses (Semitics 140A, 140B, 141, 142) and two literature and history courses selected from Ancient Near East M104A, 150A, M185D. The remaining eight courses are to be selected from (in Ancient Near East M103A, M103B, M104B, M104C, M104D, 130, 140A, 140B, 140C, 145, 150B, 150C, 160, 161, 162, 163, 170, Iranian 169, Jewish Studies M150A. One course must be in research methodology (such as Anthropology 111, C115R, 130, M140, 141, 150, 156, Archaeology C159, Comparative Literature 100, English 111A, 140A, or Linguistics 110) taken preferably in another department with consent of the adviser.

Majors selecting option 2 (Egypt) are required to take 14 courses as follows: four language courses (Ancient Near East M120A, 120B, 121A, 121B) and three literature and history courses (Ancient Near East M103A, M103B, 150B). The remaining seven courses are to be selected from Ancient Near East CM101A, CM101B, M104A, M104B, M104C, M104D, 121B, 121C, 123A, 123B, 124, 130, 150A, 150B, 150C, 160, 161, 162, 163, C165, 170, Iranian 169, Jewish Studies M150A, M182A. One course must be in research methodology (such as Anthropology 111, C115R, 130, M140, 141, 150, 156, Archaeology C159, Comparative Literature 100, English 112A, 120A, or Linguistics 110) taken preferably in another department with consent of the adviser.

Majors selecting option 3 (Near Eastern archaeology and cultures) are required to take 14 courses as follows: three upper division courses in any Near Eastern language (Akkadian, Arabic, Egyptian, Hebrew) and two courses in research methodology (such as Anthropology 111, C115R, 130, M140, 141, 150, 156, Archaeology C159, Comparative Literature 100, English 112A, 120A, or Linguistics 110) taken preferably in another department with consent of the adviser.

Majors selecting option 4 (biblical studies) are required to take 14 courses as follows: four language courses (English 111B, Jewish Studies M150A, M182A). The remaining seven courses are to be selected from Ancient Near East M103A, M103B, M104A, M104B, M104C, M104D, 130, 150A, 150B, 160, 161, 162, 163, C165, 170, English 111A, 111C, Greek 130, Hebrew 125, 130, 135, History 186A, 186B, 186C, Jewish Studies 150B, 170, 177, Latin 120, Semitics 130.

Study Abroad
Students are encouraged to spend time abroad either to (1) study with an education abroad program or (2) work on a UCLA-affiliated archeological excavation in the broader Middle East. For information on studying abroad, con-
tact the Education Abroad Program, B300 Murphy Hall, (310) 825-4995; for UCLA-affiliated excavations, contact the departmental academic counselor at (310) 825-4165.

### Arabic B.A.

#### Preparation for the Major

**Required:** Arabic 1A, 1B, 1C.

**Transfer Students**

Transfer applicants to the Arabic major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Arabic.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

#### The Major

**Required:** Fourteen courses, including seven from Arabic 102A, 102B, 102C, 103A, 103B, 103C, 120, 130, 132, C141, 142, 181; three literature and culture courses from Arabic M110, 150, M151, Comparative Literature 100; Islamic 110, 130, 151; and two history courses from History 105A, 105B, 105C, 106A, 106B, 111A, 111B, 111C, 200J. The remaining two courses may be selected from Anthropology M171P, 271, Arabic 111A, 111B, 111C, 112A, 112B, 112C, Art History 104A, 104B, C104C, 213, C214, Geography 187, History 105A, 105B, 105C, 106A, 106B, 111A, 111B, 111C, 200J, Near Eastern Languages 200, 201, Political Science 132A, M132B, 157, 165, 245, Women’s Studies 285. No more than two of the 14 courses may be credited through a proficiency test administered by the department. Other courses, including extra-departmental courses, may be applied with consent of the adviser.

#### Hebrew B.A.

**Preparation for the Major**

**Required:** Hebrew 1A, 1B, 1C, or equivalent.

**Transfer Students**

Transfer applicants to the Hebrew major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Hebrew.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

#### The Major

**Required:** Fourteen courses, including at least two from Hebrew 103A, 103B, 103C, M110A, M110B, M110C, 120, 140, 141, 142, 161A, 161B, 161C, 170, 178, and at least five courses from Ancient Near East 150A, 150B, 163, Ancient Hebrew 1A, 1B, 1C, Art History 104A, 104B, C104C, Ethnomusicology 20B, History 105A, 105B, 105C, 110D, Iranian 104, 120, 181A, 181B, 187, 197, 199, M210, 220A, 220B, 221, 231A, 231B, 231C, 250, 251, Political Science 157. The remaining three courses may be selected from any of the above. No more than two of the 14 courses may be credited through a proficiency test administered by the department. A maximum of two Iranian 197 or 199 courses (8 units total) may be applied toward the major.

#### Iranian Studies B.A.

Students majoring in Iranian Studies may combine the major with specialization in other fields to enhance their career opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career.

**Preparation for the Major**

**Required:** Iranian 1A, 1B, 1C, or equivalent.

**Transfer Students**

Transfer applicants to the Iranian Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Persian.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

#### The Major

**Required:** Fourteen courses, including at least two from Iranian 102A, 102B, 102C, 103A, 103B, 103C, M110A, M110B, M110C, 120, 140, 141, 142, 161A, 161B, 161C, 170, 178, and at least five courses from Ancient Near East 150A, 150B, 163, Ancient Iranian 1A, 1B, 1C, Art History 104A, 104B, C104C, Ethnomusicology 20B, History 105A, 105B, 105C, 110D, Iranian 104, 120, 181A, 181B, 187, 197, 199, M210, 220A, 220B, 221, 231A, 231B, 231C, 250, 251, Political Science 157. The remaining three courses may be selected from any of the above. No more than two of the 14 courses may be credited through a proficiency test administered by the department. A maximum of two Iranian 197 or 199 courses (8 units total) may be applied toward the major.

#### Jewish Studies B.A.

Students must select one of five tracks: (1) Jewish history, (2) Jewish religions, (3) Jewish literature and culture, (4) American Jewish literature and culture, or (5) Israeli studies.

**Preparation for the Major**

**Required:** Jewish Studies 10.

**Transfer Students**

Transfer applicants to the Jewish Studies major with 90 or more units must complete the following introductory course prior to admission to UCLA: one social, cultural, and religious institution of Judaism course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

#### The Major

Students are required to complete Sociology 159 and four of the following courses, in addition to the core courses for the major: English 103, 111A, 111C, 183C, 183D, 197, Jewish Studies 135, 143, 150A, 150B, 151A, 151B, 155, 170, 177, 187, 197, 199. For the American Jewish studies track, students are required to complete Sociology 159 and four of the following courses, in addition to the core courses for the major: English 103, 183C, 197, Jewish Studies 135, 143, 150A, 150B, 151A, 151B, 155, 170, 177, 187, 197, 199.

For the American Jewish studies track, students are required to complete Sociology 159 and four of the following courses, in addition to the core courses for the major: English 103, 183C, 197, Jewish Studies 135, 143, 150A, 150B, 151A, 151B, 155, 170, 177, 187, 197, 199.

#### Study in Israel

Students are encouraged to spend up to one year in Israel either to (1) study with an education abroad program or (2) study at an Israeli university. For information on studying in Israel, contact the Education Abroad Program, B300 Murphy Hall, (310) 825-4889.
Arabic and Islamic Studies Minor

The Arabic and Islamic Studies minor is designed for students who wish to augment their major program with a group of related courses that provide a systematic introduction to the study of Arabic language and literature and Islam.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed Arabic 1A, 1B, 1C, or the equivalent as determined by the department and file a petition in 378 Humanities Building, (310) 825-4165.

Required Upper Division Courses (28 units):

- Seven courses in Arabic or Islamics; 199 courses may not be applied. With consent of the undergraduate adviser, two of the seven courses may be taken outside the department. Courses recommended as electives for the major in Arabic (Anthropology M171P, 271, Art History 104A, 104B, C104, 213, C214, Comparative Literature 107), Geography 187, History 105A, 105B, 105C, 106A, 106B, 108B, 111A, 111B, 111C, 200J, Islamics 110, 130, Near Eastern Languages 200, 201, Political Science 132A, M132B, 157, 165, 245, Women's Studies 285 may be applied. Other courses, including extra-departmental courses, may be applied with consent of the adviser.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Armenian Studies Minor

The Armenian Studies minor is designed for students who wish to augment their major program with a group of courses that provide a systematic introduction to the study of Armenian culture.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed Armenian 101A, 101B, 101C, or the equivalent as determined by the department, and file a petition in 378 Humanities Building, (310) 825-4165.

Required Upper Division Courses (28 units):

- Seven courses from the Armenian section of the department; 199 courses may not be applied. At least one course from each of the three disciplines of language, literature, and history must be selected. Eligible language courses begin in the fourth quarter of study (i.e., course 102A for Western Armenian, course 105A for Eastern Armenian). With consent of the undergraduate adviser, two of the seven courses may be taken outside the department. Ordinarily, the following courses may be applied: History 107A through 107E, 200S, 201S, 211A, 211B, 212, Indo-European Studies M150.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Hebrew and Jewish Studies Minor

To enter the Hebrew and Jewish Studies minor, students must have an overall grade-point average of 2.0 or better, have completed Hebrew 1A, 1B, 1C, or the equivalent as determined by the department, and file a petition in 378 Humanities Building, (310) 825-4165.

Required Upper Division Courses (28 units):

- Seven courses from the Hebrew or Jewish studies section of the department; 199 courses may not be applied. With consent of the undergraduate adviser and based on course content, two of the seven courses may be taken outside the department.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Near Eastern Languages and Cultures Minor

The Near Eastern Languages and Cultures minor is designed for students who wish to augment their major program in the College of Letters and Science with a group of related courses from various linguistic, literary, archaeological, and historical disciplines of the Near East, from ancient Egypt, Mesopotamia, and biblical studies to the modern Arabic, Armenian, Iranian, Jewish, and Turkish world.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in 378 Humanities Building, (310) 825-4165.

Required Upper Division Courses (28 units):

- Seven courses selected in consultation with an academic adviser from any of the courses offered by the department; 199 courses may not be applied. With consent of the undergraduate adviser, two of the seven courses may be taken outside the department, provided the content of the courses bears a direct relation to the culture of the Near East.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Near Eastern Languages and Cultures offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Near Eastern Languages and Cultures.

Ancient Near East

(Akkadian, Aramaic, Phoenician, and Ugaritic are listed under Semitics.)

Lower Division Course

10W. Jerusalem: Holy City. (5) Lecture; three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Survey of religious, political, and cultural history of Jerusalem over three millennia as symbolic focus of three faiths: Judaism, Christianity, and Islam. Transformation of sacred space as reflected by literary and archaeological evidence through examination of testimony of artifacts, architecture, and iconography in relation to written word. Study of creation of mythic Jerusalem through event and experience. Satisfies Writing II requirement. Letter grading.

Upper Division Courses

CM101A. Art and Architecture of Ancient Egypt, Predynastic Period to New Kingdom. (Formerly numbered M101A.) (Same as Art History M101A.) Lecture, three hours. Study of architecture, sculpture, painting, and minor arts during Predynastic period and Old Kingdom. May be repeated for credit with consent of instructor. Concurrently scheduled with course C267A. P/NP or letter grading.

CM101B. Art and Architecture of Ancient Egypt, New Kingdom to Greco-Roman Period. (4) (Formerly numbered Near Eastern Languages M101B.) (Same as Art History M101B.) Lecture, three hours. Study of architecture, sculpture, painting, and minor arts from New Kingdom to Greco-Roman period. Concurrently scheduled with course C267B. P/NP or letter grading.

M101C. Ancient Egyptian Temple and City of Thebes. (4) (Same as Art History M101C.) Lecture, four hours; fieldwork, one hour. Focus on ancient temples of city of Thebes (modern day Luxor). Theban temples are some of best-preserved cult buildings in all of Egypt, and their study illuminates traditions of artistic representation, architectural development, and social and political transformations echoed throughout all of ancient Egypt. Investigation of ritual linking of temples on Nile's eastern and western banks through festival processions, chronological changes in function and form of Theban temples through time, and statuary program of individual temples. P/NP or letter grading.

M103A-M103B. Ancient Egyptian Civilization. (4-4) (Same as History M103A-M103B.) Lecture, three hours; discussion, one hour (when scheduled). Course M103A is not requisite to M103B. Designated for juniors/seniors. Political and cultural institutions of ancient Egypt and ideas on which they were based. P/NP or letter grading. M103A. Chronological discussion of Prehistory, Old and Middle Kingdom. M103B. New Kingdom and Late period until 332 B.C.

M104A. History of Ancient Mesopotamia and Syria. (4) (Formerly numbered M104.) (Same as History M104A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Political and cultural development of Fertile Crescent, including Palestine, from Late Uruk to neo-Babylonian period. P/NP or letter grading.

M104B. Sumerians. (4) (Formerly numbered M104B.) (Same as History M104B.) Lecture, three hours. Overview of Sumer and related cultures of Greater Mesopotamia in 4th and 3rd millennia B.C.E., with focus on rich cultural history of region and integration of archaeological, art historical, and written records. P/NP or letter grading.

M104C. Babylonians. (4) (Formerly numbered M104B.) (Same as History M104C.) Lecture, three hours. Overview of Babylon and cultural history of region from late 3rd millennium B.C.E. to invasion of Cyrus in 539 B.C.E., with focus on history and archaeology of reformation, urban structure, literature, and legal practices. P/NP or letter grading.
These topics? How does one reason, argue, and solve real-world problems through digital cultural mappings? Designing digital implementation, project management, and student mapping-based research projects. Part of Digital Cultural Mapping Project supported by W.M. Keck Foundation. P/NP or letter grading.

120A-120B-120C. Elementary Ancient Egyptian. (5-5-5) Lecture, five hours. Course 120A is requisite to 120B, which is requisite to 120C. P/NP or letter grading.

120A. Introduction to hieroglyphic script and phonology and morphology of Middle Egyptian. Basic rules of Middle Egyptian syntax, with focus on nominal, adjectival, and adverbial sentences. 120B. Verbal system and syntax of verbal sentences of Middle Egyptian. 120C. Reading of authentic Egyptian texts to deepen knowledge of Egyptian grammar and to acquire familiarity with aims and methods of philology, study of ancient culture.

121A-121B-121C. Intermediate Ancient Egyptian Readings. (5-5-5) Lecture, three hours. Requisite: course 120C. Course 121A is requisite to 121B, which is requisite to 121C. P/NP or letter grading.

124. Middle Egyptian Technical Literature. (4) Lecture, three hours. Requisite: course 121C. Reading of Middle Egyptian technical literature in logographic transcription. Medical, veterinary, mathematical, and astronomical texts included. P/NP or letter grading.

125A. Cultural Digital Mapping Core Course A: Place, Time, and Digital World. (4) Lecture, three hours. Introduction to how emerging digital mapping technologies like geographic information systems (GIS), virtual globes, and three-dimensional modeling are being utilized as new means of inquiry in the social sciences. Provides students with critical apparatus needed to effectively, responsibly, and heuristically use technology in digital cultural mapping projects. Analysis of different forms of works as well as students’ own research presentation through mapping, reasoning, and argumentation to learn to critically assess map-basedpresentations. Tracing of history of mappings and spatial representation of place to learn how mapping has always been connected with societal structures, politics, economics, and culture because maps do not merely represent reality, but also produce reality by structuring world and organizing knowledge about it. Part of Digital Cultural Mapping Project supported by W.M. Keck Foundation. P/NP or letter grading.

125B. Digital Cultural Mapping Core Course B: Google Earth and Information Visualization Superheroes and Timelines. (4) Same as Architecture and Urban Design M125B. Laboratory, three hours; discussion, two hours; enforced requisite: course 125A. Hands-on laboratory-based investigation of emerging digital mapping technologies, including instruction in Web-based mapping applications, virtual globes, and geographic information systems (GIS). Critique and creation of maps of cultural phenomena, applying skills students learned in course 125A to real-world data sets in humanities and social sciences. By mastering mapping technologies in field of digital cultural mapping, students take part in evaluation and production of sophisticated visual representations of complex data, becoming active participants in development of field. Students learn to use suite of GIS and georeography tools. Fostering of creative approaches to and engagement with mapping technologies: What new questions can be asked and answered using these technologies? How does one reason, argue, and solve real-world problems through digital cultural mappings? Designing digital implementation, project management, and student mapping-based research projects. Part of Digital Cultural Mapping Project supported by W.M. Keck Foundation. P/NP or letter grading.

125C. Digital Cultural Mapping Core Course C: Summer Residential Program in Urban Design (M125C). Laboratory, three hours; fieldwork, one hour. Enforced requisite: course M125B or Architecture and Urban Design M125B. Participation in collaborative geographic information systems (GIS) research project in humanities or social sciences using skills learned in courses 125A and M125B. Gathering and input of datasets from real-world sources, creating virtual representations of data through production of digital maps, and performing analysis of larger dataset to answer specific research questions. Final oral presentation required that details student work and provides critical analysis of source material and technological/methodological issues inherent to type of GIS used for investigation. Part of Digital Cultural Mapping Project supported by W.M. Keck Foundation. Offered in summer only. P/NP or letter grading.

130. Ancient Egyptian Religion. (5) Lecture, three hours; discussion, one hour. Introduction to religious beliefs, practices, and customs of ancient Egypt to study Egyptian religion’s role in formation of thought and sphere of action that once served as meaningful and relevant framework for understanding physical reality and human life for inhabitants of Nile Valley. General social and economic conditions as well as religious beliefs. P/NP or letter grading.

135. Religion in Ancient Israel. (4) Lecture, three hours. Introductory survey of various ancient Israelite religious beliefs and practices, their origin, and development, with special attention to diversity of religious practice in ancient Israel. Discussion of Canaan during 1st millennium B.C.E. P/NP or letter grading.

140A-140B-140C. Elementary Sumerian. (4-4-4) Lecture, three hours. Requisites: Semiotics 140A, 140B. Elementary grammar and reading of royal inscriptions, letters, and administrative texts from Uruk III period. P/NP or letter grading.

150A-150B-150C. Survey of Ancient Near Eastern Literatures in English. (4-4-4) Lecture, three hours. Each course may be taken for credit once. P/NP or letter grading. 150A. Mesopotamia: 150B. Egypt. Preparation: familiarity with Egyptian history. Survey of 3,000 years of ancient Egyptian literature. Reading and translation of literary works, study Egypt’s intellectual history and trace transformations in its construction of cultural identity. Topics include invention of writing, autobiography, wisdom texts, narratives, royal inscriptions, and hymns. Discussion of text analysis such as narratology. 150C. Syria and Palestine, Asia Minor, Persia.

162. Archaeology of Ancient Israel. (4) Lecture, three hours. Survey of Bronze and Iron Age archaeology of Canaan and Israel through coming of Alexander the Great, with emphasis on relationships between ancient archaeology and historical texts. P/NP or letter grading.

163. Archaeology of Iran. (4) Lecture, three hours. Designed to introduce students to Iranian archaeology from prehistoric through Achaemenid times. P/NP or letter grading.

165. Egyptian Archaeology. (4) Formerly numbered 165B. Seminar, three hours. Opportunity to re-examine aspects of topics in ancient Egyptian archaeolog-
lect subject, then write research design that could form basis for extensive paper, grant application, or oral exam.

Students work closely with faculty members and report weekly on their progress. Preparation of at least two oral progress-report presentations, one on theoretical framework and one on practical aspects of project, is required. Each student writes research design that includes theoretical and practical aspects of research and formulates bridging arguments required. S/U or letter grading.

M208. Topics in Ancient Iranian History. (Same as History M210 and Iranian M210.) Seminar, three hours. Varying topics on Elamite, Achaemenid, Arsacid, and Sasanian history. May be repeated for credit. S/ U or letter grading.

210. Late Egyptian. (4) Lecture, three hours. Requisites: courses 121A, 121B, 121C. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. May be repeated for credit. S/U or letter grading.

211A-211B. Egyptian Texts of Greco-Roman Period. (4-4) Lecture, three hours. Requisite: course 121C. Introduction to grammar and orthography of hieroglyphic texts from Greco-Roman temples. Texts reading and translation of various textual types. Letter grading.

220. Seminar: Ancient Egypt. (4) Seminar, three hours. May be repeated for credit. S/U or letter grading.

221A-221B. Demotic. (4) Lecture, three hours. Requisite: course 221C. Course 221A is requisite to 221B. Introduction to Demotic grammar and orthography. Reading of texts from various genres. May be repeated for credit with topic change. S/U or letter grading.

230. Seminar: Ancient Syria/Palestine. (4) Seminar, three hours. Examination of selected topics on political, social, and intellectual history of ancient Israel. Exploration of how historical, social, and political contexts shaped and influenced interpretation and use of biblical texts. May be repeated for credit. S/U or letter grading.

240A-240B-240C. Seminars: Sumerian Language and Literature. (4-4-4) Seminar, two hours. Readings of texts from various Sumerian periods and literary genres; selected problems in linguistic or stylistic analysis and literary history. S/U or letter grading.

250S. Seminar: Ancient Mesopotamia. (4) Same as History M207.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit. S/U or letter grading.

250X. Seminar: Ancient Mesopotamia. (1) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. Course for students who participate regularly in class meetings without homework required. In course M250. May be repeated for credit. S/U or letter grading.

260. Seminar: Ancient Near Eastern Archaeology. (2 to 4) Seminar, two hours. May be repeated for credit. S/U or letter grading.

261. Practical Field Archaeology. (2 to 8) Fieldwork, two hours. Participation in archaeological excavations or other archaeological research in Near East under staff supervision. May be repeated for credit. S/U or letter grading.

262. Seminar: Object Archaeology. (4) Seminar, two hours; laboratory, one hour. Selected topics in analysis and interpretation of Near Eastern archaeological finds in museum collections. Students work with objects in Heeremanke Collection of Los Angeles County Museum of Art. S/U or letter grading.

263. Seminar: Egyptian Monuments. (4) Seminar, two hours. Selected monuments and sites in Egypt, including desert sites, wadi cemeteries, and border regions. Architecture and decoration of temples and tombs, statuary and monuments, settlement and use history, text translation of appropriate documents, iconography, monumental inscriptions, or pertinent socioeconomic texts. May be repeated. S/U or letter grading.

264. Egyptian Museum Collections. (4) Seminar, two hours; research group meeting, one hour. Ancient Egyptian museum collections around world, data sets, provenance and dating studies, collection history and agenda, museology, and exhibition history. May be repeated for credit with consent of instructor. S/U or letter grading.

M265. Depositional History and Stratigraphic Analysis. (4) (Same as Archaeology M265.) Lecture, two hours. Theoretical understanding of depositional processes ("form") which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in literature, with specific test cases from actual excavations and site analyses. Coverage of theoretical implications of such disciplines as surveying and pedology, with help of specialists. S/U or letter grading.

266. Egyptian Archaeology. (4) Seminar, three hours. Opportunity to research aspects of ancient Egyptian archaeology. Topics vary each year. May be repeated for credit. Concurrently scheduled with course C165. S/U or letter grading.

C267A. Art and Architecture of Ancient Egypt, Pre -Dynastic Period to New Kingdom. (4) Lecture, three hours. Study of architecture, sculpture, painting, and minor arts during Predynastic period and Old Kingdom. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM101A. S/U or letter grading.

C267B. Art and Architecture of Ancient Egypt, New Kingdom to Greco-Roman Period. (4) Lecture, three hours. Study of architecture, sculpture, painting, and minor arts from New Kingdom to Greco-Roman period. Concurrently scheduled with course CM101B. S/U or letter grading.

C269. Introduction to Archaeological Sciences. (4) (Same as Anthropology CM210Q.) Lecture, three hours. Basic understanding of newly introduced methods and techniques throughout field of archaeology to implement them and to evaluate and analyze results of their use by others who have embedded them in their scholarly publications or theoretical models. Systematic instruction in digital data management and mining, theoretical analysis of materials (including geological and biochemical techniques), and visual presentation of data and research results (ranging from simple graphs to virtual reality). Concurrently scheduled with course CM169. S/U or letter grading.

277. Variable Topics in Ancient Near East. (4) Lecture, four hours; laboratory, one hour. Variable topics; consult Schedule of Classes for topics to be offered in specific term. Concurrently scheduled with course C177. S/U or letter grading.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

597. Examination Preparation. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

Arabic

Lower Division Courses

1A-1B-1C. Elementary Standard Arabic. (5-5-5) Lecture, six hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Introduction to spoken Arabic (modern standard Arabic), including listening, speaking, reading, and writing. P/NP or letter grading.

1B. Intermediate Standard Arabic. (5-5-5) Lecture, six hours. Requisite: course 1C. Course 1A is requisite to 1B, which is requisite to 1C. Intermediate formal Arabic, including listening, speaking, reading, and writing. P/NP or letter grading.

1C. Advanced Intermediate Arabic. (4-4-4) Lecture, four hours. Requisites: courses 102A, 102B, 102C. Advanced formal grammar, composition, and readings from classical and modern texts. Letter grading.

M110. Thousand and One Nights/Alf Layla Wa-Layla. (4) (Same as Comparative Literature M110.) Lecture, three hours. May be repeated for credit with topic change. S/U or letter grading.

Since its appearance in Europe in 1704, Thousand and One Nights is most well-known work of Arab lit- erature in West. Examination of cycle of tales more commonly known as Arabian Nights, including history of its translation, contemporary oral performances of tales in Arabic-speaking world, literary emergence of vernacular language in relation to classical Arabic, and Western appropriations of tales in music, film, and novels (Ravel, Rimsky-Korsakov, Barth, Poe, and Walt Disney). P/NP or letter grading.

111A-111B-111C. Elementary Spoken Egyptian Arab- ic. (4-4-4) Lecture, three hours. Enforced requisite: course 1C or 8. Course 111A is requisite to 111B, which is enforced requisite to 111C. Not suitable for heritage speakers. Introduction to spoken Arabic dialect of Egypt. Training in listening, speaking, and reading. P/NP or letter grading.

112A-112B-112C. Advanced Spoken Egyptian Arab- ic. (4-4-4) Lecture, three hours. Study of Egyptian colloquial (vernacular) or heritage spoken Arabic for students who have completed courses 1A, 1B, 1C. P/NP or letter grading.

115. Studies in Arabic Dialectology. (4) Lecture, three hours. Introduction to spoken Arabic dialect of Ar- abic, with emphasis on speaking and listening compre- hension. Dialects vary from year to year based on stu- dent interest and instructor availability and may include Lebanese, Levantine, North; and other dialects. May be repeated for credit. P/NP or letter grading.

116A-116B-116C. Elementary Iraqi Arabic. (5-5-5) Lecture, five hours. Course 116A is requisite to 116B, which is requisite to 116C. Introduction to dialect of Arabic spoken in contemporary Iraq, with emphasis on conversational proficiency. Recognition and production of sounds of Iraqi Arabic and basic vocabu- lary, grammar, idiomatic expressions, and relevant cultural background through dialogues and other conversations. P/NP or letter grading.

120. Islamic Texts. (4) Lecture, four hours. Requisite: course 103C. Readings from Qur'an, Tafsir, Hadith, Pan. May be repeated for credit.

123. Oral Literature and Performance of Arab World. (4) (Same as Comparative Literature M123.) Lecture, three hours. Knowledge of Arabic not re- quired. Introduction to oral tradition of troubadours, storytellers, oral poets, and performers in Arabic-speaking Middle East. P/NP or letter grading.

130. Classical Arabic Texts. (4) Lecture, four hours. Requisite: course 103C. Readings from premodern literary texts, with grammatical and syntactical analysis. May be repeated for credit. Letter grading.

132. Philosophical and Kalâm Texts. (4) Lecture, three hours. Requisite: course 120. Readings from pre- modern philosophy and theology. May be repeated for credit. P/NP or letter grading.

C141. Modern Arabic Literature. (4) (Formerly numbered 141.) Lecture, three hours. Requisite: course 102C. Conducted in English and Arabic, with all re-
quired readings in original Arabic only. Readings in modern Arabic literature, variously organized across or around particular trends, genres, topics, canonical authors, scholars, or national literatures, mixing thematic and formal analyses of literary and critical texts and making use of film, video, and song in approaching literary culture for credit. Concurrently scheduled with course C241. Letter grading.

148F. Special Studies: Readings in Arabic. (1) Seminar, one hour. Requisite: course 102C. Students must be concurrently enrolled in affiliated main course. Primary readings and additional work in Arabic to enrich and augment work assigned in main course, including reading, writing, and other exercises. May be repeated for credit. P/NP or letter grading.

150. Classical Arabic Literature in English. (4) Lecture, three hours. Readings in English; knowledge of Arabic not required. Survey of premodern Arabic cultural production in its political, religious, and social contexts. Coverage of pre-Islamic Arabia, rise of Islam, and major themes of Southwest Asian history, along with significant moments in literature and culture of premodern period. Consideration of selected modern responses to Arabic tradition. P/NP or letter grading.

151. Modern Arabic Literature in English. (4) (Formerly numbered 151.) (Same as Comparative Literature M151.) Lecture, three hours. Designed for upper division literature majors. Topics may include conceptions of modernity in modern Arab culture; East-West debate; memory, trauma, and mourning; violence, narrative, and ethics; globalization, oil, and cultural insularity; Arab culture in transnational context or cultural hybridity; Arab cinema, translation, marketing. Genres may include prison narratives; novels of terror; memoirs by women and/or by refugees and exiles; 19th- and 20th-century travel narratives; Arabic romanticized pre-1948; rise of novelistic novel. Areas may range from generic look at Arab world to narrow focus on Maghreb or one country such as Algeria, Palestine, Iraq, Lebanon, or Egypt. May also be organized around Arab literatures written in one specific language, namely English, Arabic, or French. Letter grading.

1515. Al-Andalus: Literature of Islamic Spain. (4) (Formerly numbered 1515.) (Same as Comparative Literature M1515.) Lecture, three hours. Study of literature of Islamic Spain to learn about interaction of Arabic and Western and Arabic and Jewish cultures and to recognize Islamic culture as formative force in European life and letters. P/NP or letter grading.

1517. Culture Area of Maghreb (North Africa). (4) (Same as Anthropology M1517 and History M150C.) Lecture, three hours. Designed for juniors/seniors. Introduction to North Africa, especially Morocco, Algeria, Tunisia, and Libya, also known as Maghreb or Tamazight. Topics include changing notions of personal- ity in Maghreb, various religious identities; colonialism; and gender and legal rights, changing representations of Islam, and religions in region's public spaces. P/NP or letter grading.

180. Linguistic Analysis of Arabic. (4) Lecture, four hours. Requisite: knowledge of Arabic in both its modern standard and dialect forms. Introduction to linguistic analysis of Arabic phono- mology, morphology, and syntax and to linguists’ approaches to specific problems posed by Arabic grammar and dialects.

181. Translating Arabic. (4) Seminar, three hours. Preparation: advanced proficiency in English and Arabic (at least three years of Arabic instruction or equiva- lent). Open to both native and nonnative speakers of English and Arabic; requires knowledge of modern standard and dialect of translation from Arabic into English, with focus on producing accurate and readable English versions of Arabic texts from variety of fields. Close reading and written translation of Arabic texts, with review of lin- guistic and cultural difficulties that arise in course of translation. Texts may include classical Arabic literature (religion, historiography), modern writing (litera- ture, media, translation, radio), based on student interest. Letter grading.

188FL. Special Studies: Readings in Arabic. (1) Seminar, one hour. Requisite: course 102C. Students must be concurrently enrolled in affiliated main course. Primary readings and additional work in Arabic to enrich and augment work assigned in main course, including reading, writing, and other exercises. May be repeated for credit. P/NP or letter grading.

197. Individual Studies in Arabic. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Reading and tangible evidence of mastery of subject matter may be required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Arabic. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or proj- ect required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

220. Seminar: Islamic Texts. (4) Seminar, three hours. Major Islamic thinkers and their works from classical period to modern times. Coverage of doc- trines and hermeneutics of various schools of thought in Islam, such as Ahl al-sunna wa’l-jama’a, Shi’a, Mu’tazila, and Sufis. May be organized around one au- thor and his works, multiple authors and their works, or specific topic with representative readings from various schools. Exploration of secondary literature in Arabic and other languages for student research papers. May be repeated for credit. S/U or letter grading.

230FL. Texts in Islamic Law, (Same as Hebrew M230FL.) Lecture, three hours. Requisites: course 102C, Hebrew 102C. Reading of Judeo-Arabic texts by Mai- monides (medieval religion, medicine, philosophy) and more recent texts in Judeo-Arabic dialects of Iraq and Egypt, with discussion of grammar and deviations from norms of classical Arabic. S/U or letter grading.

240A. Seminar: Arab Historians. (4) (Formerly num- bered 240.) Seminar, three hours. Introduction to very large body of literature on medieval Islamic history. Se- lected readings in Arabic that represent cross-section of Islamic historical writings, including Ibn Ishaq’s Siraj, al-Qadi al-Mansur’s Al-Tabaqat al-umumiyya, Ibn Khaldun’s Muqaddima, and Maqrizi’s topography. Historians studied ei- ther to determine their reliability as sources of our view of history and its theoretical foundations. Explo- ration of sources, research tools, and problems in Islamic history. May be repeated for credit. S/U or letter grading.

240B. Seminar: Arab Geographers. (4) Seminar, three hours. Introduction to large body of literature on medieval Islamic geographers. Selected readings in Arabic that represent cross-section of Islamic geographical writings distributed over number of disci- plines and national literatures, such as Sur- ra-al-ad, Kidb al-Buldan, al-Masalik wa-l-mamalik, to- pography, and travel accounts. May be repeated for credit. S/U or letter grading.

241. Modern Arabic Literature. (4) Lecture, three hours. Requisite: course 102C. Conducted in English and Arabic, with all required readings in original Arabic only. Readings in modern Arabic literature, variously organized across or around particular trends, genres, topics, canonical authors, regional, or national literatures, mixing thematic and formal analyses of literary and critical texts and making use of film, video, and song in approaching literary culture. May be repeated for credit. Concurrently scheduled with course C141. Letter grading.

250. Seminar: Premodern Arabic Literature. (4) Seminar, three hours. Readings in Arabic texts from vari- ety of periods and genres, along with appropriate sec- ondary literature. Topics include pre-Islamic poetry and oratory, Qur’an, Umayyad and Abbasid poetry and lit- erary prose, Hadith and Fiqh, historiography, biogra- phy, geography, medicine, mathematics, theology, as- ceticism, and mysticism. May be repeated for maxi- mum of 24 units. S/U or letter grading.

251. Seminar: Modern Arabic Literature. (4) Seminar, three hours; discussion, one hour. Requisite: course C141. Selected topics in modern and contem- porary Arabic prose and poetry. May be repeated for credit. Letter grading.

2525. Literatures and Cultures of Maghreb. (4) (Same as Comparative Literature M2525.) Seminar, three hours. Limited to graduate students. Examination of predominantly diverse literatures of Maghreb in their multiple and competing contexts of language and gen- der politics, religious and cultural formations, Pan-Arab- istic, national, and other traditions of post-colonial and economic development, modernity and globalization, immigration and citizenship, soccer industry and Rai music, mass media and Star Academy Maghreb, and media representations of Maghreb today. May be repeated for credit. S/U or letter grading.

275. Encountering Arabic Manuscripts: Introduction to Arabic Paleography and Critical Edition of Manuscripts. (4) Lecture, three hours; discussion, one hour. Requisite: course 103C. Introduction to Ara- bic paleography and how to prepare editions of medi- eval manuscripts with critical apparatus and stemma. During past decades enormous number of previously unknown Arabic manuscripts have been discovered. While vast range of medieval texts have been pub- lished in editions of varying quality, equally large num- ber of manuscripts remain unpublished. UCLA has outstanding collections of Near Eastern manuscripts in Arabic, Persian, and Ottoman Turkish, primarily in fields of theology, medicine, and philosophy. May be repeated for credit. S/U or letter grading.

359. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

Armenian

Upper Division Courses

101A-101B-101C. Elementary Modern Western Armenian. (5-5-5) Lecture, five hours. Course 101A is recommended requisite to 101B, which is recommend- ed requisite to 101C. Students with knowledge of Ar- menian, optional knowledge of Eastern or Western Armenian (from elementary or high school) should contact instructor to determine ap-
propriate enrollment level. Reading of selected texts, composition, and conversation. Each course may be taken independently for credit. P/NP or letter grading.

103A-103B-103C. Advanced Modern Armenian. (4-4-4) Lecture, four hours. Recommended requisite: course 102C. Course 103A is recommended requisite to 103B, which is recommended requisite to 103C. Students with knowledge of Eastern or Western Armenian (from elementary or high school) should contact instructor to determine appropriate enrollment level. Designed for students with advanced speaking fluency and reading abilities in Armenian. Exploration of advanced Western Armenian in following areas of competency: fluency, literacy, accuracy, and proficiency. Use of language to engage literary themes and cultural issues of historical and contemporary significance for Armenian speakers. P/NP or letter grading.

104A-104B-104C. Elementary Modern Armenian. (5-5-5) Lecture, five hours. Course 104A is recommended requisite to 104B, which is recommended requisite to 104C. Students with knowledge of Western Armenian should contact instructor to determine appropriate enrollment level. Designed for students with little or no prior knowledge of Eastern Armenian, official idiom of Republic of Armenia. Introduction to basics of grammar and conversation. P/NP or letter grading.

105A-105B-105C. Intermediate Modern Eastern Armenian. (5-5-5) Lecture, five hours. Recommended requisite: course 104C. Students with knowledge of Eastern or Western Armenian (from elementary or high school) should contact instructor to determine appropriate enrollment level. Continuing introduction to Armenian grammar, with greater attention to readings from short stories and simple newspaper articles and film viewings on video. Emphasis on improving students’ self-expression in idiom, both orally and in written form. Each course may be taken independently for credit. P/NP or letter grading.

106A-106B-106C. Advanced Modern Eastern Armenian. (4-4-4) Lecture, four hours. Recommended requisite: course 105C. Students with knowledge of Eastern or Western Armenian (from elementary or high school) should contact instructor to determine appropriate enrollment level. Designed for students with advanced speaking fluency and reading abilities in Armenian. Discussion of contemporary Armenian social and cultural issues through readings from critical essays, editorials, short stories, and poems written since World War II and film showings. Emphasis on enhancing students’ self-expression orally and in written form. Each course may be taken independently for credit. P/NP or letter grading.

110. History of Armenian Language. (4) Lecture, three hours. Requisite: course 101C or 104C. Exploration of history of Armenian language as reflected in literature and intellectual discourse throughout written period (5th through 20th centuries). Use of top-down approach beginning with modern state of Armenian language in its two standard versions (Western and Eastern), then retracing of historical development through formation of New Armenian (17th century), Middle Armenian (17th through 12th centuries), and earliest attested form, Grabar, literary version of ancient Arme- nian (11th through 5th centuries). Discussion of attempts at reconstructing major features of Armenian phonology and morphology in preliterary period. P/NP or letter grading.

Near Eastern Languages and Cultures / 489
C265. Armenian Film and Culture. (5) Lecture, six hours. Requisite: course 101C or 104C. Overview of development of Armenian cinematography from first talkie to present, with focus on work of most seminal directors from Armenian Republic, as well as various voices from worldwide diaspora. Concurrently scheduled with course C166. S/U or letter grading.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

Berber
Upper Division Courses
101A-101B-101C. Elementary Berber. (4-4-4) Lecture, three hours; laboratory, two hours. Development of oral proficiency and analysis of basic grammatical structure. P/NP or letter grading.
130. Berbers. (4) Lecture, four hours. Examination of main features of Berber societies and cultures, with particular attention to social structures and institutions on one hand, and to customs, values, and beliefs on the other. Presentation of broad framework within which study of particular aspects of Berber cultures may be pursued. P/NP or letter grading.

Hebrew
Lower Division Courses
1A-1B-1C. Elementary Hebrew. (5-5-5) Lecture, five hours; laboratory, one hour. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Introduction to modern Hebrew, including listening, speaking, reading, and writing. Offered in summer only. P/NP or letter grading.

Upper Division Courses
102A-102B-102C. Intermediate Hebrew. (5-5-5) Lecture, five hours. Requisite: course 1C. Course 102A is requisite to 1B, which is requisite to 102C. Amplification of grammar; reading of texts from modern literature. P/NP or letter grading.
103A-103B-103C. Advanced Hebrew. (4-4-4) Lecture, three hours. Requisites: courses 102A, 102B, 102C. Students with prior knowledge of Hebrew who did not take courses 102A, 102B, and 102C should contact instructor to determine appropriate enrollment level. Designed for students with intermediate speaking and reading abilities in Hebrew. Introduction to modern Hebrew literary texts. P/NP or letter grading.
110C. Readings in Biblical Hebrew. (4) Lecture, three hours. Requisites: courses 110A, 110B. Continuation of course 110B. Reading of prose texts from Hebrew Bible, particularly from Former Prophets (Joshua-Kings). Introduction to certain aspects of historical grammar of biblical Hebrew. Reading and translation of variety of texts from different historical periods of Hebrew language, including texts from Archaic, Standard, and Late periods. Increased understanding of Hebrew verbal system, including different verbal patterns, their morphology, and syntactic function in biblical Hebrew prose. P/NP or letter grading.
111A. Israeli Society through Hebrew Song and Video. (4) Lecture, three hours; laboratory, one hour. Requisite: course 1C: Use of contemporary Israeli Hebrew song and video to explore Israeli collective imagination and various Israeli sociocultural issues to familiarize students with different aspects of Israeli daily life and popular culture, while teaching them multiple speech acts in both formal and informal contexts and enriching their Hebrew vocabulary and its retention. P/NP or letter grading.
111B-111C. Conversational Hebrew. (3-3) Lecture, two hours; laboratory, one hour. Requisite: course 111A. Course 111B is requisite to 111C. Vocabulary used in daily life, different speech acts in both formal and informal contexts, and various Israeli sociocultural issues using different kinds of media, such as video, Internet, and newspapers. P/NP or letter grading.
112. Readings in Modern Scholarly Hebrew. (2) Seminar, two hours. Requisite: course 102C. In-depth reading and discussion of selected scholarly articles in modern Hebrew for various disciplines: Bible study, Jewish history and folklore, sociology, and literary criticism. P/NP or letter grading.
113. Contemporary Israeli Short Stories/Novellas and Films in English. (5) Lecture, three hours; laboratory, two hours. Exploration of Israeli short stories/ novellas and films (translated into English) written since mid-1980s that use, to varying degree, postmodernist techniques to undermine predominance of modernist-Zionist narrative. Recycling and reexamini- nation of Israeli condition and Zionist condition and skepticism about telos or legitimacy of meta-narrative that fed blurred outline of Israeli identity and subvert its un- derpinning formative myths. They simultaneously dis- play loss of faith in representative dimension of lan- guage, including ability of texts to penetrate to its hidden meaning. Using periphery discourses, these texts strive to change modernist aesthetic and power paradigm. P/NP or letter grading.
125. Hebrew Biblical Historical Commentaries. (4) Lecture, three hours. Requisite: course 103C. Hebrew Bible with the commentaries of Rashi, Ibn Ezra, and/or Nahmanides. May be repeated for maximum of 16 units. Letter grading.
126. Biblical Texts. (4) Lecture, three hours. Requi- sites: courses 103A, 103B, 103C. Readings in Maimonides, Talmud, and/or Midrash. May be repeated for credit.
141. Modern Hebrew Poetry and Prose. (4) Lecture, three hours. Requisites: courses 103A, 103B, and 103C, or equivalent knowledge of Hebrew. Study of major Hebrew writers of past 100 years. May be repeated for credit. Concurrently scheduled with course C240. Letter grading.
170. Dead Sea Scrolls. (4) Lecture, three hours. Requisite: course 110C. Readings in Hebrew scrolls from Dead Sea Scrolls. 30, with focus on Hebrew language, paleography, and biblical interpretation in Dead Sea Scrolls. May be repeated for credit. P/NP or letter grading.
180A-180B. Survey of Hebrew Grammar. (4-4) Lecture, three hours. Requisites: courses 102A, 102B, 102C, and 103C, or equivalent knowledge of Hebrew grammar: phonology and morphology. Topics include development of Hebrew language from biblical times to present day, its relation to Arabic and other Semitic languages, methods of language preservation in Israel, Hebrew traditional pronunciation of Hebrew by various Jewish communities, Hebrew contribution to other Jewish languages (Yiddish, Ladino, Judeo-Arabic). P/NP or letter grading.
188FL. Special Studies: Readings in Hebrew. (2) Seminar, two hours. Requisite: course 102C. Students must be concurrently enrolled in an affiliated main course. Primary readings and advanced training in Hebrew. Additional work in Hebrew to enrich and augment work assigned in main course, including reading, writing, and other exercises in Hebrew. P/NP or letter grading.
197. Individual Studies in Hebrew. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.
199. Directed Research or Senior Project in Hebrew. (2 to 4) Tutorial, one hour. Limited to seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses
210. History of Hebrew Language. (4) Seminar, three hours. Development of Hebrew language in its classical period from archaic poetry through rabbinic Hebrew. Study of Biblical Hebrew and its influence on languages of the Jewish diaspora, as well as important Jewish communities, Hebrew contribution to other Jewish languages (Yiddish, Ladino, Judeo-Arabic) with particular emphasis on development of Hebrew language from biblical times to present day, its relation to Arabic and other Semitic languages, methods of language preservation in Israel, Hebrew traditional pronunciation of Hebrew by various Jewish communities, Hebrew contribution to other Jewish languages (Yiddish, Ladino, Judeo-Arabic). P/NP or letter grading.
225. Studies in Dead Sea Scrolls. (2 or 4) Seminar, three hours. Requisite: course 120. Critical study of Dead Sea Scrolls, with attention to history of biblical inter- pretation and role of Dead Sea Scrolls in formative Judaism. Reading in original manuscripts from Dead Sea Scrolls. May be repeated for credit. S/U or letter grading.
230. Rabbinic Hebrew Literature. (4) Seminar, three hours. May be repeated for credit. S/U or letter grading.
M231. Texts in Judeo-Arabic. (4) Same as Arabic M231. Lecture, three hours. Requisites: course 102C, Arabic 102C. Reading of Judeo-Arabic texts by Mai- monides (medieval religion, medicine, philosophy) and more recent texts in Judeo-Arabic dialects of Iraq and Egypt, with discussion of grammar and deviations from norms of classical Arabic. Course builds following skills: reading unpointed texts, mastering distinctive elements of Hebrew grammar, and syntax of Second Temple Hebrew, and analyzing relationships between biblical and postbiblical sources. May be repeated for credit. S/U or letter grading.
240. Modern Hebrew Poetry and Prose. (4) Lecture, three hours. Requisites: courses 103A, 103B, and 103C, or equivalent knowledge of Hebrew. Study of
596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

Iranian

Lower Division Courses

1A-1B-1C. Elementary Persian. (5-5-5) Lecture, six hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Not open to students with prior knowledge of Persian. P/NP or letter grading.

8. Elementary Persian: Intensive. (15) Lecture, 10 hours; discussion, 10 hours. Not open to students who have learned, from whatever source, enough Persian to qualify for more advanced courses. Intensive course equivalent to courses 1A, 1B, and 1C. Introduction to fundamentals of Persian, including pronunciation, grammar, and Persian script, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing. Offered in summer only. P/NP or letter grading.

20A-20B-20C. Accelerated Elementary Persian. (6-6-6) Lecture, four hours; discussion two hours; laboratory, 30 minutes per day. Preparation: some knowledge of spoken Persian. Course 20A is enforced requisite to 20B, which is enforced requisite to 20C. Intensive and thorough study of fundamental structure of Persian grammar; reading from a wide range of classical and modern poetry and prose compositions. P/NP or letter grading.

Upper Division Courses

102A-102B-102C. Intermediate Persian. (5-5-5) Lecture, six hours. Requisite: course 1C or 20C. Course 102A is enforced requisite to 102B, which is requisite to 102C. P/NP or letter grading.

103A-103B-103C. Advanced Persian. (4-4-4) Lecture, three hours. Requisite: course 102C. Students who do exceptionally well in course 20C may be permitted to enroll with consent of instructor. Each course may be taken independently for credit. P/NP or letter grading.

103A. Introduction to Classical Persian Poetry. 103B. Introduction to Classical Persian Prose; 103C. Introduction to Contemporary Persian Poetry and Prose.

104. Philosophical Texts. (4) Lecture, three hours. Readings in English. Introduction to wide selection of philosophical texts in translation. Identification of major philosophical themes in ontology, epistemology, psychology, and cosmology through texts, with study in detail. P/NP or letter grading.

M110A-M110B-M110C. Iranian Civilization. (4-4-4) (Same as Ancient Near East M110A-M110B-M110C and History M110A-M110B-M110C) Lecture, three hours; discussion, one hour (when scheduled). History of ancient Iran from the Elamite to Sassanian dynasties — Elamite civilization and Mede, Achaemenid, Arsacid, and Sassanian Empires. Emphasis on ancient Iran, but may be offered for early Islamic period. P/NP or letter grading.

111A-111B-111C. Elementary Kurdish. (4-4-4) Lecture, three hours; laboratory, two hours. Proficiency-based course in the oral language of Kurdish (Sorani). Graded readings, translation, composition (level one), conversation (levels one and two).

120. Comparative Study of Six Major Persian Poets. (4) Lecture, two hours; discussion, one hour. Pre-requisite: project required. Lectures in Persian, readings in English and Persian. Comparative study of six major Persian poets from 10th to 14th century who shaped sense of Persian identity and delineated chief distinguishing characteristics of Persian thought and culture. May be repeated for credit with consent of instructor. P/NP or letter grading.

130. Intellectual History of Jews of Persia. (4) Lecture, three hours. Requisites: readings in English. Introduction to intellectual history of Jews in Persia by highlighting select areas of Judeo-Persian studies and focusing on various authors and their work. P/NP or letter grading.

141. Persian Analytical Prose. (4) Lecture, three hours. Requisite: course 102C. Study of selected analytical and expository prose texts, with emphasis on philosophy, sciences, literary criticism, and history. May be repeated for credit with consent of instructor. P/NP or letter grading.

142. Persian Popular Ethics. (4) Lecture, three hours. Requisite: course 102C. Study of major Persian works on popular ethics that have helped shape normative social, cultural, and political values in Iranian civilization. May be repeated for credit with consent of instructor. P/NP or letter grading.

150A-150B. Survey of Persian Literature in English. (4-4) Lecture, three hours. Knowledge of Persian not required. Each course may be taken independently for credit.

161A-161B-161C. Elementary Modern Iranian. (4-4-4) Lecture, three hours. Pre-requisite: knowledge of Persian descriptive course 161A is requisite to 161B, which is requisite to 161C. Studies in grammars and texts of Middle Iranian languages (e.g., Middle Persian, Pahlavi, Old Persian, Rumi, Bahari, Dehkhoda, and others). May be repeated for credit with consent of instructor. P/NP or letter grading.

169. Civilization of Pre-Islamic Iran. (4) Survey of Iranian culture from the beginning through Sassanian period.

170. Religion in Ancient Iran. (4) History of religion in Iran from the beginning to the Mohammadan conquest; Indo-Iranian background, Zoroastrianism, Manichaeanism, Mazdaism.

187. Variable Topics in Iranian Studies. (4) Lecture, three hours. Variable topics; consult Schedule or Classes for topics to be offered in specific term. May be repeated for credit. P/NP or letter grading.

188FL. Special Studies: Readings in Iranian. (2) Seminar, two hours. Requisite: course 102C. Students must be concurrently enrolled in course. Primary readings and advanced training in Iranian. Additional work in Iranian to enrich and augment work assigned in main course, including reading, writing, and other exercises in Iranian. P/NP or letter grading.

197. Individual Studies in Iranian. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

221. Rumi, Mystic Poet of Islam. (4) Seminar, three hours. Requisite: course 220A or 220B. Study of life and works of Rumi in context of interaction of Sufism and poetic creativity. May be repeated twice for credit.

M222A-M222B. Vedic. (4-4) (Same as South Asian M222A-M222B.) Lecture, three hours. Preparation: knowledge of Sanskrit equivalent to South Asian 110C. Characteristics of Vedic hymns and readings in Rig-Vedic hymns. Only course M222B may be repeated for credit. S/U or letter grading.

231A-231B-231C. Advanced Middle Iranian. (4-4-4) Lecture, three hours. Requisite: course 161C. Course 231A is requisite to 231B, which is requisite to 231C. Further studies in grammars and texts of Middle Iranian languages (e.g., Middle Persian, Pahlavi, Sogdian, Khotanese, Bactrian). May be repeated for credit with consent of instructor. S/U or letter grading.

250. Seminar: Classical Persian Literature. (4) Seminar, three hours. Requisites: courses 103A, 103B, 103C, 199. May be repeated twice for credit.

256. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

Islamics

Upper Division Courses

110. Introduction to Islam. (5) Lecture, three hours; discussion, one hour. Genesis of Islam, its doctrines, and practices, with readings from the Qur’an and hadith; schools of law and theology; piety and Sufism; reform and modernism. P/NP or letter grading.

130. Shi’a in Islamic History. (4) Seminar, three hours; discussion, one hour. Rise and development of Shi’a Islam, its doctrines, and practices; major branch-es: Twelvers, Ismailis, Zaidis; their contribution to Islamic thought and civilization; modern trends of reinterpretation and redefinition. P/NP or letter grading.

151. Contemporary Islamic Thought. (4) Lecture, 90 minutes; discussion, 90 minutes. Recommended requisite: course 110. Based on original writings of major Islamic thinkers in English translation, provides balanced picture of enormous ideological variety found in Near Eastern Languages and Cultures / 491
Graduate Courses

201. Arabo-Islamic Sciences. (4) Seminar, three hours. Preparation: good reading knowledge of Arabic, English, and one other Western language. Comprehensive coverage of Arabo-Islamic sciences that formed matrix of Islamic education. Survey of most recent developments in following disciplines: Arabic language and literature, Qur'anic sciences, traditions, jurisprudence, and literature. Letter grading.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. Individual contract required. P/NP or letter grading.

597. Examination Preparation. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

Upper Division Courses

130. Modern Jewish Religious Movements and Their Ideologies. (4) Lecture, three hours. Introduction to and overview of Jewish religious movements and evolution of their ideologies in the Western world from time of the Enlightenment to the present.

135. Jewish Law. (5) Lecture, three hours. Introduction to Jewish law from biblical literature to modern legal systems. Comparison of Jewish legal systems to modern secular systems and discussion of ethical dimensions of legal systems. P/NP or letter grading.

Study of historical Jewish literature; Rabbinic Judaism; its original literary forms; rabbinic world-view; forms of medieval rabbinic literature; modern Jewish religious movements and their attitude to rabbinic Judaism. S/U grading.

151A-151B. Modern Jewish Literature in English. (4-4) Lecture, three hours. Each course may be taken independently for credit. P/NP or letter grading. M151A. Diaspora Literature. (Same as Comparative Literature M165A.) Study of Jewish literature written in Jewish language and reading of them in context of their historical backgrounds. P/NP or letter grading.

M162. Israel Seen through its Literature. (4) (Same as Comparative Literature M162.) Lecture, three hours. Attempt to impart profound understanding of Israel as seen through its literature. Examination of variety of literary texts — stories, novels, and poems; and reading of them in context of their historical backgrounds. P/NP or letter grading.

Variable Topics in Jewish Studies. (4) Lecture, three hours. Variable topics; consult Schedule of Classes for topics prior to registration. May be repeated for credit. P/NP or letter grading.

M181. Topics in Jewish History. (4) (Same as History M181.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of major issues in Jewish history. May be repeated for maximum of 16 units with topic and/or instructor change. P/NP or letter grading.

M182A. Ancient Jewish History from Patriarchs to Rabbinics. (4) (Same as History M182A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of social, political, and religious developments. P/NP or letter grading. M182B. Between Cresecent and Cross: Jewish Middle Ages. (4) (Same as History M182B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exploration of unfolding of Jewish history from rise of Christianity to expulsion of Jews from Spain in 1492. P/NP or letter grading.

182C. Jewish History, Spanish Expulsion to 1881. (4) (Same as History M182C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of early modern Jewish history beginning with enormously repercussions of expulsion of Jews from Spain in 1492, followed by transplantation of Jews to New World and Europe; history of Jews in general; political factors that shaped cultures of Europe's Jews from outbreak of First World War to present. Emphasis on diversity of Jewish cultures, religious groups and to great diversity of cultures; that Judaism as safe haven for Jewish people has been characterized by various positions on when and how to observe Judaism, that, founded as democracy, it contends with multiple strains on its democratic system, such as tensions between Jews and Arabs, secular and religious Jews, and disparate ethnic groups and to great diversity of cultures; that it was envisaged as safe haven for Jewish people but has been characterized by various positions on when and how to observe Judaism, that, founded as democracy, it contends with multiple strains on its democratic system, such as tensions between Jewish and Arab, secular and religious Jews, and disparate ethnic groups. P/NP or letter grading.

182D. European Jewry, 1881 to Present. (4) (Same as History M182D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of Jewish history with emphasis on major trends in Jewish intellectual history from 18th century to present. P/NP or letter grading.

182G. Spirit of Secularism: Jewish Cultures in Secular Age, (4) (Same as History M182G.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of emergence of distinct forms of Jewish culture in modern age, particularly those that challenge traditional forms of Jewish religious culture (e.g., laws, customs, rituals). P/NP or letter grading.

184A. American Jewish Civilization: Encounter with Great World Cultures. (4) (Same as History M184A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of origins and development of American Jewish civilization; cultural, intellectual, political, social and economic development of American Jewish civilization. P/NP or letter grading.

184B. History of Anti-Semitism. (4) (Same as History M184B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of American Jewish civilization. P/NP or letter grading.

184C. American Jewish Experience. (4) (Same as History M184C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Experience of Jews in America, both historical and contemporary. P/NP or letter grading.

184D. History of State of Israel, 1948 to Present. (4) (Same as History M184D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of history of State of Israel from 1948 to present. P/NP or letter grading.

187. Holocaust in Literature. (4) (Same as Comparative Literature M165.) Lecture, three hours. Examination of how Holocaust informs many of literary and cinematic works and raises wide range of aesthetic and moral questions. P/NP or letter grading.

191. Variable Topics Research Seminars: Jewish Studies. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty and student. S/U or letter grading. May be repeated for credit. Individual contract required. P/NP or letter grading.

194D. Jewish Intellectual History. (4-4) (Same as History M194D-E-M194F.) Lecture, three hours; discussion, one hour (when scheduled). Designed for seniors. Examination of most important currents and figures in Jewish intellectual history from 18th century to present. P/NP or letter grading.

200. Directed Research or Senior Project in Islamic Studies. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

210. Jewish History, Spanish Expulsion to 1881. (4) (Same as History M210A-C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of early modern Jewish history beginning with enormously repercussions of expulsion of Jews from Spain in 1492, followed by transplantation of Jews to New World and Europe; history of Jews in general; political factors that shaped cultures of Europe's Jews from outbreak of First World War to present. Emphasis on diversity of Jewish cultures, religious groups and to great diversity of cultures; that it was envisaged as safe haven for Jewish people but has been characterized by various positions on when and how to observe Judaism, that, founded as democracy, it contends with multiple strains on its democratic system, such as tensions between Jews and Arabs, secular and religious Jews, and disparate ethnic groups. P/NP or letter grading.

215A. Modern Jewish Literature in English. (4-4) Lecture, three hours. Each course may be taken independently for credit. P/NP or letter grading. 215A-215B. Hebrew Literature in English. (4-4) Lecture, three hours. Each course may be taken independently for credit. 215A. Literary Traditions of Ancient Israel: Bible and Apocrypha. (Same as Comparative Literature M150A.) Study of literature of ancient Israel through examination of principal compositional strategies of biblical Hebrew and Apocrypha (read in translation). P/NP or letter grading. 215B. Rabbinic Judaism and its Literature: Jewish Religious Culture. (Same as Comparative Literature M165A.) Study of historical Jewish literature; Rabbinic Judaism; its original literary forms; rabbinic world-view; forms of medieval rabbinic literature; modern Jewish religious movements and their attitude to rabbinic Judaism. S/U grading.

215A-151B. Modern Jewish Literature in English. (4-4) Lecture, three hours. Each course may be taken independently for credit. P/NP or letter grading. 215B. Rabbinic Judaism and its Literature: Jewish Religious Culture. (Same as Comparative Literature M165A.) Study of historical Jewish literature; Rabbinic Judaism; its original literary forms; rabbinic world-view; forms of medieval rabbinic literature; modern Jewish religious movements and their attitude to rabbinic Judaism. S/U grading.

240A-240B. American Jewish History. (4-4) Lecture, three hours. Examination of social and cultural history of American Jewish community from its inception to the present with emphasis on immigration of successive immigrants and development of institutions. P/NP or letter grading. 240A. 1654 to 1914; 240B. 1914 to the Present.

241. Modern Anti-Semitism. (4) Lecture, three hours. Examination of modern anti-Semitism from the 18th century to the present; comparison of modern racist ideologies with premodern theories; case studies (e.g., Dreyfus affair, Beilis Trial, Holocaust); Jewish reactions to these phenomena.
Graduate Course

Near Eastern Languages

Lower Division Courses

M20. Visible Language: Study of Writing. (5) (Same as Asian M20, Indo-European Studies M20, Slavic M20, and Southeast Asian M20.) Lecture, three hours; discussion, one hour. Consideration of concrete means of communication in human societies. Earliest representations of language known are those of Near East dating to end of 4th millennium B.C. While literate civilizations of Egypt, Indus Valley, China, and Mesoamerica left little evidence of corresponding earliest developments, their antiquity and, in case of China and Mesoamerica, their evident isolation mark these centers as loci of independent developments in writing. Basic characteristics of early scripts, assessment of modern alphabetic writing systems, and presentation of conceptual basis of semiotic language representation. Origins and development of early non-Western writing systems. How Greco-Roman alphabet arose in 1st millennium B.C. and how it compares to other modern writing systems. P/NP or letter grading.

50A. First Civilizations. (5) Lecture, three hours; discussion, one hour. Survey of great civilizations of ancient Near East — Egypt, Israel, and Mesopotamia — with attention to emergence of writing, monotheism, and urban societies. Letter grading.

50C. Introduction to Near Eastern Cultures. (5) Lecture, three hours; discussion, one hour. Survey of modern Middle Eastern cultures through readings and films from Arab countries, Iran, Turkey, and Israel. Letter grading.

Graduate Courses

200. Bibliography and Method of Near Eastern Languages and Literatures. (4) Lecture, two hours. Required for M.A. degree. Introduction to bibliographical research in methods of research in various areas of specialization offered by department. May be repeated for credit.

201. Study of Religion: Theory and Method. (4) Seminar, three hours. Preparation: familiarity with at least two major world religions. Designed for advanced under- and graduate students. Introduction to variety of theories and methods used in academic study of religion. In attempt to demonstrate importance that historical, cultural, and social exigencies play in development of religious traditions, discussion of theories comparatively and in their historical context, with focus on prescriptive aspects of research and concepts and implications of each theory. Letter grading.

210. Survey of Afro-Asiatic Languages. (4) Lecture, three hours. Survey of structures of a number of representative languages from various major branches of Hamito-Semitic (Afro-Asiatic) language family.

290. Seminar: Paleography. (4) Seminar, three hours. Provides students with ability to cope with varieties of manuscripts.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U or letter grading.

495. Preparation for Teaching Language and Literature in Near Eastern Languages and Cultures. (2) Seminar, two hours. Preparation of two methods of preparing literary texts as exemplary materials in teaching of language and literature in Near Eastern Languages and Cultures. Theory and classroom practice, with individual counseling and faculty evaluation of teaching assistant performances. May be not applied toward M.A. degree requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

Semitics

Upper Division Courses

140A-140B. Elementary Akkadian. (4-4) Lecture, three hours. Elementary grammar and reading of texts in standard Babylonian.

141. Advanced Akkadian. (4) Lecture, three hours. Old Babylonian syntax; reading of basic Old Babylonian texts.

142. Akkadian Literary Texts. (4) Lecture, three hours. Selected readings from Akkadian myths and epics, with introduction to historical tradition of the works and their literary structure.

197. Individual Studies in Semitics. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be taken more than once. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Semitics. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

210. Ancient Aramaic Dialects. (4) Lecture, three hours. Required: course 130. Reading of surviving inscriptions and papyri. Texts include Old Aramaic inscriptions, Egyptian Aramaic texts, Qumran Aramaic, and Targumic Aramaic. May be repeated for credit. S/U or letter grading.

215B. Syriac. (4) Lecture, two hours. Morphology and syntax of Syriac language; readings in Syriac translation of Bible and Syriac literature. May be repeated for credit. S/U or letter grading.

230. Seminar: Northwest Semitic Languages and Literatures. (4) Seminar, two hours. May be repeated for credit. S/U or letter grading.

240. Seminar: Akkadian Language. (4) Seminar, two hours. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. May be repeated for credit. S/U or letter grading.

240X. Seminar: Akkadian Language. (1) Seminar, two hours. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. Course for students who participate regularly in class meetings but without the homework required in course 240. May be repeated for credit. S/U grading.

241. Seminar: Akkadian Literature. (4) Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit. S/U or letter grading.

424. Seminar: Akkadian Literature. (1) Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. Course for students who participate regularly in class meetings but without the homework required in course 241. May be repeated for credit. S/U grading.

280A-280B-280C. Seminars: Comparative Semitics. (4-4-4) Seminar, two hours. S/U or letter grading.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

Turkic Languages

Upper Division Courses

101A-101B-101C. Elementary Turkish. (5-5-5) Lecture, five hours. Course 101A is requisite to 101B, which is requisite to 101C. Grammar, reading, conversation, and elementary composition drills. P/NP or letter grading.

111A-111B-111C. Elementary Uzbek. (4-4-4) Lecture, three hours; laboratory, two hours. Elementary grammar, reading, and composition exercises; elementary conversation.

112A-112B-112C. Advanced Uzbek. (4-4-4) Lecture, three hours; laboratory, two hours. Descriptive Uzbek grammar, reading, and analysis of Uzbek literary and folkloric texts. High-style composition and conversation.

114A-114B-114C. Bashkir. (4-4-4) Lecture, three hours. Required: course 102A. Grammar, reading, and literary and folkloric texts.

115A-115B-115C. Elementary Azeri. (4-4-4) Knowledge of Russian, Turkish, and Iranian helpful. Grammatical competence at elementary level; knowledge of basic facts of Azeri grammar; reading comprehension with help of dictionary; ability to write simple compositions; basic conversational skill.

120A-120B-120C. Descriptive Grammar of Modern Literary Uzbek. (4-4-4) Lecture, three hours; discussion, one hour; laboratory, one hour. Required: courses 102A, 102B, and 102C, or 111A, 111B, and 111C,
494 / Neurobiology

or 180. Systematic and comprehensive grammatical survey of modern literary Uzbek, official language of the newly independent Republic of Uzbekistan. Phonetics, morphology, syntax, paralemology, and lexiconology analyzed on today's native material. Letter grading.

160. Turkish Tradition. (4) Lecture/discussion. Preparation: entrance examination. Survey of cultural history of the Turks, as seen primarily through their literature, from their early history to the present.

165. Islamic Literary Heritage of Central Asia. (4) Lecture, two hours; discussion, one hour. Systematic survey of Islamic and related documents perfused with both Turkish and Persian in Central Asia, with reading of primary sources in English translation. Study of special characteristics of Central Asian Islam.

170. Individual Studies in Turkic. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

190. Directed Research or Senior Project in Turkic. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

210A-210B-210C. Introduction to Ottoman. (4-4-4) Lecture, three hours. Introduction to the literary language of post-Ottoman Empire from its foundation in the 14th to its overthrow in the 20th century. For students of history, literature, and religion of the Ottomans, Near East, and Central Asia. Topics include Arabic script as applied to Ottoman; Arabic and Persian elements in grammar and vocabulary. Readings of historical and literary texts.

235A-235B-235C. Middle Turkic: Karakhanid, Khorazmian, Mamluk-Kipchak, and Old Anatolian. (4-4-4) Lecture, three hours. Required: course 180. Survey of Middle Turkic documents. Textual and linguistic analysis of Middle Turkic texts from various literary genres.

240A-240B-240C. Advanced Ottoman. (4-4-4) Lecture, three hours. Required: courses 210A, 210B, and 210C. Emphasis on different genres of Ottoman writing (battles letters as well as various types of state documents) in elaborate high style of classical Ottoman period (15th to 19th century). Selections are read in manuscript to prepare students to read works in form in which they are likely to encounter them in their research.

250A-250B-250C. Islamic Texts in Chagatay. (4-4-4) Lecture, three hours. Required: courses 220A, 220B, and 220C. Philological and linguistic survey of basic Islamic source material written in Chagatay literary language. Reading and discussion of Chagatai texts on Islamic topics.

280A-280B. Seminars: Modern Turkish Literature. (4-4) Seminar, two hours; lecture, required. Course 102B. Specific issues and trends in development of Turkish literature from middle of 19th century to the present.

590. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

Scope and Objectives

The Department of Neurobiology offers advanced training leading to the Ph.D. degree. Graduates can anticipate an academic career at the college or university level or as a basic science researcher at a research institute or biotechnology company. In accord with this the department strives to produce graduates soundly qualified both for teaching at the college or university level and for the conduct of original research in neurobiology.

Finally, the overall objective of the Ph.D. program is to provide a strong theoretical and practical foundation in the area of cellular and systems neurobiology, with the goal to develop a better understanding of normal and pathological brain function and behavior. The graduate program provides (1) basic and advanced instruction in the fundamentals of neuroscience, (2) advanced independent research training in the areas of cellular, structural, and systems neurobiology, and (3) teaching experience in undergraduate, graduate, and professional (dental and medical) courses in neuroscience. The program is targeted toward highly qualified and self-motivated doctoral students who take advantage of a flexible curriculum characterized by extensive informal and formal interactions with faculty in small groups and on an individual tutorial basis. This training is structured to allow students extensive opportunities for critical examination of contemporary neuroscience literature and research and for the development of oral and written communication skills.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/
197. Individual Studies in Neurobiology. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study with scheduled meetings to be arranged between faculty member and student. Assigned readings and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual written or research topics. S/U grading.

198. Directed Research in Neurobiology. (2 to 8) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Students in anatomy and related subject areas appropriate for training of particular students, which includes reading assignments or laboratory work leading to final oral or written report. May be repeated for maximum of 16 units. Individual contract required. P/NP or letter grading.

Graduate Courses
M200A. Synapses, Cells, and Circuits. (4) (Same as Neuroscience M204.) Lecture, three hours; laboratory, two hours. Fundamental topics concerning synapse, neuronal circuitry, and intrinsic and extrinsic modulatory systems. Introduction to neuronal microcircuits. Letter grading.

M200B. Cell, Developmental, and Molecular Neurobiology. (6) (Same as Molecular, Cell, and Developmental Biology M220 and Neuroscience M201.) Lecture, two hours; laboratory, two hours. Fundamental topics concerning cellular, developmental, and molecular neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotropic factors. P/NP grading.

M200C. Sensory Systems Neurobiology. (4) (Same as Neuroscience M221.) Lecture, two hours; discussion, two hours. Fundamental topics in sensory systems neurobiology concerning sensory transduction, taste and olfaction, audition, vision, and somatosensory system. P/NP grading.

M200D. Motor Systems Neurobiology. (4) Lecture, four hours. Fundamental topics in motor systems neurobiology, including muscle, motor units, and motor neuron pool, spinal motor control, reflexes, locomotion, basal ganglia, cerebellum, and eye movements. Letter grading.

M200E. Regulatory, Behavioral, and Cognitive Neurobiology. (6) Lecture, two hours; discussion, two hours; laboratory, two hours. Topics include hypothalamus, cardiovascular system, breathing, food intake and metabolism, respiratory system, body fluids, neuroendocrine systems, circadian timing, sleep and dreaming, psychosexual development, motivation, reward and addiction, cognitive development, object, face, and spatial recognition, learning and memory, language, and communication, and thinking and problem solving. Letter grading.

M200F. Cellular Neurophysiology. (4) (Same as Neuroscience M202 and Psychological Science M202.) Lecture, three hours; discussion, two hours. Topics include hypothalamus, cardiovascular system, breathing, food intake and metabolism, respiratory system, body fluids, neuroendocrine systems, circadian timing, sleep and dreaming, psychosexual development, motivation, reward and addiction, cognitive development, object, face, and spatial recognition, learning and memory, language, and communication, and thinking and problem solving. Letter grading.

M200G. Biology of Learning and Memory. (4) (Same as Molecular, Cellular, and Integrative Physiology M200G, Neuroscience M220, and Psychology M202.) Lecture, four hours. Molecular, cellular, circuit, systems, and cognitive neurophysiology and models of learning and memory. Cross-disciplinary focus on learning and memory to provide integrative view of subject that emphasizes emerging findings that take advantage of novel experimental techniques. Letter grading.

M201. Structural Neurobiology. (2) Lecture, two hours; discussion, two hours; laboratory, two hours. Introduction to molecular structure of chemical, electrical, and mixed signal transduction. Magnetic resonance imaging methods. Letter grading.

M202. Physiology and Neurobiology / 495. (Same as Physiological Science M202 and Psychological Science M202.) Lecture, three hours; discussion, two hours. Topics include hypothalamus, cardiovascular system, breathing, food intake and metabolism, respiratory system, body fluids, neuroendocrine systems, circadian timing, sleep and dreaming, psychosexual development, motivation, reward and addiction, cognitive development, object, face, and spatial recognition, learning and memory, language, and communication, and thinking and problem solving. Letter grading.

M208. Dynamics of Neural Microcircuits. (4) (Same as Neuroscience M267.) Lecture, two hours; discussion, two hours. Development of integrative understanding of neural microcircuits that underlie specific functions of sensory processing, generation, and coordination of motor activity, as well as generation and modulation of neural rhythms. Letter grading.

M265. Seminar: Neural and Behavioral Endocrinology. (2) Preparatory course for graduate endocrine, systems neurobiology subjects. Letter grading.

M266. Seminar: Neural and Behavioral Endocrinology. (2) Preparatory course for graduate endocrine, systems neurobiology subjects. Letter grading.

M295. Culture of Neurobiology. (2) Discussion, two hours. Outside readings, classroom discussions, short write-ups, and student presentations on current issues in neurobiology. Topics include networking, mentoring, publishing, grant system, authorship, and career opportunities. S/U grading.

M296. Research Seminar and Journal Club. (1) Seminar, one hour. Seminar and journal club with focus on current research topics and activities occurring within department. S/U grading.

M298A-298C. Advanced Topics in Neurobiology. (2-2-2) Seminar, one hour; discussion, one hour. Advanced seminar conducted by faculty members to be offered by different departmental faculty members. Topics are grouped thematically. S/U grading.

M298A. Sensory, Motor, and Developmental Neurobiology; M298B. Sensory, Motor, and Developmental Neurobiology; M298C. Regulatory, Behavioral, and Cognitive Neurobiology.

M299. Preparation for Teaching in Anatomical Sciences. (2 to 4) Seminar, to be arranged. Designed for graduate students. Observation and practice of methods of teaching in anatomy, including preparation of material, participation in laboratory instruction, and presentation of reviews with departmental faculty and faculty criticism. Gross anatomy, microscopic anatomy, and neuroanatomy subject fields included. May not be applied toward degree requirements. S/U grading.

M301. Cooperative Program. (2 to 6) Tutorial, to be arranged. Preparation consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

M303. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) To be arranged. Observation and practice of methods of teaching in anatomy, including preparation of material, participation in laboratory instruction, and presentation of reviews with departmental faculty and faculty criticism. Gross anatomy, microscopic anatomy, and neuroanatomy subject fields included. May not be applied toward degree requirements. S/U grading.

Scope and Objectives

Neurology is the medical science dealing with the normal and diseased nervous system. Neurological disorders are often associated with significant disability, morbidity, and mortality. Their higher incidence in association with greater longevity of the population, increased awareness, improved diagnostic methods, and other factors place neurological disorders among the major medical problems today. The Department of Neurology and the Reed Neurological Research Center provide means for an advanced laboratory methods course and develop a research plan to test such hypotheses; work on research projects independently and in small groups; evaluate and discuss primary literature and the validity of hypotheses generated by others; communicate effectively orally and in writing; and demonstrate creative thinking.

Carlos V. Grijalva, Ph.D. (Psychology)
Patricia E. Phelps, Ph.D. (Integrative Biology and Physiology)
Joseph B. Watson, Ph.D., in Residence (Psychiatry and Biobehavioral Sciences)

Scope and Objectives

Neuroscience seeks to understand the brain in health and in disease. Topics of fundamental interest include perception, cognition, learning, memory, motor control, and regulation of body function. The undergraduate interdepartmental program seeks to explore the principles and concepts of this broad range of nervous system function at many levels of analysis, including molecular, cellular, synaptic, network, computational, and behavioral.

Undergraduate Study

The Neuroscience major is a designated capstone major. Undergraduate students have the option of conducting two terms of independent research within a faculty laboratory or completing an advanced laboratory methods course with a series of research modules. Through their capstone work, students demonstrate ability to generate testable scientific hypotheses and develop a research plan to test such hypotheses; work on research projects independently and in small groups; evaluate and discuss primary literature and the validity of hypotheses generated by others; communicate effectively orally and in writing; and demonstrate creative thinking.

Neuroscience B.S.
Capstone Major

Preparation for the Major

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4, 23L; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; one course from Statistics 10 or 13.

Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving grades below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

Transfer applicants to the Neuroscience major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, one semester of organic chemistry with laboratory, and one statistics course. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

The Neuroscience major consists of 11 courses (approximately 47 units). Consult respective departmental or program listings for course descriptions.

Required Core: Neuroscience M101A, M101B, M101C, 102, Chemistry and Biochemistry 153A, 153L. Psychology 115 cannot be substituted for Neuroscience M101A; however, Psychological Science 111A can be substituted.

Elective Options: One course from each of the following three options:

Molecular, Cell, and Developmental Neuroscience: Molecular, Cell, and Developmental Biology 162, Neuroscience M130, M145, M148, C177, 180, 181, 182, 191C, Physiological Science C126, M145, 146, 147, M148, M181, or Psychology M117J.

Capstone Research Options: (1) Neuroscience 101L or (2) Neuroscience 198A and 198B, or A99A and A99B. Students who select the Neuroscience 101L capstone research option must take four upper division electives, with at least one from each of the three elective options. Students who select the Neuroscience 198A and 198B, or A99A and A99B option must take as many upper division electives as possible.
three upper division electives, one from each elective option.

No more than eight courses may be from any one department. A maximum of 8 units of Neuroscience 198 or 199 in any combination) may be applied toward the major. Each course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better in all upper division courses taken for the major.

Honsors Program

The honors program provides exceptional Neuroscience majors with the opportunity to do research culminating in an honors thesis. Majors who have completed all preparation courses with a grade-point average of 3.0 or better and an overall GPA of 3.2 or better may apply for admission to the honors program. Applications and program requirements are available in the Neuroscience Undergraduate Office and at http://www.neurosci.ucd.edu. Students must submit the application before beginning their upper division honors requirements. After completion of all requirements and with the recommendation of the faculty sponsor and a second reader of the thesis, the chair confers honors at graduation.

Neuroscience Minor

The Neuroscience minor is designed to allow students in other majors an opportunity to explore the interdisciplinary field of neuroscience in a structured and rigorous way, while pursuing a major field of study in another discipline at the same time.

To enter the minor, students must have an overall grade-point average of 2.0 or better and a 2.5 GPA in the requisite courses for Neuroscience M101A and M101B.

Nonscience majors wishing to minor in Neuroscience should be aware that preparation courses in chemistry, life sciences, and physics are requisites to the upper division course requirements.

Required Upper Division Courses (approximately 31 units): Neuroscience M101A, M101B, M101C, M101D (15 units each) and four elective courses selected from 101L, 102, 199A and 199B, and from any of the three elective options listed under the Neuroscience major.

No more than two courses may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Neuroscience

See the Neuroscience Interdepartmental Graduate Program for the graduate course offerings.
gene(s) involved in these processes. Emphasis on mouse models, but other model organisms considered as well.

181. Cellular and Molecular Mechanisms of Learning and Memory. (4) Seminar, four hours. Enforced requisite: course M101A. Not open for credit to students with credit for course 191C, seminar 2. Cellular models of circuitry, genetic and molecular approaches to learning and memory. Learning and memory deficits in neuropsychiatric diseases. LTP and LTD models. Letter grading.

182. Pharmacology and Abnormal Behavior. (4) Seminar, four hours. Enforced requisite: course M101A. Not open for credit to students with credit for course 191A. Seminar 3. Pharmacology of stimulants, depressants, hallucinogens, and addictive drugs. Focus on how drugs interact with central nervous system and produce dependence, addiction, and chronic toxic affects. Letter grading.

191A-191B-191C. Variable Topics Research Seminars: Neuroscience. (4-4-4) Seminar, three hours. Topics on one or more aspects of neuroscience. Reading, discussion, and development of culminating project. May be applied as elective only in specific area of group B. Enforced requisite once for credit. P/NP or letter grading. 191A. Behavioral and Cognitive Neuroscience. Requisite: course M101A or Psychological Science 111A. Systems and Integrative Neuroscience. Requisite: course M101A or Psychological Science 111A, 191C. Molecular, Cell, and Developmental Neuroscience. Enforced requisite: course M101B.

191H. Honors Seminars: Neuroscience. (4) Seminar, four hours. Preparation: one statistics course (Statistics 10 or equivalent). Limited to neuroscience honors program students. Introduction in principles of scientific method, ethics, and written and oral communication; critique of current journal articles and research projects. Presentation of individual research. May not be applied toward elective requirements for major. May be taken during Winter Quarter of academic year that students enroll in courses 198A and 198B. Letter grading.

192. Practicum in Neuroanatomy for Undergraduate Assistants. (2) Seminar, three hours; laboratory, one hour. Requisites: courses M101A and 102, with grades of A. Limited to senior Neuroscience majors. Training and supervised practicum in neuroanatomy for undergraduate assistants. Students assist faculty members and graduate teaching assistants in laboratory only. May not be applied toward elective requirements and may not be repeated for credit. P/NP or letter grading.

192B. Project Brainstorm: Neuroanatomy K-12 Outreach. (4) (Formerly numbered 192.) Seminar, one hour; fieldwork, three hours. Limited to juniors/seniors. Course to teach to children in the K-12 educational system and teaching assistant advisers. Project Brainstorm is K-12 science education outreach program of Brain Research Institute (BRI) and Neuroscience Ph.D. and undergraduate programs that stimulates interest in science for children and young adults in grades K-12 by providing hands-on learning experiences that emphasize function and importance of brain. Students expected to prepare age-appropriate lesson plans to be used in Project Brainstorm classroom visits. Students meet on regular basis with supervisors and provide periodic reports of their experience. May not be applied toward major requirements. May be repeated twice for credit. P/NP grading.

198A. Honors Research in Neuroscience. (4) Tutorial, 12 hours minimum. Requisites: courses 99, M101A. Limited to neuroscience honors program students. Directed independent research involving extensive reading, participation in laboratory, and development of honors thesis or comprehensive project under direct supervision of faculty member. For departmental honors, students must also take course 191H. Maximum of 8 units of courses 198A, 198B, 199 may be applied toward major. Individual contract required. In Progress grading (credit to be given only on completion of course 198B).

198B. Honors Research in Neuroscience. (4) Tutorial, 12 hours minimum in laboratory. Requisite: course 198A. Continued reading and research that culminate in honors thesis under direct supervision of faculty member. For departmental honors, students must also take course 191H. Maximum of 8 units of courses 198A, 198B, 199 may be applied toward major. Individual contract required. In Progress grading (credit to be given only on completion of course 198B).

199A. Directed Research in Neuroscience. (4) Tutorial, 12 hours minimum. Enforced requisites: courses 99, M101A. Limited to junior/senior Neuroscience majors and minors and those interested in better understanding of how supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. Maximum of 8 units of courses 198A, 198B, 199A, 199B may be applied toward major. Individual contract required. In Progress grading (credit to be given only on completion of course 199B).

199B. Directed Research in Neuroscience. (4) Tutorial, 12 hours minimum. Enforced requisite: course 199A. Specific topic areas include neuronal ultrastructure, synaptic transmission, and LTD models. Letter grading.

199C. Continued Directed Research in Neuroscience. (4) Tutorial, 12 hours minimum in laboratory. Enforced requisite: course 199B or 199B. Limited to junior/senior Neuroscience majors and minors with grades of B (3.0) or better. Continued reading and research that culminate in report under direct supervision of faculty mentor. May not be applied toward major. May be repeated for credit. Individual contract required. Letter grading.

199D. Directed Research in Neuroscience. (4) Tutorial, 12 hours minimum. Enforced requisite: course 191A. Limited to junior/senior Neuroscience majors and minors with grades of B (3.0) or better. Continued reading and research that culminate in report under direct supervision of faculty mentor. May not be applied toward major. May be repeated for credit. Individual contract required. Letter grading.

Scope and Objectives The Interdepartmental Neuroscience Ph.D. Program prepares students for careers in neuroscience research and education. The hallmark of the program is an integrated approach to study of the nervous system, using the multi-level analytical tools of molecular, cellular, systems, and/or behavioral biology, as well as quantitative approaches from the fields of mathematics, physics, and engineering. Students working at one or two analytical levels nevertheless learn to appreciate the methods and advantages of other levels of analysis. Emphasis is both on mechanisms of neural function and the biological basis of disease. Students select their research mentor from the list of all neuroscience faculty at UCLA.

Graduate Study Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/ gassaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree The Neuroscience Program offers the Doctor of Philosophy (Ph.D.) degree in Neuroscience.

Neuroscience Graduate Courses

M201. Cell, Developmental, and Molecular Neurobiology. (6) (Same as Molecular, Cell, and Developmental Biology M220 and Neurobiology M200B) Lecture six hours. Fundamental topics concerning cellular, developmental, and molecular neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotropic factors. Letter grading.

M202. Cellular Neuropathology. (4) (Same as Neuropathology M200F and Physiological Science M202.) Lecture, three hours; discussion, two hours. Requisites: Physiological Science 111A (or M180A or Physics 6B). 166. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Letter grading.

M203. Neuroanatomy: Structure and Function of Nervous System. (4) (Same as Biomedical Engineering M283.) Lecture, three hours; discussion/laboratory, three hours. Anatomy of central and peripheral nervous system at cellular histological and regional systems level, with emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems. Letter grading.

M204. Synapses, Cells, and Circuits. (4) (Same as Neurobiology M200A.) Lecture, three hours; laboratory, two hours. Fundamental topics concerning subcellular, cellular, and structural organization of nervous system. Specific topic areas include neuronal ultrastructure, cellular neurobiology, neuroanatomy, neural circuitry, and imaging. Letter grading.
205. Systems Neuroscience. (4) Lecture/discussion, four hours. Introduction to fundamentals of systems neuroscience with emphasis on integration of molecular mechanisms, cellular processes, anatomical circuits, and behavioral analysis to understand function of neural systems. Letter grading.

M206. Neuroengineering. (4) (Same as Biomedical Engineering M255A, Electrical Engineering M255B.) Lecture, four hours; laboratory, three hours; outside study, five hours. Requisites: Mathematics 32A, Physics 1B or 6B. Introduction to principles and technologies of biotechnology and neural signal recording, processing, and stimulation. Topics include biotechnology, electrophysiology (action potentials, local field potentials, EEG, ECOC), intracellular and extracellular recording, microelectrode technology, neural signal processing (neural signal frequency bands, filtering, spike detection, spike sorting, stimulus artifact removal), brain-computer interfaces, deep-brain stimulation, and prosthetics. Letter grading.

207. Integrity of Scientific Investigation: Education, Research, and Career Implications. (2) Discussion, two hours. Designed for graduate students. Debate on topics related to ethical conduct of scientific investigation, with emphasis on critical thinking. Topics include scientific misconduct, mentoring, data ownership, authorship, peer review, use of animals and humans in biomedical research, conflicts of interest, technology, and scientific integrity. S/U grading.

210A-210B-210C. Introduction to Current Literature in Neuroscience. (2-2-2) Discussion, two hours. Critical perspective of current research in neuroscience with emphasis on topics related to topics of the five core courses in neuroscience graduate curriculum. S/U grading.

215. Variable Topics Research Literature Seminars: Neuroscience. (1) Seminar, two hours. Critical discussion and analysis of current literature for various neuroscience research topics. Only one topic may be taken for credit or can be applied toward neuroscience graduate requirements. S/U grading.

M220. Biology of Learning and Memory. (4) (Same as Molecular, Cellular, and Integrative Physiology M220A, Neurobiology M220B, and Biomedical Engineering M220C.) Lecture, four hours. Molecular, cellular, circuit, systems, neuroanatomy, theory, and models of learning and memory. Cross-disciplinary focus on learning and memory to provide integrative view of subject that emphasizes emerging findings that take advantage of novel groundbreaking models. Letter grading.

M221. Sensory Systems Neurobiology. (4) (Same as Neurobiology M220C.) Lecture, two hours; discussion, two hours. Fundamental topics in sensory systems neurobiology, including sensory transduction, taste and olfaction, audition, vision, and somatosensory systems. Letter grading.

M230. Molecular and Cellular Mechanisms of Neural Integration. (5) (Same as Physiological Science M210 and Physiology M210.) Lecture, four hours; discussion, one hour. Requisite: course M202. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration involving learning, sensory, motor, processing, and neuronal events in development and sexual differentiation. Letter grading.

240. Phenotypic Measurement of Complex Traits. (4) Lecture, three hours. Preparation: background in human genetics helpful. Integrative approach to understand gene to behavior pathways by examination of levels of gene expression, such as schizophrenia, Alzheimer’s disease, linking of these diverse approaches in genetic research to map out integrative system of understanding basis of complex human behavior. Emphasis on understanding of methods used at each level of phenotype analysis, along with major resources that can be accessed to gain insight to gene-behavioral links. Letter grading.

250. Neural Development and Repair. (4) Lecture, four hours. Specific training in neural development and repair. Each module offers different research topic and provides perspective on its relevance to human diseases, treatments, and unmet needs for future research. Letter grading.

255. Functional Organization of Behavior. (2) Lecture, two hours. Changes in neuronal properties supporting learned behavior. Different type of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotrophic factors. Letter grading.

M267. Advanced Magnetic Resonance Imaging. (4) (Same as Biomedical Physics M266 and Psychiatry M266.) Lecture, four hours. Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction more intuitive than mathematical. Letter grading.

M273. Neural Basis of Memory. (4) (Same as Psychology M270.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

275. Advanced Techniques in Neurobiology. (2) Lecture, one hour; laboratory, one hour. Preparation: basic biology and chemistry. Designed to provide introduction and, when possible, practical demonstration of the number of techniques used in neurochemical research, with emphasis on techniques used for identification, measurement, and visualization of compounds thought to be important as mediators of intercellular communication in central nervous system. S/U or letter grading.

CM277. Drugs of Abuse from Neurobiology to Policy and Education. (4) (Formerly numbered C277.) (Same as Community Health Sciences M280.) Lecture, four hours. Prerequisite: course M101A. Course ranges from synapse to society. Provides intensive didactic on current neuroscientific basis for understanding substance abuse and blends that material with relevant topics such as epidemiology, co-occurring disorders, treatment options, prevention, and public policies, with emphasis on communication of course materials to general public. Concurrently scheduled with course M277.

M285. Functional Neuroimaging: Techniques and Applications. (3) (Same as Biomedical Engineering M284, Biomedical Physics M285, Psychiatry M285, and Psychology M248.) Lecture, two hours. In-depth examination of activation imaging, including MRI and electrophysiological methods, data acquisition and analysis, experimental design, and results obtained thus far in human systems. Strong focus on understanding technologies, how to design activation imaging paradigms, and how to interpret results. Laboratory visits and design and implementation of functional MRI experiment. S/U or letter grading.

M287. Dynamics of Neural Microcircuits. (4) (Same as Neuroscience M287.) Lecture, two hours; discussion, two hours. Development of integrative understanding of neural microcircuits that underlie specific functions of sensory processing, generation, and coordination of motor activity, as well as generation and modulation of neural rhythms. Letter grading.

M293. Culture, Brain, and Development Forum. (1) (Same as Anthropology M293, Applied Linguistics M292, Education M285, and Psychology M248.) Seminar, 90 minutes every other week. Interdisciplinary seminar series to provide students with exposure to current research in understanding complex relationship between culture, brain, and development. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. Designated for students requiring special instruction or time to work on dissertation. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged. S/U grading.

597. Preparation for Ph.D. Qualifying Examination. (2 to 12) Tutorial, to be arranged. S/U grading.

599. Dissertation Research for Ph.D. Candidates. (2 to 12) Tutorial, to be arranged. Designed for students requiring special instruction or time to work on dissertation. S/U grading.

NEUROSURGERY

David Geffen School of Medicine

UCLA
6236 Reagan UCLA Medical Center
Box 957436
Los Angeles, CA 90095-7436
(310) 267-9449
fax: (310) 267-3841
http://neurosurgery.ucla.edu

Chair
Neil A. Martin, M.D. (W. Eugene Stern Professor of Neurosurgery)

Scope and Objectives

Neurosurgery is a discipline of medicine that provides (1) operative and nonoperative management (i.e., critical care, prevention, diagnosis, evaluation, treatment, and rehabilitation) of disorders of the central, peripheral, and autonomic nervous systems, including their supporting structures and vascular supply, (2) the evaluation and treatment of pathological processes that modify the function or activity of the nervous system, including the hypophysis, and (3) the operative and nonoperative management of pain paradigms.

As such, neurosurgery encompasses treatment of adult and pediatric patients with disorders of the nervous system — disorders of the brain, meninges, and skull and their blood supply, including the extracranial carotid and vertebral arteries, disorders of the pituitary gland, disorders of the spinal cord, meninges, and vertebral column, including those that may require treat-
ment by spinal fusion or instrumentation, and disorders of the cranial and spinal nerves throughout their distribution.

For further details on the Department of Neurosurgery, see http://neurosurgery.ucla.edu.

Nursing

Upper Division Course

199. Directed Research in Neurosurgery. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Scope and Objectives

A strong scientific basis underlies the teaching of nursing practice, leadership, and research. Related clinical experiences are arranged within the Reagan UCLA Medical Center, its affiliates, other major medical centers, or in selected community sites.

At the bachelor's level, nurses are prepared as generalists with special skills in primary, secondary, and tertiary prevention and care within a population-based context, leadership, and evidence-based practice. A program designed for associate degree or diploma nurses provides an opportunity to learn about community-based nursing care while providing a foundation for entering the advanced practice nurse master's degree program. At the master's level, nurses are prepared as generalists in hospital-based care or for advanced nursing practice as nurse practitioners, clinical specialists, or administrators in a variety of settings and specialized areas of healthcare. The Ph.D. program prepares scholars who do original research, generate new theories, and build the scientific basis for professional nursing practice. Research is both basic and applied.

Undergraduate Study

The Undergraduate Council of the UCLA Academic Senate suspended admissions to the Nursing B.S. (R.N. to B.S.,postlicensure) program effective Fall Quarter 2011.

The Nursing (Prelicensure) major is a designated capstone major. Students complete a clinically based scholarly project that is approved by a designated faculty member. In completing the capstone course, students should select, evaluate, and apply appropriate theory and research findings concerning individual- and population-based health promotion and disease prevention, biobehavioral and health systems, and social environmental, cultural, and human diversity to the nursing process. They should utilize the nursing process to promote biopsychosocial health and disease prevention and to support the resources of culturally diverse clients and families in community- and/or hospital-based settings.

Through their work, students should demonstrate effective communication and collaboration skills with clients and their families, research participants, other health professionals, colleagues, and policymakers. They also should identify practice-based problems and hypotheses and critique research on issues of importance to nursing and healthcare delivery; participate effectively in relevant professional and community organizations and/or interest groups; demonstrate leadership as a member of the health team to plan, manage, and evaluate care of individuals, families, and communities for culturally diverse populations; and practice their work based on the principles of ethics, social justice, and law.
Two undergraduate programs are offered: Nursing B.S. (Prelicensure) for nonnurses and Nursing B.S. (R.N. to B.S./Postlicensure) for registered nurses.

**Nursing B.S. Prelicensure**

**Capstone Major**

The focus of the prelicensure program is on the preparation of nurse generalists with special skills in primary, secondary, and tertiary prevention and care within an individual- and population-based context while developing the basics for a strong leadership role. Students learn the art and science of nursing using the latest research findings to guide their practice.

**Admission**

The School of Nursing strives to attract a culturally and ethnically diverse student population. Admission is designed for freshman students and transfer students at the junior level. Freshman applicants are expected to fulfill the University of California admission requirements. Transfer applicants are expected to fulfill the Intersegmental General Education Transfer Curriculum (IGETC). Students must have a grade of C or better in each requisite course and an overall grade-point average of 3.5 or better.

Two recommendation forms and a written statement of purpose are also required. Diverse life experiences, including previous employment, volunteer work, and community service that reflect leadership, responsibility, multicultural involvement, multilingual abilities, and other unusual skills and knowledge are evaluated for all applicants. Consideration is also given to students who are socially, economically, and educationally disadvantaged. Completed applications should reflect clearly identified career goals and documentation of potential for nursing practice.

**Preparation for the Major**

**Required:** Chemistry and Biochemistry 14A, 14B, 14C, Communication Studies 1 or 10, Life Sciences 2, 3, Microbiology, Immunology, and Molecular Genetics 10, Nursing 10, 20, 50, 54A, 54B, Physiological Science 3, 13, Psychology 10.

**Transfer Students**

Transfer applicants to the Nursing major with 90 or more units must complete the following introductory courses prior to admission to UCLA: communications, human anatomy, human physiology, inorganic and organic chemistry, cells, tissues, and organs, molecular biology, and psychology.

**The Major**

**Required:** Biostatistics 100A, Nursing 115, 150A, 150B, 152W, 160, 161, 163, 164, 165A, 165B, 166, 167, 168, 171, 173, 174, and completion of a capstone senior scholarly project (course 168). Transfer students must complete Nursing 10, 20, 50, 54A, and 54B on entry. Students may request to pursue a minor in a related field if the coursework can be completed within the 216-unit limit.

The curriculum at UCLA must be completed with a minimum overall grade-point average of 2.0 (C) or better in all courses taken while a student in the School of Nursing.

Each required nursing course in the school must be completed with a grade of C or better (C– grade is not acceptable).

**Nursing B.S. R.N. to B.S./Postlicensure**

The Undergraduate Council of the UCLA Academic Senate suspended admissions to the Nursing B.S. (R.N. to B.S/postlicensure) program effective Fall Quarter 2011.

The focus of the R.N. to B.S./postlicensure program is on community-based nursing care and cultural and human diversity. The curriculum is designed to assist registered nurses in gaining new knowledge needed for professional nursing in a changing society and to build on their earlier associate degree or diploma education.

The program also provides a bridge for students who may wish to prepare for advanced practice study at the graduate level.

Emphasis is placed, throughout the curriculum, on concepts related to (1) contributing to the viability of academic health centers through responsiveness to community needs, (2) improving care of the underserved in community clinics in inner-city urban and rural settings, and (3) redesigning the role of public (community) healthcare through community outreach, home-based health services, and population-based health promotion.

**Admission**

The School of Nursing strives to attract a culturally and ethnically diverse student population. Admission, beginning in the junior year, requires licensure as a registered nurse and a minimum of one year of full-time experience as an R.N. within the past five years, completion of requisite courses, scholarship, and attainment of a passing score on four Excelsior College Examinations. Students must have a grade of C or better in each requisite course and an overall grade-point average of 3.0 or better prior to admission.

Three recommendation forms and a written statement of purpose are also required. Diverse life experiences, including previous employment, volunteer work, and community service that reflect leadership, responsibility, multicultural involvement, multilingual abilities, and other unusual skills and knowledge are evaluated for all applicants. Consideration is also given to students who are socially, economically, and educationally disadvantaged. Completed applications should reflect clearly identified career goals and documentation of potential in advanced practice nursing.

Transcripts of all high school and college work must be submitted to the UCLA Office of Undergraduate Admissions and Relations with Schools and the School of Nursing. Applicants already enrolled at UCLA need to submit transcripts to the School of Nursing.

**Preparation for the Major**

**Required:** Completion of each University and school requirement course with a grade of C or better (C– grade is not acceptable) prior to admission as follows: human anatomy (one course), sociocultural anthropology (one course), humanities (one or more courses), introductory or general microbiology with laboratory (one course), introductory organic chemistry (one course or one year of high school physics with laboratory with a grade of B or better), human physiology (one course), introductory psychology (one course), introductory sociology (one course).

**The Major**

**Required:** Completion of 76 to 85 units of lower and upper division coursework, including Biostatistics 100A, Chemistry and Biochemistry 14A, 14B, 14C, Life Sciences 2, 3, Nursing 50, 102, 109, 152W, 160, 168, 171, 173, 174, 200, 220, and one or more courses from 213A, 214F, 216F, 219A, 232F, and three 4-unit electives related to nursing to be selected with consent of the adviser, depending on student interest and area of concentration.

The curriculum at UCLA must be completed with a minimum overall grade-point average of 2.0 (C) or better in all courses taken while a student in the School of Nursing.

Each required nursing course in the school must be completed with a grade of C or better (C– grade is not acceptable).

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, [http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm](http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm). In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Graduate Degrees**

The School of Nursing offers the Master of Science in Nursing (M.S.N.) degree and the Doctor of Philosophy (Ph.D.) degree in Nursing. A concurrent degree program (Nursing M.S.N./Management M.B.A.) is also offered.

**Nursing**

**Lower Division Courses**

10. **Introduction to Nursing and Social Justice I.** (2) Lecture, two hours. Within context of history of nursing, introduction to practice of nurses, including role of advocacy. Discussion of effective use of self as professional nurse in relation to ethics, cultural competence, and human diversity. Introduction to ethical principles (justice, autonomy, veracity, beneficence, confidentiality) and professional values (altruism, autonomy, human dignity, integrity, and social justice) in relation to nursing practice throughout history in health/illness and end-of-life contexts. Letter grading.

20. **Introduction to Nursing and Social Justice II.** (2) Lecture, two hours. Advanced discussion on history of nursing, with focus on role of contemporary nursing in relation to ethics and social justice. Analysis of ethical principles (justice, autonomy, veracity, beneficence, confidentiality) and professional values (altruism, autonomy, human dignity, integrity, and social justice) in relation to nursing practice throughout history in health/
illness and end-of-life contexts. Evaluation of social, cultural, legal, and political forces in relation to paternalism for professional nurses working with diverse patient populations in the 21st century. Letter grading.

50. Fundamentals of Epidemiology. (4) Lecture, three hours; laboratory, three hours. Epidemiology focuses on distribution and determinants of health-related states in specified populations. Fundamentally, epidemiology seeks to control health problems in communities and institutions. Letter grading.

54A. Pathophysiology I. (3) Lecture, three hours. Preparation: Human physiology course taken within past five years. Designed to provide students with basic understanding of pathophysiological changes that occur within internal environment of individuals. Understanding these alterations is basic to providing quality nursing care. Discussion of system variations across lifespan. Letter grading.

54B. Pathophysiology II. (2) Lecture, two hours. Requisites: course 54A. Designed to provide students with understanding of pathophysiological changes that occur within internal environment of individuals. Presence of dysfunction or disease of selected systems provided as rationale for nursing diagnosis and therapeutic interventions. Letter grading.

Upper Division Courses

102. Professional Nursing in Culturally Diverse Communities. (5) Lecture, four hours; community experience, three hours. Introductory course to assist registered professional nurses in providing culturally sensitive nursing in context of complex and dynamic healthcare systems. Analyses include individual and population-based approaches to healthcare in dynamic multicultural communities. Letter grading.

105. Human Physiology. (4) Lecture, three hours; discussion, one hour. Designed for nursing students. Lecture and discussion, with emphasis on a correlational approach to anatomy and physiology of human body. P/NP or letter grading.

109. Human Diversity in Health and Illness. (4) (Formerly numbered C109.) Lecture, four hours. Human diversity in response to illness that nurses diagnose and treat, centering on culture and human health systems associated with diverse orientations related to ethnicity and gender. Provides conceptual base that nurses can use in clinical practice, research, teaching, and administration. Letter grading.

150A. Fundamentals of Professional Nursing. (4) (Formerly numbered 150B.) Lecture, four hours. Introduction to practice of professional nursing as theory-based goal-directed method for assisting patients to meet basic human needs at various levels of health continua. Concepts of communication, interdisciplinary communication and collaboration, interpersonal relationships, and nursing process as clinical decision-making strategy essential to practice of professional nursing. Essentials of nutrition, characteristics and roles of professional nursing. Development of caregiver, teacher, and collaborator roles in learning experiences in nursing skills laboratory and clinical settings. Letter grading.

150B. Fundamentals of Professional Nursing Laboratory. (1) Laboratory, three hours. Corequisite: course 150A. Introduction to practice of professional nursing as theory-based goal-directed method for assisting patients to meet basic human needs at various levels of health continua. Concepts of communication, interdisciplinary communication and collaboration, interpersonal relationships, and nursing process as clinical decision-making strategy essential to practice of professional nursing. Learning experiences in nursing skills laboratory and clinical settings. P/NP grading.

152W. Human Development/Health Promotion in Culturally Diverse Populations. (5) (Formerly numbered 152.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Limited to nursing students. Introduction to primary prevention strategies as they pertain to infant development, including, using population-based approach to nursing care of diverse populations. Priorities in nutrition and reproductive health, including issues related to contraception and parenting, pre-child care, school-age health, and chronic illness prevention strategies for young and middle-aged adults; elderly who live independently in communities or within institutions. Analysis of influence of overarching population and governmental systems within U.S. Satisfies Writing II requirement. Letter grading.

158. Culture, Illness, and Healing. (4) (Same as Anthropology M158B.) Lecture, four hours. Medical anthropology is organized around holistic exploration of ways in which health, illness, and medical practices are socially and culturally mediated. Topics include health and illness in diverse societies, health and illness patterns of care seeking, therapeutic practices, and medical systems in context of different social and cultural settings, including our own. P/ NP or letter grading.

160. Secondary Prevention. (4) (Formerly numbered C160.) Lecture, four hours. Requisite: course 152. Corequisite: course 161. Screening and early detection of illness to prevent chronic or acutely deteriorating illness. Emphasis on human development and nursing care for patients and their families at earliest possible time to prevent disability or premature mortality. Examination of health problems of individuals within context of family, social and community systems, and interdisciplinary systems. Emphasis on differences in developmental stages in response to screening for early and late signs and symptoms of illness in ambulatory and acute care settings, community agencies, rehabilitation units, outpatient specialty clinics and surgical units, and home and community settings. Letter grading.

163. Medical-Surgical/Gerontology I. (9) Lecture, five hours; clinical, 12 hours. Requisites: courses 115, C160, 174. Examination of pathophysiological and psychosocial aspects of assessment and management of selected common acute and chronic problems of adult patients/clients with emphasis on social, cultural, and developmental influences. Integration of knowledge of pathophysiology, diagnostics, pharmacology, therapeutics, and communication concepts as applied to care of pediatric clients. Discussion of application of nursing process to problem solving and critical thinking. Letter grading.

165B. Tertiary Prevention and Care: Pediatrics. (3) Lecture, three hours. Requisites: courses 162A, 162B, 163, 164. Corequisite: course 167. Examination of pathophysiological and psychosocial aspects of assessment and management for selected acute and emergent problems of patients/clients across lifespan, with emphasis on social, cultural, and developmental influences. Building on prior knowledge and experience, integration of basic knowledge of pathophysiology, diagnostics, pharmacology, therapeutic interventions, and communication concepts as applied to care of pediatric clients. Discussion of application of nursing process to problem solving and critical thinking. Letter grading.

166. Medical-Surgical/Gerontology II. (9) Lecture, five hours; clinical, four hours. Requisites: courses 162A, 162B, 163, 164. Examination of pathophysiological and psychosocial aspects of assessment and management for selected acute and emergent problems of adult patients/clients with complex illness, including multifaceted assessment, health history, and diagnostic reasoning skills, with emphasis on social, cultural, and developmental influences. Integration of knowledge of pathophysiology, diagnostics, pharmacology, therapeutics, and communication concepts as applied to care of medical and surgical adult/geriatric patients. Supervised practicum experience within setting of multidisciplinary team on medical-surgical/geriatric clinical units, with focus on application of theory in clinical interpretation of assessment and diagnostic data for purpose of planning, implementing, and evaluating course of care for patients, both as individuals and cohorts. Intermediate-level assessment, health maintenance, and management of symptoms across lifespan. Letter grading.

168. Advanced Leadership and Role Integration. (5) Lecture, four hours; fieldwork, three hours. Leadership and management theory and practice, resource allocation and management, delegation, conflict resolution, legal implications and practice, managed care, evaluation of practice, continuous quality improvement, accreditation process for healthcare systems, and contemporary issues in workplace. Emphasis on integration of all professional role behaviors, application of research, and leadership-management of care as transi-
tion is made from student role to that of practicing nurse. Letter grading.

171. Public Health Nursing. (6) (Formerly numbered 171C). Lecture, three hours; clinical, nine hours. Requisites: courses 165A, 165B, 461, 464, 465. Communication and research competencies for health promotion and disease prevention at level of communities, other large population aggregates, and systems. Clinical practicum concentration on population-based public health nursing in culturally diverse settings, including health departments, health policy institutions, and public service agencies. Emphasis on communication and disease prevention at level of communities, aggregate, whole populations, and systems, both domestically and internationally. Letter grading.

195. Introduction to Research. (4) Lecture, four hours. Requisite: one hour. Introduction to planning research project based on simple question. Specific components of research activities analyzed: specific aims and study purposes, variable definition, sample selection, data collection tools, data analysis, and ethical conduct in research studies. Critique of research reports. P/NP or letter grading.

174. Physical Assessment. (4) Lecture, three hours; laboratory, three hours. Designed to provide in-depth review and synthesis of physical assessment skills and knowledge covering lifespan. Individual study, use of audiovisual aids, physical assessment skills practice in laboratory, and required text are mandatory. Letter grading.

188. Special Topics in Nursing. (4) Lecture, three hours; discussion, one hour. Limited to junior/senior Nursing majors. Sponsoring faculty to arrange reading and/or temporal or permanent courses, as those taught by visiting faculty members. May be repeated for credit. P/ NP or letter grading.

190. Research Colloquia in Nursing. (1) Seminar, one hour. Designed to bring together students under supervision of a research faculty member. Requisite: prerequisite course 202A. May be repeated for credit. P/NP grading.

193. Journal Club or Speaker-Seminar Seminars: Nursing. (1) Seminar, two hours; outside study, four hours. Independent study. Graduate students. Discussion of readings selected from current literature of field or of topics related to guest speaker series. May be repeated for credit. P/NP grading.

196. Research Apprenticeship in Nursing. (2 to 4) Tutorial, four hours. Requisite: one hour. Limited to junior/senior Nursing majors. Individual study with scheduled meetings to be arranged between faculty member and student. Individual contract required. P/NP or letter grading.

197. Individual Studies in Nursing. (2 to 4) Tutorial, two hours. Limited to junior/senior Nursing majors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

201. Health-Related Quality of Life. (2) Lecture, two hours. Theoretical foundations of health-related quality of life as an outcome of disease, treatment, and style of care. Analysis of meaning, dimensions, predictors, measures, ethical dilemmas, cultural diversity issues, and biobehavioral foundations of health-related quality of life. Letter grading.

202. Philosophy of Nursing Science. (4) Lecture, four hours. Exploration of concepts of importance related to history of philosophy, history of science, and philosophy of nursing science. Genealogies of thought that underpin assumptions about knowledge and knowledge development in relation to discipline of nursing and of questions related to methods of inquiry and scientific reasoning. Contemporary schools of thought (modern and postmodern) analyzed, with emphasis on their philosophical and historical roots in relation to nursing scholarship and nursing science. Letter grading.

203A. Basic Statistics and Fundamentals for Analysis. (4) Lecture, four hours. Preparation: one upper division statistics course. Introduction to applied statistics, including design, analysis of variance, correlation techniques, and regression. Sample size calculations, parametric versus nonparametric tests, and concepts of database design, management using statistical package programs. Letter grading.

203B. Statistical Approaches for Complex Nursing Phenomena. (4) Lecture, four hours. Requisites: course 203A. Use of multiple linear regression, including model validation techniques, and principal components analysis, factorial and repeated measure analysis of variance models, logistic regression, analysis of survival data. Letter grading.

204. Research Design and Critique. (4) Lecture, 90 minutes; discussion, one hour. Requisite: course 173 or equivalent upper division basic research methodology course. Complex research designs and analysis of multiple variables, and research utilization. Emphasis on techniques for control of variables, data analysis, and interpretation of results. Analysis in depth of interrelationship of theoretical frameworks, design, sample selection, data collection instruments, and data analysis techniques. Content discussed in terms of clinical nursing research problems and how these apply to clinical settings. Letter grading.

205A. Introduction to Qualitative Methods in Research. (4) Lecture, four hours. Requisites: course 202A. Introduction to qualitative research design in nursing science. Examination of major methodologies that guide qualitative research in relation to various strategies for data collection (interviews, participant observation, focus groups), data analysis, and data interpretation. Scientific rigor and ethical concerns for research with human participants critically examined. Letter grading.

205C. Advanced Qualitative Research Methodology III. (4) Lecture, four hours. Requisite: course 205B. Advanced techniques for simultaneous collection and analysis of qualitative data. Expansion on traditional grounded theory analysis procedures by learning and applying statistical analysis and constructivist grounded theory techniques to analysis of data. Development of conceptual formulation (or grounded theory) of student-selected phenomenon based on pilot study data collected and analyzed as part of course. Letter grading.

206. Nursing Theory Development. (4) Lecture, four hours. Critical examination of theoretical and conceptual thinking in nursing and issues that continue to influence development of nursing knowledge and nursing science. Application of analytical and evaluative skills fundamental to development of theory in nursing and integral to use of theory in nursing research. Letter grading.

207. Quantitative Research Designs of Clinical Phenomena. (4) Lecture, three hours; discussion, one hour. Introduction to various research designs for testing clinical nursing phenomena. Emphasis on dynamic interaction between research process and theory, as well as on appropriate use of empirical and quasi-experimental or experimental designs among diverse populations. Approaches for evaluation of validity of various research designs, with analysis of related threats to validity of each design. Letter grading.

209. Human Diversity in Health and Illness. (4) (Formerly numbered 209L). Lecture, four hours. Human diversity in response to illness that nurses diagnose and treat, centering on culture and human belief systems associated with diverse orientations related to ethnicity and gender. Provides conceptual base that nurses can use in clinical practice, research, teaching, and administration. Letter grading.

210. Nursing Research I. (Formerly numbered 210A). Lecture, four hours. Designed for PhD students. Exploration of phenomena of interest to nurses in past and present in relation to traumatic events (across environments of control, health, and nursing). Investigation of state of science in nursing, with special focus on health service, biologic, vulnerable populations, and biobehavioral nursing research. Integration and synthesis of current and historical scholarly findings of particular phenomena in literature to identify meaningful gaps in knowledge and directions for future research. Letter grading.

211. Theoretical Foundations of Women's Health Nursing during Reproductive Years. Lecture, two hours; discussion, one hour. Theory and research on assessment and management of women's health issues during reproductive years. Clinical topics include gynecology, family planning, childbearing, and postpartum care, with emphasis on health promotion of women during reproductive years in primary care systems. Letter grading.

212. Health-Related Family Theory. (2) Lecture, two hours. Overview of conceptual frameworks related to contemporary family structure and functioning, with particular emphasis on health. Family is defined broadly to include nontraditional families and members with cross-cultural views of families as well. Identification of limitations of current theory and research related to family study and applicability of current knowledge to various problems encountered in care of families. Letter grading.

Strategies for data collection, and basic coding. Exploration of self-reflexivity and ethics in relation to entry to field, recruitment of pilot study participants, interview, and preliminary data analysis via analytic, theoretical, and reflective memos based on pilot study data collected as part of course. Letter grading.
214A. Seminar: Advanced Concepts in Oncology Nursing I. (2) (Formerly numbered 214, 214F.) Seminar, two hours. Enforced requisite: course 216B. Designed for adult/gerontology acute care oncology specialty nurses and oncology clinical nurse specialists. Synthesis, critique, and application of oncology research and evidence-based practice guidelines to support nursing management decisions in diverse populations. Theories and research related to health history/risk assessment, cancer diagnosis and staging, treatment, rehabilitation, oncologic emergencies, and management of symptoms and psychosocial issues to provide family-focused care. Examples focused on major drug classes. Letter grading.

215A. Qualitative Research Design and Methodology for Indigenous Communities. (5) (Same as American Indian Studies M202 and Health Services M202.) Seminar, three hours. Introduction to some key theoretical themes in American Indian studies and explorations and identifications of research methods and principles in research on American Indian cultures, societies, languages, and other issues. Quantitative methods (design, appropriate use), with emphasis on qualitative research methods emphasizing numbers in conducting research in American Indian country. Design of research and exploration of feasibility of researching topics. Letter grading.

215B. Qualitative Research Methods. (4) Lecture, five hours. Enforced requisite: course 231. Preparation for prescriptive authority, focus on major drug classes and their mechanisms of action, pharmacokinetics, adverse effects, and clinical uses. Advanced knowledge of and expectations for clients/patients with stable acute or chronic conditions. Letter grading.

216A-216B-216C. Adult/Gerontology Concepts for Advanced Practice Nurses in Acute Care I, II, III. (4-4-4) Lecture, four hours. Enforced requisites: courses 200, 231. Enforced corequisite for course 216A: course 224. Course 216A is enforced requisite to 216B, which is enforced requisite to 216C. Assessment and management of health problems affecting adult/gerontology population from late adolescence to senescence in acute care settings. Synthesis of knowledge from advanced courses in pathophysiology, pharmacotherapeutics, health promotion, and evidence-based psychosocial care and cultural constraints. Letter grading.

218C. (4) Lecture, four hours. Enforced requisite: course 218B. Project management, organizational communication, governance, change, introduction to change, introduction to organizations, risk management, liability, and ethics of administration decision making. Emphasis on issues affecting local, national, and international healthcare settings. Letter grading.

219A. Essentials of Accounting and Budgeting in Healthcare Administration. Lecture, two hours. Enforced requisite: requirements of management, organization, and administration presented in relation to techniques of account-
236. Essential Theoretical Foundations of Primary Care of Children. (4) Lecture, four hours. Requisite: course 225A. Theoretical family nurse practitioner framework to assume responsibility for health promotion and illness prevention, and maintenance and management of common developmental, behavioral, acute, and chronic health problems of children, and adolescents in primary healthcare settings. Presentation of conditions or disease, etiology and incidence, clinical findings, differential diagnosis, pharmacologic and treatment options of cognitive, addictive, and affective disorders and patient education measures. Examination of primary child health delivery model reliant on evidence-based knowledge, practice protocols, consultation, referral, and community resources. Letter grading.

239A-239B-239C. Assessment and Management in Adult Healthcare I, II, III. (4-4-4) Lecture, four hours. Letter grading.

239A. Assessment, diagnosis, and management of common adult healthcare problems. Application of biobehavioral theories to the assessment and management of chronic and acute adult healthcare problems and conditions, including urgent care. Presentation of multiple approaches needed for special populations requiring adult healthcare, including developmental, gender, life-stage perspectives, and functional impairment, such as chronic pain and disability. Demonstration of applications and evaluation of evidence-based interventions and clinical guidelines in adult population (adolescence through age old). Letter grading.

239B. Assessment, diagnosis, and management of chronic and acute adult healthcare problems. Application of biobehavioral theories to the assessment and management of chronic and acute adult healthcare problems and conditions, including urgent care. Presentation of multiple approaches needed for special populations requiring adult healthcare, including developmental, gender, life-stage perspectives, and functional impairment, such as chronic pain and disability. Demonstration of applications and evaluation of evidence-based interventions and clinical guidelines in adult population (adolescence through age old). Letter grading.

239C. Assessment, diagnosis, and management of chronic and acute adult healthcare problems. Application of biobehavioral theories to the assessment and management of chronic and acute adult healthcare problems and conditions, including urgent care. Presentation of multiple approaches needed for special populations requiring adult healthcare, including developmental, gender, life-stage perspectives, and functional impairment, such as chronic pain and disability. Demonstration of applications and evaluation of evidence-based interventions and clinical guidelines in adult population (adolescence through age old). Letter grading.

242F. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (4) Lecture, four hours. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuro-psychiatric assessment and diagnosis. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective disorders, with emphasis on developing a biobehavioral nursing approach. Letter grading.

242G. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (4) Lecture, four hours. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuro-psychiatric assessment and diagnosis. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective disorders, with emphasis on developing a biobehavioral nursing approach. Letter grading.

244. Biobehavioral Foundations of Health Promotion/Risk Reduction Systems: Population Level. (5) Lecture, four hours; discussion, two hours. Introduction to primary prevention strategies as they pertain to health and wellness across lifespan, using population-based approach to nursing care of diverse populations. Priorities in nutrition; re- productive health; injury prevention; and mental health. Letter grading.

246. Biobehavioral Foundations of Health Promotion/Risk Reduction Systems: Individual Level. (3) Laboratory, three hours. Focus on application to clinical practice settings that include culturally diverse population groups served by advanced practice nurses. Emphasis on differences in developmental stages in the assessment and management of selected psychosomatic disorders. Discussion of case management, outcomes coordination, leadership, risk anticipation, information technology, and research utilization of master’s entry clinical nurse (MECN) role as it relates to patient/citizen sphere of influence. Letter grading.

249. Meeting Health-Related Needs in Underserved Populations. (4) Lecture, four hours. Requisite: course 438A. Examination of systematic barriers within healthcare settings that limit access to those in greatest need of culturally appropriate interventions. Unmet healthcare needs often result in health disparities and compromising quality of life among underserved, low income, uninsured, marginalized populations. Analysis of current evidence-based strategies and interventions designed to address these clinical problems and improve outcomes in culturally competent manner. Presentation of context of healthcare financing, limited access, and public policy. Letter grading.

250. Ethical Issues, Social Justice, and History of Nursing. (5) Lecture, four hours; discussion, two hours. Emphasis on historical and sociopolitical aspects of the evolution of the role of the nurse and changes in the historical context of nursing practice. Letter grading.

253. Health Promotion/Risk Reduction Systems: Individual Level. (3) Laboratory, three hours. Focus on application to clinical practice settings that include culturally diverse population groups served by advanced practice nurses. Emphasis on differences in developmental stages in the assessment and management of selected psychosomatic disorders. Discussion of case management, outcomes coordination, leadership, risk anticipation, information technology, and research utilization of master’s entry clinical nurse (MECN) role as it relates to patient/citizen sphere of influence. Letter grading.

266. Healthcare Systems/Organizations. (4) Lecture, four hours. Development of understanding of ways health care is organized and delivered. Discussion of totality of healthcare systems, including establishment of public and private healthcare plans and delivery systems, development of managed care systems, common characteristics shared by HMOs/PPOs, and impact of managed care on nursing. Delivery of patient care within integrated care systems and on continuing basis. Emphasis on key theoretical ideas and financial concepts to nursing and healthcare organizations. Letter grading.

267. Healthcare Policy. (3) Lecture, three hours. Requisite: course 266. Analysis of healthcare policies and how political decisions and public healthcare delivery. Discussion of concepts related to policymaking, specifically how to formulate healthcare policy, how to affect political process, and stakeholder involvement in policy development and implementation. Development of understanding of increasing levels of public, governmental, and third-party participation in and scrutiny of direction and healthcare systems. Current mandated assembly bills and their effect on nursing. Concepts associated with escalating healthcare costs and cost containment efforts instilled by private and governmental sectors, as well as by individual healthcare institutions. Letter grading.

269. Quality Improvement and Population-Based Quality of Practice. (4) Lecture, four hours. Requisite: course 268. Principal elements related to quality improvement theories and practices in which quality management impacts delivery of patient-centered and value-driven care, including improved system performance and efficient use of fiscal resources, quality improvement, and patient-population quality practice at organizational level. Review of individual methods to improve patient-care outcomes such as organizational support, effective teamwork, and quality-improvement concepts in workplace. Emphasis on quality management, adverse outcomes, evidence-based clinical and cost-control decision making, patient safety and risk reduction, resource management, and external impacts on quality control. Letter grading.

270. Human Responses to Critical Illness. (4) Lecture, three hours; laboratory, one hour. Requisites: courses 464, 465. Pathophysiological concepts and nursing management for selected critical ill geriatric patients, with focus on effect of critical illness on individual and family health. Key diagnostic and therapeutic modalities that promote effective nursing management of individuals with critical illness addressed. Letter grading.

273. Advanced Seminar: Medical Anthropology. (2 to 4) Same as Anthropology M263Q. Community Health Sciences M244, and Psychiatry M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

288. Variable Topics in Nursing. (4) Lecture, three hours; discussion, one hour. Variable topics; consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit. Letter grading.

295A. Nursing Science Seminar. (1 Seminar, one hour. Introduction to nursing research methods, activities, and programs within specially straitens at UCLA School of Nursing. Emphasis on selected research subjects. S/U grading.

295B-295C. Nursing Science Seminars. (2-2) Seminar, two hours. Requisite: course 295A. Introduction to grant writing, with focus on preparing applications for National Student Research Award. Discussion of requirements of various extramural and specialty organization funding sources, and evaluation criteria identified. Role of external sponsors, institutional and postdoctoral research, research activities, and professional development. S/U grading.

M298. Interdisciplinary Response to Infectious Disease Emergencies. (4) (Same as Community Health Sciences M256, Medicine M256, and Oral Biology M256.) Lecture, three hours; discussion, one hour. Designed to instill in professional students ideas of common emergency health problems and coordinated response, with specific attention to bioterrorism. Examination of tools to help students prevent, detect, and intervene in infectious disease emergencies. Interdisciplinary activities are attended by students in Schools of Dentistry, Medicine, and Public Health during weeks two through five. Letter grading.

299A. Research Research Seminar. (2) Seminar, two hours. Seminar to assist students who are beginning careers in scientific research to understand issues of responsible conduct of research and protection of research subjects. S/U grading.

299B-299C. Nursing Research/Laboratory Experiences. (4-4) Seminar/discussion, one hour; research/laboratory, three hours. Requisites: courses 202, 206. Seminars and research/laboratory-based experiences to assist students to prepare for careers as scientists, with focus on research methodology and mentorship. S/U grading.

299D. Nursing Education Seminar. (2) Seminar, two hours. Discussion of teaching strategies. Requisites: courses 206, 207, 280. Seminar to assist students to prepare for careers in academic settings, with focus on teaching. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation for apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum development at UCLA. May be repeated for credit. S/U grading.

414A-414B. Clinical Practicum: Adult/Gerontology Acute Care Oncology Nurse Practitioners. (6-8) Clinic practicum, 16 hours (course 414A) and 22 hours (course 414B). Enforced requisite: course 416C. Course 414A is enforced requisite to 414B. Assessment and therapeutic interventions in oncology settings with diverse acute adult/growth/gerontology populations. Letter grading.

415A-416B. Adult/Gerontology Acute Care Nurse Practitioner Practicum I, II. (4-6) Clinic practicum, six hours. Enforced requisite: course 440. Course 416A is enforced requisite to 416B. Assessment and therapeutic interventions for selected health problems in acute adult/growth/gerontology populations. Developmental, health promotion, and maintenance needs of clients in relation to family, social, and cultural structures. Letter grading.

416C-416D. Adult/Gerontology Acute Care Nurse Practitioner Practicum III, IV. (4 to 6 each) Clinic practicum, 16 hours. Enforced requisite: course 416B. Course 416C is enforced requisite to 416D. Assessment and therapeutic interventions for selected health problems in acute adult/growth/gerontology populations. Developmental, health promotion, and maintenance needs of clients in relation to family, social, and cultural structures. Letter grading.

416E. Adult/Gerontology Acute Care Nurse Practitioner Practicum V, VI. (6 to 8) Clinic practicum, 24 hours. Enforced requisite: course 416D. Assessment and therapeutic interventions for selected health problems in adult/growth/gerontology populations. Developmental, health promotion, and maintenance needs of clients in relation to family, social, and cultural structures. Letter grading.

418A-418B-418C. Nursing Administration Practicum. (3 or 4 each) Clinic practicum, eight or 11 hours; clinical conference, one hour. Letter grading. 418A. Requisites: courses 219A, 219B, 219D. Synthesis, evaluation, and practical application of organizational theory in practice setting, with emphasis on content presented in course 218A, including organizational structure, processes, and outcomes. 418B. Requisites: courses 218A, 418A. Experience in organizational setting for synthesizing content from course 218B, including strategic planning and management, care delivery system, resource management, and management information systems, professional practice, and meeting accreditation and legal standards. 418C. Requisites: courses 218A, 418B. Experience in organizational setting for synthesizing and evaluating content from course 218C, including processes of project management, organizational communication, governance, development and change, diverse relationships within organization, management responsibility, and ethics of administration decision making.

418D. Nursing Administration Residency. (12) Clinic practicum, 33 hours; clinical conference, one hour. Requisites: courses 219B, 219D. Supervised experiential learning setting as student assumes leadership role in planning, managing, and evaluating administrative projects. Synthesizing of content from course 218B, including strategic planning and management, care delivery system, resource management, management information systems, professional practice, and meeting accreditation and legal standards. 418C. 418A-418B-418C. Nursing Practice Seminar. (3) Clinic practicum, one hour. Letter grading.

429A. Family Nurse Practitioner Practicum I, II. (4) Clinic practicum, 12 hours. Requisites: courses 200, 440. First of five clinical practices designed to prepare family nurse practitioners with knowledge, skills, and competencies necessary to assume role of primary healthcare provider for families and individual patients across lifespan. Use of family-focused framework of care for those who experience common acute and chronic illness, developmental transitions, and health problems. Emphasis on biopsychosocial maintenance, and risk reduction interventions across wide range of diverse populations. Focus on context of community, cultural awareness, and practice in interdisciplinary teams. Letter grading.

429B. Family Nurse Practitioner Practicum II. (4) Clinic practicum, 12 hours. Requisite: course 429A. Second of five clinical practices designed to prepare family nurse practitioners with knowledge, skills, and competencies necessary to assume role of primary healthcare provider for families and individual patients across lifespan. Use of family-focused framework of care for those who experience common acute and chronic illness, disability, and developmental transitions. Emphasis on health promotion, maintenance, and risk reduction interventions across wide range of
diverse populations. Preparation in variety of clinical settings to implement evidence-based practice guidelines and to provide basis for development of interventions and treatment for acute and chronic problems across lifespan. Letter grading.

445. Advanced Practice Nursing: Clinical Nurse Specialist Practicum. (6) Lecture, three hours; clinic, six hours. Restricted to graduate students only. Clinical-surgical/geriatric clinical units, with focus on application of theory in interpretation of assessment and diagnostic reasoning, with emphasis on implementation, and evaluating course of care for patients, both as individuals and cohorts. Beginning-level assessment, health maintenance, and management of symptoms across lifespan. Letter grading.

465. Medical-Surgical/Gerontology II. (9) Lecture, five hours; clinical, 12 hours. Requisites: courses 462, 463, 465. Second course in two-course sequence. Pathophysiologic and psychosocial aspects of assessment and management for selected acute and chronic problems of adults/patients, including psychosocial assessment, health history, and diagnostic reasoning skills and emphasis on social, cultural, and developmental influences and integration of basic knowledge of pathophysiology, pharmacology, therapeutic interventions, and communication concepts as applied to care of adult/geriatric patients. Supervised practicum experiences in multidisciplinary teams in clinical interpretation of assessment and diagnostic data for purpose of planning, implementing, and evaluating course of care for patients, both as individuals and cohorts. Beginning-level assessment, health maintenance, and management of symptoms across lifespan. Letter grading.

495. Nursing Education Practicum. (2) Seminar, six hours. Supervised student teaching internship in preparation for academic roles. In-depth opportunity to gain skills in role of nurse educator within university setting, including application of instructional strategies and evaluation methods. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA assistant dean and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward M.S.N. degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged. Opportunity for individual graduate nursing students to pursue special studies or research interests. May be repeated for credit, but only 4 units may be applied toward graduate degree requirements. S/U or letter grading.

597. Individual Study for Comprehensive Examination. (2 to 4) Tutorial, to be arranged. Opportunity for individual graduate nursing students to prepare for comprehensive examination. May be repeated once for credit, but only 8 units may be applied toward M.S.N. degree requirements. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 12) Tutorial, to be arranged. Individualized faculty supervision of Ph.D. dissertation research by student’s chair. May be repeated for credit, but only 8 units may be applied toward Ph.D. degree requirements. S/U grading.

199. Directed Research in Obstetrics and Gynecology. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Obstetrics and Gynecology

Upper Division Course

199. Directed Research in Obstetrics and Gynecology. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Ophthalmology

Upper Division Course

199. Directed Research in Ophthalmology. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Sherwin J. Isenberg, M.D. (Laraine and David Geber Professor of Ophthalmology), Vice Chair, Harbor-UCLA

Scope and Objectives

Ophthalmology is the medical science that encompasses knowledge concerning the eyes and the visual system. Derived from many basic and clinical fields, this knowledge must be synthesized by the physician and applied to the prevention, diagnosis, medical management, and surgical therapy of ocular disease.

In response to the steadily increasing incidence and growing importance of ocular disorders, the Department of Ophthalmology and the Jules Stein Eye Institute (including the Doris Stein Eye Research Center) are closely coordinated to form a comprehensive center for research in the sciences related to vision, for the care of patients with disease of the eyes and related structures, and for education in the broad field of ophthalmology.

The Department of Ophthalmology provides instruction to medical students during the second, third, and fourth years. Through lectures, demonstrations, discussions, and the opportunity to observe patients and review data on cases with a variety of ocular conditions, students gain knowledge and experience in ophthalmology.

For further details on the Department of Ophthalmology, see http://www.jsei.org/education/.

Scope and Objectives

Oral biology is the area of knowledge that deals with the development, structure, and function of the oral tissues and their interrelationships with other organ systems in normal and disease states. It is a multidisciplinary field that includes cell biology, morphology, molecular biology, biochemistry, neuroscience, immunology, microbiology, and virology. The objective of the graduate program is to provide students with a sound foundation in these areas in order to pursue an academic or research career.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasalibrary/pgmrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Section of Oral Biology in the School of Dentistry offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Oral Biology. A combined D.D.S./Oral Biology M.S. or Ph.D. or advanced certificate training/Oral Biology M.S. or Ph.D. is also offered.

Oral Biology

Graduate Courses

201A. 201C. Advanced Oral Biology. (3-3) Lecture, three hours. S/U or letter grading.

201A. Ontogeny. (3) Lecture, three hours. Evolutionary perspective of cellular development from simple molecules that were formed during first billion years of Earth to development of cells, tissues, and organs of invertebrates and vertebrates. Development of vertebrate feeding apparatus from comparative anatomical and physiological point of view, followed by embryogenesis of orofacial and dental structures of humans. S/U or letter grading.

201C. Pathobiology. (3) Lecture, three hours. Molecular basis of pathogenic processes in tissues of oral cavity. Topics include microbially mediated demineralization of hard tissues, soft tissue infections, carcinogenesis, colonization of mucosal substrates by opportunists, etc. S/U or letter grading.

205A. Methodology in Research Design and Data Analysis. (2) (Formerly numbered 205.) Lecture, two hours. Designed for graduate oral biology students. Integration of didactic lectures in descriptive and inferential statistical techniques and in research design (emphasis on experimental design), presentations of statistical software, and open discussion of specific needs of oral biology students when they design their research. Letter grading.

205C. Advanced Seminar: Comparative Effectiveness and Evidence-Based Research. (2) Seminar, one hour; discussion, one hour. Requirements: courses 205A, 205B (may be taken concurrently). Hands-on experience in process of systematic review, as shared mechanism in comparative effectiveness and evidence-based research. Specialized in methodology and quality of evidence assessments, acceptable sampling analysis, meta-analysis and meta-regression, and Bayesian-derived decision making following utility versus logic model. Students work on examples of their choice and interest in oral biology, medicine, and orthodontics. Letter grading.

206. Current Topics in Oral Immunology. (2) Lecture, two hours. Preparation: basic immunology. Discussion and analysis of current research dealing with immunological issues related to oral health, including HIV, opportunistic oral infections, periodontal pathology, oral immunopathology, caries immunology, endodontic immunology, etc. Letter grading.

208. Genomics and Proteomics in Oral Biology Research. (2) Lecture, one hour; discussion, one hour. Introduction and overview of gene expression and regulation in oral biology research. Techniques and guidelines for current methods of data derivation therefrom. Discussion of implications and applications of genomics and proteomics in diagnostic protocols such as saliva-based diagnostics. Letter grading.

209. Scientific Ethics. (2) Lecture, one hour; laboratory, one hour. Required course in scientific ethics for graduate students in Oral Biology M.S. and Ph.D. programs and for NRSA trainees in School of Dentistry. Letter grading.

212. Proseminar: Oral Biology Research. (2) Seminar, one hour; discussion, one hour. Introductory course for graduate M.S. students. Guest seminars on topics of research in oral biology (pain pathways, immunology, bone biology, microbiology, cancer, and salivary genomics). Followed by discussions led by course chair. Letter grading.

214. Current Research in Osteoimmunology. (2) Seminar, one hour; discussion, one hour. Exploration of oral pathology and how both systems talk to each other. Topics include immune modulation of bone metabolism, osteoblastic niche for hematopoietic progenitors, adult bone marrow stem cell changes, and osteoimmunology in at-risk populations. Letter grading.

215A. Fundamentals of Immunology. (2) (Formerly numbered 215.) Lecture, two hours. Basic cellular and molecular mechanisms involved in responses mediated by immune effectors, with emphasis on immunopa-thology involved in autoimmunity, cancer, and immunodeficiency syndromes. Letter grading.

215B. Current Advanced Research Topics in Immunology. (2) Seminar, one hour; discussion, one hour. Overview of rapidly changing discoveries in very important field of immunology. Directed and student-lent discussions of current cutting-edge research developments in immunology. Letter grading.

226. Craniofacial Growth and Development. (2) Lecture, two hours. Preparation: strong background in histology and embryology. Students acquire, from scientific literature discussed in lecture format, advanced knowledge of relevant aspects of human biology as they apply to classic and current concepts of principles governing growth and development of craniofacial region and related structures. Letter grading.

227. Dental Embryology and Histology. (2) Lecture, two hours. Description and interpretation of important stages in development of oral facial apparatus and histological features of its component tissues. Critique of scientific literature relevant to course content and analysis of current state of knowledge about selected features of oral facial apparatus with special significance to clinical dental specialists. S/U or letter grading.

228. Dental Pharmacology and Therapeutics. (2) Lecture, three hours. Survey of pharmacology, with particular emphasis on how drugs interact with dentistry. General principles of drug action and drug effects on autonomic and central nervous systems. S/U or letter grading.

229A. Culture, Ethnicity, and Health: Implications for Oral Biology and Medicine. (2) Seminar, one hour; discussion, one hour. Examination of sociocultural, biological, and linguistic anthropology to understand factors that influence health and well-being, experience and distribution of illness, prevention and treatment of sickness, healing processes, social relations of therapy management, and cultural importance and utilization of pluralistic medical systems. Theory, perspectives, and methods from clinical medicine, public health, epidemiology, demography, and social sciences. Letter grading.

229B. Anthropological Perspectives on Global Health: Implications for Oral Biology and Medicine. (2) Seminar, one hour; discussion, one hour. What factors determine health, illness, and disease in global context, including political ecology of infectious diseases, child health, and reproductive health, global trade in legal and illegal drugs, demography and health transition, structural adjustment, problems associated with globalization of pharmaceutical industry, biopiracy, and globalization and health equity. Letter grading.

234. Seminar: Developmental Neuroendocrinimmunology. (2) (Formerly numbered M234.) Lecture, two hours. Designed for graduate students. Psychological and biological aspects of health, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmune interaction from developmental perspective. S/U or letter grading.

M255. Interdisciplinary Response to Infectious Disease Emergencies: Dentistry Perspective. (4) Same as Community Health Sciences numbered M255, Medicine M256, and Nursing M256.) Lecture, three hours; discussion, one hour. Designed to instill in professional students ideas of common emergency health problems and coordinated response efforts, with special attention to bioterrorism. Examination of tools to help students prevent, detect, and intervene in infectious disease emergencies. Interdisciplinary sessions also attended by students in Schools of Medicine, Nursing, and Public Health during weeks two through five. Letter grading.

273. Research in Clinical Immunology and Lymphology. (2) Lecture, one hour; discussion, one hour. Forum for discussion of cutting-edge topics in immunology and lymphology from clinical perspective. Emphasis is on immune surveillance and lymph node drainage of oral pathologies associated with AIDS and other diseases. Letter grading.

275. Molecular and Cell Biology for Oral Biology Graduate Students. (3) Lecture, one hour; literature review, one hour. Advanced course on prokaryotic and eukaryotic molecular and cell biology, with emphasis on applications in dental research. Letter grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U grading.

Bo Wei, M.D., Ph.D.

Scope and Objectives
Pathology is the branch of medicine concerned with the causes and development of disease. The goal of the cellular and molecular pathology (CMP) graduate program is to provide students with the knowledge to integrate findings at the molecular, cellular, and systemic levels to understand the causes and progression of disease.

Coursework is designed so that students gain an in-depth knowledge of cell and molecular biology, genetics, and disease mechanisms. Didactic instruction is complemented by participation in seminars and training in the design and execution of original laboratory research. As a result, graduates obtain the expertise to translate and answer questions defined in the clinical area to the laboratory bench and vice versa. See http://www.pathnet.medsch.ucla.edu/edc_p/cmp/home.php for more information.
Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnets.ucla.edu/gasalib/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Pathology and Laboratory Medicine offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Cellular and Molecular Pathology.

Pathology and Laboratory Medicine

Upper Division Course

199. Directed Research in Pathology. (2 to 4) Tutorial, 10 hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M215. Interdepartmental Course: Tropical Medicine. (2) Same as Medicine M215 and Pediatrics M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infe-
tious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

M229. Molecular Mechanisms of Host/Pathogen Interaction. (4) Same as Microbiology M229.) Lecture, two hours; discussion, two hours. Requisites: Biologi-
cal Chemistry 236A-B. Basic molecular mechanisms of microbial interactions with eukaryotic host cells that result in disease or pathogen survival. Topics include pathogenesis of common viruses, bacteria, fungi, and parasites, basis of toxin-mediated cellular damage, and immune suppression of microbial tissue damage. Letter grading.

M237. Cellular and Molecular Basis of Disease. (4) (Same as Biological Chemistry M237.) Lecture, two hours; laboratory, two hours. Preparation: one course each in molecular biology, cell biology, and biological chemistry. Discussion of key issues in disease mechanisms, with emphasis on experiments leading to understanding of these mechanisms. Identification of important questions still remaining unanswered. Letter grading.

M238. Histology and Pathology for Graduate Students. (2) Laboratory, two hours. Designed for UCLA ACCESS or Cellular and Molecular Pathology Ph.D. students. Basic introductory knowledge of normal tissue, pneumatocytic processes, and animal models as observed by light microscopy. Letter grading.

240. Transplantation Immunology from Benchside to Bedside. (4) Lecture, three hours; laboratory, one hour. Preparation: knowledge of basic immunology. Limited to graduate students. New developments in organ transplantation, updates on basic science of immune mechanisms, integration of basic science principles with clinical practice. Letter grading.

256. Seminar: Viral Oncology. (2) Seminar, two hours. Advanced research seminar designed to consider current developments in field. Selection of current subjects and publications dealing with tumor viral oncogenesis, development, and cellular regulation. S/U or letter grading.

M257. Introduction to Toxicology. (4) (Same as Pharmacology M257.) Lecture, two hours; laboratory, one hour. Preparation: knowledge of basic biochemistry, pharmacology, molecular biology, physiology, and statistics courses. Survey of entire landscape of nutrition, biochemical, and genetic aspects of obesity and diabetes and their microvascular and macrovascular complications. Review of descriptive and analytical epidemiology of these seemingly distinct yet clearly clustered disorders, including so-called metabolic syndrome. Study of distributions and determinants of these disorders in Westernized populations to appreciate how and why these epidemics occurred. Through case studies students learn process of generating etiologic hypotheses, using modern molecular epidemiologic methods. Techniques and principles of molecular genetics relevant to epidemiologic studies. Analysis of real data sets that include both genotype and phenotype information, with emphasis on examination of various gene/environment interactions. S/U or letter grading.

260. Immunopathology. (4) Lecture, two hours; dis-
cussion, one hour. Preparation: Immunobiology 261. Advanced information for graduate and advanced undergraduate students regarding immune system anatomy, lymphocyte development, acute and chronic inflammation, hypersensitivity, and autono-
munity. Letter grading.

270. Basic and Clinical Aspects of Developmental Hematology. (4) Lecture, two hours. Graduate- and postgraduate-level course that covers broad range of topics in both basic and clinical aspects of develop-
tamental hematology. Pediatric hematologic disorders provide important paradigm to study other developmental systems. Subjects include hematopoiesis, basic stem cell biology, angiogenesis, alternative models to study developmental hematology (zebrafish and Drosophila), basic physiology of normal and abnormal red blood cells, platelets, and white cells, leukemogenesis and novel therapeutics to treat leukemia, basic and clinical stem cell transplantation, state-of-the-art methods in developmental hematology (genomics, proteomics, and genomics), and clinical trials, and biomathematical modeling and statistics in develop-
tamental hematology. Letter grading.

M272. Stem Cell Biology and Regenerative Medicine. (4) (Same as Molecular, Cell, and Developmen-
tal Biology M272.) Lecture, two hours; discussion, two hours. Designed for graduate students. Presentation of current knowledge of embryonic and adult stem cells and factors that influence stem cell development. Major emphasis on how advances in cell and molecular biology and tissue engineering can be applied to use of stem cells in regenerative medicine. Bio-
ethical and regulatory issues related to stem cell research. S/U or letter grading.

280. Clinical Aspects and Molecular Biology of Bone Marrow Failure Syndromes. (4) Lecture, two hours. Limited to graduate students. Focus on fundamental mechanisms of human disease in addition to normal and abnormal blood cell development. Topics include basic biology and clinical features of aplastic anemia, myelodysplastic syndromes, Dia-
mond Blackfan Anemia, and Fanconi Anemia. Sickle Cell Syn-
drome, Fanconi Anemia, Dyskeratosis Congenital, Para-
oxymal Nocturnal Hemoglobinuria, flow cytometry, and research approaches to study bone marrow failure syndrome. Journal club sessions include discussion of two journal articles per meeting — one clinical and one basic/translational. Students present at least one journal article and lead group discussion. S/U or letter grading.

294. Basic Concepts in Oncology. (4) Lecture, three hours. Fundamental biological, genetic, and molecular process involved in genesis and growth of cancer cells and diagnosis, characterization, and treatment of can-
cer. Letter grading.

296. Research Topics in Pathology. (1 to 2) Re-
search group meeting, one to two hours. Limited to de-
partmental graduate students. Advanced study and analysis of current topics in pathology. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

298A-298D. Current Research in Disease Mecha-

isms. (2 each) Lecture, 90 minutes. Preparation: one course each in molecular biology, cell biology, and bio-

cological chemistry. Designed for graduate experimental pathology students. Current research in disease mech-

anisms, with strong emphasis on experimental ap-

proach in pathology. Topics include genetic and meta-

bolic disorders, thyroid disease, immunology, athero-

596. Directed Individual Study or Research. (4 to 12) Tutorial, to be arranged. Individual research with members of the staff or other departments, the latter for purpose of supplementing programs available in department. S/U grading.

599. Preparation of Ph.D. Dissertation. (2 to 12) Tu-

torial, to be arranged. Preparation: completion of quali-

PEDIATRICS

David Geffen School of Medicine

UCLA

Chairs

Sherin Devasark, M.D., (Matted Executive Endowed Professor of Pediatrics), Executive Chair

Rick E. Harrison, M.D., Vice Chair; Clinical Affairs

Thomas S. Kitzner, M.D., Ph.D. (Jack H. Skirball Professor of Pediatric Cardiology), Vice Chair, Academic Affairs

Lee T. Miller, M.D., Vice Chair, Medical Education

Kathleen M. Sakamoto, M.D., Vice Chair, Translational Research

Richard Findlay, M.D., Interim Chair, Drew University

Adam J. Jonas, M.D., Chair, Harbor-UCLA
Scope and Objectives

The Department of Pediatrics encompasses five teaching hospitals: Mattel Children's Hospital UCLA and Olive View-UCLA, Harbor-UCLA, Cedars-Sinai, and Santa Monica UCLA Medical Centers. The clinical program and teaching activities of the Reagan UCLA Medical Center are integrated with the Olive View-UCLA Medical Center. In the fundamentals of clinical medicine course, medical students receive detailed instruction in the techniques of the clinical examination of pediatric patients.

The required six-week clinical clerkship in pediatrics can be taken at any of five sites (a combined experience at Mattel/Olive View-UCLA and Santa Monica UCLA, Cedars-Sinai, Harbor-UCLA, Kaiser Los Angeles, and Riverside/Redlands). In-depth electives in the Department of Pediatrics are listed in the School of Medicine Handbook of Clinical Courses, as are the advanced clinical clerkships.

For further details on the Department of Pediatrics and a listing of the courses offered, see http://www.pediatrics.medsch.ucla.edu.

Graduate Course

M215. Interdepartmental Course: Tropical Medicine. (2) [Same as Medicine M215 and Pathology M215.] Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

Scope and Objectives

Philosopher, translated from the Greek, means lover of wisdom. The term has come to mean someone who seeks knowledge, enlightenment, and truth. The Department of Philosophy undergraduate program is not directed at career objectives (although it is traditionally good preparation for law, theology, and graduate work in philosophy). Philosophy is taught to undergraduate students primarily as a contribution to their liberal education. All of the lower and most of the upper division course offerings should be of interest and useful to students who are reflective about their beliefs or who wish to become so. It also provides the occasion to ponder the foundations of almost any other subject to which they are exposed — whether history, religion, government, law, or science.

The principal goal of the graduate program is to produce philosophers of high quality, thinkers informed by the great historical traditions of Western philosophers who can apply the methods of philosophical analysis to a broad range of current philosophical problems. Since all its graduate students hope to teach at the college or university level, the department is also committed to training clear, able, and stimulating teachers.

The department offers programs leading to the Bachelor of Arts and Ph.D. degrees.

Undergraduate Study

Philosophy B.A.

Preparation for the Major

Required: Four lower division courses, including Philosophy 7 or 21, 22, 31, and one other lower division philosophy course.

Transfer Students

Transfer applicants to the Philosophy major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one philosophy of mind or skepticism and rationality course, one ethical theory course, one symbolic logic course, and one additional philosophy course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Thirteen upper division (100 series) or graduate (200 series) philosophy courses (52 units), including Philosophy 100A, 100B, 100C. Seven of the 13 courses must be distributed among the groups into which the undergraduate and graduate courses are divided — history of philosophy; logic, semantics and philosophy of science; ethics and value theory; and metaphysics and epistemology. Students should take two courses in each of three of the groups and one course in the remaining group.

Contract courses (199) may be applied toward the major but not toward a group requirement. A maximum of 8 units of course 199 may be applied toward the major but not toward a group requirement. Courses 100A, 100B, 100C may not be applied toward any group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Students intending to do graduate work in philosophy should consult both the graduate and undergraduate advisors.

Honors Program

Admission

To be admitted to the honors program, students must have taken at least three upper division philosophy lecture or seminar courses at UCLA with an overall grade-point average of 3.7.

Requirements

To be awarded honors in philosophy at graduation, Philosophy majors must (1) have a 3.7 grade-point average in UCLA philosophy courses and a 3.7 GPA in upper division UCLA philosophy courses; (2) satisfy the honors directed study requirement by taking Philosophy 198A and 198B in conjunction (usually, but not necessarily concurrently) with two different regular upper division philosophy courses supervised by the instructors of those courses; and
Philosophy

Lower Division Courses

1. Beginnings of Western Philosophy. (5) Lecture, three hours; discussion, one hour. Origins of Greek cosmology and philosophy, beginning of systematic thought and scientific investigation concerning such questions as origin and nature of the material world, concept of laws of nature, possibility and extent of knowledge. Concentration on pre-Socratic philosophers, particularly Anaximander, Heraclitus, the Pythagoreans, Parmenides, Empedocles, and Greek atomists, during first two thirds of course and on Socrates and some earlier works of Plato in last few weeks. P/NP or letter grading.

2. Introduction to Philosophy of Religion. (4) Lecture, three hours; discussion, one hour. Introductory study of such topics as nature and grounds of religious belief, relation between religion and ethics, nature and existence of God, pre-existence, and what can be learned from religious experience.

3. Historical Introduction to Philosophy. (5) Lecture, three hours; discussion, two hours. Historical introduction to Western philosophy based on classical texts dealing with major problems, related thematically and studied in chronological order: properties of rational argument, existence of God, problem of knowledge, causality, relations between mind, body, possibility of justice, and others. P/NP or letter grading.

4. Philosophical Analysis of Contemporary Moral Issues. (5) Lecture, three hours; discussion, one hour. Critical study of principles and arguments advanced in discussion of current moral issues. Possible topics include revolutionary violence, rules of warfare, sexual morality, right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, exploitation of human subjects, rights of women. P/NP or letter grading.

5. Philosophy in Literature. (5) Lecture, three hours; discussion, one hour. Study of some classical or contemporary works in political philosophy. Questions that may be discussed include What is justice? Why obey the law? Which form of government is best? How much personal freedom should be allowed in society? P/NP or letter grading.

6. Introduction to Political Philosophy. (5) Lecture, three hours; discussion, one hour. Study of some classical or contemporary works in political philosophy. Questions that may be discussed include What is justice? Why obey the law? Which form of government is best? How much personal freedom should be allowed in society? P/NP or letter grading.

7. Introduction to Philosophy of Mind. (5) Lecture, three hours; discussion, one hour. Introductory study of philosophical issues about nature of the mind and its relation to the body, including materialism, functionalism, behaviorism, determinism and free will, nature of psychological knowledge. P/NP or letter grading.

8. Introduction to Philosophy of Science. (5) Lecture, three hours; discussion, one hour. Study of selected problems concerning the character and reliability of scientific understanding, such as nature of scientific theory and explanation, reality of theoretical entities, inductive confirmation of hypotheses, and occurrence of scientific revolutions. Discussion at non-technical level of examples from history of science. P/NP or letter grading.

9. Principles of Critical Reasoning. (4) Nature of arguments: how to analyze them and assess soundness of the reasoning they represent. Common fallacies that often occur in arguments discussed in light of what counts as a good deductive or inductive inference. Other topics include use of language in argumentation to arouse emotions as contrasted with conveying thoughts, logic of scientific experiments and hypothesis-testing in general, and some general ideas about probability and its application in making normative decisions (e.g., setting legal standards).

10. Skepticism and Rationality. (4) Lecture, three hours; discussion, one hour. Can we know anything with certainty? How can we justify any of our beliefs? Introduction to study of these and related questions through works of some great philosophers of modern period, such as Descartes, Hume, Leibniz, or Berkeley.

21. Ethical Theories of Responsibility. (4) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 22W. Required in advance. Students may also substitute Philosophy 191 for either course.

22. Introduction to Ethical Theory. (5) Lecture, three hours; discussion, one hour. Enforced prerequisite: English Composition 3 or 3H or English as a Second Language 36. Limited to freshmen/sophomores. Not open for credit to students with credit for course 22. Introduction to major ethical theories in Western thought. Examination of works of Plato, Aristotle, Hume, Kant, and Mill. Topics include ideas of virtue, obligation, egoism, relativism, and foundations of morals. Four papers required. Satisfies Writing II requirement. Letter grading.

31. Logic, First Course. (4) Lecture, three hours; discussion, one hour. Recommended for students who plan to pursue more advanced studies in logic. Elements of symbolic logic and quantification; forms of reasoning and structure of language.

97. Freshman Seminar. (Variable topics) consult Schedule of Classes or “Department Announcements” for topics to be offered in a specific term. May be repeated for credit with consent of instructor.

Upper Division Courses

100A. History of Greek Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Survey of origins of Greek metaphysics from pre-Socratics through Plato and Aristotle.

100B. Medieval and Early Modern Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended prerequisite: course 100A. Course 100A and 100B should be taken in immediately successive terms if possible. Survey of development of metaphysics and theory of knowledge from 1650 to 1800, including Locke and/or Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include views of these (and perhaps other) philosophers of the period on mind and body, causality, existence of God, skepticism, empiricism, limits of human knowledge and philosophical foundations of modern science.

Group I: History of Philosophy

M101A. Plato — Earlier Dialogues. (4) (Same as Classics M146A.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected topics in early and middle dialogues of Plato. P/NP or letter grading.

M101B. Plato — Later Dialogues. (4) (Same as Classics M146B.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended prerequisite: course 100B. Courses 100A, 100B, and 100C should be taken in immediately successive terms if possible. Survey of development of metaphysics and theory of knowledge from 1650 to 1800, including Locke and/or Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include views of these (and perhaps other) philosophers of the period on mind and body, causality, existence of God, skepticism, empiricism, limits of human knowl-
e

100C. History of Modern Philosophy, 1650 to 1800. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended prerequisite: course 100B. Courses 100A, 100B, and 100C should be taken in immediately successive terms if possible. Survey of development of metaphysics and theory of knowledge from 1650 to 1800, including Locke and/or Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include views of these (and perhaps other) philosophers of the period on mind and body, causality, existence of God, skepticism, empiricism, limits of human knowledge and philosophical foundations of modern science.

M102. Aristotle. (4) (Same as Classics M147.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected works of Aristotle. P/NP or letter grading.

M103A. Ancient Greek and Roman Philosophy. (4) (Same as Classics M145A.) Lecture, three hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of texts, their literary form, inter-

M103B. Later Ancient Greek Philosophy. (4) (Same as Classics M145B.) Lecture, three hours; discussion, one hour. Preparation: course M101A. Study of selected topics in middle and later dialogues of Plato, P/NP or letter grading.

M104. Islamic Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Development of Muslim philosophy in its great age (from Kindo to Avemore, 850 to 1200), considered in connection with Muslim theology and mysticism.

106. Later Medieval Philosophy. (4) Preparation: one philosophy course. Metaphysics, theory of knowledge, and ontologies of Duns Scotus, and Ockham, with less full discussion of other authors from the 13th through early 15th century. Selected texts read in English translation.

107. Topics in Medieval Philosophy. (4) Lecture, four hours; discussion, one hour. Preparation: one philosophy course. Recommended requisite: course 105 or 106. Study of philosophy and theology of one medieval philosopher such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham, or study of one single area such as logic or theory of knowledge in several medieval philosophers. Topic announced each term. May be repeated for credit with consent of instructor. P/NP or letter grading.

C108. Hobbes. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Hobbes’ philosophical career, especially Leviathan, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C208. P/NP or letter grading.

C109. Descartes. (4) Lecture, four hours; discussion, one hour. Preparation: two philosophy courses. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C209. P/NP or letter grading.

C110. Spinoza. (4) Lecture, three hours; discussion, one hour. Preparation: Philosophy of Spinoza. May be concurrently scheduled with course C210, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled. P/NP or letter grading.

C111. Leibniz. (4) Lecture, three hours; discussion, one hour. Preparation: course 21. Study of philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled. P/NP or letter grading.

C112. Locke and Berkeley. (4) Lecture, four hours. Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C212. P/NP or letter grading.

C114. Hume. (4) Lecture, four hours. Preparation: one philosophy course. Selected topics from metaphysical, epistemological, and ethical writings of Hume. Limited to 40 students when concurrently scheduled with course C214. P/NP or letter grading.

C115. Kant. (4) Formerly numbered 115.) Lecture, three hours; discussion, one hour. Preparation: course 21 or 22. Study of early works on related topics in epistemology, ethics, and politics. May be repeated for credit with consent of instructor. Concurrently scheduled with course C215. P/NP or letter grading.

116. 19th-Century Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in 19th-century thought. Limited to 40 students when concurrently scheduled.

117. Late 19th- and Early 20th-Century Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in framework of one or more of following philosophers: Boziano, Fege, Husserl, Meinong, G. Moore, early Russell, and Wittgenstein. May be repeated for credit with consent of instructor.

118. Kierkegaard. (4) Preparation: one philosophy course. Philosophical study of some major works of Kierkegaard, with emphasis on interpretation of the texts.

C119. Topics in Modern Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in one or more philosophies of early modern period, or study in single area such as theory of knowledge or metaphysics in several philosophes. May be repeated for credit with consent of instructor, concurrently scheduled with course C219. P/NP or letter grading.

Group II: Logic, Semantics, and Philosophy of Science

124. Philosophy of Science: Historical. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Historical introduction to philosophy of science. Several general topics discussed in context of actual episodes in development of natural sciences. May be repeated for credit with consent of instructor.

125. Philosophy of Science: Contemporary. (4) Lecture, three hours; discussion, one hour. Preparation: course 31 or 124. Introduction to contemporary philosophy of science, focusing on problems of central importance. May be repeated for credit with consent of instructor.

126. Philosophy of Science: Social Sciences. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Discussion of topics in philosophy of social sciences (e.g., methods of social sciences in relation to physical sciences, value-bias in social inquiry, concepts of scientific explanation and prediction, nature of social laws).

127A. Philosophy of Language. (4) Lecture, three hours; discussion, one hour. Preparation: course 31. Syntax, semantics, pragmatics. Semantical concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor. P/NP or letter grading.

127B. Philosophy of Language. (4) Lecture, three hours; discussion, one hour. Preparation: course 127A. Course 127A is not requisite to 127B. Selected topics similar to those considered in course 127A, but at more advanced and technical level. May be repeated for credit with consent of instructor. P/NP or letter grading.

127C. Philosophy of Language. (4) Lecture, four hours; discussion, one hour. Preparation: course 31. Syntax, semantics, pragmatics. Semantical concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor. P/NP or letter grading.

128A. Philosophy of Mathematics. (4) Lecture, four hours. Preparation: courses 31, 137, and preferably one additional logic course. Philosophy of mathematics; logicism of Frege and Russell, arithmetic reduced to logic; ramified type theory and impredicative definition (Russell, Poincaré, early Weyl), P/NP or letter grading.

129. Philosophy of Psychology. (4) Lecture, three hours; discussion, one hour. Preparation: one 4-unit psychology course, one philosophy course. Selected philosophical issues arising in psychological theories. Relevance of computer simulation to accounts of thinking and meaning; relations between semantic theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology.

130. Philosophy of Space and Time. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses or one philosophy course and one physics course. Selected philosophical problems concerning nature of space and time. Philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include nature of geometry, conventionalism, absolutist versus relationalist views of space and time, philosophical implications of relativity theory.

131. Science and Metaphysics. (4) Lecture, four hours. Preparation: two philosophy courses. Recommended: some background in basic calculus and physics. Intensive study of one or two metaphysical topics on which results of modern science have been thought to have had major implications. Topics may include causality and direction of time, time-travel, backwards causation, realism, determinism, absolute view of space, etc. May be repeated for credit with consent of instructor. P/NP or letter grading.

132. Philosophy of Biology. (4) Lecture, four hours. Preparation: one philosophy course. Intensive study of one or two current topics in philosophy of biology, which may include structure of evolutionary theory, fitness, taxonomy, reductionism, concepts of biological species, and biological explanation. P/NP or letter grading.

133. Topics in Logic and Semantics. (4) Lecture, four hours. Preparation: course 137. Possible topics include formal theories, definitions, alternative theories of descriptions, many-valued logics, deviant logics. P/NP or letter grading.

M134. Introduction to Set Theory. (4) (Same as Mathematics M114E.) Lecture, three hours; discussion, one hour. Preparation: course 135 or Mathematics 110A or 131A. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

Group III: Ethics and Value Theory

150. Society and Morals. (4) Lecture, three hours; discussion, one hour. Preparation: course 22. Critical study of the structures and dynamics of society and its moral and social issues. May be repeated for credit with consent of instructor. P/NP or letter grading. 151A. Selected Classics in Ancient Ethical Theories: Plato, Aristotle: C151B. Modern. Intensive study of Kant’s ethical theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C245; C151C. Selected Classics of Medieval Ethics.

153A. Topics in Ethical Theory: Normative Ethics. (4) Lecture, three hours; discussion, one hour. Preparation: course 22. Study of selected topics in normative ethical theory. Topics may include human rights, virtues and vices, principles of culpability and praiseworthiness (criteria of right action). May be repeated for credit with consent of instructor. P/NP or letter grading.

C153B. Topics in Ethical Theory: Metaphysics. (4) Lecture, three hours; discussion, one hour. Preparation: course 22. Study and analysis of basic concepts, selected problems and contemporary issues in metaphysics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, free will, moral motivation, etc. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C253B. P/NP or letter grading.
154. Topics in Value Theory: Rationality and Action. (4) Lecture, three hours; discussion, one hour. Requisite: course 6 or 7 or 22. Selected topics concerning normative issues in practical rationality or philosophy of action. Topics may include moral and practical dilemmas, nature of reasons for action, rationality of moral norms and prudence, weakness of will, freedom of will, and decision theory. May be repeated for credit with consent of instructor. P/NP or letter grading.

154B. Topics in Value Theory: Moral Responsibility and Free Will. (4) Lecture, three hours; discussion; one hour. Preparation: one philosophy course. Examination of philosophical problems surrounding moral responsibility and free will, using contemporary or classical readings in attempt to better understand kind of freedom required for moral agents. May be repeated for credit. P/NP or letter grading.

155. Medical Ethics. (4) Lecture, three hours; discussion, one hour. Examination of philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, and medical experimentation. P/NP or letter grading.

C156. Topics in Political Philosophy. (4) Lecture, three hours; discussion, one hour. Analysis of some basic issues in political theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C247. P/NP or letter grading.

157A-157B. History of Political Philosophy. (4-4) Lecture, four hours; discussion, one hour. Preparation: two philosophy courses. May be repeated with consent of instructor. 157A. Reading and discussion of classic works in earlier political theory, especially those by Hobbes, Locke, Hume, and Rousseau. 157B. Reading and discussion of classic works in later political theory, especially those by Kant, Hegel, and Marx.

161. Topics in Aesthetic Theory. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Examination, through study of recent philosophical writings, of such topics as nature of law, relations between mind and body, and our knowledge of other minds. May be repeated once for credit with consent of instructor.

166. Philosophy of Law. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Examination, through study of recent philosophical writings, of such topics as nature of law, relations between mind and body, and our knowledge of other minds. May be repeated once for credit with consent of instructor.

170. Philosophy of Mind. (4) Lecture, three hours; discussion, one hour. Preparation: two relevant philosophy courses. Analysis of various problems concerning nature of mind and mental phenomena, such as relation of mind to body, free will, personal identity, and knowledge of other minds. May be repeated once for credit with consent of instructor.

172. Philosophy of Language and Communication. (4) Lecture, three hours; discussion, one hour. Requisites: courses 127A, 127B. Theories of meaning and communication; how words refer to things; limits of meaninglessness; analysis of speech acts; relation of everyday language to scientific discoveries. P/NP or letter grading.

174. Topics in Theory of Knowledge. (4) Lecture, three hours; discussion, one hour. Requisite: course 182 or 183. Selected topics in epistemology, such as skepticism, the nature of knowledge, and the role of evidence. May be repeated for credit. P/NP or letter grading.

176. Metaphysics of Modality. (4) Lecture, four hours. Requisites: courses 31, 137. Highly recommended preparation: one second course in two-term sequence (also see course 136). Metaphysical foundations of modal logic and philosophical basis of model theory of modal logic. What are possible worlds? What is the modal logic of a basic one logic or one theory? Is its logic local or modal necessity? Are both notions really distinct? How metaphysically involved is (quantified) modal logic? What is its connection to doctrines of (1) Haecceitism and (2) Aristotelian Essentialism? P/NP or letter grading.

177A. Existentialism. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Analysis of methods, problems, and views of some of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Sartre, and Camus. Emphasis on explication and interpretation of the texts. May be repeated for credit with consent of instructor.

182. Philosophy of Action. (4) Lecture, four hours. Preparation: one philosophy course. Examination of various concepts employed in understanding human action. Topics may include rational choice, desire, intention, weakness of will, and self-deception. P/NP or letter grading.

182. Elements of Metaphysics. (4) Lecture, three hours; discussion, one hour. Requisite: course 21. Study of basic metaphysical questions; nature of physical world of which we have knowledge; and answers, provided by alternative systems (e.g., phenomenological, materialism, dualism). P/NP or letter grading.

183. Theory of Knowledge. (4) Lecture, three hours; discussion, one hour. Requisite: course 21. Analysis of concept of empirical knowledge. May be repeated for credit with consent of instructor. P/NP or letter grading.

184. Topics in Metaphysics. (4) Lecture, three hours; discussion, one hour. Requisite: course 21. Intensive investigation of one or two topics or works in metaphysics, such as personal identity, nature of dispositional possibility, necessity and universals and particulars, causality. Topics announced each term. May be repeated for credit with consent of instructor. P/NP or letter grading.

185. Major Philosophers of 20th Century. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Study of writings of one or more major modern philosophers (e.g., Russell, Moore, Wittgenstein, Carnap, Quine). May be repeated for credit with consent of instructor. P/NP or letter grading.

Special Studies

M187. Philosophical Analysis of Issues in Feminist Theory. (4) (Same as Women's Studies M110C.) Lecture, three hours. Requisite for Women's Studies majors: Women's Studies major, or permission of instructor. Preparation: one philosophy course. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by new scholarship on women in philosophy. Critical study of concepts and principles that arise in discussion of women's rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor. Letter grading.

188. Advanced Honors Seminars. (1) Seminar, three hours. Limited to 20 students. Designed as adjunct to undergraduate lecture course. Exploration of topics in greater depth through supplemental readings, papers, and other activities and led by lecture course instructor. May be applied toward honors credit for eligible students. Honors content noted on transcript. P/NP or letter grading.

199C. Honors Research in Philosophy. (4) Tutorial, four hours. Limited to junior/senior philosophy honors program students. May be taken in conjunction with one upper division philosophy lecture course, either concurrently or in subsequent term, under direct supervision of lecture course instructor. Advanced work related to lecture course, further reading, and preparation of 12- to 15-page paper representing original research. Courses 198A and 198B must be taken in conjunction with two different lecture courses, and may not be taken for multiple honors requirement. May be repeated for credit. Individual contract required. Letter grading.

Graduate Courses

200A-200B-200C. Seminar for First-Year Graduate Students. (4-4-4) Seminar, three hours. Limited to and required of all first-year graduate philosophy students. Selected topics in metaphysics and epistemology, history of philosophy, and ethics. S/U or letter grading.

Group I. History of Philosophy

203. Seminar: History of Ancient Philosophy. (4) Seminar, four hours. Selected problems and philosophers. May be repeated for credit with consent of instructor. S/U or letter grading.

206. Topics in Medieval Philosophy. (4) Lecture, four hours. Study of philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham or study of single area such as logic or theory of knowledge in
several medieval philosophers. Topics announced each term. May be repeated for credit with consent of instructor. S/U or letter grading.

207. Seminar: History of Medieval and Renaissance Philosophy. (4) Seminar, four hours. Selected problems and philosophers. May be repeated for credit with consent of instructor. S/U or letter grading.

220. Hobbes. (4) Lecture; three hours; discussion, one hour. Preparation: philosophy course. Hobbes' political philosophy, especially Leviathan, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C108. S/U or letter grading.

229. Descartes. (4) Lecture; four hours; discussion, one hour. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C109. S/U or letter grading.

230. Spinoza. (4) Lecture; three hours. Selected topics in philosophy of Spinoza. May be concurrently scheduled with course C110, in which case there is two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students. S/U or letter grading.

231. Leibniz. (4) Lecture; three hours. Selected topics in philosophy of Leibniz. May be concurrently scheduled with course C111, in which case there is two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students. S/U or letter grading.

232. Locke and Berkeley. (4) Lecture, four hours. Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis on some cases on one or the other. Limited to 30 students when concurrently scheduled with course C112. S/U or letter grading.

234. Hume. (4) Lecture; four hours. Selected topics in philosophy of Hume. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C114. S/U or letter grading.

250. Philosophy of Social Science. (4) Lecture, four hours. Examination of philosophical problems concerning concepts and methods used in social sciences. Topics may include: intermediate between social processes and individual psychology, logic of explanation in social sciences, determinism and spontaneity in history, interpretation of cultures radically different from one's own. Students interested in advanced preparation in social sciences encouraged to enroll. May be repeated for credit with consent of instructor. S/U or letter grading.

235. Seminar: Logic. (4) Seminar, four hours. May be repeated for credit with consent of instructor. S/U or letter grading.

236. Seminar: Intensional Logic. (4) Seminar, four hours. Topics may include logic of sense and denotation, modal logic, and intensional logics, epistemic logic, intensional logic of Principia Mathematica, possible worlds semantics. May be repeated for credit with consent of instructor. S/U or letter grading.

237. Seminar: Philosophy of Science. (4) Seminar, three hours. Selected topics in philosophy of science. May be repeated for credit with consent of instructor. S/U or letter grading.

238. Seminar: Philosophy of Physics. (4) Seminar, four hours. May be repeated for credit with consent of instructor. S/U or letter grading.

Group III. Ethics and Value Theory

241. Topics in Political Philosophy. (4) Seminar, four hours. Requisites: course 150 or C156 or 157A or any two philosophy courses. Examination of one or more topics in political philosophy (e.g., justice, democracy, human rights, political obligation, alienation). May be repeated for credit with consent of instructor. S/U or letter grading.

242. History of Ethics: Modern. (4) Lecture, three hours; discussion, one hour. Intensive study of Kant's ethical theory. May be repeated for credit with consent of instructor. May be concurrently co-registered with course C151B. S/U or letter grading.

246. Seminar: Ethical Theory. (4) Seminar, four hours. Selected topics. Content varies from term to term. May be repeated for credit with consent of instructor. S/U or letter grading.

247. Topics in Political Philosophy. (4) Lecture, three hours; discussion, one hour. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C156. S/U or letter grading.

248. Problems in Moral Philosophy. (4) Seminar, four hours. Intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor. S/U or letter grading.

253B. Topics in Ethical Theory: Metaethics. (4) Lecture, three hours; discussion, one hour. Requisites: course 22. Study and analysis of basic concepts, theories, and problems in metaethics. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C153B. S/U or letter grading.

254A-254B. Legal Theory Workshop. (1 to 8 each) (Same as Law M555.) Seminar, three hours. Course M254A is enforced requisite to M254B. Students engage with work in progress on philosophical issues in law of leading scholars from around country. Presentation of works in progress by visiting scholars every two weeks. Study by students of papers to be presented to gain background in relevant topics and to be prepared for speakers' presentations. Presentation of student papers to class for discussion. Substantial analytical paper required. In Progress (M254A) and S/U or letter (254B) grading.

255. Seminar: Aesthetic Theory. (4) Seminar, four hours. Selected topics. May be repeated for credit with consent of instructor. S/U or letter grading.

256. Topics in Legal Philosophy. (4) (Same as Law M217.) Lecture; three hours. Examination of topics such as concept of law, nature of justice, problems of punishments, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor.

257A-257B. Philosophy Legal Theory. (1 to 8 each) (Formerly numbered M257.) (Same as Law M554.) Seminar, two hours. Course M257A is enforced requisite to M257B. Selected topics in philosophy of law. May be repeated for credit with consent of instructor. In Progress (M257A) and S/U or letter (257B) grading.

259. Philosophical Research in Ethics and Value Theory. (2 to 4) Seminar, two hours. Preparation: completion of proposition requirement. Presentation of ongoing research by graduate students. Participants make presentations, analyze and discuss presentations of others, and read and discuss philosophical texts related to presentations. Must be taken for 4 units in quarters in which students present their own research. May be repeated for credit with consent of instructor. S/U grading.

Group IV. Metaphysics and Epistemology

271. Seminar: Topics in Metaphysics and Epistemology. (4) Seminar, three hours. Selected problems and philosophers which may be from different periods. May be repeated for credit with consent of instructor. S/U or letter grading.

275. Human Action. (4) Preparation: two upper division philosophy courses. Examination of theories, concepts, and problems concerning human actions. Topics may include analysis of intentional actions; determinism and freedom; nature of explanations of intentional actions. May be repeated for credit with consent of instructor. S/U or letter grading.

280. 20th-Century Continental Philosophy. (4) Seminar, three hours. Selected topics in 20th-century continental European philosophy. May be repeated for credit with consent of instructor. S/U or letter grading.

281. Seminar: Philosophy of Mind. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

282. Seminar: Metaphysics. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

283. Seminar: Theory of Knowledge. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

284. Seminar: Philosophy of Perception. (4) Seminar, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

Scope and Objectives

Since the time of the ancient Greeks, a natural affinity has existed between astronomy and physics, and the intellectual development of the two disciplines has often proceeded synergistically. Newton’s discovery of the laws of mechanics and universal gravitation not only explained motion on Earth, but brought the heavens and Earth into a single quantitative framework in which both are governed by the same laws. The revolutionary discoveries of twentieth-century physics — quantum mechanics and nuclear physics — were rapidly adopted by astronomers to interpret the spectroscopic observations of the stars and to construct accurate models of stellar structure. Einstein’s general theory of relativity predicted the expansion of the universe and that most awesome compaction of matter — the black hole.

Today astronomers study the accretion of matter onto supermassive black holes in quasars and search the most distant regions of the universe to learn about the exotic physical conditions that existed when the universe’s expansion was only fractions of a second old. By measuring the gravitational interactions on distance scales from galaxies to the vast superclusters of galaxies, astronomers have concluded that most of the universe’s matter is dark or nonluminous; physicists have speculated that this dark matter may consist of yet-undiscovered exotic particles that are predicted by the most advanced theories of elementary particle physics.

Department of Physics and Astronomy faculty members and students are able to study the universe in the holistic manner which is demanded by the breadth of these two disciplines.
Undergraduate Study

The Department of Physics and Astronomy offers a choice of four undergraduate majors: the B.S. degree program in Astrophysics, the B.S. degree program in Biophysics, the B.S. degree program in Physics, and the B.A. degree program in Physics. Each course taken to fulfill any of the requirements for the majors must be taken for a letter grade.

Astronomy Courses

The department offers general courses to all University students, including those who are not science oriented.

Astronomy 3 is the fundamental one-term course for students who do not major in physical sciences and should be taken in the first or second year.

Astronomy 4, 5, and 6 develop the topics covered in course 3 to somewhat greater depths but are still aimed at nontechnical majors. Course 4 discusses stellar and supermassive black holes; course 5 concentrates on the problem of life in the universe; course 6 discusses the structure and evolution of the universe.

Astronomy 81 and 82 are general survey courses recommended for science majors in their second year. They systematically introduce astrophysics and require a good background in physics and mathematics (at least two terms of the Physics 1 series and two terms of the Mathematics 31A and 31B series).

Students of junior and senior standing in Physics or related sciences are invited to select any of these courses: Astronomy 115, 117, 127, 140, 180.

Physics Courses

Students who wish to use physics to satisfy part of the general education requirements in the physical sciences and who have no mathematics background beyond the high school mathematics required for admission to UCLA may take Physics 10.

Physics 1Q is intended for entering freshman Physics majors and other interested students. Although it is not a required course or a part of or requisite to any general physics sequence of courses, its purpose is to indicate the nature of current research problems in physics on a level intended to be attractive to entering students with a good high school science and mathematics background.

Physics 1A, 1B, and 1C, or 1AH, 1BH, and 1CH form sequences of courses in general physics for majors in Physics.

The department takes into account prior preparation in physics. If students feel their background would permit acceleration, they may be exempted from one course in the 1A, 1B, 1C sequence by taking the final examination with a class at the end of any term. This serves as a placement examination. A satisfactory score on one or both parts of the College Board Advanced Placement Physics C Test may also serve as a placement examination, but placement is not automatic. Students should discuss such possibilities with their departmental adviser.

Physics 6A, 6B, 6C form a one-year sequence of courses in basic physics for students in the biological and health sciences.

Physics 10 is a one-term, nonlaboratory course that surveys the whole field of physics. Any two or more courses from Physics 1A, 6A, and 10 are limited to 6 units credit.

Astrophysics B.S.

Preparation for the Major

Required: Physics 81, 82; Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 18L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Program in Computing 10A or demonstrated ability to program. Systematic study of astrophysics should begin with Astronomy 81 and 82, taken in the second year. Recommended: Chemistry and Biochemistry 20A.

Transfer Students

Transfer applicants to the Astrophysics major with 90 or more units must complete as many of the following introductory courses prior to admission to UCLA: two astrophysics courses, two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one physics course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Honors Program

Senior majors in Astrophysics with a 3.5 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astrophysics. In addition to completing all courses required for the major, students must complete two terms of Astronomy 199. To receive honors and highest honors at graduation, the grade-point average must remain at 3.5 and 3.75 or better, respectively, and work in course 199 must reflect original research and be accepted by the departmental honors committee.

Biophysics B.S.

The goal of the Biophysics major is to provide students with the undergraduate background to enable them to enter very good graduate programs in biophysics, molecular biology, and physics. As the molecular biophysics field emerges as an important and rapidly developing area of scientific research and knowledge, the major is designed to provide both the scientific/technical training and the immersion in physics and molecular biology necessary to enable students to understand and integrate these fields intellectually and to have the opportunity to become leaders in bringing the analytical and experimental techniques of both fields to bear on the complicated behavior of microbiological macromolecular systems.

Preparation for the Major

Required: Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 18L; Chemistry and Biochemistry 20A, 20B, 30A, 30B; Life Sciences 2, 3 or 3H, 4; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Recommended: Life Sciences 1, Mathematics 33B, Physics 18L.

Transfer Students

Transfer applicants to the Biophysics major with 90 or more units must have completed the following introductory courses prior to admission to UCLA: two years of calculus, one and one half years of calculus-based physics with laboratory for majors, one year of general biology with laboratory for majors, and one year of general chemistry with laboratory for majors.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Physics B.S.

The Physics B.S. major should be taken if students intend to continue toward the Ph.D. in Physics.

Preparation for the Major

Required: Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 18L; Chemistry and Biochemistry 20A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office, 1-707A Physics and Astronomy Building.

Transfer Students

Transfer applicants to the Physics B.S. major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one general chemistry course for majors.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 115C, 131. The remainder of the course of study consists of a plan, to be worked out by students in consultation with their designated departmental adviser, that details which courses they take to complete the degree. There are four overall requirements: (1) the plan must be worked out five terms before students expect to graduate; (2) the plan must include at least two courses from the Physics 180 series, which should be taken in the senior
year; (3) there must be three additional upper division courses in the plan, preferably selected from Physics 108, 114, 117, M122, 123, 124, 126, 132, 140A, 140B; (4) there must be written rationale for the plan. Except for the Physics 180 laboratories, the courses need not be in the Physics and Astronomy Department. However, it is expected that the courses fit into a coherent structure. It is important that the structure and rationale are thought out carefully, as the plan must be endorsed by the designated adviser and be approved by the departmental academic affairs committee. Preapproved plans of study are available from the undergraduate advisers. A C average is required in all courses taken to satisfy the major requirements.

Students preparing for graduate school should take additional courses in physics and mathematics. Physics 108, 114, 117, M122, 123, 124, 126, 132, 140A, and 140B are recommended.

Honors Programs

The department offers three honors programs leading to graduation with honors or highest honors in physics. Students are eligible after completing the preparation for the major and four upper division physics courses with an overall grade-point average of 3.0 and a 3.5 GPA in upper division physics and mathematics courses. Contact the Undergraduate Office for a complete description of the programs and an application.

Physics B.A.

The Physics B.A. major is intended to provide a strong background in physics, yet allow students flexibility to study other fields as well. It should be of particular interest to students who want to double major or who want to teach science. Students who intend to continue work toward the Ph.D. in Physics are advised to work for the B.S. in Physics as described earlier.

Preparation for the Major

Required: Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 1D, 1DL; Chemistry and Biochemistry 20A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office, 1-707A Physics and Astronomy Building.

Transfer Students

Transfer applicants to the Physics B.A. major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one general chemistry course for majors.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/ADM_TR.htm for up-to-date information regarding transfer selection for admission.

The Major

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gsasa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Physics and Astronomy offers the Master of Arts in Teaching (M.A.T.) degree in Astronomy, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Astronomy, Master of Arts in Teaching (M.A.T.) degree in Physics, and Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Physics.

Astronomy

Lower Division Courses

3. Nature of Universe. (5) Lecture, three hours; discussion, two hours. Not open to students with credit for or currently enrolled in course 81 or 82. No special mathematical preparation required beyond that necessary for admission to UCLA in freshman standing. Course for general UCLA students, normally not intended to major in physical sciences, on development of ideas in astronomy and what has been learned of nature of universe, including recent discoveries and developments in fields related to astronomy. P/NP or letter grading.

4. Black Holes and Cosmic Catastrophes. (4) Lecture, three hours; discussion, one hour. Essentially nonmathematical course for general UCLA students that discusses black holes and related cosmic catastrophes. White dwarfs, neutron stars, and black holes are compact objects formed in violent events that terminate lives of stars and are associated with some of most energetic and explosive phenomena in astrophysics: planetary nebulae and novae (white dwarfs), supernovae, pulsars, galactic X-ray sources, and gamma-ray bursts. Supersmassive black holes form in nucleus of young galaxies, and gravitational accretion of matter onto black holes powers most energetic objects in universe — quasars. Universe was born in ultimate cosmic explosion — Big Bang — that may have derived its energy from quantum mechanical vacuum. P/NP or letter grading.

5. Life in Universe. (4) Lecture, four hours; discussion, one hour. Preparation: prior introduction to astronomy. Life on Earth and prospects for life elsewhere in context of evolution of universe from simple to complex. Course material primarily from astronomy and biology but includes some chemistry, geology, and physics. Selected topics treated in some depth, but with little or no formal mathematics. P/NP or letter grading.

7. Astronomy and Media. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Designed to help nonmajors develop skills to continually learn about science through media. Detailed study of research currently in media, including media effects, greenhouse effect, NASA, cosmology, and extraterrestrial life. Investigation of forces that influence science reporting. P/NP or letter grading.

81. Astrophysics I: Stars and Nebulae. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, and Physics 1A or 1AH. Open to qualified sophomores and upper division students. Survey of our knowledge about stars: their distances, masses, luminosities, temperatures, and interrelations between these parameters. Emphasis on astronomy and galactic stellar and interstellar mechanics. P/NP or letter grading.

82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, and Physics 1A or 1AH. Recommended: course 81, Physics 1B and 1C (or 1BH and 1CH). Open to qualified sophomore and upper division students. Basic principles of stellar structure and evolution. Red giants, white dwarfs, novae, supernovae, neutron stars, and black holes. Pulsars and galactic X-ray sources. Milky Way galaxy and interstellar medium. Extragalactic astrophysics, galaxy clusters, active galactic nuclei, and quasars. Introduction to cosmology; Hubble law, thermal history of Big Bang, and earliest moments of universe.

88A-88Z. Lower Division Seminars. (2 each) Seminar, two hours. Limited to freshmen. Variable topics; consult Schedule of Classes for topics to be offered in specific term. P/NP or letter grading.

88A. Cosmic Evolution. (2) Seminar, two hours. Limited to freshmen. Variable topics; consult Schedule of Classes for topics to be offered in specific term. P/NP or letter grading.

115. Statistical Mechanics and Its Application to Astrophysics. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 32B, 33A, 33B, Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). Particle distributions, partition functions, black body radiation, Saha equation, degeneracy. Applications to stellar atmosphere, stellar interiors, and interstellar medium. P/NP or letter grading.

180. Astrophysics Laboratory. (4) Lecture, two hours; laboratory, four hours. Designed for juniors/seniors in Astrophysics, Physics, or related field. Lectures cover statistical methods in astrophysics, one- and two-dimensional random processes, and numerical methods. Laboratory experiments involve radio astronomy, interferometry, narrowband solar imaging, and visual photometry. Emphasis on use of computers for astronomical data processing and for solving two-dimensional astronomical images. P/NP or letter grading.

190. Research Colloquia in Astrophysics. (2) Seminar, two hours. Designed for and limited to students undertaking supervised tutorial research in seminar setting with one or more faculty members to discuss
their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

194. Research Group Seminars: Astrophysics. (1) Research group meeting, one hour. Designed for undergraduate students who are part of research group/ laboratory. Discussion of research of faculty members or students with regular attendance. Understanding methodology in field and/or laboratory equipment. May be repeated for credit. P/NP grading.

196. Research Apprenticeship in Astrophysics. (2 to 4) Tutorial, three hours and three hours per week per unit. Limited to juniors/seniors with overall 3.0 grade-point average. Entry-level research apprenticeship for upper division students under guidance of faculty mentor. May be repeated for credit. Individual contract required. P/NP grading.

197. Individual Studies in Astronomy. (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

198. Honors Research in Astrophysics. (2 to 4) Tutorial, 12 hours. Limited to juniors/seniors with minimum overall 3.0 grade-point average. Development and completion of honors thesis or comprehensive research project. Independent post-graduate supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

199. Directed Research or Senior Project in Astronomy. (2 to 4) Tutorial, two hours. Limited to junior/senior Astrophysics and Physics majors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

274. Galaxies. (4) Lecture, three hours. Galaxy properties: kinematics, mass, morphology, stellar populations; stellar evolution and spiral structure; galaxy formation; galaxy clusters, collisions, and mergers; observations and theory of quasars and active galactic nuclei. Letter grading.

277A-277B. Astronomy Research Project. (6-6) Tutorial, to be arranged. Designed for second-year graduate astronomy students. Two-term research project planned in conjunction with faculty advisor on any in- terestable research topic in astronomy or astrophysics, culminating in written report at end of second term. S/U (277A) and letter (277B) grading.

278. Special Topics in Astronomy. (2 or 4) Seminar, to be arranged. Informal course with lecture/seminar format, focusing on one of set of specific topics in astronomy. S/U (2-unit course) or letter (4-unit course) grading.

280. Quantum Mechanics for Astrophysics. (4) Lecture, four hours. Designed for departmental graduate students. Quantum mechanical topics in areas of interest for astrophysics applications. Hydrogen atom, radiation transitions, complex atoms, molecular spectroscopy including electronic, vibrational, and rotational transition, nuclear reaction theory. Letter grading.

283. Numerical and Statistical Methods. (4) Lecture, three hours. Topics selected by instructor in mathematical, numerical, and statistical methods of relevance to modern astrophysical research. Topics include Fourier transforms, filtering, and power spectra, numerical algorithms, N-body codes, maximum likelihood, Bayesian inference, and error estimation. Letter grading.

284. Order of Magnitude Astrophysics. (4) Lecture, three hours. Practice in real-time problem solving covering all fields of astrophysics. Topics selected by instructor. Students selected individually to solve problems on blackboard using basic physics and order/demonstration and statistical, and ionization equilibrium. Letter grading.

285. Origin and Evolution of Solar System. (4) (Same as Earth and Space Sciences M285.) Lecture, four hours. Dynamics of solar system; chemical origins, geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

296. Research Topics in Astronomy. (2) Discussion, two hours. Advanced study and analysis of current topics in astronomy. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

297. Research Tutorial: Astrophysics Physics. (2 or 4) (Same as Physics M297.) Tutorial, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astrophysics. May be repeated for credit. S/U grading.

275. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Internship at educational television program or university or college as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

596A. Directed Individual Studies. (4 to 10) Tutorial, to be arranged. May be repeated at discretion of department. S/U grading.

596L. Advanced Study and Research at Lick Observatory. (4 to 12) Tutorial, to be arranged. Designed for graduate students who require observational experience, as well as those working on observational problems for their thesis. May be repeated at discretion of department. S/U grading.

599. Ph.D. Research and Writing. (10 to 12) Tutorial, to be arranged. May be repeated at discretion of department. S/U grading.

Physics

Lower Division Courses

1A. Physics for Scientists and Engineers: Mechanics. (5) Lecture, four hours; discussion, one hour. Recommended preparation: high school physics, one year of high school calculus or Mathematics 31A and 31B. Enforced requisite: Mathematics 31A. Enforced corequisite: Mathematics 32A. Recommended corequisite: Mathematics 32A. Motion, Newton's laws, work, energy, linear and angular momentum, rotation, equilibrium, gravitation. P/NP or letter grading.

1AH. Physics for Scientists and Engineers: Mechanics (Honors). (5) Lecture/demonstration, four hours; discussion, one hour. Enforced requisite: Mathematics 31A. Enforced corequisite: Mathematics 31B. Recommended corequisite: Mathematics 32A. Enriched preparation for upper division physics courses. Same material as course 1A but in greater depth; recommended for Physics majors and other students desiring such coverage. P/NP or letter grading.

1BH. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields (Honors). (5) Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: courses 1A, 1B, Mathematics 31B. Enforced corequisite: Mathematics 32B. Recommended corequisite: Mathematics 32B. Enriched preparation for upper division physics courses. Same material as course 1B but in greater depth; recommended for Physics majors and other students desiring such coverage. P/NP or letter grading.

1CH. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity (Honors). (5) Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: courses 1A or 1B, 18B or 1B, Mathematics 32A. Enforced corequisite: Mathematics 32B. Recommended corequisite: Mathematics 33A. Enriched preparation for upper division physics courses. Same material as course 1CH but in greater depth; recommended for Physics majors and other students desiring such coverage. P/NP or letter grading.

1Q. Contemporary Physics. (2) Review of current problems in physics, with emphasis on those being studied at UCLA. Significance of the problems and their historical context. P/NP grading.
4AL. Physics Laboratory for Scientists and Engineers: Mechanics. (2) Laboratory, three hours. Enforced requisites: courses 1A or 1AH, 1B, and 2B. Enforced corequisite: course 1B or 1AH. Experiments on measuring gravity, accelerated motion, kinetic and potential energy, impulse and momentum, damped and driven oscillators, resonance and vibrating strings. Computer data acquisition and analysis. Introduction to error analysis, including distributions and least-squares fitting procedures. Letter grading.

4BL. Physics Laboratory for Scientists and Engineers: Electricity and Magnetism. (2) Laboratory, three hours. Enforced requisites: courses 1A or 1AH, 1B, and 1CH. Enforced corequisite: course 1C or 1CH. Experiments on electric fields, forces, and potentials. Magnetic fields, lines of force and nonlinear devices. Resistors, capacitors, and inductors. Modern circuits. Geometrical and physical optics. Letter grading.

5A. Physics for Life Sciences Majors: Mechanics. (5) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced requisites: Mathematics 3A, 3B, 3C. Enforced corequisite: Mathematics 3C. Not open for credit to students with credit for course 6AH. Motion, Newton laws, energy, linear and angular momentum, rotation, equilibrium, gravity, biological applications. P/NP or letter grading.

5AH. Physics for Life Sciences Majors: Statics and Dynamics of Living Systems. (5) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced requisites: Mathematics 3A, 3B, 3C. Enforced corequisite: Mathematics 3C. Not open for credit to students with credit for course 6AH. Tissues, cells, and tissues of whole organisms. Applications to biology and bio-chemical systems. Systems of states of matter (solids, liquids, and gases) and of surfaces and interfaces as they apply to biological organisms. P/NP or letter grading.

6B. Physics for Life Sciences Majors: Waves, Electromagnetism, and Magnetism. (5) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced requisites: courses 1A, 1B, and 1C, or 1AH, 1B, and 1CH. Not open for credit to students with credit for course 6BH. Mechanical waves, sound, electricity and magnetism, electromagnetic waves, biomolecular applications. P/NP or letter grading.

6BH. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics (Honors). (5) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced requisites: courses 1A, 1B, and 1C, or 1AH, 1B, and 1CH. Sound and electromagnetic waves, interference, diffraction, radioactivity, and hydrodynamics, with applications to biological and biochemical systems. P/NP or letter grading.

6C. Physics for Life Sciences Majors: Light, Fluids, Thermodynamics, Modern Physics. (5) Lecture, three hours; discussion, one hour; laboratory, two hours. Not open for credit to students with credit for course 6CH. Geometrical and physical optics, fluid statics and dynamics, thermodynamics. Selected topics from foundations of quantum mechanics; atoms, nuclei, and particle physics; relativity; medical detectors; biological applications. P/NP or letter grading.

6CH. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport (Honors). (5) Lecture, three hours; discussion, one hour; laboratory, two hours. Not open for credit to students with credit for course 6CH. Electromagnetism and transport phenomena. Electric circuits, with applications to electrophysiology. Magnetism, especially NMR. Diffusion and heat flow, with applications to bio- logical and biochemical systems. P/NP or letter grading.

10. Physics. (4) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 1A, 1AH, 6A, or 6AH. Special mathematical preparation beyond that necessary for admission to University of California, Berkeley. Special topics in modern physics. Emphasis on applications to current research. Consult Schedule of Classes for topics to be offered in a specific term. P/NP or letter grading.

10A. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH), Mathematics 32B, 33A. Corequisite: Mathematics 33B. Newtonian mechanics and conservation laws. Work-energy theorem; Center-of mass; Motion in central force fields; Damped oscillations; diffusion, nonlinear oscillations; P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH), 105A. Relevance with vector equations; non-linear systems, chaos and chaotic attractors. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH), 105A. Relevance with vector equations; non-linear systems, chaos and chaotic attractors. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.

10B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1B, and 1CH). Stability of motion. P/NP or letter grading.
of sound using radio-frequency pulsed ultrasound, sound-following sensors, cosmic ray detector. P/NP or letter grading.

M122. Introduction to Plasma Electronics. (4) (Same as Electrical Engineering M185.) Lecture, three hours. Requisite: course 110A or Electrical Engineering 101. Senior-level introductory course on electrodynamics of plasmas and applications to materials processing, generation of coherent radiation, particle beams, and renewable energy sources. Letter grading.

123. Atomic Structure. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Theory of atomic structure. Interaction of radiation with matter. P/NP or letter grading.

124. Nuclear Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Nuclear properties, nuclear forces, nuclear structure, nuclear decays, and nuclear reactions. P/NP or letter grading.

126. Elementary Particle Physics. (4) Lecture, three hours; discussion, three hours. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Introduction to physics of elementary particles. The four basic interactions: electromagnetic, weak, strong, and gravitational. Properties of baryons, mesons, quarks, and leptons; conservation laws, symmetries and broken symmetries; the Standard Model; experimental techniques; new physics at the new accelerators. P/NP or letter grading.

128. Cosmology and Particle Astrophysics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Vectors and fields in space, linear transformations, matrices, and operators; Fourier series and integrals. P/NP or letter grading.

132. Mathematical Methods of Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Functions of a complex variable, including Riemann surfaces, analytic functions, Cauchy theorem and formula, Taylor and Laurent series, calculus of residues, and Laplace transforms. P/NP or letter grading.

140A. Introduction to Solid-State Physics. (4) Lecture, three hours; discussion, one hour. Enforced requisitise: course 112. Introduction to basic theoretical concepts of solid-state physics with applications. Crystal symmetry; cohesive energy; diffusion of electron, neutron, and electromagnetic waves in a lattice; reciprocal lattice; phonons and their interactions; free electron theory of metals; energy bands. Letter grading.

150. Physics of Charged-Particle and Laser Beams. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 110A, 110B, 115A, 115B. Physics of charged-particle and laser beams presented as a unified subject. Basic physics of charged-particle beams, covering relativistic particle motion in electromagnetic fields, transverse focusing, acceleration mechanisms, linear and circular accelerators, and advanced topics. Some fundamentals of laser physics, including gain and broadening mechanisms, linear light optics, laser reso- nators, and advanced topics and applications. P/NP or letter grading.

1515. Energy in Modern Economy. (4) (Same as Environment M155.) Lecture, three hours. Requisites: courses 1A and 1B (or 6A and 6B), Mathematics 3A and 3B (or 31A and 31B), Statistics 12 or 13. Examination of physics of energy, history of energy development, and role that energy plays in our economy, particularly in transportation and power grid. Prospects for decreasing availability of fossil fuels and impact of global warming on energy development. Current and potential future government and social responses to energy issues. P/NP or letter grading.

160. Numerical Analysis Techniques and Particle Simulations. (4) Lecture, three hours; computer terminals, six hours. Preparation: minimum knowledge of computer programming (Fortran). Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 105A, 105B, 110A, 110B. Introduction to field of computer modeling of physical systems using particle models; numerical models and methods, methods of diagnosing results, experience with running interesting physical problems. P/NP or letter grading.

180A. Nuclear Physics Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180B. Physical Optics and Spectroscopy Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180C. Solid-State Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180D. Acoustics Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180E. Plasma Physics Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180F. Elementary Particle Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180G. Soft Matter Laboratory. (4) (Same as Chemistry M120.) Laboratory, four hours. P/NP or letter grading.

186. Neuropsychology: Brain-Mind Problem. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, 1C, 4AL, 6A, 6B, 6C, Chemistry 14A or 20A, Mathematics 3A, 3B, 3C, 31A, 32A, 32B, 33A. How does mind emerge from brain? Provides summary of basic biophysics of neurons, synapses, and plasticity. Introduces to commonly used experimental and theoretical techniques of measuring, quantifying, and understanding the relative strengths and weaknes and use of them to understand basic neural mechanisms, their emergent neural dynamics, and behavior in example model systems. Discussion of how neural interactions between neural circuits and their role in cognition, learning, and sleep. Computer laboratory component where students learn to write simple codes to quantify neural activity patterns. P/NP or letter grading.

188. Special Courses in Physics. (4) Lecture, three hours; discussion, one hour. Limited to junior/senior Astrophysics and Physics majors. Departmentally sponsored temporary courses such as pilot courses or those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

188L. Special Laboratory Courses in Physics. (4) Lecture, one hour; laboratory, two hours. Limited to junior/senior departmental majors. Departmentally sponsored temporary laboratory courses such as pilot courses or those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

190. Research Colloquia in Physics. (2) Seminar, two hours. Designed to bring together students under- taking supervised tutorial research in seminar setting with c. P/NP or more faculty members to discuss their own work or related work in discipline. Led by one supervis- ing faculty member. May be repeated for credit. P/NP grading.

191. Variable Topics Research Seminars: Physics and Astronomy. (4) Lecture or seminar, one hour. Limited to undergraduate students. Seminars are linked to speaker-series seminars offered by department on weekly basis. Supplemental reading from literature on speaker’s topic, as well as active partic- ipation and discussion to understand what kind of questions modern-day physicists actually ask and how they go about answering them. May be repeated for credit. P/NP or letter grading.

194. Research Group Seminars: Physics and Astronomy. (1) Research group meeting, one hour. Designed for undergraduate students who are part of research group/laboratory. Discussion of research of fac- ulty members or students with regard to understanding methodology in field and laboratory equipment. May be repeated for credit. P/NP grading.

196. Research Apprenticeship in Physics. (2 to 4) Tutorial, three hours per week. Limited to juniors/seniors with overall 3.0 grade-point average. En- try-level research apprenticeship for upper division stu- dents under guidance of faculty mentor. May be repeated for credit. Individual contract required. P/NP grading.

197. Individual Studies in Physics. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Individual in- tensive study, with scheduled meetings to be arranged between faculty mentor and student. Assigned read- ing and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP grading.

198. Honors Research in Physics. (2 to 4) Tutorial, 12 hours. Limited to juniors/seniors with overall 3.0 grade-point average. Development and completion of honors thesis or comprehensive research project un- der direct supervision of faculty mentor. May be repeated for credit. Individual contract required. Letter grading.

199. Directed Research or Senior Project in Phys- ics. (2 to 4) Tutorial, two hours. Limited to juniors/seniors with overall 3.0 grade-point average. En- try-level research apprenticeship for upper division stu- dents under guidance of faculty mentor. May be repeated for credit. Individual contract required. Letter grading.

Graduate Courses

201G. Modern Physics Research Areas. (2) Review of modern physics research areas, with emphasis on those actively pursued at UCLA. S/U grading.

213B. Advanced Atomic Structure. (4) N-j symbols; continuous groups, fractional parentage coefficients, n electronic systems.

215C. Quantum Statistical Mechanics and the Many Body System. (4) Lecture, three hours. Classical methods for interacting systems; quantum field theory techniques in statistical mechanics; Green’s func- tion approach; Coulomb gas; imperfect Bose gas; electro- phonon interaction; superconductivity; phase transitions; theory of Fermi liquid. S/U or letter grading.

226E. Particle Astrophysics: Exploring Earliest and Extreme Universe. (4) Lecture, three and one half hours. Requisites: courses 210A, 210B, 211A, 215A. Topics include inflationary cosmology; introduction to high-energy astrophysics and discussion of latest de- v elopments in both experimentation and theory. Spe- cial emphasis on unified picture of universe that emerges from particle, astronomy, and cos- mology. S/U or letter grading.

230A-230B-230C. Quantum Field Theory. (6-6-6) Lecture, four hours. Requisites: courses 221A, 221B, 221C. Modern quantum field theory, including free and interacting field quantization, operator and path inte- gral formalism, renormalization theory and renormal- ization group methods, gauge theories, quantum elec- trodynamics, perturbative quantum field theory, sponta- neous symmetry breakdown, mass generation, and anomalies. S/U or letter grading.

230D. Quantum Field Theory. (4) Lecture, four hours. Requisites: courses 221A, 221B, 221C. Topics in modern quantum field theory, including solitons, in- stantons, and other topological defects, large N meth- ods, finite temperature field theory, lattice field theory, effective field theory methods and chiral Lagrangians, conformal field theories and topological aspects of anomalies. S/U or letter grading.

231A. Methods of Mathematical Physics. (4) Lecture, four hours, not open for credit to students with credit for Mathematics 226B. Ordinary differential equations, partial differential equations, and integral equations. Calculus of variations. S/U or letter grading.

232A-232B. Relativity. (4-4) Special and general the- ories, with application to elementary particles and as- trophysics. S/U or letter grading.

232C. Special Topics in General Relativity. (4) Lec- ture, four hours. S/U or letter grading.

236. Geometry and Physics. (4) (Same as Mathe- matics M217.) Lecture, three hours. Interdisciplinary course on topics at interface between physics quantum fields and supersymmetries and mathematics of differential and algebraic geometry. Topics include supersymme- try, supergravity, Witten’s Chern-Simons term and conformal field theory, Calabi-Yau manifolds, mirror symmetry and duality, integrable systems. S/U grading.

237B. String Theory. (4) Lecture, four hours. Requi- site: course 237A. Topics include toroidal com- pactification, t-duality and d-branes, supersymmetric string theories, orbifolds, Calabi-Yau compactifications and physics in four dimensions, and strings at strong cou- pling and dualities. S/U or letter grading.

256. Seminar: Propagation of Waves in Fluids. (2 to 4) Seminar, three hours. S/U or letter grading.

258. Seminar: Spectroscopy. (2 to 4) Seminar, three hours. S/U or letter grading.

279A. Seminar: Nuclear Physics. (2 to 4) Seminar, three hours. S/U or letter grading.

279B. Seminar: Elementary Particle Physics. (2 to 4) Seminar, three hours. S/U grading.

279C. Seminar: Accelerator Physics. (2 to 4) Semi- nar, three hours. Physics principles governing design and performance analysis of particle accelerators, us- ing existing accelerators as examples and emphasizing the interplay among design goals, performance, and operational experience. S/U grading.
280E. Advanced Plasma Laboratory. (4) Lecture, two hours; laboratory, four hours. Requisites: courses M122, 188B. Laboratory experiments on behavior of plasmas in magnetic fields. Study of basic physics of particle motions, distribution functions, and fluid dynamics. Plasma waves and nonlinear phenomena. Advanced plasma diagnostics.

290. Research Tutorial: Plasma Physics. (2 or 4) Three terms required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students directed toward problems of current research interest in plasma physics group, both experimental and theoretical. May be repeated for credit. S/U grading.

291. Research Tutorial: Elementary Particle Theory. (2 or 4) Requisites: courses 226A, 230A, 230B. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

292. Research Tutorial: Spectroscopy, Low-Temperature, and Solid-State Physics. (2 or 4) Required of each graduate student doing research in these fields, ordinarily during second or third year. Seminar and discussion by staff and students on problems of current research interest in spectroscopy, low-temperature, and solid-state physics. May be repeated for credit. S/U grading.

293. Research Tutorial: Current Topics in Physics. (2) Lecture, one hour. Seminar and discussion by staff and students on current topics in physics, both experimental and theoretical (topics not limited to one field of physics). Strongly recommended for graduate students in physics. May be repeated for credit. S/U grading.

294. Research Tutorial: Accelerator Physics. (2 or 4) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in accelerator physics. May be repeated for credit. S/U grading.

295. Research Tutorial: Solid Earth Physics. (2 or 4) Required (or course 292 if appropriate) of each graduate student doing research in this field, ordinarily in second or third year. Seminar and discussion on solid earth physics. May be repeated for credit. S/U grading.

296. Research Topics in Physics. (2) Advanced study and analysis of current topics in physics. Discussion of current research and literature in research specialties of faculty member teaching course. May be repeated for credit. S/U grading.

M297. Research Tutorial: Astroparticle Physics. (2 or 4) (Same as Astronomy M297.) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astroparticle physics. May be repeated for credit. S/U grading.

298. Research Tutorial: Experimental Elementary Particle Physics. (2 or 4) Limited to six students. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students on current problems in experimental elementary particle physics. May be repeated for credit. S/U grading.

299. Research Tutorial: Nuclear Physics. (2 or 4) Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion on nuclear physics by staff and students, in both experimental and theoretical. May be repeated for credit. S/U grading.

M370A. Integrated Science Instruction Methods. (4) (Same as Chemistry M370A and Earth and Space Sciences M370A.) Lecture, two hours; discussion, one hour; laboratory, one hour. Preparation of one introductory lower division year (including laboratory) each of chemistry, life sciences, and physics and at least two Earth science courses, preferably one with field experience. Classroom management, lesson design, assessment, history of science education. S/U or letter grading.

M370B. Integrated Science Instruction Methods. (4) (Same as Chemistry M370B and Earth and Space Sciences M370B.) Lecture, two hours; discussion, one hour; laboratory, one hour. Requisite: course M370A or Chemistry M370A or Earth and Space Sciences M370A. Application of learning theory to science instruction and classroom management, including use of technology, collaborative learning, laboratory safety, ethical issues, field experiences, and professional development. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

490. Scientific Writing. (2) Seminar, 90 minutes. Practical guidelines for improved scientific writing and oral presentation. Writing of several short papers with subsequent analysis in class. Short blackboard and/or viewgraph presentations. Topics vary. S/U grading.

495. Teaching College Physics. (2) Seminar/discussion (five or more one-hour meetings during term, plus intensive training week at beginning of Fall Quarter). Required of all new teaching assistants. Special course for teaching assistants designed to deal with problems and techniques of teaching college physics. Ideas and techniques learned are applied and evaluated in the sections of each teaching assistant. May be repeated for credit. S/U grading.

596. Directed Individual Studies. (2 to 12) Tutorial, to be arranged. May be repeated for credit. S/U grading.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations. (4) Tutorial, to be arranged. May be repeated twice for credit. S/U grading.

598. Master’s Thesis Research and Writing. (4) Tutorial, to be arranged. May be repeated twice for credit. S/U or letter grading.

599. Ph.D. Research and Writing. (4 to 12) Tutorial, to be arranged. May be repeated for maximum of 18 units. S/U grading.

Scope and Objectives
Physiology is the science of the functional activities of the human body. This covers a wide range of domains, including observations on humans and experiments on animals and model systems in order to understand principles. Physiology is the science most directly relevant to human medicine in all its specialties and to understanding all environmental factors affecting human life. It is also a pure science of great challenge because of the complexity of its problems and its extensive interaction with mathematical, physical, biochemical, and engineering sciences, as well as with other branches of biology.

Within the prescribed curriculum, students may specialize in cellular and molecular physiology, theoretical and mathematical physiology, and organ systems and integrative phenomena, including neuroscience and behavioral physiology.

In the last survey conducted by the National Academies Board on Higher Education and Workplace, UCLA’s Physiology Department was judged second best in the nation in terms of the quality of its faculty. The department offers postdoctoral training in research and welcomes students interested in articulated M.D./Ph.D. programs.

Applicants interested in pursuing graduate study may apply directly to the interdepartmental Molecular, Cellular, and Integrative Physiology Ph.D. Program. See http://www.mcp.ucla.edu or UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences at http://www.uclaaccess.ucla.edu.

Physiology
Upper Division Courses

100. Elements of Human Physiology. (6) Designed for first-year dental students. Major organic body functions. With special supplementation, a suitable introduction to the field for graduate students for whom the 201A, 201B course sequence is too extensive.

199. Directed Research in Physiology. (2 to 4) Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M210. Molecular and Cellular Mechanisms of Neural Integration. (5) (Same as Neuroscience M210 and Physiological Science M210.) Lecture, four hours; discussion, one hour. Requisite: Neuroscience M202. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation. Letter grading.

220. Methods in Cell Physiology. (6) Linear circuit analysis, including admittance, transfer admittance, transfer function, and filters using transform methods. Application of these concepts to electronic analog circuits in lectures and laboratory, with emphasis on operational amplifiers. Applications to electrophysiology include microelectrode amplifiers, voltage clamp and clamp techniques, with circuit analysis and noise

Chair
Nancy L. Wayne, Ph.D.

Academies Board on Higher Education and Workplace.
considerations. Digital electronics cover logic gates, sequential circuits, and A/D and D/A conversion, with introduction to sampling theory.

221. Cell Physiology: Excitability. (6) Requisite: course 220. In-depth coverage of general properties of excitable cells, linear cable properties, nonlinear conductance changes, and generation and propagation of the nerve impulse. Voltage gating and gating currents, as well as relationship between macroscopic conduc-
tance and single channel properties discussed in ana-
tytical detail using original publications.

M223. Membrane Molecular Biology. (4) (Same as Biological Chemistry M223.) Lecture, two hours; dis-
cussion, two hours. Requisite: Biological Chemistry CM253. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes; pumps, carriers, and channels; receptors and transmembrane signaling. S/U or letter grading.

298. Current Topics in Physiology. (2 to 4) Lecture, one hour; discussion, one hour. Designed for graduate students. Students read primary literature in a speci-
ified area and conduct or participate in discussions on these papers. May be repeated for credit. S/U or letter grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged. S/U grading.

597. Preparation for M.S. Comprehensive Exami-
nation or Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged. S/U grading.

Brian D. Walker, Ph.D.

Assistant Professors

Lorrie A. Frasure, Ph.D.
Leslie N. Johns, Ph.D.
Robert Trager, Ph.D.

Adjunct Assistant Professor

James A. Desseaux, Ph.D.

Scope and Objectives

The undergraduate major in Political Science aims to provide understanding of basic political processes and institutions as these operate in different national and cultural contexts. It also covers the interaction between nation states, the changing character of the relations between citizens and governments, and the values and criteria by which the quality of political life is judged.

The program may be individually fo-
cused to serve the needs of the liberal arts ma-

or in Political Science (a master's degree

Requirements. It is designed to give stu-
dents a strong foundation in the discipline while enabling them to acquire additional skills for advanc-
ing their professional careers.

Undergraduate Study

**Political Science B.A.**

**Political Science Premajor**

All students intending to major in Political Sci-
ence must enroll as Political Science prema-
jors. After completion of preparation for the ma-

or courses, they need to petition to enter the major in the Undergraduate Office, 4269A/ 4269B Bunche Hall.

**Preparation for the Major**

**Required:** Four lower division courses from Po-

tical Science 10, 20, 30, 40, 50. These lower division courses is requisites to upper division courses are required in those fields design-

ated as the concentration or distribution field. Students must also take Political Science 6 or 6R. Students who concentrate in Fields I, II, III, or IV may substitute Statistics 10 or 12 for course 6 or 6R.

Students must complete all premajor courses with a 2.0 grade-point average by the time they attain 135 units. Admission to the major is granted only after successful completion of all lower division requirements.

**Transfer Students**

Transfer applicants to the Political Science ma-

or with 90 or more units must complete the fol-

dowing introductory courses prior to admission to UCLA: one statistics course and four courses from political theory, world politics, game the-

ory, American politics, or comparative politics.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/ adm_tr.htm for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** Ten upper division courses (40 units) selected from Political Science 104A through 199, each taken for a letter grade. Students are required to maintain a 2.0 overall grade-point average in all upper division political science courses.

Upper division political science courses are or-

ganized into five fields: (I) political theory, (II) in-

ternational relations, (III) American politics, (IV) comparative politics, and (V) methods and models.

In fulfilling the requirement of 10 upper division political science courses, students must satisfy the following:

1. A concentration in one field by completing the lower division course and at least four upper division courses in that field

2. A distribution of the lower division course and two upper division courses in each of two other fields (four upper division courses)

3. Two additional elective courses in political science to comprise the total of 10

**Field Concentration Requirements**

The lower division course is requisite to upper division courses in those fields designated as the concentration field and the two distribution fields for majors. Specific requirements for the field concentration are as follows:

1. **Political Theory**: Political Science 10 and any four courses in Field I

2. **International Relations**: Course 20 and any four courses in Field II. Courses 118 and 151C may also be applied toward concentra-
tion or distribution in Field II
Ill. American Politics: Course 40 and any four courses in Field III. Courses 114A through M114D, M115A, 120A, and 121A may also be applied toward concentration or distribution in Field III

IV. Comparative Politics: Course 50 and any four courses in Field IV. Courses 118, 124C, 128A, 128B, 131, 132A, M132B, and 135 may also be applied toward concentration or distribution in Field IV

V. Methods and Models: Courses 6 or 6R (Statistics 10 and related courses may not be substituted), 30, and any four courses from 104A, 104B, M105, M106, 124A, M142D, 149 (collective action; congress, institutions, and collective choice; legislative strategy), 153B, 156D, 166, 169 (political economy of development), 170A, 191B (international negotiation)

Courses 119, 139, 149, 169, and 179 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Courses 191H, 198, and 199 may not be applied toward either the concentration or distribution requirement.

Political Science majors should be aware that the upper division course requirements in the major (40 units) do not meet the upper division requirement of 60 units for graduation. Additional upper division units must be taken to reach the 60-unit total.

Undergraduate Seminars
Each term the department offers a series of seminars (Political Science 191A through 191E) in each field. The requisites are two upper division courses in the field in which the seminar is offered, a 3.25 average at the upper division level in political science, or discretion of the instructor. These courses may be applied toward either the concentration or distribution requirement, and students who qualify are encouraged to take them.

Honors Program
The department honors program is open to seniors and to students who (1) have completed five upper division political science courses (two of which are in one field), (2) have a 3.5 grade-point average in upper division political science courses, and (3) are eligible for College of Letters and Science honors. Students should have substantial experience in writing research papers and take at least one seminar course in the Political Science 191 series before they enter the honors program or course 191H.

Students wishing to qualify for graduation with departmental honors must complete the following: (1) courses 191H and 198, in which a senior thesis is written; (2) eight upper division courses (excluding courses 119, 139, 149, 169, and 179) distributed as follows: four courses in one field and four additional courses, two in each of two other fields; (3) four upper division courses in one or two of the social sciences other than political science.

International Relations Specialization
The undergraduate specialization in International Relations can only be taken jointly with a major in Political Science, and all requirements for the Political Science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in Political Science and specialization in International Relations. The program is designed to serve the needs of (1) students desiring a general education focused on international affairs and (2) students preparing for graduate work in international affairs, whether in a social science or area study.

The program is also beneficial for (1) students planning careers (in business, law, journalism, or library service) with an international emphasis and (2) those preparing to teach social sciences in the secondary schools. These students should structure their programs primarily to meet the preparation requirements of the professional school or institutional credential of their choice.

Courses in management and administration, and in oral and written communications, ordinarily increase the career options of students in this program.

Preparation for the Specialization
Required: Political Science 26, 50, and two courses from 10, 30, 40; Anthropology 9, Economics 1 and 2, 5, or 100; Geography 3 or 5; History 1A, 1B, and 1C, or any three courses from 8A, 8B, 8C, 9A, 9C, 9D, M10A, 10B, 11A, 11B; Sociology 1.

Upper Division Requirements
The Political Science major should be completed as follows: any four upper division political science courses in each of Fields II and IV and two additional courses both in Field I or III.

Other required social sciences courses include one course from Anthropology 161, 167, 171, 173Q, 174P, 175R, 175T, 175U, 177, Sociology 179, 182, 183, 186; two courses from Economics 111, 112, 121, 122, 181, 181B; one course from Geography 110, 121, 125, M128, 133, 140, 161, 162A, 182B, 183, 185, 186, 187; two courses from History 113A, 113B, 114A, 123A, 125B, 137A, 137B, 140C, 144.

Completion of the sixth quarter course (or equivalent as prescribed by the language department), with a grade of C or better, of any modern foreign language is also required. French 6, German 6, Spanish 25, and Russian 6 are most frequently offered in fulfillment of this requirement, but also refer to the offerings listed under African Languages, Asian Languages and Cultures, Germanic Languages, Italian, Near Eastern Languages and Cultures, and Portuguese. Arabic, Chinese, French, German, Japanese, Russian, and Spanish are the languages of widest career utility in international affairs.

Each course must be taken for a letter grade.

Area Focus
Students are advised but not required to concentrate their political science, geography, history, and language courses so as to achieve broad familiarity with one area, such as Africa, East Asia, Europe, Latin America, the Middle East, South Asia, or Southeast Asia.

For further information, contact the Undergraduate Office, 4269A/4269B Bunche Hall.

Political Science Minor
The Political Science minor introduces students to political processes and institutions.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in the Undergraduate Office, 4269A/4269B Bunche Hall.

Required Lower Division Courses (10 units):
Any two lower division political science courses.

Required Upper Division Courses (20 units):
Any five upper division political science courses. At least three of the five courses must be taken in residence at UCLA.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnnet.ucla.edu/gasaa/library/pgmreqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Political Science offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Political Science.

Political Science
Lower Division Courses

6. Introduction to Data Analysis. (5) Lecture, three or four hours; discussion, one hour (when scheduled). Not open for credit to students with credit for course 6R. Introduction to collection and analysis of political data, with emphasis on application of statistical reasoning to study of relationships among political variables. Use of computer as aid in analyzing data from various fields of political science, among them comparative politics, international relations, American politics, and public administration. P/NP or letter grading.

6R. Introduction to Data Analysis — Research Version. (5) Lecture, three or four hours; discussion, one hour (when scheduled). Enforced corequisite: course 50R. Not open for credit to students with credit for course 6. Introduction to collection and analysis of political data, with emphasis on application of statistical reasoning to study of relationships among political variables. Use of computer as aid in analyzing data from comparative politics. P/NP or letter grading.
10. Introduction to Political Theory. (5) Lecture, three hours; discussion, one hour. Exposition and analysis of political theorists and concepts from Plato to the present. P/NP or letter grading.

20. World Politics. (5) Lecture, three hours; discussion, one hour. Required of all students concentrating in Field II. Introduction to problems of world politics. P/NP or letter grading.

30. Politics and Strategy. (5) Lecture, three or four hours; discussion, one hour (when scheduled). Introduction to study of strategic interaction in political applications. Use of game theory and other formal modeling strategies to understand politics. P/NP or letter grading.

40. Introduction to American Politics. (5) Lecture, three hours; discussion, one hour. Basic institutions and processes of democratic politics. Treatment of themes such as constitutionalism, representation, participation, and leadership coupled with particular emphasis on the American case. P/NP or letter grading.

50. Introduction to Comparative Politics. (5) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 50R. Comparative study of constitutional principles, governmental institutions, and political processes in selected countries. P/NP or letter grading.

50R. Introduction to Comparative Politics — Research Version. (5) Lecture, three or four hours; discussion, one hour (when scheduled). Enforced corequisite: course 6R. Not open for credit to students with credit for course 50. Comparative study of constitutional principles, governmental institutions, and political processes in selected countries, with emphasis on presentation and evaluation of quantitative evidence. P/NP or letter grading.

88A-88D. Lower Division Seminars. (4 each) Seminar, three hours. Limited to freshmen/sophomores. Opportunities to develop writing, verbal, and reasoning skills. General introduction to a subfield of a major area, or intensive exploration of a particular theme or topic. Variable topics; consult Schedule of Classes for topics to be offered in a specific term. May not be repeated for credit except by students who receive a grade of C- or higher in each (when scheduled). P/NP or letter grading.

M105. Economic Models of Public Choice. (4) (Same as Economics M135.) Lecture, three or four hours; discussion, one hour (when scheduled). Preparatory requisites: Economics 11. Designed for juniors/seniors. Analysis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-rider problem, voting and majoritarian logic, democratic representation, and political bargaining. P/NP or letter grading.

M107. Women and Politics. (4) (Same as Women's Studies M117.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to rapidly growing body of empirical and theoretical scholarship on women and politics in both national and international contexts. Topics may include women's political experience and gender; women's electoral participation; representation of women in Congress and in legislatures worldwide; women as heads of government and state; feminist critiques of political philosophies and citizen rights; SRA; women's struggle for suffrage; mothers as political actors; women and military; women, development, and globalization. P/NP or letter grading.

Field I: Political Theory

M111A-111B-111C. History of Political Thought. (4-4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exposition and critical analysis of major political philosophers and schools. P/NP or letter grading. M111A. An-cient and Medieval Political Thought from Plato to Machiavelli. (Same as Classics M121.) M111B. Early Modern Political Theory from Hobbes to Bentham. M111C. Late Modern and Contemporary Political Theory from Hegel to the Present.

112A. Democratic Theory. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Critical analysis of selected major authors, issues, and arguments in contemporary democratic theory.

M112B. Invention of Democratic Theory. (4) (Same as Classics M125.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/se-niors. Democratic theory was invented in ancient Greece. Political form grounded on equality before law, citizenship, and freedom. It came into existence as struggle by “demos,” people, aware of its excellence and pride of its power, “kratos.” It became only regime capable of including minorities, while disregarding wealth, status, and diverging interests. Examination of history and theory of ancient democracy. P/NP or letter grading.

113A. Problems in 20th-Century Political Theory. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study and interpretation of theorists who have focused their analyses on social and political problems of 20th cen-tury P/NP or letter grading. 113B. Politics, Theory, and Film. (4) Seminar, four hours. Requisite: course 10. Designed for juniors/seniors. Intense and individualized examination of central issues in political theory such as power and truth in light of relevant political theorists. P/NP or letter grading.

114A-114B. American Political Thought. (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study and interpretation of theorists who have focused their analyses on social and political problems of 20th century. P/NP or letter grading.

116A. Marxism. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of important text in continental political theory, including relationship between politics and religion, skepticism, and political freedom. P/NP or letter grading.

117. Jurisprudence. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of important text in continental political theory, including relationship between politics and religion, skepticism, and political freedom. P/NP or letter grading.

M119A. Modern Receptions of Ancient Political Theory. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Critical analysis of origins, nature, and development of Marxist political theory. P/NP or letter grading.

119B. Continental Political Thought. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of important text in continental political theory, including relationship between politics and religion, skepticism, and political freedom. P/NP or letter grading.

M120A. Modern Receptions of Ancient Political Thought. (4) (Same as Classics M134.) Lecture, three hours. Designed for juniors/seniors. Study of how Western culture has conceived and reinterpreted political thought of ancient Greeks and Romans. Topics include Plato, Aristotle, and Machia-velian amorality, democratic responsibility and repre-sentation, ethics of compromise, dirty hands problems, international ethics. Letter grading.

M115C. Citizenship and Public Service. (4) (Formerly numbered 115C.) (Same as Civic Engagement M115.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: course 10. Designed for juniors/seniors. Study of ways in which political theorists have ideas of citizenship and public service, how these ideas have changed over time, and frameworks for thinking about citizenship in era of markets and globalization. P/NP or letter grading.

M115D. Diversity, Disagreement, and Democracy: Can We All Just Get Along? (4) (Same as Human Complex Systems M140D.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Can’t we all just get along? Study of diversity, disagreement, and democracy. Di-versity covers individual differences, cultural differences, and human universals; groupism, factionalism, and identity politics; multiculturalism and one-world ethics. Disagreement includes moral, ideological, and party-political disagreement; resolvable and irresolvable kinds of disagreement; conceptions of polarization; herding and information cascades. Democracy stands for political mechanisms of information aggre-gation; political mechanisms to resolve differences, or to keep peace among wide-ranging differences; emergence and spread of democracy, liberty, and rule of law. Letter grading.

116A. Feminism. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Critical analysis of origins, nature, and development of Marxist political theory. P/NP or letter grading.

116B. Controversiality and Public Debate. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Study of important text in twentieth century political theory, including relationship between politics and religion, skepticism, and political freedom. P/NP or letter grading.

Field II: International Relations

120A. Foreign Relations of U.S. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of factors and forces entering into formation and implementation of American foreign policy, with special emphasis on contemporary problems. P/NP or letter grading.

120B. World Politics and U.S. Foreign Policy after September 11. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for jun-iors/seniors. Video lectures by leading scholars as well as live lectures and discussion on complex prob-lems such as terrorism, nuclear proliferation, and Arab-Israeli conflict. P/NP or letter grading.
M120C. U.S. Intelligence Agencies in Theory and Practice. (4) [Same as Public Policy M118.] Lecture, three hours; discussion, one hour (when scheduled). Limited to juniors/seniors. Examination of U.S. intelligence agencies from Cold War to present. Particularly in light of 9/11 and Iraq war, few organizations are more important and less understood. Three separate facets from current policy, comparing how intelligence agencies are portrayed in popular culture and how policymakers develop strategies to address them. Exploration of Cold War legacy, development of American national security and intelligence community strategic doctrine, and U.S. foreign policymaking process from 1945 to present. Examination of broad spectrum of issues confronting today’s foreign policy leaders, from threats to vital U.S. interests (WMD proliferation and terrorism), to regional security and economic challenges (Iraq, China), to humanitarian intervention and nation-building (Darfur, Afghanistan). Students draft analytic options memos and deliver oral presentations on how to handle six intelligence national security mini-cases. Provides overview of current challenges and hones student analytic skills to examine these challenges from strategic policy perspective. Letter grade or pass/fail.

126. Peace and War. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20. Designed for juniors/seniors. Theory and research on causes of war, conditions of war, and how policymakers develop strategies to address them. Exploration of Cold War legacy, development of American national security strategic doctrine, and U.S. foreign policymaking process from 1945 to present. Examination of broad spectrum of issues confronting today’s foreign policy leaders, from threats to vital U.S. interests (WMD proliferation and terrorism), to regional security and economic challenges (Iraq, China), to humanitarian intervention and nation-building (Darfur, Afghanistan). Students draft analytic options memos and deliver oral presentations on how to handle six intelligence national security mini-cases. Provides overview of current challenges and hones student analytic skills to examine these challenges from strategic policy perspective.

127A-127B. Atlantic Area in World Politics. (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: courses 20, 128A. Designed for juniors/seniors. Survey of foreign policy of post-Communist Russia, with special emphasis on Russian relations with NATO, the former communist states of East Central Europe, China, and the Commonwealth of Independent States. Diplomacy and War. (4) (Not same as course 129 prior to Winter Quarter 2008.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: courses 20, 128A. Designed for juniors/seniors. Survey of foreign policy of post-Communist Russia, with special emphasis on Russian relations with NATO, the former communist states of East Central Europe, China, and the Commonwealth of Independent States. Diplomacy and War. (4) (Not same as course 129 prior to Winter Quarter 2008.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: courses 20, 128A. Designed for juniors/seniors. Survey of foreign policy of post-Communist Russia, with special emphasis on Russian relations with NATO, the former communist states of East Central Europe, China, and the Commonwealth of Independent States. Diplomacy and War. (4) (Not same as course 129 prior to Winter Quarter 2008.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: courses 20, 128A. Designed for juniors/seniors. Survey of foreign policy of post-Communist Russia, with special emphasis on Russian relations with NATO, the former communist states of East Central Europe, China, and the Commonwealth of Independent States.

127B. Western Europe. External relations of United Kingdom, West Germany, France, Italy, and other European members of NATO, in regard to European security in context of the Atlantic Alliance. 127B. U.S. and Europe. Requisite: course 127A. Relations between the U.S. and Western Europe in context of the Atlantic Alliance, in context of U.S./Soviet relations.

128B. International Relations of Post-Communist Russia. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: courses 20, 128A. Designed for juniors/seniors. Survey of foreign policy of post-Communist Russia, with special emphasis on Russia’s relations with NATO, the former communist states of East Central Europe, China, and the Commonwealth of Independent States. Diplomacy and War. (4) (Not same as course 129 prior to Winter Quarter 2008.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: courses 20, 128A. Designed for juniors/seniors. Survey of foreign policy of post-Communist Russia, with special emphasis on Russia’s relations with NATO, the former communist states of East Central Europe, China, and the Commonwealth of Independent States. Diplomacy and War. (4) (Not same as course 129 prior to Winter Quarter 2008.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: courses 20, 128A. Designed for juniors/seniors. Survey of foreign policy of post-Communist Russia, with special emphasis on Russia’s relations with NATO, the former communist states of East Central Europe, China, and the Commonwealth of Independent States.

129. Diplomacy and War. (4) Not same as course 129 prior to Winter Quarter 2008.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20 or 127A. Designed for seniors. Analysis of role of diplomacy in great power politics, history of diplomatic institutions, advantages of public and private diplomacy, bilateral and multilateral settings, and theory and practice of deterrence and coercion. Use of game theoretic reasoning and historical analysis. Prior exposure to both useful but not required. P/NP or letter grading.

130. Latin American International Relations. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20. Contemporary regional issues and conflicts, with particular attention to Arab-Israeli problem, and Persian Gulf area. M132B. International Relations of Sub-Saharan Africa. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for seniors. Contemporary regional issues and foreign policies of African states; role of external powers.

132A-M132B. International Relations of Middle East. (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Contemporary regional issues and foreign policies of African states; role of external powers. 132A. Contemporary regional issues and foreign policies of African states; role of external powers.

133. International Relations of Sub-Saharan Africa. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for seniors. Contemporary regional issues and foreign policies of African states; role of external powers.

134. Foreign Policy Decision Making and Tools of Statecraft. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 120A. Designed for seniors. Concept of statecraft and process models of individual and group decision making. Impact of strategic interaction and situational factors on foreign policy decision making. Implications for policy choice of tools of statecraft (i.e., threats/promises, military/economic/diplomacy). P/NP or letter grading.

135. International Relations of China. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20. Designed for juniors/seniors. Relations of China with its neighbors and the other powers, with emphasis on contemporary interests and policies of China vis-a-vis the U.S. and Soviet Union.

136. International Relations of Japan. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 20. Designed for juniors/seniors. Foreign policies of Japan and interests and policies of other countries, particularly the U.S., as they relate to Japan.

137A-137B. International Relations Theory. (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. 137A. Examination of various theoretical approaches to international relations. P/NP or letter grading. 137B. Alternative approaches to analysis of international politics and their application to historical and contemporary cases.

138A. International Politics, 1815 to 1914. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for seniors. Classic period of European great power politics, beginning with peace settlement at end of Napoleonic Wars, ending with coming of World War I. P/NP or letter grading.

138B. International Politics, 1914 to the Present. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for seniors. First World War, failure of peace settlement, origins of Second World War, Cold War, and post-Cold War period. P/NP or letter grading.

139. Special Studies in International Relations. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: two courses in Field II, or course 20 and one course in Field II. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to international relations. Sections offered on regular basis, with topics announced in preceding term. May be repeated for credit with topic change. P/NP or letter grading.

139B. Nuclear Weapons: Critical Decisions. (4) [Same as Environment M165, Honors Collegium M119, and Public Policy M116.] Lecture, three hours. Examination of critical decisions regarding nuclear weapons, starting with President Roosevelt’s decision to build atomic bomb and ending with current policies on containing nuclear proliferation and on avoiding nuclear catastrophe. Letter grading.

Field III: American Politics

140A-140B-140C. National Institutions. (4-4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. 140A. Congress. Study of those factors which affect character of the legislative process and capacity of representative institutions to govern in contemporary society. 140B. The Presidency. Study of nature and problems of presidential leadership, emphasizing impact of the bureaucracy, congress, public opinion, interest groups, and party system on the presidency and national policy-making. 140C. Supreme Court. Introduction to American constitutional development and role of Supreme Court as interpreter of the U.S. Constitution. Reading of Supreme Court cases as well as various historical and current commentaries.

141A-141L. Electoral Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.

141A. Political Psychology. (4) [Same as Psychology M120A.] Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for seniors. Examination of political behavior, political socialization, personality and politics, racism, conflict, and psychological analysis of public opinion on these issues. P/NP or letter grading.
globalization, restructuring, and regional development, (2) citizenship, democracy, and regional governance, (3) effects of globalization on processes on contemporary local politics, (4) effectiveness of political structures and electoral politics.

M144C. Equal Rights and Unequal Education. (4) (Same as Education M186 and Public Policy M186.) Lecture, four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Extensive examination of one or more topics to be offered in different years. Discussion of American public education, with emphasis on issues of inequality.

145A. Anglo-American Legal System. (4) Lecture, four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of the historical development of the Anglo-American legal system and the fundamental concepts of law and justice. P/NP or letter grading.

145C. Constitutional Law — Civil Liberties. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Legal analysis and protection of civil liberties. P/NP or letter grading.

145D. Judicial Oversight of Bureaucracy. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Study of judicial oversight of administrative agencies and the role of the judiciary in the American political process. P/NP or letter grading.

146A. Public Administration and Policy. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Legal controls of administrative action. Substantive and procedural limits on administrative discretion imposed by legislation, executive and judicial agencies, and sources of administrative bodies within these limits. P/NP or letter grading.

146C. Governing the Bureaucracy in the U.S. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Relationship between elected officials and administrators in the U.S., especially efforts of elected and appointed officials to monitor and control behavior of those in government. P/NP or letter grading.

146D. Theories of Organization and Decision Making. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of decision-making frameworks for studying public and private bureaucracies, with emphasis on political and economic patterns, and concepts of organization. P/NP or letter grading.

145E. National Policy Development and Implementation. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Investigation of complex process of policy development and implementation in the U.S., including roles of federal, state, and local agencies as well as public organizations. Subsections offered on particular policy areas, with topics announced in advance. P/NP or letter grading.

145F. Politics, Ethics, and Business. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of business ethics and the role of government. P/NP or letter grading.

146G. Social Life of Information. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of how information moves from those who have it to those who need it. Information flows in organizations, and network analysis. How information circulates in organizations. P/NP or letter grading.

146H. Theories of Organization and Decision Making. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of organizational theory and decision making. P/NP or letter grading.

147A. Overview. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Introduction to historical development of American politics and ideas and an understanding of how institutions of government have evolved over time. Examination of theories, concepts, and analytical tools at center of developmental inquiry. P/NP or letter grading.

147B. Period Inquiry. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of one period in American political history. Critical features of period to be covered and how they contribute to our understanding of contemporary politics. P/NP or letter grading.

147C. Institutional Development. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Examination of one American political institution and its development over time, or interaction of American politics and institutions with some aspect of society and culture. P/NP or letter grading.

149. Special Topics in American Government and Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 40. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to American politics. Sections offered on
151A-151B-151C. African Politics. (4-4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Letterm grading.
151A. Government and Politics of Africa. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Letterm grading.
151B. Political Economy of Africa. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of interactions of economic and political factors in African development, with special attention to political basis of inappropriate economic policy during early post-independence period and change toward a more appropriate economic strategy in recent times. Letter grading.
151C. Special Topics in African Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Consult Schedule of Classes for topics to be offered in a specific term. Letter grading.
152A-152B-152C. Government and Politics of West European Countries. (4-4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparative study of government and politics in contemporary Africa, with special attention to state/society relations, interaction of politics and economic development, political institutions, and conflict and conflict resolution. Letter grading.
152A. Government and Politics of Western Europe, especially Britain, France, or Germany, with particular attention to contemporary problems. P/NP or letter grading.
152B. Political Economy of West European Countries. (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparative study of governmental and political institutions, one hour (when scheduled). Designed for juniors/seniors. Comparative study of governmental and political institutions, one hour (when scheduled). Designed for juniors/seniors. Analysis of bureaucratic structures and function in the U.S., other industrialized, and less developed countries, primarily at national level. Special attention to methods of comparative analysis and utility of various methods. P/NP or letter grading.
153A-153B. Comparative Government and Politics of Western Europe. (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Letterm grading.
153A. West European Government and Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Letterm grading.
153B. Game-Theoretic Approach to West European Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Course 153A is not requisiteto 153B. Designed for juniors/seniors. Uses of elementary game theory to investigate post-War II Western European politics. Social and political forces, and political institutions. Particular emphasis on study of three West European countries United Kingdom, France, and Federal Republic of Germany. Consideration of current developments and comparisons with the U.S. P/NP or letter grading.
154A-154B. Government and Politics in Latin America. (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparative study of governmental and political development in the Latin American republics. P/NP or letter grading.
154A. States of Middle America. Enforced requisites: courses 50 or 50R; 154B. States of South America.
155. Advanced Pluralist Democracies. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Main features and basic problems of economically advanced democracies, analyzed in comparative framework. Topic by topic. Emphasis on cross-Atlantic comparisons, not only political but also sociological.

156A-156D. Government and Politics of Post-Communist States. (4 each) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. P/NP or letter grading.
156A. Russia. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Intensive study of institutions and political development in Russia, with special attention to legacy of the Soviet Union. P/NP or letter grading.
156B. Eastern Europe. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of institutions and political processes in selected post-Communist states of Eastern Europe. P/NP or letter grading.
156C. Post-Soviet States. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of institutions and political processes in selected former Soviet republics other than Russia. P/NP or letter grading.
156D. Political Economy of Post-Communist Reform. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Focused study of interaction between transitions to democracy and to the market in selected post-Communist countries, with emphasis on development of general theories of political and economic reform. P/NP or letter grading.
157. Government and Politics in the Middle East. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparative study of government and politics in contemporary Africa, with special attention to state/society relations, interaction of politics and economic development, political institutions, and conflict and conflict resolution. Letter grading.
158. Southeast Asian Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Course: course 50. Designed for juniors/seniors. Survey of political environment in major Southeast Asian states. Use of comparative analysis to address major problems confronting these states, including democratisation, economic growth, drug trade, deforestation, and security threats. Letter grading.
159A-159B. Government and Politics of China. (4-4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of political environment in major Southeast Asian states. Use of comparative analysis to address major problems confronting these states, including democratisation, economic growth, drug trade, deforestation, and security threats. Letter grading.
160. Government and Politics of Japan. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Letterm grading.
161. Comparative History of Government from Earliest Times to Present Day. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: course 50. Designed for juniors/seniors. Historical diversity of forms of government: archetypal politics, great empires, major innovations, nottable variants. P/NP or letter grading.
165. Islam and Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Religious and spiritual foundations of Islamic legal and political institutions; legitimacy of historical and contemporary regimes, movements, and ideologies; political strategies of Islamic activism. P/NP or letter grading.
166. Comparative Analysis of Government Institutions. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Comparison of major institutional structures such as presidentialism vs. parliamentarism, unicameralism vs. bicameralism, two-party vs. multi-party systems, federal vs. unitary systems, pluralism vs. proportional electoral systems, etc. Method of analysis is rational choice. P/NP or letter grading.
167A. Ideology and Development in World Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Required: course 50. Designed for juniors/seniors. Development in Russia, with special attention to methods of comparative analysis and utility of various methods. P/NP or letter grading.
M167C. Political Economy of Development. (4) (Same as International Development Studies M100B.) Lecture, three or four hours; discussion, one hour (when scheduled). Required: course 50. Designed for juniors/seniors. Letterm grading.
167D. Political Institutions and Economic Development. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: one statistics course. Designed for juniors/seniors. Letterm grading.
168. Comparative Political Analysis. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisites: two courses in Field IV, or course 50 and one course in Field IV. Designed for juniors/se- niors. Major approaches to study of comparative politics. Concepts and methodology of comparative analysis. Letter grading.
169. Special Studies in Comparative Politics. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: one statistics course. Designed for juniors/seniors. Letterm grading.
170A. Studies in Statistical Analysis of Political Data. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Enforced requisit: course 6 or 6R. Designed for juniors/seniors. Letterm grading. Use of statistical methods to interpret data and test theories from various fields in political science and use of quantitative evidence in construction of convincing and truthful ar-
guments related to world of politics. Consult Schedule of Classes for topics to be offered in specific term. P/NP or letter grading.

171A. Applied Formal Models: Collective Action and Social Movements. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 30. Designed for juniors/seniors. How do social movements become convivial or peculiar to participate? Consideration of various theoretical perspectives, including game-theoretic, social network, structural, and identity approaches, illustrated by case studies. P/NP or letter grading.

171D. Negotiation. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 30. Designed for juniors/seniors. Study of negotiation and bargaining in different contexts. Experimental exercises with emphasis on various aspects of negotiation, including coalition formation, honesty, and role of agents. P/NP or letter grading.

172. Strategy and Conflict. (4) Lecture, three or four hours; discussion, one hour (when scheduled). Enforced: one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: course 40. Designed for juniors/seniors. Introduction to political economy of racial discrimination and exploitation of Mexican origin communities. Emphasis on identifying and explaining historically changing relationship between class, race, and power by studying interaction between state policies and political, economic, and social stratification systems, and cultural codes and modes of ideological discourse in each historical period. Letter grading.

M182. Ethnic Politics: African American Politics. (4) (Formerly numbered M144B.) (Same as Afro-American Studies M144.) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: course 40. Designed for juniors/seniors. Emphasis on dynamics of minority group politics in U.S., touching on conditions facing racial and ethnic groups, with black Americans being primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of black Americans, (2) to analyze important political issues facing black Americans, (3) to sharpen students’ analytical skills. P/NP or letter grading.

M184. Black Experience in Latin America and Caribbean. (4) (Formerly numbered M144C.) Same as Afro-American Studies M154C.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: senior or upper division credit in Africana Studies or Africana America. Culture, history, politics, and identity of Afro-descendants in Latin America and the Caribbean, South America, and Central America. Exploration of issues of identity in context of Afro Latino migration to U.S. P/NP or letter grading.

Special Studies

190. Research Colloquium in Political Science. (1) Seminar, one hour. Designed to bring together students undertaking original research in seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

190H. Honors Research Colloquium in Political Science. (1) Seminar, one hour. Designed to bring together students writing departmental honors theses in seminar setting with one or more faculty members to discuss their theses. Led by one supervising faculty member. P/NP grading.

191H. Research Design Seminar for Honors Thesis. (4) Seminar, four hours. Preparation: one course in 191 series, 3.5 grade-point average in upper division political science courses, eligibility for Letters and Science honors. Requisite: all students who wish to write honors theses. May be repeated for credit. Design and development of original empirical research based on experiences from Washington, DC-based field placements. Study of variety of qualitative methods (observation, interviewing, etc.), with emphasis on quantitative analysis. Examination of features of solid and significant research; intensive writing. Letter grading.

195. Community or Corporate Internships in Political Science. (2 or 4) Tutorial, to be arranged. Preparation: 3.0 overall grade-point average. Limited to juniors/seniors. Supervised jointly by Center for Community Learning and undergraduate studies committee. May be repeated for credit. P/NP grading.

M194DC. CAPP Program Internships in Washington, DC. (8) Seminar, four hours. Limited to CAPP-P Program students. Internships in Washington, DC, through Center for American Politics and Public Policy’s program in Washington, DC. May be repeated for credit. P/NP grading.

M194DC. CAPP Program Internships in Washington, DC. Internships. (4) Same as History M194DC and Sociology M194DC.) Seminar, three hours. Limited to CAPP-P Program students. Internships in Washington, DC, through Center for American Politics and Public Policy. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. P/NP grading.

M195CE. Community and Corporate Internships in Political Science. (4) Tutorial, to be arranged: fieldwork, eight to ten hours. Limited to juniors/seniors. Internship in corporate, nonprofit or nonprofit setting coordinated through Center for Community Learning. Students complete weekly written assignments, attend biweekly meetings with graduate student coordinator, and write final research paper. Faculty sponsor and graduate student coordinator construct series of readings assignments that examine issues related to internship site. May be repeated for credit with consent of Center for Community Learning. No more than 8 units may be applied toward major; units may be applied toward credit. P/NP grading.

M196B. African American Freedom Narratives. (4) (Formerly numbered M114C.) Same as Afro-American Studies M114C and Labor and Workplace Studies M114C.) Lecture, three or four hours; discussion, one hour (when scheduled). Enforced: one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: course 30. Designed for juniors/seniors. Understanding of black radicalism in mid-20th century, with special attention to contribution of Malcolm X and black nationalism to African American liberation movement. P/NP or letter grading.

181. Ethnic Politics: Chicano/Latino Politics. (4) (Formerly numbered M144A.) Lecture, three or four hours; discussion, one hour (when scheduled). Prepara- tion: one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: course 40. Designed for juniors/ seniors. Introduction to political economy of racial discrimination and exploitation of Mexican origin communities. Emphasis on identifying and explaining historically changing relationship between class, race, and power by studying interaction between state policies and political, economic, and social stratification systems, and cultural codes and modes of ideological discourse in each historical period. Letter grading.
Graduate Courses

Formal Theory and Quantitative Methods

204B. Game Theory in Politics II. (4) Seminar, three hours. Discussion of approaches used to explain for- mulation and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psycholo- gy, bargaining theory, and game theory. Applications concern political participation, public goods, legislatures, interest groups, and party competition. Designed to help students become informed consumers of game-theoreti- cal literature in political science. S/U or letter grading.

204D. Quantitative Methods in Politics. (4) Seminar, three hours. Preparation: knowledge of calculus and matrix algebra. Recommended requisite: course 200C. Designed to build foundations set in course 200C. Focus on logical and mathematical structure un- derlying some statistical methods that are frequently used in political science. Special emphasis on understanding the structure of the models rather than on gaining added experience using them to analyze data. Applied data analysis. Letter grading.

205. Advanced Topics in Quantitative Methods. (4) Seminar, three hours. Topics vary each year and have included experimental variables principal compo- nents and scaling, models of selection, models of du- ration, ecological inference, and hierarchical models. Student-led presentations on relevant statistical theory and applications. Monte Carlo simulations and replication of well-known studies used to demonstrate how various models work and how they are applied in pract- ice. S/U or letter grading.

220A. International Relations Core Seminar I. (4) Seminar, three hours. Survey of formal political theory to enhance literacy and provide analytical tools without presupposing mathematical background. Model building, collective goods, unanimity and the social con- tract, voting rules, paradoxes and impossibility theo- rems, stability, individual liberty and decentralization, strategic manipulation, representation, veto, and infor- mation. Letter grading.

220C. Introduction to Formal Political Analysis. (4) Seminar, three hours. Survey of formal political theory to enhance literacy and provide analytical tools without presupposing mathematical background. Model building, collective goods, unanimity and the social contract, voting rules, paradoxes and impossibility theorems, stability, individual liberty and decentralization, strategic manipulation, representation, veto, and information. Letter grading.

220D. Bayesian Econometrics. (4) Same as Economics M232A. Lecture, three hours. Requisites: Economics P11A, P11B. Subjective probability, introduction to decision theory, Bayesian analysis of regression, sensitivity analysis, simplification of models, criticism. May be repeated for credit. S/U or letter grading.

221. Seminar: Seminar: Strategic Interaction. (4) Seminar, three hours. Discussion of approaches used to explain for- mulation and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psycholo- gy, bargaining theory, and game theory. Applications concern political participation, public goods, legislatures, interest groups, and party competition. Designed to help students become informed consumers of game-theoreti- cal literature in political science. S/U or letter grading.

222. Seminar: Seminar: Strategic Interaction. (4) Seminar, three hours. Discussion of approaches used to explain for- mulation and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psycholo- gy, bargaining theory, and game theory. Applications concern political participation, public goods, legislatures, interest groups, and party competition. Designed to help students become informed consumers of game-theoreti- cal literature in political science. S/U or letter grading.

223. Politics and Strategies of Modern War. (4) Seminar, three hours. A strategic move influences the other per- son’s choice by affecting his expectations of how he will behave. Discussion of theories of deterrence, coer- cive diplomacy, crisis management, war termination, and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psycholo- gy, bargaining theory, and game theory.

225. American Foreign Policy. (4) Seminar, three hours. An analysis of academic and professional work in international relations and introduction to de- sign of research project in this area. Letter grading.

226. Making of American Foreign Policy. (4) Seminar, three hours. An analysis of academic and professional work in international relations and introduction to de- sign of research project in this area. Letter grading.

230A. Introduction to Political Theory. (4-4) Lecture, three hours. Exploration of major texts and issues in political theory. 230A. Classical and Medieval Foundations (From Plato through Machiavelli) 8459. Early Modern Period from Machiavelli through the Enlighten- ment.

233. Liberalism and Its Critics. (4) Seminar, three hours; discussion, one hour (when scheduled). Critical examination of selected text from post- colonial, spatial, feminist, postmodern, and post-struc- turalist theories that address issues of globalization on major concepts and problems of tradi- tional social and political theory as sovereignty, citizenship, rights, community, representation, and demo- cracy. S/U or letter grading.

234. Game Theory in Politics I. (4) Formerly num- bered 204. Seminar, three hours. Survey of game the- ory, with emphasis on utilizing mathematical models to understand political and economic phenomena. Appli- cations concern political participation, public goods, legislatures, interest groups, party competition. Designed to help students become informed consumers of game-theo- retical literature in political science. S/U or letter grading.

235. Seminar: Political Theory. (4) Seminar, three hours. Discussion, one hour (when scheduled). Examination of works of one or more major contemporary lib- eral theorists (Rawls, Dworkin, Habermas, Nussbaum, etc.) in light of issues which have been proposed to the liberal position (communitarianism, post-struc- turalism, group rights theories, etc.). S/U or letter grading.

236. Toleration, Pluralism, and Diversity. (4) Same as Public Policy M248.) Seminar, three hours. Prior experience in political or legal theory helpful. Ex- ploration of both abstract concepts of toleration and contemporary disputes. S/U or letter grading.

237. Selected Topics in Political Theory. (4) Semi- nar, three hours. Critical examination of major texts in political theory, with particular attention to their philo- sophostic system, their relations to contemporary political and intellectual currents, and importance of system for present-day political analysis. S/U or letter grading.

238. Selected Topics in Political Theory. (4) Semi- nar, three hours. Critical examination of major problem in political theory S/U or letter grading.

239. Workshop: Political Theory. (4) Discussion, three hours. S/U or letter grading.

International Relations

220B. International Relations Core Seminar II. (4) Seminar, three hours. Fundamental analysis of academic work in international relations and introduction to de- sign of research project in this area. Letter grading.

220C. International Relations Research Seminar. (4) Seminar, three hours; tutorial meetings, to be ar- ranged. Design, implementation, and presentation of research project in international relations within combi- nation of seminar and tutorial settings. Letter grading.

222. Seminar: Strategic Interaction. (4) Seminar, three hours. A strategic move influences the other per- son’s choice by affecting his expectations of how he will behave. Discussion of theories of deterrence, coer- cive diplomacy, crisis management, war termination, and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psycholo- gy, bargaining theory, and game theory.

225. American Foreign Policy. (4) Discussion, three hours. Discussion of approaches used to explain for- mulation and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psycholo- gy, bargaining theory, and game theory.

230. Contending Perspectives on International Poli
tical Economy. (4) Seminar, three hours. Introduction to and discussion of various theoretical approaches to international political economy.

231. International Political Economy I. (4) Seminar, three hours. Designed to develop Ph.D. students' skills in setting up and solving simple institutional design, political economy macro, signaling, and participation models, as well as two-level game models of domestic politics and international conflict and cooperation, with emphasis on applications in international political economy and comparative politics.

233A-233B-233C. Political Economy Workshops (4-4-4). Discussion, two hours. Preparation: successful completion of major field examinations. Workshops for students writing or preparing to write dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Research paper of publishable length and quality required. S/U or letter grading.

234A-234B-234C. Workshops: National Security, Foreign Policy, and International Relations (0-0-12). Discussion, two hours. Preparation: successful completion of major field examinations. Course 234A is requisite to 234B, which is requisite to 234C. Courses must be taken in sequence. Workshops for students preparing for or working on dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Major research paper required. In Progress (234A-234B-234C) grading.

239. Selected Topics in International Relations. (4) Seminar, three hours. S/U or letter grading.

Comparative Politics

240A-240B. Seminars: Comparative Politics. (4-4) Seminar, three hours. Survey of contemporary research approaches and problems in Japanese and Western Pacific politics. S/U or letter grading.

244. Latin American Politics. (4) Seminar, three hours. Survey of contemporary research approaches and problems in Latin American politics. S/U or letter grading.

245. Middle Eastern Politics. (4) Seminar, three hours. Survey of contemporary research approaches and problems in Middle Eastern politics. S/U or letter grading.

246A. Western European Politics. (4) Seminar, three hours. Survey of contemporary research approaches and problems in Western European politics. S/U or letter grading.

246B. Political Development of Modern Europe. (4) Seminar, three hours; discussion, one hour (when scheduled). Principal phases of political development from high feudalism to the present, together with theories of causation.

247A. Evolution of Soviet and Russian Politics. (4) Seminar, three hours; discussion, one hour (when scheduled). Focus on evolution of Soviet and Russian political system and its transformation.

247B. Domestic Context of Russian Foreign Policy. (4) Seminar, three hours. Examination of domestic social, political, bureaucratic, and organizational sources of Russian foreign and strategic policy. S/U or letter grading.

251. Political Economy of Economic Reform. (4) Discussion, three hours. Some familiarity with economic helpful. Principal political and economic arguments for economic reform and consideration of political issues that arise from this process. Letter grading.

252. Parties and Party Systems. (4) Seminar, three hours; discussion, one hour (when scheduled). Theories and practices of political parties, party systems, and elections in a comparative perspective.

253. Political Change in Communist Systems. (4) Discussion, three hours. Examination of political context and consequences of structural reform in Communist systems; theories of post-Leninist political pluralization and conformation.

254A-254B. Institutions and Comparative Politics. (4-4) Seminar, three hours; discussion, one hour (when scheduled). Comparative Institutional Analysis. (4) Seminar, three hours; discussion, one hour (when scheduled). Use of advances of rational choice theory and new institutionalism to compare and analyze major institutional structures, including presidentialism vs. parliamen
tarism, unicameralism vs. bicameralism, two-party vs. multiparty systems, cadre vs. mass parties, and plurality vs. proportional electoral systems.

254B. Political Institutions, Delegation, and Policy-Making. (4) Seminar, three hours; discussion, one hour (when scheduled). Comparative analysis of delegation and policy-making processes and decision-making processes for economic reform and consideration of political implications for market system, banking and finance, corporate enterprise, and organized labor. S/U or letter grading.

256. Group Theories of Politics. (4) Discussion, three hours. Critical appraisal of “group theory” approaches to study of political decision making, with special attention to empirical research problems and findings. S/U or letter grading.

262. Political Parties. (4) Seminar, three hours. Examination of the role of political parties in all subfields of political science as well as policy studies. Special attention to American political parties. S/U or letter grading.

265. Politics and Economy. (4) Seminar, three hours. Application of selected classical and contemporary sociological theories to politics and modern research in American political behavior. Letter grading.

266. Political Environment of Federal Executive. (4) Seminar, three hours. Special attention to executive/legislative relations. S/U or letter grading.

268. Seminar: Political and Electoral Problems. (4) Seminar, three hours. Critical appraisal of “group theory” approaches to study of political decision making, with special attention to empirical research problems and findings. S/U or letter grading.

270. Legislative Behavior. (4) Seminar, three hours. Analysis of major approaches and problems in all subfields of political science as well as policy studies. S/U or letter grading.

271. Executive Politics and Presidency. (4) Seminar, three hours. Analysis of major approaches and problems in all subfields of political science as well as policy studies. S/U or letter grading.

American Politics

262A. Proseminar: Political Psychology. (4) Seminar, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

26B. Mass Attitudes and Political Behavior. (4) Seminar, three hours. Requisite: course 141B. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion. S/U or letter grading.

262C. Political Communication. (4) Discussion, three hours. Broad survey of research bearing on role of mass media in the American political process. Topics include theories of persuasion, evolution of “media effects” research, reporting and advertising as determinants of election outcomes, adversarial versus deliberative journalism, and analyses of media bias.

M261D. Seminar: Political Psychology. (4) Same as Psychology M228B. Discussion, three hours. Requisite: course M261A or Psychology M229A. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion. S/U or letter grading.

M261E. Critical Problems in Political Psychology. (4) Same as Psychology M228C. Discussion, three hours. S/U or letter grading.

266. Group Theories of Politics. (4) Discussion, three hours. Critical appraisal of “group theory” approaches to study of political decision making, with special attention to empirical research problems and findings. S/U or letter grading.

M268B. Electoral Democracy: Theory and Behavior. (4) Same as Public Policy M246. Seminar, three hours. Examination of both empirical and normative questions from rich variation in the literature on elections for scholars in all subfields of political science as well as policy students. S/U or letter grading.

270. Legislative Behavior. (4) Seminar, three hours. Analysis of major approaches and problems in all subfields of political science as well as policy studies. S/U or letter grading.

271. Executive Politics and Presidency. (4) Seminar, three hours. Analysis of major approaches and problems in all subfields of political science as well as policy studies. S/U or letter grading.

Scopes and Objectives

The Department of Psychiatry and Biobehavioral Sciences offers interdisciplinary courses related to the mental health professions of the biobehavioral sciences in addition to its programs for psychiatry interns and residents and for medical students.

Enrollment in department courses is limited to registered UCLA students, students registered in programs officially affiliated with UCLA, and students enrolled concurrently through UCLA Extension. Students who meet these requirements, but who are not affiliated with a departmental training program, must also meet required course requisites determined by specific educational programs.

Clinical Psychology Internship

The department offers a 12-month Clinical Psychology Internship. Students enrolled in clinical psychology doctoral programs at APA-approved universities are eligible to apply. Applications are accepted through November 1. The primary goals of the internship are to provide a year of intensive exposure to a wide variety of clinical and human services experiences and to maximize the personal growth of each professional. Students interested in this certificate program should contact David Crawford, 38-232 Semel Institute, (310) 794-5715, e-mail dcrawford@mednet.ucla.edu, or see http://www.ssemel.ucla.edu/psychology/internship/

Information on clinical practicums that are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

Psychiatry and Biobehavioral Sciences

Upper Division Courses

M180. Contemporary Problems in Developmental Disabilities. (4) (Same as Psychology M180.) Seminar, three hours. Corequisite: course M181. Limited to Developmental Disabilities Program students. Examination of broad spectrum of issues related to mental retardation, intelligence and IQ, genetics, neurobiology, and other developmental disabilities. P/NP or letter grading.

M182. Communication of Science. (2) (Same as Biomatics M262B.) Lecture, two hours; discussion, one hour. Preparation: calculus. Students interested in this certificate program should contact David Crawford, 38-232 Semel Institute, (310) 794-5715, e-mail dcrawford@mednet.ucla.edu, or see http://www.ssemel.ucla.edu/psychology/internship/

Information on clinical practicums that are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

Graduate Courses

M209. Introduction to Neural Networks: Modeling and Applications. (4) (Same as Biomatics CM208C.) Lecture, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

M210. Editorial Board Apprenticeship. (2) (Same as Health Sciences M210.) Seminar, two hours. For directed, individual contract required. P/NP or letter grading.

M214. Cross-Cultural Studies of Socialization and Children. (4) (Same as Anthropology M236P) Seminar, three hours. Students interested in this certificate program should contact David Crawford, 38-232 Semel Institute, (310) 794-5715, e-mail dcrawford@mednet.ucla.edu, or see http://www.ssemel.ucla.edu/psychology/internship/

Information on clinical practicums that are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

M180. Contemporary Problems in Developmental Disabilities. (4) (Same as Psychology M180.) Seminar, three hours. Corequisite: course M181. Limited to Developmental Disabilities Program students. Examination of broad spectrum of issues related to mental retardation, intelligence and IQ, genetics, neurobiology, and other developmental disabilities. P/NP or letter grading.

M182. Communication of Science. (2) (Same as Biomatics M262B.) Lecture, two hours; discussion, one hour. Preparation: calculus. Students interested in this certificate program should contact David Crawford, 38-232 Semel Institute, (310) 794-5715, e-mail dcrawford@mednet.ucla.edu, or see http://www.ssemel.ucla.edu/psychology/internship/

Information on clinical practicums that are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

Upper Division Courses

M180. Contemporary Problems in Developmental Disabilities. (4) (Same as Psychology M180.) Seminar, three hours. Corequisite: course M181. Limited to Developmental Disabilities Program students. Examination of broad spectrum of issues related to mental retardation, intelligence and IQ, genetics, neurobiology, and other developmental disabilities. P/NP or letter grading.

Psychiatry and Biobehavioral Sciences

259. Legal and Ethical Issues with Vulnerable Populations. Seminar in professional health law and ethical issues affecting vulnerable populations, including children and adolescents. Course 259 is requisite for supervised evaluation and case management of various ways that power, as it is structured and enacted in everyday activities, shapes human reproductive behavior. Case materials from diverse cultures illuminate how competing interests within households, communities, states, and institutions influence reproductive arrangements in society. Letter grading.

261. Advanced Seminar: Child and Adolescent Psychopharmacology. Use of videotapes and discussion in the clinical decision-making process, given the limited scientific evidence supporting pharmaceutical practice in this field. S/U grading.

262. Clinical Pharmacology. Seminar, two hours. Preparation: completion of professional health sciences course (M.D., D.D.S., D.N.Sc., or Ph.D.). Overview of psychiatric therapeutics especially as they relate to clinical and translational medicine and to advances in contemporary medicine such as targeted, gene therapy, and genomics. Letter grading.

264. Health and Mental Health Disparities from Psychosocial and Cultural Perspectives. Seminar, two hours. Designed for graduate and medical students, resident physicians, and juniors/seniors (with consent of discipline). S/U grading.

265. Functional Neuroimaging: Techniques and Applications. Seminar, two hours. Required: course 292. Course 264 is requisite to 284B. Instrumental imaging methods for study of nervous system, with emphasis on quantitative understanding and data interpretation and features common to modalities. X-ray computed tomography, magnetic resonance imaging, magnetoencephalography, transcranial magneto stimulation, near infrared imaging. Letter grading.

268. Anthropological Perspectives on Human Body. Seminar, four and one-half hours. Preparation: competence in integral calculus, electricity and magnetism, computer programming (any language), general statistics. Required: course 292. Course 264 is requisite to 284B. Instrumental imaging methods for study of nervous system, with emphasis on quantitative understanding and data interpretation and features common to modalities. X-ray computed tomography, magnetic resonance imaging, magnetoencephalography, transcranial magneto stimulation, near infrared imaging. Letter grading.

280. Politics of Reproduction. Seminar, three hours. Examination of various ways that power, as it is structured and enacted in everyday activities, shapes human reproductive behavior. Case materials from diverse cultures illuminate how competing interests within households, communities, states, and institutions influence reproductive arrangements in society. Letter grading.

281A-281B-281C. Behavioral Therapy in Educational Settings. (4-4-4) Lecture, one hour; laboratory, seven hours. Supervised experience in classroom working with exceptional children using systematic observations, administering formal assessments, and developing and carrying out individualized educational and behavioral programs. Theoretical background, part-time five-hour weekly lecture. S/U or letter grading.

282. Anthropological Perspectives on Human Body. Seminar, four and one-half hours. Preparation: competence in integral calculus, electricity and magnetism, computer programming (any language), general statistics. Required: course 292. Course 264 is requisite to 284B. Instrumental imaging methods for study of nervous system, with emphasis on quantitative understanding and data interpretation and features common to modalities. X-ray computed tomography, magnetic resonance imaging, magnetoencephalography, transcranial magneto stimulation, near infrared imaging. Letter grading.

M234. Affective Disorders. (2 or 4) Lecture, two hours. Preparation: completion of professional health sciences course (M.D., D.D.S., D.N.Sc., or Ph.D.). Overview of psychiatric therapeutics especially as they relate to clinical and translational medicine and to advances in contemporary medicine such as targeted, gene therapy, and genomics. Letter grading.

M261. Advanced Seminar: Child and Adolescent Psychopharmacology. Use of videotapes and discussion in the clinical decision-making process, given the limited scientific evidence supporting pharmaceutical practice in this field. S/U grading.

M262. Clinical Pharmacology. Seminar, two hours. Preparation: completion of professional health sciences course (M.D., D.D.S., D.N.Sc., or Ph.D.). Overview of psychiatric therapeutics especially as they relate to clinical and translational medicine and to advances in contemporary medicine such as targeted, gene therapy, and genomics. Letter grading.

M264. Health and Mental Health Disparities from Psychosocial and Cultural Perspectives. Seminar, two hours. Designed for graduate and medical students, resident physicians, and juniors/seniors (with consent of discipline). S/U grading.

M265. Functional Neuroimaging: Techniques and Applications. Seminar, two hours. Preparation: course 292. Course 264 is requisite to 284B. Instrumental imaging methods for study of nervous system, with emphasis on quantitative understanding and data interpretation and features common to modalities. X-ray computed tomography, magnetic resonance imaging, magnetoencephalography, transcranial magneto stimulation, near infrared imaging. Letter grading.
M289. Intervention to Reduce HIV and Its Consequences. (4) Same as Community Health Sciences M299.) Lecture, three hours. Examination of interven-
tions to reduce HIV/AIDS transmission. Review of the-
ory and research supporting efficacy of HIV interven-
tions for variety of high-risk populations. Letter grading.

290. Los Angeles HIV-Community Colloquia. (1) Lecture, three hours. Opportunities for stu-
dents to identify and appreciate experimental neuro-
ing and research supporting efficacy of HIV interven-
tions for variety of high-risk populations. Letter grading.

291. Functional Magnetic Resonance Imaging and
Consciousness Journal Club. (1) Seminar, three hours; discussion, three hours. Opportunity for stu-
dents to identify and appreciate experimental neuro-
ing and research supporting efficacy of HIV interven-
tions for variety of high-risk populations. Letter grading.

292. Functional Neuroanatomy for Neuropsycholog-
ists. (2) Lecture, two hours. Preparation: graduate-
level neuroanatomy course. Designed for neuropsy-
chologists and other graduate students. Focus in odd-
numbered sessions on personality theory, and assign-
ed readings. Guest speakers with expertise in vari-
ces of emotional and psychological assessment and treat-
ment. Letter grading.

293. Clinical Investigation. (2) Seminars, three hours; discussion, one hour. Designed for gradu-
ate students. Introduction to initial steps in clinici-
sal research through preparation of research proposal.
Small working groups develop proposal on spe-
cific topic. S/U grading.

294. Essentials of Clinical Investigation. (2) Lecture,
two hours; discussion, one hour. Designed for gradu-
ate students. Introduction to initial steps in clinici-
sal research through preparation of research proposal.
Small working groups develop proposal on spe-
cific topic. S/U grading.

295A. Seminar in Substance Abuse I, II, III. (2-2-2) Seminar, two hours; discussion, one hour. 

course. Discussion of emerging scientific con-
nclusions and IRB issues, and (6) preparation of budgets 
for NIH grants. Letter grading.

405. Trauma and Sexual Abuse Research Seminar. 
(4) Seminar, three hours; discussion, one hour. De-
designed for graduate and medical students. Focus in even-
umbered sessions on personality theory, and assign-
ed readings. Guest speakers with expertise in vari-
ces of emotional and psychological assessment and treat-
ment. Letter grading.

407A-407B-407C. Clinical Hypnosis Seminars. (2- 
2-2) Formerly numbered 207A-207B-207C.) Seminars, two hours. Integrated, experientially oriented sequence with workshops, independent study, practice, and 
assigned readings. Guest speakers with expertise in spe-
cific hypnagogic techniques and population, and vid-
eo programs included. In-clinical and faculty members 
in healthcare providers as well as licensed health-
care providers from community (MCEP credit avail-
able) encouraged to enroll. For trainees in social work, 
psychology, and psychiatry, completion of minim-
um of year of supervised training in psychotherapy or 
behavior therapy required. S/U grading. 407A. Cultural 
and historical context for hypnosis; development of techni-
ques for induction, therapeutic alliance, countertransference, 
management, and re-alerting; and involving family 
and trance experiences. Fundamentals of trance 
utilization, including diagnosis, safety, and 
and managing hypertrance experiences. Application of 
hypnagogic techniques in specific clinical situations 
and with specific populations.

425. Teaching Case Conference. (1) Review of diag-
nosis and treatment of full spectrum of disorders, with 
expert off-unit consultants. S/U or letter grading.

429. Child Outpatient Team. (1) Weekly team 
meetings to coordinate clinical activities of trainees in Child 
Outpatient Department. Discussion of literature and 
thoretical approaches to therapy. Letter grading.

434. Seminar: Addiction Psychiatry. (1) Seminar, one 
hour. Cutting-edge information on basic and appli-
ced aspects of addiction psychiatry (neurobiology, 
pharmacology, genetics, and evidence-based medical and 
behavioral therapies) and opportunities for partici-
pants to connect with established scientists in addi-
tion research. S/U grading.

449. Parent Training Intervention Workshop. (2) Lecture, 90 minutes; discussion, one hour. Advanced 
clinical training. Techniques and practical aspects of assess-
ment and treatment of parent-child problems. Lectures, 
case presentations, and workshops on various skills 
necessary.

454. Advanced Topics in Neuropsychology. (1) Seminar, two hours; discussion, one hour. Preparation of 
theses and papers. Focus in even number of odd years 
that involve interface of neuropsychology with other disciplines, 
such as cognition and psychopharmacology, 
neuroimaging, and neuropsychological assessment, cognition and genomics, psychometrics/behavioral development. Focus in odd years on current models of human neuropsychology, 
such as models of working memory, neuropsychology of emotion and social cognition, models of implicit ver-
sus explicit learning, types of attention, and models of executive processes. S/U grading.

468. Translational Neuroscience of Drug Addic-
tion. (1) Lecture, one hour. Designed for graduate stu-
dents. Focus in odd number of even years on current 
models of human neuropsychology, such as models of working memory, neuropsychology of emotion and social cognition, models of implicit versus explicit learning, types of attention, and models of executive processes. S/U grading.

479. Genetics Clinic Presentation. (No credit) Weekly clinical teaching session on patients seen in the genetics clinic. In-depth discussion on ge-
cetics of each disorder.

480. Analysis of Human Chromosome Studies. (1) 
Chromosome karyotypes prepared in cytogenetics lab-
oratory during preceding week presented and dis-
cussed with reference to clinical findings. Teaching in-
cludes interpretation of abnormal karyotypes and tech-
nical aspects of routine and special chromosome stud-
ies.

482. Clinical Practicum in Childhood Anxiety and 
Related Disorders. (3) Clinic, two hours. Training in 
cognitive/behavioral assessment and treatment of chil-
dren and adolescents with anxiety and related disor-
ers. Didactic and experiential training, including direct 
patient care, clinical supervision, and participation in 
weekly team meetings. Letter grading.

495. Human Genetics Seminar. (No credit) Semi-
inar, one hour. Preparation: introductory genetics 
course. Weekly lecture series intended for those inter-
ested in human genetics or in specific topic to be pre-
sented. Speakers are invited for their expertise or re-
search in some special area related to human genetics 
and may be from UCLA or elsewhere. No grading.

M490. Educational Advocacy. (2) Same as Law 
M431.) Clinic, two hours (12 weeks). How to provide 
educational advocacy based on IDEA, ADA, and Sec-
tion 504 of Rehabilitation Act on behalf of children with 
learning disabilities, behavior disorders, and mental re-
tardation. S/U or letter grading.

596. Individual Studies in Psychiatry. (2 to 12) Tu-
torial, to be arranged. Preparation: submission of writ-
ten proposal outlining course of study (to be structured 
by instructor and student at time of initial enrollment). 
Additional information and course proposal forms 
available in Office of Education, 38-216 Semel Insti-
tute. Directed individual research and study in psychia-
try at graduate level. S/U or letter grading.

Scope and Objectives
Psychology is a subject of considerable interest to most people — we all tend to practice some form of intuitive psychology in an attempt to understand ourselves and the people and groups with whom we interact. The curriculum offered by the UCLA Department of Psychology presents psychology as a scientific discipline that employs systematic methods of inquiry to study and explain human and animal behavior — both normal and abnormal — in terms of a variety of underlying variables, including neural, physiological, and cognitive processes; developmental factors and individual differences; and social and interpersonal influences and contexts. According to recent surveys, the UCLA Psychology Department is ranked as one of the top departments in the country.

The undergraduate curriculum has been designed to reflect the extensive breadth of psychology — both the range of behavioral phenomena studied and the variety of methods and theoretical approaches employed — while allowing students to pursue in greater depth those areas in which they become most interested. Beyond basic core courses, students can take many specialized courses in areas such as behavioral neuroscience, animal behavior, learning and memory, motivation, perception, cognition, measurement, personality, and clinical, social, developmental, community, and health psychology. The curriculum also provides excellent opportunities for research experiences — either in the form of laboratory courses or by participation with faculty members and graduate students in a wide variety of research projects.

A choice of three undergraduate majors is offered: a B.A. degree in Psychology and B.S. degrees in Cognitive Science and in Psychobiology. While the majors overlap in certain fundamental and basic knowledge bases, they differ considerably in their focus (i.e., the extent to which certain areas of psychology and related disciplines are studied) and in terms of the different student interests and needs they satisfy. For nonmajors, the department offers many courses that provide new and valuable insights into the understanding of human behavior, including their own.

At the graduate level, the department offers training leading to the Ph.D. degree with emphases in the areas of behavioral neuroscience, clinical, cognitive, cognitive neuroscience, developmental, health, learning and behavior, social, and quantitative psychology. The graduate program is designed to prepare future psychologists for careers as scientific investigators, college and university teachers, and professional psychologists.

Undergraduate Study

Psychology B.A.

The Psychology major is the most general of the three majors and offers both broad and in-depth coverage of the fundamental and traditional areas of psychology. It provides students with a strong foundation for postgraduate education in psychology and can serve as excellent background to prepare them for further training in such fields as law, education, government and public policy, business, and many of the health-related professions. Its basic liberal-arts orientation also provides excellent foundation for immediate postbaccalaureate careers in many areas, particularly ones in which an understanding of human behavior and its diversity of expression would be an asset.

The requirements described below represent the minimum requirements in satisfaction of the preparation and the major. Additional courses in psychology, statistics, and related sciences, as well as other types of research and fieldwork experiences, are highly recommended if students plan to pursue graduate work in psychology and related fields. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.
Psychology Premajor

Students need to file a petition in the Undergraduate Advising Office to declare the Psychology premajor. Psychology premajors can petition to declare the Psychology major once they have (1) satisfied all the preparation for the major requirements and (2) are accepted into the major through a competitive application process (for students who entered UCLA as freshmen) or file a petition to declare the Psychology major (for students who entered UCLA as transfers).

Preparation for the Major

Each of the following required courses must be taken for a letter grade (C or better in Psychology 10, 100A, and 100B, C– or better in the remaining courses): Life Sciences 1 or 15 or Physiological Science 3; Chemistry and Biochemistry 2 or 14A or 20A or Physics 10 or 1A or 6A; one course from Computer Science 2, Mathematics 2, Program in Computing 10A, Statistics 10, or one term of calculus; one course from Philosophy 1, 2, 3, 4, 5, 6, 7, 8, 9, 21, 22, 22W, 31; Psychology 10, 100A, 100B. Students cannot take Psychology 100B until they have passed course 100A with a grade of C or better. Psychology 100A and 100B are only open to students who have declared the Psychology premajor before the term in which they plan to enroll. It is recommended that students with no background in introductory statistics take Statistics 10 before enrolling in course 100A. Students who repeat more than two preparation courses or any preparation course more than once are denied admission to the major.

Freshman Students

Students may declare the Psychology premajor once they have established a 2.5 grade-point average in at least one preparation for the major course. Students must petition to declare the Psychology major and can do so once they complete all seven preparation for the major courses and submit an application to enter the major by the end of the Fall Quarter of their third year at UCLA. Admission into the major is based on student academic performance in the preparation courses. Students who have a grade-point average of 2.9 or higher in the preparation coursework and have met all other Psychology premajor requirements are guaranteed entry into the major after they submit the application by the above deadline. Students with a grade-point average between 2.5 and 2.89 in the preparation coursework enter a competitive application pool and are admitted only if there is space available in the major. Students with a grade-point average below 2.5 in the preparation coursework are not eligible to apply for admission to the major.

Transfer Students

Transfer applicants to the Psychology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one biology course equivalent to Life Sciences 1 or 15 or Physiological Science 3, one general chemistry or general physics course, one philosophy course, one introductory course to psychology, one introductory course to statistics (recommended), finite mathematics, calculus, computer science theory, or computer programming in C++.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

The Major

Required: (1) Five core courses, with at least two from each category and a fifth course from either category: (a) Psychology 110, 115 (or M117A, M117B, and M117C), 120A, 120B, and (b) 127A or 127B or 127C, 130 (or one course from 133A through 133L or 161), 135, 150; (2) one laboratory/fieldwork course from 101, 111, 116, 125, 130, 155, 185A, 185B, 183A, 185C, 186A through 186D; (3) four additional upper division elective courses (16 units) in psychology.

Students who complete Psychology M117A, M117B, M117C receive equivalent credit for course 115 and two upper division psychology electives. All three courses must be completed to receive psychology elective credit.

Each upper division course must be taken for a letter grade. A C– or better is required in each core course and in at least one laboratory/fieldwork course. Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements.

Cognitive Science B.S.

The Cognitive Science major focuses on the study of intelligent systems, both real and artificial. While including a strong foundation in the traditional areas of psychology, computer science, linguistics, and related disciplines, the major is interdisciplinary in nature and emphasizes subject matter within cognitive psychology, computer science, mathematics, and related disciplines.

The requirements described below include sufficient preparation if students plan to pursue graduate work in cognitive science or related fields; however, they may want to include additional advanced courses in psychology and fields related to cognitive science (e.g., computer science, linguistics, mathematics, philosophy, and statistics) as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Cognitive Science Premajor

Students need to file a petition in the Undergraduate Advising Office to declare the Cognitive Science premajor. They are then identified as Cognitive Science premajors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Cognitive Science major. Questions about the major should be directed to the Undergraduate Advising Office, 1531 Franz Hall.

Preparation for the Major

Each of the following required courses must be taken for a letter grade (C or better in each course and a 2.5 overall grade-point average in the preparation courses) before students reach 140 total units: Life Sciences 1 or 15 or Physiological Science 3; Chemistry and Biochemistry 2 or 14A or 20A or Physics 10 or 1A or 1A; Mathematics 31A, 31B; Philosophy 7 or 8 or 9; Program in Computing 10A, 10B, and one course from 15 or 20A or 40A; Psychology 10, 85, 100A, 100B. Students cannot take Psychology 100B until they have passed course 100A with a grade of C or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Cognitive Science premajor before the term in which they plan to enroll. Students with no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

Students who repeat more than two preparation courses or any preparation course more than once are denied admission to the major.

Transfer Students

Transfer applicants to the Cognitive Science major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one biology course, one general chemistry or general physics course, two calculus/analytical geometry courses, one general physics course, one philosophy course, one introduction to psychology course, one introduction to cognitive science course, one psychological statistics course, one psychology research methods course, one computer programming course in C++, and one other computer programming course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Required: (1) Psychology 115 (or M117A, M117B, and M117C), 120A or 120B, and one course from 124A through 124J; (2) one course from 186A through 186D and one course from 121, 186A through 186D, or Computer Science 161; (3) three upper division elective courses (12 units) from Psychology 110, 112A through 116, M117J through M119X, 124A through 124J (if taken for the major, may not be applied as an elective); 130, 133B, 135, 142H, 160, 161, 187A, 191CH (if content is approved by the Undergraduate Advising Office and course has not been applied toward the Psychology 195B or 196B requirement), Computer Science 111 through CM186, Ethnomusicology 172A, Linguistics 103 through 185B, Mathematics 110A through 171, Neuroscience 102, Philosophy 124 through 136, Statistics 100A, 100B, 100C, 101B, 101C; (4) two terms of Psychology 195B or 196B (may be fulfilled by taking any
two courses from 191CH, 195B, or 196B, provided content is approved by the Undergraduate Advising Office).

Students who complete Psychology M117A, M117B, M117C receive equivalent credit for course 115 and two upper division cognitive science electives. All three courses must be completed to receive cognitive science elective credit.

Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements. With the exception of Psychology 195B and 196B, each course must be taken for a letter grade.

Psychobiology B.S.
The Psychobiology major is designed for students who plan to go on to graduate work in physiological psychology, neuroscience, behavioral aspects of biology, or the health sciences. Psychobiology involves the study of brain-behavior relations and laboratory training in standard brain research techniques.

The requirements described below include sufficient preparation if students plan to pursue graduate work in any of the above fields; however, they may want to include additional advanced courses in psychology and related sciences as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Psychobiology Premajor
Students need to file a petition in the Undergraduate Advising Office to declare the Psychobiology premajor. They are then identified as Psychobiology premajors before declaring the Psychobiology premajor before students reach 150 total units. Students who repeat more than two preparation courses or any preparation course more than once are denied admission to the major.

Transfer Students
Transfer applicants to the Psychobiology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, one semester of organic chemistry with laboratory, one introduction to psychology course, one psychological statistics course, and one psychology research methods course. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office. Required: (1) Ecology and Evolutionary Biology 100 or 129 or Psychology 118 or Anthropology 128A and 128B, and Psychology 110, 115 (or M117A, M117B, and M117C), 116 or Neuroscience 101L, 120A or 120B; (2) one course from Psychology 127A, 127B, 127C, 130, 133A through 133L, 135, 150, 161; (3) 16 units of graded elective courses from the following list: Ecology and Evolutionary Biology 112, 113A, 114A (no more than one from this group), Psychology 111, 112A through 112D, M117A, M117B, M117C, M117J, 119A through 119X, 120, 161, 186D, 191CH (only if content is approved by the Undergraduate Advising Office), Chemistry and Biochemistry 153A, 153L, Computational and Systems Biology M187, Ecology and Evolutionary Biology 100, 102, 105, 106, 110, 111, 115, 117, C119, 120, 121, 122, 124 (only 4 units may be applied toward the major), 129, 135, 164, 170, Microbiology, Immunology, and Molecular Genetics 185A, Molecular, Cell, and Developmental Biology 100, 104, 138, M140, CM156, Neuroscience 102, Physiological Science C144, 146, 147, M148, 166, 173.

Students who complete Psychology M117A, M117B, M117C receive equivalent credit for course 115 and 10 units of upper division psychobiology electives. All three courses must be completed to receive psychobiology elective credit.

Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements, and each must be taken for a letter grade.

Honors
Honors Courses
Each year the department offers a selection of honors courses, designated with an H suffix. The courses provide organic chemistry with laboratory for honors students, emphasize readings in the original literature, student reports, and small group discussions, and may include field or research experience. Enrollment priority in honors courses is given to students in the departmental honors program. Consult the College of Letters and Science for information on requirements for College Honors.

Honors Program
Psychology, Cognitive Science, and Psychobiology majors intending to continue study at the graduate level are encouraged to apply for the departmental honors program. Students work for one year with a faculty sponsor on a research project that is the basis of a formal honors thesis. During that year they also participate in a weekly seminar (Psychology 191AH, 191BH, 191CH) in which thesis projects are presented and discussed and other topics of interest are explored with invited faculty members and other guests. Other requirements may apply. Consult the Undergraduate Advising Office during Spring Quarter for further information and application forms. Satisfactory completion of the program and the other requirements for the major leads to awarding of the degree with honors or highest honors.

Computing Specialization
 Majors in Psychology, Psychobiology, and Cognitive Science may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, and at least one course from 10C, 15, 20A, 30, 40A, or 60, and (3) completing at least three courses from Psychology 85, 121, 142H, 186A through 186D (one 199 course may be substituted for one of these courses provided project has been approved by vice chair). A grade of C or better is required in each course. Students graduate with a bachelor's degree in their major and a specialization in Computing. Students planning to enter this specialization should consult the Undergraduate Advising Office.

Applied Developmental Psychology Minor
The Applied Developmental Psychology minor is designed to (1) provide a coherent academic program with focus on issues central to improving the well-being of children and their families, (2) teach undergraduate students how to apply theories, research methods, and research findings to practical concerns, and (3) prepare students to join or receive further training in various child-related professions.

The minor is open to all enrolled UCLA students (including Cognitive Science, Psychobiology, and Psychology majors) who have an overall grade-point average of 2.0 or better and have been accepted into an approved applied developmental psychology internship program. For further information about applying to the internship program, contact the director of the Infant Development Program, 1615 Franz Hall, (310) 825-2896. For questions about additional course requirements for the minor, contact a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730.
Required Lower Division Course (4 units): Psychology 10.

Required Upper Division Courses (24 units): Psychology 134A (must be taken concurrently with course 134D), 134B (must be taken concurrently with course 134E), and four additional courses from Education 120, 121, 132, Psychology 127C, 129F, 130, 131, 132A, 132B, 133B through 133I, 134F, 134G, 134I, 161, 198A or 198B (content must be approved by the Undergraduate Advising Office), Sociology M174. One of the four additional courses must include either Psychology 130 or one course from 133B through 133I.

Internship Requirement/Fieldwork Component (8 units): Psychology 134C, 134D (must be taken concurrently with course 134A), 134E (must be taken concurrently with course 134B). Students work as interns for three consecutive academic terms at an approved daycare center/school. The internship provides hands-on experience working with young children as teacher’s aides and opportunities for observing children.

No more than two courses may be applied toward both this minor and a major in another department or program.

Each minor course, except for the fieldwork component of the internship courses, must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Cognitive Science Minor

The Cognitive Science minor is designed to introduce students to cognitive science topics as addressed in a number of different disciplines, such as biology, computer science, engineering, linguistics, mathematics, philosophy, and psychology, while allowing them to pursue a more in-depth study of cognitive science topics within specific areas of their own choice.

The minor consists of two parts. In the first part students complete background courses and satisfy a computer programming experience requirement. In the second part they select a primary cluster.

Required Courses (28 units): Psychology 85 and one course from 15, 100B, Computer Science 2, Linguistics 1, 20.

The computer programming experience requirement is satisfied by petition based on coursework (e.g., completion of Program in Computing 10A) or other relevant programming experience.

Students must also select (with approval of the Undergraduate Advising Office) and complete one of the following four primary clusters: (1) biological basis of cognition cluster — three courses from Linguistics C135, Neuroscience 102, Psychology 115, 116, M117C (or Molecular, Cell, and Developmental Biology M175C or Neuroscience M101C or Physiological Science M180C), 119B, 119F, M119L, M119N, 160, 161; (2) computation and modeling cluster — three courses from Biomatics 108, Computer Science 161, Psychology 186A through 186D (at least one course must be from Computer Science 161, Psychology 186A through 186D); (3) human cognition cluster — Psychology 121 and two courses from 120A or 120B, 124A through 124J, 133B, 133C, 133E; (4) mind and language cluster — three courses from Linguistics 120A, 120B, 120C, 130, 132, C135, 185A, Philosophy 124, 125, 126, 127A, 127B, 129, 170, 172, Psychology 124A.

Students must also fulfill a secondary cluster requirement of two additional courses from one or more of the clusters not selected as the primary cluster.

No more than two courses may be applied toward both this minor and a major in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Fieldwork and Research Opportunities

Many research and fieldwork opportunities are open to students who wish to expand their knowledge and broaden their background in the field of psychology. These experiences can be enriching and help bring undergraduate students closer to understanding the importance of research and internships, including their applications in the everyday world. At least one of the following courses is recommended for students planning postgraduate study: Psychology 99, 185, 192, 193, 194A through C194D, 195A, 195B, 196A, 196B, 199A, or 199B. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward the undergraduate degree. Information about these courses and programs is available from the Undergraduate Advising Office, 1531 Franz Hall.

Only one 4-unit 199 course may be taken per term, and only 16 units of course 199 may be applied toward the degree. Only one 199 course may be taken for a letter grade (additional 199 courses may be taken on a P/NP basis). If approved in advance by the Undergraduate Advising Office, 8 units of course 199 may be applied toward the Psychology 195B/196B requirement for the Cognitive Science major and 4 units of course 199B may be applied toward the elective course requirements for the Psychology major.

Psychology Research Opportunity Programs

The Psychology Research Opportunity Programs (PROPS) represent a vital effort to identify and mentor underrepresented minority and/or low-income students. The purpose of PROPS is to encourage such students to participate in research and pursue graduate studies leading to careers in academia. The recruitment and application process for PROPS takes place each Fall Quarter. Students selected to participate are awarded stipends for Winter and Spring Quarters, during which time they do research under the mentorship of a psychology faculty member. In addition, students are required to attend weekly seminars covering such topics as graduate school, careers in academia, and research opportunities in various fields of psychology. Prior research experience is not required. This is an excellent opportunity for students to begin their research careers and acquire the needed experience to pursue advanced studies.

Infant Development Program

The Megan E. Daly Infant Development Program (IDP), established in May 1983, is designed as a teaching and research facility for the department and is set up to accommodate both cross- and longitudinal investigation of infants, toddlers, their families, and caregivers. In addition, the program provides an opportunity for undergraduate students in developmental psychology and other areas to acquire firsthand experience working with infants and toddlers on an individual basis or in a group setting. The program has two primary functions: (1) to offer quality group care for infants and toddlers of the students, staff, and faculty of the Psychology Department and other UCLA departments and (2) to serve as a teaching and research facility for the Psychology Department and the UCLA community. The program has two locations and accommodates children from three months to three years old.

UCLA Psychology Clinic

The UCLA Psychology Clinic is the Department of Psychology is a major training center for students in the clinical psychology Ph.D. program, one of the top-ranked programs in the country. It provides a broad range of psychological services to children and adults, including assessment and individual, couples, family, and group therapy. Clients cover the entire age range and represent diverse populations in the community.

Student therapists receive very close supervision and utilize research-based cutting-edge psychological interventions. Students and faculty members are also involved in a variety of research projects through the clinic.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnnet.ucla.edu/
Psychology

Lower Division Courses

10. Introductory Psychology. (4) Lecture, four hours. General introduction including topics in cognitive, experimental, personality, developmental, social, and clinical psychology; six hours of psychological research and a grade of C or better required of all departmental premajors. P/NP or letter grading.

85. Introduction to Cognitive Science. (4) Lecture, three hours. Exploration of computer metaphor of mind as an information-processing system, focusing especially on perception, knowledge representation, and thought based on research in cognitive psychology, neuropsychology, and artificial intelligence. May examples from various fields. P/NP or letter grading.

88A-88Z. Lower Division Seminars. (4 each) Seminar, three hours. Enforced requisite: course 10. Limited to freshmen/sophomores. Intensive analysis in seminar of situations of selected topics of current psychological interest. Consult Schedule of Classes for times and instructors. May be repeated for credit.

88A. Stress, Adaptation, and Coping. Limited to freshmen/sophomores. Physiological and psychological processes related to stresses and strains of daily living and potential relation of these processes to disease states. Examination of multifaceted nature of coping with stressors and exploration of strategies for stress management. P/NP or letter grading.

97. Variable Topics in Psychology. (4) Seminar, three hours. Enforced requisite: course 10. Study of selected topics in psychology at introductory level; seminar format designed for freshmen/sophomores. P/NP or letter grading.

Upper Division Courses

100A. Psychological Statistics. (4) Lecture, four hours. Requisites: course 10 with a grade of C or better, and one course from Computer Science 2, Mathematics 2, Program in Computing 10A, Statistics 10, or one term of calculus. Designed for premajors. Basic statistical procedures and their application to research and practice in various areas of psychology. Letter grading.

100B. Research Methods in Psychology. (6) Lecture, two hours; laboratory, four hours. Enforced requisites: courses 10 and 100A, with grades of C or better. Introduction to research methods and critical analysis in psychology. Lecture and laboratory topics include experimental and nonexperimental research methods, statistical design, and analysis as applied to a biopsychological range of basic and applied research issues. P/NP or letter grading.

101. General Psychology Laboratory. (4) Lecture, one hour; laboratory, three hours. Requisites: courses 10, 100A, 100B, 101B. General laboratory course for psychology students to acquire key concepts in psychology through active participation in enriched environment. Use of current technologies (e.g., Web-based teaching, interactive computer demonstrations) in challenging atmosphere to learn how mind works. Letter grading.

110. Fundamentals of Learning. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Experimental findings on animals and human conditioning; retention and transfer of research. In addition to overview, major topics intended to provide empirical basis for theory and research in this area. P/NP or letter grading.

111. Learning Laboratory. (4) Lecture, two hours; laboratory, three hours. Requisites: courses 10, 100A, 100B. Designed for departmental majors. Laboratory experience with techniques in study of learning, especially with animals. Letter grading.

112A. Basic Processes of Motivated Behavior. (4) Lecture, 90 minutes; recitation, 90 minutes. Designed for juniors/seniors. Examination of some basic processes underlying motivated behavior, stressing environmental determinants of behavior, learning, and reproduction-related behavior. Discussion of physiological mechanisms that contribute to such behaviors. Consideration of topics such as reinforcement, acquired motivation, and drug addiction. Evaluation of evidence obtained in laboratory studies conducted with animals. P/NP or letter grading.

112B. Psychobiology of Fear and Anxiety. (4) Lecture, three hours. Requisites: courses 10, 100A, 110. Recommended: course 115. Designed for juniors/seniors. Presentation of biological and behavioral approaches to fear and anxiety, taken from laboratory and applied research. Difference in major principles from each approach, emphasis on areas in which significant research advances have recently occurred. Examination of concordance and discordance between results from laboratory and applied research. P/NP or letter grading.

112C. Psychobiology of Anxiety and Depressions. (4) Lecture, two and one-half hours; discussion, 30 minutes. Requisites: courses 110 and 115, or Neuroscience M101A, M101B, M101C, Limited to juniors/seniors. Presentation of biological and behavioral approaches to anxiety and depression, taken from laboratory and applied research. In addition to overview of major principles from each approach, emphasis on areas in which significant research advances have recently occurred. Examination of concordance and discordance between results from laboratory and applied research. P/NP or letter grading.

112D. Animal Cognition. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 100A, 110. Designed for juniors/seniors. Investigation of scientific study of cognition and behavior in animals. Topics include perception and attention, working and reference memory, spatial cognition, timing and counting, concept formation, and abstract reasoning. Most discussions focused on findings from animals, as viewed from evolutionary framework concerned with natural histories of animals. P/NP or letter grading.

116. Behavioral Neuroscience Laboratory. (4) Lecture, one hour; laboratory, three hours. Requisites: courses 10, 100A, 100B, 115. Designed for Psychobiology and Psychology majors. Laboratory experience with various topics in behavioral neuroscience. P/NP or letter grading.

M117A. Cellular and Systems Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisites: courses 10, 100A. Designed for juniors/seniors. Study of topics in systems and neuron systems: courses 10 and 100A, with grades of C or better. Not open for credit to students with credit for Physiological Science 111A. For Physiological Science majors only, a grade of C– or better is required to proceed to Physiological Science 111B. Cellular neuropsychopharmacology; membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

M117B. Molecular and Developmental Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisites: course 115 or M117A (or Molecular, Cell, and Developmental Biological M117A or Neuroscience M101A or Physiological Science M108A) or Physiological Science 111A, Life Sciences 3, 4 (a may be taken concurrently). Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in development and neurobiology. P/NP or letter grading.

M117C. Behavioral and Cognitive Neuroscience. (5) Lecture, four hours; discussion, 90 minutes. Requisite: course 115 or M117A (or Molecular, Cell, and Developmental Biological M117A or Neuroscience M101A or Physiological Science M108A) or Physiological Science 111A. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

M117J. Biological Bases of Psychiatric Disorders. (5) (Same as Molecular, Cell, and Developmental Biological M117J, Neuroscience M101A, M101B, M101C, and Physiological Science M181, and Psychiatry M181.) Lecture, three hours. Requisite: course 115 or M117A (or Molecular, Cell, and Developmental Biological M117A or Neuroscience M101A or Physiological Science M108A) or Physiological Science 111A. Underlying brain systems involved in psychiatric symptoms and neurological disorders, including schizophrenia, depression, bipolar disorder, obsessive/compulsive disorder. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmaceutical treatments. P/NP or letter grading.

119A. Neuropsychopharmacology. (4) Lecture, three hours. Requisite: course 115. Designed for junior/senior majors. Survey of brain systems and focus on the interaction of drugs with neurochemical systems to produce behaviors. P/NP or letter grading.

119C. Cognitive Neuroscience. (4) Lecture, three hours. Requisite: course 115 or M117C. Understanding complex mental functions depends on interplay of cognitive neuroscience and behavior. Designed to provide advanced undergraduate students with current perspectives on how complex processes of mind may be understood using neuroscientific techniques. P/NP or letter grading.

119E. Stress and Bodily Disease. (4) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Psychobiological processes as they pertain to fight or flight responses. Link bodily diseases with psychological factors. P/NP or letter grading.
of visual processing from retina to visual cortex. The ability to image and analyze the visual world is truly remarkable. Physiology and anatomy of the nervous system and brain circuitry.

M119N. Visual System. (Same as Neuroscience M119N.) Lecture, three hours. Requisite: course 115 or Neuroscience M110A. Also listed as Psychological Science 111A. Ability to image and analyze the visual world is truly remarkable. Coverage of anatomy and physiology of visual processing from retina to visual cortex through exploration of perception, memory, and cognitive aspects of vision. P/NP or letter grading.

119P. Psychology of Sleep and Dreams. Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Review of measurement and comparison of sleep in mammals and submammalian species, circadian rhythms and circadian control of sleep, development and aging of sleep, neural and neurochemical control of sleep, effects of sleep deprivation, sleep in psychiatric disorders, human sleep disorders, and function of dreams. P/NP or letter grading.

121. Laboratory in Cognitive Psychology. Lecture, four hours. Requisites: courses 10, 100A, 100B, 120A, 120B, or 120AB. Designed for Psychology and Cognitive Science majors. Aspects of perception and cognition as they relate to learning and potential for learning technology. Basic knowledge about visual information processing and perceptual-cognitive research, knowledge representation, pattern recognition, attention, imagery, memory, representation of knowledge, language, action, decision making, thinking. P/NP or letter grading.

123A. Developmental Psychopathology. Seminar, three hours. Requisite: course 120A or 120B. Aspects of perception and cognition as they relate to learning potential for learning technology. Basic knowledge about visual information processing and perceptual-cognitive research, knowledge representation, pattern recognition, attention, imagery, memory, and expertise, as well as research on learning, technology, and applications of perceptual and cognitive concepts in specific domains, with special focus on teaching and learning in mathematics. P/NP or letter grading.

123B. Research Methods in Developmental Psychopathology. Laboratory, three hours; fieldwork, seven hours. Limited to departmental majors. Aspects of perception and cognition as they relate to learning potential for learning technology. Basic knowledge about visual information processing and perceptual-cognitive research, knowledge representation, pattern recognition, attention, imagery, memory, and expertise, as well as research on learning, technology, and applications of perceptual and cognitive concepts in specific domains, with special focus on teaching and learning in mathematics. P/NP or letter grading.

123C. Advanced Research Methods in Developmental Psychopathology. Laboratory, three hours; fieldwork, seven hours. Limited to departmental majors. Research approaches utilized by psychologists to conduct research in developmental psychopathology. Letter grading.

123D. Principles of Human Performance. (Formerly numbered Psychology 127B.) Lecture, two hours; discussion, one hour. Requisites: courses 10, 100A, 100B, 120A, or 120B. Designed for seniors. Analysis of recent research on basic processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony. P/NP or letter grading.

124A. Principles of Human Performance. (Formerly numbered Psychology 127B.) Lecture, two hours; discussion, one hour. Requisites: courses 10, 100A, 120A, or 120B. Designed for seniors. Analysis of recent research on basic processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony. P/NP or letter grading.

124C. Human Memory. (Formerly numbered Psychology 127B.) Lecture, two hours; discussion, one hour. Requisite: course 120A or 120B. Designed for seniors. Analysis of recent research on basic processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony. P/NP or letter grading.

124D. Principles of Human Performance. (Formerly numbered Psychology 127B.) Lecture, two hours; discussion, one hour. Requisite: course 120A or 120B. Designed for seniors. Analysis of recent research on basic processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony. P/NP or letter grading.

124E. Language and Cognition. Lecture, three hours. Requisites: courses 10, 120A, or 120B. Designed for seniors. Recent theories of language and cognition: nature of categories, feedback, and error detection in language and cognition; modularity; knowledge acquisition; processes and representations underlying perception, production, attention, and awareness in language and cognition. P/NP or letter grading.

124F. Thinking. Lecture, three hours. Requisite: course 120A or 120B. Analysis of experimental studies of thinking processes and their categorization from a problem solving, creativity, and related topics. P/NP or letter grading.

124G. Cognitive Aging. Lecture, nine minutes; discussion, one hour. Requisites: courses 10, 100A, 120A, or 120B. Designed for seniors. Recent facts and theories on relations between normal aging and cognition, including perception, language comprehension, memory, recognition, and formation of images of period, how modern cognitive neuroscience explains experience of watching movies, and neuropsychology of acting in movies. P/NP or letter grading.

124H. Perception, Learning, and Learning Technology. Seminar, three hours. Requisite: course 120A or 120B. Aspects of perception and cognition as they relate to learning and potential for learning technology. Basic knowledge about visual information processing and perceptual-cognitive research, knowledge representation, pattern recognition, attention, imagery, memory, and expertise, as well as research on learning, technology, and applications of perceptual and cognitive concepts in specific domains, with special focus on teaching and learning in mathematics. P/NP or letter grading.

125A. Developmental Psychopathology. Seminar, three hours. Requisite: course 120A or 120B. Aspects of perception and cognition as they relate to learning and potential for learning technology. Basic knowledge about visual information processing and perceptual-cognitive research, knowledge representation, pattern recognition, attention, imagery, memory, and expertise, as well as research on learning, technology, and applications of perceptual and cognitive concepts in specific domains, with special focus on teaching and learning in mathematics. P/NP or letter grading.

125B. Research Methods in Developmental Psychopathology. Laboratory, three hours; fieldwork, seven hours. Limited to departmental majors. Aspects of perception and cognition as they relate to learning and potential for learning technology. Basic knowledge about visual information processing and perceptual-cognitive research, knowledge representation, pattern recognition, attention, imagery, memory, and expertise, as well as research on learning, technology, and applications of perceptual and cognitive concepts in specific domains, with special focus on teaching and learning in mathematics. P/NP or letter grading.

125C. Advanced Research Methods in Developmental Psychopathology. Laboratory, three hours; fieldwork, seven hours. Limited to departmental majors. Research approaches utilized by psychologists to conduct research in developmental psychopathology. Letter grading.

126. Clinical Psychology Laboratory. Laboratory, four hours. Requisites: courses 10, 100A, 100B, and 127A or 127B or 127C. Designed for departmental majors. Methods, designs, and issues in conduct of clinical psychology research. Students develop and conduct research. Content varies by instructor, with concentration on one of following: schizophrenia, mood disorders, anxiety disorders, childhood disorders, psychophysiological methods, observational methods with couples and families. Letter grading.

127A. Abnormal Psychology. (Formerly numbered Psychology 127B, 127C, or former course 127 or 128.) Study of dynamics and prevention of abnormal behavior, including neuroses, psychoses, character disorders, psychosomatic reactions, and other abnormal personality patterns. P/NP or letter grading.

127B. Abnormal Psychology: Biological Bases. Lecture, three hours; laboratory, one hour. Requisites: courses 10, 100A, 100B, and 127A, 127C, or former course 127 or 128. Study of biological substrates of abnormal cognition, behavior, and mood, with particular focus on neuroscience, genetics, physi-
127C. Abnormal Psychology: Developmental Perspectives. (4) Lecture, three hours. Require: course 10. Not open for credit to students with credit for course 127A, 127B, or former course 127 or 128. Study of development from prenatal period through adolescence and early adulthood. Clinical disorders include behavioral disorders, learning problems, depression/anxiety, and disorders of development such as autism and mental retardation. P/NP or letter grading.

129A. Personality Measurement. (4) Lecture, three hours. Require: courses 10, 100A. Rationale, methods, and context of studies dealing with problems of describing persons in terms of a limited set of dimensions. Detailed consideration of research literature dealing with a few representative personality dimensions. P/NP or letter grading.

129B. Introduction to Psychoanalysis. (4) Lecture, three hours. Require: courses 10, 100A. Development of Freud's ideas from 1895 to 1926, with emphasis on how his theory evolved from a drive-based reinforcement model to the structural theory in which unconscious fantasy plays a crucial role. Coverage of developments beyond Freud, especially work of the British school under the leadership of Klein, Winnicot, and Bim. P/NP or letter grading.

129C. Culture and Mental Health. (4) Lecture, two hours; discussion, one hour. Require: courses 10, 100A. Introduction to study of culture and human behavior in general, and culture and mental health in particular. Emphasis on cultural groups that comprise major U.S. ethnic groups (i.e., African Americans, Latinos/Chicanos, Asian Americans, and African Indians). P/NP or letter grading.

129D. Personality. (4) Lecture, three hours. Require: course 10. Survey of major topics in field of personality, including personality theory, personality assessment, and psychological and cultural dimensions of personality, learning, and motivation. P/NP or letter grading.

129F. Clinical Child: Childhood and Adolescence. (4) Lecture, two hours; discussion, one hour. Require: course 127A or 127B or 127C. Survey of child and adolescent psychology and psychotherapy from a psychoanalytic perspective. Coverage includes such conditions as anxiety disorders, depression, conduct and attention problems, eating disorders, and autism, with information on prevalence, causes, common treatments and their effects. P/NP or letter grading.

130. Developmental Psychology. (4) Lecture, three hours; discussion, one hour. Require: courses 10, 100A. Designed for juniors/seniors. Elaboration of developmental aspects of physical, mental, social, and emotional growth from birth to adolescence. P/NP or letter grading.

131. Research in Developmental Psychology. (4) Discussion, three hours; laboratory, three hours. Require: courses 10, 100A, 100B, and 130 or one course from 133A through 133I. Designed for Psychology and Cognitive Science majors. Forms of scientific writing; ethics of research; working with problems; special advantages and problems of asking developmental research questions; relevant methodologies for experimental and observational work; data analysis and data presentation options. Letter grading.

132B. Mental Health in Schools: Policy and Practice. (4) Seminar, three hours. Limited to juniors/seniors. Policies, models, and mechanisms for mental health in schools. Psychopathology placed into broader context of educational and social conditions/needs. Consideration of current research findings presented in applied setting. P/NP or letter grading.

133A. Adolescent Development. (4) Lecture, three hours; discussion, one hour. Require: courses 10, 100A. Major theories, approaches, and issues in study of cognitive development. Readings include original research on important topics such as development of perception, language, thinking, and problem solving, and acquisition of concepts and domain-specific language. P/NP or letter grading.

133B. Cognitive Development. (4) Lecture, three hours. Require: courses 10, 100A. Major theories, approaches, and issues in study of cognitive development. Readings include original research on important topics such as development of perception, language, thinking, and problem solving, and acquisition of concepts and domain-specific language. P/NP or letter grading.

133C. Language Development. (4) Lecture, three hours. Require: courses 10, 100A. Application of principles of cognitive development, learning, and perception to study of language development. Topics include first and second language acquisition (sounds, meanings, grammatical structures), learning mechanisms, communication skills, and relation between language and thought in children. P/NP or letter grading.

133D. Social and Personality Development. (4) Lecture, three hours. Require: courses 10, 100A. Theory and research on social and personality development during childhood and adolescence. Topics include parental emotions, attachment, temperament, self-control, aggression, sex-typing, self-concept, moral reasoning and behavior, status and social skills, and peer group relations. P/NP or letter grading.

133E. Perceptual Development. (4) Lecture, three hours. Require: courses 10, 100A. Topics include origins and development of human perceptual abilities, origins of knowledge, and important aspects of the environment, ecological and computation- al issues in perception, research and theory about initial perceptual capacities, and some sensory foundations. P/NP or letter grading.

133F. Psychology and Education. (4) Lecture, three hours. Require: courses 10, 100A. Application of principles of cognitive development, learning, and perception to educational environments. Topics include general instructional issues, psychological and educational settings, early childhood education, and education of the disadvantaged. P/NP or letter grading.

133G. Culture and Human Development. (4) Lecture, three hours; discussion, one hour. Require: courses 10, 100A. Role of culture in human development through psychology, anthropology, and autobiography. Students relate material from lectures and readings, through empirical research projects, to diverse cultural backgrounds in class, at UCLA, and in the broader community. P/NP or letter grading.

133H. Applied Developmental Psychology. (4) Lecture, three hours. Require: courses 10, 100A, 100B. Application of developmental psychology to issues pertaining to improving well-being of children and their families. Topics include: life cycle, the child, interaction of social, and emotional development of children, developmentally appropriate practices, child care quality, role of educator/caregiver, and other related issues. Letter grading.

133I. Applied Developmental Psychology: Pre-school/School-Age. (4) Lecture, three hours. Designed for Applied Developmental Psychology minors. Coverage of children three to eight years old. Topics include physical, cognitive, social, and emotional development of children, developmentally appropriate practices, child care quality, role of educator/caregiver, and other related issues. Letter grading.

134D. Fieldwork in Applied Developmental Psychology. (2) Fieldwork, 86 hours per term. Enforced corequisite: course 134A. Designed for Applied Developmental Psychology minors. Fieldwork in advanced applications of developmental psychology to support and illustrate, in applied setting, theories and research findings presented in lecture. P/NP grading.

134F. Infant Care and Development. (4) Lecture, three hours. Require: courses 10, one course from 133 or 133B through 133I, one statistics course. Examination of methods, mentors, and philosophers that enhance development of children in context of childcare settings. Topics include issues of multiculturalism, ambivalence, role, and special needs adaptations. P/NP or letter grading.

134G. Early Childhood Curriculum. (4) Lecture, three hours; discussion, one hour. Require: courses 10, one course from 130 or 133B through 133I, one statistics course. Examination of methods, mentors, and philosophers that enhance development of children in context of childcare settings. Topics include issues of multiculturalism, ambivalence, role, and special needs adaptations. P/NP or letter grading.

134H. Child, Family, and Community. (4) Lecture, three hours. Require: courses 10, one course from 130 or 133B through 133I, one statistics course. Exploration of role of early childhood educators within context of diverse racial, ethnic, economic, and cultural backgrounds and impact of these dynamics on children's development. P/NP or letter grading.

134I. Social Psychology. (4) Lecture, four hours; discussion, one hour. Require: courses 10, 100A. Topics include origins of knowledge, and important aspects of the environment, ecological and computation- al issues in perception, research and theory about initial perceptual capacities, and some sensory foundations. P/NP or letter grading.

136A. Social Psychology Laboratory. (4) Lecture, one hour; laboratory, four hours. Require: courses 10, 100A, 100B, 135. Designed for Psychology majors. Introduction to research designs and methods used to test social psychological hypothesis, including experiments, observation, content analysis, and/or questionnaires. P/NP or letter grading.

136B. Nonexperimental Methods in Social Psychology. (4) Lecture, two hours; laboratory, two hours. Require: courses 10, 100A, 100B, 135. Designed for Psychology majors. Research experience with nonexperimental methods for study of social attitudes or behavior, including fieldwork with survey research, naturalistic observation, or questionnaires. P/NP or letter grading.

136C. Survey Methods in Psychology. (4) Lecture, two hours; laboratory, three hours. Require: courses 10, one course from 130 or 133B through 133I. Designed for Psychology majors. Survey research in psychology, with particular emphasis on surveys of social and political attitudes. Actual experience in systematic survey research such as that done by media polling agencies, market research companies, and academic survey research centers. Topics include survey design, sampling, interviewing techniques, response rates, questionnaire design, data coding, and analysis. Training in telephone interview- ing techniques in laboratories. P/NP or letter grading.
137A. Sport Psychology. (4) Lecture, three hours. Designed for junior/senior Psychology majors. Introduction to field of sport psychology. Coverage of research and applied aspects of a range of topics, including youth sport participants as well as world-class performers.

137C. Intimate Relationships. (4) Lecture, three hours. Requisites: courses 10, 100A. Limited to juniors/seniors. Not open for credit to students with credit for former course M176. Introduction to how social scientists think about, study, and treat intimate relationships. Understanding how relationships change over time. Topics include attraction, relationship formation, conflict resolution, social support, sex, role of individual differences, and external circumstances.

M137E. Work Behavior of Women and Men. (4) (Same as Women’s Studies M137E.) Lecture, two and one-half hours. Requisite: course 10 or Women’s Studies 10. Designed for seniors. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles. P/NP or letter grading.

137F. Introduction to Sport Psychology. (4) Lecture, three hours. Designed for juniors/seniors. Survey of topics in sport psychology, including leadership and team dynamics, moral development and aggression, personality, motivation, fan behavior, and performance enhancement. Consideration of youth sport through work with professionals. P/NP or letter grading.

137I. Interpersonal Influence and Social Power. (4) Lecture, three hours. Requisite: course 135. Theory and research focusing on how people influence one another and resist such influence, and on the bases of social power. Motivations and effects of influence for the powerholder and target of influence. Applications to such problems and issues as power and leadership in organizations, interpersonal influence and health, power and the family, loci of influence in everyday life, social power of political figures.

M138. Electoral Politics: Political Psychology. (4) (Same as Political Science M141A.) Lecture, three or four hours; discussion, one hour (when scheduled). Requisite: course 10. Designed for juniors/seniors. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues.

M139. Representing Autism. (4) (Same as Disability Studies M139.) Seminar, three and one half hours. Students build critical awareness of autism as historically constructed disability and are required to move beyond solely medical or deficiency model of autism to recognize this new categorization of disability as produced by and productive of new dialogues, identities, and visions of what range of people fall into the category and how these multiple framings are in context of autism and disability intervention, policy, and theory today. Letter grading.

M140. Introduction to Study of Aging. (4) (Same as Gerontology M140 and Social Welfare M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on aging and concepts of aging that prepare students for subsequent specialization. P/NP or letter grading.

142H. Advanced Statistical Methods in Psychology (Honors) (4) Lecture, three hours; laboratory, two hours. Requisites: courses 100A, 100B. Survey of statistical techniques commonly used in psychology, education, and behavioral and social sciences: correlation and regression, analysis of variance, and multiple regression. P/NP or letter grading.

M147A. Psychology of Lesbian Experience. (4) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M147A and Women’s Studies M147A.) Lecture, two hours; discussion, one hour. Requisite: course 135. Examination and theory of psychology and women’s studies to examine various aspects of contemporary gay, bisexual, and lesbian life. Concentrations of interest may include: child-rearing, gender role socialization, minority status of women and lesbians, identity development within a multicultural society, changes in psychological theories about lesbians in sociocultural context. P/NP or letter grading.

150. Introduction to Health Psychology. (4) (Formerly numbered 137D.) Lecture, three hours. Requisite: course 10. Not open for credit to students with credit for former course 137D. Areas of health, illness, treatment, and delivery of treatment that can be elucidated by understanding of psychological concepts and research related to these problems. Topics include the biopsychosocial model approach and how psychological perspectives might be enlarged and extended in medical area. P/NP or letter grading.

151. Research Methods in Health Psychology. (4) (Formerly numbered 136D.) Laboratory, four hours. Requisites: courses 100A, 100B, 135. Not open for credit to students with credit for former course 136D. Requisites: course 137A, 137B, or 137D. Methodology of psychological investigation involving experimental, quasi-experimental, and nonexperimental methods. Examples and projects from health psychology. Letter grading.

160. Genetics of Human Cognition and Behavior. (4) Lecture, three hours. Requisites: courses 10, 100A, 127A or 127B or 127C. Limited to juniors/seniors. Survey of field of behavior genetics, including methods for determining genetic and environmental influences and for assessing the relative magnitudes of the effects of genes impacting these traits, as well as current knowledge of genetic contributions to cognition and behavior and disorders thereof. P/NP or letter grading.

161. Behavior and Brain Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Limited to juniors/seniors. Exploration of relationship between brain development and behavior. Examination of how cognitive neuroscience can inform study of development and how developmental approach can advance progress in cognitive and developmental sciences. P/NP or letter grading.

163. Death, Suicide, and Trauma. (4) (Same as Sociology M138.) Lecture, three hours; discussion, one hour. Sociological analysis of incidence of violent death. Suicide is eighth leading cause of death in U.S. and one of the most deadly experience people aged 15 to 24. Both kinds of violent deaths are often dismissed as extreme psychopathology, reflecting individual mental health issues. Sociologists argue that suicide and homicide are social facts. Suicide and homicide do not occur randomly in society but are stratified according to social factors such as age, gender, race, sexual orientation, and class. Analysis of strength of this sociological perspective on the relation of potential of different theories to make sense of violent death, paying particular attention to forensic and medicolegal system to determine suicide and solve homicides. Re- view of historical and contemporary studies to examine how research and conceptualizations of suicide and homicide have changed, as well as social responses to these phenomena. P/NP or letter grading.

M165. Psychology of Gender (4) (Same as Women’s Studies M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex role development, biological, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction. P/NP or letter grading.

M172. Afro-American Woman in U.S. (4) (Same as Afro-American Studies M172 and Women’s Studies M172.) Lecture, two and one-half hours. Designed for juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of large society and as members of their biological and ethnic group. P/NP or letter grading.

176. Human Motivation. (4) Lecture, three hours. Des-signed for juniors/seniors. Examination of theories of human motivation, experimental findings supporting these theories, and history of study of motivation. Topics include sociobiology, conflict, aspiration level, achieve- ment strivings, and causal attributions.

179A. Health Behavior and Health Status of Ethnic Groups: Behavioral Perspective. (4) Lecture, three hours. Requisites: course 135, 137A. Same as Psychology M181B. Limited to Developmental Disabilities Program students. Examination of broad spectrum of issues related to mental retardation, intelligence and IQ, genetics, neurobiolo- gy, and other developmental disabilities. P/NP or letter grading.

M181A. Research in Contemporary Problems in Developmental Disabilities. (4) (Same as Psychiatry M181A.) Lecture, one hour; laboratory, eight hours. Corequisite: course 135. Limited to Developmental Disabilities Program students. Research experience. In Progress grading (credit to be given only on completion of course). P/NP or letter grading.

184A-184B. Psychology Research Opportunity Program Seminars. (2-2) Seminar, 90 minutes. De- signed for juniors/seniors. Open to students participating in the Psychology Research Opportunity Program (PROPS) students undertaking supervised tutorial research in seminar setting with one or more faculty members to discuss their own undertaking or re- lated work in discipline. Led by one supervising faculty member. P/NP grading.

185. Research Practicum in Psychology. (3) Labo- ratory, seven hours. Corequisite: course C194D. Limited to juniors/seniors. Practical applications of psychol-
ogy through research under guidance of faculty mentor. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

186A. Cognitive Science Laboratory: Introduction to Theory and Simulation. (4) Laboratory, four hours. Requisites: courses 10, 85, 100A, 100B. Program in Computing 10A, 10B. Designed for junior/senior departmental majors. Models of cognition within framework of explanation at multiple levels of abstraction. Examples of elementary models in multiple psychological domains (e.g., visual perception, categorization, learning, reasoning, and problem solving). Types of models include neural networks and symbolic models. Lectures and discussions interwoven with computer simulations written in Matlab. P/NP or letter grading.

186B. Cognitive Science Laboratory: Neural Networks. (4) Laboratory, four hours. Requisites: courses 10, 85, 100A, 100B, Mathematics 31A, 31B, Program in Computing 10A, 10B. Designed for junior/senior departmental majors. Laboratory experience in neural network modeling of perception and cognition. Specific topics include essential neurophysiology, basic architecture, learning techniques, and application of computational models illustrated and discussed in context of models of specific perceptual and cognitive processes. Simulations written in Pascal. P/NP or letter grading.

186C. Computer-Based Psychophysical Theories and Methods. (4) Lecture, two hours; laboratory, two hours. Requisites: courses 10, 85, 100A, 100B. Designed for junior/senior departmental majors. Lectures and laboratory work that examine perceptual measurement procedures (psychophysical methods) and cognitive processing and decision models on which procedures are based, with particular emphasis on signal detection theory and its applications. Letter grading.

187A. Psychology and Law. (4) Lecture, two hours; discussion, two hours. Designed for juniors/seniors. Study of new topics on legal psychology, including suspect identification, polygraphy, and legal procedures. Outside speakers utilized in presentation of these materials. Students participate in presentations and/or discussion.

187B. Advanced Psychology and Law. (4) Lecture, three hours; discussion, one hour. Requisite: course 187A. Designed for juniors/seniors. Study of additional topics on legal psychology, including gang violence, theories of crime, corrections, repeat offenders, community policing, and interrogation. Outside speakers utilized in presentation of these materials. P/NP or letter grading.

187C. Sex and Law. (4) Lecture, three hours. Limited to juniors/seniors. Explains role of Constitutional foundation for sexual rights in America, with focus on freedom of speech and press, right to privacy, and Ninth Amendment rights reserved by the people. P/NP or letter grading.

188A. Special Seminars: Psychology. (4) Seminar, three hours. Limited to juniors/seniors. Departmentally sponsored experimental or temporary seminars on selected topics such as those taught by visiting faculty members. Reading, discussion, and development of culminating project. May be repeated for credit. P/NP or letter grading.

188B. Special Courses in Psychology. (4) Lecture, three hours. Designed for junior/senior majors. Departmentally sponsored experimental or temporary courses on topics of psychological interest, such as those taught by visiting faculty members. Consult Schedule of Classes for topics and instructors. May be repeated for credit. P/NP or letter grading.

190. Research Colloquia in Psychology. (1) Seminar, one hour. Designed to bring together students under-graduate supervision of seminar in seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

191. Variable Topics Research Seminars: Psychology. (1) Seminar, one hour. Limited to juniors/seniors. Research seminar on selected topics in psychology. Reading, discussion, and development of culminating project. May be repeated for credit. P/NP grading.

191AH-191BH-191CH. Departmental Honors Research Seminars. (2-2-2) Seminar, two hours. Enforced corequisite: course 198. Course 191AH is requisite to 191BH and 191CH. Psychology honors program students. Opportunity for development and analysis of creative ideas through individual research projects with faculty sponsor and discussion of student and faculty research presentations. Information and applications may be obtained from Undergraduate Advising Office, 1531 Franz Hall. If approved in advance by Undergraduate Office, courses 191AH-191BH-191CH count as part of the Psychology Department major. Letter grading.

192. Education Practices in Psychology. (4) Seminar, one hour. Limited to junior/senior psychology majors. Practical applications of cognitive science. Topics in teaching, research, and supervised practicum for advanced undergraduate students to assist in courses related to psychology. Students assist in preparation of materials and development of methods and strategies for faculty members and teaching assistants. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree and may be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

193. Journal Club Seminars: Psychology. (1) Seminar, one hour. Limited to undergraduate students. Discussion of readings selected from current literature of particular field of interest and different ways of organizing and writing-up of speakers series. May be repeated for credit. P/NP grading.

194A. Internship Seminars: Psychology. (2) Seminar, two hours. Corequisite: course 195A. Study of research methods, applications, and current literature through group discussion, presentation, and papers. Research fields and topics vary by instructor. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

194B. Research Group Seminars: Psychology. (1) Seminar, one hour. Corequisite: course 196A (3-unit option). Limited to juniors/senior who are part of research group. Discussion of research methods and current literature field in or of research of faculty members or students. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

194C. Research Group Seminars: Cognitive Science. (1) Seminar, off-hour. Corequisite: course 195B (3-unit option). Limited to junior/senior Cognitive Science majors who are part of research group. Discussion of research methods and current literature in field or of research of participants. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May be applied toward course requirements for any Psychology major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

194D. Research Group Seminars: Practicum. (1) Formerly numbered 194D.) Seminar, one hour. Corequisite: course 185. May be repeated for credit. Designed for students who are part of research group that meets with graduate students. Discussion of research methods and current literature in field or of research of faculty members or students. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. Concurrently scheduled with course C296B. P/NP grading.

195A. Community Internships in Psychology. (2) Tutorial (approved community setting), six hours. Corequisite: course 194A. Limited to juniors/seniors. Internship in applications of psychology in supervised setting. Students meet on regular basis with supervisor and provide periodic reports of their experience. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. Individual contract with supervising placement sponsor required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

195B. Corporate Internships in Cognitive Science. (4) Tutorial, eight hours. Limited to junior/senior Cognitive Science majors. Practical applications of cognitive science through internships in corporate settings. Students meet on regular basis with supervisor and provide periodic reports of their experience. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May be applied toward course requirement for Cognitive Science major. Individual contract with supervising sponsor required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

195A. Research Apprenticeship in Psychology. (3 to 4) Tutorial, eight hours. Corequisite: course 194B. Limited to junior/seniors. Practical applications of psychology through research under guidance of faculty mentor. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

195B. Research Apprenticeship in Cognitive Science. (3 to 4) Tutorial, eight hours. Corequisite: course 194C. Limited to junior/senior Cognitive Science majors. Practical applications of cognitive science through research under guidance of faculty mentor. Only 12 units from any combination of courses 185, 192, 194, 195, and 196 may be applied toward undergraduate degree. May be applied toward course requirements for Cognitive Science major. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.

198. Honors Research in Psychology. (2) Tutorial, two hours. Enforced corequisite: course 191AH or 191BH or 191CH. Limited to juniors/seniors and psychology honors program students. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. Letter grading.

199A. Senior Project in Psychology. (4) Tutorial, to be arranged. Limited to juniors. Directed individual research under guidance of psychology faculty mentor. Capping paper required. Only one 4-unit 199 course may be taken per term. May be repeated for credit. Individual contract required. Information and contracts may be obtained from Undergraduate Advising Office, 1531 Franz Hall. P/NP grading.
larity and organization, coordinated sensory representation, language, regional functional specialization, attention, and regulation of cortical function by extracortical systems. Letter grading.

20SC. Neurotransmitters in Human Disorders of Motor and Cognitive Function. (2) Lecture, three hours. Designed for graduate students. Detailed analysis of neuromodulators and their roles in frontal areas involved in interpersonal communication processes (i.e., neurotransmitters, neuromodulators, “neuromodulators,” neurotropic agents). Discussion of their roles in normal brain physiology, followed by detailed examination of their perturbations in various disease states. Particular emphasis on current and past thinking about Alzheimer’s disease, Parkinsonism, Huntington’s disease, and Down’s syndrome dementia. Letter grading.

20SD. Clinical Psychopharmacology. (2) Lecture, three hours. Designed for graduate students. General principles of brain neurotransmitters, including synthesis, cell bodies, and release properties. Principles of drug administration and pharmacokinetics. Major classes of psychoactive drugs, animal models, and “atypical” compounds. Letter grading.

20SE. Psychobiology of Emotion and Stress. (2) Lecture, three hours. Designed for graduate students. Overview of literature on role of brain and autonomic endocrine systems in emotion and stress-related responses. Specific involvement of neurotransmitters, neuromodulators, and hormones in emotional plasticity, visceral function, and bodily diseases. Letter grading.

20SF. Physiology of Learning. (2) Lecture, three hours. Designed for graduate students. Search for an atomic loci of engrams. Cell biology of plasticity, including electrophysiological and molecular approaches. Theories of how neural circuitry might be organized to make learning possible. Letter grading.

20SG. Behavior Genetics. (2) (Not same as course 205G prior to Winter Quarter 2008.) Lecture, three hours. Designed for graduate students. In-depth analysis of principles of genetics for determining genetic and environmental influences and for locating and characterizing genes impacting these traits, as well as current knowledge of genetic contributions to behavior and disorders thereof. Letter grading.

20SK. Vision Neurobiology. (2) Lecture, three hours. Designed for graduate students. Exploration of anatomy, physiology, and computational in visual system, focusing on retinocortical system and the visual cortex, and visual performance. Letter grading.

20SM. Neuropsychology of Perception. (2) Lecture, three hours (five weeks). Designed for graduate students. Examination of neural substrates of high-level visual processing. Topics include anosognosia and characteristics of electrophysiological responses recorded in primate temporal lobe. Discussion of issues regarding neural representation. Letter grading.

202B. Instrumental Conditioning. (4) Lecture, three hours. Topics include animal learning and conditioning and application of learning principles to goal-directed action, motivational processes, and goal selection in nonhuman animals. S/U or letter grading.

206D. Fear and Anxiety. (4) Pre requisite: course 200A. Critical discussion and in-depth analysis of current major theoretical approaches to associative learning, with emphasis on recent experimental analyses of conditioning phenomena.

204A. Basic Motivational Processes. (4) Lecture, three hours. Designed for graduate students. Analysis, using behavioral systems approach, of basic motivated behavior such as feeding, drinking, foraging, and reproduction. This same approach is also applied to phenomena such as acquired motivation, reinforcement, and drug addiction. Historical survey of behavioral analyses of motivation and goal-directed behavior. S/U or letter grading.

204B. Theories of Learning. (4) Discussion, three hours. Requisite: course 200A. Critical discussion and in-depth analysis of major theoretical approaches to associative learning, with emphasis on recent experimental analyses of conditioning phenomena.

204C. Evaluative Processes. (4) Lecture, three hours. Designed for graduate psychology students. Lectures and discussion on current research in application of learning principles to clinical and social problems such as alcohol and drug abuse, aggression, fear management, mental retardation, behavioral medicine, autism/schizophrenia, etc. S/U or letter grading.

204D. Fear and Anxiety. (4) Lecture, three hours. Preparation: graduate training. Presentation of theoretical and empirical advances, from biological and behavioral perspectives, in the area of fear and anxiety. Integration of animal and human research.

205A. Cortical Plasticity and Perceptual Learning. (2) Lecture, three hours. Designed for graduate students. Examination of neural basis of perceptual learning. Overview of literature on cortical plasticity and how it relates to different forms of perceptual learning in visual, auditory, and somatosensory modalities. Review of mechanisms of neural plasticity, including features of long-term synaptic plasticity and computational models of cortical processing. Letter grading.

205B. Human Neurophysiology. (2) Lecture, three hours. Designed for graduate students. Examination of higher cognitive processes in terms of neural mechanisms that underlie them. Topics include cortical modulation, integration, and organization, coordinated sensory representation, language, regional functional specialization, attention, and regulation of cortical function by extracortical systems. Letter grading.

20SC. Neurotransmitters in Human Disorders of Motor and Cognitive Function. (2) Lecture, three hours. Designed for graduate students. Detailed analysis of neuromodulators and their roles in frontal areas involved in interpersonal communication processes (i.e., neurotransmitters, neuromodulators, “neuromodulators,” neurotropic agents). Discussion of their roles in normal brain physiology, followed by detailed examination of their perturbations in various disease states. Particular emphasis on current and past thinking about Alzheimer’s disease, Parkinsonism, Huntington’s disease, and Down’s syndrome dementia. Letter grading.

20SD. Clinical Psychopharmacology. (2) Lecture, three hours. Designed for graduate students. General principles of brain neurotransmitters, including synthesis, cell bodies, and release properties. Principles of drug administration and pharmacokinetics. Major classes of psychoactive drugs, animal models, and “atypical” compounds. Letter grading.

20SE. Psychobiology of Emotion and Stress. (2) Lecture, three hours. Designed for graduate students. Overview of literature on role of brain and autonomic endocrine systems in emotion and stress-related responses. Specific involvement of neurotransmitters, neuromodulators, and hormones in emotional plasticity, visceral function, and bodily diseases. Letter grading.

20SF. Physiology of Learning. (2) Lecture, three hours. Designed for graduate students. Search for an atomic loci of engrams. Cell biology of plasticity, including electrophysiological and molecular approaches. Theories of how neural circuitry might be organized to make learning possible. Letter grading.

20SG. Behavior Genetics. (2) (Not same as course 205G prior to Winter Quarter 2008.) Lecture, three hours. Designed for graduate students. In-depth analysis of principles of genetics for determining genetic and environmental influences and for locating and characterizing genes impacting these traits, as well as current knowledge of genetic contributions to behavior and disorders thereof. Letter grading.

20SK. Vision Neurobiology. (2) Lecture, three hours. Designed for graduate students. Exploration of anatomy, physiology, and computational in visual system, focusing on retinocortical system and the visual cortex, and visual performance. Letter grading.

20SM. Neuropsychology of Perception. (2) Lecture, three hours (five weeks). Designed for graduate students. Examination of neural substrates of high-level visual processing. Topics include anosognosia and characteristics of electrophysiological responses recorded in primate temporal lobe. Discussion of issues regarding neural representation. Letter grading.

nomic health disparities and to methodological issues faced in conducting research on these issues. Letter grading.  

220A. Social Psychology. (4) Lecture. Three hours. Designed for graduate psychology students. Intensive consideration of concepts, theories, and major problems in social psychology.  

220C. Advanced Social Psychology. (4) Lecture. Three hours. Requisite: course 220A or 220D. Review of contemporary topics and issues in social psychological research and theory.  

220D. Introduction to Social Psychology. (4) Lecture, three hours. Designed for graduate students. Introduction to theory and research in social psychology for students who are not psychology majors. Service course for graduate students in education, sociology, political science, management, public health, etc.  

222A. Interpersonal Relations. (4) Discussion, three hours. Requisite: course 222A. Critical review of theory and research on interpersonal relationships, with emphasis on friendship, dating, and marriage.  

222B. Interpersonal Influence and Social Power. (4) Seminar, three hours. Preparation: advanced social psychology course (psychological or sociological). Review of theory and research on interpersonal influence and social power, with applications to various power relationships such as supervisor/subordinate, health-care professional/patient, parent/child, teacher-student, political figures, etc. S/U or letter grading.  

222C. Psychology of Intergroup Relations. (4) Lecture, three hours. Designed for graduate students. In-depth and comprehensive exposure to major theoretical and methodological issues within domain of intergroup relations research. Approaches not simply restricted to work within psychology but across social sciences in general, including anthropology, political science, and sociology. S/U or letter grading.  

222D. Social Stigma. (4) Seminar, three hours. Introduction to classic and contemporary theory and research on interpersonal stigma whit primarily from perspective of stigmatized. Letter grading.  

226-A226B-226C. Current Literature in Social Psychology. (2-2-2) Discussion, 90 minutes. Course 226A is limited to first-year social psychology students. Courses 226B and 226C are open to nonsocial psychology students with consent of instructor. Recent and current research papers in social psychology presented by members of seminar and their significance and methodology discussed and critiqued in depth. S/U grading.  

M228A. Proseminar: Political Psychology. (4) (Same as History M236A and Political Science M261A.) Seminar, three hours. Introduction to political psychology as the study of interpersonal relationships, political mass attitudes, group conflict, political communication, and elite decision making.  

M228B. Seminar: Political Psychology. (4) (Same as Political Science M261A.) Discussion, three hours. Requisite: course 220A or Political Science M261A. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion. S/U or letter grading.  

M228C. Critical Problems in Political Psychology. (4) (Same as Political Science M261E.) Discussion, three hours grading.  

229. Social Cognition. (4) Lecture, one hour; discussion, two hours. Social cognition is concerned with how people organize and interpret social information in their environment. Seminar provides broad background concerning specific responses and focus on particular research topics in the field. Weekly papers, as well as a lengthy final paper, required.  

231. Psychology of Gender. (4) Seminar, three hours. Preparation: courses and background in gender studies. Critical evaluation of current research and theory concerning psychology of gender, drawing on work from various areas of psychology to understand sources of gender differences and the implications for human behavior and social interaction.  

232. Human Sexuality. (4) Lecture, three hours. Designed for graduate students. Intended to teach students how to carry out research on human sexual behavior. Contents include theory construction, scale development, physiological and endocrinological implications, radioimmunoassay (measuring hormones in blood sample), ethical issues, methodological and statistical considerations, and considerations of sexual arousal, fantasy, and sexual dysfunction therapy. Discussion-oriented, with emphasis on operationalizing predictions concerning sexuality.  

233. Seminar: Environmental Psychology. (4) Requisites: courses 235, 250A, 250B. Critical review of work in environmental psychology designed to identify basic dimensions for analysis of man/environment relations. Use of human environmental variables as environmental variables as intervening variables linking specific stimulus qualities to a variety of approach-avoidance behaviors. Individual differences and drug-induced states as these response dimensions are used to explain within-individual differences in response to same environment over time or between-individual differences to same situation. Review of literature relating interindividual environments to arousals and preferences for those environments.  

234. Social Psychological Aspects of Competitive Youth Sport. (4) Review of research concerning social psychological aspects of competitive sport for children. Sport is presented as a major achievement domain for young participants. Topics include sources and consequences of competitive stress, significant adult influences and interactions, predictors of performance, determinants of participation and dropping out, and socialization through sport.  

235. Personality. (4) Survey of cognitive, analytic, and learning theory approaches to theory of personality. Emphasis on interactions of selected concepts and related research.  

236. Interdisciplinary Relationship Science. (4) Formerly numbered 236.) (Same as Anthropology M295S, Education M297, and Sociology M270.) Lecture, three hours. Limited to graduate students. Diverse approaches to relationship science in fields of anthropology, education, psychology, and sociology. Focus on theme of understanding biological, behavioral, and cultural aspects of relationships through diverse theoretical and methodological approaches. Use of broad definition of interpersonal relationships, including relationships between father-child, teacher-student, sibling, peer, kin, romantic relationships, marriage, and friendships. S/U or letter grading.  

238. Survey Research Techniques in Psychocultural Studies. (4) (Same as Psychiatry M238.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.  

M239. Personality, Motivation, and Attribution. (4) (Same as Education M215.) Discussion, three hours. Recent research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivations and concerns of the field, including research on the role of personality and attribution in understanding behavior. Perceived causes of outcomes in achievement and affective domains. S/U or letter grading.  

240A. Language and Cognitive Development. (4) Lecture, three hours. Preparation: background in developmental psychology course in cognitive or language development. Designed for graduate students. Consideration of major topics and concepts, key theories, latest methods, and research findings in development of language and cognition. S/U or letter grading.  

240B. Social and Emotional Development. (4) Lecture, three hours. Preparation: one undergraduate developmental psychology course in social development or related topic. Designed for graduate students. Consideration of major topics and concepts, key theories, latest methods, and recent research studies. S/U or letter grading.  

241. Current Developments in Developmental Psychology. (1) Discussion, 90 minutes. Designed for graduate developmental psychology students. Presentation of papers on current advances in developmental psychology and closely related areas by experts in the field. Emphasis on approaches to a problem, making it suitable to introduce new papers by graduate students. S/U grading.  

242A-M242G. Seminars: Developmental Psychology. (4) (each) Each course may be taken independently and may be repeated for credit.  

242A. Perceptual Development. (4) Seminar, three hours. Requisites: courses 240A, 240B. May be taken independently and may be repeated for credit. S/U or letter grading.  

242B. Cognitive Development. (4) Seminar, three hours. Requisites: courses 240A, 240B. May be taken independently and may be repeated for credit. S/U or letter grading.  

242C. Socialization. (4) Seminar, three hours. Requisites: courses 240A, 240B, 240C. May be taken independently and may be repeated for credit. S/U or letter grading.  

242D. Development of Language and Communication. (4) Seminar, three hours. Requisites: courses 240A, 240B, 240C. May be taken independently and may be repeated for credit. S/U or letter grading.  

242F. Development of Language and Communication. (4) Seminar, three hours. Requisites: courses 240A, 240B, 240C. May be taken independently and may be repeated for credit. S/U or letter grading.  

242G. Adolescent Development. (4) (Same as Education M217F.) Seminar, four hours. Designed for graduate students. Review of research on physical, cognitive, social, and psychological characteristics during second decade of life. Topics include pubertal development, changes in parent/adolescent relationships, roles of peers, identity development, high-risk behaviors, stress and coping, and school adjustment. Letter grading.  

244. Critical Problems in Developmental Psychology. (4) Lecture, three hours. Requisites: courses 240A, 240B. Current problems; content varies depending on interest of class and instructor. May be repeated for credit with consent of instructor.  

M245. Personality Development and Education. (4) (Same as Education M217C.) Lecture, four hours. Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggres-
sion, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality development. S/U or letter grading.

M246. Psychological Aspects of Mental Retardation. (4) (Same as Psychiatry M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theories of prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems). S/U or letter grading.

M247. Culture, Brain, and Development. (4) (Same as Anthropology M239S, Applied Linguistics M233, and Education M285.) Seminar, three hours. Designed for graduate students. Integration of knowledge across different disciplines to understand interrelations of culture, brain, and development, where development includes both human ontology and human phylogeny. S/ U or letter grading.

M248. Culture, Brain, and Development Forum. (1) (Same as Anthropology M239S, Applied Linguistics M233, Education M285, and Neuroscience M293.) Seminar, 90 minutes every other week. Interdisciplinary seminar series to provide students with exposure to current research in understanding complex relationships between culture, brain, and development. S/U grading.

249. Evaluation Research. (4) Requisites: courses 250A, 250B. Introduction to evaluation research in psychology, with emphasis on clinical, community, and social psychology applications. Survey includes policy and strategy issues, design of evaluative studies, data analysis, and utilization of findings.

250A. Advanced Psychological Statistics. (4) Review of fundamental concepts. Basic statistical techniques as applied to design and interpretation of experiments and psychological data.

250B. Advanced Psychological Statistics. (4) Advanced experimental design and planning of investigations.

250C. Advanced Psychological Statistics. (4) Lecture, three hours; discussion, two hours. Requisite: course 250A. Limited to graduate students. Review of traditional topics in correlation and regression analyses, including model comparison strategies, evaluation of model assumptions, testing mediation and moderation hypotheses, working with categorical variables, general linear model, and logistic regression. Letter grading.

251A-251B-251C. Research Methods. (4-4-4) Tutorial to laboratory. Designed for graduate psychology students. Students design and conduct original research projects under supervision of instructor in charge. It is anticipated that many students will complete major projects that form the basis (normally three are allowed). S/U (251A, 251B) and S/U or letter (251C) grading.

252B. Discrete Multivariate Analysis. (4) Lecture, three hours. Requisites: courses 250A, 250B. Introduction to analysis of frequency table data. Topics include categorical univariate and multivariate distributions, independence and conditional independence, log-linear model categorical designs, and ordered categorical variables. Applications from various areas of psychology.

254A. Computing Methods for Psychology. (4) Lecture, three hours. Theory and computer coded use of MATLAB, but only basic programming knowledge assumed; prior knowledge of MATLAB required. Designed to teach basic computer methods relevant to work in experimental psychology and cognitive science. Topics include simulation/modeling, statistical data analysis, and stimulus presentation. S/U or letter grading.

255A. Quantitative Aspects of Assessment. (4) Lecture, four hours. Requisites: courses 250A, 250B. Introduction to test theory, issues concerning empirical measurement of abstract constructs using both classical and modern empirical techniques. Hands-on approach allows students to develop practical experience. In addition to traditional issues such as reliability and validity, topics include exposure to analytic approaches, including item response theory, multiple regression, principal components analysis, exploratory factor analysis, confirmatory factor analysis, path analysis, and structural equation modeling. S/U or letter grading.

256. Advanced Regression Analysis. (4) Seminar, three hours. Requisites: courses 250A, 250B. Advanced treatment of traditional topics — model comparison strategies, model assumptions, topics such as outliers, mediation, moderation, categorical variables, polynomial models, transformations, logistic regression. S/U or letter grading.

257. Multivariate Analysis with Latent Variables. (4) (Same as Sociology M202B and Statistics M242.) Lecture, three hours. Introduction to models and methods for data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structural-means factor models, Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications. S/U or letter grading.

259. Quantitative Methods in Cognitive Psychology. (4) Requisites: courses 250A, 250B. Number of nonstatistical mathematical methods and techniques commonly used in cognitive psychology. Topics include Markov chains, random processes, queueing theory, information theory, frequency analysis, etc.

260A-260B-260C. Proseminars: Cognitive Psychology. (1-1-1) Presentation of research topics by students, faculty, and visiting scholars. Each course may be taken for credit. S/U grading.

260D. Seminar: Cognitive Psychology. (4) Seminar, three hours. Discussion of problems in cognitive psychology that encompass more than a single subfield of the area. May be repeated for credit.

270A-270B-270C. Foundations of Clinical Psychology. (4-4-4) Recommended for students interested in working with clinical populations. Designed for graduate clinical psychology students. A survey of phenomenological, theoretical, and research issues regarding the diagnostic process in clinical psychology and related areas. Topics include neural and cognitive bases of mental disorder, and the relationship between brain, cognition, and behavior. Offered with overviews of the biological, psychological, and social aspects of psychopathology, and introduction to and overview of theories of causality and etiology of mental disorder. (Same as Psychiatry M246.) Lecture, three hours. Requisites: courses 250A, 250B. Memory in clinical psychology. S/U grading.

271G. Clinical Research Laboratory. (2) Corequisites: courses 271A, 271B, 271C. Required of first-year clinical psychology students. Students design and conduct original research projects under supervision of instructor in charge. It is anticipated that many students will complete major projects that form the basis (normally three are allowed). S/U grading.

272A-272G. Advanced Clinical Psychological Methods. (4 each) Each course may be taken independently and may be repeated for credit. S/U grading.

students that covers behavior modification research and practice in clinic, school, institution, and home settings. May be taken independently for credit.

272C. Clinical Interventions for Psychological Problems of Children. (4) Seminar, three hours. Requisite or corequisite: course 401 or 451. May be taken independently for credit.

272D. Family Therapy and Research. (4) Seminar, three hours. Requisite: courses 270A, 270B, 270C. Survey of major schools of family therapy and how each applies to specific clinical cases, with emphasis on depression, bipolar disorder, and schizophrenia. Discussion of areas of research that relate to family theories, modes of assessment, and specific interventions. May be taken independently for credit. Letter grading.

272E. Special Problems. (4) Seminar, three hours. Requisite or corequisite: course 401 or 451. May be taken independently for credit.

272F. Behavior Modification with Adults. (4) Seminar, three hours. Requisite or corequisite: course 401 or 451. Designed for second-year graduate clinical psychology students. Current cognitive behavior modification principles and techniques. Major conceptual issues, specific techniques demonstrated and practiced by students to cover a range of adult problems such as depression, stress and anxiety, anger management, assertion problems. May be taken independently for credit.

272G. Marital Therapies. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Requisites: courses 270A, 270B, 270C, 271A, 271B, 271C. Examination of assessment and treatment approaches for relationship problems in couples. Presentation, discussion, and illustration of procedures derived from social-learning, psychodynamic, and systems theories, with relevant research findings. May be taken independently for credit.

273A-273B-273C. Professional and Ethical Issues in Clinical Psychology. (2-2-2) Lecture, one hour; discussion, one hour. Designed for graduate clinical psychology students. Year-long course sequence covering variety of topics necessary for clinical psychologists in their clinical work, including legal and ethical issues, child abuse, suicide assessment, issues in empirically validated treatments, psychiatric consultation and psychoactive medications, working with diverse client populations, etc. S/U or letter grading.

274. Health Status and Health Behaviors of Racial and Ethnic Groups. (4) Lecture; Social and Health Services M274.) Lecture, two hours; discussion, one hour. Limited to graduate students. Overview of physical and mental health behaviors and status of major racial/ethnic groups in U.S. Where appropriate, discussion of international issues as well. S/U or letter grading.

275. Conceptual and Methodological Issues in Community Intervention. (4) Lecture, three hours. Limited to graduate students. Conceptualization of social problems from macrosocial perspective; discussion of multidimensional explanatory models for select illustrative problems; discussion and critical evaluation of both individual-focused and community-focused interventions with high-risk and impacted populations. S/ U or letter grading.

276. Clinical Approaches to Children with Learning and Developmental Disabilities. (4) Lecture, four hours; discussion, one hour. Designed for Ph.D. students. Theoretical and research issues and problems related to purposes of and practices involved in assessment and correctional approaches for children learning and behavior problems. Practicum experiences to illustrate course content and provide opportunities to improve research and clinical competence. S/U or letter grading.

277. Advanced Clinical Assessment. (4) Lecture, four hours; laboratory, three hours. Designed for graduate clinical psychology students. Projective techniques, case studies, psychometrical test battery, psychopathology, and application of assessment to problems in psychotherapy. S/U or letter grading.

278. Functional Neuroimaging: Techniques and Applications. (3) (Same as Biomedical Engineering M285, Radiology M285, and Psychiatry M285.) Lecture, three hours. In-depth examination of activation imaging, including MRI and electrophysiological methods, data acquisition and analysis, experimental design, and interpretation of functional MRI experiment. S/U or letter grading.

280. Affective Disorders. (2 or 4) (Same as Psychiatry M284.) Seminar, two hours. General topics related to primary affective disorders (depression, mania, depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for 4 units are assigned a more intensive reading list and required to make a presentation or prepare a research paper. S/U or letter grading.

283. Psychopathology. (4) Lecture, three hours. Survey of dominant psychological attributes of particular forms of psychopathology, including analysis of status of various theories concerned with etiology and mediating mechanisms of personality, neurotic, schizophrenic, and affective disturbances. S/U or letter grading.

289A-289B-289C. Current Issues in Clinical Psychology. (1-1-1) Discussion, two hours. Designed for first-year graduate clinical psychology students. Presentation of research and applied topics relevant to clinical psychology. In Progress (289A, 289B) and S/U (289C) grading.

292. Biobehavioral Mechanisms of Stress and Disease. (4) Lecture, two hours; laboratory, three hours. Designed for graduate psychology students. Behavior/physiology interactions of some major bodily systems: nervous, cardiovascular, gastrointestinal, and endocrine systems. Usual and altered states of these systems through these interactions can promote permanent tissue injuries, disease, or improved bodily function, health enhancement. S/U or letter grading.

292B. Psychosocial Contributors to Ethnic Disparities in Health. (4) Seminar, three hours. Limited to graduate students. Role of social class, gender, and other psychosocial factors in accounting for disparities in physical and psychological health in racial/ethnic groups. Attention to variety of specific disorders, with focus on explanatory models and approaches to intervention. S/U or letter grading.

295. Psychology of Diversity. (4) Seminar, three hours. Introduction to research and theory on group diversity and psychology of diversity. Issues include social identity, intergroup relations, development across lifespan and across social and cultural contexts, and group disparities in health and mental health. Letter grading.

296A. Research Topics in Psychology. (1) Formerly numbered 296B.) Research group meeting, one hour. Limited to graduate students. Discussion of current literature, new ideas, methodological issues, and preliminary findings. Research presentations and opportunities for feedback on current and proposed research activity to encourage, support, and facilitate student research expertise. Assigned readings included. S/U grading.

296B. Research Group Seminars: Practicum. (1) Seminar, one hour. Designed for graduate students who are part of research group that meets with under-graduate students. Discussion of research methods and current literature in field or of research of faculty members or students. Concurrently scheduled with course C194D. S/U grading.

297. Issues in Social Development of Minority Children. (4) Seminar, three hours. Limited to graduate students. Critical evaluation and integration of existing research on social psychological development of minority child. Emphasis on socialization of cognitive and personality styles, with goal of empirically clarifying issues raised in this area of developmental study. S/U or letter grading.

298. Special Problems in Psychology. (4) Discussion, three hours. Content depends on interests of particular instructor. May be repeated for credit. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for employment as teaching assistant, associate, or fellow. Letter grading.

401. Fieldwork in Clinical Psychology. (1 to 12) Fieldwork, to be arranged. Requisite: courses 271A, 271B, 271C. Students on practicum assignments are required to register for this course each term (except by consent of clinical program committee). S/U or letter grading.

402. Clinical Research Practicum. (2) Fieldwork, two hours. Faculty and graduate students who share interests discuss current literature, new ideas, methodological issues, and preliminary findings. Meetings in-
clude research presentations and opportunities for feedback on current and proposed research activity to encourage, support, and facilitate student research expertise. Assigned reading included. S/U grading.

403. Special Topics Study Course. (1 to 4) Discussion, one to four hours. Under faculty supervision, group of students meets each week for quarter in self-established group to pursue specific topic of their choice that is not covered in other department courses. S/U grading.

410A-410B-410C. Clinical Teaching and Supervision. (4-4-4) Clinic, four hours. Preparation: completion of Ph.D. comprehensive examinations, advancement to candidacy or preparation for dissertation research actively under way. Study and practice of knowledge, concepts, and theories on teaching and supervision of psychological assessment. Letter grading.

410D. Directed Individual Research and Study in Psychology. (2-2-2) Fieldwork, to be arranged. Designed for graduate students. Determination of what areas of health, illness, treatment, and delivery of treatment can be elucidated by understanding psychological concepts and research; psychological perspective on these problems; how psychological perspective might be enlarged and extended in medical area. Through practical field placement, students apply knowledge acquired in class to research observation and/or clinical work in field. S/U or letter grading.

421. Research in Social Psychology. (2) Discussion, two hours; reading and group work, four to six hours. Forum for faculty and graduate students pursuing research on a common topic to share research ideas, make research presentations, and obtain feedback on study design, procedures, and results to foster collaborative investigations in common research areas. S/U grading.

423. Social Survey Research Practicum. (4) Practicum, two hours; additional hours to be arranged. Methods of survey sampling, conduct and management of computer-assisted telephone interview surveys. S/U or letter grading.

429A-429B. Health Psychology Practicum. (2-2) Fieldwork, to be arranged. Designed for graduate students. Determination of what areas of health, illness, treatment, and delivery of treatment can be elucidated by understanding psychological concepts and research; psychological perspective on these problems; how psychological perspective might be enlarged and extended in medical area. Through practical field placement, students apply knowledge acquired in class to research observation and/or clinical work in field. S/U or letter grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

506. Directed Individual Research and Study in Psychology. (2 to 12) Tutorial, to be arranged. One 596 course is required during second year of graduate study, and one 596 or 599 course is required during each year following completion of qualifying examinations. One 599 course is required during each year following completion of qualifying examinations. S/U grading.

507. Individual Studies. (2 to 12) Tutorial, to be arranged. Designed primarily as preparation for Ph.D. qualifying examinations. May be required by some area committees as requisite for taking examinations. S/U grading.

519. Research for Ph.D. Dissertation. (2 to 12) Tutorial, to be arranged. Preparation: successful completion of qualifying examinations. One 599 course is required during each year following completion of qualifying examinations. S/U grading.

PUBLIC AFFAIRS
Interdisciplinary Minor
Meyer and Renee Luskin School of Public Affairs
UCLA
3357 Public Affairs Building
Box 951656
Los Angeles, CA 90095-1656
(310) 206-8866
http://www.publicaffairs.ucla.edu/content/undergraduate-programs
Fernando M. Torres-Gil, Ph.D., Chair
Faculty Committee
Randall D. Crane, Ph.D. (Urban Planning)
Alfreda P. Iglishi, Ph.D. (Social Welfare)
Mark A.R. Kleinman, Ph.D. (Public Policy)
Jonja J. Leap, Ph.D. (Social Welfare)
William B. Parent, Ph.D., ex officio (Public Affairs)
Fernando M. Torres-Gil, Ph.D. (Public Policy, Social Welfare)
Rick Tuttle, Ph.D. (Public Policy)

Scope and Objectives
The Public Affairs minor teaches undergraduate students the skills of policy analysis and exposes them to many of the local, state, national, and international issues facing today's policy-makers and opinion leaders. Courses explore the public (governmental) and nonprofit sectors and provide a theoretical, conceptual, and practical foundation for students. Particular attention is given to the vexing issues facing urban areas and urban planners, social welfare and social workers, and public policies that affect individuals and groups of people in their public and private lives.

Undergraduate Study
Public Affairs Minor
To enter the Public Affairs minor, students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Required Upper Division Courses (20 units): (1) Three courses from one of the following clusters: (a) gender and multiculturalism cluster — Public Policy 120, Social Welfare 101, M104C, Urban Planning 141, M175; (b) labor and work cluster — Public Policy 141, C144, 145, 148; (c) policy studies cluster — three upper division public policy lecture/seminar courses (191A may be repeated for credit with topic change); (d) social welfare cluster — three upper division social welfare lecture courses (fieldwork and internship courses such as Social Welfare 130A and 130B may not be applied); (e) urban policy and planning cluster — three upper division urban planning lecture courses (129 may be repeated for credit with topic change); or (f) by petition, a cluster of upper division policy courses proposed by the student; (2) one elective course offered by the Luskin School of Public Affairs not used to satisfy the core or cluster requirement; (3) capstone project to be completed during the senior year that may be satisfied by one of the following: (a) Public Policy 187, (b) Political Science M191DC or M194DC, (c) Civic Engagement 105SL, or (d) by petition another upper division applied policy course that requires a substantial term paper. Fieldwork and internship courses, such as Social Welfare 130A, 130B, and Urban Planning M165, may not be applied toward the minor. No more than three of the cluster and elective courses may be from a single department, and no more than two may be from outside the school.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.
Scope and Objectives
The Public Health minor is designed for students who wish to learn more about core public health functions, including the assessment and monitoring of the health of communities and populations at risk to identify health problems and priorities, the formulation of public policies designed to solve identified local and national health problems and priorities, the assurance designed to solve identified local and national health problems and priorities, the assurance that all populations have access to appropriate health problems and priorities, the formulation of public policies designed to solve identified local and national health problems and priorities, the assurance that all populations have access to appropriate health services and cost-effective care, and the evaluation of the effectiveness of that care.

Undergraduate Study
Public Health Minor
To enter the Public Health minor, students must be in good academic standing with an overall grade-point average of 2.0 or better, have completed 30 or more units, and file a petition at the School of Public Health Student Affairs Office, A1-269 Center for the Health Sciences. Enrollment is competitive and based on grade-point average and an application essay.

Required Upper Division Courses (28 units):
Seven courses, including Biostatistics 100A, Community Health Sciences 100, Environmental Health Sciences 100, Epidemiology 100, Health Services 100, Public Health 150 (must be taken during the first term of enrollment in the minor), and one elective course to be selected from Biostatistics 100B, Community Health Sciences 90, 91, 130, 132, M140, 180, 181, Health Services M110, C121, Public Health 53, M106, or M151. Transfer credit for any of the above is subject to school approval.

Each minor course must be taken for a letter grade, and students must have a minimum grade of C (2.0) in each and an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Public Health Schoolwide Programs
School of Public Health
UCLA
A1-269 Center for the Health Sciences
Box 951772
Los Angeles, CA 90095-1772
(310) 825-5524
e-mail: info@ph.ucla.edu
http://www.ph.ucla.edu

Scope and Objectives
The profession of public health is responsible for the protection, preservation, and promotion of the health of communities and populations. Although the health problems of today differ from those of the past and of the future, the professionals who make up the field need to be trained to respond to broad community problems utilizing the basic ideas of prevention of disease and promotion of well-being. This goal can be achieved only with an understanding of the health status of the population through data gathering and analysis, as well as knowledge of the complex relationships between disease process in the social and biological environment of the community.

The field of public health today needs practitioners from many disciplines. Candidates for graduate study may come from a wide variety of academic backgrounds, training, or experience, including both the natural and social sciences.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaalibrary/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The School of Public Health offers two school-wide degrees, Master of Public Health (M.P.H.) and Doctor of Public Health (Dr.P.H.), and M.S. and Ph.D. degrees in Biostatistics, Environmental Health Sciences, Epidemiology, Health Services, and Public Health (offered through the Department of Community Health Sciences). An undergraduate minor in Public Health is also offered.

Two interdepartmental degree programs — the Doctor of Environmental Science and Engineering (D.Env), housed in the Department of Environmental Health Sciences, and the Ph.D. in Molecular Toxicology — are also available.

Upper Division Courses
M106. Health in Chicano/Latino Population. (4) (Same as Chicano and Chicano Studies M106.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Examination of Chicano/Latino health status through life expectancy, causes of death, reportable diseases, services utilization, provider supply, and risk behaviors within demographic/immigration changes. Binational review of health effects in U.S. and Mexico. Letter grading.

M151. Healthcare in Transitional Communities. (4) (Same as Sociology M142.) Lecture, three hours; discussion, one hour. Analysis of social, cultural, economic, and political processes affecting organization and accessibility of healthcare in transitional and disadvantaged communities. Fieldwork required. Letter grading.

M160A. Health Outreach and Education for At-Risk Populations. (4) (Same as Medicine M160A.) Lecture, four hours; possible field observations. First in series of courses to explore prevention of disease in at-risk populations, clinical services and referrals for disadvantaged, and effects of low socioeconomic status on academic achievement, career, and family. Lectures by faculty and practitioners, with field visits. P/NP or letter grading.

M160B. Health Outreach and Education for At-Risk Populations. (4) (Same as Medicine M160B.) Lecture, two hours; discussion, two hours. Requisite: course M160A. Second in series of courses to explore prevention of disease in at-risk populations, clinical services and referrals for disadvantaged, and effects of low socioeconomic status on academic achievement, career, and family. Lectures by faculty and practitioners, discussion groups, and field activities including health education. P/NP or letter grading.

180SA. Current Topics in California Health Policy. (4) Lecture, four hours. Concurrent for UCLA students: Civic Engagement 180SA: for non-UCLA students: one internship course. Limited to junior/senior UC Center Sacramento Program students. Development of systematic understanding of policy analysis to help students develop their own advanced policy analysis of current California-related health policy issues, and analysis of key policy challenges facing health and health care in California’s diverse population. Offered in summer only. Letter grading.

Graduate Courses
299. Strategies for Success for Doctoral Students. (2) Seminar, two hours. Interactive seminar, with focus on research process, tips for success in academia, and important tools for leadership designed for all doctoral students in School of Public Health. S/U grading.

475. Pedagogy: Essential Skills and Innovative Strategies. (2) Seminar, two hours. Designed for School of Public Health doctoral students. Interactive seminar with focus on developing teaching materials for courses and acquisition of skills and tools that help students to become successful and innovative instructors. Active learning methodologies and competencies-based approach to instruction. S/U or letter grading.

Robert Dallek, Ph.D. (Howard Noble Professor of Economics 11, 143. Survey of ways economics is used to define, analyze, and resolve problems of environmental management. Overview of analytical questions addressed by environmental economists that bear on public policies. Concurrently scheduled with course CM250. Letter grading.)
Richard N. Rosecrance, Ph.D.
Neal Halfon, M.D., M.P.H., and Public Policy M.P.P./Social Welfare M.S.W.) are also offered.

Public Policy

Scope and Objectives

The Department of Public Policy is an interdisciplinary unit composed of faculty members from various disciplines, some of whom hold joint appointments in other UCLA departments. Its goal is to foster an understanding of the theory and practice of public policy in the many fields in which it applies. Examples include education, economics, unemployment and training, drug policy and crime, economic development, national security, and the environment. The department offers the Master of Public Policy (M.P.P.) degree and participates in the undergraduate minor in Public Affairs. The M.P.P. degree program is designed to train professionals in both public- and private-sector policy analysis and implementation and provides coursework in such areas as microeconomics, statistics, political processes, and public and nonprofit management.

Concurrent degree programs allow students to combine study for an M.P.P. with work toward a J.D. in the School of Law, an M.B.A. in the John E. Anderson Graduate School of Management, an M.P.H. in the School of Public Health, or an M.S.W. in the Department of Social Welfare.

The undergraduate minor in Public Affairs familiarizes students with key issues of public policy. Both programs have a heavy applied orientation. For further information on the minor, see Public Affairs earlier in this section of the catalog.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqntro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree

The Department of Public Policy offers the Master of Public Policy (M.P.P.) degree. Four concurrent degree programs (Public Policy M.P.P./Law J.D., Public Policy M.P.P./Management M.B.A., Public Policy M.P.P./Public Health M.P.H., and Public Policy M.P.P./Social Welfare M.S.W.) are also offered.

Public Policy

Lower Division Courses

10A. Introduction to Public Policy. (4) Lecture, three hours; outside study, nine hours. An introduction to basic concepts of public policy and to administrative and policy analysis, with an emphasis on the role of the public and private sectors in American society. Letter grading.

10B. California Policy Issues. (4) Lecture, three hours; outside study, nine hours. A study of public policy issues and policies. Letter grading.

10C. Contemporary Politics. (4) Lecture, three hours; outside study, nine hours. An introduction to public policy and to administrative and policy analysis, with an emphasis on the role of the public and private sectors in American society. Letter grading.

Upper Division Courses

C101. Drug Abuse Control Policy. (4) Lecture, three hours; outside study, nine hours. An introduction to drug abuse as social problem and to drug abuse control as policy issue, with examination of both necessity and effectiveness of policies. Letter grading.

102. Imperfect Rationality. (4) Lecture, three hours; outside study, nine hours. An introduction to the role of public policy and to administrative and policy analysis, with an emphasis on the role of the public and private sectors in American society. Letter grading.

C110. Nuclear Weapons: Critical Decisions. (4) (Same as Environment M165, Honors Collegium M119, and Political Science M139B.) Lecture, three hours. Examination of critical decisions regarding nuclear weapons, including defense decisions that arise in public life. Goal is not to imbue students with a given body of factual knowledge or to develop new quantitative or social science methodologies to analyze such questions, but to enhance their critical thinking skills. Letter grading.

C112. Controversies in Education Policy. (4) Lecture, three hours; outside study, nine hours. Focus on several controversial topics in contemporary education. Topics vary each year and include multiculturalism, affirmative action, test score gap, bilingual education, and school choice. Letter grading.

M116. Nuclear Weapons: Critical Decisions. (4) (Same as Environment M165, Honors Collegium M119, and Political Science M139B.) Lecture, three hours. Examination of critical decisions regarding nuclear weapons, including defense decisions that arise in public life. Goal is not to imbue students with a given body of factual knowledge or to develop new quantitative or social science methodologies to analyze such questions, but to enhance their critical thinking skills. Letter grading.

CM117. Crisis Decision Making in U.S. Foreign Policy. (4) (Same as Political Science M121B.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisites: Political Science 120A, 127A, 137B. In-depth look at theory and practice of U.S. foreign policy-making. Assessment of decisions that arise in public life. Goal is not to imbue students with a given body of factual knowledge or to develop new quantitative or social science methodologies to analyze such questions, but to enhance their critical thinking skills. Letter grading.

M118. U.S. Intelligence Agencies in Theory and Practice. (4) (Formerly numbered 118.) (Same as Political Science M120C.) Lecture, three hours; discussion, one hour. Limited to juniors and seniors. Examination of U.S. intelligence agencies from Cold War to present. Particularly in light of 9/11 and Iraq war, few organizations are more important and less understood. Course separates fact from fiction, exposing agencies to public scrutiny. How they operate in practice. Fundamentals of intelligence collection (from satellites to spies) and analytic techniques used by agencies in the practice of intelligence; performance of U.S. intelligence agencies during Cold War; and intelligence community’s ability to ethically and effectively gather intelligence; performance of U.S. intelligence agencies during Cold War; and intelligence community’s ability.
M127. Understanding Public Life Cycle. (4) (Same as Political Science M142D.) Lecture, three or four hours; outside study, nine hours. Recommended preparation: Political Science 10, 40, and one course from Economics 1, 2, 5, 11, 100, or 101. Examination of how public life is shaped by (1) economic factors and behavior of various actors — business, news media, mass public, organized interests, Congress, the president, regulatory agencies, and courts; (2) ideology, cognitive biases, and ethical reasoning. Letter grading.

144. Comparative Industrial Relations. (4) Lecture, three hours; outside study, nine hours. Requisite: course 10A. At national and international levels, historical context, case studies, and how do they relate to specific actions and decisions? How is industrial conflict structured and managed? How do we design labor relations systems in the United States? Discussion of key issues in labor and employment policy. Letter grading.

145. Labor Policies in the U.S.: Historical Perspective. (4) Lecture, three hours; outside study, nine hours. Requisite: course 10A. Insight into evolution of labor policies in the U.S. from 19th century to the present. Emphasis on major historical periods, labor policies, and their impacts. Discussion of major labor and employment laws, policies, and their impacts. Students will learn how to analyze labor policies and their impacts. Letter grading.

146. Democracy, Disobedience, and Dissent. (4) Lecture, three hours; outside study, nine hours. Requisite: Philosophy 6 or Political Science 10. Theories of political and legal obligation and their critics; justified disobedience in response to moral injustice, and social exclusion; moral and religious pluralism as argument for both obedience and dissent. Letter grading.

C147. Critical Policy Issues and Problems in Globalizing World. (4) Lecture, three hours; outside study, nine hours. To enable students to (1) think of world in dynamic terms, (2) be able to map, divide, and assemble world in many different ways, and (3) be able to articulate patterns of flux, change, and movement in world space and history. Consider currently scheduled with course C245. Letter grading.

148. Business and Public Policy. (4) Lecture, three hours; outside study, nine hours. Requisite: course 10A. An examination of economic, political, and social factors that influence public and private sector decision making. Letter grading.

149. California Sustainable Development: Economic Perspective. (4) (Same as Environment M135 and Public Health M196.) Lecture, four hours. Examination of specific environmental challenges that California faces. Microeconomic perspective used, with special emphasis on incentives of polluters to reduce pollution and incentives of local, state, and federal government to address these issues. Focus on measurement and empirical hypothesis testing. P/NP or letter grading.

M186. Equal Rights and Unequal Education. (4) (Same as Education M186 and Political Science M144C.) Lecture, four hours. Exploration of contradictions between American beliefs about equal opportunity and racial equality and inequalities that exist in public education. Three major topics in education: (1) vehicular for-
ble evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

201. Principles of Microeconomic Theory I. (4) Lecture, three hours; outside study, nine hours. First course in two-term sequence (see course 204) to prepare students for economic analysis of public policy, with review of economic principles and basic microeconomic theory and policy applications. Consumer theory and demand, producer theory and supply, equilibrium of product and factor markets. Letter grading.

202. American Political Institutions and Processes. (4) Lecture, three hours; outside study, nine hours. Designed to provide background necessary to develop strategies for dealing effectively with political environments of policy and administration. Discussion of U.S. constitutional arrangements, followed by instrumental analysis of processes and implementation of policy and administration. Discussion of U.S. political, legal, and social institutions to show where the U.S. fits in among varieties of modern capitalism and demand, producer theory and supply, equilibrium of product and factor markets. Letter grading.

203. Statistical Methods of Policy Analysis I. (4) Lecture, three hours; outside study, nine hours. First course in two-term sequence (see course 206). Review of basic statistical procedures useful to policy research and analysis. Topics include descriptive statistics, expectations, univariate distribution, probability, covariance and correlations, statistical independence, random sampling, design, unbiasedness and efficiency, statistical inference, confidence intervals, and hypothesis testing. Letter grading.

204. Principles of Microeconomic Theory II. (4) Lecture, three hours; outside study, nine hours. Requisite: course 201. Second course in two-term sequence (see course 201) covering both theory and policy applications. Topics include monopoly, factor markets, general equilibrium, consumer theory, externalities, public goods, uncertainty, and intertemporal optimization. Letter grading.

205. Bureaucracy and Public Management. (4) Lecture, three hours; outside study, nine hours. Problems posed by behaviors within and by bureaucracies. Conceptual tools for comprehending organization environment in which policy analysts work; tools for understanding role of manager with such organizations. Practical suggestions for policy analyst attempting to navigate waters of bureaucracy. Theoretical analysis integrated with case studies. Letter grading.

206. Political Economy of Policy Adoption and Implementation. (4) Lecture, three hours; outside study, nine hours. Preparatory course that precedes three-term 298A, 298B, 298C sequence in which students prepare major public policy projects and papers that are drawn from examinations, course papers, and implementation and are equivalent to professional master’s theses. Papers build on prior core courses, internship experience, and policy cluster courses. Letter grading.

211. Normative Issues in Policy Analysis. (4) Lecture, three hours; discussion, one hour. Limited to graduate students. Introduction to some basic normative categories of policy analysis and addressing questions of public policy. Normative questions are those that concern whether actions, characters, or states of world are right or wrong — or, in less absolute cases, better or worse than possible alternatives. Allegedly, value-free methods of analysis do not help decide policy questions. Certain policy questions raise normative concerns sooner or more urgently than others: those that go beyond matters of economic efficiency and touch on questions of human dignity, equality, justice, or national or cultural traditions. Some questions that seem to be subject to efficiency analysis raise some standards from those that are concerned with those of efficiency. Discussion of disagreement that exists over what both efficiency is and in what cases or across what dimensions it ought to govern. Letter grading.

M213. Mental Health Policy. (4) Same as Social Welfare M290M.) Lecture, three hours. Examination of evolution of social policy and services for mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of mental illness and services they provide. S/U or letter grading.

M215. Health Policy. (4) Same as Social Welfare M290M.) Lecture, three hours. Introduction to contemporary issues in health care financing and delivery, providing a broad perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

M216. Public Policy for Children and Youth. (4) Same as Social Welfare M290N.) Lecture, three hours. Policy issues that affect children and adolescents in relation to their interaction with schools and community, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

M218. Research Design and Methods for Social Policy. (4) Same as Urban Planning M204.) Lecture, three hours; outside study, nine hours. Limited to graduate students. How to become more sophisticated consumers and producers of qualitative and quantitative policy research. In first half of course, formal principles of research design, half, various data collection methods, including ethnography, interview, and survey design. Letter grading.

M220. Transportation, Land Use, and Urban Form. (4) Same as Urban Planning M252.) Lecture, three hours. Historical evolution of urban form and transportation systems, metropolitan location theory, recent trends in urban form, spatial mismatch hypoth-

M228. Leadership, Development, and Governance of Nonprofit Organizations. (4) (Same as Social Welfare M241E and Urban Planning M289.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. Letter grading.

CM231. Comparative Industrial Relations. (4) (Same as Management M255.) Lecture, three hours; outside study, nine hours. Requisite: Management 409 or elementary knowledge of labor economics. At national and international levels, historical and contem- porary analytical comparison of political, social, and economic contexts influencing human resource sys- tems of selected developed countries. In addition to discussing possible frameworks for analyzing human resource systems, examination of institutions and iden- tities of labor, management, and government, and interaction of interests in contemporary labor market problems. S/U or letter grading.

233. Employment Issues in California. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Drawing on resources of UCLA Business Forecasting Project, introduction to general features of California labor market, analysis of employ- ment fluctuations and forecasting techniques including linkages between employment fluctuations in Califor- nia and elsewhere in the country, and social issues re- lated to labor market. Letter grading.

234. Labor Markets and Social Policy. (4) Lecture, three hours; outside study, nine hours. Examination of analytical tools and conceptual models needed to un- derstand labor markets and people in lower income distribution. Concepts include static and dy- namic labor supply, labor demand, compensating dif- ferentials, human capital, and economic models of im- migration and job creation.

C235. Drug Abuse Control Policy. (4) Lecture, three hours; outside study, nine hours. Introduction to drug abuse as social problem and to drug abuse control as policy issue, with examination of both necessity and difficulty of making and executing wise policies around psychoactive substances. Concurrently scheduled with course C101. Letter grading.

237. Ethical Questions in Public Life. (4) Lecture, three hours; discussion, two hours. Introduction to moral issues that commonly arise in public life. Ethics of political roles, compromise and moral integrity, lying and deception, public service, and in defending stand on issues, power, and violence. Letter grading.

238. Issues in Cultural Policy. (4) Seminar, three hours; outside study, nine hours. Designed for graduate students. Survey of role of policy in shaping forms and modes of performance and cultural activities in con- temporary society. Overview of relevant theories of cul- ture and their ramifications in such phenomena as con- sciousness, ideology, and identity. Empirical examina- tion of what policies have been said and done about promotion of culture in interests of various social goals. Contemporaneous trend of economic and cultural inter- secting to be subject for trend analysis. Examination of globalization and national cultural interests in depth. General debate about logic and meaning of cultural politics in contemporary society and their consequenc- es for trajectories of cultural policy at local, national, and international levels. Letter grading.

C239. Budget Politics, Social Policy, and Entitle- ment Reform. (4) Lecture, three hours; outside study, nine hours. Examination of politics of public budgeting in the U.S., with emphasis on financing of social safety net, with attention given both to process issues and to gaining substantive knowledge about how govern- ment really works and for developing political skills re- quired to influence resource allocation decisions. Con- current enrollment in elective courses 272C, 273, 274, 275, 276. Letter grading.

M240. Theories of Regional Economic Develop- ment I. (4) (Same as Urban Planning M236A.) Lecture, three hours; discussion, one hour. Introduction to theoretical models and concepts of policy process and oth- er forms of contact between regions, process of re- gional growth and decline, reasons for different levels of economic development, relations between more and less developed regions. Letter grading.

M241. Introduction to Regional Planning. (4) (Same as Urban Planning M230.) Lecture, three hours. Critical and historical survey of evolution of re- gional planning theory and practice, with particular em- phasis on its development in California. Regional planning and de- velopments within Western social and political philo- sophy. Major concepts include regions and regionalism, territorial community, and social production of space. Letter grading.

242. Regional Development, Urbanization, and In- dustrial Policy. (4) Lecture, three hours; outside study, nine hours. Survey of regional development, with special reference to "new economic geography" and its relevance for formulation of local economic de- velopment policies. Letter grading.

M243. Community Development and Housing Poli- cies: Roles of State, Civil Society, and Nonprofits. (4) (Same as Social Welfare M210U and Urban Plan- ning M275.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of role of government agencies and community organizations. Is problem housing or economic development? Should interven- tions be directed toward inner city housing markets or through neighborhood strategies? What lessons can be learned from experiences of other countries? Letter grading.

M244. Transportation Planning, (4) (Same as Ur- ban Planning M255.) Lecture, three hours. Examina- tion of how plans work, and operate transportation systems. Measuring system perform- ance, intelligent transportation systems, transporta- tion system demand management, parking manage- ment, right-of-way acquisition, transit policy, traffic eval- uation and management, paratransit, bicycle and pedestrian planning, transportation for elderly and dis- abled. Letter grading.

C245. Critical Policy Issues and Problems in Glo- balizing World. (4) Lecture, three hours; outside study, nine hours. To enable students to (1) think of world in dynamic terms, (2) be able to map, divide, and assemble world in many different ways, and (3) be able to articulate patterns of flux, change, and movement in world space and history. Concurrently scheduled with course C147. Letter grading.

M246. Electoral Democracy: Theory and Behavior. (4) (Same as Political Science M268B.) Seminar, three hours. Examination of both empirical and normative questions from rich variety of perspectives for scholars in all subfields of political science. Emphasis on stud- ents and others interested in these issues. Considera- tion of topics fundamental to both democratic theory and study of American politics public opinion; nature and purpose of elections; representation; parties; and purpose of democracy as whole through both classic- political theory treatments and modern research in American political behavior. Letter grading.

M247. Strategic Planning for Public and Nongovernmental Organizations. (4) (Same as Social Welfare M21F and Urban Planning M290.) Lecture, three hours; out- side study, nine hours. Designed for graduate stu- dents in the field, technical and professional skills regard- ing substantive social welfare problems at community level. This form of community practice fills niche be- tween professional and knowledge and skill set pos- sessed by agency and program administrators on one hand and by policy analysts and policymakers on oth- er. Letter grading.

M248. Toleration, Pluralism, and Diversity. (4) (Same as Political Science M216.) Seminar, three hours. Prior experience in political or legal theory help- ful. Critical examination of both abstract and historical and contemporary disputes. S/U or letter grading.

CM250. Environmental and Resource Economics and Policy. (4) (Same as Urban Planning M287.) Lecture, three hours; outside study, nine hours. Letter grading.

251. Public Budgeting and Finance. (4) Lecture, three hours; outside study, nine hours. Limited to gradu- ate students. How financial resources are allocated through budget processes at federal, state, and local levels of government in the U.S. and how each level of government finances its operations and capital invest- ments. Concurrently scheduled with course C215. Students are organized into small groups to facilitate review of assigned readings and to report key informa- tion. Budgeting process. Analysis and explora- tion of budget strategy matrix outlining best practices budget strategies to use in various resources availabil- ity contexts. Letter grading.

M250. Foundations of Social Welfare Policy. (4) (Formerly numbered M221A and Urban Planning M241.) Lecture, two hours; discussion, one hour; outside study, nine hours. Nature, roles, and history of welfare institutions in dif- ferent cultures; application of different components of welfare system theory and research about welfare policies and organizational forms. S/U or letter grading.

M251. Social Policy: Family and Elderly Families. (For- merly numbered M211.) (Same as Social Welfare M290P) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of theoretical models and concepts of policy process and application to aging policy. Analysis of decision-making processes that affect social policies. Description of his- torical development of contemporary policy. Explora- tion of current proposals and issues. Letter grading.

M256. Advanced Topics in Health Economics. (4) (Same as Social Services M249E.) Seminar, four hours. Requisites: Health Services 200A, 200B, M236. Advanced topics in health economics including topics in health eco- nomics including medical health economics, pharma- ceutical economics, and relationships between labor supply, welfare, and health. Letter grading.

M257. Medicare Reform. (4) (Same as Health Servic- es M252.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Analytical and managerial skills learned earlier to be used to analyze problems with existing Medicare program and to develop specific options for reforming features of program to accommodate coming pressures generated by retire- ment of baby-boom generation. Letter grading.

M268. Microeconomic Theory of Health Sector. (4) (Same as Health Services M266.) Lecture, four hours; discussion, two hours. Preparation: intermediate microeconomics. Requisite: Biostatistics 100A. Micro- economic aspects of healthcare system, including health insurance, substitution, choice of efficient modes of treatment, market efficiency, and competi- tion. Letter grading.

M269. Healthcare Policy and Finance. (4) (Same as Health Services M269.) Seminar, three hours; outside study, nine hours. Exploration of role of insur- ance, policies for public insurance (Medicaid and Medicare), uninsured, and health insurance reform. Examination of effects of managed care on health care delivery. Letter grading.

271. Urban Poverty, Workforce Development, and Public Policy. (4) Lecture, three hours; outside study, nine hours. Limited to graduate students. Examination of how urban labor markets function, particularly low-
and hones student analytic skills to examine these draft analytic options memos and deliver oral presentations. Examination of contemporary U.S. national security challenges and how policymakers develop approaches to address them. Exploration of Cold War practice of U.S. foreign policy-making. Assessment of U.S. foreign policymakers and final crisis simulation exercise. Concurrently scheduled with course CM117. Letter grading.

274. U.S. National Security Policy. (4) Lecture, three hours; outside study, nine hours. Required to graduate students. Examination of contemporary U.S. national security challenges and how policymakers develop strategies to address them. Exploration of Cold War legacy, development of American national security strategic doctrine, and U.S. foreign policy process from 1945 to present. Examination of broad spectrum of issues confronting today's foreign policy leaders, from threats to vital U.S. interests (WMD proliferation and counter-terrorism, regional security and economic challenges (Iraq, China), to humanitarian intervention and nation-building (Darfur, Afghanistan). Students draft analytic options memos and deliver oral presentations. Weekly role plays of foreign policymakers. Letter grading.

280A. Research and Development Policy. (4) (Same as Management M292A.) Lecture, three hours. Examination of research and development as process and analysis of goal-oriented organization. Factors affecting innovation and invention; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing and forecasting technological futures. S/U or letter grading.

280B. Growth, Science, and Technology. (4) (Same as Management M292B.) Lecture, three hours. Economic growth and change. Role of advances in science and technology, and actions of maximizing innovators and factors impinging on their behavior. How technological breakthroughs (or discontinuities) can form new industries or transform existing industries. How social trends shape major changes in existing firms in industries. S/U or letter grading.

289A-M289B. Immigration, Racial Change, and Education in 21st-Century Metropolis. (4-4) (Same as Education M289A-M289B, Political Science M287A-M287B, Sociology M280A-M280B.) Seminar, four hours. Examination of metropolitan American society and institutions at beginning of 21st century. Consideration of best available information on patterns of settlement, changing functions of urban space and institutions, and issues of opportunity linked to urban structure in society facing unprecedented demographic change that will end primarily European domination of our society by mid-century, creating democracy with no racial or ethnic majority. How this demographic transition and postindustrial transformation of urban functions and processes are transforming major social structures and major parts of professions. Vast economic transformations, brought about by globalization of workplace and dramatic decline of industrial employment in advanced nations, not only greatly raise stakes on creating equal opportunity but also cut off what were previously extremely important parts of intergenerational mobility. In Progress (M289A) and letter (M289B) grading.

290. Current Events in Public Policy. (4) Discussion, three hours. Advanced seminar on emerging issues in public policy. May be repeated for credit. Letter grading.

293. Privatization, Regulation, and Public Finance. (Same as Urban Planning M243.) Lecture, three hours; outside study, nine hours. Requisite: course 201. Evaluation of economic and political determinants of trend toward privatizing public services, and equity and efficiency outcomes of this trend as expressed through new pricing, financing, and service-level policies. Exploration of new regulatory role this trend implies for state and local governments. Letter grading.

294. Education Markets and Education Policy. (4) Lecture, three hours. Designed for graduate students. Provides set of tools that can be used to analyze pressing policy questions in field of education and some substantive background in policy issues of the day. Letter grading.

297A. Marschak Colloquium: Policy Implications in Behavioral Sciences. (2) Seminar, two hours. Required to graduate students. Students attend biweekly Marschak Colloquium presentations given by leading social science experts. Analysis and discussion of research topics and research models in behavioral sciences in this highly regarded and long-standing interdisciplinary lecture series that meets separately from colloquium presentations. Letter grading.

297B. Introduction to Public Policy. (2) Lecture, three hours; discussion, one hour. Designed for graduate students. Introduction to purposes and methods of public policy analysis. Exposure to key concepts and tools, such as market failures, decision analysis, cost benefit analysis, group behavior, and implementation. Case studies supplement lectures and texts. S/U grading.

297C. Public Policy Analysis Lectures. (2) Activity, two hours. Required to M.P.P. students. Venue for policy-makers, practitioners, and academics to present, discuss, and analyze current policy questions. Attending, formally analyzing, and commenting on policy presentations at these extra-curricular programs adds to pedagogical and intellectual maturity of students as they gain greater understanding of complexity of public policy issues by hearing wide variety of voices. S/U grading.

298A. Applied Policy Project I. (2) Seminar, 90 minutes; outside study, four and one half hours. Requisite: course 210. Limited to M.P.P. students. First course of year-long project designed to ensure that students and their teams are fully prepared to launch their projects at start of Winter Quarter. Students form teams that are assigned to seminars and instructors, identify clients, select and refine policy questions most relevant to their projects, develop and refine basic work plans, learn about various methods of data collection, and complete three drafts to support policy recommendations required for human subjects research. S/U grading.

298B. Applied Policy Project II. (6) Seminar, three hours; outside study, 15 hours. Preparation: completion of M.P.P. core curriculum, two policy cluster courses, and internship (unless waived). Requisite: course 298A. Second course in three-semester in which students prepare major public policy projects and papers that are case studies of policy evaluation and implementation and are equivalent to professional masters theses. Papers build on prior core courses, internship experience, and policy cluster courses. Letter grading.

298C. Applied Policy Project III. (2) Seminar, two hours. Preparation: completion of M.P.P. core curriculum, two policy cluster courses, and internship (unless waived). Requisite: course 298B. Third course in three-semester in which students complete research and report writing for their year-long projects, conduct oral presentations of their applied policy projects, and given written feedback on other student presentations. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

596. Directed Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual program for selected students to permit pursuit of a subject in greater depth. S/U or letter grading.

Radiation Oncology

David Geffen School of Medicine

UCLA
B265 UCLA Medical Plaza 200
Box 956951
Los Angeles, CA 90095-6951
(310) 825-9771
fax: (310) 794-1984

Chairs
Michael L. Steinberg, M.D., Chair
William H. McBride, D.Sc., Vice Chair, Division of Molecular and Cellular Oncology
Patrick A. Kupelian, M.D., Vice Chair, Clinical Operations and Clinical Research
Daniel A. Low, Ph.D., Vice Chair, Division of Medical Physics

Scope and Objectives

The Department of Radiation Oncology includes clinical divisions at the UCLA Medical Plaza and Reagan UCLA Medical Center, West Los Angeles VA Medical Center, Providence Holy Cross Medical Center in Santa Clarita and Mission Hills, and Children's Hospital of Los Angeles and includes the Divisions of Brachytherapy, Clinical and Molecular Oncology, and Medical Radiation Physics. Laboratory, clinical, and translational research are facilitated at all locations.

The primary clinical mission of the department is the management of patients who have cancer. The purpose of using radiation therapy, rather than or in addition to surgery, is to preserve function and/or cosmesis while eliminating the cancer. Other activities involve total body irradiation before bone marrow transplant-

Mary Nooter Roberts, Ph.D. (World Arts and Cultures/Dance)
Ronald W. Vroon, Ph.D. (Slavic Languages and Literatures)

Scope and Objectives
The medical student program in radiological sciences is designed to introduce students to the spectrum of diagnostic imaging modalities and their role in the clinical management of patients. It provides knowledge of essential radiographic anatomy and key imaging features of common diseases. The basic principles of all forms of diagnostic imaging pertaining to thoracic, musculoskeletal, gastrointestinal, genitourinary, cardiac, neuroradiology, mammography, pediatrics, emergency radiology, computed tomography, magnetic resonance imaging, ultrasound, and interventional radiology are provided. Students acquire interpretative skills by didactic instruction and interactive teaching sessions and through the use of Web-based teaching materials. A longitudinal clerkship is offered during the third year, with a comprehensive examination.

Greater depth of experience is provided by the three weeks of elective clerkship offered to fourth-year medical students that emphasizes training in general diagnostic radiology, angiography/interventional radiology, neuroradiology, and pediatric radiology.

For further details on the Department of Radiological Sciences, see http://www.radiology.ucla.edu.

Scope and Objectives
The undergraduate major in the Study of Religion equips students to understand and compare creatively the worldwide varieties of core convictions, stories, texts, rituals, and practices known collectively as religion. Students complete courses in a wide range of departments in which religious phenomena are analyzed, including Anthropology, Art History, Asian Languages and Cultures, Classics, Comparative Literature, English, History, Near Eastern Languages and Cultures, Philosophy, Political Science, and World Arts and Cultures/Dance. Students can anticipate gaining versatile intellectual tools for approaching, analyzing, and appreciating the deep roots, human motivations, and history of the formation of religious traditions in their respective cultural contexts. Within this interdepartmental program, students may focus in depth on one or more specific religions. Students may wish to select this major in combination with a second major field, a minor, or related language study.

Undergraduate Study

Study of Religion B.A.

Preparation for the Major
Required: History 4; Philosophy 2; two courses from Anthropology 9, Asian 60, History 1A, 1B, 1C, 9A, 9C, 9D, M10A, 10B, 11A, 11B.

Transfer Students
Transfer applicants to the Study of Religion major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one history of religions course, one philosophy of religion course, and two courses from sociocultural anthropology, Buddhism, history of Western civilization, Asian civilizations, civilizations of Africa, and history of China.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: A minimum of 14 upper division courses from the list below, of which at least four (including Study of Religion 191 and Philosophy 175) must be from Group I, at least two must be from each of Groups II and IV, and at least three must be from Group III (at least one on each of the three religious traditions listed). No more than five of the 14 may be from any one group. A course may be taken twice, on different topics, for credit toward the major where repetition is allowed by the department offering the course. Variable topics courses not listed below (e.g., History 191) may be approved by the adviser as satisfying requirements for which their content is appropriate. A maximum of two upper division courses, not listed below, in an ancient language relevant to the course of study may be applied toward the major requirements (but not the group requirements) with consent of the adviser.

Special studies courses (197 and 199) may be applied toward the major but not toward a group requirement; a maximum of 12 units, approved by the adviser, may be applied. No course for the major or preparation for the major may be taken on a P/NP grading basis.

Approved courses (courses marked with an asterisk have readings in foreign languages; see departmental course listings for requisites): Group I — Methods: Anthropology 130, 156, History 186C, Philosophy 175, Study of Religion 110, 120, 191, Theater 101A

Honors Program
The honors program provides exceptional students with an opportunity to do independent research under the tutorial guidance of a faculty member. Students admitted to honors should take three upper division courses under the guidance of the sponsoring professor. The first 199 course should be taken in Spring Quarter of the junior year, the second during the following Fall Quarter, and the third during Winter Quarter of the senior year. The three courses count as part of the regular requirement of 14 upper division courses. The program culminates in an honors thesis.
110. Religion and Violence. (4) Seminar, three hours; discussion, one hour. Exploration of capacity of religious thought and practice and its relation to other areas of theoretical knowledge, faith, and doubt, nature and function of religious language, relationship between science and religion, religious belief and standards of rational discourse, theoretical approaches to problems of religious diversity and competing truth claims, formation of religious and secular in modernity. P/NP or letter grading.

191. Variable Topics Research Seminars: Study of Religion. (4) Formerly numbered 100. Seminar, four hours. Preparation: completion of preparation for majors and at least half of upper division courses required for major (including theory and method courses). Designed for senior majors. Seminar on central methodological issues in study of religion. Refinement and integration of this knowledge by means of close reading and analysis of primary documents, debating contested issues, and researching and writing original paper. P/NP or letter grading.

199. Directed Research in Study of Religion. (2 to 4) Tutorial, one hour. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating paper or project required. Twelve units may be applied toward major. Individual contract required. Letter grading.

ROTC Program – Aerospace Studies

College of Letters and Science

UCLA 218 Student Activities Center
Box 951611
Los Angeles, CA 90095-1611
(310) 825-1742
fax: (310) 825-3055
e-mail: afrotc@ucla.edu
http://www.afrotc.ucla.edu

William E. Peris, M.S., M.O.A., Lieutenant Colonel, Chair

Professor
William E. Peris, M.S., M.O.A., Lieutenant Colonel

Adjunct Assistant Professors
Jared A. Grady, M.B.A., Captain
Devlin L. Hart, B.S., First Lieutenant

Scope and Objectives

In accordance with the National Defense Act of 1920 and with the concurrence of The Regents of the University, a unit of the Army Senior Division Reserve Officers’ Training Corps (ROTC) was established on the Los Angeles campus of the University in July 1920. Navy and Air Force units were established in 1938 and 1949 respectively.

This voluntary training allows students to qualify for an officer’s commission in the Army, Navy/US Marine Corps, or Air Force while completing their college education. The ROTC curricula are not considered academic majors, but ROTC courses may be taken as free electives and applied toward the total course requirements of a major. The ROTC program is also available through UCLA Extension.

All three ROTC departments offer voluntary four- and three-year programs for freshmen and sophomores. The Army and Navy/US Marine Corps also offer a two-year program for current and transfer students. All have leadership laboratories that teach leadership and management skills.

All commissions are reserve commissions. Active duty obligation following commissioning varies depending on branch of service and designated career field or occupational specialty.

Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents’ income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance between $300 and $500 per month during the academic year. Applications for scholarships may be obtained at http://www.afrotc.com or by calling (310) 825-1742. Completed applications should be submitted prior to August 15 for early consideration and no later than December 1 of the year preceding college matriculation. Two-year scholarship applications may be obtained from the UCLA Aeronautics Studies Department and are considered when received.

Air Force ROTC Program

Air Force ROTC provides selected students the opportunity to develop those attributes essential to positions of high responsibility as commissioned officers in the U.S. Air Force. This includes understanding Air Force history, doctrine, operating principles, and national security policies, demonstrating the ability to apply modern principles of management and human relations in the Air Force environment, and mastering of leadership theory and techniques. Students must demonstrate dedication to their assignments, willingness to accept responsibility, and the ability to think critically and communicate with clarity and precision.

Undergraduate Study

The Air Force ROTC program is available to full-time students with at least three years of undergraduate and/or graduate study remaining and consists of one to two years of the General Military Course, or GMC (Aerospace Studies 1A, 1B, 1C, 20A, 20B, and 20C), followed by a two-year Professional Officer Course, or POC (Aerospace Studies 130A, 130B, 130C, 140A, 140B, and 140C). For students completing the program in four years, GMC participation requires one hour of academic class and two hours of leadership laboratory each week during the academic year. For students completing the program in three years, GMC participation requires taking one course from Aerospace Studies 1A, 1B, or 1C, one course from 20A, 20B, or 20C, and two hours of leadership laboratory each week during the academic year. Students incur no military obligation for GMC participation unless they qualify and accept an Air Force ROTC Scholarship during or after their sophomore year.

Students who complete the GMC and wish to enter the POC attend a four-week field training course the summer following GMC completion. There is no obligation to apply. U.S. citizenship is required. Students are selected on a competitive basis with consideration given to academic major, grade-point average, aptitude examination scores, performance during an officer board interview, and a physical fitness test. Students selected for summer field training are provided meals, quarters, clothing, and travel and incidental expenses. Subjects covered at field training include junior officer training, aircraft and aircrew orientation, career orientation, sur-
vival training, base functions, Air Force environment, and physical training. POC participation requires three hours of academic class and two hours of leadership laboratory each week during the academic year. Students enrolled in the POC incur a military obligation and are paid from $450 to $500 per month during the academic year. Graduation and successful completion of the POC leads to a commission as a second lieutenant. Cadets then report to one of the challenging assignments in the Air Force.

Aerospace Studies

Lower Division Courses

Freshman-Year Courses

Z. Leadership Laboratory. (No credit) Laboratory, three hours. Mandatory for and limited to Air Force ROTC cadets. Provides cadets with practical command and staff leadership experiences through performance of various tasks within framework of organized cadet corps. As integral part of aerospace studies curriculum, provides experiences designed to develop leadership potential and serves as orientation to active duty. No grading.

1A-1B-1C. Foundation of U.S. Air Force. (2-2-2) Lecture, one hour. Survey course designed to introduce students to U.S. Air Force and Air Force Reserve Officers’ Training Corps. Topics include mission and organization of Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and introduction to communication skills. P/NP or letter grading.

Sophomore-Year Courses

20A-20B-20C. Evolution of U.S. Air Force and Space Power. (2-2-2) Lecture, one hour. Historical survey of air and space power designed to motivate students to transition from Air Force ROTC cadet to officer candidate. Featured topics include Air Force heritage and leaders; introduction to air and space power through examination of competencies, functions, and doctrines; and continued application of communication skills. P/NP or letter grading.

Upper Division Courses

130A-130B-130C. Air Force Leadership Studies. (4-4-4) Lecture, three hours. Requisites: courses 1A, 1B, 1C, 2A, 2B, 2C. Study of leadership and quality management fundamentals, professional knowledge, Air Force doctrine, leadership ethics, and communication skills required of Air Force junior officers. Use of case studies to examine Air Force leadership and management situations as means of demonstrating and exercising practical application of concepts being studied. P/NP or letter grading.

140A-140B-140C. National Security Affairs/Preparation for Active Duty. (4-4-4) Lecture, three hours. Requisites: courses 1A, 1B, 1C, 2A, 2B, 2C. Study of national security processes, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics focus on military as profession, officership and professionalism. Academic program provides experience in branch of service and designated career field. Presentations are made by professionals in field. P/NP or letter grading.

197. Individual Studies in Aerospace Studies. (2 or 4) Tutorial, three hours. Limited to juniors/seniors. Individual intensive study with scheduled meetings to be arranged between faculty member and student. At least three hours of reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Professor

Shawn A. Phelps, M.A., Lieutenant Colonel

Adjunct Assistant Professors

Christopher Barra, Lieutenant Colonel
Christopher M. Dittami, B.S., Captain
Karense D. Foxx, Captain
Simon Y. Kim, B.S., Captain
Brian M. McDermott, B.S., Captain
Sidney S. Mendoza, First Lieutenant
William N. Ritch, B.S., Major

Scope and Objectives

In accordance with the National Defense Act of 1920 and with the concurrence of The Regents of the University, a unit of the Army Senior Division Reserve Officers’ Training Corps (ROTC) was established on the Los Angeles campus of the University in July 1920. Navy and Air Force units were established in 1938 and 1949 respectively.

This voluntary training allows students to qualify for an officer’s commission in the Army, Navy/Marine Corps while completing their college education. The ROTC curricula are not considered academic majors, but ROTC courses may be taken as free electives and applied toward the total course requirements of a major. The ROTC program is also available through UCLA Extension.

All three ROTC departments offer voluntary four- and three-year programs for freshmen and sophomores. The Army and Navy/Marine Corps also offer a two-year program for current and transfer students. All have leadership laboratories that teach leadership and management skills.

All commissions are reserve commissions. Active duty obligation following commissioning varies depending on branch of service and designated career field or occupational specialty. The Army offers both active- and reserve-duty opportunities directly after commissioning.

Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents’ income. Scholarships provide full tuition or housing (on or off campus) up to $10,000, a $1,200 allowance for books and fees, and a tax-free monetary allowance between $300 and $500 per month during the academic year. Applications for four-year scholarships may be obtained at http://www.armyrotc.com, by calling (310) 825-7381, or by e-mail to armymrotc@milsic.ucla.edu. Completed four-year applications should be submitted by December 31 of the year preceding college matriculation. Two- and three-year scholarship applications may be obtained from the UCLA Military Science Department and are considered when received.

Army ROTC Program

Army ROTC is a program that enables students to become officers in the U.S. Army, Army Reserve, or Army National Guard while earning a college degree. The curriculum supplements students’ academic majors by offering elective courses ranging from leadership and management to military law. Courses are augmented with leadership laboratories that stress practical skills such as first aid, land navigation, survival techniques, rappelling, military tactics, and scenario-driven leadership reaction courses. Non-ROTC students may enroll in many of the military science courses without enrolling in the ROTC program.

Additionally, students who decide to become Army officers can receive summer training in military parachuting (Airborne School at Fort Benning, GA), helicopter operations that include rappelling from a hovering helicopter (Air Assault School in Hawaii), and mountaineering operations (Northern Warfare School in Alaska).

Scholarships are available for two, three, and four years of academic study and are awarded on a competitive basis. Army Scholarships pay for full tuition and mandatory fees or housing, up to $10,000, and provide a tiered stipend ranging from $3,000 to $5,000 per year and a $1,200 book allowance. Nonscholarship, contracted ROTC cadets also receive the tiered stipend of $3,000 to $5,000 per year. Students in the program also compete for over $35,000 in merit-based scholarships provided annually by various private organizations that support the Army ROTC program. Additionally, students may work part-time as officer trainees in local Army Reserves or National Guard units through the simultaneous membership program (SMP). Contracted students can fly free on military aircraft within the continental U.S. on a space-available basis.

Students may select a branch of the Army in which to be commissioned from 16 specialty fields, including military intelligence, aviation, signal communications, finance, logistics, nursing, and engineering. Prior to completion of the ROTC program, students may request to go on active duty or serve part-time in the Army Reserves or National Guard.

Undergraduate Study

Students aspiring to become Army officers follow prescribed course sequences with the Military Science Department and a physical fitness program. Generally, the courses consist of one 2- to 4-unit course per term and physical fitness
sessions one to three times per week, depending on the participation-level requirements. The military science curriculum is divided into two parts: (1) The Basic Course, two years of lower division study during which students must complete six military science courses and (2) the Advanced Course, two years of upper division study consisting of six military science courses, one military history course, and a five-week summer camp.

Army ROTC students must satisfy the military history requirement by completing Military Science 110 or another history course approved by the chair.

Transfer students and others who were unable to enter the Basic Course can receive equivalent credit in several different ways (see Two-Year Program below).

Admission to the Advanced Course is limited to selected students who meet all academic and physical requirements. Students in this course receive a subsistence allowance between $450 and $500 a month for 10 months during each of the two academic years, plus military science uniforms. After completion of the Advanced Course and graduation, students have the opportunity to be commissioned as second lieutenants in one of the Army’s 16 specialty areas in either the Army National Guard, Reserves, or Active Army. Students’ preferences are a major factor in determining which specialty is awarded.

Students selected for Advanced ROTC must attend a five-week leadership development and assessment course between their Military Science III and IV years. Cadets receive an allowance for travel expenses and are paid for attendance.

The active duty obligation for those students selected to enter the Reserve’s or National Guard is for initial training, and only for a period of several months. The active duty obligation for those students commissioned into the Active Army is for three years. Students who accept ROTC scholarships and enter the Active Army serve one additional year. ROTC students wishing to obtain certain advanced degrees may be granted a delay in reporting to their initial assignment.

Four-Year Program

Students are enrolled in the Basic Course (freshman and sophomore years) on a voluntary basis. After completion of the Basic Course and before entrance into the Advanced Course (junior and senior years), students are required to execute a contract with the Department of the Army agreeing to complete the Advanced Course and accept a commission if offered.

Two-Year Program

The two-year program is designed for students who receive placement credit for two years of ROTC and directly enter the Advanced Course. Placement credit may be given for completing three years of high school Junior ROTC, attending a paid ROTC Leaders’ Training Course, membership in the Army Reserves or National Guard, completing two years of college-level Air Force or Navy ROTC, or previous active duty military service. The Army also allows enrollment in the two-year program while students attend graduate school.

Commissioning

Successful completion of the Advanced Course program and a bachelor’s degree may lead to a commission as a second lieutenant in the Army Reserves, National Guard, or Active Army.

Military Science

Lower Division Courses

2. Leadership Laboratory, (No credit) Laboratory, three hours (lower division cadets) or four hours (upper division cadets). All cadets must be concurrently enrolled in a military science course; upper division cadets must also be under a contracted obligation with department. Designed to allow cadets to apply leadership techniques and military skills taught in classroom and to develop their confidence as future military officers. No grading.

11. Foundations of Officership, (2) Lecture, one hour. Introduction to issues and competencies that are central to commissioned officer’s responsibilities. Framework for understanding leadership, military, and professional ethics, and life skills such as physical fitness, nutrition, and time management. P/NP or letter grading.

12. Basic Military Leadership, (2) Lecture, one hour. Requisite: course 11. Introduction to fundamentals of leadership, Army leadership values, ethics, and counseling techniques. Foundation of basic leadership fundamentals central to commissioned officer’s responsibilities established. P/NP or letter grading.

14. Principles of Land Navigation Applicable in Maneuver, (2) Lecture, one hour; discussion, one hour. Introduction to topographic maps and aerial photographs and their relation to land navigation; conceptual linkage to basic military tactics. Topics include map coordination systems, scale and distance relationships, intersection and resection, photo interpretation, squad and platoon operations, and resource planning techniques. Introduction to new technologies, including Global Positioning Systems (GPS).

18. Modern Guerrilla Warfare, (2) Lecture, one hour; discussion, one hour. Limited to undergraduate students. Introduction to low intensity conflict and guerrilla strategies; explanation/discussion of political, economic, religious, and social factors contributing to civil unrest and/or insurgencies. Topics include nonmilitary responses, military tactics, interrelationship of military and government, psychological warfare, and civic actions.

21. Individual Leadership Development, (3) Lecture, two hours. Introduction to various individual leadership personality types, in combined lecture, discussion, and experiential learning, to assist students in development of their own individual leadership style. Additional emphasis on military factors and principles of leadership, goal setting, basic communication, and consideration of others. P/NP or letter grading.

22. Leadership Development and Military Planning, (3) Lecture, two hours. Requisite: course 21. Discussion of various methods of communication, planning, and decision making, through combined lecture, discussion, and experiential learning, with focus on written communication and group communication essential for leadership development. Introduction to and application of military planning process in developing operations orders. P/NP or letter grading.

23. Subordinate Development and Army Organization, (3) Lecture, two hours. Requisite: course 22. Discussion/application of team-building techniques and subordinate development, through combined lecture, discussion, and experiential learning, with additional focus on commissioned officer, branches, and Army organization. Application of counseling techniques, motivation, and consideration of ethics and values for modern leaders. P/NP or letter grading.

24. Theory of Warfare, (2) Inquiry into theory, nature, causes, and elements of warfare, with attention also to evolution of weapons and warfare.

Upper Division Courses

110. U.S. Military History, (3) Lecture, three hours; discussion, one hour. Survey of American military history from 1680 to the present. Causes of war, strategy, tactics, as well as technology and ethics, set against economic, political, and diplomatic concerns. Impact of warfare on society.

131. Tactical Planning and Analysis, (4) Lecture, three hours; laboratory, four hours. Examination of operational planning and decision making. Crossroads, analysis, and written and oral presentation. Emphasis on problem solving, methodology students can use in their daily lives. Experienced exercises in goal setting and military writing style. Broad overview of life in Army. P/NP or letter grading.

132. Army Officership and Communication, (4) Lecture, three hours; laboratory, four hours. Examination of role communications, values, and ethics, play in effective leadership, including ethical decision making, consideration of others, transactional and transformational leadership, and survey of Army leadership doctrine. Emphasis on improving oral and written communication abilities and leadership development and assessment. P/NP or letter grading.

141. Leadership and Management, (4) Lecture, three hours; laboratory, four hours. Interactive course to develop student proficiency in planning and executing complex training operations. Counseling techniques and development of skills needed to lead various organizations. Exploration of training management, leadership skills, and development counseling techniques. P/NP or letter grading.

142. Leadership, Ethics, and Military Law, (4) Lecture, three hours; laboratory, four hours. Interactive course to enhance student understanding of organizational culture, leadership, ethics. Understanding and enhancement of leader-member relations, assessment of organizational culture and ethical climate, and how to effect change in organizations. Exploration of foundations of military law and law of war. P/NP or letter grading.

143. Officership: Professional Military Leadership, (4) Lecture, three hours; laboratory, four hours. Capstone interactive leadership course to prepare students for challenges of being commissioned officers in U.S. Army by discussing various leadership challenges and case studies. Study of military units, with specific emphasis on joint operations involving Army, Navy, Air Force, and Marine Corps assets, military operations other than war, and global war on terror. Other topics include personnel administration, management and planning, and financial planning. P/NP or letter grading.

197. Individual Studies in Military Science, (2 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.
The Department of Naval Science provides professional training for students leading to a reserve commission at graduation in the U.S. Navy or Marine Corps. Through the Naval Reserve Officers’ Training Corps (NROTC), scholarship students receive full tuition, fees, books, and subsistence pay of $250 to $400 per month. Non-scholarship students may apply to participate as members of the midshipman battalion under the NROTC College Program and, like NROTC Scholarship students, they also receive a reserve commission at graduation. Because of the rapid development of highly technical ships systems, aviation, and other military equipment, science and engineering majors are highly desirable; however, Navy/Marine Corps Scholarships are currently available to students pursuing any major offered by the University, as long as they agree to complete basic technical requirements. In addition to University requirements, Navy option midshipmen must complete 26 units and Marine option midshipmen 18 units of naval science courses, physical fitness test, and summer training cruises, each about four to six weeks long. Both Navy and Marine Corps option students must also pass a swimming test. The department also conducts a sail training program for all Navy midshipmen. All naval science courses are open to students who are not in the program but have an interest in the Navy/Marine Corps and related fields, such as engineering, navigation and naval operations, history, and management.

Undergraduate Study
Scholarship Program
The majority of naval science students attend the University on Navy/Marine Corps Scholarships which are awarded primarily on a four-year basis to high school seniors selected by a nationwide competition. A two-year upper division scholarship program is also available, with a similar selection process, to students who have not yet begun their junior year in college. Applications for both types of scholarships are due by December 1 and March 1, respectively, each year. In addition to tuition, fees, and uniforms, students receive subsistence pay of $250 to $400 per month and a book stipend. Scholarship students are obligated to serve on active duty for a minimum of four years following graduation and commissioning.

College Program (Nonscholarship)
Students attending the University who meet Navy/Marine Corps requirements but who do not have an NROTC Scholarship may enroll in the College Program during their freshman year. These students have the opportunity to compete for scholarships after the completion of one term of naval science courses. If they do not win a scholarship, or choose not to compete for one, they must compete for advanced standing prior to their junior year. A two-year College Program is also available to students who have not yet started their junior year. Students enter the two-year program with advanced standing after selection through national competition and completion of a six-week summer training period. Applications for the two-year program are due March 1 of the sophomore year. All College Program students receive uniforms, naval science textbooks and, once selected for advanced standing, monthly subsistence pay in their junior and senior years. College Program students serve on active duty for a minimum of three years following graduation and commissioning.

Marine Corps Option
Highly motivated NROTC students may request designation as Marine Corps option students and may also pursue any UCLA academic degree. The final summer cruise involves intensive midshipman training. Marine Corps option students also participate, on a limited basis, in field training exercises during the academic year.

Navy Science Minor
The Navy Science minor is designed for students who wish to augment the major they are completing in another departmental program. Navy science courses are open to all students with an interest in history, national security, foreign policy, organizational leadership, management, ethics, and the military sciences. The minor consists of a four-year core of five courses, with an additional course selected from a broad list. Students must complete the core requirements, with a grade-point average of 2.0 or better. For further information, contact Donna Tenerelli at (310) 825-9075.

Required Lower Division Courses (10 units):
- Naval Science 1B, 20A, 20B.

Required Upper Division Courses (20 units):

Each minor course must be taken for a letter grade, with a grade-point average of 2.5 or better in each. Successful completion of the minor is indicated on the transcript and diploma.

Navy Science
Lower Division Courses
A. Naval Science Laboratory. (No credit) Laboratory, one hour. Requisite: course 102C. Limited to Naval Science ROTC midshipmen. Designed to cover service-specific administrative processes that are requisite knowledge for newly commissioned Navy and Marine Corps officers. No grading.

Z. Leadership Laboratory. (No credit) Laboratory, to be arranged. Mandatory for and limited to Naval Science ROTC midshipmen. Provides midshipmen with general military training and practical command and staff leadership experiences through classroom instruction, performance of various tasks and interactive processes within framework of organized midshipmen-run military unit, with oversight by active-duty military staff. As integral part of naval science curricu-
lum, provides professional experiences designed to develop leadership potential and orientation for active duty. No grading.

1A. Introduction to Naval Science. (3) Lecture, three hours. Introduction to organization of Naval Service, various components of Navy, career opportunities, shipboard damage control, fire fighting, Naval and Marine Corps operations, and some customs and traditions of Naval Service. Letter grading.

1B. Naval Ship Systems I. (4) Lecture, four hours. Introduction to naval engineering, with emphasis on steam, nuclear, diesel, and gas turbine propulsion systems and their associated auxiliary components. Basic thermodynamic theory, electrical theory, stability, and buoyancy. P/NP or letter grading.

20A. Naval Ship Systems II. (4) Study of naval weapon systems, with emphasis on infrared, radar, and sonar principles. Target designation and acquisition, methods of solving fire control problem, target detection systems. Analysis of transfer and feedback functions inherent in weapon systems.

20B. Seapower and Maritime Affairs. (3) Lecture, three hours. Conceptual study of seapower, with emphasis on historical development of naval and commercial power. Seapower examined in relation to economic, political, and cultural strengths, with focus on current abilities of specific nations to use oceans to attain national objectives. P/NP or letter grading.

Upper Division Courses

102B. Naval Leadership and Management I. (4) Examination of current and classical leadership and management theories, with emphasis on their application to junior military officer's role as a leader/manager. Topics include managerial functions, performance appraisal, motivation theories, group dynamics, leadership theories, and communication.

102C. Leadership and Ethics. (2) Lecture, two hours. Requires for Naval Science ROTC midshipmen: course 102B. Capstone course that examines principles of leadership and ethics relevant to military leaders through study and interactive discussion of classical and contemporary source documents and case studies. Letter grading.

103. Evolution of Warfare. (4) Study of evolution of warfare, including historical and comparative consideration of influence that leadership, political, economic, and sociological and technological development factors have had on warfare and influence they continue to exert in age of limited warfare.

104. Expeditionary Military Operations. (4) Study of historical use of expeditionary military operations, with particular emphasis on doctrine, tactics, and equipment used. Examination of topics through study of political and military objectives by focusing on historical examples, including Marathon, Gallipoli, World War II, Koreea, Beirut, and Grenada. Examination of contemporary doctrine through study of recent operations.

197. Individual Studies in Naval Science. (1 to 4) Tutorial, four hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Scope and Objectives

Scandinavia consists of five northern European countries: Denmark, Finland, Iceland, Norway, and Sweden. These countries form a geographic bridge between the American and European continents and a political bridge between Western and Eastern Europe. For all students of language, literature, the arts, and the social and physical sciences, Scandinavia is of particular interest.

The modern Scandinavian program educates students about Scandinavia through the study of its languages and literatures. The Scandinavian Section offers both undergraduate and graduate degrees in the languages and literatures of Denmark, Norway, and Sweden. Danish, Norwegian, and Swedish are mutually understandable languages, giving the student of one access to the literatures and cultures of the other two. Both undergraduate and graduate majors are expected to concentrate on one Scandinavian language, though they study the literatures of the other language areas.

Undergraduate Study

Undergraduate Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Danish, Norwegian, and Swedish grammar and/or composition. Students with demonstrated preparation may be permitted a more advanced program by the section or may be transferred to a more advanced course with consent of the instructor.

Native speakers of Norwegian, Swedish, and Danish may not enroll in any language course (including courses 105, 106, 107) in the Scandinavian Section except by petition in writing to the section. Non-Scandinavian students with knowledge of one of these Scandinavian languages may not take courses in the others except by petition in writing. Petitions must include a description of the student's linguistic background and the reason for wanting to take the language course in question.

Scandinavian Languages and Cultures B.A.

Preparation for the Major

Required: Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, or equivalent.

Transfer Students

Transfer applicants to the Scandinavian Languages major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of either Swedish, Norwegian, or Danish.

Refer to the UCLA Transfer Admissions Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Scandinavian 105 or 106 or 107; 10 courses from the following five tracks, with at least one course in each track: (1) early Nordic literatures and cultures — Scandinavian C131, 132A, 132B, C133A, C137, 138, (2) theory, genres, and authors — Scandinavian C141A, 141C, 142A, 143C, CM144A, C145A, C145B, C146A, C147A, C147B, (3) literary periods — Scandinavian 152, 155, 156, 157, (4) Scandinavian cinema — Scandinavian 161, C163A, C166A, 166C, (5) cultural studies — Scandinavian C171, C174A, C174B, C175, and three Scandinavian 187FL courses, taken in conjunction with any upper division course applied toward the major.

As an option, four upper division courses in a related field may be taken if approved in advance by the undergraduate adviser. In general, the courses must include significant content related to the Nordic region. It is recommended that students who plan to do graduate work in Scandinavian take German 1 through 6.

Scandinavian Minor

To enter the Scandinavian minor, students must have an overall grade-point average of 2.0 or better.

Required Courses (28 units): Any seven Scandinavian courses, two of which may be lower division courses selected from Scandinavian 1 through 50.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate
Scandinavian Lower Division Courses

1. Elementary Swedish. (4) Discussion, four hours. P/NP or letter grading.
6. Elementary Swedish: Intensive. (12) Lecture, 15 hours; laboratory, five hours. Intensive basic course in Swedish equivalent to courses 1, 2, and 3. Offered in summer only. P/NP or letter grading.
16. Elementary Danish. (4) Discussion, four hours. P/NP or letter grading.
22. Elementary Finnish. (4) Formerly numbered Old Norse Studies 15b.) Lecture, three hours. Introduction to standard language of Finland. Practice in grammar, listening, speaking, reading, and writing. P/NP or letter grading.
23. Modern Icelandic. (4) Formerly numbered Old Norse Studies 15c.) Lecture, three hours. Grammar, readings, and conversation. P/NP or letter grading.
25. Introduction to Scandinavian Literatures and Cultures. (5) Lecture, three hours; discussion, one hour. N. of credit for students with credit for course 50W. Designed for students in general and for those wishing to prepare for more advanced and specialized studies in Scandinavian literature and culture. Selected works from literatures of Denmark, Norway, Sweden, Iceland, and Finland, ranging from myth, national epic, saga, and folktale through modern novel, poem, play, short story, and film, read in English and critically discussed. Satisfies Writing II requirement. Letter grading.

Scandinavian Upper Division Courses

110. Introduction to Viking Age. (4) Formerly numbered Old Norse Studies C131.) Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including readings in Old Norse sagas and Eddas. Concurrently scheduled with course C231. Letter grading.
132A. Elementary Old Norse. (4) Formerly numbered Old Norse Studies 132A.) Lecture, three hours. Introduction to grammar and pronunciation of Old Norse. Selected readings from sagas and Prose Edda. P/NP or letter grading.
132C. Advanced Old Norse. (4) Lecture, three hours. Enforced requisite: course 132B. Readings from variety of Old Norse-Icelandic texts. Continuation of development of translation skills, as well as familiarity with Old Norse-Icelandic texts and philological, linguistic, literary, and cultural issues surrounding their interpretation. P/NP or letter grading.
133A. Saga. (4) Formerly numbered Old Norse Studies C133A.) Seminar, three hours. Sagas are largest extant medieval prose literature texts in English, with selections from different types of Icelandic sagas. Consideration of history and society that produced these narratives. Concurrently scheduled with course C233A. Letter grading.
131. Ancient Vikings and the Northern Tradition. (4) Formerly numbered Old Norse Studies C131.) Seminar, three hours. History of Viking Age society. Readings draw on medieval sagas and other primary material, as well as secondary material, focus on impact of Viking Age on northern Europe, and consider ways in which European and Scandinavian societies evolved in response to Viking incursions. P/NP or letter grading.
134. Nordic Poetry. (4) Formerly numbered Old Norse Studies C134.) Lecture, three hours. Study of poetry within following contexts: role(s) poetry has served in Nordic societies from prehistory to modern times; and special status of poetry in preserving Nordic languages and literatures, as indicated by financial support from Nordic states and publishers of contemporary poets and their poetry. P/NP or letter grading.
135. Introduction to Nordic Theater and Drama. (4) Lecture, three hours. Examination of artistic legacy of Henrik Ibsen and August Strindberg in context of emergence of modern Norwegian and Danish drama as a whole, as well as important contributions of their contemporaries and successors. Readings include plays, letters, speeches, and memoirs with works by authors such as Hans Christian Andersen, Jens Peter Jacobsen, Alexander Kielland, Amalie Skram, Sigbjørn Obstfelder, Knut Hamsun, Isak Dinesen, and Rubin Pimax. Emphasis on key plays and oeuvres, larger Nordic-European literary movements of 19th and 20th centuries, and tropes and conventions of short stories themselves. P/NP or letter grading.
141. Short Story in Scandinavian. (4) Seminar, three hours. Exploration of range of classic short story and novel texts from Scandinavian literature, with stories by authors such as Henrik Ibsen and August Strindberg.
143. Nordic Drama and the Modernity of Locating Texts. (4) Formerly numbered Old Norse Studies C143.) Seminar, three hours. Continue with works by authors such as Henrik Ibsen and August Strindberg. Study of modernist, postmodernist, and contemporary works, with major works in translation. Readings include plays, letters, speeches, and memoirs with works by authors such as Henrik Ibsen and August Strindberg.
144. Modern Scandinavian Drama. (4) Formerly numbered Old Norse Studies C144.) Seminar, three hours. Continue with works by authors such as Henrik Ibsen and August Strindberg. Study of modernist, postmodernist, and contemporary works, with major works in translation. Readings include plays, letters, speeches, and memoirs with works by authors such as Henrik Ibsen and August Strindberg.
145. Henrik Ibsen. (4) Formerly numbered C145.) Seminar, three hours. Readings and discussion of selected plays by Henrik Ibsen. May be concurrently scheduled with course C245A. P/NP or letter grading.
146B. Knut Hamsun. (4) Formerly numbered C146B.) Seminar, three hours. Readings and discussion of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers who explored themes of nature as modernity. May be concurrently scheduled with course C245B. P/NP or letter grading.
147A. August Strindberg. (4) Formerly numbered C147A.) Seminar, three hours. August Strindberg’s portrayal of marital conflict reflected in and shaped literary representations of so-called battle of sexes. His work, as well as its literary transformations, placed into Scandinavian, European, and feminist context. May be concurrently scheduled with course C246A. P/NP or letter grading.
148. Hanson Christian Andersen. (4) Formerly numbered C148.) Lecture, two hours; discussion, one hour. Study of works of Hans Christian Andersen, Danish novelist, dramatist, and writer of tales, including con-
sideration of his literary background and of his times. Analysis of his works in terms of their structure, style, and narrative techniques. P/NP or letter grading.

C147B, Soren Kierkegaard. (4) Formerly numbered C146.) Seminar, three hours. Readings and discussion of selected works by Soren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C147A. P/NP or letter grading.

152FL. Backgrounds in Scandinavian Literature. (2) Formerly numbered 141FL.) Seminar, two hours. Requisite, course 5 or 15 or 25. Enforced corequisite: course 152. Additional work in Nordic languages to augment work assigned in course 152, including reading, writing, and other exercises in Danish, Icelandic, Norwegian, or Swedish. P/NP or letter grading.

154. Romanticism. (4) Seminar, three hours. Exploration of Romanticism in Scandinavian literature. Reading and discussion of different approaches to Romanticism and analysis of works of prominent Scandinavian writers. Focus on development of Romanticism in literature and story, including study of the work of individual writers.

155. Modern Breakthrough. (4) Formerly numbered 142.) Seminar, three hours. Readings and discussion of selected works from Romantic, realistic, and post-Romantic literature of Scandinavia in 19th century. P/ NP or letter grading.

156. Scandinavian Literature of 20th Century. (4) Formerly numbered 143.) Seminar, three hours. Readings and discussion of selected works of modern Scandinavian literature from beginning of century to present. P/NP or letter grading.

156FL. 20th-Century Scandinavian Literature. (2) Formerly numbered 143FL.) Seminar, two hours. Requisite: course 5 or 15 or 25. Enforced corequisite: course 155. Additional work in Nordic languages to augment work assigned in course 156, including reading, writing, and other exercises in Danish, Icelandic, Norwegian, or Swedish. P/NP or letter grading.

157. Contemporary Nordic Literature. (4) Formerly numbered 157.) Seminar, three hours. Reading and analysis of selected texts by major 20th-century Swedish authors. P/NP or letter grading.

161. Introduction to Nordic Cinema. (4) Formerly numbered 161.) Seminar, three hours. Reading and viewing of selected films by directors of different nationalities and genres, including films of Scandinavian directors such as David Bordwell, Ray Carney, Paul Schrader, and Ingmar Bergman. Students will read critical essays and view films in three languages. P/ NP or letter grading.

162A. Introduction to Danish Cinema. (4) Formerly numbered 162A.) Seminar. Three hours. Introduction to history of cinema in Denmark, as well as to some fundamental concepts in study of film. Deliberately broad and historically centered approach to development of cinema in Denmark rather than focus on films of particular directors or topics. Theoretical readings from important critics, including Kracauer, Bazin, Metz, and Chatman, along with several directed exercises, to develop vocabulary and critical method for discussing films in general and Danish cinema in particular. Exposes students to a range of filmmakers and themes, including Hjort, Sandberg, Tangherlini, and other Scandinavian theoreticians. Concurrently scheduled with course C263A. P/ NP or letter grading.

163B. Introduction to Swedish Cinema. (4) Lecture, three hours. Reading and exploration of history of Swedish cinema from silent era to present. Filmmakers include auteurs in international canon, such as Victor Sjostrom, Mauritz Stiller, and Ingmar Bergman, as well as key Swedish filmmakers such as Gustaf Molander, Alf Sjoberg, Mai Zetterling, Vilgot Sjoman, Jan Troell, Lukas Moodysson, and Jesper Christensen. Development of Scandinavian high art cinema and popular genres such as rural romanticism, melodrama, crime, and documentary. All films have English subtitles. Concurrently scheduled with course C263B. P/NP or letter grading.

C163C. Introduction to Norwegian Cinema. (4) Seminar, three hours. Introduction to and exploration of history of Norwegian cinema. Focus on popular genres such as war films, horror, noir, romantic comedies, and documentaries. Concurrently scheduled with course C263C. P/NP or letter grading.

C165A, Ingmar Bergman. (4) Formerly numbered 165A.) Seminar, three hours. Focus on Ingmar Bergman’s development as film artist through various periods, spanning mid-1940s and late 1970s. Contextualization of work of this most personal of filmmakers within multiple frameworks of postwar Swedish film industry, international art cinema movement, and issues of auteur filmmaking. Course readings and viewing of 10 Bergman films. All films have English subtitles. Concurrently scheduled with course C265A. P/NP or letter grading.

165C. Carl Dreyer. (4) Seminar, three hours. Carl Theodor Dreyer (1889 to 1988) is not only one of great masters of Norwegian cinema, but one of world cinema’s most poetic. Focus on films that Dreyer made during near half century between 1919 and 1964. Contextualization of silent and sound works of this most personal of filmmakers with multiple genres in the film industry, transnational European cinema, and issues of auteur filmmaking. Readings by key Dreyer scholars such as David Bordwell, Ray Carney, Paul Schrader, Mark Sjoback, and Harold Scheit as Dreyer’s own writings on cinema. All films have English intertitles or subtitles. P/NP or letter grading.

166FL, Ingmar Bergman. (2) Seminar, two hours. Requisite: course 5 or 15 or 25. Enforced corequisite: course 166A. Critical analysis of a number of Bergman films. Concurrently scheduled with course 166A, including reading, writing, and other exercises in Danish, Norwegian, or Swedish. P/NP or letter grading.

C171. Introduction to Scandinavian Folklore. (4) Formerly numbered C178.) Seminar. Three hours. Introduction to fairy tales and legends of Scandinavian tradition as well as to interpretive methodologies that strive to answer questions of how people tell stories that they tell? Concurrently scheduled with course C271. Letter grading.

173A. Popular Culture in Scandinavia. (4) Seminar, three hours. Requisite: course 5 or 15 or 25. Popular culture in Scandinavia through study of contemporary Scandinavian literature, film, music, and art. Investigation of how issues such as globalization, immigration, and nationalism affect popular culture in Denmark, Norway, Sweden, Finland, and Iceland. Discussion of how and why human condition is interpreted through study of cultural expressions and how it is possible — taking literature, film, and art as point of departure — to analyze cultural, historical, and political expression in given piece of art. P/NP or letter grading.

C174A. Minority Cultures in Scandinavia. (4) Seminar, three hours. Exploration of emergence of immigrant cultures in Nordic countries. Beginning in 1960s, large numbers of people from Turkey, Italy, and Pakistan began immigrating to Nordic countries, followed in subsequent decades by immigrants from former Soviet Union, Vietnam, Caribbean, China, and countries throughout Africa. Cultural landscape previously marked by relatively high degree of cultural homogeneity now characterized by broad cultural diversity — examination of emergence of new voices in Nordic cultural landscape in wide range of cultural expressive media, including literature, film, and visual and performing arts. Examines changing contours of new forms of Nordic languages, such as well-documented phenomenon of Rinkesby Swedish. Concurrently scheduled with course C274A. P/NP or letter grading.

174B. Queer Scandinavia. (4) Formerly numbered 174B.) Seminar, three hours. Reading and discussion of selected works that explore the history of homosexuality in Scandinavia, including readings from important critics, including Kracauer, Bazin, Metz, and Chatman. Focus on critical approach to understanding of work of this most personal of filmmakers within multiple frameworks of postwar Swedish film industry, international art cinema movement, and issues of auteur filmmaking. Course readings and viewing of 10 Bergman films. All films have English subtitles. Concurrently scheduled with course C265A. P/NP or letter grading.

175. Introduction to Sami Language and Culture. (4) Formerly numbered C163E.) Lecture, three hours. Use of thematically arranged, structurally graduated readings, conversation topics, individual and group assignments, and journal writing to provide systematic overview of linguistic characteristics of Estonian language. At course end students should be able to communicate in Sami in a variety of common situations and should be equipped with necessary basic concepts to continue language acquisition and cultural studies in their social and professional milieu, interacting with native speakers, or taking formal courses at intermediate level. Concurrently scheduled with course C275. P/NP or letter grading.

180. Literature and Scandinavian Society. (4) Seminar, three hours. Reading and discussion of important written works by major Nordic and other Scandinavians. Limitations now characterized by broad cultural diversification and should be equipped with necessary basic concepts to continue language acquisition and cultural studies in their social and professional milieu, interacting with native speakers, or taking formal courses at intermediate level. Concurrently scheduled with course C280. P/NP or letter grading.

C185. Seminar: Scandinavian Literature. (4) Seminar, three hours. Requisite: course 5 or 15 or 25. Students may be concurrently enrolled in affiliated main course. Additional work in Nordic languages (Danish, Swedish, Norwegian, Icelandic) to augment work assigned in main course, including reading, writing, and other exercises. May be repeated for credit. P/NP or letter grading.

197. Individual Studies in Scandinavian. (2 to 4) Tutorial, three hours. Limited to juniors/seniors. Individual intensive study with scheduled meetings to be arranged between faculty member and student. Assignments, readings, and assessments are determined by subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

187FL. Special Studies: Readings in Scandinavian. (2) Seminar, two hours. Requisite: course 5 or 15 or 25. Students must be concurrently enrolled in affiliated main course. Additional work in Nordic languages (Danish, Norwegian, Swedish) to augment work assigned in main course, including reading, writing, and other exercises. May be repeated for credit. P/NP or letter grading.

187. Directed Research in Scandinavian. (4) Formerly numbered Old Norse Studies 199.) Tutorial, three hours. Limited to junior and senior Scandinavian majors. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

C231. Introduction to Viking Age. (4) Formerly numbered Old Norse Studies C231.) Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including readings in Old Norse sagas and Edda. Concurrently scheduled with course C131. Graduate students do additional reading, write more extensive research papers. Letter grading.

C233A. Saga. (4) Formerly numbered Old Norse Studies C233A.) Seminar, three hours. Sagas are largest extant medieval prose literature. Texts in English, with selections from different types of Icelandic sagas. Consideration of history and society that produced these narratives. Concurrently scheduled with course C133A. Graduate students do additional readings and write more extensive research papers. Letter grading.

233B. Advanced Old Norse Prose. (4) Formerly numbered Old Norse Studies 221.) Lecture, three hours. Requisite: course 132B. Readings of major saga texts. Also, second-semester focus on specific issues in Old Norse literature and medieval Scandinavian history. S/U or letter grading.

Scandinavian Section / 565

235A. Advanced Old Norse Poetry. (4) (Formerly numbered Old Norse Studies 222.) Lecture, three hours. Readings of mythological and heroic poems from Pòetic Edda. Secondary sources used where appropriate. S/U or letter grading.

C237. Old Norse Literature and Society. (4) (Formerly numbered Old Norse Studies 222.) Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C137. Graduate students do additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C241A. Theory of Scandinavian Novel. (4) (Formerly numbered C266.) Seminar, three hours. Preparation: advanced knowledge of one Scandinavian language. Analysis of predominant structures of Scandinavian novel from its 18th-century beginnings through its rise in 19th century and its 20th-century evolution. Discussion of application of contemporary critical theories to novel currently scheduled with course C141A. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C245A. Henrik Ibsen. (4) (Formerly numbered C251.) Seminar, three hours. Preparation: advanced knowledge of one Scandinavian language. Readings and discussion of selected plays by Henrik Ibsen. May be concurrently scheduled with course C145A. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C245B. Knut Hamsun. (4) (Formerly numbered C254.) Seminar, three hours. Preparation: advanced knowledge of one Scandinavian language. Readings and discussion of works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers who explored theme of nature as modern idyll. May be concurrently scheduled with course C145B. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C246A. August Strindberg. (4) (Formerly numbered C252.) Seminar, three hours. Preparation: advanced knowledge of one Scandinavian language. August Strindberg’s portrayals of marital conflict reflected and shaped literary representation of so-called battle of sexes. His work, as well as its literary transformations, analyzed in historical, theoretical, sociological, critical, and comparative contexts. May be concurrently scheduled with course CM144A. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C245A. Henrik Ibsen. (4) (Formerly numbered C251.) Seminar, three hours. Preparation: advanced knowledge of one Scandinavian language. Readings and discussion of selected plays by Henrik Ibsen. May be concurrently scheduled with course C145A. Graduate students may meet as group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C263A. Introduction to Danish Cinema. (4) Seminar, three hours. Introduction to and exploration of history of Norwegian cinema from silent era to present. Film-makers include Tancred Ibsen, Arne Skouen, Edith Carlmar, Nils Gaup, Erik Skjoldbjerg, Bent Ham- mer, Khalid Hussain, and Petter Næss. Particular focus on popular genres such as war films, horror, noir, ro- mantic comedies, and documentaries. Concurrently scheduled with course C163A. S/U or letter grading.

C266. Seminar: Scandinavian Literature. (4) Semi- nar, three hours. Preparation: reading knowledge of a Scandinavian language. Selected topics in Scandan-avian prose, poetry, and drama for credit with consent of instructor and graduate adviser. May be concurrently scheduled with course C185. S/U or letter grading.

C266A. Ingmar Bergman. (4) Seminar, three hours. Exploration of Ingmar Bergman’s development as film artist through various periods, spanning mid-1940s and late 1970s. Contextualization of work of this most influential Swedish filmmaker as well as other key Swedish filmmakers such as Gustaf Molander, Alf Sjöberg, Mai Zetterling, Vilgot Sjöman, Jan Troell, Lukas Moodyson, and Joel Sayre. Development of Scandinavian high art cinema and popular genres such as rural romanticism, melodrama, sex, crime, and horror. All films have Eng- lish subtitles. Concurrently scheduled with course C166B. S/U or letter grading.

C263C. Introduction to Norwegian Cinema. (4) Seminar, three hours. Introduction to and exploration of history of Norwegian cinema from silent era to present. Film-makers include Tancred Ibsen, Arne Skouen, Edith Carlmar, Nils Gaup, Erik Skjoldbjerg, Bent Ham- mer, Khalid Hussain, and Petter Næss. Particular focus on popular genres such as war films, horror, noir, ro- mantic comedies, and documentaries. Concurrently scheduled with course C163C. S/U or letter grading.

C265. Seminar: Scandinavian Literature. (4) Semi- nar, three hours. Preparation: reading knowledge of a Scandinavian language. Selected topics in Scandan-avian prose, poetry, and drama for credit with consent of instructor and graduate adviser. May be concurrently scheduled with course C185. S/U or letter grading.

C266A. Ingmar Bergman. (4) Seminar, three hours. Exploration of Ingmar Bergman’s development as film artist through various periods, spanning mid-1940s and late 1970s. Contextualization of work of this most influential Swedish filmmaker as well as other key Swedish filmmakers such as Gustaf Molander, Alf Sjöberg, Mai Zetterling, Vilgot Sjöman, Jan Troell, Lukas Moodyson, and Joel Sayre. Development of Scandinavian high art cinema and popular genres such as rural romanticism, melodrama, sex, crime, and horror. All films have Eng- lish subtitles. Concurrently scheduled with course C166A. S/U or letter grading.

C270. Seminar: Literary Theory. (5) (Same as Comparative Literature M294, East Asian Languages M251, English M270, Modern Japanese M270, Modern Korean M270, Modern Chinese M270, and East Asian Languages and Cultures M471.) Seminar, three hours. Advanced interdisciplinary seminar to explore philosophical, historical, and critical foundations of literary theory as well as current issues in literary and cultural studies. For credit, S/U grading.

C271. Introduction to Scandinavian Folklore. (4) (Formerly numbered C267.) Seminar, three hours. Preparation: advanced knowledge of one modern Scandinavian language. Fairy tales and legends of Scandinavian tradition as well as to inter- pretive methodologies that strive to answer question “why do people tell stories that they tell?” Concurrently scheduled with course C171. Letter grading.

C271. Study of Oral Tradition: History and Meth- ods. (4) (Same as English M205A.) Seminar, three hours. Exploration of scholarly and literary attempts to study, define, analyze, promote, and/or appropriate oral traditions, from Greco-Roman or- igin in vernacular literatures, European romantic (re)discovery of oral tradition, 20th-century heuristic models of oral composition, and modern-day electronic media and popular verbal genres, such as folklor and rapping, S/U or letter grading.

C272. Collecting Oral Tradition. (4) (Same as Eng- lish M205B.) Seminar, three hours. Description and evaluation of various modern approaches to collecting and documenting oral tradition as text, performance, and sociocultural event. Consideration of approaches ranging from written transcription and textualization to audio and video recording, and S/U or letter grading.

C273. Studies in Oral Traditional Genres. (4) (Same as English M206C.) Seminar, three hours. Ex- ploration in depth of variety and history of, and scholar- ship on, a particular oral traditional genre (e.g., ballad, song, epic, proverb, riddle, folktale, legend) or a set of closely related oral traditional genres. S/U or letter grading.

C274A. Minority Cultures in Scandinavia. (4) Semi- nar, three hours. Exploration of emergence of immi-grant cultures in Nordic region. Beginning in 1960s, large numbers of people from Turkey, Italy, and Paki- stan began immigrating to Nordic countries, followed in subsequent decades by immigrants and refugees from Vietnam, India, Iran, Iraq, Afghanistan, Cambodia, and countries throughout Africa. Cultural landscape previ- ously marked by relatively high degree of cultural ho- mogeneity now characterized by broad cultural diversi- ty. Examination of emergence of new voices in Nordic cultural landscape in wide range of cultural expressive media, including literature, film, and visual and perform- ing arts. Exploration of emergence of new forms of Nordic languages, such as well-documented phenomen- on of Rinkeby Swedish. Concurrently scheduled with course C174A. S/U or letter grading.

C275. Introduction to Sami Language and Culture. (4) (Formerly numbered C266.) Lecture, three hours. Use of thematically arranged, structurally graduated readings, conversation topics, individual and group as- signments, and journal writing to provide systematic overview of linguistic characteristics of Estonian lan- guage. At course end students should be able to com- municate in Sami in variety of common social situa- tions and should be equipped with necessary basic concepts to continue language acquisition and cultural studies in their social and professional milieu, interact- ing with native speakers, or taking formal courses at in- termediate level. Concurrently scheduled with course C175. S/U or letter grading.

C280. Literature and Scandinavian Society. (4) (Formerly numbered C263.) Seminar, three hours. De- signed for graduate students. Discussion of selected aspects of Scandinavian society based on readings of contemporary literature as well as historical and/or so- cial-cultural material. May be repeated for credit (as de- termined by graduate adviser) with topic change. May be concurrently scheduled with course C180. Gradu- ate students may meet for extra seminar hours and write research papers of greater length and depth. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Semi- nar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 6) Tutorial, to be arranged with faculty member who di- rects the study or research. Limited to graduate Scan- dinavian studies. Twelve units may be applied toward total course requirement, but only 4 units may be ap- plied toward minimum graduate course requirement. May be repeated twice. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examina- tion or Ph.D. Qualifying Examinations. (4 to 8) Tutorial, to be arranged with faculty member who di- rects the study or research. May be repeated once. May not be applied toward M.A. minimum course re- quirements. S/U grading.

599. Research for and Preparation of Ph.D. Disserta- tion. (4) Tutorial, to be arranged with faculty member who directs the study or research. May be repeated by S/ U grading.

Viktorija Lejko-Lacan, Ph.D.

Scope and Objectives

The Department of Slavic Languages and Literatures offers a wide array of courses in the languages and cultures of Russia and of central and eastern Europe. Instruction is offered in Czech, Hungarian, Polish, Romanian, Russian, Serbian/Croatian, and Ukrainian to provide the necessary linguistic skills to pursue advanced work in the literature, culture, history, politics, and social structures of these areas. Students have the choice of several majors and minors and the opportunity to enhance their knowledge and skills through programs of study abroad.

The department offers two majors in Russian. The Russian Language and Literature major is designed to provide students with basic mastery of the Russian language and familiarity with the classics of Russian literature. Students typically begin to study Russian in their first year, but those contemplating a Russian major later in their academic program can fulfill the Russian language requirement by combining regular coursework with summer programs or with the University of California Education Abroad Program (EAP) in Moscow, which is open to students who have completed the equivalent of one or more years of study (level 1 on the American Council on Teaching of Foreign Languages — ACTFL — scale). Students interested in this program should consult the undergraduate adviser as early as possible.

The major in Russian Studies is designed for students who wish to complement mastery of the language with an array of courses on Russian history, politics, literature, and culture.

The major in Central and East European Languages and Cultures is designed to provide students with a mastery of two languages of central or eastern Europe and familiarity with the literatures, as well as general background in the cultural, political, and social history of the Slavic peoples.

The graduate program provides advanced training in Slavic literatures and linguistics leading to the M.A. and Ph.D. degrees. The primary task of the department faculty is to develop and refine the critical and analytic skills of its students in preparation for productive careers in college teaching and research in the Slavic field. Alternative careers include language teaching, business, translation, interpreting, librarianship, and government service.

Undergraduate Study

The department offers three majors: (1) Central and East European Languages and Culture, (2) Russian Language and Literature, and (3) Russian Studies. The equivalent of a major in Central and East European Languages and Culture or Russian Language and Literature is normally required for admission to the department's graduate program and is used to determine the number of courses in Russian literature and/or linguistics that students majoring in Russian Studies are expected to make up in order to receive graduate degrees in the department. Students not majoring in Central and East European Languages and Culture or Russian Language and Literature who intend to pursue graduate study in the department are strongly encouraged to take courses in Russian literature and linguistics during their undergraduate years to reduce the number of makeup courses required. Qualified seniors may also take graduate courses numbered below 220 with consent of the instructor and the graduate and undergraduate advisers.

Central and East European Languages and Cultures B.A.

Preparation for the Major

Required: Central and East European Studies 91 or Slavic 90.

Transfer Students

Transfer applicants to the Central and East European Languages and Cultures major with 90 or more units must complete the following introductory course prior to admission to UCLA: one culture, history, or civilization course on one or more European nations.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Eleven courses (44 to 47 units), including (1) three Russian language courses selected from Russian 100A, 100B, 100C, 101A, 101B, 101C, 102A, 102B, 102C, 103A, 103B, 103C, 123, 130A, 140A; (2) humanities or fine arts courses numbered above 100, (3) foreign language or civilization course numbered above 100, and (4) at least two courses numbered above 200.

Students may petition to substitute courses after consulting with the undergraduate adviser. Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

Russian Language and Literature B.A.

Preparation for the Major

Required: Russian 6 or 20 or equivalent proficiency, one course from 25, 25W, 90A, 90B, or 90BW.

Transfer Students

Transfer applicants to the Russian Language and Literature major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Russian and one Russian civilization course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/admin_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Eleven courses (44 to 47 units), including (1) three Russian language courses selected from Russian 100A, 100B, 100C, 101A, 101B, 101C, 102A, 102B, 102C, 103A, 103B,

During their senior year, students must also take Slavic 191T in which they complete a senior thesis.

Students may petition to substitute courses after consulting with the undergraduate adviser.

Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

**Russian Studies B.A.**

**Preparation for the Major**

*Required:* Russian 6 or 20 or equivalent proficiency, one course from 25, 25W, 90A, 90B, or 90BW.

**Transfer Students**

Transfer applicants to the Russian Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Russian and one Russian civilization course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm.htm for up-to-date information regarding transfer selection for admission.

**The Major**

During their senior year, students must also take Slavic 191T in which they complete a senior thesis. Students may petition to substitute courses after consulting with the undergraduate adviser.

Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

**Honors Program**

The honors program is designed for exceptional departmental majors who wish to complete a research project that culminates in an honors thesis. Juniors and seniors who have completed all university-level coursework, including all preparation courses and requirements for the major, with an overall grade-point average of 3.0 and a 3.5 GPA or better in the major courses, are eligible to apply. Students must have the sponsorship of an approved faculty adviser.

All honors students must enroll in Slavic 198A and 198B in two consecutive terms to conduct independent research and write the honors thesis. The results of the research should be presented as a conference paper at the annual Slavic Undergraduate Research Conference.

**Central and East European Studies Minor**

The Central and East European Studies minor is designed for students who wish to augment their major program of study in the College of Letters and Sciences with exposure to a variety of disciplines pertinent to the study of central and eastern Europe, including language, literature, history, political science, folklore, ethnomusicology, and women’s studies.

To enter the minor students must be in good academic standing (2.0 minimum grade-point average) and file a petition with the department counselor in 322B Humanities Building. (310) 825-3856.

**Required Lower Division Course (5 units):** Central and East European Studies 91 or Slavic 90.

**Required Upper Division Courses (28 to 31 units):**

1. One three-quarter introductory central and east European language sequence to be selected from Czech 101A, 101B, 101C, Hungarian 101A, 101B, 101C, Polish 101A, 101B, 101C, Romanian 101A, 101B, 101C, Serbian/Croatian 101A, 101B, 101C, or Ukrain- 101A, 101B, 101C (students who demonstrate sufficient fluency in one of these languages through departmental testing are exempt from this three-course sequence and can replace it with a minimum of 12 units of language courses from item 3); (2) one course dealing directly with the target culture to be selected from Central and East European Studies 126, Czech 155, Ethnomusicology 161C, History 120A through 120D, 130A, 130B, Polish 152A, 152B, 152C, Political Science 156B, 156D, Romanian 152, Russian 124G, Serbian/Croatian 154, Slavic 125, 179, Sociology M166, Ukrainian 152, Women’s Studies M166, or 185; (3) 12 units of second-year or higher-level language courses to be selected from Czech 102A, 102B, 102C, 187A through 187M, Hungarian 102A, 102B, 102C, 187A through 187M, Polish 102A, 102B, 102C, 187A through 187M, Romanian 102A, 102B, 102C, 187A through 187M, Serbian/Croatian 102A, 102B, 102C, 187A through 187M, Ukrainian 102A, 102B, 102C, 187A through 187M (187 courses are 2 units each) OR three courses dealing directly with any central and east European culture to be selected from Central and East European Studies 126, Czech 155, Ethnomusicology 161C, History 120A through 120D, 130A, 130B, Hungarian 121, Polish 152A, 152B, 152C, Political Science 156B, 156D, Romanian 152, Russian 124G, Serbian/Croatian 154, Slavic 125, 179, Sociology M166, Ukrainian 152, Women’s Studies M166, 185.

With approval of the undergraduate adviser, other related upper division courses may be applied toward the minor. No more than two courses (8 to 10 units) may be applied toward both this minor and a major in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Russian Language Minor**

To enter the Russian Language minor, students must have an overall grade-point average of 2.0 or better.

**Required Lower Division Courses (9 to 17 units):** Russian 6 or 20 or equivalent proficiency, one course from 25, 25W, 90A, 90B, or 90BW.

**Required Upper Division Courses (20 to 23 units):**

Students select one of the following options: (1) Russian 101A, 101B, 101C and two additional Russian language or literature courses; (2) Russian 100A, 100B, 100C and two additional Russian language or literature courses; or (3) five Russian language and literature courses selected from 102A, 102B, 102C, 103A, 103B, 103C, 107A, 107B, 107C, 130A, 130B, 130C, 140A through 140D, with a minimum of three courses in Russian language.

Students may petition to substitute courses after consulting with the undergraduate adviser. No more than two courses (8 to 10 units) may be applied toward both this minor and a major in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Russian Literature Minor**

To enter the Russian Literature minor, students must have an overall grade-point average of 2.0 or better.

**Required Lower Division Courses (9 to 17 units):** Russian 3 or 10 or equivalent proficiency, one course from 25, 25W, 90, 31, 32, 90A, 90B, or 90BW.

**Required Upper Division Courses (20 units):**

Five Russian language and literature courses, including at least two from Russian M118, 119, 120, 130A, 130B, 130C, 140A through 140D.

Students may petition to substitute courses after consulting with the undergraduate adviser. No more than two courses (8 to 10 units) may be applied toward both this minor and a major in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.
Russian Studies Minor
To enter the Russian Studies minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (9 to 17 units): Russian 3 or 10 or equivalent proficiency course from 25, 25W, 50, 31, 32, 90A, 90B, or 90BW.

Required Upper Division Courses (20 units): Five courses in Russia-related fields, with a minimum of three courses selected from History M127A through 127D, Honors Collegium 130, 164, Political Science 128A, 128B, 156A.

Students may petition to substitute courses after consulting with the undergraduate adviser.

No more than two courses (8 to 10 units) may be applied toward both this minor and a major in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasas/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Slavic Languages and Literatures offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Slavic Languages and Literatures.

Bulgarian

Upper Division Courses
101A-101B-101C. Elementary Bulgarian. (5-5-5) Lecture, five hours. Course 101A is requisite to 101B, which is requisite to 101C. Basic courses in Bulgarian language. P/NP or letter grading.

Central and East European Studies

Lower Division Course
91. Culture and Society in Central and Eastern Europe. (5) Lecture, three hours; discussion, one hour. Interdisciplinary course to introduce students to main themes and concepts of central and east European studies, including historical background, nation states and ethnic groups, languages spoken in area, and culture and politics in communist and post-communist periods: religion, literature, mass media, music, art, and cinema. Examination of coldwar Central European culture through prism of prose fiction, essays, and film from 1947 to 1992. Analysis of strategies of Polish, Czech, Hungarian, and East German writers as articulation of tensions, contradictions, and compromises informing communist rule in central and eastern Europe, with focus on culture as node of resistance as well as accommodation to communist system. P/NP or letter grading.

Czech

Upper Division Courses
102A-102B-102C. Advanced Czech. (4-4-4) Lecture, three hours. Requisite: course 101C. P/NP or letter grading.
155. Survey of Czech Literature from Middle Ages to Present. (4) Lectures and readings in English. P/NP or letter grading.
187B. Advanced Tutorial Instruction in Czech. (2) Tutorial, one hour; laboratory, one hour. Requisite or corequisite: course 187A. Tutorial and guided independent study of advanced Czech: advanced conversational, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.
187C-187M. Advanced Tutorial Instruction in Czech. (2) Tutorial, one hour; laboratory, one hour. Preparation: prior course in sequence or Czech placement test. Tutorial and guided independent study of advanced Czech: advanced conversational, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.
215. Survey of Czech Literature from Middle Ages to Present. (4) Lecture, three hours. Requisite: course 101C. Course 102A is requisite to 102B, which is requisite to 102C. Tutorial, one hour; laboratory, one hour. Preparation: prior course in sequence or Czech placement test. Tutorial and guided independent study of advanced Czech: advanced conversational, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.
Graduate Course

280. Seminar: Polish Literature. (4) Seminar, three hours. Selected topics in Polish prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser.

Romanian

Lower Division Course

90. Introduction to Romanian Civilization. (4) Lecture, three hours. Introductory survey of social and cultural institutions of Romanian people and their historical background. P/NP or letter grading.

Upper Division Courses

102A-102B-102C. Advanced Romanian. (5-5-5) Lecture, five hours. Requisite: course 101C. Course 102A is requisite to 102B, which is requisite to 102C. Differences between oral and written discourse, expansion of students’ general and academic vocabulary, and increase of range of grammatical structures for use in speaking and writing. Cultural information to be included in readings. Letter grading.

103. Intensive Elementary Romanian. (12) Intensive basic course in the Russian language equivalent to courses 1, 2, and 3. 11A-11B-12A-12B-13A-13B. Self-Paced Program in Russian. (2 each) Russian language; 2 to 4 units per term recommended. Each 2-unit course in sequence requires 30 minutes of laboratory session per week and 30 minutes of discussion session per week, plus individual instruction as required by the staff. Courses 11B and higher require completion of or simultaneous enrollment in all courses lower in sequence. P/NP or letter grading.

25. Russian Novel in Translation. (5) Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students who have previously taken course 25. P/NP or letter grading.

30. Russian Literature and World Cinema. (4) Lecture, three hours. Introductory survey of Russian literary masterpieces and their screen adaptations in various national cinematic traditions, with focus on problems of perception and misperception arising when literature is translated into film, and when national culture is viewed through the eyes of another. P/NP or letter grading.

31. History of Russian Cinema. (5) Lecture, three hours; discussion, one hour; film screening, three hours. Overview of Russian cinema from silent films of early 20th century to current developments, with focus on cinematic styles, genres, and directors. Special attention paid to difficulties of visual and verbal storytelling. P/NP or letter grading.

50A. Introduction to Russian Civilization. (5) Lecture, three hours; computer laboratory, one hour. Introduction to Russian culture and society from earliest times to 1917. P/NP or letter grading.

90B. Russian Civilization in 20th Century. (5) Lecture, three hours. Russian civilization; one hour. Not open for credit to students with credit for course 90BW. Survey of literature, theater, cinema, television, press, music, and arts. Emphasis on contemporary period, with constant reference to Russian and early Soviet antecedents. P/NP or letter grading.

90BW. Russian Civilization in 20th Century. (5) Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H as a Second Language 36. Not open for credit to students with credit for course 90B. Survey of literature, theater, cinema, television, press, music, and arts. Emphasis on contemporary period, with constant reference to Russian and early Soviet antecedents. P/NP or letter grading.

101A-101B-101C. Third-Year Russian. (5-5-5) Recitation, five hours. Course 101A is requisite to 101B, which is requisite to 101C. For students who speak Russian and have difficulty reading and writing. Focus on improving reading and writing skills, increasing vocabulary, and developing speaking skills required for academic discourse. P/NP or letter grading.

102A-102B-102C. Advanced Tutorial Instruction in Russian. (2 each) Tutorial, one hour; laboratory, one hour. Requisite: course 101C. Tutorial and guided independent study of advanced Russian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

25A. Advanced Russian Civilization. (5) Lecture, three hours; computer laboratory, one hour. Introduction to Russian culture and society from earliest times to 1917. P/NP or letter grading.

25B. Russian Film in Translation. (5) Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H as a Second Language 36. Not open for credit to students who have previously taken course 25. P/NP or letter grading.

31. History of Russian Cinema. (5) Lecture, three hours; discussion, one hour; film screening, three hours. Overview of Russian cinema from silent films of early 20th century to current developments, with focus on cinematic styles, genres, and directors. Special attention paid to difficulties of visual and verbal storytelling. P/NP or letter grading.

31. History of Russian Cinema. (5) Lecture, three hours; discussion, one hour; film screening, three hours. Serbian/Croatian

Upper Division Courses

101A-101B-101C. Elementary Serbian/Croatian. (5-5-5) Lecture, five hours. Course 101A is requisite to 101B, which is requisite to 101C. Basic courses in Serbian/Croatian. P/NP or letter grading.

102A-102B-102C. Advanced Serbian/Croatian. (4-4-4) Lecture, four hours. Requisite: course 101C. Course 102A is requisite to 102B, which is requisite to 102C. P/NP or letter grading.

154. South Slavic Literature. (4) Lecture, three hours. Lectures and readings in English. Survey of South Slavic literature from Middle Ages to the present. P/NP or letter grading.

187A. Advanced Tutorial Instruction in Serbian/Croatian. (2) Tutorial, one hour; laboratory, one hour. Requisite: course 102C or Serbian/Croatian placement test. Recommended corequisite: course 187B. Tutorial and guided independent study of advanced Serbian/Croatian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

187B. Advanced Tutorial Instruction in Serbian/Croatian. (2) Tutorial, one hour; laboratory, one hour. Requisite or corequisite: course 187A. Tutorial and guided independent study of advanced Serbian/Croatian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

187C-187M. Advanced Tutorial Instruction in Serbian/Croatian. (2 each) Tutorial, one hour; laboratory, one hour. Preparation: prior conversation or Serbian/Croatian placement test. Tutorial and guided independent study of advanced Serbian/Croatian: advanced conversation, composition, vocabulary development, and review of selected grammar topics. P/NP or letter grading.

Upper Division Courses

103E. Intensive Elementary Estonian, (12) Lecture, 19 hours. Intensive basic course in Estonian equivalent to one year of language study. Use of series of thematically arranged, structurally graduated readings, conversation exercises, and individual and group assignments, as well as journal writing, to provide systematic overview of linguistic characteristics of Estonian language. P/NP or letter grading.

103L. Intensive Elementary Latvian, (12) Lecture, 19 hours. Intensive basic course in Latvian equivalent to one year of language study. Use of series of thematically arranged, structurally graduated readings, conversation exercises, and individual and group assignments, as well as journal writing, to provide systematic overview of linguistic characteristics of Latvian language. P/NP or letter grading.

CM114. Teaching and Learning of Heritage Language (Same as Arabic 1212.) Lecture, three hours. Consideration of issues relevant to heritage language learners (HLL) and to heritage language (HL) instruction. Readings and discussion on such topics as definitions of HLLs and HLLs; linguistic, demographic, sociolinguistic, and sociocultural profile of HLLs, particularly HL groups most represented among UCLA students; institutional and instructor attitudes toward HLLs; impact of student motivation and expectations on HL curriculum and teaching approaches; similarities and differences between HLLs and foreign language learners (FLLs) regarding teaching methods and materials; diagnostic testing and needs analysis; use of oral/aural proficiency as springboard for literacy instruction; optimization of instruction of mixed HL and FL classes. Action research component included. Concurrently scheduled with course CM214. P/NP or letter grading.

125. Intervar European Community Prose. (4) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns. P/NP or letter grading.

179. Baltic and Slavic Folklore and Mythology. (4) Lecture, four hours. General course for students interested in folklore and mythology and for those interested in Indo-European mythic antiques. P/NP or letter grading.
191T. Senior Thesis in Slavic Languages and Literatures. (4) Seminar, three hours. Limited to senior departmental majors. Planning and completion of senior thesis; students make verbal and written presentations. Normally taken in Spring Quarter of senior year. P/NP or letter grading.

197. Individual Studies in Slavic Languages and Literatures. (2 to 6) tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery required. May be repeated for credit. Individual contract required. P/NP or letter grading.

198A-198B. Honors Research in Slavic Languages and Literatures. (4-4) tutorial, three hours. Course 198A is requisite to 198B. Limited to junior/senior departmental honors program students. Development and completion of honors thesis under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

199. Directed Research in Slavic Languages and Literatures. (2 to 6) tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research under guidance of senior faculty member. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

200A. Literary Proseminar. (4) Seminar, three hours. Required for M.A. (literature). Designed to prepare incoming graduate students for scholarly work by introducing them to resources (departmental, intramural, and extramural), methodologies, and techniques for analysis of literary materials and cultural studies. S/U grading.

211. Slavic Gender Linguistics. (2 or 4) Lecture, three hours. Examination of linguistic differences between male and female speech and of language used to refer to females and males. Course contributes to understanding of gender issues, and sociolinguistic and sociocultural profile of HLLs, particularly HL groups most represented among UCLA students; institutional and instructor attitudes toward female students; socio-economic status of student membership; and expectations on HL curriculum and teaching approaches; similarities and differences between HLLs and foreign language learners (FLLs) regarding teaching method, classroom materials, learner assessment, and needs analysis; use of oral/aural proficiency as springboard for literacy instruction; optimization of instruction of mixed HL and FLL classes. Action research component included. Concurrently scheduled with course CM214. S/U or letter grading.

M229. Introduction to Slavic Bibliography. (2) (Same as Information Studies M229C) Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements of background and enrollment of students. Topics include overview of pedagogical, historical, and cultural contexts; surveys of languages and translation systems; acquisition of Slavic and East European library materials; and East and Southeast European scholarships in the West. Relevant reference sources, archival resources, and research methods; survey of online databases; compilation of bibliographies. S/U grading.

230A-230B-230C. Topics in Comparative Slavic Literature. (4-4-4) Lecture, three hours. Recommended preparation: M229. Survey of texts, authors, and periods of selected topics. P/NP or letter grading.

281. Seminar: Slavic Linguistics. (4) Seminar, three hours. Selected topics in comparative and historical Slavic linguistics. May be repeated for credit with consent of instructor and graduate adviser.

282. Seminar: Structural Analysis. (4) Seminar, three hours. Selected topics. May be repeated for credit with consent of instructor and graduate adviser.

M299. Research Resources for European Studies. (2) (Same as French M299, German M299, Informatica Studies M299, Italian M299, and Spanish M299) Lecture, two hours. Essentials of library research strategy and effective searching in key print and online resources for European and Russian studies. Through combination of lecture, online demonstration, and hands-on activities in and outside class, students understand how to efficiently use library and databases. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for course instruction and administration at UCLA. May be repeated for credit. S/U or letter grading.

495. Teaching Slavic Languages at College Level. (4) Seminar, 90 minutes; discussion, 90 minutes. Designed for graduate students. Theory and practice of language teaching. Discussion of contemporary language teaching methodology as well as problems of pedagogical grammar. S/U grading.

596. Directed Individual Study or Research. (2 to 4) tutorial, to be arranged. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 4) Tutorial, to be arranged. S/U grading.

Social Thought

Upper Division Courses

190A-190B. Research Colloquia in Social Thought I, II. (2-2) Seminar, two hours. Corequisite for course 190A: course 199A; for 190B: course 199B. Limited to juniors/seniors. Required of students in Social Thought minor. Designed to bring together students undertaking supervised senior thesis work in seminar setting with one or more faculty members to discuss their work or related work in Social Thought minor. Led by one supervising faculty member. Course 190A may be repeated for credit. P/NP grading.

199A-199B. Directed Research or Senior Thesis in Social Thought I, II. (4-4) Tutorial, to be arranged. Corequisite for course 199A: course 199A; for 199B: course 199B. Limited to juniors/seniors. Required of students in Social Thought minor. Supervised individual research under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. Letter grading.

Mary Kay Oliveri, L.C.S.W., M.S.W.
Winifred E. Smith, M.S.W., Emerita
Michelle Talley, L.C.S.W.

Scope and Objectives

The primary objectives of the Department of Social Welfare graduate program are to prepare leaders for the profession of social work and to develop the empirical base for all facets of practice. In response to changing demographic trends and the emergence of new social problems, the department provides leadership in the areas of policy, practice, and research and in the development of an innovative curriculum for training students and professionals to meet the service needs of a multicultural clientele.

The educational program is based on the premise that all students need to acquire a common body of knowledge and basic skills, and a common understanding of the philosophy and values of the profession. These then form a sound foundation for the development of more specialized knowledge and skills along the lines of each student’s interests and the needs of the field.

Students are encouraged to take advantage of the resources within the University by selecting elective courses in related disciplines. In addition, as a department within the School of Public Affairs, the program affords students instructional opportunities in the other affiliated departments — Public Policy and Urban Planning.

Beyond national opportunities in the profession of social work, there is increasing demand for qualified and experienced social workers to serve in the international field, where many social service programs are conducted under the auspices of the United Nations, the U.S. government, and national sectarian organizations. Graduates of the doctoral program generally secure appointments at major universities or research centers.

The challenge to the department, the profession, and those who join us as students is to prepare to forge the paths, build the bridges, and shape the future to ensure that all individuals, families, and communities enjoy better education, better healthcare, better job training, and better economic futures.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasas/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in an-
nouncements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

Social Welfare

Upper-Division Courses

100A. Introduction to Social Welfare: Policies and Programs. (4) Lecture, four hours. Origin and development of major U.S. welfare programs and policies guiding them, with emphasis on analysis of policy developments/issues related to provision of social welfare services. Study of historical and current responses of professional to major social problems. P/NP or letter grading.

100B. Social Welfare Policy: Overview. (4) Lecture, four hours. Requisite: course 100A. Review of existing policy regarding major social issues in field of social welfare. Examination of discrepancy between need and capacity of social agencies to address need. Exploration of differential impact of policy on various populations. P/NP or letter grading.

101. Social Welfare in Multicultural Society. (4) Lecture, four hours. Social policy viewed from perspective of various cultural groups. Students to become aware of their own cultural perspective and learn to recognize similarities and differences in values, perspectives, and beliefs across cultural groups. P/NP or letter grading.

103. Introduction to Direct Practice with Individuals, Families, and Groups. (4) Lecture, four hours. Requisite: courses 100A, 100B, 101. Description and demonstration of basic skills employed in direct social work practice via casework process. Students practice these skills in a small group, role-play, video or audio exercises. P/NP or letter grading.

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) (Same as Gerontology M104C and Women's Studies M104C) Lecture, four hours. Exploration of complexity of variables related to diversity of aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in multidisciplinary perspective using research from fields to address issues of diversity. Letter grading.

M104D. Public Policy and Aging. (4) (Same as Gerontology M104D) Lecture, four hours. Examination of theoretical models and concepts of policy processes, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting elderly. P/NP or letter grading.

M104E. Social Aspects of Aging. (4) (Same as Gerontology M104E) Lecture, four hours. Topics include theories of aging, elderly roles, social relationships, and special populations. Weekly seminars organized around key aspect of social gerontology. P/NP or letter grading.

M105. Social Welfare Policy in Modern America: Historical Perspectives. (4) Lecture, three hours; outside study, eight hours. Historical and contemporary policy dealing with three core societal problems: poverty, sickness, and joblessness. Programs developed by governments to ameliorate these problems have typically involved cash transfers such as unemployment insurance, welfare, and Social Security. Collectively these programs are known as “the welfare state”; examination of origins of the U.S. welfare system and its development over time, and features that make it distinctive as compared to welfare states in other nations. Letter grading.

106. Research Seminar and Field Observation: Social Welfare. (4) Seminar, three hours; discussion, one hour; outside study, eight hours. Didactic component with focus on development of basic skills in the areas of research. Students select one field of observation. Letter grading.

107. Field Practicum: Social Welfare. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 106. In field practicum students are placed in a specific agency where they combine observation of agency functions with participation in specific agency tasks and roles under instructional supervision of an agency mentor and a UCLA faculty member. P/NP or letter grading.

130A-130B. Community Research and Services Seminars. (4-4) Seminar, three hours; service learning, four hours; outside study, five hours. Course 130A is required to 130B. Limited to juniors/seniors. Exploration and roles of social welfare policy within government, organizations, and communities. Reflections about service-learning site experiences, with application of issues related to lecture and seminar readings. Students to be assigned to two-termin mentoring site where they apply tutoring techniques as they assist middle school children living in impoverished areas of Los Angeles County. In Progress (130A) and P/NP or letter (130B) grading.

131. Poverty, Poor, and Welfare Policy. (4) Seminar, three hours. Limited to juniors/seniors. Current research on issues and policy responses concerning poverty in the U.S., with specific emphasis on single-parent households. Overview of measurements and characteristics of poor people; theoretical and empirical issues of social welfare policies to combat poverty, particularly Aid to Families with Dependent Children (AFDC) and Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA) and the recently enacted state welfare reform policies. Relationship between research knowledge about poverty and current policies, and the development of basic skills for working with patterns of poverty and policy responses. P/NP or letter grading.

132. Community Analysis and Community Needs. (4) Lecture, three hours. Limited to juniors/seniors. Theoretical and practical foundation for understanding and depicting demographic composition of communities and for determining community needs. Use of systematic organizing framework. Community-level interventions are affected by community's social ecology, culture, economic system, political system, ethnic composition, and class structure. Agencies often seek to define community needs and develop interventions to respond to those needs. Knowledge of community infrastructure necessary for ascertaining its strengths and resources that can be mobilized for addressing and responding to community needs, issues, and concerns. Social service agencies and community ties can work together in partnership to enhance quality of community life. P/NP or letter grading.

M142SL. Intergenerational Communication across Lifespan. (4) (Same as Gerontology M142SL) Lecture, two hours; fieldwork, one hour. Limited to juniors/seniors. What do you say to your grandparents? How do you talk to your parents in conversation? How do they talk to you? Does your family talk well to one another as group? How do you communicate with those who are 30 years older than you? Individuals of all ages interact with one another, and their interactions have significance throughout their lives. Introduction to psychological, interpersonal, and societal issues related to intergenerational communication across lifespan. Letter grading.

151. Child Welfare Policy in America. (4) Lecture, three hours. Limited to juniors/seniors. Examination of public child welfare system in the U.S. Major programs dealing with children's needs and services to families, including child chil- dren, including welfare, food stamps, child care, child support, and children's allowance programs. Review of research and analysis in this area. Overview of social policies and programs and their impacts on the U.S. Examination of comparative policies in other countries. P/NP or letter grading.

152. Health Policy and Services. (4) Seminar, three hours. Limited to juniors/seniors. Contemporary issues in health care financing and delivery and their historical perspective on these issues. Role of government in healthcare and ways controversy about this role continues to shape and constrain public policy in health. Major public programs, notably Medicare and Medicaid, and their relationship to issues of access and cost for diverse vulnerable populations. Various public and private approaches to thinking about their predicted impact, cost, and political feasibility. Issues in care of persons with chronic illness and debate about public and private approaches to long-term care reform. Social work roles in health-care policy and practice. P/NP or letter grading.

153. Prevention of Risky Substance Use and Related Problems. (4) Lecture, four hours. Limited to jun- iors/seniors. Prevention of substance use and related harms from legal or illegal substances is a major concern to parents, communities, and nations. Examination of research related to patterns of drug use and related harms (such as death, disorder) and effectiveness of interventions to reduce these problems. Through review of science-based programs and policies, evaluation of effectiveness of evidence-based interventions, health education, skills, and expert advice in determining effective interventions to reduce drug-related harm, using most up-to-date information. P/NP or letter grading.

154. HIV Prevention in U.S. and Developing World. (4) Lecture, three hours. Limited to juniors/seniors. Examination of various approaches to HIV prevention, drawing on infectious disease paradigms from public health and theories of behavior change from fields of psychology, sociology, and communications. Sexual behavior and injection drug use, existing and promising technologies to reduce HIV transmission, and fiscal, cultural, ethical, and moral dilemmas in allocation of prevention resources. P/NP or letter grading.

M156. Disability Policy and Services in Contemporary America. (4) (Same as Disability Studies M130) Lecture, three hours. Limited to juniors/seniors. Growing numbers of people of all ages with disabilities are leading active and productive lives in American communities. Many others are struggling to lead such lives. Who are people with disabilities in contemporary America? How has U.S. responded to various needs and aspirations of people with disabilities, young and old? What demands have been made over time by disability advocates? How has government addressed demands of advocates for various disability populations? What do we know about extent to which public policies and programs are responsive to people in need? How do demands and policies continue to influence evolving public policy responses? P/NP or letter grading.
181. Nonprofit Sector, State and Civil Society. (4) (Formerly numbered C181.) Lecture, three hours; out-
side study, three hours. Use of political economy per-
spective to analyze forces that have shaped rise and
characteristics of nonprofit sector and its constituent
elements. Examination of social history of nonprofit
sector in historical and policy environments and
distinct organizational forms. Comparative perspective
between U.S. and other countries. P/NP or letter
grading.

(4) Seminar, three hours; outside study, nine
hours. Examination in depth of particular subfield of
social welfare (e.g., child welfare, children and youth,
nonprofit, health, mental health). Limits of investigation
set by individual instructor. May be repeated for credit
with topic change. Letter grading.

194. Internship Seminars: Social Welfare. (1) Semi-
nar, one hour; outside study, three hours. Corequisite:
course 195. Not open to freshmen. Introduction to top-
ics relevant to psychosocial determinants of children’s
health and community resources for children and fami-
lies, with opportunity to gain breadth and depth of
knowledge and skill setting. May be repeated for
credit. P/NP grading.

195. Community Internships in Social Welfare. (2)
Tutorial, four hours. Corequisite: course 194. Not open
to freshmen. Students in community placement to pro-
vide direct care with infants, children, and chil-

199. Directed Research in Social Welfare. (2 or 4)
Tutorial, two hours. Limited to juniors/seniors. Super-
vised individual research or investigation under guid-
ance of faculty mentor. Culminating paper required.
Letter grading.

200. History and Philosophy of Social Welfare. (2)
Discussion, two hours. Review of current status of homelessness; who homeless are, what are their needs and
how. Letter grading.

200A. Homelessness: Housing and Social Ser-
vice Issues. (4) (Same as Urban Planning M270.)
Lecture, 90 minutes; discussion, 90 minutes; one field
trip. Review of current status of homelessness; who homeless are, what are their needs and how. Letter grading.

220. Social Welfare Policy and Services II. (4)
Lecture, three hours; outside study, nine hours. Na-
ture, roles, and history of welfare systems; different
strategies for solving problems; new issues and trends;
legal and ethical considerations of welfare. S/U or
letter grading.

221B. Social Welfare Policy and Services II. (4)
Lecture, three hours; outside study, nine hours. Na-
termary health system; different strategies for solving
problems; new issues and trends; legal and ethical con-
siderations in social welfare. S/U or letter grading.

222. Seminar: Social Work Profession. (2) Semi-
nar, two hours. Nature and role of social work in con-
temporary society; relationships to other profes-
sions; probable future trends; social work ethics, pro-
fessional organizations, certification licensing;
professional responsibility for continued self-criti-
cism and improvement of profession. S/U grading.

225A-225B. Social Welfare Policy. (4-4) Seminar,
hours. Designed for Ph.D. students. Letter grad-
ing.

225A. Formulation and Analysis. (4) Seminar, three
hours. Designed for Ph.D. students. Examination of
principal issues in development, formulation, and
adoption of U.S. welfare policies, with particular focus
on income distribution and redistribution. Em-
phasis on analysis of theoretical assumptions and concep-
tual frameworks for analysis. Letter grading.

225B. Implementation and Evaluation. (4) Seminar,
hours. Designed for Ph.D. students. Examination of
issues in implementation and evaluation of social
welfare policies. Emphasis on determining provi-
sion, organization, and delivery of social services, in-
cluding auspices funding, distribution, criteria for effec-
tiveness, and use of quantitative methods in policy
analysis. Letter grading.

229A. Craft of Social Welfare Scholarship I. (4)
Lecture, three hours; outside study, nine hours. Limited
to Ph.D. students. Exploration of one problem for study —
its history, current state of knowledge about why problem exists, and what might be done about it. Sur-
vey of several problems and alternative ways in which
problems have been conceptualized and studied to un-
derstand how social work practice evolved and gain em-
pirical evidence to advance what is known, what is yet unknown, where there are important gaps in understanding par-
ticular problems, and what might be done to solve them. Letter grading.

229B. Craft of Social Welfare Scholarship II. (2)
Lecture, 90 minutes; outside study, four and one half
hours. Enforced requisite: course 229A. Limited to
Ph.D. students. Continued study of one social welfare research problem, moving from understanding of evolution and context of general problem to more detailed and intensive review of re-
search literature on the core problem. Open-ended question to deepen student understanding of existing knowledge on topic and begin to identify one or more critical gaps in knowledge to explore. Discussion of different meth-
ods of summarizing research literatures, identifying seminal studies, and interpreting contradictory find-
ings. Regular meetings to discuss ongoing work and to
courage students to review their work with their fac-
ulty advisor and other students with expertise in their
problem areas. Letter grading.

229C. Craft of Social Welfare Scholarship III. (2)
Lecture, 90 minutes; outside study, four and one half
hours. Enforced requisite: course 229B. Limited to Ph.D.
students. Continued study of one social welfare research problem, moving from understanding of evolution and context of general problem to more detailed and intensive review of re-
search literature on the core problem. Open-ended question to deepen student understanding of existing knowledge on topic and begin to identify one or more critical gaps in knowledge to explore. Discussion of different meth-
ods of summarizing research literatures, identifying seminal studies, and interpreting contradictory find-
ings. Regular meetings to discuss ongoing work and to
courage students to review their work with their fac-
ulty advisor and other students with expertise in their
problem areas. Letter grading.
231K. Advanced Theory of Social Welfare Practice with Individuals, Families, and Groups: Mental Health. (4) Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Designed to provide students with grounding in social work practice with adults in mental health settings. Emphasis on evidence-based approaches to providing services to pervasive and persistent mentally ill. Exploration of strengths-based recovery-oriented approaches that are consistent with knowledge and values of social work practice. Exposure to range of interventions applicable to most common mental health problems and emerging patterns of physical, economic, and social planning within framework of social change theory. Letter grading.

M241E. Leadership, Development, and Governance of Nonprofit Organizations. (4) (Same as Public Policy M228 and Urban Planning M230.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. Letter grading.

M241F. Strategic Planning for Public and Nonprofit Organizations. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Technical processes of problem solving regarding substantive social welfare problems at community level. This form of community practice fills niche between professional and knowledge and skill set possessed by agency and program administrators on one hand and by policy analysts and policymakers on other. Letter grading.

231P. Advanced Theory of Social Welfare Practice with Individuals, Families, and Groups: Gerontology. (4) (Formerly numbered 231D.) Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Advanced-level, critical analysis of theoretical models related directly to practice with diverse population of older adults. Presentation of comprehensive tools for multidimensional geriatric assessment. How to engage in collaborative treatment planning across range of late-life problems and address impaired functioning in client. Theoretical underpinnings and most effective practice models to enable students to serve needs of older clients and their families as they adjust to late-life transitions, as well as to health and care problems most prevalent for older adults. Client populations range from well elderly to physically frail and/or demented from diverse backgrounds. S/U or letter grading.

240A-240B. Theory of Social Welfare Practice in Organizations, Communities, and Policy Settings I, II, (3-3) Lecture, three hours. Corequisite: required social work practicum. Historical and theoretical developments in administration, planning, and community organization; understanding the community as a social system; administration of organizations; role of the practitioner in identification, analysis, and evaluation of needs using various settings, policies, structures, and strategies of intervention. Letter grading.

241A-241B-241C. Advanced Theory of Social Welfare Practice in Organizations, Communities, and Policy Settings IV, V, VI, (4-4-4) Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Emphasis on various patterns of community action for attaining social welfare objectives; re- search on theory and practice with emphasis on planning in context of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. S/U or letter grading.

M241D. Social Advocacy and Domestic Violence. (4) (Same as Law M359.) Lecture, three hours; fieldwork. Use of domestic violence as case study to give students needed skills to advocate for individuals or isues. How systems work, how law legitimizes systems, and how advocacy can be used to change systems. Letter grading.

241E. Advanced Theory of Social Welfare Practice in Organizations, Communities, and Policy Settings IV, V, VI, (4-4-4) Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Methods of social work practice policy and advocacy as problem-solving process. Analysis of consequences of societal policies, particularly for marginalized populations, development of alternative policies, and use of different advocacy tools/techniques to gain support for policy change. S/U or letter grading.

245A. Epistemology of Practice. (4) Seminar, three hours. Designed to encourage students to guide scientific models of practice theories; process of emergence, development, and change of practice theories; intellectual foundations of practice theories; how professionals apply, accumulate, and modify their practice knowledge; science and practice interpretive. Letter grading.

245B-245B. Foundations of Scientific Inquiry I, II, III, (4-4-4) Lecture, three hours; outside study, nine hours. Limited to Ph.D. students. Introduction to underlying logic(s) of scientific inquiry to provide students with building blocks for independent scholarship. Letter grading.

249A. Experimental and quasi-experimental approaches in intervention research, ways of enhancing internal, external, and statistical conclusion validity, and inferring causality. 249B. Enforced requisite: course 249A. Survey design, sampling strategies, and data collection, and reliability as measurement issue. 249C. Interdisciplinary collaboration: Introduction to a array of qualitative research strategies.

251A. Advanced Theory of Social Welfare Practice: Violence against Women. (4) Lecture, three hours. Designed for second-year M.S.W. students in macro and clinical social work. One most pervasive aspect of women’s existence has been violence against them as consequence of their gender. Female and critical examination of theories, research, and methods of intervention research that seek to design, test, evaluate, and disseminate innovative intervention technologies. Letter grading.

258. Critical Problems in Social Welfare. (2) Discussion, two hours. Designed for Ph.D. students. Current problems in field of social welfare. Specific topics vary depending on research and educational interests and needs of class. May be repeated for credit. S/U grading.

280A-280B. Knowledge Acquisition, Evidence-Based Practice, and Research in Social Welfare. (1-3) Limited to first-year M.S.W. students. Designed to stimulate student thinking about importance and relevance of evidence in social welfare. 280A. (Formerly numbered 280.) Lecture, three hours. Five-week course in Fall Quarter. Introduction to foundations of critical thinking to develop students’ ability to examine ideas, beliefs, and knowledge. Examination of variable meanings of research and introduction to some basic components of scientific method. Critical examination of utility and role systematic literature review plays in building knowledge/evidence. In Progress grading (credit to be given only on completion of course 280B). 280B. Seminar, three hours. Five-week course in Spring Quarter. Examination of evidence-based practice in social work, including its many and varied meanings. Exposure to utility of single case designs and role of program evaluation and social work practice. S/U or letter grading.
281A-281B-281C. Advanced Social Welfare Research. (2-2-2) Discussion, two hours. Individual or group research projects requiring intensive examination and analysis of social problem area, directed toward development of research knowledge and techniques for social work practice. In Progress (281A, 281B) and S/U or letter grading.

285A-285B-285C. Research in Social Welfare. (4-4-4) Discussion, three hours. Review of areas of research of concern to social workers, with special attention to design, instrument construction, data collection, data analysis, evaluation, interpretation, and development of new designs. Studies designed to include survey, panel, experimental observation, and theory development research. S/U or letter grading.

285E. Research in Gerontology. (4) Lecture, three hours. Overview of research in aging. Development of research questions, selecting appropriate theoretical frameworks, conducting literature reviews, selecting appropriate research designs, identifying sampling methods. Special considerations in aging research, including sampling, questionnaire design, and recruitment issues. Letter grading.

285F. Research in Health. (4) Lecture, three hours. Research methods and policies and selection of readings about range of research from field of health services. Identification of research design issues, design of research instruments, analysis of strengths and limitations of current approaches to health services research, consideration of alternative roles for social work practitioners in arena of health services. Letter grading.

285H. Program Evaluation Research. (4) Lecture, three hours. Discussion of differences and similarities between evaluation and other research, alternative program evaluation methods, ethnographic methods, single-subject designs, and observational methods. Operational definition of variables and selection and design of appropriate measures for research with children and adolescents. Letter grading.

286A. Survey of Research Methods. (4) Seminar, three hours. Basic concepts underlying research methods. Content includes theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis. Letter grading.

286B. Advanced Research Methods. (4) Seminar, three hours. Advanced concepts underlying research methods. Continuing study of theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis. Letter grading.

285C. Research Internship. (4) Fieldwork, four hours. Supervised participation through participation in on-going research project or one initiated by students and carried out under faculty supervision, enabling students to apply research skills developed in previous courses. May be repeated for credit. S/U grading.

290A-290B-290C. Seminars; Social Work. (4-4-4) Seminar, three hours; outside study, nine hours. Series of seminars dealing with trends in social work and social welfare, with focus on current social problems affecting individuals, families, and communities and new patterns of intervention based on recent demonstrations and research. S/U or letter grading.

290D. Children with Special Healthcare Needs: Systems Perspective. (4) Same as Community Health Sciences M420 and Health Services M420.) Lecture, three hours; fieldwork, one hour. Examination and evaluation of principles, policies, programs, and practices that affect the health and welfare of children and adolescents with developmental needs or chronic illness and their families. Letter grading.

290E. Child Welfare Policy. (4) Same as Public Policy M212.) Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in public child welfare system. Examination of development of an infrastructure to support needs of children and families. S/U or letter grading.

290F. Mental Health Policy. (4) Same as Public Policy M213.) Lecture, three hours. Examination of evolution of social policy for mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of mentally ill and services they are provided. S/U or letter grading.

290G. Poverty, Poor, and Welfare Reform. (4) Same as Public Policy M214 and Urban Planning M246.) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward poor in U.S. S/U or letter grading.

290H. Health Policy. (4) Same as Public Policy M215.) Lecture, three hours. Introduction to contemporary issues in healthcare financing and delivery, providing historical perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

290I. Public Children and Youth. (4) Same as Public Policy M216.) Lecture, three hours. Policy issues that affect children and adolescents in relation to their interaction with schools and community, with emphasis on impact of policy across federal, state, and local levels. S/U grading.

290J. Aging Policy, Elderly and Families. (4) Same as Public Policy M261.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of theoretical models and concepts of policy process and aging policy. Analysis of decision-making processes that affect social policies. Description of historical development of contemporary policy. Exploration of current proposals and issues. Letter grading.

290L. Law and Poor. (4) Same as Law M215, Public Policy M225, and Urban Planning M248.) Lecture, three hours. Designed for graduate students. Study of major income-related problems in U.S. with emphasis on intersection of moral attitudes toward poor and structure and implementation of law, policy, and administration. Use of reform consensus and major reforms. Letter grading.

290M. Nonprofit Sector, State and Civil Society. (4) Formerly numbered CM290M.) Same as Public Policy M227 and Urban Planning M228.) Lecture, three hours; outside study, nine hours. Use of political economy perspective to analyze forces that have shaped rise and characteristics of nonprofit sector and its constituent elements. Examination of social history of nonprofit sector in U.S. Exploration of legal and policy environments and distinct organizational forms. Comparative perspective between U.S. and other countries. S/U or letter grading.

290T. Social Work and Juvenile Justice System. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Exploration of evolution of juvenile justice system in the U.S. and issues that have shaped current-day practice. Role of social workers in system to be theme throughout course. Letter grading.

290U. Community Development and Housing Policies: Roles of State, Civil Society, and Nonprofits. (4) Same as Public Policy M243 and Urban Planning M275.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of role of U.S. housing policy and role of government agencies and community organizations. Is problem housing or economic development? Should interventions be directed toward inner city housing markets or through neighborhood strategies? What lessons can be learned from experiences of other countries? Letter grading.

290V. Management Challenges and Tools for Nonprofit Sector. (4) Same as Public Policy M256 and Urban Planning M286.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of management tools useful in addressing issues of nonprofit management in nonprofit sector. Students develop management skills in strategic thinking/problem solving, project management, team building, and negotiation. Use of case studies to test critical management challenges, from finance to crisis management to marketing, that nonprofit managers typically face. Letter grading.

290W. International Social Welfare. (4) Lecture, three hours; outside study, nine hours. Intended for graduate students interested in pursuing analysis of key international social welfare issues. Topics approached from perspective of globalization of social, economic and political systems. Examination of global poverty, social injustice and inequality, and issues of racial, ethnic, and cultural diversity, with emphasis on multilayered contributions of social work, social services, and social welfare and international social development within rich and poor countries. Acquisition of knowledge of international social welfare activities, as well as analytical skills to address and debate complex international issues. S/U or letter grading.

290X. Graduation Seminar. (1-1-0) Seminar, to be arranged. Preparation: apprentice personnel placement as teaching assistant, associate, or fellow. Topics and approach vary, and the specific courses are to be arranged with the student and supervisor of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. Letter grading.

401A-401B-401C. Practicum; Social Work. (3-3-3) Laboratory, 20 hours. Educationally directed practicum conducted in selected health, welfare, and educational facilities. Provides opportunities for students to test their theoretical knowledge and to acquire disciplined practice foundation in profession. In Progress (401A, 401B) and S/U (401C) grading.

402A-402B-402C. Advanced Practicum; Social Work. (4-4-4) Laboratory, 24 hours. Requisites: courses 401A, 401B, 401C. Practicum in social work, arranged for students in keeping with their major field of study. In Progress (402A, 402B) and S/U (402C) grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.
596A. Special Study and Research in Social Welfare. (2 to 8) Tutorial, to be arranged. Individual programming for selected students to permit pursuit of subject in greater depth. S/U or letter grading.

596B. Special Study and Research for Ph.D. Candidates. (2 to 12) Tutorial, to be arranged. Limited to Ph.D. students. S/U grading.

597A. Preparation for M.S.W. Comprehensive Examination. (2 to 8) Tutorial, to be arranged. S/U grading.

597B. Preparation for Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged. Limited to Ph.D. students. S/U grading.

**Scope and Objectives**

The Human Biology and Society majors provide a rigorous interdisciplinary education in current issues at the intersection of human biology, genetics, and society where bridging the institutional divide between the life sciences and human sciences (humanities and social sciences) is necessary.

The teaching strategy emphasizes the value of synthetic, integrative thinking. Learning can best be organized synthetically around the sorts of knowledge and skills required to investigate and address such problems rather than by building up from the stepwise sequences of traditional disciplines. Preparation for the majors is centered on three areas of study that together prepare students to solve problems at the intersection of biology and society: genes and gene expression; human evolutionary biology; and society, diversity, and identity. The majors provide an important integrative space where different ways of knowing in the human and life sciences are explored, interrelated, and applied. Core and capstone courses emphasize problem-based learning about pressing issues of the time that are inextricably problems of society, culture, and biology. Students learn about genetically modified foods, forensic uses of DNA, new cloning technologies, gene testing and therapies, genetic privacy, gene patents, mapping DNA through human history, politics of race and heredity, genetics of behavior, and many other related topics, and become more active citizens, well-trained in both biological and social concepts and practices.

Programmatically, the majors consist of required elements that develop critical thinking skills, knowledge, and excellence in written and spoken communication; elective concentrations that allow students to focus on a particular emerging research area at the intersection of biology and society; and extracurricular involvement in academic research and corporate/community internship. The mission is to educate students who become leaders in diverse areas such as law, medicine, humanities, social sciences, and biological sciences, and to have them interact and work together to form a deep understanding of the issues at the intersection of human social systems, evolutionary biology, and genetics.

The minor in Society and Genetics provides undergraduate students with the opportunity to understand and probe the complex problems and possibilities presented by genetics, with special attention to their social context and content. Given the dynamic interaction between genetics and the social world in which it is embedded, the minor is robustly multidisciplinary.

The emphasis on multidisciplinary scholarship is reflected in the collaborative, cross-disciplinary approach to instruction in the core courses of the minor, as well as in the wide range of elective courses available in such areas as anthropology, biology, history, philosophy, public policy, and sociology.

**Undergraduate Study**

**Human Biology and Society B.A.**

**Human Biology and Society Premajor**

All students intending to major in Human Biology and Society must enroll as Human Biology and Society premajors after receiving a grade of B or better in Society and Genetics 5. After completing the premajor requirements with a minimum grade-point average of 2.9, students should petition to enter the major at the undergraduate counselor's office in 1308 Rolfe Hall.

**Preparation for the Major**

*Required: Anthropology 7, Chemistry and Biochemistry 14A, Life Sciences 1, 2, Society and Genetics 5, Statistics 10 or 13, one empirical social theory course from American Indian Studies M10, Anthropology 9, Asian American Studies 20, Geography 3, History 3C, Honors Collegium 70A, Human Complex Systems M10A, Molecular, Cell, and Developmental Biology 40, 50, Microbiology, Immunology, and Molecular Genetics 12, Public Policy 10A, or Sociology 1, and one normative social theory course from Molecular, Cell, and Developmental Biology 60, Philosophy 4, 6, 8, 22, Sociology M5, or Women's Studies 10. Each course must be taken for a letter grade, and students must complete all premajor courses with a minimum grade-point average of 2.9. Admission to the major is granted only after successful completion of all lower division requirements.

Enrollment in the program is limited. The required course is listed above for courses in the optional subfocus areas.

**Transfer Students**

Transfer applicants to the Human Biology and Society B.A. major with 90 or more units must complete at least five of the following seven preparatory courses prior to admission to UCLA: the equivalent of Life Sciences 1 and 2, introductory chemistry, statistics, one anthropology human evolution course, and two introductory social sciences or history courses. Society and Genetics 5 must be taken at UCLA once a transfer student is admitted to the University.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

**The Major**

*Required: Society and Genetics 101, 105A, 105B, 191R, Anthropology 193 and Society and Genetics 193 (or two terms of one of them); two total terms of any of Molecular, Cell, and Developmental Biology 199, Society and Genetics 195, and/or 196; and five courses from one of the following concentration areas, including at least one society and genetics course, selected in consultation with a departmental faculty member:*

Historical and Social Studies of Science: Anthropology M125A, 153P, 181, 182, 185A, Asian American Studies 105, Bioengineering 165EW, Biophysics 168, Biotechnology 169, Chemistry and Biochemistry 179A, Computer Science M131, Ecology and Evolutionary Biology 100, 120, 126, 130, 175, Environmental Health Sciences 100, C185A, C185B, Epidemiology 100, Geography M109, M115, Global Studies 100A, 100B, History M151C, 179A, 179B, 180A, 180C, Honors Collegium 177, Human Complex Systems M130, Human Genetics C144, Neurobiology M169, Philosophy 124, 125, 129, 130, 132, 155, Society and Genetics 102W, 130, 131, 161, 163, 175, 197, 199, Sociology M138, 143, 148, 154, 156, 170, Women's Studies 134, M162, M164, M180B. See below for courses in the optional subfocus areas of cell development, microbiology and immunology, molecular biology and genomics, physiology, and psychology and mental health.

Medicine and Public Health: Anthropology M134, Chicania and Chicano Studies M106, Communication Studies 116, M123W, Computer Science CM121, Disability Studies 101, M121, M124, M125, M126, M129, M130, M131, M132, M133, M134, M135, M136, M137, M138, M139, M140, Microbiology, Immunology, and Molecular Genetics 101, 185A, and one course from 103L, 106, 107, 158, or 168

Molecular Biology and Genomics: Molecular, Cell, and Developmental Biology 144, 172, and one course from CM156, Human Genetics CM124, C144, Microbiology, Immunology, and Molecular Genetics CM122, or 158

Physiology: Physiological Science 111A, 111B, and one course from 147, 149, or 177

Population Genetics: Two courses from Ecology and Evolutionary Biology 135, Human Genetics CM124, Society and Genetics 120, and one course from Ecology and Evolutionary Biology 120, 121, or Human Genetics C144

Human Biology and Society B.S.

Human Biology and Society Premajor
All students intending to major in Human Biology and Society must enroll as Human Biology and Society premajors after receiving a grade of B or better in Society and Genetics 5. After completing the premajor requirements with a minimum grade-point average of 2.5, students should petition to enter the major at the undergraduate counselor's office in 1308 Rolfe Hall.

Preparation for the Major
Required: Anthropology 7, Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, 14D (or 20A, 20B, 20L, 30A, 30AL, 30B, 30BL), Life Sciences 1, 2, 3, 4, Mathematics 3A, 3B, 3C (or 31A, 31B, 32A), Physics 1A, 1B, 1C, 4BL, 4AL (or 6A, 6B, 6C), Society and Genetics 5, Statistics 10 or 13, one empirical social theory course from American Indian Studies M10, Anthropology 9, Asian American Studies 20, Geography 3, History 3C, Human Complex Systems M10A, Microbiology, Immunology, and Molecular Genetics 12, Molecular, Cell, and Developmental Biology 40, 50, Public Policy 10A, or Sociology 1, and one normative social theory course from Molecular, Cell, and Developmental Biology 30, Philosophy 4, 6, 8, 22, Sociology M5, or Women's Studies 10. Each course must be taken for a letter grade, and students must complete all premajor courses with a minimum grade-point average of 2.5. Admission to the major is granted only after successful completion of all lower division requirements.

Enrollment in the program is limited. The requisite grade-point averages plus completion of the preparation for the major courses do not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration.

Transfer Students
Transfer applicants to the Human Biology and Society B.S. major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission. Students should also complete at least two of the following introductory courses prior to admission: one statistics course, one anthropology human evolution course, and two introductory social sciences or history courses. Society and Genetics 5 must be taken at UCLA once a transfer student is admitted to the University.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: Society and Genetics 102W, 105A, 105B, 191R; Anthropology 193 and Society and Genetics 193 (or two terms of one of them); two total terms of any of Molecular, Cell, and Developmental Biology 199, Society and Genetics 195, and/or 196; and five courses from one of the following concentration areas, including at least one society and genetics course, selected in consultation with a departmental faculty member:

Each course (except Anthropology 193 and Society and Genetics 193) must be taken for letter grade and passed with a grade of C− or better, and all courses must be completed with an overall 2.0 grade-point average.

Optional Subfocus Areas
Optional subfocus areas are designed and recommended for students planning to go on to medical, dental, or pharmacy schools, or graduate school in the life or health sciences. Students select one subfocus area and complete three courses within that area:

Cell Development: Molecular, Cell, and Developmental Biology 138, 165A, 168

Microbiology and Immunology: Microbiology, Immunology, and Molecular Genetics 101, 185A, and one course from 103L, 106, 107, 158, or 168

Molecular Biology and Genomics: Molecular, Cell, and Developmental Biology 144, 172, and one course from CM156, Human Genetics CM124, C144, Microbiology, Immunology, and Molecular Genetics CM122, or 158

Physiology: Physiological Science 111A, 111B, and one course from 147, 149, or 177

Population Genetics: Two courses from Ecology and Evolutionary Biology 135, Human Genetics CM124, Society and Genetics 120, and one course from Ecology and Evolutionary Biology 120, 121, or Human Genetics C144

Human Biology and Society B.S.
M114, 125, 134, M162, M164, 171A. See below for courses in the optional subfocus areas of cell development, microbiology and immunology, molecular biology and genomics, physiology, and psychology and mental health.

**Historical and Social Studies of Science:** Anthropology M125A, 153P, 181, 182, 185A, Asian American Studies 105, Bioengineering 165EW, Disability Studies 101, M121, Ecology and Evolutionary Biology 100, 120, 126, 130, 175, Environmental Health Sciences 100, C185A, C185B, Epidemiology 100, Geography M109, M115, Global Studies 100A, 100B, History M151C, 179A, 179B, 180A, 180C, Honors Collegium 177, Human Complex Systems M130, Human Genetics C144, Neurobiology M169, Philosophy 124, 125, 129, 130, 132, 155, Society and Genetics 130, 131, 161, 163, 175, 197, 199, Sociology M138, 143, 148, 154, 156, 170, Women's Studies 134, M162, M164, M180B. See below for courses in the optional subfocus areas of cell development, microbiology and immunology, molecular biology and genomics, physiology, and psychology and mental health.

**Medicine and Public Health:** Anthropology M134, Chicana and Chicano Studies M108, Communication Studies 116, M123W, Computer Science CM121, Disability Studies 101, M121, Epidemiology 100, History M151C, Human Complex Systems M130, Human Genetics C144, Neurobiology M169, Philosophy 124, 125, 129, 130, 132, 155, Society and Genetics 130, 131, 161, 163, 175, 197, 199, Sociology M138, 143, 148, 154, 156, 170, Women's Studies 134, M162, M164, M180B. See below for courses in the optional subfocus areas of cell development, microbiology and immunology, molecular biology and genomics, physiology, and psychology and mental health.

Each course (except Anthropology 193 and Society and Genetics 193) must be taken for letter grade and passed with a grade of C- or better, and all courses must be completed with an overall 2.0 grade-point average.

**Optional Subfocus Areas**

Optional subfocus areas are designed and recommended for students planning to go on to medical, dental, or pharmacy school, or graduate school in the life or health sciences. Students select one subfocus area and complete three courses within that area:

- **Cell Development:** Molecular, Cell, and Developmental Biology 138, 165A, 168

- **Ecology and Evolutionary Biology:** Three courses from Anthropology 121C, 124A, 124P, M125A, 128A, Ecology and Evolutionary Biology 100, 116, 120, 121, 126, 129, 130, 135, 175, 176

- **Microbiology and Immunology:** Microbiology, Immunology, and Molecular Genetics 101, 185A, and one course from 103L, 106, 107, 158, or 168

- **Molecular Biology and Genomics:** Molecular, Cell, and Developmental Biology 144, 172, and one course from CM156, Human Genetics CM124, C144, Microbiology, Immunology, and Molecular Genetics CM122, or 158

- **Physiology:** Physiological Science 111A, 111B, and one course from 147, 149, or 177

**Population Genetics:** Two courses from Ecology and Evolutionary Biology 135, Human Genetics CM124, Society and Genetics 120, and one course from Ecology and Evolutionary Biology 120, 121, or Human Genetics C144

**Psychology and Mental Health:** Three courses from Psychology M107, 112A, 112B, 115, M117J, 127A, 129C, 160

**Honors Program**

To receive departmental honors, students must take each course in the major (except Anthropology 193 and Society and Genetics 193) for a letter grade and complete all upper division courses in the major with an overall grade-point average of 3.5 or better. For highest departmental honors, students must take Society and Genetics 199 in which they write a research paper in their major concentration area and receive a grade of A or better.

**Society and Genetics Minor**

To enter the Society and Genetics minor, students must (1) have an overall grade-point average of 2.5 or better and (2) file a petition at the undergraduate counselor's office in 1308 Rolfe Hall no later than three terms before graduation. They are encouraged to declare the minor as early as possible and to discuss their proposed course of study with the undergraduates adviser.

**Required Upper Division Courses (30 to 34 units):**

1. (1) Society and Genetics 101 or, for life sciences majors, a 4- or 5-unit upper division elective course from the approved list of courses issued each term by the program, (2) course 102W, (3) course 191, and (4) at least four upper division elective courses (minimum 16 units) from the approved list. One individual research tutorial (course 199) may be applied; enrollment in additional 199 courses may be considered by petition.

Students may petition to have a course not on the approved list applied toward the four-course elective requirement.

No more than one upper division course may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

**Society and Genetics**

**Lower Division Course**

5. Integrative Approaches to Human Biology and Society. (5) Lecture, three hours; discussion, one hour. Introduction to concept of problem-based approaches to study of biology and society and areas of concentration, such as biotechnology and public science policy, evolutionary biology, culture, and behavior, historical and social studies of life sciences, medical genetics and public health, and population genetics and history, and central thematic issues shared across concentrations, such as commercialization of life and public understanding of science. Letter grading.

**Upper Division Courses**

101. Genetic Concepts for Human Sciences. (5) Lecture, three hours; discussion, one hour. Not open to credit for students with credit for Life Sciences 4. Focused treatment of selected complex genetic concepts from molecular biology, population and quantitative genetics, and evolutionary biology, with emphasis on gene-environment interaction at various levels and culminating in exploration of notion of coevolution of genotypes and society. Basic science concepts presented through real-world issues and research problems. Current research on cancer, immune system and development, and how this research is performed and adds to knowledge. Letter grading.

102W. DNA: Promise and Peril. (5) Formerly numbered M102W. Lecture, three hours; discussion, one hour. Enforced prerequisite: English Composition 3 or 3H or English as a Second Language 36. Sequence of events required personal genome is now available to us. Consideration of impact that knowledge of this genomic sequence has on concepts of ourselves as individuals and of our place in biological universe. Exploration of how this information influences concepts of race/ethnicity and gender. Examination of ability of DNA-based forensics to identify specific individuals. Ownership and commodification of genes. Discussion of human cloning for reproductive and therapeutic purposes. Human Genome Project influence on not just medicine, but our concepts of self and identity. Satisfies Writing II requirement. Letter grading.

105A. Ways of Knowing in Life and Human Sciences (4) Lecture, three hours. Enforced requisite: course 5. Introduction to study of epistemology to train students to recognize different ways of knowing what we know. In life and human sciences, instruments and methods are use to study, measure, and experiment. Exploration of how they are manifest in technologies and fields.
that cut across disciplines to help students evaluate explanatory models, standards of proof, and qualitative versus quantitative research orientations. DNA sequencing, tissue cultures, bioinformatics, statistics, photography and cinema, charts, trees, and databases. DNA sequencing is used to study gene functions, evolution, and disease. We will discuss the role in legal context to reconstruct aspects of human history or to trace identity of people. Databases play role in life sciences in administrative, commercial, and legal contexts. DNA is used in sciences and medicine (e.g., X-ray photography), as well as in art and forensics. Letter grading.

105B. Problems of Identity at Biology/Society Interface. (4) Lecture, three hours. Enforced requisites: course 5B. Study of formation of identities and forms of life sciences in administrative, commercial, and legal contexts. DNA is used in sciences and medicine (e.g., X-ray photography), as well as in art and forensics. Letter grading.

120. Using Genetics to Infer Human History. (4) Seminar, three hours. DNA elucidates human history in ways that traditional historical investigation sometimes cannot. Introduction to tools for non-specialists. Discussion of practical and theoretical background (e.g., challenges of using ancient DNA, population genetic theory) necessary to critically evaluate genetic history studies. Prehistoric and historical data about who we are as members of human and non-human species. Focus on how genetic analysis has been used to investigate major agricultural expansions in Europe, and resulting impact on current and past populations of human and non-human species. Discussion of implications for understanding human and non-human history and the role of social factors in shaping human and non-human history. Letter grading.

126. Biotechnologies, Law, and Body. (4) Seminar, three hours. Nature and authority of human bodies, how they are constructed and used. Historical and philosophical analysis of how law has shaped and continues to shape the construction and use of human bodies. Consideration of what rights are associated with human bodies and how these rights can be used to support or restrict genetic research and development. Letter grading.

163. Science and Popular Movements: Controversies. (4) Seminar, three hours. Exploration of how science intersects with social movements and how social movements intersect with science. Topics will vary and may include race, obesity and nutrition, autism, deafness or blindness, inequality. Examination of governments' use of science and technology to reconstruct aspects of human history. Letter grading.

180. Special Courses in Society and Genetics. (4) Lecture, three hours. Departmentally sponsored experimental or temporary courses on selected topics, such as those taught by visiting faculty members. May be repeated for credit with topic change. Letter grading.

188. Special Courses in Society and Genetics. (4) Seminar, three hours. Departmentally sponsored experimental or temporary courses on selected topics, such as those taught by visiting faculty members. May be repeated for credit with topic change. Letter grading.

190. Research Colloquia in Society and Genetics. (1) Seminar. Limited to juniors/seniors. Designed to bring together advanced undergraduate students undertaking faculty-supervised tutorial research to discuss their own work or related work in society and genetics. May be repeated once for credit with topic change. P/NP grading.

191S. Capstone Seminar: Society and Genetics. (5) Seminar, three hours. Enforced requisites: courses 105A, 105B. Students bring their accumulated interdisciplinary knowledge and methodological tools to bear on one contemporary problem at intersection of biology and society. Letter grading.

191S. Capstone Seminar: Society and Genetics. (5) Seminar, three hours. Enforced requisites: courses 105A, 105B. Students bring their accumulated interdisciplinary knowledge and methodological tools to bear on one contemporary problem at intersection of biology and society. Letter grading.

195. Community or Corporate Internships in Society and Genetics. (2) Tutorial, to be arranged; fieldwork, six hours. Enforced requisites: course 102W or 102R. Limited to juniors/seniors. Study of how genetic inheritance is used to reconstruct aspects of human history. Letter grading.

195. Community or Corporate Internships in Society and Genetics. (2) Tutorial, to be arranged; fieldwork, six hours. Enforced requisites: course 102W or 102R. Limited to juniors/seniors. Study of how genetic inheritance is used to reconstruct aspects of human history. Letter grading.

Ka-Yuet Liu, Ph.D.
Gabriel Rossman, Ph.D.
Edward T. Walker, Ph.D.

Associate Professors
Jennie E. Brand, Ph.D.
Ruben Hernandez-Leon, Ph.D.
Hannah L. Landecker, Ph.D.
Mignon R. Moore, Ph.D.
Meredith Phillips, Ph.D.
Abigail C. Saguy, Ph.D.
Tanya Stivers, Ph.D.
Megan McDonnell Sweeney, Ph.D.

Assistant Professors
Stefan Bargheer, Ph.D.
Richard D. Granits, Ph.D.

Adjunct Associate Professor
Ana Maria Goldani, Ph.D.

Scope and Objectives

Sociology is the study of the organization, dynamics, and consequences of social life. The scope of the discipline is as broad and diverse as social life itself. Sociologists study social interaction and relationships, organizations and institutions, communities and whole societies. The methods of sociological investigation are also varied: sociologists immerse themselves in the daily life of groups, interview group participants, examine recorded interaction, interpret historical documents, analyze census data, and conduct large surveys. The methods and concepts of sociological study yield powerful insights into the social processes shaping lives, problems, and possibilities in contemporary society. The capacity to identify and understand these processes — a capacity that C.W. Mills called the "sociological imagination" — is valuable preparation for personal and professional participation in a changing and complex world.

In addition to contributing to a liberal arts education, the Sociology major prepares individuals for a broad range of career options and graduate and professional studies. The analytic perspectives and skills gained in the major are a foundation for careers in law, social welfare, urban planning, business, education, and public health. The major also provides a foundation for students intending to pursue graduate work in sociology and related fields. Employment opportunities available to the graduate with a Bachelor of Arts degree in Sociology also include work in community service organizations and health agencies, government service, and human resources.

The Sociology Department faculty includes internationally renowned scholars who address topics ranging in scope from the organization of face-to-face interaction to the consequences of globalization. The department boasts outstanding teachers — five of whom have won Distinguished Teaching Awards — and excellently trained teaching assistants, many of whom have also won awards. The select honors program has a record for training students in the fundamentals of research and generating honors theses of substantial accomplishment.

The Ph.D. in Sociology usually leads to a career in research and/or teaching. Although most sociologists are employed by universities, there are increasing career opportunities in government and other nonuniversity research centers.

Undergraduate Study

Sociology B.A.

Sociology Premajor

Only students with less than 90 units completed (excluding Advanced Placement units/credit) may declare the Sociology premajor once they complete either Sociology 1 or 20 with a grade of C or better.

Preparation for the Major

Required: Sociology 1, 20; one course from Mathematics 2, 3A, or 31A; one course from Statistics 10, 11, 13, or Psychology 100A.

A minimum grade of C is required in each preparation for the major course. Students with a grade-point average less than 2.5 in the preparation coursework are not eligible for admission to the major. Students who repeat any preparation course more than once are automatically denied admission to the major.

Freshman Students

Students must petition to declare the Sociology major. All preparation for the major courses should be completed by the end of the Fall Quarter of the third year at UCLA. If Sociology 101 or 102 has already been completed, a grade of C or better is required. Grades in any other completed sociology courses for the major must be C– or better.

Transfer Students

Transfer applicants to the Sociology premajor with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introduction to sociology course, one finite mathematics or calculus course, and one statistics course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.
The Major
Required: Eleven upper division courses, including (1) two theory courses — Sociology 101, 102; (2) one methods course from Sociology 113 or Statistics 112; (3) one course from each of the following core areas: (a) interactions — Sociology 111, 119, M124A, CM125, 130, 132, 133, 134, (b) institutions and social processes — courses 116, 143, 158, 173, M174, M175, M176, (c) power and inequality — courses 156, 157, M161, M162, M165, 182, 183, 185; and (4) any five upper division sociology elective courses.

Students should complete course 101 and the core courses before taking other upper division courses. Each course for the major must be taken for a letter grade. To graduate, students must have at least a 2.0 grade-point average in their upper division major courses, with grades of C or better in Sociology 101 and 102.

Only 8 units of Sociology 199 are allowed. The two theory courses, three core area courses, and one sociology elective (six courses total) must be taken while in residence in the College of Letters and Science at UCLA.

Honors Program
The honors program in sociology provides opportunity for outstanding students to undertake an independent year-long research project under the guidance of a faculty member. Students who successfully complete the honors program graduate with departmental honors.

As preparation for the honors program, students must complete all preparation for the major courses.

After acceptance into the honors program, students are required to take courses 191H, 196A, 198B, and 198C (honors thesis seminars) which may be applied as electives toward the major requirements.

Students must have a 3.5 overall grade-point average, have completed the sociology preparation requirements and, in most cases, have completed the required theory course. Applications are available from the Undergraduate Counselor's Office, 254E Haines Hall.

Computing Specialization
Majors in Sociology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the major, (2) completing Program in Computing 10A, 10B, 10C, and (3) completing Sociology 112, 113. Each course must be taken for a letter grade. Students graduate with a bachelor's degree in sociology and a specialization in Computing.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Sociology offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Sociology.

Sociology
Lower Division Courses
1. Introductory Sociology. (5) Lecture. Four hours; discussion, one hour. Survey of characteristics of social life, processes of social interaction, and tools of sociological analysis of social phenomena. P/NP or letter grading.

Sociology Organization of Black Communities. (5) (Same as Afro-American Studies M5.) Lecture, four hours; discussion, one hour; field trips. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues. Letter grading.

10. Social Thought and Origins of Sociology. (5) Lecture, three hours; discussion, two hours. Introduction to history of social thought, with special emphasis on theoretical precursors to development of discipline of sociology. Examination and analysis of selected social theorists and concepts, especially from the 17th to 19th centuries. Letter grading.

20. Introduction to Sociological Research Methods. (5) Lecture, three hours; discussion, one hour. Introduction to methods and data, sociological research, with focus on issues of research design, data collection, and analysis of data. Fieldwork may be required. Letter grading.

88A-88Z. Lower Division Seminars. (1 each) Seminar, one hour. Limited to 15 freshmen/sophomores. Variable topics of current sociological interest. Consult Schedule of Classes or "Department Announcements" for topics and instructors. P/NP grading.

Upper Division Courses
101. Development of Sociological Theory. (5) Lecture, three hours; discussion, one hour. Comparative survey of basic concepts and theories in sociology from 1850 to 1920. P/NP or letter grading.

106A. Field Research Methods I. (6) Lecture, two hours; discussion, two hours; fieldwork, eight to 10 hours. Research practicum in which students write field notes on their experiences in and observations of intensive internship field placement. Readings focus on fieldwork roles and relations, observing and describing, writing field notes, field interviewing, ethical issues, and preliminary data analysis. Fieldwork and extensive field notes required. Letter grading.

106B. Field Research Methods II. (6) Lecture, two hours; discussion, two hours; fieldwork, 10 hours. Requisite: course 106A. Collection and analysis of both field notes and unstructured interview data from student field placement. Use of techniques of qualitative data analysis, including qualitative coding, analytic memoing, and use of theory methods. Analysis and write up of these materials and to write ethnographic paper. Letter grading.

110. Sociological Methods. (4) Lecture, three hours; discussion, one hour. Course open to juniors/seniors. General problems of scientific abstraction, generalization, inference, and verification and particular problems of historical specification, comparison, and counterfactual reasoning in constructing and testing replicable explanation of historical event. P/NP or letter grading.

111. Social Networks. (4) Lecture, three hours; laboratory, one hour. Analysis of how social networks create social structure in which social actors utilize them, and their unexpected effects. Topics include job search, finding efficiency, and social movements. Visualization programs, computer simulations, and research project. P/NP or letter grading.

112. Introduction to Mathematical Sociology. (4) Lecture, three hours; laboratory, one hour. Requisites: Mathematics 2, 3A (course whose content includes introductions to probability theory, matrix algebra, and differential and integral calculus). Statistics 10. Mathematical treatment of several sociological phenomena, such as occupational mobility, population growth, organizational structure, and friendship patterns, each covered in some detail, including initial development and subsequent evaluation and modification (emphasizing both deductive and computational aspects of mathematics). Letter grading.

113. Statistical and Computer Methods for Social Research. (4) Lecture, three hours; laboratory, one hour. Requisites: Statistics 10. Combination of Statistics 10, covering more advanced statistical techniques such as multiple regression, analysis of variance, or factor analysis. Content varies, but students learn how to use computer and write papers analyzing prepared data sets. P/NP or letter grading.

114A-114B. Introduction to Scientific Sociology. (4) Lecture, three hours; discussion, one hour. How to make testable arguments about social reality; how to make and test causal arguments. How to use computer and write papers analyzing prepared data sets. P/NP or letter grading.

M115. Environmental Sociology. (4) (Same as Environmental M133.) Lecture, three hours; discussion, one hour. Relationship between society and environment. Analysis of detail of interactions between social factors (such as class, race, gender, and religion) and environmental factors (such as pollution, waste disposal, sustainability, and global warming). P/NP or letter grading.

117. Family Demography. (4) Lecture, three hours; discussion, one hour. Examination of demographic behavior, such as marriage, fertility, and changes associated with family and household organization. Sociological approach to understanding causes and consequences of trends and differentials in family formation and dissolution. P/NP or letter grading.

M118. Simulating Society: Exploring Artificial Communities. (5) (Same as Honors College M148.) Seminar, three hours; computer laboratory, one hour. Examination of social behavior through computer simulations of behavior in artificial communities. P/NP or letter grading.

119. Primate Societies. (4) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Selected topics in the diverse behaviors and cultural forms of primate cousins, with special focus on baboons, chimpanzees, and gorillas. Examination of primate sociocology, sexual competition, demography and kinship, politics, communication, and interactions within and between groups. Implications for our lives as human primates. P/NP or letter grading.

M124A-M124B. Conversational Structures I, II. (4-4) (Same as Communication Studies M144A-M144B.) Lecture, three hours; discussion, one hour. P/NP or letter grading. M124A. Introduction to some structures that are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions. M124B. Requisite: course M124A. Consideration of some more expanded se-
quenence structures, story structures, topical sequences, and overall structural organization of single conversations.

CM125. Talk and Social Institutions. (4) (Same as Communication Studies M125.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Practices of communication and social interaction in numberous settings. Setting varies but includes emergency services, police and courts, medicine, news interviews, and political offices. Concurrently scheduled with course C256. P/NP or letter grading.

126. Study of Norms. (4) Lecture, three hours; discussion, one hour. Properties of norms, of normatively governed conduct, of lay and professional methods for describing, measuring, and validating norms; in contrasting settings of socially organized activities; relevance of these properties for programmatic problems of analytic sociology. Fieldwork required. P/NP or letter grading.

127. Mind and Society. (4) Lecture, two and one-half hours; discussion, one hour. Requisite: course 1. Study of social production of modes of thought and forms of knowledge. Study of ways in which bodies of knowledge and cognitive styles are produced, used, and transformed in everyday, organizational, and extraordinary contexts. P/NP or letter grading.

128. Sociology of Emotions. (4) Lecture, three hours; discussion, one hour. Requisite: course 1. Designed for juniors/seniors. Sociological theories and explanations of social conditions shaping and producing emotional experiences; effects of individual expression of emotions on social conditions; relations between thought, sensations, and emotions; self and emotions; social construction of emotions. P/NP or letter grading.

129. Sociology of Time. (4) Lecture, three hours; discussion, one hour. Conceptualizations of time seen from scientific, philosophical, historical, and sociological perspectives; “cyclical” and “linear” time in primitive, ancient, and modern societies; ritual, sacred, and experience of the eternal; structuring of urban, modern, and postmodern societies by clock, calendar, and schedule; future value orientation and notion of progress; time, labor, and social domination. P/NP or letter grading.

130. Self and Society. (4) Lecture, three hours; discussion, one hour. Examination of social processes shaping experience, definition, and enactment of self and others in individual society. P/NP or letter grading.

132. Social Psychology: Sociological Approaches. (4) Lecture, three hours; discussion, one hour. Survey of contribution of sociologists to theory and research in social psychology. Including theories of social control; conformity and deviation; reference groups; and intergroup processes through which youth become involved in juvenile delinquency or labor in Mexico-U.S. context. Requisite: course 1. P/NP or letter grading.

133. Collective Behavior. (4) Lecture, three hours; discussion, one hour. Requisite: course 1. Designed for juniors/seniors. Characteristics of crowds, mobs, publics, social movements, and revolutions; their relation to social unrest and their role in developing and changing social organization. P/NP or letter grading.

135. Group Processes. (4) Lecture, three hours; discussion, one hour. Systematic study of formation, structure, and functioning of groups; analysis of group processes and group products from variety of theoretical viewpoints; implications of various research techniques. P/NP or letter grading.

M138. Death, Suicide, and Trauma. (4) (Same as Psychology M163.) Lecture, three hours; discussion, one hour. Sociological analysis of incidence of violent death. Suicide is eight leading cause of death in U.S. and third leading cause for young people aged 15 to 24. Both types of deaths are often dismissed as extreme psychopathology, reflecting individual mental health issues. Sociologists argue that suicide and homicide are social facts. Suicide and homicide do not occur randomly in society but are stratified according to social factors such as age, gender, race, sexual orientation, and class. An important sociological argument and evaluation of explanatory potential of different theories to make sense of violent death; paying particular attention to forensic and medicolegal systems, detectives, and forensic pathologists. Review of historic and contemporary studies to examine how research and conceptualizations of suicide and homicide have changed, as well as social responses to these phenomena. P/NP or letter grading.

141A. Migration and Labor in Mexico-U.S. Context. (5) Seminar, 20 hours. Mexico-U.S. migration is largest and oldest continuous international population flow of contemporary world. In recent decades, prompted by swift economic transformations, rural and urban Mexican Americans, police and courts, medicine, news interviews, and political offices. Concurrently scheduled with course C256. P/NP or letter grading.

141B. Migration and Labor in Mexico-U.S. Context: Research Seminar. (5) Seminar, 10 hours; fieldwork, 10 hours. Development of qualitative micro-study and research paper. Research of one particular community in Mexico-U.S. context. Research topic of interest to be selected so students become familiar with commonly employed qualitative methods of research. Designed to help students understand ethnographic methods of methodological reasoning; how to formulate research questions, and how to frame and investigate one particular issue related to migration and labor. How to make ethical decisions about conducting research. Development of student abilities as researchers by conducting secondary and research study on golden ager research paper to be presented to faculty members and peers. Offered in summer only. Letter grading.

M142. Healthcare in Transitional Communities. (4) (Same as Public Health M151.) Lecture, three hours; discussion, one hour. Analysis of social, cultural, economic, and political processes affecting organization and accessibility of healthcare in transitional and disadvantaged communities. Fieldwork required. Letter grading.

145. Sociology of Deviant Behavior. (4) Lecture, three hours; discussion, one hour. Examination of leading sociological approaches to study of deviant and general survey of major types of deviance in American society. P/NP or letter grading.

C146. Sociology of Interpersonal Conflict. (4) Lecture, three hours; discussion, one hour. Origins, development, and resolution of interpersonal conflicts and adjustment of conflict and its consequences. P/NP or letter grading.

147A. Sociology of Crime. (4) Lecture, three hours; discussion, one hour. Sociological theories of social origins, organization, and meanings of crime and criminal behavior. P/NP or letter grading.

147B. Sociology of Criminal Justice. (4) Lecture, three hours; discussion, one hour. Examination of structures and routine decision-making processes of key criminal justice institutions, including police, courts, probation and parole, jails and prisons. P/NP or letter grading.

149. Youth, Trouble, and Juvenile Justice. (4) Lecture, three hours; discussion, one hour. Requisite: course 1. Examination of processes through which youth become involved in juvenile justice system. Analysis of this system as people-processing and people-changing institution as context for considering critical issues in juvenile justice. P/NP or letter grading.

M150. Sociology of Aging. (4) (Same as Gerontology M150.) Lecture, three hours; discussion, one hour. Role of older people in family, communities, and society; aging as process; aging and society; social policies; and role of sociology in helping to improve the lives of older people. P/NP or letter grading.

152. Comparative Acculturation and Assimilation. (4) Lecture, three hours; discussion, one hour. Requisite: course 151. Comparison of acculturation and assimilation of Europeans, Africans, Mexicans, and Asians in the U.S., with emphasis on long-term cultural consequences of immigration. P/NP or letter grading.

M153. Chinese Immigration. (4) (Same as Asian American Studies M130C.) Lecture, three hours; discussion, one hour. Requisite: course 151. Exploration of sociological studies of Chinese immigration, with focus on international context, organization, and institutions of Chinese American society and its interactions with social environment. P/NP or letter grading.

154. Race and Ethnicity: International Perspectives. (4) Lecture, three hours; discussion, one hour. Not open to freshmen. Role of race and ethnicity in political, economic, and social lives of nations other than the U.S. P/NP or letter grading.

M155. Latinos in U.S. (4) (Same as Chicana and Chicano Studies M155.) Lecture, three hours; discussion, one hour. Requisite: course 151. Study of historical and social conditions of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in larger social structure and on comparisons with other minority groups in immigration, family, education, and work issues. P/NP or letter grading.

156. Race and Ethnicity in American Life. (4) Lecture, three hours; discussion, one hour. Role of race and ethnicity in the U.S., including interplay between racial and ethnic structures and meanings. Special attention to comparison of African American and European American experiences and to transformation of Asian American and Latino communities and the nation generally, brought by renewal of mass migration in second half of the 20th century. P/NP or letter grading.

157. Social Stratification. (4) Lecture, three hours; discussion, one hour. Requisite: course 151. Study of social structure in terms of evaluational differentiation. Topics include criteria for differentiation, bases for evaluation, types of stratification, composition of strata and status systems, mobility, consequences of stratification, and problems of methodology. P/NP or letter grading.

159. Comparative Studies of Jewish Communities in the U.S. and Abroad. (4) Lecture, three hours; discussion, one hour. History, distribution, structure, and functioning of major Jewish communities, with particular emphasis on North America and Israel. Interrelationships and sources of conflict between Jews and Gentiles in Western countries. More generally, eco-
nomic and social integration of Diaspora Jewish com-
munities. Fieldwork may be required. P/NP or letter grading.

160. Intergroup Conflict and Prejudice. (4) Lecture, three hours; discussion, one hour. Study of causes and consequences of group conflict, with emphasis on majority/minority relations, prejudice, and discrimina-
tion. Special emphasis on alternative sociological and psychological theories of prejudice; effects of minority status on individuals; and possibilities for attitude and behavior change. P/NP or letter grading.

M161. Comparative American Indian Societies. (4) (Same as American Indian Studies M161.) Lecture, three hours. Requisite: course 1 or American Indian Studies M10. Comparative and historical study of politi-
cal, economic, and cultural changes in indigenous North American societies. Several theories of social change, applied to selected case studies. Letter grading.

M162. Sociology of Gender. (4) (Same as Women’s Studies M162.) Lecture, three hours. Requisite: course 1 or Women’s Studies 10. Ex-
amination of processes by which gender is socially con-
structed. Topics include distinction between biolog-
ical sex and sociological gender, causes and conse-
quences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.

M163. Gender and Work. (4) (Same as Women’s Studies M163.) Lecture, three hours. Requisite: course 1 or Women’s Studies 10. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality. P/NP or letter grading.

M164. Post-Reproductive. (4) (Same as Wom-
en’s Studies M164.) Lecture, three hours; discussion, one hour. Title refers to intersection between politics and life cycle. Topics include social construction of gender and reproductive issues, policies and politics of motherhood, motherhood, and surroga-
cy, and new reproductive technologies. Letter grading.

M165. Sociology of Race and Labor. (4) (Same as Afro-American Studies M165 and Labor and Work-
place Studies M165.) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Exploration of rel-
ationship between race/ethnicity, employment, and U.S. labor movement. Analysis of underlying racial di-
 visions in industry and industrialized societies. Legalization of consideration of circumstances under which workers and unions have excluded people of color from jobs and unions. Emphasis on changing circumstances under which workers and unions have organized people of color into unions in efforts to improve their wages and work-
ing conditions. Impact of globalization on these dy-
namics. P/NP or letter grading.

M166. Women in Socialist and Post-Socialist States. (4) (Same as Women’s Studies M166.) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Exploration of diverse aspects of women’s lives in socialist and post-
socialist states. Although transition from socialism may dif-
curiously, gender differences are everywhere central to democratization and marketization. Discus-
'sion of ways in which state policies affect women. Let-
ter grading.

168. Organizations and Society. (4) Lecture, three hours; discussion, one hour. Sociological analysis of organizations and their social environment. Introduc-
tion to basic theories, concepts, methods, and re-
search on behavior of organizations in society. P/NP or letter grading.

169. Law and Society. (4) Lecture, three hours; dis-
cussion, one hour. Specific topics may include law in preindustrial and industrialized societies, legalization and decolonization, development and underdevelop-
ment of law, legal and illegal forms, public and private auspices. P/NP or letter grading.

170. Medical Sociology. (4) Lecture, three hours; dis-
cussion, one hour. Requisite: course 1. Provides ma-
jors in Sociology and other social sciences, as well as students preparing for health sciences careers, with understanding of health-seeking behavior and inter-
personal and organizational relations that are involved in receipt and delivery of health services. P/NP or letter grading.

171. Occupations and Professions. (4) Lecture, three hours; discussion, one hour. Description and analysis of representative occupations and profes-
sions, with emphasis on contemporary U.S. P/NP or letter grading.

172. Entrepreneurship. (4) Lecture, three hours; dis-
cussion, one hour. Description and analysis of entre-
preneurship, with special reference to economic and political development. Country and specific focus varies each term. P/NP or letter grading.

173. Economy and Society. (4) Lecture, three hours; dis-
cussion, one hour. Sociology of economic life, with emphasis on principal economic institutions of the U.S. P/NP or letter grading.

174. Sociology of the Family. (4) (Same as Wom-
en’s Studies M174.) Lecture, three hours; discussion, one hour. Theory and research dealing with modern family, its structure, and functions, including historical changes, variant family patterns, family as an institu-
tion, and influence of contemporary society on the fam-
ily. P/NP or letter grading.

175. Sociology of Education. (5) (Same as Educa-
tion M108.) Lecture, four hours; discussion, one hour. Study of how U.S. educational system both promotes socioeconomic aspirations, maintains socioeconomic inequalities: historical and theoretical perspec-
tives on role of education in U.S. society; trends in edu-
cational attainment; ways in which family background, class, race, and gender affect educational achieve-
ment and attainment; stratification between and within schools; effects of education on socioeconomic attain-
ment, family, health, attitudes, and social participation; educational policies and their consequences. P/NP or letter grading.

176. Sociology of Mass Communication. (4) (Same as Communication Studies M147.) Lecture, four hours; discussion, one hour. Limited to juniors/seniors. Studies in relationship between mass communication and social organization. Topics include history and or-
ganization of major media institutions, social forces that shape production of mass media news and enter-
tainment, selected studies in media content, and ef-
tects of media on society. P/NP or letter grading.

178. Sociology of Caribbean. (4) (Same as Afro-
American Studies M178.) Lecture, three hours; dis-
cussion, one hour. Limited to juniors/seniors. Historical soci-
ology of Caribbean, with emphasis on colonialism and decolonization, development and underdevelop-
ment of Caribbean, political economy, race relations, nationalism and migration. P/NP or letter grading.

179. Comparative East Asian Societies. (4) Lec-
ture, three hours; discussion, one hour. Designed for juniors/seniors. Introductory and comparative survey of traditional societies of East Asia, including China, Ja-
pan, Korea, and Vietnam, with focus on dynamic inter-
actions between culture, state, and society in process of change. P/NP or letter grading.

180A-180B. Special Topics in Sociology. (4 each) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Study of selected topics of sociological interest. Consult with instructor on topics and in-
structors. May be repeated for credit and may be ap-
plicated as elective units toward Sociology major. P/NP or letter grading.

181. State and Society in China. (4) Lecture, three hours; discussion, one hour. Development for juniors/se-
niors. Thematic overview of post-1949 society and pol-
itical development. Country and specific focus varies each term. Reading, discussion, and development of culminating project. Letter grading.

191A. Undergraduate Seminar: Self and Identity. (5) Seminar, three hours. Limited to junior/senior Soci-
ology majors. Examination of the social and interac-
tional contexts shaping definition, enactment, and experience of self. Reading, discussion, and de-
veloping culminating project. Letter grading.

191B. Undergraduate Seminar: Sociology of Hu-
mor and Laughter. (5) Seminar, three hours. Limited to junior/senior Sociology majors. Selected topics. Reading, discussion, and development of culminating project. Letter grading.

191C. Undergraduate Seminar: Money and Emo-
tions. (5) Seminar, three hours. Limited to junior/se-
nior Sociology majors. Selected topics. Reading, dis-
cussion, and development of culminating project. Let-
ter grading.

191D. Undergraduate Seminar: Sociology of Devel-
opment. (5) Seminar, three hours. Limited to juniors/
seniors. Taught in Spanish. Selected topics on develop-
ment in Third World from global perspective. Read-
ing, discussion, and development of culminating proj-
et Letter grading.

M191DC. CAPPP Washington, DC, Research Semi-
nars. (8) (Same as History M191DC and Political Sci-
cies M191DC.) Seminar, two to four hours. Limited to CAPPP Program students. Seminars for undergraduate students in Center for American Pol-
itics and Public Policy’s program in Washington, DC. Focus on development and maintenance of empir-
ical research based on experiences from Washington, DC-based field placements. Study of variety of qualita-
tive methods (observation, interviewing, etc.), with comparison to quantitative analysis. Examination of features of solid and significant research; intensive writing. Letter grading.

191E. Undergraduate Seminar: Population Growth Models. (5) Seminar, three hours. Limited to juniors/
seniors. Selected topics. Reading, discussion, and de-
velopment of culminating project. Letter grading.

191F. Undergraduate Seminar: Sociology of Glo-
balization. (5) Seminar, three hours. Limited to ju-
niors/seniors. Great extensibility of social relations across globe has occurred over last 50 years. What are causes and mechanisms of this process, how far has it transformed human societies, and how far will it go in future? Economic, cultural, political, and military aspects of globalization, with focus on extent to which global expansion of capitalism, nation-state system, and international institutions are similar or different from each other, producing new lines of division and conflict across world. Reading, discussion, and development of culminating project. Letter grading.

191H. Honors Seminars: Sociology. (4) Seminar, three hours. Limited to sophomores with honors standing, pro-
ducing scholarly sociological research for students who intend to write undergraduate thesis for depart-
mental honors. Letter grading.
191L Undergraduate Seminar: Health and Inequality. (5) Seminar, three hours. Limited to juniors/seniors. During last century, social inequalities in health and survival were widening in the U.S. as in other developed societies. Broad overview of these trends and their causes. Reading, discussion, and development of culminating project. Letter grading.

191J Undergraduate Seminar: Mexican Society. (5) Seminar, three hours. Selected topics on contemporary Mexican society and vital transformations it has undergone in recent years. Reading, discussion, and development of culminating project. Letter grading.

191K Undergraduate Seminar: Cigarettes and contemporary Mexican society and vital transformations it has undergone in recent years. Reading, discussion, and development of culminating project. Letter grading.

191L Undergraduate Seminar: Environmental Justice and Sustainability. (5) Seminar, three hours. Limited to juniors/seniors. Socioanalytical approaches to study environmental issues and problems. Topics include ecopolitics and environmental racism, global environmental change, sustainable development, and society-environment interface. Reading, discussion, and development of culminating project. Letter grading.

191M Undergraduate Seminar: Social Ecology. (5) Seminar, three hours. Limited to juniors/seniors. Fundamentals of sociological approach to social ecology, also known as human ecology. Study of adaptation of population to its environment. Topics include density, maintaining personal space, space and territoriality, and effects of environment on humans. Reading, discussion, and development of culminating project. Letter grading.

191N. Undergraduate Seminar: Urban and Suburban Sociology. (3) Seminar, three hours. Limited to juniors/seniors. History and present condition of cities and suburbs in America, with stress on global cities such as New York and Los Angeles, and comparisons to London and Shanghai. Process of urbanization; it began in early 19th century and still continues. Analysis of city politics, house and architectural styles, crime, urban terror, public housing and ghettos, segregation and integration and development of concepts of gentrification, gentrification, urban culture (especially art, museums, and movies), and environmentalism. Concurrently scheduled with course C297. Letter grading.

191NY Undergraduate Seminar: Urban and Suburban Sociology in New York City. (5) Seminar, eight hours. Limited to students in summer UCLA Study Program: Cutting edge urban issues in country's largest city, including New York's attempt to plan for city of 9.2 million, rebuilding of World Trade Center, Robert Moses (New York's master builder), urban economic development, green New York, transportation systems, urban politics, houses and architectural styles, including New York's famous skyscrapers, historic preservation, crime and police departments, ghetto, education, urban poor, public housing, and search for affordable housing. Offered in summer only. Letter grading.

191P Undergraduate Seminar: Politics of Reproduction. (5) Seminar, three hours. Limited to juniors/seniors. Social and human reproduction is global policy issue. Government efforts to influence reproduction are important feature of modern state: political intervention in private life, including family planning, women's health, and sexuality. Exploration of politics of reproduction — intersection between politics and life cycle or between public sphere and private lives — and coverage of broad range of issues addressing prevention and promotion of reproduction from an inter-cultural-comparative approach. Reading, discussion, and development of culminating project. Letter grading.

191Q Undergraduate Seminar: Communication in Medical Care. (5) Seminar, three hours. Limited to juniors/seniors. Exploration of role of communication in primary care context. Use of microsociological methods to examine main facets of American primary care medical visits, including detailed analysis of interactional conduct of those visits and development of microsociological constructs to quantitative measures. Emphasis on direct contact with empirical materials and development of observational and analytic skills. Reading, discussion, and development of culminating project. Letter grading.

191R Undergraduate Seminar: Cultural Sociology. (5) Seminar, three hours. Limited to juniors/seniors. Introduction to classic theoretical approaches and contemporary developments in study of social worlds dedicated to creating and handling cultural institutions such as literature, journalism, film/television, art, architecture, fashion, and music. Study of cultural and social organization in general, with particular attention to social processes and their theoretical implications. Letter grading.

191S Undergraduate Seminar: Gender and Sexuality. (5) Seminar, three hours. Limited to juniors/seniors. Sexuality is important site for enactment of gender and sexual identity. The course examines relation between politics and life cycle or between public sphere and private life. Reading, discussion, and development of culminating project. Letter grading.

191T Undergraduate Seminar: War and Society. (5) Seminar, three hours. Limited to juniors/seniors. Study of relationship between society's military and its social organization in general, with particular attention to shock-based civic militarism characteristic of the West. Topics include honor, discipline, bureaucracy, conscription, logistics, total war, guerrilla war, terrorism, and counterinsurgency. Reading, discussion, and development of culminating project. Letter grading.

191U Variable Topics Research Seminars: Sociological. (5) Seminar, three hours. Limited to juniors/seniors. Study of selected topics of sociological interest. Reading, discussion, and development of culminating project. May be repeated for credit. Individual contract with supervising faculty member. Letter grading.

199. Directed Research in Sociology. (2 to 4) Tutorial, one hour. Preparation: 3.0 grade-point average in major. Requisite: courses 1, 198A. Limited to junior/senior Sociology majors. Independent intensive study designed for students who want to do research under guidance of faculty mentor. Scheduled meetings to be arranged between faculty member and student. Culminating paper or project required. May be repeated for maximum of 8 units, with no more than 4 in any one term. Individual contract required; see undergraduate counselor. P/NP or letter grading.

Graduate Courses

201A-201B-201C. Proseminars: Sociology. (2-2-2) Seminar, two hours every other week. Required of first-year graduate sociology students. Introduction to range of theoretical and research interests represented by department faculty members. S/U grading.

202A-202B. Theory and Research in Sociology. (4-4) Lecture, two hours; discussion, two hours. Required of first-year graduate sociology students. Examination of interrelations of theory, method, and substance in exemplary sociological works, with analytical and skills-centered orientation. In Progress (202A) and S/U or letter (202B) grading.

204. Topics in Sociological Theorizing. (4) Seminar, four hours. Examination of selected issues and problems in classical or contemporary sociological theory. S/U or letter grading.

205. Family and Social Change. (4) Lecture, three hours. Examination of sources of change in family and household organization, with major focus on relationships among economic institutions, family structure, and content of family life. Consideration of concepts, theories, and data about family life. S/U or letter grading.

206. Understanding Fertility: Theories and Methods. (4) Same as Community Health Sciences M222.) Lecture, three hours. Preparation: one formal course in demography or biostatistics. Examination of sources of change in fertility patterns, demographic theories, and methods to describe fertility trends and differentials and social and proximate determinants of fertility, with em-
phasis on understanding key proximate determinants. For advanced students interested in population, demography of health, and social demography. Letter grading.

210A-210B. Intermediate Statistical Methods I, II. (4-4) Lecture, three hours; discussion, two hours. Intermediate statistical methods using computers: probability theory, sampling, hypothesis testing, interval estimation, multiple regression and correlation, experimental design, analysis of variance and covariance, contingency tables, sampling theory. S/U or letter grading.

210C. Intermediate Statistical Methods III. (4) Lecture, four hours. Requisite: course 210B. Survey of advanced statistical methods used in social research, with focus on problems for which classical linear regression analysis may not be adequate, including categorical data, structural equations, longitudinal data, incomplete and erroneous data, and complex samples. S/U or letter grading.

211A-211B. Comparative and Historical Methods. (4-4) Lecture, three hours. In Progress (211A) and S/U or letter (211B) grading. 211A. Strategies of Research and Conceptualization. Topics include relationship of theory and fact to social sciences, logic of comparative and historical analysis, and substantive paradigms of comparative and historical analysis. Reading involves methodological examination of basic works in representational problem areas. 211B. Research Techniques. Requisite: course 211A. Topics include problem of evidence, quantitative and qualitative data. Techniques of data analysis, including use of manuscript census, content analysis, collective biography, and secondary analysis.

212A-212B. Quantitative Data Analysis. (4-4) Lecture, three hours. Requisites: courses 210A, 210B. Course 212A is enforced requisite to 212B. Analysis and interpretation of primarily nonexperimental quantitative data, with focus on sample survey and census data. Extensive practice at utilizing statistical methods encountered in courses, culminating in term paper in style of American Sociological Review or similar journal article. Topics include simple tabular analysis, log-linear analysis, ordinal least squares regression, robust regression, and nonparametric logistic regression, and scale construction. Logic of analysis and problems of statistical inference, including diagnostic procedures and methods for handling complex sample survey data. In Progress (212A) and S/U or letter (212B) grading.

212C. Study Design and Other Issues in Quantitative Data Analysis. (4) Lecture, three hours. Designed for graduate and undergraduate students who have had some exposure to statistics and quantitative methods. Introduction to study design, including experimental, longitudinal, cohort, time-series designs, contextual, and other designs. Discussion of suitability of various design classes for specific analytic goals, as well as their comparative strengths and weaknesses. S/U or letter grading.

M213A. Introduction to Demographic Methods. (4) (Same as Biostatistics M208, Community Health Sciences M208, and Economics M208.) Lecture, four hours. Preparation: one introductory statistics course. Introduction to methods of demographic analysis. Topics include demographic rates, standardization, decomposition of differences, life tables, survival analysis, cohort analysis, birth interval analysis, models of population growth, stable populations, population projection, and demographic data sources. Letter grading.

216A-216B. Survey Research Design. (4-4) Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 210A. History of survey method; facet methodology and contingency tables; item design; scales, indices techniques; data collection—planning and management; network, snowball, and experience sampling; multistage probability sampling, stratification and clustering. Students participate in survey research project. Letter grading.

217B-217C. Ethnographic Fieldwork. (4-4) Seminar, three hours. Recommended requisite: course 217A. Theories and methods of ethnographic fieldwork. Kinds of problems amenable to ethnographic approaches, methods, and techniques for doing fieldwork, and ethical problems involved in such research. In Progress (217B) and letter (217C) grading.

220. Self and Society. (4) Lecture, three hours. Examination of social and cultural processes shaping definition and experience of the self, embodied interactive practices through which the self is constructed in everyday and institutional contexts, formation and transformation of self during life course, and construction of collective identity. Letter grading.

223. Phenomenological and Interactionist Perspectives on Selected Topics. (4) Lecture, three hours. Comparison of phenomenological and symbolic perspectives by examining particular body of live or currently unresolved substantive issues. Topics vary; attention development of phenomenological and interactionist thought in topic of concern, with special concern for ambiguities and divergences both within and between two approaches. When relevant, attention to logics of phenomenology and interactionism of pragmatist, existentialist, and ordinary language philosophies. S/U or letter grading.

227. Sociology of Knowledge. (4) Lecture, three hours. Designed for graduate students. Survey of theories and research concerning social determinants of systems of knowledge and role of intellectual and artistic elites in Western societies. S/U or letter grading.

228. Critical Issues in Macrosociology. (4) Lecture, three hours. Conceptual introduction to area of macrosociology in which exemplary works are read, studied for substance and methods, and critiqued in seminar and in written papers. S/U or letter grading.

229A. Sociology of Interpersonal Conflict. (4) Lecture, three hours; discussion, two hours. Origins, development, and outcomes of interpersonal conflicts and traits that attract and repel individuals, households, workplaces, and public places in contemporary societies. Concurrently scheduled with course C146. Letter grading.

229B. People-Processing Institutions. (4) Lecture, three hours; discussion, two hours. Course C229A is not requisite to 229B. Theory and research analyzing operation and decision-making processes of variety of people-processing institutions, including police, courts, schools, psychiatry, human service agencies, and medicine. Letter grading.

230A-230B. Comparative Ethnicity, Race, and Nationalism. (4-4) Seminar, three hours. Preparation for independent research in area of comparative ethnicity, race, and nationalism through close reading of key theoretical and empirical works. S/U or letter grading.

230C. Comparative Ethnicity, Race, and Nationalism. (4) Seminar, three hours. Introduction to comparative sociological sociology of race and ethnicity and ability to demonstrate merits of double comparative approach to race, one that strives to be as comparative at level of theory (attending to relationship between race and other social classifications such as ethnicity and nationality) as it does at level of research. Exploration of cases from wide variety of countries, including Australia, Brazil, Colombia, Dominican Republic, Haiti, Mexico, modern China, modern Japan, Nazi Germany, Nicaragua, Rwanda, South Africa, Sudan, and U.S. S/U or letter grading.

232. Class, Politics, and Society. (4) Lecture, four hours. Nature of class structure and how it affects relations of class structure to politics and political power. Issue of salience of class versus other identities such as gender, age, race, and nationalism. Examination of contemporary “globalization” tendencies of capitalism. Letter grading.

233. Foundations of Political Sociology. (4) Lecture, three hours. Designed for graduate students. Survey of field of political sociology, oriented around critical themes in major theoretical traditions and contemporary exemplars. Special attention to competing perspectives on power, theory of state, and relationship of class structure to politics. S/U or letter grading.

234. Social History of Development. (4) Seminar, three hours; discussion, one hour. Readings and discussion of theoretical, historical, and specific issues in sociology of development (e.g., world system theory, developmental state, import substitution industrialization, export promotion industrialization, neoliberalism in Latin America, new approaches). S/U or letter grading.

235. Theories of Ethnicity. (4) Lecture, one hour; discussion, two hours. Designed for graduate students. Examination of variety of theoretical approaches in understanding race and ethnicity in contemporary societies, with emphasis on recent debates among class analysis, pluralism, primitivism, and rational choice perspectives. S/U or letter grading.

236A-236B-236C. International Migration. (4-4-4) Lecture, three hours. S/U or letter grading.

236A. (4) Lecture, three hours. Comprehensive overview of key current theoretical debates in study of international migration, with focus on exploration of possibilities of comparative (historical and cross-national) research program in field, linking North American, European, and other global experiences of immigration. S/U or letter grading.

236B. (4) Lecture, three hours. Further exploration of key current theoretical debates in study of international migration, with emphasis on exploring both theoretical debates of the field and empirical data and case studies on which those debates hinge, to encourage students to undertake research in the field. S/U or letter grading.

236C. (4) Lecture, three hours. Designed for students beginning or undertaking original research in field of international migration. Outside lectures, oral presentations of student projects, circulation of completed or draft student papers. S/U or letter grading.

237. Seminar: Theory and Research in Comparsive Social Analysis. (2) Seminar, two hours. Designed for graduate students. Emphasis on one issue of particular importance for comparative analysis of capitalism and socialism, North America and Western Europe, developed capitalist and socialist countries and Third World, and implications for theory construction and social research. S/U grading.

M238. Feminist Theory. (4) (Same as Women’s Studies M238.) Seminar, three hours. Designed for graduate students. Analysis of current American feminist theory relevant to sociologists. Exploration of critiques of reproductive feminism from poststructuralists and/or feminists of color, feminist scholars from other countries, and recent “antifeminist” feminists. Discussion of directions for future feminist sociology. Letter grading.
239A–239B. Quantitative Research on Social Stratification and Social Mobility. (4–4) Lecture, three hours. Prerequisites: 210A, 210B. Introduction to English language research literature on quantitative social stratification and social mobility in the U.S. and abroad. In Progress 239A and letter 239B grading.

241. Theories of Gender in Society. (4) Lecture, one hour; discussion, two hours. Gender stratification, gender structure in society, and overall structural organization of single organizations. Concepts, current exemplars of research that utilize these concepts, and critical reflection on research traditions. Letter grading.

242. Analysis of Data with Qualitative and Limited-Duration Qualitative Variables. (4) Same as Statistics M211.) Lecture, three hours. Requisites: courses 210A and 210B, or Statistics 101A, 100B, and 100C. Models for binary, polytomous, and ordered outcomes; censored and truncated dependent variables; sample selection bias and qualitative response models; count outcomes; multilevel models; log-linear models. S/U or letter grading.

244A–244B–244C. Conversation Analysis I II, III. (6-6-6) Lecture, four hours; discussion, two hours. Requisite: course 244A. Continuation of introduction to some structures basic to organization of conversational interaction: turn-taking organization and sequence organization. S/U or letter grading.

252. Selected Topics in Sociology of Gender. (4) Same as Women’s Studies M252.) Lecture, two hours; discussion, two hours. Designed for graduate students. Seminar on selected topics in sociology of gender. May be repeated for credit. Letter grading.

254. Human Capital, Social Capital, and Cultural Capital. (4) Lecture, three hours. Designed for graduate students. Intellectual history of these concepts, points of difference and similarity among these concepts, current exemplars of research that utilize these concepts, and critical reflection on research traditions. Letter grading.

255. Cross-Cultural Perspectives on Gender. (4) (Same as Women’s Studies M255.) Seminar, three hours. How does gender manifest itself in lives of different groups of women in U.S. and abroad? Are universal analytical categories or unified feminist movements possible or is gender too different cross-cultural? S/U or letter grading.

267. Demography of Marriage Formation and Dissolution. (4) Discussion, three hours. Requisites: course 210A. Extensive and intensive critical examination of major approaches to analysis of marriage formation and dissolution, with focus primarily on demographic literature. S/U or letter grading.

258. Talk and Social Institutions. (4) Lecture, four hours; discussion, one hour. Practices of communication and social interaction in number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. Concurrently scheduled with course CM125. S/U or letter grading.

259. Social Structure and Economic Change: Historical and Comparative Perspectives. (4) Lecture, four hours. S/U or letter grading.

262. Selected Problems in Urban Sociology. (4) Same as Afro-American Studies M260C.) Seminar, three hours. Designed for graduate students. Use of city of Los Angeles to examine major social and demographic factors that characterize cities in the U.S. Examination of role of these factors in affecting health outcomes. Letter grading.

266. Selected Problems in Analysis of Conversation. (4) Lecture, three hours. Requisites: courses 244A, 244B, and 244C. Seminar course. Consultant instructor for topics and formats to be offered in specific term. May be repeated for credit with topic change. S/U or letter grading.

268. Selected Problems in Psychoanalytic Sociology. (4) Discussion, two hours. Recommended preparation: at least one year of methods courses. Selected problems in interpretation of sociology and psychoanalysis, which may be substantive (group development, interpersonal relations, collective behavior) or methodological; latter focuses on critical fieldwork and experimental use of psychoanalytic and sociological techniques. S/U or letter grading.

270. Interdisciplinary Relationship Science. (4) Lecture, three hours. Limited to graduate students. Diverse approaches to relationship science in fields of anthropology, education, psychology and sociology. Topics focus on theories of understanding biologic, behavioral, and cultural aspects of relationshipships through diverse theoretical and methodological approaches. Use of broad definition of interpersonal relationships, including relationships such as parent-child, teacher-student, sibling, peer, kin, romantic relationships, marriages, and friendships. S/U or letter grading.

272. Topics in Political Sociology. (4) Lecture, four hours. S/U or letter grading.

276. Selected Topics in Sociology of East Asia. (4) Lecture, three hours. Designed for graduate students. Selected problems in China, or in China and Japan comparatively. Possible topics include (1) China’s Great Proletarian Cultural Revolution, (2) internal construction of Chinese society: male/female relations, city and countryside, minority nationalities, class struggle under socialism, etc., (3) China and Japan: two models of development. S/U or letter grading.

277. Sociology of Latin America. (4) Lecture, one hour; discussion, two hours. Designed for graduate students. Seminar on selected topics in sociological study of Latin America. Possible topics include social movements, race and ethnicity, stratification, and social development. Letter grading.

278. Trafficking, Gender, Health, and Human Rights. (4) (Same as Law M577.) Seminar, four hours. Review and critical assessment of diverse literature on international traffic of persons on significance of sociological, legal, and gender aspects of trafficking. Primary focus on trafficking for sex work and slavery lines between commercial sex trade and trafficking. Additional issues include role of political and economic transition, militarization, health implications of trafficking, trafficking for nonsexual purposes, and role of state.
284. Topics in Mental Health and Illness. (4) Lecture, two to three hours. Requisite: course 148. Designed for undergraduates. May be repeated for credit. S/U or letter grading.

287. Topics in Chinese Society. (4) Seminar, three hours. Preparation: at least two upper division courses on China in a disciplines discipline. Introduction to current research questions in Chinese sociology, as well as major themes in study of Chinese society, both historical and contemporary, including demographic, economic, political, and social change before and after 1949. S/U or letter grading.

288A–288B–288C. Mental Health Services for Persons with AIDS. (4–4–4) Lecture, four hours. Designed for graduate students. Analysis of current research on mental health service systems for persons with AIDS. S/U grading.

289A–289B. Practicum in Conversation Analysis. (2-4) Requisites: courses 244A, 244B. S/U grading. 289A. Daily 60-minute, three hours. Practice in analysis of conversational data. May be repeated for credit. 289B. Developing Work in Progress. Seminar, three hours. Opportunity to advance research projects in progress and to discuss in small groups critical issues in conversational analysis. S/U grading.

M290A-M290B. Immigration, Racial Change, and Education in 21st-Century Metropolises. (4-) (Same as Education M290A-M290B, Political Science M287A-M287B, and Public Policy M290A-M290B.) Seminar, four hours. Examination of metropolitan American society and institutions at beginning of 21st century. Concentration on best available information on patterns of settlement, changing functions of urban space and institutions, and issues of opportunity linked to urban structure in society facing unprecedented demographic change and primarily European domination of our society by mid-century, creating democracy with no racial or ethnic majority. How this demographic transition and postindustrial transformation of urban functions and space interact to shape opportunity and inequality. Vast economic transformations, brought about by globalization of workplace and dramatic decline of industrial employment in advanced nations, not only greatly raise stakes in creating equal opportunity but also cut off what were previously extremely important parts of intergenerational mobility. In Progress (M290A) and later (M290B) grading.

295. Working Group in Sociology. (1 to 4) Discussion, two hours. Variable topics, including sociology of gender, ethnicity, social networks, race, class, and social demography and stratification. Advanced study and analysis of current topics in specialized areas of sociology. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S.U. or letter grading.

M296A–M296B. Social Theory and Comparative History. (4-) (Same as History M293A-M293B and Political Science M290A-M290B.) Seminar, three hours and one-half hour every other week. Introduction to historically rooted social theory and theoretically sensitive history, following program of Center for Social Theory and Comparative History. Course may be taken independently for credit. S.U. or letter grading.

M296C. Theories in Cultural History. (4) Same as History M203C. Discussion, three hours. Introduction to social, linguistic, semiotic, or other new interpretative theories and practices developed in other fields and applied to historical material. Letter grading.

C297. Urban and Suburban Sociology. (5) ( Formerly numbered 297.) Seminar, three hours. History and present condition of cities and suburbs in America, with stress on global cities such as New York and Los Angeles, and comparisons to London and Shanghai. Process of suburbanization as it began in early 19th century and still continues. Analysis of city politics, house and architectural styles, crime, urban terror, public housing and ghettos, segregation and integration of neighborhoods, question of gentrification, immi- gration, urban culture (especially museums, and movie and music industries), and environmentalism. Concurrently scheduled with course C191N. Letter grading.

298. Workshop in Culture and Society. (4) Seminar, two hours every other week. Interdisciplinary workshop for graduate students and faculty pursuing theory and research in topics related to interplay of culture and society; whether scholarly, literary, or philosophical in nature. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprentice ship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

375. Supervised Teaching of Sociology. (2) Seminar, two hours. Preparation: appointment as teaching assistant in Sociology Department. Special course for teaching assistants designed to deal with problems and techniques of teaching introductory sociology. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S.U. grading.

Monica L. Smith, Ph.D. (Anthropology)

Scope and Objectives

The minor in South Asian Studies seeks, through multidisciplinary approaches, to address the history and contemporary importance of South Asia, which is comprised of Sri Lanka, India, Pakistan, Nepal, Bhutan, Bangladesh, and the Maldives, and accounts for nearly 1.5 billion people.

Studying South Asia as a region exposes students to the rich historical, cultural, and religious diversity of a major center of civilization. South Asia is the birthplace of half of the world’s religions, including Buddhism, Hinduism, Sikhism, and Jainism, India, Pakistan, and Bangladesh together have more Muslims than the Middle East, and South Asian Islam, interacting with the other faiths of the subcontinent, has seen an efflorescence of philosophy, theology, poetry, and art.

South Asia is emerging as an important node in the global economy as a center of high technology and manufacturing. It is also important as a regional power, a contributor to world literature and film, and a seedbed for philosophy and social activism.

Undergraduate Study

South Asian Studies Minor

The South Asian Studies minor is designed for students who wish to augment their major with a concentration study of the history, culture, society, and languages of South Asia. The minor includes the introductory study of one South Asian language, one lower division course on South Asian history, and five upper division courses that focus on some aspect of the history, culture, politics, religions, and artistic heritage of South Asia.

To enter the minor, students must be in good academic standing with a 2.0 grade-point average or better and have completed 45 units and at least one lower division course (other than a language course) in South Asian studies.

Required Lower Division Courses (10 units maximum): History 9A and completion of the third term of either Hindi (Hindi-Urdu 3 or 3R) or Sanskrit (South Asian 110C) or by demonstrated proficiency as determined by a placement examination. Proficiency in other South Asian languages, such as Gujarati, Bengali, Marathi, Tamil, Telugu, Pashto, or Urdu, may be accepted by petition, pending completion of a placement examination to be administered at UCLA or approval of an alternative and recognized course of language study.
Southeast Asian Studies / 591

Required Upper Division Courses (20 units minimum): Five courses, with no more than two from any single discipline or department, to be selected from Anthropology 116, Art History 114A, 114D, C115A, C180C, Asian 151, 162, 163, 164, Asian American Studies M172A, Ethnomusicology 146, 147, History 174A through 174E, 175A, M175B, 175C, 185B, 185C, Islamics 110, 130, 151, South Asian 115, 150, 175, 185.

Variable or selected topics courses fulfill minor requirements only when the content focuses substantially on South Asia. Other courses with substantial South Asian content of at least 50 percent (as determined by the course instructor) may be applied only with prior approval of a petition filed with the academic counselor. Up to 12 units taken through a study abroad program may be applied toward the minor, though no more than 8 of the units may be applied toward the 20 units of upper division coursework.

Independent studies courses (197 or 199) may not be applied toward the minor. No more than one upper division course may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Scope and Objectives

The Southeast Asian Studies major and minor approach Southeast Asia as a region of deep local particularities and transregional engagements. This includes the study of present-day countries of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Indonesia, the Philippines, Singapore, Brunei, and East Timor. This is a massively heterogeneous grouping of societies, ethnicities, languages, cultures, histories, and environments.

In addition to the prominence of the region in many recent international issues (democratization, the Cold War, decolonization, global capital flows, natural resource and environmental regulation, ethnic tensions, etc.), Southeast Asia is also a prominent site for reflection on enduring questions about culture and human diversity. Southeast Asia is taught as a region, with emphasis on the particular languages, cultures, politics, and topographies of individual nations, ethnic groups, subnational regions, and associations. Yet, it is nearly impossible to teach about any part of Southeast Asia without at least occasionally engaging a range of transregional connections that date back to ancient times. Historically, the peoples of Southeast Asia have been engaged with each other as well as with India and China, the Middle East, Europe, and the Americas and with global contexts of economics, politics, migrations, and communications. When approached from the point of view that holds Southeast Asia to be a focus of shifting transactions and human connections (rather than a reified and timeless region of common culture), the study of the region speaks powerfully to critical issues across many disciplines. Thus construed, Southeast Asian studies addresses major contemporary concerns in the humanities, social sciences, arts, business, the professions, government policy, and international affairs.

Undergraduate Study

Southeast Asian Studies B.A.

The major is designed for students who are deeply interested in the study of Southeast Asian languages, cultures, and societies. It requires the intermediate-level study of one Southeast Asian language, three lower division core courses on Southeast Asia as a region, and at least 14 upper division courses, including a capstone senior seminar. Majors are expected, whenever possible, to study for at least one term at a university in Southeast Asia.

Admission

To enter the major, students must (1) be in good academic standing (minimum 2.0 grade-point average), (2) have completed 45 units and at least one lower division core course in Southeast Asian studies, and (3) meet with the academic counselor in 10357 Bunche Hall.

Preparation for the Major

Required: History 9E, Southeast Asian Studies 1, 88; completion of six terms of either Filipino 1 through 6, Indonesian 1 through 6, Thai 1 through 6, or Vietnamese 1 through 6 or demonstrated proficiency as determined by a placement examination. Proficiency in other Southeast Asian languages may be accepted by petition, pending completion of a placement examination or approval of an alternative course of language study.

Transfer Students

Transfer applicants to the Southeast Asian Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: either one course on Southeast Asia or one year of study of a Southeast Asian language (or demonstrated equivalency). Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: At least 14 upper division courses (56 units) must be completed, including 10 courses that must have substantial Southeast Asian content, as follows:

Three humanities and arts courses must be selected from Art History 114F, Dance 112B, Ethnomusicology C159, 161B, 161H, 161M, Indonesian 100A, 100B, 100C, Southeast Asian 130, 135, 170A, 170B, 170C, Thai 100A, 100B, 100C. Theater 102B, Vietnamese 100A, 100B, 100C. For Ethnomusicology 161B, 161H, and 161M to count as one 4-unit upper division course to be applied toward the major, any two of the courses may be taken once or any one course may be taken twice.

Three social sciences and policy courses must be selected from Anthropology 175U, Asian American Studies 133, 134, M164, M171D, 171E, History 176A through 176E, 177A, 177B, 191M, Political Science 158, Southeast Asian 157.

Variable or selected topics courses (e.g., Asian American Studies 191) fulfill major requirements only when the content focuses substantially on Southeast Asia or a subregion of it.

All majors must also successfully complete Southeast Asian Studies 191.

Three elective courses must be selected from the courses listed above and from those offered by the program. Other courses with substantial Southeast Asian content may be applied toward the major pending approval of a petition filed with the academic counselor.

Breadth and Methods Requirement

Four additional upper division courses on topics outside Southeast Asia must be taken to satisfy the breadth and methods requirement. The courses must be selected in consultation with and approved by the academic counselor. The requirement can be fulfilled by one of the following options:

1. Completing at least 16 units that focus on a single geographical region other than Southeast Asia (e.g., East Asia, South Asia, Europe, Middle East). All four courses must focus on the same country or region. This track provides students with an opportunity to analyze Southeast Asia from a comparative geographic perspective.

2. Completing at least 16 units with a single topic of study relevant to Southeast Asia (e.g., religion, economic development, gender studies, human rights, diasporic...
Admission
To enter the honors program, students must (1) have completed Southeast Asian Studies 1 and 88, (2) have a 3.5 grade-point average in the major and a 3.5 overall GPA, and (3) obtain agreement from a faculty member to supervise their honors thesis. Application should normally be made during the junior year, after students have completed more than 90 units of coursework. Consult the academic counselor for further details about the application, thesis requirements, and rules regarding the selection of a faculty thesis adviser.

Requirements
After a faculty adviser has been selected and has agreed to advise them during the year-long project, students must complete the Southeast Asian Studies Honors Program Application and a two-page preliminary outline of the proposed research project, have the faculty adviser sign the application, and submit both to the academic counselor who verifies that the necessary signatures have been obtained and the requisites have been met. The counselor assists the students in formally enrolling in Southeast Asian Studies 198A. Enrollment in subsequent terms (courses 198B and 198C) is contingent on students having demonstrated satisfactory progress toward writing of the honors thesis.

Throughout the three terms of the honors program, students work closely with their faculty adviser who guides them through the various phases of research. At the end of the third term, students submit the thesis to their faculty adviser for final review.

To graduate with departmental honors, students must (1) complete all requirements for the major with a cumulative grade-point average of 3.5 or better in upper division courses required for the major and an overall GPA of 3.5 or better, (2) complete courses 198A, 198B, and 198C, and (3) produce an honors thesis (approximately 40 to 60 pages) determined to be of honors quality by a committee of three faculty members. The thesis must then be submitted to the academic counselor in 10357 Bunche Hall.

To graduate with departmental highest honors, students must (1) complete all requirements for the major with a cumulative grade-point average of 3.75 or better in upper division courses required for the major and an overall GPA of 3.5 or better, (2) complete courses 198A, 198B, and 198C, and (3) produce an honors thesis (approximately 40 to 60 pages) determined to be of highest honors quality by a committee of three faculty members. The thesis must then be submitted to the academic counselor in 10357 Bunche Hall.

Departmental honors and highest honors are recorded on the final transcript and diploma after students successfully complete the program.

Southeast Asian Studies Minor
The Southeast Asian Studies minor is designed for students who wish to augment their major with concerted study of language, culture, and society in Southeast Asia. The minor includes the introductory study of one Southeast Asian language, two lower division core courses on Southeast Asia as a region, and five upper division courses that may focus on one or more Southeast Asian cultures or societies.

To enter the minor, students must (1) be in good academic standing (minimum 2.0 grade-point average), (2) have completed 45 units and at least one lower division nonlanguage preparatory course in Southeast Asian studies, and (3) meet with the academic counselor in 10357 Bunche Hall.

Required Lower Division Courses (13 units): History 9E, Southeast Asian Studies 1, and completion of Filipino 3, Indonesian 3, Thai 3, or Vietnamese 3 or demonstrated proficiency as determined by a placement examination. Proficiency in other Southeast Asian languages may be accepted by petition, pending completion of a placement examination or approval of an alternative course of language study.

Required Upper Division Courses (20 units): Five courses, with (1) at least two humanities and arts courses selected from Art History 114F, Dance 112B, Ethnomusicology C159, 161B, 161H, 161M, Indonesian 100A, 100B, 100C, Southeast Asian 130, 135, 170A, 170B, 170C, Southeast Asian Studies 191, Thai 100A, 100B, 100C, Theater 102B, Vietnamese 100A, 100B, 100C and (2) at least two social sciences and policy courses selected from Anthropology 175U, Asian American Studies 133, 134, M164, M171D, 171E, History 176A through 176E, 177A, 177B, 191M, Political Science 158, Southeast Asian 157.

For Ethnomusicology 161B, 161H, and 161M to count as one 4-unit upper division course to be applied toward the major, any two of the courses may be taken once or any one course may be taken twice.

Variable or selected topics courses (e.g., Asian American Studies 191) fulfill minor requirements only when the content focuses substantially on Southeast Asia or a subregion of it. Other courses with substantial Southeast Asian content may be applied pending approval of a petition filed with the academic counselor.

Independent studies courses (197 or 199) may not be applied toward the minor. No more than two upper division courses may be applied toward both this minor and a major or minor in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Southeast Asian Studies
Lower Division Courses
1. Introduction to Southeast Asian Studies. (5) Lecture, three hours; discussion, one hour (when scheduled). Introductory survey of diverse and dynamic societies of contemporary Southeast Asia, with strong focus on interdisciplinary themes in humanities and cultural studies. P/NP or letter grading.
88. Sophomore Seminars: Introduction to Interdisciplinary Study of Southeast Asia. (5) Seminar, three hours. Limited to majors. Introduction to methods of interdisciplinary and comparative study, providing students with opportunity to develop competence in using those approaches through investigation of critical issues in Southeast Asian studies. Culminating paper or project may be required. Letter grading.

Upper Division Courses

180. Research Seminar: Southeast Asian Studies. (4) Seminar, three hours. Limited to Southeast Asian Studies majors and minors. Designed for students to analyze their experiences after they return from study abroad in Southeast Asia. Culminating paper or project required. Letter grading.

188. Special Courses in Southeast Asian Studies. (4) Lecture, three hours; discussion, one hour. Interdepartmentally sponsored experimental or temporary courses on selected contemporary topics in Southeast Asian studies taught by visiting instructors or affiliated faculty member. May be repeated for credit with topic change. P/NP or letter grading.

191. Senior Seminar: Variable Topics in Southeast Asian Studies. (4) Seminar, three hours. Limited to senior majors. Research seminar on selected topics. Examination of literature and/or state of field in Southeast Asian studies. Capstone course for majors who write substantial literature review or paper based on original research. May be repeated once for credit with topic change and consent of chair. Letter grading.

Scope and Objectives

The Department of Spanish and Portuguese is dedicated to the study and teaching of the languages, literatures, and cultures of the Hispanic heritage in all areas of the world, particularly on the continents of Europe and America. It maintains a strong commitment to the value of original research and professional instruction at all levels of its activities.

Whether studying for the B.A., M.A., or Ph.D. degree, students are given careful guidance in the choice of courses and in the preparation of a study program. The richness of Hispanic culture is amply represented in the extensive range of courses in language, linguistics, and literature. Although the literatures of Spain, Portugal, Brazil, and Spanish America predominate, courses are also offered in Chicano literature. The breadth of courses offered by the department allows undergraduate students to pursue many possible interests and enables graduate students to concentrate in depth in several areas of specialization.

The department's courses are primarily designed to serve the five B.A. programs: B.A. in Spanish, B.A. in Spanish and Community and Culture, B.A. in Spanish and Linguistics, B.A. in Spanish and Portuguese, and B.A. in Portuguese, as well as to prepare students for its three graduate programs: M.A. in Spanish, M.A. in Portuguese, and Ph.D. in Hispanic Languages and Literatures. The courses are also functionally supportive of such interdepartmental programs as the B.A. program in Chicana and Chicano Studies, B.A. and M.A. programs in Latin American Studies, and M.A. and Ph.D. programs in Comparative Literature.

Undergraduate Study

One of the majors in the Spanish and Portuguese Department is a designated capstone major: Spanish and Community and Culture. Undergraduate students participate in community-based experiential learning courses coupled with elective and adjunct courses. Reflective journals, final projects, and in-class presentations are required. Through their capstone work, students should have mastery of the Spanish language, ability to conduct and interpret research to determine the needs of specific communities, critical understanding and ability to apply theories within a service context, sensitivity to diversity and cultural differences, and ability to perform scholarly presentations that tie current issues to research and theory.

Undergraduate Courses

Spanish 1 through 3 use Castells’ Mosaicos. The method is inductive. Selected examples are given to enable students to inductively grasp the rules and develop their own grammar. This enables students to use language effectively and creatively. The courses are taught entirely in Spanish — students simultaneously learn to understand, speak, read, and write Spanish.

Students with one or more years of high school Spanish who plan to enroll in Spanish 1 through 25 must take the departmental placement examination. Consult the Schedule of Classes or the department office for test dates and location.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Spanish and Portuguese grammar and/or composition.

Spanish B.A.

Preparation for the Major

Required: Spanish 25 or 27 or equivalent, and 42 and 44 or equivalent as determined by the undergraduate adviser. Each course must be passed with an average grade of C or better prior to beginning upper division work in the major.

Transfer Students

Transfer applicants to the Spanish major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one Spanish civilization course, and one Spanish American civilization course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: (1) Two core courses (Spanish 119 and 120), (2) eight upper division Spanish elective courses in literature, culture, linguistics, media, service learning, or interdisciplinary studies, up to two of which may be from an outside department that deals with Spain or Spanish America and have been approved by the undergraduate adviser, and (3) one senior capstone seminar.

Spanish and Community and Culture B.A.

Capstone Major

Preparation for the Major

Required: Spanish 25 or 27, 42, 44. Each course must be passed with an average grade
of C or better prior to beginning upper division work in the major.

**Transfer Students**

Transfer applicants to the Spanish and Community and Culture major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one Spanish civilization course, and one Spanish American civilization course.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** (1) Spanish 100A or 100B, and 119 or 120; (2) four elective Spanish literature, culture, linguistics, or media studies courses selected from 130, 135, 140, 155, 160, 170, 175, 195; (3) two interdisciplinary studies courses selected from Chicana and Chicano Studies 100SL, M106, M119, M120, M121, M122, M131, M144, 149, 181, Sociology M155; (4) two capstone community-based and experiential learning courses (8 to 10 units) selected from Chicana and Chicano Studies 100SL, Spanish M165SL, M172SL.

A minimum of 46 units applied toward the major requirements must be in addition to units applied toward major or minor requirements in another department or program.

**Spanish and Linguistics B.A.**

**Preparation for the Major**

**Required:** Spanish 25 (or 27), M35 (or Linguistics 20), 44. Each course must be passed with an average grade of C or better prior to beginning upper division work in the major.

**Transfer Students**

Transfer applicants to the Spanish and Linguistics major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one introduction to linguistics course, and one Spanish American civilization course.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** (1) Spanish 100A or 100B, Linguistics 103, 120A, 120B, (2) one course from Linguistics 160 or 165A or 165B, and (3) four upper division Spanish electives, two of which must be from Spanish 160.

**Spanish and Portuguese B.A.**

**Preparation for the Major**

**Required:** Spanish 25 or 42 or 44 or equivalent, Portuguese 3 or 102B, 46 or equivalent.

**Transfer Students**

Transfer applicants to the Spanish and Portuguese major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Spanish, one year of Portuguese, one Spanish civilization course or one Spanish American civilization course, and one Brazilian culture course.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** (1) Four upper division language and linguistics courses: Portuguese 100A, 100B, 105, Spanish 105; (2) four upper division literature courses selected as follows: two courses from Spanish 119A, 119B or from 120A, 120B, 120C and two courses from Portuguese 120A, 120B or from 130A, 130B; (3) six upper division electives, three of which must be in Spanish and three in Portuguese (numbered C124 and above). Only upper division courses taught in the target language may be applied toward the major.

**Portuguese B.A.**

**Preparation for the Major**

**Required:** Portuguese 3, M35, 46, Spanish 42 or 44, or equivalent.

**Transfer Students**

Transfer applicants to the Portuguese major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Portuguese, one nature of language course, one Portuguese civilization course or one Brazilian civilization course, and one Brazilian culture course.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

**Portuguese Language and Literature Concentration**

**Required:** Thirteen upper division courses, including Portuguese 100A, 100B, 105, either 120A and 120B, or 130A and 130B, and eight elective courses in Portuguese, or six electives in Portuguese plus two courses from areas that complement the program approved by the undergraduate adviser in Portuguese.

**Portuguese and Linguistics Concentration**

**Required:** Completion of six terms of study in one other foreign language or three terms in each of two other foreign languages, in addition to the preparation for the major courses. Spanish is recommended.

The concentration consists of 13 upper division courses, including Portuguese 100A, 100B, 105, M118A, M118B, Linguistics 100, 103, 110, 120A, 120B, and three electives, two of which must be in Luso-Brazilian literature.

**Double Majors**

Through judicious use of electives, students may find it possible to secure the B.A. degree with two complete majors (e.g., Portuguese/Spanish, Spanish/History, Portuguese/Sociology, etc.). Interested students should consult the undergraduate adviser in Portuguese as early as possible in their B.A. program.

**Study in a Portuguese-Speaking Country**

Students are encouraged to spend up to one year in a Portuguese-speaking country to study in a university or conduct research. Appropriate credit may be granted in accordance with the individual program, arranged in consultation with the undergraduate faculty adviser in Portuguese. Proposals must be submitted in advance in writing and must be approved by the department.

**Honors Program**

The honors program is open to all departmental majors who have completed the required nine upper division core courses with a 3.5 grade-point average. Eligibility is verified by the departmental counselor.

Two honors projects and an honors thesis are required. To graduate with departmental honors, students must first complete an honors project in each of two of their upper division Spanish elective courses. The honors project is a 12- to 15-page term paper on a special topic, selected in consultation with the instructor, to be completed in addition to the normal course requirements. On the basis of the coursework and special interests, students then consult a faculty member in that field and formulate a research project that they pursue under the faculty member's guidance through Spanish 198. Students research and write an honors thesis (not to be confused with an honors project) of approximately 25 pages on the selected topic. Approval of the honors thesis is the final requirement for departmental honors.

**Mexican Studies Minor**

The Mexican Studies minor allows students with an interest in Mexico to augment their major programs with courses that expose them to the history, literature, and culture of Mexico. Given Southern California's proximity to Mexico, the demographics of Los Angeles, and the shared history of Mexico and the Southwest, the minor is a natural complement to many majors.

To enter the minor, students must have an overall grade-point average of 2.0 or better and must complete or show proficiency equivalent to two years of college-level Spanish. A petition to declare the minor should be filed with the undergraduate counselor in 5314 Rolfe Hall.

**Required Lower Division Courses**

(8 to 9 units): Spanish 25 or 27, and one course from History 6A, 8B, 8C, or Spanish 44.

**Required Upper Division Courses**

(20 to 22 units): Three Mexican culture and literature courses selected from Spanish 135 through 175 in consultation with the undergraduate adviser and two courses from Anthropology 114P, 114Q, Chicana and Chicano Studies M102, M108A, 120, M125, 132, 142, 172, 184, Ethnomusicology M108A, Geography 181, History 157B, 160B.

No more than two upper division courses may be applied toward both this minor and a major or minor in another department or program. By
petition and after consultation with the undergraduate adviser, one 4-unit 197 or 199 course may be applied toward the minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Portuguese Minor
To enter the Portuguese minor, students must have an overall grade-point average of 2.0 or better and must complete Portuguese 3 or 102B.

Required Lower Division Courses (4 units): Portuguese 46.

Required Upper Division Courses (24 units): Portuguese 105 and five Portuguese courses selected from 100A through 199 (except 102A, 102B). Only one 4-unit Portuguese 197 or 199 course may be selected.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnets.uc.edu/gasaa/library/pgmgrrk.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Spanish and Portuguese offers the Master of Arts degree in Spanish, Master of Arts degree in Portuguese, and Candidate in Philosophy (Ph.D.) degrees in Hispanic Languages and Literatures.

Portuguese
Lower Division Courses
1. Elementary Portuguese. (4) Discussion, five hours; laboratory, one hour. P/NP or letter grading.
2. Elementary Portuguese. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 1P/NP or letter grading.
3. Intermediate Portuguese. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 2P/NP or letter grading.
4. Spanish and Portuguese / 595
5. Portuguese Conversation. (2-2) Discussion, three hours. Enforced requisite: course 3 with grade of B or better. P/NP or letter grading.

M35. Spanish, Portuguese, and Nature of Language. (3-4) Same as Spanish M35. Lecture, three hours: discussion, one hour. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge. P/NP or letter grading.

46. Brazil and Portuguese-Speaking World. (5) Lecture, four hours; discussion, one hour (when scheduled). Taught in English. Topical analysis of cultural history of Brazil in context of Portuguese-speaking world, with emphasis on comparative, trans-Atlantic relations, social development, and artistic manifestations. P/NP or letter grading.

Upper Division Courses

C135. 20th-Century Brazilian Literature. (4) Lecture, three hours. Requisite: course 105. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C235. P/NP or letter grading.

141. Brazilian Film and Literature. (4) Lecture, three hours. Taught in English. Topical analysis of main literary and historical themes of Brazilian culture, through films and literary texts. P/NP or letter grading.

191. Undergraduate Variable Topics Seminars: Portuguese. (4) Seminar, three hours. Requisite: course 105. Research seminar on selected topics in Portuguese. Reading, discussion, and development of culminating project. Consult Schedule of Classes or department counselor for topic to be offered in specific term. P/NP or letter grading.

197. Individual Studies in Portuguese. (2 to 4) Tutorial, to be arranged. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Individual reading and tangible evidence of mastery of subject matter required. Eight units of courses 197 and/or 199 may be applied toward major requirements. May be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

199. Directed Research in Portuguese. (2 to 4) Tutorial, to be arranged. Requisite: course 105. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating paper required. Eight units of courses 197 and/or 199 may be applied toward major requirements. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M200. Research Resources. (4) (Same as Spanish M200.) Lecture, three hours. Identification and use of research resources for graduate students.

M201A-M201B. Literary Theory and Criticism. (4-4) (Same as Spanish M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. Letter grading.

202. Synchronic Morphology and Phonology. (4) Lecture, three hours. Study of theoretical synchronic linguistics as applied to Portuguese.

204A-204B. Generative Grammar. (4-4) Lecture, three hours. Course 204A prerequisite to 204B. Generative approach to the Portuguese language, with some consideration of bearing of syntax, etymology, and phonology on style, metaphor, and meter.

M205A-M205B. Development of Portuguese and Spanish Languages. (4-4) (Same as Spanish M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

C229. 20th-Century Portuguese Literature. (4) Lecture, three hours. Requisite: course 105. Study of principal representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C129. S/U or letter grading.

C231. Colonial Brazilian Literature and Culture. (4) Lecture, three hours. Requisite: course 105. Study of most important authors to 1830. May be repeated for credit with topic change. Concurrently scheduled with course C131. S/U or letter grading.

C235. 20th-Century Brazilian Literature. (4) Lecture, three hours. Requisite: course 105. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C135. S/U or letter grading.

M249. Folk Literature of Spanish and Portuguese Worlds. (4) (Same as Spanish M249.) Lecture, three hours. Intensive study of folk literature of Spanish and Portuguese cultures as represented in (1) tallied and poetry, (2) narrative and drama, (3) speech. S/U or letter grading.

M251A-M251B. Studies in Galician-Portuguese and Old Spanish. (4-4) (Same as Spanish M251A-M251B.) Lecture, 20 hours; laboratory, one hour. Study of problems related to historical development of Galician-Portuguese and Old Spanish. Each course may be repeated once with topic change and consent of appropriate guidance committee.

255. Studies in Modern Brazilian Literature. (4) Discussion, two hours. S/U or letter grading.

290. Special Topics. (4) Discussion, two hours. Designed for graduate students. Consult Schedule of Classes or department counselor for topics to be offered in a specific term. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Training in English and Portuguese language teaching with emphasis on active participation, supervision, and preparation for future teaching. S/U grading.

596. Directed Individual Study or Research. (4 to 8) Tutorial, to be arranged. Study or research in areas or topics not offered as regular courses. No more than 8 units may be applied toward M.A. course requirements. S/U or letter grading.

597. Preparation for Graduate Examinations. (4 to 12) Tutorial, to be arranged. Preparation: official acceptance of candidacy by department. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

Spanish

Lower Division Courses

1. Elementary Spanish. (4) Discussion, five hours; laboratory, one hour. P/NP or letter grading.

2. Reading Course for Graduate Students. (4) Lecture, three hours. Knowledge of Spanish not required. May not be applied toward degree requirements. S/U grading.

3. Elementary Spanish. (4) Discussion, five hours; laboratory, one hour. Requisite: course 2. P/NP or letter grading.

4. Advanced Spanish. (4) Lecture, 20 hours; laboratory, five hours. Concurrently scheduled with course C205A. Requisite: course 1 or one year of high school Spanish. Intensive basic course in Spanish, with cultural activities, field trips, luncheons. Offered in summer only. P/NP or letter grading.

2G. Reading Course for Graduate Students. (4) Lecture, three hours. Enforced requisite: course 1G. May not be applied toward degree requirements. S/U grading.

3. Elementary Spanish. (4) Discussion, five hours; laboratory, one hour. Requisite: course 2. P/NP or letter grading.

4. Advanced Spanish. (4) Lecture, 20 hours; laboratory, five hours. Requisite: course 1 or one year of high school Spanish. Intensive basic course in Spanish, with cultural activities, field trips, luncheons. Offered in summer only. P/NP or letter grading.

5. Intermediate Spanish. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 4. P/NP or letter grading.

3A. Intensive Spanish. (4) Lecture, 20 hours; laboratory, five hours. Enforced requisite: course 1 or one year of high school Spanish. Intensive basic course in Spanish, with cultural activities, field trips, luncheons. Offered in summer only. P/NP or letter grading.

9A. Advanced Conversation. (2-2) Discussion, three hours. Enforced requisite: course 8A. P/NP or letter grading.

10. Intensive Elementary Spanish. (12) Lecture, 20 hours. Intensive elementary instruction in speaking, listening, reading, and writing equivalent to courses 1, 2, and 3, with emphasis on Spanish grammar and Hispanic culture. Offered in summer only. P/NP or letter grading.

25. Advanced Conversation and Composition. (4) Lecture, three hours. Enforced requisite: course 5. Emphasis on development of communicative abilities, both verbal and written, as well as on increasing com-
prehension of a variety of forms of cultural production in Spanish language and on preparation for more advanced topics. P/NP or letter grading.

28A. Spanish for Special Purposes: Medical. (4) Lecture, three hours. Enforced requisite: course 5. Practice in speaking, reading, and writing Spanish using authentic vocabulary and cultural situations for students with special interest in fields such as medicine, business, law, etc. P/NP or letter grading.

M35. Spanish, Portuguese, and Nature of Language. (5) (Same as Portuguese M35S.) Lecture, three hours; discussion, one hour. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge. P/NP or letter grading.

42. Iberian Culture. (5) (Formerly numbered M42.) Lecture, three hours; discussion, one hour. Required of majors. Lectures taught in English; discussion sections taught in either Spanish or English. Highlights of civilization of Spain, with emphasis on artistic, economic, social, and historical development as background for upper division courses. P/NP or letter grading.

44. Latin American Culture. (5) (Formerly numbered M44.) Lecture, three hours; discussion, one hour. Required of majors. Lectures taught in English; discussion sections taught in either Spanish or English. High- lights of civilization of Spanish America, with emphasis on artistic, economic, social, and historical development as background for upper division courses. P/NP or letter grading.

60A-60B-60C. Hispanic Literatures in Translation. (4-4-4) Lecture, three hours. Class readings and analysis of selected works in translation. Classroom discussion, papers, and examinations in English. 60A. Spanish Literature; 60B. Spanish-American Literature; 60C. Don Quijote.

88A-88B. Lower Division Seminars. (4) Seminar, three hours. Knowledge of Spanish not essential. Variable topics courses designed to explore various themes and issues pertinent to Hispanic literature and culture. P/NP or letter grading.

97. Variable Topics in Spanish. (2) Lecture, two hours variable topics course with readings, discussions, and papers; consult Schedule of Classes or department counselor for topic to be offered in specific term. May be repeated for credit. P/NP or letter grading.

Upper Division Courses

100A-100B. Introduction to Study of Spanish Grammar. (4-4) Lecture, three hours. Requisite: course M35. 100A. Phonology and Morphology. Analysis of phonemic and morphological systems of Spanish. 100B. Syntax. Study of syntactic systems of Spanish.

102A-102B. Catalan Language and Culture I, II. (4-4) Lecture, six hours. Introduction to oral and written Catalan language. Two-termed accelerated language. (4) Semester equivalent to three terms of traditional pattern and designed for advanced undergraduate and graduate students. May not be applied as upper division elective in major. P/NP or letter grading. 102A. Prepa- ration: at least two years of college-level Spanish, Portuguese, or another Romance language other than Catalan. Preparatory: course 102A. 1011A-111B. History of Portuguese and Spanish. (4-4) (Same as Portuguese M111A-111B.) Lecture, three hours. Requisites: courses M35, 100A. Course M111A is requisite to M111B. Major features of development of Indo-European and Spanish languages from their origins in vulgar Latin to modern times. P/ NP or letter grading. 111A. Morphology; 111B. Mor- phology and Syntax.

120. History of Literature. (4) (Formerly numbered 120A.) Lecture, three hours; discussion, one hour. Requisite: course 25. Introduction to different ways of looking at literary works as historical phenomena. Presentation of major models for writing history — great narratives, cyclic, teleological, sacred, and profane conceptions. Traditional concepts of literary history and problems of mixed categories (historical epochs versus epochs of style, national history, and world literature). P/NP or letter grading.

130. Topics in Medieval Studies. (4) (Not same as course 130 prior to Fall Quarter 2010.) Lecture, three hours. Requisite: course 25. Exploration of medieval Iberian literatures; heroic poetry, prose, and history of the peninsula, with emphasis on its literary and linguistic diversity. Possible topics include Convivencia (peaceful coexistence), Europe and Orient, beginnings of inqui- siti on, pre-13th-century epic, and the 13th-century Christian expansion beyond the peninsula, and flowering of Al-Andalus. May be repeated for credit with topic change. P/NP or letter grading.

135. Topics in Modern Spanish Studies. (4) Lecture, three hours. Requisite: course 25. Exploration of 18th and 17th centuries, with focus on early modern period of Spain and Spanish America. Possible topics include Spanish colonial reform, response to Modern Age, transatlan- tic literary and visual baroque, race and religion in construction of early modern nation, transatlantic fic- tions, early modern identities and theatrical representa- tions, literature and theater history, Atlantic philosophy, poet- ics and poetry. May be repeated for credit with topic change. P/NP or letter grading.

140. Topics in Modern Studies. (4) (Not same as course 140 prior to Fall Quarter 2010.) Lecture, three hours. Requisite: course 25. Exploration of major liter- ary movements and writers of 18th and 19th centuries in Spain and Spanish America. Possible topics include Enlightenment, Romanticism, nation-building literature, realism and naturalism, and works by Cadalso, Con- colorcorvo, Lizarr, Larra, Sarmiento, Becquer, Isacar, Mera, Villaverde, and Galóis. May be repeated for credit with topic change. P/NP or letter grading.

1014A-10145B. Introduction to Chicano Literature. (4-4) (Same as Chicano and Chicano Studies M1014A- M1014B.) Lecture, three hours. Requisite: course 25 or 27. Introduction to texts representative of the Chicano literary tradition — Corrido, Semblanza, chronic, au- tobiography, novel, romance, and satire. Emphasis on way in which narrative forms are formed by and address social and cultural problems. P/NP or letter grading.

1046. Chicano Narrative. (4) (Same as Chicana and Chicano Studies M1046.) Lecture, three hours. Intro- duction to Chicana Chicano literary tradition — Corrido, Semblanza, chronic, auto- biography, novel, romance, and satire. Emphasis on way in which narrative forms are formed by and address social and cultural problems. P/NP or letter grading.

150. Topics in Contemporary Studies. (4) Lecture, three hours. Requisite: course 25. Exploration of main trends that characterize Chicana and Spanish American and Spanish literatures and cultures and main con- cepts used to address them. Possible topics include transculturalization and heterogeneity, race and ethnicity, gender, migration, and Chicana Chicano cultures and the literary modernization in Latin American boom, litera- ture and revolution, autobiography, women’s writing, border literature, and postmodernist fiction. May be re- peated for credit with topic change. P/NP or letter grading.

155. Topics in U.S. Latino Studies. (4) Lecture, three hours. Requisite: course 25. Exploration of the spread of Chicano Chicano culture and culture throughout North America, including literatures that are outgrowth of civil rights movements of 1960s, recent demographic changes, new transnational identi- ties, and mixed citizens. U.S. Latinos and Lati- nos. Chicano, Puerto Rican, Cuban American, Central American American, South American American, and Jewish Latino literatures may be included. May be re- peated for credit with topic change. P/NP or letter grading.

160. Topics in Spanish Linguistics. (4) Lecture, three hours. Requisite: course 25. Exploration of origin of language, how Spanish is acquired, evolution of Spanish from Latin to early modern period, how Span- ish varies in world, how to teach Spanish, Spanish in contact with other languages. Possible topics include inclusion of a variety of different definitions of literacy, programs for adult literates, literacy and gender, approaches to literacy education, first- and second-language acquisition, and language and cognition. May be repeated for credit with topic change. P/NP or letter grading.

15165SL. Taking It to Street: Spanish in Communi- ty. (3) (Formerly numbered 165SL) (Same as Applied Linguistics M165SL) Seminar, three hours; fieldwork, 10 hours. Requisite: course 25 or 27. Service learning course to give students opportunity to use cultural and linguistic knowledge acquired in classes in real-world settings. Students are required to spend mini- mum of eight to 10 hours per week at agreed on site in Latino community. P/NP or letter grading.

15217SL. Chicanas, Chicanoas, Chicano, Chicana, and Trans- historical Studies. (4) Lecture, three hours; discus- sion, one hour (when scheduled). Requisite: course 25. Exploration of the cultural and historical context of Chicana/Chicano Studies and transnational theoretical frameworks. May be repeated for credit with topic change. P/NP or lettergrading.

15217SL. Chicanas, Chicanoas, Chicano, Chicana, and Trans- historical Studies. (4) Lecture, three hours; discus- sion, one hour (when scheduled). Requisite: course 25. Exploration of the cultural and historical context of Chicana/Chicano Studies and transnational theoretical frameworks. May be repeated for credit with topic change. P/NP or lettergrading.

175. Topics in Creative Writing and Translation. (4) Seminar, three hours. Requisite: course 25. Exploration of the nature of translation and creative writing. Guest speakers or instructors include professional literary translators, poets, novelists, playwrights, and filmmakers who discuss theory, methodology, and practice of their art. May be repeated for credit with topic change. P/NP or letter grading.

187A-187B. Advanced Tutorial in Community and Culture I, II. (1-2) Tutorial, one hour. Requisite: course 25 or 27. Designed as adjunct to upper division course in Chicano Chicano studies. Exploration of topics in greater depth through supplemental readings, papers, community service, or other activities. Course 187A may be repeated once for credit. P/ NP or letter grading.

191A. Variable Topics in Spanish. Studies in His-panic Literature and Linguistics. (4) Seminar, three hours. Limited to 15 junior/senior Spanish majors. Variable topics course with readings, papers, and development of culminating paper. Consult Schedule of Classes or department counselor for topic to be of- fered in specific term. P/NP or letter grading.

191B. Variable Topics in Spanish. Studies in His-panic Literature and Linguistics. (4) Seminar, three hours. Advanced variable topics course that studies di- verse aspects of Hispanic culture, civilization, and his-
Graduate Courses

M200. Research Resources. (4) (Same as Portuguese M200.) Lecture, three hours. Identification and use of research resources for graduate students.

M201A-M201B. Literary Theory and Criticism. (4-4) (Same as Portuguese M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. Letter grading.

M228. The Enlightenment. (4) Lecture, three hours. Readings of and lectures on representative works of the period. Letter grading.

M234. Spanish Drama and Poetry from 1898 to the Civil War. (4) Lecture, three hours. Readings of and lectures on representative plays and poems. Letter grading.

M235. Spanish Drama and Poetry after the Civil War. (4) Lecture, three hours. Readings of and lectures on representative plays and poems of the period. Letter grading.

M241A-241B. Contemporary Spanish-American Short Story. (4-4) Lecture, three hours. Study of important short story writers from modernism to the present. Letter grading.

M243A-243B. Contemporary Spanish-American Poetry. (4-4) Lecture, three hours. Intensive study of important poets of Spanish America from modernism to the present. Letter grading.

M244A-244B. Contemporary Spanish-American Novel. (4-4) Lecture, three hours. Study of important novelists from modernism to the present. Letter grading.

M248. Folk Literature of Spanish and Portuguese Worlds. (4) (Same as Portuguese M248.) Lecture, three hours. Intensive study of folk literature of Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech. S/U or letter grading.

M251A-M251B. Studies in Galegan-Portuguese and Old Spanish. (4-4) (Same as Portuguese M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galegan-Portuguese and Old Spanish. Each course may be repeated once with topic change and consent of appropriate guidance committee. Letter grading.

M256A-256B. Studies in Spanish Linguistics. (4-4) Lecture, two hours. Study of problems in analysis and description of the contemporary Spanish language. Each course may be repeated once with topic change and consent of appropriate guidance committee. Letter grading.

M257. Studies in Dialectology. (4) Discussion, two hours. May be repeated once with topic change and consent of appropriate guidance committee. Letter grading.

M262A-M262B. Studies in Medieval Spanish Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee. Letter grading.

M264A-264B. Studies in Golden Age Spanish Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee. Letter grading.

M270A-270B. Studies in 18th-Century Spanish Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee. Letter grading.

M271A-271B. Studies in 19th-Century Spanish Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee. Letter grading.

M277A-277B. Studies in Colonial Spanish-American Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee. Letter grading.

M278A-278B. Studies in 19th-Century Spanish-American Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee. Letter grading.

M280A-280B. Studies in Contemporary Spanish-American Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee. Letter grading.

M286A-286B. Studies in Hispanic Folk Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee. S/U or letter grading.

M290. Special Topics. (4) Lecture, two hours. Variable topics; consult Schedule of Classes or department counselor for topics to be offered in a specific term. May be repeated once with topic change and consent of appropriate guidance committee. Letter grading.

M291A-291B. Colloquial Spanish Research Group. (2-2) Research group meeting, two hours. Limited to graduate students. Discussion and analysis of colloquial manuscripts. Specific topics vary from year to year. Production of student papers for publication and/or presentation at conferences or symposia. Letter grading; 291B. Request: course 291A. May be repeated for credit. S/U or letter grading. Letter grading.

296. Graduate Research Group. (2) Research group meeting, two hours. Limited to graduate students. Designed to bring together graduate students in seminar setting with one or more faculty members to discuss and critique individual research projects, especially dissertation research. S/U grading.

M299. Research Resources for European Studies. (2) Seminar: Research Methods in European Studies (M299, Italian M299, Information Studies M299, German M299, Slavic M299.) Lecture, two hours. Essentials of library research strategy and effective searching in key print and online resources for European and Russian studies. Through combination of lecture, online demonstration, and hands-on activities in and outside class, students understand how to efficiently use library and databases. S/U grading.

310. Teaching Spanish in Elementary School. (4) Lecture, three hours.

373. Teaching Composition. (2) Designed for graduate students. Seminar on teaching writing in Spanish language courses. Introduction to composition theory. Instruction and practice in integrating writing into curricular setting goals and standards, designing and sequencing course materials, evaluating and commenting on papers. May not be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

490. Using Technology in Foreign Language Classroom. (4) Discussion, two hours. Designed for graduate students. Theory and practice of using technology in foreign language classroom. Computer applications that facilitate instruction of grammar, discourse, culture, and composition, as well as evaluation and communication between students and instructor. S/U grading.

596. Directed Individual Study or Research. (4 to 8) Tutorial, to be arranged. Study or research in areas or subjects not offered as regular courses. No more than 4 units may be applied toward M.A. course requirements. S/U or letter grading.

597. Preparation for Graduate Examinations. (4 to 12) Tutorial, to be arranged. Preparation: official acceptance of candidacy by department. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

Ivaylo D. Dinov, Ph.D.

**Academic Administrator**

Robert L. Gould, Ph.D.

**Scope and Objectives**

With the advent of fast computing and the subsequent flood of data detailing almost every aspect of our daily lives comes an urgent need for scientists trained in modern statistical methodologies. Both the undergraduate and graduate programs are structured around three core course sequences that introduce students to the science of data: theoretical statistics, data analysis, and statistical computing. This balance reflects the scale and complexity of problems that statisticians are now routinely called to address. Additional course offerings reflect the work of faculty members in bioinformatics, sensor networks, environmental studies, finance, and computer vision.

Courses and workshops for secondary school teachers of statistics are also offered in order to promote sound statistics pedagogy throughout the curriculum.

Reflecting diverse research interests, the Statistics Department is organized around several centers that collectively provide undergraduate and graduate students rich opportunities for specialized study. These include the Center for Environmental Statistics, Center for Image and Vision Sciences, Center for Statistical Computing, Center for Statistical Research in Computational Biology, and Center for the Teaching of Statistics.

**Undergraduate Study**

The Statistics major is a designated capstone major. Undergraduate students work in small groups to solve problems posed by real community-based or campus-based clients. The capstone gives students an opportunity to put into practice concepts and ideas that otherwise might remain theoretical and/or abstract and to synthesize the many topics they have studied. Students should demonstrate ability to restate investigative questions in terms of statistical models or algorithms, find appropriate research literature to support their work, relate theoretical concepts to real-world problems, and clearly communicate their results to nontechnical audiences.

**Undergraduate Courses**

Students planning to pursue advanced degrees in statistics should enroll in the Statistics 100 sequence. Most courses are offered once or twice each year; students interested in either the major or minor in Statistics should meet with the student affairs officer early in their careers.

**Statistics B.S. Capstone Major**

The Statistics major is designed to provide a general introduction to the practice of statistics for students who intend to pursue study at the graduate level or seek employment in industry or government. Courses are selected to provide sufficient theoretical background for future graduate-level research work, exposure to modern techniques and practices, and experience in fields of application.

To enter the major, students should have successfully completed one lower or upper division Statistics Department course with a letter grade, have an overall grade-point average of 2.0 or better, and declare the Statistics major with the undergraduate adviser in 8117A Math Sciences, (310) 206-3742.
It is strongly recommended that students, in conjunction with the B.S. degree, pursue a minor in a substantive discipline that applies statistics. Students must consult with the undergraduate faculty adviser to ensure that the minor selected is one in which statistics is applied.

Preparation for the Major

Transfer Students

Transfer applicants to the Statistics major with 90 or more units must complete as many of the following introductory courses as possible prior to admission: two years of calculus, one linear algebra course, and one statistics course.

Referrer to the UCLA Transfer Admission Guide at http://admissions.ucla.edu/prospect/adm_transfer for up-to-date information regarding transfer selection for admission.

The Major

Required: Statistics 100A, 100B, 100C, 101A, 101B, 101C, 102A, 102B, 102C, two capstone statistical consulting courses (140SL, 141SL), and two upper division elective courses selected from 130, C151 through 199, Mathematics 131A, 131B, 151A, 151B, 170B, 171, 172A, 172B. Elective courses from outside the department are selected in consultation with the undergraduate faculty adviser.

Only 4 units of course 199 may be applied toward the major. Courses 189 and 189HC may not be applied toward any of the major requirements.

Students planning to continue their study of statistics at the graduate level are strongly advised to include in their schedule as many of the following courses as possible: Mathematics 131A, 131B, 151A, 151B, 170B, 171, 172A, 172B. Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

Statistics Minor

The Statistics minor is designed to provide a solid background in statistics for students majoring in other disciplines.

To enter the minor, students should have successfully completed one course from Statistics 10 through 14 with a letter grade, have an overall grade-point average of 2.0 or better, and file a petition with the undergraduate adviser in 8117A Math Sciences, (310) 206-3742.

Required Lower Division Courses (9 units):
Statistics 10 and Mathematics 31B.

Required Upper Division Courses (28 units):
Seven upper division courses selected from one of the following options: (1) any two sequences from Statistics 100A, 100B, 100C, and 101A, 101B, 101C, and 102A, 102B, 102C, and one elective course or (2) two courses from each of the above sequences and one elective course. Electives may be selected from any upper division statistics course. Statistics 195 may be applied as one of the electives for both options. Courses 105 and 189 may not be applied toward the minor. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in another department or program.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasasa/pgmintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Statistics offers Master of Science (M.S.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Statistics.

Statistics

Lower Division Courses

10. Introduction to Statistical Reasoning. (5) Lecture, three hours; discussion, one hour; computer laboratory, two hours. Preparation: three years of high school mathematics. Not open for credit to students with credit for course 11, 12, 13, 14, or former course 10H. Introduction to statistical thinking and understanding, including strengths and limitations of basic experimental designs, graphical and numerical summaries of data, inference, regression as descriptive tool. P/NP or letter grading.

11. Introduction to Statistical Methods for Business and Economics. (5) Lecture, three hours; discussion, one hour; computer laboratory, one hour. Requisite or corequisite: Mathematics 3A or 31A. Not open for credit to students with credit for course 10, 10H, 12, 13, 14, 100A, 100B, 100C, Mathematics 170A, or 170B. Elements of statistical analysis. Presentation and interpretation of data; descriptive statistics; theory of probability and basic sampling distributions; statistical inference, including principles of estimation and tests of hypotheses; introduction to regression and correlation. P/NP or letter grading.

12. Introduction to Statistical Methods for Geophysics and Environmental Studies. (9) Lecture, four hours; discussion, one hour; laboratory, one hour. Not open for credit to students with credit for course 10, 11, or 13. Introduction to statistical thinking and understanding, with emphasis on techniques used in geophysics and environmental science. Underlying logic behind statistical procedures, role of variation in statistical thinking, strengths and limitations of statistical summaries, and fundamental inferential tools. Emphasis on applications in geophysics and environmental science in laboratory work using professional statistical analysis package, including spatial statistics. P/NP or letter grading.

13. Introduction to Statistical Methods for Life and Health Sciences. (5) Lecture, three hours; discussion, one hour; laboratory, one hour. Not open for credit to students with credit for course 10, 10H, 11, 12, or 14. Presentation and interpretation of data, descriptive statistics, introduction to correlation and regression and to basic statistical inference (estimation, testing of means and proportions, ANOVA) using both spreadsheet methods and parametric models. P/NP or letter grading.

14. Introduction to Statistical Methods in Physical Sciences and Engineering. (5) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: Mathematics 31A. Not open for credit to students with credit for course 10, 10H, 11, 12, or 13. Introduction to conceptual and technical aspects of statistics, with attention to applications of physical sciences and engineering. Topics include data collection and experimental design, quantifying uncertainty in measurements, descriptive statistics, introduction to time series and regression. Laboratory component to learn data analysis on real data and fundamental techniques of computer statistical analysis, including bootstrap methods. P/NP or letter grading.

35. Introduction to Probability with Applications to Poker. (4) Formerly numbered 35B. Lecture, three hours; discussion, one hour. Exploration of some main topics in introductory probability theory, especially discrete probability problems, that are useful in wide variety of scientific applications. Topics include conditional probability and conditional expectation, combinatorics, laws of large numbers, central limit theorem, Bayes theorem, univariate distributions, Markov processes, and Brownian motion. Examination of computer simulation in both depth and discussion of computational approximations of solutions to complex problems using R, with examples of situations and concepts that arise naturally when playing Texas Hold’em and other games. P/NP or letter grading.

88. Sophomore Seminars: Statistics. (2) Seminar, two hours. Requisite: one course from 10, 10H, 11, 12, 13, or 14. Limited to 20 lower division statistics students. Readings and discussions design to introduce students to current statistical consulting research and fieldwork disciplines. Culminating project may be required. P/NP or letter grading.

Upper Division Courses

100A. Introduction to Probability. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 32B, 33A. Not open to students with credit for Electrical Engineering 131A or Mathematics 170A; open to graduate students. Students may receive credit for only two of the following: course 100A, former course 110A, Biostatistics 100A. Probability distributions, random variables, vectors, and expectation. P/NP or letter grading.

100B. Introduction to Mathematical Statistics. (4) Lecture, three hours; discussion, one hour. Requisite: course 100A or Mathematics 170A. Survey sampling, estimation, testing, data summarization; one- and two-sample problems. P/NP or letter grading.

100C. Linear Models. (4) Lecture, three hours; discussion, one hour. Requisite: course 100B. Theory of linear models, with emphasis on matrix approach to linear regression. Topics include model fitting, extra sums of squares principle, testing general linear hypothesis in regression, inference procedures, Gauss/Markov theorem, examination of residuals, principle component regression, stepwise procedures. P/NP or letter grading.

101A. Introduction to Design and Analysis of Experiments. (4) Lecture, three hours; discussion, one hour. Requisites: course from 10, 11, 12, 13, or 14, and Mathematics 32B. Fundamentals of collecting data, including components of experiments, randomization and blocking, completely randomized design and ANOVA, multiple comparisons, power and sample size, and block designs. P/NP or letter grading.

101B. Introduction to Data Analysis and Regression. (4) Lecture, three hours; discussion, one hour. Requisites: course 10, Mathematics 33A. Recommended: course 102A. Applied regression analysis, with emphasis on general linear model (e.g., multiple regression) and generalized linear model (e.g., logistic regression). Special attention to modern extensions of regression, including regression diagnostics, graphical procedures, and bootstrapping for statistical influence. P/NP or letter grading.
101C. Introduction to Regression and Data Mining. (4) Lecture, three hours; discussion, one hour. Enforced prerequisites: course 101B. Design for juniors. Applied regression analysis, with emphasis on general linear model (e.g., multiple regression) and generalized linear model (e.g., logistic regression). Special topics include model estimation, extensions of regression, including regression diagnostics, graphical procedures, and bootstrapping for statistical influence. P/NP or letter grading.

102A. Introduction to Computational Statistics with R. (4) Lecture, three hours; discussion, one hour. Enforced prerequisites: course 100B, Mathematics 33A. Introduction to programming and data analysis in R. P/NP or letter grading.

103. Statistical Analysis with Missing Data. (4) Lecture, three hours. Enforced prerequisites: courses 100C or 101B. Exploration of standard methods for checking whether assumptions required for statistical model, analyze data, and report results. Weekly meetings in classroom setting to study basic con- cepts and techniques of statistical analysis. 141SL. Practice of Statistical Consulting. (4) Seminar, one hour; research group meeting, two hours. Enforced prerequisite: course 140SL. Limited to seniors. Opportunity to solve real data analysis problems for real community clients. Students work in small groups with faculty member and client to frame client's question in statistical terms, create statistical model, analyze data, and report results. On-site visits as necessary. Courses 140SL and 141SL must be taken in consecutive terms. In Progress grading (credit to be given only on completion of course 141SL). P/NP or letter grading.

105. Statistics for Engineers. (4) Lecture. Three hours; discussion, one hour. Enforced prerequisites: course 100A or Electrical Engineering 131A or Mathematics 170A. Fundamentals of descriptive and inferential statistics. Special topics include statistical design and analysis of experiments, statistical process control, and quality assurance. Statistical methodology in engineering and physical sciences, using professional software. Letter grading.

112. Statistical Methods for Social Sciences. (5) Lecture, three hours; discussion, one hour; laboratory, one hour. Enforced prerequisites: course 10. Limited to juniors/seniors. Statistical methods for analyzing social research data. Special topics include social research design; study and implementation of computer statistical programming; applications to social sciences, using professional statistical software. Letter grading.

115. Applied Sampling. (Formerly numbered C135.) Lecture, three hours; discussion, one hour. Enforced prerequisite: one course from 10, 11, 12, 13, 14, or Psychology 100A. Selected theories for quantification of variability in large populations and estimation of population characteristics. Practical application of statistical and inferential methods for planning sample surveys and experiments. P/NP or letter grading.

130. Getting Up to Speed with SPSS, Stata, SAS, and R. (4) Lecture, three hours; discussion, one hour. Enforced prerequisites: course 100B. Introduction to statistical computing and computer software for data analysis. Weekly meetings in classroom setting to study basic computational problems. Letter grading.

131. Experimental Design. (4) Lecture, three hours. Enforced prerequisites: courses 100C or 101B or 101C. Basic principles, analysis of variance, randomized block design, factorial designs, fractional factorial designs, minimum aberration designs, robust parameter designs. Concurrently scheduled with course C225. P/NP or letter grading.

153. Statistical Analysis with Missing Data. (4) Lecture, three hours. Enforced prerequisite: course 102A. Study of methods dealing with nonresponse and missing data, including use of auxiliary variables; limitations of simple methods, and modern methods for dealing with missing data, such as EM algorithm and multiple imputation. P/NP or letter grading.

154. Measurement and Its Applications. (Same as Psychology M144.) Lecture. Three hours. Enforced prerequisites: one course from 10, 11, 12, 13, 14, or Psychology 100A. Selected theories for quantification of variability in large populations and estimation of population characteristics. Practical application of statistical and inferential methods for planning sample surveys and experiments. P/NP or letter grading.

155. Applied Sampling. (Formerly numbered C135.) Lecture, three hours; discussion, one hour. Enforced prerequisite: one course from 10, 11, 12, 13, 14, or Psychology 100A. Selected theories for quantification of variability in large populations and estimation of population characteristics. Practical application of statistical and inferential methods for planning sample surveys and experiments. P/NP or letter grading.

157. Probability and Statistics in Finance. (4) Lecture, three hours. Enforced prerequisites: courses 100A and 100B, or 101B and 101C, or one course from 10, 11, 12, 13 and 14. One-half division of statistics course. Designed for social sciences graduate students and advanced undergraduate students. Topics include probability models, statistical inference, regression, analysis of variance, time series analysis, and Monte Carlo methods. P/NP or letter grading.

160. Getting Up to Speed with SPSS, Stata, SAS, and R. (4) Formerly numbered 130A.) Lecture, three hours; discussion, one hour. Enforced prerequisites: courses 100A and 100B. Basic principles of statistical computing, basic computer programming, and data handling and analysis. Applications to social sciences, using professional statistical analysis software package for data analysis. Letter grading.

161B. Seminar. (4) Lecture, three hours. Preparation: Some knowledge of basic calculus and linear algebra. Enforced prerequisites: courses 100A and 100B, or 101B and 101C, or one course from 10, 11, 12, 13 and 14. Designed for social sciences graduate students and advanced undergraduate students seeking training in data analysis and data methods employed in social sciences. Concurrently scheduled with course C216. P/NP or letter grading.

162. Foundations of Scientific Writing. (2) (Formerly numbered C183.) Seminar. One hour. Development and perfection of student written communication skills through variety of scientific writing and reading assignments. Discussion of writing and practice with different forms of professional writing. Analysis of quality of writing, including control, clarity, grammar, and mechanics. P/NP or letter grading.

164. Careers in Statistics. (1) Lecture, one hour. Discussion of applications of statistics by weekly guest speakers. How statistical skills, data analysis, economic decisions, arts, environment, and other fields, with some emphasis on career paths in statistics. P/NP grading.
Graduate Courses

200A. Applied Probability. (4) Lecture, three hours. Requisite: course 100A or Mathematics 170A. Limited to graduate students. Specialized treatments of probability theory, martingale, and selected topics from queuing, reliability, speech recognition, computational biology, mathematical finance, epidemiology. S/U or letter grading.

201A. Research Design, Sampling, and Analysis. (4) Lecture, three hours. Designed for graduate stu- dents. Basic principles, ANOVA block designs, factorial designs, unbalanced and numerical integration, regression, stratified sampling, and cluster sampling. S/U or letter grading.

201C. Advanced Modeling and Inference. (4) Lecture, three hours. Strongly recommended requisites: courses 200B, 201B. Designed for graduate students. Introduction to advanced topics in statistical modeling and inference, including hierarchical models, hidden Markov, generative (hidden Markov), and discriminative models, variational inference, empirical Bayes, shrinkage and penalty, confidence intervals. Likelihood ratio test, p-value, false discovery, nonparametrics, semi-parametrics, model selection, dimension reduction. S/U or letter grading.

202A. Survey of computational methods that are espe- cially useful for statistical analysis, with implementa- tions in statistical package R. Topics include matrix analysis, multivariate regression, principal component analysis, clustering, and discriminant optimi- zation methods. S/U or letter grading.

202C. Monte Carlo Methods for Optimization. (4) Lecture, three hours. Requisite: course 200B. Monte Carlo methods and numerical methods that are espe- cially useful for statistical analysis, with implementa- tions in statistical package R. Topics include matrix analysis, multivariate regression, principal component analysis, clustering, and discriminant optimi- zation methods. S/U or letter grading.

204. Nonparametric Function Estimation and Mod- eling. (4) Lecture, three hours. Requisite: course 200A. Introduction to many useful nonparametric tech- niques such as nonparametric density estimation, non- parametric regression, and high-dimensional statistical modeling. Some semiparametric techniques and func- tional data analysis. S/U or letter grading.

211. Analysis of Data with Qualitative and Limit- ed Dependent Variables. (4) Same as Sociology M242.) Lecture, three hours. Requisites: courses 100A, 100B, and 100C, or Sociology 210A and 210B. Models for categorical and dependent outcomes: logistic regression, probit regression, Cox proportional hazards, hierarchical (multilevel) models, log-linear models. S/U or letter grading.

216. Social Statistics. (4) Lecture, three hours. Preparation: some knowledge of basic calculus and linear algebra. Requisites: courses 100A and 100B, or 101B and 101C, or one course from 10, 11, 12, 13 and one upper division statistics course using regression. S/U or letter grading.

225. Experimental Design. (4) Lecture, three hours. Requisite: course 201A. Topics include analysis of variance, randomized block designs, factorial experiments, fixed and random effects, splitting the plot, confounded experiments, Latin square designs, crossover designs, balanced incomplete block designs, and factorial designs. S/U or letter grading.

231. Pattern Recognition and Machine Learning. (4) Same as Computer Science M276A.) Lecture, three hours. Designed for graduate students. Funda- mental concepts, theories, and algorithms for pattern recognition, introduction to machine learning, and data mining. Topics include Bayesian decision theory, parametric and nonparametric estimation, density estimation, clustering and pattern finding, sampling, and various data mining algorithms. S/U or letter grading.

233. Introduction to Bayesian Statistics. (4) Lecture, three hours. Preparation: one course in probability and statistics. Requisites: courses 100A and 100B, or 101B and 101C. Topics include Bayesian decision theory, parametric and nonparametric learning, clustering, complexity and computational limits, and methods for analysis of spatial data hypothesized to be generated by unmeasured latent variables, including

M244. Statistical Analysis with Latent Variables. (Same as Education M231E.) Lecture, three hours. Preparation: courses of sampling from finite populations, sources of sampling and estimation bias, and methods of generating efficient and precise estimates of population characteristics. Practical applications of sampling methods via lecture and hands-on laboratory exercises. Concurrently scheduled with course C155. S/U or letter grading.

M245. History of Statistics. (Same as History M220.) Lecture, three hours. History of statistics and probability theories over vast and diverse territory. Development of mathematical methods; philosophical, political, and social issues that were linked to their emergence and use. S/U or letter grading.

246. Statistical Model Selection. (4) Lecture, three hours. Preparation: basic knowledge of calculus, linear algebra, and computer programming. Modern methods for constructing and evaluating statistical models, including non-Bayesian and Bayesian statistical modeling approaches. Discussion of theoretical points and data analysis. Letter grading.

CM248. Applied Sampling. (4) Formerly numbered C214G. Lecture, four hours; discussion, one hour. Preparation: upper division and graduate students in social or life sciences and those who plan to major in Statistics. Topics include methods of sampling from finite populations, estimation and hypothesis testing. Terminology, estimation, testing, and model building considerations. Letter grading.

M250. Statistical Methods for Epidemiology. (4) (Same as Biostatistics M240E and Epidemiology M211.) Lecture, four hours. Preparation: two terms of statistics (such as Biostatistics 100A, 100B). Requisites: Epidemiology 200B, 200C. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in Epidemiology 200B and 200C and introduction of new topics, including principles of epidemiologic analysis, trend analysis, smoothing and sensitivity analysis. S/U or letter grading.

M251. Statistical Methods for Life Sciences. (4) (Same as Ecology and Evolutionary Biology M216.) Lecture, three hours. Requisite: course 13. Fundamentals of mathematical methods and statistical procedures in life sciences, including statistical inferences for continuous and categorical data (estimation, testing of means and proportions, ANOVA) study design, linear regression, and introduction to principle components analysis. Methods to be implemented on computer with SAS. S/U or letter grading.

M254. Statistical Methods in Computational Biology. (4) (Formerly numbered M217 and M21I and Bimathematics M271.) Lecture, three hours; discussion, one hour. Preparation: elementary probability concepts. Requisites: course 100A or 203A or Bioinformatics M210. Preparation: computational methods developed and widely applied in several branches of computational biology, such as gene expression, sequence alignment, motif discovery, comparative genomics, and biological pathways, with emphasis on understanding basic statistical concepts and use of statistical inference to solve biological problems. Letter grading.

257. Design, Analysis, and Modeling for Embedded Sensing. (4) Lecture, three hours; discussion, one hour. Preparation: knowledge of probability and regression analysis. Limited to graduate students. Analysis of data produced by embedded sensing, which is product of several technological advancements in hardware and software and systems. Topics include low-power computing and communication protocols, and robot devices. S/U or letter grading.

C260. Site-Specific Topics. (4) Seminar, three hours. Tracking of invisible flows of data through great-er Los Angeles metropolitan area, with focus on specific number of sites situated prominently in both physical and virtual (data) spaces. Documentation of data that originate, terminate, or simply route through each location. Consideration of analyses (visual, computational, or simply informal), decisions that are made, and actions that are taken on basis of these data, whether they be human or automated responses. Documentation of how patterns of data acquisition and analysis dictate behaviors, enable or restrict movements, and shape local community. Alterations or addi-tions to data flows that could improve quality of life for inhabitants of or visitors to sites. May be repeated for credit; however, only one C260 may be applied toward any graduate degree. Concurrently scheduled with course C190.

C261. Introduction to Pattern Recognition and Machine Learning. (4) Lecture, three hours. Requisites: course 100B. Mathematics 33A. Introduction to pattern analysis and machine intelligence designed for advanced undergraduate or graduate students. Concurrently scheduled with course C2161. S/U or letter grading.

C285. Seminar: Computing for Statistics. (2 to 4) Seminar, one to three hours. Topics in various statistical areas by means of lectures and informal conferences with staff members. S/U grading.

M286. Seminar: Statistical Problem Solving for Population Biology. (2) (Same as Ecology and Evolutionary Biology M286.) Seminar, two hours. Designed for graduate students. Statistical solutions to problems encountered by biology graduate students in their own research. S/U or letter grading.

287. Seminar: Gene Expression and Systems Biology. (2) Seminar, two hours. Designed for graduate students (open to undergraduate students with con-sent of instructor). With high-throughput technologies such as genomic sequencing, microarray gene expressions, Chromatin-Immunoprecipitation DNA CHIP, and mass spectrometry (MS/MS) proteomics, scientists are collecting genetic, genomic, and pathway data at rates far beyond imagination one deca-de ago. Such gigantic volumes of data produced cannot be analyzed with traditional tools or highly sophisti-cated computational methods guided by mathe-matical and statistical principles. Cutting-edge genom-ics research from statistical data analytic point of view. S/U or letter grading.

295L. Service Learning for Graduate Statistical Consulting. (Formerly numbered 291L.) Research group meeting, two hours; fieldwork, two hours. Exposure to realistic statistical problems that appear in typical interactions between statisticians and researchers, with lectures centered on case studies presented by faculty members and invited speakers from business and academic fields. Applied regression analysis and design of experiments, together with ba-sic statistical programs. Presentations and written re-port required. S/U or letter grading.

298. Graduate Student Statistical Packages Seminar. (1 to 2) Seminar, two hours. Introduction to vari-ous statistical packages. How to handle data in differ-ent packages (input, output, data management, treat-ment of missing data), general syntax of different pro-gramming languages, and good practice for writing own statistical functions. S/U grading.

293. Graduate Student Research Seminar. (2) Sem-inar, two hours. Designed for graduate statistics stu-dents. Participating seminar in which various aspects of performing research are discussed by variety of fac-ulty members. Exposure to current research topics in statistics and discussions of special topics, select-able thesis or dissertation topics. May not be applied toward degree course requirements. S/U grading.

294. Scientific Writing. (2) (Formerly numbered C294.) Seminar, two hours. Development of oral and written presentations of statistical data. Objectives and techniques of scientific writing and practice with different forms of professional writing. Participation in oral presentations of student work. S/U or letter grading.

297SL. Service Learning and Community Learning for Statistics. (2 to 4) Seminar, three hours; fieldwork, 10 hours. To further knowledge by applying what students have learned in class to an actual service work setting under guidance of faculty mentor. Interac-tion with nonprofit organizations can be either on loca-tion or over the Internet. May be used for M.S. thesis; research paper/project required. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Semi-nar to be arranged. Practicum on placement or part-time employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

485. Statistics Programming and Analysis with R. (1 to 4) Seminar, one hour. Teaching of researchers and data analysts in use of R, software environment for statistical computing and graphics, in applied settings and taught in three tracks — data to graphics in R, ba-sic statistical analysis in R, and advanced topics in R. S/U or letter grading.

495A. Teaching College Statistics. (2) Seminar, two hours; intensive training at beginning of Fall Quarter. Required of all potential departmental teaching assis-tants and new Ph.D. students. Practical and theoretical issues in teaching of statistics. S/U grading.

495B. Teaching College Statistics. (2) Seminar, two hours. Weekly discussion and intensive training for all first-year teaching assistants that addresses practical and theoretical issues in use of technology to teach statistics, including use of statistical software as education tool. S/U grading.

495C. Evaluation of Teaching Assistants. (2) Semi-nar, two hours. Overview of new trends and directions in teaching of statistics and grading of teaching assis-tants twice by instructor to give them chance to ob-
serve and analyze their own strengths and weaknesses and think about how they can improve their teaching. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Supervised individual reading and study on project approved by a faculty member. May be repeated for credit. Letter grading.

STUDY OF RELIGION

Chairs
Ronald W. Busuttil, M.D., Ph.D. (Dumont-UCLA Professor of Transplantation Surgery and William P. Longmire, Jr., Professor of Surgery), Executive Chair
Richard J. Shemin, M.D. (Robert and Kelly Day Professor of Cardiothoracic Surgery), Vice Chair, Clinical Affairs
Jonathan R. Hiatt, M.D. (Robert and Kelly Day Professor of General Surgery), Vice Chair, Surgical Education
Peter F. Lawrence, M.D. (Wiley F. Barker Endowed Professor of Vascular Surgery and Lillian and Alvin L. Bergman Professor of Vascular Surgery), Vice Chair, Clinical Practice and Planning
Jerzy W. Kupiec-Weglinski, M.D., Ph.D. (Juan S. and Ralph N. Goldwyn Professor of Immunobiology and Transplantation), Vice Chair, Basic Research
Clifford Y. Ko, M.D., M.S.H.S. (Robert and Kelly Day Professor of Surgical Outcomes), Vice Chair, Clinical Research
Matthias G. Steltzer, M.D., Vice Chair, VA Greater Los Angeles Healthcare System
Bruce E. Stabile, M.D., Vice Chair, Harbor-UCLA
Jesse E. Thompson, Jr., M.D., Vice Chair, Olive View-UCLA
Bruce L. Gewertz, M.D., Chief of Surgery, Cedars-Sinai
Nand S. Datta, M.D., Chief of Surgery, Drew University

Scope and Objectives
The Department of Surgery instructs medical students during all four years of medical school. Students are expected to obtain broad knowledge of diseases treated by surgical means and to understand the pathophysiology of these conditions, the therapy that may be applied, and the anticipated results of treatment. They are also encouraged to learn about the effects of surgical illness on the patient and the patient’s family and environment.

Third-year students participate in one 12-week core clerkship in clinical surgery and are assigned to rotations at a combination of Reagan UCLA, Cedars-Sinai, Harbor-UCLA, West Los Angeles VA, Olive View-UCLA, and Santa Monica UCLA Medical Centers. Each facility has a special orientation depending on the patient population and the individual staff. During the fourth year students may elect to take additional clinical rotations with increasing responsibilities. Additional in-depth elective courses are offered in collaboration with other departments. For further details on the Department of Surgery and a listing of the courses offered, see http://www.surgery.medsch.ucla.edu.

Surgery
Upper Division Course
199. Directed Research in Surgery. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Julie Weiss

Scope and Objectives
UCLA’s theater program offers comprehensive training for the profession, as well as serious study of theater’s long history and rich literature. Drawing on this vibrant heritage, the curriculum promotes an awareness of theater as a global phenomenon embodying the contributions of diverse cultures and explores theater as a forum for reflecting the human experience as revealed through the dynamics of theater production. With this in mind, students engage in the presentation of dramatic work in a community where creativity and critical thought combine in the exploration of the artistic and intellectual challenges inherent in the making of theater. Manifesting talent and promise as well as representing a wide range of backgrounds and interests, prospective students are selected by the faculty through auditions and interviews in cities throughout the U.S.

At the undergraduate level, students receive education in acting, design, directing, history and criticism, musical theater, and playwriting, all within the rigorous liberal arts framework of the B.A. degree. The department also offers a Theater minor.

At the graduate level, the M.A. in Theater offers a flexible curriculum of graduate courses that
provides a focus in theater scholarship or theater practice. For exceptional students who wish to pursue graduate education, the M.A. offers a foundation in theater history, criticism, or performance studies, or an area of theater practice such as dramatic writing, directing, design, or theater education outreach. Students in the M.F.A. program develop as artists and are given preprofessional training in the skills of theater, while Ph.D. students engage in critical investigations of the art form. In conjunction with their theater studies, students also have the opportunity to pursue elective courses in the area of film and television.

For current or specific information about the programs and faculty members, see http://www.tft.ucla.edu/programs/ht.

**Undergraduate Study**

The Theater major is a designated capstone major. Theater capstone courses represent the highest level of student scholarship/artistic achievement in each of the undergraduate areas. They are the culmination of all the broad educational courses and core foundational courses that have come before. Group participation in the creation and production of student projects is core to the curriculum. Capstone courses vary by area and require individual projects or performances, a major artistic contribution to a theater production, or an individual course of study resulting in a research paper. Through their capstone work, students demonstrate general knowledge and specialized skills, successfully relate their experience in a studio, production, or fieldwork setting, communicate effectively orally and in writing, and engage with a community of artists and scholars presenting theatrical work.

**Theater B.A.**

**Capstone Major**

The Theater B.A. provides a liberal education by combining critical study of theater with experiential practice in one or more of its component parts. Students explore acting, design, directing, playwriting, and production to build a foundation for future creative work. Specialized and advanced training is available to prepare students for a variety of careers, further training, or graduate study. At the upper division level, students choose from an array of advanced elective courses in acting, design and production, directing, musical theater, playwriting, theater history, criticism, dramatic literature, and performance.

**Admission**

All applicants must meet the admission standards of UCLA and the departmental screening process. Applications are accepted only in November for admission to the following Fall Quarter. There are no mid-year admissions. Students must submit required supplemental materials directly to the Theater Department. All applicants must also sign up for an audition and/or interview at http://www.tft.ucla.edu/admissions/. There is a $50 fee for all auditions/interviews. Applicants may submit materials for consideration in one or more of the following areas: acting, design and production, directing, history and criticism, musical theater, and playwriting.

**Preparation for the Major**

**Required:** Theater 11, 12, 13, 14A, 14B, 14C, 50 (must be taken for 4 units total).

**The Major**

**Required:** A total of 61 upper division units, including Theater 101A, 101B, 101C, 150 (must be taken for 4 units total), and 38 upper division elective units selected from courses 101A through 199 within the elective sequences listed below.

Through some of these required courses, students are responsible for completing specific production assignments related to production activity of the theater curriculum.

The acting electives include fundamental and advanced courses in all aspects of performance training that prepare students for careers in performance. There is some performance in projects, but emphasis is on class and studio work. Upper division advanced courses explore verse, scene study, comedy, cabaret, movement, and combat. One capstone senior project (Theater 180) is required.

The design and production electives introduce design principles and investigate the design of scenery, lighting, costumes, and sound for theater, film, and television in lower division courses. Four design and production areas of study are available at the upper division level — scenic design, costume design, lighting design, and sound design. Students select from an array of design skills courses to develop proficiency in essential areas of rendering, drafting, painting, computer-aided design, and technology. Courses in art, history, and philosophy build an understanding of the social history of visual ideas. A sequence of courses in each area of study examines design principles and practice specific to each field. One capstone senior project (Theater 180) is required.

The directing electives explore the basic theories of play direction, as well as text analysis and craft fundamentals. Advanced courses emphasize psychological aspects of director-actor communication and development of specific directorial and production styles. One capstone directing course (Theater 163C) is required.

The history and criticism of theater and drama electives include the study of fundamental cultural, social, ethical, and political issues in the context of artistic expression enriched by historical perspective. The curriculum promotes an awareness of the theater as a global phenomenon embodying the contributions of diverse cultures and explores the verbal and visual elements of its language as revealed through the dynamics of theater production. One capstone senior project (Theater 180) is required.

The Ray Bolger Musical Theater Program electives train selected students in acting, singing, and dance for the musical theater and provide knowledge of musical theater history. Additional courses provide hands-on training with professional artists and a range of performing experiences from workshops to full productions. One capstone senior project (Theater 180) is required.

The playwriting electives include specialized and advanced courses that prepare students to write one-act and full-length plays, books and lyrics for music theater, and scripts for the one-person show. One capstone intermediate playwriting course (Theater 131C) is required.

Due to curriculum changes, students in the Theater major are no longer allowed to change their major to Film and Television at the end of their sophomore year.

**Theater Minor**

The Theater minor is designed for students who wish to augment their major program of study with a series of courses that promote the study of theater as a global phenomenon for reflecting the human experience. The minor consists of a selection of lower division courses that expose students to the fundamentals of theatrical production, as well as acting, writing, and directing. Upper division courses offer more focused study of those areas, as well as theater design, history, education, and theater of non-Western cultures.

To enter the minor students must be in good academic standing (minimum 2.0 grade-point average), have completed at least one theater course with a grade of C or better, and file a petition at the Student Services Office, 103 East Melnitz Building, (310) 206-8441. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by each student's school or college.

**Required Lower Division Courses (6 to 10 units):** Theater 10 and one course from 15, 20, 28A, 28B, 28C, 30.

**Required Upper Division Courses (22 to 27 units):** Theater 150, one course from 102A through 102E, M103A through M103G, 105, 106, 107, 108, M109, 110, 111A, 111B, 111C, or 113, and four courses from 118A, 118D, 121, 123, 130A, 138, 139, C146A, C146B, C146C, 149, 195.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in another department or program, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer credit for any of the above is subject to department approval.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gndnet.ucla.edu/gasaa/library/programintro.htm. In many cases, more detailed guidelines may be outlined in an-
nouncements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Theater offers Master of Arts (M.A.) and Master of Fine Arts (M.F.A.) degrees in Theater and Candidate in Philosophy (C.Phil) and Doctor of Philosophy (Ph.D.) degrees in Theater and Performance Studies.

Theater

Lower Division Courses

1A-1B-1C. Introduction to Dance for Musical Theater. (1-1-1) Studio, four hours. Designed for Theater majors. Introduction to basic music theater dance technique. Each course may be repeated once for credit. Letter grading.

2. Theater in Performance: International Theater Festival. (5) Lecture, three hours; discussion, two hours. Exploration of theater in performance as revealed in productions and guest artists of UCLA International Theater Festival, with emphasis on collaborative role of theater artists and active role of audience. Students view selected productions, go back stage to discover how they are realized, and meet creative team. Letter grading.

4. Israel and Palestine in Literature and Media. (5) Lecture, three hours; discussion, two hours. Readings in English, Letter grading. Israel and Palestine through artistic, cultural, and political modes of analysis. Examination of selected works of literature, theater, and film dramatic by Israeli, Palestinian, and Western artists, looking beyond facile cultural cliches to deeper insights. Letter grading.

10. Introduction to Theater. (5) Lecture, three hours; discussion, one hour. Exploration of theater in production, with emphasis on collaborative role of theater artists and active role of audience. Understanding of and access to live theatrical event and enhanced appreciation of value of theater to society; development of critical skills through consideration of representative examples of theatrical production from Europe, America, Asia, and Africa. Letter grading.

11. Approaches to Interpretation of Theater and Performance. (5) Lecture, four hours. Introduction to basic method and concerns in interpretation of theater and performance throughout world. Topics illustrated by faculty members and guest speakers, visits to off-campus theaters, and reading from contemporary plays. Letter grading.

12. Introduction to Performance. (4) Lecture, two hours; studio, four hours. Investigation of phenomenon of performance and role of performer in theatrical events, including interpretation of drama through performance. Examination of various forms of theatrical performance and styles of expression, and development of acting, voice, and movement skills. Letter grading.

13. Play Reading and Analysis. (5) Lecture, three hours. Provides base for subsequent study in theater. Development of techniques of play reading and habits of scholarship useful to further study in each of theater's subdisciplines, including acting, directing, design, playwriting, and critical study. Letter grading.

14A-14B-14C. Introduction to Design. (5-5-5) Lecture, three hours; studio, six hours. Exploration of visual interpretation of drama. Study of styles and techniques of design, collaborative role of designer, principles of design for scenery, lighting, costumes, and sound. Both technical and aesthetic groundwork for further study in design. Letter grading.

15. Introduction to Directing. (4) Lecture, two hours; studio, four hours. Requisite: course 11. Investigation of role of director in theatrical production and theories of play direction, with emphasis on analysis and interpretation of dramatic work and its realization in production. Letter grading.

20. Acting Fundamentals. (4) Studio, four hours. Introduction to interpretation of drama through art of actor. Development of vocal awareness, listening, and discipline in presentation of dramatic material to audience. P/NP or letter grading.

23. Musical Literacy for Singing Actors I. (2) Studio, three to four hours. Introduction to reading and understanding musical notation, musical terminology, and basic to complex rhythm-reading and sight-singing in C major. Letter grading.

26. Alexander Techniques. (2) Studio, three hours. Study and practice in Alexander techniques as method of developing balance, poise, and coordination of body and mind. Exploration of principles, techniques, and movement potential of actors and relevant use of visual and animal studies to character development and to expansion of movement potential. P/NP or letter grading.

27. From Vaudeville to Standup Comedy. (2) Studio, three hours. Exploration of many aspects of comedy using American vaudeville traditions, acts, and performers as historical base to experience importance of rhythm, timing, delivery, speech, and body language in all styles of comedy, to find value of improvisation/ imagination as well as innovative writing skills in comic forms, to discover how comedy draws from so many art forms, including music/songs, dance, storytelling, clowning, magic, design, and tumbling/stunts, and to build overall confidence in comic performance skills. P/NP or letter grading.

28A-28B-28C. Acting, Voice, and Movement Workshops I. (2-2-2) Studio, three to six hours. Study of beginning acting technique, scene study, and development of voice and movement skills. Each course may be repeated for maximum of 12 units. Letter grading.

30. Dramatic Writing. (1 to 4) Studio, three hours. Exploration and development of creative writing skills for one or more of various forms of entertainment media. May be taken for maximum of 8 units. Letter grading.

35A-35B-35C. Singing for Musical Theater I. (1-1-1) Studio, four to five hours. Exploration of musical literacy and development of singing techniques for musical theater. Basic voice training to explore how voice works, learn to maintain appropriate and consistent voice, and learn to preserve voice health. How to build stamina and range. Letter grading.

50. Theater Production. (1 to 2) Laboratory, three to six hours. Laboratory experience in various aspects of theater production, including stage management or member of production crew. May be repeated for maximum of 8 units. Letter grading.

57. Production Practice in Theater, Film, Video, and Digital Media. (3) Studio, three hours. Exploration and laboratory experience in one or more of various aspects of production and postproduction practice for entertainment media, including theater, film, video, and digital media. May be taken for maximum of 8 units. Letter grading.

Upper Division Courses

101A. Making Tradition. (5) Lecture, four hours; discussion, one hour. Exploration of traditional performance traditions in terms of how they were produced, including training techniques, archives, practices, and forms of history. Examples may include classical Grecian tragedy, Noh and Kyogen, Ta'zi and Chuanji, Quem Queris/English medieval festival plays, Saniskrit drama, Yoruba/Egungun, Yaqiu deer dance, depending on faculty and resources available. Letter grading.

101B. Reconstructing Theatrical Past. (5) Lecture, three hours; discussion, one hour. Reconstructing the theater is understood in several ways: reconstruction of performance spaces such as New Globe and of specific productions and traditions such that seek to reintegrate classical traditions. Letter grading.

101C. Reconstructing Theatre. (5) Lecture, three hours; discussion, one hour. Exploration of deconstructive practices such as fragmentation, abstraction, and absurdism, with focus on theatrical movements, directorial adaptations, cultural translations, and new forms. Letter grading.

102A. Theater of Japan. (5) Lecture, three hours. Exploration of major theater traditions of Japan from emergence of earliest theatrical activity to present, including investigation of Noh, Bunraku, and Kabuki performance traditions. Letter grading.

102B. Theater of Southeast Asia. (5) Lecture, three hours. Exploration of representative theatrical genre from various geographical areas in Southeast Asia to illustrate importance and contribution that theater plays in society. Letter grading.

102C. Cross-Cultural Currents in Theater. (5) Lecture, three hours. Exploration of interculturalism in theater, with focus on 20th-century alternatives to naturalism. Analysis of historical materials and dramatic texts to investigate cultural, aesthetic, ethical, and social implications of borrowing from other cultures. Letter grading.

102E. Theater of Non-European World. (5) Lecture, three hours; discussion, one hour. Survey of theater forms of non-European world in which primary attention is concentrated on examination and analysis of traditional dance-drama and puppet theaters of East Asia, Southeast Asia, South Asia, Middle East, and Africa. Analogous forms from European theater included for comparative purposes. P/NP or letter grading.

103A. African American Theater History: Slavery to Mid-1800s. (5) (Same as Afro-American Studies M103A.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from minstrel stage to rise of American musical. Letter grading.

103B. African American Theater History: Minstrel Stage to Rise of American Musical. (4) (Same as Afro-American Studies M103B.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from minstrel stage to rise of American musical. Letter grading.

103C. Origins and Evolution of Chicano Theater. (5) (Same as Chicana and Chicano Studies M103C.) Lecture, three hours. Designed for juniors/seniors. Exploration of development of Chicano theater from its beginning in legends and rituals of ancient Mexico to works of Luis Valdez (late 1960s). P/NP or letter grading.

103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement. (5) (Same as Chicana and Chicano Studies M103D.) Lecture, three hours. Analysis and discussion of Chicano and Chicanx theatrical and political events from 1965 to 1980, as well as theatrical traditions that led to emergence of Chicano theater. Letter grading.

103E. African American Theater History: Depression to Present. (4) (Same as Afro-American Studies M103E.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and lit-
erature of theater as developed and performed by Afri-
can American artists in America from Depression to
depression and rapidly. 103F. Native American Theater. (5) Lecture, three
hours. Study of American Indian theater as evolving art.
P/NP or letter grading.

M103G. Contemporary Chicano Theater: Chicano Theatre since 1980. (5) (Same as Chicana and Chica-
of Los Angeles. 104B. Civil War to WWI; 104C. WWI to Present.

105. Main Currents in Theater. (5) Lecture, three hours. Critical examination of leading theories of the-
ater from 1887 to present. Study and discussion of
management. Examples primarily from theaters within
their audience, and their goals. Concentration on the-
performance. Study of how experimental theaters orig-
ination. Letter grading.

108. Undergraduate Seminar: History and Criti-
igm. May be repeated once for credit. P/NP or letter
grading.

113. Special Topics in Critical Studies. (5) Lecture, three hours. Study of history of influence
relations of arts to tr aditional disciplines of learn-

119A. Theater for Child Audience: Theory and Crit-
ism. (4) Lecture, six hours. Requisite: course 131A. Preparation
ation of play forms and writing of one-act and full-

123. Intermediate Acting for Stage. (4) Lecture/stu-
dio, four hours. Requisite: course 20. Study and prac-
tice of art of acting through presentation of moderately
and application of those techniques to acting prob-
lems. P/NP or letter grading.

124A-124B-124C. Voice and Speech II. (1-1-1) Stu-
dio, three to four hours. Development of voice and speech

125A-125B-125C. Movement and Combat II. (1-1-1) Studio, three to four hours. Physical training for ac-
tors, concentrating on warming up body, relaxation,
control, stunts, gymnastics, martial arts, and use of
weapons. Letter grading.

125D-125E-125F. Movement and Combat III. (1-1-1) Studio, three to four hours. Physical awareness for ac-
tors, concentrating on warming up body, relaxation,
control, stunts, gymnastics, martial arts, and use of
weapons. Letter grading.

126A-126B-126C. Acting Ill. (4-4-4) Studio, six hours. Study of characterization, including introduction to
Shakespeare. Approach to verse, scansion, use of em-
boles in classic texts. Personification within height-
ened realistic reality. Letter grading.

Comedy workshop, stand-up comedy, performance art
pieces. Audition and cold reading workshop. Solving
individual acting problems. P/NP or letter grading.

128A-128B-128C. Acting, Voice, and Movement Workshops II. (2-2-2) Studio, four to six hours. Study of
advanced acting technique, scene study, and develop-
ment of voice and movement skills. Each course may be repeated for maximum of 12 units. Letter grad-
ing.

129A. Contemporary Topics in Theater, Film, and
Television. (2) (Same as Film and Television CM129.) Lecture, two hours; screenings, two hours. Limited to
junior/senior and graduate theater/film and television
students. Examination of creative process in theater, film, and television, with consideration of writing, direc-
tion, production, and performance. Overview of individ-
ual and collective contributions to the image; examination of
theatrical and interrelationships among these arts. In-
dividual units include participation of leading members
of theater, film, and television professions. May be repeated twice for credit. Concurrently scheduled with
course CM229. P/NP or letter grading.

130A. Fundamentals of Playwriting I. (5) Lecture, three hours; discussion, one hour. Study and analysis of
dramatic structure, characterization, and narrative
leading to guided completion of student-
written one-act play. Letter grading.

130B. Fundamentals of Playwriting II. (4) Lecture, three hours plus conference. Requisite: course 130A.
Study in original material for theater, its preparation and
development. Designed to give further insight into
writing techniques in playwriting, scene study, and develop-
ment of play and performance. May be repeated once for credit. P/NP or letter grading.

131A-131B-131C. Intermediate Playwriting. (5-5-5) Lecture, three hours. Letter grading. 131A. Play Strate-
gies and Styles, Requisite: course 30 or 130A. Explo-
rating the role of play forms and writing of one-act play.
131B. One-Act Play. Requisite: course 131A. Preparation of the text and writing of one-act play and/or outline of
full-length play. May be repeated twice for credit with con-
sent of instructor. 131C. Full-Length Play. Requisites:
courses 131A, 131B. Preparation and writing of full-length play. May be repeated twice for credit with consent of instructor.

C133A-C133B-C133C. Script Development Workshops. (4 to 8 each) Lecture, three hours; studio, four to 24 hours. Guided process of script development, with emphasis on communication, artistic growth, and professional process. Each course may be taken for maximum of 8 units. Concurrently scheduled with courses C433A-C433B-C433C. Letter grading.

136. Advanced Acting for Stage. (4) Studio, four hours. Requisite: course 123. Study and practice of art of acting through progression to more advanced acting problems. May be repeated twice for credit. Consensual enrollment with same instructor not permitted. Total units for courses 136, 137A, 137B, and 137C may not exceed 12 units. Letter grading.

137A-137B-137C. Continuum Study in Acting for Stage. (4) Lecture, three hours. Requisite: course 123. Technique of characterization and performance in advanced and complex acting styles. Each course may be repeated once for credit. P/NP or letter grading.

138. Special Problems in Performance Techniques. (4) Studio, four hours. Study of complex problems in voice, movement, and acting. May be repeated twice for credit. P/NP or letter grading.

139. Play Reading and Analysis. (5) Lecture, three hours. Investigation of dramatic texts, with focus on play structure, plot, character, dialogue, ideas, and various other elements essential to effective theatrical interpretation and realization. Letter grading.

C140A. Introduction to Programming for Entertainment Design. (4) Studio, three hours. Study and practice in object-based programming using MAX/MSP programming language. May be repeated once for credit. Concurrently scheduled with course C440A. Letter grading.

C140B. Advanced Programming for Entertainment Design. (4) Studio, three hours. Study and practice in object-based programming using MAX/MSP programming language to control sound and video. May be repeated once for credit. Concurrently scheduled with course C440B. Letter grading.

C140C. Advanced Projects in Programming for Entertainment Design. Three hours. Advanced projects using object-based programming to control sound and video. May be repeated once for credit. Concurrently scheduled with course C440C. Letter grading.

C144A-C144B-C144C. Advanced Sound Design. (4-4-4) Lecture, four hours; laboratory, four hours. Concurrently scheduled with courses C444A-C444B-C444C. Letter grading.

C144A. (4) Lecture, four hours; laboratory, four hours. Study of sound and acoustics as they relate to performance environments, techniques associated with recording, mixing, processing, automation, and reproduction of sound, effects, and music tracks for theater sound design. May be repeated once for credit. Letter grading.

C144B. (4) Lecture, four hours; laboratory, four hours. Advanced study and practice in preparation and recreation of original production sound design with emphasis on analysis of script and score, conceptual development of design, and multitrack recording techniques to realize design. May be repeated once for credit. Letter grading.

C144C. (4) Lecture, four hours; laboratory, four hours. Study and practice in processing and mixing of live and recorded sound; mix-down of multitrack recordings; preparation of sound tracks and sound reinforcement in theater. Study of creation of sound effects, control of MIDI data, and design techniques for music theater. May be repeated once for credit. Letter grading.

145. Costume Design for Theater. (4) Lecture/laboratory, four hours. Requisite: course 137A. Study of costume design for theatrical presentations. Study of use of silhouette, fabrics, color, and decoration as related to theatrical characterizations. May be repeated once for credit. P/NP or letter grading.

C146A-C146B-C146C. Art and Process of Entertainment Design. (4-4-8) Lecture. Conceptualization, design, and prototyping of interactive theatrical events. Each course may be repeated once for credit. Concurrently scheduled with courses C446A-C446B-C446C. Letter grading.

C146A. (4) Lecture, three hours. Exploration of original forms of media-rich entertainment experience through lecture, presentation, and participation. Students form collaborative teams to conceive and propose interactive entertainment events. May be repeated once for credit. Letter grading.

C146B. (4) Lecture, three hours. Prototype development; two to five proposals to be more completely defined and developed. Students form collaborative teams for further conceptual development of their project proposals. May be repeated once for credit. Letter grading.

C146C. (4 to 8) Lecture, three to six hours. Prototype development; conceptual refinement and technological realization of prototypes, that may entail creation of elaborate proposals containing storyboards, budgets, and models or may involve production of short performances demonstrating entertainment potential of concepts or prototypes. May be repeated once for credit. Letter grading.

147A. Drafting. (4) Studio, four hours. Development of visual communication skills through drafting. Exploration of drafting for scenic and lighting designs. May be repeated once for credit. Letter grading.

147B. Drawing Sceney. (4) Studio, four hours. Introductory course in basic skills necessary for drawing, by hand, scenic design for theater. Letter grading.

148. Special Courses in Design and Technical Theater. (4) Lecture, three hours. Group study of selected subjects in design and technical theater. May be repeated twice for credit. P/NP or letter grading.

149. Introduction to Design. (5) Lecture, three hours. Exploration of interpretation of drama through design, including study of styles and techniques of design, collaborative role of designer, principles of design for scenery, lighting, costumes, and sound. Both technical and aesthetic groundwork for further study. Investigation of techniques for realization of designs in production. Letter grading.

150. Theater Production and Performance. (1 to 2) Laboratory, three to six hours. Laboratory experience in various aspects of theater production, including performance in project or production, stage management, member of crew, or assignment as designer or assistant on production. May be repeated for maximum of 8 units. Letter grading.

C151A. Scenic Design. (4) Lecture/studio, four hours. Requisites: courses 14A, 14B, 14C. Imagination as im-petus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of design. May be repeated once for credit. Concurrently scheduled with course C451A. Letter grading.

C151C. Production Design for Film, Television, and Video. (4) Lecture/studio, four hours. Study of role of art director, scenic design for single-camera and multicamera production, and set decoration. May be repeated once for credit. Concurrently scheduled with course C451C. Letter grading.

C153A. Costume Design. (4) Lecture/studio, four hours. Requisites: courses 14A, 14B, 14C. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of design. May be repeated once for credit. Concurrently scheduled with course C453A. Letter grading.

C153C. Costume Design for Film and Television. (4) Lecture/studio, four hours. Requisites: courses 14A, 14B, 14C. Study of current professional costume design and wardrobe practices in film and television, including effect of differing media on design choices. May be repeated once for credit. Concurrently scheduled with course C453C. Letter grading.

C154A. Sound Design. (4) Lecture/studio, four hours. Requisites: courses 14A, 14B, 14C. Introduction to sound and studio in acoustic, audio, and video domain. Study and practice of techniques for recording, editing, and creating soundscapes. May be repeated once for credit. Concurrently scheduled with course C454A. Letter grading.

C154B. Sound Design for Theater. (4) Lecture/studio, four hours. Requisites: courses 14A, 14B, 14C. Exploration of sound design for theater and techniques for mixing, reinforcement, and signal processing. Top-ics include use of delay, equalization, and microphone placement for theater sound reinforcement. Study of creation of sound effects, control of MIDI data, and design signs for musical theater. May be repeated once for credit. Concurrently scheduled with course C454B. Letter grading.

C154C. Sound for Film and Television. (4) Lecture/studio, four hours. Study of current professional sound recording, re-recording, and synchronization practices for film and television. Concurrently scheduled with course C454C. Letter grading.

C155A. Perspective Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Introduction to use of pencil and pen to communicate scenic designs, including one- and two-point perspective, form light, shade, and textures. Letter grading.

C155B. Watercolor Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of watercolor techniques as they relate to interpretation of scenic design signs, including painting of brick, wood, stone, fabrics, and other surfaces. Letter grading.
C155C. Marker Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice of marker rendering techniques as means of communication for scenic and costume designers. Letter grading.

C155D. Model Making. (2) Studio, four hours. Requisite: course 147A or 147B. Study of model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of model. Letter grading.

C155E. Life Drawing. (2) Studio, four hours. Requisite: course 14C or 147A or 147B. Experience and practice in drawing of human form. Letter grading.

C155F. Costume Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of techniques for rendering theatrical costumes, with emphasis on figure, clothing, and fabrics. Letter grading.

C155G. Scene Painting Techniques. (2) Studio, four hours. Requisite: course 147A or 147B. Study of scenic painting techniques and materials and their realization of color design and elevations. May be repeated once for credit. Letter grading.

C155H. Selected Topics in Graphic Representation of Design. (2) Studio, six hours. Group study of selected subjects in techniques for interpretation of design for theater. May be repeated once for credit. Letter grading.

C156G. Introduction to Three-Dimensional Models. (4) Studio, four hours. Study of techniques for rendering theatrical costumes, with emphasis on figure, clothing, and fabrics. Letter grading.

C157A-C157B-C157C. Costume Construction Techniques. (2-2-2) Lecture/studio, four hours. Study of theory and application of drafting, pattern making, fitting, and construction techniques for period costumes and undergarments to achieve authentic-appearing costume using contemporary methods. Each course may be repeated once for credit. Concurrently scheduled with courses C457A-C457B-C457C. P/NP or letter grading.

C157A. Requisites: courses 14A, 14B, 14C. Introduction to pattern making, fitting, cutting, and construction techniques for period garments.

163A. Requisites: courses 14A, 14B, 14C. Intensive development of primary directing skills and process, including text analysis and exploration of craft fundamentals as basis for director/actor communication and effective staging. Students direct scenes from plays under laboratory conditions. Letter grading.

163B. Requisites: courses 14A, 14B, 14C. Application of stage directing techniques in production of short play or project. Students direct one-act play or project. May be repeated once for credit. Concurrently scheduled with course C263D. Letter grading.

170. Design and Production Project. (4) Laboratory, eight hours. Requisites: courses 14A, 14B, 14C. Experience as stage manager or designer, including participation in preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice. Letter grading.

173A. Design Assignment: Assistant Designer. (2) Studio, six hours. Requisites: courses 14A, 14B, 14C. Laboratory experience as assistant designer, including participation in preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice. Letter grading.

173B. Production Design Assignment: Designer. (2) Studio, six hours. Requisites: courses 14A, 14B, 14C. Laboratory experience as designer, including preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice. Letter grading.

174A. Stage Managing Techniques. (2) Studio, six hours. Requisites: courses 14A, 14B, 14C. Laboratory experience as stage manager, including participation as assistant stage manager in preparation, rehearsal, and performance phases of productions. May be repeated once for credit. Letter grading.

174C. Project in Stage Management. (3) Studio, nine hours. Requisite: course 174A. Laboratory experience in professional duties of stage manager, including participation as stage manager in preparation, rehearsal, and performance phases of productions. Offered in summer only. Letter grading.

175A-175C-175D. Summer Theater Workshops. (4 or 8 each) Laboratory, 12 to 24 hours. Participation in various aspects of theater production and performance. Offered in summer only. Letter grading.

175B. Summer Theater Workshop. (1 to 4) Laboratory, three hours. Participation in various aspects of theater production and performance. Offered in summer only. Letter grading.

M178. Film and Television Acting Workshop. (2) (Same as Film and Television M177.) Laboratory, four hours. Workshop providing opportunities for students to rehearse, perform, and evaluate scenes. Three different production styles to which performers may need to adjust are (1) preproduction rehearsals with director, (2) single-camera experience, and (3) multiple-camera experience. May be repeated twice for credit. Letter grading.

180. Career Development for Actors. (2) Lecture, three hours; fieldwork, three hours. Limited to seniors. Study of business practices, career entry, and development for actors. P/NP or letter grading.

C185A. Role of Producer in Professional Theater. (2) Lecture, three hours. Study of structure governing economic and artistic decision-making processes in professional theater of America. Concurrently scheduled with course C285B. P/NP or letter grading.

C185B. Role of Manager in Educational and Community Theater. (2) Lecture, three hours. Study of artistic, social, and economic criteria in administration of educational and community theater. Concurrently scheduled with course C285B. P/NP or letter grading.

M187. Art Alive: Art and Improvisation in Museums. (4) (Same as Honors Collegium M116.) Seminar, six hours. Offered in conjunction with Los Angeles County Museum of Art (LACMA). Interpretation of
art in collection through acting, dialogues, movement, and music. Research into history and art history and production of creative performance piece required. Pr/ NP or letter grading.

195. Community or Corporate Internships in Theater, Film, and Television. (2, 4, or 8) Tutorial, eight, 16, or 24 hours. Limited to juniors/seniors. Internship at various locations appropriate to credit. Prerequisite: consent of organizing body. May be repeated with different experiences. Pr/ NP or letter grading. May be taken for maximum of 8 units. Individual contract with supervising faculty member required. Letter grading.

199. Directed Research or Senior Project in Theater. (2 to 8) Tutorial, thesis, or seminar hours. Open to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culuminating paper or project required. May be repeated for credit. Individual contract required. Pr/ NP or letter grading.

Graduate Courses

202A. Seminar: Western Classical Theater. (4) Seminar, three hours. Designed for graduate students. Examination of theatrical production and dramatic form in Greek and Roman drama. May be repeated twice for credit. S/U or letter grading.

202B. Seminar: Medieval Theater. (4) Seminar, three hours. Designed for graduate students. Selected studies in theatrical production and dramatic form in Middle Ages. May be repeated twice for credit. S/U or letter grading.

202C. Seminar: Renaissance and Baroque Theater. (4) Seminar, three hours. Designed for graduate students. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1485 to early 18th century. May be repeated twice for credit. S/U or letter grading.

202D. Seminar: Bourgeois and Romantic Theater. (4) Seminar, three hours. Designed for graduate students. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1700 to 1870. May be repeated twice for credit. S/U or letter grading.

202E. Seminar: Modern Consciousness in Theater. (4) Seminar, three hours. Designed for graduate students. Study of prototypes of modern experience as encountered in work of Ibsen and Strindberg. May be repeated twice for credit. S/U or letter grading.

202F. Seminar: Modern Realism. (4) Seminar, three hours. Designed for graduate students. Selected studies of theater's response to science and technology, politics, and revolution. May be repeated twice for credit. S/U or letter grading.

202G. Seminar: Modern Theatricalism. (4) Seminar, three hours. Designed for graduate students. Selected studies in symbolism and avant-garde theater. Exploration of dream experience and private psyche, religious experience, and revitalization of myth and ritual. May be repeated twice for credit. S/U or letter grading.

202P. Seminar: Traditions of African Theater. (4) Seminar, three hours. Designed for graduate students. Selected studies of traditional theater forms such as those indigenous to Ghana, Nigeria, and other African nations and their diaspora (Haiti, Jamaica, and other areas of Caribbean) through examination of character, structure, performance modes, and archetypes. May be repeated twice for credit. S/U or letter grading.

202R. Seminar: East Asian Theater. (4) Seminar, three hours. Designed for graduate students. Selected topics in theater forms of East Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit. S/U or letter grading.

202S. Seminar: South Asian Theater. (4) Seminar, three hours. Designed for graduate students. Selected topics in Indian, Indonesian, and other South Asian theater, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit. S/U or letter grading.

202T. Seminar: Southeast Asian Theater. (4) Seminar, three hours. Designed for graduate students. Selected topics in theater forms of Southeast Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit. S/U or letter grading.

203. Theater Ethics and Issues. (5) Seminar, four hours. Designed for graduate students. Investigation of one selected area of theater and drama study that explores significant ethical considerations of modern world. May be repeated four times for credit. S/U or letter grading.

204. Theater Genres. (5) Seminar, four hours. Designed for graduate students. Examination of history and literature of theater as manifested in one or more of its major forms or genres. May be repeated four times for credit. S/U or letter grading.

206. Themes in World Theater and Drama. (5) Seminar, four hours. Designed for graduate students. Selected topics in world theater history, drama, production, and/or architecture organized on thematic basis. May be repeated four times for credit. S/U or letter grading.

207A-207B. Theater Aesthetics. (4-4) Lecture, three hours. Designed for graduate students. Discussion of essential issues in aesthetics of theater and drama based on philosophy of art and theories of theater. S/U or letter grading. 207A. Classical and Medieval Theories of Art and Theater; 207B. Renaissance Theories of Art and Theater to Present.

208A-208B. Dramaturgy I, II. (4-4) Lecture, three hours; laboratory, one hour. Designed for graduate students. Analysis of theory and practice of dramaturgy. May be repeated once for credit. S/U or letter grading.

208C-208D. Practicum in Dramaturgy. (2 to 12) Lecture, three hours; laboratory, one hour. Designed for graduate students. Investigation of work of one theater artist from history of world theater, with special emphasis on relationship to time in which work was generated. May be repeated four times for credit. S/U or letter grading.

210. Topics in World Theater and Drama. (5) Seminar, three hours. Designed for graduate students. Study of selected topics in world theater, drama, production, and architecture. May be repeated four times for credit. S/U or letter grading.

211A. Approaches to Representation. (5) Lecture, three hours; laboratory, one hour. Overview of strategies of representation from classical aesthetic theories to postmodern deconstructions of them. May be repeated once for credit. Letter grading.

211B. Approaches to History. (5) Lecture, three hours; laboratory, one hour. Study of historical methodologies, theories, and debates in historiography of theater and performance linked to plays and performances appropriate to approach. Letter grading.

216C. Approaches to Identification. (5) Lecture, three hours. Analysis of strategy and dramatic form in world theater, including specific and ethical considerations of modern world. May be repeated twice for credit. S/U or letter grading.

220. Graduate Forum. (1 to 2) Seminar, one to two hours. Limited to graduate theater students. Presentation and discussion of issues frames and affecting contemporary theater. May be repeated four times for credit. S/U grading.

221. Introduction to Performance Studies. (5) Seminar, three hours. Investigation of performance as sustaining social space in traditional theater, music, and dance and as lens to focus thinking about human experience in fields such as philosophy, literature, cultural anthropology, linguistics, education, and law. Emphasis on establishing interdisciplinary dialogue across many fields. Letter grading.

CM229. Contemporary Topics in Theater, Film, and Television. (2) Same as Film and Television CM229. Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated twice for credit. Concurrently scheduled with course CM129. S/U or letter grading.

230A-230B-230C. Writing for Contemporary Theater. (4 each) Lecture, one to two hours. Designed for graduate students. Letter grading.

230A. One-Act Play. Analysis of strategy and dramatic structure of selected contemporary short plays leading to guided completion and critique of student-written one-act plays. 230B. Full-Length Play. Analysis of strategy and dramatic structure of selected contemporary full-length plays leading to guided completion and critique of student-written full-length plays. 230C. Performance and Text. Exploration of structural strategies, political implications, and technical demands of selected contemporary American plays leading to guided completion and critique of student work.

231. Special Topics in Playwriting. (4) Lecture, three hours. Analysis and practice of various aspects of playwriting. Variable content selected from topics such as comedy writing, docudrama, experimental theater, writing for alternative audiences, or children's theater. May be repeated twice for credit. Letter grading.

232. Manuscript Analysis. (4) Lecture, three hours. Designed for graduate students. Critical and constructive study of dramatic techniques as employed by playwrights and screenwriters in selected examples of contemporary work. May be repeated once for credit. S/U or letter grading.

242. Introduction to Design in Production. (4) Lecture or studio, four hours. Introduction to process of design for entertainment, collaborative role of designer, and realization of designs in production. May be repeated once for credit. Letter grading.

243A-243B-243C. Scenic Design. (4-4-4) Studio, four hours. Advanced study and practice in scenic design for theater. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research procedures and style leading to visual presentation of design. May be repeated once for credit. S/U or letter grading.

244A-244B. Advanced Theater Production. (2 to 8 each) Studio, 12 to 24 hours. Designed for graduate students. Creative participation in preparation and presentation of theatrical production. Each course may be taken for maximum of 8 units. Letter grading.

245A. Production Management. (4) Lecture, three hours. Study in production management. Examination of professional duties of production manager, including pre-production, rehearsal, and performance phases of productions. Problems of resource management, unions, stage management, scheduling, and budgeting while maintaining creative and collaborative environment. Letter grading.
245B. Production Management. (4) Lecture, three hours. Requisite: course 245A. Advanced study in production management for theater, with focus on planning process of professional production manager in seasonal and repertory environment. Problems of resource allocation, unions, organizational structure, scheduling to establish creative and collaborative environment. Letter grading.

245C. Projects in Production Management. (4) Lecture/laboratory, three hours. Requisite: course 245B. Laboratory experience in professional duties of production manager, including participation as production manager in preproduction, rehearsal, and performance phases of productions. Problems of resource management, unions, organization, scheduling, and budgeting. Letter grading.

246A-246B-246C. History of Costume. (4-4-4) Lecture/studio, four hours. Designed for graduate students. Study of history of costume as manifestation of cultural, social, economic, and political influences to provide historical framework for design of costumes for theater, film, and television. History survey and in-depth exploration of selected periods, with study of influences of diverse cultures. Letter grading.

246D. History of Costume Design. (4) Lecture, four hours. Study of history of costume as manifestation of cultural, social, economic, and political influences to provide historical framework for design of costumes for theater, film, and television. History survey and in-depth exploration of selected periods, with study of influences of diverse cultures. Letter grading.

247. Collaborative Project in Design and Production. (3 to 4) Studio, four hours. Designed for graduate students. Collaborative project in design, including analysis, conceptual development, and preparation of scenic, lighting, costume, or sound designs. May be repeated once for credit. Letter grading.

250. Directing I. (4) Lecture, four hours; studio, 24 hours. Designed for graduate students. Development of directorial skills of analysis, planning, staging, and criticism through preparation of written preparations and directing of scenes. Letter grading.

251. Directing Post-Realist Drama. (4) Lecture, four hours; studio, 30 hours. Designed for graduate students. Problems in direction of post-realist plays through interpretation and laboratory scene work. Letter grading.

253. Production Project in Direction for Stage. (2 to 8) Discussion, one hour; studio, 12 to 30 hours. Designed for graduate students. Production of dramatic work, with discussion and critique of work in progress. May be repeated for maximum of 20 units. Letter grading.

253D. Directing Project for Stage. (5) Discussion, three hours to eight hours. Requisites: courses 163A, 163B, 163C. Application of stage directing techniques in production of short play or project. Students direct one-act play or project. May be repeated once for credit. Concurrently scheduled with course C163D. Letter grading.

264. Directing Classical and Historical Drama. (4) Lecture, four hours; studio, 30 hours. Designed for graduate students. Problems in interpretation and direction of historical or classical drama through medium of laboratory scene work. Letter grading.

265. Modern Theories of Production. (4) Lecture, four hours. Examination of modern theories of production from emergence of director in 19th century to present. Investigation of different responses to problems of creating vital theatrical event in context of ongoing evolution of theater as art form. Examination of contribution of significant directors and movements; relation between theater and other forms of representation. Letter grading.

266. Theatrical Conceptualization. (4) Lecture, four hours. Designed for graduate students. Study of conceptualization in dramatic production; centrality of theatrical conceptualization in interpretation of dramatic text; exploration of range of possibilities inherent in different theatrical spaces and options in design components. Consideration of visual arts and music as sources of stimulus for theatrical conceptualization, with focus on collaborative aspect of theatrical production. Letter grading.

272. Production Practice in Theater, Film, Video, and Digital Media. (1 to 8) Studio, three to eight hours. Laboratory experience in one or more various aspects of production and postproduction practice for entertainment media, including theater, film, video, and digital media. May be repeated for maximum of 24 units. Letter grading.

272. Role of Producer in Professional Theater. (2) Lecture, three hours. Designed for graduate students. Study of structure governing economic and artistic decision-making processes in professional theater of America. Concurrently scheduled with course C185A. S/U or letter grading.

272B. Role of Management in Educational and Community Theater. (2) Lecture, three hours. Designed for graduate students. Study of artistic, social, and economic criteria in administration of educational and community theater. Concurrently scheduled with course C185B. S/U or letter grading.

272A-272B. Special Studies in Theater Arts. (2 or 4 each) Lecture/discussion, two or four hours. Designed for graduate students. Seminar study of problems in theater arts, organized on topic basis. Each course may be repeated once for credit. S/U or letter grading.

275. Teaching Acting. (4 to 6) Seminar, (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel; employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of instructor responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

240A. Directing I. (4 to 8) Studio, six to 18 hours. Development of internal technique, beginning with autodrama that is dramatization of one’s personal history. Scene work follows, with emphasis on off-stage preparations, improvisations capturing circumstances, life of character, and intentions of scene. Letter grading.

240B. (4) Studio, six to 18 hours. Scene work, usually from 20 to 30 minutes in length. Continuation of work on off-stage preparation, with further development of how actor goes about doing research and fieldwork on character being played. Letter grading.

240C. (4) Studio, six to 18 hours. Development of external technique through comedy and of skills, improvisation, physical humor, delivery of lines, rhythm, timing, and public cabaret. Fusion of internal use of action and objective with external. Letter grading.

421A-421B-421C. Advanced Acting II. (4 or 8 each) Studio/laboratory, six to 18 hours. Letter grading.

421A. Extending character behavior study through language and movement. Further work on actions, objectives, and researching role. 421C. Comedy workshop. Exploration of craft of comedy and development of cabaret pieces.

422. Advanced Acting for Theater, Film, and Television. (8 to 12) Studio/laboratory, eight to 12 hours. Intensive performance experience. May be repeated for maximum of 24 units. Letter grading.

424A-424B-424C. Advanced Voice and Speech I. (2 or 4 each) Studio/laboratory, three to six hours. Development of voice and speech techniques for stage, including those of relaxation, breathing, resonance, and development of voice. Letter grading uses International Phonetic Alphabet to train students in standard American speech. Text work in poetry and prose. Letter grading.

424D-424E-424F. Advanced Voice and Speech II. (2 or 4 each) Studio/laboratory, three to six hours. Advanced voice problems. Extension of first-year work, with increased demands on voice. Range, resonance, and breathing capacity extension. Articulation and phonetic alphabet. Text work in classical verse. Letter grading.

424G-424H-424I. Advanced Voice and Speech III. (2 or 4 each) Studio, three to six hours. Extension of second-year work, with increased demands on voice/speech, range, resonance, and breathing capacity extension. Application of ear training and International Phonetic Alphabet to creation of dialect and accents, as well as systematic approach to creating dialect charts. Letter grading.

425A-F. Advanced Movement I. (2 or 4 each) Studio/laboratory, three to six hours. Discovery of body's unique language through exercises designed to explore and free total instrument. Development of flexible actor with range, expression, and confidence physically. Awakening of imagination while exploring worlds of ritual, animal, conceptual, and modern dance movements. Letter grading.

425D-425E-425F. Advanced Movement II. (2 or 4 each) Studio/laboratory, three to six hours. Presentation of more complete picture of stage movement and its relationship to theater, music, and dance. Advance-ment of actor's concepts of movement and their maximum potential. Experience in techniques and discovery of origins of variety of acrobatic and dance disciplines, including ballet, ballroom, period dance, and circus techniques. Letter grading.

425G-425H-425I. Advanced Movement III. (2 or 4 each) Studio, three to six hours. Advanced physical training for actors in one or more movement, dance, or combat discipline: capoeira, martial arts, ballet, ballroom, period dance, circus techniques. Letter grading.

426A-426B-426C. Alexander Techniques. (2 or 4 each) Studio, three to six hours. Study and practice in Alexander techniques as method of developing balanced alignment of body and mind. Exploration of use of rhythm to expand movement potential of actors and relevant use of visual arts and animal studies to character development and to expansion of movement potential. Letter grading.

430A-430B-430C. Advanced Studies in Playwriting. (4 to 8 each) Lecture, three hours. Limited to M.F.A. playwriting program students. Guided completion of full-length scripts for stage. S/U or letter grading.

431. Special Topics in Playwriting. (4) Discussion, three hours. Designed for M.F.A. playwriting program students. Analysis and practice of varied aspects of playwright's art. Variable content selected from topics such as comedy writing, docudrama, writing for alternative audiences, adaptation from screen, children's theater, or improvisational techniques. May be repeated twice for credit. S/U or letter grading.

433A-433B-433C. Script Development Workshops. (4 to 8 each) Lecture, three hours; studio, four to 24 hours. Designed for graduate students. Guided process of script development, with emphasis on communication and artistic growth of process. Each course may be taken for maximum of 8 units. Concurrently scheduled with courses C133A-C133B-C133C. Letter grading.

Theater / 611

C440B. Advanced Programming for Entertainment Design. (4) Studio, three hours. Study and practice in object-based programming using MAX/MSP programming language to control sound and video. May be repeated once for credit. Concurrently scheduled with course C140B. Letter grading.

C440C. Advanced Projects in Programming for Entertainment Design. (4) Studio, three hours. Advanced projects using object-based programming to control sound and video. May be repeated once for credit. Concurrently scheduled with course C140C. Letter grading.

C441A-C441B-C441C. Lighting Design. (4-4-4) Lecture/studio, four hours. Letter grading.

C441A. (4) Lecture/studio, four hours. Study and practice in lighting actors, emphasizing textual and character analysis from lighting designer’s perspective, conceptual development with director, effect of light on dynamics of staging, use of color in light, and relationship of lighting designer to actor. May be repeated once for credit. Letter grading.

C441B. (4) Lecture/studio, four hours. Study of use of light and color to define space, effect of light on scenery and costumes, lighting for arena/thrust theaters, multiscreen productions, lighting patterns, and moving scenery. May be repeated once for credit. Letter grading.

C441C. (4) Lecture/studio, four hours. Investigation of lighting design in musicals, musical theater, opera, touring, and repertory situations. Study of analysis of script and score for lighting designer. May be repeated once for credit. Letter grading.

C441D. Scenic Projection and Media Techniques. (4) Lecture/laboratory, four hours. Designed for graduate students. Advanced study and practice in scenic projection and media techniques, with emphasis on analysis, design, and execution of theatrical projection and photographic technique for stage. S/U or letter grading.

C442A-C442B-C442C. Costume Design. (4-4-4) Lecture/studio, four hours. Advanced study and practice in costume design for theater. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, period study, and character analysis leading to visual presentation of design. Study of costume design for theatrical productions, ballet, opera, and musical theater. Each course may be repeated once for credit. Letter grading.

C443. Problems in Design. (2 or 4) Lecture/laboratory, four hours (additional hours as required). Study and practice in design techniques for theater. May be repeated for maximum of 12 units. S/U or letter grading.

C444A-C444B-C444C. Advanced Sound Design. (4-4-4) Lecture, four hours; laboratory, four hours. Concurrently scheduled with courses C144A-C144B-C144C. Letter grading.

C444A. (4) Lecture, four hours; laboratory, four hours. Study of sound and acoustics as they relate to performance environments, techniques associated with recording, mixing, processing, automation, and reproduction of sound in live and recorded settings. May be repeated once for credit. Letter grading.

C444B. (4) Lecture, four hours; laboratory, four hours. Advanced study and practice in preparation and recording of original compositions, with emphasis on analysis of script and score, conceptual development of design, and multitrack recording techniques to realize design. May be repeated once for credit. Letter grading.

C444C. (4) Lecture, four hours; laboratory, four hours. Study and practice in processing and mixing of live and recorded sound. Topics include microphone setup, microphone recording, preparation of sound tracks and sound reinforcement in theater. Study of creation of sound effects, control of MIDI data, and design techniques for music theater. May be repeated once for credit. Letter grading.

C445A-C445B. Production Design for Film, Television, and Entertainment Media. (4-4-4) Lecture/studio, four hours. Study and practice in design of scenic environment for film, video, and television media, including effect of differing media on design choices, role of production designers and art directors, and design for single- and multiple-camera production. Each course may be repeated once for credit. Letter grading.

C446A-C446B-C446C. Art and Process of Entertainment Design. (4-4-4 to 8) Lecture. Conceptualization, design, and prototyping of interactive theatrical events. Each course may be repeated once for credit. Concurrently scheduled with courses C146A-C146B-C146C. Letter grading.

C446A. (4) Lecture, three hours. Exploration of original forms of media-rich entertainment experience through lectures, presentations, and seminar participation. Students form collaborative teams to conceive and propose interactive entertainment events. May be repeated once for credit. Letter grading.

C446B. (4) Lecture, three hours. Prototype development—two to five prototypes are completely defined and developed. Students form collaborative teams for further conceptual development of their project proposals. May be repeated once for credit. Letter grading.

C446C. (4 to 8) Lecture, three to six hours. Prototype development; conceptual refinement and technological realization of prototypes, that may entail creation of elaborate proposals containing storyboards, budgets, and mock-ups. May be repeated once for credit. Letter grading.

C448A-C448B. Costume Design for Film, Television, and Entertainment Media. (4-4) Lecture/studio, four hours. Study and practice in design of costumes for live and virtual characters in film, television, and entertainment media, including effect of differing media on design choices. Each course may be repeated once for credit. Letter grading.

C449. Design Thesis Project. (4) Lecture/studio, four hours. Takes of graduate students who have served as comprehensive examination for M.F.A. degree in entertainment design. Review and evaluation of projects by design faculty members from all areas of curriculum. Letter grading.

C451A. Scenic Design. (4) Lecture/studio, four hours. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of design. May be repeated once for credit. Concurrently scheduled with course C151A. Letter grading.

C451B. Scenic Design for Theater. (4) Lecture/studio, four hours. Study of scenic design for proscenium, thrust, and arena configurations, multiset productions, and music theater. May be repeated once for credit. Concurrently scheduled with course C151B. Letter grading.

C451C. Production Design for Film, Television, and Video. (4) Lecture/studio, four hours. Study of role of art director, scenic design for single-camera and multicamera production, and set decoration. May be repeated once for credit. Concurrently scheduled with course C151C. Letter grading.

C452A. Lighting Design. (4) Lecture/studio, four hours. Study of lighting with emphasis on imagination, text analysis, metaphor, and conceptualization. Investigation of composition and control of light and color in relation to actor. May be repeated once for credit. Concurrently scheduled with course C152A. Letter grading.

C452B. Lighting Design for Theater. (4) Lecture/studio, four hours. Study of lighting design for proscenium, thrust, and arena configurations, music theater, and concert lighting. May be repeated once for credit. Concurrently scheduled with course C152B. Letter grading.

C453A. Costume Design. (4) Lecture/studio, four hours. Imaginaton as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of design. May be repeated once for credit. Concurrently scheduled with course C153A. Letter grading.

C453B. Costume Design for Theater. (4) Lecture/studio, four hours. Study of costume design for proscenium, thrust, and arena configurations, multiset productions, and music theater. May be repeated once for credit. Concurrently scheduled with course C153B. Letter grading.

C453C. Costume Design for Film and Television. (4) Lecture/studio, four hours. Study of current professional costume design and wardrobe practices in film and television, including effect of differing media on design choices. May be repeated once for credit. Concurrently scheduled with course C153C. Letter grading.

C454A. Sound Design. (4) Lecture/studio, four hours. Introduction to sound and audio in acoustic, audio, and digital domains. Study and practice of techniques for recording, editing, and creating soundscapes. May be repeated once for credit. Concurrently scheduled with course C154A. Letter grading.

C454B. Sound Design for Theater. (4) Lecture/studio, four hours. Exploration of sound design for theater and techniques for mixing, reinforcement, and signal processing. Topics include use of delay, equalization, and microphone placement for theater sound reinforcement. Study of creation of sound effects, control of MIDI data, and design techniques for musical theater. May be repeated once for credit. Concurrently scheduled with course C154B. Letter grading.

C454C. Sound for Film and Television. (4) Lecture/studio, four hours. Study of current professional sound recording, re-recording, mixing, and synchronization practices for film and television. Concurrently scheduled with course C154C. Graduate students expected to produce designs demonstrating higher level of proficiency and skill. Letter grading.

C455A. Perspective Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Introduction to use of pencil and pen to communicate scenic designs, including use of two-point perspective, form, light, shade, and textures. Graduate students expected to produce drawings demonstrating higher level of proficiency and skill. Letter grading.

C455B. Watercolor Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of watercolor techniques as they relate to interpretation of scenic designs, including painting of brick, wood, stone, fabrics, and other surfaces. Graduate students expected to produce drawings demonstrating higher level of proficiency and skill. Letter grading.

C455C. Marker Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice of marker rendering techniques as means of communicating for scenic and costume designers. Letter grading.

C455D. Model Making. (2) Studio, four hours. Requisite: course 147A or 147B. Study of model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of model. Graduate students expected to produce models demonstrating higher level of proficiency and skill. Letter grading.

C455E. Life Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice in drawing of human form. Letter grading.
C455F. Costume Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of techniques for rendering theatrical costumes, with emphasis on figure, clothing, and fabrics. Letter grading.

C455G. Scene Painting Techniques. (2) Studio, four hours. Requisite: course 147A or 147B. Study of scenic painting techniques and materials and their realization of space, design, and elevations. May be repeated one time for credit. Letter grading.

C455H. Selected Topics in Graphic Representation of Design. (2) Studio, six hours. Group study of selected subjects in techniques for interpretation of design for theater. May be repeated one time for credit. Letter grading.

C457A-C457B-C457C. Costume Construction Techniques. (2-2-2) Studio, four hours. Study of theory and application of drafting, pattern making, fitting, and construction techniques for period costumes and undergarments to achieve authentic-appearing costumes using contemporary methods. Each course may be repeated one time for credit. Concurrently scheduled with courses C157A-C157B-C157C. S/U or letter grading.

C459A-C459B. Directing for Theater, Film, and Televisi. (4-4) Lecture, three hours. Limited to graduate theater students. Analysis and exploration, with specific scenes, of differences and many similarities in directoral approach to same literary material in three media. S/U or letter grading.

C462. Advanced Directing. (8 or 12) Studio, 12 or 30 hours. Designed for graduate students. Advanced problems in directing for theater, film, and television. May be repeated for maximum of 24 units. Letter grading.

C463. Production Project in Direction for Stage (8 or 12 units). Studio, 24 hours. Designed for graduate students. Creative participation as director in conceptualization and preparation of dramatic work. Letter grading.

C472. Production Practice in Theater, Film, Video, and Digital Media. (1 to 8) Studio, three to eight hours. Exploration and laboratory experience in one or more various aspects of production and postproduction practice for entertainment media, including theater, film, video, and digital media. May be repeated for maximum of 24 units. Letter grading.

C473. Production Practice in Theater, Film, Video, and Digital Media. (1 to 8) Studio, 12 or 30 hours. Designed for graduate students. Creative participation in conceptualization and preparation of dramatic work. Letter grading.

C474. Advanced Projects in Design and Production. (4) Lecture/studio, four hours. Study and practice in preparation and execution of designs for theater, film, video, and related entertainment forms. As contributing artistic member of design team, creative responsibilities include designer, technical supervisor, or production manager. May be repeated for maximum of 16 units. Letter grading.

C496A-C496B-C496C. Practicum and Practice in Teach. (2-2-2) Seminar, to be arranged; discussion, two hours. Limited to Ph.D. students. Study and practice of teaching theater at university level. Orientation and preparation of graduate (Ph.D.) students who have responsibility to assist in teaching undergraduate courses in department. Discussion of problems common to teaching experience. Letter grading.

C498. Professional Internship in Theater, Film, and Television. (4, 8, or 12) Tutorial, to be arranged. Full- or part-time at studio or on professional project. Designed for advanced M.F.A. students. Internship at various film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled. S/U or letter grading.

C501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus advisor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

C596A. Directed Individual Studies: Research. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

C596B. Directed Individual Studies: Writing. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

C596C. Directed Individual Studies: Directing. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

C596D. Directed Individual Studies: Design. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

C596E. Directed Individual Studies: Acting. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

C596F. Directed Individual Studies: Production. (2 to 12) Tutorial, to be arranged. Designed for graduate students. May be repeated with consent of instructor. S/U or letter grading.

ASSOCIATE PROFESSORS

Eric R. Avila, Ph.D.
Evelyn A. Blumenberg, Ph.D.
Leobardo F. Estrada, Ph.D.
Vinit Mukhija, Ph.D.
Assistant Professor
Rui Wang, Ph.D.

Lecturers
Stephen K. Commins, Ph.D.
Carol E. Goldstein, B.A.
Gilda Haas, M.A.
Goetz Wolff, M.Phi.

Scope and Objectives
The professional urban planner works on the creation and management of the urban environment, including its physical, economic, and social elements. Housing, transportation, air and water quality, the preservation of historic communities, and the development of community-level economic and employment programs are some of the tasks undertaken by recent graduates of the UCLA Department of Urban Planning. Graduates have taken positions in local, state, and national governments, and increasingly with nonprofit and private companies whose products and services affect the urban environment. While most UCLA graduates find positions in the U.S., the program offers the opportunity to specialize in development planning abroad, including rural development, and many graduates have found positions in Latin America, Africa, and Asia.

The program offers an undergraduate minor in Urban and Regional Studies, a two-year Master of Urban and Regional Planning (M.U.R.P.) degree, and a Ph.D. degree. Concurrent degree programs allow students to combine study for a M.U.R.P. in Urban Planning with work toward an M.B.A. in the John E. Anderson Graduate School of Management, a J.D. in the School of Law, an M.Arch. in the Department of Architecture and Urban Design, an M.A. in Latin American Studies, or an M.P.H. in the School of Public Health.

The department takes pride in its collegial atmosphere. It features a lively mix of students from diverse academic backgrounds, drawn from many foreign countries and from every avenue of American life. It includes many members of racial and ethnic minority groups, and more than half the students are women. Student organizations provide an interesting program of extracurricular activities.

Undergraduate Study
Urban and Regional Studies Minor
The scale, diversity, balkanized governance, and natural environment of Southern California all contribute to making it an extraordinary natural laboratory for learning about urban and regional issues, whether the focus is on immigration, employment, the built environment, transportation, poverty, natural resources, or a host of other challenges. The Urban and Regional Studies minor offers undergraduate students a means to address some of these issues from an interdisciplinary perspective, giving a balanced mixture of theory, practice, and service learning courses.

To enter the minor, students must be in good academic standing with an overall grade-point average of 2.0 or better, have completed 90 or more units, and complete either Urban Planning 120 or 121 with a grade of C or better. An introductory course in geography, political science, or sociology is recommended. For further information, contact the program director/counselor at (310) 206-8966.

Required Courses (28 units): (1) Urban Planning 120 or 121 with a grade of C or better; (2) five elective courses selected as follows: (a) at least three courses from Public Policy 10A, 104, C115, M120, C147, Urban Planning 120 (unless taken under item 1), 121 (unless taken under item 1), 130, C133, 141, M150, CM160, M165, M175, C184 and (b) up to two courses from Anthropology 167, Chicana and Chicano Studies 181, Geography 150, History 145A, 145B, Management 175, Political Science 143B, Sociology 158 (students may petition to include a Luskin School of Public Affairs course not listed above to fulfill an elective requirement); (3) capstone project that may be satisfied by one of the following: (a) Urban Planning 185SL — service learning project or (b) Urban Planning 199 or a 199 in the College of Letters and Science with a faculty mentor affiliated with this minor or individual research project.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

Urban Planning
Upper Division Courses
120. Introduction to Cities and Planning. (4) Lecture, three hours. Survey of urban history and evolution in U.S., urban social theory, current growth trends, system of cities, urban economy and economic restructuring, traditional and alternative location theories, transportation, and residential location and segregation. P/ NP or letter grading.
121. Policy and Planning. (4) Lecture, three hours. Examination of current urban planning and policy issues and debates, such as normative theories of good urban form, metropolitan organization and governance, economic development and growth management, city policies, spatial mismatch hypothesis, urban poverty, racial/ethnic inequality, gender and urban structure, sustainability, and future of cities. P/ NP or letter grading.
M122. Policy, Planning, and Community. (4) (Same as Asian American Studies M108.) Lecture, three hours, field laboratory. Project-oriented methods course on conducting, interpreting assessment in Asian American communities. Geographic information systems to be used to define problems and needs. Letter grading.
125. Special Topics in Urban Policy and Research. (4) Lecture, three hours. Examination of particular planning/policy subfield (e.g., economic development, transportation, environmental planning, housing and community development, international planning and development, land use, or urban design) in some depth. Specific topic area rotates depending on instructor. May be repeated for credit with topic change. P/ NP or letter grading.
130. Fundamentals of Urban and Regional Economics. (4) Lecture, three hours. Preparation: one introduction to microeconomics course. Most U.S. population lives and works in urbanized areas, and world’s population is becoming more urbanized with each passing decade. National, state, and local governments are engaged in managing, planning, policymaking, and governance in urban context. Ultimate efficacy of these public activities can be enhanced by understanding of economic forces acting on urban areas. Basic concepts related to location choice, agglomeration effects, economies of scale, and specialization by cities and transportation. P/ NP or letter grading.
C133. Political Economy of Urbanization. (4) Lecture, three hours. Introduction to new approaches to urban studies, basic concepts and analytical approaches of urban political economy, with major emphasis on American urban problems and restructuring of modern metropolis. Topics include historical geography of urbanization, development and transformation of urban spatial structure, suburbanization and metropolitan political fragmentation, urban fiscal crisis, and role of urban social movements. Concurrently scheduled with course C233. P/ NP or letter grading.
CM137. Southern California Regional Economy. (4) (Same as Labor and Workplace Studies M180.) Lecture, three hours. Introduction to regional economy, with emphasis on Los Angeles. Key economic sectors, labor market composition, and review of conflicting portrayals depicting dynamics of region. Two-day bus tours of key economic regions and guest lectures by regional experts included. Concurrently scheduled with course C237C. Letter grading.
M140. Issues in Latin American Poverty. (4) (Same as Chicana and Chicano Studies M121 and Labor and Workplace Studies M121.) Lecture, four hours. Examination of nature and extent of urban and rural poverty confronting Latina/Latino population in U.S. Special emphasis on antipoverty policies of government and nonprofit organizations and social planning and economic development strategies. Attention also to literature on underclass. Letter grading.
141. Planning for Minority Communities. (4) Lecture, three hours. Introduction to inner-city policy issues on three separate levels: (1) each student develops comprehensive inner-city urban program using materials from Alternatives Inner-City Future Exercise, (2) each student is expected to identify value assumptions and theories of social justice implicit or explicit in alternative intervention programs, and (3) each student is expected to participate in class discussions that emphasize minority issues that affect implementation. P/ NP or letter grading.
M150. Transportation Geography. (4) (Same as Geography M149.) Lecture, three hours, for juniors/seniors. Study of geographical aspects of transportation, with focus on characteristics and functions of various modes and on complexities of intra-urban transport. P/ NP or letter grading.
151. Urban Transportation Economics. (4) Lecture, three hours. Big cities offer many attractions, but high density also produces traffic congestion and air pollution. How can we have dense urban areas without congested traffic and polluted air? Analysis of economic explanations for transportation problems and examination of
possible solutions. Because university campuses re-
semble small cities, they are used as examples to ex-
plain urban policies (such as BruinGO at UCLA) that universities have adopted to improve transportation. Letter grading.

CM160. Environmental Politics and Governance. (4) (Same as Environment M164.) Lecture, three hours. Examination of institutional and historical evolution of the land use policies and practices in which localities plan. Environmental, social, and equity aspects of different patterns of urbanization and likely trends into future. Letter grading.

M162. Land Use and Development. (4) (Same as Environment M162.) Lecture, four hours. Examination of institutional and historical evolution of the land use policies and ways in which localities plan. Environmental, social, and equity aspects of different patterns of urbanization and likely trends into future. Letter grading.

CM165. California Sustainable Development: Economic Perspective. (4) (Same as Environment M135 and Public Policy M149.) Lecture, three hours. Examination of institutional and historical evolution of the land use policies and practices in which localities plan. Environmental, social, and equity aspects of different patterns of urbanization and likely trends into future. Letter grading.

M165. Environmentalism: Past, Present, and Future. (4) (Formerly numbered CM165.) Lecture, three hours; discussion, one hour. Exploration of history and origin of major environmental ideas, movements or countermovements they spawned, and new and changing approaches within environmentalism. Examination of early ideas of environment, how to rise of modern sciences reshaped environmental thought, and how this was later transformed by 19th-century ideas and rise of American conservation movements. Review of politics of American environmental thought and contemporary environmental questions as they relate to broader set of questions about nature of development, sustainability, and equity in environmental debate. Exploration of issues in broad context, including global climate change, rise of pandemics, deforestation, and environmental justice impacts of war. Letter grading.

M170. Human Environment: Introduction to Architecture and Planning. (4) (Same as Architecture and Urban Design M170.) Lecture, three hours; outside study, nine hours. Kinds of problems that arise in creating and maintaining environment for urban activities. Principles and methods of historical, conceptual, and urban planning in helping to cope with such problems. Complexities involved in giving expression to human needs and desires in provision of shelter and movement, construction and destruction, and protection of technology and building forms, and to issues involved in relating human-made to natural environment. Students are expected to comprehend major urban issues both as citizens and as potential technical experts. P/NP or letter grading.

M171. Planning Issues in Latina/Latino Communities. (4) (Same as Chicana and Chicano Studies M122.) Lecture, three hours. Exploration of socioeconomic, demographic, and political forces that shape low-income communities and analyses of planning intervention strategies. Emphasis on community and economic development and environmental equity. Letter grading (CM175, Women and Cities; Formerly as Women’s Studies M175.) Lecture, three hours. Limited to juniors/seniors. Examination of relationship between women and cities: (1) how cities have affected women’s opportunities for economic and social equality, (2) contributions to development of U.S. cities, and (3) contemporary strategies and efforts to create urban environments that reflect women’s needs and interests. P/NP or letter grading.

C184. Looking at Los Angeles. (4) Lecture, three hours. Introduction to history and physical form of Los Angeles, with emphasis on understanding social, economic, and political issues in development of Los Angeles. Concurrently scheduled with course C284. Letter grading.

185SL. Community-Based Research in Planning. (4) Seminar, one hour; fieldwork, three hours. Preparation: at least four Urban and Regional Studies minor courses, of which at least one should be related to subject area of service learning setting. Limited to junior/senior minor students. Designed to serve as complement to service learning requirement and may be used to fulfill capstone requirement for minor. Students are matched to public, private, or nonprofit agency through required placement and must complete minimum of 30 hours of work. Duties and responsibilities to be set by students and sponsoring organizations. Readings to be determined in consultation with instructor. Letter grading.

195. Community Internships in Urban Planning. (4) Tutorial, 12 hours. Limited to junior/senior Urban and Regional Studies minors. Internship in supervised setting in community agency or urban planning setting. Students meet on regular basis with instructor and provide periodic progress reports. May be repeated for credit. Individual contract with supervising faculty member required. P/NP grading.

199. Directed Research in Urban Planning. (2 to 8) Seminar, three hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culuminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

M201. Theories of Architecture. (4) (Same as Architecture and Urban Design M201.) Lecture, three hours. Exploration of conceptual and historical structures that shape current issues in architectural theory. Readings in primary texts serve as framework for understanding nature of speculative inquiry in architectural context. Letter grading.

M202A-202B. Land Use. (1 to 8 each) (Same as Law M526.) Lecture, three hours. Course M202A is enforced requisite to 202B. Exploration of 21st-century land-use public controls, private practice, and litigation in California from basic planning, zoning, subdivision controls, and official mapping to regional growth management, sustainability, and environmentally sensitive land protection. In Progress (M202A) and S/U or letter (202B) grading.

M203A-203B. Seminar: Urban Affairs. (3 to 6 each) (Formerly numbered M200C.) (Same as Law M526.) Seminar, three hours; two field trips. Course M203A is enforced requisite to 203B. Consideration of selected aspects of urban affairs, including current federal and state housing subsidies; remedies of housing consumers; impacts of market discrimination against children, racial minorities, and women; and local governmental laws influencing cost and supply, such as anticipation and rent control legislation. Consideration of role of economic development in expansion of housing supply also considered. In Progress (M203A) and S/U or letter (203B) grading.

M204. Research Design and Methods for Social Policy. (4) (Same as Public Policy M218.) Lecture, three hours. Outside study, one hour. Advanced to graduate students. How to become more sophisticated consumers and producers of qualitative and quantitative policy research. In first half of course, formal principles of research design; in second half, advanced data collection methods, including ethnography, interview, and survey design. Letter grading.

M205A-205B. M.U.R.P. Comprehensive Examination: Advanced Planning Research Project. (4) (Formerly numbered 205.) Seminar, three hours. Required of all second-year students completing applied planning research project M.U.R.P. comprehensive examination capstone option. S/U grading. 205A. Guides students through identifying topics, selecting clients, developing scope of work and memorandum of understanding with clients, completing research design and project, writing report, and presenting project, research, and collecting data. 205B. Guides students through completion of data collection, analysis, findings, conclusions, and recommendations portions of assignment. Involves research design and execution of summative field examination and poster synthesizing their work.

M206A. Introduction to Geographic Information Systems. (4) (Same as Public Policy M224A.) Lecture, four hours; laboratory, four hours. Required: course M206A or Public Policy M224A. Principles and skills of geographic analysis and modeling; managing, processing, and interpreting spatial data. Especially useful for students interested in environmental, demographic, suitability, and transportation-related research. Scripts Avenue, modeling (Spatial Analyst), network analysis, and transportation modeling (TransCAD). Letter grading.

search design course that guides students in selecting a problem/question to study, reviewing previous research on problem, and framing specific research questions/hypotheses, and selecting methodology and plan for testing hypotheses. Students complete and orally defend their dissertation/thesis proposal. May be repeated for credit.

209. Special Topics in Planning Theory. (4) Lecture, three hours. Topics in planning theory selected by faculty members. May be repeated for credit. S/U or letter grading.

211. Law and Quality of Urban Life. (4) Lecture, three hours. Introduction to law as urban system, distinguished primarily toward those interested in intersection of law and policy: broad array of urban issues examined, as is causation and cure of urban problems. Examination of law as changing process rather than collection of principles, so that students develop facility to interact with law and lawyers in positive and forceful manner. S/U or letter grading.

212. International/Comparative Planning Workshop. (4) Seminar, three hours; field trips, five to ten days. Topics of planning and policy in various international or domestic sites. Topics may include urban design, urban governance, land use, environmental issues, transportation, infrastructure planning, housing development, community development, and urban policy planning. May be repeated for credit. S/U or letter grading.

215. Spatial Statistics. (4) (Same as Geography M272 and Statistics M222.) Lecture, three hours. Designed for graduate students. Survey of modern methods of spatial statistical analysis, including various techniques using real data sets from diverse fields, including neuroimaging, geography, seismology, demography, and environmental sciences. S/U or letter grading.

218. Graphics and Urban Information. (4) Lecture, two hours; studio, one hour. Presentation of basic graphic methods and tools for conceptualization, analysis, and documentation of built environment. Development of conceptual stages through graphic ideation and communication. Letter grading.

219. Special Topics in Built Environment. (4) Lecture, three hours. Topics in built environment selected by faculty members. May be repeated for credit. S/U or letter grading.

220. Quantitative Analysis in Urban Planning I. (4) Lecture, three hours; laboratory, 90 minutes. Preparation: passing score on basic mathematics proficiency examination given first day of class. Introduction to mathematical and statistical concepts and methods with applications in urban planning. Review of basic mathematical concepts fundamental to planning methods; linear and nonlinear functions focusing on growth curves and mathematics of finance; data measurement and display; descriptive statistics and probability. Introduction to use of computer as tool in analysis of planning-related data. Letter grading.

220B. Quantitative Analysis in Urban Planning II. (4) Lecture, three hours; laboratory, 90 minutes. Requirements: course 220A or equivalent as demonstrated by passing score on mathematics proficiency examination given first day of course 220A. Introduction to concepts of statistical inference and modeling, with emphasis on urban planning applications. Topics include sampling, hypothesis testing, variance, correlation, regression, and simple and multiple regression. Use of computer as tool in statistical analysis and modeling. Letter grading.

222A. Introduction to Planning History and Theory. (4) (Formerly numbered 222.) Lecture, three hours. Required of first-year M.A. students, typically in Fall Quarter; required of first-year Ph.D. students who have not completed comparable graduate course in planning history and theory. Exploration of planning thought and practice over time, leading authors and key issues in field of planning, traditional and insurgent histories of planning, and alternative approaches to planning for multipolar and pluralistic publics. Letter grading.

222B-222C. Advanced Planning Theory and History I, II. (4-4) (Formerly numbered 210A-210B.) Lecture, three hours. Prerequisites: through evaluation of theoretical writings and case studies, of complexity and diversity of developing countries. Emphasis on linkages between policy and rural and urban impacts. Gives students important background for courses 234B, 234C, and many other planning courses addressing Third World issues. Letter grading.

224B. Conservation in Inhabited Landscapes. (4) Lecture, three hours. Recommended preparation: courses 234B, 234C. Science and social sciences of environmental and questions of planning in light of transformations inherent in global change; how to address these questions in ways that go beyond green consumerism and bifurcation of human environment. American environmentalism has become a dominant model for many conservation practices. Informed by Muirist model of idea of untrammeled nature, this approach used in environmental policy and as key idea in conservation and fragment biology. At opposite end is environmental planning developed to infrastructuralize and fragment habitats (cities). Many reasons to be skeptical of both models in 21st century. Exploration of ideas pertaining to these questions. Letter grading.

234C. Resource-Based Development. (4) (Same as Geography M222.) Discussion, three hours. Recommended preparation: course 234A. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of state, corporations, and local groups, and environmental and social impact of its development. Letter grading.

235A-235B. Urbanization in Developing World I, II. (4-4) Lecture, 90 minutes; discussion, 90 minutes. Course 235A is requisite to 235B. Questions of urbanization and planning in first term; rural development in second term. Case studies from Latin America, Africa, and Asia. Lectures, student presentations, and policy debates. Letter grading.

236A. Theories of Regional Economic Development. (4) (Same as Public Policy M240.) Lecture, three hours; discussion, one hour. Introduction to theories of location of economic activity, trade, and other forms of contact between regions, process of regional growth and decline, reasons of development of economic development, relations between more and less developed regions. Letter grading.

236B. Globalization. (4) Lecture, three hours. Requirements: course 236A. Application of theories of regional economic development, location, and trade learned in course 236A to contemporary process known as globalization. Examination of nature and effects of globalization on development, employment, and social structure, along with implications for policy. Letter grading.

236C. Advanced Workshop on Regions in World Economy. (4) Lecture, three hours. Requirements: course 236B. Advanced workshop on regional development examining changes in organizations of national and global systems, their geographies, and processes that affect regional performance in globalized environment. Letter grading.

237A. Sectoral Analysis. (4) Lecture, three hours; laboratory, one hour. Introduction to methods and procedures of sectoral investigation as applied to regions, industries, companies, and their labor forces. Current theories and conceptions of industrial structure and industrial change. Investigation of characteristics and trends of industry subsidiaries in Los Angeles resulting in industry profile that can serve as aid to planning and shaping economic development. Letter grading.

237B. Urban and Regional Economic Development Applications. (4) Lecture, three hours. Survey and analysis of economic development strategies in U.S. Benchmark for economic development strategies, seeking to modify or shape existing conditions, focus on how policies attempt to harness dynamics associated with new forms of industrialization, intensified global competition, and interrelationships among capital, labor, and state. Letter grading.

237C. Southern California Regional Economy. (4) Lecture, three hours. Introduction to regional economy, with emphasis on Los Angeles. Key economic sectors, labor market composition, and review of conflicting portrayals depicting dynamics of region. Two all-day bus tours of key economic regions and guest lectures by regional experts included. Concurrently scheduled with course CM137. Letter grading.
239. Special Topics in Regional and International Development. (4) Seminar, three hours. Topics in urban and regional development selected by faculty members. May be repeated for credit. S/U or letter grading.

M240. Local Government. (2 to 6) (Same as Law M285S.) Lecture, three hours. Analysis of structure and functioning of local, county, and state government in historical and institutional context: organization, finance, intergovernmental relations, role of judiciary, public services, lawmaking, citizen participation through initiatives, referenda, and government tort liability. Letter grading.

M243. Privatization, Regulation, and Public Finance. (4) (Same as Public Policy M293.) Lecture, three hours; outside study, nine hours. Requisite: Public Policy 220. Economic and political determinants of trend toward privatizing public services, and equity and efficiency outcomes of this trend as expressed through new pricing, financing, and self-serve policies. Exploration of new regulatory role this trend implies for state and local governments. Letter grading.

244. Urban Poverty and Planning. (4) Lecture, three hours. Examination of determinants of urban poverty, with emphasis on poverty in U.S. and on geographical dimensions of poverty and planning interventions that contribute to poverty reduction. Topics include relationship between poverty and human and social capital, demographic change, low-wage labor market, spatial concentration of poor, residential segregation, and social policy. Letter grading.

245. Urban Public Finance. (4) Lecture, three hours. Requisites: courses 207, 220A. Theory and practice of urban public finance, with emphasis on methods used to fund public infrastructure. Topics include fiscal impact analysis of real estate development, effects of taxes on land-use decisions, benefits assessments to finance neighborhood public investment, private and intergovernmental contracting as means of supplying urban public services, tax increment finance for urban redevelopment, and municipal bond market. S/U or letter grading.

M246. Poverty, Poor, and Welfare Reform. (4) (Same as Social Welfare M292.) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward poor in U.S. S/U or letter grading.

247. Race, Gender, Culture, and Cities. (4) Discussion, three hours. Exploration of multicultural context of contemporary U.S. cities, with focus on changing social and spatial relations of ethnic communities and their political implications. Topics relate new diversity and gender with global restructuring, new urban economy, and policies of workplace, housing, schools, and governance. S/U or letter grading.

249. Special Topics in Social Policy and Analysis. (4) Lecture, three hours. Topics in social policy and analysis selected by faculty members. May be repeated for credit. S/U or letter grading.

250. Introduction to Social Policy. (4) Lecture, three hours. Topics: economic changes and their impact on social needs, and ideological debates that affect development of social policy in U.S., compared with Western Europe. S/U or letter grading.

251. Planning for Multiple Publics. (4) Lecture, three hours. Exploration of planning needs of various social and political groups with different lifestyles and life circumstances and research studies to determine appropriate mechanisms for planning for multiple publics. Analysis of community implications in Los Angeles metropolitan area to gain insights into economic efficiency of planning, problems of planning for multiple publics. Generally, taken in first year. S/U or letter grading.

252. Parking, Transportation, and Land Use. (4) Lecture, three hours. Parking is key link between transportation and land use, but that link has been widely misunderstood. Transportation engineers typically assume that free parking simply is there at end of most trips, while urban planners treat parking as transportation issues that engineers must study. No profession is intellectually responsible for parking, and everyone seems to assume that someone else is doing hard work planners analyze, manage, and operate transportation systems. Measuring system performance, intelligent transportation systems, transportation system demand management, parking management, freight transit evaluation and management, paratransit, bicycle and pedestrian planning, transportation for elderly and disabled. Letter grading.

M254. Transportation, Land Use, and Urban Form. (4) (Same as Public Policy M220L.) Lecture, three hours. Historical evolution of urban form and transportation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form. Letter grading.

255. Transportation Planning. (4) (Same as Public Policy M244.) Lecture, three hours. Examination of transportation systems. Measuring system performance, intelligent transportation systems, transportation system demand management, parking management, freight transit evaluation and management, paratransit, bicycle and pedestrian planning, transportation for elderly and disabled. Letter grading.

M256. Travel Behavior Analysis. (4) (Same as Public Policy M244.) Lecture, three hours. Principles of household travel surveys; quantitative techniques; econometric models; choice models; trip distribution, mode split traffic assignment, critique of traditional travel forecasting methods and new approaches to travel behavior analysis. Letter grading.

257. Transportation Economics, Finance, and Policy. (4) (Same as Public Policy M222L.) Lecture, three hours. Overview of transportation finance and economics; concepts of efficiency and equity in transportation finance; historical evolution of highway and transit finance; current issues in highway finance; private participation in road finance, toll roads, road costs and cost allocation, truck charges, congestion pricing; current issues in transit finance; and public and private policies. S/U or letter grading.

258. Transportation and Environmental Issues. (4) (Same as Public Policy M220L.) Lecture, three hours. Overview of environmental impacts, geography, use of land and water, and consideration of resource planning. S/U or letter grading.

259. Transportation and Economic Development. (4) Lecture, three hours. Examination of equity issues related to urban transportation, with focus on complex relationships among urban spatial structure, transportation (travel patterns and transportation investments), and economic outcomes. Role of transportation in improving economic outcomes of minority households and communities. Letter grading.

C260. Environmental Politics and Governance. (4) Lecture, three hours. Environmental planning is more than simply finding problems and fixing them. Each policy must be negotiated and implemented within multiple, complex systems of governance. Institutions and politics matter deeply. Overview of how environmental governance works in practice and how it might be improved. Concurrently scheduled with course CM160. Letter grading.

261. Land-Use Planning: Processes, Critiques, and Innovations. (4) Lecture, three hours. Understanding of techniques, processes, strategies, and dilemmas of land-use planning. Despite strong criticisms and demonstrated shortcomings, land-use control remains integral part of planning practice. How does land-use control work? What are its problems with traditional land-use control mechanisms? How do innovations in land-use planning address criticisms? What is role of land-use planning in good society? S/U or letter grading.

262. Urban Environmental Problems: Water Resources. (4) Lecture, three hours. Water is life and wealth in California, which has world’s most extensive long-distance, interbasin water transfer system. To date, water resources planning has been devoted almost exclusively to adding facilities for water delivery. But conflicts over additional developments have basi- cally precluded further development, despite growing pressures to increase supplies. Examination of environmental impacts, geography, use of water, and consideration of resource planning. S/U or letter grading.

263. Introduction to Environmental Analysis and Policy. (4) Lecture, three hours. Introduction to basic concepts and methods of environmental analysis covering variety of topics with cross-disciplinary perspectives. Development of ability to analyze major environmental and resource issues as well as to read, discuss, and write critically about environmental policy. Letter grading.

M264A-264B. Environmental Law. (1 to 8 each) (Formerly numbered M264.) (Same as Law M290.) Lecture, three hours. Course M264A is enforced requisite to 264B. Examination of field of environmental law through analysis of various environmental public policies: legal consequences of public decision-making strategies and allocation of primary responsibility for various environmental decisions. Focus on air pollution and Clean Air Act as means of illustrating policy issues underlying field. In Progress (M264A) and S/U or letter grading (264B) grading.

265. Environmentalisms. (4) (Formerly numbered C265.) Lecture, three hours; discussion, one hour. Review of environmental theories and their practices in dynamic U.S. and international contexts. Issues of climate change, scenario planning, and matrix ecology and its implications in both urban and rural settings. Exploration of problems of increasing internationalization (or international implications) of environmental practices as part of both green and black economies. What does integrated environmental planning look like in this century? Letter grading.

M267. Environmental and Resource Economics and Policy. (4) (Same as Public Policy CM250.) Lecture, three hours. Requisites: courses 207, 220B, or Public Policy 204 and 208. Survey of ways economic tools is used to define, analyze, and resolve problems of
environmental management. Overview of analytical questions addressed by environmental economists that bear on solutions and policies. S/U or letter grading.

269. Special Topics in Environmental Analysis and Policy. (4) Lecture. Three hours. Topics in environmental analysis and policy selected by faculty members. May be repeated for credit. S/U or letter grading.

M270. Homelessness: Housing and Social Service Issues. (4) (Same as Social Welfare M206A.) Lecture, 90 minutes; discussion, 90 minutes; one field trip. Review of current status of homelessness: who homeless are, what services and housing are available, existing and proposed programs—appropriate architecture, management, and sources of funding. Outside speakers include providers of services to homeless. Letter grading.

M272. Real Estate Development and Finance. (4) (Same as Architecture and Urban Design M272.) Lecture, two hours; workshop, two hours; outside study, eight hours. Requisites: courses 220A, 220B. Recommended for first-year students in community development and architecture. An introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market studies, design, loan packages, development plan, and feasibility studies. Lectures and projects integrate development process with proposed design solutions that are interactively modified to meet economic feasibility tests. S/U or letter grading.

273. Site Planning. (4) Lecture, 90 minutes; laboratory, 90 minutes. Requisite: course 274. Introduction to principles of site planning for urban areas. S/U or letter grading.

274. Introduction to Physical Planning. (4) Lecture/ workshop, 90 minutes; discussion, 90 minutes. Designed for students with no prior physical planning background and for first-year M.A. students in community development and built environment, design and development, and transportation policy and planning concentrations. Introductory overview of physical planning, land use, site analysis, and surveys; regulatory structures and social/community impacts. Letter grading.

M275. Community Development and Housing Policies: Roles of State, Civil Society, and Nonprofits. (4) (Same as Social Welfare M290L.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Examination of role of U.S. housing policy and role of government agencies and community organizations. Is property housing or economic development? Should interventions be directed toward inner city housing markets or through neighborhood strategies? What lessons can be learned from experiences of other countries? Letter grading.

M276A-276B. Urban Housing. (1 to 8 each) (Formerly numbered M276.) (Same as Law M287.) Lecture, three hours. Course M276A is enforced requisite to 276B. Examination of past 40 years of federal and state programs to stem urban decline and improve housing in U.S.; comparison and contrast of legal and policy initiatives in areas of public housing, housing segregation, mortgage subsidies, landlord/tenant laws, urban renewal, and community organizing. Research paper required. In Progress (M276A) and S/U or letter (276B) grading.

277. Historic Preservation: Principles and Practice. (4) Lecture, 90 minutes; discussion, 90 minutes. Overview of preservation field, including history and theory, current legislation, tax incentives, preservation planning, landmark and district surveys and designations, adaptive reuse, citizen involvement, and social issues. S/U or letter grading.

278. Urban Labor Markets and Public Policy. (4) Lecture, three hours. Central issues in urban economic development: how to stimulate them, how to help disadvantaged populations gain access to them, and how to ensure that they are of adequate quality in terms of wages, advancement, and skill development. Examination of how urban labor markets work and what can be done to help them work better, with focus on U.S. Particular emphasis on low-wage, low-skill workers and marginalized groups, such as inner-city people of color and people of urban labor markets work with discussions of policy options for making them work better and range of solutions, including job creation, workforce training, job ladder creation, union and community organizing, and immigration reform. Examination of power and economic inequality and how to make changes. Letter grading.

279. Seminar: Public Space. (4) Seminar, three hours. Investigation of changes in production, consumption, design, and meaning of public space and analysis of socioeconomic, political, and cultural factors that lie behind them. Letter grading.

280. Affordable Housing Development. (4) Lecture, three hours. Requisites: courses 220A, 220B. Exploration of basic concepts and skills utilized in non-profit development initiatives, especially by community-based organizations. Focus on non-profit provision of subsidized housing to low-income homeowners, first-time homebuyers, broker debt and equity funding from private, government, and philanthropic sources. Use of client project and negotiation exercises. S/U or letter grading.

281. Introduction to Urban History of Built Environment in U.S. (4) Lecture, two hours; discussion, one hour. Open to advanced undergraduates with consent of instructor. Introduction to history of physical forms of urbanization in America; survey of economic, political, social, and aesthetic forces behind creation of built environments. S/U or letter grading.

282. Urban Design: Theories, Paradigms, Applications. (4) Lecture, three hours. Discussion and evaluation of philosophical bases, ideologies, and paradigms of urban design in last century; examination of how these are reflected on built environment of cities. Letter grading.

284. Looking at Los Angeles. (4) Lecture, three hours. Introduction to history and physical form of Los Angeles, with emphasis on understanding social, economic, and political issues in development of Los Angeles. Concurrently scheduled with course C184. Letter grading.

285. Women and Community Development: Great Gender Debates. (4) Lecture, nine hours; discussion, 90 minutes. Focus on gender, race, class and power in community development, and women, with attention to interaction of gender, race, and class/ethnicity. Examples from domestic and international developments. Alternate theories and methods to close gaps between household needs and urban policies. Preparation of written and oral critical reviews of literature and research paper. Letter grading.

286. Management Challenges and Tools for Nonprofit Sector. (4) (Same as Public Policy M226 and Social Welfare M290V.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Fundamental building blocks for successful management of organizations: management skills in strategic thinking/problem solving, project management, team building, and negotiation. Use of case studies to identify common challenges, from finance to crisis management to marketing, that nonprofit managers typically face. Letter grading.

287. Nonprofit Sector, State and Civil Society. (4) (Same as Public Policy M227 and Social Welfare M290S.) Lecture, three hours; outside study, nine hours. Use of political economy perspective to analyze forces that have shaped rise and characteristics of nonprofit sector and its constituent elements. Examination of social movements and nonprofit sector in U.S. Exploration of legal and policy environments and different organizational forms. Comparative perspective between U.S. and other countries. S/U or letter grading.

288. Leadership, Development, and Governance of Nonprofit Organizations. (4) (Same as Public Policy M247 and Social Welfare M281F.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. Letter grading.

289. Strategic Planning for Public and Nonprofit Organizations. (4) (Same as Public Policy M247 and Social Welfare M241F.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Technical processes of problem solving regarding substantive social problems. This form of community practice fills niche between professional and knowledge and skill set possessed by an agency or program administrators on one hand and by policy analysts and politicians on other. Letter grading.

291. Introduction to Sustainable Architecture and Community Planning. (4) (Same as Architecture and Urban Design CM247A.) Lecture, three hours. Relationship of built environment to natural environment through whole systems approach, with focus on sustainability of designs and buildings and planning of communities. Issues include energy efficiency, renewable energy, and appropriate use of resources, including materials, water, and land. Letter grading.

292. Elements of Urban Design. (4) (Same as Architecture and Urban Design M292.) Lecture, three hours. Exploration of cultural and political context of architecture and urban design. Concepts of varied physical environments and to set of current spatialized concepts. Consideration of theoretical propositions that are shaping present urban architectural and debate case studies where politics and ideology shape design process. Letter grading.

294. Housing in Developing Countries: Policy Objectives and Options. (4) Lecture, three hours. Examination of relevance of public policies and their intended and unintended effects on housing demand and supply in developing countries. Examination of factors that influence housing problems, and scope of solutions, has changed over time. Critical assessment of some key solutions that have been tried in past, their advantages, shortcomings, and resultant trade-offs, and likely directions for future housing policy. Letter grading.

296. Management Challenges and Tools for Nonprofit Sector. (4) (Same as Public Policy M226 and Social Welfare M290V.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Fundamental building blocks for successful management of organizations: management skills in strategic thinking/problem solving, project management, team building, and negotiation. Use of case studies to identify common challenges, from finance to crisis management to marketing, that nonprofit managers typically face. Letter grading.

298. Special Topics in Emerging Planning Issues. (4) Seminar, three hours. Topics in newly emerging planning issues such as role of cutting edge technology, innovative policies, and experimental programs. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) (Same as Architecture M231.) Seminar, to be arranged. Preparation: apprentice personnel under supervision of faculty fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for course planning and instruction at UCLA. May be repeated for credit. S/U grading.

M404. Joint Planning/Architecture Studio. (4) (Same as Architecture and Urban Design M404.) Lecture, one hour; discussion, one hour; studio, four hours. Opportunity to work on joint planning/architectural project for client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; working with resident leaders at Los Angeles City public housing developments. S/U or letter grading.
M470. Improving Worker Health: Social Movements, Policy Debates, and Public Health. (4) (Same as Community Health Sciences CM470 and Environmental Health Sciences M471.) Lecture, three hours; fieldwork, two hours. Examination of intersection between work, health, and environment, analysis of social causes of health disparities, investigation of historical trends and social movements, interpretation of current policy debates, and development of innovative interventions. S/U or letter grading.

496. Field Projects. (4) Tutorial, four hours. May not be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. M.A. Research in Planning. (4) Tutorial, three hours. May be repeated once for credit. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examinations or Ph.D. Qualifying Examinations. (4 to 12) Tutorial, four hours. May be repeated for credit by Ph.D. students. S/U grading.

598. Preparation for M.A. Thesis in Urban Planning. (4) Tutorial, four hours. May be repeated but may be applied toward degree only once. S/U grading.

UROLOGY
David Geffen School of Medicine
UCLA
66-143 Center for the Health Sciences
Box 951738
Los Angeles, CA 90095-1738
(310) 206-2355

http://urology.ucla.edu

Chair
Jean B. deKernion, M.D. (Fran and Ray Stark Foundation Professor of Urology), Chair

Scope and Objectives
The fundamental goal of the Department of Urology is to teach medical students the general principles of diagnosis and management in diseases of the genitourinary tract. Urology encompasses a wide scope of human illness, including conditions that are congenital and acquired, pediatric and adult, male and female, malignant and benign. The department functions to acquaint students with the skills necessary to manage these conditions in the initial stages and over the long term.

Instruction spans all four years of the undergraduate medical school curriculum but is concentrated during the clinical rotations. Students spend one week on the urology service during the third year and may return for an additional four-week elective rotation during the fourth year. The clinical experience includes time spent in the faculty and resident clinics, on ward rounds, and in didactic conferences that cover general urology, urological subspecialties, uropathology, and uroradiology. Urology teaching settings include the Reagan UCLA, Harbor-UCLA, Olive View-UCLA, Santa Monica UCLA, and West Los Angeles VA Medical Centers.

For further details on the Department of Urology and a listing of the courses offered, see http://urology.ucla.edu.

Urology
Upper Division Course
199. Directed Research in Urology. (2 to 8) Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Tara C. Browner, Ph.D. (Ethnomusicology)
Barbara Drucker, M.F.A., ex officio (Art)
Angelia S.-Y. Leung, M.A., C.M.A. (World Arts and Cultures/Dance)
Willem Henri Lucas, B.A. (Design | Media Arts)
Patricia A. Wideman, M.F.A. (Art)

Scope and Objectives
The Visual and Performing Arts Education minor is an interdisciplinary and interdepartmental series of courses designed to (1) introduce students to the field of arts education for public schools in general and specifically in relationship to the K-12 public school system, (2) introduce students to a potential range of careers in the arts, including teaching artists, arts specialists, museum educators, arts administrators, and arts advocates and to a variety of arts-related programs and cultural agencies, including community arts centers, museums, after-school programs, and nonprofit arts institutions, (3) contribute to improved communication and interaction between the University, extended Los Angeles community, K-12 public school system, and students in the arts, and (4) expand the School of the Arts and Architecture’s commitment to University and community partnerships by linking teaching and research with undergraduate education, civic engagement, and support for institutional priorities to improve the quality of life for Los Angeles residents.

Sandra Harding, Ph.D.

Undergraduate Study
Visual and Performing Arts Education Minor
The Visual and Performing Arts Education minor is intended to supplement the education of undergraduate students enrolled in the Architectural Studies, Art, Design I Media Arts, Ethnomusicology, Music, and World Arts and Cultures majors.

To apply to the minor, students must have completed at least 50 percent of the lower division requirements of their specific majors and Arts and Architecture 102 with a grade of B or better, be in good academic standing with an overall grade-point average of at least 2.7, and submit a statement of interest, a résumé including any previous teaching and/or outreach experience, and at least one letter of recommendation from a faculty member in the home department. Applicants are contacted regarding an interview.

Required Upper Division Courses (28 to 32 units): (1) Arts and Architecture 102, (2) two courses selected from Arts and Architecture 100, Art M186A/M186AL, Dance C145 (with consent of adviser), 166, 167, Ethnomusicology 196, Music 100A, Theater 118A, 118D, World Arts and Cultures 103, 120 (with consent of adviser), C155, a 4-unit 195 course from the Departments of Art, Design I Media Arts, Ethnomusicology, Music, or World Arts and Cultures/Dance, or a 195 sponsored by the Center for Community Learning, (3) two courses selected from Education M108, 118, 120, 121, 122, 123, C125, C126, 127, 128, 129, 130, 131, 132, 133, 138, M186 (courses 120, 121, 127, and 130 are recommended), and (4) a two-course capstone sequence (Arts and Architecture 192, 192SL) that includes a guided teaching experience.

No more than two upper division courses (8 to 10 units) may be applied toward both this minor and a major or minor in another department or program. Each minor course must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.
The Department of Women's Studies provides interdisciplinary academic programs that are both nationally and transnationally oriented. The undergraduate program offers a Bachelor of Arts degree and a minor; the graduate program offers Master of Arts (for Ph.D. students only, no terminal master's) and Ph.D. degrees.

Students develop critical reasoning and analytical skills, a deep appreciation for complexities of power and asymmetries in gender relations across time, class, and cultures, and conceptual tools for social change.

The women's studies curriculum challenges the pervasive theory/practice divide within the academy. In both undergraduate and graduate courses, students are taught a broad range of methodological and analytical skills. Core undergraduate courses contextualize foundational theories and key analytic concepts within the study of different historical periods and social movements. In designating these courses Power, Knowledge, and Bodies, the department identifies three primary areas in which feminist inquiry has been concentrated over time, enabling students to trace grounding concepts, key controversies, and the emergence of new theoretical paradigms.

The department has long enjoyed recognition for its strengths in areas including women’s history, feminist science studies, Middle East women’s studies, and gender and the law. Over the past several years, it has become a leading center for interdisciplinary intersectional feminist scholarship on gender, sexuality, race, class, and nationality and is building a strong reputation in the areas of transnational literary and media studies, postcolonial feminist studies, and studies of settler colonialism.

Undergraduate Study

Women's Studies B.A.

The major in Women's Studies may be taken alone or in conjunction with another Letters and Science major. In the case of a double major, no more than five courses may be applied toward both majors.

Admission

To be admitted to the major, students must have completed Women's Studies 10, be in good standing, and formally register with the department. They are encouraged to declare their major as early as possible and to discuss their proposed course of study with the undergraduate adviser.

Students are encouraged to draw on the University’s diverse resources in creating their program of study. They may pursue traditional and/or innovative subjects in fields ranging from the humanities and fine arts to the social and life sciences. In addition to courses on the women's studies approved list, students may petition to have diverse courses accepted, including courses outside the College of Letters and Science, independent studies, or field study courses.

Each course applied toward the major must be taken for a letter grade, and students must have a grade-point average of 2.0 or better in women’s studies courses to receive credit for completing the program. Courses in which they receive grades of C– or lower may not be applied toward the required courses in the major.

Preparation for the Major

Required: Women's Studies 10. Students must also complete departmental lower division requisites, as applicable, for upper division women's studies courses.

Transfer Students

Transfer applicants to the Women's Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one multidisciplinary feminist perspectives in women and society course and departmental lower division requisite courses. Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospectivetransfer.htm for up-to-date information regarding transfer selection for admission.

The Major

The major is designed to (1) impart core concepts in theory and critical analysis, research design, and methods and (2) provide exposure to a range of feminist scholarship across disciplines. To achieve these goals, the major is divided into three categories.

Required: At least 11 upper division courses (minimum of 4 units each) as follows: (1) three core courses — Women’s Studies 102, 103, 104, (2) seven elective courses; one upper division tutorial (minimum of 4 units) selected from course 195, 197, or 199 may be applied toward the elective requirement (this limit does not apply to course 198A or 198B), and (3) course 187 (capstone seminar).

Honors Program

The honors program is open to advanced junior and senior Women's Studies majors with a 3.6 grade-point average in women's studies courses and a minimum 3.4 overall GPA who have no outstanding Incomplete grades, and to majors who demonstrate ability to do honors work by submitting a paper to the department chair for approval.

To qualify for honors at graduation, students must successfully complete three successive terms of honors research (courses 198A, 198B, 198C) with their faculty sponsor and receive a grade of B+ or better on their research paper/project. Course 198A may be applied toward the elective requirement; courses 198B and 198C are in addition to the minimum required courses. Further information is available from the undergraduate counselor in the department office.

Women's Studies Minor

The Women's Studies minor augments and enriches study in a traditional field. Students participating in this program are required to complete both a departmental major and the Women's Studies minor.

To enter the minor, students must have an overall grade-point average of 2.0 or better and formally register with the department undergraduate advisers in 1120 Rolfe Hall. They are encouraged to declare the minor as early as possible.

Required Lower Division Course (5 units):
Women's Studies 10. Students must also complete departmental lower division requisites, as applicable, for upper division women's studies courses.

Required Upper Division Courses (24 units): (1) One core course from Women's Studies 102, 103, or 104, (2) 120 or 187 or an equivalent senior research seminar approved in advance, and (3) four upper division courses (minimum of 4 units each) from the approved women's studies course list. No more than 4 units of courses 195 through 199 may be applied.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Courses in which students receive grades of C– or lower may not be applied toward the core requirements in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnet.ucla.edu/gasaa/library/pgmreqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Women's Studies Department offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Women's Studies.
102. Power. (4) Lecture, three hours. Enforced requisite: course 10. Consideration of how feminist theorists have critiqued traditional theories of power, as well as ways feminist and other social movements have challenged sex- and gender-based social subordination. Focus on contribution of women of color feminism to ways power is conceived and organized. Historicalizing of women of color feminism within context of new social movements of the 1970s. Examination of ways in which relations of power shifted in wake of these social movements, necessitating new perspectives on such terms as struggle, resistance, and agency. Theorizing of key concepts of women of color feminism—intersectionality and difference— as offering these new perspectives. P/NP or letter grading.

103. Knowledge. (4) Lecture, three hours. Enforced requisite: course 10. One central aim of research in field of women's studies has been to disclose ways that knowledge production historically has been gendered, and to suggest alternative methods of inquiry and interpretation. In seeking to supplement or provide alternatives to dominant research methods, some scholars have sought to distinguish distinctively feminist ways of knowing. Introduction to lively ongoing debates within academy concerning knowledge production, with focus on central epistemological and methodological controversies existing in social sciences and humanities. Consideration of stakes and implications of these sometimes abstract debates, with focus on one particular arena of scholarly inquiry—what historians of black women have sought to define and investigate inner lives of historical subjects. P/NP or letter grading.

104. Bodies. (4) Lecture, three hours. Enforced requisite: course 10. Tracing of shifting meanings of terms sex and gender in different historical periods and social locations, as well as how these terms have been produced as essential difference? What is presumed relationship between body and gendered subjectivities? What role does heteronormativity play in constructing and regulating sex identity and gender roles? How has category of woman been critiqued and restructured and regulating sex identity and gender roles? May be repeated for credit with topic or instructor change. P/NP or letter grading.

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) (Same as Gerontology M104C and Social Welfare M104C.) Lecture, four hours. Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnic differences and main differences and differences in the field of physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity. Letter grading.

105. Topics in Women's and Gender Studies. (4) Lecture/ discussion, three hours. Examination of medical conditions of women in context of issues that impact women's health, healthcare, and healthcare providers. Discussion of basic health concepts and self-care; consideration of a women's health specialty and ways to deliver healthcare to women. Exploration of roles and lifestyle issues in women's healthcare. P/NP or letter grading. M105A. Premodern Queer Literatures and Cultures. (5.) (Same as English M101A and Lesbian, Gay, Bisexual, and Transgender Studies M101A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of discrete period of queer literature from beginning to circa 1850. Works by such writers as Sappho, Plato, Marlowe, Shakespeare, and Thomas Gray may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M105B. Queer Literatures and Cultures, 1850 to 1970. (5.) (Formerly numbered M101B.) (Same as English M101B and Lesbian, Gay, Bisexual, and Transgender Studies M101B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of discrete period of queer literature and culture from circa 1850 to 1970. Works by such authors as Walt Whitman, Radclyffe Hall, Gertrude Stein, Virginia Woolf, Langston Hughes, Tennessee Williams, Henry Blake Fuller, and James Baldwin may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M105C. Queer Literatures and Cultures after 1970. (5.) (Formerly numbered M101B.) (Same as English M101B and Lesbian, Gay, Bisexual, and Transgender Studies M101C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Examination of cultural production produced by queer after Stonewall rebellion in New York in 1969, widely regarded as origins of beginning of modern lesbian and gay rights movement in U.S. Writings and films by such authors as Eve Sedgwick, Andy Ohejas, Essex Hemphill, Audre Lorde, Cheryl Dunye, and Alison Bechdel may be included. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M105D. Studies in Queer Literatures and Cultures. (5.) (Formerly numbered M101C.) (Same as English M101D and Lesbian, Gay, Bisexual, and Transgender Studies M101D.) Lecture, four hours; discussion, one hour (when sched- uled). Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in queer literatures and cultures. Topics focus on particular problem or issue in terms of its relationship to queer cultures and writings. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M106. Imagining Women. (4.) (Same as Honors College D16, Social Science C16 in honors, Designated for ju- niors/seniors. Study of four female cultural archetypes—abscording wife/mother, infanticide mother, intellec- tual woman, and warrior woman—as they appear in their classical and modern manifestations in European and American cultures. P/NP or letter grading.

M107A. Women in Jazz. (4) (Formerly numbered M107C.) (Same as English M107A.) Lecture, four hours; discussion, one hour (when sched- uled). Enforced requisite: English Composition 3 or 3H. Focus on women writers that may include historical, re- gional, national, or thematic emphasis, with possible topical variations. May be repeated for credit with topic and genre. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M107B. Studies in Gender and Sexuality. (5) (Not same as course 101.) (Same as English M107B and Lesbian, Gay, Bisexual, and Transgender Studies M107B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Examination of literary and cultural production through lens of gender and sexuality. Depending on instructor, emphasis may be historical, regional, national, comparative, or thematic and include other intersections of identity and representation such as race and ethnicity. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M108. Love and Sex in German Literary Tradition. (4) (Same as German M107.) Lecture, three hours. Taught in English. Study of major literary works that address issues of idealized desire, emotional/sexual boundaries, and development of sexual identity. Letter grading.

108S. Violence against Women. (4) (Formerly numbered M108S.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from 1880s to present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

110A. Feminist Theories in Social Sciences. (4) Lecture/discussion, three hours. Requisite: course 10. Multidisciplinary explorations of theorists' attempts to describe, explain, and interpret, reconsider, and consider impact of race, ethnicity, class, etc. Emphasis on relation of theories to change in law, work, politics, economics, psychology, education, religion, sexuality, etc. Applications of theories to research questions and methodologies. P/NP or letter grading.

110B. Feminist Theories in the Humanities. (4) Lecture/discussion, three hours. Requisite: course 10. Examination of theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by new scholarship on women in philosophy. Critical study of concepts and principles that arise in discussion of women's rights and liberation. Philosophy of theories to research questions and methodologies. P/NP or letter grading.

M110C. Philosophical Analysis of Issues in Femi- nist Theory. (4) (Same as English M110.) Lecture, three hours. Requisite: Women's Studies majors: course 10; for other students: one philosophy course. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by new scholarship on women in philosophy. Critical study of concepts and principles that arise in discussion of women's rights and liberation. Philosophy of theories to research questions and methodologies. P/NP or letter grading.

M111. Women and Film. (6) (Same as Film and Tele- vision M111.) Lecture, each hour, one to three hours. Historical issues and critical approaches to women and cinema that may include authorship, stardom, female genres, and images of women in Hollywood comedies, alternative cinema, and independent cinema from silent era to present. Letter grading.

112. Special Topics in Women and the Arts. (4) Lecture, three hours. Requisite: course 10. Selected topics relating feminist theories to creation of art by women, with consideration of cultural contexts in which they work. Approach to be comparative, cross-cultural, and interdisciplinary. Consideration of artistic practice by women in relation to issues of power, representa- tion, and access. May be repeated twice, except for credit toward Women's Studies major. P/NP or letter grading.

M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies. (3) (Same as English M114, Gay, Bisex- ual, and Transgender Studies M114.) Lecture, three hours; discussion, one hour. Introduction to histo- ry, politics, culture, and scientific study of lesbians, gay men, bisexuals, and transgenders, with examination of sexuality and gender as categories for investiga- tion; interdisciplinary theories and research on minority sexualities and genders. P/NP or letter grading.

M115. Topics in Study of Sexual and Gender Orienta- tions. (4) (Same as English M115, Gay, Bisexual, and Transgender Studies M115.) Lecture/discussion, three hours. Requisite: course 10 or M114. Studies in arts, humanities, and social sciences concerning gender on as- pects of sexual orientation, gender identity, and lesbi- an, gay, and/or bisexual issues; variable topics may in-
include cultural representations, historical and political change, life and health experiences, and queer or trans gender theories; multicultural and cross-cultural emphases. May be repeated for credit. Letter grading.

M117. Women and Politics. (4) (Same as Political Science M117) Lecture/or four or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to rapidly growing body of empirical and theoretical scholarship on women and politics in both national and international contexts. Topics may include women's movement in U.S. and globally; women's electoral participation; representation of women in Congress and in legislatures worldwide; women as heads of government and state; feminist critiques of political systems as well as national and transnational. Attention to various roles, positions, and concerns of Chicana, and Native American women in order to assess intersections of race, ethnicity, class, and gender. Controversy and mediation; feminist theory, and political practices on race and its relation to feminism as defined by women of color. P/NP or letter grading.

M118. Queering American History. (4) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M118) Lecture, four hours. Enforced requisite: one pri or or upper division women's studies course. History of sexual and gender minorities in U.S. Topics include changing norms, romantic friendships, medical discourse, liberation politics, post-Stonewall culture. Attention to transformative and revolutionary, queer theory, and politics. P/NP or letter grading.

M119. Tristan, Isoldé, and History of Heterosexuality. (4) (Same as German M105) Lecture, three hours. Taught in English. German, French, and English versions of Tristan and Isoldé story from Middle Ages to 20th century. Particular attention to relation between representation of heterosexual love in each text and contemporaneous ideas about human sexuality. P/NP or letter grade.

120. Internship in Women's Studies. (4) Seminar, three hours; internship, eight hours. Preparation: at least two upper division women's studies courses. Requisite: upper-division women's studies course combining seminar with field placement. Practical experience in working on women's issues and connecting these experiences to methodological and theoretical frameworks explored in course 110A or 110B. Letter grading.

M121. Topics in Gender and Disabilities. (4) (Same as Disability Studies M121) Lecture, three and one half hours. Explores intersectionality of disability and gender. Why various aspects of lived experiences of disability are affected by gender, with particular attention to various roles, positions, and concerns of women with disabilities. Approach is intersectional, exploring how interconnections of class, race, ethnicity, religion, age, sexuality, nationality, and citizenship affect and are affected by gender and disability. Topics may include law (civil rights, nondiscrimination), representation (arts, literature, education), public health. May be repeated for credit with topic and instructor change. P/NP or letter grading.

M124. Psychology of Language and Gender. (4) (Same as Communication Studies M124) Lecture, four hours; discussion, topic and method of current topics at intersection of gender and language. Topics include sex differentiation in language across cultural systems; sex bias in lexicon and usage, sex differences in language; cross, synchrony, and nonverbal behavior; development of sex differentiated language in children; women's and men's language in various racial/ethnic/class/ssexual preference groups; and conversational interaction. Letter grading.

M133A. Chicana Lesbian Literature. (4) (Same as Chicana and Chicano Studies M133A) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of Chicanas both within Chicanas/Chicana communities and dominant society. Attention to Anglo-European and Third World women. P/NP or letter grading.

130. Women of Color in the U.S. (4) Lecture/discussion, three hours. Enforced requisite: course 10 or Chicana and Chicano Studies M10A. Examination of theories and practices of women who identify as “Chicana feminism.” Analysis of writings of Chicanas who do not identify as feminist but whose practices are feminist. Chicana has both within Chicanas/Chicana community and dominant society. Attention to Anglo-European and Third World women. P/NP or letter grading.

M134. Gender, Science, and Theory. (4) (Same as Environmental Studies 134) Lecture, three hours; discussion, one hour (when scheduled). Requisite: one course from 10 of 103, 104, English 120, or 121. Investigation of key concepts and debates in study of gender, sexuality, gender, and kinship, with focus on their interrelated significance for making of culture. Readings to be interdisciplinary, with possible emphasis on impact of changing ideas of gender and sexuality on society and culture. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M127. Women in Russian Literature. (4) (Same as Russian M127) Lecture, three hours. Designed for junior or upper division women's studies students. Introduction to “alternative tradition” of women's writings in Russia and the Soviet Union. Emphasis on images of women expressed in this tradition as compared with those found in works of contemporary male writers. P/ NP or letter grading.

M132A. Chicana Feminism. (4) (Same as Chicana and Chicano Studies M132A) Lecture, three hours. Requisite: course 10 or Chicana and Chicano Studies M10A. Examination of theories and practices of women who identify as “Chicana feminist.” Analysis of writings of Chicanas who do not identify as feminist but whose practices are feminist. Chicana has both within Chicanas/Chicana community and dominant society. Attention to Anglo-European and Third World women. P/NP or letter grading.

M136. Music and Gender. (5) Lecture, three hours; discussion, one hour (when scheduled). Enforced requisite: one course from English M136, Music and Gender. Study of women and men. Topics include antecedents of career choral work and gender in music, including representation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles. P/ NP or letter grading.

M140. Women's Studies in French Literature. (4) (Same as French M140) Lecture, three hours. Exploration of selected aspect of history of women in French literature as author, character, symbol, etc. P/NP or letter grading.

153C. Bilingual Writing Workshop. (4) (Same as Chicana and Chicano Studies M153C) Seminar, four hours. Writing sample required on first day of class; access to course Web page mandatory; need not be bilingual. Enforced requisite: one course from Chicana and Chicano Studies M153A or letter grade. Study of theoretical perspectives on bilingual creative expression, with focus on specific genre (i.e., autobiography, poetry, fiction). Emphasis on memory, identity, gender, and sexuality; and central theme of bilingualism as politics and aesthetics. Peer critique of weekly writing assignments. Letter grading.

M136. Music and Gender. (5) (Same as Music History M136) Lecture, four hours. Enforced requisite: course 10 or Psych 10. Exploration of some significant cultural issues of contemporary American women's art movement. Study of women and men. Topics include antecedents of career choral work and gender in music, including representation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles. P/ NP or letter grading.

M140. Women's Studies in French Literature. (4) (Same as French M140) Lecture, three hours. Exploration of selected aspect of history of women in French literature as author, character, symbol, etc. P/NP or letter grading.

texts and political conditions that give rise to women’s resistance, as well as major debates in field of study. L6 P/N or letter grading.

M146. Feminist Geography. (4) (Same as Geography M146.) Lecture, three hours; discussion, one hour. Critical engagement of gender as concept of geographic inquiry. Gender as spatial process, analysis of feminist geographic theory and methods, landscapes of gender, challenges of representing gender. Spaces of femininity, masculinity, and sexuality. P/NP or letter grading.

M147. Psychology of Lesbian Experience. (4) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M147A and Psychology M147A.) Lecture, two hours; discussion, one hour. Required: course 10 or Lesbian, Gay, Bisexual, and Transgender Studies M114 or Psychology 10. Designed for juniors/seniors. Review of research and theory in psychology and women’s studies to examine various aspects of lesbian experience, impact of heterosexism/stigma, gender role socialization, minority status of women and lesbians, identity development within a multicultural society, changes in psychological theories about lesbians in sociocultural context. P/NP or letter grading.

M147B. History of Women in Colonial British America and Early U.S., 1600 to 1860. (4) (Same as History M147C.) Lecture, three hours; discussion, one hour. Required: course 10 or designed for juniors/seniors. Introduction to major themes in history of early American women from initial confrontation of English and American Indian cultures in early 17th century to rise of women’s rights movement in mid-19th century. P/NP or letter grading.

M147C. Transnational Women’s Organizing in Americas. (4) (Same as Chicana and Chicano Studies M147.) Lecture, four hours. Feminist theories of transnational organizing. Examination of gender and race as central to processes of globalization and essential to economic and political struggles encompassed in transnational power relations. Exploration of how questions of race, gender, and globalization effect economic policies and impact local actors and their communities. In time when people, capital, cultures, and technologies cross national borders with growing frequency, discussion of process of accelerated globalization has been linked to feminization of labor and migration, environmental degradation, questions of diaspora, sexuality, and cultural displacement, as well as growing global militarization. Problems and issues created by globalization and cultural, social, and political responses envisioned by transnational organizing. P/NP or letter grading.

M147D. History of Women in U.S., 1860 to 1980. (4) (Same as History M147D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to major themes in history of American women from abolition of slavery and Civil War to rise and consequences of second-wave feminism. P/NP or letter grading.

M148. Women in Higher Education. (4) (Same as Education M148.) Seminar, three hours. Designed for juniors/seniors. Overview of issues related to experience of women in higher education. Topics include curricular transformation, feminist pedagogy, gender equity, women’s health, and intersection of gender and race. Letter grading.

M149. Media: Gender, Race, Class, and Sexuality. (5) (Same as Communication Studies M149 and Labor and Workplaces M149.) Lecture, four hours; activity, one hour. Limited to junior/senior Communication Studies and Women’s Studies majors and Labor and Workplace Studies minors. Examination of manner in which diverse categories of people are represented by various dominant and codominated and/or colonized groups of people. Ways in which women, gay, lesbian, bisexual, transgendered, racial, and ethnic marginalized peoples, and subordinate subaltern and边缘 groups are presented and often misrepresented in media. Investigation and employment of practical applications of communications and feminist theories for understanding representation of stereotyped and political representation through use of media, guest presentations, lectures, class discussions, and readings. Introduction to theory and practice of cultural studies. Letter grading.

M155. Women’s Voices: Their Critique of Anthropological Narrative. (4) (Same as Anthropology M155.) Lecture, three hours. Preparation: introduction to sociocultural anthropology course. The anthropology of Japan has long viewed Japan as a homogeneous whole. Restoration of diversity and contradiction in it by listening to voices of Japanese women in various historical contexts. P/NP or letter grading.

M155Q. Gender and Social Movements. (4) (Same as Anthropology M155Q.) Lecture/discussion, three hours. Recommended preparation: prior women’s studies or anthropology courses. Comparative studies of social movements (e.g., nationalist, socialist, liberal reform), beginning with Japanese and China and including Cuba, Algeria, Bolivia, Mexico, Nicaragua, and Iran. Analysis of women’s participation in social movements and the centrality of gender interests across movements. P/NP or letter grading.

M156A. History of Women in the U.S.: Rebellious Women of 20th Century. (4) Lecture, three hours. Limited to juniors/seniors. Introduction to major and minor figures and movements for social change in the U.S., including themes from politics, sports, civil rights, and body. Examination of dramatic challenges to gender roles over course of the 20th century through actions of rebellious women who led way for myriad of changes in women’s lives. Offered in summer only. P/NP or letter grading.

M157. Chicana Historiography. (4) (Same as Chicana and Chicano Studies M157 and History M151D.) Lecture, three hours. Examination of Chicana historiography, looking closely at how practice of writing of history has placed Chicanas into particular narratives. Using Chicana feminist approaches to study of history, revisiting of specific historical periods and people moments such as Spanish Conquest, Mexican Period, American Conquest, Mexican Revolution, and Chicano Movement to excavate untold stories about women’s participation in and contributions of Chicana and Chicano history. P/NP or letter grading.

M158. Women, Gender, and Sexuality in Italian Culture. (4) (Same as Italian M158.) Lecture, three hours: discussion, one hour. Gender role, gender roles, images of femininity and masculinity, patriarchy, myths of Madonna and Latin lover, condition of women in Italian societiy through history, politics, literature, film, and other media. Italian majors required to read texts in Italian. P/NP or letter grading.

M159. Politics and Evolution. (4) (Same as Communication Studies M159.) Lecture, three hours. Discussion of theories and research on why pornography exists and its effects. Use of topic to illustrate value of theoretical study to social sciences generally. Letter grading.

M162. Sociology of Gender. (4) (Same as Sociology M162.) Lecture, three hours; discussion, one hour. Required: course 10 or Sociology 1. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality. Particular focus on gender relations in modern industrial societies. P/NP or letter grading.

M163. Gender and Work. (4) (Same as Sociology M163.) Lecture, three hours. Required: course 10 or Sociology 1. Examination of how questions of race and gender influence global labor market, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality. P/NP or letter grading.

M164. Politics of Reproduction. (4) (Same as Sociology M164.) Lecture, three hours; discussion, one hour. This course leads to intersectionality politics and life cycle. Topics include social construction of gender and population, reproductive issues, politicization of mothers and motherhood, and marriage, mourning, and new reproductive technologies. Letter grading.

M164A. Women, Violence, Globalization: India, Philippines, Singapore, Vietnam. (4) (Same as Asian American Studies M164.) Lecture, four hours. Study of various forms of violence done on women not only in their own society but in less developed societies of oppression, with focus on Filipino, Vietnamese, Singaporean, and South Asian cultures. Letter grading.

M165. Psychology of Gender. (4) (Same as Psychology M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction. P/NP or letter grading.

M166. Women in Socialist and Post-Socialist States. (4) (Same as Sociological Anthropology M166.) Lecture, three hours; discussion, one hour. Exploration of diverse aspects of women’s lives in socialist and post-socialist states. Although transition from socialism occurs differently, gender issues remain central to democratisation and marketization. Discussion of ways in which state policies affect women. Letter grading.

M167. Contested Sexualities. (4) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M167.) Lecture, three hours; discussion, one hour. Sociological perspectives on formation, control, and resistance of lesbian, gay, bisexual, and transgendered people. Variations in the social and cultural meanings of gender, and population, reproductive issues, politicization of mothers and motherhood, and marriage, mourning, and new reproductive technologies. Letter grading.

M168. Feminist Economics in Globalizing World. (4) Lecture, four hours. Preparation: Letters and Science Writing II requirement. Required: course 10. Designed for juniors/seniors. Overview of field of feminist economics, with emphasis on development economics in globalizing world economy. Overview of gender inequalities such as gender division of labor in paid and unpaid work, patterns of employment and unemployment, and wage gaps between men and women in different world regions. Literature feminist critiques of economics and of theoretical debates within gender and development field on topics such as structural adjustment, feminization of labor force, and poverty alleviation. Examination of efforts by governments, international policy-making institutions, and civil society organizations to make economic policies and structures gender-equitable. P/NP or letter grading.

M170C. History of Women in China, A.D. 1000 to Present. (4) (Same as History M170C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for seniors/juniors. Topics include women and family, women in Confucian ideology, women in literati culture, feminism, women and communism revolution. P/NP or letter grading.

171A. Women, Gender, and Law: Jurisprudence of Sexual Equality. (4) Lecture, four hours. Requisite: course 10 or Political Science 10 6 or 9. Recommended: course 110A or 110B or M110C. Exploration of models of equality described and/or advocated by legal theorists primarily in the U.S. — equality of opportunity for women, equality of result for women, non-result equality, etc. — using specific problems of women (e.g., sexual harassment, pregnancy leave policy, access to safe and effective reproductive control technologies) for purposes of illustration and critique. Specific topics may vary by instructor (e.g., consideration of sexual equality theories to issues of gender equity, legal status of women in countries outside the U.S. or from perspectives of international human rights). May be repeated for credit with topic or instructor change. P/NP or letter grading.

M172. Afro-American Woman in U.S. (4) (Same as Afro-American Studies CM172.) Lecture, two and one-half hours. Designed for juniors/seniors. Topics include women and African-American society and as members of their biological and ethnic group. P/NP or letter grading.

M173B. Women in 20th-Century Japan. (4) (Same as History M173B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/ seniors. Japanese women in Japanese and world history through state documents, autobiographical voices, contemporary television, and other varying historical sources, including topics such as women and new political order (1900 to 1930), women, war, and empire (1930 to 1945), and women in consumer society (1940s to 1980s) to be arranged. P/NP or letter grading.

M174. Sociology of the Family. (4) (Same as Sociology M174.) Lecture, three hours; discussion, one hour. Theory and research dealing with modern family, its structure, and functions, including historical changes, variant family patterns, family as an institution, and influence of contemporary society on the family. P/NP or letter grading.

M175. Women and Cities. (4) (Same as Urban Planning M175.) Lecture, three hours; discussion, one hour. Examination of relationship between women and cities: (1) how cities have affected women's opportunities for economic and social equality; (2) women's contributions to cities; (3) city planning, land use, and technology; (4) city planning, regionalism, and outer environment that reflect women's needs and interests. P/ NP or letter grading.

CM176. Comparative Media Literacy and Politics of Gender: Theory and Production. (4) (Same as Education CM176.) Seminar, three hours. Corequisite: course CM178L. Use of range of pedagogical approaches to the teaching of critical media literacy that necessarily involves understanding of new technologies and media forms. Study of both theory and production techniques to inform student analysis of media. Concurrently scheduled with course CM178L. P/NP or letter grading.

CM178L. Critical Media Literacy and Politics of Gender: Laboratory. (2) (Same as Education CM178L.) Laboratory, two hours. Corequisite: course CM176.必修课程。Course work includes experience as integral component of course CM178. Concurrently scheduled with course CM278L. Letter grading.

M180B. Historical Perspectives on Gender and Science. (4) (Same as History M180B.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Historical cases illustrating how gender enters practices and concepts of science. Topics include gendered conceptions of nature, person, and man of science, role of women and Asian women writers in science, scientific investigations of women and feminism. P/NP or letter grading.

185. Special Topics in Women's Studies. (4) Lecture, three hours. Preparation: one prior women's studies course. Topics include Specialized or advanced study in one area within women's studies. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

M186A. Global Feminists Since 1850 to the Present. (4) (Same as History M186A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Introduction to movements for women's rights (19th century) in Europe, Latin America, Asia, and the United States, analysis of the political order (1900 to 1930), and women, war, and empire (1930 to 1945). May be repeated for credit with topic or instructor change. P/NP or letter grading.

187. Senior Research Seminar: Women's Studies. (4) Seminar, three hours. Requisites: courses 10, and 110A or 110B or M110C. Introduction to senior Women's Studies majors or minors. In-depth study of major theme in feminist research. Themes vary by instructor and term. Students pursue independent research related to course theme, with guidance from instructor, then share and critique other student works in progress. Letter grading.

M191D. Topics in Queer Literatures and Cultures. (5) (Same as English, Gay, Bisexual, and Transgender Studies M191D.) Seminar, three or four hours. For seniors. Advanced or 110A or 110B or M110C. 1 credit. Topics include gender and sexuality as political and cultural components of gender and sexuality in society, and as members of their biological and ethnic group. P/NP or letter grading.

M191E. Topics in Gender and Sexuality. (3) (Same as English 191E and Sexualities M191E.) Seminar, three or four hours. Enforced requisite: English Composition 3 or 4H. Consult Schedule of Classes for class, period, subject or topic to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M191F. Topics in Feminist Knowledge Production: Early/Modern. (4) (Same as English M191F and Feminist Studies M191F.) Seminar, three or four hours. Preparation: English Composition 3 or 4H. Enforced requisite: English Composition 3 or 4H. Enforced requisite: English Composition 3 or 4H. Consult Schedule of Classes for class, period, subject, or topic to be studied in specific term. May be repeated for credit with topic or instructor change. P/NP or letter grading.

199. Community or Corporate Internships in Women's Studies. (2 or 4) Tutorial, four hours. Requisites: course 110A or 110B or M110C. Internship opportunities with organizations that includes a substantial feminist component. May be repeated for credit. P/NP or letter grading.

201. Feminist Knowledge Production: Early/Modern. (4) Lecture/discussion, three hours. Examination of early and modernist feminist theories and epistemologies in context of global flows of people, ideas, and goods and in diverse socioeconomic settings. Evaluation of shifting forms of feminist knowledge production and multicultural critiques of theories of modernity. Letter grading.

203. Research Methods in Studies of Women and Gender. (4) Lecture/discussion, four hours. Preparatory: course 110A or 110B or M110C. May be repeated for credit with topic or instructor change. P/NP or letter grading.

204. Current Research in Women's Studies. (1) Seminar, to be arranged. Designed for graduate students. Examination of research of current faculty in women's studies. Letter grading.

205. Gender and Politics of Information. (4) Seminar, three hours. Examination of gendered dimensions of embedded in information technologies. Critical analysis of information as resource and commodity; impact of Internet and information technologies on women and men and gendered distinctions between who builds and who "owns" information technology resources; race, class, gender relations in cyberspace and electronic communications. Letter grading.

210. Topics in Women and Public Policy. (4) Lecture, four hours. Designed for graduate and professional students in women’s studies. Introduction to background, decision-making processes, and current debates over public policy directly affecting women in one or more major sectors of public life (e.g., family, health, education, environment, labor, welfare, childcare). Topics may focus on public health, political science, economics, and social welfare. Letter grade.
215. Topics in Study of Sexuality and Gender. (4) Seminar, three to four hours. Designed for graduate students. Multidisciplinary studies on aspects of sexual orientation, gender identity, queer and transgender theory, interdisciplinary research on minority sexualities, and social construction/deconstruction of gender. May be repeated for credit with topic or instructor change. Letter grading.

220. Cultural Studies in Gender, Race, and Sexuality. (4) Seminar, three hours. Designed for graduate students. In-depth study of representations of gender and race in contemporary literature and performance culture, with special attention to race. Topics include flow of artistic cultural production across national borders, theorizing femalequeer as diasporic or multicultural formation. Letter grading.

M238. Feminist Theory. (4) (Same as Sociology M238.) Seminar, three hours. Designed for graduate students. Analysis of current American feminist theory relevant to sociologists. Exploration of critiques of second wave feminism by working class feminists and/or feminists of color, feminist scholars from other countries, and recent “antifeminist” feminists. Discussion of directions for future feminist sociology. Letter grading.

M252. Selected Topics in Sociology of Gender. (4) (Same as Sociology M252.) Lecture, two hours; discussion, two hours. Designed for graduate students. Seminar on selected topics in sociology of gender. May be repeated for credit. Letter grading.

M253A. Seminar: Current Problems in Compara- tive Education. (4) (Same as Education M253A.) Seminar, four hours. Corequisites: courses M527B. Study of aspects of feminist theory or research methods or gender analysis within disciplinary studies in social sciences, humanities, health sciences, arts, or professional programs. May be repeated for credit with topic or instructor change. Letter grading.

M255. Cross-Cultural Perspectives on Gender. (4) (Same as Sociology M255.) Seminar, three hours. How does gender manifest itself in lives of different groups of women in U.S. and abroad? Are universal analyses of gender possible or is gender too different cross-culturally? S/U or letter grading.

M259A-M259B. History of Women. (4-4) (Same as History M259A-M259B.) Seminar, four hours. Corequisite: course M259A is requisite to M259B. History of women's social and political issues seen in U.S. and comparative context. In Progress (M259A) and letter (M259B) grading.

M261. Gender and Music in Cross-Cultural Per- spective. (4) (Same as Ethnomusicology M261.) Seminar, three hours. Designed to foster in-depth understanding of gender in study of music as culture. Topics range from ethnomusicology of gender and sexuality, (de)codification of messages of resistance, and gender representation to gender politics via musical production. S/U or letter grading.

M263P. Gender Systems. (4) (Same as Anthropology M263P.) Seminar, three hours. Current theoretical developments in understanding gender systems cross-culturally, with emphasis on relationship between systems of gender, economy, ideological systems, and social inequality. Selection of ethnographic cases from recent literature. S/U or letter grading.

M266. Feminist Theory and Social Sciences Re- search. (4) (Same as Education M266.) Lecture, four hours. Examination of how diverse feminist social theories of last quarter century have both challenged and strengthened conventional social sciences theories and methodologies. Introduction especially to feminist standpoint theory, distinctive critical theory methodology now widely used in social sciences. Letter grading.

CM270. Alternate Traditions: In Search of Female Voices in Contemporary Literature. (5) (Same as Comparative Literature CM270.) Seminar, four hours. Designed for graduate students. Investigation of narrative texts by contemporary French, German, English, American, Spanish American, African, and Asian women writers from cross-cultural perspective. Common themes, problems, and techniques. Concurrently scheduled with course CM170. S/U or letter grading.

CM278L. Critical Media Literacy and Politics of Gen- der: Theory and Production. (4) (Same as Educa- tion CM278L.) Seminar, three hours. Corequisites: course CM278L. Use of range of pedagogical approaches to theory and practice of critical media literacy that necessarily involves understanding of new technologies and media forms. Study of both theory and production techniques to inform student analysis of media and critical media literacy projects. Concurrently scheduled with course CM178. Letter grading.

285. Special Topics in Women's Studies. (4) Lecture/discussion, four hours. Designed for graduate students. Examination of specific topics or special problems. In-depth study of aspects of feminist theory or research methods or gender analysis within disciplinary studies in social sciences, humanities, health sciences, arts, or professional programs. May be repeated for credit with topic or instructor change. Letter grading.

296. Doctoral Roundtable. (2) Research group meeting, two hours. Preparation: satisfactory completion of Ph.D. program first year. Requisites: at least two courses from 201, 202, 210. Limited to program Ph.D. students. Interactive seminar with focus on disciplinary and interdisciplinary issues, feminist scholarship, research presentation, and professional development. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel, employment as teaching assistant, associate, or fellow. Requisite or corequisite: course 495. Teaching apprenticeship under active guidance and superintendence of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Feminist Pedagogy. (2) Seminar, two hours. Preparation: appointment as teaching assistant in department. Introduction to feminist methods of teaching, with emphasis on reciprocity and dialogue and de-emphasis on hierarchy. Required of students while serving as teaching assistants (first time only) in undergraduate women's studies courses. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged. Requisites: courses 201, 202, 203. Directed individual research and study in area related to women's studies/gender studies, arranged individually by student with instructor. May be repeated for credit. S/U or letter grading.

597. Preparation for M.A. Comprehensive Exam- ination or Ph.D. Qualifying Examinations. (2 to 12) Tutorial, eight hours. Limited to graduate women's studies students. Reading and preparation for written M.A. comprehensive examination or Ph.D. qualifying field examinations. May be repeated for a maximum of 12 units. S/U grading.

Undergraduate Study

World Arts and Cultures B.A.

The World Arts and Cultures major leads to the Bachelor of Arts degree and is designed to offer choice and flexibility while maintaining balance and rigor. At the outset, students select one of two concentrations: dance or world arts and cultures. All students take a set of core courses designed to explore a wide range of artistic practices in cultural context. In addition, it is recommended that students selecting the dance concentration study movement techniques of their choice four to five days a week for the first two years of the program, while those concentrating in world arts and cultures must select 8 units of arts practice electives in movement, music, theater, film, design, or visual art — either within or outside the department.

In the junior year, students enroll in World Arts and Cultures 185 where they propose the final path of study for the senior year. World arts and cultures concentration students propose a senior honors project, or equivalent coursework, with faculty approval. Dance concentration students propose their senior-year course plan and have the option to propose a senior honors project (10 additional units). Students are guided in their proposals by the instructor and in consultation with their faculty mentors.

The dance concentration is grounded in contemporary choreography and offers courses in a range of idioms from throughout the world, including special emphasis on dance composition. Opportunities for performance, production, videography, and movement studies are augmented by courses in the study of the body and of bodily identity from historical and cultural perspectives, dance theory, and dance in the public sphere, including arts pedagogy and civic engagement. Multimedia forms of expression integrating music, theater, visual arts, film, and other technologies along with hybrid forms of cultural expression utilizing both emerging and classically based vocabularies are encouraged.

The world arts and cultures concentration emphasizes cultural studies through visual and performance arts, arts activism, and the dynamics of creativity in global perspective. Courses combine theory and practice and are grounded in diverse cultural artistic expressions, with topics including art as moral action, ethnography as colonialism, arts-based AIDS interruptions, body politics, documentary practice, theories of performance, curating cultures, space, and place, and indigenous spiritual traditions.

For both concentrations, students are encouraged to complement the required set of core and elective departmental courses with others offered across campus, such as courses from ethnic and area studies programs, and may organize their course of study in relation to particular interests or professional goals (e.g., international comparative studies, intercultural studies, education, area specializations such as Africa, Asia, or Latin America, minority discourse, gender or women's studies).

Students who wish to confer with the departmental affairs officer regarding program planning and major requirements should contact the undergraduate counselor at (310) 825-8537.

Admission

New students are admitted to the major for Fall Quarter only. All applicants are reviewed individually, based on submission of a written research paper, transcripts, two letters of recommendation, and two personal essays. These supplementary materials are requested from students in mid-December, after the general UC application is received and processed, and are due back in the department in January. For freshman applicants, college placement test scores are also considered. Students interested in the dance concentration must participate in a late January/early February audition. Specifics about the audition are included in the e-mail requesting the above-mentioned supplementary materials.

Current UCLA students who petition to change their major are required to meet with the student affairs officer prior to application. They are advised to take selected departmental courses before and during the term in which they apply to the program. They must have a minimum 2.0 overall grade-point average and no more than 90 quarter units at the time of application. Students may apply at the beginning of Spring Quarter for admission into the program the following Fall Quarter. Those interested in the dance concentration are expected to participate in an audition. All students are interviewed as part of the application process.

Dance Concentration

The dance concentration consists of 103 units of coursework.

Preparation for the Major

Required: Dance 16, 44, 45, 67A, 67B, World Arts and Cultures 1, 2, 70, 85.

The Major

Required: (1) World Arts and Cultures 185; (2) 4 units in production practices from Dance 169, 171, World Arts and Cultures 174A, 174B, or other department courses with faculty approval; (3) 9 units in topics in dance studies, including World Arts and Cultures 101 and 4 units from Dance C145 through 167, World Arts and Cultures C146 through C168, 199, or from outside the department with faculty approval; (4) creative inquiry/research — Dance 117A, 117B; (5) civic engagement — World Arts and Cultures 100A or 100B or 103 and 4 units from Dance 166, 167, World Arts and Cultures 100A, 100B, 103, 144, 177SL, or from outside the department with faculty approval; (6) 4 additional elective units from Dance 116, 117C, World Arts and Cultures C180, or upper divi-
sion courses listed above, or outside the department with faculty approval. Students also have the option to propose a senior honors project through World Arts and Cultures 186A and 186B.

Movement Arts/Dance Practices — Required: A total of 36 units from Dance 6 through 15, 56 through 65, C106A through C115, World Arts and Cultures 5, 55, 78, and 178, including a minimum of 6 units of advanced upper division coursework in any genre. Twenty units must be at the intermediate/advanced levels in two different genres; one genre must be modern/post-modern for a minimum of 6 units from Dance 65 or C115. No more than 8 units of World Arts and Cultures 78 or 178 may be applied toward the total 36-unit requirement.

World Arts and Cultures Concentration

The world arts and cultures concentration consists of 89 units of coursework.

Preparation for the Major

Required: World Arts and Cultures 1, 2, 20, 21, 70, 85; 8 units in world arts practice elective selected from Dance 6 through 16, 56 through 59, World Arts and Cultures 5, and 55 (4 units must be taken within the department; 4 units may be from outside the department); and one course from World Arts and Cultures 22, 24, 33, or 44.

The Major

Required: (1) World Arts and Cultures 100A or 100B, 101, 105, 185A, and 186B, or equivalent coursework with faculty approval; (2) 8 units in locating cultures in which students select a geographical/cultural focus from either inside or outside the department with faculty approval; (3) 4 units in arts/activism/community engagement selected from Dance 166, 167, World Arts and Cultures 103, M125A, M125B, M125C, 144, C168, or other courses with faculty approval; and (4) 20 units from one of three commitment areas — studies in culture and performance, interdisciplinary/intercultural creative work, or integrated studies — selected from approved course lists (see department counselor), in which all units must be taken within the department.

Senior Honors Project

World Arts and Cultures 186A and 186B lead to a senior honors project that has three possible areas of focus — performance, applied research, or studies in culture and performance: (1) the performance project is a creative project leading to the production and public performance of original or traditional work; (2) the applied research focus implies an application of knowledge in a hands-on situation and includes projects in and with the community or campus; and (3) the culture and performance focus involves students in independent ethnographic research in some aspect of the arts. This project is optional for the dance concentration. Students in the world arts and cultures concentration may choose to complete courses 186A and 186B, or two equivalent courses with faculty approval. All students wishing to complete a senior honors project must submit a proposal and receive faculty approval.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://www.gdnut.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of World Arts and Cultures offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Culture and Performance and a Master of Fine Arts (M.F.A.) degree in Dance.

Dance Lower Division Courses

6. Beginning World Arts Practices in Sub-Saharan Africa and Diaspora. (2) (Formerly numbered World Arts and Cultures 6.) Studio, three hours. Beginning-level study of world arts practices originating from sub-Saharan Africa and extending to cultures of African diaspora, including Brazil and Afro-Caribbean. Variable topics, such as dance of Guinea, Mali, and Senegal or Afro-Caribbean, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

7. Beginning World Arts Practices in Middle East/ North Africa and Diaspora. (2) (Formerly numbered World Arts and Cultures 7.) Studio, three hours. Beginning-level study of world arts practices originating from Middle East and North Africa. Variable topics, such as belly dancing or Israeli folk dance, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

8. Beginning World Arts Practices in Latin America and Diaspora. (2) (Formerly numbered World Arts and Cultures 8.) Studio, three hours. Beginning-level study of world arts practices originating from Latin America, including cultures of South and Central America. Variable topics, such as Argentine tango and Mexicolouric dancing, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

9. Beginning World Arts Practices in North America and Diaspora. (2) (Formerly numbered World Arts and Cultures 9.) Studio, three hours. Beginning-level study of world arts practices originating from North America, including U.S., Canada, and Native America. Variable topics, such as Native American dance, jazz, and jazz-tap, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

10. Beginning World Arts Practices in East Asia and Diaspora. (2) (Formerly numbered World Arts and Cultures 10.) Studio, three hours. Beginning-level study of world arts practices originating from East Asia, including China, Korea, and Japan. Variable topics, such as movement and music techniques of Beijing Opera, Korean shamanic movement practices, and Kabuki theater, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

11. Beginning World Arts Practices in South Asia and Diaspora. (2) (Formerly numbered World Arts and Cultures 11.) Studio, three hours. Beginning-level study of world arts practices originating from South Asia and extending to cultures of South Asian diaspora, including communities in England and West Africa. Variable topics, such as Bharata Natyam (classical dance of India), bhangra (diasporic social dance), and hatha yoga, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

12. Beginning World Arts Practices in Southeast Asia and Diaspora. (2) (Formerly numbered World Arts and Cultures 12.) Studio, three hours. Beginning-level study of world arts practices originating from Southeast Asia. Variable topics, such as Cambodian classical court dance, Indonesian kechak, or Balinese legong, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

13. Beginning World Arts Practices in Europe and Diaspora. (2) (Formerly numbered World Arts and Cultures 13.) Studio, three hours. Beginning-level study of world arts practices originating from Europe and extending to cultures of European diaspora, including U.S. Variable topics, such as flamenco, Balkan folk dances, and classical ballet, in cultural and historical context. May be repeated for credit without limitation. P/NP or letter grading.

14. Beginning Modern/Postmodern Dance. (2) (Formerly numbered World Arts and Cultures 14.) Lecture, three hours. Study of dance technique. Critical viewing, reading, and discussion of modern/postmodern dance artists’ work. May be repeated twice for credit. P/NP or letter grading.

15. Beginning Improvisation in Dance. (2) (Formerly numbered World Arts and Cultures 15.) Laboratory, four hours. Study of dance technique. Critical viewing, reading, and discussion of modern/postmodern dance artists’ work. May be repeated twice for credit. P/NP or letter grading.
and how various artists have worked with place in construction of new dances. Use of these analyses to assist in creative process for making new dances. P/NP or letter grading.

117B. Theories and Methods in Dance Composition IV: Impacts. (4) (Formerly numbered World Arts and Cultures 117B.) Seminar, two hours; studio; two hours. Enforced requisites: courses 16, 67A, 67B. Examination of relation of dance to its audience. Synthesis of analyses undertaken in previous courses to determine how dance moves their viewers. How do dances appeal to or address their audiences? How do dance vocabulary, sequencing, and location combine to create particular effects? Answers to these questions in relation to broad range of artistic approaches, acknowledging that dance-making occurs distinctively in different cultural contexts and different historical moments. Different approaches to dance-making are explored through use of range of locations for dances, including proscenium stages, theaters in round, parks, sidewalks, temples, and its relationship to other art forms. Lectures illustrated with demonstrations, films, and slides. P/NP or letter grading.

117C. Advanced Topics in Choreography. (4) (Formerly numbered World Arts and Cultures 117C) Lecture, four hours; studio, two hours; outside study, six hours. Enforced requisites: courses 16, 67A, 67B. Directed exploration in composition with focus on developing works that engage two or more disciplines, such as dance, music, visual art, performance art. Theoretical engagement with selected topics through lectures, readings, and discussions. May be repeated for credit without limitation. P/ NP or letter grading.

118. Advanced Interdisciplinary Composition. (4) (Formerly numbered World Arts and Cultures 118.) Lecture, four hours; studio, two hours. Enforced requisites: courses 67A, 67B. Directed exploration in composition with focus on works that engage techniques and practice in one or more cultures. Study of postcolonial theory through lectures, readings, and discussions. May be repeated for credit without limitation. P/NP or letter grading.

119. Advanced Intercultural Composition. (4) (Formerly numbered World Arts and Cultures 119.) Lecture, four hours; studio, two hours. Enforced requisites: courses 67A, 67B. Directing exploration in composition with focus on works that engage techniques and practice in one or more cultures. Study of postcolonial theory through lectures, readings, and discussions. May be repeated for credit without limitation. P/NP or letter grading.

121. Advanced Improvisation in Dance. (2) (Formerly numbered World Arts and Cultures 121.) Studio, four hours. Development of aesthetic perspective through use of imagery, sound, and other art. Concentration and execution. May be repeated twice. P/NP or letter grading.

117A. Theories and Methods in Dance Composition I: Languages. (4) (Formerly numbered World Arts and Cultures 117A.) Lecture, two hours; studio, two hours; outside study, eight hours. Enforced requisites: course 65. Studies in advanced modern/postmodern dance technique, with emphasis on performing skills. May be repeated for credit without limitation. Concurrently scheduled with course C415. P/NP or letter grading.

116. Advanced Improvisation in Dance. (2) (Formerly numbered World Arts and Cultures 116.) Studio, four hours. Development of aesthetic perspective through use of imagery, sound, and other art. Concentration and execution. May be repeated twice. P/NP or letter grading.

115. Advanced Modern/Postmodern Dance. (2) (Formerly numbered World Arts and Cultures 115.) Studio, six hours. Enforced requisites: course 65. Studies in advanced modern/postmodern dance technique, with emphasis on performing skills. May be repeated for credit without limitation. Concurrently scheduled with course C415. P/NP or letter grading.

114. Dance in Multicultural U.S. (4) (Formerly numbered World Arts and Cultures 114.) Lecture, two hours; discussion, one hour; laboratory, one hour. Enforced for juniors/seniors. Study of dance in U.S. culture and society. Class Study Topics to be offered in specific term. May be repeated for credit without limitation. Concurrently scheduled with course C222. P/NP or letter grading.
150. History of Dance in Culture and Performance. (4) (Formerly numbered World Arts and Cultures 150.) Lecture, two hours; discussion, one hour; laboratory, two hours. Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression. Focus on topics from traditional and recent research in world dance. P/NP or letter grading.

C152. History and Theory of Modern/Postmodern Dance. (4) (Formerly numbered World Arts and Cultures C152.) Lecture, four hours; studio, two hours; outside study, six hours. Introduction to key figures in creation of modern dance, with special attention to their theories and philosophies and tracing of radical shift to postmodern dance that occurred in mid-20th century. Contemporary developments, both historical and theoretical. Student projects involve choreography and writing. Concurrently scheduled with course C252. P/NP or letter grading.

M157. Rechoeographing Disability. (Formerly numbered World Arts and Cultures 157.) Same as Disability Studies M157.) Seminar, four hours. Through study of range of performance by, featuring, or about people who identify as disabled, reading and discussion of range of writing about experiences of disability and process of making work about disability by key artists and thinkers, introduction to concept of choreography as pedagogy and as a form of activism, in order to present and interpret movement and organization of bodies, as well as choreography as poetic form for expression of ideas, creative tool, or product. Viewing and discussion of works that emphasize movement through movement and dance-making. P/NP or letter grading.

158. Choreographing Gender. (4) (Formerly numbered World Arts and Cultures 158.) Lecture, three hours; laboratory, two hours. Designed for juniors and seniors. Analysis of aesthetic codes and theatrical choreographic approaches as they intersect with construction of gender in U.S., with close attention to race, class, and sexuality. P/NP or letter grading.

159. Movement Theories. (2) (Formerly numbered World Arts and Cultures 159.) Lecture, two hours; laboratory, two hours. Study of motor coordination patterns as related to expressive movement features for dance performance. Personalized attention and use of video to increase students' stylistic diversity. Development of movement efficiency for prevention of dance injuries. May be repeated twice. P/NP or letter grading.

160. Topics in Body Mechanics. (4) (Formerly numbered World Arts and Cultures 160.) Lecture, three hours; studio, one hour. Designed for juniors/seniors. Variable topics course with discussion of injury prevention, anatomy, and how the body functions. Advanced topics that have reached level of self-initiation of substantial creative works. Refinement and realistic self-evaluation; critical counsel by acknowledged choreographers. S/U or letter grading.

C161. Movement Observation and Analysis. (4) (Formerly numbered World Arts and Cultures 161.) Lecture, two hours; laboratory, two hours. Designed for juniors/seniors. Use of variable theoretical frameworks and techniques such as labananalysis to emphasize culturally defined processes of observing, analyzing, and describing human movement. P/NP or letter grading.

165. Foundations of Dance Education. (4) (Formerly numbered World Arts and Cultures 165.) Lecture, two hours; laboratory, three hours. Introduction to movement concepts, skills, and teaching principles for modern dance education. Supervised teaching practicum included. P/NP or letter grading.

166. Dance as Culture in Education. (4) (Formerly numbered World Arts and Cultures 166.) Lecture, two hours; laboratory, two hours. Theoretical and practical aspects of teaching dance, especially in higher education. P/NP or letter grading.

167. Creative Dance for Children. (4) (Formerly numbered World Arts and Cultures 167.) Lecture, three hours; laboratory, one hour. Introduction to movement education. Principles for teaching children's dance; emphasis on dance as creative medium of expression. P/NP or letter grading.

168. Repertory Tour Ensemble. (2 or 4) (Formerly numbered World Arts and Cultures 168.) Lecture, two hours; studio, four to six hours. Designed for World Arts and Cultures majors. Creation and presentation of performances in community, with special emphasis on problems of touring companies with variable repertoire. May be repeated once. P/NP or letter grading.

C171. Dance Production: Variable Topics. (4) (Formerly numbered World Arts and Cultures 171.) Lecture, four hours; laboratory, two hours. Foundational experience in range of dance production processes, including but not limited to lighting design, set design, costume design, and stage management. Practical training in area covered, combined with theoretical inquiry into practice and opportunities for students to reflect on their own work and that of others. Completion of production project required. May be repeated for maximum of 12 units. Concurrently scheduled with course C271. P/NP or letter grading.

182. Dance and Visual Media. (4) (Formerly numbered World Arts and Cultures 182.) Lecture, four hours. Examination of aesthetic differences between dance and the visual arts, analysis and exploration of new aesthetic trends. May be repeated twice. P/NP or letter grading.

C184. Production Arts Seminar. (4) (Formerly numbered World Arts and Cultures C184.) Seminar, four hours. Theory and practice of production administration for dance, emphasizing roles and responsibilities for producing public events in arts and academia. Topics include, but are not limited to, history and theories of producing, mission statements, budgeting, marketing, public relations, legal issues, and policies. Concurrently scheduled with course C243. P/NP or letter grading.

Graduate Courses

211A-211F. Advanced Choreography. (4 each) (Formerly numbered World Arts and Cultures 211A-211F.) Lecture, two hours; studio, two hours. Theoretical aspects of advanced choreography. Topics include, but are not limited to, historical and theoretical components. May be repeated once. P/NP or letter grading.

222. Music and Dance Collaborations. (4) (Formerly numbered World Arts and Cultures 222.) Studio, four hours. Opportunity for directors, choreographers, and composers to work together creating and developing material in their respective disciplines. Exploration of different forms and ways of approaching creative process of making dance and music, presenting material, and working as a composer and choreographer. S/U or letter grading.

252A-252B. Theories of Movement: Labananalysis. (4-6 each) (Formerly numbered World Arts and Cultures 252A-252B.) Lecture, two hours; laboratory, two hours. Theories of Laban movement analysis as means for analyzing and describing human movement. Use of Laban movement analysis to increase movement observation skills and theoretical understanding of role of movement in dance, nonverbal behavior, and cross-cultural dance studies. Focus on complex movement patterns and timing. S/U or letter grading.

230. Research Methods and Bibliography in Dance. (4) (Formerly numbered World Arts and Cultures 230.) Lecture, four hours. Survey of methods for scholarly analysis of dance materials using systems from social science, physical sciences, and humanities. S/U or letter grading.

C243. Production Arts Seminar. (4) (Formerly numbered World Arts and Cultures C243.) Seminar, four hours; studio, two hours. Laboratory, two hours. Advanced modern/postmodern dance technique, with emphasis on process and design. May be repeated for credit without limitation. Concurrently scheduled with course C171. S/U or letter grading.

C271. Dance Production: Variable Topics. (4) Lecture, four hours; laboratory, two hours. Foundational experience in range of dance production practices, including but not limited to lighting design, set design, costume design, and stage management. Practical training in area covered, combined with theoretical inquiry into practice and opportunities for students to reflect on their own work and that of others. Completion of production project required. May be repeated for maximum of 12 units. Concurrently scheduled with course C171. S/U or letter grading.

C409A. Advanced World Arts Practices in North America and Diaspora. (2) (Formerly numbered World Arts and Cultures C409A.) Studio, three hours; outside study, three hours. Advanced-level study of world arts practices originating from North America, including U.S., Canada, and Native America. Variable topics such as Native American dance, jazz, and jazz-tap, in cultural and historical context. May be repeated for credit without limitation. Concurrently scheduled with course C109A. S/U or letter grading.

C413A. Advanced World Arts Practices in Europe and Diaspora. (2) (Formerly numbered World Arts and Cultures C413A.) Studio, three hours; outside study, three hours. Advanced-level study of world arts practices originating from Europe and Diaspora. Variable topics such as flamenco, Balkan folk dances, and classical ballet, in cultural and historical context. May be repeated for credit without limitation. Concurrently scheduled with course C113A. S/U or letter grading.

C415. Advanced Modern/Postmodern Dance. (2) (Formerly numbered World Arts and Cultures C415.) Studio, six hours. Requires: course C65, Study in advanced modern/postmodern dance technique, with emphasis on performance skills. May be repeated for credit without limitation. Concurrently scheduled with course C155. S/U or letter grading.

441. Dance Production Practicum. (2 to 4) (Formerly numbered World Arts and Cultures 441.) Laboratory, four to eight hours (one or two hours may be individualized consultation). Skills in understanding of production concepts in roles of stage manager, production assistant, and producer. May be repeated for maximum of 8 units. S/U grading.

452. Directed Field Study in Dance Education. (2 to 8) (Formerly numbered World Arts and Cultures 452.) Seminar, one hour; field study, two hours minimum. Directed field study to provide teaching experience in community school or other approved site. No more than 4 units may be applied toward M.A. degree requirements. S/U grading.

490. Projects in Choreography and Performance. (2 to 8) (Formerly numbered World Arts and Cultures 490.) Tutorial, one through four units per week minimum. Creation, casting, and rehearsing of culminating concert, reflecting professional achieve-
World Arts and Cultures
Lower Division Courses

1. Introduction to World Arts and Cultures. (5) Lecture, three hours; discussion, one hour. Survey of concepts and theories involved in intercultural, interdisciplinary study of art, aesthetics, and performance. Examination of interactions among various modes of creative expression, teamwork in daily life, and transformative representation of cultural identity and difference. May be repeated for credit. Letter grading.

2. Lower Division Seminar. (5) Formerly numbered 2AL Seminar, four hours; outside study, 11 hours. Variable topics seminar with focus on scholarly and practice-based research in arts. In-depth investigations of topics ranging from body in cultural context, interdisciplinary art-making, visual cultures, oral genres, material culture, study of culture and performance, including individual and cultural identity through arts, creation of dance/theatrical performance, theoretical and analytical approaches to arts practice, activism, and other topics pertaining to broad fields of culture, performance, and dance. Research inquiry methods may include readings, assigned written analysis, supervised fieldwork, individual and collaborative assignments, and practice-oriented processes. Substantial culminating project integrating theoretical and practical components of selected seminar topic required. May be repeated for credit. Letter grading.

5. Beginning Global and Transcultural Forms. (2) Studio, three hours. Beginning-level study of world arts practices crossing national and cultural boundaries. Variable topics, such as body music, cross-cultural textile creation, or mural painting, in cultural and historical context. May be repeated for credit without limit. P/NP or letter grading.

20. Culture: Introduction. (5) Lecture, four hours. Introduction to key concepts and major theoretical and methodological debates that characterize field of cultural studies, discussion of notions of culture, popular culture, subculture, youth culture, hegemony, gender, race, class, and national identity. Letter grading.

21. Introduction to Field-Based Research. (5) Lecture, three hours. Introduction to methods, techniques, and issues in conducting field-based research, including nature, uses, and limitations of major data-gathering procedures, ethical concerns, sampling, checks and controls, and limitations, and results not only tangible and impartial outcomes of inquiry but also personal and tangible. Through readings, discussion, exams, and fieldwork, students learn to plan fieldwork projects and write proposals, prepare consent forms and deal with ethical issues, observe behavior, construct questionnaires, interview, use audiovisual documentation, and manage and present data. P/NP or letter grading.

22. Introduction to American Folklore Studies. (5) Lecture, four hours; discussion, one hour; outside study, 10 hours. Survey of various forms of folklore and approaches to their identification, description, and analysis, including their historical and social significance. Introduction to ethnography of performance and for topics to be offered in specific term. May be repeated for credit without limit. P/NP or letter grading.

M23. Introduction to American Indian Studies. (5) Formerly numbered 2AL Seminar, four hours; outside study, 11 hours. Survey of selected Native North American cultures from pre-Western contact to contemporary period, with particular emphasis on early cultural diversity and its historical and social implications of epistemological differences between people. Examination of critical perspectives on social development, historical progress, and worldviews, including, but not limited to, limited to theoretical, performative, and cultural boundaries. Variable topics, such as body music, cross-cultural textile creation, or mural painting, in cultural and historical context. May be repeated for credit without limit. P/NP or letter grading.

78. Private Instruction in World Arts and Cultures. (1 to 4) For credit without limit. P/NP or letter grading.

201. Theories of Performance. (5) Lecture, three hours; discussion, one hour. Recent discussions of multiculturalism have demanded broader base of cultural literacy for society in general and three artists in particular. Consult beyond stereotyping and formalism, focus on areas of overlap and exchange, collaborations, collective creation, hybridization, and evolving possibilities of video and extended media. P/NP or letter grading.

101. Theories of Performance. (5) Lecture, four hours; studio, two hours. Requisite: course 85. Performance commonly refers to activities on proscenium stage, explosion of that narrow notion of performance by delving into scholarship from young field of performance studies, which draws on disciplines of anthropology, cultural studies, gender studies, linguistics, postcolonial theory, and sociology. Exploration of stutdio of concept of performing theory by creating interdisciplinary performance works that engage with and amplify theories studied. P/NP or letter grading.

120. Introduction to Folklore. (4) Lecture, four hours. Survey of various of folklore and approaches to their identification, description, and analysis, including their historical and social significance. Introduction to ethnography of performance and for topics to be offered in specific term. May be repeated for credit without limit. P/NP or letter grading.

M125A. Beyond Mexican Mural: Beginning Muralism and Community Development. (4) Same as Art 125A. Lecture, four hours; discussion, one hour. Study of cultural strategies of moral engagement, persuasion, and inquiry in personal and public life, including acts of conscience and civil disobedience. P/NP or letter grading.

103. Arts in Communities. (5) Lecture. Recent discussions of multiculturalism have demanded broader base of cultural literacy for society in general and three artists in particular. Consult beyond stereotyping and formalism, focus on areas of overlap and exchange, collaborations, collective creation, hybridization, and evolving possibilities of video and extended media. P/NP or letter grading.
M128. Chicana Art and Artists. (4) Lecture, four hours. Designed for seniors. Course concentration will be on selected material and cultural theory and with theoretical and methodologies utilized in their analysis. P/NP or letter grading.

132. Narrative and Oral Performance. (4) Lecture, four hours. Survey of concepts of text as text versus narratives as action as performing narrative. Narrators, how stories are composed in performance, interaction of narrator and audience, how place and experience become embodied in narratives, modes of representing oral narrating, and politics, stories and oral performance. P/NP or letter grading.

133. Textiles of World. (4) Lecture, four hours; discussion, one hour; laboratory, one hour. How cloth and clothing are made and worn in indigenous societies. Use of textiles from Fowler Museum collection to coordinate hands-on experience with cultural history. May be repeated twice for credit. P/NP or letter grading.

135. African Populism. (4) Lecture, three hours. Introduction to problems and issues in study of popular arts in sub-Saharan Africa. Lectures, readings, and audiovisual materials on broad spectrum of creative and popular visual and plastic arts, literature, performed genres such as music, poetry, theater, and dance, and everyday practices such as hair weaving, housepainting, personal adornment, and joke telling. P/NP or letter grading.

M136. Culture of Jazz Aesthetics. (4) Same as Anthropology M142R and Ethnomusicology M130C. Lecture, three hours. Required: course 20 or Anthropology 9 or 33 or Ethnomusicology 0 or 20B or 202. Aesthetics of jazz from point of view of musicians who shaped jazz as art form in 20th century. Listening to and interacting with professional jazz musicians who answer questions on jazz, interpretations. Analytical resources and historical knowledge of musicians and ethnomusicologists combined with those interested in jazz as cultural tradition. P/NP or letter grading.

CM140. Women Healers, Ritual, and Transformation. (4) Same as Women’s Studies CM143. Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Examination of role of women healers, historically and within contemporary culture-specific contexts. Exploration of psychological functions served by rites of passage and healing rituals and of role of arts in healing troubled communities. Concurrently scheduled with course CM240. P/NP or letter grading.

C141. Carnival and Festivity. (4) Lecture, three hours; fieldwork, one hour. Study of traditional calen- drical, religious, and local festivals and related events in their cultural and historical contexts, with emphasis on American festival occasions and their Old World antecedents. Topics include carnival and carnivalesque and politics of celebration. Concurrently scheduled with course CM240. P/NP or letter grading.

142. Myth, Magic, and Mind. (4) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Consideration of metaphor and symbol, reflex- ive anthropology, and notion of culture as text applied to such examples as trickster figures, rhetorical devices including parable and irony, and arguably magical experience of humans “shape-shifting” to become animals. Concurrently scheduled with course C242. P/NP or letter grading.

143A. Introduction to Museology: Museum Collections and Administration. (5) Lecture, six hours. Introduction to history and functions of museums, tracing development to present. Collection, organization, man- agement, and conservation of objects and legal and ethical issues surrounding these practices. P/NP or letter grading.

C143C. Introduction to Museology: Selected Topics. (4) Seminar, six hours; individual study, six hours. Stu- dents pursue individually designed projects, working with staff members and museum directors to produce papers on contemporary issues in museums. For example, one student might work under curator and help develop a permanent exhibition on such issues as they pertain to contemporary museums, following sug- gested reading list. P/NP or letter grading.

144. Make Art/Stop AIDS. (5) Lecture, four hours; studio, two hours. Can arts save lives? That is central question posed here in relation to global AIDS epidemic. Working in close connection with public health and epidemiology, exploration of arts as powerfully effect- ive tool in AIDS prevention and treatment efforts. Re- view of literature of AIDS crisis that emerged in late 1980s in U.S. and application of that literature to international hotspots such as India, Chi- na, South Africa, and Brazil. Collaborative theory-in- action seminar. P/NP or letter grading.

146. Politics of Performance. (4) Seminar, four hours; outside study, eight hours. Designed for juniors/ seniors. Opportunity to reflect on artists and intellectu- als as cultural workers operating in domains of idio- ty, aesthetics, and theory. Analysis of such keywords as ideology, aesthetics, theory, art, politics, interven- tion, intellectuals, and artists. Concurrently scheduled with course C246. P/NP or letter grading.

147. Dance and Healing. (4) Lecture, four hours. In- terdisciplinary, contemporary arts-based model of healing applicable to persons leading Western mod- ern lifestyles and coping with a variety of social is- sues during their lifetimes: (1) developmental transitions that are disruptive life-cycle changes that have poten- tial to promote self-regeneration or self-fragmentation and (2) external transitions that are situational cata- strophic events that evoke great terror and trigger fears of annihilation and chaos, but if successfully negotiat- ed, have potential to promote revitalized sense of self, greater compassion for others, and restored sense of trust and hope in humanity. Concurrently scheduled with course C247. P/NP or letter grading.

148. Dance as Healing and Therapy. (4) Lecture, two hours; laboratory, two hours; outside study, eight hours. Designed for juniors/seniors. Intro- duction to historical, theoretical, methodological, and ethical considerations involved in practice of dance as healing and therapy. Concurrently scheduled with course C248. Letter grading.

C155. Self and Culture. (4) Lecture, two hours; labo- ratory, two hours; outside study, eight hours. Designed for juniors/seniors. Examination of critical developmen- tal processes and situational factors contributing to construction of sense of self and emergence of creativ- ity and subjective relatedness in different cultural con- texts. Concurrently scheduled with course C255. P/NP or letter grading.

156. Frida Kahlo: Creation of Cultural Icon. (5) Lecture, four hours. Examination of life of renowned Mexican artist Frida Kahlo in light of (1) Mexico’s politi- cal, religious, and social history that gave rise to me- stiza and machismo, two social conditions that strongly influenced construction of her mestiza and gender identity, as well as her revolutionary political ideals, (2) debates that 20th-century Mexican living in par- triarchal societies had to confront, (3) way her signifi- cant attachment influenced her construction of sub- jective sense of self and kinds of artwork she pro- duced, and (4) the transcendent and the transcendent functions her self-portraits served in maintaining her emotional equilibrium, (5) conversion of Kahlo’s image after her death into cultural icon by culturally disenchanted groups, and (6) psychosocial conditions and process-
es that tend to promote creation of cultural icons. Concurrently scheduled with course C256. P/N or letter grading.

C164. Public Writing in Arts. (4) Lecture, four hours; outside study, eight hours. Survey of journalistic approaches to writing about arts, with eye toward shaping critique of public writing practices and putting that critique into practice. Emphasis on new modes of venue (and venues for) writing that rebalance power differential between art makers and commentators. Concurrently scheduled with course C264. P/N or letter grading.

C168. Writing and Academia: Making Art in Real World. (4) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Focus on understanding bureaucratic structures and regional histories conditioning creation of art in real world, including such practical issues as publicity and grant-writing. Concurrently scheduled with course C268. P/N or letter grading.

170. Advanced Production. (1) Laboratory, three hours; Requisite: course 70. Further development and application of technical and administrative support practices in producing events in world arts and cultures, including but not limited to theatrical support and planning and executing lecture series. May be repeated for credit without limitation. P/N grading.

C173. Sound Resources for Performance. (4) Lecture, three hours; studio, one hour; outside study, eight hours. Designed for juniors/seniors. Exploration of music in, in search of interesting, new, and unusual. Investigation of musical possibilities via record store, Internet, and music library; environmental sounds and patterns; body (clapping, stepping, and singing); and hardware store (found sound). Participants collaborate with fellow students in creative efforts and in presentations of research results. Concurrently scheduled with course C273. P/N or letter grading.

174A. Projects in World Arts and Cultures. (2) Laboratory, four hours. Individualized major projects in choreography, performance, cultural studies, production, and media. May be repeated for credit. P/N or letter grading.

174B. Projects in World Arts and Cultures. (4) Laboratory, six hours. Individualized major projects in choreography, performance, cultural studies, production, and media. May be repeated for credit. P/N or letter grading.

177SL. Taking Action: Arts Practice and Community Service. (4) Seminar, four hours; outside study, eight hours; eight hours, design and production of media. Application of training in world arts and cultures through service projects designed by students. Service projects include representations of body, body symbolism, emblem of identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and American diet. Concurrently scheduled with course C129. S/U or letter grading.

180. Video Production in Arts. (4) Lecture, one hour; laboratory, three hours. Fundamentals of video production: conceptualization, field recording (camera, lighting, sound, and editing); organizational, raw footage, constructing program, mastering finished tape). Emphasis alternates quarterly between ethnographic documentary and dance/choreography. May be repeated once for credit. Concurrently scheduled with course C280. Letter grading.

181. Ethnographic Film. (4) Lecture, four hours. Survey of ethnographic film and video, with focus on studies of ethnographic recording and analysis of social and cultural dynamics. May be repeated once for credit. Concurrently scheduled with course C280. Letter grading.

C183. Film and Folklore. (4) Lecture, three hours. Designed for juniors/seniors. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course C416. S/U or letter grading.

185. Junior-Year Proposal. (1) Lecture, 90 minutes; outside study, 90 minutes. Requisite: course 85. Limited to World Arts and Cultures majors. Planning and execution of proposal (either senior focus or senior honors thesis). Emphasis on dealing with curricular and exploring resources of department and University as whole. May be repeated once for credit. P/N grading.

186A-186B. Senior Honors Projects in World Arts and Cultures. (5-8) Lecture, four hours; outside study, 11 hours; internship. Course 186A is required. Course 186A is required. Course 186B is required. Limitless to senior World Arts and Cultures majors. Application of concepts and content from interdisciplinary major to individual projects. Methodologies may include critical, comparative, ethnographic, and performance approaches. Lecture/semester format with World Arts and Cultures faculty during first term; faculty-directed presentations of individual projects during second term. Letter grading.

195. Community or Corporate Internships in World Arts and Cultures. (2 to 4) Tutorial, six hours. Internship in supervised setting in community agency or business, exploring connections with community interest. May be repeated for credit. P/N or letter grading.

199. Directed Research in World Arts and Cultures. (2 to 4) Tutorial, two hours. Preparation: 3.0 grade-point average in major. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project report may be required. May be repeated for maximum of 8 units. Individual contract required. P/N or letter grading.

Graduate Courses

200. Theories of Culture. (4) Seminar, three hours; outside study, nine hours. Introduction to history of culture concept in arts, humanities, and social sciences. Analysis of contemporary debates concerning ownership and use of world “culture” and critical elucidation of study of culture. S/U or letter grading.

201. Theories of Performance. (4) Seminar, three hours; outside study, nine hours. Close reading and analysis of classic and contemporary studies of performance and related aesthetic practices. Familiarization with ways in which “performance” is defined and deployed by scholars working in disciplines of anthropology, dance, folklore, musicology, musical performance studies, philosophy, sociology, and theater. S/U or letter grading.

202. Research Methodologies. (4) Not same as course 202 prior to Fall Quarter 2009.) Seminar, three hours; outside study, nine hours. Survey of theoretical issues and problems in study of dance and body movement in cultural, social, and historical context. S/U or letter grading.

203. Proseminar: Dance Studies. (4) Seminar, three hours; outside study, nine hours. Survey of theoretical issues and problems in study of dance and body movement in cultural, social, and historical context. S/U or letter grading.

204. Theories of Corporeality. (4) Seminar, three hours; outside study, nine hours. Cross-cultural and interdisciplinary perspectives on human body. Topics include representations of body, body symbolism, embodiment of identity (including gender, race, ethnicity, and class), representation of body in religious and other contexts. S/U or letter grading.

205. Folklore Theories and Methods. (4) Lecture, three hours; outside study, nine hours. Introductory course in history, analytic perspectives, and current trends, including research techniques in contemporary folkloristics. S/U or letter grading.

206. Folklore Seminar. (4) Seminar, three hours; outside study, nine hours. Variable topics. Detailed consideration of particular folk genres, cultural area, historical period, and/or theoretical issue in field of folklore. May be repeated for credit. S/U or letter grading.

207. Ethnography of Performance. (4) (Formerly numbered 202.) Seminar, three hours; outside study, nine hours. Survey of methods and methodological issues in ethnographic study of performance in cultural context. Field documentation, participant observation, oral history and interview techniques, performative dimensions of ethnographic research, ethics, and politics of ethnographic representation. S/U or letter grading.

210. Ethnography of and as Colonialism. (4) Seminar, three hours. Beginning students reading on Indian human and ranging to contemporary scholarship about and by indigenous peoples, focus on intersection of writing, colonialism, violence, and historiography in Americas. Exploration of the relationship between 16th-century reasoning about race and postmillennial, Western, and academic practices of writing history. Development of critical stance on utility of postcolonial theories as such perspectives bear on anthropological and historical studies of indigenous religiosity. Regions include southwest Colombia, Orinoco Delta in Venezuela, Valley of Mexico, and several examples throughout U.S. southwest, plains, and northeast. S/U or letter grading.

216. Analyzing Narrative and Oral Performance. (5) Lecture, four hours. Designed for graduate students. Examination of ways that narrator and interpreting their styles and repertoires; how narrators conceptualize and perform narrative discourse, impact of audience and situated event on both narrating and story, how experiences and values are communicated through narrating, modes of representing oral narrating, and politics of narrative and oral performance. S/U or letter grading.

220. Seminar: Culture and Performance. (4) Seminar, three hours; outside study, nine hours. Designed for graduate students. Variable topics in interdisciplinary study of expressive culture, arts, and performance in social and historical context. May be repeated for credit without limitation. S/U or letter grading.

222. Arts of Identity: Survey of Expressive Cultures. (4) Lecture, four hours; outside study, eight hours. Introduction to study of arts, performance, and creativity in cultural context. Special attention to relationship between arts and identity and to role of artists in cultural survival and transformation. Concurrently scheduled with course C123. S/U or letter grading.

229. Food Customs and Symbolism. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Variable topics in interdiscipli- study of expressive culture, arts, and performance in social and historical context. May be repeated for credit without limitation. S/U or letter grading.

240. Women Healers, Ritual, and Transforma- tion. (4) (Same as Women’s Studies CM240.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Examination of role of women healers, practitioners, and community leaders in African-American and Caribbean. S/U or letter grading.

CM240. Women Healers, Ritual, and Transforma- tion. (4) (Same as Women’s Studies CM240.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Examination of role of women healers, practitioners, and community leaders in African-American and Caribbean. S/U or letter grading.
C247. Myth, Magic, and Mind. (4) Lecture, four hours; outside study, eight hours. Designed for gradu- 
ate students. Consideration of metaphor and symbol, reflexive anthropology, and notion of culture as text ap- 
pplled to understanding tricky figures, rhetorical devices including parable and irony, and arguably mag- 
ical experience of humans “shape-shifting” to become animals. Concurrently scheduled with course C142. S/ 
U or letter grading.

244. Folk Medicine. (4) Seminar, three hours; out- 
side study, nine hours. Exploration of fundamental con- 
cepts, analytical approaches, and recurrent questions in 
research on folk and traditional medicine, including 
categories and motivations of healers, varieties of ill- 
ness, and treatment modalities such as use of faith- 
and plant-based remedies, along with issues about persistence, efficacy, and development of culturally 
sensitive healthcare. S/U or letter grading.

245. Politics of Performance. (4) Seminar, four 
hours; outside study, eight hours. Designed for gradu- 
ate students. Opportunity to reflect on artists and intel- 
lectuals who are cultural workers operating in domains of 
paediology, aesthetics, and theory. Analysis of such key- 
words as ideology, aesthetics, theory, art, politics, in- 
tervention, intellectuals, and artists. Concurrently scheduled with course C146. S/U or letter grading.

247. Arts and Healing. (4) Lecture, four hours. Inter-
disciplinary, contemporary arts-based model of 
healing applicable to persons leading Western mod- 
ernist lifestyles and coping with two kinds of illness or 
critique of public writing practices and putting that 
outside study, eight hours. Survey of journalistic ap-
proaches to writing about arts, with eye toward shap-
ing of cultural icons. Consideration of such practical issues as publicity and grant-writing. 
Concurrently scheduled with course C168. S/U or let-
ter grading.

273. Sound Resources for Performance. (4) Lect-
ure, three hours; studio, one hour; outside study, eight 
hours. Designed for graduate students. Exploration of 
music, in search of new and unusual. In-
vestigation of musical possibilities via record store, 
internet, and music library; environmental sounds and 
patterns; body (clapping, stepping, and singing); and 
hardware store (found sound). Participants collaborate 
with fellow students in creative efforts and in presenta-
tions of research results. Concurrently scheduled with 
course C173. S/U or letter grading.

280. Video Production in Arts. (4) Lecture, one hour; 
laboratory, three hours. Fundamentals of video pro-
duction: conceptualization, field recording (camera, 
lighting, sound, coverage), and editing (organizing raw 
footage, constructing program, mastering finished 
tapes). Emphasis alternates quarterly between ethno-
graphic documentary and dance/choreography. May 
be repeated once for credit. Concurrently scheduled 
with course C180. Letter grading.

283. Film and Folklife. (4) Lecture, three hours. 
Designed for graduate students. Introduction to film, 
criticism and folklore methodology. Topics include early 
examples of folklore on film, changing conceptions of 
folklore and uses of films about folklore, and examples 
of films by, with, and for folklorists. Concurrently sched-
uled with course C183. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Semi-
nar, to be arranged. Preparation: apprentice personnel 
emphasized in teaching assistant, associate, or fellow. 
Teaching apprenticeship under active guidance and 
revision of regular faculty member responsible for 
curriculum and instruction at UCLA. May be repeated 
for credit. S/U grading.

400. Directed Professional Activities. (2 to 8) Lect-
ure, to be arranged. Directed projects in professional 
editing, bibliography, filmography, videography, confer-
ence and festival director, and other professional ac-
vities. May not be applied to M.A. degree re-
quirements. May be repeated. S/U grading.

451. Teaching Assistant Seminar. (2 Seminar, one 
hour; laboratory, three hours. Required of all World 
Arts Department teaching assistants. Lectures, discussion, readings, and practice teaching. 
May be repeated once for credit. S/U grading.

478. Advanced Private Instruction in World Arts 
and Cultures. (2 to 8) Studio, three to 12 hours; 
outside study, three to 12 hours. Private or semiprivate 
instruction with distinguished community-based artist to 
be arranged by students and approved by instructor. 
May be repeated for maximum of 24 units. S/U grad-
ing.

480. Seminar: Research Topics. (2 Seminar, two 
hours. Forum in which faculty, students, and visitors 
made presentations and obtained feedback on research 
being planned, in progress, or recently completed. Stu-
dents required to make one presentation each term 
they are enrolled for credit. May be repeated for maxi-
mum of 8 units. S/U grading.

495. Teacher Preparation in World Arts and 
Cultures. (2) Seminar, two hours. Directed work in prepa-
ration of course syllabi and discussion of topics rele-
ant to developing teaching skills. Fundamental princi-
pies and methodology for design course syllabi, and 
gather resources for courses. Topics include de-
velopment of teaching philosophy, evaluating/Selecting 
course content, teaching methodologies, assessment/ 
evaluation: grading practices, and consideration of 
practical, administrative, and ethical issues. Students 
meet with instructor to review their specific needs as 
they progress in development and elaboration of 
venues for writing that rebalance power differential be-
 tween art markers and commentators. Concurrently 
scheduled with course C164. S/U or letter grading.

596A. Directed Individual Study or Research. (2 to 
8) Tutorial, to be arranged. S/U or letter grading.

596R. Directed Study or Research in Hospital or 
Clinic. (2 to 8) Tutorial, to be arranged. S/U grading.

597. Preparation for Master’s Comprehensive Ex-
amination or Ph.D. Qualifying Examination. (2 to 
8) Tutorial, to be arranged. Preparation for M.A. or 
M.F.A. comprehensive examination or Ph.D. qualifying 
examination. S/U grading.

598. Research for and Preparation of Master’s The-

tesis. (2 to 8) Tutorial, to be arranged. Preparation for 

599. Research for and Preparation of Ph.D. Disser-
tation. (2 to 12) Tutorial, to be arranged. Preparation of 
research data and writing of Ph.D. dissertation. May 
be repeated for credit. S/U grading.

Jennifer Westbay, Ph.D.

Scope and Objectives

Students need to develop their proficiency as 
writers and communicators at every stage of 
their university careers and beyond. Writing 
Programs offers a series of courses introducing 
the varieties of university discourse and providing 
instruction in basic to high-level skills. Be-
sides courses that satisfy the University of Cali-
fornia Entry-Level Writing requirement and 
UCLA’s English as a Second Language, Writing 
I, and Writing II requirements, Writing Pro-
grams offers language support for international 
teaching assistants, as well as advanced
courses in writing across the curriculum and composition pedagogy.

Undergraduate Study
Entry-Level Writing

Every student who does not satisfy the Entry-Level Writing requirement by presenting transfer credit or acceptable test scores is required to take, as early as possible during the first year in residence, English Composition A, 2, or 2I (determined by performance on the Analytical Writing Placement Examination). For more information regarding Entry-Level Writing, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

English as a Second Language
Lower Division Courses

32. Conversation and Interaction for Academic Purposes. (4) Lecture, four hours. Development of oral skills that prepare nonnative speakers of English to improve critical listening skills, participate in class discussions, make oral presentations before audiences, ask and answer questions, participate in English conversations with members of academic community, and improve through self-evaluation of speech. P/NP (undergraduates), SU (graduates), or letter grading.

33A. Intermediate English for Academic Purposes. (4) Lecture, 10 hours. Requisite: course 33B (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on reading comprehension, vocabulary development, and composition techniques, with additional work on structure and oral skills. To satisfy English as a Second Language requirement, students must select letter grading. P/NP (undergraduates), SU (graduates), or letter grading.

33B. Intermediate English for Academic Purposes. (4) Lecture, five hours. Requisite: course 33A (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on reading comprehension, vocabulary development, and composition techniques, with additional work on structure and oral skills. To satisfy English as a Second Language requirement, students must select letter grading. P/NP (undergraduates), SU (graduates), or letter grading.

33C. Advanced English for Academic Purposes. (4) Lecture, five hours. Requisite: course 33B (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on academic reading, writing, study skills, and lecture comprehension. To satisfy English as a Second Language requirement, students must select letter grading. P/NP (undergraduates), SU (graduates), or letter grading.

33G. Advanced English for Academic Purposes for Graduate Students. (4) Lecture, five hours. Requisite: course 33B (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Designed to improve academic skills of advanced ESL graduate students, using authentic graduate-level materials. Emphasis on academic reading, writing, study skills, and lecture comprehension. To satisfy English as a Second Language requirement, students must select letter grading. P/NP (undergraduates), SU (graduates), or letter grading.

34. Public Speaking for Academic Purposes. (4) Lecture, four hours. Requisite: course 33B or proficiency demonstrated on English as a Second Language Placement Examination. Designed to help nonnative speakers of English communicate effectively in academic and professional settings. Development of oral skills that prepare nonnative speakers of English to present ideas extemporaneously, lead class discussions and making presentations. Grammar incorporated as needed, especially in regard to writing. SU or letter grading.

35. Approaches to University Writing for ESL Students. (5) Lecture, four hours. Requisite: course 33C (C or better) or proficiency demonstrated on English as a Second Language Placement Examination and/or Analytical Writing Placement Examination. Composition skills for ESL students, with focus on writing pro...
97A. Variable Topics in English as a Second Language. (4) Lecture, four hours, Specialized topics in English as a Second Language for academic purposes. Emphasis varies according to topics covered and/or audience to whom course is directed. May be repeated for credit with topic change. Offered in summer only. P/NP (undergraduates), S/U (graduates), or letter grading.

97B. Variable Topics in English as a Second Language. (2) Lecture, two hours. Enforced requisite: course 33B or proficiency demonstrated on English as a Second Language Placement Examination. Specialized topics in English as second language for academic purposes. Emphasis varies according to topics covered and/or audience to whom course is directed. May be repeated for credit with topic change. Offered in summer only. P/NP (undergraduates), S/U (graduates), or letter grading.

Upper Division Courses

101. Introduction to Language Learning and Language Teaching. (4) Lecture, four hours. Enforced corequisite: Applied Linguistics 101. Designed to provide students whose first language is not English with language support in areas of academic reading, writing, listening, and speaking. Exploration of skills and conditions involved in successful second and foreign language learning; application of this knowledge in development of framework for teaching second and foreign languages. P/NP or letter grading.

106. Advanced Composition for ESL Students. (4) Lecture, four hours. Requisites: course 36 (C or better) or proficiency demonstrated on English as a Second Language Placement Examination, and appropriate Composition Placement Test score. Focus on production of fully developed, stylistically sophisticated expository and argumentative essays based on complex academic reading. Additional emphasis on grammatical structure and style. P/NP (undergraduates), S/U (graduates), or letter grading.

107. Academic Reading and Vocabulary. (4) Lecture, review hours. Requisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Instruction in and practice of academic reading skills using authentic university texts. Focus on improving reading rate and comprehension, expanding academic vocabulary, and developing critical reading skills. P/NP (undergraduates), S/U (graduates), or letter grading.

108. Language and Literature. (4) Lecture, four hours. Requisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on literary works within cultural contexts to engage students in critical thinking and writing about issues important to academic inquiry and responsible citizenship. Minimum of 15 to 20 pages of revised text required. Satisfies Writing II requirement. Letter grading.

109. Literature, Culture, and Critical Inquiry. (5) Lecture, four hours. Enforced requisite: course 3 or 3H or English as a Second Language 36. Use of analysis of literary works within cultural context to engage students in critical thinking and writing about issues important to academic inquiry and responsible citizen- ship. Minimum of 15 to 20 pages of revised text required. Satisfies Writing II requirement. Letter grading.

110. Writing Adjunct. (4) Lecture, four hours. Requisites: satisfaction of Entry-Level Writing requirement, course 3 or 3H. Designed to help students develop skills in revision, editing, and critique of university-level writing. Closely interwoven in course offered in conjunction with course 110 (consult Schedule of Classes for courses so designated). Writing assignments use materials from adjunct Writing Programs courses that have information/research-related assignments. P/NP or letter grading.

120A. Language Study for Teachers: Elementary Secondary School. (4) Lecture, four hours. Requisite: satisfaction of Entry-Level Writing and English Composition requirements. Survey of topics in English linguistics of special interest to elementary school teachers. Subjects include approaches to English grammar, language acquisition and development; language attitudes; regional and social dialects of American English; bilingual schooling; contribution of English language study to teaching of writing, spelling, and literature. P/NP or letter grading.

123. Information Literacy and Research Skills. (1) Lecture, one hour. Preparation: satisfaction of Writing I requirement. Designed to help students become information literate, so they know how to identify, locate, critically evaluate, and use print and electronic information effectively and ethically. Closely interwoven in course offered in conjunction with Writing Programs courses that have information/research-related assignments. P/NP or letter grading.

129A-129D. Academic Writing in Disciplines. (5 each) Lecture, four hours. Enforced requisite: course 2. Letter grading. Each course designed for specific disciplines. Each course and reflect and develop analytic writing skills needed in that course. May be repeated for credit with consent of instructor. P/NP or letter grading.

Upper Division Courses

100W. Introduction to Academic Writing. (5) Lecture, four hours. Requisite: course 3 or 3H or English as a Second Language 36. Designed for sophomores/juniors/seniors. Course in academic writing suitable for both lower and upper division students that helps them develop coherent, well-developed, academic prose with range of complexity and length. Focus on conventions of academic prose and genres across disciplines. Written assignments include common forms of academic writing such as argument, research paper, and/or critical essay. Satisfies Writing II requirement. Letter grading.

115. Writing Workshop. (2) Lecture, five hours, Limited to high school juniors/seniors. First course in reading and writing university-level texts and framed written responses that employ range of rhetorical strategies from paraphrase to anal- ysis. Emphasis on revision, developing syntactic variety and academic vocabulary, and editing for grammar and style. Course of course with grade of C or better or demonstration of minimum competence on Analytical Writing Placement Examination is requisite to course 2. Letter grading.

2. Approaches to University Writing. (5) Lecture, four hours. Enforced requisite: course 2 or better or appropriate score on Analytical Writing Placement Examination. Second course in university-level discourse, with analysis and critique of university-level texts. Emphasis on revision for argumentation, coherence and effective style. Completion of course with grade of C or better satisfies Entry-Level Writing requirement. Letter grading.

2. Approaches to University Writing. (5) Lecture, six hours. Enforced requisite: appropriate scores on Analytical Writing Placement Examination and English as a Second Language Placement Examination. Second course in university-level discourse, with analysis and critique of university-level texts. Emphasis on strategies for developing coherent and well-argued pieces of academic writing and for achieving effective and clear style in academic prose. Completion of course with grade of C or better satisfies Entry-Level Writing and English as a Second Language requirements. Let- ter grading.

3. English Composition, Rhetoric, and Language. (5) Lecture, three hours. Enforced requisite: satisfac- tion of Entry-Level Writing requirement, course 2 or English as a Second Language 35 (C or better). Rhetorical and argumentative skills and transport of argumentative writing, analysis of varied of academic prose and writing of minimum of 20 pages of revised text. Completion of course with grade of C or better satisfies Writing I requirement. Letter grading.

3H. English Composition, Rhetoric, and Language (Honors). (5) Lecture, three hours. Enforced requi- sites: satisfaction of Entry-Level Writing requirement, course 2 or English as a Second Language 35 (C or better). Theoretical and historical approaches to skillful argument. Analysis of varieties of academic prose and writing of minimum of 20 pages of revised text. Completion of course with grade of C or better satisfies Writing I requirement. Letter grading.

5W. Literature, Culture, and Critical Inquiry. (5) Lecture, four hours. Enforced requisite: course 3 or 3H or English as a Second Language 36. Use of analysis of literary works within cultural context to engage students analyze authentic language as it is used in private and public contexts. Minimum of 15 to 20 pages of revised text required. Satisfies Writing II requirement. Letter grading.

6. Language, Culture, and Discipline. (5) Lecture, four hours. Enforced requisite: course 3 or 3H or English as a Second Language 36. Emphasis on rhetorical and literary structures, and use of English and how it reflects social structure and cultural values. Readings in linguistic analysis, lan- guage acquisition, sociolinguistics, and pragmatics provide foundation as students analyze authentic languages as it is used in private and public contexts. Minimum of 15 to 20 pages of revised text required. Satisfies Writing II requirement. Letter grading.

50. Writing Workshop. (2) Lecture, five hours, Limited to high school juniors/seniors. Introduction to demands of university-level writing and often untested conventions that govern it. Writing techniques developed to address specific writing tasks such as timed examination, applic- ation essay, effective e-mail, and college papers. Of- fered in summer only. P/NP or letter grading.

English Composition

Lower Division Courses

A. Introduction to University Discourse. (No cred- it) Lecture, five hours. Enforced requisite: appropriate score on Analytical Writing Placement Examination. Displaces 4 units on student’s Study List but yields no credit toward A. First course in reading university-level texts and framed written responses that employ range of rhetorical strategies from paraphrase to anal- ysis. Emphasis on revision, developing syntactic vari- ety and academic vocabulary, and editing for grammar and style. Course of course with grade of C or better or demonstration of minimum competence on Analytical Writing Placement Examination is requisite to course 2. Letter grading.

B. Academic Reading and Vocabulary. (4) Lecture, four hours, Specialized topics in English for academic purposes. Emphasis varies according to topics covered and/or audience to whom course is directed. May be repeated for credit with topic change. Offered in summer only. P/NP (undergraduates), S/U (graduates), or letter grading.
course may be taken independently for credit. P/NP or letter grading. 131A. Law and Politics; 131B. Business and Social Policy; 131C. Medicine and Public Health; 131D. Media and Communications.

132A-132D. Topics in Rhetoric and Writing. (4 each) Lecture, four hours; discussion, one hour. Requisite: satisfaction of Entry-Level Writing and English Composition requirements. Designed for juniors/seniors. Study of specific topics in relationship between rhetoric/writing and social or political history. Each course may be taken independently for credit. P/NP or letter grading. English majors who wish to use course to satisfy departmental requisites must take it for letter grade. 132A. Gender and Writing; 132B. Autobiographical Writing; 132C. Cultural Studies; 132D. Variable Topics.

136A-136B-136C. Practical Writing and Editing. (4-4-4) Lecture, three hours. Preparation: one course from 131 series. Requisites: satisfaction of Entry-Level Writing requirement, course 3. Sequence in practical writing and editing ability specifically designed to prepare students for careers. Analysis of prose and literary styles necessary to variety of writing in professional, nonacademic fields combined whenever possible with practical experience in variety of writing internships and training in wide range of editorial skills. In Progress (136A) and P/NP or letter (136B, 136C) grading.

195. Community or Corporate Internships in English Composition. (4) Tutorial, to be arranged. Requisites: course 3 or 3H, satisfaction of Writing II requirement. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

199. Directed Research or Senior Project in English Composition. (2 to 4) Tutorial, to be arranged. Requisite: course 3 or 3H. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

300. Teaching English. (4) Lecture, four hours. Requisite: satisfaction of Entry-Level Writing and English Composition requirements. Focus of theories of rhetoric, composition, reading, and literature as they apply to secondary school or college English curriculum. S/U or letter grading.

495A. Supervised Teaching Preparation. (2) Seminar, two hours. Requisite: course 495B. Required of all teaching assistants for Writing II courses not exempt by appropriate departmental or program training. Training and mentoring, with focus on composition pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in disciplinary contexts. Practical concerns of creating assignments, marking and grading essays, and conducting peer reviews and conferences. S/U grading.

495B. Supervised Teaching Preparation. (2) Seminar, two hours. Course 495A is not requisite to 495B. Required of all teaching assistants who are assigned to English Composition 3 courses. Focus on composition pedagogy, assessment of student writing, and specialized problems that may occur in teaching English Composition 3. S/U grading.

495C. Supervised Teaching Preparation. (2) Seminar, two hours. Requisite: course 495B. Required of all teaching assistants who are assigned to English Composition 3 courses. Focus on composition pedagogy, writing course design, assessment of student writing, and specialized problems that may occur in teaching English Composition 3. S/U grading.

495D. Supervised Teaching Preparation. (2) Seminar, two hours. Requisite: course 495A. Required of all teaching assistants for Writing II courses not exempt by appropriate departmental or program training. Training and mentoring, with focus on composition pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in disciplinary contexts. Practical concerns of creating assignments, marking and grading essays, and conducting peer reviews and conferences. S/U grading.

495E. Supervised Teaching Preparation. (2) Same as Engineering M495E.) Seminar, two hours. Requisite: course 495A. Required of all teaching assistants for Engineering writing courses not exempt by appropriate departmental or program training. Training and mentoring, with focus on composition pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in engineering writing contexts. Practical concerns of preparing students to write course assignments, marking and grading essays, and conducting peer reviews and conferences. S/U grading.

495F. Supervised Teaching Preparation. (2) (Same as Engineering M495F.) Seminar, one hour. Requisite: course M495E. Required of all teaching assistants in their initial term of teaching Engineering writing courses. Mentoring in group and individual meetings. Continued focus on composition pedagogy, assessment of student writing, guidance of revision process, and specialized writing problems that may occur in engineering writing contexts. Practical concerns of preparing students to write course assignments, marking and grading essays, and conducting peer reviews and conferences. S/U grading.
APPENDIX A:
REGULATIONS AND POLICIES

Nondiscrimination
The University of California, in accordance with applicable Federal and State Laws and University Policies, does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy (including pregnancy, childbirth, and medical conditions related to pregnancy and childbirth), physical or mental disability, medical condition (cancer-related or genetic characteristics), ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services (including membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services). The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Inquiries regarding the University’s student-related nondiscrimination policies may be directed to the UCLA Campus Counsel, 3149 Murphy Hall, Box 951405, Los Angeles, CA 90095-1405, (310) 825-4042.

Inquiries regarding nondiscrimination on the basis of disability covered by the Americans with Disabilities Act (ADA) of 1990 or Section 504 of the Rehabilitation Act of 1973 may be directed to Monroe Gorden, ADA and 504 Compliance, A233 Murphy Hall, UCLA, Box 951405, Los Angeles, CA 90095-1405, (310) 825-1514, (TTY) (310) 206-3349. See http://www.ada.ucla.edu.

Students may complain of any action which they believe discriminates against them on the ground of race, color, national origin, marital status, sex, sexual orientation, disability, or age and may contact the Office of the Dean of Students, 1206 Murphy Hall, or refer to Section 111.00 of the University of California Policies Applying to Campus Activities, Organizations, and Students (available in 1206 Murphy Hall or at http://www.ucop.edu/uucophage/coordrev/ucpolicies/aos/tooc.html) for further information and procedures.

Student Conduct Policies
Students are members of both society and the academic community with attendant rights and responsibilities. Students are expected to make themselves aware of and comply with the law, and with University and campus policies and regulations. While many of UCLA’s policies and regulations parallel federal, state, and local laws, UCLA’s standards may be set higher. The University of California Policies Applying to Campus Activities, Organizations, and Students (UC Policies) have been incorporated into the UCLA Student Conduct Code either by adapting or inserting verbatim the language of the policies. The complete University of California Policies Applying to Campus Activities, Organizations, and Students is available at http://www.ucop.edu/uucophage/coordrev/ucpolicies/aos/tooc.html. Students may contact the Office of the Dean of Students, Office of Ombuds Services, or Student Legal Services for advice concerning these policies.

A. Jurisdiction
The University has jurisdiction over student conduct that occurs on University property, or in connection with official University functions whether on or off University property. Although the University will not routinely invoke its disciplinary processes over student conduct that occurs off campus except in connection with an official University function, the University has discretion to exercise jurisdiction over conduct that occurs off campus and that would violate student conduct and discipline policies or regulations if the conduct had occurred on campus when (1) the alleged misconduct indicates the student poses a threat to the safety or security of any member(s) of the University community or (2) the alleged misconduct involves academic work or the forgery, alteration, or misuse of any University document, record, key, electronic device, or identification.

Specifically, the University may choose to exercise jurisdiction over off-campus incidents under alternative A.1 above where the alleged misconduct involves

a. Conduct that threatens the health or safety of any person, including oneself. This conduct includes, but is not limited to, physical assault, sexual assault, sexual misconduct, domestic violence, threats that cause a person reasonably to be in sustained fear for one’s own safety or the safety of her or his immediate family, incidents involving the use or display of a weapon likely to cause great bodily harm, and intoxication or impairment through the use of alcohol or controlled substances to the point one is unable to exercise care for one’s own safety
b. Stalking (as defined in Section 102.10 of the University of California Policies Applying to Campus Activities, Organizations, and Students)

C. Sexual Harassment

102.01: Academic Dishonesty. All forms of academic misconduct, including but not limited to cheating, fabrication, plagiarism, multiple submissions, or facilitating academic misconduct. For the purposes of the UCLA Student Conduct Code, the following definitions apply:

102.01a: Cheating. Cheating includes, but is not limited to, the use of unauthorized materials, information, or study aids in an academic exercise; the alteration of any answers on a graded document before submitting it for grading; or the failure to observe the expressed procedures or instructions of an academic exercise (e.g., examination instructions regarding alternate seating or conversation during an examination).

102.01b: Fabrication. Fabrication includes, but is not limited to, falsification or invention of any information or citation in an academic exercise.

102.01c: Plagiarism. Plagiarism includes, but is not limited to, the use of another’s words or ideas as if they were one’s own, including but not limited to representing, either with the intent to deceive or by the omission of the true source, part of or an entire work produced by someone other than the student, obtained by purchase or otherwise, as the student’s original work or representing the identifiable but altered ideas, data, or writing of another person as if those ideas, data, or writing were the student’s original work.
102.01d: Multiple Submissions. Multiple submissions includes, but is not limited to, the re-submission by a student of any work which has been previously submitted for credit in identical or similar form in one course to fulfill the requirements of a second course, without the informed permission/consent of the instructor of the second course; or the submission by a student of any work submitted for credit in identical or similar form in one course to fulfill the requirements of a concurrent course, without the permission/consent of the instructors of both courses.

102.01e: Facilitating Academic Dishonesty. Facilitating academic dishonesty includes, but is not limited to, knowingly helping another student commit an act of academic misconduct (e.g., cheating, fabrication, plagiarism, multiple submissions).

102.01f: Coercion Regarding Grading or submissions). A student commit an act of academic misconduct is defined as behavior that the student is caused or coerced to commit an act of misconduct (e.g., physical, psychological, or financial). Coercion includes, but is not limited to, threatening or intimidating the student or the student's family, or offering or threatening to offer rewards or benefits. Coercion also includes, but is not limited to, physical or psychological pressure to commit an act of misconduct or to influence the student's academic performance.

102.02: Other Forms of Dishonesty. Other forms of dishonesty include, but are not limited to, fabrication of information, knowingly furnishing false information or reporting a false emergency to the University.

102.03: Forgery. Forgery, alteration, or misuse of any University document, record, key, electronic device, or identification.

102.04: Theft. Theft of, conversion of, misappropriation of, or damage to or destruction of any property of the University or property of others while on University premises or at official University functions; or possession of any property when the student had knowledge or reasonable cause to have had knowledge that it was stolen.

102.05: Computer Misuse. Theft or abuse of University computers and other University electronic resources such as computer and electronic communications facilities, systems, and services. Uses include, but are not limited to, unauthorized entry, use, transfer, or tampering with the communications of others; interference with the work of others and with the operation of computer or electronic communications facilities, systems, and services. Abuses include, but are not limited to, unauthorized entry, use, transfer, or tampering with the communications of others; interference with the work of others and with the operation of computer or electronic communications facilities, systems, and services; or violations of copyright laws, whether by theft, unauthorized sharing, or other misuse of copyrighted materials such as songs, movies, software, photos, or text. Violation of the UCLA E-Mail Policy and Guidelines (available at http://www.admnpolicies.ucla.edu/app/Default.aspx?&id=455), of the University of California Electronic Communications Policy (available at www.ucop.edu/ucophome/policies/ec/), or of any other University acceptable or allowable use policy is also considered a violation of Section 102.05.

102.06: Unauthorized Use of University Resources or Name. Unauthorized entry to, possession of, receipt of, or use of any University services, equipment, resources, or properties, including the University's name, insignia, or seal.

102.07: Unauthorized Use of University Housing and Parking.

102.07a: University Housing. Violation of policies, regulations, or rules governing University-owned, -operated, or -leased housing facilities or other housing facilities located on University property.

102.07b: Parking. Violation of policies, regulations, or rules governing University parking services or University-owned or -operated parking facilities.

102.08: Conduct that Threatens Health or Safety. Conduct that threatens the health or safety of any person, including oneself. This includes, but is not limited to, physical assault, sexual assault, sexual misconduct, domestic violence, threats that cause a person reasonably to be in sustained fear for one's own safety or the safety of her or his immediate family, incidents involving the use or display of a weapon likely to cause great bodily harm, and intoxication or impairment through the use of alcohol or controlled substances to the point one is unable to exercise care for one's own safety.

Sexual Assault occurs when a person knowingly causes another person to engage in a sexual act by (a) physical force, violence, threat, intimidation, and/or coercion; (b) ignoring the objections of the other person; (c) causing the other's intoxication or impairment through the use of drugs or alcohol; or (d) taking advantage of the other person's incapacitation, state of intoxication, helplessness, or other inability to consent. Situations involving physical force, violence, threat, intimidation, and/or coercion fall under the definition of Sexual Assault.

Sexual Misconduct occurs when a person, having failed to take appropriate steps to gain effective consent, engages in a sexual act with another under the unreasonable belief that effective consent had been obtained. NOTE: For the purpose of this regulation, the following apply:

1. "Effective consent" referenced in the terms above means words or actions that show a voluntary agreement to engage in a mutually agreed-upon sexual activity.

2. "Sexual act" referenced in the terms above includes, but is not limited to, sexual intercourse, sodomy, oral-genital contact, or sexual penetration with a foreign object (including a finger), the touching of a person's intimate parts (defined as genitalia, groin, breast, or buttocks, or clothing covering them), or compelling a person to touch her or his own or another person's intimate parts without effective consent.

3. Intoxication of the accused will not diminish her or his responsibility for any violations of this section.

102.09: [Interim]. Sexual, racial, and other forms of harassment, defined as follows:

Harassment is defined as conduct that is so severe and/or pervasive, and objectively offensive, in that it so substantially impairs a person's access to University programs or activities, that the person is effectively denied equal access to the University's resources and opportunities on the basis of her or his race, color, national or ethnic origin, alien niche, sex, religion, age, sexual orientation, gender identity, marital status, veteran status, physical or mental disability, or perceived membership in any of these classifications.

Student Employees. When employed by the University of California, and acting within the course and scope of that employment, students are subject to the University of California Policy on Sexual Harassment. Otherwise, Section 102.09 above is the applicable standard for harassment by students.

For both student and/or employee sexual harassment, refer to the University of California Procedures for Responding to Reports of Sexual Harassment.

102.10: Stalking. Stalking behavior in which a student repeatedly engages in a course of conduct directed at another person and makes a credible threat with the intent to place that person in reasonable fear for her or his safety, or the safety of her or his family; where the threat is reasonably determined by the University to seriously alarm, torment, or terrorize the person; and where the threat is additionally determined by the University to serve no legitimate purpose.

102.11: [Deleted—See 102.09].

102.12: Hazing. Participation in hazing or any method of initiation or preinitiation into a campus organization or other activity engaged in by the organization or members of the organization at any time that causes, or is likely to cause, physical injury or personal degradation or disgrace resulting in psychological harm to any student or other person.

102.13: Obstruction or Disruption. Obstruction or disruption of teaching, research, administration, disciplinary procedures, or other University activities.

102.14: Disorderly Behavior. Engaging in disorderly or lewd conduct.

102.15: Disturbing the Peace. Participation in a disturbance of the peace or unlawful assembly.

102.16: Failure to Comply. Failure to identify oneself to, or comply with directions of, a University official or other public official acting in the performance of her or his duties while on University property or at official University functions, or resisting or obstructing such University or other public officials in the performance of or the attempt to perform their duties.

102.17: Controlled Substances. Unlawful manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of controlled substances, identified in Federal and State laws or regulations, or being unable to
exercise care for one’s own safety or the safety of others because one is under the influence of controlled substances. NOTE: This provision shall not apply to circumstances wherein the person under the influence was given a controlled substance without her or his knowledge and permission.  

102.18: Alcohol. Manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of alcohol which is unlawful or otherwise prohibited by, or not in compliance with, University policy or campus regulations, or being unable to exercise care for one’s own safety or the safety of others because one is under the influence of alcohol. NOTE: This provision shall not apply to circumstances wherein the person under the influence was given alcohol without her or his knowledge and permission.  

102.19: Destructive Devices. Possession, use, storage, or manufacture of explosives, firebombs, or other destructive devices.  

102.20: Weapons. Except as expressly permitted by law, possession, use, storage, or manufacture of a firearm or other weapon capable of causing bodily injury. Except as expressly permitted by University policy, possession, use, storage, or manufacture of replicas of firearms or other weapons.  

102.21: Violation of Disciplinary Conditions. Violation of the conditions contained in the terms of a disciplinary action imposed under the UCLA Student Conduct Code.  

102.22: Violation of Interim or Emergency Suspension Conditions. Violation of the conditions contained in a written Notice of Interim or Emergency Suspension issued pursuant to Section IV of the UCLA Student Conduct Code.  

102.23: Unauthorized Use or Sale of University Materials. Except as provided herein, no student shall give, sell, or otherwise distribute to others or publish any recording made during any course presentation without the written consent of the University and the instructor/presenter. This policy is applicable to any recording in any medium, including handwritten or typed notes. Any distribution of a recording of a course presentation at UCLA that captures the actual sounds and/or images of that course presentation, in any medium, must consider not only the rights of the instructor and the University, but also those of other parties. Examples include the privacy rights of students enrolled in the course, the rights of guest lecturers, and the copyright interests in materials authored by others that are displayed or presented during the course presentation. In addition to the consent of the University and the instructor/presenter, it may be necessary to secure permission from these other parties before any recording, distribution, publication, or communication is legally permitted.  

102.23a: Selling Course Notes. Selling, preparing, or distributing for any commercial purpose course lecture notes or video or audio recordings of any course unless authorized by the University in advance and explicitly permitted by the course instructor in writing. The unauthorized sale or commercial distribution of course notes or recordings by a student is a violation of the UCLA Student Conduct Code whether or not it was the student or someone else who prepared the notes or recordings. This policy is applicable to any recording in any medium, including handwritten or typed notes.  

102.23b: Copying Course Notes. Copying for any commercial purpose handouts, readers, or other course materials provided by an instructor as part of a University of California course unless authorized by the University in advance and explicitly permitted by the course instructor or the copyright holder in writing (if the instructor is not the copyright holder). Students currently enrolled in a course may provide a copy of their own notes or recordings to other currently enrolled students for noncommercial purposes reasonably arising from participation in the course, including individual or group study.  

102.23c: Commencement Tickets. Selling commencement tickets.  

102.24: University Properties. Organizing or carrying out unlawful activity on University properties.  

102.25: Violations of Law. Violation of Federal, State, or local laws.  

Sexual Assault and Sexual Misconduct  
UCLA does not tolerate sexual assault or sexual misconduct. Where there is probable cause to believe a student has committed a sexual assault or has engaged in sexual misconduct, disciplinary action will be pursued. Sanctions may include dismissal from the University.  

If a Person Has Been Sexually Assaulted  
Those who believe that they are the victims of sexual assault should  
1. Immediately call the police department. If possible, call the UCLA Police Department at (310) 825-1491 or 911  
2. Get medical attention. Campus police will provide transportation to the Santa Monica UCLA Medical Center Emergency Room for emergency medical treatment and evidence collection. A counselor from the Rape Treatment Center will be available at that time, free of charge  
Utilize campus and community support services:  
1. Contact a Campus Assault Resources and Education (CARE) counselor at Counseling and Psychological Services. CARE counselors have expertise in working with people who have been sexually assaulted. They can discuss options and alternatives, help identify the most appropriate support services, and provide information about medical care, psychological counseling, academic assistance, legal options, how to file a police report, and how to file a complaint through the Office of the Dean of Students. Counselors are available to assist any UCLA student regardless of where or when the assault occurred. For assistance, contact Counseling and Psychological Services at (310) 825-0768 or go to 221 Wooden Center West and ask to speak to a CARE counselor.  
2. Contact the Rape Treatment Center at Santa Monica UCLA Medical Center (310-319-4000) for free emergency medical treatment and counseling services. See http://www.911rape.org. Caring assistance is available for persons who have been subjected to sexual assault or sexual misconduct. They are encouraged in the strongest terms to make a report.  

Harassment  
Sexual Harassment  
The University of California is committed to creating and maintaining a community where all persons who participate in University programs and activities can work and learn together in an atmosphere free from all forms of harassment, exploitation, or intimidation. Every member of the University community should be aware that the University is strongly opposed to sexual harassment and that such behavior is prohibited both by law and by University policy. The University will respond promptly and effectively to reports of sexual harassment and will take appropriate action to prevent, correct and, if necessary, discipline behavior that violates this policy. See http://www.sexualharassment .ucla.edu.  
Definitions  
For detailed definitions of sexual harassment, refer to Section 102.09 of the UCLA Student Conduct Code listed above.  

Complaint Resolution  
Experience has demonstrated that many complaints of sexual harassment can be effectively resolved through informal intervention. Individuals who experience what they consider to be sexual harassment are advised to confront the alleged offender immediately and firmly. Additionally, an individual who believes that she or he has been sexually harassed may contact the Sexual Harassment Coordinator in 2241 Murphy Hall or a Sexual Harassment Information Center counselor for help and information regarding sexual harassment complaint resolution or grievance procedures at one of the locations listed below as determined by the complainant’s status at the University at the time of the alleged incident:  
1. Campus Human Resources/Employee and Labor Relations, Manager, 200 UCLA Wilshire Center, (310) 794-0860  
2. Campus Human Resources/Staff and Faculty Counseling Center, Coordinator, 380 UCLA Wilshire Center, (310) 794-0248
3. Center for Student Programming, Associate Director, 105 Kerckhoff Hall, (310) 206-8817
4. Chancellor's Office, Sexual Harassment Coordinator, 2241 Murphy Hall, (310) 206-3417
5. Counseling and Psychological Services, Director, 221 Wooden Center West, (310) 825-0768
6. David Geffen School of Medicine, Dean's Office, Special Projects Director, 12-138 Center for the Health Sciences, (310) 794-1958
7. Graduate Division, Office Manager, 1237 Murphy Hall, (310) 206-3269
8. Healthcare Human Resources, Employee Relations Manager, 400 UCLA Wilshire Center, (310) 794-0500
9. Lesbian Gay Bisexual Transgender Campus Resource Center, Director, B36 Student Activities Center, (310) 206-3628
10. Office of the Dean of Students, Assistant Dean of Students, 1206 Murphy Hall, (310) 825-3871
11. Office of Ombuds Services, 105 Strathmore Building, (310) 825-7627; 52-025 Center for the Health Sciences, (310) 206-2427
12. Office of Residential Life, Judicial Affairs Coordinator, 205 Bradley Hall, (310) 825-3401
13. Resnick Neuropsychiatric Hospital, Administration/Human Resources Associate Director, B7-370 Semel Institute, (310) 206-5258
14. School of Dentistry, Assistant Dean, Student Affairs, A0-111 Dentistry, (310) 825-2615
15. Student Legal Services, Director, A239 Murphy Hall, (310) 825-9894
16. UCLA Extension, Human Resources Director, 629 UNEX Building, (310) 825-4287; Student Services Director, 214 UNEX Building, (310) 825-2656

Other Forms of Harassment

The University strives to create an environment that fosters the values of mutual respect and tolerance and is free from discrimination based on race, ethnicity, sex, religion, sexual orientation, disability, age, and other personal characteristics. Certainly harassment, in its many forms, works against those values and often corrodes a person's sense of worth and interferes with one's ability to participate in University programs or activities. While the University is committed to the free exchange of ideas and the full protection of free expression, the University also recognizes that words can be used in such a way that they no longer express an idea, but rather injure and intimidate, thus undermining the ability of individuals to participate in the University community. The University of California Policies Applying to Campus Activities, Organizations, and Students (hereafter referred to as Policies; http://www.ucop.edu/ucophome/coordrev/ucpolicies/aos/toc.html) presently prohibit a variety of conduct by students which, in certain contexts, may be regarded as harassment or intimidation.

For example, harassing expression which is accompanied by physical abuse, threats of violence, or conduct that threatens the health or safety of any person on University property or in connection with official University functions may subject an offending student to University discipline under the provisions of Section 102.06 of the Policies.

Similarly, harassing conduct, including symbolic expression, which also involves conduct resulting in damage to or destruction of any property of the University or property of others while on University premises may subject an offending student to University discipline under the provisions of Section 102.04 of the Policies.

Further, under specific circumstances described in the Universitywide Student Conduct Harassment Policy (http://www.deansofstudents.ucla.edu), students may be subject to University discipline for misconduct which may consist solely of expression. Copies of this Policy are available in the Office of the Dean of Students, 1206 Murphy Hall, or in any of the Harassment Information Centers listed below:

1. Counseling and Psychological Services, 221 Wooden Center West, (310) 825-0768, http://www.counseling.ucla.edu
2. Dashew Center for International Students and Scholars, 106 Bradley Hall, (310) 825-1681, http://www.internationalcenter.ucla.edu

Complaint Resolution

One of the necessary measures in our efforts to assure an atmosphere of civility and mutual respect is the establishment of procedures which provide effective informal and formal mechanisms for those who believe that they have been victims of any of the above misconduct.

Many incidents of harassment and intimidation can be effectively resolved through informal means. For example, an individual may wish to confront the alleged offender immediately and firmly. An individual who chooses not to confront the alleged offender and who wishes help, advice, or information is urged to contact any of the Harassment Information Centers listed immediately above.

In addition to providing support for those who believe they have been victims of harassment, Harassment Information Centers offer persons the opportunity to learn about the phenomena of harassment and intimidation; to understand the formal and informal mechanisms by which misunderstandings may be corrected and, when appropriate, student perpetrators may be disciplined; and to consider which of the available options is the most useful for the particular circumstances.

With regard to the Universitywide Student Conduct Harassment Policy, complainants should be aware that not all conduct which is offensive may be regarded as a violation of this Policy and may, in fact, be protected expression. Thus, the application of formal institutional discipline to such protected expression may not be legally permissible. Nevertheless, the University is committed to reviewing any complaint of harassing or intimidating conduct by a student and intervening on behalf of the complainant to the extent possible.

Faculty Code of Conduct

The entire Faculty Code of Conduct can be found in the UCLA Faculty Handbook (copies are available in the Academic Personnel Office, 3109 Murphy Hall, and at http://www.apo.ucla.edu/facultyhandbook/9.htm). Part IIA of the Faculty Code of Conduct outlines faculty obligations to students and reads as follows:

Teaching and Students

Ethical Principles: “As teachers, the professors encourage the free pursuit of learning of their students. They hold before them the best scholarly standards of their discipline. Professors demonstrate respect for students as individuals and adhere to their proper roles as intellectual guides and counselors. Professors make every reasonable effort to foster honest academic conduct and to assure that their evaluations of students reflect each student’s true merit. They respect the confidential nature of the relationship between professor and student. They avoid any exploitation, harassment, or discriminatory treatment of students. They acknowledge significant academic and scholarly assistance from them. They protect their academic freedom.” (from 1966 AAUP statement, revised 1987)

Types of Unacceptable Conduct

Failure to meet the responsibilities of instruction, including (1) arbitrary denial of access to instruction, (2) significant intrusion of material unrelated to the course, (3) significant failure to adhere, without legitimate reason, to the rules of the faculty in the conduct of courses, to meet class, to keep office hours, or to hold examinations as scheduled, (4) evaluation of student work by criteria not directly reflective of course performance, (5) undue and unexcused delay in evaluating student work.

Discrimination, including harassment, against a student on political grounds or for reasons of race, religion, sex, sexual orientation, ethnic origin, national origin, ancestry, marital status, medical condition, status as a covered veteran
or, within the limits imposed by law or University regulations, because of age or citizenship or for other arbitrary or personal reasons.

Violation of University policy, including the pertinent guidelines, applying to nondiscrimination against students on the basis of disability.

Use of the position or powers of a faculty member to coerce the judgment or conscience of a student or to cause harm to a student for arbitrary or personal reasons.

Participating in or deliberately abetting disruption, interference, or intimidation in the classroom.

Entering into a romantic or sexual relationship with any student for whom a faculty member has, or should reasonably expect to have in the future, academic responsibility (instructional, evaluative, or supervisory).

Exercising academic responsibility (instructional, evaluative, or supervisory) for any student with whom a faculty member has a romantic or sexual relationship.

Charges of Violation

If a student has reason to believe that a faculty member has violated the Faculty Code of Conduct and that formal discipline may be warranted, the alleged violator should be reported to the chair of the department and to the dean of the division or school with a request that a charge be filed with the Academic Senate Charges Committee. If the dean, in consultation with the vice chancellor of Academic Personnel, determines that there are not sufficient grounds for the administration to file a charge, the student may, after discussing the matter with the Office of Ombuds Services and a member of the Academic Senate Grievance Advisory Committee, file such a charge in person if the student continues to feel it is warranted.

Residence for Tuition Purposes

Students who have not been living in California with intent to make it their permanent home for more than one year immediately before the residence determination date for each term in which they propose to attend the University must pay nonresident supplemental tuition in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Laws Governing Residence

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Order 110.2 of The Regents of the University of California (http://www.universityofcalifornia.edu/regents/bylaws/s01102.html). Under these rules adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors (see below).

Who Is a Resident?

Persons who are adult students (at least 18 years of age) may establish residence for tuition purposes in California if (1) they are U.S. citizens, (2) they are permanent residents or other immigrants, or (3) they are nonimmigrants who are not precluded from establishing a domicile in the U.S.

Nonimmigrants who are not precluded from establishing domicile in the U.S. include those who hold valid visas of the following types: A, E, G, H-1, H-4, I, K, L, O-1, O-3, R, T, U, or V. To establish residence students must be physically present in California for more than one year, and they must have come here with the intent to make California their home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of stay. Students must demonstrate their intention to make California their home by severing their residential ties with their former state of residence and establishing those ties with California. If these steps are delayed, the one-year durability period is extended until students have demonstrated both presence and intent for one full year. If their parents are not California residents, students are required to be financially independent in order to be a resident for tuition purposes. Their residence cannot be derived from their spouse, registered domestic partner, or their parents.

Requirements for Financial Independence

Students are considered financially independent if one or more of the following apply: (1) they are at least 24 years of age by December 31 of the calendar year for which they are requesting residence classification; (2) they are a veteran of the U.S. Armed Forces; (3) they are a ward of the court or both parents are deceased; (4) they have legal dependents other than a spouse; (5) they are married, have a registered domestic partner, or are a graduate student or a professional student, and they were not claimed as an income tax deduction by their parents or any other individual for the tax year immediately preceding the term for which they are requesting resident classification; or (6) they are a single undergraduate student and they were not claimed as an income tax deduction by their parents or any other individual for the tax year immediately preceding the term for which they are requesting resident classification; or (6) they are a single undergraduate student and they were not claimed as an income tax deduction by their parents or any other individual for the tax year immediately preceding the term for which they are requesting resident classification; and (7) they are a single undergraduate student and they were not claimed as an income tax deduction by their parents or any other individual for the tax year immediately preceding the term for which they are requesting resident classification.

Note: Financial dependence is not a factor in determining residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full time or awarded the equivalent in University-administered funds (e.g., grants, stipends, fellowships) in the term for which classification is sought.

Establishing Intent to Become a California Resident

Indications of students’ intent to make California their permanent residence can include the following: (1) registering to vote and voting in California elections, (2) designating California as their permanent address on all school and employment records, including military records if they are in the military service, (3) obtaining a California driver’s license or, if they do not drive, a California Identification Card, (4) obtaining California vehicle registration, (5) paying California income taxes as a resident, including taxes on income earned outside California from the date they establish residence, (6) establishing a California residence in which they keep their personal belongings, and (7) licensing for professional practice in California.

The absence of these indicia in other states during any period for which students claim residency can also serve as an indication of their intent. Documentary evidence is required, and all relevant indications are considered in determining the classification. Intent is questioned if students return to their prior state of residence when the University is not in session.

General Rules Applying to Minors

If students are unmarried minors (under age 18), the residence of the parent with whom they live is considered to be their residence. If they have a parent living, they cannot change their residence by their own act, by the appointment of a legal guardian, or by the relinquishment of their parent’s right of control. If students live with neither parent, their residence is that of the parent with whom they last lived. Unless they are minor aliens present in the U.S. under the terms of a nonimmigrant visa that precludes them from establishing a domicile in the U.S., students may establish their own residence when both their parents are deceased and a legal guardian has not been appointed. If they derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

Specific Rules Applying to Minors Divorced or Separated Parents

Minor U.S. citizens or eligible aliens may be able to derive California resident status from a California resident parent if they move to California to live with that parent on or before their 18th birthday. If they begin residing with their California parent after their 18th birthday, they are treated like any other adult student coming to California to establish residence.
Parent of Minor Moves from California

Students may be entitled to resident status if they are minor U.S. citizens or eligible aliens whose parent(s) was a resident of California who left the state within one year of the residence determination date if (1) they remained in California after their parent(s) departed, (2) they enroll in a California public postsecondary institution within one year of their parent(s) departure, and (3) once enrolled, they maintain continuous attendance in that institution. Financial independence is not required in this case.

Two-Year Care and Control

Minor students may be entitled to resident classification if, immediately prior to enrolling in a postsecondary institution, they have been living with and been under the continuous direct care and control of an adult or adults other than a parent for a period of no less than two years. The adult or adults having control must have been residents of California during the one year immediately prior to the residence determination date. The classification continues until students have attained the age of majority and have lived in the state the minimum time necessary to become a resident, so long as continuous full-time attendance is maintained at a postsecondary institution.

Self-Support

If students are U.S. citizens or eligible aliens and are minors who can prove that they lived in California for the entire year immediately before the residence determination date, they have been self-supporting for that year, and that they intend to make California their permanent home, they may be eligible for resident status.

Exemptions from Nonresident Supplemental Tuition

Member of the Military

Members of the U.S. military may be exempt from nonresident supplemental tuition unless their assignment to California is for the purpose of attending a state-supported institution of higher education. Graduate and professional students are eligible for this exemption for two years, during which time they must fulfill the UC residence requirements in order to maintain their resident status. They must provide the residence deputy on campus with a statement from their commanding officer or personnel officer stating that their assignment to active duty in California is for educational purposes. The letter must include the dates of their assignment to the state.

Undergraduate students discharged from military service after having been stationed in California on active duty for at least 366 days are entitled to resident classification for the minimum time necessary to establish residence (366 days). In this case, financial independence is not a requirement.

Some members of the U.S. military may qualify for an exemption from nonresident supplemental tuition based on the federal Higher Education Opportunity Act of 2008. Under this Act, undergraduate and graduate students who are members of the U.S. military on active duty for a period of more than 30 days and whose domicile or permanent duty station is in California, are entitled to an exemption from nonresident supplemental tuition. Students must be continuously enrolled at the University, notwithstanding a subsequent change in their permanent duty station to a location outside of California.

Suppose, Registered Domestic Partner, or Other Dependents of Military Personnel

Students are exempt from payment of nonresident supplemental tuition if they are a spouse, registered domestic partner, or natural or adopted child or stepchild who is a dependent of a member of the U.S. military stationed in California on active duty. Graduate and professional students are eligible for the exemption only until they have resided in the state the minimum time necessary to become a resident (366 days). Students must petition for a waiver of nonresident supplemental tuition each term they are eligible. If they are enrolled in an educational institution and the member of the military is transferred on military orders to a place outside California where he or she continues to serve in the Armed Forces, or the member of the military retires from active duty immediately after having served in California on active duty, they may retain this exemption under conditions listed above.

Some dependents of members of the U.S. military may qualify for an exemption from nonresident supplemental tuition based on the federal Higher Education Opportunity Act of 2008. Under this Act, undergraduate or graduate students who are the spouse, registered domestic partner, or dependent child of a member of the U.S. military on active duty for a period of more than 30 days and whose domicile or permanent duty station is in California, are entitled to an exemption from nonresident supplemental tuition. Students must be continuously enrolled at the University, notwithstanding a subsequent change in the U.S. military member's permanent duty station to a location outside of California.

Child, Spouse, or Registered Domestic Partner of Faculty Member

To the extent funds are available, if students are an unmarried dependent child under age 21, spouse, or registered domestic partner of a member of the University faculty who is a member of the Academic Senate, they may be eligible for a waiver of nonresident supplemental tuition. Confirmation of the faculty member's membership on the Academic Senate must be secured each term this waiver is granted.

Child, Spouse, or Registered Domestic Partner of University Employee

Students may be entitled to resident classification if they are an unmarried dependent child, spouse, or registered domestic partner of a full-time University employee whose assignment is outside California (e.g., Los Alamos Scientific Laboratory or University of California Washington, DC, Center). Their parent's, spouse's, or registered domestic partner's employment status with the University must be ascertained each term.

Child, Spouse, or Registered Domestic Partner of Deceased Public Law Enforcement or Fire Suppression Employee

Students may be entitled to a waiver of nonresident supplemental tuition if they are the child, spouse, or registered domestic partner of a deceased public law enforcement or fire suppression employee who was a California resident at the time of his or her death and who was killed in the course of fire suppression or law enforcement duties.

Dependent Child of a California Resident

If students have not been an adult resident of California for more than one year and are the natural or adopted dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date, they may be entitled to a waiver of nonresident supplemental tuition until they have resided in California the minimum time necessary to become a resident, so long as continuous attendance is maintained at an institution.

Native American Graduate of a Bureau of Indian Affairs High School

Students who are graduates of a California high school operated by the federal Bureau of Indian Affairs may be exempt from nonresident supplemental tuition.

Employee of a California Public School District

Students holding a valid credential authorizing service in the public schools of the State of California who are employed by a school district in a full-time certificate position may be exempt from nonresident supplemental tuition.

Student Athlete in Training at the U.S. Olympic Training Center, Chula Vista

Any amateur student athletes in training at the U.S. Olympic Training Center in Chula Vista may be exempt from nonresident supplemental tuition until they have resided in California the minimum time necessary to become a resident.

Graduate of a California High School

Students who attended high school in California for three or more years (9th grade included) and graduated from a California high school (or attained the equivalent) may be exempt from nonresident supplemental tuition. They are not eligible for the exemption if they are a nonimmigrant alien.

Surviving Dependents of California Residents Killed in the September 11, 2001, Terrorist Attacks

Students who are surviving dependents of California residents killed in the September 11, 2001, terrorist attacks may be exempt from nonresident supplemental tuition.
Appendix A: Regulations and Policies / 643

Petition for Residence Classification

Students may obtain a petition at 1113 Murphy Hall or at http://www.registrar.ucla.edu/forms/residencieclass.pdf for a change of classification from nonresident to resident status. All changes of status must be initiated at least three weeks in advance of the fee payment deadline for the applicable term.

Time Limitation on Providing Documentation

If additional documentation is required for residence classification but is not readily accessible, students are allowed until the end of the applicable term to provide it.

Incorrect Classification

Students who were incorrectly classified as residents are subject to nonresident classification and to payment of all nonresident tuition fees not paid. If they concealed information or furnished false information and were classified incorrectly as a result, they are also subject to University discipline. Resident students who become nonresidents must immediately notify the residence deputy.

Inquiries and Appeals

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, UCLA Office of the Registrar, 1113 Murphy Hall, Box 951429, Los Angeles, CA 90095-1429 (310-825-3447; http://www.registrar.ucla.edu/faq/residencefaq.htm)

Students are cautioned that this summary is NOT a complete explanation of the law regarding residence. Note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Students may appeal a campus nonresident determination to the Office of the General Counsel only on the grounds and within the deadline specified below.

Grounds for Appeal

1. The decision for classify the student as a nonresident for purposes of tuition was based on (a) a significant error of fact, (b) a significant procedural error, or (c) an incorrect application of policy that, if corrected, would require that the student be reclassified as a resident.

2. Significant new information became available after the date of the campus decision classifying the student as a nonresident; despite the exercise of reasonable diligence (care and attention) the information was not previously known or available to the student; and, based on the new information classification as a nonresident is incorrect.

No appeals based solely on disagreement with the campus decision are acceptable.

Financial Aid Standards for Satisfactory Academic Progress

The UCLA Financial Aid Office establishes Standards of Satisfactory Academic Progress to measure students’ progress toward degree completion using both qualitative and quantitative methods in accordance with federal regulations. To be eligible for financial aid, students must meet or exceed these standards. Failure to maintain these standards may result in suspension of financial aid eligibility. The standards are as strict or more strict than the UCLA standards for a student enrolled in the same educational program who is not receiving Title IV assistance. See the Guide to Satisfactory Academic Progress at http://www.fao.ucla.edu/publications.html.

Qualitative Standard

Undergraduate students must maintain a cumulative grade-point average (GPA) of 2.0; graduate students must maintain a cumulative grade-point average of 3.0.

Quantitative Standard

Students must complete a minimum of 67 percent of cumulative coursework attempted.

Maximum Timeframe

Units attempted may not exceed 150 percent of the published length of students’ programs.

Change of Major/Pursuit of Double Major/Minor

Students who have a change of academic major or pursue a double major or minor do not have additional financial aid eligibility beyond the maximum timeframe established in this policy.
Successful Completion of Units
To successfully complete units, students must receive a grade of A, B, C, D, or P (S for graduate students) in each course. Grades of F, I, NP (U for graduate students), NR (No Report), and DR (Deferred Report) do not count as successful completion of coursework attempted.

The Standards for Satisfactory Academic Progress apply to all coursework attempted, including coursework for which students did not receive financial aid.

Cancellations
Cancellation of registration on or before the first day of classes does not count as units attempted.

English as a Second Language, Remedial, and Summer Sessions Coursework
English as a Second Language (ESL), remedial, and Summer Sessions coursework counts as units attempted and toward the cumulative grade-point average.

Repeat Coursework
Repeated courses and grade-point average are treated in accordance with the University's academic policy as outlined in this catalog. If the Registrar's Office counts repeat coursework as attempted/completed, this counts equally for academic progress standards.

Transfer Coursework
Coursework accepted for transfer credit counts as both units attempted and completed and has no affect on grade-point average unless the coursework is transferred from another UC campus.

Withdrawals
Withdrawals after the first day of classes during a term count as units attempted unless students do not attend any classes for the given term and receive a 100 percent refund of all fees.

Evaluation
Academic progress is evaluated annually after Spring Quarter grades are available. For students on probation and for students who are required to follow an academic plan (see below), academic progress is evaluated each term.

Suspension
Students who fail to meet the Standards for Satisfactory Academic Progress are placed on suspension and are no longer eligible to receive financial aid. Suspended students are notified via MyFAO account.

Appeal Process
Students who have their financial aid suspended may submit a written appeal using the Satisfactory Academic Progress Appeal form. When filing an appeal, they must provide a full explanation along with documentation, verifying the circumstances that led to their inability to meet the Standards for Satisfactory Academic Progress. Before filing an appeal, students should seek assistance from an academic adviser to explore ways to eliminate deficiencies and to establish a realistic plan toward graduation. Refer to the Appeal Instruction Packet for specific examples of valid reasons for an appeal.

Appeal Deadline
Appeals must be submitted to the Financial Aid Office prior to the last day of the term for which students are appealing to have aid reinstated. Appeals are not considered retroactively. Refer to the Appeal Instruction Packet for priority deadlines.

Denied Appeals
If the appeal is denied, students may file a secondary appeal and submit additional information that may help explain the circumstances by which they were not able to maintain the Standards for Satisfactory Academic Progress. They are notified of the decision of the secondary appeal in writing; the decision is final.

Probation
Students who have an appeal approved are placed on probation and their academic progress monitored on a quarterly basis to ensure that they meet the conditions of their academic plan.

Reinstatement
Students who have had their aid eligibility suspended for failing to maintain the Standards for Satisfactory Academic Progress, or who have a denied satisfactory academic progress appeal, may regain financial aid eligibility by becoming compliant with the qualitative and quantitative components of the academic progress standards. Students who exceed the maximum timeframe cannot regain eligibility through the reinstatement process.

Academic Plans
If students are required to submit an academic plan as a condition of their approved appeal, their financial aid cannot be disbursed until the Financial Aid Office confirms that they are adhering to their academic plan. Students on an academic plan are evaluated each term. Their ability to adhere to the units and courses specified in their academic plan is closely monitored. Failure to adhere to their academic plan causes delays in their aid being disbursed and may result in suspension of their financial aid eligibility.

Professional Schools
Students attending the Schools of Dentistry, Law, Management, Medicine, and University Extension are covered by criteria established by the respective school.

Grading Regulations
Assigning a Grade
The instructor in charge of a course is responsible for determining the grade of each student in the course. The standards for evaluating student performance are based on the course description as approved by the appropriate course committee.

The final grade in the course is based on the instructor's evaluation of the student's achievement in the course. When on examination or other work submitted by a student, the student is suspected of having engaged in plagiarism or otherwise having cheated, the suspected infraction is to be reported to the appropriate administrative officer of the University for consideration of disciplinary proceedings against the student. Until such proceedings, if any, have been completed, the grade DR (Deferred Report) is assigned for that course. If, in such disciplinary proceedings, it is determined that the student did engage in plagiarism or otherwise cheat, the administrative officer, in addition to imposing discipline, reports back to the instructor of the course involved, the nature of the plagiarism or cheating. In light of that report, the instructor may replace the grade DR with a final grade that reflects an evaluation of that which may fairly be designated as the student's own achievement in the course as distinguished from any achievement that resulted from plagiarism or cheating.

Grade Complaints
A grade may be appealed, on any reasonable grounds, to the instructor, the chair of the department, and the dean of the division or school.

If the student believes that the instructor has violated the Faculty Code of Conduct by assigning the grade on any basis other than academic grounds, the matter should first be taken up with the instructor. If the matter is not resolved, the student may go for counsel to the Office of Ombuds Services or may follow the procedures for the formal filing of charges (see Faculty Code of Conduct earlier in the Appendix). If a charge is sustained by the Academic Senate Committees on Charges and on Privilege and Tenure, an ad hoc committee is appointed within two weeks to review the disputed grade, and any warranted change is made within four weeks.

Correction of Grades
All grades, except DR, I, and IP, are final when filed by the instructor in the end-of-term course report. However, the Registrar's Office is authorized to change a final grade (1) on written request of an instructor, provided that a clerical or procedural error is the reason for the change or (2) on written request of the chair of the UCLA Academic Senate in cases where it has been determined by the Committee on Privilege and Tenure that an instructor has assigned a grade on any basis other than academic grounds. No change of grade may be made on the basis of reexamination or, with the exception of the I and IP grades, the completion of additional work. Any grade change request made more than one year after the original filing must be validated for authenticity of the instructor's signature by the department chair. Any grade change request made by an instructor who has left the University must be countersigned by the department chair. No grade change may be
made once a student has graduated. All grade changes are recorded on the transcript.

Policy on Alternate Examination Dates

In compliance with Section 92640(a) of the California Education Code, the University must accommodate requests for alternate examination dates for any test or examination at a time when that activity would not violate a student’s religious creed. This requirement does not apply in the event that administering the test or examination at an alternate time would impose an undue hardship that could not reasonably be avoided. Accommodation for alternate examination dates are worked out directly and on an individual basis between the student and the faculty member involved.

In general, students should make such requests of the instructor during the first two weeks of any given academic term, or as soon as possible after a particular examination date is announced by the instructor.

Students unable to reach a satisfactory arrangement with their instructor should contact the Office of Ombuds Services, 105 Strausmore Building, or the Office of the Dean of Students, 1206 Murphy Hall, for assistance.

Instructors who have questions or who wish to verify the nature of the religious event or practice involved should contact the Office of Ombuds Services or the Office of the Dean of Students for assistance.

Undergraduate Final Examinations

No student shall be excused from assigned final examinations, except as provided above in the policy on alternate examination dates and as provided in the following three paragraphs.

The instructor in charge of an undergraduate course is responsible for assigning the final grade in the course. The final grade shall reflect the student’s achievement in the course and shall be based on adequate evaluation of that achievement. The instructor’s method of evaluation must be announced at the beginning of the course. The methods may include a final written examination, a term paper, a final oral examination, a take-home examination, or other evaluation device. Evaluation methods must be of reasonable duration and difficulty and must be in accord with applicable departmental policies. Final written examinations may not exceed three hours’ duration and are given only at the times and places established and published by the department chair and the Registrar’s Office.

At the end of the term in which a student is expected to be graduated, a student’s major department may examine him or her in the field of the major, may excuse the student from final examinations in courses offered by the department during that term and, with the approval of the Undergraduate Council, assign a credit value to such general examination.

An instructor shall, if he or she wishes, release to individual students their original final examinations (or copies). This may be done by any method that insures the students’ right to privacy. Otherwise, the instructor shall retain final examination materials, or a copy thereof, until the end of the next succeeding regular term of instruction, during which period students shall have access to their examinations.

Disclosure of Student Records

Pursuant to the Federal Family Educational Rights and Privacy Act (FERPA), the California Information Practices Act, and the University of California Policies Applying to the Disclosure of Information from Student Records, students at UCLA have the right to (1) inspect and review records pertaining to themselves in their capacity as students, except as the right may be waived or qualified under Federal and State Laws and University Policies, (2) have withheld from disclosure, absent their prior written consent for release, personally identifiable information from their student records, except as provided by Federal and State Laws and University Policies, (3) inspect records maintained by UCLA of disclosures of personally identifiable information from their student records, (4) seek correction of their student records through a request to amend the records or, if such request is denied, through a hearing, and (5) file complaints with the U.S. Department of Education regarding alleged violations of the rights accorded them by FERPA.

UCLA, in accordance with Federal and State Laws and University Policies, has designated the following categories of personally identifiable information as “public information” that UCLA may release and publish without the student’s prior consent: name, address (local/mail ing, permanent, and/or e-mail), telephone numbers, major field of study, dates of attendance, enrollment status, grade level, number of course units in which enrolled, degrees and honors received, the most recent previous educational institution attended, participation in officially recognized activities (including intercollegiate athletics), and the name, weight, and height of participants on intercollegiate athletic teams.

Students who do not wish certain items (i.e., name, local/mailing, permanent, and/or e-mail address, telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, and degrees and honors received) of this “public information” released and published may so indicate through URSRA (http://www.ursa.ucla.edu). To restrict the release and publication of the additional items in the category of “public information,” complete the UCLA FERPA Restriction Request form available from the Registrar’s Office, 1113 Murphy Hall.

Students who do not wish certain items (i.e., name, local/mailing, permanent, and/or e-mail address, telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, and degrees and honors received) of this “public information” released and published may so indicate through URSRA (http://www.ursa.ucla.edu). To restrict the release and publication of the additional items in the category of “public information,” complete the UCLA FERPA Restriction Request form available from the Registrar’s Office, 1113 Murphy Hall.

Students records that are the subject of Federal and State Laws and University Policies may be maintained in a variety of offices, including the Registrar’s Office, Office of the Dean of Students, UCLA Career Center, Graduate Division, UCLA External Affairs Department, and the offices of a student’s College or school and major department. Students are referred to the UCLA Telephone Directory (http://www.directory.ucla.edu) which lists all the offices that may maintain student records, together with their campus address and telephone number.

Students have the right to inspect their student records in any such office subject to the terms of Federal and State Laws and University Policies. Inspection of student records maintained by the Registrar’s Office is by appointment only and must be arranged three working days in advance. Call (310) 825-1091, option 6, or inquire at the Registrar’s Office, 1113 Murphy Hall.

A copy of the Federal and State Laws, University Policies, and the UCLA Telephone Directory may be inspected in the office of the Information Practices Coordinator, 500 UCLA Wilshire Center. Information concerning students’ hearing rights may be obtained from that office and from the Office of the Dean of Students, 1206 Murphy Hall.

Undergraduate Retention, Graduation, and Time to Degree

Retention and graduation rates are higher than ever before at UCLA and among the highest for public universities anywhere in the country.

The past three years, 97 percent of all students entering from high school and 94 percent of all students entering as transfers were still enrolled at UCLA one year later.

The past three years, the four-year, five-year, and six-year graduation rates for students entering from high school averaged 65, 87, and 89 percent respectively. Over 91 percent of all entering freshmen eventually graduate from UCLA.

The past three years, the two-year, three-year, and four-year graduation rates for entering transfer students have averaged 56, 86, and 90 percent respectively. Over 91 percent of all entering transfer students eventually graduate from UCLA.

Time to degree for UCLA undergraduates has declined significantly over the past decade. In 2009-10 approximately 4,500 baccalaureate degrees were awarded to students who entered directly from high school. The average number of quarters registered at UCLA was 12.1, down from an average of 13 quarters for similar graduates in 1999-00. Among recent graduates, 80 percent were registered for 12 quarters or less (i.e., four years or less), 87 percent for 13 quarters or less, 93 percent for 14 quarters or less, and 99 percent for 15 quarters or less (i.e., five years or less). In 2009-10 approximately 3,100 baccalaureate degrees were awarded to students who entered as transfers. The average number of quarters registered at UCLA was 6.7, down from an average of 7.5 quarters for similar graduates in 1999-00. Among recent gradu-
ates, 66 percent were registered for six quarters or less (i.e., two years or less), 76 percent for seven quarters or less, 84 percent for eight quarters or less, and 96 percent for nine quarters or less (i.e., three years or less).

Additional information is available at http://www.aim.ucla.edu/graduation/graduation.asp.

## Campus Security Information

### UCLA Police Department

The UCLA Police Department (UCPD), (310) 825-1491, http://www.ucpd.ucla.edu, is located at 601 Westwood Plaza. The sworn State of California Police Officers are empowered by the State of California with the authority to enforce all state and local laws. UCLA police officers patrol the campus 24 hours a day, 365 days a year. They enforce all applicable local, state, and federal laws, arrest violators, investigate and suppress crime, and provide a full range of police services and community safety programs.

The department is linked by computer to city, state, and federal criminal justice agencies that provide access to information concerning criminal records, wanted persons, stolen property, and vehicle identification. The Detective Bureau handles criminal investigations, and detectives conduct interviews, arrest violators, execute search warrants, and file cases with the Los Angeles District and City Attorney Offices.

### Incident Reporting

UCLA police officers have primary jurisdiction over the UCLA campus, Reagan UCLA Medical Center, Center for the Health Sciences, Santa Monica UCLA Medical Center and Orthopaedic Hospital, and University Apartments South. The City of Los Angeles Police Department does not handle calls for service on campus or on most UCLA properties. All requests for police service should be made to UCPD. All crime occurring on the campus, the Center for the Health Sciences, and other UCLA properties should be reported immediately to the department to ensure appropriate action is taken. Crimes occurring off campus should be reported immediately to the local law enforcement agency. UCPD does take reports from students, faculty, and staff for incidents occurring in the Westwood area.

Police, fire, or medical EMERGENCIES can be reported by dialing 911 from any telephone on campus. All landline telephones (University, private, public) located on University grounds are tied into the 911 emergency system. Emergencies can also be reported by using the blue-hooded or yellow Emergency Reporting Telephones located throughout the campus.

Campus community members are encouraged to program the department number (310-825-1491) into their cell phones. When on campus this number should be used in the event of an emergency to avoid the delay that may occur by the time it takes for the emergency cellular operators to transfer calls to the appropriate jurisdiction.

NONEMERGENCY calls for service can be made by contacting the department at (310) 825-1491.

### Crime Statistics and Reports

As required by the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, UCLA prepares an annual report describing campus security policy and information concerning alcohol and drug use, crime prevention, crime reporting, and related matters. It also includes three years of crime statistics. Printed copies are available by calling (310) 825-1491. The report can be accessed at http://map.ais.ucla.edu/go/1000958.

### Community Service Officers

UCPD employs approximately 80 student community service officers (CSOs; http://map.ais.ucla.edu/go/100050) who are the additional “eyes and ears” (trained observers) of the department and act as noninterventional visual deterrents to crime. CSOs wear high-visibility uniforms and carry two-way police radios. They are dispatched by the department’s Communications Center and provide a direct link to police, fire, and medical aid. CSOs provide security service to a number of campus buildings, including residence halls and libraries. They are most well-known for the Campus Escort Service and the Evening Van Service. The Campus Escort Service (http://map.ais.ucla.edu/go/1000806) operates every day of the year from dusk to 1 a.m. (2 a.m. on Thursdays during academic terms). Individuals requesting the service call the Communications Center at (310) 794-WALK; a CSO is then dispatched to walk them safely to their destination. The service is available to UCLA students, staff, faculty, and visitors and operates on campus and in the nearby residential areas. The Evening Van Service (http://map.ais.ucla.edu/go/1001008) provides a safe and convenient mode of transportation around campus at night (Monday through Thursday from 6 to 11 p.m. during academic terms) and is accessible to people with disabilities.

### Crime Prevention

An involved community is one of the best defenses against crime. Therefore, the department is committed to a community policing philosophy and supports a proactive Crime Prevention Unit (http://map.ais.ucla.edu/go/1001449) that works closely with community members to make UCLA a safer place to work, live, and learn. The unit gives presentations on vehicle and residential security, personal safety, office and equipment security, and sexual assault prevention. Other programs are developed to meet the special needs of the campus community. Brochures and literature on crime prevention and personal safety are available. Counseling and Psychological Services (CAPS) and the Crime Prevention Unit provide presentations on sexual assault issues. Topics include acquaintance rape education and prevention, personal safety and prevention techniques, recovery from sexual assault, clear communications, and the continuum of violence and rape in society. The educational programs, tailored to meet the needs of individual audiences, include films, discussion groups, lectures, role-plays, and communication exercises. CAPS reaches students through the residence halls, sororities, fraternities, athletic teams, student clubs, and various student functions. Services include crisis intervention and advocacy for victims of sexual assault; short-term counseling and referrals for survivors, their families, and friends; support groups for rape survivors; and self-defense classes and a lending library. CAPS works closely with the student housing offices and the police department to increase campus safety.

Several programs have been designed to increase the level of crime awareness and campus safety at UCLA. All incidents of criminal activity that pose a potential threat to the campus are brought immediately to the attention of the community through campus Crime Alert Bulletins (http://map.ais.ucla.edu/go/1001893). Additionally, those interested in receiving public safety bulletins and news briefs can sign up for the public safety list server at http://lists.ucla.edu/cgi-bin/mailman/listinfo/campus_safety-l.

### Emergency Medical Services

UCPD provides emergency medical assistance for the campus community through the Emergency Medical Service program, which is staffed by students certified as emergency medical technicians (EMTs). As in all emergencies, call 911 for this service.

### Alcohol and Substance Abuse Education

Students with alcohol or substance abuse problems create safety and health risks for themselves and others. Such abuses also can result in a wide range of emotional and behavioral problems. Therefore, UCLA makes available to every student a variety of alcohol and substance abuse awareness programs that are designed to discourage the use of illicit substances and to educate students on the merits of legal and responsible alcohol consumption. Counseling and Psychological Services (310-825-0768; http://www.counseling.ucla.edu) provides counseling and referral assistance to students who are troubled by alcohol or substance abuse problems. The service is completely confidential and free to regularly enrolled students. All information and counseling is treated in accordance with University Policies and State and Federal Laws. Any decision to seek assistance is not used in connection with any academic determination or as a basis for disciplinary proceedings.

### Policies

UCLA is designated as a drug-free environment and, only under certain conditions is alcohol consumption permitted (none is permitted at athletic events). In keeping with its educational mission, the University assumes the re-
sponsibility to better inform the UCLA community about alcohol and substance abuse. The sale, manufacture, distribution, or possession of any controlled substance without a prescription is illegal under both State and Federal Laws. Such laws are strictly enforced by UCLA police officers. Student violators are subject to University disciplinary action, criminal prosecution, fine, and imprisonment. Refer to the UCLA policies on substance abuse for further information.

The sale, consumption, and distribution of alcohol on the UCLA campus is restricted by the UCLA alcohol policy and California State Law. Organizations or groups violating alcohol or substance policies or laws may be subject to sanctions by the University.

Residential Housing
UCLA is the size of a small city and provides residential housing to approximately 11,000 students. Housing facilities range from apartments designed for students with children to multistudent apartment complexes to high-rise student residence halls. UCPD and student housing staff work hand in hand to create a safe and comfortable living and learning environment. Campuswide security and safety programs for residents are held throughout the year to increase crime potential awareness and improve campus safety. To keep residents immediately informed of major crime or threats to the campus, Crime Alert Bulletins are posted in residential areas by the housing staff. However, residents must take an active role to ensure their own safety by exercising simple commonsense crime prevention techniques. Because the campus is open 24 hours a day, visitation to residence halls and apartments is restricted. All residence halls have 24-hour access control on entrance doors, and during the evening hours access control monitors are stationed at each entrance. Police officers and CSOs are also assigned to the residence halls.

UCLA-affiliated organizations that maintain off-campus facilities are under the shared jurisdiction of their local police department and the UCLA Police Department, which provides assistance to students, faculty, and staff and/or referrals to neighboring police departments.

Safety Tips
The nature of the studies and research done at UCLA requires many of the campus buildings to be open 24 hours. Because the campus is so large and adjacent to the greater Los Angeles community, individuals with criminal intent are able to access the University grounds. Regardless of the time of day or night and no matter where persons are on campus, they should be alert and aware of their surroundings and exercise good commonsense safety precautions. Anyone parking on campus should remember to lock their vehicles and consider investing in a steering wheel locking device and/or alarm. Take advantage of all of the safety services provided by the University and UCPD.

Use the Campus Escort Service when walking at night. Keep room and apartment doors locked at all times. Most important, anyone needing assistance should not hesitate to contact the department.

APPENDIX B: UNIVERSITY ADMINISTRATIVE OFFICERS
Terms of Regents (http://www.universityofcalifornia.edu/regents/) appointed by the Governor expire March 1 of the year in parentheses. The Student Regent (Alfredo Mireles, Jr.) and Alumni Regents serve a one-year term beginning July 1 and ending June 30 of the year listed.

Regents Ex Officio
Governor of California
Edmund G. Brown, Jr.
Lieutenant Governor of California
Gavin C. Newsom
Speaker of the Assembly
John A. Pérez
State Superintendent of Public Instruction
Thomas A. Torlakson
President of the Alumni Associations of the University of California
Bruce Hallelt (2012)
President of the Alumni Associations of the University of California
Lori Pellecioni (2012)
President of the University
Mark G. Yudof

Appointed Regents
Richard C. Blum (2014)
David G. Crane (2022)
William De La Peña (2018)
Russell S. Gould (2017)
Eddie Island (2017)
Odessa P. Johnson (2012)
George D. Kieffer (2021)
Sherry L. Lansing (2022)
Monica C. Lozano (2013)
Hadi Makarechian (2020)
George M. Marcus (2012)
Norman J. Pattiz (2014)
Bonnie Reiss (2020)
Frederick R. Ruiz (2016)
Leslie Tang Schilling (2013)
Bruce D. Varner (2018)
Paul D. Wachter (2016)
Charlene Zettel (2021)
Alfredo Mireles, Jr., Student Regent (2012)

Faculty Representatives to the Board of Regents
Robert M. Anderson
Robert L. Powell

Staff Advisers to the Board of Regents
Penelope Herbert (2010-12)
Kevin Smith (2011-13)

Officers of The Regents
President of The Regents
Edmund G. Brown, Jr.
Chair of The Regents
Sherry L. Lansing
Vice Chair of The Regents
Bruce D. Varner
Chief Investment Officer and Acting Treasurer
Marie N. Berggren
General Counsel
Charles F. Robinson
Secretary and Chief of Staff
To be announced
Senior Vice President—Chief Compliance and Audit Officer
Sheryl Vacca

Office of the President
President of the University
Mark G. Yudof
Provost and Executive Vice President—Academic Affairs
Lawrence H. Pitts
Executive Vice President—Business Operations
Nathan Brostrom
Executive Vice President—Chief Financial Officer
Peter J. Taylor
Senior Vice President—External Relations and Vice President—Health Sciences and Services
John D. Stobo
Vice President—Budget and Capital Resources
Patrick J. Lenz
Vice President—Human Resources
Dwaine B. Buckett
Vice President—Investments
Marie N. Berggren
Vice President—Laboratory Management
Bruce B. Darling
Vice President—Legal Affairs
Charles F. Robinson
Vice President—Research and Graduate Studies
Steven V.W. Beckwith
Vice President—Student Affairs
Judy K. Sakaki

Chancellors of the Campuses
Chancellor at Berkeley
Robert J. Birgeneau
Chancellor at Davis
Linda P.B. Katehi
Chancellor at Irvine
Michael V. Drake
Chancellor at Los Angeles
Gene D. Block
Chancellor at Merced
Dorothy Leland
Chancellor at Riverside
Timothy P. White
Chancellor at San Diego
Marye Anne Fox
Chancellor at San Francisco
Susan Desmond-Hellmann
APPENDIX C: ENDOWED CHAIRS

Although UCLA is a public institution, private gifts are increasingly important in maintaining the quality of the University’s three missions of teaching, research, and community service. Among the principal forms of private support are endowed professorships or “chairs,” that support the educational and research activities of distinguished members of the faculty.

As this catalog goes to press, UCLA has 352 endowed chairs that have been approved by the Office of the President of the University of California.

See the complete list of endowed chairs at http://www.registrar.ucla.edu/catalog/UCLA EndowedChairs1112.pdf.

APPENDIX D: DISTINGUISHED TEACHING AWARDS

Academic Senate Recipients

Each year the UCLA Alumni Association presents Distinguished Teaching Awards to six Academic Senate faculty members. The highly prized awards are presented at the annual Andrea L. Rich Night to Honor Teaching, and selection of recipients is based on recommendations of the Academic Senate Committee on Teaching. Nominations are solicited from academic departments during Fall Quarter.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 were named the Luckman Distinguished Teaching Awards.

1961
John F. Barron (Economics)
Hector E. Hall (Physiology)
Kenneth N. Trueblood (Chemistry and Biochemistry)

1962
Charles W. Hoffman (Germanic Languages)
Thomas P. Jenkin (Political Science)
Ken Nobe (Chemical Engineering)

1963
Carl W. Hage (Germanic Languages)
Wendell P. Jones (Education)
Robert H. Sorgenfrey (Mathematics)
Saul Weinstein (Chemistry and Biochemistry)

1964
Mustafa A. El-Sayed (Chemistry and Biochemistry)
Leon Howard (English)
Moshe F. Rubinstein (Civil and Environmental Engineering)

1965
E.A. Carlson (Biology)
W.R. Hitchcock (History)
Allen Parmucci (Psychology)
William R. Romig (Microbiology and Molecular Genetics)

1966
George A. Bartholomew (Biology)
William P. Gerberding (Political Science)
Hans Meyerhoff (Philosophy)
Joseph E. Spencer (Geography)

1967
Basil Gordon (Mathematics)
J.A.C. Grant (Political Science)
William Matthews (English)
David S. Saxon (Physics and Astronomy)
E.K.L. Upton (Physics and Astronomy)

1968
Edward W. Graham (Chemistry and Biochemistry)
W. James Popham (Education)
Sydney C. Rittenberg (Microbiology and Molecular Genetics)
Robert P. Stockwell (Linguistics)
Fred N. White (Physiology)

1969
Robert J. Finkelstein (Physics and Astronomy)
Douglas S. Hobbs (Political Science)
J.E. Phillips (English)
Raymond M. Redheffer (Mathematics)
Margaret I. Sellers (Microbiology and Immunology)

1970
Ehrhard Bahr (Germanic Languages)
Joseph Cascarano (Biology)
B. Lamar Johnson (Education)
Daniel Kivelson (Chemistry and Biochemistry)
Richard D. Lehan (English)

1971
Vernon E. Denny (Chemical Engineering)
Peter N. Ladevede (Linguistics)
Arthur D. Schwabe (Medicine)
Duane E. Smith (Political Science)
Appendix D: Distinguished Teaching Awards / 649

Andreas Tietze (Near Eastern Languages and Cultures)

1972
Barbara K. Keogh (Education)
James N. Miller (Microbiology and Immunology)
David S. Rodes (English)
Ned A. Shearer (Speech)
Charles A. West (Chemistry and Biochemistry)

1973
Kirby A. Baker (Mathematics)
David Evans (Chemistry and Biochemistry)
Albert Hoxie (History)
Nhan Levan (Electrical Engineering)
Judith L. Smith (Physiological Science)

1974
Robert B. Edgerton (Anthropology, Psychiatry and Biobehavioral Sciences)
David S. Eisenberg (Chemistry and Biochemistry)
Victoria A. Kurkin (Linguistics)
Robert C. Neurhout (Pediatrics)
Andrea L. Rich (Speech)

1975
Alma M. Hawkins (World Arts and Cultures)
Morris Holland (Psychology)
Paul M. Schachter (Linguistics)
Stanley A. Wolpert (History)
Richard W. Young (Neurobiology)

1976
Marianne Celce-Murcia (Teaching English as a Second Language and Applied Linguistics)
Jesse J. Dukeminier (Law)
George R. Guffey (English)
Marilyn L. Kourilsky (Education)
Chand R. Viswanathan (Electrical Engineering)

1977
Michael J.B. Allen (English)
Henry M. Cherrick (Dentistry)
Richard C. Maxwell (Law)
J. William Schopf (Earth and Space Sciences)
Verne N. Schumaker (Chemistry and Biochemistry)

1978
William R. Allen (Economics)
Michael E. Jung (Chemistry and Biochemistry)
J. Fred Weston (Management)

Non-Academic Senate Recipients

In spring of 1985, the Office of Instructional Development began sponsorship of awards to three instructors who are not members of the Academic Senate. This category includes lecturers and adjunct and clinical faculty members. All non-Academic Senate faculty members who are nominated by their departments are eligible. Recipients are selected by the Academic Senate Committee on Teaching, utilizing the same criteria as that used for Academic Senate members.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 were named the Luckman Distinguished Teaching Awards.

Gold Shield Faculty Prize

The $30,000 Gold Shield Faculty Prize, an award for academic excellence, was created by the Gold Shield Alumnae of UCLA in celebration of their fiftieth anniversary in 1986. The prize is funded by an endowment of $250,000 raised by Gold Shield for this purpose, which has grown to over $450,000. Guidelines provide that the prize “recognize and reward UCLA faculty members who have demonstrated extraordinary accomplishment in teaching and in research or creative activity...and who have made a significant contribution to undergraduate education.” Preference for recipients is given to faculty members in mid-career who do not often receive the extra professional incentives available to distinguished senior faculty.

The Gold Shield Faculty Prize is awarded to each recipient for scholarly use. The awardee is selected every year by a committee of peers appointed by the Academic Senate. Student and Gold Shield representatives are included. Recipients must come from fields that have undergraduate programs at UCLA.

1986-88
Michael E. Jung (Chemistry and Biochemistry)
1988-90
Patricia M. Greenfield (Psychology)
1992-94
J. William Schopf (Earth and Space Sciences)
