### Fall Quarter 2014
- Quarter begins: September 29
- Instruction begins: October 2
- Veterans Day holiday: November 11
- Thanksgiving holiday: November 27–28
- Instruction ends: December 12
- Common final examinations: December 13–14
- Final examinations: December 15–19
- Quarter ends: December 19
- Christmas holiday: December 24–25
- New Year's holiday: December 31–January 1
- Winter campus closure (tentative): December 26, 29, 30, January 2

### Winter Quarter 2015
- Quarter begins: January 5
- Instruction begins: January 5
- Martin Luther King, Jr. holiday: January 19
- Presidents' Day holiday: February 16
- Instruction ends: March 13
- Common final examinations: March 14–15
- Final examinations: March 16–20
- Quarter ends: March 20

### Spring Quarter 2015
- Quarter begins: March 25
- César Chávez holiday: March 27
- Instruction begins: March 30
- Memorial Day holiday: May 25
- Instruction ends: June 5
- Common final examinations: June 6–7
- Final examinations: June 8–12
- Quarter ends: June 12
- Commencement ceremonies: June 12–14

### Fall Quarter 2015
- Quarter begins: September 21
- Instruction begins: September 24
- Veterans Day holiday: November 11
- Thanksgiving holiday: November 26–27
- Instruction ends: December 4
- Common final examinations: December 5–6
- Final examinations: December 7–11
- Quarter ends: December 11
- Christmas holiday: December 24–25
- New Year's holiday: December 31–January 1
- Winter campus closure (tentative): December 28–30

### Winter Quarter 2016
- Quarter begins: January 4
- Instruction begins: January 4
- Martin Luther King, Jr. holiday: January 15
- Presidents' Day holiday: February 18
- Instruction ends: March 11
- Common final examinations: March 12–13
- Final examinations: March 14–18
- Quarter ends: March 18
- Spring Quarter 2016
- Quarter begins: March 23
- César Chávez holiday: March 25
- Instruction begins: March 28
- Memorial Day holiday: May 30
- Instruction ends: June 3
- Common final examinations: June 4–5
- Final examinations: June 6–10
- Quarter ends: June 10
- Commencement ceremonies: June 10–12

### Online Publications
The UCLA General Catalog is available at [http://www.registrar.ucla.edu/catalog/](http://www.registrar.ucla.edu/catalog/). Links to updates of UCLA courses and curricula are available from the online Catalog main menu.

Consult the online Schedule of Classes for detailed information on registration and enrollment and for academic and administrative deadlines. The online Schedule at [http://www.registrar.ucla.edu/schedule/](http://www.registrar.ucla.edu/schedule/) has the most current information about fees, deadlines, and courses.

[http://www.registrar.ucla.edu](http://www.registrar.ucla.edu)
FROM THE CHANCELLOR
OF UCLA

This Catalog describes the almost endless academic choices available to you at UCLA. Choose from 5,000 courses each term, 128 undergraduate majors, 88 master’s programs, 110 doctoral and professional programs, and 89 minors as you build a course of study that suits your own interests and aspirations. The size and scope of our campus enables us to offer you a remarkable range of academic possibilities. At the same time, almost 70 percent of our undergraduate classes have fewer than 30 students so you can get to know your professors and classmates.

Your fellow students at UCLA come from incredibly diverse backgrounds. Those admitted to our freshman class for 2014-15 are from 50 states and 112 countries. But, like you, all of them are driven by an unwavering commitment to excellence and a determination to make a difference wherever they go.

Our faculty of more than 4,300 is made up of renowned scholars who are highly regarded as leaders in their fields. Undergraduates, as well as graduate students, have opportunities to study with top professors and conduct research under their guidance.

This Catalog includes opportunities for graduate and undergraduate students, including those that offer priority enrollment for lower division students. Among these are Fiat Lux Seminars, which are small classes in a broad range of subjects; Freshman Clusters, which engage students in yearlong, team-taught interdisciplinary study of timely topics; and advanced research opportunities.

Our campus is a vibrant community made up of forward-thinking achievers who think outside traditional academic boundaries and share an exuberant sense of possibility. The UCLA experience prepares leaders who go on to excel all over the world.

I invite you to explore UCLA beyond the contents of this catalog. Visit us on campus, or online at http://www.ucla.edu.

Gene D. Block
Chancellor

Graduate Concurrent and Articulated Degrees

CONCURRENT DEGREES

Inquiries about concurrent and articulated degree programs should be directed to graduate advisers in the departments and schools involved. Students should contact Graduate Admissions/Student and Academic Affairs for information on designing articulated programs.

ARTICULATED DEGREES

Articulated degree programs permit no credit overlap; students must complete degree requirements separately for each degree.

About UCLA

Few universities in the world offer the extraordinary range and diversity of academic programs that students enjoy at UCLA. Leadership in teaching, research, and public service make UCLA a beacon of excellence in higher education, as students, faculty members, and staff come together in a true community of scholars to advance knowledge, address societal challenges, and pursue intellectual and personal fulfillment.

TEACHING

The National Research Council Committee to Assess Research-Doctorate Programs evaluates the quality of the faculty in 212 American research universities approximately every 15 years. Of the 62 doctoral degree disciplines studied in the 2011 evaluation, 33 UCLA academic departments ranked among the top 10 in the country and 12 ranked among the top 20.

Distinguished faculty members at UCLA include Nobel prizewinners, Guggenheim fellows, Sloan fellows, and Fulbright scholars, as well as numerous members of the National Academy of Sciences and the American Academy of Arts and Sciences. In fact, UCLA consistently places among the leading universities nationwide in the number of these prestigious awards granted to its faculty members.

This remarkable pool of talent is shared between one college and 11 professional schools. The College of Letters and Science offers programs leading to both undergraduate and graduate degrees, as do the School of the Arts and Architecture, Henry Samueli School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television. The other professional schools offer graduate programs exclusively: the Graduate School of Education and Information Studies, School of Law, John E. Anderson Graduate School of Management, Meyer and Renee Luskin School of Public Affairs and, in the health sciences, the School of Dentistry, David Geffen School of Medicine, and Jonathan and Karin Fielding School of Public Health.

Undergraduates may earn a Bachelor of Arts or Bachelor of Science degree in one of 128 different disciplines; graduate students may earn one of 88 master’s and 110 doctoral and professional degrees.

Academic programs undergo continuous review and evaluation to maintain their excellence, and new degree programs are added as they are approved by the Academic Senate or The Regents.

RESEARCH

Pushing the boundaries of the known, UCLA researchers—faculty members and students, both graduate and undergraduate—venture every day into uncharted worlds from the molecular to the galactic.

Whether it’s tracing the roots of urban decay, pioneering new drug therapies for cancer, or revealing a black hole at the center of our galaxy, research at UCLA is advancing the frontiers of knowledge.

Among the 10 leading research universities in the country, UCLA received $894 million in 2012-13 in extramural grants and contracts to support its research. Each year it hosts hundreds of postdoctoral scholars who share its facilities.

Its laboratories have seen major breakthroughs in scientific and medical research; its study centers have helped foster understanding among the various cultures of the world; ongoing pursuits of new knowledge in vital areas continue to improve the quality of life for people around the world.

Faculty members teach both undergraduate and graduate courses and, through their research, create knowledge as well as transmit it. At UCLA, students are taught by the people making the discoveries. They exchange ideas with faculty members who are authorities in their fields and, even as undergraduate students, are encouraged to participate in research to experience firsthand the discovery of new knowledge.

SERVICE

As a public university, serving the community is one of UCLA’s greatest commitments. Undergraduate and graduate programs, research activities, community outreach programs, and grass-roots participation by students, faculty, staff, and alumni help to forge a partnership between the University and the entire Los Angeles region.

With the Ronald Reagan UCLA Medical Center, UCLA furthers its tradition of medical outreach and assures the highest quality of care to Los Angeles and the world. Low-income families receive top-quality medical care through the UCLA Health System.

In terms of overall excellence, UCLA is one of America’s most prestigious and influential public universities. It is consistently rated among the best universities in the nation.
The Los Angeles branch of the State Normal School welcomed students in 1882. Ground was broken for the Westwood campus in 1927, when construction began on Royce Hall.

A Brief History of UCLA

With only 11,000 inhabitants in 1880, the pueblo of Los Angeles convinced the state government to establish a State Normal School in Southern California. Enthusiastic citizens contributed between $2 and $500 to purchase a site, and on August 29, 1882, the Los Angeles Branch of the State Normal School welcomed its first students in a Victorian building that had been erected on the site of an orange grove.

By 1914 Los Angeles had grown to a city of 350,000, and the school moved to new quarters—a Hollywood ranch off a dirt road that later became Vermont Avenue. In 1919, the school became the Southern Branch of the University of California and offered two years of instruction in Letters and Science. Third- and fourth-year courses were soon added; the first class of 300 students was graduated in 1925, and by 1927 the Southern Branch had earned its new name: University of California at Los Angeles. (The name was changed again in 1958 to University of California, Los Angeles.)

Continued growth mandated the selection of a site that could support a larger campus and, in 1927, ground was broken in the chaparral-covered hills of Westwood. The four original buildings—Royce Hall, Powell Library, Haines Hall, and Kinsey Hall (now called the Humanities Building)—formed a lonesome cluster in the middle of 400 empty acres. The campus hosted some 5,600 students its first term in 1929. The Regents established the master’s degree at UCLA in 1933 and, three years later, the doctorate. UCLA was fast becoming a full-fledged university offering advanced study in almost every field.

The most spectacular growth at UCLA occurred in the 25 years following World War II, when it tripled its prewar enrollment of 9,000 students and undertook what would become a $260 million building program that included residence halls, parking structures, laboratories, more classrooms, service buildings, athletic and recreational facilities, and a 581-bed teaching hospital that is now one of the largest and most highly respected in the world.
treatment from School of Dentistry clinics on campus and in Venice. The Santa Monica-UCLA Medical Center’s Rape Treatment Center offers 24-hour care to victims. The Fielding School of Public Health’s Community Health Promotion Program supports community-service projects to benefit poor and underserved communities, and the School of Nursing offers care through its nurse-managed Health Center at the Union Rescue Mission. The University also supports K-12 enhancement programs such as the School of the Arts and Architecture’s Music Partnership Program, which funds UCLA students to be academic and musical mentors for at-risk youth.

As UCLA gives to the community, Los Angeles gives something back. The University’s arts and cultural programs, for example, attract more than half a million people each year, drawn by everything from world-class acts performing at Royce Hall to classic-film screenings from the School of Theater, Film, and Television archives. These relationships create opportunities for partnerships and growth that ensure UCLA’s preeminence in the twenty-first century and beyond.

### LIFE ON CAMPUS

Just five miles from the ocean, UCLA lies in one of the most attractive areas of Southern California. It is bordered on the north by the protected wilderness of the Santa Monica Mountains and on the south by Westwood Village. Some 199 buildings on 419 acres house the College of Letters and Science plus 11 professional schools and serve more than 42,190 students.

### A UNIQUE SETTING

The Romanesque architecture of UCLA’s early buildings blends with the modern design of new structures and provides a backdrop for diverse campus settings. Bruin Walk continually echoes with the chatter of students and vendors, but nearby, the botanical gardens provide a serene escape. While a hip-hop band energizes lunchtime crowds in the Ackerman quad, a classical recital may be taking place in Schoenberg Music Building, and students contemplating a Rodin or Lachaise in the Murphy Sculpture Garden may be unaware of a political rally organizing in Meyerhoff Park.

To give a feel for the dynamic atmosphere at UCLA, Undergraduate Admission offers tours tailored to prospective undergraduates. See http://www.admission.ucla.edu/tours.htm or call (310) 825-8764 or 206-3719.

### A LARGE CAMPUS WITH A COMFORTABLE FEEL

The general campus population, some 38,162 students, is enriched by an additional 4,028 in the health sciences schools of Dentistry, Medicine, Nursing, and Public Health. While such numbers sound daunting, the University provides orientation sessions and innovative academic assistance programs to help acclimate new students and, through a range of services and social programs, new students quickly meet people with common interests in their academic departments, residence halls, or clubs and organizations. Even athletic events help to cement relationships as the campus comes together to celebrate Bruin victories.

Large lecture groups exist, especially in introductory courses; however, 86 percent of lower division lecture classes in 2012-13 had under 200 students, and the University is striving to further reduce class size. Large lecture classes typically include discussion sections of about 25 students or smaller seminars and laboratory classes. There is an overall ratio of one faculty member for approximately 16 students.

Most UCLA faculty members set aside office hours for students and appreciate the opportunity for informal conversation. Professors are often aided by graduate student teaching assistants (TAs) who are available to talk about academic problems.

### A DYNAMIC STUDENT BODY

Students at UCLA pride themselves on academic excellence. The Fall Quarter 2013 entering freshman class had an average high school GPA of 4.29, with an average composite score on the SAT Reasoning Test of 1,942 out of a possible 2,400.

One of the University’s highest priorities is to advance the diversity of its students, faculty, staff, and administrators. UCLA’s student population—nearly equally divided between men and women—yields the wide range of opinion and perspective essential to a great university.

Although most students are from California, they come from all 50 states and 112 foreign countries to study at UCLA. Ethnic minorities comprise 71.4 percent of the undergraduates and 61.6 percent of the graduate student population, and international students and scholars presently number over 10,000, making this one of the most popular American universities for students from abroad.

### ACADEMIC PROGRAMS

UCLA has a tradition of advancing higher education and the common good through excellence in scholarship, research, and public service. Academic excellence, faculty distinction, and a comprehensive curriculum are hallmarks of the UCLA experience. The College of
Letters and Science and 11 graduate and professional schools present an extraordinary richness and diversity of teaching programs. The International Education Office, Summer Sessions, UCLA Extension, and UCLA International Institute provide academic and professional resources to UCLA and the greater Los Angeles community, as well as to the international community.

**UCLA College and Schools**

Academic programs offered at UCLA span the breadth and depth of over 200 disciplines and areas of study. Lecture, discussion, laboratory, research, and creative courses are supplemented by seminars, honors programs, specialized freshman clusters, internships, and education abroad opportunities. Instruction takes place in many unique venues, including specialized classrooms, computer and scientific laboratories, performance and studio spaces, and off-campus settings. Students and faculty members themselves mirror the cultural and racial diversity of Los Angeles. Academic programs are described in detail in the Curricula and Courses section of this catalog.

**International Education Office**

The International Education Office (IEO) believes that study abroad and student exchange are exciting and broadening experiences that enrich any educational curriculum. The office works to facilitate international education by serving as the campuswide portal for the development and administration of study abroad and student exchange activity. It provides assistance to academic units seeking to develop study abroad programs, and it collaborates with the Academic Senate and departments to insure academic oversight of study abroad programs. The IEO also coordinates student advising services for undergraduate and graduate students interested in studying abroad.

The IEO administers several programs, including the UC Education Abroad Program (UCEAP), Travel Study, Non-UC Programs, and various student exchange agreements.

Full details about the academic programs abroad, requirements, and application procedures are available in 1332 Murphy Hall, (310) 825-4995. See http://ieo.ucla.edu.

**Education Abroad Program**

The UC Education Abroad Program (UCEAP) offers short- and long-term study programs in cooperation with over 115 host universities and colleges in more than 40 countries throughout the world. Participating students remain registered on their home campuses while studying abroad and receive full academic credit for their work. With careful planning, study abroad should not delay progress toward graduation. While on EAP, students are eligible for financial assistance. See http://ieo.ucla.edu/uceap.

**Travel Study**

Travel Study offers short-term summer programs on five different continents. The Travel Study programs offer UC credit, the promise of an exciting summertime adventure, and intensive learning experiences taught by distinguished UCLA faculty members. Over 20 academic departments offer Travel Study programs that include from 8 to 16 quarter units of UC credit. Financial aid is available for qualified UC students. Registration begins in November for the following summer on a first-come, first-served basis. Travel Study is open to all students at any academic level. There is no grade-point average requirement to participate. See http://ieo.ucla.edu/travelstudy.

**Non-UC Programs**

The IEO also advises students about the many study abroad programs available through other universities or outside providers. Students should check with IEO to make sure those organizations are credible and to learn about the policies involved in taking a planned academic leave (PAL) for study abroad and the transfer of credit back to UCLA from other institutions. See http://ieo.ucla.edu/nonucprograms.

**Summer Sessions**

Throughout the summer, UCLA provides three ways to earn UC credit—academic courses, Summer Institutes, and Travel Study. More than 700 courses from approximately 60 departments are offered in six-, eight-, nine-, and 10-week sessions. Developed from courses that are already part of UCLA’s regular curriculum, Summer Institutes offer the breadth and depth of UCLA’s academic rigor in an intensive, holistic format that allows students to share a unique hands-on learning experience. Some Summer Institute programs are specifically designed for advanced high school students. Travel Study programs offer the option to study various subjects as part of an exciting and challenging travel experience. Many students take advantage of Summer Sessions to enroll in courses they were unable to take during the year, put themselves closer to graduation, explore possibilities, and broaden perspectives.

Although visiting students are welcome to enroll, admission to Summer Sessions does not constitute admission to the University in either undergraduate or graduate standing. Students who wish to attend UCLA in regular session must follow admission procedures described in the Undergraduate Study and Graduate Study sections of this catalog.

Regularly enrolled undergraduate students may attend UCLA Summer Sessions for full unit and grade credit. Summer Sessions work is recorded on the UCLA transcript, and grades earned are computed in the grade-point average. Check with a College or school counselor about applying these courses toward degree requirements and about any limitations the College or school may impose on Summer Sessions study. Financial aid funds are available to UCLA students.

Regularly enrolled graduate students may, with departmental approval, take regular session courses offered in Summer Sessions for credit toward a master’s or doctoral degree; consult a graduate adviser in advance con-
The U.S. Department of Education has designated the UCLA International Institute as the central hub for global and area studies on campus, offering six undergraduate majors, eight undergraduate minors, and four graduate programs in regional and global studies. Founded in 1958, the institute educates students, champions scholarship, and builds academic partnerships here and abroad. More than 25 centers and programs promote innovative multidisciplinary research and educational opportunities in virtually every region of the world. Together they serve the entire campus through graduate student fellowships, language study scholarships, faculty grants, and funding for conferences, publications, and collaborative research projects.

The U.S. Department of Education has designated the institute’s programs in East Asia, Europe and Eurasia, Latin America, Near East, and Southeast Asia as National Resource Centers, and its specialized center for heritage language teaching as a National Heritage Language Research Center. The institute also houses thematic centers, including the Burke Center for International Relations and the Program on International Migration. Other programs engage local, national, and international communities, such as the Fulbright Enrichment program for Greater Los Angeles, the International Visitors Bureau that hosts over 600 international educational and professional visitors each year, and the Center for World Languages.

A gateway to the world for UCLA and the global city of Los Angeles, the International Institute and its centers organize a robust schedule of free public events, along with research conferences, cultural programs, and K-12 teacher institutes. At the campus level the institute brings together UCLA’s globally and regionally focused faculty members, departments, and research centers in collaborative initiatives to address pressing world challenges such as climate change and international conflicts. At the global level the institute manages UCLA’s more than 300 formal research, teaching, and student exchange agreements with foreign institutions, including universities, governments, nonprofit organizations, and businesses worldwide. See http://web.international.ucla.edu/institute/home or call (310) 825-4811.

RESEARCH PROGRAMS

At any given time, more than 6,000 funded research programs are in progress at UCLA. For more information on the Organized Research Units listed below, see https://vcr.ucla.edu/organized-research-units-oru-1.

ORGANIZED RESEARCH UNITS

Organized Research Units (ORUs) are campuswide research programs. Members come from more than one department and normally from more than one school, college, or division.

BRAIN RESEARCH INSTITUTE

The Brain Research Institute (BRI) has one of the largest programs for neuroscience research and education in the country, with nearly 300 scientists from 26 departments involved in every aspect of neuroscience research from molecular organization to human behavior. The BRI provides facilities with new technologies for research and training and sponsors affinity groups, conferences, and symposia to strengthen ties among neuroscientists. Public service activities include an elementary and secondary school outreach program and a joint educational program with UCLA Extension. See http://www.bri.ucla.edu or call (310) 825-5061.

CENTER FOR EUROPEAN AND EURASIAN STUDIES

The Center for European and Eurasian Studies (CEES) develops and coordinates teaching and research on Russia and the successor states of the former Soviet Union, as well as the countries of western Europe, through conferences, lectures, seminars, and academic exchange programs with European and Russian institutions. It also funds advanced instruction in languages such as Czech, Hungarian, Romanian, Polish, and Ser-
The Cotsen Institute of Archaeology (COIOA) studies and seeks to understand the human past through artifacts, analysis of field data, and the creation of archives. The institute, the only one of its kind in the U.S., coordinates facilities for more than 35 researchers and many graduate students and volunteers in 11 associated academic departments. Facilities include the Ceramics Research Group, Cotsen Digital Archive, Lithic Analysis Research Group, Moche Archive, Rock Art Archive, and many laboratories such as the Channel Islands Laboratory, East Asian Laboratory, Human Origins Laboratory, and Zooarchaeology Laboratory. It publishes the findings of scholars from UCLA and other archaeology centers and provides a forum for the public presentation of archaeological discoveries and advances. See http://www.ioa.ucla.edu or call (310) 206-8934.

CRUMP INSTITUTE FOR MOLECULAR IMAGING
The Crump Institute for Molecular Imaging (CIMI) brings together physical, biomathematical, chemical, biological, and clinical scientists and students to merge the principles of imaging with those of molecular and cellular biology, genetics, and biochemistry. The imaging domains range from the molecular organization of viruses and cellular subunits to the biological processes of organ systems in the living human. A major focus is the development and use of imaging technologies to collect, analyze, and communicate biological data. The institute has research and educational programs for visiting scientists, postdoctoral scholars, and Ph.D. graduate students that include the development of multimedia computer-based learning technologies. See http://www.crump.ucla.edu or call (310) 825-4903 or 825-6539.

DENTAL RESEARCH INSTITUTE
The Dental Research Institute (DRI) fosters excellence in research, professional research training, and public education as it focuses on the basic mechanisms of disease in the orofacial region. Members include scientists in molecular biology, immunology, virology, biochemistry, pharmacology, pathology, genetics, developmental biology, neurobiology, and neurophysiology. Research includes molecular oncology, viral oncology, molecular mechanisms of periodontal diseases, dental implantology, orofacial pain, neuroimmunology, molecular immunology, HIV immunology, and wound repair. The DRI contributes to educational activities in the form of quarterly seminars in the UCLA Center for the Health Sciences. See http://www.dentistry.ucla.edu/research or call (310) 206-3048.

GUSTAVE E. VON GRUNEBAUM CENTER FOR NEAR EASTERN STUDIES
The von Grunebaum Center for Near Eastern Studies (CNES) coordinates research and academic programs related to the Near East. It supports the degree programs in African and Middle Eastern Studies and in Islamic Studies. Resources of the center include the largest faculty, one of the most comprehensive library holdings, and the richest variety of Near and Middle Eastern studies courses of any institution in the Western Hemisphere. The center conducts publication, community outreach, and scholarly exchange programs. See http://web.international.ucla.edu/cnes/ or call (310) 825-1181.

INSTITUTE FOR RESEARCH ON LABOR AND EMPLOYMENT
The interdisciplinary research program of the Institute for Research on Labor and Employment (IRLE) studies employment relationships, including labor markets, labor law, labor and management relations, equal employment opportunity, occupational safety and health, and related issues. Its Center for Labor Research and Education offers social policy and
employment relations programs to the public, unions, and management. The academic unit of the institute oversees the Labor and Workplace Studies minor. See http://www.irle.ucla.edu or call (310) 794-5957.

**INSTITUTE OF AMERICAN CULTURES**

The Institute of American Cultures (IAC) oversees four ORUs associated with UCLA ethnic studies centers. Applying the University’s capabilities to the analysis and solution of social issues, the institute makes funds available for research and fellowships and promotes the study and illumination of the histories of African Americans, American Indians, Asian Americans, and Chicanas/Chicanos. See http://www.iac.ucla.edu or call (310) 825-6815.

**Ralph J. Bunche Center for African American Studies**

The Bunche Center for African American Studies (CAAS) conducts and sponsors research on the African American experience, supports the Afro-American studies curriculum, publishes research results, and sponsors community service programming. See http://www.bunchecenter.ucla.edu or call (310) 825-7403.

**American Indian Studies Center**

The American Indian Studies Center (AISC) serves as an educational and research catalyst and includes a library, postdoctoral fellowship programs, a publishing unit that produces books and a quarterly journal, and a student/community relations unit. See http://www.aisc.ucla.edu or call (310) 825-7315.

**Asian American Studies Center**

The Asian American Studies Center (AASC) seeks to increase the knowledge and understanding of the experiences of Asian and Pacific Islander peoples in America and promotes the development of material resources related to Asian American studies. The center includes a library, publications unit, student/community projects unit, and postdoctoral fellowships. See http://www.aasc.ucla.edu or call (310) 825-2974.

**Chicano Studies Research Center**

The Chicano Studies Research Center (CSRC) promotes the study and dissemination of knowledge on the experience of the people of Mexican descent and other Latinos in the U.S. The center supports interdisciplinary and collaborative research and the analysis, understanding, and articulation of issues critical to the development of Chicano and Latino communities in the U.S. It seeks to establish and maintain relationships with communities with similar academic and research interests at the state, national, and international levels. The center also includes a library, academic press, and grant fellowship programs. See http://www.chicono.ucla.edu or call (310) 825-2363.

**INSTITUTE OF GEOPHYSICS AND PLANETARY PHYSICS**

The Institute of Geophysics and Planetary Physics (IGPP) is a multicampus research unit of the University of California; the branch at UCLA researches climate dynamics, geophysics, geochronology, planetology, petrology, space physics, biochemistry, and biology. Research topics include the nature of the Earth, moon, and other planetary bodies; global and regional environmental change; the origin of terrestrial life; dynamical properties of the sun and solar wind; and the nonlinear dynamics of complex systems. Facilities include analytical laboratories in geochronology, meteoritics, glaciology, petrology, geochronology, archaeology, and the origins of life; laboratories for experiments in fluid dynamics and high-pressure physics; developmental laboratories for instrumentation in space physics and seismology; and computational laboratories for large-scale numerical modeling. See http://www.igpp.ucla.edu or call (310) 206-2285.

**INTELLECTUAL AND DEVELOPMENTAL DISABILITIES RESEARCH CENTER**

The Intellectual and Developmental Disabilities Research Center (IDDRC) provides laboratories and clinical facilities for research and training in intellectual and developmental disabilities. Interdisciplinary activities range from anthropological studies to molecular aspects of inherited metabolic diseases. See http://www.mrrc.npi.ucla.edu/iddrc/home.aspx or call (310) 825-9395 or 825-6429.

**JAMES S. COLEMAN AFRICAN STUDIES CENTER**

The Coleman African Studies Center (JSCASC) coordinates research and teaching on Africa in the humanities, social sciences, and natural sciences, as well as in the schools of Arts and Architecture, Education and Information Studies, Law, Medicine, Public Affairs, Public Health, and Theater, Film, and Television. The center sponsors public lectures, seminars, publications, and academic exchanges with African institutions and an outreach service to the Southern California community. See http://webinternational.ucla.edu/africa/ or call (310) 825-3686.

**JULES STEIN EYE INSTITUTE**

The Jules Stein Eye Institute (JSEI) is one of the best equipped centers for research and treatment of eye diseases in the world. This comprehensive facility is dedicated to the preservation of vision and prevention of blindness, the care of patients with eye disease, and education in the broad field of ophthalmology. Outpatient, inpatient, and surgical facilities are provided. See http://www.jssei.org or call (310) 825-5053.

The Doris Stein Eye Research Center houses clinical facilities as well as new research and training programs concentrating on major eye diseases worldwide.

The Edie and Lew Wasserman Eye Research Center houses outpatient surgery clinics, faculty offices, and refractive, oculoplastic, and cataract services.

**LATIN AMERICAN INSTITUTE**

The Latin American Institute (LAI) is a major regional, national, and international resource on Latin America and hemispheric issues. The institute sponsors and coordinates research, academic and public programs, and publications on Latin America in the humanities, social sciences, and professional schools and links its programs and activities with developments in the field and in other institutional settings.
By combining instruction, research, and service and by encouraging multidisciplinary and interdisciplinary approaches, the Institute promotes the use of UCLA Latin American resources for the benefit of the campus, the broader community, and the public at large. See http://web.international.ucla.edu/lai/ or call (310) 825-4571.

**Molecular Biology Institute**

The Molecular Biology Institute (MBI) promotes molecular biology research and teaching at UCLA, with emphasis on genomics, proteomics, and chemical biology. The Institute houses the laboratories of 30 MBI members and the Institute for Genomics and Proteomics, as well as the administration of the Molecular Biology Interdepartmental Ph.D. Program and the Biosciences Program. See http://www.mbi.ucla.edu or call (310) 825-1018.

**Plasma Science and Technology Institute**

The Plasma Science and Technology Institute (PSTI) is dedicated to research of plasma physics, fusion energy, and the application of plasmas in other disciplines. Students, professional research staff, and faculty members study basic laboratory plasmas, plasma-fusion confinement experiments, fusion engineering and nuclear technology, computer simulations and the theory of plasmas, space plasma physics and experimental simulation of space plasma phenomena, advanced plasma diagnostic development, laser-plasma interactions, and the use of plasma in applications ranging from particle accelerators to the processing of materials and surfaces used in microelectronics or coatings. See http://www.physics.ucla.edu/psti/ or call (310) 825-4789.

**UCLA-DOE Institute for Genomics and Proteomics**

The UCLA-DOE Institute for Genomics and Proteomics, funded through a Department of Energy (DOE) contract, conducts research in bioenergy, carbon capture, microbial genomics, and structural and functional studies of organisms and their constituents. Institute faculty members have joint appointments in academic departments and teach at both undergraduate and graduate levels. Major facilities include a biomedical cyclotron, advanced scanning equipment, and macromolecular crystallization, nuclear magnetic resonance, protein expression, and X-ray crystallography facilities. See http://www.doe-mbi.ucla.edu/overview or call (310) 825-3754.

**SPECIALIZED RESEARCH CENTERS, LABORATORIES, AND INSTITUTES**

Additional research centers, laboratories, and institutes advance scholarship in all fields. The breadth of research conducted on campus is reflected in undertakings as diverse as the California Center for Population Research (http://www.ccpr.ucla.edu)—which carries out basic and applied research and training in demography—and the Jonsson Comprehensive Cancer Center (http://www.cancer.ucla.edu)—one of only 41 comprehensive centers in the nation. For a list of research centers, laboratories, and institutes, see http://www.research.ucla.edu/labs/index.htm.

Interdisciplinary activities in the social sciences include the nationally respected UCLA Anderson Forecast (http://uclaforecast.com) in UCLA’s Anderson Graduate School of Management and the Center for Study of Evaluation and the National Center for Research on Evaluation, Standards, and Student Testing (http://www.cse.ucla.edu) in the Graduate School of Education and Information Studies, which are at the forefront of efforts to improve the quality of education and learning in America.

In the health sciences, research ranges from improving the quality of life for patients and caregivers at the UCLA Alzheimer’s Disease Research Center (http://www.eastonad.ucla.edu) to epidemiology, immunology, and the clinical management of AIDS at the UCLA AIDS Institute (http://aidsinstitute.ucla.edu) and the Center for Clinical AIDS Research and Education (http://www.uclahealth.org/homepage_site.cfm?id=1926). The Fernald Child Study Center (http://www.psych.ucla.edu/center-and-programs/fernald-child-study-center) focuses on the study and treatment of a variety of childhood behavioral problems and learning disorders.

In the physical sciences and engineering, the Institute for Pure and Applied Mathematics (http://www.ipam.ucla.edu) makes connections between a wide spectrum of mathematicians and scientists and broadens the range of applications in which mathematics is used. The UCLA Logic Center (http://www.logic.ucla.edu) fosters teaching and research in logic, broadly understood to include all areas of mathematical and philosophical logic, as well as the applications of logic to philosophy, linguistics, and computer science. On other frontiers, the Center for Embedded Networked Sensing (http://research.cens.ucla.edu), a National Science Foundation Science and Technology Center, develops embedded networked sensing systems to monitor and collect information on plankton colonies, endangered species, soil and air contaminants, medical patients, and buildings, bridges, and other man-made structures.

The Center for Study of Urban Poverty (http://www.cusp.ucla.edu) initiates new research on issues related to urban poverty and sponsors seminars in the field. The Center for Policy Research on Aging (http://luskin.ucla.edu/content/center-policy-research-aging) addresses the significant issues of an aging society through policy analysis, dissemination of information, and technical assistance to the public and private sectors.

**SUPPORTING RESOURCES**

As UCLA students and scholars advance knowledge, illuminate the past, shape the present, and uncover the future, they rely on resources that support their endeavors in all fields. From a top-rated library to out-
door nature reserves, the campus is well-equipped to meet diverse scholastic needs.

**ART GALLERIES AND MUSEUMS**

The leading arts and cultural center in the West, UCLA museums, galleries, and gardens provide eclectic resources ranging from the ancient to the avant-garde.

**Fowler Museum at UCLA**
The Fowler Museum at UCLA is internationally known for the quality of its collections, which encompass the arts and material culture of much of the world, with particular emphasis on West and Central Africa, Asia and the Pacific, and the Americas, past and present. It supports UCLA instruction and research and sponsors major exhibitions, lecture programs, and symposia. The museum is open to the public Wednesday through Sunday. For more information on hours and admission, see http://www.fowler.ucla.edu or call (310) 825-4361.

**Grunwald Center for the Graphic Arts**
Housed in the UCLA Hammer Museum, the Grunwald Center for the Graphic Arts holds a distinguished collection of over 45,000 prints, drawings, photographs, and artists’ books, including nearly 10,000 works from the prestigious Armand Hammer Daumier and Contemporaries Collection. A study and research facility for the benefit of students and the community, the center’s permanent holdings include significant European and American examples from the fifteenth century to the present. It is particularly noted for its collection of German Expressionist prints and works on paper by Matisse and Picasso, as well as the Richard Vogler Cruikshank Collection and the Frank Lloyd Wright Collection of Japanese prints. The center is open only by appointment. See http://hammer.ucla.edu/collections/detail/collection_id/5 or call (310) 443-7078.

**Franklin D. Murphy Sculpture Garden**
Situated on a picturesque five-acre expanse that spans the heart of north campus, the Murphy Sculpture Garden contains a collection of over 70 major works by Arp, Butterfield, Calder, Falkenstein, Hepworth, Lachaise, Lipchitz, Matisse, Moore, Noguchi, Rodin, Smith, Zuniga, and many other late nineteenth- and early twentieth-century masters. All works in this distinguished collection are private gifts to the University. Tours may be arranged. See http://hammer.ucla.edu/collections/detail/collection_id/6 or call (310) 443-7055 or 443-7041.

**New Wight Gallery**
The New Wight Gallery is an exhibit space for visual arts, including student and faculty exhibitions. The gallery is housed in 1100 Broad Art Center, (310) 825-0557. See http://www.art.ucla.edu/gallery/index.html.

**UCLA Hammer Museum**
The UCLA Hammer Museum regularly presents its collection of Impressionist and Post-Impressionist paintings by such artists as Monet, Pissarro, Sargent, Cassatt, and Van Gogh. The museum organizes and presents major changing exhibitions devoted to examinations of historical and contemporary art in all periods. Cultural programming, including children’s performance and storytelling series, music, poetry readings, and lunchtime art talks, are presented throughout the week. For information on programming, hours, and docent tours, see http://hammer.ucla.edu or call (310) 443-7000.

**UCLA Meteorite Collection and Gallery**
UCLA has the largest collection of meteorites on the West Coast and the fifth largest in the U.S. Many of the most important meteorites are displayed in the UCLA Meteorite Gallery located in 3697 Geology. The collection and gallery are a major resource for cosmochemical research and the teaching of planetary science. For information on hours, see http://meteorites.ucla.edu.

**Libraries**
The UCLA Library, a campuswide network of libraries serving programs of study and research in many fields, is among the top 10 ranked research libraries in the U.S. The total collections number more than 10 million volumes, and over 112,000 serial titles are received regularly. Reference librarians are available in all library units to answer questions about using online systems and to provide assistance with reference and research topics.

Students locate and identify materials through the library’s web-based online information systems. The UCLA Library Catalog contains records for all UCLA Library holdings and other campus collections, including the Archive Research and Study Center of the Film and Television Archive, Chicano Studies Research Center Library, Ethnomusicology Archive, Social Science Data Archive, Instructional Media Collections and Services, and William Andrews Clark Memorial Library. It also provides library item location and circulation status. Other available catalogs include the UC Libraries Catalog (Melvyl), WorldCat, Center for Research Libraries, Online Archive of California, numerous abstracting and indexing databases, and gateways to other systems. The Melvyl Catalog contains information on library holdings at all 10 UC campuses. While continuing to develop and manage collections of traditional printed materials, the UCLA Library also makes a number of digital resources available for campus use through the library site. These include College Library electronic reserves and electronic journals, texts, reference resources, periodical indexes, and abstracts. See http://www.library.ucla.edu.

**Arts Library**
Housed in the Public Affairs Building, the Arts Library has more than 300,000 books on architecture, architectural history, art, art history, design, film, television,
The UCLA Library is among the top research libraries in the U.S.

The UCLA Library, provides students with access to computers and multimedia equipment, and Night Powell provides study space in a late-night reading room. See http://www.library.ucla.edu/libraries/college/college-undergraduate-library or call (310) 825-1938 or 825-9389.

RICHARD C. RUDOLPH EAST ASIAN LIBRARY

HUGH AND HAZEL DARLING LAW LIBRARY

The Darling Law Library collects published case decisions, statutes, and codes of the federal and state governments of the U.S. and other common law jurisdictions, legal treatises and periodicals in Anglo-American and international law, and appropriate international and comparative law holdings. The Law Library reports to the dean of the School of Law and contains over 600,000 bound volumes and over 30,000 electronic titles. See http://www.law.ucla.edu/library/Pages/default.aspx or call (310) 825-4743 or 825-6414.

LOUISE M. DARLING BIOMEDICAL LIBRARY

The Darling Biomedical Library, located in the Center for the Health Sciences, serves all the UCLA health and sciences departments and schools and the UCLA Medical Center. Its collections focus on materials related to medicine, nursing, dentistry, public health, physiological sciences, biology, molecular biology, chemistry, biochemistry, zoology, plant sciences, psychology, and life sciences, as well as rare works in the history of health and life sciences, botanical illustration, and Arabic and Persian medical manuscripts. It contains over 678,000 print volumes and 3,170 journal subscriptions. See http://www.library.ucla.edu/libraries/biomed/louise-m-darling-biomedical-library or call (310) 825-4904.

MUSIC LIBRARY

The collections of the Music Library in the Schoenberg Music Building include books, music scores, sheet music, video and sound recordings, microforms, and interactive media on Western music history and criticism; world music styles, cultures, and traditions; and music theory, aesthetics, philosophy, and organology. It also houses the Archive of Popular American Music, a special collection of published and manuscript sheet music, recordings, and related materials. Performing Arts Special Collections, housed in the Young Research Library, include rare printed and manuscript books, scores, and opera librettos; personal papers of prominent Southern California composers, performers, and writers on music; and archives of film, television, and radio music. See http://www.library.ucla.edu/libraries/music/music-library or call (310) 825-4882 or 825-1353.

HUGH AND HAZEL DARLING LAW LIBRARY

The Darling Law Library collects published case decisions, statutes, and codes of the federal and state governments of the U.S. and other common law jurisdictions, legal treatises and periodicals in Anglo-American and international law, and appropriate international and comparative law holdings. The Law Library reports to the dean of the School of Law and contains over 600,000 bound volumes and over 30,000 electronic titles. See http://www.law.ucla.edu/library/Pages/default.aspx or call (310) 825-4743 or 825-6414.

LOUISE M. DARLING BIOMEDICAL LIBRARY

The Darling Biomedical Library, located in the Center for the Health Sciences, serves all the UCLA health and sciences departments and schools and the UCLA Medical Center. Its collections focus on materials related to medicine, nursing, dentistry, public health, physiological sciences, biology, molecular biology, chemistry, biochemistry, zoology, plant sciences, psychology, and life sciences, as well as rare works in the history of health and life sciences, botanical illustration, and Arabic and Persian medical manuscripts. It contains over 678,000 print volumes and 3,170 journal subscriptions. See http://www.library.ucla.edu/libraries/biomed/louise-m-darling-biomedical-library or call (310) 825-4904.

MUSIC LIBRARY

The collections of the Music Library in the Schoenberg Music Building include books, music scores, sheet music, video and sound recordings, microforms, and interactive media on Western music history and criticism; world music styles, cultures, and traditions; and music theory, aesthetics, philosophy, and organology. It also houses the Archive of Popular American Music, a special collection of published and manuscript sheet music, recordings, and related materials. Performing Arts Special Collections, housed in the Young Research Library, include rare printed and manuscript books, scores, and opera librettos; personal papers of prominent Southern California composers, performers, and writers on music; and archives of film, television, and radio music. See http://www.library.ucla.edu/libraries/music/music-library or call (310) 825-4882 or 825-1353.

RICHARD C. RUDOLPH EAST ASIAN LIBRARY

about Leonardo da Vinci and related materials in Renaissance studies. Performing Arts Special Collections, housed in the Young Research Library, contain noncirculating materials including the Artists’ File, archival records of major Southern California motion picture studios and television production companies, scripts from film, television, and radio, animation art, personal papers of writers, directors, and producers, photographs and production stills, posters, lobby cards, press kits, and West Coast theater playbills. See http://www.library.ucla.edu/libraries/arts/arts-library or call (310) 206-5425.

The collections of the Music Library in the Schoenberg Music Building include books, music scores, sheet music, video and sound recordings, microforms, and interactive media on Western music history and criticism; world music styles, cultures, and traditions; and music theory, aesthetics, philosophy, and organology. It also houses the Archive of Popular American Music, a special collection of published and manuscript sheet music, recordings, and related materials. Performing Arts Special Collections, housed in the Young Research Library, include rare printed and manuscript books, scores, and opera librettos; personal papers of prominent Southern California composers, performers, and writers on music; and archives of film, television, and radio music. See http://www.library.ucla.edu/libraries/music/music-library or call (310) 825-4882 or 825-1353.

RICHARD C. RUDOLPH EAST ASIAN LIBRARY

SCIENCE AND ENGINEERING LIBRARY

The Science and Engineering Library (SEL) collections on engineering, mathematics, and the physical sciences are housed in two separate locations. SEL/Engineering and Mathematical Sciences in Boelter Hall houses materials on aeronautics, astronomy, and atmospheric sciences; bioengineering; chemical, civil, electrical, environmental, manufacturing, mechanical, and nuclear engineering; computer science and electronics; energy technology; mathematics; metals and materials; pollution; and statistics. SEL/Geology-Geophysics in the Geology Building houses materials on geology, geophysics, geochemistry, space physics, planetary science, regional geology, paleobiology, micropaleontology, invertebrate paleontology, ore deposits, geomorphology, hydrology, chemical oceanography, and all U.S. Geological Survey publications of western U.S. state geological surveys. See http://www.library.ucla.edu/libraries/sel/science-engineering-library or call (310) 825-4951, 825-1055, or 825-3982.

SPECIAL ARCHIVES AND COLLECTIONS

In addition to the extensive collections of the University Library, a rich array of other information resources is independently managed by individual UCLA departments and centers.

CULTURAL CENTER COLLECTIONS

The Bunche Center for African American Studies Library and Media Center (http://www.bunchecenter.ucla.edu) contains materials reflecting the African American experience in the social sciences, arts, and humanities. The American Indian Studies Center Library (http://www.aisc.ucla.edu/library/) houses a collection on American Indian life, culture, and state of affairs in historical and contemporary perspectives, while the Asian American Studies Center Reading Room/Library (http://www.aasc.ucla.edu/library/) features Asian and Pacific Island American resources.

Materials related to Chicano and Latino cultures are housed in the Chicano Studies Research Center Library (http://www.chicano.ucla.edu/library), and the William Andrews Clark Memorial Library (http://www.clarklibrary.ucla.edu) contains rare books, manuscripts, and other noncirculating materials on English culture (1641 to 1800). The English Reading Room (http://www.library.ucla.edu/resource/english-reading-room) features a noncirculating collection of British and American literature, literary history, and criticism.

INSTRUCTIONAL MEDIA COLLECTIONS AND SERVICES AND LABORATORY

The Instructional Media Collections and Services, located in the Powell Library Building, is UCLA's central resource for the collection and maintenance of educational and instructional media. Materials from the collection are loaned to regularly scheduled UCLA classes and may be rented by organizations and individuals from the campus community and beyond. Staff members monitor compliance with University guidelines and federal copyright law governing the use of video recordings. Reference books from educational and feature film distributors are available. Staff members assist in researching media on any subject and obtaining materials from outside sources. See http://www.oid.ucla.edu/units/imcs or call (310) 825-0755.

The Instructional Media Laboratory provides access to course- or textbook-related audio, interactive, and videotape programs. Students, assigned by faculty members to study specific supplementary materials, may learn at their own pace and time. See http://www.oid.ucla.edu/edtech/medialab or call (310) 206-1211.

UCLA FILM AND TELEVISION ARCHIVE

The UCLA Film and Television Archive is the world's largest university-based collection of motion pictures and broadcast programming. The archive's holdings of over 300,000 original film and television materials serve both the UCLA community and national and international constituencies.

The Motion Picture Collection is the country's largest collection after the Library of Congress. Among its outstanding collections are 27 million feet of Hearst Metrotone News film dating back to 1919. Other noteworthy holdings include studio print libraries from Twentieth Century-Fox, Paramount Pictures, Warner Brothers, Sony/Columbia Pictures, Republic Pictures, RKO, New World Pictures, and Orion Pictures. Special collections document the careers of William Wyler, Hal Ashby, Tony Curtis, Rosalind Russell, Stanley Kramer, Cecil B. DeMille, Harold Lloyd, Charlton Heston, Rock Hudson, and other persons of prominence in the American film industry.

The Television Collection is the nation's largest university-based collection of television broadcast materials. Its titles include kinescopes, telefilms, and videotapes spanning television history from 1946 to the present, with emphasis on drama, comedy, and variety programming. A special collection of over 100,000 news and public affairs programs is also maintained.

The archive's exhibition program presents evening screenings and discussions that focus on archival materials, new work by independent filmmakers, and an array of international films. See http://www.cinema.ucla.edu or call (310) 206-8013 or (310) 794-8888.

The Archive Research and Study Center (ARSC) in the Powell Library Building (310-206-5388) provides on-site viewing of the Film and Television Archive's collections and research consultation to students, faculty, and researchers.

OTHER COLLECTIONS

The Ethnomusicology Archive (http://www.ethnomusic.ucla.edu/archive/) houses over 100,000 sound and audiovisual recordings of folk, ethnic, and non-Western classical music, while the Social Science Data Archive (http://dataarchives.ss.ucla.edu) contains a collection of statistical databases for the social sciences. The UCLA Lab School Gonda Family Library (http://www.labschool.ucla.edu/learning/library) features contemporary materials for children from kindergarten through junior high school and adult works on children's literature.

The Film and Television Archive contains 220,000 original film and TV holdings, including millions of feet of Hearst Metrotone News film dating back to 1919.

The Ethnomusicology Archive includes recordings and a vast collection of musical instruments from non-Western countries.
PARKS, RESERVES, AND NATURAL SCIENCE RESOURCES

The geography of Southern California is conducive to research in the natural sciences. The diverse region is a natural laboratory supported by numerous UCLA resources for study.

BIOLOGICAL COLLECTIONS

The Biological Collections of the Ecology and Evolutionary Biology Department include marine fishes from the Eastern Pacific and Gulf of California, and birds and mammals primarily from the Western U.S., Canada, Mexico, and Central America. The department also maintains a more limited collection of amphibians, reptiles, and fossil vertebrates. See https://www.eeb.ucla.edu/dickey/index.php or call (310) 825-1282.

DIVISION OF LABORATORY ANIMAL MEDICINE

The Division of Laboratory Animal Medicine is responsible for the procurement, husbandry, and general welfare of animals required for teaching and investigative services. It also administers the veterinary medical and husbandry programs throughout the campus. See https://portal.dlam2.ucla.edu/Pages/Default.aspx or call (310) 794-2571.

MARINE SCIENCE CENTER

The Marine Science Center coordinates marine-related teaching and research on campus and facilitates interdepartmental interaction of faculty members and students. UCLA offers one of the broadest interdisciplinary educational programs in marine sciences in the U.S. Field trips for marine-related courses and access to research sites in the Santa Monica Bay, Channel Islands, and the Southern California Bight are provided by UCLA’s 68-foot research vessel Sea World UCLA. See http://www.msc.ucla.edu/Sea_World/ or call (310) 206-8247.

MILDRED E. MATHIAS BOTANICAL GARDEN

The Mathias Botanical Garden is a living museum with one of the most important botanical collections in the U.S. With specimens from all over the world, the seven-acre expanse on south campus specializes in tropical and subtropical plants, including some 5,000 species in 225 families. The botanical garden also has a research herbarium containing 180,000 dried plant specimens. School and community group tours are available as are individual guided tours. See http://www.botgard.ucla.edu or call (310) 825-1260 or 206-6707.

STUNT RANCH SANTA MONICA MOUNTAINS RESERVE

The University of California founded the UC Natural Reserve System (NRS) in 1965 to preserve undisturbed natural areas representing the state's vast ecological diversity for students, teachers, and researchers from public and private educational institutions to use as outdoor classrooms and living laboratories. The Stunt Ranch Santa Monica Mountains Reserve, administered by the Los Angeles campus, officially joined the UC NRS in November 1995. The 310-acre site is a 40-minute drive from UCLA and includes fine examples of chaparral and oak woodland ecosystems. The reserve lends itself to programs that focus on the natural ecosystems and issues of resource management in the urban/wildland interface. Undergraduate and graduate courses in the departments of Anthropology, Earth, Planetary, and Space Sciences, Ecology and Evolutionary Biology, Geography, Physics and Astronomy, and the Institute of the Environment and Sustainability utilize Stunt Ranch and other NRS sites. See http://stunt ranch.ucnrs.org or call (310) 206-3887.

STUDENT SERVICES

Like a small city, UCLA has its own police department and fire marshal, an equivalent to the phone company, health center, corner restaurants, and shops. Hundreds of services for the campus community facilitate academic and personal endeavors.

SERVICES FOR STUDY

From academic advising to advanced computer support, UCLA services for study give students the tools they need to achieve academic success.

ACADEMIC COUNSELING

Many sources of academic counseling are available. Faculty advisers and counselors in the College and each school help students with major selection, program planning, academic difficulties, degree requirements, and petitions. Advisers in each department counsel undergraduates concerning majors offered and their requirements, and possible career and graduate school options (see Advising and Academic Assistance in the Undergraduate Study section of this catalog). In addition, special graduate advisers are available in each department to assist prospective and currently enrolled graduate students.

BRUIN ONLINE

Bruin OnLine (BOL) is the campus Internet service provider for UCLA students, faculty, and staff and a vehicle for accessing campus network communication services. Bruin OnLine services include access to the campus backbone network and the Internet, e-mail accounts, and personal web hosting. Wireless Internet access is available in select campus locations for BOL account holders. Utility software can be downloaded from the BOL website. Help desk services are available online, by e-mail at consult@ucla.edu, by telephone at (310) 267-4357, and at the BOL office in Kerckhoff Hall. See https://www.bol.ucla.edu.

COMPUTER LABORATORIES

Student laboratories are supported through the College Library Instructional Computing Commons (CLICC, http://www.library.ucla.edu/clicc/welcome-clicc), a collaborative effort of the Center for Digital Humanities (http://www.cdh.ucla.edu/labs/), Social Sciences Computing (http://computing.sscnet.ucla.edu/labs), Office of Instructional Development, and College Library. Some 15 computer laboratories are available
The Instructional Enhancement Initiative assures that all UCLA undergraduate nontutorial courses provide an individual online course website for both faculty members and enrolled students. The sites facilitate the distribution of course materials, lecture notes, homework assignments, research links, and electronic communication. Instructors decide which of these online capabilities are best suited to their course websites.

**Course Websites**

The Instructional Enhancement Initiative assures that all UCLA undergraduate nontutorial courses provide an individual online course website for faculty members, teaching assistants, and enrolled students. The sites facilitate the distribution of supplementary course materials, lecture notes, homework assignments, research links, and electronic communication, including virtual office hours and class bulletin boards for interactive question and answer sessions.

**Disabilities and Computing Program**

The Disabilities and Computing Program (DCP) provides adaptive technology services and support to students, faculty, and staff with disabilities, to faculty who are working with students with disabilities, and to departments. The DCP also coordinates access to computers, local area networks, and online resources for people with disabilities. See http://www.dcp.ucla.edu or call (310) 206-7133 or 206-6004.

**Lecture Notes and Course Readers**

For certain courses, students may subscribe to Lecture Notes, which publishes concise weekly summaries of about 100 lecture classes. See http://shop.uclastore.com/c-330-lecture-notes.aspx or call (310) 825-8016. Course Reader Solutions provides custom course readers, obtaining 5,000 copyright authorizations each year. See http://shop.uclastore.com/c-323-custom-course-readers.aspx or call (310) 825-2831.

**MYUCLA**

MYUCLA provides the easiest way for students to gain real-time access to their academic, financial, and personal records. The site is designed with an intuitive visual interface that walks students through the different steps of the procedure they are trying to accomplish, whether it be to check their billing accounts, change address information, view and print Study Lists or Degree Progress Reports (DPRs) or Degree Audits, or see term grades. MYUCLA also provides a convenient way to enroll in classes, to verify enrollment appointment times, and to view real-time enrollment counts.

Other features include a notifications section for important announcements; a subscriptions section to access online information from newspapers, journals, or magazines or from University departments, clubs, and organizations; a personal calendar; and links to UCLA online resources, including the Schedule of Classes and UCLA General Catalog. WebMail provides students an intuitive way to access private e-mail accounts from any computer through MYUCLA.

Students access the site using their UCLA Logon ID and password. MYUCLA operates Sunday from noon through Tuesday at 1 a.m. and Tuesday through Saturday from 6 a.m. to 1 a.m., including holidays. See https://my.ucla.edu or call (310) 206-4525.

**Veterans Affairs Services**

The Veterans Affairs coordinator, 1113 Murphy Hall, (310) 825-5391, provides information for veterans and eligible dependents about veterans’ educational benefits, tutorial assistance, and the work-study program; issues fee waivers to dependents of California veterans who are deceased or disabled because of service-connected injuries and who meet the income restrictions in Education Code Section 10652; and certifies student status for recipients of educational benefits under VA chapters 30-32, 35, and 1606.

**SERVICES FOR HEALTH AND SAFETY**

**Arthur Ashe Student Health and Wellness Center**

The Ashe Student Health and Wellness Center in Westwood Plaza (310-825-4073) is a full-service medical clinic available to all registered UCLA students. Most services are subsidized by registration fees, and a current BruinCard is required for service. Its clinical staff of physicians, nurse practitioners, and nurses is board certified. It offers primary care, specialty clinics, and physical therapy. The center has its own pharmacy, optometry, radiology, and laboratory. Visits, core laboratory tests, X-rays, and preventive immunizations are all prepaid for students with the University of California Student Health Insurance Plan (UCSHIP).

The cost of services received outside the Ashe Center, such as emergency room services, is each student’s financial responsibility. Students are required to purchase medical insurance either through the UCLA-sponsored University of California Student Health Insurance Plan (UCSHIP) or other plans that provide adequate coverage. Adequate medical insurance is a condition of registration. See Registration in the Undergraduate Study and Graduate Study sections of this catalog.

Consult the Ashe Center website for specific information on its primary care, women’s health, immunization, health clearance, optometry, travel, and mind-body clinics, as well as on dental care available to students at discounted rates. See http://www.studenthealth.ucla.edu.

For emergency care when the Ashe Center is closed, students may obtain treatment at the UCLA Medical Center Emergency Room on a fee-for-service basis. If students withdraw during a school term, all Ashe Center services continue to be available on a fee basis for the remainder of that term, effective from the date of withdrawal.

**Mental Health Services**

Services for mental health range from routine counseling and psychotherapy to crisis counseling.
Counseling and Psychological Services

Counseling and Psychological Services (CAPS) offers short-term personal counseling and psychotherapy in 221 Wooden Center West, (310) 825-0768.

Psychologists, clinical social workers, and psychiatrists assist with situational stresses and emotional problems from the most mild to severe. These may include problems with interpersonal relationships, academic stress, loneliness, difficult decisions, sexual issues, anxiety, depression, or other concerns affecting the personal growth of students.

In addition, Campus Assault Resources and Education (CARE) counselors—individuals who provide information, support, and resources for members of the UCLA community who have been raped or sexually assaulted—can discuss options and alternatives, help identify and assist in contacting the most appropriate support services, and answer any questions that may arise.

Service is confidential and available to regularly enrolled students. Students are seen individually by appointment or may choose from a number of groups offered each term. Emergency and walk-in counseling is also available. See http://www.counseling.ucla.edu.

CAPS is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center, available to all UCLA students (see Harassment in the Appendix for more information).

STUDENT SAFETY AND SECURITY

Dial 911 from any campus phone for police, fire, or medical emergencies. For nonemergency information, contact the UCLA Police Department. See http://map.ais.ucla.edu/go/police or call (310) 825-1491.

The police department provides a free Campus Escort Service every day of the year from dusk to 1 a.m. Uniformed community service officers (CSOs)—specially trained UCLA students—walk students, staff, faculty, and visitors between campus buildings, local living areas, or Westwood Village. See http://map.ais.ucla.edu/go/1000806 or call (310) 794-WALK.

The free Evening Van Service provides a safe, accessible, and convenient mode of transportation around campus at night. Vans provide transportation between Ackerman Union, westside apartments, Lot 36, campus buildings, and residence halls Monday through Thursday from 6 to 11 p.m. See http://map.ais.ucla.edu/go/1001008 or call (310) 825-1493 to request pick up from most of the drop-off locations.

UCLA Campus Assault Resources and Education (CARE) Prevention and Education Services—including workshops, self-defense classes, counseling, and referrals—increase physical and psychological preparedness and heighten awareness of the complex issues of rape, sexual assault, and relationship violence. See http://www.counseling.ucla.edu/care/ or call (310) 825-0768.

Cardiopulmonary resuscitation (CPR) and basic emergency care courses are offered by the Center for Prehospital Care and can be organized most days and times. See https://www.cpc.mednet.ucla.edu or call (310) 267-5959.

The Office of Environment, Health, and Safety (EH&S) works to reduce workplace hazards on campus and to promote safety at all levels of the University community. EH&S is a consulting resource for UCLA departments and personnel who want to learn how to make the workplace safe. It handles requests for safety information and training, regulatory interpretation and applicability, approval for potentially hazardous procedures, resolution of safety problems, and surveillance and monitoring of persons and workplaces. See http://www.ehs.ucla.edu or call (310) 825-5689.

ASSOCIATED STUDENT SERVICES

Founded when UCLA opened in 1919, the Associated Students UCLA (ASUCLA) provides services to the campus community through student government, student media, and services and enterprises. Every registered UCLA student is a member of ASUCLA. See http://asucla.ucla.edu.

STUDENT GOVERNMENT

Many facets of student life at UCLA are sponsored or organized by student government. Getting involved in the decision-making process is rewarding and offers avenues of expression students may not find in other aspects of their university experience.

Graduate Students Association

The Graduate Students Association (GSA) is the official organization representing UCLA graduate and professional students in academic, administrative, campus, and statewide areas. GSA appoints or elects graduate student members to important campus organizations and committees from the Student Fee Advisory Committee to the committees of the Academic Senate. It sponsors graduate student orientation, the Graduate Student Resource Center, various graduate student journals, programs, and social events, including the Melnitz Movies film program. See http://gsa.asucla.ucla.edu or call (310) 206-8512.

Undergraduate Students Association

Undergraduate student government is embodied in the Undergraduate Students Association (USA). Its governing body, the Undergraduate Students Association Council (USAC), is comprised of elected officers as well as appointed administrative, alumni, and faculty representatives. Every UCLA undergraduate student is a member of USA. See https://www.usac.ucla.edu.

The breadth of USA activities offers an invaluable service to the campus and surrounding communities and provides students the opportunity to participate in and

benefit from these endeavors. For example, USA programs benefit both campus and community through programs to tutor youths and adults, address health needs of ethnic communities, combat poverty and homelessness, and better the environment.

Student government also supports approximately 20 student advocacy groups on campus from the African Student Union to the Vietnamese Student Union.

CAMPUS EVENTS

Each year approximately 40,000 students, faculty, and staff attend programs of the Campus Events Commission (CEC), including a low-cost film program, a speakers program, and performances by dozens of outstanding entertainers.

The Speakers Program brings entertainers, politicians, and literary figures to campus and presents two annual awards programs—the Jack Benny Award for comedic excellence and the Spencer Tracy Award for outstanding screen performance. Speakers and awardees have included notables as varied as Bill Gates, Whoopi Goldberg, and Tom Hanks.

The Concert Program brings new and name performing artists like Rage Against the Machine or A Tribe Called Quest to UCLA for free and affordably priced concerts. See http://campuseventsblog.com or call (310) 825-1958.

The Cultural Affairs Commission sponsors art exhibits in the Kerckhoff Hall Art Gallery, the JazzReggae Festival, Bruin Bash, Hip Hop Explosion, and Worldfest. See http://www.culturalaffairsla.com or call (310) 825-6564.

PUBLICATIONS, WEB, AND BROADCAST MEDIA

Publications and media provide a training ground for aspiring writers, journalists, photographers, and media managers while serving the communication needs of the campus community. Most publications offices are in Kerckhoff Hall. See http://apply.uclastudentmedia.com or call (310) 825-2787.

Daily Bruin

The Daily Bruin, with a circulation of 10,000, is one of the largest daily newspapers in Los Angeles. As the principal outlet for campus news, the Bruin is published each weekday of the academic year (once a week during the summer) and is distributed free from kiosks around campus and local areas. Students work as reporters, editors, designers, photographers, and radio reporters, as well as advertising sales representatives and marketing account executives. New staff members are welcome every quarter. See http://dailybruin.com or call (310) 825-9898.

Textbooks

Seven print newsmagazines reflecting the diversity of the campus community are published each term. Al-Talib (http://al-talib.org), Fem (http://femmagazine.com), Ha’Am (http://haam.org), La Gente (http://lagente.org), Nommoro (http://nominonewsmag.word press.com), OutWrite (http://outwritenewsmag.org), and Pacific Ties (http://pacificties.org) deal respectively with issues relevant to the Muslim; feminist; Jewish; Chicano, Latino, and Native American; African American; lesbian, gay, bisexual, and transgender; and Asian communities. Each includes news and features on political and cultural affairs both on and off campus. Prospective staffers are welcome.

Online Media

Student Media supports the Bruinwalk.com community portal website at http://www.bruinwalk.com. Features include UCLA professor reviews, used book trading, reviews of apartments near UCLA, and a campus calendar.

UCLAradio

UCLAradio broadcasts live over the Internet from http://uclradio.com and features college alternative, hip-hop, jazz, and world music. It also covers select Bruin football, basketball, and baseball games and a lineup of sports talk shows. Studios are in Ackerman Union, (310) 825-9999; all positions, including on-air, news staff, and advertising representatives, are open to students.

UCLA Yearbook

The UCLA yearbook, BruinLife, is one of the largest student publication efforts on campus. Available each June, it contains photographs and information on undergraduate students, graduating seniors, athletic teams, fraternities and sororities, and campus activities. Students who would like to participate may contact the yearbook staff. See http://www.bruinlife.com or call (310) 825-2640.

UCLA RESTAURANTS

ASUCLA operates more than a dozen restaurants and two coffee houses on campus, assuring a range of eating options from Italian to sushi. From the residence halls to the student union, a restaurant is never far. Hours vary, especially during summer and holidays. For hours and locations of all the restaurants, see http://asucla.ucla.edu/ucla-restaurant-hours/.

UCLA STORE

In terms of sales, the UCLA Store is the biggest college store in the nation. There are five locations on campus. Author signings, sales, and other special events are announced in the Daily Bruin or on the UCLA Store site. See http://shop.uclastore.com.

The UCLA Store—Ackerman Union, (310) 825-7711, has eight departments. The Textbooks department carries required and recommended texts for most undergraduate and many graduate courses and operates a buyback service so students can sell used texts. BookZone offers reference books and a wide selection of titles in literature, science, history, and technical disciplines, including the UCLA Faculty Authors section. The Computer Store carries personal computers, peripherals, accessories, and software at low academic prices. Essentials offers school and office supplies, including consumables for computer printers. BearWear specializes in UCLA emblematic merchandise. Fast Track carries active sportswear for men and women, plus an extensive Clinique counter. Market is a convenience store, with snacks, health and beauty aids, gifts, and greeting cards.

The UCLA Store has five campus locations. Textbooks is one of eight departments in the main Ackerman Union store.
New freshman and transfer students who are admitted for Fall Quarter and apply by the deadline are guaranteed housing. Graduate student housing is also available.

OTHER SERVICES AND ENTERPRISES

ASUCLA oversees a variety of other services ranging from a post office to a hair salon. Most are located in Ackerman Union.

Students preparing to graduate can use the Campus Photo Studio, http://shop.uclastore.com/c-522-grad-portraits.aspx, (310) 206-8433, for their senior yearbook portraits. Graduation Etc., http://shop.uclastore.com/c-320-graduation-etc.aspx, (310) 825-2587, sells and rents caps, gowns, and hoods for degree ceremonies and provides announcements, diploma mounting, and other graduation-related products and services.

On the lighter side, ASUCLA operates Game On, (310) 794-2122, with PC, Xbox 360, PS3, and Wii electronic games.

The UCLA BruinCard is a mandatory student identification card that can electronically confirm student identification, transaction privileges, and access to on-campus facilities.

To apply for on-campus housing, the application must be completed online by the deadlines set by the housing office. See http://map.ais.ucla.edu/go/1001744. Students applying for Winter or Spring Quarter are assigned on a space-available basis in the order applications are received.

Per-person costs for the academic year start at $11,225. Consult the housing office for the range of price options. See http://map.ais.ucla.edu/go/1005183.

The Office of Residential Life is responsible for student conduct in residence halls and suites and provides professional and student staff members to counsel residents on programming and other problems. See https://www.orl.ucla.edu or call (310) 825-3401.

The office is also a designated Sexual Harassment Information Center and Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

Off-Campus Housing

Within walking distance of campus, the University maintains five off-campus apartment buildings for full-time single transfer and upper division students. Apartments vary from singles to two-bedroom units, with bedrooms usually shared by two or three students. Not all types of apartment spaces are available to entering students. See http://map.ais.ucla.edu/go/1001723 or call (310) 983-1300.

Off-campus apartments for married, single-parent, and single graduate students include unfurnished studio, one-, two-, and three-bedroom units, some located within walking distance of campus and others about five miles from campus. Assignment to several of the apartment units is by wait list; students should not wait until they have been accepted to UCLA to apply. Verification of marriage and/or copies of children’s birth certificates must accompany applications for married and family housing. See http://map.ais.ucla.edu/go/1001376 or http://map.ais.ucla.edu/go/1001744 or (310) 983-1300.

The UCLA Community Housing Office provides information and listings for non-University-owned apartments, cooperatives, private apartments, roommates, rooms in private homes, and short-term housing. Rental listings are updated daily. The office also has bus schedules, area maps, and neighborhood profiles. A current BruinCard or letter of acceptance is required for service. See http://www.cho.ucla.edu or call (310) 825-4491.

Many of the fraternities and sororities at UCLA own chapter houses. Complete information and membership requirements are provided by Fraternity and Sorority Relations. See http://www.greeklife.ucla.edu/housing.html or call (310) 825-6322.

BANKING

Automated teller machines representing several major banks are located in Ackerman Union and near restaurants and shops around campus.

The University Credit Union has an office in West Los Angeles and a branch office in Ackerman Union. See http://www.ucu.org or call (310) 477-6628.

The UCLA Bruins shop—Health Sciences, http://shop.uclastore.com/c-321-health-sciences.aspx, (310) 825-7721, specializes in books and supplies for students in dentistry, medicine, nursing, public health, and related areas. UCLA Store—Lu Valle Commons, (310) 825-7238, carries art supplies and books, as well as textbooks and supplies for all on-campus Extension courses and selected academic programs (architecture and urban design, art, design, film, information studies, law, management, public policy, social welfare, theater, urban planning). North Campus Shop, and Hill Top Shop in Sunset Village, are convenience store locations.

Services for Student Life

From housing to transportation, basic student needs are facilitated by services designed to enhance all aspects of student living.

Accommodations

The UCLA Housing website is the best guide for finding the right kind of accommodation for different lifestyles and budgets. It includes detailed information about the different residence options, dining plans, support and extracurricular programs, and an online housing application. See http://www.housing.ucla.edu or call (310) 206-7011.

On-Campus Housing

Many students, especially those in their first year, choose to live on campus. Besides the convenience, it’s a good way to meet other people and to find out about social and academic activities. Four residence halls, four deluxe residence halls, two residential suites, and five residential plazas accommodate over 11,000 undergraduate students. All on-campus housing is coed and within walking distance to classrooms.

Rooms in undergraduate residences are furnished and usually shared between two to three students. Meals are served daily at residential restaurants, and students may choose from a variety of meal plans.

Off-Campus Housing

Within walking distance of campus, the University maintains five off-campus apartment buildings for full-time single transfer and upper division students. Apartments vary from singles to two-bedroom units, with bedrooms usually shared by two or three students. Not all types of apartment spaces are available to entering students. See http://map.ais.ucla.edu/go/1001723 or call (310) 983-1300.

Off-campus apartments for married, single-parent, and single graduate students include unfurnished studio, one-, two-, and three-bedroom units, some located within walking distance of campus and others about five miles from campus. Assignment to several of the apartment units is by wait list; students should not wait until they have been accepted to UCLA to apply. Verification of marriage and/or copies of children’s birth certificates must accompany applications for married and family housing. See http://map.ais.ucla.edu/go/1001376 or http://map.ais.ucla.edu/go/1002103 or call (310) 398-4692.

The UCLA Community Housing Office provides information and listings for non-University-owned apartments, cooperatives, private apartments, roommates, rooms in private homes, and short-term housing. Rental listings are updated daily. The office also has bus schedules, area maps, and neighborhood profiles. A current BruinCard or letter of acceptance is required for service. See http://www.cho.ucla.edu or call (310) 825-4491.

Many of the fraternities and sororities at UCLA own chapter houses. Complete information and membership requirements are provided by Fraternity and Sorority Relations. See http://www.greeklife.ucla.edu/housing.html or call (310) 825-6322.

Banking

Banking

Automated teller machines representing several major banks are located in Ackerman Union and near restaurants and shops around campus.

The University Credit Union has an office in West Los Angeles and a branch office in Ackerman Union. See http://www.ucu.org or call (310) 477-6628.
status and eligibility for services. Supportive photo identification, such as a driver's license or passport, is required when the card is issued.

The primary benefit of the BruinCard is convenience. It is a versatile card that serves the following functions: confirmation of student status; ID card for faculty, staff, and students; residence hall access and meal card; laundry card; library card; recreation card; debit card (if activated) for purchases at campus stores and restaurants on and off campus; and access to the Santa Monica and Culver City bus lines.

Students with a hold from an office with which they have an outstanding obligation (financial, academic, or administrative) may not receive services until the hold is released by the initiating office. For details on outstanding holds and initiating offices, check MyUCLA at https://my.ucla.edu.

The BruinCard center is located in 123 Kerckhoff Hall. See https://secure.bruincard.ucla.edu/bcw/web/home.aspx to check account balance, make deposits, view recent transactions, and report lost or stolen cards or call (310) 825-2356.

**BRUIN RESOURCE CENTER**

The Bruin Resource Center (BRC) in the Student Activities Center can help students navigate the campus and its many services by directing them to the correct office or personnel to meet their specific needs.

The center provides services to all UCLA students, including specialized services for transfer and reentry students, students who are transitioning out of foster care, student parents, and veterans. Additional offerings include workshops and academic courses to help students develop practical skills and knowledge to succeed at UCLA. The BRC also houses the Veterans Resource Office (http://www.veterans.ucla.edu, 310-206-6915 or 206-3819) which offers services specifically designed to assist students who are U.S. armed forces veterans or current military members. See http://www.brc.ucla.edu or call (310) 825-3945.

**CAREER CENTER**

The UCLA Career Center, located in the Strathmore Building, offers career planning and employment assistance free to all UCLA students. See http://career.ucla.edu or call (310) 206-1915.

**Career Planning and Exploration**

Career counselors provide assistance in selecting a major, setting realistic career goals, investigating career options, evaluating graduate and professional school programs, and developing skills to conduct a successful job search. Information on local, national, and international internship opportunities can assist students in exploring different career possibilities, making important professional contacts, and obtaining valuable on-the-job experience. The Career Center library offers a collection of over 3,000 resources, including career-related books and directories, videos, periodicals, and other materials. In addition, the Career Center offers workshops on a variety of career-related topics; many are repeated several times each term.

**Employment Assistance**

Students who need extra money to finance their college degree can find a large volume of part-time, temporary, and seasonal employment leads advertised through the Career Center’s 24-hour BruinView™ online listings. Students and recent graduates looking for full-time, entry-level career positions may access hundreds of current professional, managerial, and technical openings in numerous career fields. Seniors and graduate students may participate in campus interviews for positions in corporations, government, not-for-profit organizations, elementary and secondary schools, community colleges, and four-year academic institutions. Annual career fairs and special events offer additional opportunities to meet potential employers.

**CENTRAL TICKET OFFICE**

Tickets for UCLA events are available at the Central Ticket Office (CTO) in the James West Alumni Center. As part of its service, CTO offers students with current BruinCards discount tickets to campus athletic and cultural events and local movies. Students may also purchase tickets to off-campus events through Ticketmaster, as well as student discount tickets for Los Angeles area buses. See http://tickets.ucla.edu or call (310) 825-2101.

**CHILD CARE**

UCLA Early Care and Education (ECE) operates three child care centers near the University and student housing. Care is provided for children two months to six years old at most centers. Fees depend on the age of the child. A limited number of state grants and partial scholarship subsidies is available for eligible student families. See http://www.ece.ucla.edu or http://map.ais.ucla.edu/go/1001644 or call (310) 825-5086.

The ECE Child Care Resource Program helps parents make off-campus child care arrangements and coordinates a Choosing Child Care Forum each month. See http://map.ais.ucla.edu/go/1000688 or call (310) 825-8474.

The ECE University Village Kindergarten Program offers a multicultural, full-day science-based curriculum for five-year-old children of UCLA students, faculty, and staff. It also offers summer enrichment activities. See http://map.ais.ucla.edu/go/1003991 or call (310) 915-5827.

University Parents Nursery School is a UCLA-affiliated, parent-participation, multicultural cooperative school for two- through five-year-old children of UCLA students, faculty, and staff. It is located in the University Village Child Care Complex. See http://www.upns.info or call (310) 397-2735.

**DEAN OF STUDENTS**

The Office of the Dean of Students in Murphy Hall helps students, either directly or by referral, with whatever needs they might have. Direct services include general counseling; sending emergency messages to students; and assisting in understanding University policies and procedures, including grievance procedures regarding student records, discrimination, and student debts.

---

The campus offers multiple services to support students who are veterans and members of the military.
In addition, the office publishes Official Notices in the Daily Bruin at various times during the year. Such notices are important, and all students are held responsible for the information in them.

The Office of the Dean of Students may also administer campus discipline and enforce the standards of citizenship that students are expected to follow at UCLA. Standards involve complying with the policies and regulations governing this campus and being aware that violation of those policies or regulations can result in disciplinary action. Refer to Student Conduct Policies in the Appendix for more information. See http://www.deanofstudents.ucla.edu or call (310) 825-3871.

INTERNATIONAL STUDENT SERVICES

International student services in Bradley Hall provide support for UCLA’s international community, particularly for nonimmigrant students. An orientation program helps international students plan their academic objectives, and programs throughout the year allow them to share viewpoints with American students and the community.

Dashew Center for International Students and Scholars

The Dashew Center for International Students and Scholars assists students with questions about immigration, employment, government regulations, financial aid, academic and administrative procedures, cultural adjustment, and personal matters. The center seeks to improve student and community relationships, helps international students with language, housing, and personal concerns, and sponsors cultural, educational, and social programs. The center is a designated Sexual Harassment Information Center for international students and a Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information). In addition, the center provides visa assistance for faculty members, researchers, and postdoctoral scholars. See http://www.internationalcenter.ucla.edu or call (310) 825-1681.

LESBIAN GAY BISEXUAL TRANSGENDER CAMPUS RESOURCE CENTER

The Lesbian Gay Bisexual Transgender (LGBT) Campus Resource Center in the Student Activities Center provides education, information, and advocacy services for the UCLA community. The center offers support groups, educational workshops, training seminars, and social activities and maintains a library of 4,000 books, periodicals, and films. The staff provides confidential assistance and support to students, faculty, and staff who feel they have experienced harassment or discrimination or who wish to connect to the campus LGBT community. See http://www.lgbt.ucla.edu or call (310) 206-3628.

OFFICE FOR STUDENTS WITH DISABILITIES

The Office for Students with Disabilities (OSD) in Murphy Hall provides academic support services to regularly enrolled students with documented permanent or temporary disabilities in compliance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990, and University policies. Services include campus orientation and accessibility, note takers, reader service, sign language interpreters, Learning Disabilities Program, registration assistance, test-taking facilitation, special parking assistance, real-time captioning, assistive listening devices, on-campus transportation, adaptive equipment, support groups and workshops, tutorial referral, special materials, housing assistance, referral to the Disabilities and Computing Program, and processing of California Department of Rehabilitation authorizations. There is no fee for any of these services. All contacts and assistance are handled confidentially. See http://www.osd.ucla.edu or call (310) 825-1501, TDD (310) 206-6083, fax (310) 825-9656.

For information on the Disabilities and Computing Program, see Services for Study under Student Services earlier in this section.

OFFICE OF OMBUDS SERVICES

The Office of Ombuds Services responds to issues and concerns from students, staff, faculty, and administrators. Acting impartially, ombuds persons may investigate unresolved conflicts or facilitate the resolution of problems for which there are no established guidelines and may also, where possible and when requested by the visitor, assist in resolving an issue through mediation (including sexual harassment cases). The office is in the Strathmore Building. See http://www.ombuds.ucla.edu or call (310) 825-7627.

The office is also a designated Sexual Harassment Information Center for students, faculty, and staff, as well as a campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

PARKING AND COMMUTER SERVICES

Parking, ridesharing, and other transportation options and services are offered through UCLA Transportation Services. There are several commuting alternatives for students to get to and from campus without driving their cars. Both full-time and part-time riding opportunities are available.

Commuter Services

The Bruin Commuter Services (BCS) Office is the best place for information on transportation options. Many students form or join existing UCLA carpools or vanpools. Students can use Zimride (http://www.zimride.com/ucla), a Facebook application, to find one-time rides or create a carpool with fellow Facebook users. More than 160 vanpools (https://main.transporation.ucla.edu/getting-to-ucla/vanpool) commute to UCLA from 85 Southern California communities, and full- and part-time riding opportunities are available. The Bruin Commuter Club (https://main.transportation.ucla.edu/getting-to-ucla/bruin-commuter-club) offers special benefits and incentives to eligible UCLA students who ride public transit, a UCLA vanpool, or carpool with two other persons. Students may also rent a car through Zipcar (http://www.zipcar.com/ucla).

Information on these and other commuting options, including an extensive network of public transit, are available online or at the BCS Office in the Strathmore Building at Strathmore Drive and Westwood Plaza.
Through Student Legal Services in Murphy Hall, tenant relations; accident and injury problems; legal problems, including those related to landlord/supervision of attorneys. They help students resolve problems or questions about their legal rights. can get currently registered and enrolled students with legal assistance from attorneys or law students under direct supervision of attorneys. They help students resolve legal problems, including those related to landlord/tenant relations; accident and injury problems;

**STUDENT LEGAL SERVICES**

Students interested in purchasing parking should access the student parking application at https://www.transportation.ucla.edu/appmain.htm using their UCLA Logon ID to see personalized parking options based on campus data (class standing, housing status, graduate student major, etc.). Parking offers are prioritized according to class standing listed in the student database as follows: graduate students, followed by seniors and juniors, followed by sophomores and first-year students. Within each category, priority is given to students who carpool. Students must be registered for the current term to apply for parking.

All commuter students qualify for parking. Students living within ZIP code 90024 must pay the residence hall parking rate. Students living on campus (excluding Regents’ Scholars) must have local, verifiable, current, continuous paid employment, paid internship, or an academic apprenticeship to qualify for parking.

Carpool groups that apply on time are given priority for carpool permits at a discounted rate. All members of the carpool must qualify under the carpool parking requirements at https://main.transportation.ucla.edu/campus-parking/students/student-carpool-permit-requirements.

Students are encouraged to apply on time and follow all application and payment guidelines to increase their chances of receiving a permit. Permits are not guaranteed. Students who are not offered a parking assignment during a given term must reapply for parking in a subsequent term. Student parking applications, payment deadlines, and related information are available on the student parking permits webpage at https://main.transportation.ucla.edu/campus-parking/students.

Students with permanent disabilities who have disabled persons’ placards or DMV-issued disabled persons’ license plates, and students with short-term disabilities, may apply to the Office for Students with Disabilities for parking assignments and on-campus transportation assistance. See http://www.osd.ucla.edu/docs/Publications/Guidelines/Parking.html or call (310) 825-1501.

Parking permits and access cards to campus lots and structures are not transferable and may be purchased only from UCLA Parking Services. Resale is prohibited and subjects both buyer and seller to disciplinary action.

**POST OFFICES**

Campus mail is handled by UCLA Mail, Document, and Distribution Services, which offers full-service document processing and delivery for the campus community. See https://www.mdds.ucla.edu or call (310) 825-0374.

ASUCLA operates a U.S. Postal Service express post office on A Level in Ackerman Union. Call (310) 206-5596 for more information.

**STUDENT LEGAL SERVICES**

Through Student Legal Services in Murphy Hall, tenant relations; accident and injury problems; legal problems, including those related to landlord/tenant relations; accident and injury problems;

**STUDENT ACTIVITIES**

The opportunities to participate in extracurricular activities at UCLA are virtually unlimited and provide a good way for students to expand their horizons beyond classroom learning.

**CLUBS AND ORGANIZATIONS**

Joining a club or organization is a great way to meet other students with shared interests and to get involved in campus life.

**COMMUNITY PROGRAMS OFFICE**

The UCLA Community Programs Office (CPO) was established in 1970 by concerned students, staff, and faculty who felt that students’ educational experiences at UCLA should expand outside the classroom and into Los Angeles.

Currently, the CPO houses 24 student-initiated community service projects that provide educational, legal, social, medical, and academic services to underserved communities in Southern California, seven student-initiated outreach projects that seek to improve the number of students from underserved areas of Southern California who attend colleges and universities, and six student-initiated retention projects that seek to ensure that all students who enter UCLA actually graduate. CPO is unique because it provides a multicultural and ethnically diverse environment to the UCLA campus. See http://www.cpo.ucla.edu or call (310) 825-5969.

**FRATERNITY AND SORORITY RELATIONS**

Fraternities and sororities have been at UCLA since the early 1920s. Today UCLA is home to more than 68 national and local Greek-letter organizations that make up one of the largest Greek systems on the West Coast.

Fraternity and Sorority Relations (FSR) interprets University policies, procedures, and regulations and acts as a liaison between established Greek organizations and the University. It coordinates Greek-letter social organizations that participate in programs such as the Greek Leadership Conference, Membership Recruitment...
ABOUT UCLA

STUDENT ORGANIZATIONS, LEADERSHIP, AND ENGAGEMENT

UCLA has over 1,000 different organizations recognized by Student Organizations, Leadership, and Engagement (SOLE—formerly the Center for Student Programming)—more than are found on almost any other university campus in the country. Organizations registered with SOLE include political, recreational, community service, cultural, academic, religious, and residential clubs. It only takes three people to start a new club if their interests are not already represented. SOLE also handles complaints of misconduct against officially recognized student organizations. See http://www.studentactivities.ucla.edu or call (310) 825-7041.

PERFORMING ARTS

Concerts, dance recitals, and theater productions are all part of exceptional programs offered by the Ethnomusicology, Film, Television, and Digital Media, Music, Theater, and World Arts and Cultures/Dance Departments and by the Center for Art of Performance at UCLA.

DEPARTMENT EVENTS

The Ethnomusicology Department provides students with the opportunity to perform in various world music and jazz ensembles that provide concerts listed in the department’s schedule of events. See http://www.ethnomusic.ucla.edu.

The Film, Television, and Digital Media Department features student-directed films and television programs throughout the year, and the Theater Department presents a series of major productions to the general public. The School of Theater, Film, and Television’s annual Design Showcase West and Film Festival is a week-long celebration of film, digital media, animation, screenwriting, and acting that features everything from performance art to the classics. See http://www.tft.ucla.edu.

The Music Department features performances by ensembles ranging from music theater to opera. In addition, the Gluck Outreach Program and Music Partnership program provide community outreach through free performances throughout the Los Angeles and Southern California region. See http://www.music.ucla.edu.

The World Arts and Cultures/Dance Department presents events and concerts involving departmental faculty members, guest artists, and students. Student performances include M.F.A. concerts, an undergraduate and graduate student-produced concert, and the Senior Concert/Colloquium. Students also perform in more informal programs, such as the end-of-term student works festival or Pau Hana, that feature many world dance forms. See http://www.wacd.ucla.edu.

CENTER FOR THE ART OF PERFORMANCE AT UCLA

Since 1937, the Center for the Art of Performance at UCLA has served as the premier West Coast showcase for world-class performing artists and ensembles as well as innovative new work in dance, music, theater, and performance art. The center presents more than 200 public concerts and events each year, often sponsoring debut performances of new works by major artists. Through the center, the campus hosts a varied and active performance program, ranging from regular concerts by the Los Angeles Chamber Orchestra to events with the Paul Dresher Ensemble, American Youth Symphony, Kronos Quartet, Chick Corea, and Philip Glass Ensemble. Subject to availability, discount tickets are offered to students, faculty, and staff. See http://cap.ucla.edu or call (310) 825-4401.

SPORTS AND ATHLETICS

Athletics play a major role in the University’s mission to provide a well-rounded education both in and out of the classroom. UCLA continues to live up to its reputation as a national leader in intercollegiate sports and ranks first in the U.S. in the number of National Collegiate Athletic Association (NCAA) championships won (111). In 2012-13 the UCLA athletic programs (men and women) placed third in the Directors Cup national all-around excellence survey; and the men placed first in the Capital One Cup. In the 23-year history of the former USA Today survey, the men’s program placed first 11 times, while the women’s program placed first five times in the final nine years. UCLA was the first university in the country to win five NCAA men’s and women’s championships in a single year (1981-82). See http://www.uclabruins.com.

UCLA also has produced a record number of professional athletes such as Troy Aikman, Eric Karros, Kevin Love, Reggie Miller, Natalie Williams, and Corey Pavin and Olympians such as gold medalists Lisa Fernandez, Karch Kiraly, Gail Devers, Peter Vidmar, Dot Richardson, and Jackie Joyner-Kersee.

ATHLETIC FACILITIES

The major indoor arena at UCLA is the famed Pauley Pavilion, which seats almost 14,000 for UCLA basketball, volleyball, and gymnastics events. It was the site of the 1984 Summer Olympics gymnastics competition. Immediately adjacent, Drake Stadium is the home of UCLA track and field and soccer competitions and site of many outdoor events, including the U.S. Olympic Festival 1991. The Spieker Aquatic Center is home to the UCLA water polo, swimming,
and diving teams. The Los Angeles Tennis Center, a 5,800-seat outdoor tennis stadium and clubhouse, was the site of the 1984 Olympic tennis competition. Easton Softball Stadium, which seats 1,300, is the home of the championship women's softball team. The Morgan Intercollegiate Athletics Center houses the UCLA Athletic Hall of Fame and the actual personal den of Coach John Wooden. Off-campus facilities include Jackie Robinson Stadium for varsity baseball and the renowned Rose Bowl in Pasadena, home of the UCLA football team.

MEN’S INTERCOLLEGIATE SPORTS

UCLA is a member of the Pacific-12 Conference, which includes Arizona State University; University of Arizona; University of California, Berkeley; University of Colorado; Oregon State University; University of Oregon; Stanford University; University of Southern California; University of Utah; Washington State University; and the University of Washington. UCLA teams have won an overall total of 72 NCAA men’s championships—second highest in the nation—including 19 in volleyball, 16 in tennis, 11 in basketball, eight each in track and field and water polo, four in soccer, two each in golf and gymnastics, and one each in baseball and swimming. Students can participate on the varsity level in football, basketball, track, baseball, tennis, volleyball, water polo, golf, soccer, and cross-country. Call (310) 825-8699 for further information.

WOMEN’S INTERCOLLEGIATE SPORTS

With 11 different varsity sports, the UCLA women’s program is one of the most extensive in the country, and UCLA has played an important role in establishing women’s sports as part of the NCAA. Women’s teams have won an overall total of 39 NCAA titles—second highest in the nation—including 11 in softball, seven in water polo, six in gymnastics, five in track and field, four in volleyball, three in golf, two in tennis, and one in soccer. Other nationally ranked teams are those in basketball, swimming, and cross-country. Call (310) 825-8699 for further information.

UCLA RECREATION

To help students learn new skills, meet people with similar interests, relieve stress, and increase fitness, the Department of Cultural and Recreational Affairs (CRA) oversees programs from intramural sports to outdoor adventures. See http://www.recreation.ucla.edu or call (310) 825-3701.

INTRAMURAL AND CLUB SPORTS

The UCLA Intramural Sports Program, (310) 267-5416, consists of team, dual, and individual sports competition in tournament or league play. Over 1,800 teams and 8,000 participants compete throughout the year in various sports activities ranging from basketball to weight lifting. UCLA students and recreation membership holders are eligible. Varying skill levels are offered in almost all activities, and the emphasis is on friendly competition.

The Club Sports Program, (310) 267-5416, offers students the chance to organize, coach, or participate in sports that fall beyond the scope of intramurals but are not offered at the varsity level. Recognized teams exist in archery, badminton, baseball, boxing, Brazilian jiu-jitsu, cycling, dragon boat, fencing, figure skating, golf, gymnastics, ice hockey, Japanese martial arts, jeet kune do, kendo, kung fu, men’s and women’s lacrosse, powerlifting, quidditch, men’s rowing, men’s and women’s rugby, running, sailing, sambo, shikendo, snowboarding and skiing, men’s and women’s soccer, softball, surfing, swimming, table tennis, taekwondo, tennis, triathlon, men’s and women’s ultimate, men’s and women’s volleyball, men’s and women’s water polo, waterskiing, wrestling, and wushu.

OUTDOOR ADVENTURES

Outdoor Adventures, (310) 206-1252, offer students the chance to get away and enjoy the wonders of local and distant mountains and waterways. Activities designed for beginning to experienced outdoors people include camping, rock climbing, scuba diving, windsurfing, canoeing, kayaking, and hiking.

CLASS PROGRAMS

Noncredit recreation classes in arts, dance, fitness sports, kayaking, martial arts, outdoor adventures, rock wall, rowing, sailing, surfing, swimming, tennis, water aerobics, windsurfing, yoga, and a variety of group fitness programs are offered for beginning and intermediate levels. Private lessons in tennis, fitness activities, swimming, racquetball, martial arts, and golf are also available. Fitness is offered either as a recreation class or on a drop-in basis.

FACILITIES

For registered students who prefer independent recreation and exercise, CRA offers access to many facilities. The John R. Wooden Recreation and Sports Center has multiple gymnasia, handball/racquetball/squash courts, a weight training facility, rock climbing wall, exercise/dance and martial arts studios, and a games lounge. The Sunset Canyon Recreation Center offers activities in an outdoor park setting that features a 50-meter swimming pool, 25-yard family pool, picnic/barbecue areas, play fields, outdoor amphitheater, six lighted tennis courts, sand volleyball court, two multipurpose sports courts, and various meeting rooms and lounges, as well as a challenge course. The UCLA Marina Aquatic Center offers sailing, windsurfing, kayaking, rowing, surfing, and other activities. Students also have the use of Pauley Pavilion, Drake Stadium, Sycamore Tennis Courts, Los Angeles Tennis Center, Intramural Fields, Student Activities Center, and Kaufman Hall for recreational sports and activities.
YOUTH AND FAMILY PROGRAMS

About UCLA Youth and Family Programs, (310) 825-3701, offer exciting activities for children 5 to 17 years old. Summer programs include Bruins on Broadway for ages 9 to 14, Bruins on Water for ages 8 to 10, Camp Adventure for ages 11 to 15, Camp Bruin Kids for ages 5 to 10, Camp Explore for ages 7 to 10, Camp Voyager for ages 11 to 15, Counselors in Training for ages 14 to 17, Sunset Sleepover for ages 7 to 12, Teen Programs for ages 11 to 15, group and private lessons, and the Summer Family Entertainment Series. Activities combine play with skill development and deepen the fun in learning.

UCLA ALUMNI ASSOCIATION

Celebrating 80 years of serving the UCLA community, the UCLA Alumni Association has more than 92,000 members, making it one of the largest alumni groups in the nation. Whether a person is a recent graduate, a pioneer Bruin, or somewhere in between, membership in the Alumni Association is the best way to stay connected to UCLA and its growing excellence.

Membership dues enable the Alumni Association to serve as an advocate on campus and to play the vital role of guardian of the value of every UCLA degree. Dues also support programs such as Beat SC Bonfire and Rally, I Love UCLA Week, Dinners for 12 Strangers, Spring Sing, UCLA Alumni Day, senior events, class reunions, career events, and the scholarship program.

The association offers many benefits and services, including career services. Members make friends, pursue lifelong learning, save money, and make a difference. UCLA graduates, Bruin parents, and friends of the University are invited to take advantage of all the association has to offer. Offices are in the James West Alumni Center. See http://alumni.ucla.edu. Call (310) 825-2586 or, outside Los Angeles County, (800) 825-2586 for further information.
UCLA Undergraduate Admission (UA) invites prospective students to visit UCLA for individual or group tours of the campus. Reservations are required. See http://www.admission.ucla.edu/tours.htm or call (310) 825-8764 or 206-3719.

**UNDERGRADUATE ADMISSION**

Undergraduate Admission  
1147 Murphy Hall  
(310) 825-3101  
http://www.admission.ucla.edu

Prospective UCLA undergraduate students should give careful thought to adequate preparation in reading, writing, mathematics, laboratory sciences, languages, visual and performing arts, and other subject areas related to a degree objective or major. To be competitive, UCLA applicants need to present an academic profile much stronger than that represented by the minimum UC admission requirements.

**APPLYING FOR ADMISSION**

To apply for admission to UCLA, complete the UC Application for Admission and Scholarships. Applicants may apply for the Fall Quarter at http://admission.universityofcalifornia.edu/.

One application is used for the nine UC campuses with undergraduate programs. Students apply to one UC campus for a nonrefundable application fee; an additional fee is charged for each additional campus.

**WHEN TO APPLY**

All majors and programs in the College of Letters and Science, Henry Samueli School of Engineering and Applied Science, School of the Arts and Architecture, School of Nursing, and School of Theater, Film, and Television are open for Fall Quarter. The application filing period is November 1-30 of the prior year. See http://www.admission.ucla.edu/prospect/applying.htm for up-to-date information on application procedures.

**NOTIFICATION OF ADMISSION**

The UC Undergraduate Application Processing Service e-mails notices to acknowledge receipt of applications. Subsequently, UCLA Undergraduate Admission notifies students of the admission decision. Fall Quarter freshman applicants are notified beginning in late March and transfers in late April.

Students who are offered admission are asked to submit a Statement of Intent to Register and a Statement of Legal Residence. A nonrefundable deposit, also required at this time, is applied to the Student Services Fee as long as students register in the term to which they are admitted.

**ENTRANCE REQUIREMENTS**

Entrance requirements established by the University follow the guidelines set forth in the California Master Plan for Higher Education, which requires that the top 12.5 percent of the state's high school graduates be eligible for admission to the University of California. Requirements are designed to ensure that all eligible students are adequately prepared for University-level work.

Fulfilling the minimum admission requirements does not assure admission to UCLA. Admission is based on demonstrated high scholarship in preparatory work going well beyond the minimum eligibility requirements. High school honors level and Advanced Placement courses are good preparation regardless of the desired major. UCLA offers admission to those students with the best overall academic preparation, viewed in the context of the applicants’ academic and personal circumstances, extracurricular and volunteer experiences, and the overall strength of the UCLA applicant pool. For details, see http://www.admission.ucla.edu.

**ADMISSION AS A FRESHMAN**

Students are considered freshman applicants if they have not enrolled in a regular session of any college-level institution since graduation from high school. Students who attend summer session immediately following high school graduation are still considered freshman applicants.

**MINIMUM ADMISSION REQUIREMENTS**

To be considered for admission as a freshman, students must meet the subject requirement, scholarship requirement, and examination requirement.

**Subject Requirement**

The subject requirement, sometimes called A to G requirements, is a sequence of high school academic courses required for admission to the University. Each
To be considered for admission as a freshman, students must meet three main requirements: the subject requirement, the scholastic requirement, and the examination requirement. To be competitive, applicants need to present an academic profile much stronger than that represented by the minimum admission requirements.

**Subject Requirement**

</tbody>
</table>

**Scholarship Requirement**

California residents are eligible for admission to the University of California with a 3.0 grade-point average; nonresidents are eligible with a 3.4 GPA. Minimum eligibility does not guarantee admission to UCLA.

**Examination Requirement**

All freshman applicants must submit scores from either the ACT Assessment plus Writing Tests score or the SAT Reasoning Test score.

The tests should be taken by December of the senior year, as they are part of the review process. Students should request that test results be sent directly to UCLA when they take the test.

**ADMISSION SELECTION**

UCLA selects students using a carefully designed holistic evaluation process that takes into account an applicant’s achievements, both academic and nonacademic, in the context of the opportunities available to the student. Among other factors, holistic evaluation specifically considers academic grade-point average; performance on standardized tests; the quality, quantity, and level of coursework taken; sustained participation in activities that develop academic and intellectual abilities; leadership and initiative; employment and personal responsibilities; and overcoming life challenges related to personal or family situations.

Because admission requirements and selection criteria may change, freshman applicants should see http://www.admission.ucla.edu/Prospect/Adm_f.htm for the most complete and up-to-date information.

**ADMISSION AS A TRANSFER STUDENT**

Students are considered transfer applicants if they have been a registered student (1) at another college or university or (2) in college-level extension courses. (This does not include attending a summer session immediately following high school graduation.) Students may not disregard their college record and apply for admission as a freshman.

In accordance with the California Master Plan for Higher Education, first preference is given to California community college applicants. Applicants transferring from other UC campuses are next in priority, followed by applicants transferring from other colleges and universities. Each application receives a holistic evaluation, integrating all available information. Students attaining senior standing are generally not admitted.

Academic criteria are as follows: junior-level standing (60 semester/90 quarter transferable units completed) by the end of the spring term before transfer, grade-point average in transferable courses, significant preparation for the major, completion of the English composition and mathematics requirements, and progress toward completion of the Intersegmental General Education Transfer Curriculum (IGETC), another UC campus general education requirements, or UCLA general education requirements.

For details on transfer admission requirements, refer to the guidelines in the application. See http://www.admission.ucla.edu/prospect/Adm_tr/tradms.htm.
INTERCAMPUS TRANSFERS
Undergraduate students registered in a regular session at any University of California campus (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Submit the UC Application for Transfer Admission and Scholarships with the required application fees. The filing periods are the same as those for new applicants. Students who have attended another UC campus and wish to be considered for admission to UCLA must have been in good standing when they left that campus. Intercampus transfers are not automatic; students must compete with all other applicants.

TRANSFER CREDIT AND CREDIT BY EXAMINATION
The University awards unit credit to transfer students for certain courses completed at other accredited colleges and universities. To be accepted for credit, the courses must be comparable to those offered at the University, as determined by Undergraduate Admission. All courses that meet the criteria are used in determining eligibility for admission.

To convert semester units into quarter units, multiply the semester units by 1.5. For example, 12 semester units x 1.5 = 18 quarter units.

College credit for examinations given by national testing services is generally not allowed, except for the AP Examinations given by the College Board and the International Baccalaureate higher-level examinations. See http://www.admission.ucla.edu/trcredit.htm.

INTERNATIONAL APPLICANTS
To be considered for admission to the University of California, international students must have completed secondary school with a superior average in academic subjects and have earned a certificate of completion that would enable them to be admitted to a university in the home country.

The application for admission, copies of official certificates, and detailed records of all secondary schools attended should be submitted as early as possible after the filing period opens. This allows time for the necessary correspondence and, if students are admitted, to obtain passport visas.

Proficiency in English. Students whose native language is not English must have sufficient command of English to benefit from instruction at UCLA. First-year undergraduate students who have not otherwise satisfied the Entry-Level Writing requirement and who have not taken the Analytical Writing Placement Examination (AWPE) by the time they enter UCLA must take the AWPE in their first term at UCLA. Results of the AWPE are reviewed to determine whether students should complete the English as a Second Language (ESL) requirement, prior to satisfying the Entry-Level Writing requirement, in order to demonstrate sufficient command of English. If held for the ESL requirement, students must complete the requirement by taking the designated ESL courses.

In addition, they are advised to take the Test of English as a Foreign Language (TOEFL) as a preliminary means of testing their ability. Make arrangements for this test by contacting TOEFL/TSE Publications, P.O. Box 6151, Princeton, NJ 08541-6151, (609) 771-7100 or at http://www.ets.org. Have the test results sent directly to UCLA Undergraduate Admission.

SECOND BACHELOR’S DEGREE
By policy, second bachelor's degrees are not generally granted.

REGISTRATION
Registrar's Office
1113 Murphy Hall
(310) 825-1091, option 6
http://www.registrar.ucla.edu

Registration consists of paying fees and enrolling in classes.
1. Registration fees and other University charges are due the 20th of each month. BruinBill accounts can be viewed through MyUCLA.
2. Enrollment in classes is completed through MyUCLA at https://my.ucla.edu.

Students must complete both processes by the established deadlines to be officially registered and enrolled for the term.

PAYING FEES
Details on fee payment, enrollment procedures, and deadlines are in the Schedule of Classes at http://www.registrar.ucla.edu/schedule/.

E-BILL
BruinBill accounts are administered electronically (e-bill) through MyUCLA. Financial activity is displayed for the current term, as well as account activity for the last 24 months. MyUCLA also provides a link to important communications from the University regarding registration and University policies. Students can pay their BruinBill account electronically using electronic checks with no fee, or American Express, Discover, MasterCard, and VISA credit cards with a fee.

ANNUAL UNDERGRADUATE FEES
Although the exact cost of attending UCLA varies, there are some fees that all UCLA students must pay. UCLA does not charge on a per-unit basis. Each entering and readmitted student is required to submit a Statement of Legal Residence. Students classified as nonresidents of California must pay annual nonresident supplemental tuition in addition to registration fees. Legal residents of California are not required to pay nonresident supplemental tuition. For a definition of residence and nonresidence, see the Appendix.
Fees are subject to change without notice by The Regents. See http://www.registrar.ucla.edu/fees/ for updates. The Student Services Fee covers student expenses such as counseling, facilities, registration, graduation, and health services. The fee is charged whether or not students make use of these services.

**INSTRUCTIONAL ENHANCEMENT INITIATIVE FEE**

The Instructional Enhancement Initiative (IEI) Fee supports technology in undergraduate education. The fee helps support course websites and online tools, computer labs, and software. For more information, see http://www.iei.ucla.edu.

**COURSE MATERIALS AND SERVICES FEES**

The College of Letters and Science and each school are authorized to assess course materials and services fees. Some course materials and services fees are assessed based on actual enrollment at the end of the fourth week of classes. Students are responsible for ensuring that all Study List errors and omissions are corrected prior to the end of the second week. All students in a course with an approved course materials and services fee are assessed the fee, regardless of major. The fee is nonrefundable. Students who are approved for a Late Add enrollment in a course after the third week are required to pay the course materials and services fee, which is billed through BruinBill, for the entire term.

For fee amounts and updates, see http://www.registrar.ucla.edu/fees/.

**MISCELLANEOUS FEES**

Miscellaneous fees include charges for late registration fees payment. Late fees also apply if students file their Study List late or do not pay off BruinBill balances on time. Fees are charged if any check is returned by a bank for any reason. Charges are assessed for most petitions and other special requests. A full list of miscellaneous fees is posted at http://www.registrar.ucla.edu/fees/miscfee.htm.

**STUDENT HEALTH INSURANCE**

All UCLA undergraduate students are automatically assessed for and enrolled in the University of California Student Health Insurance Plan (UCSHIP) as a condition of registration at UCLA. Continued enrollment in a qualified medical/health insurance plan must be maintained during all registered terms. UCSHIP components are medical, vision, dental, and behavioral health services.

The UCSHIP fee is billed each term along with other UCLA fees. UCSHIP fulfills all of the requirements mandated for a qualified medical/health insurance plan as defined by the University. The Ashe Student Health and Wellness Center is the primary healthcare provider for UCSHIP and is where all nonemergency medical care must be initiated for UCSHIP claim payment consideration. See http://www.studenthealth.ucla.edu.

**Waiving UCSHIP**

Students may waive UCSHIP if they (1) maintain active enrollment in a qualified medical/health insurance plan that meets all established requirements, (2) apply for a UCSHIP waiver within established deadlines each term, and (3) correctly complete the online UCSHIP waiver form.

Students must apply for a UCSHIP waiver online. A pre-waiver worksheet is available to assist students before they complete an actual waiver. See the Ashe Center website for details, including a definition of qualified private medical/health insurance. Click the Insurance tab on http://www.studenthealth.ucla.edu and select the appropriate waiver link.

**Deadlines for Waiving UCSHIP**

Third-party individuals may not waive UCSHIP for a student. Waivers must be submitted by the stated deadlines whether or not fees have been paid by that date. The Fall UCSHIP waiver is available between July 1 and the student fee payment deadline. If the 20th falls on a weekend or holiday, the due date is the last business day prior to the 20th. Deadlines are strictly enforced. There are no refunds after the deadline.

The schedule for waiving UCSHIP is as follows:

- **Fall Quarter**
  - September 1–19

- **Winter Quarter**
  - December 1–19

- **Spring Quarter**
  - March 1–20

The UCSHIP Fall Quarter waiver website is available between July 1 and September 19, 2014. The above information serves as official notice of the UCLA mandatory medical/health insurance requirement. All students are responsible for providing complete and accurate information that must be submitted by the stated deadlines.

**HEPATITIS B VACCINATION REQUIREMENT**

California law requires students 18 years and younger to provide proof of immunity to Hepatitis B prior to
entering and enrolling at the University of California. The Hepatitis B vaccine is a three-shot series. If students have already received the series in their lifetime, there is no need to repeat it. To satisfy the requirement, all students must log in and complete the Hepatitis B questionnaire at http://www.studenthealth.ucla.edu by the beginning of their first term at UCLA.

Students who have not yet completed the series are granted a two-term grace period to comply. Failure to satisfy the requirement by the third term results in a hold on student records, whereby students cannot enroll in classes or use any University services. For more information, call (310) 825-4695.

**FEE REFUNDS**

Students who formally withdraw from the University may receive partial refunds of fees. For information on withdrawal, see the Academic Policies section of this catalog. Consult the Schedule of Classes for exact refund amounts and dates.

**FEE WAIVER REQUESTS**

Late registration, processing, and penalty fees are waivable on request in writing to the office assessing the fees only if they were incurred through the fault of the University or because a student suffered sudden and debilitating injury or accident.

**REDUCED FEE PROGRAMS**

UCLA recognizes the need for part-time study in special circumstances. Undergraduate resident students—when approved for enrollment in 10 units or less by the dean of their program—may be eligible for a one-half reduction in tuition. The reduction is based on total units enrolled as of Friday of the third week of classes.

File a Fee Reduction Request with the academic dean’s office by Friday of the second week. Except for these qualified and approved part-time students, there is no reduction in tuition, or in the student services, student union, Wooden Center, student programs, activities, and resources complex (SPARC), or Undergraduate Students Association fee.

Undergraduate nonresident students with College or school approval for enrollment in 10 units or less pay only half the nonresident supplemental tuition fee. File a Fee Reduction Request with the College or school office by Friday of the second week of classes for the applicable term.

Full-time University employees may apply for a reduction of tuition and the student services fee at their Campus Human Resources office. Students who use the part-time fee reduction may not also use the UC employee reduction.

**ENROLLING IN CLASSES**

New students should see an academic counselor before enrolling in classes (counseling is required in the Henry Samueli School of Engineering and Applied Science). Counselors help new students select courses and formulate a schedule tailored to their academic interests or degree objectives.

New Student Orientation takes new students through a step-by-step process designed to ensure that they enroll in an effective program.

The Schedule of Classes (http://www.registrar.ucla.edu/schedule/) contains listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Use the Schedule and academic counseling to assemble a program of courses.

**MYUCLA ENROLLMENT**

Students enroll in classes through MyUCLA, which is accessed at https://my.ucla.edu. The site walks students through the enrollment procedure.

Students are assigned specific times—called enrollment appointments—when they are allowed to enroll. Use MyUCLA to determine enrollment appointments.

Also use MyUCLA for other enrollment-related tasks, such as adding, dropping, or exchanging classes, joining the wait list for a class and checking wait list status, or changing the grading basis for a class. For more information, see MyUCLA in the Enrollment section of the Schedule of Classes at http://www.registrar.ucla.edu/soc/enroll.htm.

**IN-PERSON ENROLLMENT**

For classes that require written approval or specialized processing, students may enroll in person at 1113 Murphy Hall Monday through Friday from 9 a.m. to 4 p.m.

**STUDY LIST**

A Study List is the record of courses a student is enrolled in for the term. At 11:59 p.m. on Friday of the second week of instruction the Study List of enrolled courses becomes official, and all wait lists are eliminated. Students should verify their Study List through MyUCLA after each enrollment transaction. Students are responsible for all courses and the grading basis as listed on MyUCLA and cannot receive credit for courses not listed.

After Friday of the second week, most changes to the official Study List can be made with a fee through MyUCLA. Some changes require an Enrollment Petition along with approval signatures.

See Enrollment in the Schedule of Classes for deadlines and complete instructions.

Errors or omissions should be corrected before the College or school deadlines for changes by petition. Unapproved withdrawal from or neglect of a course entered on the Study List results in a failing grade.
STUDY

INTERSEGMENTAL CROSS-ENROLLMENT

At the discretion of the appropriate campus authorities on both campuses, California Education Code sections 66755 and 66756 (amended by California Senate Bill 361 passed in 1999) allow undergraduate students enrolled in any campus of the California community colleges, the California State University, or the University of California to enroll without formal admission in a maximum of one course per academic term at a campus of either of the other systems on a space-available basis. Enrollment in precollege courses is excluded.

UCLA students qualify for intersegmental cross-enrollment if they meet all the following requirements:

1. Complete at least one term at UCLA as a matriculated student
2. Enroll for a minimum of 6 units for the current term
3. Earn a grade-point average of 2.0 (C) for work completed
4. Pay appropriate tuition and fees at UCLA for the current term
5. Complete appropriate academic preparation as determined by the host campus
6. Have California resident status

Obtain a concurrent enrollment application from the College or school. An administration fee is charged for each academic term such enrollment is requested.

INTERCAMPUS VISITOR PROGRAM

Undergraduate students enrolled at one campus of the University of California may have the opportunity to attend another UC campus for one quarter or semester on the Intercampus Visitor Program. UCLA students obtain applications from the Registrar's Office, 1113 Murphy Hall. Observe the deadlines on the application. Applications are reviewed by a student's College or school. Letters and Science students should consult College Academic Counseling in A316 Murphy Hall; Arts and Architecture students should contact the Student Services Office in 2200 Broad Art Center; Theater, Film, and Television students should consult the Student Services Office in 103 East Melnitz Building; Engineering students should contact the Office of Academic and Student Affairs in 6426 Boelter Hall.

APPLYING FOR FINANCIAL AID

Students do not need to come from low-income families to qualify for financial aid. However, those who apply for need-based aid—including grants, loans, work study, and some scholarships—must demonstrate financial need, which is defined as the difference between the cost of attending UCLA and the amount that they and their families should be able to contribute.

No financial aid can be awarded to international students in their first year of attendance at UCLA. Students attending UCLA Summer Sessions, Summer Travel Programs, Summer Institutes, or UC Cross-Campus Summer Programs and in need of financial aid must submit a summer financial aid application in addition to the Free Application for Federal Student Aid (FAFSA). Summer applications are available at http://wwwfinancialaid.ucla.edu.

To qualify for aid, students must also comply with minimum progress standards, which set unit and grade-point average requirements as defined in the Appendix of this catalog.

FREE APPLICATION FOR FEDERAL STUDENT AID

To evaluate financial need, all citizen and permanent resident students who apply for aid must provide financial information on the Free Application for
Federal Student Aid (FAFSA). If students are financially independent according to the federal financial aid guidelines, their own financial circumstances are analyzed rather than those of their parents. The University expects that students and their families bear as much of the cost of a student’s education as their circumstances permit.

The FAFSA is used to apply for all federally funded programs, funds administered by UCLA, and Cal Grants administered by the California Student Aid Commission. Loans that are not need based are also available to all students who complete the FAFSA. Students should complete the FAFSA at http://www.fafsa.ed.gov by March 2. Be sure to indicate that the data is to be sent to UCLA by using the UCLA Title IV code: 001315.

**CALIFORNIA DREAM ACT APPLICATION**

Students who are not citizens or permanent residents but who are eligible for Assembly Bill 540 nonresident fee waivers may be eligible to qualify for scholarships and University grant aid if they complete a California Dream Act Application at https://dream.csac.ca.gov. The priority filing deadline for University grant consideration is March 2.

**PROSPECTIVE STUDENT SCHOLARSHIPS**

In addition to using the FAFSA to apply for aid, prospective students who apply to UCLA with the UC Application for Admission and Scholarships may use the application to apply for undergraduate scholarships.

**CONTINUING STUDENT SCHOLARSHIPS**

Scholarship applications for continuing students can be submitted at http://www.finaid.ucla.edu, are available beginning in January, and should be completed by March 2 for on-time consideration. Students should also check with their College or school and department for scholarship availability. The Scholarship Resource Center can also help with a thorough search for UCLA and outside scholarships.

**TYPES OF FINANCIAL AID**

The four basic types of aid are scholarships, grants, loans, and work-study employment. Financial Aid and Scholarships usually offers a combination of different award types to most applicants.

Aid can be merit based—awarded on the basis of standards such as academic achievement, or need based—awarded on the basis of financial need as determined by the financial aid application. Scholarships managed by Financial Aid and Scholarships are based on merit and need. Grants, loans, and work study are generally need based.

**SCHOLARSHIPS**

The Undergraduate Scholarship Program at UCLA rewards academic excellence and assists with the expenses of an undergraduate education.

Financial need is required for University and name (endowed) scholarships other than those listed below. Each year approximately $300,000 is awarded from the many different scholarship funds. Awards range from $100 to $2,000 and are not renewable. Entering students apply for scholarships on the UC Application for Admission and Scholarships. Continuing students must apply using the Undergraduate Scholarship Application for Continuing Students at http://www.finaid.ucla.edu. The application is available at the beginning of January and is due by March 2.

In addition to applying for University scholarships, students are encouraged to apply for outside scholarship funding via search engines such as FastWeb, GoCollege, and others.

**Regents Scholarships**

One of the highest honors conferred on an undergraduate student is the Regents Scholarship, which is awarded for four years to students entering from high school and for two years to entering juniors. A UCLA faculty committee selects Regents Scholars on the basis of exceptional academic achievement and promise. Scholars receive a yearly honorarium if they have no financial need. Scholars who establish financial need by filing the FAFSA receive a combination of grants and scholarships to cover the amount of their need. Regents Scholars also receive special privileges.

**UCLA Alumni Scholarships**

The Alumni Scholarships Program is one of UCLA’s oldest and most prestigious scholarships program on campus. Since 1936, a select group of distinguished Bruins have had the honor of being known as Alumni Scholars. Recipients are selected by alumni volunteers throughout the U.S. for the following programs.

**Community College Transfer Alumni Scholarship** (CCTS). For students transferring to UCLA from a California Community College with a 3.75 GPA. Financial awards are $4,000 over a two-year tenure.

**Freshman Alumni Scholarship.** Awards prospective freshmen who have demonstrated academic excellence, powerful leadership, and a desire to effect positive change. Financial awards for freshmen range from $4,000 to $20,000 over a four-year tenure.

**Lew and Edie Wasserman Grants.** Sophomore and Junior Alumni Scholars may apply to receive additional financial assistance. Applicants are evaluated on a combination of academic merit and financial need.

**National Finals Competition.** Every April, top-scoring UCLA scholarship applicants participate in the competition to potentially increase their base scholarship award up to $20,000 paid over four years. This competition is a 30-year tradition of the Alumni Scholarships Program.

**Need-Based Scholarship.** First-year Alumni Scholars who complete a FAFSA and have demonstrated financial need may also receive up to $5,000 for the first year in addition to their scholarship award.
Out-of-State Scholarship. Provides an outstanding opportunity for highly accomplished students from outside California to fund their UCLA education. Ralph Bunche Freshman Alumni Scholarship. Continues the legacy of Dr. Ralph J. Bunche ’27, first-generation college student who went on to become class valedictorian, a Nobel Peace Prize winner, and a founder of the United Nations. Bunche Scholars exemplify Dr. Bunche’s experiences, come from all walks of life, and are invaluable to the UCLA community. True Bruin Distinguished Senior Award. Awarded to highly meritorious students who exemplify the True Bruin values of integrity, excellence, accountability, respect, and service. True Bruin Distinguished Seniors receive $5,000 and are recognized and celebrated for the skills, knowledge, and leadership experiences they have demonstrated on campus and in their community. UCLA Alumni Legacy Scholarship. For academically talented undergraduate students who have a parent or guardian that is a UCLA degree holder. The applicant must be admitted to UCLA under the standard admissions process. Being an Alumni Scholar is more than just receiving a scholarship. Awardees are automatically enrolled in the esteemed Alumni Scholars Club where they are involved in campus events and organizations with like-minded students, increase their connections throughout the university, and attain skills that will benefit their professional career well after graduation. For additional information, see http://alumni.ucla.edu/scholarships.

ROTC Scholarships
ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents’ income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance during the academic year. Applications for scholarships may be obtained by calling Army, (310) 825-7381; Air Force, (310) 825-1742; or Navy/Marine Corps, (310) 825-9075. Applications for Army scholarships can also be obtained at http://www.goarmy.com/rotc/scholarships.html; for Air Force scholarships at http://www.afrotc.com/scholarships/highschool/scholarships/; and for Navy scholarships at http://www.nrotc.navy.mil/scholarships.aspx or by calling (800) 628-7682. Completed applications for four-year scholarships should be submitted prior to August 15 (Navy/Marine Corps) for early consideration, but no later than December 1 (Air Force), January 31 (Navy/Marine Corps) or February 28 (Army) of the year preceding college matriculation. Two- (not available for Air Force) and three-year scholarship applications are also available and are considered when received.

Grants
Grants are based on need and do not have to be repaid. When awarding policies and funds permit, the financial aid package includes a grant.

Federal Pell Grants
Federal Pell Grants are based on exceptional need. They are awarded to undergraduate students who are U.S. citizens or eligible noncitizens and who have not earned a bachelor’s degree. Amounts for 2014-15 range from $602 to $5,730 for students enrolled full time. Students who file the FAFSA are automatically considered for a Pell Grant. Eligibility is determined by the federal government. Award amounts depend on a student’s Estimated Family Contribution (EFC) and whether enrollment is full time or below. Awards are reduced for students enrolled less than full time.

Cal Grants A and B
California residents who attend at least half-time are eligible to apply for a California Student Aid Commission Cal Grant award. The FAFSA or California Dream Act Application and GPA Verification Form are the official applications for these programs. Cal Grant A awards assist low- and middle-income students with tuition and fee costs. They are based on need and grade-point average. Cal Grant B awards are intended to assist low-income and disadvantaged students with living expenses, books, supplies, and transportation costs. First-year awards may also cover registration fees. Renewal award recipients receive registration fee assistance. New awards are limited to students who have completed no more than one full-time semester or two full-time quarters or 16 semester units of part-time study or the equivalent. Award amounts are $12,192 for Cal Grant A and $1,473 for Cal Grant B for full-time students (12 units or more). Awards are reduced for students enrolled less than full time.

University Grants
University grants provide eligible on-time applicants with financial assistance from state funds. Awards range from $100 to over $15,000 and are based on student need. All undergraduate students who are U.S. citizens, eligible noncitizens, or noncitizens eligible for AB 540 waivers and who apply on time are considered. University grant eligibility is subject to availability of funding. Grants may be exhausted before the end of the academic year. Awards are reduced for students enrolled less than full time.

University Grants to Purchase UCSHIP
These grants are based on need and awarded to on-time FAFSA and California Dream Act applicants to cover the cost of the University of California Student Health Insurance Plan (UCSHIP). Students who waive UCSHIP are not eligible for these grants.

Federal Supplemental Educational Opportunity Grants
Federal Supplemental Educational Opportunity Grants (FSEOG) are awarded to undergraduate students with financial need. Awards range from $100 to $800. Recipients must be U.S. citizens or eligible noncitizens. Preference is given to Pell Grant and Cal Grant recipients. Only on-time, grant-eligible students are considered.

Loans
Loans allow students to postpone paying some of the costs of their education until they have completed school. A financial aid offer includes a long-term, low-interest loan.
Borrowers must realize their commitment and responsibility to repay according to repayment schedules. Before accepting a loan, students should assess their total educational debt and ability to repay after graduation. The University makes every effort to assist students during the repayment of their obligation, but University services, including registration and the release of official transcripts, are withheld if the loan becomes delinquent. Seriously delinquent accounts are referred to a professional collection agency for action. All first-time borrowers must complete a debt management session at http://www.loans.ucla.edu before funds are released.

All loan recipients must complete an exit interview with the Loan Services Office (A227 Murphy Hall, 310-825-9864, http://www.loans.ucla.edu) before leaving UCLA for any reason. This interview helps students understand their loan agreement and their rights and responsibilities. If students fail to participate in an exit interview, the University places a hold on their academic records and registration materials. Exit information is mailed to students by the Loan Services Office after receipt of notification of separation from the University.

Federal Perkins Loans

Low-interest Federal Perkins Loans are awarded to eligible, on-time applicants who are U.S. citizens or eligible noncitizens; eligibility is subject to availability of funding. The loan limit per academic year is $5,500 for undergraduate students and $8,000 for graduate and professional students. The actual award amount may be less, based on annual funding and UCLA’s institutional awarding policy. The loan interest rate is 5 percent. Loan repayment and interest accrual begin either six or nine months after graduation or dropping below half-time enrollment.

William D. Ford Federal Direct Loan Program

Direct Loans

Direct Loans are low-interest Subsidized and Unsubsidized Loans financed by the Department of Education. Subsidized Direct Loans are awarded to undergraduate students who have demonstrated financial need. Interest rates are fixed and adjusted by the Department of Education annually; contact Financial Aid and Scholarships for additional information. Interest accrues immediately after students graduate or drop below half-time enrollment. Repayment begins six months after students leave school or drop below half-time enrollment.

Unsubsidized Direct Loans are available to undergraduate, graduate, and professional students who are U.S. citizens or eligible noncitizens regardless of income. Interest accrues from the date of disbursement, but students can avoid the extra costs of accrual by making regular interest payments while in school.

Direct PLUS Loans

Direct PLUS Loans are designed to help graduate students and parents of undergraduate students meet the total cost of education. Graduate students and parents may be eligible to borrow up to the cost of education for the academic year less any other financial aid received. This loan is available only to borrowers who do not have adverse credit histories. The interest rate is fixed and annually adjusted by the Department of Education. Please contact Financial Aid and Scholarships for information on current interest rates. Borrowers may want to consult a tax adviser to see if this interest is tax deductible.

Private Loans

Private loans are available to students who have received the maximum award amounts under the Direct Loan Program and require additional funding. These loans are sponsored by banks and private lending institutions. Interest rates and repayment schedules vary. These loans must be certified by Financial Aid and Scholarships before funds can be disbursed. A list of private lenders that UCLA borrowers have used in the past is available under Publications at http://www.financialaid.ucla.edu/publications.html.

Short-Term Loans

Students need not be receiving financial aid to apply for a short-term loan. They may borrow up to $200 for immediate emergency needs; the amount is repayable on the 20th of the month following the month in which the loan was made. To qualify, applicants must be registered UCLA students with satisfactory loan repayment records. Applications are available from the Loan Services Office, A227 Murphy Hall. See http://www.loans.ucla.edu/shorttermloan.html.
WORK-STUDY PROGRAM

The Federal Work-Study Program (FWS) is intended to stimulate and promote part-time student employment, particularly for students from low-income families who are in need of earnings to pursue their studies. Under FWS, the federal government pays a portion of the students’ wage and the employer pays the balance. Through this program, students may work up to 20 hours per week for the University, government agencies, or public and private nonprofit agencies. Students employed through FWS provide essential services to the University and community and have the opportunity to hold jobs that may relate to their educational objectives or enable them to gain valuable work experience.

MAJORS AND DEGREES

Students may choose from over 128 majors in a wide variety of disciplines offered through the undergraduate degree programs of the College of Letters and Science, School of the Arts and Architecture, Henry Samueli School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television. For a complete list of major programs and degrees, see the table in the front of this catalog.

PLANNING A MAJOR

New students should obtain academic counseling before enrolling in classes at UCLA. Counselors can help new students formulate degree objectives based on interests, abilities, and career goals. As students begin to decide on a major, counselors can help them start fulfilling College or school requirements as well as the department requirements necessary for completion of the degree program.

DECLARING A MAJOR

Regulations and procedures for declaring a major vary for the College and each school. Students in the College of Letters and Science do not need to declare a major in their freshman year and can attend with an undeclared major until the end of their sophomore year. Certain schools require students to choose a major when applying for admission, or require early declaration. Check specific policies for declaration with the school or department adviser. All students must declare a major by the beginning of their junior year (90 quarter units). To declare a major, obtain a Petition to Declare a Major at the College or school office. There is no fee for the petition.

INDIVIDUAL MAJORS

Highly motivated students who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit. Requirements for individual majors vary among the College and schools.

CHANGING MAJORS

Changing majors requires the approval of the College or school and the department. To change majors, obtain a Petition for Change of Major at the department office.

DEGREE REQUIREMENTS

As soon as they are accepted for admission to UCLA, new students should learn the requirements necessary to receive a bachelor’s degree and begin planning an appropriate program of study. All undergraduate students must satisfy three types of requirements for a degree:

1. University requirements
2. College or school requirements
3. Department requirements

UNIVERSITY REQUIREMENTS

The University of California has established two requirements that all undergraduate students must satisfy in order to graduate: Entry-Level Writing or English as a Second Language (ESL), and American History and Institutions. It is each student’s responsibility to see that these requirements are fulfilled.

ENTRY-LEVEL WRITING

Because proficiency in English composition is so important to successful performance in many courses, Entry-Level Writing is the only requirement for graduation that students must satisfy before entering UCLA or during their first year in residence. They may meet this requirement by

1. Scoring 3, 4, or 5 on one of the College Board Advanced Placement Examinations in English OR
2. Scoring 5, 6, or 7 on the International Baccalaureate High Level English A Examination or scoring 6 or 7 on the International Baccalaureate Standard Level English A Examination OR
3. Scoring 680 or higher on the SAT Reasoning Test Writing Section OR
4. Scoring 30 or higher on the ACT Combined English/Writing test OR
5. Presenting transfer credit for an acceptable college-level course in English composition (passed with a grade of C or better) at another institution OR
6. Passing the University of California Analytical Writing Placement Examination (all freshmen from California high schools should have taken the examination during the month of May before they enrolled; others take an examination at UCLA early in their first term)
UNDERGRADUATE STUDY

CAPSTONE MAJORS AND PROGRAMS

Capstones are designed to be the culmination of a UCLA undergraduate experience. Capstones range from yearlong sequences of courses or tutorials to a single seminar, and from honors theses to comprehensive seminar projects or internships. They may be based in tutorials, laboratories, advanced courses, or seminars and may include either individual or team-based projects.

Four levels of UCLA capstone options are illustrated. The four levels represent different expectations for student engagement and independence, ranging from advanced senior seminars or project courses that require a comprehensive term paper, performance, or product design, to individually designed majors. The percentages listed indicate the expected participation of seniors at each of the four levels. It should be noted that some students might complete capstones at more than one level; for example, a student, having completed an advanced seminar, might decide to engage in an independent study or honors project.

Capstone majors and programs are identified in the Curricula and Courses section of this catalog. See http://www.capstones.ucla.edu for more detailed information.

PROGRAMS

American Literature and Culture B.A.
Chicana and Chicano Studies B.A.
English B.A.
If students do not meet the requirement in one of the ways described above, Academic Senate regulations require them to enroll in a course determined by performance on the Analytical Writing Placement Examination as early as possible during their first year in residence. Each course must be taken for a letter grade and passed with a grade of C or better. Students receiving a final grade of C– or less must repeat the course during their next term in residence. Satisfaction of the Entry-Level Writing requirement is a requisite to English Composition 3 and all subsequent English courses.

For more information, see http://www.ucla.edu/elwr/.

**ENGLISH AS A SECOND LANGUAGE**

All entering UCLA students whose native language is not English and who have not otherwise satisfied the English as a Second Language (ESL) requirement are required to take the Analytical Writing Placement Examination (AWPE) or the English as a Second Language Placement Examination (ESLPE). Neither the Test of English as a Foreign Language (TOEFL) nor any other English proficiency test can be submitted or accepted in lieu of the AWPE or ESLPE. Undergraduate students may take the AWPE or ESLPE once only. Unauthorized retakes of the examinations result in an invalid examination score.

First-year undergraduate students do not need to take the ESLPE. Students who have not otherwise satisfied the Entry-Level Writing requirement and who have not taken the AWPE by the time they enter UCLA must take it in their first term at UCLA. Results of the AWPE are reviewed to determine whether students should complete the ESL requirement, prior to satisfying the Entry-Level Writing requirement, in order to demonstrate sufficient command of English. If held for the ESL requirement, students must complete the requirement by taking the designated ESL courses.

Transfer students who have completed the English Composition 3 and English 4W equivalent courses at their transfer institution may nonetheless be held for the UCLA ESL requirement at the discretion of UCLA Undergraduate Admission. This includes, but is not limited to, all students who received a grade below B in either of these equivalent courses. Transfer students held by UCLA Undergraduate Admission to the ESL requirement must take the ESLPE prior to or during the term in which they are to register. Failure to sit for the ESLPE results in a hold on student records. Depending on the ESLPE results, students may be required to successfully complete one or more courses in the English as a Second Language series to satisfy the ESL requirement.

Results of the ESLPE are used to determine placement into the required sequence of ESL courses or exemption from the ESL requirement. In the case of a nonpassing score on the examination, students are placed in one or more of the credit-bearing courses—English as a Second Language 33B, 33C, and 35. Students must begin taking courses during their first term in residence at UCLA and must complete each course in sequence with a grade of C or better (C– or a Passed grade is not acceptable). All units are applied toward graduation but cannot be applied toward general education requirements. Certain ESL courses provide upper division elective units.

**AMERICAN HISTORY AND INSTITUTIONS**

The American History and Institutions requirement is based on the principle that a U.S. citizen attending an American university should understand the history and public institutions of the U.S. under the federal and state constitutions. Candidates for a bachelor’s degree must satisfy the American History and Institutions requirement by one of the following methods:

1. Completing a year’s course in American history or American government, or a one-year combination of both, in high school with an average grade of B or better OR
2. Completing any one of the following UCLA courses with a grade of C or better, or a grade of Passed:
   - Asian American Studies M171D
   - Chicana and Chicano Studies M159A, M159B, CM182, M183
   - Economics 183
   - Gender Studies M147B, M147D
   - Geography 136
   - Political Science 40, 114, 140A, 140B, 140C, 142A, 143A, 145B, 145C
   - Study of Religion M142C
3. Equivalent courses completed in UCLA Extension or at another college institution, and accepted by the Board of Admissions, may be used to fulfill the requirement OR
4. Presenting a satisfactory result of the requirement, by examination, as administered at another college or university within the state OR
5. Scoring 500 or better on the SAT Subject Test in U.S. History OR
6. Scoring 3, 4, or 5 on the College Board Advanced Placement Test in American History. Candidates for an instructional credential, but not for a degree, must take one of the following courses: History 143A, 143B, Political Science 145B, or 145C.

Students attending the University on an F-1 or J-1 visa may petition for exemption from this requirement by showing proof of temporary residence in the U.S.

For more information on this requirement, contact the undergraduate History Department counselor in 6248 Bunche Hall, (310) 825-3720.
The Undergraduate Research Centers (URC) assist the College and each school with undergraduate programs. These centers provide opportunities to become actively involved in the university research community. Working with faculty members on research projects, SRP students gain valuable research training and experience, as well as preparation for advanced undergraduate work and graduate school. Students enroll in course 99 in any department and receive 1 unit of course credit for each 30 hours of research completed during the term. Science, engineering, and mathematics students should see http://www.ugresearchsci.ucla.edu/srpintro.htm. Arts, humanities, social sciences, and behavioral sciences students should see http://www.ugresearchnorth.ucla.edu/research.htm.

The Undergraduate Research Fellows Program (URFP) is available on a competitive basis and by application for undergraduate students seeking entry-level research experience. Funded students typically participate in two terms of research (Winter and Spring Quarters) through SRP. Science, engineering, and mathematics students should see http://www.ugresearchsci.ucla.edu/urfp.htm. Arts, humanities, social sciences, and behavioral sciences students should see http://www.ugeducation.ucla.edu/urhass/scholarships.htm#URFP.

The Undergraduate Research Scholars Program (URSP) offers scholarships from foundations, industry, and individual donors to continuing students (junior-level standing and higher). Applicants must have a strong commitment to research and must complete an honors thesis or a comprehensive independent studies project during the senior year. Applications are accepted during Spring Quarter for the following academic year. Science, engineering, and mathematics students should see http://www.ugresearchsci.ucla.edu/ursp.htm. Arts, humanities, social sciences, and behavioral sciences students should see http://www.ugeducation.ucla.edu/urhass/scholarships.htm#URSP.

All academic departments offer undergraduate research courses that allow students to obtain academic credit for their research experiences. Students enrolled in the courses are often upper division students with Student Research Program experience. Department requirements for credit vary, but all departments require a research proposal to enroll in upper division tutorial courses and a research report to receive credit when the research project is completed. Senior students working toward honors or highest honors in many majors must complete a two-term (or more) research project that culminates in an honors thesis. Arrangements must be made with a faculty mentor before students can register for the course. See the undergraduate adviser in the department of interest for more information.
INTERNETSIUPS AND SERVICE PROGRAMS

Rewarding opportunities in the form of internships, community service work, industry and business positions, local, national, and international programs, and community-based teaching provide students with insights into a range of professional fields and the chance to apply academic theories firsthand.

CAREER CENTER

INTERNATIONAL AND EXPERIENTIAL LEARNING SERVICES

The UCLA Career Center, located in the Strathmore Building, offers advice and leads for internships, fellowships, and other experiential learning opportunities in the U.S. and abroad. Many helpful resources are featured in the Career Center Library Internship Zone and on BruinView™. Options for current students and alumni include teaching or volunteering abroad, research or fieldwork, and internships in almost every occupation or industry. All career counselors and peer advisers offer support for students eager to gain hands-on experience. See http://career.ucla.edu.

DC FELLOWS INTERNSHIP PROGRAM

The DC Fellows internship program supports students seeking summer internships in Washington, DC. Assignments are available with elected officials, government agencies, public interest groups, international organizations, the media, and a wide range of public and private organizations. The program offers advice on searching and applying for internships, as well as housing support and the option to apply for alumni-sponsored scholarships. For further information, send e-mail to internships@career.ucla.edu.

QUARTER IN WASHINGTON, DC

The Center for American Politics and Public Policy (CAPPP) selects undergraduates each fall, winter, and spring to participate in its Quarter in Washington Program. The program offers an exciting opportunity to combine UC courses with research and field experience.

Students live at the UC Washington Center for up to 12 weeks, dividing their time between coursework and a part-time internship placement. They can earn credit in multiple majors. The core course, a research development seminar, is multiple-listed in political science, sociology, communication studies, and history; meets the capstone requirement for the Public Affairs minor; applies toward the Civic Engagement minor; and is eligible for College Honors consideration. At least one course in a subject other than political science, such as economics or history, is usually offered each quarter.

All courses take advantage of Washington's unique resources for study and research.

UC Washington Center administrators help students find a field placement that complements a substantial research project. Placements have included ABC News, the Brookings Institution, CNN, the Department of Justice, the Kennedy Center, Studio Theatre, the Center for Strategic and International Studies, and various members of Congress. For information, contact the CAPPP office by e-mail at info@cappp.ucla.edu or call (310) 206-3109. See http://www.cappp.ucla.edu/quar

TERINWASHINGTON/.

RESERVE OFFICERS’ TRAINING CORPS

The University of California, in accordance with the National Defense Act of 1920 and with the concurrence of The Regents, offers courses and programs in military training. This voluntary training allows students to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing their college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). Equipment, uniforms, and textbooks are provided. The programs provide a monthly stipend to eligible students while on contract and additional financial benefits, including tuition and fee scholarships, to qualified students. Individual programs are described in the Curricula and Courses section of this catalog.

TEACHING OPPORTUNITIES

Exciting teaching programs prepare undergraduate students for careers in teaching or education and allow them to serve in classrooms in the Los Angeles area. Many teaching opportunities are offered in conjunction with the Graduate School of Education and Information Studies (GSE&IS), which helps coordinate programs leading to various instructional credentials or to graduate study.

EDUCATION STUDIES MINOR

The Education Studies minor provides a sequence of core and elective courses designed to introduce students to key issues, research, and policies in education. Students participate in a range of seminar and practicum courses to fulfill program requirements. The program office is in 1009 Moore Hall. See http://gseis.ucla.edu/education/academic-programs/education-studies-minor and the program description in the Curricula and Courses section of this catalog.

JOINT MATHEMATICS/EDUCATION PROGRAM

The Joint Mathematics/Education Program (JMEP), offered jointly by GSE&IS and the Department of Mathematics, leads to a teaching credential and master's degree in education for mathematics majors pursuing a career in secondary school teaching. The program offers courses in education for students completing courses required for a Bachelor of Science degree in a major within the Department of Mathematics. During their senior year, participants serve as teaching interns in an observational teaching program under the direction of a teaching coordinator. During the year following
graduation, students take additional graduate courses and teach full-time in a secondary classroom with a full salary. For information, contact the Mathematics Student Services Office, 6356 Math Sciences. See http://www.curtiscenter.math.ucla.edu/undergraduate.shtml.

**MATHEMATICS FOR TEACHING B.S.**
The Mathematics for Teaching capstone major is designed primarily for students planning to teach mathematics at the high school level. It provides exposure to a broad range of mathematical topics, especially those appropriate for the prospective teacher. Students who complete the major automatically complete the Mathematics Department’s California-approved subject matter program. At the end of their senior year, students may request a letter from the Mathematics Student Services Office, 6356 Math Sciences, verifying their completion of these courses and thus their subject matter competence for the California Single Subject Teaching Credential in Mathematics. See the degree description in the Curricula and Courses section of this catalog.

**SCIENCE EDUCATION MINOR**
The Science Education minor is designed for students who wish to become middle school and high school science teachers and is also attractive to students who plan to teach as graduate students in their disciplines. The minor provides the broad general science background included in California State subject matter credential examinations, selected coursework required for entry into a variety of postbaccalaureate credential programs, and field experiences in the development, management, and teaching of science laboratory instruction in grades 7 through 12, including Advanced Placement Tests. See http://www.cateach.ucla.edu/content/science-education-minor and the program description in the Curricula and Courses section of this catalog or call (310) 794-2191.

**SCIENCE TEACHER EDUCATION PROGRAM**
The Science Teacher Education Program (STEP), cosponsored by the College of Letters and Science and GSE&IS, allows science majors to observe and participate in classrooms in schools in the Los Angeles area and to begin teacher education courses in their senior year. Students earn a preliminary teaching credential the summer after the bachelor’s degree is received and a master’s in education the following academic year. For details, e-mail Dr. Arlene Russell at russell@chem.ucla.edu or contact any science department undergraduate counseling office. See http://www.cateach.ucla.edu/content/science-teacher-education-program-step or call (310) 794-2191.

**TEACHER EDUCATION PROGRAM**
The Teacher Education Program allows students to obtain both a Master of Education degree and a preliminary multiple or single subject credential in a full-time, two-year program that provides clinical classroom experience and a full-year urban teaching residency. See http://centerx.gseis.ucla.edu/teacher-education/.

**TEACHING SECONDARY MATHEMATICS MINOR**
The Teaching Secondary Mathematics minor is designed for students majoring in fields other than mathematics who plan to teach secondary mathematics after graduation. The minor provides recognition for completion of requisite coursework for the Joint Mathematics Education Program and also prepares students for the contents on the California Subject Examination for Teachers (CSET). Post-bachelor credentialing programs will see that students with this minor have taken coursework on secondary mathematics from an advanced standpoint that is recommended by the Conference Board of Mathematical Sciences and the California State Commission on Teacher Credentialing. This minor is not open to students in any Mathematics Department major. See the program description in the Curricula and Courses section of this catalog.

**UCLA CALIFORNIA TEACH**
The UCLA California Teach program encourages and supports undergraduate students who are interested in exploring K-12 mathematics and science teaching as a potential career. Courses include 30 hours of observation, participation, and assisting in K-12 schools, and seminars to support those field experiences. See http://www.cateach.ucla.edu or call (310) 794-2191.

**VISUAL AND PERFORMING ARTS EDUCATION MINOR**
The Visual and Performing Arts Education minor in the School of the Arts and Architecture is an interdisciplinary and interdepartmental series of courses designed to introduce students to key issues and methodologies in the field of arts education for multiple publics and to a broad range of possible careers in the arts, including K-12 teaching, museum education, teaching artist, art therapy, and arts advocacy.

The arts education teaching sequence, an important component of the minor, consists of three courses in which selected undergraduate students explore core issues in arts education, creativity, and social justice. Students are assigned to K-12 classrooms in the Los Angeles area where they first observe and then implement an eight-week sequential arts-based lesson plan under the supervision of the guiding teacher. The program office is in 2101 Broad Art Center. See http://www.arts.ucla.edu/vape and the program description in the Curricula and Courses section of this catalog.

**UCLA CENTER FOR COMMUNITY LEARNING**
The UCLA Center for Community Learning serves faculty members, undergraduate students, and community partners through academic courses and programs, including credit-bearing internships, service learning courses, community-based research, service scholarships, and the Astin Scholars program. It is home to the undergraduate minors in Civic Engagement and Disability Studies. The office is in A265 Murphy Hall, (310) 825-7867. See http://www.uei.ucla.edu/communitylearning.htm.
**University of California Center Sacramento**

The University of California Center Sacramento (UCCS) is operated by UC Davis and cosponsored by the UC Office of the President. The center's long-term goal is to bring together UC faculty members with undergraduate and graduate students to pursue research related to state government, politics, and public policy. UCCS is open to all juniors and seniors with a 3.0 grade-point average. For more information, send e-mail to bwilkinson@college.ucla.edu. See http://uccs.ucdavis.edu.

**Lower Division Seminar Programs**

**Collegium of University Teaching Fellows**

The Collegium of University Teaching Fellows (CUTF) offers outstanding graduate students the opportunity to develop and teach lower division seminars in their area of expertise. These unique courses cover all areas, from the humanities to the life, physical, and social sciences. Undergraduate students take courses that are at the cutting edge of a discipline and benefit from a small-seminar environment. GE and honors credit is granted for most seminars, which are offered in Winter and Spring Quarters only. Enrollment is limited. For further information, contact the Office of Instructional Development, 70 Powell Library, (310) 206-8998. See http://www.oid.ucla.edu/teaching/cutf.

**Honors Collegium**

The Honors Collegium, a series of interdisciplinary honors courses, offers a unique educational experience where students learn how to think critically and creatively and how to communicate effectively. Courses emphasize the breadth of an interdisciplinary approach to learning and focus on small classes and individual attention. See http://www.honors.ucla.edu/hchome.html.

**Fiat Lux Freshman Seminar Program**

Fiat Lux seminars provide students with an opportunity to share ideas in class—an important academic skill that can be acquired only through practice. These 1-unit seminars, taught by distinguished faculty members from across UCLA, introduce freshman students to topics of intellectual importance and encourage them to participate in critical discussions with a small group of peers. The program takes its name from the motto of the University of California: *Fiat Lux – Let There be Light!* For details about seminar offerings each term, see the Schedule of Classes at http://www.registrar.ucla.edu/schedule/. For more information about the program, see http://www.uei.ucla.edu/fiatlux.htm.

**Advising and Academic Assistance**

Academic assistance is available in the form of staff and student counselors, faculty advisers, student services, tutorials, and special programs.

**New Student and Transition Programs**

UCLA's New Student and Transition Programs welcome new undergraduate students to UCLA and ease their transition into and throughout the first year. New Student Orientation introduces students to UCLA through academic counseling and educational planning and orients students to all the special programs available to them. During Orientation, students work in small groups with peer counselors and gain insight into necessary academic skills. They learn how to plan their academic program and become familiar with educational opportunities, student services, and facilities available at UCLA. Individual counseling sessions help students adjust to University life and fulfill the advising requirements of the College or school. Sessions for family members are also offered.

New Student Orientation sessions are three-day, two-night residence hall live-in programs for first-year students and one-day programs for transfer students. There is a fee for participation.

During the academic year, additional programs are offered to provide academic advising and successful transition to the second year. For more information, contact the New Student and Transition Programs office in 201 Covel Commons, (310) 206-6685. See http://www.newstudents.ucla.edu.

**College and School Advisers**

The College and each school and academic department at UCLA have a staff of academic counselors and advisers to help students plan their academic program, monitor their progress toward the bachelor's degree, provide information about degree requirements, and assist with academic problems. See the Schedule of Classes for a list of counselors and advisers.

**Ask Peer Counselors**

The ASK Peer Counseling Program is an extension of College Academic Counseling. ASK peer counselors are undergraduate students from the College of Letters and Science trained to respond to student questions and concerns in several convenient settings. No appointments are required, just walk up and ASK. Peer counselors make referrals and provide information.
about academic rules and regulations, deadlines, and petitions and, as peers, can provide valuable personal experience.

Students can find ASK peer counselors weekdays when school is in session at various locations across campus. For details about locations and operating hours, see http://www.ugeducation.ucla.edu/counseling/ask/. Students may also e-mail questions to ask@college.ucla.edu.

**COLLEGE ACADEMIC MENTORS**

Letters and Science college academic mentors (CAMs) are graduate students who mentor primarily undergraduate lower division students and new transfer students to successfully navigate a large research university. In addition to addressing issues related to program planning and academic success, CAMs provide information and referrals to campus resources that focus on undergraduate achievement. Many CAMs have served as teaching assistants and can give unique perspectives on faculty members, course selection, major requirements, and preparation for and application to graduate school. See http://www.ugeducation.ucla.edu/counseling/cam.html.

For appointments, go to Window 1, A316 Murphy Hall. CAMs are also available in selected departments and through the MyUCLA Virtual Counseling link.

**ACADEMIC ADVANCEMENT PROGRAM**

The Academic Advancement Program (AAP, http://aap.ucla.edu), built on principles of social justice, has a threefold mission: (1) to ensure the academic success, retention, and graduation of students who have been historically underrepresented in higher education, (2) to increase the numbers of AAP students entering graduate and professional schools, and (3) to develop the academic, political, scientific, economic, and community leadership necessary to transform society. AAP promotes academic achievement and excellence by providing students with an array of academic services.

Students are eligible for AAP if their academic profiles and personal backgrounds may impact their University experience and their retention and graduation from UCLA. Students are also eligible if they are part of any federally funded program that requires counseling, tutoring, or mentoring. For more information, contact AAP New Student Programs in 1230 Campbell Hall. See http://aap.ucla.com/programs/new-students/overview/ or call (310) 206-1571.

**ACADEMIC COUNSELING**

College counselors at AAP holistically counsel students to facilitate their academic and personal success by empowering them with the knowledge and guidance to thrive in their undergraduate careers and beyond. Counselors work with students to plan their academic programs, monitor progress toward the degree, provide information about degree requirements, and discuss graduate school and career options. See http://aap.ucla.com/programs/counseling/ or call (310) 825-1481.

**CENTER FOR COMMUNITY COLLEGE PARTNERSHIPS**

The Center for Community College Partnerships (CCCP) develops academic partnerships between California community colleges, particularly those with large underrepresented populations, and the University to improve student competitiveness for UC admissions and increase the diversity of the UCLA transfer admit pool. The CCCP Scholars Program offers peer mentoring and several academic residential summer programs to help prepare students for transfer to a four-year university and to help institutions develop a transfer culture through a critical race theory framework. See http://cccp.ucla.edu/#/ or call (310) 267-4441.

**MENTORING AND RESEARCH PROGRAMS**

AAP offers several programs aimed at helping students achieve academic and professional goals beyond the bachelor’s degree.

**Community Development and Social Justice Program**

The Community Development and Social Justice (CDSJ) Program assists undergraduate students interested in graduate and professional schools. The program works in the fields of labor/workplace studies, public health, public policy, social welfare, and urban planning to increase enrollment of AAP students committed to working toward social equity. Students work as interns, under the supervision of a professional staff member, at a community-based organization. See http://aap.ucla.com/mentoring/community-development-and-social-justice-program-cdsj/ or call (310) 794-4186.

**Educators for Tomorrow Scholars Program**

The Educators for Tomorrow (EFT) Scholars Program aims to advance a new generation of socially conscious leaders interested in careers in education. It provides AAP students with opportunities to meet faculty members and students in the Graduate School of Education and Information Studies to get involved in community service programs, internships, and service learning courses. Students in the program work with teachers at local public schools as volunteers and participate in educational roundtables. See http://aap.ucla.com/mentoring/educators-for-tomorrow/ or call (310) 794-4186.

**Graduate Mentoring and Research Programs**

The Graduate Mentoring and Research Programs offer all AAP students one-on-one mentoring in preparation for graduate studies and professional school admission. The office also offers a variety of workshops on graduate school topics. See http://aap.ucla.com/mentoring/graduate-and-professional-school-resources/ or call (310) 794-4186.
McNair Research Scholars Program
The McNair Research Scholars Program prepares low-income, first-generation, and historically underrepresented undergraduate students for the best graduate programs in the country. The program works with 28 students annually to prepare them for Ph.D. programs in the humanities or social sciences. Students conduct an independent research project and participate in an intensive summer program. See http://aapucla.com/mentoring/mcnair-research-scholars-program/ or call (310) 794-4186.

Research Rookies Program
The Research Rookies Program gives second-year AAP undergraduate students the opportunity to develop entry-level research projects in the humanities and social sciences. Over two academic terms, students meet regularly with graduate mentors and a faculty member. See http://aapucla.com/mentoring/aap-junior-scholars/ or call (310) 794-4186.

PEER COUNSELING
Peer counselors are upper division AAP students who assist entering students with the transition to the University and provide them with a perspective on life at UCLA. See http://aapucla.com/mentoring/peer-counselors/ or call (310) 825-1481.

PEER LEARNING
AAP Peer Learning services promote academic excellence. Most peer learning facilitators are upper division AAP students who provide the intellectual challenge, encouragement, and personal support that students need to recognize their own authority as thinkers and learners. Most sessions are held in small groups that foster discussion and allow students to listen to and articulate new and different perspectives. See http://aapucla.com/programs/peer-learning/overview/ or call (310) 206-7771.

SCHOLARSHIPS
There are many opportunities for eligible students in AAP to receive merit and need-based scholarship funds. Some awards require application; others are available through nomination. See http://aapucla.com/aap-scholarship/ or call (310) 206-1805 for further information.

SUMMER PROGRAMS
AAP’s seven-week intensive academic residential summer program for incoming freshman and transfer students prepares historically underrepresented, low-income, and first-generation college-going students with the academic rigors and demands of a research university. Students are able to build a network of academic resources and friends prior to the regular school year that provides interaction with students from diverse backgrounds and broadens life experiences.

Students enroll in three University courses that meet UCLA requirements for graduation and receive support in small groups or individual sessions from teaching assistants and peer learning facilitators. Freshmen have the option of taking classes offered in the writing or mathematics/science intensive programs. Transfer student preparation involves an advanced composition course, honors research course, and upper division seminar. Academic counselors are available to assist students in shaping their educational plan toward graduation. See http://aapucla.com/programs/new-students/freshman-and-transfer-summer-programs/ or call (310) 206-1571.

VICE PROVOST INITIATIVE FOR PRECOLLEGE SCHOLARS
The Vice Provost Initiative for Precollege Scholars (VIPS) program is a partnership between UCLA and the Los Angeles and Pasadena school districts that prepares historically underrepresented students in 10 high schools to become competitively eligible for admission to UCLA and other flagship universities, and to encourage pursuit of graduate and professional education using a social justice framework and holistic approach. VIPS offers peer mentoring, summer programs, Saturday academies, and research opportunities to scholars and their families. See http://aapucla.com/programs/vips/ or call (310) 267-4676.

ACADEMIC EXCELLENCE
Eligible students receive the following honors and awards in recognition of academic achievement.

DEAN’S HONORS LIST
The School of the Arts and Architecture, Henry Samueli School of Engineering and Applied Science, School of Nursing, School of Theater, Film, and Television, and the deans of the five divisions in the College of Letters and Science award Dean’s Honors to deserving students each term. Honors are based on the grade-point average attained within a specified number of units. Consult the College or school for further information.

LATIN HONORS
The College and schools award Latin honors according to overall grade-point average at graduation. To be eligible students must have completed at least 90 (98 for the School of Nursing) University of California units for a letter grade. The levels of honors are summa cum laude, magna cum laude, and cum laude. Specific requirements vary for each level and are detailed in the College and Schools section of this catalog. See the Schedule of Classes for the most current calculations of Latin Honors.

DEPARTMENTAL HONORS
In the College of Letters and Science, departmental honors and highest honors are awarded at graduation on the recommendation of a student’s major department, based on successful completion of a departmen-
tal honors program. Students should consult their department for its requirements.

**DEPARTMENTAL SCHOLAR PROGRAM**

Departments in the College of Letters and Science and each school, except the School of Nursing and School of Theater, Film, and Television, may nominate exceptionally promising juniors and seniors as Departmental Scholars to pursue bachelor's and master's degree programs simultaneously. Nominations are submitted to the College or school dean for recommendation to the dean of the Graduate Division. Students interested in becoming Departmental Scholars should consult their departments well in advance of application dates for graduate admission (see the calendar at the beginning of this catalog).

**HONOR SOCIETIES**

**ALPHA LAMBDA DELTA AND PHI ETA SIGMA**

Alpha Lambda Delta and Phi Eta Sigma are national honor societies that recognize high achieving first-year students. Membership is based solely on academic achievement during the freshman year. To be eligible students must have a 3.5 grade-point average with 12 graded University of California units in the first term of their freshman or first year at UCLA, or a cumulative 3.5 GPA at the end of the second and/or third terms. Invitations are issued in Winter Quarter, and an induction ceremony is held during Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall, (310) 825-3871. See http://www.aldpes.ucla.edu.

**GOLDEN KEY**

Golden Key is an international interdisciplinary academic honors organization dedicated to excellence. Students qualify on the basis of objective academic criteria. No more than the top 15 percent of enrolled sophomores, juniors, and seniors may be eligible. The society recognizes and encourages scholastic achievement and excellence in all undergraduate fields of study. It unites with collegiate faculties and administrators in developing and maintaining high standards of education and promotes scholastic achievement and altruistic conduct through voluntary service. Invitations are issued in Fall Quarter, and a reception is held during Winter Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall, (310) 825-3871. See http://ucla.goldenkey.org.

**MORTAR BOARD**

Mortar Board is a national honor society for college seniors that recognizes outstanding and continual scholarship, leadership, and service to the campus community.

To be considered for membership, candidates must have completed 90 units and must have attained at least a B average or be in the highest 35 percent scholastically of the junior class, whichever is higher. Applications are available at http://www.mortarboardatucla.org/apply.html early in Winter Quarter and are due by mid-February. Approximately 35 members are selected each spring by the outgoing chapter. See http://www.mortarboardatucla.org or call (310) 206-5523.

**PHI BETA KAPPA**

Phi Beta Kappa is a national academic honors society in the humanities, liberal arts, and sciences, founded at the College of William and Mary in 1776. Membership is conferred for high scholastic standing and is determined by vote of the chapter council according to scholarship records. Students do not apply for Phi Beta Kappa membership.

At UCLA only graduating seniors and selected juniors are elected to membership. The annual election is held in May, with the initiation in June. At present, the minimum grade-point average considered is 3.67 (for 140 or more UC units); the minimum number of UC units considered is 90 (students at the 90-unit level must have at least a 3.85 GPA).

A reasonable distribution of courses in the humanities and sciences is also required, as is a foreign language course at the intermediate level (one level above the UCLA language requirement for graduation) or above. A Passed grade is computed approximately as a B, depending on number of courses taken and graded units. Students who are elected are notified by mail. For further information, contact Phi Beta Kappa in the Honors Programs Office, A311 Murphy Hall, (310) 825-1615. See http://www.college.ucla.edu/pbk/.

**TAU SIGMA**

Tau Sigma is a national honor society that recognizes the high academic achievement of first-year transfer students. To become a member, UCLA students need to earn a 3.5 grade-point average or better during their first term at UCLA after transferring either from a community college or a four-year institution (summer quarter not included). Invitations are issued after each regular academic term, and an induction ceremony is held during Spring Quarter.

Tau Sigma honors UCLA's large transfer community for academic achievement and provides leadership, networking, and social activities. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall, (310) 825-3871.
Graduate Study

Graduate students at UCLA benefit from—and contribute to—the resources of one of the country’s outstanding research universities. A distinguished faculty committed to research and teaching, an extensive library system ranked among the best in the nation, and excellent research centers, institutes, and laboratories in virtually every major discipline all provide extraordinary opportunities for graduate endeavor.

Graduate training at UCLA takes place in the classrooms, the laboratories, the libraries, in specialized seminars, through independent research, and in teaching experiences. Graduate education is enriched by several hundred postdoctoral and visiting scholars from other universities who engage in research and, in some instances, teaching at UCLA every year. This unique research environment promotes the quality of original work and study that is the hallmark of graduate education.

The degree of Master of Arts or Master of Science, or one of several professional degrees such as Master of Business Administration, is intended to develop mastery of a field and prepare students for the practice of a profession. The doctoral degree (Ph.D., Ed.D., and so forth) is designed to prepare students for creative activity and original research, often in association with college or university teaching.

GRADUATE ADMISSION

Diversity, Inclusion, and Admissions
1237 Murphy Hall
(310) 206-3411
http://grad.ucla.edu

Meeting the minimum requirements does not ensure graduate admission, which is limited by the number of places and the amount of student support available in UCLA’s graduate programs. Applicants are evaluated on scholastic qualifications and formal preparation for the graduate field of study. Departments may have other requirements for admission, which are listed by department at http://grad.ucla.edu/gasaa/deptinfo/deptinfointro.asp.

APPLYING FOR ADMISSION

Prospective students may apply online at http://grad.ucla.edu.

WHEN TO APPLY

Most departments and schools have deadlines in November and early December for the following Fall Quarter. Consult the Graduate Division website’s Admissions section for specific deadlines for each major. A few departments accept applications for Winter and Spring Quarters.

At the discretion of the department, applications may be considered if submitted after a program’s stated deadline, provided the enrollment limits have not been exceeded.

APPLICATION FEE

A nonrefundable application fee is required when the application is submitted.

ENTRANCE REQUIREMENTS

U.S. applicants to graduate standing must hold a bachelor’s degree from a regionally accredited institution comparable in standard and content to that awarded at the University of California. Degrees granted on the basis, for example, of nonacademic prior learning, test scores, and other than organized supervised coursework in academic subjects are not considered comparable. A scholastic average of B or better (or its equivalent if the letter grade system is not used) is required in the last two years of undergraduate coursework and in any postbaccalaureate study.

Requirements for international applicants are listed below.

SUPPORTING MATERIALS

Supporting materials to be submitted, including official transcripts of record and the nonrefundable application fee, are specified at http://grad.ucla.edu. Submitted materials become the property of the University and are not returnable.

GRADUATE RECORD EXAMINATION

Applicants who apply for admission to a department or school that requires Graduate Record Examination (GRE) scores should arrange to take the examination no later than December so scores arrive on time. GRE scores should be sent directly to the prospective department and not to the Graduate Division.

GRE registration and information about both paper and computer-based testing are available at http://
Letters of Recommendation

Most graduate professional schools, departments, and interdepartmental programs at UCLA require applicants to submit three letters of recommendation. Letters typically augment, validate, or explain information provided in the application and should be written by people qualified to analyze students’ abilities and academic promise.

International Applicants

International applicants who have completed their postsecondary education outside the U.S. are expected to hold a degree, with above average scholarship, from a university or university-level institution. If their examinations have been graded Excellent, Very Good, Good, and Pass, applicants must have at least a Very Good general rating to qualify for admission. Applicants who hold a three-year Bologna degree may be considered for admission on the recommendation of the department, program, or professional school.

Applicants who hold a three-year ordinary or pass degree, or who hold a professional diploma in accounting, business, librarianship, social work, physical education, health education, and so forth, or a four-year degree, diploma, or higher certificate from a technical, vocational, or postsecondary specialized school, should not apply for graduate admission. Persons with memberships in professional associations such as Institutes of Chartered Accountants, the Institute of Chartered Secretaries and Administrators, and so forth, also do not qualify for graduate admission unless they also hold recognized university-level degrees or titles.

Students should submit official transcripts of record, in the original language and with an English translation certified by the institution, for all college and university work. The original of an academic record that cannot be replaced must not be sent; a properly certified copy should be sent instead. Specific information for applicants from a variety of educational systems is available at http://grad.ucla.edu.

Proficiency in English

International students who hold a bachelor’s or higher degree from a university located in the U.S. or in another country in which English is both the primary spoken language of daily life (e.g., Australia, Barbados, Canada, Ireland, Jamaica, New Zealand, United Kingdom) and the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) examination and the UCLA English as a Second Language Placement Examination (ESLPE). All other applicants must take the TOEFL, administered by the Educational Testing Service in some 95 foreign centers, or the IELTS, administered by IELTS test centers throughout the world. See http://www.ielts.org for the nearest test center. TOEFL applications are available from TOEFL Services, PO. Box 6151, Princeton, NJ 08541-6151, (609) 771-7100, or at http://www.ets.org.

Students whose native language is not English are required to take the UCLA English as a Second Language Placement Examination (ESLPE), in addition to the TOEFL or IELTS examination, before or during the term in which they are to register. Failure to sit for the ESLPE results in a hold on student records. Those graduate students who believe that their initial ESLPE score is not reflective of their English language proficiency due to having recently arrived in the U.S. may sit for the examination a second time in a subsequent term only (retaking the examination in the same term is not counted as a valid result). In cases where students retake the examination, the most recent examination score is held to be valid. Unauthorized retakes of the examination result in an invalid examination score.

About the UCLA Graduate Division

The UCLA Graduate Division administers policy established by the Academic Senate and its Graduate Council for master’s, doctoral, and graduate professional degree programs other than the professional degree programs in law, medicine, and dentistry, and for postdoctoral scholars. It oversees graduate recruitment and admissions (including the recruitment of a diverse student body), fellowships, teaching assistantships, graduate student researcher appointments, and other graduate student support, and the maintenance of high quality standards in all UCLA graduate programs. The dean of the Graduate Division also serves as vice provost of Graduate Education.

Graduate Council. The Graduate Council is a standing committee of the UCLA Academic Senate. In keeping with the University’s commitment to the philosophy of shared governance, the council is responsible for the establishment of policy and standards for graduate education and postdoctoral scholars at UCLA; the approval, review, and monitoring of graduate degree programs; and recommendations regarding fellowships and assistance.

Graduate Adviser. At matriculation, a graduate student usually selects or is assigned a graduate adviser who assists in program planning and completion of degree requirements. Sometimes this role is temporarily assumed by a faculty adviser assigned to the program as a whole. When the student’s master’s or doctoral committee is established, the chair of the committee assumes the adviser’s role.

Depending on the ESLPE results, students may be required to complete one or more courses in the English as a Second Language 33 series, beginning in their first term in residence at UCLA. The courses must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. Students should expect to spend a longer period of time at the University than would normally be necessary to complete a degree program if they are required to take any English as a second language courses. If they do not achieve a minimum score on the ESLPE, their admission is deferred until they have acquired the necessary proficiency in English. Neither the TOEFL, nor IELTS, nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE.

Graduate students who plan to work as teaching assistants (TAs) and are nonnative English-speaking international students are required to take the Test of Oral Proficiency (TOP), which is administered by the Office of Instructional Development (OID). Those who hold a bachelor’s degree from a U.S. institution are exempt. Students who do not plan to work as teaching assistants do not need to take the TOP.

For students receiving a clear pass (7.1 or above) on the TOP, no coursework is required. Students receiving a marginal pass (between 6.4 and 7.0) are required to take an approved oral skills course either before or during their first term as teaching assistants. Students scoring 6.3 or below are not eligible to become teaching assistants and are encouraged to complete recom-
mended coursework in English as a Second Language before taking the TOP examination again. No other oral examination is accepted. Entering graduate students who plan to work as teaching assistants in their first term at UCLA must arrive early enough to take the TOP before instruction begins. The examination schedule and other information about TOP are available at http://www.oid.ucla.edu/units/top/ or call (310) 825-3106.

ADMISSION TO THE SCHOOLS OF DENTISTRY, LAW, AND MEDICINE

Applicants for M.S. and Ph.D. programs in departments of the School of Medicine or Dentistry should apply for admission to the Graduate Division as described above. For admission to D.D.S., J.D., LL.M., S.J.D., and M.D. degree programs in the Schools of Dentistry, Law, and Medicine, consult the websites or write to the respective schools for information and application procedures.

ADMISSION TO PROGRAMS IN LIFE AND MEDICAL SCIENCES

Applicants to Ph.D. programs in fields related to life and biomedical sciences apply for admission to the individual degree-granting program. Graduate Programs in Biosciences is a consortium of Ph.D. programs organized into specialized research groups, called home areas, that serve as the admissions and training units associated with the degree-granting programs. Through this structure, students can specialize in their chosen area while maintaining the flexibility to move between home areas to best pursue their research interests.

DEGREE-GRA NTING PROGRAMS AND HOME AREAS

Consortium Ph.D. programs offer the research home areas listed below.

- Bioinformatics
- Biomedical Physics
- Human Genetics
- Molecular Biology
  - Biochemistry, Biophysics, and Structural Biology
  - Cell and Developmental Biology
  - Gene Regulation
  - Immunity, Microbes, and Molecular Pathogenesis
- Molecular, Cellular, and Integrative Physiology
  - Molecular, Cellular, and Integrative Physiology
- Molecular and Medical Pharmacology
  - Molecular Pharmacology: Diagnostics, Therapeutics, and the Biology of Disease
- Neuroscience

Additional opportunities for doctoral study include Biochemistry and Molecular Biology in the College of Letters and Science, Oral Biology in the School of Dentistry, and Molecular Toxicology in the Fielding School of Public Health.

Consult the individual program website for information and application procedures. See http://www.grad.ucla.edu/departments.html for information about degree requirements for each program.

SPECIAL ADMISSION POLICIES

NO DEGREE OBJECTIVE

UCLA has no special limited or unclassified categories of graduate admission. Under some circumstances, however, applicants may be admitted for coursework without a degree objective. For example, teachers with a master's degree who wish some refresher study, or international students on a year's stay in the U.S., may wish to apply in this manner. Requirements for admission are the same as those for degree programs, and the academic program must agree to accept the student for the no degree objective (NDO) status. All admission to NDO status must be specially approved by the dean of the Graduate Division, as must any University financial assistance for students on NDO status.

DUPICATION OF DEGREES

The University of California, in general, discourages the duplication of advanced degrees. At the same time, it recognizes that a professional degree does not duplicate an academic one, and that pressing needs may exist for degrees in different areas (see Concurrent and Articulated Degree Programs in the front of this catalog). Students who apply for a second academic degree at the same level or lower than the one they already hold are required to show compelling cause to the department. The Graduate Division is particularly concerned that a careful review and special justification be made by the graduate program in all cases where an applicant or continuing student is recommended for admission to a second doctoral program. This concern also extends to a recommendation for student support for pursuit of a second doctoral degree. All degree requirements and University regulations apply just as they do for a first degree. Courses and other degree requirements already applied to the earlier degree may not be applied to the second.

SUMMER SESSIONS COURSES

Enrollment in Summer Sessions courses does not constitute admission to graduate standing, nor does it substitute for the required continuous registration in Fall, Winter, and Spring Quarters. Students who wish to apply Summer Sessions courses to their subsequent graduate program should consult in advance with their departmental adviser. This is also true if they have been readmitted to graduate standing and wish to resume graduate study in Summer Sessions. Information and applications are available from Summer Sessions, 1331 Murphy Hall.

If students take Summer Sessions courses following the award of their bachelor's degree, the grades do not appear on the undergraduate transcript (they are included on a separate transcript). After students are accepted by the Graduate Division, Summer Sessions grades are included on the graduate transcript and computed in the grade-point average.
READMISSION

Students who have registered at any time as a graduate student at UCLA and are returning after an absence (except a formal leave of absence) must file an Application for Graduate Admission.

See the Academic Policies section of this catalog for readmission procedures.

REGISTRATION

Registrar’s Office
1113 Murphy Hall
(310) 825-1091, option 6
http://www.registrar.ucla.edu

Registration consists of paying fees and enrolling in classes.

1. Registration fees and other University charges are due the 20th of each month. BruinBill accounts can be viewed through MyUCLA.
2. Enrollment in classes is completed through MyUCLA at https://my.ucla.edu.

Students must complete both processes by the established deadlines to be officially registered and enrolled for the term.

Graduate students must be either registered and enrolled or on an official leave of absence every term until their degrees are awarded. As an exception, certain graduate students may be eligible to pay the filing fee (see below). Failure to register or be on an official leave of absence for any term constitutes withdrawal from UCLA.

PAYING FEES

Details on fee payment, enrollment procedures, and deadlines are in the Schedule of Classes at http://www.registrar.ucla.edu/schedule/.

E-BILL

BruinBill accounts are administered electronically (e-bill) through MyUCLA. Financial activity is displayed for the current term, as well as account activity for the last 24 months. MyUCLA also provides a link to important communications from the University regarding registration and University policies. Students can pay their BruinBill account electronically using electronic checks with no fee, or American Express, Discover, MasterCard, and VISA credit cards with a fee.

ANNUAL GRADUATE FEES

Although the exact cost of attending UCLA varies by program, there are some fees that all UCLA students must pay. UCLA does not charge on a per-unit basis. Each entering and readmitted student is required to submit a Statement of Legal Residence to Diversity, Inclusion, and Admissions with the Statement of Intent to Register. Students classified as nonresidents of California must pay annual nonresident supplemental tuition in addition to other registration fees. Legal residents of California are not required to pay nonresident supplemental tuition. For a definition of residence and nonresidence, see the Appendix.

Fees are subject to change without notice by The Regents. See http://www.registrar.ucla.edu/fees/ for updates.

Self-Supporting Program Fees

Students in self-supporting programs pay a flat annual fee instead of per-term fees. For details, consult the individual program. Self-supporting program fees are published online at http://www.registrar.ucla.edu/fees/selfsupporting.htm.

MISCELLANEOUS FEES

Miscellaneous fees include charges for late registration fees payment. Late fees also apply if students file their Study List late or do not pay off BruinBill balances on time. Fees are charged if any check is returned by a bank for any reason. Charges are assessed for most petitions and other special requests. There is also a fee for advancement to doctoral candidacy. A full list of miscellaneous fees is at http://www.registrar.ucla.edu/fees/miscfee.htm.

STUDENT HEALTH INSURANCE

All UCLA graduate students are automatically assessed for and enrolled in the University of California Student Health Insurance Plan (UCSHIP) as a condition of registration at UCLA. Continued enrollment in a qualified medical/health insurance plan must be maintained during all registered terms. Uship components are medical, vision, dental, and behavioral health services.

The Uship fee is billed each term along with other UCLA fees. Uship fulfills all of the requirements mandated for a qualified medical/health insurance plan as defined by the University. The Ashe Student Health and Wellness Center is the primary healthcare provider for Uship and is where all nonemergency medical care must be initiated for Uship claim payment consideration. See http://www.studenthealth.ucla.edu.

Waiving Uship

Students may waive Uship if they (1) maintain active enrollment in a qualified medical/health insurance plan that meets all established requirements, (2) apply for a Uship waiver within established deadlines each term, and (3) correctly complete the online Uship waiver form.

Students must apply for a Uship waiver online. A pre-waiver worksheet is available to assist students before they complete an actual waiver. See the Ashe Center website for details, including a definition of qualified private medical/health insurance. Click the Insurance tab on http://www.studenthealth.ucla.edu and select the appropriate waiver link.
Deadlines for Waiving UCSHIP

Third-party individuals may not waive UCSHIP for a student. Waivers must be submitted by the stated deadlines whether or not fees have been paid by that date. The Fall UCSHIP waiver is available between July 1 and the student fee payment deadline. If the 20th falls on a weekend or holiday, the due date is the last business day prior to the 20th. Deadlines are strictly enforced. There are no refunds after the deadline.

The schedule for waiving UCSHIP is as follows:

**School of Law Students**
- **Fall Semester**
  - LLM: July 1–August 13
  - Year 1: July 1–August 18
  - Years 2, 3: July 1–August 25
- **Spring Semester**: December 1–19

**School of Medicine Students**
- **Fall Semester**
  - Year 4: June 1–20
  - Years 1, 2, 3: July 1–18
- **Spring Semester**: December 1–19

**All Other Students**
- **Fall Quarter**: September 1–19
- **Winter Quarter**: December 1–19
- **Spring Quarter**: March 1–20

The UCSHIP Fall Quarter waiver website is available between July 1 and September 19, 2014. For semester students, the waiver website is available between July 1 and the fee payment deadline.

The above information serves as official notice of the UCLA mandatory medical/health insurance requirement. All students are responsible for providing complete and accurate information that must be submitted by the stated deadlines.

---

**ESTIMATED ANNUAL FEES FOR 2014-15**

Fees are mandatory and subject to change without notice. See [http://www.registrar.ucla.edu/fees/](http://www.registrar.ucla.edu/fees/) for updates.

*New academic master’s degree students are also assessed a one-time Document Fee of $80, and new academic doctoral students are also assessed a one-time Document Fee of $100, that permits lifetime access to official transcripts and academic verifications without a fee for standard processing. See the Schedule of Classes for more details.*

---

**FEE REFUNDS**

Students who formally withdraw from the University or take an approved leave of absence may receive partial refunds of fees. For more information, see Withdrawal in the Academic Policies section of this catalog or consult the Schedule of Classes for policy details and specific refund deadlines for each term.

**FEE DEFERRALS**

Academic apprentice personnel are eligible to receive a fee deferral for registration fees assessed during the term in which they serve as an academic apprentice. Students are responsible for paying fees by the deferred payment deadline, which is two months after the standard term due date. Whether students attend UCLA, take a leave of absence, or withdraw from the University, they are responsible for the fees, but may be eligible to receive a partial fee refund, according to the refund schedule in the Schedule of Classes. Fees not paid by the deadline are subject to the late fee charge.

**REDUCED NONRESIDENT SUPPLEMENTAL TUITION**

The annual nonresident supplemental tuition for graduate doctoral students who have advanced to candidacy is reduced by 100 percent, effective the term after the student is advanced. Doctoral students may receive this reduced nonresident supplemental tuition rate for a maximum of three years. After three years, the full nonresident rate is assessed.

**FILING FEE**

Graduate students may be eligible to pay the filing fee (half the quarterly Student Services Fee) in lieu of full registration fees for the term in which they expect to complete final degree requirements and receive their degree. Students are not eligible to pay the filing fee unless registered the immediately preceding term. For more information, see [http://grad.ucla.edu/gasaa/etd/filingfee.htm](http://grad.ucla.edu/gasaa/etd/filingfee.htm).

Students who pay the filing fee are not eligible for University services beyond a maximum of 12 hours of faculty and staff time required to complete degree requirements and are not considered in the same status as registered students.

**IN ABSENTEE REGISTRATION**

Graduate students conducting research or taking coursework outside California may be eligible for in absentia registration and reduction of Tuition and the Student Services Fee to 15 percent of the full amounts. See the Academic Policies section of this catalog for more information.

**ANNUAL BUDGET ESTIMATES**

Students admitted to the D.D.S., D.Env., Dr.P.H., J.D., M.Arch., M.F.A. in Art, M.F.A. in Film and Television, M.F.A. in Theater, M.D., M.P.H., M.P.P., M.S.N., M.S.W., and M.U.R.P. degree programs must add Professional Degree Supplemental Tuition, which varies by school.

Budgets for the Schools of Medicine, Dentistry, and Nursing are higher due to specialized supplies; figures are available from the health professions counselor. Budgets are designed to serve as a guide and are subject to change without notice.
Throughout their appointments, teaching assistants (TAs) and graduate student researchers (GSRs) are required to be registered and enrolled in at least 12 quarter units. TAs or GSRs terminate their appointments if they take a leave of absence or withdraw. Course 375 for TAs and independent studies at the 500 level for GSRs may be counted toward the 12-unit load.

Graduate students holding fellowships must be enrolled in at least 12 units, both before and after advancement to candidacy. The 12-unit minimum required per term may include, among others, the 500 series (individual study or research).

Veterans are required to make normal progress toward the degree as stated by the major department. Information on Department of Veterans Affairs regulations is available from the Veterans Affairs coordinator, 1113 Murphy Hall.

**Continuous Registration Policy**

Graduate students must be either registered and enrolled or on an official leave of absence every term until their degrees are awarded. As an exception, certain graduate students may be eligible to pay the filing fee (see above). Failure to register or be on an official leave of absence for any term (Fall, Winter, or Spring Quarter) constitutes withdrawal from UCLA.

**Registration in the Final Term**

If students are completing courses; using faculty time, library facilities, laboratories, or other University resources; or receiving University funds, they are required to register in the final term in which they expect to receive their degree. When the award of a degree is expected at the end of a given term, but special circumstances (not involving preparation of the manuscript) over which a student has no control prevent the completion of all requirements before the first day of instruction in the next term, a student may petition for a waiver of registration for that term. Such petitions must be accompanied by a letter from the graduate adviser or department chair elaborating the exceptional circumstances.

Students who were registered for the preceding term and who completed all requirements for a degree in the interval between terms (before the first day of instruction) are not required to register to receive a degree at the end of the following term.

**Health Assessment and Evaluation**

New students enrolling in the School of Dentistry, Medicine, or Nursing or the Department of Social Welfare must complete and return to the Arthur Ashe Student Health and Wellness Center the Health Evaluation forms. Visit the Ashe Center website at http://www.studenthealth.ucla.edu to obtain professional school health clearances and monitor immunization compliance. To schedule a clearance appointment, call (310) 825-4073, option 1, or visit the Ashe Center.
GRADUATE STUDY

56

FINANCIAL SUPPORT

Fellowships and Financial Services Office
1228 Murphy Hall
(310) 825-1025
uclafellowship@grad.ucla.edu
http://grad.ucla.edu

As a major center for graduate study, UCLA offers its qualified graduate students substantial support through several types of financial assistance. Information on available funding for entering (and reentering) students is included in the online Application for Graduate Admission. Continuing graduate students should complete the online Fellowship Application for Continuing Graduate Students. Completed fellowship applications must be returned to the home department by the published deadlines. Some departments have earlier deadlines; consult the Graduate Division website at http://grad.ucla.edu for details.

Financial Support for Entering Graduate Students and Graduate Student Financial Support for Continuing Students describe the full range of financial assistance available. They are revised annually and made available at the Graduate Division's website. Students should contact their department for more detailed information.

FELLOWSHIPS

The University administers several awards on the basis of scholarly achievement. Most awards are available in open competition, though some are restricted to new students or to specific departments. Some fellowship and scholarship awards are made from University funds; others are made from endowment funds held in trust by the University and given by interested friends and alumni. Still others come from annual donations by educational foundations, industry, government, and individual benefactors.

Most fellowship, traineeship, and grant awards are for one academic year (three terms). Fellowships and grants provide stipends in varying amounts for qualified students. Nonresident tuition fellowships cover the nonresident supplemental tuition, for periods of one to three terms, of selected graduate students who are not California residents.

ASSISTANTSHIPS

Academic apprenticeships train qualified students for careers in teaching and research, and compensate them for their services. Teaching assistantships provide experience in teaching undergraduates, with faculty supervision. Graduate student researcher appointments give students experience working on faculty-supervised research projects.

AWARDS BASED ON FINANCIAL NEED

Because the cost of a graduate education may present a financial hardship, students who require assistance in meeting educational costs are encouraged to apply for aid based on their financial need. Need is defined as the difference between allowable school-related expenses and financial resources. Financial aid applicants must file the Free Application for Federal Student Aid (FAFSA). The priority filing deadline is March 2. Some awards, such as university grants, are subject to availability of funding. Students who complete the FAFSA by March 2 should also make sure that any additional requested documentation is submitted to Financial Aid and Scholarships as soon as possible.

Students who need financial aid for Summer Sessions must submit a Summer Aid Application in addition to the FAFSA. Summer applications are available at http://www.finaid.ucla.edu beginning April 1 and should be filed by April 30 for on-time consideration.

Financial aid is also available to UCLA students enrolled in Summer Travel, Summer Institutes, or UC cross-campus Summer Sessions. See http://www.finaid.ucla.edu for applications and deadline information.

Financial aid awards include work-study and low-interest loans. Students are usually awarded a financial aid package that is a combination of these forms of assistance. Further information is available from Financial Aid and Scholarships, A129J Murphy Hall, or at http://www.finaid.ucla.edu.

DEGREE REQUIREMENTS

The following information is for prospective applicants and those outside the University who are interested in the basic structure of UCLA graduate degree requirements. It is not meant to be comprehensive or to serve as a primary resource for continuing students. Official, specific degree requirements, including language requirements, are detailed in Program Requirements for UCLA Graduate Degrees at http://grad.ucla.edu. At the same website, Standards and Procedures for Graduate Study at UCLA provides detailed information and sets forth general policies, many of which emanate from the Academic Senate and its Graduate Council, regarding completion of degree requirements, master’s and doctoral committees, examinations, and foreign language requirements. General regulations concerning graduate courses, standards of scholarship, disqualification, appeal, leave of absence, normal progress toward degree, withdrawal, and a number of other matters also are included.

MASTER’S AND DOCTORAL STUDY

Graduate students earn a master’s or doctoral degree by distinguished achievement in advanced study and research. In addition to coursework, there are various means of evaluating achievement in study, including qualifying and comprehensive examinations and vari-
ous kinds of laboratory and fieldwork. Achievement in research is primarily assessed through evaluation of the master’s thesis or doctoral dissertation. In addition to advanced study and research, professional master’s and doctoral programs also may include professional training. This training may take the form of fieldwork, internships, or projects, and may lead to professional licensure.

**UNIVERSITY MINIMUM STANDARDS**

The requirements described here for master’s and doctoral degrees are minimum standards set by the University. Individual schools or departments may set higher standards and may require additional courses and examinations for their master’s degree. Each department also sets additional requirements for doctoral degrees according to the demands of the field of study. See Program Requirements for UCLA Graduate Degree at http://grad.ucla.edu and the departmental graduate adviser for details. Policies and regulations are outlined in Standards and Procedures for Graduate Study at UCLA at http://grad.ucla.edu.

**ACADEMIC RESIDENCE**

For the master’s degree, the minimum residence requirement consists of three academic terms of registration in graduate standing at the University of California, including at least two terms at UCLA.

For the doctoral degree, the minimum residence requirement is two years (six terms) of registration in graduate standing at the University of California, including one year (usually the second) in continuous residence at UCLA. If students earned a master’s degree at UCLA, one year of this requirement will have been met. In most cases a longer period of residence is necessary, and from three to five years is generally considered optimal.

Academic residency for both degrees is established by successfully completing a minimum of one graduate or upper division course (4 units) during a term.

Students may earn one term of residence for summer study in either of these ways: (1) enroll in two six-week Summer Sessions taking at least 2 units of upper division and/or graduate work in each session OR (2) enroll in one eight-week session for at least 4 units of credit. Residence earned through Summer Sessions enrollment is limited to one third of the degree requirements.

To maintain satisfactory progress toward the degree, UCLA requires at least a B average in all courses taken in graduate standing at the University and in all courses applied toward a graduate degree, including those taken at another UC campus.

**FOREIGN LANGUAGE REQUIREMENTS**

Foreign language requirements are determined by individual departments and programs. If their program has a language requirement, students should fulfill it either before they begin graduate study or as soon as possible thereafter. All foreign language requirements must be satisfied before advancement to candidacy.

Many departments require graduate degree candidates to demonstrate proficiency in one or more foreign languages, so that they can acquire broad knowledge in their field of study and keep abreast of foreign developments in the field. Students are urged to complete language requirements as early as possible in their graduate career. If the department requires two or more foreign languages, students must complete at least one before the University Oral Qualifying Examination (unless, as is most common, the department requires that both be completed before the examination).

Some departments allow students to fulfill language requirements either by passing departmental examinations or by completing coursework in a foreign language. Certain departments may require additional languages, special competence, or other special procedures. In some departments, English satisfies the foreign language requirement if it is not the native language.

For further details on foreign language requirements, consult the departmental graduate adviser.

**CHANGING MAJORS**

Continuing graduate students may petition for a change of major after discussing plans with the new department. Forms are available from the departments and should be filed with Academic Services, 1255 Murphy Hall. Deadlines are generally the same as those for the graduate admissions procedure.

**PROGRAM OF STUDY AND SCHOLARSHIP**

**MASTER’S DEGREE**

At least nine graduate and upper division courses (or any number of fractional courses totaling 36 units) must be completed in graduate standing; at least five (20 units) of the nine must be graduate-level courses. These unit requirements represent the University minimum standard. Many master’s degree programs have higher unit requirements.

UCLA offers master’s degrees under two plans: Plan I, the Master’s Thesis, and Plan II, the Master’s Comprehensive Examination. Some departments offer both plans, and students must consult with their department to determine the plan for meeting their degree requirements. University minimum requirements are the same under either plan.

**Plan I: Master’s Thesis**

Every master’s degree thesis plan requires the completion of an approved thesis that demonstrates the student’s ability to perform original, independent research.

**Plan II: Master’s Comprehensive Examination**

Following advancement to candidacy, students under Plan II must pass a comprehensive examination. Information concerning this examination and its format...
GRADUATE STUDY

Doctoral Degree

Doctoral programs are individualized and permit a high degree of specialization. The University does not specify course requirements for doctoral programs. Individual programs set their own requirements, which may include specific courses, and these must be completed before students take the University Oral Qualifying Examination. Students determine their course of study in consultation with a graduate adviser until the doctoral committee is appointed.

Doctoral Examinations before Advancement to Candidacy

Prior to advancement to candidacy, doctoral candidates fulfill the coursework, teaching, and/or examinations required by the major department or group. They are supervised during this period by a departmental adviser and/or departmental guidance committee. This committee administers a departmental written and, in some cases, oral examination (not to be confused with the University Oral Qualifying Examination) after students complete the recommended or required work. All students are required to successfully complete a written qualifying examination and the University Oral Qualifying Examination before advancement to doctoral candidacy. Once all departmental and foreign language requirements are met, the department chair consults with the student and then nominates a doctoral committee.

University Oral Qualifying Examination

The doctoral committee, consisting of at least four faculty members nominated by the department, is appointed by the dean of the Graduate Division (consult Standards and Procedures for Graduate Study at UCLA for details on committee membership). To determine qualifications for advancement to candidacy, the committee administers the University Oral Qualifying Examination and, at its option, a separate written examination.

Doctoral Dissertation

Every doctoral degree program requires the completion of an approved dissertation that demonstrates the student's ability to perform original, independent research and constitutes a distinct contribution to knowledge in the principal field of study.
Academic Policies

Students at UCLA are responsible for understanding the policies and regulations established by the Academic Senate. Should any variations exist between explanations in this catalog and regulations in the Manual of the Academic Senate, the manual prevails in all cases.

ACADEMIC TERMS

Undergraduate programs and most graduate programs at UCLA use the quarter system for academic terms, credit units, and registration fees. An academic quarter term is 10 weeks of instruction, and there are 146 days of instruction in an academic year. Class credit is accumulated in quarter units (see below). Registration fees are due each quarter. For details on academic dates and deadlines, see the Schedule of Classes calendar at http://www.registrar.ucla.edu/calendar/. For fees, see the fee charts at http://www.registrar.ucla.edu/fees/. Note: The School of Law and Geffen School of Medicine use the semester system.

ACADEMIC CREDIT

Academic work at UCLA is measured by units of credit, which are used to evaluate the amount of time a student has devoted to a particular subject and to determine a student's class level.

LANGUAGE OF INSTRUCTION

Courses at UCLA are taught in the English language, unless otherwise noted in the course description (for example, foreign language courses).

UNITS OF CREDIT

Most University courses are assigned a unit value. One unit represents three hours of work per week per term by the student, including both class attendance and preparation.

CLASS LEVELS

Undergraduate class levels are determined by the number of units completed as follows:

- Freshman (UFR) 0-44.9 units
- Sophomore (USO) 45-89.9 units
- Junior (UJR) 90-134.9 units
- Senior (USR) 135 or more units

Graduate class levels are based on the degree objective and whether or not students are advanced to candidacy for a doctorate.

REPETITION OF COURSES

Certain courses, as noted in their course descriptions, may be repeated for credit. Other courses taken at the University (except UCLA Extension) may be repeated only according to the following guidelines:

1. To improve the grade-point average, students may repeat only those courses in which they receive a grade of C– or lower; NP or U grades may be repeated to gain unit credit. Courses in which a letter grade is received may not be repeated on a P/NP or S/U basis. Courses originally taken on a P/NP or S/U basis may be repeated on the same basis or for a letter grade.
2. Repetition of a course more than once requires the approval of the College or school or the dean of the Graduate Division, and is granted only under extraordinary circumstances.
3. Degree credit for a course is given only once, but the grade assigned each time the course is taken is permanently recorded on the transcript.
4. For undergraduates who repeat a total of 16 units or less, only the most recently earned letter grades and grade points are computed in the GPA. After repeating 16 units, however, the GPA is based on all letter grades assigned and total units attempted.
5. For graduate students, all courses in which a letter grade is given, including repeated courses, are used in computing the GPA.

CREDIT FOR UPPER DIVISION TUTORIALS

Credit for upper division tutorial courses numbered 195 through 199 in a single term is limited to a maximum of 8 units. Subject to regulations governing Passed/Not Passed grades, students may take these courses on a Passed/Not Passed or a letter-grade basis.
but the total number of units allowed in upper division tutorial courses for a letter grade is 32.

To enroll in an upper division tutorial course, students must have advanced junior standing and at least a 3.0 grade-point average in the major field, or must have senior standing. Students who have an outstanding Incomplete grade in an upper division tutorial course may not enroll in another upper division tutorial course until the grade of Incomplete has been removed. On the advice of the instructor and chair, the dean of the College or school may authorize exceptions to the limitations listed. Departments may impose additional limitations on upper division tutorial courses.

CREDIT BY EXAMINATION

Students with high scholastic standing may earn credit for regular UCLA courses by taking examinations rather than enrolling in the courses. This is accomplished by establishing, with a UCLA faculty member, an individual plan of study that may include oral and written work in addition to other requirements. To be eligible, undergraduate students must have completed a minimum of 12 units at UCLA. Graduate students must be registered at the time of the examination and are limited to a maximum of three courses taken in this manner. The results of these courses are entered on the record in the same way as University of California transfer credit, and grade points are assigned. Graduate credit earned by examination may be applied to minimum course requirements for master’s degrees but cannot apply to academic residence requirements for master’s or doctoral degrees.

Students need approval from the instructor, the department, and the College or school or the dean of the Graduate Division, from whom petitions for credit by examination (with fee) are available.

GRADUATE GRADES

The following grades are used to report the quality of graduate student work at UCLA:

A Superior Achievement
B Satisfactorily demonstrated potentiality for professional achievement in field of study
C Passed the course but did not do work indicative of potentiality for professional achievement in field of study
F Fail
S Satisfactory (achievement at grade B level or better)
U Unsatisfactory
I Incomplete
IP In Progress
DR Deferred Report

The grades A, B, and C may be modified by a plus or minus suffix. The grades A, B, and S denote satisfactory progress toward the degree, but a C grade must be offset by higher grades in the same term for students to remain in good academic standing. Courses in which a C grade is received, however, may be applied toward graduate degrees unless otherwise prohibited by the program requirements.

The Schools of Dentistry, Medicine, and Law use their own grading codes. Students who are interested in programs in any of these schools should consult the appropriate school announcement.

GRADE POINTS

Grade points per unit are assigned by the Registrar as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A–</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B–</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C–</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>D–</td>
<td>0.7</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
</tr>
<tr>
<td>NP</td>
<td>0.0</td>
</tr>
<tr>
<td>U</td>
<td>0.0</td>
</tr>
</tbody>
</table>

As indicated, a plus (+) or minus (–) suffix added to a grade raises or lowers the grade-point value, except in the case of A+, which carries the same number of grade points as the A grade. Courses in which students receive a P or S grade may count toward satisfaction of degree requirements, but these grades, as well as DR, I, IP, and NR, are disregarded in determining the grade-point average. (If an I grade is later removed and a letter grade assigned, units and grade points are included in subsequent GPAs.) NR indicates that no grade was received from the instructor.
GRADE-POINT AVERAGE

The grade-point average is determined by dividing the number of grade points earned by the number of units attempted. The total grade points earned for a course equals the number of grade points assigned times the number of course units. For example, if a student takes three four-unit courses and receives grades of A–, B–, and C+, then the GPA for the term equals the total grade points (34.8) divided by the total course units (12). The GPA is 2.9. For satisfactory standing, undergraduate students must maintain a C average (2.0 GPA) and graduate students a B average (3.0 GPA) in all courses taken at any campus of the University (except UCLA Extension).

Only grades earned in regular session or Summer Sessions at any UC campus and grades earned by Arts and Architecture and Letters and Science undergraduate students in UCLA Extension courses prefixed by XLC are computed in the UCLA grade-point average. Grades earned at another institution or in UCLA Extension courses other than those prefixed by XLC do not affect the GPA.

Other schools and agencies may calculate GPAs differently from the University when evaluating records for admission to graduate and professional school programs. Students should contact them about their policies in this regard.

<td>2.3</td>
<td>4</td>
<td>9.2</td>
</tr>
<tr>
<td>Total</td>
<td>12</td>
<td>34.8</td>
<td></td>
</tr>
</tbody>
</table>

PASSED/NOT PASSED GRADES

Undergraduate students in good standing who are enrolled in at least 12 units (14 in the Henry Samueli School of Engineering and Applied Science) may take certain courses on a Passed/Not Passed (P/NP) basis. The grade P is assigned for a letter grade of C or better. Units earned this way count toward degree requirements but do not affect the GPA. Students receive neither units nor course credit for an NP grade.

Students may enroll in one course each term on a P/NP basis (two courses if they have not elected the P/NP option in the preceding term). Their department or school may require that they take some or all courses in their major for a letter grade. Certain other courses or programs may also be exempt from the P/NP option; consult the College or school for details. Students may make program changes to or from P/NP grading in one graduate or upper division course outside the major field each term, in addition to any courses offered only on an S/U grading basis within the major. The grade S is assigned for a letter grade of B or better, but units earned in this manner are not counted in computing the GPA. Students receive neither units nor degree credit for a U grade. They may not elect the S/U option for Summer Sessions courses without an approved petition.

Courses taken on an S/U basis outside the major, and 500-series courses within the major, are applicable toward degree and/or academic residency requirements if so approved. Interdepartmental majors may not apply S/U courses to degree requirements, except for 500-series courses. Program changes to or from S/U grading may be made through the tenth week of instruction through MyUCLA.

Courses that are offered only on an S/U basis are designated SU in the Schedule of Classes.

INCOMPLETE GRADES

Once an Incomplete (I) grade is assigned, it remains on the transcript along with the passing grade students may later receive for the course. The instructor may assign the I grade when work is of passing quality but is incomplete for a good cause (such as illness or other serious problem). It is the student’s responsibility to discuss with the instructor the possibility of receiving an I grade as opposed to a nonpassing grade.

If an I grade is assigned, students may receive unit credit and grade points by satisfactorily completing the coursework as specified by the instructor. Students should not re-enroll in the course; if they do, it is recorded twice on the transcript. If the work is not completed by the end of the next full term in residence, the I grade lapses to an F, NP, or U as appropriate. The College or school may extend the deadline in unusual cases (not applicable to graduate students).

IN PROGRESS GRADES

For certain courses extending over more than one term, evaluation of student performance is deferred until the end of the final term of the course. Provisional grades of In Progress (IP) are assigned in the intervening term(s) and are replaced with the final grade when students complete the full sequence. The school or College faculty or the Graduate Division determines credit if they do not complete the full sequence and petition for partial credit.

DEFERRED REPORT GRADES

Students may receive a Deferred Report (DR) grade when the instructor believes their work to be complete but cannot assign a grade because of disciplinary
proceedings or other problems. If students are given a DR grade, the Office of the Dean of Students assists them in resolving the problem. For graduate students, the dean of the Graduate Division sets a deadline by which the DR lapses to an F if the problem is not resolved and a grade assigned. The DR is changed to a grade, or perhaps to an Incomplete, when the instructor provides written confirmation that the situation is resolved. The DR grade is not included in determining the grade-point average.

CORRECTION OF GRADES

All grades except DR, I, and IP are final when filed by the instructor in the end-of-term course report. Thereafter, a grade change may be made only in case of a clerical or procedural error or other unusual circumstances. No grade may be revised by re-examination or, with the exception of the I and IP grades, by completing additional work. Students who are dissatisfied with a grade should review their work with the instructor and receive an explanation of the grade assigned. All grade changes are recorded on the transcript. See the Appendix for further details and procedures for appealing grades.

ABSENCE AND READMISSION

To be registered for a term, students must enroll in courses and pay fees according to deadlines specified in the Schedule of Classes. Students who do not register are subject to the following policies on absence and readmission.

CANCELLATION

Before the first day of classes, students may cancel registration by (1) completing and submitting a Cancellation of Registration form, available at http://www.registrar.ucla.edu/forms/, or (2) faxing a written notice to (310) 206-4520. Refund is as follows: fees paid by new undergraduate and Dentistry students are refunded except for the nonrefundable acceptance of admission fee; for new graduate, undergraduate, continuing, and re-entering students, a service fee is deducted from the amount of fees paid.

Graduate students who cancel their registration and do not apply for a formal leave of absence must file for readmission to return to the University.

WITHDRAWAL

Withdrawing from the University means discontinuing attendance in all courses in which students are enrolled. Students who withdraw during a term need to file a Withdrawal Notice, available online at http://www.registrar.ucla.edu/forms/.

When students officially withdraw, a percentage of the Student Services Fee may be refunded depending on the date the withdrawal form is filed. The UCSHIP fee is nonrefundable in most cases. Contact the Arthur Ashe Student Health and Wellness Center insurance office for more information.

CLAIMS FOR REFUND

Claims for refund must be presented within the academic (fiscal) year to which the claim is applicable. Consult the Schedule of Classes for policy details and specific refund dates.

Students may withdraw only if they have not taken any final examinations or otherwise completed the work in any classes. For undergraduates, one withdrawal places no restriction on readmission or continuation if they started the term in good academic standing. If they withdraw after one or more previous withdrawals or while in academic difficulty, a restriction may be placed on their continuance in undergraduate standing. Before withdrawing, they are urged to consult faculty, departmental, or College advisers to consider the full implications of this action.

Undergraduates may also withdraw from a term retroactively, provided no final examinations have been taken and no coursework has been completed. No withdrawals are accepted once they have officially graduated from the University.

Students who register and subsequently discontinue coursework or stop payment on registration checks without an approved petition for withdrawal, leave of absence, or cancellation receive F, NP, or U grades, as appropriate, for all courses in which they are enrolled for that term. A fine is assessed if any check for registration fees payment is returned by a bank for stopped payment, insufficient funds, or any other reason. No fees are refunded, and future registration privileges may be curtailed or revoked.

UNDERGRADUATE READMISSION

Students who complete a term (Fall, Winter, or Spring Quarter), and do not register the following term, may return to UCLA the subsequent term as a continuing student and be eligible to register and enroll in advance.

ONE-TERM ABSENCE

Students on a one-term absence who plan to attend another institution—including UCLA Extension—should discuss plans with their College or school counselors before enrolling elsewhere. On returning to UCLA, they must have an official transcript mailed from the institution directly to UCLA Undergraduate Admission to have coursework evaluated.

PLANNED ACADEMIC LEAVE (PAL) FOR INTERNATIONAL TRAVEL

Students who plan to participate in a study abroad program sponsored by an institution other than UC are required to take a planned academic leave of absence (PAL) from UCLA. After they are accepted into a program, students must register their program with the UCLA International Education Office (IEO), B300 Murphy Hall. Registering the program also generates the student application for the leave of absence.

Requirements for programs and registration can be found on the IEO website at http://ieo.ucla.edu/nonucprograms/.

Students returning from an approved leave of absence for participation in a registered non-UC study abroad program are not required to seek readmission, but must provide official transcripts for coursework evaluation.
RE-ENTERING STUDENTS

To return to the University after an absence of more than one term, students—except for those on PAL for non-UC study abroad—must complete an undergraduate readmission application and file it with the Registrar’s Office in accordance with published deadlines. A nonrefundable fee applies.

Students must submit official transcripts from all institutions (including UCLA Extension) and a completed Statement of Legal Residence with readmission applications. Coursework is evaluated when official transcripts are received. The paper records of nonregistered students, including transcripts submitted for transfer credit, are retained by the Registrar’s Office for five academic years after the last registered term.

Students who have not registered for five years must resubmit official transcripts of all work completed outside UCLA. Readmission is generally approved if students were in good academic standing (2.0 grade-point average) when they left the University, if coursework completed elsewhere in the interim is satisfactory, and if readmission applications are filed on time. The College or school may have other regulations. Contact the readmission clerk for more information at (310) 825-1091, option 6.

### READMISSION DEADLINES

GRADUATE READMISSION

For details on the policies below, consult Standards and Procedures for Graduate Study at UCLA at http://grad.ucla.edu/publications.asp.

CONTINUOUS REGISTRATION POLICY

Graduate students must be either registered and enrolled or on an official leave of absence every term until their degrees are awarded. As an exception, certain graduate students may be eligible to pay the filing fee. Failure to register or be on an official leave of absence for any term (Fall, Winter, or Spring Quarter) constitutes withdrawal from UCLA.

GRADUATE LEAVE OF ABSENCE

Continuing graduate students in good standing (3.0 GPA or above) who have completed at least one term of UCLA graduate work may, with the support of their department and the approval of the Graduate Division, be eligible for leaves of absence. Graduate students are allowed three terms of official leave of absence.

Federal policy governing students on F-1 and J-1 visas restricts leaves of absence to certain conditions. Therefore, the Dashew Center for International Students and Scholars, in consultation with the Graduate Division, individually evaluates each international graduate student request for a leave of absence to determine that it meets federal (and University) eligibility criteria.

Students on approved leave of absence are not permitted to use faculty time or make use of University facilities for more than 12 hours since their last registration and are not eligible for apprentice personnel employment or other services normally available to registered students. There is no need to apply for readmission, since the approved leave is for readmission to a specific term. The Registrar’s Office notifies students about registration for the returning term.

The Leave of Absence Request is available at http://grad.ucla.edu in the forms section. See the Schedule of Classes calendar for the filing deadline.

Research doctoral students who are new parents or who are confronted with extraordinary parenting demands should consult Standards and Procedures for Graduate Study at UCLA in regard to Graduate Council policy requiring program accommodations for them.

In Absentia Registration

Academic and professional graduate students conducting research outside California related to their degree program may be eligible for in absentia registration. Students registered in absentia pay 15 percent of Tuition and the Student Services Fee, but pay the full amounts of other mandatory fees such as health insurance and nonresident supplemental tuition (if applicable). In absentia registration and fee reductions may be used for a maximum of six quarters or four semesters for academic doctoral students, and up to three quarters or two semesters for master’s and professional graduate students. To register in absentia, complete a Petition for In Absentia Registration at http://grad.ucla.edu/gss/library/abspetition.pdf. The form includes an FAQ with complete details and restrictions.

APPLICATION FOR READMISSION

Students who are granted a formal leave of absence do not have to apply for readmission if they resume their graduate work in accordance with the terms of their leaves. All other continuing graduate students who fail to register for any regular session, or who fail to complete a term through cancellation or withdrawal, must apply for readmission.

Students who have registered at any time as a graduate student at UCLA and are returning after an absence (except a formal leave of absence) must file an Application for Graduate Admission, which is available online at http://grad.ucla.edu. Payment of the nonrefundable application fee may be made by credit card only. Transcripts of all academic work completed since registration at UCLA as a graduate student must also be submitted.

**TRANSCRIPTS AND RECORDS**

The transcript reflects all undergraduate and graduate work completed in UCLA regular session and Summer
The verification transcript certifies registration (fee payment), enrollment status, and degrees. For auto insurance good-student discount, insurance forms should be presented at 1113 Murphy Hall. Verification transcripts confirm student status only after registration fees have been paid for the term. Verification of student workload is based on actual enrolled units and does not consider wait-listed units or list courses for a term.

Verification of degree can be issued after the degree has been posted to the student's record, approximately six weeks after the term ends. If verification is required before the degree is posted, the student may contact his or her degree auditor in 1113 Murphy Hall.

**Third-Party Verifications**

UCLA has authorized National Student Clearinghouse to act as its agent for all third-party verifications of student enrollment and degrees, including those for loans and creditors. Approved by the U.S. Department of Education, the Clearinghouse is a national organization that facilitates and expedites student enrollment verifications for creditors and other student service-related agencies. The Clearinghouse abides by all provisions of the Family Educational Rights and Privacy Act (FERPA). Degree verification for the most recent term is available approximately seven weeks after the term ends. See http://www.studentclearinghouse.org.

**Ordering Transcripts**

Continuing students must order official academic and verification transcripts through MyUCLA. Other students may order transcripts in person at 1113 Murphy Hall, or by using a Transcript Order form, available at http://www.registrar.ucla.edu/forms/. The form should be sent to UCLA Registrar’s Office, Attn: [Academic or Verification] Transcripts, 1105 Murphy Hall, Box 951429, Los Angeles, CA 90095-1429.

For UCLA Extension courses, order transcripts from UCLA Extension, P.O. Box 24901, Department K, Los Angeles, CA 90024-0910 or online at https://www.uclaextension.edu/pages/str/Transcripts.aspx.

Requests are not processed if students have outstanding financial, academic, or administrative obligations (holds) to the University. Transcripts of work completed elsewhere must be requested directly from the campus or institution concerned.

More information on ordering transcripts is available by calling (310) 825-1091 or by contacting transcripts@registrar.ucla.edu.

**FEES AND PAYMENT**

Most academic and verification transcripts are available at no charge after payment of the Document Fee. A fee may be charged for some transcript-related services. For example, forms that must be completed by the Registrar’s Office and envelopes that require official signatures are charged a special handling fee. Expedited service—processing within 24 hours—is available for an additional fee, or transcripts can be faxed with payment of an additional fee. Faxed transcripts are generally not considered official, and confidentiality cannot be guaranteed.

Transcript requests are not processed for anyone with outstanding obligations to the University. For exact fees, see http://www.registrar.ucla.edu/fees/.
STUDENT RECORDS

The Registrar prepares, maintains, and permanently retains a record of each student's academic work. Student files of pertinent documents are maintained up to five years from the admit term. Students may view their documents at the Registrar's Office, 1113 Murphy Hall. Advance notice of two to three days is required for viewing.

MYUCLA

Through MyUCLA, UCLA students acquire academic, financial, and personal information from their University academic records. See https://my.ucla.edu.

CHANGE OF NAME OR ADDRESS

Students who wish to change their name on official University records should complete a UCLA Name Change or Correction form (available online at http://www.registrar.ucla.edu/forms/) and submit it with documentation supporting the name change to the Registrar's Office, 1113 Murphy Hall. Students on an F or J visa must provide a current passport bearing the exact same name as the new name. All name changes are recorded on the transcript.

Student changes of address should be updated through MyUCLA.

CLOSURE OF STUDENT RECORDS

Student records are closed to revisions in enrollment, grading, and academic actions on award of a degree. Students are responsible for requesting review of their record prior to award of their degree. See UCLA Procedure 220.1 Student Grievances Regarding Challenge to Content of Student Records Under the Family Educational Rights and Privacy Act, which may be found at http://www.adminpolicies.ucla.edu/app/Default.aspx?id=220-1.

Changes requested by an individual after award of a degree are considered by the College or school only under extraordinary circumstances. Supportive documentation is required. On action of the academic dean, a statement of the request for revision and a note of the change will be recorded only in the memoranda section of the transcript.

DEGREES

Students must satisfy (1) University requirements, (2) College or school requirements, and (3) department requirements as described in this catalog.

UNDERGRADUATE DEGREES

Undergraduate degree requirements are subject to the following degree policies.

STUDENT RESPONSIBILITY

It is the responsibility of students to keep informed of and to comply with the rules, regulations, and policies affecting their academic standing. Meeting academic deadlines, monitoring the Study List for accuracy, completing requisites, and fulfilling degree requirements are all part of their academic duties as students.

MINIMUM SCHOLARSHIP

The grades A through C and Passed denote satisfactory progress toward the bachelor's degree. The grades C– through D– yield unit credit but may not satisfy certain scholarship requirements. Even when they do, they must be offset by grades of C+ or better in other courses. Students must earn at least a C (2.0) average in all courses taken at any University of California campus. Students who fail to maintain this level may be placed on academic probation or may become subject to dismissal. The College and each school may set additional scholarship requirements.

Academic Probation

Students are placed on probation if their overall or term grade-point average falls between 1.5 and 1.99. While they are on probation, they may not take any course on a Passed/Not Passed basis. Probation ends at the close of a regular term if students have attained a C (2.0) average for the term and a cumulative C average in all University work. Students who do not end probation within two terms are subject to dismissal.

Academic Dismissal

Students are subject to dismissal from the University under any of the following conditions:

1. If their grade-point average in any one term is less than 1.5 or
2. If they do not earn at least a C (2.0) average in any term when they are on probation or
3. If they do not end probation within two terms

If students are subject to dismissal, their transcripts carry that notation. They should make an appointment with their College or school counselor. Depending on the situation, they are given conditions for continuation or are dismissed from the University.

PROGRESS TOWARD THE DEGREE

UCLA is a full-time institution, and it is expected that students complete their undergraduate degree requirements promptly. Normal progress toward graduation in four years is defined as the completion of 45 units per year, or 15 units per term.

MINIMUM PROGRESS AND EXPECTED CUMULATIVE PROGRESS

Each school enforces minimum progress regulations. The College enforces expected cumulative progress regulations. Students may be subject to disqualification for failing to meet minimum progress and expected cumulative progress requirements. See the College and Schools section for specific minimum progress and expected cumulative progress and Study List regulations.
PETITIONS

A petition is a form submitted to explain an exception from any standard rule or regulation of the University. It is the only way to obtain formal approval from the department, the College or school, the Registrar, or office with authority over the particular request. Some petitions carry a fee.

Some of the uses of petitions are to change the College, school, or major; take more or fewer units than regulations permit; make changes to the Study List after MyUCLA processing ends; or obtain credit by examination. In addition, students may petition for concurrent enrollment, double major, or waiver of scholarship requirements.

TRANSFER CREDIT

Every California community college has transfer course agreements that specify which courses will receive transfer credit. These courses are displayed on ASSIST (http://www.assist.org), the statewide transfer information site. Students can get some knowledge of transfer credit from accredited institutions other than the University of California or California community college by comparing the descriptions of courses taken with those in the UCLA General Catalog.

Once students complete the courses, they must have the other institution send official, sealed transcripts to UCLA Undergraduate Admission, 1147 Murphy Hall, Box 951436, Los Angeles, CA 90095-1436. Transfer students should discuss transfer credit with their College or school counselor and/or departmental adviser.

Community College

The maximum number of community college units allowed toward the bachelor’s degree is 105 quarter units (70 semester units). UCLA Undergraduate Admission does not grant transfer credit for community college courses beyond 105 quarter units, but students may still receive subject credit for this coursework to satisfy lower division requirements. Consult the College or school counselors for possible further limitations. To convert semester units into quarter units, multiply the semester units by 1.5—for example, 12 semester units x 1.5 = 18 quarter units. To convert quarter units into semester units, multiply the quarter units by .666—for example, 12 quarter units x .666 = 7.99 or 8 semester units.

Summer Sessions

Summer Sessions grades at any UC campus are computed in the UCLA grade-point average.

UCLA Extension

Students who wish to receive degree credit for work taken through UCLA Extension should take courses that correspond in number to the undergraduate courses offered in regular session. The designation XL or XLC before the number of the Extension course signifies that the course is equivalent to the regular session course bearing the same number. Grades earned by undergraduate students in the College of Letters and Science, the School of Arts and Architecture, and the Henry Samueli School of Engineering and Applied Science in courses prefixed by XLC are computed in the UCLA grade-point average. No degree credit is given for courses numbered X300 through X499. Concurrent enrollment in Extension and regular session is not permitted.

DEGREE CHECKS

Anytime prior to graduation students may request a review of degree progress. These official degree checks detail requirements remaining to complete the bachelor’s degree. The degree check process may be different for the College and each school. The Degree Progress Report (DPR) or Degree Audit is a computer-generated assessment of all degree requirements and the courses taken to fulfill them. View and print DPRs or Degree Audits through MyUCLA or order one at a College or school counseling office.

College of Letters and Science

Degree Audits are available through MyUCLA and on request from a College counseling office (Academic Advancement Program, 1209 Campbell Hall; Honors Programs, A311 Murphy Hall; College Academic Counseling, A316 Murphy Hall). Students should review their DPR or Degree Audit with departmental undergraders or College counselors, as appropriate.

School of the Arts and Architecture

Degree Audits are available through MyUCLA and on request from the Office of Student Services, 2200 Broad Art Center. Students should consult an adviser in the Office of Student Services when they have questions about degree requirements. Specific questions regarding major requirements should be referred to the departmental counselor.

Henry Samueli School of Engineering and Applied Science

Degree Audits are available through MyUCLA for students who entered Fall 2012 and later. Students who entered prior to Fall 2012 should use the HSSEAS Degree Audit Reporting System (DARS) at http://www.seasoasa.ucla.edu/undergraduates/DARS to determine which degree requirements are left to complete. Students should obtain an official degree check at least one term prior to their graduation term, and can make an appointment to see their academic counselor at 6426 Boelter Hall. Students should obtain an official degree check at least one term prior to their graduation term. For details, see the HSSEAS undergraduate degree audit website at http://www.seasoasa.ucla.edu/seniors/degree-candidate-information.

School of Nursing

Degree Audits are available through MyUCLA for students who entered Fall 2012 and later. Students who entered prior to Fall 2012 may request their most recent degree check from the undergraduate student services coordinator in 2-147 Factor Building.

School of Theater, Film, and Television

Degree Audits are available through MyUCLA for students who entered Fall 2012 and later. Students who entered prior to Fall 2012 should make an appoint-
G R A D U A T E  D E G R E E S

For graduate degree requirements and procedures, see Program Requirements for UCLA Graduate Degrees and Standards and Procedures for Graduate Study at UCLA at http://www.grad.ucla.edu.

C E R T I F I C A T E  O F  R E S I D E N T  S T U D Y

International students who must leave the University and the country before completing a degree or certificate program may request a Certificate of Resident Study in addition to a formal transcript. The certificate cannot be awarded if the studies involved are covered by a diploma or other certificate. The chair of the major department recommends the award of the certificate through a petition to the College, school, or Graduate Division. To be eligible to receive the certificate, students must have completed a program of at least nine courses with a minimum GPA of 2.0 (2.5 for Graduate Division students) and have satisfactorily completed a research project over a period of nine months or more.

G R A D U AT I O N

The awarding of degrees is the culmination of several steps that begin when students identify the term in which they expect to complete degree requirements.

U N D E R G R A D U A T E  S T U D E N T S

Approximately eight out of every 10 UCLA freshmen eventually receive a baccalaureate degree, either from UCLA or from another campus or institution. One third of all UCLA baccalaureate recipients go on to graduate school.

D E C L A R A T I O N  O F  C A N D I D A T Y

To initiate the steps leading to the award of a bachelor’s degree, students must identify the term in which they expect to complete degree requirements through MyUCLA by the time they complete 160 units (172 units for engineering students) to avoid the late declaration of candidacy fee. The identified term must fall within the academic year (four quarters) subsequent to the term in which students reach or expect to reach the 160- or 172-unit mark. Once they complete 160/172 or more units, a fee is assessed each time students change the degree expected term.

Current-term or past-term candidates over the unit limit must file a UCLA Declaration of Candidacy form with the Registrar’s Office at 1113 Murphy Hall. The form is available online at http://www.registrar.ucla.edu/forms/.

Friday of the second week is the last day to declare candidacy for the current term (with fee depending on units completed). Declaration of candidacy after the second week may result in a degree award date for the following term and additional penalty fees.

Verify the degree expected term through MyUCLA. For questions about degree candidacy status, Letters and Science students may inquire at 1113 Murphy Hall. Arts and Architecture, Engineering, Nursing, and Theater, Film, and Television students should see their school office. A photo ID is required. Declaring candidacy is not a guarantee of graduation.

I N  A B S E N T I A  G R A D U AT I O N

Students who intend to complete degree requirements while nonregistered (those who take a course through UCLA Extension or at another institution, remove an Incomplete grade, and so on) must file a request to graduate in absentia with their degree auditor in 1113 Murphy Hall by the second-week candidacy deadline. Students graduating in absentia are assessed the undergraduate in absentia degree processing fee in addition to the declaration of candidacy fee if they were also not registered in the term immediately prior to their degree expected term.

F I N A L  D E G R E E  A U D I T S  A N D  G R A D U AT I O N

Degree auditors (in the Registrar’s Office for Letters and Science students, 2200 Broad Art Center for Arts and Architecture students, 6426 Boelter Hall for Engineering students, 2-137 Factor Building for Nursing students, and 103 East Melnitz Building for Theater, Film, and Television students) are responsible for verifying each candidate’s eligibility for a bachelor’s degree. Degree auditors have information pertaining to a student’s graduation only if that student declared candidacy and completed 160 quarter units (172 units for engineering students).

During their graduating term, students should inform a degree auditor of grade changes, petitions for substitutions or exemptions, transfer credits, or similar changes that may affect their degree. Degree auditors notify students whose graduation eligibility cannot be verified of any requirements still outstanding and other problems in completing the degree.

Student records are closed to revisions in enrollment, grading, and academic actions on award of a degree. Students are responsible for requesting review of their record prior to award of their degree.

A Summary of Shortages for the Bachelor’s Degree statement is sent to each current-term candidate who does not satisfy degree requirements that term. Students who receive such notices should contact a degree auditor immediately. If students expect to satisfy degree requirements in a later term, they must change their degree expected
ACADEMIC POLICIES

Contact degree auditors only for questions about degree audits. Phone numbers are in the Registrar’s Services Guide in the Student Services section of the Schedule of Classes. For graduation ceremony procedures, contact the College or schools.

DEGREE DATE

Degrees are awarded at the end of Fall, Winter, and Spring Quarters and at the end of Summer Session C. School of Law and School of Medicine degrees are normally awarded at the end of Fall and Spring semesters. Consult the UCLA quarter, summer sessions, and semester calendars for the degree award date, which is the final day of the term. See http://www.registrar.ucla.edu/calendar/.

COMMENCEMENT

The College and each school conduct ceremonies for their graduates. Ceremonies feature addresses and recognize candidates who have achieved high academic distinction and honors. Names of students who request that no public information be released do not appear in commencement ceremony programs. Students may change their privacy status on MyUCLA.

Check with the College or school for eligibility requirements, programs, and time schedules. Further information, including the schedule of ceremonies, maps and parking, and updates, is at http://www.commencement.ucla.edu.

DIPLOMAS

Diplomas for both undergraduate and graduate students are available approximately three months after the degree award date. Information about obtaining the diploma in person or by mail is sent to students approximately six weeks after the end of their final term. To expedite receipt of diplomas, students should return the Diploma Mail Request form, available at http://www.registrar.ucla.edu/forms/. Obtain recorded diploma availability information at (310) 825-8883.

Change of Name

To be reflected on the diploma, name changes must be submitted to the Registrar’s Office, 1113 Murphy Hall, by the last day of the degree expected term. Once the degree is awarded, only a court order will be accepted to make a name change. The replacement diploma fee applies.

Duplicate Diplomas

If an original diploma is destroyed, a duplicate may be ordered by contacting the Registrar’s Office, Diploma Reorder, 1113 Murphy Hall, or by completing a Duplicate Diploma Application available at http://www.registrar.ucla.edu/forms/. There is a fee for the replacement diploma, and it bears a reissue date and the signatures of the current officials of the state and University.

GRADUATE STUDENTS

Candidates for both master’s and doctoral degrees must be advanced to candidacy and complete all degree requirements, including the master’s thesis or comprehensive examination, or doctoral dissertation, before the degree is conferred (see the Schedule of Classes calendar for filing deadlines). For graduate degree requirements and procedures, see Program Requirements for UCLA Graduate Degrees and Standards and Procedures for Graduate Study at UCLA at http://grad.ucla.edu.
College and Schools

The UCLA campus has one College and 11 professional schools. Each has its own degree requirements and is headed by a dean who has final academic authority. UCLA students enroll in the University and in the College or one of the schools described in this section.

COLLEGE OF LETTERS AND SCIENCE

David C. Schaberg, Dean of Humanities
Victoria L. Sork, Dean of Life Sciences
Joseph A. Rudnick, Dean of Physical Sciences/Senior Dean of the College
Alessandro Duranti, Dean of Social Sciences
Patricia A. Turner, Dean/Vice Provost of Undergraduate Education

UCLA
2300 Murphy Hall
Box 951430
Los Angeles, CA 90095-1430
(310) 825-9009
http://www.college.ucla.edu

UCLA is one of the world's premier universities. At the core of the University's research programs, graduate training, and undergraduate instruction is the UCLA College of Letters and Science. With over 26,915 students and more than 900 faculty members, the College is the largest academic unit in the UC system and the academic heart of UCLA. The College offers more than 130 majors leading to the Bachelor of Arts, Bachelor of Science, or Bachelor of Arts and Sciences (B.A.S.), as well as to master's and doctoral degrees.

For a complete list of College of Letters and Science degrees, see the table in the front of this catalog.

The undergraduate programs in the College stress a liberal arts education that brings together perspectives from many fields in a unified approach to learning. Students learn ways that issues are analyzed, questions are posed, and knowledge is organized. After sampling many general subjects, they concentrate on one field or subject and are required to pursue it rigorously and in depth, according to the standards of scholars in the field. When they reach the graduate level, they pose their own questions, analyze academic issues of their own making and, through their research, participate in the creation of knowledge.

ORGANIZATION OF THE COLLEGE

The College is organized in five divisions, each led by a dean. A description of each division follows.

HUMANITIES

The Humanities Division promotes, through scholarly inquiry and the transmission of ideas, sensitive, imaginative, and rigorous reflection on the human condition. Courses in literature help students understand the enduring power of texts both great and small—from cuneiform to manuscript to hypertext. Studies of nearly 100 foreign languages create a gateway to civilizations that span the globe and five millennia of human history. Philosophers provide training in the fundamental principles of logic and moral reasoning, and linguists—both theoretical and applied—illuminate the physiological, cognitive, and social aspects of human language. Musicologists and art historians explore with students the forms and media through which humans have sought to express themselves and to challenge and make sense of their worlds. Programs in the humanities teach students to interpret texts with an informed sensitivity, to evaluate ideas critically, to write clearly and effectively about them, and to be able to question and discuss them with their peers. See http://www.humanities.ucla.edu.

LIFE SCIENCES

Faculty members and students in the Life Sciences Division play an essential role in unlocking the basic mechanisms of life at the most fundamental level. The geography of Southern California is conducive to life sciences research, since the diverse region is a natural laboratory for environmental biologists, plant and animal ecologists, and evolutionary biologists. Scientists in microbiology and molecular, cell, and developmental biology study embryo formation, cell signaling, and genetics. Neurochemists, neurophysiologists, psychobiologists, and behavior biologists study the underlying mechanisms of the neural basis of behavior. Physiological scientists examine the structure of muscle, hormonal control of behavior, and environmental conditions, such as weightlessness, that affect bone and muscle structure and function. Cognitive psychologists are concerned with the nature of knowledge—how people learn, remember, associate, and think, and how computers relate to human thought processes. See http://lifesciences.ucla.edu.
**Physical Sciences**

Departments in the Physical Sciences Division present the results of human efforts to understand the natural sciences and their physical aspects, including the properties and characteristics of matter and energy; the science of numbers and order; the origin and structure of the universe, solar system, and Earth; and climatic change and its environmental impact. The bases for the physical sciences are the fundamental laws and proof of mathematics, chemistry, and physics. Studies in the physical sciences are experimental, theoretical, observational, and computational. Faculty members and students are interested in such topics as the nature and evolution of the galaxies; ozone depletion; nuclear winter; greenhouse effect; molecular recognition, interactions, design, synthesis, and structure; evolution of life and the continents; computational mathematics and symbolic logic; superconducting materials; plasma fusion, space plasmas; and high-energy accelerator physics. See http://www.physics.ucla.edu.

**Social Sciences**

Majors in the Social Sciences Division help students make sense of the rapidly changing world around them by giving them the tools and sensibilities to appreciate the complex interplay of individuals, environment, culture, and economy that makes up their social world. They study human and animal evolution, as well as the transformation of human societies from small groups to states. They explore and debate the meaning of cultural, ethnic, and racial identities in historical and contemporary settings. Some majors challenge students to analyze the role of labor, markets, and exchange, as well as the dynamics of political choices, participation, and institutions. Communication, from interpersonal conversation to mass media, and its impact on personal and political behavior are studied in different fields, while the impact of place and the natural environment are examined through geography. Underlying all of these topics is a drive to capture the elusive nature of human behaviors and relationships through direct observation and the questioning of prevailing theories. In addition, students learn exciting and diverse methods of social and environmental analysis, such as archaeology, linguistics, statistics, game theory, remote sensing and imagery, textual analysis, ethnography, geographic information systems, fieldwork, and ecology. See http://socialsciences.ucla.edu.

**Undergraduate Education**

The Undergraduate Education Division serves as the campuswide advocate for undergraduate education, promoting academic success for UCLA’s diverse undergraduate population and ensuring options for all students to engage in a challenging array of educational opportunities, from foundational general education courses to advanced research and honors projects. See http://www.ugeducation.ucla.edu.

Academic Advancement Program. The Academic Advancement Program (AAP) is a multiracial, multi-ethnic, and multicultural program that promotes academic excellence through academic counseling, learning sessions, and mentoring. Students are eligible for AAP if their academic profiles and personal backgrounds may impact their University experience and their retention and graduation from UCLA. See http://aap.ucla.edu.

Center for Community Learning. The Center for Community Learning (CCL) serves faculty members, undergraduate students, and community partners through academic courses and programs, including credit-bearing internships, service learning courses, community-based research, service scholarships, and the Astin Scholars Program. It is home to the undergraduate minors in Civic Engagement and Disability Studies. See http://www.uei.ucla.edu/community-learning.htm.

Center for Educational Assessment. The Center for Educational Assessment (CEA) provides information and analysis to support planning, program and policy development, and other decision making about undergraduate education at UCLA. See http://www.oid.ucla.edu/content/center-educational-assessment.

College Academic Counseling. College Academic Counseling (CAC) provides College undergraduate students with counseling on academic regulations and procedures, course selection, preparation for graduate and professional programs, selection of appropriate majors, and the options and alternatives available to enhance a UCLA education. See http://www.ugeducation.ucla.edu/counseling/.

Honors Programs. Honors Programs offers academic programs and services designed to promote an outstanding honors education, including College Honors, Honors Collegium, Departmental Scholar Program, Individual Majors Program, Phi Beta Kappa, Honors Scholarships, Honors Research Stipends, and specialized counseling and support services for College honors students. See http://www.honors.ucla.edu.

New Student and Transition Programs. New Student Orientation is the first introduction to UCLA for new students. During the three-day first-year student sessions and the one-day transfer student sessions, a unique set of comprehensive and engaging programs is offered to make student transitions to UCLA great ones. See http://www.newstudents.ucla.edu.

Office of Instructional Development. The Office of Instructional Development (OID) supports undergraduate education by enhancing teaching and learning opportunities. Through grants, programs, and services, OID promotes the effective use of current and emerging instructional methodologies and technologies. See http://www.oid.ucla.edu.

Scholarship Resource Center. The Scholarship Resource Center (SRC) is designed to help students in the search for private scholarships, regardless of financial aid eligibility. See http://www.ugeducation.ucla.edu/src/.

Transfer Alliance Program. The Transfer Alliance Program (TAP) seeks to strengthen academic ties between UCLA and honors programs in over 45 California community colleges to provide specialized transfer programs for participating students. See http://www.tap.ucla.edu.

Undergraduate Education Initiatives. Undergraduate Education Initiatives are innovative programs designed for lower division students that feature best practices in undergraduate education and attract UCLA’s most distinguished faculty members from all campus areas. Programs include College General Education, Fiat Lux Freshman Seminar Program, Freshman Cluster Program, Undergraduate Student Initiated Education Program, and Writing II Program. See http://www.uei.ucla.edu.

Undergraduate Research Centers. Undergraduate Research Centers (URC)—one for students in the arts, humanities, social sciences, and behavioral sciences
The College of Letters and Science has seven requirements for the Bachelor of Arts or Bachelor of Science degree:

1. University requirements
2. College requirements
3. Department requirements

The University of California has two requirements that undergraduate students must satisfy to graduate: (1) Entry-Level Writing or English as a Second Language (ESL) and (2) American History and Institutions. Students who do not satisfy the Entry-Level Writing requirement prior to enrollment must pass an approved course or other program prescribed by their UC campus of residence. Only after satisfying the Entry-Level Writing requirement can they take an English composition course for transfer credit after enrolling at UCLA. See Degree Requirements in the Undergraduate Study section for details.

The College of Letters and Science has seven requirements that must be satisfied for the award of the degree: unit, scholarship, academic residence, writing, quantitative reasoning, foreign language, and general education.

Students must satisfactorily complete for credit a minimum of 180 units for the bachelor’s degree. At least 60 of the 180 units must be upper division courses numbered 100 through 199. A maximum of 216 units is acceptable. Admission into the course is determined with a grade of C or better (C– grades are not acceptable). Students whose native language is not English may satisfy the Writing I requirement by completing English Composition 3 or an equivalent course with a grade of C or better (C– or a Passed grade is not acceptable). The Writing I requirement may also be satisfied by scoring 4 or 5 on one of the College Board Advanced Placement Examinations in English or a combination of a score of 720 or higher on the SAT Reasoning Test Writing Section and superior performance on the English Composition 3 Proficiency Examination.

Students must complete the University’s Entry-Level Writing or English as a Second Language (ESL) requirement prior to completing the College writing requirement.

The Writing I requirement must be satisfied within the first three terms of enrollment by completing English Composition 3 or an equivalent course with a grade of C or better (C– or a Passed grade is not acceptable).

Structure of a Degree

</tr>
</tbody>
</table>

Courses that do not satisfy specific University, College, or department requirements are referred to as electives and can be used to meet the minimum unit requirement for graduation.
the English as a Second Language Placement Examination (ESLPE).

Qualifying examination scores and courses are determined by the College Faculty Executive Committee. Approved courses are published in the UCLA Schedule of Classes.

Writing II. The Writing II requirement must be satisfied within seven terms of enrollment by completing one course from a list approved by the College Faculty Executive Committee. The course must be completed with a grade of C or better (C– or a Passed grade is not acceptable). Writing II courses are listed in the Schedule of Classes at http://www.registrar.ucla.edu/soc/writing.htm. Applicable courses may also be applied toward preparation for the major requirements and, if approved for general education (GE) credit, may fulfill a GE requirement.

Transfer students with 90 or more units who have completed the Intersegmental General Education Transfer Curriculum (IGETC) will have satisfied the Writing I, Writing II, and reciprocity requirements. No transfer student is admitted to the College without completing, with a grade of C or better (C– grade is not acceptable), a college-level writing course that Undergraduate Admission accepts as equivalent to English Composition 3.

Quantitative Reasoning Requirement

The quantitative reasoning requirement may be satisfied by completing one approved UCLA course (see list below) or an equivalent course within the first seven terms of enrollment. The course must be taken for a letter grade, and students must receive a grade of C or better (C– grade is not acceptable).

The requirement may also be satisfied by achieving an SAT Reasoning Test Mathematics Section score of 600 or higher or an SAT Subject Test in Mathematics score of 550 or higher. Approved UCLA courses and examinations, and qualifying scores, are determined by the College Faculty Executive Committee. Approved courses are listed below.

Applicable courses may also be applied toward preparation for the major requirements and, if approved for general education (GE) credit, may fulfill a GE requirement.

Transfer students with 90 or more units who have completed the Intersegmental General Education Transfer Curriculum (IGETC) will have satisfied the quantitative reasoning and reciprocity requirements. No transfer student is admitted to the College without completing, with a grade of C or better (C– grade is not acceptable), a college-level quantitative reasoning course that Undergraduate Admission accepts as equivalent to those approved by the College Faculty Executive Committee.

Foreign Language Requirement

The foreign language requirement may be satisfied by one of the following methods: (1) completing a college-level foreign language course equivalent to level three or above at UCLA with a grade of C or Passed or better or (2) scoring 3, 4, or 5 on the College Board Advanced Placement (AP) foreign language examination in Chinese, French, German, Italian, Japanese, Spanish, or scoring 4 or 5 in Latin, thereby earning College credit or (3) presenting a UCLA foreign language departmental examination score indicating competency through level three. Consult the Schedule of Classes or the appropriate department for times and places of the regularly scheduled examinations. Students who wish to demonstrate proficiency in a language that is taught in a UCLA department that has no scheduled examination should contact the appropriate department to arrange for one. Students wishing to take an examination in a language not taught at UCLA should contact a College counselor.

Transfer students with 90 or more units who have completed the Intersegmental General Education Transfer Curriculum (IGETC) will have satisfied the foreign language and reciprocity requirements.

The following language courses may be used to fulfill the foreign language requirement:

African Languages (Applied Linguistics) 1A-1B-1C or 15 (Swahili); 7A-7B-7C or 17 (Zulu); 11A-11B-11C or 25 (Yoruba); 27 (Xhosa); 29 (Igbo); 31A-31B-31C or 35 (Bambara); 41A-41B-41C or 45 (Hausa); 51A-51B-51C or 56 (Amharic); 55 (Tigrinya); 61A-61B-61C (Wolof); 75 (Chichewa); 85 (Setswana)

Afrikaans (Germanic Languages) 105A and 105B

American Sign Language (Linguistics) 1, 2, and 3, or 8

Ancient Near East (Near Eastern Languages) 120A-120B-120C (Ancient Egyptian); 140A-140B-140C (Sumerian)

Arabic (Near Eastern Languages) 1A-1B-1C or 8

Armenian (Near Eastern Languages) 1A-1B-1C or 4A-4B-4C

Bulgarian (Slavic Languages) 101A-101B-101C

Chinese (Asian Languages) 1, 2, and 3, or 1A, 2A, and 3A, or 8 or 8A

Czech (Slavic Languages) 101A-101B-101C

Dutch (Germanic Languages) 103A-103B, and 103C, or 104A-104B

Filipino (Asian Languages) 1, 2, and 3, or 3R or 8

French (French and Francophone Studies) 1, 2, and 3, or 8

German (Slavic Languages) 1, 2, and 3, or 8

Greek (Classics) 1, 2, and 3, or 16; 8A-8B-8C or 15 (Modern Greek)

Hebrew (Near Eastern Languages) 1A-1B-1C or 8

Hindi-Urdu (Asian Languages) 1, 2, and 3, or 3R

Hungarian (Slavic Languages) 101A-101B-101C

Indigenous Languages of the Americas (Linguistics) 17 or 18A-18B-18C (Quechua)

Indonesian (Asian Languages) 1, 2, and 3

Iranian (Near Eastern Languages) 1A-1B-1C or 8 or 20A-20B-20C (Persian); M115A-M115B-M115C (Azeri)

Italian 1, 2, and 3, or 9

Japanese (Asian Languages) 1, 2, and 3, or 8

Korean (Asian Languages) 1, 2, and 3, or 1A, 2A, and 3A, or 8

Latin (Classics) 1, 2, and 3, or 16

Lithuanian (Slavic Languages) 101A-101B-101C

Polish (Slavic Languages) 101A-101B-101C

Portuguese (Spanish and Portuguese) 1, 2, and 3, or 11A-11B

Romanian (Slavic Languages) 101A-101B-101C or 103

Russian (Slavic Languages) 1, 2, and 3, or 10 or 15A-15B or 100B

Scandinavian 1, 2, and 3, or 8 (Swedish); 11, 12, and 13 (Norwegian); 21, 22, and 23 (Danish)
Semotics (Near Eastern Languages) 140A-140B and 141 (Akkadian)
Serbian/Croatian (Slavic Languages) 101A-101B-101C
South Asian (Asian Languages) 110A (Sanskrit)
Spanish (Spanish and Portuguese) 1, 2, and 3, or 2A and 3A, or 10 or 11A-11B
Thai (Asian Languages) 1, 2, and 3, or 3R
Turkic Languages (Near Eastern Languages) 101A-101B-101C (Turkish); 111A-111B-111C (Uzbek); M115A-M115B-M115C (Azerbaijan)
Ukrainian (Slavic Languages) 101A-101B-101C
Vietnamese (Asian Languages) 1, 2, and 3, or 1A, 2A, and 3A, or 3R or 8
Yiddish (Germanic Languages) 101A, 101B, and 101C, or 102B

**GENERAL EDUCATION REQUIREMENTS**

General education (GE) is more than a checklist of required courses. It is a program of study that (1) reveals to students the ways that research scholars in the arts, humanities, social sciences, and natural sciences create and evaluate new knowledge; (2) introduces students to the important ideas and themes of human cultures; (3) fosters appreciation for the many perspectives and the diverse voices that may be heard in a democratic society; and (4) develops the intellectual skills that give students the dexterity they need to function in a rapidly changing world. This entails the ability to make critical and logical assessments of information, both traditional and digital; deliver reasoned and persuasive arguments; and identify, acquire, and use the knowledge necessary to solve problems.

**FOUNDATIONS OF KNOWLEDGE**

Students follow a general education curriculum that is grouped into three foundational areas: Foundations of the Arts and Humanities, Foundations of Society and Culture, and Foundations of Scientific Inquiry.

Ten courses (48 units minimum) are required. GE-approved Writing II courses may fulfill an appropriate foundational area. See the foundational area descriptions below for a breakdown of courses required.

Students who complete a yearlong GE Cluster series (1) fulfill the Writing II requirement, (2) complete 40 percent of their general education requirements, and (3) receive laboratory/demonstration credit where appropriate.

Courses listed in more than one category can fulfill GE requirements in only one of the cross-listed categories.

**Foundations of the Arts and Humanities.** Three 5-unit courses, one from each subgroup:

- Literary and Cultural Analysis
- Philosophical and Linguistic Analysis
- Visual and Performance Arts Analysis and Practice

The aim of courses in this area is to provide perspectives and intellectual skills necessary to comprehend and think critically about our situation in the world as human beings. In particular, the courses provide the basic means to appreciate and evaluate the ongoing efforts of humans to explain, translate, and transform their diverse experiences of the world through such media as language, literature, philosophical systems, images, sounds, and performances. The courses introduce students to the historical development and fundamental intellectual and ethical issues associated with the arts and humanities and may also investigate the complex relations between artistic and humanistic expression and other facets of society and culture.

**Foundations of Society and Culture.** Three 5-unit courses, one from each subgroup and a third course from either subgroup:

- Historical Analysis
- Social Analysis
- Third course from either subgroup

The aim of courses in this area is to introduce students to the ways in which humans organize, structure, rationalize, and govern their diverse societies and cultures over time. The courses focus on a particular historical question, societal problem, or topic of political and economic concern in an effort to demonstrate how issues are objectified for study, how data is collected and analyzed, and how new understandings of social phenomena are achieved and evaluated.

**Foundations of Scientific Inquiry.** Four courses, two from each subgroup. One 5-unit course from each subgroup must include either laboratory/demonstration or Writing II credit. For students entering Fall Quarter 2009 through Spring Quarter 2017, the laboratory requirement is reduced to one 5-unit course from either subgroup. Other courses in the subgroups may be 4 units:

- Life Sciences
- Physical Sciences

The aim of courses in this area is to ensure that students gain a fundamental understanding of how scientists formulate and answer questions about the operation of both the physical and biological world. The courses also deal with some of the most important issues, developments, and methodologies in contemporary science, addressing such topics as the origin of the universe, environmental degradation, and the decoding of the human genome. Through lectures, laboratory experiences, writing, and intensive discussions, students con-

| **Total GE** | 10 Courses/48 Units Minimum |
Consider the important roles played by the laws of physics and chemistry in society, biology, Earth and environmental sciences, and astrophysics and cosmology.

**Foundations Course Lists.** Creating and maintaining a general education curriculum is a dynamic process; consequently, courses are frequently added to the list. For the most current list of approved courses that satisfy the Foundations of Knowledge GE plan, consult an academic counselor or see http://www.registrar.ucla.edu/ge/.

**Advanced Placement Examination Credit**

Students may not use Advanced Placement (AP) Examination credit to satisfy the College's 10-course foundational area general education requirement. See the AP Chart at http://www.admission.ucla.edu/prospect/APCreditLS.htm. Consult a departmental counselor for applicability of AP credit toward course equivalencies or satisfaction of Preparation for the Major requirements.

**Reciprocity with Other UC Campuses**

Students who transfer to UCLA from other UC campuses and have met all GE requirements prior to enrolling at UCLA are not required to complete the College GE requirements. Written verification from the dean at the other UC campus is required. Consult a College counselor regarding eligibility for this option.

**Intersegmental General Education Transfer Curriculum**

Transfer students from California community colleges have the option to fulfill UCLA lower division GE requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses that have been agreed on by the University of California and the California community colleges. Although GE or transfer core courses are degree requirements rather than admission requirements, students are advised to fulfill them prior to transfer. The IGETC significantly eases the transfer process, as all UCLA GE requirements are fulfilled when students complete the IGETC courses. Students who select the IGETC must complete it entirely before enrolling at UCLA.

Students who are unable to complete one or two IGETC courses prior to transfer may request certification of partial completion of IGETC from their community college. On certification, the remaining courses must be completed with a minimum grade of C in each. Students who fail to complete the remaining IGETC coursework or who are otherwise not eligible for IGETC or partial IGETC are required to complete the College GE requirements.

**Department Requirements**

College departments generally set two types of requirements that must be satisfied for the award of the degree: (1) Preparation for the Major (lower division courses) and (2) the Major (upper division courses). Departments also set requirements for minors and specializations.

**Preparation for the Major**

Admission to a major often requires completion of a set of courses known as Preparation for the Major. Students in life sciences majors must complete a set of preparatory courses known as the Life Sciences Core Curriculum. Each department sets its own Preparation for the Major requirements; see the Curricula and Courses section of this catalog.

**The Major**

A major in the College consists of a group of coordinated upper division courses and is designated as departmental, interdepartmental, or individual. Each course applied toward the major and preparation for the major must be taken for a letter grade unless otherwise stipulated by the department. Students who have been away from the University for several terms should consult with their major department or curriculum adviser concerning the requirements under which they are to graduate.

Each department sets its own major requirements; see the Curricula and Courses section of this catalog.

**Departmental Majors.** A departmental major consists of a minimum of 36 upper division units and a maximum of 60 upper division units. The majors are established and supervised by campus departments.

**Interdepartmental Majors.** An interdepartmental major consists of a minimum of 48 upper division units and a maximum of 75 upper division units, of which no more than 32 units may be coursework in one department. The programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of departmental division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

**Individual Capstone Majors.** If students have some unusual but definite academic interest for which no suitable major is offered at the University and have completed at least three terms of work (45 units minimum) at the University with a grade-point average of 3.4 or better, they may petition for an individual major that is also a designated capstone major. The consent of the College Honors Programs and the assistance of a faculty adviser are required. Individual majors must be approved by the vice provost for Undergraduate Education.

The individual major must consist of at least 48 and no more than 60 upper division units, a majority of which must be in departments offering a major in the College. A capstone senior thesis of at least 8 but no more than 12 units is required. For details about individual majors, contact Honors Programs, A311 Murphy Hall, (310) 825-1553. See http://www.honors.ucla.edu/individual.html.

**Double Majors.** Students in good academic standing may be permitted to have a double major consisting of majors from two departments within the College. Both majors must be completed within the maximum limit of 216 units, and students must obtain the approval of both departments.

With few exceptions, double majors in the same department are unacceptable. No more than 20 upper division units may be common to both majors.

**Minors and Specializations**

Students may choose to pursue a minor to complement their major program of study. Minors consist of no fewer than seven courses (28 units) and no more than nine courses (36 units). Some minors also have admission requirements.
The Computing specializations are sequences of supplemental courses that enhance work in a major.

For a list of minors and specializations, see the chart at the beginning of this catalog; descriptions are in the Curricula and Courses section.

POLICIES AND REGULATIONS

Degree requirements are subject to policies and regulations, including the following:

STUDENT RESPONSIBILITY

Students should take advantage of academic support resources, but they are ultimately responsible for keeping informed of and complying with the rules, regulations, and policies affecting their academic standing.

STUDY LIST

The Study List is a record of classes that a student is taking for a particular term. The allowable Study List load is up to 19 units. After the first term, students may petition to enroll in more than 19 units if they attained at least a B average the preceding term in a total program of at least 15 units and have an overall grade-point average of 3.0. First-term transfer students from any other campus of the University may carry excess units on the same basis as students who have completed one or more terms at UCLA; however, they are not encouraged to do so.

PROGRESS TOWARD THE DEGREE

UCLA is a full-time institution, and it is expected that students complete their undergraduate degree requirements promptly. Normal progress toward graduation in four years is defined as the completion of 45 units per year, or 15 units per term.

The Degree Progress Report (DPR) or Degree Audit is a record of degree requirements and the courses taken to fulfill them. Students are responsible for monitoring their progress toward the degree. They must read and understand the catalog, check the online catalog for updates, and consult regularly with the College and department counselors to confirm they are satisfying all program requirements. Department counselors advise students on progress and completion of the major requirements. Counselors in College Academic Counseling, the Academic Advancement Program, Honors Programs, and Student Athletics Counseling assist students with College requirements and degree planning and provide DPRs or Degree Audits on request. Students can also view DPRs or Degree Audits through MyUCLA.

MINIMUM PROGRESS/EXPECTED CUMULATIVE PROGRESS

During a regular term of enrollment, undergraduate students in the College are required to enroll in a minimum of 13 units. Students are also required to meet cumulative progress unit expectations as outlined in the Expected Cumulative Progress Chart at http://www.uveducation.ucla.edu/counseling/esp-cum-prog.html.

The following courses count toward minimum progress and expected cumulative progress but are exempt from the maximum unit limit of 216: 19 ( Fiat Lux), 88S (Undergraduate Student Initiated Education seminars), 89 and 189 (honors seminars), 89HC and 189HC (honors contracts), M97X (PEERS lectures), 98X, 98XA, and 98XB (PEERS laboratories), 99 (student research tutorials), 190 (research colloquia), 193 (journal club seminars), 194 (research group or internship seminars), Honors Collegium 101A through 101E, Mathematics 71SL, 72SL, Science Education 1SL, and 10SL.

REDUCED FEE PROGRAMS

While full-time study is expected and required of students, some students may qualify for part-time study due to compelling reasons of occupation, home and family responsibilities, or health. Under this policy, part-time status is defined as 10 units or less per term based on enrolled units at the end of the third week, and is presumed to be of a permanent nature. On approval of part-time status, a reduction of the tuition fee by one half and a reduction of the nonresident supplemental tuition fee by one half are approved.

To be eligible for part-time study, students must provide documentation of occupation, home and family responsibility, or health that prevents them from carrying a full-time study load, as well as documentation of a need for part-time study for a minimum of three consecutive terms. Once approved for part-time study, students must complete two courses of 10 units or less in each of the three consecutive terms. Only under documented extraordinary circumstances is a one-course Study List approved. Documentation must specify that a one-course Study List is warranted.

Students should obtain the petition, Undergraduate Request for Fee Reduction, from College Academic Counseling. The application for part-time study must be submitted with accompanying documentation by Friday of the second week of the term. Students approved for part-time study who become enrolled in or receive credit for more than 10 units during a term must pay the full fees for that term.

DECLARING A MAJOR

Students are expected to select a major by the beginning of their junior year. This may be a program of related upper division courses within a single department (departmental major) or a group of related courses involving a number of departments (interdepartmental major) or, under certain circumstances, a group of courses selected to meet a special need (individual capstone major).

Most entering freshmen are unsure about specific academic goals and request to be admitted to the College as “undeclared.” These students then explore fields of study by taking introductory courses in the physical and life sciences, social sciences, and humanities in search of an area that most excites their interest.

All students with 90 or more units toward a degree are expected to declare a premajor or a major. When they are ready to do so, they obtain approval on a Petition for Declaration of Major from the department or interdepartmental degree committee that governs their intended major.

CHANGING A MAJOR

Students in good academic standing who wish to change their major may petition to do so provided they can complete the new major within the 216-unit limit. Petitions must be submitted to and approved by the department or committee in charge of the new major. Admission to certain majors may be closed or
restricted; changes are normally not permitted if students are on probation or have begun their last term.

Students who fail to attain a grade-point average of 2.0 (C) in preparation for the major or major courses may be denied the privilege of entering or continuing in that major. Some departments may have higher grade-point requirements for their preparation and major courses; consult the appropriate department regarding minimum standards.

RE-ENTERING STUDENTS AND THEIR MAJORS

Students returning to the University to resume their studies after an absence of several years may find their previous major area of study no longer available. They then must select a current major in which to complete their studies. Consult an academic counselor for assistance.

CREDIT LIMITATIONS

The following credit limitations apply to all undergraduate students enrolled in the College. In most cases units are not deducted until the final term before graduation. Students with questions should consult an academic counselor.

Transfer students with credit from other institutions (advanced standing credit) receive a Degree Progress Report (DPR) or Degree Audit from Undergraduate Admission indicating the transferable units from former institutions; however, the following credit limitations may reduce the total number of transferable units that apply toward the degree in the College. Consult a counselor in College Academic Counseling about these limitations.

Advanced Placement Examinations. Advanced Placement (AP) Examination credit may not be applied toward a degree unless students had less than 36 units of credit at the time of the examination(s). See the AP Chart at http://www.admission.ucla.edu/prospect/APCreditList.htm for UCLA course equivalents and credit allowed for GE requirements.

College Level Examination Program. Credit earned through the College Level Examination Program (CLEP) and through the California State University English Equivalency Examination may not be applied toward the bachelor’s degree.

Community College Unit Limit. After completing 105 quarter units toward the degree in all institutions attended, students are allowed no further unit credit for courses completed at a community college.

Credit by Examination. Within the College, eligibility for credit by examination is usually limited to students who have been approved as Departmental Scholars or who are admitted to a departmental honors program or UCLA Honors Programs. Students who have completed a minimum of 12 units at UCLA with a minimum 3.5 overall grade-point average may petition for credit by examination. The examination for that course must be taken successfully before they may petition for credit by examination in another course. Students may receive credit by examination for only one course out of 10 courses completed. Credit by examination may not be used to gain credit for prior knowledge, audited courses, or courses taken elsewhere. Units for a course taken by examination are applied toward the 216-unit maximum allowable units for graduation. Petitions for credit by examination (with fee) are available only through an appointment with a counselor in the Honors Programs Office, A311 Murphy Hall.

Education Abroad Program. Students participating in the Education Abroad Program may receive a maximum of 48 units of credit toward the degree in addition to the 8 units maximum allowed for the Intensive Language Program.

Foreign Language. Credit is not allowed for completing a less advanced course in grammar and/or composition after students have received credit for a more advanced course. College credit for an international student’s native language and literature is allowed for (1) courses taken in native colleges and universities or (2) upper division (advanced language courses only) and graduate courses taken at the University of California or another English-speaking institution of approved standing. No credit is allowed for lower division courses.

Performance Courses. No more than 12 units of music and/or dance performance courses (Music 6, 16, 56 through 65, C109A, C113A, C115, 116, Ethnomusicology 91A through 91Z, 161A through 161Z, Music 60A through 65, C90A through 90S, 160A through 165, and World Arts and Cultures 5, 114) may be applied toward the bachelor’s degree whether taken at UCLA or another institution.

Physical Education. No more than 4 units in physical education activities courses may be applied toward the bachelor’s degree.

Physics Courses. Any two or more courses from Physics 1A, 1AH, 6A, and 10 are limited to a total of 6 units of credit.

ROTC Courses. For students contracted in the Aerospace Studies Department, 36 units of aerospace studies credit may be applied toward the requirements for the bachelor’s degree; for students contracted in the Military Science Department, 26 units of military science credit may be applied; for students contracted in the Naval Science Department, 26 units of naval science credit may be applied.

Statistics Courses. Credit is allowed for only one of the following introductory statistics courses: Statistics 10, 12, 13 (or former 10H, 11, or 14), or any equivalent course taken at UCLA or another institution.

Upper Division Tutorials. No more than 8 units of credit may be taken per term in upper division tutorials numbered 195 through 199. The total number of units allowed in such courses for a letter grade is 32; see specific restrictions under each departmental listing.

300- and 400-Level Courses. No more than 8 units in the 300 and 400 series of courses may be applied toward the bachelor’s degree. Credit is not granted for X300 and X400 courses taken in UCLA Extension.

HONORS

College undergraduate students who achieve scholastic distinction may qualify for the following honors and programs:

COLLEGE HONORS

The highest academic recognition the College confers on its undergraduate students is College Honors, which is awarded to graduating seniors who successfully complete the College Honors program and who have an overall University of California grade-point
average of 3.5 or better. The program provides exceptional undergraduate students an opportunity to pursue individual excellence.

For details on the College Honors program and entry requirements, see http://www.honors.ucla.edu/program.html.

DEAN’S HONORS

The Dean’s Honors list recognizes high scholastic achievement in any one term. The following criteria are used to note Dean’s Honors on the student records:

(1) a 3.75 grade-point average in any one term with at least 12 graded units and no grade of NP or I or (2) a 3.66 GPA and at least 56 grade points during the term, with no grade of NP or I. Dean’s Honors are automatically recorded on the transcript.

DEPARTMENTAL HONORS

Individual departments and programs in the College offer departmental honors programs. Admission and curricular requirements vary according to the department or program. See the Curricula and Courses section of this catalog for details, and consult the departmental adviser about procedures and arrangements. Students who successfully complete the requirements graduate with departmental honors or highest honors.

LATIN HONORS

Students who have achieved scholastic distinction may be awarded the bachelor’s degree with Latin honors. To be eligible, students must have completed 90 or more units for a letter grade at the University of California and must have attained an overall grade-point average at graduation that places them in the top five percent of College graduates (GPA of 3.897 or better) for summa cum laude, the next five percent (GPA of 3.821 or better) for magna cum laude, and the next 10 percent (GPA of 3.698 or better) for cum laude. Coursework taken on the Education Abroad Program is applied toward Latin honors at graduation. The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in the graduating year (fall, winter, spring, summer) determine student eligibility. Students should consult their Degree Progress Reports, Degree Audits, or the Schedule of Classes for the most current calculations of Latin honors.

DEPARTMENTAL SCHOLAR PROGRAM

Departments may nominate exceptionally promising undergraduate students (juniors and seniors) as UCLA Departmental Scholars to pursue bachelor’s and master’s degrees simultaneously. Qualifications include completion of 24 courses (96 quarter units) at UCLA or the equivalent at a similar institution, the requirements in preparation for the major, and eligibility to participate in the College Honors program. Students must also have at least one term of coursework remaining at UCLA. To obtain both the bachelor’s and master’s degrees, students must be provisionally admitted to the Graduate Division, fulfill requirements for each program, and maintain a minimum B average. No course may be used to fulfill requirements for both degrees. Interested students should consult their department well in advance of application dates for graduate admission. For further information, contact the Honors Programs Office in A311 Murphy Hall or see http://www.honors.ucla.edu/deptschl.html.

GRADUATE STUDY

The College of Letters and Science provides graduate students virtually unlimited opportunities for academic pursuit, faculty-sponsored research, and fieldwork relative to specific programs and career goals.

With Graduate Division approval and subject to University minimum requirements, each department sets its own standards for admission and other requirements for the award of master’s and doctoral degrees. For complete degree requirements, see Program Requirements for UCLA Graduate Degrees at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.

For information on the proficiency in English requirements for international graduate students, see Graduate Admission in the Graduate Study section of this catalog.

DAVID GEFFEN SCHOOL OF MEDICINE

A. Eugene Washington, Dean and Vice Chancellor

UCLA

12-105 Center for the Health Sciences

Box 957035

Los Angeles, CA 90095-7035

(310) 825-6081

e-mail: somadmiss@mednet.ucla.edu

http://dgsom.healthsciences.ucla.edu/dgsom

/education/

At the David Geffen School of Medicine at UCLA, faculty members and students play a dynamic role on campus and in the Los Angeles community. Not only are they in the clinics, wards, and operating rooms of the Ronald Reagan UCLA Medical Center and multiple private and public affiliated medical centers, they are also at work in the facilities of many research programs of the school and broader University. They volunteer in community clinics, health fairs, and public schools, and participate in research and clinical care in multiple global settings.

Students at the Geffen School of Medicine are exposed to the best of many worlds—strong research-oriented basic and clinical science departments, a hospital consistently ranked among the nation’s elite, superb affiliated clinical facilities that provide the full spectrum of teaching settings and patient populations, a biomedical library that is considered one of the world’s best, and a multidisciplinary global health program. Geffen School of Medicine departments are staffed by a distinguished faculty of respected researchers and practitioners.

DEGREES

The Geffen School of Medicine offers an M.D. degree program, special programs in affiliation with other hospitals and universities, postgraduate medical training programs, and the following master’s and doctoral degrees offered through the UCLA Graduate Division:

Biological Chemistry (M.S., Ph.D.)

Biomathematics (M.S., Ph.D.)

Biomedical Physics (M.S., Ph.D.)

Clinical Research (M.S.)

Human Genetics (M.S., Ph.D.)
The curriculum is an innovative, integrated, organ system-based program, with problem-based learning case studies to link basic, clinical, and social studies. Because medical school is but one phase in a physician’s education, the curriculum stresses self-directed learning to prepare students for a future in which scientific knowledge, social values, and human needs are ever changing. Formats for instruction include lectures, problem-based learning tutorials, seminars, laboratories, standardized patient exercises, and clinical experiences; students are involved in patient care from their first week through graduation.

The M.D. program is a four-year medical curriculum that prepares students broadly for careers in research, practice, and teaching in the medical field of their choice. The curriculum emphasizes issues of growing importance such as primary care, research opportunities for careers in academic medicine, human genetics and the evolving world of gene therapy, psychosocial issues of health and disease, evidence-based medicine, medical ethics, and clinical reasoning.

For details on the M.D. curriculum or to apply to the program, see http://www.medstudent.ucla.edu/prospectives/ or contact the Geffen School of Medicine Admissions Office, 12-105 Center for the Health Sciences, UCLA, Box 957035, Los Angeles, CA 90095-7035. See http://career.ucla.edu/Students/GradProfSchCounseling/Overview for details on the four-year premedical studies program.

SPECIAL PROGRAMS

PARTNERSHIP PROGRAMS

Extending medical education to a broader segment of tomorrow’s physicians and researchers, the Geffen School of Medicine admits a select group of students into two innovative partnership programs. In addition to completing the requirements for the M.D. degree, students engage in specialized coursework and/or projects designed to fulfill the mission of each program.

Charles Drew/UCLA Medical Education Program

The mission of the Charles Drew (CDU)/UCLA Medical Education Program is to train students to practice medicine with competence and compassion in disadvantaged rural and urban communities. Each year 24 students are admitted to the program. Students spend their first two years at the UCLA campus and complete their last two years of clinical work in specially designated training centers in medically underserved communities and at UCLA and affiliated hospitals. A distinguishing component of the program is the required medical research thesis. See http://www.cdrewu.edu/com/pgm/CDUUCLA.

UCLA PRIME Program

The UCLA PRIME Program is a five-year program to develop leaders in medicine who address policy, care, and research issues in healthcare for underserved populations. A commitment to serve and experience in working with diverse medically disadvantaged populations is paramount. The program leads to the M.D. and a master’s degree in areas that complement the mission of the program. Each year the class is comprised of 14 students. Students identify with one of two programs: PRIME UCLA-WESTWOOD or PRIME UCLA-CDU. Following successful completion of the required clinical clerkships, students pursue a one-year master’s degree. See http://www.medsch.ucla.edu/uclaprime/ or call (310) 794-5912.

ARTICULATED AND CONCURRENT DEGREE PROGRAMS

Medical Scientist Training Program

The Geffen School of Medicine and the Graduate Division offer an articulated degree program that allows students to earn both the M.D. and Ph.D. in about eight years, depending on the course of study and research. The Ph.D. may be awarded in one of several medical sciences fields. Call the Medical Scientist Training Program at (310) 794-1817 for details or see http://mstp.healthsciences.ucla.edu.

M.D./M.B.A., M.D./M.P.H., M.D./M.P.P.

Concurrent programs with the Anderson Graduate School of Management and Luskin School of Public Affairs and an articulated program with the Fielding School of Public Health allow UCLA medical students to earn both the M.D. and M.B.A., M.D. and M.P.P., or the M.D. and M.P.H. degrees over five years by following a designated course of study and some shared coursework. Separate application must be made to the Anderson School, Luskin School of Public Affairs, or the Fielding School of Public Health during the third year of medical school. Call (310) 825-3970 for information.

POSTGRADUATE MEDICAL TRAINING

Postgraduate medical training programs, including residencies, are offered through all the clinical departments at UCLA and the affiliated training hospitals such as Harbor-UCLA, Cedars-Sinai, and Greater Los Angeles VA System. Programs at the affiliated institutions broaden the scope of the teaching programs by

Microbiology, Immunology, and Molecular Genetics (M.S., Ph.D.)
Molecular and Medical Pharmacology (M.S., Ph.D.)
Molecular, Cellular, and Integrative Physiology (Ph.D.)
Neurobiology (M.S., C.Phil., Ph.D.)
Neuroscience (Ph.D.)
Pathology—Cellular and Molecular Pathology (M.S., Ph.D.)
Psychiatry and Biobehavioral Sciences Clinical Psychology Internship (Certificate)

Students at the Geffen School of Medicine are exposed to the best of many worlds—strong research-oriented basic and clinical science departments, a hospital consistently ranked among the nation’s elite, and superb clinical facilities.
providing extensive clinical facilities, special population settings, and diverse practice modes. Information about these programs is available from the individual clinical departments of the Geffen School of Medicine or the affiliated hospitals.

SEMEI INSTITUTE FOR NEUROSCIENCE AND HUMAN BEHAVIOR

The Semel Institute is one of the world’s leading interdisciplinary research and education institutes devoted to the understanding of complex human behavior. Fourteen research centers, ranging from genetics to human culture, together with research initiatives distributed widely across the academic departments of the Geffen School of Medicine and the College of Letters and Science provide a comprehensive and outstanding research and training environment for the study of neuroscience and behavior.

The research portfolio of the 400 faculty members, graduate students, and fellows who work in the institute spans behavioral genetics, developmental neurobiology, cognitive neuroscience, neuropharmacology, brain imaging, clinical research, health policy, and sociocultural studies of human behavior and its disorders. For further information, see http://www.semel.ucla.edu.

GRADUATE SCHOOL OF EDUCATION AND INFORMATION STUDIES

Marcelo M. Suárez-Orozco, Dean

UCLA
1009 Moore Hall
Box 951521
Los Angeles, CA 90095-1521
(310) 825-8326
fax: (310) 794-4732
e-mail: info@gseis.ucla.edu
http://gseis.ucla.edu

The Graduate School of Education and Information Studies (GSE&IS) is dedicated to inquiry, the advancement of knowledge, the improvement of professional practice, and service to the education and information professions. GSE&IS develops future generations of scholars, teachers, information professionals, and institutional leaders. Its work is guided by the principles of individual responsibility and social justice, an ethic of caring, and commitment to the communities it serves.

Faculty members and students of GSE&IS combine a passion and skill for cutting-edge research with an appreciation for its application in the widely diverse cultures and communities in which it exists. These communities serve as fertile training ground for students in all programs, through internships, research projects, summer placements, and teaching opportunities.

GSE&IS is committed to the highest quality professional education and to the application of research and scholarship to the challenges facing a diverse and increasingly urbanized world.

DEPARTMENTS AND PROGRAMS

The school consists of two departments—the Department of Education and the Department of Information Studies. Both have a clear and strong commitment to the pursuit of excellence in their research-oriented and professional degree programs.

Research-oriented master’s and doctoral programs prepare top scholars in their respective fields, while future librarians, archivists, and information professionals, teachers, student affairs practitioners, school administrators, and superintendents are prepared in the various master’s and doctoral professional degree programs. Additionally, UCLA Lab School (Corinne A. Seeds campus) provides an innovative educational program for students 4 to 12 years old.

DEGREES

The school offers the following degrees, in addition to an undergraduate minor in Education Studies:

Education (M.A., M.Ed., Ed.D., Ph.D.)
Educational Administration (Joint Ed.D. with UC Irvine)
Information Studies (Ph.D.)
Library and Information Science (M.L.I.S., accredited by American Library Association)
Moving Image Archive Studies (M.A.)
Special Education (Joint Ph.D. with California State University, Los Angeles)

Credential Programs

The school offers two credential programs that are accredited by the California Commission on Teacher Credentialing:

Preliminary Administrative Services Credential
Teacher Credential

Articulated Degree Programs

The school offers two articulated degree programs:

Education M.Ed./Latin American Studies M.A.
Library and Information Science M.L.I.S./Latin American Studies M.A.

Concurrent Degree Programs

The school offers two concurrent degree programs:

Education M.Ed., M.A., Ed.D., or Ph.D./Law J.D.
Library and Information Science M.L.I.S./Management M.B.A.

ADMISSION

Admission criteria established by the UCLA Graduate Division require a bachelor’s degree from a regionally accredited institution comparable in standards and content to a bachelor’s degree from the University of California. A scholastic average of B (3.0 on a 4.0 scale) or better—or its equivalent if the letter grade system is not used—is required for the last 60 semester units or last 90 quarter units of under-graduate study and in any postbaccalaureate study. Further requirements for international students are explained in the Graduate Study section. See http://grad.ucla.edu/gasaa/admissions/admisinfo.html.

Departments and programs in the school set additional admission requirements. See http://gseis.ucla.edu.
DEGREE REQUIREMENTS

Specific degree requirements vary according to the department and program. Refer to Program Requirements for UCLA Graduate Degrees at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.

RESEARCH CENTERS AND INSTITUTES

The centers and institutes outlined below provide GSE&IS with valuable resources that support school programs and research. See http://gseis.ucla.edu/research-centers/.

BLACK MALE INSTITUTE

The Black Male Institute (BMI) is a cadre of scholars, practitioners, community members, and policymakers dedicated to improving the educational experiences and life chances of black males. Educational settings are considered to be critical spaces for developing informed action to address black male persistence in schooling, recognizing that the challenges that impact the academic success of black males are manifold, be they economic, social, legal, or health-related. See http://www.blackmaleinstitute.org.

CENTER FOR GLOBAL EDUCATION

The Center for Global Education promotes international education to foster cross-cultural awareness, cooperation, and understanding. The center collaborates with colleges, universities, and other organizations around the world to create new and enhance existing study abroad programs, integrate an international and intercultural perspective into the U.S. educational system, increase the ethnic diversity of participants in study abroad, and provide resources to support their participation. See http://globaled.us.

CENTER FOR IMPROVING CHILD CARE QUALITY

The Center for Improving Child Care Quality (CICCQ) conducts high-quality, policy-relevant research, with focus on improving the early care and education experiences of young children. Utilizing expertise in the areas of child development, professional development, child care quality, attachment, and observational and survey research methodology, CICCQ conducts basic, applied, and policy-driven research at the local, state, and national levels. CICCQ takes a collaborative approach to the evaluation process, building relationships with community partners to inform research, practice, and professional development. See http://ciccq.gseis.ucla.edu.

CENTER FOR INFORMATION AS EVIDENCE

The Center for Information as Evidence (CIE) serves as an interdisciplinary forum to address the ways in which information objects and systems are created, used, and preserved as legal, administrative, scientific, social, cultural, and historical evidence. CIE is committed to incorporating perspectives from ethnic communities around the world to sustain the diversity within indigenous cultural heritages and broaden methods of information analysis and conservation. See http://legacy.gseis.ucla.edu/cie/.

CENTER FOR INTERNATIONAL AND DEVELOPMENT EDUCATION

The Center for International and Development Education (CIDE) is a research and action center whose mission is to enhance educational capacity, facilitate human and economic development, and promote cross-cultural exchanges related to international and development education. This is accomplished through a series of publications, research programs, practical initiatives, and networks with existing development and academic institutions. See http://www.cideucla.org.

CENTER FOR RESEARCH AND INNOVATION IN ELEMENTARY EDUCATION

The Center for Research and Innovation in Elementary Education (CONNECT) links nationally recognized researchers with teachers and administrators at UCLA Lab School and public schools in Southern California to investigate central issues in education. Programs examine children’s learning and development from preschool to sixth grade; investigate teaching diverse student populations; encourage exchange of ideas among scholars, practitioners, and policymakers concerned with child development and school reform; and disseminate effective educational approaches and research. See http://www.connect.gseis.ucla.edu.

CENTER FOR STUDY OF EVALUATION/NATIONAL CENTER FOR RESEARCH ON EVALUATION, STANDARDS, AND STUDENT TESTING

The Center for Study of Evaluation (CSE)/National Center for Research on Evaluation, Standards, and Student Testing (CRESST) is devoted to educational research, development, training, and dissemination. CSE/CRESST provides leadership to the field in these areas by creating new methodologies for evaluating educational quality, creating new designs for assessing student learning, promoting the sound use of assessment data, setting the national research agenda, and influencing practice. See http://www.cse.ucla.edu.

CENTER X

Center X provides a unique setting where researchers and practitioners collaborate to design and conduct programs that prepare and support K-12 education professionals committed to social justice, instructional excellence, the integration of research and practice, and caring in low-income urban schools. See http://centerx.gseis.ucla.edu.

CIVIL RIGHTS PROJECT/PROYECTO DERECHOS CIVILES

The Civil Rights Project/Proyecto Derechos Civiles (CRP) is a research center dedicated to creating a new generation of research in social sciences and law on the critical issues of civil rights and equal opportunity for racial and ethnic groups in the U.S. It has commissioned more than 400 studies, published 13 books, been cited in major Supreme Court decisions on affir-
mative action, and issued numerous reports from authors at universities and research centers across the country. See http://civilrightsproject.ucla.edu.

**HIGHER EDUCATION RESEARCH INSTITUTE**

The Higher Education Research Institute (HERI) conducts research, evaluation, information, policy studies, and research training in postsecondary education. HERI’s research program includes the outcomes of postsecondary education, leadership development, institutional transformation, faculty performance, federal and state policy, and educational equity, and houses the Cooperative Institutional Research Program (CIRP), the largest ongoing national study of college students in the U.S. See http://heri.ucla.edu/index.php.

**INSTITUTE FOR DEMOCRACY, EDUCATION, AND ACCESS**

The Institute for Democracy, Education, and Access (IDEA) seeks to understand and challenge pervasive racial and social class inequalities in education. In addition to conducting research and policy analysis, IDEA supports educators, public officials, advocates, community activists, and young people as they design, conduct, and use research to make high-quality public schools and successful college participation routine occurrences in all communities. IDEA also studies how research combines with strategic communications and public engagement to promote widespread participation in civic life. See http://www.idea.gseis.ucla.edu.

**INSTITUTE FOR IMMIGRATION, GLOBALIZATION, AND EDUCATION**

The Institute for Immigration, Globalization, and Education (IGE) conducts multidisciplinary and comparative research engaging policymakers, practitioners, and institutional leaders. The research serves to inform efforts to expand opportunities, reduce barriers, and improve the wellbeing of diverse, vulnerable, and marginalized students. The work is timely in the context of globalization, which is profoundly changing the developmental contexts, educational trajectories, and life courses of children, adolescents, and young adults. See http://ige.gseis.ucla.edu.

**PAULO FREIRE INSTITUTE**

The Paulo Freire Institute (PFI) seeks to gather scholars and critics of Freire’s pedagogy in permanent dialog to foster the advancement of new pedagogical theories and concrete interventions in the real world. PFI brings together research, teaching, and technology while concentrating on five major areas: studies of globalization and education, teacher education, a comparative perspective on Latin American education, the politics of education, and Paulo Freire’s political philosophy and critical pedagogy. See http://www.paulofreireinstitute.org.

**SUDIKOFF FAMILY INSTITUTE FOR EDUCATION AND NEW MEDIA**

The Sudikoff Family Institute for Education and New Media utilizes the popular press and other media to disseminate the work of GSE&IS scholars to policymakers, educators, and the general public. Sudikoff Fellows are selected each year from GSE&IS faculty members to enhance awareness of critical issues related to education and information studies by contributing to a variety of media that reach a lay audience, or serve the public interest in some manner. See http://sudikoff.gseis.ucla.edu.

**UC ALL-CAMPUS CONSORTIUM ON RESEARCH FOR DIVERSITY**

The UC All-Campus Consortium on Research for Diversity (UC ACCORD) is an interdisciplinary, multicampus research center devoted to a more equitable distribution of educational resources and opportunities in California’s diverse public schools and universities. UC ACCORD leverages the research capacity of the UC system to influence policy and practice to produce more positive educational outcomes for low-income and underrepresented students. See http://ucaccord.gseis.ucla.edu.

**UC EDUCATIONAL EVALUATION CENTER**

The UC Educational Evaluation Center (UCEC) utilizes the systemwide expertise of nationally recognized scholars to address educational problems through the rigorous evaluation of potential educational solutions. Through these evaluations, the UCEC contributes to the knowledge base of effective policies and practices (PK–20 and beyond) with the goal of improving data use and decision making. See http://uccic.gseis.ucla.edu.

**HENRY SAMUELI SCHOOL OF ENGINEERING AND APPLIED SCIENCE**

Vijay K. Dhir, Dean

UCLA
6426 Boelter Hall
Box 951601
Los Angeles, CA 90095-1601
(310) 825-2826
http://www.engineer.ucla.edu

The UCLA Henry Samueli School of Engineering and Applied Science (HSSEAS), founded in 1945, is committed to creating a better future for Los Angeles, California, the nation, and the world. Over the years, UCLA Engineering has grown into one of the top engineering programs in the country. Though the school has changed in many ways, it has not wavered from its early vision of developing an engineering program with imagination and integrity. As part of a great public University, the school is committed to a core mission of teaching, research, and service.

UCLA Engineering supports dynamic programs in traditional and new areas of study and research, including bioengineering and biotechnology, embedded networked sensing systems, information technology including wireless communications and computing, signal processing, sensor technologies, flight and autonomous systems, alternative energy systems, smart structures and materials, and protection of the environment. Partnerships across campus reflect the school’s commitment to a wide range of interdisciplinary activities.

Students receive their education through lectures and gain hands-on experience through laboratories and
The school offers the following degrees, in addition to undergraduate minors in Bioinformatics and in Environmental Engineering:

- Aerospace Engineering (B.S., M.S., Ph.D.)
- Bioengineering (B.S., M.S., Ph.D.)
- Chemical Engineering (B.S., M.S., Ph.D.)
- Civil Engineering (B.S., M.S., Ph.D.)
- Computer Science (B.S., M.S., Ph.D.)
- Computer Science and Engineering (B.S.)
- Electrical Engineering (B.S., M.S., Ph.D.)
- Engineering (M.Eng., online M.S., Engr.)
- Engineering and Applied Science (Graduate Certificate of Specialization)
- Manufacturing Engineering (M.S.)
- Materials Engineering (B.S.)
- Materials Science and Engineering (M.S., Ph.D.)
- Mechanical Engineering (B.S., M.S., Ph.D.)

**Concurrent Degree Program**

The school offers one concurrent degree program:

Computer Science M.S./Management M.B.A.

**Undergraduate Admission**

Applicants for admission to the school must satisfy the University admission requirements as outlined in the Undergraduate Study section. Students must apply directly to HSSEAS by selecting one of the majors within the school or the undeclared engineering option. In the selection process many elements are considered, including grades, test scores, and academic preparation.

Applicants are accepted at either the freshman or junior level.

**Admission as a Freshman**

Freshman applicants must satisfy the examination requirement described in the Undergraduate Study section and should take required tests by the December test date, since scores are part of the review process. Instruct the testing agencies to send results directly to Undergraduate Admission.

Applicants must submit scores from an approved core test of mathematics, language arts, and writing. This requirement may be satisfied by taking either (1) the ACT Assessment plus Writing Tests or (2) the SAT Reasoning Test. Applicants to the school are strongly encouraged to also take the following SAT Subject Tests: Mathematics Level 2 and a laboratory science test (Biology E/M, Chemistry, or Physics) that is closely related to the intended major.

Freshman applicants must meet the University subject, scholarship, and examination requirements described at http://www.admission.ucla.edu.

**Credit for Advanced Placement Examinations.** Students may fulfill part of the school requirements with credit allowed at the time of admission for College Board Advanced Placement (AP) Examinations with scores of 3, 4, or 5. Students with AP Examination credit may exceed the 213-unit maximum by the amount of this credit. AP Examination credit for freshmen entering in Fall Quarter 2014 fulfills HSSEAS requirements as indicated on the school AP Chart at http://www.admission.ucla.edu/prospect/APCreditEN.htm.

Students who have completed 36 quarter units after high school graduation at the time of the examination receive no AP Examination credit.

**Admission as a Junior**

Students who begin their college work at a California community college are expected to remain at the community college to complete the lower division requirements in chemistry, computer programming, English composition, mathematics, physics, and the recommended engineering courses before transferring to UCLA. Transfer students who have completed the recommended lower division program in engineering at California community colleges normally can complete the remaining requirements for one of the B.S. degrees in two to three academic years of full-time study. Students who select certain majors, such as Computer Science and Engineering or Chemical Engineering, may be required to complete additional lower division courses for the major sequence.

**Lower Division Requirements**

Applicants to the school in junior standing should have completed 90 quarter units (60 semester units) in good standing, including the following lower division minimum subject requirements:

1. Chemistry courses equivalent to UCLA's Chemistry and Biochemistry 20A, 20B, 20L (only Chemistry and Biochemistry 20A is required for the Computer Science, Computer Science and Engi-
neering, and Electrical Engineering majors; the Bioengineering and Chemical Engineering curricula also require Chemistry and Biochemistry 30A, 30AL, 30B, 30BL, which do not need to be taken prior to admission to UCLA.

3. Physics courses equivalent to UCLA’s Physics 1A, 1B, 1C, 4AL, 4BL, depending on curriculum selected

4. Computer programming courses in C++, C, or Java (C++ is strongly recommended); applicants to majors in Computer Science, Computer Science and Engineering, and Electrical Engineering must take a programming course in C++, preferably one equivalent to UCLA’s Computer Science 31

5. Additional life sciences (4 units), English composition (5 units), and humanities/social sciences courses (total of 16 quarter units minimum) equivalent to HSSEAS general education (GE) courses

Transfer students must also complete a course equivalent to UCLA’s English Composition 3 and a second UC-transferable English composition course.

All lower division requirements should be completed by the end of the spring term prior to anticipated enrollment at UCLA.

Transfer Credit

Students transferring to the school from institutions that offer instruction in engineering subjects in the first two years, particularly California community colleges, are given credit for certain engineering core requirements.

Many sophomore courses in circuit analysis, strength of materials, and properties of materials may satisfy Electrical Engineering 100, Civil and Environmental Engineering 108, and Materials Science and Engineering 104 requirements respectively. Check with the Office of Academic and Student Affairs.

UNDERGRADUATE DEGREE REQUIREMENTS

Henry Samueli School of Engineering and Applied Science students must meet three types of requirements for the Bachelor of Science degree:

1. University requirements
2. School requirements
3. Department requirements

UNIVERSITY REQUIREMENTS

The University of California has two requirements that undergraduate students must satisfy in order to graduate: (1) Entry-Level Writing or English as a Second Language and (2) American History and Institutions. See Degree Requirements in the Undergraduate Study section for details.

SCHOOL REQUIREMENTS

The Henry Samueli School of Engineering and Applied Science has seven requirements that must be satisfied for the award of the degree: unit, scholarship, academic residence, writing, technical breadth, ethics, and general education.

UNIT REQUIREMENT

The minimum units allowed for HSSEAS students is between 183 and 190, depending on the program. The maximum allowed is 213 units.

After 213 quarter units, enrollment may not normally be continued in the school without special permission from the associate dean. This regulation does not apply to Departmental Scholars.

SCHOLARSHIP REQUIREMENT

Students must earn at least a C (2.0) grade-point average in all courses taken at any UC campus. In addition, at least a 2.0 grade-point average must be achieved in total upper division required courses and total upper division engineering courses. See a counselor in 6426 Boelter Hall for details.

ACADEMIC RESIDENCE REQUIREMENT

Of the last 48 units completed for the B.S. degree, 36 must be earned in residence in HSSEAS on this campus. No more than 16 of the 36 units may be completed in Summer Sessions at UCLA.

WRITING REQUIREMENT

Students must complete the University’s Entry-Level Writing or English as a Second Language (ESL) requirement prior to completing the school writing requirement.

Students admitted to the school are required to complete a two-term writing requirement—Writing I and engineering writing. Both courses must be taken for letter grades, and students must receive grades of C or better (C– grades are not acceptable).

Writing I. The Writing I requirement must be satisfied by completing English Composition 3 with a grade of C or better (C– or a Passed grade is not acceptable) by the end of the second year of enrollment.

The Writing I requirement may also be satisfied by scoring 4 or 5 on one of the College Board Advanced Placement Examinations in English or a combination of a score of 720 or higher on the SAT Reasoning Test Writing Section and superior performance on the English Composition 3 Proficiency Examination.

Students whose native language is not English may satisfy the Writing I requirement by completing English as a Second Language 36 with a grade of C or better (C– or a Passed grade is not acceptable). Admission into the course is determined by completion of English as a Second Language 35 with a grade of C or better demonstrated on the English as a Second Language Placement Examination (ESLPE).

Engineering Writing. The engineering writing requirement is satisfied by selecting one approved engineering writing (EW) course from the HSSEAS writing course list or by selecting one approved Writing II (W) course.
The course must be completed with a grade of C or better (C– or a Passed grade is not acceptable). Writing courses are listed in the Schedule of Classes at http://www.registrar.ucla.edu/soc/writing.htm.

Writing courses also approved for general education credit may be applied toward the relevant general education foundational area.

**TECHNICAL BREADTH REQUIREMENT**

The technical breadth requirement consists of a set of three courses providing sufficient breadth outside the student’s core program. A list of HSSEAS Faculty Executive Committee-approved technical breadth requirement courses is available in the Office of Academic and Student Affairs, and deviations from that list are subject to approval by the associate dean for Academic and Student Affairs. None of the technical breadth requirement courses selected by students can be used to satisfy other major course requirements.

**ETHICS REQUIREMENT**

The ethics and professionalism requirement is satisfied by completing one course from Engineering 183EW or 185EW with a grade of C or better (C– or a Passed grade is not acceptable). The course may be applied toward the engineering writing requirement.

**GENERAL EDUCATION REQUIREMENTS**

General education (GE) is more than a checklist of required courses. It is a program of study that (1) reveals to students the ways that research scholars in the arts, humanities, social sciences, and natural sciences create and evaluate new knowledge, (2) introduces students to the important ideas and themes of human cultures, (3) fosters appreciation for the many perspectives and the diverse voices that may be heard in a democratic society, and (4) develops the intellectual skills that give students the dexterity they need to function in a rapidly changing world.

This entails the ability to make critical and logical assessments of information, both traditional and digital; deliver reasoned and persuasive arguments; and identify, acquire, and use the knowledge necessary to solve problems.

Students may take one GE course per term on a Passed/Not Passed basis if they are in good academic standing and are enrolled in at least three and one-half courses (14 units) for the term. For details on P/NP grading, see Grading in the Academic Policies section or consult the Office of Academic and Student Affairs.

GE courses used to satisfy the engineering writing and/ or ethics requirements must be taken for a letter grade.

**FOUNDATIONS OF KNOWLEDGE**

General education courses are grouped into three foundational areas: Foundations of the Arts and Humanities, Foundations of Society and Culture, and Foundations of Scientific Inquiry.

Five courses (24 units minimum) are required. Engineering writing requirement courses also approved for GE credit may be applied toward the relevant GE foundational areas.

Students must meet with a counselor in the Office of Academic and Student Affairs to determine the applicability of GE Cluster courses toward the engineering writing or GE requirements.

Courses listed in more than one category can fulfill GE requirements in only one of the cross-listed categories.

**Foundations of the Arts and Humanities.** Two 5-unit courses selected from two different subgroups:

- Literary and Cultural Analysis
- Philosophical and Linguistic Analysis
- Visual and Performance Arts Analysis and Practice

The aim of courses in this area is to provide perspectives and intellectual skills necessary to comprehend and think critically about our situation in the world as human beings. In particular, the courses provide the basic means to appreciate and evaluate the ongoing efforts of humans to explain, translate, and transform their diverse experiences of the world through such media as language, literature, philosophical systems, images, sounds, and performances. The courses introduce students to the historical development and fundamental intellectual and ethical issues associated with the arts and humanities and may also investigate the complex relations between artistic and humanistic expression and other facets of society and culture.

**Foundations of Society and Culture.** Two 5-unit courses, one from each subgroup:

- Historical Analysis
- Social Analysis

The aim of courses in this area is to introduce students to the ways in which humans organize, structure, rationalize, and govern their diverse societies and cultures over time. The courses focus on a particular historical question, societal problem, or topic of political and economic concern in an effort to demonstrate how issues are objectified for study, how data is collected and analyzed, and how new understandings of social phenomena are achieved and evaluated.

**Foundations of Scientific Inquiry.** One course (4 units minimum) from the Life Sciences subgroup or one course from Bioengineering CM145/Chemical
Engineering CM145, Chemistry and Biochemistry M166/Environmental Health Sciences M166: Life Sciences

This requirement is automatically satisfied for Bioengineering and Chemical Engineering majors. The requirement may be satisfied for Civil Engineering majors if students select an approved major field elective that is also a course approved under Foundations of Scientific Inquiry.

The aim of courses in this area is to ensure that students gain a fundamental understanding of how scientists formulate and answer questions about the operation of both the physical and biological world. The courses also deal with some of the most important issues, developments, and methodologies in contemporary science, addressing such topics as the origin of the universe, environmental degradation, and the decoding of the human genome. Through lectures, laboratory experiences, writing, and intensive discussions, students consider the important roles played by the laws of physics and chemistry in society, biology, Earth and environmental sciences, and astrophysics and cosmology.

Foundations Course Lists. Creating and maintaining a general education curriculum is a dynamic process; consequently, courses are frequently added to the list. For the most current list of approved courses that satisfy the Foundations of Knowledge GE plan, consult an academic counselor or see http://www.registrar.ucla.edu/ge/.

Intersegmental General Education Transfer Curriculum

Transfer students from California community colleges have the option to fulfill UCLA lower division GE requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. Although GE or transfer core courses are degree requirements rather than admission requirements, students are advised to fulfill them prior to transfer. The IGETC significantly eases the transfer process, as all UCLA GE requirements are fulfilled when students complete the IGETC courses. Students who select the IGETC must complete it entirely before enrolling at UCLA. Otherwise, they must fulfill the Henry Samueli School of Engineering and Applied Science GE requirements. The school does not accept partial IGETC.

DEPARTMENT REQUIREMENTS

Henry Samueli School of Engineering and Applied Science departments generally set two types of requirements that must be satisfied for the award of the degree: (1) Preparation for the Major (lower division courses) and (2) the Major (upper division courses). Preparation for the Major courses should be completed before beginning upper division work.

PREPARATION FOR THE MAJOR

A major requires completion of a set of courses known as Preparation for the Major. Each department sets its own Preparation for the Major requirements; see the Curricula and Courses section of this catalog.

THE MAJOR

Students must complete their major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major. Each course in the major department must be taken for a letter grade. See the Curricula and Courses section of this catalog for details on each major.

POLICIES AND REGULATIONS

Degree requirements are subject to policies and regulations, including the following:

STUDENT RESPONSIBILITY

Students should take advantage of academic support resources, but they are ultimately responsible for keeping informed of and complying with the rules, regulations, and policies affecting their academic standing.

STUDY LIST

The Study List is a record of classes that a student is taking for a particular term. It is the student’s responsibility to present a Study List that reflects satisfactory progress toward the degree. Study Lists or programs of study that do not comply with the standards set by the faculty may result in enforced withdrawal from the University or other academic action. Study Lists require approval of the dean of the school or a designated representative.

Undergraduate students in the school are expected to enroll in at least 12 units each term. Students enrolling in less than 12 units must obtain approval by petition to the dean prior to enrollment in courses. The normal program is 16 units per term. Students may not enroll in more than 21 units per term unless an Excess Unit Petition is approved in advance by the dean.

MINIMUM PROGRESS

Full-time HSSEAS undergraduate students must complete a minimum of 36 units in three consecutive terms in which they are registered.
CREDIT LIMITATIONS

The following credit limitations apply to all undergraduate students enrolled in the school:

Advanced Placement Examinations. Some portions of Advanced Placement (AP) Examination credit are evaluated by corresponding UCLA course number. If students take the equivalent UCLA course, a deduction of UCLA unit credit is made prior to graduation. See the HSSEAS AP Chart at http://www.admission.ucla.edu/prospect/APCreditEN.htm.

College Level Examination Program. Credit earned through the College Level Examination Program (CLEP) may not be applied toward the bachelor’s degree.

Community College Unit Limit. After students have completed 105 quarter units (regardless of where the units are completed), they do not receive unit credit or subject credit for courses completed at a community college.

Foreign Language. No credit is granted toward the bachelor’s degree for college foreign language courses equivalent to quarter levels one and two if the equivalent of level two of the same language was completed with satisfactory grades in high school.

REPETITION OF COURSES

For undergraduate students who repeat a total of 16 units or less, only the most recently earned letter grades and grade points are computed in the grade-point average (GPA). After repeating 16 units, the GPA is based on all letter grades assigned and total units attempted. The grade assigned each time a course is repeated on the same basis or for a letter grade.

1. To improve the grade-point average (GPA), students may repeat only those courses in which they receive a grade of C– or lower; NP or U grades may be repeated to gain unit credit. Courses in which a letter grade is received may not be repeated on a P/NP or S/U basis. Courses originally taken on a P/NP or S/U basis may be repeated on the same basis or for a letter grade.

2. Repetition of a course more than once requires the approval of the College or school or the dean of the Graduate Division and is granted only under extraordinary circumstances.

3. Degree credit for a course is given only once, but the grade assigned each time the course is taken is permanently recorded on the transcript.

4. There is no guarantee that in a later term a course can be repeated (such as in cases when a course is deleted or no longer offered). In these cases students should consult with their academic counselor to determine if there is an alternate course that can be taken to satisfy a requirement. The alternate course would NOT count as a repeat of the original course.

MINORS AND DOUBLE MAJORS

HSSEAS students in good academic standing may be permitted a minor or double major. The minor or second major must be outside the school (e.g., Electrical Engineering major and Economics major). HSSEAS students are not permitted to double major with two school majors (e.g., Chemical Engineering and Civil Engineering). Students may file an Undergraduate Request to Double Major or Add Minor form at the Office of Academic and Student Affairs. The school determines final approval of a minor or double major request; review is done on a case by case basis, and filing the request does NOT guarantee approval.

While HSSEAS considers minor or double major requests, specializations are not considered at this time. Students interested in a minor or double major should meet with their counselor in 6426 Boelter Hall.

COUNSELING SERVICES

New undergraduate students must have their course of study approved by an academic counselor. After the first term, curricular and career advising is accomplished on a formal basis. Students are assigned a faculty adviser in their particular specialization in their freshman year.

In addition, undergraduate students are assigned, by major, to an academic counselor in the Office of Academic and Student Affairs who provides them with advice regarding general requirements for the degrees and University and school regulations and procedures. It is the students’ responsibility to periodically meet with their academic counselor in the Office of Academic and Student Affairs, as well as with their faculty adviser, to discuss curriculum requirements, programs of study, and any other academic matters of concern.

Students normally follow the curriculum in effect when they enter the school. California community college transfer students may also select the curriculum in the catalog in effect at the time they began their community college work in an engineering program, providing attendance has been continuous since that time.

Students admitted to UCLA in Fall Quarter 2012 and thereafter use the Degree Audit system, which can be accessed through MyUCLA at https://my.ucla.edu. Students should contact their academic counselor in 6426 Boelter Hall with any questions.

Students following the 2005-06 through 2011-12 catalog years use the program called Degree Audit Reporting System (DARS) and should contact their academic counselor in 6426 Boelter Hall with any questions. See http://www.seasoasa.ucla.edu/undergraduates/DARS.

Undergraduate students following a catalog year prior to 2005-06 and beginning their upper division major field coursework are advised to meet with their academic counselor in 6426 Boelter Hall to review their degree requirements.

Academic counselors in the Office of Academic and Student Affairs assist students with University procedures and answer questions related to general requirements.

HONORS

HSSEAS undergraduate students who achieve scholastic distinction may qualify for the following honors and programs:

DEAN’S HONORS LIST

Students following the engineering curricula are eligible to be named to the Dean's Honors List each term. Minimum requirements are a course load of at least 15 units (12 units of letter grade) with a grade-point average equal to or greater than 3.7. Students are not eligible for the Dean's Honors List if they receive an Incom-
The student body takes an active part in shaping policies on the school's Faculty Executive Committee. The UCLA chapter of Tau Beta Pi, the national engineering honor society, encourages high scholarship, provides volunteer tutors, and offers many services and programs to foster a spirit of liberal culture in engineering colleges. See http://tbp.seas.ucla.edu.

**Latin Honors**

Students who have achieved scholastic distinction may be awarded the bachelor's degree with honors. To be eligible, students must have completed 90 or more units for a letter grade at the University of California and must have attained a cumulative grade-point average at graduation which places them in the top five percent of the school (GPA of 3.872 or better) for summa cum laude, next five percent (GPA of 3.775 or better) for magna cum laude, and the next 10 percent (GPA of 3.631 or better) for cum laude. The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in the graduating year determine student eligibility.

Based on grades achieved in upper division courses, engineering students must have a 3.872 grade-point average for summa cum laude, a 3.775 for magna cum laude, and a 3.631 for cum laude. For all designations of honors, students must have a minimum 3.25 GPA in their major field courses. To be eligible for an award, students should have completed at least 80 upper division units at the University of California.

**Tau Beta Pi**

The UCLA chapter of Tau Beta Pi, the national engineering honor society, encourages high scholarship, provides volunteer tutors, and offers many services and programs to foster a spirit of liberal culture in engineering colleges. See http://tbp.seas.ucla.edu.

**Departmental Scholar Program**

Exceptionally promising juniors or seniors may be nominated as Departmental Scholars to pursue bachelor's and master's degree programs simultaneously. Minimum qualifications include the completion of 24 courses (96 quarter units) at UCLA, or the equivalent at a similar institution, the current minimum grade-point average required for honors at graduation, and the requirements in preparation for the major. To obtain both the bachelor's and master's degrees, Departmental Scholars fulfill the requirements for each program. Students may not use any one course to fulfill requirements for both degrees.

For details, consult the Office of Academic and Student Affairs in 6426 Boelter Hall well in advance of application dates for admission to graduate standing.

**Special Programs**

**Extracurricular Activities**

Students are encouraged to participate in UCLA extracurricular activities, especially those relevant to engineering, such as the student engineering society (the Engineering Society, University of California), student publications, and programs of the technical and professional engineering societies in the Los Angeles area.

The student body takes an active part in shaping policies of the school through elected student representatives on the school's Faculty Executive Committee.

**Women in Engineering**

Among HSSEAS students, women make up approximately 22 percent of the undergraduate and 20 percent of the graduate enrollment. Today's opportunities for women in engineering are excellent, as both employers and educators try to change the image of engineering as a males-only field. Women engineers are in great demand in all fields of engineering.

The Society of Women Engineers (SWE), recognizing that women in engineering are still a minority, has established a UCLA student chapter that sponsors field trips and engineering-related speakers (often professional women) to introduce the various options available to women engineers. The UCLA chapter of SWE, in conjunction with other Los Angeles schools, also publishes an annual resume book to aid women students in finding jobs and presents a career day for women high school students. See http://www.seas.ucla.edu/swe/.

**Continuing Education**

Continuing education in engineering is developed and administered by the UCLA Extension (UNEX) Department of Engineering and Technology in close cooperation with HSSEAS. The department offers evening classes, short courses, certificate programs, special events, and education and training at the workplace. The office (540 UNEX, 10995 Le Conte Avenue) is open Monday through Friday. Call (310) 825-4100 for information systems and engineering programs, (310) 825-3344 for short course programs, (310) 206-1548 for technical management classes, and (310) 825-3858 for the Technical Management Program. See https://www.uclaextension.edu/eistm/Pages/default.aspx.

**Graduate Admission**

In addition to meeting the requirements of the Graduate Division, applicants to the HSSEAS graduate programs are required to take the General Test of the Graduate Record Examination (GRE). Specific information about the GRE may be obtained from the department of interest.

Students entering the Engineer/Ph.D. program normally are expected to have completed the requirements for the master's degree with at least a 3.25 grade-point average and to have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having an M.S. degree.

For information on the proficiency in English requirements for international graduate students, see Graduate Admission in the Graduate Study section of this catalog.

To submit a graduate application, see http://www.seas.oasa.ucla.edu/admissions/graduate-admissions. From there connect to the site of the preferred department or program and go to the online graduate application.
**GRADUATE DEGREE REQUIREMENTS**

Graduate degree information is updated annually in *Program Requirements for UCLA Graduate Degrees* at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.

**MASTER OF SCIENCE DEGREES**

No lower division courses may be applied toward graduate degrees. In addition, the various departments generally do not allow, for graduate degree credit, courses required of their undergraduate students. Consult the departmental graduate affairs office for more information.

Individual departments within the school may impose certain restrictions on the applicability of other undergraduate courses toward graduate degrees. Consult with the graduate adviser on departmental requirements and restrictions.

**Major Fields or Subdisciplines**

The M.S. program focuses on one major field. The major fields and subdisciplines offered at the M.S. level in most cases parallel those listed below for the Ph.D. program. There are some differences (for example, manufacturing engineering in the Department of Mechanical and Aerospace Engineering is offered only at the M.S. level). Contact the department concerned regarding possible differences between the M.S. and Ph.D. fields and subdisciplines. Students are free to propose to the school any other field of study, with the support of their adviser.

**Course Requirements**

A total of nine courses is required for the M.S. degrees, including a minimum of five graduate courses. (Some fields require more than five; obtain specific information from the department of interest.) A majority of the total formal course requirement and of the graduate course requirement must consist of courses in HSSEAS. In the thesis plan, seven of the nine courses must be formal courses, including at least four from the 200 series. The remaining two courses may be 598 courses involving work on the thesis. In the comprehensive examination plan, at least five of the nine courses must be in the 200 series; the remaining four courses may be either 200-series graduate or upper division undergraduate courses. No 500-series courses may be applied toward the comprehensive examination plan requirements.

**Thesis Plan**

The thesis must either describe some original piece of research that students have done, usually but not necessarily under the supervision of the thesis committee, or else provide a critical exposition of some topic in their major field of study. Students would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

**Comprehensive Examination Plan**

For information on the comprehensive examination plan for each department, see *Program Requirements for UCLA Graduate Degrees* at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.

**CONCURRENT DEGREE PROGRAM**

A concurrent degree program between HSSEAS and the Anderson Graduate School of Management allows students to earn two master’s degrees simultaneously: the M.B.A. and the M.S. in Computer Science. Contact the Office of Academic and Student Affairs for details.

**MASTER OF SCIENCE IN ENGINEERING ONLINE DEGREE**

The primary purpose of the Master of Science in Engineering online self-supporting degree program is to enable employed engineers and computer scientists to augment their technical education beyond the Bachelor of Science degree and to enhance their value to the technical organizations in which they are employed. For further information, see http://msol.seas.ucla.edu.

**MASTER OF ENGINEERING DEGREE**

The Master of Engineering (M.Engr.) degree is granted to graduates of the Engineering Executive Program, a two-year work-study program consisting of graduate-level professional courses in the management of technological enterprises. For details, write to the HSSEAS Office of Academic and Student Affairs, 6426 Boelter Hall, UCLA, Box 951601, Los Angeles, CA 90095-1601, (310) 825-2514.

**ENGINEER DEGREE**

HSSEAS offers an Engineer (Engr.) degree at a level equivalent to completion of preliminaries in the Ph.D. program. The Engineer degree represents considerable advanced training and competence in the engineering field but does not require the research effort involved in a Ph.D. dissertation.

Requirements for the Engineer degree are identical to those of the Ph.D. degree up to and including the oral preliminary examination, except that the Engineer degree is based on coursework. The minimum requirement is 15 (at least nine graduate) courses beyond the bachelor’s degree, with at least six courses in the major field (minimum of four graduate courses) and at least three in each minor field (minimum of two graduate courses in each).

The Ph.D. and Engineer degree programs are administered interchangeably, so that a student in the Ph.D. program may exit with an Engineer degree or pick up the Engineer degree en route to the Ph.D. degree; similarly, a student in the Engineer degree program may continue to the Ph.D. after receiving the Engineer degree. The time spent in either of the two programs may also be applied toward the minimum residence requirement and time limitation for the other program.

**PH.D. DEGREES**

The Ph.D. programs prepare students for advanced study and research in the major areas of engineering and computer science. All candidates must fulfill the minimum requirements of the Graduate Division. Major and minor fields may have additional course and examination requirements. For further information, contact the individual departments.
Fields of Study
Established fields of study for the Ph.D. are listed below. With the support of an adviser, students may propose any other field of study to their department. Instructions on the definition of acceptable ad hoc fields and procedures for their approval are available in each department office.

Bioengineering Department. Biomedical instrumentation; biomedical signal and image processing; biosystems science and engineering; medical imaging informatics; molecular cellular tissue therapeutics; neuroengineering

Chemical and Biomolecular Engineering Department. Chemical engineering

Civil and Environmental Engineering Department. Civil engineering materials, environmental engineering, geotechnical engineering, hydrology and water resources engineering, structures (structural mechanics and earthquake engineering)

Computer Science Department. Artificial intelligence, computational systems biology, computer network systems, computer science theory, computer system architecture, graphics and vision, information and data management, software systems

Electrical Engineering Department. Circuits and embedded systems, physical and wave electronics, signals and systems

Materials Science and Engineering Department. Ceramics and ceramic processing, electronic and optical materials, structural materials

Mechanical and Aerospace Engineering Department. Applied mathematics (established minor field only), applied plasma physics (minor field only), dynamics, fluid mechanics, heat and mass transfer, manufacturing and design, nanoelectromechanical/microelectromechanical systems (NEMS/MEMS), structural and solid mechanics, systems and control

Graduate Certificate of Specialization
A Certificate of Specialization is available in all areas, except computer science, offered by HSSEAS. Requirements for admission are the same as for the M.S. degree.

Each graduate certificate program consists of five 100- or 200-series courses, at least two of which must be at the graduate level. No work completed for any previously awarded degree or credential may be applied toward the certificate. Successful completion of a certificate program requires an overall minimum B average in all courses applicable to the certificate. In addition, graduate certificate candidates are required to maintain a minimum B average in 200-series courses used in the certificate program. A minimum of three terms of academic residence is required. The time limitation for completing the requirements of a certificate program is two calendar years. Details regarding the certificate programs may be obtained from each department office.

Courses completed in HSSEAS for a Certificate of Specialization may subsequently be applied toward master's and/or doctoral degrees.

John E. Anderson Graduate School of Management
Judy D. Olian, Dean
UCLA

Box 951481
Los Angeles, CA 90095-1481
(310) 825-7982
fax: (310) 206-2073
http://www.anderson.ucla.edu

In today’s rapidly changing global marketplace, it is essential that professional managers be conversant with the latest concepts and principles of management. At the UCLA John E. Anderson Graduate School of Management, which is consistently ranked among the best such schools in the nation, students prepare to become first-rate managers with both specialized skills and a broad understanding of the general economic, business, and managerial environment. This background enables them to become effective and efficient directors of organizations and people whether they are in the private, public, or not-for-profit sector.

Specifically, the Anderson Graduate School of Management offers the business community a wide range of higher education programs that provide state-of-the-art information in a variety of fields. Through its faculty, the school advances the art and science of management by engaging in fundamental and cutting-edge research in all fields of management and by educating scholars who can continue to create this new knowledge.

Students come from diverse professional and educational backgrounds and seek equally diverse personal and professional goals. Whether they pursue the professional M.B.A. or a Ph.D. in Management, they graduate with a broad understanding of people and organizations and with a sound technical background in the economic and mathematical concepts of management planning and decision making.

The school offers a variety of programs leading to graduate degrees at the master’s and doctoral levels. These include a professional (M.B.A.) master’s and a Master of Financial Engineering (M.F.E.), as well as an Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management and a three-year Fully Employed M.B.A. Program for emerging managers. The school also offers dual Global Executive M.B.A. degrees with the National University of Singapore (NUS) Business School and with the Universidad Adolfo Ibáñez (UAI).
in Santiago, Chile, that prepare participants for top positions in organizations around the world. A Ph.D. in Management is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.

The school also offers an undergraduate minor in Accounting and several undergraduate courses in management. Enrollment in these courses, although open to all University students who have completed the prerequisites, is limited.

DEGREES AND PROGRAMS

The school offers the following degrees, in addition to an undergraduate minor in Accounting:

- Master of Business Administration (M.B.A.)
- Executive Master of Business Administration (EMBA)
- Fully Employed Master of Business Administration (FEMBA)
- Global Executive M.B.A. for the Americas (GEMBA—dual degree program with Universidad Adolfo Ibáñez in Chile)
- Global Executive M.B.A. for Asia Pacific (GEMBA—dual degree program with National University of Singapore)
- Master of Financial Engineering (M.F.E.)
- Master of Science (M.S.)
- Candidate in Philosophy (C.Phil.)
- Doctor of Philosophy (Ph.D.)

Concurrent Degree Programs

The school offers 10 concurrent degree programs:

- Management M.B.A./Computer Science M.S.
- Management M.B.A./Dentistry D.D.S.
- Management M.B.A./Latin American Studies M.A.
- Management M.B.A./Law J.D.
- Management M.B.A./Library and Information Science M.L.I.S.
- Management M.B.A./Medicine M.D.
- Management M.B.A./Nursing M.S.N.
- Management M.B.A./Public Health M.P.H.
- Management M.B.A./Public Policy M.P.P.

Office of Executive Education

Lifelong learning plays a critical role in the success of today's business leaders. The school's Office of Executive Education offers more than 40 innovative open enrollment and customized programs that address complex and rapidly changing business issues. The Executive Program covers such diverse areas as strategic planning, organizational design, and competitive positioning. See http://www.anderson.ucla.edu/executive-education.

RESEARCH CENTERS

Six interdisciplinary research centers provide valuable resources that support school programs: Center for Global Management (CGM), Center for Management of Enterprise in Media, Entertainment, and Sports (MEMES), Harold and Pauline Price Center for Entrepreneurial Studies, Laurence D. and Lori W. Fink Center for Finance and Investments, Richard S. Ziman Center for Real Estate, and the UCLA Anderson Fore-
The school offers the following degrees, in addition to the Department of Biostatistics develops statistical applications for public health use. The Department of Community Health Sciences addresses behaviors that prevent disease and enhance health, health problems of high-risk groups (women, children, the aged, the poor, the disadvantaged, and racial and ethnic minorities), health education and promotion, public health policy, community nutrition, and international health. The Department of Environmental Health Sciences elucidates health hazards in the general environment and in the workplace. The Department of Epidemiology is concerned with the nature, extent, and distribution of disease and health in populations. The Department of Health Policy and Management deals with the organization, financing, delivery, quality, and distribution of healthcare services. The school also administers an interdepartmental degree program in molecular toxicology. See the Curricula and Courses section for further information on each department.

DEGREES AND PROGRAMS

The school offers graduate programs leading to both academic and professional degrees in five departments. The Department of Biostatistics develops statistical and analytical techniques for public health use. The Department of Community Health Sciences addresses behaviors that prevent disease and enhance health, health problems of high-risk groups (women, children, the aged, the poor, the disadvantaged, and racial and ethnic minorities), health education and promotion, public health policy, community nutrition, and international health. The Department of Environmental Health Sciences elucidates health hazards in the general environment and in the workplace. The Department of Epidemiology is concerned with the nature, extent, and distribution of disease and health in populations. The Department of Health Policy and Management deals with the organization, financing, delivery, quality, and distribution of healthcare services. The school also administers an interdepartmental degree program in molecular toxicology. See the Curricula and Courses section for further information on each department.

DEGREES AND PROGRAMS

The school offers the following degrees, in addition to an undergraduate minor in Public Health:

- Biostatistics (M.S., Ph.D.)
- Community Health Sciences (M.P.H.-HR, M.S., Ph.D.)
- Environmental Health Sciences (M.S., Ph.D.)
- Epidemiology (M.S., Ph.D.)
- Health Policy and Management (EMPH, M.S., Ph.D.)
- Molecular Toxicology (Ph.D.)
- Preventive Medicine and Public Health (M.S.)
- Public Health (M.P.H., Dr.P.H.)

New students are not being admitted to the M.S. in Preventive Medicine and Public Health at this time.

Articulated Degree Programs

The school offers two articulated degree programs:

- Public Health M.P.H./Latin American Studies M.A.
- Public Health M.P.H./Medicine M.D.

Concurrent Degree Programs

The school offers eight concurrent degree programs:

- Public Health M.P.H./African Studies M.A.
- Public Health M.P.H./Asian American Studies M.A.
- Public Health M.P.H./Islamic Studies M.A.
- Public Health M.P.H./Law J.D.
- Public Health M.P.H./Management M.B.A.
- Public Health M.P.H./Public Policy M.P.P.
- Public Health M.P.H./Social Welfare M.S.W.

ADMISSION

Admission criteria established by the UCLA Graduate Division require a bachelor's degree from a regionally accredited institution comparable in standard and content to a bachelor's degree from the University of California. A scholastic average of B (3.0 on a 4.0 scale) or better is required—or its equivalent if the letter grade system is not used—for the last 60 semester units or last 90 quarter units of undergraduate study and in any postbaccalaureate study. Further requirements for international students are explained in the Graduate Study section. See http://grad.ucla.edu/gasaa/admissions/admisinfo.html.

Applicants must also submit the application to the centralized Schools of Public Health Application Service (SOPHAS) at http://www.sophas.org. For additional admission requirements, see http://ph.ucla.edu/prospective-students/application-checklist-and-submission-instructions.

DEGREE REQUIREMENTS

Specific degree requirements vary according to the department and program. Refer to Program Requirements for UCLA Graduate Degrees at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.

RESEARCH CENTERS

The field of public health addresses a wide range of issues, making it a natural for interdisciplinary collaboration. UCLA faculty members and students reach beyond traditional academic boundaries to promote cooperative exchange across disciplines. The following is a list of interdisciplin ary centers sponsored by or associated with the UCLA Fielding School of Public Health.

BIXBY CENTER ON POPULATION AND REPRODUCTIVE HEALTH

The Bixby Center on Population and Reproductive Health was established in 2001 at the Fielding School of Public Health as the result of a generous gift from...
The Center for Cancer Prevention and Control Research (http://ph.ucla.edu/research/centers/center-cancer-prevention-and-control-research) is a joint program of the Fielding School of Public Health and the Geffen School of Medicine's Jonsson Comprehensive Cancer Center. Since its inception in 1976, the center has been recognized throughout the Los Angeles community, nationally, and internationally. It conducts rigorous peer-reviewed research in two major program areas—the Healthy and At-Risk Populations Program (http://www.cancer.ucla.edu/Index.aspx?page=1194) and the Patients and Survivors Program (http://www.cancer.ucla.edu/Index.aspx?page=1195). The Healthy and At-Risk Populations Program focuses on research in primary prevention and screening/early detection among healthy populations and persons at increased risk for developing cancer. The program's research portfolio includes cancer epidemiology, gene-environment interaction, tobacco control, nutrition and exercise, and breast, cervix, prostate, and colon cancer screenings, as well as risk counseling and genetic testing of high-risk populations. The Patients and Survivors Program has as its major goal the reduction in avoidable morbidity and mortality among adult and pediatric patients with cancer and long-term survivors of cancer.

Center for Environmental Genomics

The Center for Environmental Genomics was established in May 2003 in partnership with the Jonsson Comprehensive Cancer Center. The goal of the center is to bring together experts from a variety of fields, including cancer, environmental health, epidemiology, biostatistics, human genetics, pathology, and pharmacology, to investigate the molecular mechanisms by which environmental agents such as air pollutants and radiation interact with genetic predisposing factors to cause disease. A better understanding of these processes paves the way not only for targeted drug therapies, but also for targeted public health efforts to reduce environmental exposures in high-risk populations. Environmental genomics helps prevent diseases rather than waiting to cure them once they have occurred. See http://ph.ucla.edu/research/centers/center-environmental-genomics.

Center for Global and Immigrant Health

The UCLA Center for Global and Immigrant Health was established in 2008 and includes faculty members from all the departments in the School of Public Health, as well as the Schools of Medicine, Dentistry, and Nursing and the California Center for Population Research, all of whom have research or teaching interests in global and/or immigrant health. Participating faculty members have active research collaborations in more than 50 countries throughout the world, and several work both with immigrant communities in California and in the countries of origin of these communities. The center offers a regular seminar series and a Certificate in Global Health available to students in any of UCLA's degree-granting graduate and professional programs. See http://ph.ucla.edu/research/centers/ucla-center-global-and-immigrant-health.

Center for Global Infectious Diseases

Infectious diseases are a significant cause of death worldwide and a cause of concern in the U.S. One of the greatest challenges in public health and medicine is to understand the environmental and genetic factors that contribute to the emergence and re-emergence of infectious diseases and to develop the tools that will enable detecting and monitoring of how diseases spread, so that they can be identified and controlled before they become pandemics.

Driven by its core public health mission, the Center for Global Infectious Diseases is an intellectual collection of individuals who provide a home for sustaining and expanding research evaluating how infectious diseases evolve and how their spread can be forecast and in turn mitigated or prevented. The center will bring together in addition to those involved in infectious disease epidemiology and control from within public health an interdisciplinary group of faculty members from across the campus, including those who study microbiology, virology, immunology, molecular genetics, ecology, and the evolution of infectious diseases. See http://ph.ucla.edu/research/centers/center-global-infectious-diseases.

Center for Health Advancement

The UCLA Center for Health Advancement provides enhanced analysis and evidence-based information to help policymakers decide which policies and programs can best improve health and reduce health disparities. The center analyzes a wide range of timely health improvement opportunities, identifying those supported by strong evidence. It presents and disseminates the results of these analyses in plain language to those who make and influence public and private sector policies and programs and provides training and technical assistance to facilitate implementation of recommended approaches.

The center brings together faculty from multiple departments of the Fielding School of Public Health and other UCLA schools with a wide range of subject matter and methodological expertise, including expertise in nonhealth sectors, such as education, transportation, housing, environmental protection, community planning, agriculture, public welfare, and economics. It has strong collaborations with governmental public health agencies, foundations, academic institutions, and other not-for-profit organizations. Within the health sector, its work is focused on how alternative investments to wasteful expenditures in healthcare can yield greater returns. See http://ph.ucla.edu/research/centers/ucla-center-health-advancement.

Center for Health Policy Research

The UCLA Center for Health Policy Research was established in 1994 to apply the expertise of UCLA faculty members and researchers to meet national, state,
and local community needs for health policy-related research and information and to accomplish three missions: (1) to conduct research on national, state, and local health policy issues, (2) to provide public service to policymakers and community leaders, and (3) to offer educational opportunities for graduate students and postdoctoral fellows.

Sponsored by the Fielding School of Public Health and the Luskin School of Public Affairs, the center provides a collaborative health policy research environment for the leading professional schools and academic departments of UCLA. One major project is the California Health Interview Survey (CHIS), one of the largest health surveys in the nation. The center also sponsors major public service programs supported by extramural grants. See http://www.healthpolicy.ucla.edu/Pages/home.aspx.

**CENTER FOR HEALTHIER CHILDREN, FAMILIES, AND COMMUNITIES**

The Center for Healthier Children, Families, and Communities (CHCFC) was established at UCLA in 1995 to address some of the most challenging health and social problems facing children and families. The center’s mission is to improve society’s ability to provide children with the best opportunities for health, well-being, and the chance to assume productive roles within families and communities.

Through a unique interdisciplinary partnership between UCLA departments, schools, and affiliated institutions, including the Schools of Public Health, Medicine, Nursing, Education, Law, and Public Affairs and the Department of Psychology, as well as providers, community agencies, and affiliated institutions, a critical mass of expertise has been assembled to conduct activities in five major areas: (1) child health and social services, (2) applied research, (3) training of health and social service providers, (4) policy research and analysis, and (5) technical assistance and support to community providers, agencies, and policymakers. See http://www.healthychild.ucla.edu.

**CENTER FOR OCCUPATIONAL AND ENVIRONMENTAL HEALTH**

The California State Legislature mandated that the Center for Occupational and Environmental Health (COEH) be formed in 1978, when a group of chemical workers became sterile from exposure to the pesticide DBCP, a known carcinogen and reproductive toxin. With branches in the north and south of the state, COEH trains occupational and environmental health professionals and scientists, conducts research, and provides services through consultation, education, and outreach. The centers constitute the first and most supported institutions to develop new occupational and environmental health leadership in the U.S.

The COEH branch at UCLA is housed in the Center for the Health Sciences and involves the Schools of Public Health, Medicine, and Nursing. Specific COEH programs within the Fielding School of Public Health include environmental chemistry, occupational/environmental epidemiology, occupational/environmental medicine, occupational ergonomics, occupational hygiene, toxicology, gene-environment interactions, psychosocial factors in the work environment, occupational health education, and pollution prevention. See http://ehs.ph.ucla.edu/coeh.

**CENTER FOR PUBLIC HEALTH AND DISASTERS**

The Center for Public Health and Disasters was established in 1997 to address the critical issues faced when a disaster impacts a community. The center promotes interdisciplinary efforts to reduce the health impacts of domestic, international, natural, and human-induced disasters. It facilitates dialog between public health and medicine, engineering, physical and social sciences, and emergency management. This unique philosophy is applied to the education and training of practitioners and researchers, collaborative interdisciplinary research, and service to the community. The multidisciplinary center staff and participating faculty members have backgrounds that include emergency medicine, environmental health sciences, epidemiology, gerontology, health services, social work, sociology, urban planning, and public health.

The center is one of 15 Academic Centers for Public Health Preparedness funded by the Centers for Disease Control. The goal of these national centers is to improve competencies of front-line workers in public health to respond to public health threats. See http://www.cphd.ucla.edu.

**GLOBAL MEDIA CENTER FOR SOCIAL IMPACT**

The Fielding School of Public Health has established an innovative new center to increase awareness of important health issues and improve the well-being of people throughout the world by harnessing the storytelling power of television, film, music, and new media.

By collaborating with the entertainment industry and news media, the Global Media Center for Social Impact helps content creators and reporters craft compelling stories that accurately address a full range of public health issues—from the social determinants of health to climate change and early childhood health—with the goal of impacting global health.

The center is ideally poised to engage the entertainment industry in creating storylines by linking filmmakers, writers, and other industry types with the experts and extensive resources of the school. The center also collaborates with media organizations and producers around the globe to promote exceptional storytelling, effective reporting, and interactive new media content that can help move research on population health from evidence to impact. See http://ph.ucla.edu/research/centers/global-media-center-social-impact-0.

**UCLA KAISER PERMANENTE CENTER FOR HEALTH EQUITY**

Academic studies and current events have converged to highlight the magnitude of potentially preventable health disparities among various population groups, and the urgency of addressing these disparities. The UCLA Kaiser Permanente Center for Health Equity identifies, investigates, and addresses these differences in health status and disease burden. A key feature of the center is its heavy focus on community-based intervention research to mitigate observed disparities.

The center aims to advance understanding of health disparities across the lifespan and to foster multidisciplinary research to improve the health of underserved communities. With focus on Los Angeles County, the center facilitates community and academic partnerships in research, trains new investigators in health disparities research, and assists community partners in
implemented effective programs and advocating for effective policies to reduce disparities. The center also
endeavors to erode the barriers preventing more effective collaboration with local health departments and
other key community partners engaged in the practice of public health. It is a collaborative center without
walls that includes associates from academia, government, foundations, and private/nonprofit organizations. See http://healthequity.ucla.edu.

**UCLA/RAND Prevention Research Center**

The UCLA/RAND Prevention Research Center conducts studies and develops programs to improve the health and well-being of adolescents, with special emphasis on projects that involve parents of adolescents. The center is a partnership of the Fielding School of Public Health, Department of Pediatrics, RAND (a nonpartisan, private, nonprofit research institute that conducts research to improve public policy), and local communities.

The center's multidisciplinary faculty and staff members represent the fields of public health, medicine, social and clinical psychology, sociology, economics, political science, anthropology, education, sampling, statistics, and survey design. It is innovative in its approach to community service, partnering with ethically and economically diverse communities in Los Angeles County to identify opportunities for it to provide technical support to community groups for program implementation and assessment. In addition, the center has partnerships with the Los Angeles Unified School District, Los Angeles County Department of Health Services, and other local groups. See http://prc.ph.ucla.edu.

**World Policy Analysis Center**

The World Policy Analysis Center aims to improve the quantity and quality of comparative data available to policymakers, citizens, civil society, and researchers around the world on policies affecting human health, development, well-being, and equity. To date, the research team has gathered detailed information on public policies in all UN member states, including labor laws, poverty reduction policies, education policies, and constitutional rights, with the goals of increasing access to this data and translating research findings into policies and programs at the global, national, and local levels. The center is committed to enhancing global health and public policy research and policy capacity across universities, governments, and international organizations. See http://world.ph.ucla.edu.

**MEYER AND RENEE LUSKIN SCHOOL OF PUBLIC AFFAIRS**

Franklin D. Gilliam, Jr., Dean

UCLA
3250 Public Affairs Building
Box 951656
Los Angeles, CA 90095-1656

(310) 206-7568
fax: (310) 206-5773
http://luskin.ucla.edu

Founded in 1994, the UCLA Meyer and Renee Luskin School of Public Affairs incorporates best practices in scholarship, research, and teaching in the fields of policy making, social work, and urban and regional planning. The unique intersection of these disciplines within one school allows for academic cross-collaboration and a graduate education that values perspectives at both the macroorganizational and microorganizational levels. Graduates of the master’s and doctoral degree programs are well prepared to take leadership roles and effect change as practitioners, researchers, and policymakers in the public, private, and nongovernmental sectors. Faculty members are actively engaged in research that addresses pressing national and regional issues, including immigration, drug policy, prison reform, healthcare financing, transportation and the environment, national security, economic development, and an aging U.S. and world population.

**Departments**

The school combines three academic departments—Public Policy, Social Welfare, and Urban Planning—and faculty members from such diverse disciplines as economics, geography, history, law, management, and political science. The school trains policy professionals, planners, and social workers for public, private, and nongovernment service, conducts research on significant regional, national, and international issues with a strong interdisciplinary and cross-cultural focus, and acts as a convener and catalyst for public dialogue, engaging people locally, nationally, and internationally.

**Degrees and Programs**

The school offers the following degrees, in addition to undergraduate minors in Gerontology, Public Affairs, and Urban and Regional Studies:

- Public Policy (M.P.P.)
- Social Welfare (M.S.W., Ph.D.)
- Urban and Regional Planning (M.U.R.P.)
- Urban Planning (Ph.D.)

**Concurrent Degree Programs**

The school offers 13 concurrent degree programs:

- Public Policy M.P.P./Law J.D.
- Public Policy M.P.P./Management M.B.A.
- Public Policy M.P.P./Medicine M.D.
- Public Policy M.P.P./Public Health M.P.H.
- Public Policy M.P.P./Social Welfare M.S.W.
- Social Welfare M.S.W./Asian American Studies M.A.
- Social Welfare M.S.W./Law J.D.
- Social Welfare M.S.W./Public Health M.P.H.
- Urban Planning M.U.R.P./Architecture M.Arch. I
- Urban Planning M.U.R.P./Latin American Studies M.A.
- Urban Planning M.U.R.P./Law J.D.
- Urban Planning M.U.R.P./Management M.B.A.
- Urban Planning M.U.R.P./Public Health M.P.H.

Obtain brochures about the school’s programs from the department offices, 3357 Public Affairs Building, or see http://luskin.ucla.edu.

The school also offers a wide array of undergraduate courses in public policy, social welfare, and urban plan-
The mission of the Center for the Study of Inequality is to generate new information and knowledge about the nature, magnitude, and causes of socioeconomic inequality. It is committed to translating academic scholarship into feasible and actionable policies, plans, and programs. The center focuses on these issues and challenges in the Southern California region and expands its findings by including comparative analysis with other regions. See http://luskin.ucla.edu/content/center-study-inequality.

Institute of Transportation Studies

The UCLA Institute of Transportation Studies (ITS), one of the leading transportation policy research centers in the U.S., was created in 1993 to conduct research and provide professional education on the social, economic, environmental, and cultural aspects of transportation policy. Each year ITS faculty members, students, and research staff collaborate on a wide array of transportation policy and planning studies, ranging from an analysis of the travel trends and transportation needs of immigrants and low-income workers to the testing and evaluation of innovative fare programs to increase public transit use. See http://its.ucla.edu.

Ralph and Goldy Lewis Center for Regional Policy Studies

The Lewis Center for Regional Policy Studies was established in 1988 with a $5-million endowment from Ralph and Goldy Lewis to promote the multidisciplinary study, understanding, and solution of regional policy issues in California. Research projects include topics such as welfare reform, immigration, the environment, health insurance, labor and employment, and transportation. See http://lewis.ucla.edu.

Luskin Center for Innovation

The Luskin Center for Innovation serves as a point of intersection and interaction at UCLA, bringing together the brightest minds to concentrate on a specific urgent policy issue in Southern California. Los Angeles is at a critical juncture in many key areas of public policy. UCLA has the intellectual capital to bring together some of the top thinkers in the country, the most enterprising students, and relevant research to support innovative approaches to broad policy problems.

Strategically located within the Luskin School of Public Affairs, the Luskin Center was founded with a generous gift from the Luskins to engage the academic and public decision makers together in actively pursuing solutions to the Los Angeles region's most urgent threats. The center turns the conventional dividing lines between the academic and practical world into a meeting point—reaching across disciplines, sectors, and political points of view to actively pursue long-term solutions that can immediately be put into practice. The current funding cycle addresses environmental sustainability and pollution reduction in Los Angeles. See http://innovation.luskin.ucla.edu.
The School of the Arts and Architecture at UCLA plays a vital role in the cultural and artistic life of the campus and community. Courses and degree programs in six departments (Architecture and Urban Design, Art, Design | Media Arts, Ethnomusicology, Music, and World Arts and Cultures/Dance) provide students with unparalleled opportunities to learn from faculty members who rank among the most innovative artists, designers, musicians, choreographers, architects, and arts scholars of our time.

The school is also home to two undergraduate minors. The Music Industry minor introduces ethnomusicology, music, and music history students to critical perspectives on the formative effects the music industry and music technology have on musical practices around the world. The Visual and Performing Arts Education minor is designed to introduce arts students to the issues and methodologies in the field of arts education.

Combining opportunities for the hands-on study of creative practice with the academic foundation of the liberal arts, the school offers students the chance to develop an integrated and encompassing understanding of human creativity, the arts, and architecture. The mission is to educate, empower, and inspire the next generation of citizens to serve as cultural and artistic leaders of the twenty-first century.

The School of the Arts and Architecture has an impressive array of public arts units, including the Center for Art of Performance at UCLA, one of the largest and most diverse performing arts presenters in the nation, and two world-class museums—the UCLA Hammer Museum which focuses on contemporary and emerging artists and the Fowler Museum at UCLA which focuses on the traditional and contemporary arts of Africa, the Americas, Asia, and Oceania.

Seven interdisciplinary research centers—the Art | Global Health Center, Art | Sci Center, cityLab, Experiential Technologies Center, Grunwald Center for the Graphic Arts, and NOW Institute—and the renowned Murphy Sculpture Garden are part of the school. All of these programs offer students the opportunity to broaden and deepen their experience of the arts and architecture while at UCLA.

In addition to providing a rich and diverse environment on campus, the school offers students the opportunity to participate in community outreach programs designed around concerts, exhibitions, symposia, and dance productions presented in cooperation with groups throughout the greater Los Angeles area.

## DEPARTMENTS AND PROGRAMS

The six departments of the school are integral to the rich and varied cultural life of the campus. The Department of Architecture and Urban Design provides students with a unique opportunity to study buildings, cities, and their interdependence in one of the most structurally and ethnically diverse cities in the world. Students in the Department of Art learn to understand the broad panorama of the visual arts emphasizing experimentation. The Department of Design | Media Arts focuses on electronic and digital imagery in visual communication design. Students in the Department of Ethnomusicology study the performance and context of music-making from a global perspective, including a concentration in jazz studies, and the Department of Music offers concentrations in composition, music education, and performance. The Department of World Arts and Cultures/Dance offers innovative curricula focused on the interdisciplinary and intercultural investigation of performance, the arts, and dance, and on establishing connections between cultural theory and artistic practice.

Information regarding academic programs is available from the Office of Enrollment Management, 8260 Broad Art Center, UCLA, Box 951427, Los Angeles, CA 90095-1427, http://www.arts.ucla.edu, (310) 825-8981.

Students interested in obtaining instructional credentials for California elementary and secondary schools should consult the Department of Education, 1009 Moore Hall, (310) 825-8328.

## DEGREES

The school offers the following degrees, in addition to undergraduate interdisciplinary minors in Music Industry and in Visual and Performing Arts Education:

- Architectural Studies (B.A.)
- Architecture (M.Arch. I, M.Arch. II, M.A., Ph.D.)
- Art (B.A., M.F.A.)
- Culture and Performance (M.A., Ph.D.)
- Dance (B.A., M.F.A.)
- Design | Media Arts (B.A., M.F.A.)
- Ethnomusicology (B.A., M.A., C.Phil., Ph.D.)
- Individual Field (B.A.)
- World Arts and Cultures (B.A.)

## UNDERGRADUATE ADMISSION

In addition to the University of California undergraduate application, departments in the School of the Arts and Architecture require auditions, portfolios, or evidence of creativity. Information regarding departmental requirements is available on each department's website; see http://www.arts.ucla.edu (click on Departments). The annual deadline date for applications is November 30 for admission in the following Fall Quarter. After the UC application has been filed, applicants must submit supplemental application material and should consult the individual department website for details.

## UNDERGRADUATE DEGREE REQUIREMENTS

School of the Arts and Architecture students must meet three types of requirements for the Bachelor of Arts degree:

1. University requirements
2. School requirements
3. Department requirements

**UNIVERSITY REQUIREMENTS**

The University of California has two requirements that undergraduate students must satisfy in order to graduate: (1) Entry-Level Writing or English as a Second Language and (2) American History and Institutions. See Degree Requirements in the Undergraduate Study section for details.

School of the Arts and Architecture students enrolled in English as a Second Language 33A, 33B, 33C, 35 must take each course for a letter grade.

**SCHOOL REQUIREMENTS**

The School of the Arts and Architecture has nine requirements that must be satisfied for the award of the degree: unit, scholarship, academic residence, writing, quantitative reasoning, foreign language, upper division nonmajor courses, diversity, and general education.

**UNIT REQUIREMENT**

Students must complete for credit, with a passing grade, no less than 180 units and no more than 216 units, of which at least 64 units must be upper division courses (numbered 100 through 199). Credit for upper division tutorials numbered 195 through 199 is limited to a maximum of 8 units in a single term and a maximum of 32 units total for a letter grade. Each major may have limitations on the number of upper division tutorials and/or units that may be applied toward degree requirements.

**SCHOLARSHIP REQUIREMENT**

A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A 2.0 (C) average is also required in all upper division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements.

**ACADEMIC RESIDENCE REQUIREMENT**

Students are in residence while enrolled and attending classes at UCLA as a major in the School of the Arts and Architecture. Of the last 45 units completed for the bachelor’s degree, 35 must be earned in residence in the School of the Arts and Architecture. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

**WRITING REQUIREMENT**

Students must complete the University’s Entry-Level Writing or English as a Second Language (ESL) requirement prior to completing the school writing requirement.

Students admitted to the school are required to complete a two-term writing requirement—Writing I and Writing II. The courses must be taken for letter grades, and students must receive grades of C or better (C– grades are not acceptable).

**Writing I**. The Writing I requirement must be satisfied within the first three terms of enrollment by completing English Composition 3 with a grade of C or better (C– or a Passed grade is not acceptable).

The Writing I requirement may also be satisfied by scoring 4 or 5 on one of the College Board Advanced Placement Examinations in English or a combination of a score of 720 or higher on the SAT Reasoning Test Writing Section and superior performance on the English Composition 3 Proficiency Examination.

Students whose native language is not English may satisfy the Writing I requirement by completing English as a Second Language 36 with a grade of C or better (C– or a Passed grade is not acceptable). Admission to the course is determined by completion of English as a Second Language 35 with a passing grade or proficiency demonstrated on the English as a Second Language Placement Examination (ESLPE).

**Writing II**. The Writing II requirement must be satisfied within the first six terms of enrollment by completing one course from a faculty-approved list of Writing II courses published in the Schedule of Classes at http://www.registrar.ucla.edu/soc/writing.htm and available in the Student Services Office. The course must be completed with a grade of C or better (C– or a Passed grade is not acceptable).

A Writing II course also approved for general education may be applied toward the relevant general education foundational area.

**QUANTITATIVE REASONING REQUIREMENT**

In the School of the Arts and Architecture, students must demonstrate basic skills in quantitative reasoning. The requirement may be satisfied by completing one approved UCLA course (see list below) for a letter grade of C or better or Passed (C– or a Not Passed grade is not acceptable).

The quantitative reasoning requirement may also be satisfied by achieving an SAT Reasoning Test Mathematics Section score of 600 or higher or an SAT Subject Test in Mathematics score of 550 or higher.

Approved courses include Biostatistics 100A, 100B, Life Sciences 30A, Mathematics 2 (or any higher numbered course except 19, 71SL, 72SL, 89, 89HC, 98XA, 98XB, 99, 103A, 103B, 103C, 105A, 105B, 105C, 189, 189HC, 195, 197, 199), Philosophy 31, Political Science 6, 6R, Program in Computing 10A, 10B, 10C, Statistics 10, 12, 13, and former courses 11 and 14.

**FOREIGN LANGUAGE REQUIREMENT**

Students must meet the foreign language requirement by (1) scoring 3, 4, or 5 on the College Board Advanced Placement (AP) foreign language examination in Chinese, French, German, Italian, Japanese, or
The diversity requirement is predicated on the notion of socioeconomic background, religion, sexual orientation, age, and disability and are relevant to the understanding of these dynamics in contemporary society and culture in the U.S. and around the world.

**GENERAL EDUCATION REQUIREMENTS**

General education (GE) is more than a checklist of required courses. It is a program of study that (1) reveals to students the ways that research scholars in the arts, humanities, social sciences, and natural sciences create and evaluate new knowledge, (2) introduces students to the important ideas and themes of human cultures, (3) fosters appreciation for the many perspectives and the diverse voices that may be heard in a democratic society, and (4) develops the intellectual skills that give students the dexterity they need to function in a rapidly changing world.

This entails the ability to make critical and logical assessments of information, both traditional and digital; deliver reasoned and persuasive arguments; and identify, acquire, and use the knowledge necessary to solve problems.

**FOUNDATIONS OF KNOWLEDGE**

General education courses are grouped into three foundational areas: Foundations of the Arts and Humanities, Foundations of Society and Culture, and Foundations of Scientific Inquiry.

Eight courses (38 units minimum) are required. A Writing II course also approved for general education may be applied toward the relevant general education foundational area.

Students who complete a yearlong GE Cluster series fulfill the Writing II requirement and complete 40 percent of their general education requirements. Students who do not complete the yearlong GE Cluster series must meet with a counselor in the Student Services Office to determine applicable GE credit.

Courses listed in more than one category can fulfill GE requirements in only one of the cross-listed categories.

**Foundations of the Arts and Humanities.** Three 5-unit courses, one from each subgroup. Courses required to satisfy the major or other courses taken in the major field may not be used to satisfy this GE requirement:

- Literary and Cultural Analysis
- Philosophical and Linguistic Analysis
- Visual and Performance Arts Analysis and Practice

The aim of courses in this area is to provide perspectives and intellectual skills necessary to comprehend and think critically about our situation in the world as human beings. In particular, the courses provide the basic means to appreciate and evaluate the ongoing efforts of humans to explain, translate, and transform their diverse experiences of the world through such media as language, literature, philosophical systems, images, sounds, and performances. The courses introduce students to the historical development and fundamental intellectual and ethical issues associated with the arts and humanities and may also investigate the complex relations between artistic and humanistic expression and other facets of society and culture.

**Foundations of Society and Culture.** Three 5-unit courses, one from each subgroup and a third course from either subgroup:

- Historical Analysis
- Social Analysis
The aim of courses in this area is to introduce students to the ways in which humans organize, structure, rationalize, and govern their diverse societies and cultures over time. The courses focus on a particular historical question, societal problem, or topic of political and economic concern in an effort to demonstrate how issues are objectified for study, how data is collected and analyzed, and how new understandings of social phenomena are achieved and evaluated.

**Foundations of Scientific Inquiry.** Two courses from either subgroup. If both courses are selected from the same subgroup, they must be from different departments:

- **Life Sciences**
- **Physical Sciences**

The aim of courses in this area is to ensure that students gain a fundamental understanding of how scientists formulate and answer questions about the operation of both the physical and biological world. The courses also deal with some of the most important issues, developments, and methodologies in contemporary science, addressing such topics as the origin of the universe, environmental degradation, and the decoding of the human genome. Through lectures, laboratory experiences, writing, and intensive discussions, students consider the important roles played by the laws of physics and chemistry in society, biology, Earth and environmental sciences, and astrophysics and cosmology.

**Foundations Course Lists.** Creating and maintaining a general education curriculum is a dynamic process; consequently, courses are frequently added to the list. For the most current list of approved courses that satisfy the Foundations of Knowledge GE plan, consult an academic counselor or see http://www.registrar.ucla.edu/ge/.

**Reciprocity with Other UC Campuses**

Students who transfer to UCLA from other UC campuses and have met all GE requirements prior to enrolling at UCLA are not required to complete the School of the Arts and Architecture GE requirements. Written verification from the dean at the other UC campus is required. Verification letters should be sent to the Student Services Office, School of the Arts and Architecture, 2200 Broad Art Center, UCLA, Box 951620, Los Angeles, CA 90095-1620.

**Intersegmental General Education Transfer Curriculum**

Transfer students from California community colleges have the option to fulfill UCLA lower division GE requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. Although GE or transfer core courses are degree requirements rather than admission requirements, students are advised to fulfill them prior to transfer. The IGETC significantly eases the transfer process, as all UCLA GE requirements are fulfilled when students complete the IGETC courses. Students who select the IGETC must complete it entirely before enrolling at UCLA. Otherwise, they must fulfill the School of the Arts and Architecture GE requirements.

**School of the Arts and Architecture General Education Requirements**

**Foundations of the Arts and Humanities**

- Literary and Cultural Analysis. 1 Course
- Philosophical and Linguistic Analysis. 1 Course
- Visual and Performance Arts Analysis and Practice. 1 Course

Total = 15 units minimum

**Foundations of Society and Culture**

- Historical Analysis. 1 Course
- Social Analysis. 1 Course
- Third course from either subgroup. 1 Course

Total = 15 units minimum

**Foundations of Scientific Inquiry**

- Life Sciences/Physical Sciences. 2 Courses
- Two courses from either subgroup. If both courses are selected from the same subgroup, they must be from different departments.

Total = 8 units minimum

**Total GE. 8 Courses/38 Units Minimum**

A Writing II course also approved for general education may be applied toward the relevant general education foundational area.

**Department Requirements**

School of the Arts and Architecture departments generally set two types of requirements that must be satisfied for the award of the degree: (1) Preparation for the Major (lower division courses) and (2) the Major (upper division courses). Preparation for the Major courses should be completed before beginning upper division work.

**Preparation for the Major**

A major requires completion of a set of courses known as Preparation for the Major. Each department sets its own Preparation for the Major requirements; see the Curricula and Courses section of this catalog.

**The Major**

A major is composed of no less than 56 units, including at least 36 units of upper division courses. Students must complete their major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major. Each course in the major department must be taken for a letter grade.

As changes in major requirements occur, students are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the department adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of the Arts and Architecture may require a general final examination.

**Individual Majors.** Highly motivated students who believe that no single major accommodates their specific interests and goals may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and must explain the intent concerning the anticipated program of study and reasons why the academic goals cannot be achieved.
within an existing major. Proposals must be submitted no later than the end of the sophomore year. Transfer students must complete at least one term of residency at UCLA before proposing an individual major. Students interested in designing an individual major should consult the Director of Student Services, School of the Arts and Architecture, 2200 Broad Art Center, (310) 206-3564.

**Minors and Double Majors.** Students may petition to be reviewed for a minor and/or double major on an individual basis. It is strongly recommended that students pursuing a minor or double major enroll in 15 to 20 units per term. Contact the Student Services Office for an outline of criteria required.

**Policies and Regulations**

Degree requirements are subject to policies and regulations, including the following:

**Student Responsibility**

Students should take advantage of academic support resources, but they are ultimately responsible for keeping informed of and complying with the rules, regulations, and policies affecting their academic standing.

**Study List**

Each term the student Study List must include from 12 to 20 units. The school has no provision for part-time enrollment. After the first term, students may petition to carry more than 20 units if they have an overall grade-point average of 3.0 (B) or better and have attained at least a B average in the preceding term with all courses passed. Consult the Student Services Office no later than the end of the second week of instruction.

**Minimum Progress**

Students are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; they are placed on probation if they fail to pass these units. They are subject to dismissal if they fail to pass at least 32 units in three consecutive regular terms in residence.

**Changing a Major**

Students in good academic standing who wish to change their major may petition to do so provided they can complete the new major within the 216-unit limit. Petitions must be submitted to and approved by the department or committee in charge of the new major. Admission to certain majors may be closed or restricted; changes are normally not permitted if students are on probation or have begun their last term.

**Concurrent Enrollment**

Enrollment at a non-UC institution or at UCLA Extension while enrolled at UCLA is not permitted.

**Credit Limitations**

The following credit limitations apply to all undergraduate students enrolled in the school:

**Advanced Placement Examinations.** Credit earned through the College Board Advanced Placement (AP) Examinations may be applied toward certain University/school requirements. Consult a counselor in the Student Services Office to determine applicable credit. Portions of AP Examination credit may be evaluated by corresponding UCLA course numbers (e.g., French 4). If students take the equivalent UCLA course, unit credit for such duplication is deducted before graduation. See the AP Chart at http://www.admission.ucla.edu/prospect/APCreditAA.htm for UCLA course equivalents and credit allowed for GE requirements.

**Graduate Courses.** Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet the specific qualifications. Courses numbered in the 400 and 500 series may not be applied toward the degree.

**Counseling Services**

The School of the Arts and Architecture offers advising, program planning in the major and general education requirements, and individual meetings with school and departmental counselors. For counseling information, contact the Student Services Office, School of the Arts and Architecture, 2200 Broad Art Center, (310) 206-3564.

**Honors**

School of the Arts and Architecture undergraduate students who achieve scholastic distinction may qualify for the following honors and programs:

**Dean's Honors**

To receive Dean's Honors in the School of the Arts and Architecture, students must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on the transcript for the appropriate term. Students are not eligible for Dean's Honors in any given term if they receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

**Latin Honors**

Latin Honors are awarded at graduation to students with superior grade-point averages. To be eligible, students must have completed 90 or more units for a letter grade at the University of California. The levels of honors and the requirements for each level are summa cum laude, an overall average of 3.926; magna cum laude, 3.872; cum laude, 3.799. The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in the graduating year determine student eligibility. See the Schedule of Classes for the most current calculations of Latin honors.

**Departmental Scholar Program**

Exceptionally promising juniors or seniors may be nominated as Departmental Scholars to pursue bachelor's and master's degree programs simultaneously. Qualifications include completion of 24 courses (96 quarter units) at UCLA or the equivalent at a similar institution and the requirements in preparation for the major. Students must also have at least one term of coursework remaining at UCLA. To obtain both the bachelor's and master's degrees students must be provisionally admitted to the Graduate Division, fulfill requirements for each program, and maintain a minimum B average. No course may be used to fulfill
requirements for both degrees. Interested students should consult their department well in advance of application dates for graduate admission. Contact the Student Services Office in 2200 Broad Art Center for details.

GRADUATE STUDY

The advanced degree programs offered in the School of the Arts and Architecture provide graduate students with unique research opportunities when combined with special resources, such as the Young Research Library, the special collections of the Arts and Music Libraries, and the University’s exhibition and performance halls.

Fellowships, grants, and assistantships are available through the departments and the dean of the Graduate Division.

ADMISSION

In addition to requiring that applicants hold a bachelor’s degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. In general, samples of creative work (auditions, portfolios, computer programs, etc.) are required. Detailed information is available on individual department websites and in Program Requirements for UCLA Graduate Degrees at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.

For information on the proficiency in English requirements for international graduate students, see Graduate Admission in the Graduate Study section of this catalog.

DEGREE REQUIREMENTS

Requirements to fulfill each degree objective vary according to the degree and the department. For complete degree requirements, see Program Requirements for UCLA Graduate Degrees at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.

SCHOOL OF DENTISTRY

No-Hee Park, Dean

UCLA
53-038 Dentistry
Box 951668
Los Angeles, CA 90095-1668
(310) 206-6063
fax: (310) 794-7734
https://www.dentistry.ucla.edu

The UCLA School of Dentistry has a national and international reputation for its teaching, research activities, and public service that prepare dental students for professional careers dedicated to patient treatment, leadership, and service. The curriculum prepares students for changes in treatment modalities and healthcare delivery systems. From the moment training begins, students actively participate in preventive and clinical dental care and soon make valuable contributions to the clinical health team. Clinical instruction emphasizes the comprehensive care of patients. Students interact with their colleagues, faculty members, and dental auxiliary personnel in much the same way as they later will interact in a private or group practice.

School of Dentistry students may undertake programs designed to meet their special interests; mandatory selectives encourage advanced training in an area of particular interest and service learning. In addition to basic and applied research programs within the school, students participate in community service programs such as the Wilson-Jennings-Bloomfield UCLA Venice Dental Center. The graduate programs and resident specialty programs foster new lines of research that lead to better treatment options. An active continuing education program directed by UCLA faculty members provides a variety of hands-on courses for members of the dental profession and their auxiliaries.

DEGREES AND PROGRAMS

The school offers the following degrees:

Dental Surgery (D.D.S.)
Oral Biology (M.S., Ph.D.)

In addition, the school has a Professional Program for International Dentists (PPID) and a number of dental specialty residency programs. Articulated D.D.S., M.S., Ph.D., and specialty programs are also available. One concurrent degree program (Dentistry D.D.S./Management M.B.A.) is also offered. For information on the M.S. and Ph.D. programs in Oral Biology, for which admission to the School of Dentistry is not required, see Program Requirements for UCLA Graduate Degrees at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.

PREDENTAL CURRICULUM

For details on the three-year predental curriculum, see http://career.ucla.edu/Students/GradProfSchCounseling/PreHealthCareerServices/Dentistry.aspx.

D.D.S. DEGREE

The UCLA dental curriculum leading to the degree of Doctor of Dental Surgery (D.D.S.) is based on the quarter system. The course of study usually takes four academic years of approximately nine months each, with three required Summer Quarters between the first/second, second/third, and third/fourth years. The curriculum is designed to provide students with clinical competence and broad experience in all phases of clinical dentistry within the four years.

The dental curriculum consists of three principal areas: basic health sciences courses, didactic dental courses, and clinical experience. The first two years of the curriculum are chiefly devoted to didactic, laboratory, and general clinical coursework. The final two years emphasize training and instruction in the clinical fields, including endodontics, fixed prosthodontics, operative dentistry, oral diagnosis and treatment planning, oral radiology, oral and maxillofacial surgery, anesthesiology, orthodontics, pediatric dentistry, periodontics, and removable prosthodontics.

For details on the D.D.S. program and a listing of the courses offered, see https://www.dentistry.ucla.edu/
learning/doctor-dental-surgery-program or write to the
Office of Student Affairs, School of Dentistry, A0-111
Dentistry, UCLA, Box 951762, Los Angeles, CA
90095-1762.

RESIDENT PROGRAMS
School of Dentistry opportunities for resident study
include a one-year general practice residency program;
a one-year advanced education in general dentistry
program; a one-year residency in maxillofacial prosth-
dontics; a six-year oral and maxillofacial surgery resi-
dency training program; three-year prosthodontics,
periodontics, and orthodontics programs; two-year
programs in the specialties of endodontics, oral radiol-
ogy, and orofacial pain and dysfunction; and 26-
month programs in dental anesthesiology and pediat-
ric dentistry.

Information on the resident programs can be obtained
by writing directly to Residency Programs, School of
Dentistry, A0-111 Dentistry, UCLA, Box 951762, Los
Angeles, CA 90095-1762.

SCHOOL OF LAW
Rachel F. Moran, Dean
UCLA
1242 Law
Box 951476
Los Angeles, CA 90095-1476
(310) 825-4841
fax: (310) 206-6489
http://www.law.ucla.edu

By any standard, the UCLA School of Law is recog-
nized as one of the nation's great law schools. Each year
a lively, talented, and diverse law student population
assembles in a rigorous, innovative, and supportive
environment. Members of the faculty frequently
receive awards for teaching excellence and are highly
regarded Universitywide and nationally. They also
are recognized worldwide for their contributions to
scholarship and law reform in a broad spectrum of
fascinating fields that dramatically affect our world—
constitutional law, environmental law and policy,
criminal law, corporate law, employment law, interna-
tional law, and intellectual property, to name a few.
The structure of our democracy, the underpinnings
and regulation of business, families, communities, and
individual liberties, the powerless and homeless, the
many permutations of a race-conscious society—all are
subjects of investigation and study. Faculty members
are committed to being intellectually and profession-
ally demanding of students and humane at the same
time, encouraging and fostering a genuine spirit of
cooperation and community.

Law students select courses from an intellectually rich
curriculum in private or public law and theory.
Courses are taught in both traditional and clinical
settings, with some offered as part of coordinated con-
current degree programs or specializations in Business
Law and Policy, Critical Race Studies, Entertainment,
Media, and Intellectual Property Law, Law and Philos-
ophy, and Public Interest Law and Policy. Situated at a
major gateway to the Pacific Rim, UCLA is a center of
international programs; international and comparative
law has become a dynamic, integral part of the law
school curriculum, with courses addressing the Euro-
pean Union, modern Japan and China, Islam, interna-
tional trade and business transactions, and a host of
other related courses. Part of an outstanding research
University, possessed of rich cultural resources, and
located in a beautiful garden setting allowing year-
round outdoor study and reflection, UCLA's extensive
educational programs afford law students myriad inter-
disciplinary opportunities both in the classroom and
through independent research.

The technologically advanced, spacious, and comfort-
able Hugh and Hazel Darling Law Library—replete
with natural lighting and views—houses an extensive
collection of legal materials. The school's nationally
recognized clinical program offers sophisticated
courses that help students develop applied lawyering
skills, focus on solving client problems, and see in their
education at UCLA more of what ultimately will face
them as lawyers and policymakers. An entire wing of
the Law Building is designed especially for clinical
teaching and student practice and facilitates work and
study in the ever-expanding clinical curriculum, which
includes courses in interviewing, counseling, negotia-
tion, business transactions, criminal and civil trial
advocacy, community-based lawyering, environmental
law, and international justice. The first-year lawyering
skills course, taught by experienced lawyers who are
full-time faculty members, is truly outstanding and
features interviewing and counseling of clients and
drafting of legal memoranda, contracts, and "advice
letters," thereby developing legal research capabilities
and writing prowess.

Successful placement of UCLA law graduates reflects
the school's excellent national ranking. Approximately
400 interviewers from across the country visit the cam-
pus annually, including law firms, corporations, gov-
ernment agencies, and public interest organizations.
UCLA graduates (more than 14,000) work in coveted
positions locally and around the world, not only
serving in a wide variety of public and private law
practices, but as judges, business executives, writers,
journalists, law professors, and academic administrators.

DEGREES
The school offers the following degrees:
Juris Doctor (J.D.)
Master of Laws (LL.M.)
Doctor of Juridical Science (S.J.D.)

Concurrent Degree Programs
The school offers nine concurrent degree programs:
Law J.D./Afro-American Studies M.A.
Law J.D./American Indian Studies M.A.
Law J.D./Education M.Ed., M.A., Ed.D., or Ph.D.
Law J.D./Management M.B.A.
Law J.D./Philosophy Ph.D.
Law J.D./Public Health M.P.H.
Law J.D./Public Policy M.P.P.
Law J.D./Social Welfare M.S.W.
Law J.D./Urban Planning M.U.R.P.

In addition to the concurrent programs above, stu-
dents may design a tailored program from other disci-
plines in the UCLA curriculum or from another high-
quality institution; this must be arranged in consultation with the School of Law and the other selected program.

Detailed information about the academic programs offered by the School of Law, course titles and descriptions, fees, and the semester-system calendar by which it operates are available at http://www.law.ucla.edu/academic-programs-and-courses/Pages/default.aspx.

**JURIS DOCTOR DEGREE**

**Admission**

Students beginning their professional work are admitted only for Fall Semester. They must have received a bachelor’s degree from a university or college of approved standing before beginning work in the school and are required to take the Law School Admission Test (LSAT).

The school seeks to admit students of outstanding intellectual ability who bring a wide range of backgrounds, experiences, and perspectives to the classroom and the legal profession. Through long experience the faculty has concluded that the quality of the education of each student is affected in significant ways by the presence of vital diverse viewpoints. Students of all backgrounds choose to come to UCLA in significant part because of the school’s outstanding achievements in creating a highly diverse educational environment.

In evaluating each applicant the school places substantial weight on traditional measures of academic ability, namely grades and LSAT scores. It also recognizes in its evaluation that other factors and attributes contribute greatly to a person’s ability to succeed as a law student and lawyer. When assessing academic promise and achievement, the applicant’s entire file is considered, including letters of recommendation, whether economic, physical, or other challenges have been overcome, scholarly achievements such as graduate study, awards, or publications, and the rigor of the undergraduate educational program.

In addition, the school considers attributes that may contribute to assembling a diverse class. Special emphasis is placed on socioeconomic disadvantage in the evaluation. Also considered are work experience and career achievement, community or public service, career goals (with particular attention to the likelihood of applicants representing underrepresented communities), significant hardships overcome, evidence of potential for leadership, language ability, unusual life experiences, and other factors (except those deemed inadmissible by The Regents or by other applicable law) that indicate the applicant may significantly diversify the student body or make a distinctive contribution to the school or the legal profession.

The UCLA School of Law has as one of its central purposes the training of attorneys who attain high levels of professional excellence and integrity and who exercise civic responsibility in myriad ways over long careers.

**Residence and Unit Requirements**

Candidates for the degree of Juris Doctor must pursue resident law school study for six semesters and successfully complete 87 units, at least 65 of which must be earned in regularly scheduled law class sessions. The residence requirements may be satisfied as follows: (1) six semesters in regular session in this school or (2) two semesters in regular session (or equivalent) in a school that is accredited by the American Bar Association, coupled with four semesters in regular session (or equivalent) in this school.

Every first-year student is required to take the full schedule of required courses; second- and third-year students are required to take a minimum of 12 units and may not take more than 16 units each semester. The second- and third-year curriculum is elective, except for a required course in professional responsibility and a substantial analytical writing requirement. In addition to the courses in the regular law school curriculum, students may take two courses for credit in other disciplines within the University. Graduate students may enroll in upper division law courses on a limited basis. Law courses are not open to non-UCLA students. Auditing of courses is not permitted.

**Attendance and Grades.** The right to take examinations and the privilege of continuing as a student in the school are conditioned on regular classroom attendance. Information on the grading system, which is based on a letter-grade scale of A+ to F, may be obtained from the Office of the Assistant Dean for Students. Standards for satisfactory performance and for graduation are prescribed by the faculty and are published separately. They may also be obtained from the above office.

**Curriculum**

The school offers courses of instruction within the school and supervised educational experiences outside it in an effort to enable its students to think intelligently and to prepare them for careers of practice and public service. To this end the school employs several instructional techniques in a variety of subject areas.

In the first year of their legal education students are exposed to an intensive study of legal reasoning in a series of fields that have historically dominated legal thought. Additionally, the first-year required course in lawyering skills provides students the opportunity to explore the relationship between legal analysis and lawyering tasks such as legal writing, oral advocacy, research, and client interviewing and counseling.

In the second and third years students have an opportunity to engage in a number of different fields of law and law-related study. All of the courses in the second- and third-year curriculum are elective, with the exception of the legal profession and substantial analytical writing requirements that are requisites for graduation.

**MASTER OF LAWS DEGREE**

The School of Law offers a Master of Laws (LL.M.) degree program for international and domestic law school graduates who wish to pursue a year of graduate legal education. The program allows students to specialize their studies in fields such as entertainment law, international and comparative law, and four separate business law subjects, or to design their own specialization in a field of their choice. For further information, see http://www.law.ucla.edu/llm/.
DOCTOR OF JURIDICAL SCIENCE DEGREE

The Doctor of Juridical Science (S.J.D.) degree program is designed for those seeking to pursue careers as teachers and scholars of law. The highly selective program is open only to applicants who possess a distinguished prior academic record in law, show promise of outstanding scholarship, and demonstrate a high potential for completing a scholarly dissertation of required quality. Applicants must hold a J.D. degree or foreign equivalent and an LL.M. degree (or be enrolled in a program leading to an LL.M. degree). For further information, see http://www.law.ucla.edu/sjd/.

ACADEMIC SPECIALIZATIONS FOR J.D. DEGREE

BUSINESS LAW AND POLICY SPECIALIZATION

The Business Law and Policy specialization is designed to allow students to focus in one of four tracks: business law, bankruptcy, mergers and acquisitions, securities regulation, and taxation. Approximately 70 courses and seminars are offered in the specialization. The five tracks are designed to provide additional guidance to students in course selection, as well as highlight the specialization’s curricular strengths. Business law materials are integrated to varying degrees in the law school’s first-year curriculum, typically in property, contracts, and torts. The second- and third-year curricula in the specialization include courses covering a wide variety of legal and business issues, ranging from regulation of markets to the design of business transactions.

CRITICAL RACE STUDIES SPECIALIZATION

The UCLA School of Law is the first American law school to offer an advanced curriculum that fosters students’ systematic and rigorous study in the area of critical race studies. With many faculty members who have been instrumental in pioneering and advancing critical race theory, the Critical Race Studies specialization is essential to promoting insightful, intelligent public conversation about race relations. It is appropriate for law students who seek advanced study and/or practice in race and the law, critical race theory, civil rights, public policy, and other legal practice areas that are likely to involve working with racial minority clients and communities or working to combat racial inequality. The course of study emphasizes mastery of five areas: (1) history (centered on the Constitution but focused as well on a variety of other legal documents and experiences), (2) theory (critical race theory, jurisprudence, and theoretical advances outside the legal academy), (3) comparative subordination (understanding of the multiracial nature of American race relations, as well as how racial inequality is affected by discrimination based on gender, sexual orientation, and disability), (4) doctrine (case and statutory law and its interpretation), and (5) practice (including legal practice, community service, and lawyers’ use of social science inquiries and methods).

ENTERTAINMENT, MEDIA, AND INTELLECTUAL PROPERTY LAW SPECIALIZATION

Los Angeles is the center of the entertainment industry, and recognizing the unique ability to offer a specific program in that arena, the school launched the Entertainment, Media, and Intellectual Property Law specialization in 2005. The specialization is the most comprehensive, advanced, and innovative approach to the study of entertainment and media law in the country. Students who fulfill the requirements have a solid grounding in the law, custom, theory, and policy in the motion picture, television, music, and other industries involved in creative and artistic matters. The program also prepares students who choose to work in nonprofit institutions, government, or academia in the area of entertainment, media, and intellectual property law.

LAW AND PHILOSOPHY SPECIALIZATION

The Law and Philosophy specialization is designed for students who want to supplement their legal studies by exploring more theoretical issues concerning the philosophical foundations of law. It is invaluable to students, especially those interested in attending graduate programs or exploring a career in academia. The specialization exposes students to material on the nature of law and legal systems, legal methodologies, and the theoretical underpinnings and justifications of particular doctrinal areas such as constitutional law, criminal law, and contract. Students need not have any prior background in philosophy, but a strong interest in the subject is recommended.

PUBLIC INTEREST LAW AND POLICY SPECIALIZATION

Recognizing the considerable debate about the proper role of the law in creating and sustaining a just society and defining public interest broadly to include all interests underrepresented by the private market, the Public Interest Law and Policy specialization strives to provide its students with an innovative and intellectually ambitious curriculum that prepares them to engage in sophisticated representation of traditionally underserved clients and interests. The specialization, one of the nation’s top such programs, has a competitive admissions process. Students represent a broad range of political and ideological perspectives and often pursue additional specializations and joint degrees. Graduates have received prestigious public interest law fellowships, and they work in a variety of settings, with focus on an array of social justice issues ranging from immigration, labor, and international human rights to healthcare, welfare and poverty, and civil rights. Faculty members are leaders in their respective fields and have distinguished themselves by the quality of their scholarship and teaching. They represent a broad cross-section of interests on social justice issues and bring to the classroom a depth of knowledge from a wide range of experiences and research perspectives.

ACADEMIC SPECIALIZATIONS FOR LL.M. DEGREE

BUSINESS LAW SPECIALIZATION

The Business Law specialization is designed to allow students to focus in one of four tracks: business law,
bankruptcy, securities regulation, and taxation.

Approximately 70 courses and seminars are offered in the specialization. The four tracks are designed to provide guidance to students in course selection, as well as highlight the specialization’s curricular strengths. The advanced curricula in the specialization include courses covering a wide variety of legal and business issues, ranging from regulation of markets to the design of business transactions. The Lowell Milken Institute for Business Law and Policy prepares students for outstanding careers and leadership in business law as well as in business, the nonprofit sector, and philanthropy. The institute simultaneously serves as a dynamic hub of research and strategy for practitioners, scholars, and experts across a variety of disciplines.

**ENTERTAINMENT, MEDIA, AND INTELLECTUAL PROPERTY LAW SPECIALIZATION**

Los Angeles is the center of the entertainment industry, and recognizing the unique ability to offer a top-notch program in that arena, the school launched the LL.M. Entertainment, Media, and Intellectual Property Law specialization in 2005. The specialization offers the most comprehensive, advanced, and innovative approach to the study of entertainment and media law in the world. Students who fulfill the requirements have a solid grounding in the law, custom, theory, and policy in the motion picture, television, music, and other industries involved in creative and artistic matters. The program also prepares students who choose to work in nonprofit institutions, government, or academia in the area of entertainment, media, and intellectual property law.

**INTERNATIONAL AND COMPARATIVE LAW SPECIALIZATION**

The school’s International and Comparative Law Program is one of the best in the nation. An expansive law faculty, course offerings, colloquia and symposia, student-edited journals, externships, foreign exchange offerings, and a broad community of interested students from around the world constitute a rich milieu in which to learn about the field. The International and Comparative Law specialization builds on these strengths and directs students to coursework that may range from international business to comparative constitutional law to international human rights. Students may either select a range of international and comparative courses or pursue a specialization route that allows them to compare U.S. law with the laws of their home country.

**LAW AND SEXUALITY SPECIALIZATION**

The Law and Sexuality specialization builds on the role of UCLA Law as a leader in the field of sexual orientation and gender identity law and scholarship. The goal of the specialization is to expand the quality and extent of legal knowledge and public discourse on issues related to sexuality and law. It is affiliated with the Williams Institute, a national think tank dedicated to conducting rigorous, independent research on sexual orientation and gender identity law and public policy. Students can take classes offered by faculty members and scholars associated with the institute, to be mentored by them, and to participate in a range of institute activities, including the speaker series and annual conference, moot court competition, and the Dukeminier Awards journal. Staff from the institute work with LL.M. students to secure internships in the Los Angeles area and to establish connections between LL.M. students and international experts and organizations working in their geographic or topic area. The specialization involves coursework on comparative and/or international law with focus on sexuality issues, including a course on law and sexuality and a Sexual Orientation Workshop seminar taught by Williams Institute teaching fellows.

**PUBLIC INTEREST LAW AND POLICY SPECIALIZATION**

Exploring the proper role of the law in creating and sustaining a just society and defining public interest broadly to include all interests underrepresented by the private market, the Public Interest Law and Policy specialization strives to provide its students with an innovative and intellectually ambitious curriculum that prepares them to engage in sophisticated representation of traditionally underserved clients and interests. The specialization, one of the nation’s top such programs, has a competitive admissions process. Students represent a broad range of political and ideological perspectives. Graduates work in a variety of settings, with focus on an array of social justice issues ranging from immigration, labor, and international human rights to healthcare, welfare and poverty, and equality rights.

**PROGRAMS AND CENTERS**

**CENTER FOR LAW AND ECONOMICS**

The mission of the Center for Law and Economics is to foster academic scholarship exploring how economics can help us better understand and improve our laws. UCLA has one of the richest law and economics traditions in the world, and many of the founders of law and economics have made UCLA their academic home. The center, along with the Anderson Graduate School of Management and the law school’s Lowell Milken Institute for Business Law and Policy, sponsors the UCLA Law, Economics, and Organization Workshop where speakers present their latest works-in-progress in the broad area of law and economics as it relates to business organizations.

**CLINICAL PROGRAM**

With more than 26 diverse clinical offerings, the Clinical Program is widely regarded as one of the strongest in the nation. Housed in a special clinical wing, it provides extensive and rigorous practical training for student-lawyers interested in litigation, transactional, and public interest work. The program is built on two principles: that most legal skills are transferable across practice areas and that such skills are best learned through repetition in increasingly more complex settings. The goal is to provide students with conceptual frameworks that allow them to make reasoned strategic judgments across all substantive areas of law. Students can choose among a wide variety of live-client clinics (in which they represent actual clients) and sophisticated simulation-based courses. In the more than 20 clinical settings, students learn how to interview and counsel clients, draft legal documents, conduct depositions, examine and cross-examine witnesses, resolve disputes, and argue before a judge or jury. Students interested in transactional practice can learn how to
finance a start-up company, sell a private company, advise a community-based organization engaged in economic development projects, or manage myriad environmental issues that arise when selling a business.

**CRITICAL RACE STUDIES PROGRAM**
Throughout American history, race has profoundly affected the lives of individuals, growth of social institutions, substance of culture, and workings of our political economy. Not surprisingly, this impact has been substantially mediated through the law and legal institutions. To understand the deep interconnections between race and law and, particularly the ways in which race and law are mutually constitutive, is an extraordinary intellectual challenge with substantial practical implications. In a nation that is becoming more racially diverse and finds global issues at the forefront of political debate, these issues promise to remain central to the work of law practitioners and the research of legal scholars. The only one of its kind in the U.S., the Critical Race Studies Program is proud that some of the original architects of critical race theory are faculty members. It is the premier institutional setting for the study of the intersection between race and the law. Established in 2000, the program has quickly emerged as a training ground for a new generation of practitioners, scholars, and advocates committed to racial justice theory and practice and is a multifaceted program that augments a rigorous course of study with research colloquia, symposia, interdisciplinary collaborations, and community partnerships in order to integrate theory and practice.

**DAVID J. EPSTEIN PROGRAM IN PUBLIC INTEREST LAW AND POLICY**
The school’s highly selective David J. Epstein Program in Public Interest Law and Policy was established in 1997 in response to the need to better train public interest lawyers. It quickly became one of the nation’s most innovative and successful law school public interest programs, engaging students in an array of social justice issues. Recognizing the considerable debate about the proper role of the law in creating and sustaining a just society and defining public interest broadly to include all interests underrepresented by the private market, the program strives to ensure that its students pursue an innovative and intellectually ambitious curriculum and extracurricular involvement that best prepares them to engage in sophisticated representation of traditionally underserved clients and interests. Beyond the formal coursework, the program provides an array of opportunities for students to hear from leading public interest practitioners and scholars, work on current policy problems, and become involved in public interest activities within and outside the School of Law. The program also sponsors a series of forums, symposia, and activities that focus on social justice issues in which all students, faculty, alumni, and the broader community participate.

**EMMETT INSTITUTE ON CLIMATE CHANGE AND THE ENVIRONMENT**
The Emmett Institute on Climate Change and the Environment is the nation’s first law school institute focused exclusively on climate change. It was established in 2008 to tackle the most pressing climate issues and works hand in hand with the Frank G. Wells Environmental Law Clinic and the Evan Frankel Environmental Law and Policy Program. The institute engages experts in other UCLA schools, as well as those outside UCLA who are working on matters related to climate change.

**EMPIRICAL RESEARCH GROUP**
The UCLA School of Law is one of the only law schools in the country to provide its faculty members with the support of trained statisticians to further empirical research. The Empirical Research Group (ERGs) is a methodology-oriented research center that specializes in the design and execution of quantitative research in law and public policy, and enables faculty members to include robust empirical analysis in their legal scholarship. Articles and reports published by faculty members working with ERG have covered topics as diverse as bankruptcy, legal aid, pollution prevention, tax policy, gay rights, the living wage, and campaign finance disclosure. Articles, reports, working papers, and supporting data are posted on the ERG website. In addition to faculty scholarship, ERG trains law students as research assistants in empirical methods such as sampling, data collection, and statistics, and works closely with law students who conduct their own empirical research. ERG has received or facilitated more than $2.5 million in foundation support for specific projects, including a grant from the Pew Charitable Trusts to study state campaign finance disclosure.

**ENTERTAINMENT, MEDIA, AND INTELLECTUAL PROPERTY LAW PROGRAM**
The Entertainment, Media, and Intellectual Property Law Program supports and expands the curricular offerings of the Entertainment, Media, and Intellectual Property Law specialization. For students interested in learning more about entertainment law, the program helps them earn externships with entertainment-related businesses, brings influential speakers to campus, and sponsors the industry’s top legal conference on entertainment issues, the annual UCLA Entertainment Symposium. Students run an entertainment-related journal, the UCLA Entertainment Law Review, as well as the student organization, the Entertainment Law Association.

**ENVIRONMENTAL LAW CENTER**
The Environmental Law Center houses the school’s varied and interdisciplinary work related to environmental law and policy. It includes the Frank G. Wells Environmental Law Clinic, which offers excellent opportunities for students to obtain hands-on experience in environmental law, the Emmett Institute on Climate Change and the Environment, and the Evan Frankel Environmental Law and Policy Program, as well as the work of UCLA’s world-class environmental law faculty. The center provides opportunities for members of the UCLA community to have a voice in solving the important environmental issues of the twenty-first century and to educate the public about these issues.

**EVAN FRANKEL ENVIRONMENTAL LAW AND POLICY PROGRAM**
The Evan Frankel Environmental Law and Policy Program fosters informed analysis of timely and important issues involving governance and regulation in environmental policy. It supports ongoing work on public pol-
The Health and Human Rights Law Project seeks to improve global health by using a framework grounded in international human rights law. Through multidisciplinary research, training, and mentorship, the project examines the relationship between health and human rights and fosters the next generation of leaders working in this area. With an emphasis on issues pertaining to sexuality, gender, and HIV/AIDS, the project focuses on health issues around which rights-claiming has particular salience.

INTERNATIONAL AND COMPARATIVE LAW PROGRAM

The International and Comparative Law Program is one of the best in the nation. Permanent faculty members who have built their reputations in the field offer numerous international and comparative law courses, such as international business transactions, national security law, human rights, international environmental law, international criminal law, European Union law, and Islamic law. The study of international and comparative law at UCLA is further strengthened by the opportunity to take courses in other UCLA departments. Some of the country's best work in international economics, politics, and business occurs at UCLA, and many law students find it valuable to complement their law school work with coursework in other departments. Students may also pursue joint degrees with other departments with the approval of the law school administration.

INTERNATIONAL HUMAN RIGHTS LAW PROGRAM

International human rights touch everything from politics to commerce, security to public health, law enforcement to the environment. In 2008 the UCLA Law School established the first major International Human Rights Law Program in Southern California to provide students with opportunities to participate in important human rights activities across the range of clinical work and scholarship. At the core are a clinical program in which students can conduct on-the-ground investigations of international human rights abuses, a research program to frame and address important questions about human rights law, and a public program with regular seminars, workshops, lectures, and films. The International Justice Clinic gives students unique opportunities to participate in the process of holding perpetrators of massive human rights abuses to account.

LAW AND PHILOSOPHY PROGRAM

The School of Law and the Department of Philosophy offer an exciting program in law and philosophy that takes advantage of the law faculty's strength and depth in the subject and the school’s close relationship to the Philosophy Department. The program has many dimensions, including a wide range of courses at the intersection of law and philosophy and a legal theory workshop, open to all members of the law school and Philosophy Department, in which leading scholars present works in progress.

LOWELL MILKEN INSTITUTE FOR BUSINESS LAW AND POLICY

The central mission of the Lowell Milken Institute for Business Law and Policy is to influence the national legal and policy debate over the critical issues affecting the regulation and governance of business. The institute seeks to fulfill this mission by promoting innovative research at the intersection of law and business by a highly respected and widely recognized business law faculty, by offering a unique blend of policy and practice-oriented courses designed to prepare law students to be leaders in the new economy, and by hosting timely conferences and scholarly events on matters that advance the public discussion.

NATIVE NATIONS LAW AND POLICY CENTER

The Native Nations Law and Policy Center supports Native Nations to enhance their governmental institutions and laws, strengthen their cultural resource protections, and address critical public policy issues by bringing together the University’s academic resources and the knowledge and experience of tribal leaders and knowledge-holders. The center serves as the home for the Tribal Legal Development Clinic and Tribal Appellate Court Clinic that involve students in projects such
The Resnick Program for Food Law and Policy is dedicated to studying and advancing law and policy solutions to improve the modern food system. A national think tank at the school, the program develops key legal and policy research and tools to foster a food system, from farm to fork, that is healthy both for consumers and the environment.

Richard S. Ziman Center for Real Estate

Reflecting a growing interdisciplinary focus at UCLA, the School of Law formed a partnership in 2005 with the Anderson Graduate School of Management to create the Richard S. Ziman Center for Real Estate.

The center is firmly grounded in the scholarship and teaching missions of both schools and offers practical application principles that help real estate industry professionals, public officials, and businesspeople alike make critical policy and business decisions. The center truly bridges the divide between research and practice and offers students a full range of coursework that provides a holistic view of real estate issues.

Sanela Diana Jenkins Human Rights Project

The Sanela Diana Jenkins Human Rights Project engages in a range of activities, continuously identifying and pursuing the most promising opportunities for addressing human rights issues around the globe, while at the same time advancing understanding about human rights through interdisciplinary studies. The project utilizes the best scholarship and analyses of human rights and international justice from the fields of law, politics, sociology, history, and economics to set its agenda and select human rights opportunities to pursue. And it uses its practical engagement in human rights advocacy to improve scholarly understanding. Typical activities have included the development and utilization of Web-based technologies to advance human rights; assistance to and support of prosecutors and judges in international criminal tribunals; and conferences, roundtable discussions, and speakers series focused on developing a breakthrough understanding of particular human rights challenges. The project also supports human rights and international justice by training the next generation of lawyers in the field.

UCLA-RAND Center for Law and Public Policy

The UCLA-RAND Center for Law and Public Policy is a unique partnership of the UCLA School of Law and RAND Corporation. Its mission is to produce innovative legal scholarship that is grounded in multidisciplinary empirical analysis to guide legal and public policymakers in the twenty-first century. It was created to support collaborative research and to evolve with the doctrinal, institutional, and professional changes in the law. The main activities of the center include research, conferences, and the Empirical Legal Scholars Program.

Williams Institute on Sexual Orientation Law and Public Policy

The Charles R. Williams Institute on Sexual Orientation Law and Public Policy is the only think tank of its kind dedicated to the field of sexual orientation law and public policy. The institute supports legal scholarship, legal research, policy analysis, and education regarding sexual orientation discrimination and other legal issues that affect lesbian and gay people. The institute began with the recognition that issues central to sexual orientation law have profound implications for the development of the law and public policy in general. Drawing on the intellectual and material resources of UCLA, the institute provides a national center for the interdisciplinary exploration of these issues by scholars, judges, practitioners, advocates, and students.
The School of Nursing enjoys a national and international reputation for excellence in teaching, research, and clinical practice. A strong scientific basis underlies the teaching of nursing practice, leadership, and research. Related clinical experiences are arranged within the UCLA Medical Center, its affiliates, or in selected community sites.

At the bachelor’s level, nurses are prepared as generalists with special skills in primary, secondary, and tertiary prevention and care within a population-based context, leadership, and evidence-based practice. At the master’s level, nurses are prepared as generalists in hospital-based care or for advanced nursing practice as nurse practitioners, clinical specialists, or administrators in a variety of settings and specialized areas of healthcare. The Ph.D. program prepares scholars who conduct original research, generate new theories, and build the scientific basis for professional nursing practice. Research is both basic and applied.

The school has an exceptionally qualified faculty; many members have national and international reputations for excellence. The school is consistently ranked high for its teaching and research programs. The innovative curriculum is responsive to national needs in healthcare and the diversity of the patient population. Graduates of the program are sought by healthcare institutions and educational programs, and many alumni have become leaders in the field. Education in this research University with its full range of academic disciplines provides a rich environment for preparation in the health sciences.

**PHILOSOPHY OF THE SCHOOL**

The UCLA School of Nursing is guided by a philosophy that embodies the mission and goals of the University of California. The philosophy addresses nursing, the clients of nursing, and nursing students. The school is committed to an interdisciplinary learning environment.

Nursing encompasses clinical practice, education, research, consultation, leadership, management, and service to the profession and the local and global community. It involves individuals, families, groups, organizations, and communities as clients. The profession must consider the human and physical environments that interact with these clients who may have health conditions that range from wellness to illness. Nursing activities must therefore include health promotion and maintenance, intervention and treatment, rehabilitation and restoration, and palliation. At an advanced practice level, nursing involves comprehensive healthcare that encompasses the responsibility and accountability for continuity of care across the health/illness spectrum.

Nursing research is both applied and basic and has as its core actual or potential human responses to illness and as its goal the development of nursing science.
The University of California has two requirements that must be satisfied for the award of the degree: unit, scholarship, academic residence, writing, quantitative reasoning, and general education.

UNIT REQUIREMENT

Students must complete with a passing grade a minimum of 180 units. At least 83 of the 180 units must be upper division courses numbered 100 through 199. A maximum of 216 units is permitted. Students with advanced placement or international baccalaureate credit may exceed the unit maximum by the amount of that credit.

SCHOLARSHIP REQUIREMENT

A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A 2.0 (C) average is also required in all upper division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements. Each required nursing course in the school must be completed with a grade of C or better (C– grade is not acceptable). Elective courses may be taken on a Passed/Not Passed basis with prior approval, according to the policy listed in the Academic Policies section of this catalog.

ACADEMIC RESIDENCE REQUIREMENT

Students are in residence while enrolled and attending classes at UCLA as a major in the School of Nursing and must complete 77 of the last 97 nursing course units in residence.

WRITING REQUIREMENT

Students must complete the University’s Entry-Level Writing or English as a Second Language (ESL) requirement prior to completing the school writing requirement.

Students admitted to the school are required to complete a two-term writing requirement—Writing I and Writing II. Two courses in English composition are required for graduation. Both courses must be taken for letter grades, and students must receive grades of C or better (C– grades are not acceptable).

Writing I. The Writing I requirement must be satisfied within the first three terms of enrollment by completing English Composition 3 or an equivalent course with a grade of C or better (C– or a Passed grade is not acceptable).

The Writing I requirement may also be satisfied by scoring 4 or 5 on one of the College Board Advanced Placement Examinations in English or a combination of a score of 720 or higher on the SAT Reasoning Test Writing Section and superior performance on the English Composition 3 Proficiency Examination. Students whose native language is not English may satisfy the Writing I requirement by completing English as a Second Language 36 or an equivalent course with a grade of C or better (C– or a Passed grade is not acceptable). Admission into the course is determined by completion of English as a Second Language 35 with a passing grade or proficiency demonstrated on
the English as a Second Language Placement Examination (ESLPE). Qualifying examination scores and courses are determined by the school Faculty Executive Committee. Approved courses are published in the UCLA Schedule of Classes.

**Writing II.** The Writing II requirement must be satisfied within seven terms of enrollment by completing one course from a faculty-approved list of courses published in the Schedule of Classes at http://www.registrar.ucla.edu/soc/writing.htm and available in the Student Affairs Office. The course (Nursing 152W) must be completed with a grade of C or better (C– or a Passed grade is not acceptable).

If approved for general education (GE) credit, applicable courses may also fulfill a GE requirement. Transfer students with 90 or more units who have completed the Intersegmental General Education Transfer Curriculum (IGETC) will have satisfied the Writing I and Writing II requirements. No transfer student is admitted to the school without completing, with a grade of C or better (C– grade is not acceptable), a college-level writing course that Undergraduate Admission accepts as equivalent to English Composition 3.

### QUANTITATIVE REASONING REQUIREMENT

Students must demonstrate basic skills in quantitative reasoning. The requirement may be satisfied by completing one approved UCLA course (see list below) or an equivalent course within the first seven terms of enrollment. The course must be taken for a letter grade, and students must receive a grade of C or better (C– grade is not acceptable).

The requirement may also be satisfied by achieving an SAT Reasoning Test Mathematics Section score of 600 or higher or an SAT Subject Test in Mathematics score of 550 or higher. Approved UCLA courses and examinations, and qualifying scores, are determined by the school Student Affairs Committee. Approved courses are listed below.

If approved for general education (GE) credit, applicable courses may also fulfill a GE requirement. Transfer students with 90 or more units who have completed the Intersegmental General Education Transfer Curriculum (IGETC) will have satisfied the quantitative reasoning requirement. No transfer student is admitted to the school without completing, with a grade of C or better (C– grade is not acceptable), a college-level quantitative reasoning course that Undergraduate Admission accepts as equivalent to those approved by the Faculty Executive Committee.

Approved courses include Biostatistics 100A, 100B, Life Sciences 30A, Mathematics 2 (or any higher numbered course except 19, 71SL, 72SL, 89, 89HC, 98XA, 98XB, 99, 103A, 103B, 103C, 105A, 105B, 105C, 189, 189HC, 195, 197, 199), Philosophy 31, Political Science 6, 6R, Program in Computing 10A, 10B, 10C, Statistics 10, 12, 13, and former courses 11 and 14.

### GENERAL EDUCATION REQUIREMENTS

General education (GE) is more than a checklist of required courses. It is a program of study that (1) reveals to students the ways that research scholars in the arts, humanities, social sciences, and natural sciences create and evaluate new knowledge, (2) introduces students to the important ideas and themes of human cultures, (3) fosters appreciation for the many perspectives and the diverse voices that may be heard in a democratic society, and (4) develops the intellectual skills that give students the dexterity they need to function in a rapidly changing world.

This entails the ability to make critical and logical assessments of information, both traditional and digital; deliver reasoned and persuasive arguments; and identify, acquire, and use the knowledge necessary to solve problems.

#### FOUNDATIONS OF KNOWLEDGE

General education courses are grouped into three foundational areas: Foundations of the Arts and Humanities, Foundations of Society and Culture, and Foundations of Scientific Inquiry.

Ten courses (48 units minimum) are required. A course taken to meet the Writing II requirement may also be applied toward a GE requirement. Preparation for the major courses may overlap with the foundation courses.

Students must meet with the prelicensure student support coordinator in the Student Affairs Office to determine the applicability of GE Cluster courses toward Writing II or GE requirements.

Courses listed in more than one category can fulfill GE requirements in only one of the cross-listed categories.

#### Foundations of the Arts and Humanities. Three 5-unit courses, one from each subgroup:

Courses that do not satisfy specific University, school, or department requirements are referred to as electives and can be used to meet the minimum unit requirement for graduation.
The School of Nursing sets two types of requirements prior to transfer. The courses introduce students to the historical development and fundamental intellectual and ethical issues associated with the arts and humanities and may also investigate the complex relations between artistic and humanistic expression and other facets of society and culture.

**Foundations of Society and Culture.** Three 5-unit courses, one from each subgroup and a third course from either subgroup:

- **Historical Analysis**
- **Social Analysis**

The aim of courses in this area is to introduce students to the ways in which humans organize, structure, rationalize, and govern their diverse societies and cultures over time. The courses focus on a particular historical question, societal problem, or topic of political and economic concern in an effort to demonstrate how issues are objectified for study, how data is collected and analyzed, and how new understandings of social phenomena are achieved and evaluated. Because communication skills are essential in the nursing profession, Communication Studies 10 is recommended for this foundational area.

**Foundations of Scientific Inquiry.** Four courses, two from each subgroup:

- **Life Sciences**
- **Physical Sciences**

The aim of courses in this area is to ensure that students gain a fundamental understanding of how scientists formulate and answer questions about the operation of both the physical and biological world. The courses also deal with some of the most important issues, developments, and methodologies in contemporary science.

**Foundations Course Lists.** Creating and maintaining a general education curriculum is a dynamic process; consequently, courses are frequently added to the list. For the most current list of approved courses that satisfy the Foundations of Knowledge GE plan, consult an academic counselor or see http://www.registrar.ucla.edu/ge/.

### Intersegmental General Education Transfer Curriculum

Transfer students from California community colleges must fulfill UCLA lower division GE requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses that have been agreed on by the University of California and the California community colleges. Because of course sequencing and the rigor of the program, students must fulfill the general education requirements prior to transfer.

Additional requirements are listed under Admission and Preparation for the Major in the Curricula and Courses section in this catalog.

### MAJOR REQUIREMENTS

The School of Nursing sets two types of requirements that must be satisfied for the award of the degree: (1) Preparation for the Major and (2) the Major. See the Curricula and Courses section of this catalog for details.

### POLICIES AND REGULATIONS

Degree requirements are subject to policies and regulations, including the following:

### STUDENT RESPONSIBILITY

Students should take advantage of academic support resources, but they are ultimately responsible for keeping informed of and complying with the rules, regulations, and policies affecting their academic standing.

### STUDY LIST

The presentation of Study Lists by the students and their acceptance by the school evidences an obligation on the part of the students to faithfully perform the designated work to the best of their ability. Withdrawal from, or neglect of, any course entered on the Study List, or a change in program without the formal permission of the assistant dean of Student Affairs renders students liable to enforced withdrawal from the University or other appropriate disciplinary action.

Students are expected to follow the course sequence specified for their program. After the first term, they may petition to carry a program of study exceeding 20 units provided they have an overall grade-point average of 3.0 (B or better) and have attained at least a B average in the preceding term with all courses passed.

### MINIMUM PROGRESS

Students are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; they are placed on probation if they fail to pass these units. They are subject to dismissal if they fail to

One of the 10 courses may be a GE-approved Writing II course in an appropriate foundational area selected from a list published in the Schedule of Classes and available in the Student Affairs Office.

Preparation for the major courses may overlap with GE foundation courses.
pass at least 32 units in three consecutive regular terms in residence.

CONCURRENT ENROLLMENT
Enrollment at a non-UC institution or UCLA Extension while enrolled at UCLA is not permitted except in extraordinary circumstances. No credit is given for courses taken concurrently elsewhere without the approval of the school.

CREDIT LIMITATIONS
The following credit limitations apply to all undergraduate students enrolled in the school:

Advanced Placement Examinations. Credit earned through the College Board Advanced Placement (AP) Examinations may not be applied toward the general education requirements. Portions of AP Examination credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If students take the equivalent UCLA course, unit credit for such duplication is deducted before graduation. See the AP Chart at http://www.admission.ucla.edu/prospect/APCreditNS.htm for UCLA course equivalents and credit allowed for GE requirements.

COUNSELING SERVICES
The School of Nursing gives direction and provides information to interested potential applicants to the B.S. program through admissions information sessions. The schedule for these sessions, program information, and applications are available at http://nursing.ucla.edu. Applicants may write to the UCLA School of Nursing, Student Affairs Office, 2-137 Factor Building, Box 951702, Los Angeles, CA 90095-1702, call (310) 825-7181, or contact the Student Affairs Office by e-mail at sonsaff@sonnet.ucla.edu.

On entry, students are assigned a faculty adviser to aid in planning their total program. Advisers and student affairs officers continue meeting with students each term to evaluate progress, to identify academic and personal needs and match them with available school and University resources, to confirm University and course requirements, and to maximize the students’ abilities to reach educational and professional goals. Due to the heavy course load that the school's program expects, students are advised against working full time.

HONORS
School of Nursing undergraduate students who achieve scholastic distinction may qualify for the following honors:

DEAN’S HONORS
To receive Dean’s Honors in the School of Nursing, undergraduate students must have at least 12 graded units per term with a grade-point average of 3.75. The honor is posted on the transcript for the appropriate term. Students are not eligible for Dean’s Honors in any given term if they receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

LATIN HONORS
Latin Honors are awarded at graduation to undergraduate students with superior grade-point averages. The levels of honors and the requirements for each level are: summa cum laude, an overall average of 3.897; magna cum laude, 3.821; cum laude, 3.698. To be eligible students must have completed at least 98 University of California units for a letter grade. The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in the graduating year determine student eligibility. See the Schedule of Classes for the most current calculations of Latin honors.

GRADUATE STUDY
The Master of Science in Nursing (M.S.N.) degree program offers prelicensure and postlicensure options. The master’s entry clinical nurse (MECN)/prelicensure program is designed for students with a bachelor's degree in another discipline who wish to become registered nurses. The advanced practice nurse (APN)/postlicensure program is for registered nurses with a bachelor's degree in nursing who wish to prepare for an advanced practice role, such as nurse practitioner, clinical nurse specialist, or nurse administrator. Advanced practice populations include adult/gerontology acute care (with oncology specialization option), adult/gerontology primary care (with coursework specific to occupational and environmental health and gerontology available), family, and pediatrics.

The Ph.D. program, which includes an en route M.S. option, prepares scholars who do original research, generate new theories, and build the scientific basis for professional nursing practice. Research is both basic and applied.

ADMISSION
Detailed information about the graduate academic programs offered by the School of Nursing is included in the Program Requirements for UCLA Graduate Degrees at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.

For information on the proficiency in English requirements for international graduate students, see Graduate Admission in the Graduate Study section of this catalog.

DEGREE REQUIREMENTS
For complete degree requirements, see Program Requirements for UCLA Graduate Degrees at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.

SCHOOL OF THEATER, FILM, AND TELEVISION
Teri E. Schwartz, Dean
UCLA
102 East Melnitz Building
Box 951622
Los Angeles, CA 90095-1622
(310) 825-5761
fax: (310) 825-3383
e-mail: info@tft.ucla.edu
http://www.tft.ucla.edu
The School of Theater, Film, and Television consists of the Department of Theater and the Department of Film, Television, and Digital Media, recognized national centers for higher education in production and performance as well as history, theory, and criticism.

Whether exploring the ancient and sacred roots of theater or the latest secular rituals enacted by popular film, creating a dramatic character for the bare stage or a dramatic narrative on screen, writing scripts or scholarly articles, or making digital movies or designing websites, all students in the school study both the aesthetics and cultural significance of theater, film, and television.

Through an intensive, multidiscipline curriculum, the school defines the inherent differences of theater, film, television, and new media, affirms their similarities, and encourages their interaction. As expressive art forms, modes of communication, and cultural interventions, theater, film and television, and digital media have in common the ability and power to reflect and shape our perception of a complex, diverse, and ever-changing world. We believe—as artists and scholars—that we have an obligation to reflect on this power and to use it responsibly.

Situated in the diverse and culturally rich environment of Los Angeles and drawing on the many resources of the campus at large, including the Center for Art of Performance at UCLA, Geffen Playhouse, and UCLA Film and Television Archive, the school provides the ideal setting for students to engage in the study and practice of art forms essential to a healthy and dynamic society.

DEPARTMENTS AND PROGRAMS

The Department of Theater and the Department of Film, Television, and Digital Media are essential components of the rich intellectual, cultural, and professional life of UCLA. Depending on the degree involved, the school’s programs are either strongly professional in nature or oriented toward advanced scholarly study and research in an atmosphere that recognizes and often draws on studio practice.

Students in undergraduate courses receive a broadly based, liberal education within the context of either theater or film and television.

The Master of Fine Arts degree programs prepare talented and highly motivated students for careers in the worlds of theater, film, television, and digital production. The M.A. and Ph.D. programs engage students in the critical study and research of these media, including their history, aesthetics, and theory, and prepare students for advanced research within the context of college and university teaching, as well as for writing and research in a variety of media-related professions.

In the Department of Theater, approximately 300 undergraduate and 100 graduate students interact with over 40 faculty members, outstanding guests of national and international standing, and a professional staff of 35 in an exciting artistic community of theater production and study. The theater and performance studies program offers C.Phil. and Ph.D. degrees for the advanced scholarly study of theater and performance. Resources include the four theaters of the Macgowan Hall complex, with the latest technologies needed for the creation, control, and integration of scenery, lighting, and sound. Specializations in the Master of Fine Arts program include acting, design, directing, and playwriting.

The Department of Film, Television, and Digital Media includes both production and critical studies programs, with approximately 330 graduate and 75 undergraduate students. The 50 faculty members include leading scholars as well as members of the Los Angeles and international film and television professional communities. In production, graduate specializations are offered in the areas of film and television production, screenwriting, animation, and the producers program. The cinema and media studies program offers M.A. and Ph.D. degrees for the advanced scholarly study of film and television. The department’s resources in Melnitz Hall include three sound stages, three television studios, extensive editing, scoring, and viewing facilities, a complete animation laboratory for both traditional and computer-generated animation, and a laboratory and research facility for digital media.

The M.A. and Ph.D. programs are supported by the collections of the University’s libraries and the UCLA Film and Television Archive, the largest in the U.S. outside the Library of Congress. This archive forms a unique and priceless resource for research and classroom instruction. M.A. and Ph.D. faculty members and students also participate in various campus organized research units.

Students interested in obtaining instructional credentials for California elementary and secondary schools should consult the Department of Education, 1009 Moore Hall, (310) 825-8328.

DEGREES

The school offers the following degrees, in addition to undergraduate minors in Film, Television, and Digital Media and in Theater:

Film and Television (B.A., M.A., M.F.A., C.Phil., Ph.D.)

Individual Field (B.A.)

Moving Image Archive Studies (M.A.)

Theater (B.A., M.A., M.F.A.)

Theater and Performance Studies (C.Phil., Ph.D.)

UNDERGRADUATE ADMISSION

In addition to the University of California undergraduate application, departments in the School of Theater, Film, and Television require applicants to submit additional supporting materials. Information on departmental requirements is available at http://www.tft.ucla.edu. The annual deadline date for applications is November 30 for admission in the following Fall Quarter.
UNDERGRADUATE DEGREE REQUIREMENTS

School of Theater, Film, and Television students must meet three types of requirements for the Bachelor of Arts degree:

1. University requirements
2. School requirements
3. Department requirements

UNIVERSITY REQUIREMENTS

The University of California has two requirements that undergraduate students must satisfy in order to graduate: (1) Entry-Level Writing or English as a Second Language and (2) American History and Institutions. See Degree Requirements in the Undergraduate Study section for details.

School of Theater, Film, and Television students enrolled in English as a Second Language 33A, 33B, 33C must take each course for a letter grade.

SCHOOL REQUIREMENTS

The School of Theater, Film, and Television has seven requirements that must be satisfied for the award of the degree: unit, scholarship, academic residence, writing, foreign language, literature, and general education.

UNIT REQUIREMENT

Students must complete for credit, with a passing grade, no less than 180 units and no more than 216 units, of which at least 64 units must be upper division courses (numbered 100 through 199). No more than 8 units of freshman seminars and/or 8 units of 300-level courses may be applied toward the degree. Credit for upper division tutorials numbered 195 through 199 is limited to a maximum of 8 units in a single term and a maximum of 32 units total for a letter grade.

SCHOLARSHIP REQUIREMENT

A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A 2.0 (C) average is also required in all upper division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements.

ACADEMIC RESIDENCE REQUIREMENT

Students are in residence while enrolled and attending classes at UCLA as a major in the School of Theater, Film, and Television. Of the last 45 units completed for the bachelor's degree, 35 must be earned in residence in the School of Theater, Film, and Television. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

WRITING REQUIREMENT

Students must complete the University's Entry-Level Writing or English as a Second Language (ESL) requirement prior to completing the school writing requirement.

Students admitted to the school are required to complete a two-term writing requirement—Writing I and Writing II. Two courses in English composition are required for graduation. Both courses must be taken for letter grades, and students must receive grades of C or better (C– grades are not acceptable).

Writing I. The Writing I requirement must be satisfied within the first three terms of enrollment by completing English Composition 3 with a grade of C or better (C– or a Passed grade is not acceptable).

The Writing I requirement may also be satisfied by scoring 4 or 5 on one of the College Board Advanced Placement Examinations in English or a combination of a score of 720 or higher on the SAT Reasoning Test Writing Section and superior performance on the English Composition 3 Proficiency Examination.

Students whose native language is not English may satisfy the Writing I requirement by completing English as a Second Language 36 with a grade of C or better (C– or a Passed grade is not acceptable). Admission into the course is determined by completion of English as a Second Language 35 with a passing grade or proficiency demonstrated on the English as a Second Language Placement Examination (ESLPE).

Writing II. The Writing II requirement must be satisfied within the first six terms of enrollment by completing one course from a faculty-approved list of Writing II courses published in the Schedule of Classes at http://www.registrar.ucla.edu/soc/writing.htm and available in the Student Services Office. The course must be completed with a grade of C or better (C– or a Passed grade is not acceptable).

A Writing II course used to meet this requirement may not be applied toward a foundational area under general education or toward the literature requirement.

School of Theater, Film, and Television Structure of a Degree

University Requirements
1. Entry-Level Writing or English as a Second Language
2. American History and Institutions

School Requirements
1. Unit
2. Scholarship
3. Academic Residence
4. Writing Requirement
   Writing I
   Writing II
5. Foreign Language
6. Literature
7. General Education
   Foundations of Arts and Humanities
   Foundations of Society and Culture
   Foundations of Scientific Inquiry

Department Requirements
1. Preparation for the Major
2. The Major

Courses that do not satisfy specific University, school, or department requirements are referred to as electives and can be used to meet the minimum unit requirement for graduation.
Transfer students with 90 or more units who have completed the Intersegmental General Education Transfer Curriculum (IGETC) will have satisfied the Writing I and Writing II requirements.

**FOREIGN LANGUAGE REQUIREMENT**

Students may meet the foreign language requirement by (1) scoring 3, 4, or 5 on the College Board Advanced Placement (AP) foreign language examination in Chinese, French, German, Italian, Japanese, or Spanish, or scoring 4 or 5 on the AP foreign language examination in Latin, (2) presenting a UCLA foreign language proficiency examination score indicating competency through level three, or (3) completing one college-level foreign language course equivalent to level three or above at UCLA with a grade of Passed or C or better.

For transfer students from California community colleges, completion of the Intersegmental General Education Transfer Curriculum (IGETC) does not fulfill the school foreign language requirement. Students need to complete level three or above of a foreign language course at the community college with a grade of Passed or C or better to complete the requirement.

International students may petition to use an advanced course in their native language for this requirement. Students whose entire secondary education has been completed in a language other than English may petition to be exempt from the foreign language requirement.

**LITERATURE REQUIREMENT**

Three courses (12 units minimum) in literature are required, at least one of which must be upper division. A school-approved literature course taken in the original language can fulfill this requirement. A list of courses that satisfy the requirement is available in the Student Services Office. A course taken to meet the Writing II requirement may not also be applied toward the literature requirement.

**GENERAL EDUCATION REQUIREMENTS**

General education (GE) is more than a checklist of required courses. It is a program of study that (1) reveals to students the ways that research scholars in the arts, humanities, social sciences, and natural sciences create and evaluate new knowledge, (2) introduces students to the important ideas and themes of human cultures, (3) fosters appreciation for the many perspectives and the diverse voices that may be heard in a democratic society, and (4) develops the intellectual skills necessary to comprehend, to the ways in which humans organize, structure, and govern their diverse societies and cultures over time. The courses focus on a particular historical question, societal problem, or topic of political and economic concern in an effort to demonstrate how issues are objectified for study, how data is collected and analyzed, and how new understandings of social phenomena are achieved and evaluated.

**Foundations of Knowledge**

General education courses are grouped into three foundational areas: Foundations of the Arts and Humanities, Foundations of Society and Culture, and Foundations of Scientific Inquiry.

Ten courses (48 units minimum) are required. A course taken to meet the Writing II requirement may not also be applied toward a GE requirement.

Courses listed in more than one category can fulfill GE requirements in only one of the cross-listed categories. GE courses may not be applied toward major requirements.

**Foundations of the Arts and Humanities.** Five 5-unit courses, with no more than two from any one subgroup:

- Literary and Cultural Analysis
- Philosophical and Linguistic Analysis
- Visual and Performance Arts Analysis and Practice

The aim of courses in this area is to provide perspectives and intellectual skills necessary to comprehend and think critically about our situation in the world as human beings. In particular, the courses provide the basic means to appreciate and evaluate the ongoing efforts of humans to explain, translate, and transform their diverse experiences of the world through such media as language, literature, philosophical systems, images, sounds, and performances. The courses introduce students to the historical development and fundamental intellectual and ethical issues associated with the arts and humanities and may also investigate the complex relations between artistic and humanistic expression and other facets of society and culture.

**Foundations of Society and Culture.** Three 5-unit courses, one from each subgroup and a third course from either subgroup:

- Historical Analysis
- Social Analysis

The aim of courses in this area is to introduce students to the ways in which humans organize, structure, rationalize, and govern their diverse societies and cultures over time. The courses focus on a particular historical question, societal problem, or topic of political and economic concern in an effort to demonstrate how issues are objectified for study, how data is collected and analyzed, and how new understandings of social phenomena are achieved and evaluated.

**Foundations of Scientific Inquiry.** Two courses (8 units minimum), one from each subgroup:

- Life Sciences
- Physical Sciences

The aim of courses in this area is to ensure that students gain a fundamental understanding of how scientists formulate and answer questions about the operation of both the physical and biological world. The courses also deal with some of the most important issues, developments, and methodologies in contemporary science, addressing such topics as the origin of the universe, environmental degradation, and the decoding of the human genome. Through lectures, laboratory experiences, writing, and extensive discussions, students consider the important roles played by the laws of physics and chemistry in society, biology, Earth and environmental sciences, and astrophysics and cosmology.

**Foundations Course Lists.** Creating and maintaining a general education curriculum is a dynamic process; consequently, courses are frequently added to the list. For the most current list of approved courses that satisfy the Foundations of Knowledge GE plan, consult an academic counselor or see [http://www.registrar.ucla.edu/ge/](http://www.registrar.ucla.edu/ge/).
Transfer students from California community colleges may also be admitted to the School of Theater, Film, and Television, but they must complete the IGETC (Intersegmental General Education Transfer Curriculum) and the departments' specific major requirements before enrolling at UCLA. Otherwise, they must fulfill UCLA lower division GE requirements. Students should be sent to Director of Student Services, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Box 951622, Los Angeles, CA 90095-1622.

**Intersegmental General Education Transfer Curriculum**

Transfer students from California community colleges have the option to fulfill UCLA lower division GE requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. Although GE or transfer core courses are degree requirements rather than admission requirements, students are advised to fulfill them prior to transfer. The IGETC significantly eases the transfer process, as all UCLA GE requirements are fulfilled when students complete the IGETC courses. Students who select the IGETC must complete it entirely before enrolling at UCLA. Otherwise, they must fulfill the School of Theater, Film, and Television GE requirements.

**DEPARTMENT REQUIREMENTS**

School of Theater, Film, and Television departments generally set two types of requirements that must be satisfied for the award of the degree: (1) Preparation for the Major (lower division courses) and (2) the Major (upper division courses). Preparation for the Major courses should be completed before beginning upper division work.

**PREPARATION FOR THE MAJOR**

A major requires completion of a set of courses known as Preparation for the Major, which should be completed before upper division work is undertaken. Each department sets its own Preparation for the Major requirements; see the Curricula and Courses section of this catalog.

**THE MAJOR**

A major is composed of no less than 56 units, including at least 36 units of upper division courses.

Students must complete their major with a scholarship average of at least 2.0 (C) in all courses in order to remain in the major. Each course in the school must be taken for a letter grade.

As changes in major requirements occur, students are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the department adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of Theater, Film, and Television may require a general final examination.

**Double Majors.** Double majors in the School of Theater, Film, and Television and other academic units are not permitted.

**POLICIES AND REGULATIONS**

Degree requirements are subject to policies and regulations, including the following:

**STUDENT RESPONSIBILITY**

Students should take advantage of academic support resources, but they are ultimately responsible for keeping informed of and complying with the rules, regulations, and policies affecting their academic standing.

**STUDY LIST**

The Study List is a record of classes that a student is taking for a particular term. Each term the student Study List must include from 12 to 19 units. The school has no provision for part-time enrollment. After the first term, students may petition to carry more than 19 units (up to 22 units maximum) if they have an overall grade-point average of 3.0 (B) or better and have attained at least a B average in the preceding term with all courses passed. The petitions must be filed and approved by the Student Services Office no later than the end of the third week of instruction.

**MINIMUM PROGRESS**

Students are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; they are placed on probation if they fail to pass these units. They are subject to dismissal if they fail to pass at least 32 units in three consecutive regular terms in residence.

**CHANGING A MAJOR**

Students in good academic standing who wish to change their major may petition to do so provided they can complete the new major within the 216-unit limit. Petitions must be submitted to and approved by the department or committee in charge of the new
major. Admission to certain majors may be closed or restricted; changes are normally not permitted if students are on probation or have begun their last term. Due to curriculum changes, students in the Theater major are no longer allowed to change their major to Film and Television at the end of their sophomore year.

**Concurrent Enrollment**

Enrollment at another institution or UCLA Extension while enrolled at UCLA is not permitted except in extraordinary circumstances. No credit is given for courses taken concurrently elsewhere without the approval of the school.

**Credit Limitations**

The following credit limitations apply to all undergraduate students enrolled in the school:

Advanced Placement Examinations. Credit earned through the College Board Advanced Placement (AP) Examinations may be applied toward the school and general education requirements. If students take the equivalent UCLA course, unit credit for such duplication is deducted before graduation. See the AP Chart at http://www.admission.ucla.edu/prospect/APCreditTF.htm for UCLA course equivalents and credit allowed for GE requirements.

Graduate Courses. Undergraduate students who wish to take graduate courses (200 level) for credit toward the bachelor’s degree must petition for advance approval of the department chair and the dean of the school and must meet the specific qualifications. Courses numbered in the 400 and 500 series are not open for credit to undergraduate students.

UCLA Extension. Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

**Counseling Services**

The School of Theater, Film, and Television offers advising, program planning in the major and general education requirements, and individual meetings with departmental counselors, including a yearly degree check. Prior to registration and enrollment in classes, each new student is assigned to a counselor in the major department. For further counseling information, contact the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building, (310) 206-8441.

**Honors**

School of Theater, Film, and Television undergraduate students who achieve scholastic distinction may qualify for the following honors and programs:

**Dean’s Honors**

Dean’s Honors are awarded each term to students who complete their program of study with distinction according to criteria established by the dean of the school.

**Latin Honors**

Latin Honors are awarded at graduation to students with superior grade-point averages. To be eligible, students must have completed 90 or more units for a letter grade at the University of California. The levels of honors and the requirements for each level are summa cum laude, an overall average of 3.90; magna cum laude, 3.87; cum laude, 3.745. The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in the graduating year determine student eligibility. See the Schedule of Classes for the most current calculations of Latin honors.

**Graduate Study**

The advanced degree programs offered in the School of Theater, Film, and Television provide graduate students with unique research opportunities when combined with special resources, such as the Young Research Library, UCLA Film and Television Archive, Geffen Playhouse, special collections of the Arts Library, and the University’s exhibition and performance halls.

A program in teaching is offered by the Graduate School of Education and Information Studies in each of the areas. Fellowships, grants, and assistantships are available through the dean of the Graduate Division. Donor awards are available through the School of Theater, Film, and Television.

**Admission**

In addition to requiring that applicants hold a bachelor’s degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. Detailed information can be found in Program Requirements for UCLA Graduate Degrees at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.

For information on the proficiency in English requirements for international graduate students, see Graduate Admission in the Graduate Study section of this catalog.

**Degree Requirements**

Requirements to fulfill each degree objective vary according to the degree and the department. For complete degree requirements, see Program Requirements for UCLA Graduate Degrees at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.
Curricula and Courses

COURSE LISTINGS

Departments and programs are listed alphabetically, with the College or school administering the program identified in the program heading. Curricula and courses are listed under each program. Every effort has been made to ensure the accuracy of the information presented. However, all courses, course descriptions, instructor designations, and curricular degree requirements described herein are subject to change or deletion without notice. Changes to course descriptions and undergraduate programs are posted online on the catalog updates pages at http://www.registrar.ucla.edu/catalog/updates/. For the most current course offerings by term, see the Schedule of Classes at http://www.registrar.ucla.edu/schedule/.

For a complete outline of graduate degree requirements, see Program Requirements for UCLA Graduate Degrees available on the Graduate Division website at http://grad.ucla.edu/gasaa/library/pgmrqintro.htm.

Undergraduate Course Numbering

Undergraduate courses are classified as lower division and upper division. Lower division courses (numbered 1-99) are often surveys offering preliminary introductions to the subject field. They are designed primarily for freshmen and sophomores, though upper division students may enroll for unit and grade credit. Lower division courses may not be applied toward graduate degrees.

Upper division courses (numbered 100-199) are open to all students who have met the requirements indicated in departmental requirements or the course description. Preparation generally includes at least one lower division course in the subject or two years of college work. With approval of the major department, graduate students may take 100-series courses toward satisfaction of master’s degree requirements.

Undergraduate Seminars and Tutorials

Fiat Lux freshman seminars (numbered 19) are taught by faculty in areas of their expertise. They introduce freshmen to topics of intellectual importance and enable them to participate in critical discussion of these topics with a small group of peers. The seminar series takes its name from the motto of the University of California: Fiat Lux—Let There be Light!

Sophomore seminars (numbered 88) are departmentally sponsored courses designed to provide sophomores the opportunity to participate in small seminars to enhance writing, verbal, and analytical skills.

Honors seminars and tutorials (numbered 89/189 and 89HC/189HC) are primarily designed for students in the College Honors Program. They are adjunct to lecture courses and explore lecture topics in more depth through supplemental readings, papers, or other activities.

Student Research Program tutorials (numbered 99) offer students entry-level research experiences. Students serve as apprentices working with an individual faculty member or in a research group. Students are graded P/NP based on the number of hours they participate in research.

Upper division seminars (numbered 190-194) are small seminars with between 15 and 20 students that focus on research practice or issues. Many are designed to be taken along with a tutorial course in the 195-199 series.

Upper division tutorials (numbered 195-199) offer advanced opportunities for research through faculty-supervised internships and apprenticeships as well as honors research, directed research, and senior projects. Courses are structured by the instructor and student at the time they are initiated and are open to juniors (with a minimum 3.0 grade-point average in the major field), seniors, and graduate students. To enroll, students submit a contract (available online through MyUCLA) and have it approved by both the instructor and department chair.

Note: Courses numbered 19, 89, 89HC, 99, 189, and 189HC are not listed in the print catalog. For current course descriptions, see http://www.registrar.ucla.edu/schedule/catsel.aspx.

Graduate Course Numbering

Graduate courses numbered 200-299 are generally open only to graduate students who have completed basic undergraduate courses in the subject. Courses and seminars in the 200 series can fulfill the minimum graduate course requirement for any advanced degree.

With departmental and instructor consent, and subject to requirements in the appropriate College or school, undergraduate students may enroll in 200-series courses for unit credit toward the bachelor's degree. If students take a graduate course as an undergraduate, they may not apply that same course later toward a higher degree.

Graduate courses numbered 300-399 are highly specialized teacher-training courses that are not applicable toward University minimum requirements for graduate degrees. They are acceptable toward the bachelor's degree only at the discretion of the individual College or school.

Graduate courses numbered 400-499 are designed for professional programs leading to graduate degrees other than the M.A., M.S., and Ph.D. These courses may not be used to satisfy minimum graduate course requirements for the M.A. or M.S. degree but may apply as electives.

Individual study and research courses (numbered 500-599) are reserved for advanced study and are not open to undergraduate students. Courses are numbered as follows: 595/596, directed individual study or research; 597, preparation for master's comprehensive or doctoral qualifying examination; 598, master’s thesis research and preparation; and 599, doctoral dissertation research and preparation. Courses numbered 501 are not individual study and research but are cooperative programs held in conjunction with USC. See individual departmental listings for specific limitations on 500-series courses.

Note: These definitions do not apply to the School of Law, which maintains its own course numbering system.

Temporary Course Offerings

Courses that are temporary in nature, such as one-term-only or one-year-only are not listed in the catalog. Their descriptions can be found in the online Schedule of Classes.

Concurrent and Multiple Listings

Concurrently scheduled courses (identified by a capital C before the course number) are pairs of courses, usually within a single department or program, for which credit is given at two levels—undergraduate and graduate. Concurrently scheduled courses are offered at the same time and place with the same instructor, but work levels and performance standards are evaluated differently for students at each level. (Concurrently scheduled courses as described here should not be confused with concurrent courses offered through UCLA Extension.)

Multiple-listed courses (identified by a capital M before the course number) are courses offered jointly by more than one department. They need not have identical course numbers, but all other aspects of the course must be the same, such as title, units, requisites, format, and level. For example, Language in Culture is offered by the Department of Anthropology (Anthropology M140) and the Department of Linguistics (Linguistics M146). The course is listed under both departments.

UCLA Extension Courses

In general, students may not attend UCLA Extension for degree credit if they are enrolled in UCLA regular session at the same time. However, certain Extension courses (numbered 1-199), prefixed by XL or XLC in the Extension course listings, yield credit toward the bachelor's degree. Graduate students may petition to apply up to two XLC courses toward the master’s degree. For more details, see Concurrent Enrollment in the Academic Policies section of this catalog.
African American Studies

Scope and Objectives

The Department of African American Studies offers a Bachelor of Arts degree, an undergraduate African American Studies minor, a Master of Arts degree, and a concurrent degree program (African American Studies M.A./Law J.D.). A major or minor in this field provides a broadening of cultural experiences and perspectives for those seeking more information about African Americans and the African diaspora. Career-wise, all students profit from African American studies courses in an era when employers and academic institutions are actively seeking those with multicultural and interdisciplinary skills and backgrounds.

The fundamental goal of the African American Studies curriculum is to provide students with a comprehensive and multidisciplinary introduction to the crucial sociocultural and social justice issues facing African Americans and their counterparts in other areas of the African diaspora today. The curriculum is designed to meet this goal in two primary ways. First, it provides an interdisciplinary exposure to particular features of the African American experience. Core courses offer an in-depth understanding of historical, anthropological, sociological, psychological, economic, and political aspects of African America. The curriculum also provides opportunities to study the literary, musical, and artistic heritage of peoples of African descent. Second, students analyze key issues through additional courses that bring to bear concepts, theories, and methods of traditional academic disciplines in areas such as cultural analysis and production, social justice, and public policy. Students may also do individualized study with a professor and/or an internship for course credit.

Undergraduate Study

African American Studies B.A.

Preparation for the Major

Required: Two courses from African American Studies M5, 6, M10A.

Transfer Students

Transfer applicants to the African American Studies major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one African American Studies or civilizations of African course or equivalent.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Twelve upper division courses as follows: (1) two history and/or literature courses selected from African American Studies M104A through M104D, M105D, M158A through M158E, M179A, (2) two upper division breadth courses from any of the following departments or programs: African Languages, American Indian Studies, Asian American Studies, Chicana and Chicano Studies, or Gender Studies, and (3) a concentration of five courses in one of the following tracks and three courses in the other: (a) humanities—African American Studies M102, M103A, M103B, M103E, M104A through M104E, M107, M109, M10A, M110B, M111, CM112A through CM112F, M150D, M158A through M158E, M179A, 188A, 188B, C191, and (b) social sciences—African American Studies M114C, M114D, M114E, M118, M120, M144, M150D, M154C, M158A through M158E, M159P, M164, M165, M167, M172, M173, M178, M179A, M182A, M182B, M182C, M183A, M183B, M183C, 188A, 188B, C191, M194A, M194B.

No more than 8 graded units of African American Studies 195, 197, and 199 may be applied toward the major.

Students are encouraged to engage in a culminating activity, such as an internship, independent study, honors thesis, service learning course, Center for American Politics and Public Policy program, University of California Center Sacramento program, Education Abroad Program, or other African American studies-related project or performance course.

Honors Program

African American Studies majors with grade-point averages of 3.5 or better are eligible for the honors option that requires the completion of a senior thesis under the guidance of an African American Studies faculty member. Students must take African American Studies 198 (independent study course) with an approved professor who oversees the thesis requirement. For more information, contact the student affairs officer in the department.

African American Studies Minor

The African American Studies minor is designed for students who wish to augment their major program of study with courses from various disciplines germane to African American studies.

To enter the minor, students must be in good academic standing (2.0 grade-point average), have completed 45 units, and file a petition with the African American Studies student affairs officer.

Required Lower Division Courses (9 to 10 units): Two courses from African American Studies M5, 6, M10A.

Required Upper Division Courses (20 to 25 units): Five upper division African American studies courses.

No more than 4 graded units of African American Studies 195, 197, and 199 may be applied toward the minor. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer credit for any of the above is subject to program approval; consult the student affairs officer before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa /library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of African American Studies offers the Master of Arts (M.A.) degree in African American Studies. A concurrent degree program (African American Studies M.A./Law J.D.) is also offered.

African American Studies

Lower Division Courses

M5. Social Organization of Black Communities. (5). (Same as Sociology M5.) Lecture, four hours; discussion, one hour; field trips. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues. Letter grading.

6. Trends in Black Intellectual Thought. (5). Lecture, three hours; discussion, one hour. Overview of major intellectual trends that have shaped ways in
which African-American thinkers have interpreted experiences of blacks in U.S., drawing from such fields as history, philosophy, and literature. Letter grading.

M104. Topics in African American Literature and Culture. (5). (Same as English M104E) Lecture, four hours; discussion, one hour. Exploration of racial identities, intersectionality, and role of law. How have intersecting forms of oppression impacted black women’s historical lives? What are the implications of how black activists, artists, and in- formation about major features of American life and society, including visits to various key African American art institutions in Los Angeles. Concurrently scheduled with course CM212D. P/NP or letter grading.

M110E. African American Music in California. (4). (Same as Ethnomusicology CM112.) Lecture, four hours. Historical and analytical examination of African American music in California, including history, migration patterns, and urbanism to determine their impact on development of African American music in Cali- fornia. Concurrently scheduled with course CM212A. P/NP or letter grading.

CM112E. Imaging Black Popular Culture. (4). (Same as Art History CM112F) Lecture, three hours. Critical examination of media ranging from African American paintings and sculptures to MTV and advertising, with emphasis on relationship between black visual pro- duction and racism, Afrocenrtism, political resistance, and notions of blackness. Concurrently scheduled with courses CM212F, P/NP or letter grading.

M114C. African American Political Thought. (4). (Same as Labor and Workplace Studies M114C and Political Science M180A.) Lecture, three or four hours; discussion, one hour (when scheduled). Consideration of how black activists, artists, and intellectuals in various parts of the globe have worked to envision and enact real possibilities for sovereignty and liberation both at home and abroad. Letter grading.

M141. African American Women’s History. (4). (Same as Lesbian, Gay, Bisexual, and Transgender Studies M141L.) Lecture, four hours. Historical examination of black women’s experiences in U.S. from antebellum to present. How do historians uncover black women’s historical lives and what are the challenges to such discoveries? Examination of black women’s individual and collective production.

M104E. Topics in African American Literature and Culture. (5). (Same as English M104E) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Vari- able topics lecture course that provides opportunity to cover African American literature from wide range of theoretical and aesthetic perspectives. Topics may include African American auto- biography, 20th-century African American literature and film, black diaspora literature, postmodern Af- rican American fiction, Afro-Futurism, and African American satire. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M107. Cultural History of Rap. (5). (Same as Ethnomusi- cology M1119.) Lecture, four hours; discussion, one hour. Introduction to development of rap music and hip-hop culture, with emphasis on musical and verbal qualities, philosophical and political ideologies, gender representation, and influences on cinema and popular culture. Letter grading.

M109. Women in Jazz. (4). (Same as Ethnomusi- cology M109 and Gender Studies M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and related musical traditions from 1880s to present. Survey of roles of women instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

M110A-M110B. African American Musical Heritage. (5-5). (Same as Ethnomusicology M110A- M110B.) Lecture, four hours; discussion, one hour. P/NP or letter grading. M110A. Sociocultural history and survey of African American music covering Africa and its impact on Americas; music of 17th through 19th centuries; minstrelsy and its impact on representa- tion of blacks in film, television, and theater; reli- gious music, including hymns, spirituals, and gospa- l; music of Caribbean and Central and South America; and music of black Los Angeles. M110B. Sociocultural history and survey of African American music, including role in development and racism, Afrocentrism, political resistance, and notions of blackness. Concurrently scheduled with courses CM212F, P/NP or letter grading.

M111. Ellingtonia. (4). (Formerly numbered M114S.) (Same as Ethnomusicology M1111.) Lecture, three hours. Music of Duke Ellington, his life, and far- reaching influence of his efforts. Ellington’s music, known as Ellingtonia, is one of largest and perhaps most influential bodies of music ever produced in the U.S. Covers many contributions of other artists who worked with Ellington, such as composer Billy Stray- horn and musicians Johnson Hodges, Counttee Wil- liams, and Mercer Ellington. P/NP or letter grading.

M112A. African American Music in California. (4). (Same as Ethnomusicology CM112.) Lecture, four hours. Historical and analytical examination of African American music in California, including history, migration patterns, and urbanism to determine their impact on development of African American music in Cali- fornia. Concurrently scheduled with course CM212A. P/NP or letter grading.

M112B. African American Art. (4). (Same as Art History CM112D) Lecture, three hours. Detailed in- quiry into work of 20th-century African American art- ists whose works provide insightful and critical com- mentary about major features of African American life and society, including visits to various key African American art institutions in Los Angeles. Concurrently sched- uled with course CM212D. P/NP or letter grading.

M112E. African American Art. (4). (Same as Art History CM112E) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Intro- duction to survey of African American art from 1980s to present covering range of genres, with em- phasis on diversity of perspectives and styles that have emerged over past 30 years or so. Authors may include Toni Morrison, August Wilson, Octavia Butler, Anna Deavere Smith, June Jordan, Charles Johnson, and Rita Dove. P/NP or letter grading.

M120. Race, Inequality, and Public Policy. (4). (Same as Public Policy M120.) Lecture, three hours; discussion, one hour. Background in economics, so- ciology, or urban studies preferred but not required. Survey course to examine major debates and current controversies concerning public policy responses to social problems in urban America. Letter grading.

140. Radical Black Imaginaries: Politics, Identity, and Struggle. (4) Lecture and discussion. Consideration of some more powerful visions for freedom, liberation, and racial justice in African diasporic world, with focus on political struggles, intellectual movements, and creative expressions that have produced radical black imagination during last century. Following of black diasporic citizens from Accra to Harlem to Ha- vana as they struggled for freedom within and beyond movements against colonialism and racial oppres- sion, for Pan-Africanism, feminism, and Negritude, and through utopian art forms like Afro-Futurism. Consideration of how black activists, artists, and intellectuals in various parts of the globe have worked to envision and enact real possibilities for sovereignty and liberation both at home and abroad. Letter grading.

M141. African American Women’s History. (4). (Same as Lesbian, Gay, Bisexual, and Transgender Studies M141L.) Lecture, four hours. Historical examination of black women’s experiences in U.S. from antebellum to present. How do historians uncover black women’s historical lives and what are the challenges to such discoveries? Examination of black women’s individual and collective
struggles for freedom from racism, sexism, and heteropatriarchy, as well as black women’s participation in and challenge to social movements, including suffrage, workers’ rights, and black power. Investigation of black women’s intellectual history, including their cultural productions. Letter grading.

M142. Race, Gender, and Punishment. (4). (Same as Lesbian, Gay, Bisexual, and Transgender Studies M142.) Seminar, four hours. Interdisciplinary examination of historical and contemporary development of modem penal systems in U.S. with emphasis on impact of prison industrial complex on immigrants, including undocumented residents, homeless populations, women, African Americans, and transgender nonconforming and gay, bisexual, and transgender communities. Why does U.S. have largest prison population in world? What historical conditions and ideologies gave rise to this massive explosion in U.S. prisoner population? What policies have fueled mass imprisonment? Who is imprisoned? How have politicians used imprisonment as response to economic transformations and perceived social disorders? How is current crisis analogous to or distinct from regimes of racialized punishment in prior historical moments? Letter grading.

M144. Ethnic Politics: African American Politics. (4). (Same as Political Science M182.) Lecture, three or four hours (when scheduled). Preparation: one 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: Political Science M120. Lecture, discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of dynamics of minority group politics in U.S., touching on conditions facing racial and ethnic groups, with black Americans being primary case for analysis. Three specific objectives: (1) to provide descriptive information about social, political, and economic conditions of black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students’ analytical skills. P/NP or letter grading.

M150D. Recent African American Urban History: Funk Music and Politics of Black Popular Culture. (4). (Same as History M150D.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Exploration of musical genre known as funk that emerged in its popular form during late 1960s and reached popular high point in black culture, during 1970s. Funk, fusion of gospel, blues, jazz, rhythm and blues, soul, rock, and many other musical styles, offers students unique window into recent African American history. Letter grading.

M154C. Black Experience in Latin America and Caribbean I. (4). (Same as Political Science M184A.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Culture, history, politics, and identity of African Americans in Spanish and Lusophone Caribbean, South America, and Central America. Exploration of issues of identity in context of Afro/Latino migration to U.S. P/NP or letter grading.

M154D. Black Experience in Latin America and Caribbean II. (4). (Same as Political Science M184B.) Lecture, three or four hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Examination of slavery experiences in various New World slave societies, with emphasis on outlining similarities and differences among legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies. P/NP or letter grading.

M158B-M158C. Introduction to Afro-American History. (4-4). (Same as History M150B-M150C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Survey of Afro-American experience, with emphasis on three great transitions of Afro-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban milieu. P/NP or letter grading.

M158E. African American Nationalism in First Half of 20th Century. (4). (Same as History M150E.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Critical examination of African American search in first half of 20th century for national/group cohesion through collectively built institutions, associations, organized protest movements, and ideological self-definition. P/NP or letter grading.

M159P. Constructing Race. (4). (Same as Anthropology M159P and Asian American Studies M169.) Lecture, three hours. Examination of race, socially constructed category, from anthropological perspective. Consideration of development of racial categories over time and in different regions, racial passing, multiracial identity in U.S., whiteness, race in popular culture, and race and identity. P/NP or letter grading.

M165. Sociology of Race and Labor. (4). (Same as Labor and Workplace Studies M165 and Sociology M165.) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Exploration of relationship between race/ethnicity, employment, and U.S. labor movement. Analysis of underlying racial divisions in workplace and how they evolved historically. Consideration of circumstances under which workers and unions have excluded people of color from jobs and unions, as well as circumstances under which black workers and unions have organized people of color into unions in efforts to improve their wages and working conditions. Impact of globalization on these dynamics. P/NP or letter grading.

M167. Worker Center Movement: Next Wave Organizing for Justice for Immigrant Workers. (4). (Same as Asian American Studies M166C, Chicana and Chicano Studies M130, and Labor and Workplace Studies M167.) Lecture, four hours. Discussion of development of theory of and practical understanding of worker center movement, with focus on historical factors that have led to emergence and growth of worker centers. Role of worker centers in promoting multiracial and multicultural campaigns for workplace and economic justice. Transnational cross-border solidarity issues and rights of undocumented workers. P/NP or letter grading.

M172. Afro-American Woman in U.S. (4). (Same as Gender Studies M172 and Psychology M172.) Lecture, two and one-half hours. Designed for juniors/seniors. Examination of development and practical understanding of worker center movement, with focus on historical factors that have led to emergence and growth of worker centers. Role of worker centers in promoting multiracial and multicultural campaigns for workplace and economic justice. Transnational cross-border solidarity issues and rights of undocumented workers. P/NP or letter grading.

M175. Racial and Ethnic Disparities in Healthcare. (4). (Same as Sociology M175.) Lecture, four hours. Discussion of evolution of black divergence within African American community by focusing on evolution of differences—specifically class differences—that have minimized black progress when compared with other races and cultures like Asians and Jews. Examination of origins and plight of lower-class blacks in stark juxtaposition with leadership and African Americans occupying higher socioeconomic levels. Letter grading.

176. Race, Racism, and Law. (4). Lecture, four hours. Designed for students who are seeking to become healthcare professionals so they understand importance of how race and ethnicity impact delivery of healthcare. Focus on need to increase diversity of health professions workforce as means to address health disparities. Letter grading.

176A. Race, Racism, and Law. (4). Lecture, four hours. Throughout American history, race relations have been inextricably linked to law. Both perpetuation of racism and struggle against it have involved various legal institutions, especially U.S. Supreme Court. Lateral analysis of all sides have differences in establishing legal standards defining political, economic, social, and psychological status of African Americans and other racial/ethnic minorities. Historical overview and in-depth examination of selected major highlights of these legal developments, including Constitutional sources of racism, legal foundations establishing and eliminating slavery, major Supreme Court decisions before and during civil rights era, and contemporary legal retreat from civil rights protections. Examination of legal processes and legal profession in broader historical and political context. Letter grading.

177. Africans in Higher Education. (4). Lecture, four hours. Discussion and exploration of challenges facing black students at predominantly white institutions (PIEs), with emphasis on the extent to which Proposition 209 has affected black student community, spaces on and off campus that empower students, and issues of access and equity in higher education. Critical discussions about student experiences/concerns/challenges at UCLA, addressing specific strategies for success, and notions of empowerment that provide context for students from underrepresented backgrounds at predominantly white universities. Letter grading.

178. Sociology of Caribbean. (4). (Same as Sociology M178.) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Historical sociology of Caribbean, with emphasis on the role of the European, French, British, and American colonialization, development and underdevelopment, race-making institutions and evolution of race relations, nationalism and migration. P/NP or letter grading.

M179A. Topics in African American Literature. (5). (Same as English M191A.) Seminar, three or four hours. Enforced requisite: English Composition 3 or 3H, Variable specialized studies course in African American literature. Topics may include Harlem Renaissance, African American Literature in Nadir, Black Women’s Writing, Contemporary African American Fiction, African American Poetry. May be repeated for credit with topic or instructor change. P/NP or letter grading.

M182A. Language, Literacy, and Human Development Ethnography (2). (Same as Education M182A.) Fieldwork, three hours. Students visit after-school site on weekly basis and use ethnographic methods to document learning. Opportunity for students to connect theories of literacy and language and literacy learning with practice. Letter grading.

M182B. Culture, Gender, and Human Development Ethnography (2). (Same as Education M182B.) Fieldwork, three hours. Enforced corequisite: course M194A. Students visit after-school site on weekly basis and use ethnographic methods to document particular lessons of nonviolent movements as they impact social change organizing in Los Angeles. P/NP or letter grading.
learning. Opportunity for students to connect theories of development and language and literacy learning with practice. Letter grading.

M192C. Cultural Communications, and Human Development Ethnography (2). (Same as Education M182C.) Fieldwork, three hours. Enforced corequisite: course M194C. Students visit after-school site on a weekly basis and use ethnographic methods to document learning. Opportunity for students to connect theories of development and language and literacy learning with practice. Letter grading.

M193A. Language, Literacy, and Human Development Ethnography (3). (Same as Education M183A.) Fieldwork, six hours. Enforced corequisite: course M194A. Students visit after-school site on a weekly basis and use ethnographic methods to document learning. Opportunity for students to connect theories of development and language and literacy learning with practice. Letter grading.

M193B. Culture, Gender, and Human Development Ethnography (3). (Same as Education M183B.) Fieldwork, 18 hours. Enforced corequisite: course M194C. Students visit after-school site on a weekly basis and use ethnographic methods to document learning. Opportunity for students to connect theories of development and language and literacy learning with practice. Letter grading.

M183A. Language, Literacy, and Human Development Ethnography (3). (Same as Education M183A.) Fieldwork, six hours. Enforced corequisite: course M194A. Students visit after-school site on a weekly basis and use ethnographic methods to document learning. Opportunity for students to connect theories of development and language and literacy learning with practice. Letter grading.

M194A. Language, Literacy, and Human Development Research Group Seminars 5 (Same as Education M194A) Seminar, three hours; laboratory, two hours (when scheduled). Enforced corequisite: course M182A or M183A. Research seminar designed to provide opportunity to combine theory and practice in study of human development in educational contexts. Focus on relationship between theories of development, culture, and gender. May be taken independently for credit. Letter grading.

M194B. Culture, Gender, and Human Development Research Group Seminars 5 (Same as Education M194B) Seminar, four hours. Research seminar on selected topics in Afro-American studies. Reading, discussion, and development of culminating project. May be repeated for credit. Concurrently scheduled with course 299. Letter grading.

M194A. Language, Literacy, and Human Development Research Group Seminars 5 (Same as Education M194A) Seminar, three hours; laboratory, two hours (when scheduled). Enforced corequisite: course M182C or M183C. Research seminar designed to provide opportunity to combine theory and practice in study of human development in educational contexts. Focus on relationship between theories of development, culture, and gender. May be taken independently for credit. Letter grading.

M194C. Culture, Communications, and Human Development Research Group Seminars 6 (Same as Education M194C) Seminar, three hours; laboratory, two hours (when scheduled). Enforced corequisite: course M182C or M183C. Research seminar designed to provide opportunity to combine theory and practice in study of human development in educational contexts. Focus on relationship between theories of development, culture, and gender. May be taken independently for credit. Letter grading.

Graduate Courses

M200A. Advanced Historiography: Afro-American. (4.) (Same as History M200V) Seminar, three hours. May be repeated for credit. S/U or letter grading.

M200C. Black Families and Relationships. (4.) (Same as Sociology M200C) Seminar, three hours. May be repeated for credit. S/U or letter grading.

CM121A. African American Music in California. (4.) (Same as Ethnicmusicology CM121A) Lecture, four hours. Concentration on African American music in California. S/U or letter grading.

CM122. African American Music in California. (4.) (Same as Ethnicmusicology CM122) Lecture, four hours. Historical and analytical examination of African American music in California including migration patterns, and urbanism to determine their impact on development of African American music in California. Concurrently scheduled with course CM112A. S/U or letter grading.

Scope and Objectives

The intellectual objective of the African Studies M.A. Program is to provide graduate students with the opportunity to engage in intensive study and research on Africa on an interdisciplinary basis. The program offers African area courses in a wide range of disciplines, including the fine arts, social sciences, humanities, and professional fields. A concurrent degree program is also offered where students can work for the M.A. in African Studies and the Master of Public Health (M.P.H.) at the same time.

Academic flexibility draws many students to the program. Because there are more than 50 active faculty members on campus with African interest and experience in many disciplines, students have multiple options to design individualized programs suited to their specific interests.

Information on the undergraduate minor in African Studies can be found in the International and Area Studies section later in this catalog.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa /library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The African Studies Program offers the Master of Arts (M.A.) degree in African Studies. A concurrent degree program (African Studies M.A./Public Health M.P.H.) is also offered.

African Studies
Graduate Courses

201B. Africa and Professions. (4). Seminar, three hours. Exploration of key contributions and debates of academic disciplines in African studies, with emphasis on professional dimensions. Review of discipline’s literature, resources, career opportunities, and professionals themselves. Letter grading.

M229B. Africana Bibliography and Research Methods. (4). (Same as Information Studies M229B.) Discussion, four hours. Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized databases. S/U or letter grading.

296. Africanist Working Group. (1). Research group meeting, one hour. Collaborative exploration and discussion of current research and literature on modern Africa. Specific projects determined by research being conducted by working group participants. Activities include designing and refining research proposals, gathering and analyzing data, and interpreting and reporting results, as well as presenting research to receive critical feedback from other class participants. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4). Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 8). Tutorial, to be arranged. Limited to graduate African studies students. May be repeated, but only 4 units may be applied toward minimum graduate course requirement. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination. (4). Tutorial, to be arranged. Limited to graduate African studies students. Normally taken only during term in which student is being examined. May not be applied toward minimum graduate course requirement. S/U grading.

Paul V. Kroskrity, Ph.D., Chair
American Indian Studies / 125

Scope and Objectives
Because UCLA possesses a substantial number of faculty members in the humanities and social sciences engaged in teaching and conducting research on American Indians, the nation’s first interdisciplinary M.A. program in American Indian Studies was established here. The Bachelor of Arts degree and the undergraduate American Indian Studies minor provide a general introduction for students who anticipate advanced study at the graduate level in American Indian studies, ethnic studies, and the traditional disciplines or careers in research, administration, public service, and community service related to American Indian communities.

The Master of Arts program draws primarily on existing courses in the participating departments, where research and research methodologies are of primary concern. Students are exposed to Indian-related research in a number of different disciplines; demonstration of research skills is required. Students graduate with the training they need to teach Native American studies or to serve in an administrative capacity in Indian programs or organizations. The M.A. program ranks among the top Indian studies programs in the country.

Undergraduate Study
The American Indian Studies major is a designated capstone major. Seniors complete a research/service experience and participate in a tutorial where faculty members help them relate their course-derived academic experience to their original research/service efforts involving Native American communities. Through their capstone work, students demonstrate their skills at analyzing and synthesizing knowledge, show their capacity to work collaboratively with peers, and display their capacity to relate their academic research and discourse to Native American community needs and concerns. Students present their work at the academic year-end Research Symposium sponsored by the American Indian Studies Interdepartmental Program.

American Indian Studies B.A.
Capstone Major
The American Indian Studies B.A. program is designed to offer a coherent and comprehensive curriculum in American Indian cultures, societies, and contemporary issues in addition to valuable background in more traditional disciplines such as anthropology, art history, economics, education, history, law, linguistics, literature, sociology, and world arts and cultures. Students acquire a critical knowledge of the concepts, theories, and methods that have produced knowledge about American Indians in the traditional disciplines. Students are encouraged to develop a concentration—or special expertise—in these fields to accompany the major.

The curriculum encompasses the cultural, historical, political, and social experiences of Native Americans in the Americas. Through courses on Native American literature, languages, theater, and contemporary societies and through more culturally specific courses on California Indians, cultures of the Pueblo southwest, and so on, the major provides an in-depth and broad knowledge on the experience of Native Americans not only in the U.S. and Canada but in Mexico and elsewhere in Latin America as well.

Given the increasingly multicultural society of the U.S. and the economic revitalization of many Native American communities, a knowledge of American Indian studies greatly enhances the professional and scholarly contributions attainable for those seeking postgraduate degrees in various related disciplines and fields.

Preparation for the Major
Required: American Indian Studies M10 and two courses from Anthropology 9, Gender Studies 10, Political Science 40, Statistics 12. Each course must be completed with a grade of C or better.

Transfer Students
Transfer applicants to the American Indian Studies major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to American Indian studies course and two courses from culture and society, introduction to gender studies, introduction to American politics, or introduction to statistical methods.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Requirements are distributed according to certain categories to create a breadth of knowledge. Students are required to take a research methods course to become familiar with scholarly techniques of knowledge production and to critically regard academic research, as well as a course in either ethnic/race/gender relations or comparative indigenous studies. Additional courses are selected in the social sciences and humanities according to a distributional formula that encourages further specialization within either of these two broad areas while simultaneously adding additional breadth. Finally, American Indian Studies C122SL prioritizes the experiential dimension of involvement in Native American communities (either urban, reservation, or rancheria) through work that provides service experience and/or supervised internship opportunities.

The 12 courses must fit one of the following regional emphasis patterns: (1) Native North America—eight courses, including those mentioned below and additional electives on Native North American topics or (2) indigenous peoples of the Americas—eight courses, including at least four dealing with indigenous people in Central and/or South America.

Students must complete 12 upper division courses (48 units) as follows, with no more than 32 units from American Indian studies courses:

1. Ten core courses (40 units), including (a) American Indian Studies M161, (b) two language courses from Anthropology M140, C144, Linguistics 114, (c) two history or law courses from American Indian Studies 140, 158, C170, History 149A, 149B, 157B, (d) one social sciences course from American Indian Studies C120, C121, C130, C175, C178, Anthropology 172A, or 174P, (e) two expressive culture courses from American Indian Studies 180, Art History C117A through C117B, 118D, English 106, Ethnomusicology 106A, 106B, Theater 103F, 107, (f) one methodology course from Anthropology 139, Art History 100, Community Health Sciences 181, Comparative Literature 100, Ethnomusicology 180, Linguistics 160, Political Science 170A, Sociology 106A, 113, or World Arts and Cultures 195, and (g) either one ethnic/race/gender relations course (American Indian Studies M164, Anthropology M134, M154P, M154Q, Asian American Studies 130A, M130B, M130C, 131A, 132A, 133, 134, Chicana and Chicano Studies CM182, Communication Studies 124, Film and Television 128, Gender Studies 130, 168, Sociology 154, 156, or M162) or one comparative indigenous studies course (Anthropology 153P, Geography M131, History 135A, or Sociology 157)

2. American Indian Studies C122SL (experiential service learning or supervised internship)

3. American Indian Studies 199C (capstone course)

Each course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. No more than two independent studies courses (199s) may be applied toward the degree.

Honors Program
The honors program is designed for American Indian Studies majors who are interested in carrying out an independent research project that culminates in an interdisciplinary honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project. All junior and senior American Indian Studies majors who have a cumulative grade-point average of 3.0 or better and at least a cumulative average of 3.0 in American Indian Studies courses are eligible to apply for admission to the honors program. Students interested in the honors program should consult with their major advisor to discuss the requirements. The honors program requires completion of 60 units in the major with a minimum grade point average of 3.0, a minimum grade point average of 3.5 in the major upper division courses and upper division courses in the humanities and social sciences, and a minimum grade point average of 3.5 in the upper division courses in the major. Students must complete a major honors thesis, which is a capstone for the honors major. The honors thesis must be submitted to the Honors Program Committee by the end of the semester in which the student expects to graduate. The honors thesis is graded on a scale of A through F, with the grade being determined by the Honors Program Committee. The honors program also requires completion of a major honors thesis, which is a capstone for the honors major. The honors thesis must be submitted to the Honors Program Committee by the end of the semester in which the student expects to graduate. The honors thesis is graded on a scale of A through F, with the grade being determined by the Honors Program Committee.

The honors program is designed for American Indian Studies majors who are interested in carrying out an independent research project that culminates in an interdisciplinary honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project. All junior and senior American Indian Studies majors who have a cumulative grade-point average of 3.0 or better and at least a cumulative average of 3.0 in American Indian Studies courses are eligible to apply for admission to the honors program. Students interested in the honors program should consult with their major advisor to discuss the requirements. The honors program requires completion of 60 units in the major with a minimum grade point average of 3.0, a minimum grade point average of 3.5 in the major upper division courses and upper division courses in the humanities and social sciences, and a minimum grade point average of 3.5 in the upper division courses in the major. Students must complete a major honors thesis, which is a capstone for the honors major. The honors thesis must be submitted to the Honors Program Committee by the end of the semester in which the student expects to graduate. The honors thesis is graded on a scale of A through F, with the grade being determined by the Honors Program Committee. The honors program also requires completion of a major honors thesis, which is a capstone for the honors major. The honors thesis must be submitted to the Honors Program Committee by the end of the semester in which the student expects to graduate. The honors thesis is graded on a scale of A through F, with the grade being determined by the Honors Program Committee.
American Indian Studies Minor

The American Indian Studies minor is designed for students who wish to augment their major program of study in the College of Letters and Science with a group of related courses from various disciplines germane to American Indian studies. The minor exposes students to Indian-related research and literature in a number of different disciplines, such as American Indian studies, anthropology, economics, history, political science, sociology, and theater.

To enter the minor, students must be in good academic standing (2.0 grade-point average), have completed 45 units, and file a petition at the American Indian Studies Center, 3220 Campbell Hall. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by the College of Letters and Science.

Required Lower Division Course (5 units): American Indian Studies M10 with a grade of C or better.

Required Upper Division Courses (28 units):

1. Seven courses selected from the following: (1) one American Indian languages and communication systems course (Anthropology C144 or Linguistics 114); (2) three history and social sciences courses from American Indian Studies C120, C121, C122SL, C130, 140, 158, C170, C175, C178, Anthropology 113Q, 113R, 114P, 114R, 114S, 114T, 114U, 114V, 114W, Gender Studies 130, History 149A, 149B, 157B, Sociology M161; (3) three humanistic perspectives on language and expression culture courses from American Indian Studies 180, Art History C117A, C117B, C117C, 118D, English 106, 180, Ethnomusicology 106A, 106B, Theater 103F.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least 16 units applied toward the minor must be taken in residence at UCLA.

Transfer credit for any of the above is subject to program approval; consult the interdepartmental adviser before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have a minimum grade of C (2.0) in each and an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees on the Graduate Division website, http://grad.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The American Indian Studies Program offers the Master of Arts (M.A.) degree in American Indian Studies. A concurrent degree program (American Indian Studies M.A./Law J.D.) is also offered.

American Indian Studies

Lower Division Course

M10. Introduction to American Indian Studies. (5). (Same as World Arts and Cultures M23) Lecture, three hours; discussion, one hour; activity, one hour. Survey of selected nations and cultures from pre-Western contact to contemporary period, with particular emphasis on early cultural diversity and diverse patterns of political, linguistic, social, legal, and cultural change in postcontact period. P/NP or letter grading.

Upper Division Courses

M118. Student-Initiated Retention and Outreach Issues in Higher Education. (4). (Same as African American Studies M118, Political Science M168, and Chicano/Latino Studies M118) Lecture, four hours. Exploration of issues in outreach and retention of students in higher education, especially through student-initiated programs, efforts, activities, and services, with focus on UCLA as case. May be repeated twice for credit. Letter grading.

C121. Working in Tribal Communities: Preparing for Fieldwork. (4). Lecture, four hours. Through readings, discussion, Native guest lecturers, and project participation, introduction to rules of conduct and skills necessary to successfully work or carry out community service projects for Native American communities and organizations. Concurrently scheduled with course C221. Letter grading.

140. Federal Indian Law and Policy. (4). Lecture, four hours. Through readings, discussion, and Native guest lecturers, introduction to fundamental concepts and history of federal Indian law and policy, investiga-

tion of contemporary policies and legal issues and exploration of Native responses to policy and law. Letter grading.

C145. Contemporary Indigenous Nations. (4). Seminar, three hours. Introduction to topics on contemporary indigenous nations, including social movements, social and cultural change and continuity, nation building, law and justice, conflict and conciliation, self-determination, education and socialization, international relations, comparative policy, colonialism, migration, national and social identities, and other issues and social-cultural processes, seen as distinct from ethnicity, race, class, and nation, with focus on indigenous communities that have maintained self-government, territory, and culture. Investigation and search for analytic and policy patterns that give greater understanding and knowledge about current conditions and social and cultural processes of indigenous nations. Concurrently scheduled with course C245. Letter grading.

158. Nation Building. (4). Lecture, three hours; fieldwork/research, nine hours. Limited to junior/senior American Indian Studies majors. Examination of historical and contemporary developments of political, social, and cultural change in indigenous Native American societies. Several theories of social change, applied to selected cultural processes, social movements, social and cultural change and continuity, and nation building. Letter grading.

M161. Comparative American Indian Societies. (4). (Same as Sociology M161,) Lecture, three hours. Required course M10 or equivalent as prerequisite and historical study of political, economic, and cultural change in indigenous North American societies. Letter grading.

M162. Language Endangerment and Linguistic Revitalization. (4). (Same as Anthropology M162,) Lecture, three hours; fieldwork/research, one hour. Required courses M10, Anthropology 33. Examination of causes and consequences of current worldwide loss of linguistic diversity and revelation of kinds of efforts that members of threatened language communities have produced in their attempt to revitalize these languages. Projected loss of as many as half of world’s languages by end of 21st century can only be explained as outcome of such factors as nationalism, global economic forces, language ideological change, and language shift away from indigenous tribal languages. Since loss of such languages means both reduction of cultural as well as linguistic diversity, many affected communities have engaged in various language renewal practices. Examination of some diverse strategies that have been attempted, including immersion, language and culture classes, master-apprentice, interactive multimedia, mass media approaches, and language policy-reform approaches. Evaluation of effectiveness of these measures and of very imagery used to discuss language endangerment. P/NP or letter grading.

C170. California Indian History. (4). Lecture, four hours. Introduction to overview of California Indian history, specific tribal community histories, and/or contemporary California Indian history through readings, discussion, and Native guest lecturers. May be repeated for credit with topic, research, and consent of department chair. Concurrently scheduled with course C270. Letter grading.

C175. Cultures of Native Southern California. (4). Lecture, three hours. Introduction to Southern California indigenous societies through readings, discussions, guest lecturers, and direct community participation. May be repeated for credit with topic, research, and consent of department chair. Concurrently scheduled with course C275. Letter grading.

126 / American Indian Studies
California Experiences in Native Cultural Resource Management. (4). Seminar, three hours. Exploration of creation and implementation of laws that affect cultural resource management in California, such as California Environmental Quality Act (CEQA), Native American Graves Protection and Repatriation Act (NAGPRA), AB 378 (California NAGPRA), American Indian Religious Freedom Act, National Environmental Policy Act (NEPA), and National Historic Preservation Act (NHPA), from applied standpoint. To understand goals and challenges of these laws, examination of series of cases from California sites. Concurrently scheduled with course C278. Letter grading.

Introduction to and Practicum in Native American Studies. (3). Lecture, three hours; laboratory, one hour. Development of ability to converse, read, and write at elementary level in Native American languages. Introduction to both phonological and grammatical structures, vocabulary, and cultural patterns of using language as symbolic guide to culture. May be repeated with language change and approval of interdepartmental chair. Letter grading.

Indigenous Films. (5). (Same as World Arts and Cultures M187.) Lecture, four hours; discussion, one hour. Introduction to study of indigenous filmic images and representations, with focus on selected ethnographic, documentary, animated, and feature films ranging from 1920 to present. Letter or P/NP grading.

Special Topics in American Indian Studies. (4). Lecture, four hours. Variable topics selected from following: Myth and Folklore of Indian Societies; Contemporary American Indian Literature; Social Science Perspectives of American Indian Life; Law and American Indian; History of American Indians (cultural area); Dance and Music of American Indians (cultural area); American Indian Policy; Consult Schedule of Classes for topics and instructors. May be repeated for credit. Letter grading.

Community Internships in American Indian Studies. (4). Tutorial, two hours, fieldwork, eight hours. Requisite: course M10. Limited to juniors/seniors. Internship in supervised setting in community agency. Students meet on regular basis with instructor and provide periodic reports on their experience. Designed to integrate theory and practice through experiential learning to gain firsthand knowledge of diversity, complexity, and variety of needs of American Indian communities. May be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

Comparative Approaches to Community and Corporate Internships. (4). (Same as African American Studies M195CE, Asian American Studies M195CE, and Gender Studies M195CE.) Tutorial, one hour; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Learning. Comparative study of race, gender, and indigeneity in relation to contemporary workplace dynamics. Students complete weekly written assignments, attend bimonthly meetings with graduate student coordinator, and write final research paper. Faculty sponsor and graduate student coordinator construct series of reading assignments that examine issues associated with internship site. Individual in contact with supervising faculty member required. P/NP or letter grading.

Individual Studies in American Indian Studies. (2 to 8). Seminar, three hours; fieldwork, eight to 10 hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned readings and tangible evidence of mastery of subject matter required. May be repeated for maximum of 16 units. Individual contract required. P/NP or letter grading.

Honors Research in American Indian Studies. (4-4-4). Tutorial, one hour; activity, three hours. Open to seniors. Only honors research is enforced requisite to 198B, which is enforced requisite to 198C. Limited to senior honors program students. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. Each course may be repeated for credit. Individual contract required. Letter grading.

Directed Research-Senior Project in American Indian Studies. (2 to 8). Tutorial, one hour. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating written project may be repeated for credit. Individual contract required. P/NP or letter grading.

Individual Studies: Capstone Synthesis. (4). Tutorial, three hours. Preparation: successful completion of eight upper division major courses. Limited to senior American Indian Studies majors. Faculty members help students relate their course-derived academic experience to their original research/service efforts involving Native American communities. Completion of research paper and presentation of student work at year-end Research Symposium required. Must be taken in conjunction with American Indian Studies C222SL or an alternative upperdivision course approved by program chair and academic coordinator. Individual contract required. Letter grading.

Graduate Courses

Advanced Historiography: American Indian Peoples. (6). (Same as History M200W) Lecture, 90 minutes; seminar, 90 minutes. Introduction to culture-histories of North American Indians and review of Indian concepts of history. Stereotypical approach to contem- porary view of Indian past that is interdisciplinary and multicultural in its scope. Letter grading.

Cultural World Views of Native America. (4). (Same as English M266.) Seminar, three hours. Explores various Native American cultures and other expressive cultural forms—dance, art, song, religious and medicinal ritual—in selected Na- tive American societies, as these traditional and tribal contexts have been translated into contemporary lit- erary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary method- ological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and eth-nomusicology. May be repeated for credit with in- structor and/or topic change. Letter grading.

Contemporary Issues of American Indi- ans. (4). (Same as Anthropology M269 and Sociology M275.) Seminar, three hours. Introduction to most im- portant issues facing American Indians as individuals, communities, tribes, and organizations in contempo- rary world, building on historical background presented in course M200A and cultural and expressive experience of American Indians presented in course M200B. Letter grading.

Economic Principles and Economic De- velopment in Indigenous Communities. (4). (Same as Public Policy M270.) Seminar, two hours; discus- sion, one hour. Limited to graduate students. Intro- duction to basic economic concepts and their appli- cation to issues of economic development in inde- nisive communities. Coverage of microeconomic and macroeconomic aspects of economic development using current and existing research. Letter grading.

Topics in American Indian Studies. (4). Seminar, three hours. Limited to graduate students. Introduction to some key theoretical themes in American Indian studies and exploration of methods that can be used to incor- porate them in research on American Indian cultures, so- ciety, languages, and other issues. Quantitative methods (design, appropriate use), with emphasis on qualitative research methods, ethics, and special con- siderations in conducting research in American Indian country. Design of research and evaluation of feasi- bility of researching topics. Letter grading.

Working in Tribal Communities: Preparing for Fieldwork. (4). Lecture, four hours. Through readings, discussion, Native guest lecturers, and project participation, introduction to conduct and skills necessary to successfully work or carry out community service projects for Native American communities and organizations. Concurrently scheduled with course C122, P/NP grading.

Working in Tribal Communities: Service Learning. (4). Seminar, one hour; fieldwork, four hours. Enforced requisite: course C221. Recommended: course C220. Participation in community service learning opportunity with Native American communities and organizations where students are mentored and supported by faculty members, other stu- dents, and project directors toward completing as- signments, service learning tasks and contributing to project activities. May be repeated with consent of in- structor. Concurrently scheduled with course C222SL, S/U or letter grading.

American Indian Studies / 127

Economic Development and Tribal Le- gal Systems. (228A; 3 or 4/228B: 1 or 2). (Formerly numbered M228A.) Seminar, two hours. Course 228A is enforced requisite to 228B. Study of traditional and contemporary legal systems of Native American tribal nations. Detailed examina- tion of general differences including Na- vajo, Cherokee, Iroquois, and Hopi, with emphasis on diversity of tribal legal regimes, comparisons with American legal system, changes in tribal sys- tems during period of contact with non-Indians, and relationship between tribes’ legal systems and other aspects of their cultures, such as religion and social structure. Independent study. Focus on topics in contemporary or historic topic required. Concurrently scheduled with Law 528. In Progress (228A) and S/U or letter (228B) grading.

California Indian Strategies for Contempo- rary Challenges. (4). Seminar, three hours. Through readings, discussion, and Native guest lecturers, intro- duction to contemporary issues and processes of self-directed social change and political, cultural, legal, and economic concerns of tribes in the context of the contemporary California Native communities. Con- currently scheduled with course C130, S/U or letter grading.

Tribal Legal Development Clinic. (238A-238B). (Formerly numbered as Public Law 728.) Three hours. Course 238A is en- forced requisite to 238B. Students provide nonlitiga- tion legal assistance to Indian nations. Projects in- clude development and modification of tribal legal codes and constitutional provisions, creation of tribal dispute resolution processes, and drafting of inter- governmental agreements. Legislative drafting and cross-cultural representation skills emphasized. Fac- ulty members meet with tribal leaders to inform them of availability of clinic services and determine whether clinic could assist them with their legal development needs. All the students in the course meet with tribal proj- ects, they meet with relevant tribal officials and com- munity groups with travel funds supplied. Students learn about tribal governments and legal systems, in- clude development and modification of tribal legal institutions, and culture of tribe they are representing to be able to craft legislation and other documents that meet tribal intentions and needs. Concurrently scheduled with Law 728. In Progress (238A) and S/U or letter (238B) grading.

Contemporary Indigenous Nations. (4). Seminar, three hours. Introduction to topics on contemporary Indigenous nations in the Pacific, social and cultural change and continuity, na- tion building, law and justice relations, economic de- velopment, education and socialization, international relations, comparative policy, colonialism, migration, national and social identities, and other issues and
social cultural processes, seen as distinct from eth-
nicity, race, class, and nation, with focus on inde-
gnous communities that have maintained self-govern-
ment, territory, investigation and search for analy-
for analytic and policy patterns that give greater un-
derstanding and knowledge about current conditions
and social and cultural processes of indigenous na-
tions. Concurrently scheduled with course C145, S/U
or letter grading.

261. Comparative Indigenous Societies. (4). Lec-
ture, two hours; discussion, two hours. Designed for
graduate isolation of detailed historical and con-
temporary ethnographic analyses of social change
and cultural continuity within indigenous na-
tions, primarily of U.S., but elsewhere also. Discus-
sion of theories of change, comparative methodolo-
gies, and case materials. Letter grading.

265. Federal Indian Law I. (4 or 6). (Formerly num-
bered M265). Lecture, three to four hours. Overview of
federal Indian law, including nature and history of
tribal federal legal and political relationship; basic
legal definitions within federal Indian law (such as
what is Indian country); equal protection issues posed
by federal Indian legislation; canons of construction
unique to Indian law; tribal sovereignty and its pro-
tection; basic questions of federal and state author-
ity within Indian country; and tribal, federal, and state ju-
risdiction in Indian country according to default rules
as well as special Indian laws. May be concurren-
tly scheduled with Law 267. S/U or letter grading.
M265A-265B. Federal Indian Law I. (1 to 8 each).
(Formerly numbered M267.) (Same as Law M267.)
Lecture, three hours. Course M265A is enforced req-
quisite to 265B. Overview of federal Indian law through
study of cases and historical and contemporary ma-
terials. Basic conflicts among sovereign governments
that dominate this area of law, especially conflicts
over criminal, civil adjudicative, and regulatory juris-
diction. Special attention to status and sovereign
powers of Indian nations as recognized under U.S. law,
federal Indian law, and under international law. May be concurren-
tly scheduled with Law 267. S/U or letter grading.

M267. Federal Indian Law II. (1 to 8). (Same as Law
M382.) Lecture, three hours. Requisites: courses
M238A and 238B, or M265A and 265B. Examination
in-depth of principles and doctrines of federal Indian
law as applied to property rights in land, cultural re-
sources, hunting and fishing rights, water rights, and
economic development. Special jurisdictional regimes
established by federal statutes, such as Indian Child
Welfare Act and Indian Gaming Regulatory Act, ad-
dressed. S/U or letter grading.

M267A-267B. Federal Indian Law II. (1 to 8 each).
(Same as Law M382.) Lecture, three hours. Requi-
sites: courses M238A and 238B, or M265A and 265B.
Course M267A is enforced requisite to 267B. Examina-
tion in-depth of principles and doctrines of federal Indian
law as applied to property rights in land, cultural re-
sources, hunting and fishing rights, water rights, and
economic development. Special jurisdictional regimes
established by federal statutes, such as Indian Child
Welfare Act and Indian Gaming Regulatory Act, ad-
dressed. In Progress (M267A) and S/U or letter (267B) grading.

C270. California Indian History. (4). Lecture, four
hours. Introduction to overview of California Indian
history, specific tribal community histories, and/or con-
temporary California Indian history through read-
ings, discussion, and Native guest lecturers. May be
repeated for credit with topic change and consent of
interdepartmental chair. Concurrently scheduled with
course C170, S/U or letter grading.

M272. Seminar: Cultural Property Law. (3 or 4).
(Same as Law M514.) Seminar, three hours. Explora-
tion of identity, ownership, appropriation, and repatri-
aton of both tangible and intangible cultural prop-
erty—those items that are of great significance to cul-
tural heritage and cultural survival of people. Consideration of importance of preservation of cul-
tural property as means of maintaining group identity,
self-determination, and collective rights. Examination
of both international and domestic law governing these
issues, addressing such questions as How should
cultural property be defined? Can cultural property
be protected by underlying intellectual prop-
erty and cultural property regimes? How can we bal-
ance protection of cultural property against need or
desire for its use in creative expression or scientific
advancement? Examination of cultural property of
groups in general, with emphasis on cultural property
of indigenous peoples, including folklore, traditional
knowledge, burial grounds, sacred sites, and ancient
ceremonies and traditions. S/U or letter grading.

274. Good Native Governance. (4 or 6). Seminar,
three hours. Examination of legal issues integral to
governance that Native American nations face in 21st
century, including those that impact and shape polit-
ical sovereignty, economic development, constitu-
tional reform, membership criteria, cultural property
protection, sacred sites, religious freedom, and safety
and criminal law enforcement, among others. Em-
phasis on breadth of issues that lawyers working with
and for Native nations must confront. Integration and
highlighting of legal issues unique to Native nations
within California. Materials from traditional law review
articles, books, and case studies derived from field
research to engage students in multidimensional set-
tings that confront Native societies. May be concur-
rently scheduled with Law 637. S/U or letter grading.

C275. Cultures of Native Southern California. (4).
Lecture, three hours. Introduction to Southern Cali-
ifornia indigenous societies through readings, discus-
sions, and for analysis and policy patterns that give greater un-
derstanding and knowledge about current conditions
for analytic and policy patterns that give greater un-
derstanding and knowledge about current conditions
in-depth of principles and doctrines of federal Indian
law that affect cultural resource management in Cali-
ifornia, such as California Environmental Quality Act
(CEQA), Native American Graves Protection and Re-
patriation Act (NAGPRA), AB 978 (California NAGPRA),
American Indian Religious Freedom Act, National
Environmental Policy Act (NEPA), and Na-
tional Historic Preservation Act (NHPA), from applied
standpoint. To understand goals and challenges of
these laws, examination of series of cases from Cali-
ifornia sites. Concurrently scheduled with course C175.
S/U or letter grading.

C276. California Experiences in Native Cultural
Resource Management. (4). Seminar, three hours.
Exploration of creation and implementation of laws
that affect cultural resource management in Cali-
ifornia, such as California Environmental Quality Act
(CEQA), Native American Graves Protection and Re-
patriation Act (NAGPRA), AB 978 (California NAGPRA),
American Indian Religious Freedom Act, National
Environmental Policy Act (NEPA), and Na-
tional Historic Preservation Act (NHPA), from applied
standpoint. To understand goals and challenges of
these laws, examination of series of cases from Cali-
ifornia sites. Concurrently scheduled with course C178.
S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4). Sem-
inar, to be arranged. Preparation: apprentice per-
sonnel employment as teaching assistant, associate,
or fellow. Teaching apprenticeship under active guid-
ance and supervision of regular faculty member re-
sponsible for curriculum and instruction at UCLA.
May be repeated for credit. S/U grading.

596. Directed Individual Studies. (4 to 8). Tutorial,
if available. S/U or letter grading.

598. Research for and Preparation of M.A. Thesis.
(4 to 8). Tutorial, if available. S/U or letter grading.

199. Directed Research in Anesthesiology. (2 to 8).
Tutorial, two hours. Limited to juniors/seniors. Super-
vised individual research or investigation under guid-
ance of faculty mentor. Culminating paper required.
May be repeated for credit. Individual contract re-
pired. P/NP or letter grading.

**Scope and Objectives**

Anthropology, the broadest of the social sciences, is the study of human kind. One of the strengths of anthropology as a discipline is its “holistic” or integrative approach; it links the life sciences and the humanities and has strong ties with disciplines ranging from biology and psychology to linguistics, political science, and the fine arts. Anthropological study is appropriate for people with a wide variety of interests: human cultures and civilizations both present and past, human and animal behavior, particular regions of the world such as Africa, Asia, Latin America, Oceania, etc.

The Department of Anthropology recognizes the following four fields in anthropology:

- **Archaeology.** The study of human cultures and the natural, social, ideological, economic, and political environments in which they operated in the recent and distant past. The graduate and undergraduate programs focus on methods of discovery (field and laboratory courses), strategies of analysis pertaining to long-term cultural evolution (theory, analytic, and topical courses), and the unfolding of prehistory in many regions of the world, including North America, Mesoamerica, South America, and several parts of the Old World (regional courses). Faculty members have long-standing interests in the origins and evolution of complexity, including early human adaptations, the political organization of complex hunters/gatherers, the origins of early village life, and the emergence and florescence of ancient cities and states. Faculty members maintain programs of field research involving many students in North America, Mesoamerica, South America, and East and South Asia.

- **Biological anthropology.** The study of humans and other primates from a Darwinian point of view. The program focuses on the evolutionary ecology of early hominids, extant primates, and contemporary humans and includes training in evolution theory, behavioral ecology, evolutionary psychology, paleoanthropology, paleoecology, primate behavior, and mathematical modeling. Faculty members associated with the program have engaged in fieldwork in Africa, Central America, and Southeast Asia where ongoing projects include work on primate behavior, hominid evolution, and evolutionary psychology.

- **Linguistic anthropology.** An interdisciplinary field that addresses the manifold ways in which language, interaction, and culture mutually organize each other in different communities worldwide. Linguistic anthropologists at UCLA have a variety of backgrounds and research interests that include face-to-face communication, language contact and change, language and politics, language socialization across the lifespan, verbal art and performance, and the relation of language to ideology, mind, emotion, and identity. Courses are offered in ethnographic approaches to discourse analysis, field methods, language ideology, conversation analysis, language socialization, and communication in urban communities, as well as on cross-cultural language practices.

- **Sociocultural anthropology.** Concerns the examination and understanding of social and cultural systems and processes, and the human capacities that enable them. Its goal is to understand their operation in specific settings and to understand the experience of individuals who live in these diverse systems. Faculty members have engaged in fieldwork in almost every area of the world, but most notably in Africa, Latin America, East and Southeast Asia, and Oceania. They have also engaged in ethnographic research among Americans with diverse ethnic identities and in various institutional settings.

Bridging the four primary subfields are several other dimensions of anthropological study, including psychocultural anthropology and medical anthropology. Courses are also offered in the history and theory of anthropology and a wide range of anthropological methods.

The department offers Bachelor of Arts and Bachelor of Science degrees and a minor in Anthropology for undergraduate students; the graduate program leads to the Master of Arts and Ph.D. degrees. Studies in anthropology are particularly valuable for students planning careers in which an understanding of human behavior and cultural diversity is desirable, such as business, education, law, medicine, nursing, public health, social welfare, and urban planning. Because of its breadth of outlook, anthropology also offers an ideal basis for those seeking a general education in our increasingly interdependent world.

**Undergraduate Study**

**Anthropology B.A.**

**Preparation for the Major**

Required: Anthropology 7, 8, 9, 33. Each course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

**Transfer Students**

Transfer applicants to the Anthropology B.A. major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one human evolution course, one archaeology course, one sociocultural anthropology course, and one culture and communication course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/admtr.htm for up-to-date information regarding transfer selection for admission.
The Major
The major is designed for students interested in an anthropological understanding of human behavior. One of the strengths of anthropology is its cross-cultural “holistic” and integrative approach with many fields, such as biology, history, linguistics, the social sciences, and many of the humanities.

To provide a comprehensive understanding of the discipline as a whole, students must take two courses in the sociocultural anthropology field and one course in each of the other three fields (see “Scope and Objectives”). Students may take any upper division course in the given area to fulfill this requirement. Each course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

Students must complete 11 courses (44 to 52 units) as follows: (1) two upper division courses in the sociocultural anthropology field and one in each of the other three fields (archaeology, biological anthropology, and linguistic anthropology), (2) one upper division region and society course, (3) one upper division history/theory course, (4) one upper division methodology course, and (5) three additional upper division anthropology courses.

Students are strongly encouraged to enroll in 3 to 4 units of 89 and/or 189 courses to gain small seminar experience. Ideally, at least one of the units should be at the upper division level.

Anthropology B.S.

Preparation for the Major
Required: Anthropology 7, 8, 9, 33; Chemistry and Biochemistry 14A, 14B, 14BL, and 14C; or 20A, 20B, 20L, 30A, and 30AL; Life Sciences 1, 2, 3, 4, 23L; Mathematics 3A, 3B, 3C, and Statistics 12, or Mathematics 31A, 31B, and Statistics 12, or Life Sciences 30A, 30B, and Statistics 13; Physics 6A, 6B, and 6C, or 6AH, 6BH, and 6CH. Each course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

Transfer Students
Transfer applicants to the Anthropology B.S. major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one human evolution course, one archaeology course, one sociocultural anthropology course, one culture and communication course, two general biology courses for majors, one year of calculus, one year of general chemistry with laboratory, one year of general physics with laboratory, and one lower division organic chemistry course.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/admtchtml](http://www.admissions.ucla.edu/prospect/admtchtml) for up-to-date information regarding transfer selection for admission.

The Major
The major provides an overview of human evolution and is designed to prepare students for careers in anthropology and the health sciences, including medicine, dentistry, public health, and nursing. Each course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

Students must complete nine courses as follows: (1) two upper division courses in the sociocultural anthropology field and one in each of the other three fields (archaeology, biological anthropology, and linguistic anthropology), (2) one upper division region and society course, (3) one upper division history/theory course, and (4) two additional upper division anthropology courses.

Students are strongly encouraged to enroll in 3 to 4 units of 89 and/or 189 courses to gain small seminar experience. Ideally, at least one of the units should be at the upper division level.

Honors Program
The honors program provides research-oriented students with opportunity to engage in original research and analysis under the close supervision of faculty members and culminates in an honors thesis. To be admitted students should have a cumulative grade-point average of 3.0 overall and a 3.5 cumulative GPA in their upper division anthropology courses. The application for admission must be submitted during Fall Quarter. Ideal candidates should have junior or senior standing and have completed at least two upper division anthropology courses. The proposal, research, analysis, and writing of the paper take place over four terms via Anthropology 191HA through 191HD. Course 191HA is taken in Winter Quarter and 191HB in Spring Quarter. Research should be done in summer, and courses 191HC and 191HD are taken in Fall and Winter Quarters of the graduation year. Students should contact the departmental honors advisor early in their studies for more information.

Anthropology Minor
Students who wish to take a series of courses in anthropology, but major in another discipline, may be interested in the Anthropology minor. Students select courses from the four fields within anthropology (archaeology, biological anthropology, sociocultural anthropology), although they are encouraged to focus the body of their coursework within one field.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (10 units): Two courses from Anthropology 7, 8, 9, 33.

Required Upper Division Courses (20 units minimum): Core course (Anthropology 111, 120, 130, M140, or 150) from one of the four anthropology fields listed above; four additional courses. Students are encouraged to concentrate their upper division coursework within one field and are required to consult with the undergraduate advisor in planning their program of study.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, [http://grad.ucla.edu/gasasa](http://grad.ucla.edu/gasasa)/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Anthropology offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Anthropology.

Anthropology

Lower Division Courses
1. Welcome to America: American Culture for International Students, (4). Lecture, four hours. Designed for incoming international students. Introduction to American culture from anthropological perspective. Exploration of central aspects in American culture, including immigration, ethnic diversity, family, popular culture, and myths and realities about values at core of American society. Offered in summer only. P/NP or letter grading.

2. America through Lenses of Popular Culture, (4). Lecture, four hours. Designed for students interested in life and values in U.S. from anthropological perspective. Exploration of popular culture as experienced by Americans from various age groups, ethnic heritages and genders, and regional locations. Topics include music and art, film and television, sports, other entertainment, food, and technology. Employment of anthropological methods of inquiry and brief fieldwork. P/NP or letter grading.

3. Human Evolution, (5). Lecture, three hours; discussion, one hour. Required as preparation for both bachelor’s degrees. Evolutionary processes and evolutionary past of human species. P/NP or letter grading.

8. Archaeology: Introduction, (5). Lecture, three hours; discussion, one hour; one field trip. Required as preparation for both bachelor’s degrees. General survey of field and laboratory methods, theory, and major findings of anthropological archaeology, including case-study guest lectures presented by several campus archaeologists. P/NP or letter grading.

9. Culture and Society, (5). Lecture, three hours; discussion, one hour; fieldwork. Required as preparation for both bachelor’s degrees. Introduction to study of culture and society in comparative perspective. Examples from societies around world to illustrate basic principles of formation, structure, and distribution of human institutions. Of special concern is contribution and knowledge that cultural diversity makes toward understanding problems of modern world. P/NP or letter grading.

33. Culture and Communication, (5). Lecture, three hours; discussion, one hour. Required as preparation for both bachelor’s degrees. Introduction to study of communication from anthropological perspective. Formal linguistic methods compared with ethno- graphically oriented methods focused on context-bound temporal unfolding of communicative activ-
Upper Division Courses

Archaeology

110P. Principles of Archaeology. (4). Lecture, three hours; discussion, one hour (when scheduled). Requisi-
tie. Intended for students interested in conceptual structure of scientific archaeology. Arch-
are. May be repeated for credit with topic change. Pre-registration required. P/NP or letter grading.

114R. Ancient Civilizations of Andean South Amer-
ica. (4). Lecture, three hours. Pre-requisite: course 8 or 9. Pre-Hispanic and Conquest period cultures of Andean South America, as revealed by archaeology and early civilizations. Social and cultural factors in the period of Andean cultures. May be repeated for credit with topic change. P/NP or letter grading.

115A-M115B. Historical Archaeology. (4-4). (Same as History M102A-M102B.) Lecture, three hours; dis-
cussion, one hour (when scheduled). Designed for ju-
nior/seniors. P/NP or letter grading. M115A, World Perspect-ive. Historical archaeology requires appreci-
ation of the changing historical and archaeological landscape from simple graphs to virtual reality. Concurrently scheduled with course CM120Q. P/NP or letter grading.

111. Theory of Anthropological Archaeology. (4). Lecture, three hours. Pre-requisite: course 8. Method and theory with emphasis on archaeology within context of anthropology. Themes include theoretical develop-
ments over last 50 years, structure of archaeological reasoning, and selective survey of work on problems of general anthropological interest. P/NP or letter grading.

112. Old Stone Age Archaeology. (4). Lecture, three hours. Requisi-

113R. Southwestern Archaeology. (4). Lecture, three hours. Examina-
tion of prehistory of American Southwest from 11,000 years ago to historic times. Emphasis on descri-
ning and explaining cultural variation and change, employing evolutionary perspective. Special attention to advent of farming and settled towns, large-scale interactive networks, abduction of Four Corners area, and historic cultures. P/NP or letter grading.

114L. Archaeology of Chiefdoms. (4). Seminar, three hours. Enforced requisites: course 8. Examina-
tion of chiefdom societies in anthropological record, with readings focused on theory and data from archaeology, history, geography, and ethnohistorical literature. Illustration of how people in ranked non-state soci-
eties created remarkably rich cultures over entire globe beginning several millennia ago in both Old World and Americas. Letter grading.

114P. Ancient Civilizations of Mesoamerica. (4). Lecture, three hours. Archaeology of pre-Hispanic na-	ive cultures of Mesoamerica from late Paleocoeide through Spanish conquest, with emphasis on forma-
tive sociopolitical developments, classic period civil-
izations, and Aztec society as revealed by archaeology and early Spanish writing. P/NP or letter grading.

118. Selected Topics in Archaeology. (4). Lecture, three hours. Study of selected topics in archaeology. Consult Schedule of Classes for topics and instruc-
tors. May be repeated for credit with topic change. P/NP or letter grading.

119E. Archaeology of Egypt and Sudan. (4). (Same as Ancient Near East M105.) Lecture, three hours; laboratory, three hours. Ancient Egypt is well known for its iconic archaeological sites such as Giza Pyramids and Tomb of Tutankhamun. From these and thousands of less well-known sites, enormous variety of archaeological information can be gained. Discussion of particular archaeological themes, re-
gions, or sites, examination of methods of prehistoric and historic archaeology and how archaeologi-
apprates to understanding late antique, anti-

critic, and religious history. Background provided for development of group research projects—finding re-

gour, data gathering, analysis, interpretation, pre-

septation, and training on how to embark on research in this field. Computer laboratory component included in which student research is performed and presented in time map. P/NP or letter grading.

119P. Cities Past and Present. (4). Lecture, three hours. Requisi-
tie: course 8 or 9. Examination of an-
cient and modern cities to evaluate how urban form developed and continues to thrive as human social phenomenon. Contemporary observations compared with archaeological case studies, including South America, Africa, and ancient Near East. Letter grading.

Biological Anthropology

120. Survey of Biological Anthropology. (4). Lecture, three hours. Requisi-
tie: course 7. Recommended requisite: course 8. Development of group research projects—finding re-
sources, data gathering, analysis, interpretation, pre-

tation, and training on how to embark on research in this field. Computer laboratory component included in which student research is performed and presented in time map. P/NP or letter grading.

121C. Evolution of Genus Homo. (5). Lecture, three hours; discussion, one hour. Requisi-
tie: course 7 or 12. Origin and evolution of genus Homo, including ar-

cademic sapiens and Neanderthals. Morphology, ecology, and behavior of these groups. Course ends with appearance of modern humans. May be taken independently for credit. P/NP or letter grading.

122P. Human Osteology. (4). Lecture, three hours; laboratory, four hours. Examination of human skeletal and muscular systems, concerned with both form and function. Students expected to recognize important anthropological landmarks, identify fragmentary bones, and know origins, insertions, and action of major muscles. How to sex and age skele-
tons and introduction to paleopathology. Letter grading.

123A. Human Behavioral Ecology. (4). (Formerly numbered 124.) Lecture, three hours. Recommended requisite: course 7 or Life Sciences 1. Survey of re-

search in human behavioral ecology. Review of nat-
ural and sexual selection, kin selection, and reciprocal altruism. Emphasis on current empirical studies of modern human behavior from evolutionary perspec-
tive, including social organization, sexual division of labor, parenting strategies, conflict, and cooperation. P/NP or letter grading.

124B. Evolutionary Psychology. (4). Lecture, three hours. Recommended requisite: course 7 or Life Sci-
cences 1. Survey of evolutionary psy-

chology. Review of relevant theory and the concept of genes, including empirical studies of modern human behavior from evolutionary perspective, in-
cluding social behavior, decision making, language, culture, and behavior in general. P/NP or letter grading.

124P. Evolution of Human Sexual Behavior. (4). Lecture, three hours; discussion, one hour. Recom-

mended requisite: course 7 or 12. Examination of human sexual relations and social behavior from evo-

lutionary perspective. Emphasis on theories and evi-
dence for differences between men and women in the patterns of growth, reproduction, fertility, mortality, parenting, and relationships with members of opposite sex. Letter grading.

126. Selected Topics in Biological Anthropology. (4). Lecture, three hours. Study of selected topics in biological anthropology. Consult Schedule of Classes for topics and instructors. May be repeated for credit with topic change. Letter grading.

129Q. Paleopathology. (4). Lecture, three hours. Designed for juniors/seniors. Evidence of disease and trauma, as preserved in skeletal remains of ancient and modern human populations. Discussions of medical procedures (trepanation), health status, ethnic mutilation (e.g., body modification, footbinding), cannibalism, and sacrifice. Roles such activities have played in human societies. Letter grading.

Cultural Anthropology

130. Study of Culture. (4). Lecture, three hours; discussion, one hour (when scheduled). Enforced requisite: course 9. Designed for juniors/seniors. Twentieth-century elaboration and development of concept of culture. Examination of five major paradigms: culture as human capacity, as patterns and products of behavior, as systems of meaning and cognition, as generative structure and semiotic system, as component in social and cultural construction. (Core course for cultural field.) P/NP or letter grading.

131. Culture: What Makes It All Work. (4). Lecture, three hours. Preparation: two lower division social sciences courses (may be from different departments). Examination of questions addressed by anthropologists in their study of what is meant by culture. Consideration of theories of culture and evolutionary origins of culture. Review of new analytic methods that allow students to begin to do quasi-experimental research into nature of culture and introduction to multigenerational simulation as framework for modeling how culture can be both supra-organic and embedded in minds of culture bearers. P/NP or letter grading.

133P. Visual and Documentary Ethnography. (4). Lecture, three hours. Photographs in anthropology serve many purposes: as primary data, illustrations of words in books, documentation for disapperaging objects, field notes, material objects for museum exhibitions, and even works of art. Topics include relationships between subject and treatment of image, between art photography and ethnographic documentation, role of museum photographs and social action and reality construction. (Core course as human capacity, as patterns and products of behavior, one hour (when scheduled). Requisite: Cultural Anthropology ethnographic documentation, role of museum photography. (4).

133S. Ethnometrics and Anthropology of Numeration. (4). Lecture, three hours. Counting systems such as one, two, three, more or modern equivalent of one, two, three, infinity are widespread in human societies. Counting things is important part of everyday life. But indigenous thinking goes far beyond the simple act of counting. Counting, and conceptual systems underlying counting are integrated with concepts people have about themselves and their societies. Numerals is product of social life and not just reflection of one's experience with physical world. Exploration of different ways that indigenous mathematical thinking is embedded in human societies and cultures, ranging from use of fractals in African art to algebra of kinship terminologies to cosmological systems formulated around concepts of numbers. P/NP or letter grading.

135A-135B. Introduction to Psychological Anthropology. (4-5). P/NP or letter grading.

135A. Historical Development. (4) Lecture, three hours; discussion, one hour (when scheduled). Enforced requisite: course 9. Limited to juniors/seniors. Survey of field of psychological anthropology, with emphasis on early foundations and historical development of field. Topics include definition of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings. P/NP or letter grading.

135B. Current Issues. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Survey of field of psychological anthropology, with emphasis on current topics and research. Topics include study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings. P/NP or letter grading.

135T. Psychoanalysis and Anthropology. (4). Lecture, three hours; discussion, one hour (when scheduled). Exploration of mutual relations between anthropology and psychoanalysis, considering both theory and method. History of and current developments in psychoanalysis; anthropological and psychoanalytic approaches to culture and human behavior; cross-cultural psychoanalytic approach. Letter grading.

136Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4) Laboratory, three hours. Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some uses of observations and their implications for research in social sciences. P/NP or letter grading.

137. Selected Topics in Cultural Anthropology. (4). Lecture, three hours; discussion, one hour (when scheduled). Study of selected topics in cultural anthropology. Consult Schedule of Classes for topics and instructors. May be repeated for credit. P/NP or letter grading.

139. Field Methods in Cultural Anthropology. (5). Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Introduction to skills and tools of data ascertaining through fieldwork in cultural anthropology. Emphasis on techniques, methods, and concepts of ethnographic research and how basic observational information is systematized for presentation, analysis, and cross-cultural comparison. Letter grading.

M139P. Fieldwork in Asian American and Pacific Islander Communities. (4). (Same as Asian American Studies M143A.) Lecture, three hours; discussion, one hour. Introduction to qualitative research methods and application of techniques in data collection, analysis, and reporting. Critical reflection of issues related to identity, migration, multiculturalism, tourism, and indigenous research. Field excursions and guest lecturers from local community included. Given in Hawai’i. P/NP or letter grading.

Linguistic Anthropology

M140. Language in Culture. (5). (Same as Linguistics M146.) Lecture, three hours; discussion, one hour; fieldwork, two hours. Requisite: course 33 or Linguistics 20. Study of language as aspect of culture; relation of habitual thought and behavior to language and culture. Language in action. How language and classification of experience. Logistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology. (Core course for linguistics field.) P/NP or letter grading.

141. Ethnography of Everyday Speech. (5). Lecture, three hours; discussion, one hour; fieldwork, three hours. Requisite: course 33. Designed for juniors/seniors. Course has two interrelated objectives: (1) to introduce students to ethnography of communication—description and analysis of situated communicative behavior—and sociocultural knowledge that it reflects and (2) to train students to recognize, describe, and analyze relevant linguistic, proxemic, and kinesic aspects of face-to-face interaction. P/NP or letter grading.

M142R. Culture of Jazz Aesthetics. (4). (Same as Ethnomusicology M130 and World Arts and Cultures M138.) Lecture, three hours. Enforced requisite: course 9 or 33 or Ethnomusicology 20A or 20B or 20C or World Arts and Cultures 20. Aesthetics of jazz from point of view of musicians who shaped jazz as art form in 20th century. Listening to and interacting with professional jazz musicians who answer questions and give musical demonstrations. Analytical resources and historical knowledge of musicians and ethnomusicologists combined with those interested in jazz as cultural tradition. P/NP or letter grading.

C144. Native American Languages and Cultures. (4). Lecture, three hours. Requisite: course 33 or American Indian Studies M10. Introduction and comparative analysis of sociocultural aspects of language use by Native North America and indigenous communities. Specific foci include both micro and macro-sociolinguistic topics. Micro-sociolinguistic topics are comprised of such issues as multilingualism, cultural differences regarding appropriate communicative behavior, and identification within speech communities (e.g., male and female speech, baby talk, ceremonial speech, etc.). Macro-sociolinguistic considerations include language contact and language shift, language change and language in American Indian education. Concurrently scheduled with course C243P. P/NP or letter grading.
147. Selected Topics in Linguistic Anthropology. (4). Lecture, three hours. Study of selected topics in linguistic anthropology. Consult Schedule of Classes for topics and instructors. May be repeated for credit. P/NP or letter grading.

M148W. Talk and Body. (5). (Same as Applied Linguistics M151W and Communication Studies M123W) Lecture, three hours; discussion, one hour. Enforced prerequisite: English Composition 3 or 3H or English as a Second Language. Relationship between language and human body raises host of interesting topics. View anthropological phenomena as embodiment become possible when body is analyzed, not as isolated entity, but as visible agent whose talk and action are lodged in both processes of human embodiment. Writing assignments will require pursuit courses of action that count in their lives. Satifies Writing II requirement. Letter grading.

149A. Language and Identity. (4). Lecture, three hours. Requisite: course 33. Language as social phenomenon. Introduction to several angles from which language use can be critically examined as integral to interactions between individuals and between social groups. Letter grading.

149B. Gender and Language in Society. (4). Lecture, three hours; discussion, one hour (when scheduled). Requisite: course 33. Examination of role language plays in social construction of gender identities and ways in which gender impacts language use and ideology. Letter grading.

149C. Multilingualism: Communities and Histories in Contact. (4). Lecture, three hours. Requisite: course 33. Examination of communicative, political, and poetic aspects of use of two or more languages (multilingualism) by individuals and by groups. Broad themes in social theory, anthropological inquiry, sociolinguistics, and literary studies in lectures to contextualize class readings. Letter grading.

149D. Language, Culture, and Education. (4). Lecture, three hours. Requisite: course 33. Examination of various ways in which culture, and language in particular, influence not only educational processes and outcomes, but also very conceptions of what normal development processes and desirable educational outcomes are. Letter grading.

M149E. Language Socialization. (4). (Same as Applied Linguistics M125S) Seminar, four hours. Exploration of process of socialization through language, and socialization to use language across lifespan, across communities of practice within single society, and across different ethnic and socioeconomic groups. Examination of topics in which verbal interaction between novices and experts is structured linguistically and culturally. Letter grading.

149F. Language and Social Organization through Life History. (4). Discussion, one hour (when scheduled). Requisite: course 33. Examination of forms of participation and talk-in-interaction across various phases of life cycle from birth to old age, using videotaped interactions of naturally occurring activities. How language and interaction within specific contexts are used to constitute identity and how interaction order resulting from face-to-face interaction provides building blocks for larger formations that arise from such activities. Letter grading.

149S. Gender and Language across Communities. (4). Lecture, three hours; discussion, one hour. Requisite: course 33. Examination of how language practices contribute to expression of gender identities in different social groups and situations. Completion of 20 hours of service learning in community service program coordinated through Center for Community Action and Research. Active part is to work in organized service that is conducted in and meets needs of communities. Letter grading.

Social Anthropology

153P. Economic Anthropology. (4). Lecture, three hours. Requisite: course 9. Introduction to anthropological perspectives for interpretation of economic life and institutions. Economic facts to be placed in their larger social, political, and cultural contexts; examination of modes of production, distribution, and consumption of goods and services in their relation to social networks, power structures, and institutions of family, kinship, and class. P/NP or letter grading.

M155. Women’s Voices: Their Critique of Anthropology of Japan. (4). (Same as Gender Studies M155.) Lecture, three hours. Preparation: introductory sociocultural anthropology course. Anthropology of Japan has long viewed Japan as homogeneous whole. Restoration of diversity and contradiction in it by listening to voices of Japanese women in various historical contexts. P/NP or letter grading.

M155Q. Women and Social Movements. (4). (Same as Gender Studies M155Q) Lecture/discussion, three hours. Recommended preparation: prior gender studies or anthropology courses. Comparative studies of social movements (e.g., nationalist, socialist, liberal/reform), beginning with Russia and China and including Cuba, Algeria, Guinea-Bissau, Mozambique, Nicaragua, and Iran. Analysis of women’s participation in social transformations and centrality of gender interests. P/NP or letter grading.

156. Anthropology of Religion. (4). Lecture, three hours. Survey of various methodologies in comparative study of religious ideologies and action systems, including understanding particular religions through cross-cultural and diachronic perspective. Anthropology of various ways in which culture, and language in particular, influence not only educational processes and outcomes, but also very conceptions of what normal development processes and desirable educational outcomes are. Letter grading.

158. Hunting and Gathering Societies. (4). Lecture, three hours. Requisite: course 9. Survey of hunting and gathering societies. Examination of their distinctive features from both ecological and cultural viewpoints. Discussion of possibility of developing general frameworks for synthesizing these two viewpoints. Use of this synthesis to illustrate the role of hunting and gathering societies as understanding of complex societies. P/NP or letter grading.

M159O. Past People and Their Lessons for Our Own Future. (5). (Same as Geography M153 and Honors Collegium M152.) Lecture, two hours; discussion, two hours. Examination of modern and past people that met varying fates, as background to examination of how other modern people are coping or failing to cope with similar issues. P/NP or letter grading.

159. Warfare and Conflict. (4). Lecture, three hours. Examination of conflict and violent confrontations as these have been treated in anthropological literature. Cross-cultural comparison of modern and pre-modern warfare, and large-scale conflicts. Letter grading.

M159P. Constructing Race. (4). (Same as African American Studies M159P and Asian American Studies M159P.) Lecture, three hours. Examination of race, socially constructed category, from anthropological perspective. Consideration of development of racial categories over time and in different regions, racial passing, multiracial identity in U.S., whiteness, race in popular culture, and race and identity. P/NP or letter grading.

Applied Anthropology

M162. Language Endangerment and Linguistic Revitalization. (4). (Same as American Indian Studies M162.) Lecture, three hours; activity, one hour. Requisites: course 33, American Indian Studies M162. Examination of causes and consequences of current worldwide loss of linguistic diversity and revitalization of kinds of efforts that members of threatened heritage language communities have produced in their attempt to revitalize their languages. P/NP or letter grading.

167. Urban Anthropology. (4). Lecture, three hours; discussion, one hour (when scheduled). Designed for junior/senior social science majors. Introduction to modern industrial cities and urban life. Examination of notion of urban space in context of social relations by drawing from historical and cross-cultural urban ethnographies. Urban space is created according to
needs of capital and actions of urban subjects. Explo-ration of ways in which class, gender, race, and geog-raphy shape or contest perspectives and priorities on urban issues. Overview of social and cultural anthro-pology of inner Asia, including Mongolia, Tibet, and Soviet Central Asia. Topics include environment and economic adaptation, politics in traditional isolation and within framework of recent national integration, kinship, forms of marriage and status of women, reli-gion and social order in Hindu/Buddhist culture con-tact zone, and current problems of modernization. P/NP or letter grading.

175S. Japan. (4). Lecture, three hours. Overview of contemporary Japan, the Japanese society. General introduction, kinship, marriage and family life, social mobility and education, norms and values, religions, patterns of interpersonal relations, social deviance. P/NP or letter grading.

Middle East
176. Culture Area of Middle East. (4). Lecture, three hours. Study of Middle East has suggested many the-ories as to developmental history of humankind, evo-lution of human society, birth of monotheism, and or-gin of agriculture, trade, and cities. Presentation of anthropological material relevant to understanding Middle East as culture area, and Islam as basis of its shared tradition. Letter grading.

Pacific
177. Cultures of Pacific. (4). Lecture, three hours. Four major culture areas of Australia, Melanesia, Poly-ne sia, and Micronesia featured within the context of prehistory, and language distribution of whole region. Distinctive sociocultural features of each culture area presented in context of their adaptive significance. P/NP or letter grading.

Regional Cultures
179. Selected Topics in Regional Cultures. (4). Lec-ture, three hours. Study of selected topics in regional cultures. Consult Schedule of Classes for topics and instructors. May be repeated for credit. P/NP or letter grading.

History, Theory, and Method

Special Studies

191HB. Field Methods. (4). Seminar, three hours. Limited to anthropology honors program students. Training of major field methods in anthropology to prepare students to conduct their own field research. Letter grading.

191HC. Data Analysis. (4). Seminar, three hours. Limited to anthropology honors program students. Survey of major forms of data analysis in anthropo-logy to aid honors students in analysis of their own research data. Letter grading.

191HD. Writing for Anthropology. (4). Seminar, three hours. Limited to anthropology honors program students. Teaching of writing skills, with focus on how to write honors theses. Letter grading.

194. Research Group Seminars: Anthropology. (1). Seminar, one hour. Limited to undergraduate students who are part of research group or internship. Discuss-ion of research methods and techniques in dis-cipline or of research faculty members or students. May meet concurrently with graduate research sem-inar. May be repeated for credit with topic change. P/NP grading.

197. Individual Studies in Anthropology. (2 to 8). Tutorial, to be arranged. Limited to juniors/seniors. Indi-vidual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned readings and tangible evidence of mastery of subject matter (e.g., paper or other product) re-quired. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research in Anthropology. (2 to 8). Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Indi-vidual contract required. P/NP or letter grading.

Graduate Courses
200. Conceptualizing Anthropological Research. (4). Seminar, three hours. Introduction to process of conceptualizing research projects, including formulation, theorizing research questions, and developing appropriate methodology to carry out research. Preparation of proposals and presentation to group for critique. S/U or letter grading.

M201A-M201B. Graduate Seminars: Archae-ology. (4-4). (Same as Archaeology M201A-M201B). Seminar, three hours. Course M201A is required of anthropology students in archaeology field. Seminar discussions based on carefully selected list of 25 major works related to development of archaeology in...
202. Biological Anthropology Colloquium. (4), Seminar, three hours. Selected topics on status of current biological anthropology. May be repeated for credit. S/U or letter grading.

203A-203B-203C. Core Seminars: Sociocultural Anthropology. (4-4-4), Seminar, three hours. Letter grading.

203C. Scientific and Interpretive Frameworks in Contemporary Anthropology. (4), Seminar, three hours. Recommended requisite: course 203B. Examination of selected contemporary works and issues in field of sociocultural anthropology. Letter grading.

204. Core Seminar: Linguistic Anthropology. (4), Seminar, three hours. Theoretical and methodological foundations of study of language structure and language use from sociocultural perspective. Discussion of linguistic, philosophical, psychological, and anthropological contributions to understanding of verbal communication as social activity embedded in culture. S/U or letter grading.

Archaeology

CM212. Introduction to Archaeological Sciences. (4), (Same as Ancient Near East CM269.), Lecture, three hours. Basic understanding of newly introduced methods and techniques throughout field of archaeology to implement them and to appreciate and evaluate results of their use by others who have contributed to their scholarly publications or theoretical models. Systematic instruction in digital data management and mining, scientific analysis of materials (including geological and biochemical techniques), and visual presentation of data and research results (ranging from simple graphs to virtual reality). Concurrently scheduled with course CM110Q. S/U or letter grading.

211. Classification in Archaeology: Method and Theory. (4), Seminar, three hours. Limited to graduate anthropology and archaeology students. Discussion of issues that have guided arguments about how archaeological classification of artifacts should be conducted, with focus on ceramic classification and discovery of cultural types. Methods for implementing descriptive and interpretive classification illustrated with lithic and pottery examples. Review of relationship between classification, style, and function. S/U or letter grading.

212. Selected Laboratory Topics in Archaeology. (4), (Same as Archaeology M205A), Lecture, three hours. Designed for graduate students in archaeology or in other departments. Specialized analysis of particular classes of cultural remains. Topic may be one of following: zooarchaeology, paleoethnobotany, ceramics, lithic analysis, rock art. Laboratory experience with collections and data. May be repeated for credit with topic change. S/U or letter grading.

217. Introduction to Laboratory Training in Archaeology. (6), (Same as Archaeology M205B), Lecture, three hours; laboratory, two hours minimum. Advanced laboratory training for graduate students with extensive laboratory experience. Emphasis on laboratory-based topics, including but not limited to lithic analysis, ceramic analysis, zooarchaeology, and paleoethnobotany. May be repeated for credit with topic change. S/U or letter grading.

214. Selected Topics in Prehistoric Civilizations of New World. (4), Lecture, three hours. Mesicoamerican and Andean civilizations normally constitute major focus of seminar. May be repeated for credit. S/U or letter grading.

M216. Topics in Asian Archaeology. (4), (Same as Art History M262A), Lecture, three hours. Designed for graduate students. Topics may include identification of ethnic groups in archaeology, archaeology of religion, archaeological reflections of commerce and trade and their influence on social development, archaeology of language dispersal, cultural contact and nature of cultural “influence.” Letter grading.

217. Explorations in Prehistory, Southwest. (4), Seminar, three hours. Examination of processes of societal evolution, emphasizing usefulness of variety of explanatory models from general systems theory, ecology, and evolutionary theory. Specific research questions vary with each course offering. May be repeated for credit. S/U or letter grading.

217A. Archaeology of Urbanism. (4), Seminar, three hours. Evaluation of cities as most complex form of human population center, using both archaeological and modern examples. Observations about material culture and space enable assessment of social dynamics as cities are constructed and lived in by variety of different economic, ethnic, social, and political groups. Letter grading.

Biological Anthropology

220. Current Problems in Biological Anthropology. (4), Seminar, three hours. Detailed examination of current research in biological anthropology (specific topics to be announced). Emphasis on nature of hypotheses and their testing in ongoing student and faculty research. May be repeated for credit. S/U or letter grading.

222. Graduate Core Seminar: Biological Anthropology in Review. (4), Seminar, three hours. Graduate core course in biological anthropology. Topics include evolutionary theory, behavior of nonhuman primates, hominid evolutionary history, and contemporary human variation. Letter grading.

Cultural Anthropology

233R. Anthropology and Media Theory. (4), Seminar, three hours. Limited to graduate students. Examination of theoretical assumptions and debates that animate visual anthropology very broadly defined, including issues of interpretation, production, and reception of visual media, which includes ethnographic, documentary, and feature films, as well as television programming. S/U or letter grading.

233T. Ethnographies of Information Technology. (4), Seminar, three hours. Emerging work on new information economy, with emphasis on ethnography. Exploring landscape of anthropological and material interactions from range of disciplines, including sociology, geography, urban studies, and management studies. S/U or letter grading.

237. Seminar: Psychocultural Studies and Medical Anthropology. (4), Seminar, three hours. Devoted to present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychological anthropology, deviance, learning, perception, cognition, and psychocultural perspectives on change. S/U or letter grading.

M234Q. Psychological Anthropology. (4). (Same as Psychiatry M272), Lecture, three hours. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture and psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

234T. Anthropological Perspectives on Human Medicine. (4), (Same as Psychiatry M272A), Lecture, three hours. Exploration of how sociocultural and political dynamics shape perceptions of and understandings about human body, and how, reciprocally, those perceptions and understandings influence social processes. Includes materials from both non-Western and Western societies. Letter grading.

238. Native American Revitalization Movements. (4), (Same as History M260C), Lecture, two hours; discussion, one hour. Examination of revitalization movements among native peoples of North America (north of Mexico). Specific revitalization includes Handsome Lake, 1870 and 1890 Ghost Dances, and Peyote Religion. Letter grading.

239P. Selected Topics in Field Ethnography. (4 to 8), Seminar, three hours. Discussion and practicum in various techniques for collecting and analyzing ethnographic field data. S/U or letter grading.

Linguistic Anthropology

M241. Topics in Linguistic Anthropology. (4), (Same as Linguistics M246C), Lecture, three hours. Problems in relations of language, culture, and society. May be repeated for credit. S/U or letter grading.

M242. Ethnography of Communication. (4), (Same as Applied Linguistics M207), Lecture, three hours. Designed for graduate students. Seminar devoted to examining representative scholarship from fields of sociolinguistics and ethnography of communication. Particular attention to theoretical developments including relationship of ethnography of communication to such disciplines as anthropology, linguistics, and sociology. Topical foci include style and strategy, speech variation, varieties of noncasual speech genres, languages and ethnicity, and nonverbal communication behaviors.

243A. Language Ideologies: Political Economy of Language Beliefs and Practices. (4), Lecture, three hours. Language ideological research problematizes fundamental assumptions about speakers’ use of language and communicative practices: (1) speakers’ awareness of these structures and processes and (2) relationship of this consciousness to speakers’ political economic perspectives and to actual communicative conduct. Letter grading.
243P. Native American Languages and Cultures. (4). Lecture, three hours; seminar, two hours. Preparation: prior coursework in either anthropology, linguistics, or American Indian studies. Introduction and comparative analysis of sociocultural aspects of language use in Native North American speech communities. Specific topics include both micro- and macro-sociolinguistic issues. Micro-sociolinguistic topics are comprised of such issues as multilingualism, cultural differences regarding appropriate community behavior and interaction within speech communities (e.g., male and female speech, baby talk, ceremonial speech, etc.), and macro-sociolinguistic considerations include language use and its relationship to language change and language in American Indian education. Course is currently scheduled with course C144. S/U or letter grading.

247. Topics in Semantics and Pragmatics. (4). (Same as Applied Linguistics M266.) Seminar, four hours. Recommended preparation: three current courses in theoretical specializations in semantics and pragmatics. Topics vary from year-to-year and may include metaphor, theories of reference and denotation, honorifics, and deixis. May be repeated for credit with topic change. Letter grading.

Social Anthropology

Applied Anthropology

263P. Gender Systems. (4). (Same as Gender Studies M263P.) Seminar, three hours. Current theoretical developments in understanding gender systems cross-culturally, with emphasis on relationship between systems of gender, economy, ideational systems, and social inequality. Selection of ethnographic cases from recent literature. S/U or letter grading.

263Q. Advanced Seminar: Medical Anthropology. (2 to 4). (Same as Community Health Sciences M244, Nursing M273, and Psychiatry M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Basis for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

264. Latin America: Traditional Medicine, Shamanism, and Folk Illness. (4). (Same as Community Health Sciences M264 and Latin American Studies M264.) Lecture, three hours. Recommended preparation: courses 132, bilingual English/Spanish skills. Examination of role of traditional medicine and shamanism in Latin America and exploration of how indigenous and mestizo groups diagnose and treat folk illness and Western-defined diseases with variety of health-seeking methods. Examination of art, music, and ritual and case examples of religion and healing practices via lecture, film, and audiotape. Letter grading.

266N. Narrative and Times of Trouble. (4). Seminar, three hours. Recommended requisite: one course from 203A, 203B, 203C, 204, or M242. Exploration of how linguistic and psychological/medical anthropology inform each other in relation to narrative and times of trouble. Topics include narrative sense-making in response to illness and misfortune; phenomenology of time; narrative, healing, and experience; remembering through narrative; narrative subjectivity; and narrative selves in motion. Letter grading.

269R. Repatriation of Native American Human Remains and Cultural Objects. (4). Lecture, two hours; discussion, one hour. Native Americans have recently been successful in obtaining passage of federal and state laws repatriating human remains and cultural objects to them. Examination of this phenomenon. Concurrently scheduled with course C169R. Letter grading.

Regional Cultures

271. Contemporary Problems in Africa. (4). Seminar, three hours. Problematic issues in Africa in light of classical anthropological literature and recent work by anthropologists and other fieldworkers in Africa, with cases from eastern and southern Africa. S/U or letter grading.

276. Japan in Age of Empire. (4). (Same as Asian M292 and History M286.) Seminar, three hours. Designed for graduate students. Japan expanded its empire into East and Southeast Asia. Coverage of that period and array of anthropological studies conducted in Japan’s colonies and occupied areas in the post-WWII, Occupation period of study of colonialism. S/U or letter grading.

History, Theory, and Method

262. Research Design in Cultural Anthropology. (4). Lecture, three hours. Primarily designed for graduate students preparing for fieldwork. Unique position of anthropology among sciences and resulting problems for scientific research design. Review of typical research problems and appropriate methods. Students prepare their own research designs and present them for class discussion. S/U or letter grading.

284. Qualitative Research Methodology. (4). (Same as Community Health Sciences M218.) Seminar, three hours. S/U or letter grading. One-hour intensive seminar/field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to healthcare. Letter grading.

284P. Anthropological Methods and Data Analysis. (4). Seminar, three hours. Limited to graduate students. Recommended preparation: research design coursework. Focus is on qualitative methods used in anthropological research and techniques for analysis of qualitative data. Particular methods depend on and are appropriate to research questions and designs students bring to class. S/U or letter grading.

285P. Selected Topics in Anthropological Archaeological Theory. (4). Seminar, three hours. Designed for graduate students. Variable topics course on important theoretical subjects in anthropological archaeology. Topics include early village societies, specialization and cultural complexity, ethnography for archaeologists, power and hierarchy in intermediate societies, materialist/declarative exchange systems. May be repeated for credit. S/U or letter grading.

288. Relational Models Theory and Research Design. (4, Seminar, three hours. Relational models theory (RMT) poses that people in all cultures use combinations of just four relational models (RMs) to organize most aspects of most social coordination: community, exchange, matching, and market pricing. Exploration of how people use these RMs to motivate, generate, constitute, coordinate, judge, and sanction social interaction. RMT aims to account for what is universal and what varies across cultures, positing necessity for cultural complements that specify how and with whom each relational model operates. Readings may include presentations and research in social anthropology, sociolinguistics, social theory, semiotics, linguistics, development, cognitive, social, political, moral, clinical, and cultural psychology, neuroscience, evolution, sociology, family studies, management, marketing, and consumer psychology, economics, justice, public health, public policy, and international development. Letter grading.

291. Culture, Brain, and Development Forum. (1). (Same as Applied Linguistics M232, Education M286, Neuroscience M293, and Psychology M248.) Seminar, 90 minutes every other week. Interdisciplinary seminar series to provide graduate students preparation for current research in understanding complex relationship between culture, brain, and development. S/U grading.

293S. Culture, Brain, and Development. (4). (Same as Applied Linguistics M233, Education M286, Neuroscience M294, and Psychology M247.) Seminar, three hours. Designed for graduate students. Integration of knowledge across different disciplines to understand interrelations of culture, brain, and development, where development includes both human ontogeny and human phylogeny. S/U or letter grading.

294. Human Computer Systems Forum. (1). Seminar, 90 minutes every other week. Interdisciplinary seminar series to provide students with exposure to current research in understanding nature of human societies from complexity and multidisciplinary perspective. May be repeated for credit. S/U grading.

298S. Interdisciplinary Relationship Science. (4). (Same as Education M297, Psychology M296, and Sociology M297.) Lecture, three hours. Limited to graduate students. Diverse approaches to relationship science in fields of anthropology, education, psy-
chology, and sociology. Focus on themes of understanding biological, behavioral, and cultural aspects of relationships through diverse theoretical and methodological approaches. Use of broad definition of interpersonal relationships, including relationships such as parent-child, teacher-student, sibling, peer, kin, romantic relationships, marriages, and friendships. S/U or letter grading.

297. Selected Topics in Anthropology. (2 to 4). Seminar, three hours. Designed for graduate students. Study of selected topics of anthropological interest. Consult Schedule of Classes for topics and instructors. May be repeated for credit. S/U or letter grading.

Special Studies

375. Teaching Apprentice Practicum. (1 to 4). Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Teaching Anthropology. (2 to 4). Seminar/workshop, three hours. Designed for graduate students. Preparation of all new teaching assistants. Workshop/seminar in teaching techniques, including evaluation of each student’s own performance as teaching assistant. Four-day workshop precedes beginning of term, followed by 10-week seminar during term designed to deal with problems and techniques of teaching anthropology. Unit credit may be applied toward full-time equivalence but not toward nine-course requirement for M.A. S/U grading.

501. Cooperative Program. (2 to 8). Tutorial, to be arranged. Preparation: consent of UCLA adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 12). Tutorial, to be arranged. Ph.D. dissertation research or writing. Students must have completed qualifying examinations and ordinarily take no other coursework. S/U grading.

Russell G. Schuh, Ph.D., Chair

Professors

Charles Goodwin, Ph.D.
Marjorie Harness Goodwin, Ph.D.
Nina M. Hyams, Ph.D.
Olga Kagan, Ph.D.
Paul V. Kroksrity, Ph.D.
Reynaldo F. Macias, Ph.D.
Elinor Ochs, Ph.D.
Susan J. Plann, Ph.D.
Russell G. Schuh, Ph.D.
Hongyin Tao, Ph.D.
Noreen M. Webb, Ph.D.
Olga T. Yokoyama, Ph.D.

Professors Emeriti

Lyle F. Bachman, Ph.D.
Marianne Celce-Murcia, Ph.D.
Susan R. Curtiss, Ph.D.
Frederick D. Erickson, Ph.D.
Evelyn R. Hatch, Ph.D.
Shoichi Iwasaki, Ph.D.
Edward L. Keenan, Ph.D.
Pamela L. Munro, Ph.D.
Earl J. Rand, Ph.D.
Emanuel A. Schegloff, Ph.D.
John H. Schumann, Ed.D.

Adjunct Assistant Professors

Jisoo Kim, Ph.D.
Annelie M. Rugg, Ph.D.

Scope and Objectives

UCLA is a dynamic place to study applied linguistics, a discipline that investigates language with relevance to issues in the everyday world. Situated in discursive and interactive contexts, language is essential to all aspects of life from personal to social. Interdisciplinary in nature, applied linguistics sheds new light on the nature of language and language use. Faculty members, including affiliated members in the Anthropology, Asian Languages and Cultures, Chicana and Chicano Studies, Education, Linguistics, Psychology, and Sociology Departments whose participation reinforces the interdisciplinary nature of applied linguistics research, represent a wide range of expertise and experience in language-related research.

The Department of Applied Linguistics is at the forefront of research in the field of applied linguistics and offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees, as well as one undergraduate minor and a graduate certificate program.

The UCLA Academic Senate approved the establishment of the Department of Applied Linguistics, the discontinuance of the graduate degree and certificate programs, the Language Teaching minor, and African Languages B.A., and the transfer of the Applied Linguistics B.A. to the Department of Linguistics effective Fall Quarter 2014. Students currently enrolled in any of the programs may complete them under current requirements.

Undergraduate Study

African Languages B.A.

Preparation for the Major

Required: Linguistics 20, nine courses from African Languages 1A through 42C and 197 (six in one language and three in another).

Transfer Students

Transfer applicants to the African Languages major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course and two years of one language and one year of one other language.

Applied Linguistics B.A.

The Applied Linguistics major involves both theory-research and practice. On the theory-research side, it provides students with the opportunity to investigate the links between language, culture, social organization, and learning. On the practical side, with focus on service learning, it engages students in the community, schools, and workplaces of our geographic setting. The major encourages students to reflect on their lives with regard to language use and to bring to the academic resources of their education on these reflections.

Students must have an overall grade-point average of 2.0 or better to enter the major. Each preparation course must be passed with an average grade of C or better and must be completed before enrolling in courses for the major. A 2.0 grade-point average in courses for the major is required.

Preparation for the Major

Required: Applied Linguistics 10 or 10W; two courses from 20, 30 (or 30W), 40 (or 40W), Anthropology 33, and Psychology 10; Linguistics 20; and completion of the equivalent of the sixth term of one foreign language.

Students who complete an advanced upper division language course are considered to have completed the equivalent of whatever courses are requisite to that advanced language course (e.g., if students complete German 152, they have automatically satisfied the requirement of the sixth term of work in German).

Transfer Students

Transfer applicants to the Applied Linguistics major with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of one foreign language, one introduction to linguistics course, one introduction to psychology course, one introduction to linguistic anthropology course, and one introduction to sociology course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm transferring.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: A minimum of 13 upper division courses, including three courses in an African language; African Languages, Linguistics 103; two courses from Film and Television 106C, French 121, Theater 102E, World Arts and Cultures 134, or one or more special 4-unit African Languages 197 tutorials focusing on literature in an African language; three courses from Ethnomusicology 136A, 136B, History 121A, 121B, 121C, 122A, 122B, 123A, 123B, 124A, 124B, Linguistics 110, 120A, 120B or 127, C140, M146, 170, Political Science 151A, 151B, 151C, Linguistics 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) and completion of the sixth term in one of the following major African languages are strongly recommended: Afrikaans, Arabic, Dutch, French, German, Portuguese.
Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tchtm for up-to-date information regarding transfer selection for admission.

The Major

Applied Linguistics M121SL, M165SL, M172SL, and C175 serve as capstone courses. Courses designated as both service learning and capstone courses may be applied toward both the service learning and capstone requirements. Service learning and capstone courses may not be taken during the freshman or sophomore year. No more than two courses from 195, 197, 198, and 199 may be applied toward the major.

Honors Program
Honors in applied linguistics are awarded at graduation to those students who have completed all preparation courses and requirements for the major with an overall grade-point average of 3.5 or better and who have received a grade of A in Applied Linguistics 198 or 199.

Language Teaching Minor
The Language Teaching minor provides students with an overview of current pedagogical theories and practices in language teaching; the experience of observing the language acquisition process both in and out of the classroom; a supervised practicum experience in a variety of language classroom settings; and an opportunity to reflect on the interaction of theory and practice in language teaching.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 80 quarter units, and file a petition with the undergraduate adviser.

Required Lower Division Course (5 units): Linguistics 20 with a grade of C or better.

Required Upper Division Courses (32 units): Eight courses as follows: one from Applied Linguistics 101, 101W, or 102W; C110, C116, C118B; and a minimum of four elective courses from C111, C112, C113, C114, C115A, C117, C118A, C153, C155, C157, M161W, M165SL, English 113A, Indo-European Studies M150 (or Linguistics M150), Linguistics 130, C140, 175.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least 16 units applied toward the minor must be taken in residence at UCLA.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa/gradlibrary/pgmsqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Graduate Council of the UCLA Academic Senate voted to temporarily rescind the admissions suspension for the Applied Linguistics C.Phil. and Ph.D. degrees effective Fall Quarter 2013.

The Department of Applied Linguistics offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Applied Linguistics. A Teaching English as a Second/Foreign Language Certificate is also offered; however, admissions were suspended as of Spring Quarter 2010.

African Languages
Lower Division Courses
1A-1B-1C. Elementary Swahili. (4-4-4). Lecture, five hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Major language of East Africa, particularly Tanzania. P/NP or letter grading.

2A-2B-2C. Intermediate Swahili. (4-4-4). Lecture, four hours. For enforced requisite: course 1C. Course 2A is enforced requisite to 2C. P/NP or letter grading.

4. Conversational Swahili. (1). Seminar, one hour. Enforced requisite: courses 1A, 1B. Practice in Swahili conversation on topics of general interest, including East African current events, for Swahili students at intermediate level. May be repeated for credit. P/NP grading.

5. Building Careers through Knowledge of Africa. (1). Lecture, one hour. Guest lecturers, representing diverse careers such as academia, business, arts, nonprofits, and religious work, speak about study of Africa and careers they have pursued after studying about Africa in college and/or graduate school. P/NP grading.

1A-1B-1C. Elementary Zulu. (4-4-4). Lecture, five hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Major language of South Africa, particularly Tanzania. Reading, writing, oral, and aural skills at intermediate level. P/NP or letter grading.

5. Building Careers through Knowledge of Africa. (1). Lecture, one hour. Guest lecturers, representing diverse careers such as academia, business, arts, nonprofits, and religious work, speak about study of Africa and careers they have pursued after studying about Africa in college and/or graduate school. P/NP grading.

12A-12B-12C. Intermediate Yoruba. (4-4-4). Lecture, four hours. Enforced requisite: course 11C. Course 12A is enforced requisite to 12B, which is enforced requisite to 12C. P/NP or letter grading.

14A-14B-14C. Intermediate Tigrinya. (4-4-4). Seminar, four hours. Enforced requisite: course 55. Course 14A is enforced requisite to 14B, which is enforced requisite to 14C. Major language of Eritrea and Tigray, province of Ethiopia. Reading, writing, oral, and aural skills at intermediate level. P/NP or letter grading.

17. Intensive Elementary Zulu. (12). Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 7A, 7B, 7C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. Letter grading.

18. Intensive Intermediate Zulu. (12). Lecture, 20 hours (eight weeks). Enforced requisite: course 7C or 17. Intensive instruction (equivalent to courses 8A, 8B, 8C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. Letter grading.

27. Intensive Elementary Xhosa. (12). Seminar, 20 hours. Basic communication skills and intensive instruction in Xhosa, with emphasis on listening and speaking. Use of various instructional media, including textbook, CD-ROMS, interactive Web-based materials, and videos. P/NP or letter grading.

29. Intensive Elementary Igbo. (12). Seminar, 20 hours. Basic communication skills and intensive instruction in Igbo, with emphasis on listening and speaking. Use of various instructional media, including textbook and audio/video materials. P/NP or letter grading.

31A-31B-31C. Elementary Bambara. (4-4-4). Lecture, five hours. Course 31A is enforced requisite to 31B, which is enforced requisite to 31C. Major language of Mali, also widely spoken in adjacent parts of West Africa; includes Maninka (Malinke), Dyula, and other mutually intelligible dialects. P/NP or letter grading.

32A-32B-32C. Intermediate Bambara. (4-4-4). Lecture, four hours. Enforced requisite: course 31C. Course 32A is enforced requisite to 32B, which is enforced requisite to 32C. P/NP or letter grading.

41A-41B-41C. Elementary Hausa. (4-4-4). Lecture, five hours. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Major language of northern Nigeria and adjacent areas. P/NP or letter grading.

42A-42B-42C. Intermediate Hausa. (4-4-4). Lecture, four hours. Enforced requisite: course 41C. Course 42A is enforced requisite to 42B, which is enforced requisite to 42C. P/NP or letter grading.

51A-51B-51C. Elementary Amharic. (4-4-4). Lecture, five hours (15 hours for intensive course). Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Major language of Ethiopia. P/NP (undergraduates), S/U (graduates), or letter grading.

52A-52B-52C. Intermediate Amharic. (4-4-4). Lecture, five hours (15 hours for intensive course). Enforced requisite: course 51C. Course 52A is enforced requisite to 52B, which is enforced requisite to 52C. P/NP (undergraduates), S/U (graduates), or letter grading.

61A-61B-61C. Elementary Wolof. (4-4-4). Lecture, five hours. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Major language of Senegambia. P/NP or letter grading.

62A-62B-62C. Intermediate Wolof. (4-4-4). Lecture, four hours. Enforced requisite: course 61C. Course 62A is enforced requisite to 62B, which is enforced requisite to 62C. P/NP or letter grading.

96. Crash Course in Swahili for Volunteers. (2). Seminar, two hours. Preparation for students about to travel to East Africa for volunteer or other work experience. Students learn to interact with speakers of Swahili in authentic contexts by asking and answering questions. Reading of simple texts and understanding of short oral instructions and descriptions in standard Swahili. P/NP or letter grading.

97. Viewing, Thinking and Intermediate Studies in African Languages. (1 to 6). Seminar, five hours. Instruction at elementary or intermediate level, based on needs of students, in any language for which appropriate facilities are available. Those taught in past included Akan, Efik, Ewe, Fula, Igbo, Lingala, Luganda, and Xhosa. May be repeated for credit. Letter grading.

Upper Division Courses

103A-103B-103C. Advanced Swahili. (4-4-4). Lecture, four hours. Requisite: course 2C. Course 103A is requisite to 103B, which is requisite to 103C. Readings in Swahili literature and the contemporary press. Discussions mainly in Swahili. P/NP or letter grading.

123A-123B-123C. Advanced Yoruba. (4-4-4). Lecture, four hours. Requisite: course 12C. Course 123A is requisite to 123B, which is requisite to 123C. Readings in Yoruba literature and the contemporary press. Discussions mainly in Yoruba. P/NP or letter grading.

133A-133B-133C. Advanced Bambara. (4-4-4). Lecture, four hours. Requisite: course 32C. Course 133A is requisite to 133B, which is requisite to 133C. Readings in Bambara literature and the contemporary press. Discussions mainly in Bambara. P/NP or letter grading.

143A-143B-143C. Advanced Hausa. (4-4-4). Lecture, four hours. Requisite: course 42C. Course 143A is requisite to 143B, which is requisite to 143C. Readings in Hausa literature and the contemporary press. Discussions mainly in Hausa. P/NP or letter grading.

150A-150B. African Literature in English Translata. (4-4-4). Lecture, four hours. Narrative and didactic prose and poetry of sub-Saharan Africa and written prose and poetry of South Africa. P/NP or letter grading.

153A-153B-153C. Advanced Amharic. (4-4-4). Lecture, five hours (15 hours for intensive course). Requisite: course 52C. Course 153A is requisite to 153B, which is requisite to 153C. Readings in Amharic literature and the contemporary press. Discussions mainly in Amharic. P/NP (undergraduates), S/U (graduates), or letter grading.

171. Language in South Africa: Histories, Cultures, Politics. (4). Lecture, three hours. Recommended requisite: course 170A. Knowledge of African languages is not required. Introduction to South Africa centered around language, using variety of disciplinary perspectives as lenses to examine variated landscape of South African languages. What does South Africa’s multilingual past and present tell us about culture and politics? To what extent does language inform volatile debates about race, sexuality, economics, and healthcare? What of those debates matter? In keeping with multilingual dynamics of South African society, course is based on multiple forms of information and requires multiple levels of interaction. P/NP or letter grading.

172. Languages and Cultures of Nigeria. (4). Lecture, two hours; discussion, one hour. Recommended requisite: course 11A, 25, 29, or 41A. Knowledge of African languages is not required. Introduction to Nigeria and Nigeria’s cultural and linguistic diversity. How does language shape ethnic identities in Nigeria (one of Africa’s most multilingual nations) and Nigerian diaspora? Analysis of historical, cultural, political, and linguistic circumstances that shape the use of language in contemporary interactions. P/NP or letter grading.

173. Preparing to Study Abroad in Africa. (4). Lecture, three hours; discussion, one hour. Recommended preparation: one year of African language. Development of skills, perspectives, and practical knowledge about living and studying abroad, with particular reference to Africa and greater emphasis on those African countries with existing Education Abroad and Summer Travel Study relationships with UCLA (e.g., Ghana, Egypt, Senegal, South Africa, and Tanzania). May be repeated for credit. P/NP or letter grading.

187. Survey of African Languages. (4). Lecture, three hours; discussion, one hour. Recommended requisite: one year of one African language. Development of skills, perspectives, and practical knowledge about living and studying abroad, with particular reference to Africa and greater emphasis on those African countries with existing Education Abroad and Summer Travel Study relationships with UCLA. Exploration of other countries that may be of special interest to students. Readings, discussions, and written work on personal and national/cultural values and their role in how one views other cultures, culture shock and stages of cross-cultural adjustment, language-learning strategies, verbal and nonverbal patterns of communication, and African academic traditions, programs, and campus cultures. P/NP or letter grading.

197. Individual Studies in African Languages. (1 to 6). Tutorial, four hours. Limited to juniors/seniors. Individual intensive instruction at advanced level or supervised research, based on needs of individual students, in any language or group of languages for which appropriate facilities are available. Scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

202A-202B-202C. Comparative Bantu. (4-4-4). Lecture, four hours. Requisites: Linguistics 110, 165A, 165B. Recommended: three quarter courses in one Bantu language selected from 1A through 8C. In-vestigations of grammatical hierarchy and the extent and external relationships of Bantu. S/U or letter grading.

596. Directed Studies. (1 to 8). Tutorial, to be arranged. Direct study of topics in Linguistics. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

Applied Linguistics

Lower Division Courses

10. Language in Action: Perspectives from Applied Linguistics. (5). Lecture, three hours; discussion, two hours. Not open for credit to students with credit for course 10W. Introduction to sociolinguistics, topics, approaches, research, and resources in interdisciplinary field of applied linguistics as it is practiced at UCLA. Series of presentations by various faculty members whose work is in those areas. Introduction to various ways language works in real life and how this can be described and studied in systematic ways; designed to teach students to write effectively. Letter grading.

10W. Language in Action: Perspectives from Applied Linguistics. (5). Lecture, three hours; discussion, two hours. Requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 10. Introduction to rich variety of topics, approaches, research, and resources in interdisciplinary field of applied linguistics as it is practiced at UCLA. Series of presentations by various faculty members whose work is in those areas. Introduction to various ways language works in real life and how this can be described and studied in systematic ways; designed to teach students to write effectively. Satisfies Writing II requirement. Letter grading.

20. Ethical Issues in Language Assessment: Using Language Tests in Education and Society. (5). Lecture, four hours; discussion, one hour. Uses of language tests in education and society. Language tests have become pervasive part of education systems and society, being used for wide variety of purposes such as identifying English language learners in schools, making admissions decisions to universities, placing students into language programs, screening potential citizens, and selecting employees. But how useful are language tests for making these high-stakes decisions? By what means can we determine the usefulness of these tests and fairness of decisions that are made be evaluated? What are consequences, both beneficial and harmful, of using language tests for these purposes? Reading and discussion of selected articles that address these questions. Letter grading.

30. Language and Social Interaction. (5). Lecture, four hours. Not open for credit to students with credit for course 30W. Exploration of range of topics related to study of language and society, particularly how lan- guage affects social lives and how social organization affects use of language. Topics include different ap- proaches to study of language in society (theories and methodologies) and the relationship between language and identity (such as socioeconomic status, race, gender, and situational identity), and issues concern- ing language and culture (such as cross-cultural...
second language interaction. Examination of how cul-
ture, ethnicity, and ownership of language are made
relevant in everyday life. Discussion of second lan-
guage acquisition, sociolinguistic, and pedagogical set-
tings and examination of heritage language interac-
tion when relevant. Letter grading.

112SL. Teaching Reading in Second/Foreign/Heritage
Language through Service Learning, (5). Lecture,
four hours; fieldwork, four hours. Designed for
students with credit for course 212. P/NP or letter
grading.

Upper Division Courses

100. Discourse and Society, (4). Lecture, four hours;
discussion, two hours. Important contemporary per-
spectives for study of language in its social and cul-
tural matrix. Topics include computational organization,
narrative, repair and grammatical organization, lan-
guage in cultural settings, language socialization, and
language impairment and institutional discourse.
Focus on analysis of audio and video recordings of talk
in a variety of natural settings. P/NP or letter grading.

101. Introduction to Language Learning and Lan-
guage Teaching, (5). Lecture, four hours. Not open
for credit to students with credit for course 101W. Ex-
ploration of skills and conditions involved in suc-
scessful second and foreign language learning; appli-
cation of this knowledge in development of frame-
work for teaching second and foreign languages.
Letter grading.

101W. Introduction to Language Learning and Lan-
guage Teaching, (5). Lecture, four hours; discus-
sion, one hour. Enforced requisite: English Composi-
tion 3 or 3H or English as a Second Language 36.
Not open for credit to students with credit for course 101W. Ex-
ploration of skills and conditions involved in suc-
scessful second and foreign language learning; appli-
cation of this knowledge in development of frame-
work for teaching second and foreign languages.
Letter grading.

102W. Nature of Learning, (5). Lecture, four hours;
discussion, one hour. Enforced requisite: English Composi-
tion 3 or 3H or English as a Second Language 36.
Exploration of learning via examination of second
language acquisition. All normal children ac-
quire language of their family and community (i.e., first
language acquisition), and many, especially those
who aquire language of their family and community
in isolation, continue to acquire fluent second
language. Successful second language acquisition is
radically variable, and many learners, in spite of substantial opportunity and abil-
ity, achieve proficiencies that fall far below that of
native speakers. Focus on factors of emotion,
emotion and cognition and nature of aptitude and motiva-
tion in learning. Primary vehicle for investigation to be
autobiographies of second language learners.
Satisfies Writing II requirement. Letter grading.

110. Methodology for Second/Foreign/Heritage
Language Education, (4). Lecture, four hours. Req-
quisite: Linguistics 20. Survey of phonological
structure and practice in teaching second/foreign/heritage
languages, including (1) past and present methods used to teach
second/foreign/heritage languages, (2) current theory and
practice underlying skills-based instruction and
integrated approaches, (3) factors that affect second
language acquisition and learning, (4) development of
knowledge base in and rational basis for design, de-
velopment, implementation, and evaluation of second/
foreign/heritage language programs. Concurrently
scheduled with one credit course.

C111. Writing for Second/Foreign/Heritage Lan-
guage Education, (4). Lecture, four hours; fieldwork,
four hours. Designed to give overview of phonetic
features of North American English (NAE) that relate
to teaching of English as a second/first/heritage
language. Examination of (1) segmental and su-
prasegmental elements of NAE, (2) how English
sound system contrasts with sound systems of other
languages, (3) activities for teaching pronunciation,
and (4) current materials for teaching pronunciation
(textbooks, videotapes, computer software, Internet
resources). Students gain experience in teaching pro-
nunciation while providing valuable and meaningful
service to community partners who want help with
oral components of English as a second language.
P/NP or letter grading.

C114. Listening and Speaking for Second/Foreign/
Heritage Language Education, (4). Lecture, four hours.
Requisite: course 101W or C110. Survey of theoretical
and methodological issues related to second/foreign/heritage
language spoken discourse, including theoretical examination
of classroom materials and overview of methods of evalua-
tion of student performance. Concurrently
scheduled with course C214. P/NP or letter grading.

C115A. Media for Second/Foreign/Heritage Lan-
guage Education, (4). Lecture, four hours. Requisite:
course 101W or C110. Rationale and pedagogical ap-
plication for using media equipment and materials in
second/foreign/heritage language classroom. Training in
standard classroom media equipment operation, basic
materials preparation, and production tech-
niques, and review of published media materials, with
focus on their application to second/foreign/heritage
language instruction. Concurrently scheduled with
course C215A. P/NP or letter grading.

C115B. Computer-Enhanced Language Teaching
and Learning, (4). Seminar, four hours; fieldwork,
four hours. Requisite: course 101W or C110. De-
signing and conducting a computer-aided or computer-
ized current second/foreign/heritage language teaching
methods through application of computer technology.
Project-based seminar to encourage par-
ticipants to develop materials, either individually or
misunderstanding and language socialization). Empir-
ic and critical analysis of set of language data to be
carried out as part of course project. Letter grading.

30W. Language Interaction in Everyday Life and
Academia, (2). Lecture, four hours; discussion,
three hours; discussion, two hours. Enforced requi-
site: English Composition 3 or 3H or English as a
Second Language 36. Not open for credit to students
with credit for course 30W. Introduction to lan-
guage from the perspective of gender. Second or
related topics related to study of language and social interac-
tion in both mundane and professional settings, par-
ticularly how language affects social lives and how social
organization affects use of language. Examination of
research and examples in English and other languages
to explore nature of male and female “genderlects”
and gendered language, as reflected in lexic, lan-
guage behavior, and ownership of language, and
issues concerning language and culture (such as cross-cultural misunderstanding
and language socialization). Satisfies Writing II re-
quirement. Letter grading.

40. Language and Gender: Introduction to Gender
Differences and Stereotypes, (5). Lecture, four hours;
discussion, one hour. Not open for credit to students
with credit for course 40W. Introduction to language
from the perspective of gender. Second or related
topics related to study of language and social interac-
tion in both mundane and professional settings, par-
ticularly how language affects social lives and how social
organization affects use of language. Examination of
research and examples in English and other languages
to explore nature of male and female “genderlects”
and gendered language, as reflected in lexic, lan-
guage behavior, and ownership of language, and
issues concerning language and culture (such as cross-cultural misunderstanding
and language socialization). Satisfies Writing II re-
quirement. Letter grading.

80W. Language in Globalizing World: Second Lan-
guage Interaction in Everyday Life and Academia,
(5). Lecture, four hours; discussion, one hour. En-
forced requisite: English Composition 3 or 3H or
En-
lish as a Second Language 36. Not open for credit to
students with credit for course 80W. Introduction to lan-
guage and social interaction, with specific emphasis on
second language communication. Second or foreign
language considered highly important world-
wide in personal, intellectual, and professional life. As
important domain of research, second language inter-
action is widely studied by applied linguists, conver-
sation analysts, and linguistic anthropologists with
varying interests. Study of various interactional phe-
nomena observed in second language communica-
tion. Discussion of relevant linguistic concepts such as
turn-taking and repair as resources for analyzing

140 / Applied Linguistics

as turn-taking and repair as resources for analyzing

sation analysts, and linguistic anthropologists with

C117SL. Teaching Literature in Language Education through Service Learning. (5). Lecture, four hours; fieldwork, four hours. Development of rationale for selecting, evaluating, and using literary works in second language or ESL/EFL settings. Students tutor foreign language and ESL students at selected service learning sites, analyze and critique background knowledge, and analyze, and discuss ways in which they used skills and ideas presented in class and readings. Students share observations with and make suggestions to others. P/NP or letter grading.

C118A. Fundamentals of Second/Foreign/Heritage Language Teaching. (4). Seminar, four hours. Requisite: course 101W or C110. Designed for students interested in microcomponents of effective second/foreign language teaching. In-depth examination of decision-making process underlying planning and implementation of lessons. Provides structured environment in which to hone fundamental teaching skills such as conducting warm-up activities, managing student dynamics, eliciting student contributions, correcting errors, sequencing lesson components, and transitioning between them. Concurrently scheduled with course C218B. P/NP or letter grading.

C118B. Second/Foreign/Heritage Language Teaching Practicum. (4). Seminar, three hours; fieldwork, four hours. Requisites: courses 101W or C110, C116. Theoretical and practical concerns regarding second/foreign language teaching, with emphasis on fieldwork experiences and grounding of solutions to problems faced in current research in language education and language pedagogy. Concurrently scheduled with course C218B. P/NP or letter grading.

C119A. Seminar, four hours; C119B. Seminar, two hours.

M121SL. Oral History: Latino New Immigrant Youth. (5). (Formerly numbered 121SL.) (Same as Chicana and Chicano Studies M121SL and Spanish M121SSL.) Seminar; three hours; tutoring, two and one half hours. Theory, methodology, and practice of oral history, together with background information on Latino immigration to U.S. and development of oral histories of Latino immigrants. Letter grading.

M125. Language Socialization. (4, Same as Anthropology M149E.) Seminar, four hours. Exploration of process of socialization through language, and socialization to use language across lifespan, across communities, and across different ethnic and socioeconomic groups. Examination of ways in which verbal interaction between novices and experts is structured linguistically and culturally. Concurrently scheduled with course C215. Letter grading.

CM128. Teaching and Learning of Heritage Languages. (4, Same as Slavic CM114.) Lecture, three hours. Consideration of issues relevant to heritage language learners (HLLs) and to heritage language (HL) instruction. Lectures on such topics as definitions of HLLs and HLs; linguistic, demographic, sociolinguistic, and sociocultural profile of HLLs; particular HL groups most represented among HLLs; institutional history, and conceptual and attitudinal, impact toward HLLs; impact of student motivation and expectations on HL curriculum and teaching approaches; similarities and differences between HLLs and foreign language learners (FLLs) regarding teaching methods and materials; diagnostic testing and needs analysis; use of oral/aural proficiency as springboard for literacy instruction; optimization of instruction of mixed HL and FL classes. Action research component included. Concurrently scheduled with course CM228. P/NP or letter grading.

M131. Alternative Approaches to Language Acquisition. (4, Same as Disability Studies M131.) Seminar, four hours. Examination of everyday experience of language delay, disorder, difference, and difficulty from disability studies perspective. Presentation of key concepts and terminology of culture, disability, and language use. Discussions and assignments critically evaluate findings on language acquisition by asking questions from disability studies about inclusion and individual experience, individually constructed experience, and power. P/NP or letter grading.

M144. Fundamentals of Translation and Interpretation. (5, Same as Linguistics M144.) Lecture, four hours; discussion, one hour. Requisite: knowledge of English and at least one other language. Enforced requisite: Linguistics 20. Examination of translation as both interpretative, and social aspects of translating and interpreting between two languages or dialects. Survey of development of translation theories and rise of community interpreting and critical role of language brokering. P/NP or letter grading.

M165SL. Taking It to Street: Spanish in Community. (5, Same as Chicana and Chicano Studies M170SL, and Spanish M172SSL Seminar; three hours; fieldwork, 10 hours. Enforced requisite: Spanish 25 or 27. Service learning course to give students opportunity to use cultural and linguistic knowledge acquired in Spanish classes in real-world settings. Students required to spend minimum of eight to 10 hours per week at agreed on site in Latino community. P/NP or letter grading.

170. Field Methods in Discourse and Society. (4). Seminar, four hours. Ethnographic approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in community settings. Emphasis on hands-on activities within theoretical frameworks that consider language as social and cultural practice. Letter grading.

M172SL. Latinos, Linguistics, and Literacy. (5, Same as Chicana and Chicano Studies M170SL and Spanish M172SSL Seminar; four hours; field project, four to six hours. Recommended requisite: Spanish 100A. In-depth study of various topics related to literacy, including different definitions of literacy, programs for adult pre-literate, literacy and gender, approaches to literacy (whole language, phonics, Freire’s liberation pedagogy, theory of writing as basis for alphabetic writing, and national literacy campaigns. Required field project involving Spanish-speaking adults in adult literacy programs. P/NP or letter grading.

C175. Critical Approaches to Multilingualism. (5, Seminar, four hours. Examination of how identities and social relationships are defined through language in multilingual societies, with focus on how they have been produced, sustained, and renegotiated in societ-ies that have experienced colonialism. Assessment of effects of colonial and postcolonial language poli-tics (and ideologies) in verbal arts, media, ed-ucation, and government, and everyday conversation. How might critical applied linguists in general, and postcolonial theory in particular, help to better under-
stand politics of language use in multilingual contexts? Concurrently scheduled with course C275. P/NP or letter grading.

M179. Language Policies and Politics in U.S.: Comparative History. (4). (Same as Chicana and Chicano Studies M179.) Lecture, four hours. Historical survey of language policies and language groups in U.S. as context to understanding social, legal, and political constraints on bilingualism. Review of federal, state, and institutional language policies and politics, with focus on schooling, administration of government, justice, and workplace. P/NP or letter grading.

195. Community Internships in Applied Linguistics and TESL. (5), Tutorial, one hour; fieldwork, 10 hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide journal of their experience. Final research paper required. May be repeated for credit. Individual contract with supervising faculty member required. Letter grading.

197. Individual Studies in Applied Linguistics. (2 to 4), Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study for undergraduate students who desire individualized specialized treatment of issues in applied linguistics beyond those covered in current course offerings. Scheduled meetings to be arranged between faculty member and student. As signed reading and evidence of mastery of subject matter required. May be repeated for credit. Individual contract required; see undergraduate student adviser. Letter grading.

198. Honors Research in Applied Linguistics. (2 to 4), Tutorial, to be arranged. Limited to juniors/seniors. Development and completion of honors thesis or research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

Graduate Courses

C202. Foundations of Language Acquisition. (4), Seminar, four hours. Requisite: Linguistics 20. Introduction to theoretical and empirical research in language acquisition, with emphasis on language acquisition from psychological, sociolinguistic, and philosophical perspectives. Linguistic nature of learners, interlanguage systems, and underlying cognitive mechanisms posited to explain them, as well as various social, affective, cognitive, and neurobiological factors that affect ultimate success of learner. Concurrently scheduled with course C155. Letter grading.

M207. Ethnography of Communication. (4). (Same as Anthropology M204Z.) Lecture, three hours. Designed for graduate students. Seminar devoted to examining representative scholarship from fields of sociolinguistics and ethnography of communication. Particular attention to theoretical developments including relationship of ethnography of communication to such disciplines as anthropology, linguistics, and sociology. Topical foci include style and strategy, speech variation, varieties of nonverbal speech genres, languages and ethnicity, and intercultural communication behavior. S/U or letter grading.

208. Foundations of Discourse Analysis. (4), Seminar, four hours. Survey course to introduce basic tenets of discourse analysis, including discourse analysis and syntax, process and understood discourse, conversational analysis, analysis of speech events, unequal power discourse, and analysis of classroom discourse. Letter grading.

C210. Methodology for Second/Foreign/Heritage Language Education. (4), Lecture, four hours. Requisites: course C202, Linguistics 20. Survey of theory and practice in teaching second/foreign/heritage language programs, including (1) past and present methods used to teach second/foreign/heritage languages, (2) current theory, and practice underlying skills-based instruction and integrated approaches, (3) factors that affect second language acquisition and learning. Development of knowledge base in and rational basis for design, development, and evaluation of second/foreign/heritage language programs. Concurrently scheduled with course C110. S/U or letter grading.

C211. Writing for Second/Foreign/Heritage Language Education. (4), Lecture, four hours. Requisite: course 1011W or C110. Survey of theoretical and methodological issues related to second/foreign/heritage language written discourse and composition for second/foreign/heritage language learners. Concurrently scheduled with course C111. Additional assignments required of graduate students. S/U or letter grading.

C215B. Computer-Enhanced Language Teaching and Learning. (4), Seminar, four hours; fieldwork, four hours. Requisite: course C210. Designed for students interested in computer-enhanced language learning in second/foreign/heritage language environments. Web-based teaching (basics of creating and maintaining class websites), designing computer-enhanced teaching materials (e.g., PowerPoint presentations), managing classroom data (e.g., Excel grade calculation), and creating electronic teaching portfolios, with focus on pedagogical rationale for classroom instruction and on professionalizing current second/foreign/heritage language teaching methods through application of computer technology. Project-based seminar to encourage participants to develop materials, either individually or collaboratively, for their current or intended teaching settings/populations. Concurrently scheduled with course C115B. Letter grading.

C218A. Fundamentals of Second/Foreign/Heritage Language Teaching. (4), Seminar, four hours; fieldwork, four hours. Requisites: courses C210, C216. Designed for students interested in microcomponents of effective second/foreign/heritage language teaching. In-depth examination of decision-making process underlying planning and implementation of lessons. Provides structured environment in which to hone fundamental teaching skills such as conducting warm-up activities, managing student dynamics, eliciting student contributions, correcting errors, sequencing lesson components, and transitioning between them. Concurrently scheduled with course C118A. S/U or letter grading.

C218B. Second/Foreign/Heritage Language Teaching Practicum. (4), Seminar; three hours; fieldwork, four hours. Requisites: courses C210, C216. Theoretical and practical concerns regarding second/foreign/heritage language teaching, with emphasis on field work experiences and grounding of students to problems facing them in current research in second/foreign/heritage language pedagogy. Concurrently scheduled with course C118B. S/U or letter grading.

222. Discourse-Centered Language Learning. (4). Seminar, four hours. Requisite: course C202. Case-study and project-based research seminar on classroom language learning with authentic discourse input (usually in form of video and audio recordings of natural spoken discourse). Development of theoretical and technical tools for determining what can be learned from such recordings and how this learning might be facilitated, based on current second language research. Letter grading.

223. Topics in Psycholinguistics. (4). Seminar, four hours. Requisite: course C202. Detailed examination of specialized topics in psycholinguistics. Topics vary from year to year and may include language and cognition, and cognitive processes of evaluating learning theories and their influence on language teaching. May be repeated for credit with topic change. Letter grading.

M225A-M225B. Seminars: Corpus Linguistics. (4-6). (Same as Asian M222A-M222B.) Seminar, three hours. Construction and exploitation of computerized language corpora for studying issues in areas such as lexicology, discourse grammar, language change and variation, language learning, and teaching. Discussion of special issues in working with East Asian language corpora. In Progress (M225A) and S/U or letter grading.

CM228. Teaching and Learning of Heritage Languages. (4). (Same as Slavic CM214.) Lecture, three hours. Consideration of issues relevant to heritage language learners (HLL) and to heritage language (HL) instruction. Discussion of the differences between HLs and HLLs regarding teaching methods and materials; diagnostic testing and needs analysis; use of oral/aural proficiency as springboard for HL instruction; construction of HL-KL classrooms. Action research component included. Concurrently scheduled with course CM128. S/U or letter grading.

229. Current Issues in Language Acquisition. (4). Seminar, four hours. Requisite: course C202. Designed to explore current issues in language acquisition from both theoretical and applied research perspectives and to provide actual experience in addressing current issues. Specific topics vary according to trends in field. May be repeated for credit with topic change. Letter grading.

230. Advanced Seminar: Interlanguage Analysis. (4). Seminar, four hours. Requisite: course C202. Analysis of interlanguage from various points of view (e.g., topic-comment structure, tense, aspect, modality, thematic structure of utterances), with aim of understanding how interlanguage is organized. Original research projects. May be repeated for credit with topic change. Letter grading.

231. Crosslinguistic Topics in Language Acquisition. (4). Seminar, four hours. Requisite: course 220. Advanced seminar on language acquisition in which one particular linguistics topic (e.g., development of tense, aspect, mood), agreement) is pursued from crosslinguistic and cross-disciplinary perspectives. Focus on language-specific versus universal (i.e., crosslinguistically valid) mechanisms of language development. May be repeated for credit with topic change. Letter grading.

M232. Culture, Brain, and Development Forum. (1). Same as Anthropology M293, Education M285, Neuroscience M293, and Psychology M248.) Seminar, 90 minutes every other week. Interdisciplinary seminar series to provide students with exposure to current research in understanding complex relationship between culture, brain, and development. S/U grading.

M233. Culture, Brain, and Development. (4). Same as Anthropology M293, Education M285, Neuroscience M293, and Psychology M248.) Seminar, three hours. Designed for graduate students. Integration of knowledge across different disciplines to understand interrelationships between culture, brain, and development, where development includes both human ontogeny and human phylogeny. S/U or letter grading.

238. Neurobiology of Language and Learning Research Seminar. (4-8). Seminar, four hours; field work/research, eight hours. Research in neurobiology of language and learning, with focus on critical reading of relevant publications. Students must work toward specific program-relevant product, such as thesis, dissertation proposal, qualifying paper, dissertation research paper, or grant proposal. May be repeated for credit with topic change. S/U or letter grading.

242. Experimental Design and Statistics for Applied Linguistics. (4). Seminar, four hours. Requisite: course C204. Specialized topics of interest to graduate students in applied linguistics, with focus on design and interpretation of research projects in field. Exploration of issues in both qualitative and quantitative study design, interpretation of findings, and presentation of results. Emphasis varies according to current theoretical methodological trends in field. Project required. Letter grading.

249. Current Issues in Language Assessment. (4). Seminar, four hours. Requisite: course C204. Designed to explore current issues in language assessment from both theoretical and practical perspectives and to provide actual experience in addressing current issues. Specific topics vary according to trends in field. May be repeated for credit with topic change. S/U or letter grading.

250. Advanced Seminar: Language Assessment. (4). Seminar, four hours. Requisite: course C204. Designed to cover application of technical issues such as reliability, validation, criterion-referenced assessment, generalizability theory, item-response theory, or program evaluation to language assessment in depth. Specific topics vary. Project required. May be repeated for credit with topic change. S/U or letter grading.

258. Assessment Laboratory. (4). Laboratory, four hours. Collaborative coursework, with focus on specific theoretical and applied issues in development of innovative language assessment procedures for use in different settings. Determined by research being conducted by working group in language assessment. Activities include designing and developing measurement instruments, gathering and analyzing data, and interpreting study results. May be repeated for credit. S/U or letter grading.

M262. Topics in Communicative, Cognitive, and Functional Approaches to Linguistic Analysis. (4). (Same as German M262.) Seminar, three hours. Requisite: German C142 or C238. Readings, discussions, analyses, and validation procedures within sign-based linguistics, cognitive grammar, and discourse-functional approaches to language. Consideration of impact of grammaticalization theory on various non-formal approaches to synchronic linguistics. Discussion of work by Connt-Morava, Diver, Garcia, Goldberg, Jaensch, Lakoff, Langacker, and Verhagen, as well as Bybee, Traugott, and others. S/U or letter grading.

263. Crosslinguistic Topics in Functional Grammar II: Typology. (4). Seminar, four hours. Survey of particular linguistic area from typological perspective within functional grammar framework (e.g., tense/ mood/aspect, nominal reference, word order). May be repeated for credit with topic change. S/U or letter grading.

265. Topics in Functional Grammar. (4). Seminar, four hours. Requisite: course C201. Specialized topics in functional grammar of interest to graduate students in applied linguistics. Emphasis varies according to current topics of theoretical import in field, such as voice, nominal reference, and word order. May be repeated for credit with topic change. Letter grading.

M266. Topics in Semantics and Pragmatics. (4). (Same as Anthropology M247.) Seminar, four hours. Requisite: course C201. Detailed examination of specialized topics in semantics and pragmatics. Topics vary from year to year and may include metaphor, theories of reference and denotation, honorific speech, evidentiality, reported speech, etc. May be repeated for credit with topic change. Letter grading.

267. Talk and Body. (4). Seminar, four hours. Requisite: course M206 or M207 or 208. Investigation of organization of language and embodied action within human interaction. Use of both audio and video recordings of human interaction in variety of natural settings to examine range of phenomena, including ways in which processes of interaction between speakers and hearers are consequential for detailed organization of emerging talk, projection, gaze, gesture, participation frameworks, narrative as embodied multiparty activity, integration of semiotic structure in environments with organizations, and organization of aphasia in discourse. Student presentation of relevant data in seminar format. Letter grading.

268. Crosslinguistic Research Laboratory. (4). Laboratory, four hours. Advanced procedures in data analysis for crosslinguistic research, including critical reading of relevant publications. Students must work toward specific program-relevant product, such as thesis, dissertation proposal, qualifying paper, dissertation research paper or grant proposal. May be repeated for credit. S/U or letter grading.

according to current topics of theoretical and prac-
tical concern in field. May be repeated for credit with
topic change. Letter grading.

M270A. Ethnographic Methods in Language, Inter-
action, and Culture I, (4). (Same as Anthropology
M249A.) Seminar, three hours. Requisite: course
M207 or Sociology 244A. Ethnographic approaches
to recording and analyzing communicative events
and practices in their sociocultural context, involving stu-
dent-initiated fieldwork in community setting. Em-
phasis on hands-on activities within theoretical frame-
works that consider language, culture, and social and
cultural practice. Devoted to skills related to collecting so-
cially and culturally meaningful data. Letter grading.

271. Advanced Seminar: Cohesion Analysis of En-
GLISH STRUCTURE. (4). Seminar, four hours. Reque-
site: course C216. Investigation in depth of selected lin-
guistic features of oral and written texts that go be-
yond sentence level and thus signal cohesion. Study of
structures to determine their function in variety of
English texts representing several discourse types.
Letter grading.

274. Advanced Seminar: Contextual Analysis of
English texts representing several discourse types.
Letter grading.

275. Critical Approaches to Multilingualism. (5).
Seminar, four hours. Examination of how identities
and social relationships are defined through language
in multilingual societies, with focus on how they have
been distributed in the everyday conversation
and/or structures in oral and written texts to deter-
mine when and why they occur. Beginning with fre-
cquency and distribution of form(s), exploration of
meaning and function of form(s), Letter grading.

C275. Critical Applied Linguistics Working Group. (1
to 4). Seminar, four hours. Designed for Applied Linguis-
tics M.A., and Ph.D. students. Collaborative exploration
and discussion of current research and literature on
critical approaches to applied linguistics, including
critical discourse analysis. Development of large-
scale research project (M.A. thesis, QP, or Ph.D. dis-
sertation), conducting of review of current research,
and presentation of work in progress to receive crit-
ical feedback from class participants. May be re-
peated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4). Sem-
inar, to be arranged. Preparation: apprentice per-
sion. Employment as teaching assistant, associate,
or fellow. Teaching apprenticeship under active guid-
ance and supervision of regular faculty member re-
sponsible for curriculum and instruction at UCLA.
May be repeated for credit. S/U grading.

Seminar/student presentations, to be arranged. M.A.
candidates present and defend results of their thesis
research. Required of all candidates but may not be
applied toward M.A. degree requirements. Candi-
dates for Ph.D. in Applied Linguistics may also use
this course to report on their dissertations. S/U
grading.

495. Training and Supervision of Teaching Assis-
tants. (2). Seminar, two or more hours. Required of all
teaching assistants. Orientation, preparation, and su-
 pervision of teaching assistants. Various topics, in-
cluding effective teaching methods and strategies.
May not be applied toward any degree requirements.
S/U grading.

501. Cooperative Program. (2 to 8). Tutorial, to be
arranged. Preparation: consent of UCLA graduate ad-
viser and graduate dean, and host campus instructor,
depending upon departmental cooperation. May be
used to record enrollment of UCLA students in courses
taken under cooperative arrangements with USC. S/U
grading.

596. Directed Individual Study. (2 to 12). Tutorial,
to be arranged. Independent study in one area of applied
linguistics. May not be applied toward M.A. course
requirements. Up to 8 units may be applied toward Ph.D. course
requirements. May be repeated for credit. S/U or letter
grading.

597. Preparation for Ph.D. Candidacy Examination.
(4 to 8). Tutorial, to be arranged. Preparation: com-
pletion of at least six courses of 32-unit requirement
for Ph.D. May not be applied toward 32-unit require-
ment. May be repeated for credit. S/U grading.

598. M.A. Research and Thesis Preparation. (4 to
8). Tutorial, to be arranged. Limited to graduate stu-
dents. Survey of research needs and thesis prepara-
tion. Includes optional sections of experiments in
and statistical methods in Fall Quarter. Credit (4 units)
toward degree is allowed only once, but all M.A. can-
didates must enroll in course each term they are reg-
kistered and engaged in thesis preparation. S/U
grading.

599. Research for and Preparation of Ph.D. Disser-
tation. (4 to 16). Tutorial, to be arranged. Preparation:
advancement to Ph.D. candidacy. Required of all
Ph.D. candidates each term they are registered and
engaged in dissertation preparation. May be repeated
for credit but may not be applied toward Ph.D. course
requirements. S/U grading.

ARCHAEOLOGY
Interdepartmental Program

John K. Papadopoulos, Ph.D., Chair

Faculty Committee
Kara M. Cooney, Ph.D. (Near Eastern Languages and
Cultures)
Richard G. Lesure, Ph.D. (Anthropology)
John K. Papadopoulos, Ph.D. (Classical
Philosophy)
Lothar von Falkenhausen, Ph.D. (Art History)

Scope and Objectives
The interdisciplinary Archaeology Program offers
M.A. and Ph.D. degrees in Archaeology. It brings
together interests and specialties repre-

tended by those departments offering courses in
archaeology, as well as others offering
courses relevant to archaeology.

The primary purpose of the program is to train
scholars in archaeology for university-level

teaching and research and other professional
aims. Its resources are intended for those ar-
chaology students whose academic goals
cannot be met within any single department
and who, consequently, require an individually
designed plan of study combining academic
preparation in two or more departments. Appli-
cations are especially encouraged from stu-
dents whose interests may form bridges with
disciplines and departments not offering ar-
chaology (e.g., botany, chemistry, geology,
mathematics, statistics, and zoology). There
are opportunities for participation in a variety of
field, laboratory, and computer studies.

Graduate Study

Official, specific degree requirements are de-
tailed in Program Requirements for UCLA
Graduate Degrees, available at the Graduate
Division website, http://grad.ucla.edu/gasasa/
lbrary/pgmintro.htm. In many cases, more
detailed guidelines may be outlined in an-
nouncements, other publications, and websites
of the schools, departments, and programs.

Graduate Degrees
The Archaeology Program offers Master of Arts
(M.A.), Candidate in Philosophy (C.Phil.), and
Doctor of Philosophy (Ph.D.) degrees in Ar-
chaology but does not encourage applicants
who seek only an M.A. degree.
Archaeology

Lower Division Course

30. Science in Archaeology. (4). (Formerly numbered Ancient Near East 30.) Lecture, three hours; discussion, one hour. Archaeology is rapidly developing due to ongoing introduction of new hardware, software, and information dissemination technology. It is a multidisciplinary field of study, combining its own research methods and technologies with elements from geology, history, ethnography, geography, material science, statistics, biology, biochemistry, medicine, and other disciplines, to enable students not only to obtain new scholarly insights, but also to provide integrated instruction in science, technology, engineering, and mathematics (STEM) skills. Use of archaeological data as paradigm in STEM education. Instant practical application of mathematics during surveying, geology during ceramic analysis or geophysical research, biochemistry during archaeological residue analysis, or biology during zooarchaeological or paleoenvironmental research offers point of departure for instructors as well as motivation to students. P/NP or letter grading.

Upper Division Courses

C120. Special Topics in Archaeology. (2 or 4). Lecture, three hours. Designed for juniors/seniors. Special topics on theoretical subjects in archaeology such as new strategies, regional synthesis, or current work by core program faculty or special visiting scholars. May be repeated for credit with topic change. Concurrently scheduled with course C220. Final project or paper required if taken for 4 units (P/NP or letter grading); 2-unit course has P/NP grading.

C159. Fieldwork in Archaeology. (2 to 12). Fieldwork, to be arranged. Participation in archaeological field excavations or museum research under supervision of staff archaeologists at UCLA. Minimum of one month of field time away from campus required. May be repeated for credit with consent of adviser. Concurrently scheduled with course C259. P/NP or letter grading.

C160. Ancient and Historic Metals: Corrosion, Technology, and Microstructure. (6). Seminar, four hours; laboratory, four hours. Overview of technology of ancient metals, aspects of extraction and alloying, corrosion that ancient metals undergo, and how this impacts their preservation. Exploration of knowledge and research work of last two decades that has substantially advanced understanding of processes of extraction, alloying, surface patination, metallic coatings, corrosion, and microstructure. Laboratory work in preparation and examination of metallic samples under microscope, as well as lectures on technology of metallic works of art. Discussion of phase and stability diagrams of common alloying systems and environments. Metallographic study samples represent Bronze Age Europe, Renaissance Europe, China from Warring States to Tang dynasty, Japanese sword-making, Indian high-tin bronze alloys, bronzes, Peruvian, Colombian, Costa Rican, and Panamanian copper and gold-copper alloys. Concurrently scheduled with course C280. Letter grading.

Graduate Courses

M201A-M201B. Graduate Core Seminars: Archaeology. (4-4). (Same as Anthropology M201A-M201B.) Seminar, three hours. Required of all students. Seminar discussions based on carefully selected list of 25 major works related to development of archaeological social sciences (M201A) and humanities (M201B). Compulsory core seminars provide students with foundation in breadth of knowledge required of professional archaeologists. Archaeological historiography, survey of world archaeology, and archaeological technique Emphasis on appreciation of multidisciplinary background of modern archaeology and relevant interpretative strategies. May be repeated for credit with consent of adviser. S/U or letter grading.

M201C. Archæological Research Design. (4). (Same as Ancient Near East M201.) Seminar, three hours. Requisites: courses M201A, M201B. How to design archaeological projects in preparation for M.A. thesis or Ph.D. phase. Students do exploratory research to select subject, then write research design that could form basis for extensive paper, grant application, or oral examination. Students work closely with faculty members and meet weekly on research design. Preparation of at least two oral progress-report presentations, one on theoretical framework and one on practical aspects of project. Final written research design that incorporates theoretical and practical aspects of research and formulates bridging arguments required. S/U or letter grading.

M205A. Selected Laboratory Topics in Archaeology. (4). (Same as Anthropology M212S.) Lecture, three hours. Designed for graduate students in archaeology or in other departments. Specialized analysis of particular classes of cultural remains. Topic may be one of following: zoological analysis, paleoethnobotany, ceramic analysis, rock art, laboratory experience with collections and data. May be repeated for credit with topic change. S/U or letter grading.

M205B. Intensive Laboratory Training in Archaeology. (4). (Same as Anthropology M212T.) Lecture, three hours; laboratory, two hours minimum. Advanced laboratory training for graduate students with extended laboratory hours. Special laboratory-based topics, including but not limited to lithic analysis, ceramic analysis, zooarchaeology, and paleoethnobotany. May be repeated for credit with topic change. S/U or letter grading.

C220. Special Topics in Archaeology. (2 or 4). Lecture, three hours. Special topics on theoretical subjects in archaeology such as new strategies, regional synthesis, or current work by core program faculty or special visiting scholars. May be repeated for credit with consent of adviser. Concurrently scheduled with course C120. Final project or paper required if taken for 4 units (S/U or letter grading); 2-unit course has S/U grading.

C259. Fieldwork in Archaeology. (2 to 12). Fieldwork, to be arranged. Participation in archaeological field excavations or museum research under supervision of staff archaeologists at UCLA. Minimum of one month of field time away from campus required. May be repeated for credit with consent of adviser. Concurrently scheduled with course C159. S/U or letter grading.

M265. Depositional History and Stratigraphic Analysis. (4). (Same as Ancient Near East M265.) Lecture, two hours. Theoretical understanding of depositional processes (“laws”) which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in literature, with specific test cases from actual excavation and site reports. Coverage of theoretical implications of such disciplines as surveying and peeling with honors approval. Concurrently scheduled with course C259. S/U or letter grading.

M260. Ancient and Historic Metals: Corrosion, Technology, and Microstructure. (6). Seminar, four hours; laboratory, four hours. Overview of technology of ancient metals, aspects of extraction and alloying, corrosion that ancient metals undergo, and how this impacts their preservation. Exploration of knowledge and research work of last two decades that has substantially advanced understanding of processes of extraction, alloying, surface patination, metallic coatings, corrosion, and microstructure. Laboratory work in preparation and examination of metallic samples under microscope, as well as lectures on technology of metallic works of art. Discussion of phase and stability diagrams of common alloying systems and environments. Metallographic study samples represent Bronze Age Europe, Renaissance Europe, China from Warring States to Tang dynasty, Japanese sword-making, Indian high-tin bronze alloys, bronzes, Peruvian, Colombian, Costa Rican, and Panamanian copper and gold-copper alloys. Concurrently scheduled with course C180. Letter grading.

051. Cooperative Program. (2 to 8). Tutorial, to be arranged. Preparation; consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students. (2 to 12). Tutorial, to be arranged. May be repeated for credit with consent of adviser. S/U or letter grading.

Scope and Objectives
The Department of Architecture and Urban Design at UCLA offers a Bachelor of Arts degree in Architectural Studies and four graduate degree programs tailored to the needs of different groups of students: M.Arch. I, M.Arch. II, M.A., and Ph.D.

The B.A. in Architectural Studies is a two-year program, with focus on the built environment. The curriculum visualizes architecture as a cultural, creative, and technical practice and a discipline with direct social impact. Within the context of a liberal arts education, a finely balanced set of architecture and urban design courses, ranging from the history and theory of design to contemporary building technologies, provides students with a diverse foundation of knowledge in the field of architecture and prepares them for graduate school and/or careers in a wide range of fields.

M.Arch. I is a three-year first professional degree program accredited by the National Architectural Accrediting Board (NAAB). It does not assume any prior background in architecture. Students who do have some prior architecture background (e.g., a four-year undergraduate degree) may also enter the program and may petition to waive certain required courses and substitute more advanced electives in their place. M.Arch. I graduates normally pursue professional careers in architectural practice.

M.Arch. II is an advanced self-supporting professional degree program for students who already hold a first professional degree in architecture. It provides opportunities for intensive concentration in a variety of areas of professional specialization.

The M.A. and Ph.D. degree programs provide opportunities to pursue research and scholarship in the field of architecture. Graduates typically pursue academic or applied research and consulting careers.

In the U.S. most state registration boards require a degree from an accredited professional degree program as a requisite for licensure. NAAB, the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes two types of degrees: Bachelor of Architecture and Master of Architecture.

A program may be granted a five-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established standards. Master's degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree which, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

Undergraduate Study
Architectural Studies B.A.

Admission
Students are admitted for Fall Quarter only. Admission is highly competitive, and only a limited number of students are admitted each year. UCLA students may apply for admission in Fall Quarter of their second year in residence, must have at least a 3.0 cumulative grade-point average, and are required to complete the Preparation for the Major courses, with grades of B or better, before applying for admission. Transfer students must have at least a 3.0 cumulative GPA and are expected to complete the Preparation for the Major courses during their first year in residence. All applicants must submit a statement of interest and a three- to six-page PDF of creative work. Applications are available in the department office to regular and UCLA students during the previous Fall Quarter. For further information, consult the undergraduate adviser.

Preparation for the Major

The Major
Required: Architecture and Urban Design 121, 122, 123, 131, 132, 133, 141, 142, 143.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Architecture and Urban Design offers Master of Architecture I (M.Arch. I) and Master of Architecture II (M.Arch. II) degrees, and Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Architecture. A concurrent degree program (Architecture M.Arch. I/Urban Planning M.U.R.P) and a Graduate Certificate in Urban Humanities are also offered.

Architecture and Urban Design
Lower Division Courses
1. Introduction to Design. (2). Studio/lecture/field trips, 40 hours. Limited to high school students. Two- to four-week intensive summer course in architectural design, with focus on developing design skills through space making and its representation. Exposure to contemporary architectural practices through studio work, lectures and presentations, field trips, and final demonstration, critique, and exhibition of student work. Offered only as part of Teen Arch Studio summer program. P/NP grading.

2. History of Architecture and Urban Design: Prehistory to Mannerism. (5). Lecture, three hours; discussion, one hour; outside study, 11 hours. Development of architecture and urban design from pre-history to 1600, constructing critical positions within which implications of terms history, architecture, city, and culture can be explored. Focus on examples from Europe and Mediterranean. Scope and periodic exploration of world context. P/NP or letter grading.

3. History of Architecture and Urban Design: Baroque to Contemporary Moment. (5). Lecture, three hours; discussion, one hour; outside study, 11 hours. Exploration of role of built environment in social, cultural, and political life. How buildings are constructed, what they mean, effects they have on world, and ways they imagine new futures and shape private and public life. Focus on series of contemporary case studies for what each reveals about new possibilities for shaping world in which we live, with emphasis on how architecture extends to cities, roads, books, and films. Consideration of historical context and cultural genealogy of particular buildings and environments, material and economic conditions of building, and more. P/NP or letter grading.

Upper Division Courses
101. Introduction to Representation. (2). Studio, four hours; outside study, two hours. Limited to currently enrolled college/university students and graduates of colleges/universities. Introduction to techniques of spatial representation as they relate to architectural design. How to communicate using two- and three-dimensional drawing and modeling. Analog and digital techniques and opportunity afforded by moving between both. Analog techniques include orthographic and axonometric projection. Digital techniques focus on computer graphics fundamentals, including bit map and vector graphic imaging using Adobe suite and modeling using Rhinoceros. Offered in summer only. Letter grading.

102. Architecture and Urban Design. (6). Studio, 18 hours. Limited to currently enrolled college/university students and graduates of colleges/universities. Introduction to basic architectural design principles and problem solving. How to control point, line, surface, and volume to shape spaces for human use. Visual analysis as tool for designing and understanding organization. Techniques of repetition, variation, order, scale, and rhythm. Use of case-study analysis to uncover disciplinary issues within design problems and production of individual solutions to problems. Offered in summer only. Letter grading.

121. Studio I (6). Studio, eight hours; outside study, 10 hours. Limited to Architectural Studies majors. Introduction to basic architectural design principles and problem solving: how to control point, line, surface, and volume to shape spaces for human use. Visual analysis as tool for designing and understanding organization. Techniques of repetition, variation, order, scale, and rhythm. Use of case-study analysis to uncover disciplinary issues within design problems as well as to produce individual solutions to those problems. Letter grading.

122. Studio II. (6). Studio, eight hours; outside study, 10 hours. Enforced requisite: course 121. Limited to Architectural Studies majors. Issues of representation, domesticity, and program. Architectural precedents and principles of spatial organization. Relationship of
architectural form to human body and role of architectural space in choreography of human activity. Understanding and application of knowledge of architectural ornamentics, structure, and measurement. Letter grading.

132. Studio III. (6). Studio, eight hours; outside study, 10 hours. Enforced requisites: courses 121, 122. Limited to Architecture majors. Introduction to disciplinary issues, techniques, and organizations of landscape and how those can influence design of building and site. Development of material and temporary oral and visual representation techniques. Letter grading.

133. Modernism and Metropolis. (5). Lecture, three hours; outside study, 11 hours. Limited to Architectural Studies majors. Introduction to emergence of contemporary metropolis through series of comparative urban explorations that begin in Los Angeles and extend to engage range of cities, including key examples from Asia to South America. Modern project can be seen in myriad forms across globe, so that city and suburb, taken together, exist in complex commingling of aesthetic, political, spatial, economic, technological, and social issues. Letter grading.

141. Technology I: Projections. (5). Laboratory, four hours; outside study, 11 hours. Limited to Architectural Studies majors. Introduction to techniques of spatial representation as they relate to architectural design. How to communicate using two- and three-dimensional drawing and modeling. Analog and digital techniques and opportunity afforded by moving between both worlds in bimodal and orthographic and axonometric projection. Basic techniques focus on computer graphics fundamentals, including bit map and vector graphic imaging using Adobe suite and modeling using Rhinoceros. Letter grading.

142. Technology II: Building Materials and Methods. (5). Laboratory, four hours; outside study, 11 hours. Limited to Architectural Studies majors. Introduction to construction systems and materials in relation to design, such as framed, bearing wall, or hybrid systems. Graphic conventions and organization of construction documents. Letter grading.

143. Technology III: Digital Technology. (5). Laboratory, four hours; outside study, 11 hours. Limited to Architectural Studies majors. Overview of three-dimensional computer-aided visualization concepts, teaching applications of AutoCAD and Maya and their use relative to process of design and visual communication. Basic representation methods and tools and introduction to additional concepts required to dynamically interact with any digital design. May be repeated for credit with consent of adviser. S/U or letter grading.

149. Directed Research or Senior Project in Architecture and Urban Design. (2 to 4). Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NT or letter grading.

Graduate Courses

M201. Theories of Architecture. (4). (Same as Architecture M201.) Lecture, three hours. Exploration of conceptual and theoretical ideas that shape current issues in architectural theory. Readings in primary texts serve as framework for understanding nature of speculative inquiry in architectural context. Letter grading.

220. Introduction to Computers. (2). Lecture, 90 minutes; laboratory, 90 minutes; outside study, three hours. Introduction to basic concepts, skills, and theoretical aspects of computer-aided architecture design microcomputer skills. Applications selected are commonly found in professional offices. Two- and three-dimensional representation (i.e., painting, drafting, multimedia, hypermedia, and modeling). Letter grading.

226C. Computer Visualization. (4). Lecture, three hours. Designed for graduate students. Concept and technique of computer visualization, including realistic rendering and animation. Letter grading.

M227A. Programming Computer Applications in Architecture and Urban Design. (4). (Same as Design | Media Arts M243.) Lecture, three hours; outside study, nine hours. Introduction to logic of computer programming through experience in computer graphics programming. Investigation of both procedural and design-oriented approaches to programming. May be repeated for credit with consent of adviser. S/U or letter grading.

M227B. Introduction to Geometric Modeling. (4). (Same as Design | Media Arts M242.) Lecture, three hours; outside study, nine hours. Enforced requisite: course M227A or knowledge of C++ programming language. Programming techniques for implementing computer-aided design. Except to relevant building software tools for computer-aided problem solving in architecture and design. May be repeated for credit with consent of adviser. S/U or letter grading.

M227C. User Interaction Techniques in Design. (4). (Same as Design | Media Arts M243.) Lecture, three hours; outside study, nine hours. Requisite: course M227A or knowledge of C++ programming language. Programming techniques for implementing modern computer-user interfaces, specifically looking at issues relevant to building software tools for computer-aided problem solving in architecture and design. May be repeated for credit with consent of adviser. S/U or letter grading.

M227D. Design and Building Models. (4). Lecture, three hours. Review of range of information and knowledge potentially used in design. Knowledge representation, abstractions, and constructs. Logical structure of design information. Development of knowledge used in areas of design, how it can be identified, analyzed, and structured. Letter grading.

CM247A. Introduction to Sustainable Architecture and Community Planning. (4). (Same as Urban Planning M292.) Lecture, three hours. Enforced requisite: course M227A or knowledge of C++ programming language. Projected for architecture and urban design students. Development of built environment to natural environment through whole systems approach, with focus on sustainable design of buildings and planning of communities. Emphasis on energy efficiency, renewable energy, and appropriate use of resources, including materials, water, and land. Concurrently scheduled with course CM213. Letter grading.

M271. Elements of Urban Design. (4). (Same as Urban Planning M292.) Lecture, three hours. Introduc- tion of basic knowledge of elements and methods of urban design. Multidisciplinary approach leading to understanding of political, economic, and social conditions of urban systems and their dynamic interrelations. S/U or letter grading.

M272. Real Estate Development and Finance. (4). (Same as Urban Planning M272.) Lecture, two hours; workshop, two hours; outside study, eight hours. Requisites: Urban Planning 220A, 220B. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial structures, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects integrate development process with proposed design solutions that are interactively assessed to meet economic feasibility tests. S/U or letter grading.

286. Roman Architecture and Urbanism. (4). Lecture, three hours. Examination of architectural and urban developments during Roman period, from ar- chaeological sites to late Empire. Built environments of an- cient world investigated from various perspectives,
with consideration to programming, symbolism, and viewing, as well as to technological, aesthetic, and political factors. S/U or letter grading.

288. Renaissance Architecture and Urbanism. (4). Lecture, three hours. Examination of architectural developments from 15th to 17th century. Primary focus on Italian peninsula, and extending to entire Mediterranean basin. Study of structures, cities, and landscape designs to reveal changing cultural and theoretical values, as well as specific aesthetic and iconographic content. S/U or letter grading.

289. Special Topics in Architecture and Urban Design. (1 to 4). Lecture, three hours; discussion, two hours. Selected academic topics initiated by students, student teams, or faculty and directed by faculty member. May be repeated for credit. S/U or letter grading.

290. Special Topics in Critical Studies in Architectural Culture. (5). Lecture, three hours; discussion, one hour; outside study, 11 hours. Designed for graduate students. Exploration of how architecture operates in relation to wider cultural, historical, and theoretical issues. May be repeated for maximum of 30 units. Letter grading.

291. Theory of Architectural Programming. (4). Lecture, two hours; discussion, one hour; outside study, 12 hours. Introduces the recognition of concepts and methods of architectural programming and its interrelation to design process; planning of design process; various techniques for determination of program contents, basic program elements, and program statements; identification of solution types for given situations. S/U or letter grading.

292. Politics, Ideology, and Design. (4). (Same as Urban Planning M293.) Lecture, three hours. Examination of theory and practice from variety of perspectives applied to set of varied physical environments and to set of current spatialized problems. Consideration of theoretical propositions that are shaping present urban and architectural debate and concrete case studies where politics and ideology shape design process. Letter grading.

294A-294B. Environmental Psychology. (4-4). Lecture, three hours. Introduction to models, concepts, and theories concerning impact of environment on human behavior, perception, and thought. Review of research results concerning space perception, cognitive mapping, preferences and attitudes toward environmental effects of crowding and stress, personal space and territoriality. S/U or letter grading.

295. Introduction to Urban Humanities. (4). (Same as Urban Planning M295.) Seminar, six hours; studio, six hours. Core introduction to urban humanities. Analytical and descriptive methods of humanities paired with speculative and projective methods of architectural and urban design to better understand contemporary state of human environment. Focus on Los Angeles, with concepts seminar, methods laboratory, projects, studio, and site visit components. Offered in summer only. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4). Seminar, to be arranged. Preparation; apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for instruction at UCLA. May be repeated for credit. S/U grading.

401. Advanced Topics Studio. (6). Studio, 12 hours; outside study, six hours. Preparation: satisfactory completion of all level studios (courses 412, 413, 414) or M.Arch. II student. Students may choose (through lottery) from several different project focusing on special topics in architectural and urban design to be offered by faculty members. May be repeated for credit. Letter grading.

402. Final Advanced Topics Studio. (6). Studio, 12 hours; outside study, six hours. Preparation: satisfactory completion of intermediate- and advanced-level studio for M.Arch. II student; satisfactory completion of advanced-level studios and fourth-term standing for M.Arch. II students. Students may choose (through lottery) from several different advanced-level studio topics in architectural and urban design to be offered by faculty members. Exit document (analytic paper with graphic component that critically examines final student design work) required at completion of course. Letter grading.

403A-403B. Research Studios. (2-2-6). For courses 403A, 403B: seminar, three hours; outside study, three hours; for course 403C: studio, 12 hours; outside study, 6 hours. Preparation: satisfactory completion of intermediate-level studios (courses 412, 413, 414) or M.Arch. II student. Course 403A is required to 403B, which is required to 403C. In-depth research phase (courses 403A, 403B) and advanced studio project (course 403C), with focus on number of different special topics in architectural and urban design. In Progress (403A, 403B) and letter grading.

404. Joint Planning/Architecture Studio. (4). (Same as Urban Planning M404.) Lecture, one hour; discussion, one hour; studio, four hours. Opportunity to work jointly on planning project for client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; working with resident leaders at Los Angeles City public housing developments. S/U or letter grading.

411. Introductory Design Studio. (6). Studio, 12 hours; outside study, six hours. Introduction to sketching, drawing, perspectives, CAD. Architectural composition is initially studied in terms of its separate elements. After each is studied by means of manipulative exercise that exploits its intrinsic possibilities, students undertake series of closely controlled exercises dealing with combining elements and then design small buildings. Letter grading.

412. Building Design Studio. (6). Studio, 12 hours; outside study, six hours. Requisite: course 411. Concentration on basic skills, leading to projects exploring architectural program in relation to design process and particular progress on architectural forms and concepts. In second phase, introduction of structural elements to fulfill program requirements and to support and further developed in first phase, students conduct design studio. Letter grading.

413. Building Design with Landscape Studio. (6). Studio, 12 hours; outside study, six hours. Requisite: course 412. Introduction to theoretical and technical issues such as site planning, urban design, landscape design, building typology, Building design and site planning in relation to water, landforms, and plants in natural light, heat, and ventilation. Letter grading.

414. Major Building Design Studio. (6). Studio, 12 hours; outside study, six hours. Requisite: course 413. Designed for second-year graduate students. Introduction to issues such as programming and program manipulation, site planning, urban design, and integration of technical systems and architectural expression. Emphasis either on treatment in breadth of large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure and environmental control and to present their ideas in graphic or model form. Letter grading.

415. Comprehensive Studio. (6). Studio, 12 hours; outside study, six hours. Requisite: course 414. Curation of core sequence (courses 411 through 414), with focus on development of phase of project. Technical concerns such as lighting, material innovation, sustainability, construction documents, and building envelopes to be considered critical to generation of architectural form, integrated in design of single building project. Letter grading.

436. Introduction to Building Construction. (2). Laboratory, two hours; outside study, four hours. Introduction to construction techniques. Study of principles and materials for making architecture through series of exercises and field trips. Letter grading.

437. Building Construction. (4). Laboratory, four hours; outside study, eight hours. Principles of structure and enclosure, with focus on production and materials research. Exploration of building elements for formal and functional properties; in addition, design development of project in previous studio may be developed in detail with integration of range of technical systems. Letter grading.

441. Environmental Control Systems. (4). Lecture, four hours. Design of mechanical systems necessary for functioning of large buildings: air handling, fire and life safety, plumbing, vertical and horizontal circulation, communication and electrical power distribution, analysis of interaction of these systems and their integrated effects on architectural form of building. S/U or letter grading.

496. Special Projects in Architecture. (2 to 8). Tutorial, to be arranged. Projects initiated either by individual students or student teams and directed by faculty member. May be repeated for credit. S/U or letter grading.

497. Special Projects in Urban Design. (2 to 8). Tutorial, to be arranged. Projects initiated either by individual students or student teams and directed by faculty member. May be repeated for credit. S/U or letter grading.
498. Comprehensive Examination Seminar. (4). Seminar, three hours; outside study, nine hours. Seminar intended to begin process of developing independent proposal with related research and documentation that moves toward production of final document or book for each project. S/U grading.

501. Cooperative Program. (2 to 8). Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

507. Preparation for Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8). Tutorial, to be arranged. May be repeated for credit. S/U grading.

Hirsch Perlman, B.A., Chair

Professors
Jennifer Andrew, B.F.A.
Barbara Duncan, M.F.A.
Russell Ferguson, M.A.
Andrea Fraser
Roger R. Herman, M.F.A.
Mary Kelly, M.A.
Barbara Kruger
Catherine S. Opie, M.F.A.
Hirsch Perlman, B.A.
Lari G. Pittman, M.F.A.
Charles R. Ray, M.F.A.
Adrian A. Saxe, B.F.A.
James Welling, M.F.A.
Patricia A. Wickman, M.F.A.

Professors Emeriti
Raymond B. Brown, M.A.
Christopher L. Burden, M.F.A.
Elliott J. Elgart, M.F.A.
Paul D. McCarthy, M.F.A.
Nancy J. Rubins, M.F.A.

Associate Professor
Silke Otto-Knapp, M.F.A.

Assistant Professor
Rodney T. McMillan, M.F.A.

Lecturer
Don D. Suggs, M.F.A.

Scope and Objectives
The Department of Art offers professional art training that emphasizes experimentation and encourages students to draw from many disciplines in their creative process. The department provides a strong background in theory and criticism to support contemporary studio practice. Bachelor of Arts degree coursework and Master of Fine Arts degree specializations include ceramics, new genres, painting and drawing, photography, and sculpture. An interdisciplinary studio option is offered within the M.F.A. program. All programs have access to the art resources at UCLA and in the Los Angeles community.

The Department of Art reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection such examples as may be selected.

Additionally, the Department of Art reserves the right to use documentation and reproductions of student art work from studio courses, student exhibitions, and other records of creative work in publications including, but not limited to, the undergraduate and graduate brochures and publications, department and school websites, and presentations and events related to student recruitment and outreach.

Undergraduate Study
The Art major is a designated capstone major. As part of the upper division advanced studio requirements, all undergraduate students are required to complete a senior studio course that emphasizes analysis and criticism of individual creative work and ideas. Students develop and present a body of creative work in which they exhibit familiarity with and competence in a range of techniques and media, and a level of proficiency in utilizing particular media appropriate to advanced-level studio projects. Graduates are expected to demonstrate familiarity with historical precedents for and issues in contemporary art, to understand terms and concepts relevant to contemporary art discourse, and to have the ability to effectively articulate analysis of works of art to participate in a studio critique.

Art B.A.
Capstone Major

Preparation for the Major

The Major
Required: A minimum of nine upper division courses, including Art 100 or 132 or one course from an approved list of upper division nonmajor courses, six courses from at least four of the following studio areas: 130, 133, 137, 140, 145, 147, 148, one course from Art History M101A through 180C, one capstone senior studio course (Art 150), and 8 units of art electives.

Each course applied toward major requirements must be taken for a letter grade, with the exception of Art 190, 193, and 195A, which are offered only on a Passed/Not Passed grading basis. Of those, no more than 4 units total may be applied toward the upper division art elective requirement.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Art offers the Master of Fine Arts (M.F.A.) degree in Art.

Art

Lower Division Courses
1A. Drawing. (4). Studio, eight hours; five hours arranged. Course of basic drawing skills intended as preparation for work in variety of media. P/NP or letter grading.

1B. Sculpture. (4). Studio, eight hours; five hours arranged. Introduction to concepts and forms of contemporary sculpture to become familiar with tools and material to enable students to visually manifest their individual ideas. Presentation of work of contemporary artists. P/NP or letter grading.

11B. Photography. (4). Studio, eight hours; five hours arranged. Fundamentals in technique, with emphasis on individual projects. Varied approaches, processes, and applications of photographic medium within context of art, supported by studies in theory, aesthetics, and history of photography. P/NP or letter grading.

11C. Printmaking. (4). Studio, eight hours; five hours arranged. Introductory survey of various technical and conceptual concerns in variety of printmaking media as preparation for more focused study in particular media at upper division level. P/NP or letter grading.

11E. Ceramics. (4). Studio, eight hours; five hours arranged. Introduction to ceramic materials and processes, with emphasis on personal and cultural expression in ceramic media. Discussion of ceramics in contemporary artistic practice and social history of ceramic art. Letter grading.

31A. Modernism. (5). Lecture, three hours; discussion, one hour; field trips, three hours. Impact of modernist thought on art and society from mid-19th through early-20th centuries. Exploration of origins, development, theory, and practice of modernism in Europe and U.S. Letter grading.

31B. Modernism. (5). Lecture, three hours; discussion, one hour; field trips, three hours. Requisite for Art majors: course 31A. Continuation of impact of modernist ideas through mid-20th century, with focus primarily on work made from 1920s to 1960s. Letter grading.

31C. Modernism. (5). Lecture, three hours; discussion, one hour; field trips, three hours. Requisites for Art majors: courses 31A, 31B. Continuation of impact of modernist ideas through latter part of 20th century,
covering shift from modernist to postmodernist prac-
tices and theories, with focus on work made from 1960s to present. Letter grading.

70. Summer Institute: Special Topics in Studio. (3). Studio/lecture/field trips, 45 hours. Limited to high school students in Summer Art Institute. Two-week intensive in studio art covering range of media and contemporary art practices and combination of on-
curs studio work, lecture/presentations, field trips, critiques, and final exhibition of student work. Offered only as part of Summer Institute. May be repeated once for credit. P/NP grading.

Upper Division Courses

100. Issues in Contemporary Art. (5). Lecture, three hours; discussion, one hour; screenings/research, 11 hours. Requisites: courses 31A, 31B, 31C. Selected topics in theoretical, critical, aesthetic, and historical studies and their relevance to practicing artists. May be repeated for maximum of 20 units. Letter grading.

130. Advanced Drawing. (5). Studio, eight hours; seven hours arranged. Requisite: course 1A. Drawing as both independent exercise and shared work in professional setting. May be repeated for maximum of 20 units. Letter grading.

132. Survey of Critical Thought. (5). Lecture, three hours; discussion, one hour; screenings/research, 11 hours. Requisites: courses 31A, 31B, 31C. Overview of premodern, modern, and postmodern theory as re-
lected in critical writing and artistic practice, with em-
phasis on 1940s to present. Specific topics may vary. May be repeated for maximum of 20 units. Letter grading.

133. Advanced Painting. (5). Studio, eight hours; seven hours arranged. Requisite: course 11A. Varied media and subject to further develop students' tech-
nical and expressive means to implement their ideas. May be repeated for maximum of 20 units. Letter grading.

137. Advanced New Genres. (5). Studio, eight hours; seven hours arranged. Requisite: course 11D. Em-
phasis to be selected by faculty members from one or more of following media: installation, performance, video, film, other nontraditional media and processes. May be repeated for maximum of 20 units. Letter grading.

140. Advanced Printmaking. (5). Studio, eight hours; seven hours arranged. Requisite: course 11C. Se-
lected studies in fine printmaking, historical and con-
temporary printmaking and engraving, lithogra-
phy, silk screen, mixed media. May be repeated for maximum of 20 units. Letter grading.

145. Advanced Sculpture. (5). Studio, eight hours; seven hours arranged. Requisite: course 1B. Selected studies in contemporary and monumental; modeling, casting, carving, welding, and other media; forms in space, including installations and nonstudio pieces. May be repeated for maximum of 20 units. Letter grading.

147. Advanced Photography. (5). Studio, eight hours; seven hours arranged. Requisite: course 11B. Se-
lected projects in photography and related media, concentrating on development of students' work. Studio emphasis with special topics in theory and critical analysis. May be repeated for maximum of 20 units. Letter grading.

148. Advanced Ceramics. (5). Studio, eight hours; seven hours arranged. Requisite: course 11E. Se-
lected studies in ceramics, with emphasis on individu-
alized creative experimentation with materials and techniques introduced in course. Methods and pro-
cesses to be selected from range of possibilities, in-
cluding handforming and modeling, preparation and use of molds, slipcasting, and use of potter's wheel. May be repeated for maximum of 20 units. Letter grading.

150. Senior Studio. (5). Studio, eight hours; seven hours arranged. Limited to seniors. Advanced studio projects, with emphasis on analysis and criticism of individual creative work and ideas. Letter grading.

170. Special Topics in Studio. (2 to 4). Studio/mu-
seum visits, four to eight hours; two to four hours ar-
ranged. Current themes in art theory, practice, and criticism, offering students opportunity to explore these issues in studio context through critique of work and discussion of recommended readings. May be repeated for maximum of 16 units. P/NP or letter grading.

C180. Seminar: Art. (4). Seminar, three hours. Lim-
ted to junior/senior Art majors. Advanced topics in critical theory and study of contemporary art, with em-
phasis on individuals, issues, and theories; Possible areas of study from structuralism, decon-
struction, feminism and psychoanalytic theory, com-
modation, and censorship. May be repeated for credit. Concurrently scheduled with course C280. Letter grading.

C181. Exhibition and System. (4). Seminar, four hours. Preparation: at least one course from 100 through 150. Examination of temporary exhibition and its as-
sociated field of publications as interpretational system of meaning, beginning with individual works and pro-
ceeding to on-site analysis of current exhibitions. Concurrently scheduled with course C282. Letter grading.

C182. Exhibitions and Public Programs. (4). Se-
minar, four hours. Preparation: at least one course from 100 through 150. Introduction to principles of pro-
gram planning and community development in rela-
tion to visual arts institutions. Concurrently scheduled with course C282. Letter grading.

C183. Special Topics in Art. (2 or 4). Seminar, six hours (2-unit course) or 12 hours (4-unit course). Preparation: at least one course from 100 through 150. Selected topics in art explored through variety of approaches that may include projects, readings, dis-
cussion, research papers, and oral presentations. Topics announced in advance. May be repeated for credit. Concurrently scheduled with course C283. Letter grading.

M184. Chicana and Chicano Art. (4). (Same as Chi-
cana and Chicano Studies M175 and World Arts and Cultures M128.) Lecture, four hours. Introduction to Chicana and Chicano artists. Examination of Chicana a-
esthetic. Chicana artists have developed unique experi-
ence and identity as artists and Chicanas. Letter grading.

M185. Whose Monument Where: Course on Public Art. (4). (Same as Chicana and Chicano Studies M185 and World Arts and Cultures M126.) Lecture, four hours. Recommended corequisite: course M186AL, M186BL. Examination of public monuments in U.S. as basis for cultural insight and critique of American values from perspective of artist. Use of urban Los Angeles as textbook in urban space issues such as public private space. Debate over public space at end of 20th century, what defines neighborhoods, and do different ethnic populations use public space dif-
erently? P/NP or letter grading.

M186A. Beyond Mexican Mural: Beginning Mural-
ism and Community Development. (4). (Same as 
Chicana and Chicano Studies M186A and World Arts and Cultures M125A.) Studio/lecture, four hours. Corequisite: course M186AL. Investigation of mu-
ralism as method of community education, develop-
ment, and empowerment. Exploration of issues through development of large-scale collaborative dig-
ita
t
ally created image and/or painting for placement in community. Students research, design, and work with community participants. Continuation of project through installa-
tion, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

M186C. Beyond Mexican Mural: Advanced Mural-
ism and Community Development. (4). (Same as Chicana and Chicano Studies M186C and World Arts and Cultures M125C) Studio/lecture, four hours. Requi-
tes: courses M186B, M186BL. Corequisite: course 
M186CBL. Continuation of investigation of muralism as method of community education, development, and empowerment. Exploration of issues through development of large-scale collaborative dig-
ita
t
ally created image and/or painting for placement in community. Students research, design, and work with community participants. Continuation of project through installa-
tion, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

M187. Contemporary Art Collections in Los Ange-
elles. (2). Seminar, three hours; outside study, three hours. Limited to junior/senior Art majors. Exploration of critical issues regarding concept of collections and collecting. Visits to institutions and collections and discussion of vision, goals, and scope of collections, as well as individual works. Concurrently scheduled with course C287. Letter grading.

190. Studio/Research Colloquia in Art. (1). Sem-
inar, three hours. Corequisite: course 197 or 198. Lim-
ited to juniors/seniors. Designed to bring together students undertaking supervised tutorial studio proj-
ects or research in seminar setting with one or more faculty members to discuss work related to upper level work in discipline. Led by one supervising faculty member. May be repeated for maximum of 4 units. P/NP grading.

193. Journal Club Seminars: Current Topics in Art. (1). Seminar, three hours. Limited to junior/senior Art majors. Discussion of selected current exhibitions, visiting artist lectures, screenings, and readings in field. May be repeated for credit. P/NP grading.

195. Community Internships in Art. (2 to 4). (For-
merly numbered 195A.) Tutorial, six to 12 hours. Lim-
ited to juniors/seniors. Art-related internship in super-
vised setting in community agency, business, or insti-
tution. Students meet on regular basis with instructor and provide periodic reports of their experience. Only 4 units may be applied toward upper division art elec-
tive major requirement. May be repeated for max-
imum of 8 units. Individual work supervised by supervising faculty member required. P/NP grading.

197. Individual Studies in Art. (2 to 4). Tutorial, to be arranged. Preparation: 3.0 grade-point average in major. Corequisite: course 190. Limited to junior/se-
ior Art majors. Individual intensive studio project or study, with scheduled meetings to be arranged be-
tween faculty member and student. Tangible evidence of project or mastery of subject matter required. May be repeated for maximum of 8 units. Individual con-
tact required. Letter grading.

198. Honors Research in Art. (2 to 4). Tutorial, to be arranged. Preparation: 3.0 grade-point average overall, 3.5 grade-point average in major. Corequisite: course 190. Limited to junior/senior Art majors. Independent study project or study, with completed through the initial development and completion of comprehensive research
Graduate Courses

C283. Special Topics in Art. (2 or 4). Letter grading.

271. Graduate Painting. (2 to 8). Studio, eight hours. Study in painting and associated media. May be repeated for credit with consent of adviser. Letter grading.

272. Graduate Printmaking. (2 to 8). Studio, eight hours. Studies in traditional and experimental printmaking. Selected studies in intaglio, lithograph, woodcut, silk screen, photo printmaking, and mixed media. May be repeated for credit with consent of adviser. Letter grading.

273. Graduate Sculpture. (2 to 8). Studio, eight hours. Studies in sculpture with specific attention to ongoing nature, specificity, and approach to each student's particular discipline. Individual studio visits and consultation. May be repeated for credit with consent of adviser. Letter grading.

274. Graduate Photography. (2 to 8). Studio, eight hours. Studies concentrating on development of individual students' artwork. Studio emphasis with adjacent studies in theoretical and critical analysis. Specific attention to original, expressive, social, and humanistic values of art. May be repeated for credit with consent of adviser. Letter grading.

276. Graduate Group Critique. (4). Discussion, four hours; tutorial, arranged. Group critique/discussion of students' research. Additional tutorial meetings arranged by instructor. May be repeated for credit. Letter grading.

277. Graduate Ceramics. (2 to 8). Studio, eight hours. Studies in ceramics and art with investigation of traditional and experimental processes and intellectual approaches to art practice utilizing ceramic media. Emphasis on development of significant body of original work reflecting student's expressive and theoretical concerns. May be repeated for credit. Letter grading.

278. Interdisciplinary Studio. (2 to 8). Studio, eight hours. Tutorial focused on directed research, studio visits, and group discussions of recommended readings. May be repeated for credit. S/U or letter grading.

C280. Seminar: Art. (4). Seminar, three hours. Advanced topics in critical theory and study of contemporary art, with emphasis on individuals, issues, and methodologies. Possible areas of study from structuralism, deconstruction, feminist and psychoanalytic theory, commodification, and censorship. May be repeated for credit. Concurrently scheduled with course C180. Letter grading.

C281. Exhibition and System. (4). Seminar, four hours. Examination of temporary exhibition and its associated field of publications as intertextual system of meaning, beginning with individual works and proceeding to on-site analysis of current exhibitions. May be repeated for credit. Concurrently scheduled with course C181. Letter grading.

C282. Exhibitions and Public Programs. (4). Seminar, four hours. Introduction to principles of program planning and community development in relation to visual arts and work of art museums. May be repeated for credit. Concurrently scheduled with course C182. Letter grading.

C283. Special Topics in Art. (2 or 4). Seminar, six hours (2-unit course) or 12 hours (4-unit course). Selected topics in art explored through variety of approaches that may include projects, readings, discussion, research papers, and oral presentations. Topics announced in advance. May be repeated for credit. Concurrently scheduled with course C183. Letter grading.
The Major

Required: Eleven upper division art history courses as follows:

A total of six courses (24 units) from the following 12 areas are required, distributed as follows: one course from three different areas in Group A (three courses total) and one course from three different areas in Group B (three courses total):

Five art history electives selected from courses 100 through 180C are required; course 197 may also be included.

Two additional terms of a foreign language are also required, which are in addition to the College foreign language requirement. For example, if French was used to satisfy the College foreign language requirement, two terms of either advanced French or any level of a second advanced language must be taken to satisfy the foreign language requirement for the major.

Each course, including foreign language courses, must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

Honors Program

The honors program is designed for Art History majors who are interested in carrying out an independent research project that culminates in a departmental honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All senior Art History majors who have completed a minimum of six upper division art history courses with a departmental grade-point average of 3.5 or better and an overall GPA of 3.0 or better are eligible to apply. Consult the art history student affairs officer no later than the beginning of Fall Quarter of the senior year.

To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the department and an overall GPA of 3.0 or better, and (3) complete courses 198A and 198B with grades of A– or better.

To qualify for graduation with highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the department and an overall GPA of 3.65 or better, and (3) complete courses 198A and 198B with grades of A.

Art History Minor

The Art History minor is designed for students who wish to augment their major with a series of courses that analyze the history, theory, and criticism of diverse visual traditions in world culture. On the lower division level, the minor exposes students to overviews of these traditions in broad time periods from ancient to modern, from the regional to the global, as well as to courses that trace the historical significance of art in the context of specific thematic and media concerns. Upper division courses offer more specialized content that explores crucial episodes or areas with more intense and rigorous theoretical and methodological strategies.

To enter the minor students must be in good academic standing with an overall grade-point average of 2.0 or better, have completed 45 units, and file a petition with the student affairs officer to plan a coherent program.

Required Lower Division Courses (15 units): Three courses selected from Art History 50, 51, 54, 55, 55A, 55B, 56A, 56B, 57.

Required Upper Division Courses (20 units): Five art history courses, with at least two from each group:

Art History 127 (4 units) may be taken as one of the five upper division courses required for the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

By petition, one upper division course with substantial art historical content and methodology applied toward the students’ majors may also be applied toward this minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Art History offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Art History.

Art History

Lower Division Courses

50. Ancient Art. (5). Lecture, three hours; quiz, one hour; museum field trips. Prehistoric, Egyptian, Mesopotamian, Aegean, Greek, Hellenistic, and Roman art and architecture. P/NP or letter grading.

51. Medieval Art. (5). Lecture, three hours; quiz, two hours. Early Christian, Byzantine, Islamic, Carolingian, Ottoman, Romanesque, and Gothic art and architecture. P/NP or letter grading.

54. Modern Art. (5). Lecture, three hours; discussion, one hour; museum field trips. History of modern art from 1860s to 1960s, from Manet and impressionists to pop art and minimalism. Study of origins and social functions, as well as aesthetic innovations and philosophical dilemmas of modernism. P/NP or letter grading.

55A. Introduction to Arts of Africa. (5). Lecture, three hours; discussion, one hour; museum field trips. Introduction to arts and architecture of Africa. Examination of social and historical contexts of their production. Introduction to body of information within framework of conceptual problem through series of case studies. P/NP or letter grading.

55B. Introduction to Pre-Columbian Art. (5). Lecture, three hours; discussion, one hour; museum field trips. Survey of sequence of cultures that developed in area between (and including) Mexico and Peru from circa 1000 B.C. to Conquest. P/NP or letter grading.

56A. Art of India and Southeast Asia. (5). Lecture, three hours; discussion, one hour; museum field trips. Discussion of selection of monuments and objects from Indian subcontinent and Southeast Asia using key historical, cultural, and religious concepts. Analysis of each monument or object in detail, with their relationships compared and contrasted. P/NP or letter grading.

56B. Chinese Art. (5). Lecture, three hours; discussion, one hour; museum field trips. General introduction to Chinese art, covering all major periods from Neolithic to modern age. Presentation of monuments as well as artifacts in variety of media in their social and historical contexts. P/NP or letter grading.

57. Renaissance and Baroque Art and Ideology. (5). Lecture, three hours; discussion, one hour. Survey of Renaissance and baroque art and ideology to introduce students to basic tools of stylistic and iconographical analysis. Coverage of historical development of European art and architecture over period of almost 500 years and exploration of ways in which those in religious and secular power used images to promote their particular ideologies. P/NP or letter grading.

58. Architecture in Modern World. (5). Lecture, three hours; discussion, one hour. Introduction to historical and visual analysis of architecture from 1850 to present. Examination of ways that new architectural theories, economic and technological change, nationalism, and colonialism have shaped architecture and cities worldwide. P/NP or letter grading.
Upper Division Courses

M101A. Art and Architecture of Ancient Egypt, Predynastic Period to New Kingdom. (4). (Same as Ancient Near East CM101A) Lecture, three hours. Study of art, sculpture, painting, and minor arts from New Kingdom to Greco-Roman period. P/NP or letter grading.

M101C. Ancient Egyptian Temple and City of Thebes. (4). (Same as Ancient Near East M101C) Lecture, four hours; fieldwork, one hour. Focus on ancient temples of city of Thebes (modern day Luxor). Theban temples are some of best-preserved cult buildings in all of Egypt, and their study illuminates traditions of artistic representation, architectural development, and social and political transformations echoed throughout all of ancient Egypt. Investigation of ritual linking of temples on Nile’s eastern and western banks through festival processions, chronological changes in function and form of Theban temples through time, and study of an entire program of individual temples. P/NP or letter grading.

M102A. Minoan Art and Archaeology. (4). (Same as Classics M153A) Lecture, three hours. Requisite: course 50 or Classics 10 or 51A. Study of development of art and architecture in Minoan Crete from circa 3000 to 1000 B.C. P/NP or letter grading.

M102B. Mycenaean Art and Archaeology. (4). (Same as Classics M153B) Lecture, three hours. Requisite: course 50 or Classics 10 or 51A. Study of development of art and architecture in Mycenaean Greece from circa 2000 to 1000 B.C. P/NP or letter grading.

M102C. Archaic Greek Art and Archaeology. (4). (Same as Classics M153C) Lecture, three hours. Requisite: course 50 or Classics 10 or 51A. Study of development of art and architecture of Greek world from approximately 800 through 490 B.C. P/NP or letter grading.

M102D. Classical Greek Art and Archaeology. (4). (Same as Classics M153D) Lecture, three hours. Requisite: course 50 or Classics 10 or 51A. Study of development of art and architecture of Greek world from approximately 490 through 350 B.C. P/NP or letter grading.

M102E. Hellenistic Greek Art and Archaeology. (4). (Same as Classics M153E) Lecture, three hours. Requisite: course 50 or Classics 10 or 51A. Study of development of art and architecture of Greek world from middle of 4th century B.C., including transmittal of Greek art forms to Romans, P/NP or letter grading.

M102F. Etruscan Art. (4). (Same as Classics M153F) Lecture, three hours. Requisite: course 50 or Classics 20 or 51B. Arts of Italic peninsula from circa 1000 B.C. to end of Roman Republic. P/NP or letter grading.

M102G. Roman Art and Archaeology. (4). (Same as Classics M153G) Lecture, three hours. Requisite: course 50 or Classics 20 or 51B. Art and architecture of Rome and its Empire from circa 300 B.C. to A.D. 300. P/NP or letter grading.

M102H. Late Roman Art. (4). (Same as Classics M135H) Lecture, three hours. Requisite: course 50 or Classics 20 or 51B. Art of Roman Empire from 2nd to 4th century (A.D.). P/NP or letter grading.

M102J-M102K. Classical Archaeology. (4-4). (Same as Classics M135J-M135K) Lecture, three hours. Requisite: one course from 50, Classics 10, 50B, or History 1A. Knowledge of Greek and Latin not required. General introduction to study of Aegean, Greek, and Roman architecture, sculpture, and painting. May be repeated for credit with department consent. P/NP or letter grading.

M102L. Greco-Roman Architecture. P/NP or letter grading.

M103A. Lecture, three hours; demonstrations/field trips. Introduction to historical evolution of museums and museology, theories and methods of their operations, historical and critical relationships between museology, art history, and new technologies for archiving and exhibiting artifacts and historical materials. C103B. Lecture, three hours; demonstrations/field trips. Lectures and discussions organized to foster active critical engagement with museum policies, operations, and productions involving focused study and on-site research on particular museum institutions and exhibitions.

C103C. Museum Studies Practicum. (2 to 4). Lecture, three hours. Requisites: courses C103A, C103B. On-site examination and discussion of selected artworks, exhibitions, and associated published and distributed materials, and of museum and gallery institutions, practices, and policies. Concurrently scheduled with course C203C. Letter grading.

C103D. Preservation of Art. (4). Lecture, three hours. Designed for Art History majors and other juniors/seniors. Introduction to preservation of cultural heritage materials, including what should be preserved and why, as well as who should be involved in decision-making process. Discussion of issues of preservation and restoration of these cultural heritage materials both in museum and outdoor environments. Materials and techniques used to make cultural heritage materials, in relation to preservation efforts needed to prevent decay and loss. Introduction to examples of conservation issues related to sites, buildings, monuments, and collections. Ethical and cultural reference to changing values, illustrating how cultural materials may have been treated differently according to those values. Concurrently scheduled with course C203E. P/NP or letter grading.

C103F. Art: Fakes, Forgeries, and Authenticity. (4). Lecture, three hours. Examination of concepts of authenticity, originality, fakes, and forgeries in art. Overview of problems inherent in concept of authenticity and description of many examples of problems related to this concept in series of discussions based on objects from variety of cultures. Introduction to subject of fakes and account of three different areas of connoisseurship that is essential component of production, study, and scientific examination of fakes. Nature of art connoisseurship described in many examples from Renaissance and earlier panel paintings, as well as some examples from modern art. Background of art restoration and art conservation discussed in relationship to authenticity and technical studies. Scientific tools that form basis of another study of paintings. Some of the many new techniques that can be applied directly to works of art and technical methods by which material constituents of works of art are studied. Concurrently scheduled with course C103B. P/NP or letter grading.

104A. Western Islamic Art. (4). Lecture, three hours. From Tigris and Euphrates Rivers through Afghanistan and parts of central Asia; Ottoman Empire. P/NP or letter grading.

C104C. Problems in Islamic Art. (4). Seminar, three hours. Monuments or theoretical problems related to Islamic art and cultural production. May be repeated for credit with consent of adviser. Concurrently scheduled with course C214. P/NP or letter grading.

M104D. Introduction to Islamic Archaeology. (4). Lecture, three hours. Concurrently scheduled with courses C153A-C153B. P/NP or letter grading.

M106D. Late Renaissance Art: Counter-Reformation. (4). Lecture, three hours. Requisite: course 57. Painting, sculpture, and architecture of late 16th and early 17th centuries considered in context of Counter-Reformation. P/NP or letter grading.

M108C. From Bruegel to Rubens. (4). Lecture, three hours. Requisite: course 57. Art and history in Spanish southern Netherlands (i.e., present-day Belgium), circa 1550 to 1650, in context of Spanish rule and revolt against it (1568 to 1585), truce with northern independent (Dutch) Netherlands (1609 to 1621), and renewal of war (1621 to 1648). P/NP or letter grading.

C109A. Baroque Art. (4). Lecture, three hours. Art and architecture of Spain or Italy, 16th to late 17th century. Concurrently scheduled with course C209A. P/NP or letter grading.

M109C. European Art of 18th Century. (4). Lecture, three hours. Requisite: course 57. Painting, architecture, and sculpture of 18th century examined in light
of political and intellectual developments. Special emphasis on effect of rise of democratic institutions, esp. French Revolution. P/N or letter grading.

110C. European Art of 19th and 20th Centuries: England and Germany. P/N or letter grading.

M110D. Cultural and Intellectual History of Modern Europe, 19th Century. (Same as History M122E.) Lecture, three hours: discussion, one hour (when scheduled). Designed for juniors/seniors. Emphasis on social and political developments of time in historical context. P/N or letter grading.

110F. Selected Topics in Modern Art. (4). Lecture, three hours. Requisite: course 54. Changing topics in modern art (post-1780) that reflect interests of individual regular and/or visiting faculty members. May be repeated once for credit. P/N or letter grading.

C110H. Latin American Art of 20th Century. (4). Lecture, three hours: discussion, one hour (when scheduled). Mainstream modern and contemporary art and architecture of selected Latin American countries, including both modernist and postmodernist forms, considered in context of social and political concerns, both national and international. Concurrently scheduled with course C254. P/N or letter grading.

C110L. Mexican Art in Modern Age. (4). Lecture, three hours. Mexican art of 19th and 20th centuries, from Romanticism to present day. Study of art and revolution, muralism, surrealism, indigenism, postcolonialism, and postmodernism in painting, sculpture, prints, photography, and architecture. Concurrently scheduled with course C252. P/N or letter grading.

110J. Variable Topics in Western Art. (4). Lecture, three hours. Selected Topics in arts of Western peoples that reflect interests of individual regular and visiting faculty members. May be repeated for credit with topic change. P/N or letter grading.

C112A. American Art before Civil War. (4). Lecture, three hours. Painting, sculpture, and architecture in U.S. from Colonial period through Civil War. Concurrently scheduled with course C212A. P/N or letter grading.

C112B. American Art in Gilded Age, 1860 to 1900. (4). Lecture, three hours. Painting, sculpture, and architecture in the U.S. toward turn of century. Concurrently scheduled with course C212B. P/N or letter grading.

C112C. American Art, 1900 to 1945. (4). Lecture, three hours. Painting, sculpture, and photography in U.S. from 1900 to World War II. Concurrently scheduled with course C212C. P/N or letter grading.

113A. Architecture in U.S. (4), lecture, three hours; one hour discussion. Introduction to architecture built in U.S. over last 5,000 years. Architecture as vehicle for political and cultural authority, citizenship, ethnic and social identity; its role in defining place and our relationship to natural environment and as vehicle for asserting human control over natural world; its place in world of work and commerce; and its status as professional and aesthetic pursuit. P/N or letter grading.

113B. Cities in History. (4). Lecture, three hours: discussion, one hour. Examination of history of cities worldwide, locating cities in their aesthetic, social, cultural, and symbolic contexts. History of cities from origins of urbanism to present with focus on recent centuries. P/N or letter grading.

113C. American Houses. (4). Lecture, three hours. Many historians consider single-family houses to be one of two most American contributions to world architecture (next to skyscrapers). Examination of this claim critically by placing single-family houses in broader context of varied dwellings built and occupied by residents of present-day U.S. over last 500 years, including both aesthetically ambitious houses and ordinary (or vernacular) houses, houses of indigenous peoples and those of immigrants of many sorts, urban and rural houses, and single-family houses and multiplex dwellings of all sorts. Offered ways to think about houses we occupy and to understand how they relate to major themes in history of American architecture. P/N or letter grading.

114A. Early Art of India. (4). Lecture, three hours. Not open to freshmen. Survey of Indian art from Indus Valley cultures to 10th century. Emphasis on Buddhist and Hindu backgrounds of arts. P/N or letter grading.

114D. Later Art of India. (4). Lecture, three hours. Not open to freshmen. Survey of Indian art from 10th to 19th century. Decline of Buddhist art, last efflorescence of Hindu architecture, Muslim painting and architecture, and Rajput painting. P/N or letter grading.

114E. Arts of Korea. (4). Lecture, three hours. Art and archaeology of Korea from Neolithic Period through Yi dynasty. Particular emphasis on early archeology and state formation, Buddhist art, Koryo ceramics, and Yi literati painting. P/N or letter grading.

115A. Advanced Indian Art. (4). Lecture, three hours. Requisite: course 114A. Study in Indian sculpture and architecture. Concurrently scheduled with course C257. P/N or letter grading.

115D. Art and Material Culture, Neolithic to 21st B.C. (4). Lecture, three hours. Genesis of Chinese civilization in light of new archaeological finds, including sites and works of art (e.g., ceramics, bronzes, jades). Concurrently scheduled with course C261A. P/N or letter grading.

115E. Art and Material Culture of Early Imperial China, 210 B.C. to A.D. 906. (4). Lecture, three hours. Palaces and tombs of early imperial dynasties, impact of Buddhist art (cave temples), rise of new media and technologies. Concurrently scheduled with course C261B. P/N or letter grading.

115F. Art and Material Culture of Late Imperial China, 906 to 1911. (4). Lecture, three hours. Secular and religious (Buddhist and Taoist) architecture, painting, sculpture, and various luxury industries (lacquer, porcelain, textiles, jade, bronze, furniture, wood and bamboo carving, etc.). Concurrently scheduled with course C261C. P/N or letter grading.

115I. Selected Topics in Chinese Art. (4). Lecture, three hours. Variable topics in Chinese art that reflect interests of individual regular and/or visiting faculty members. Concurrently scheduled with course C261E. P/N or letter grading.

115J. Fieldwork in Archaeology. (8). Fieldwork, eight hours. Course takes place at Yangguanzhai Village, Jing River Valley, approximately 25 kilometers north of ancient city of Xi’An in northwestern China, as collaborative project between Cotsen Institute of Archaeology at UCLA, Shaanxi Institute of Archaeology, and Xaibei University in Xi’An China. Students spend first week in Xi’An for five days of lectures and museum instructional tours. Following four weeks are spent in field participating in excavation and laboratory work at Shaanxi Institute of Archaeology’s Jingwei Research Base near Yangguanzhai site. Concurrently scheduled with course C212J. P/N or letter grading.

C117A. Pre-Columbian Art of Mexico. (4). Lecture, three hours. Requisite: course 55B. Study of art of selected cultures of northern Mesoamerica from circa 1200 B.C. to Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C218A. P/N or letter grading.

C117B. Pre-Columbian Art of Maya. (4). Lecture, three hours. Requisite: course 55B. Study of art of selected Maya-speaking cultures of southern Mesoamerica from circa 2000 B.C. to Conquest, with particular emphasis on history and iconography of art of Pre-Classic period. Concurrently scheduled with course C218B. P/N or letter grading.

C117C. Pre-Columbian Art of Andes. (4). Lecture, three hours: discussion, one hour. Requisite: course 55B. Study of art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from circa 4000 B.C. to Conquest, with particular emphasis on history and iconography of art of Pre-Inca period. Concurrently scheduled with course C218C. P/N or letter grading.
C117D. Aztec Art. (4). Lecture, three hours. Requisite: course 55B or C117A. Painting, sculpture, architecture, and other arts of Nahua-speaking peoples of central Mexico. Survey of architectural and monumental art in various geographic regions of Mexico, from the earliest Aztec period to the fall of the Aztec Empire. Includes study of Aztec art in the imperial capital of Tenochtitlan, the Aztec state in its formative period, and the postconquest period, with emphasis on their social and historical context and major scholarly debates. Concurrency required with course C216D. P/NP or letter grading.

C119C. Contemporary Arts of Africa. (4). Lecture, three hours; discussion, one hour (when scheduled). Survey of African visual culture from the mid-20th century to the present with special emphasis on changing meaning of art in contemporary African society. Study of contemporary African art and its influences and contributions to global art. Concurrency required with course C216C. P/NP or letter grading.

C119D. Architecture and Urbanism in Africa. (4). Lecture, three hours. Survey of African built environment at various points in time and in different places from about 200 B.C.E. to present, with emphasis on cultural, political, and social contexts of architecture. Concurrency required with course C216D. P/NP or letter grading.

C119E. African Civilizations. (4). Lecture, three hours. Development of very different African civilizations through their arts from 100 B.C.E. to present. P/NP or letter grading.

127. Undergraduate Seminar. (4). Seminar, three hours. Designed for juniors/seniors. Selected aspects of art history explored through readings, discussion, research papers, and oral presentations. May be repeated twice. P/NP or letter grading.

C140C. History of Korean Buddhist Art. (4). Lecture, three hours. Requisite: course 114E. History of Korean Buddhist art from Three Kingdom period to Choson dynasty, with special emphasis on Buddhist sculpture, painting, and architecture. Concurrency required with course C242C. P/NP or letter grading.

C140D. Selected Topics in Korean Art. (4). Lecture, three hours. Requisite: course 114E. Variable topics in Korean art. May be repeated for credit. Concurrently scheduled with course C242D. P/NP or letter grading.

C147. Modern Art, 1900 to 1950. (4). Lecture, three hours. Inquiry into 20th-century modernism from Fauvism to abstract expressionism. Topics include prehistorical, primitivism, gender, and sexuality in modernist art; origins of abstraction, collage, photomontage, and ready-made; rise of automatism and chance procedures; art, utopia, and political revolution; antismodernism and feminism; mass culture, machine paradigm, and work of art in age of mechanical reproduction. Concurrency required with course C247. P/NP or letter grading.

C149A. Dada, 1915 to 1923. (4). Lecture, three hours; discussion, one hour (when scheduled). Introduction to modernism and historical avant-garde of early 20th century. Topics include: history of Dada avant-garde in its various geographical locales during and after World War I. Visual art, literature, film, and performance addressed, with special attention to invention of series of avant-garde strategies crucial to Dada: ready-made, chance procedures, mechanical drawing, and photomontage. Concurrently scheduled with course C249A. P/NP or letter grading.

C149B. Surrealism, 1924 to 1939. (4). Lecture, three hours; discussion, one hour (when scheduled). Study of art, literature, and film associated with surrealism movement in France, with special attention to dissident surrealism of writer and philosopher Georges Bataille, as well as to challenge to art history posed by surrealism’s engagement with lessons of psychoanalysis. Concurrently scheduled with course C249B. P/NP or letter grading.

C150A. Contemporary Art, 1940s to 1950s. (4). Lecture, three hours. Requisite: course 54. Study of major artistic and cultural trends following World War II in U.S. and Europe, covering abstract expressionism to pop art. Concurrency required with course C250A. P/NP or letter grading.

C150C. Contemporary Art, 1980s to Present. (4). Lecture, three hours; discussion, one hour (when scheduled). Study of politics of representation at end of century, covering dominant strategies and trends in postmodernism to current developments. Concurrently scheduled with course C250C. P/NP or letter grading.

150D. Selected Topics in Contemporary Art. (4). Lecture, three hours. Requisite: course 54. Changing topics in contemporary art (post-1945) that reflect interests of individual regular and/or visiting faculty members. May be repeated once for credit. P/NP or letter grading.

C171B. 1910 to Present. Lecture, three hours; discussion, one hour. History of photography in 20th century, with special attention to photography’s entrance into project of avant-garde and its role in formation of postmodern aesthetic. C171C. Selected Topics. Lecture, three hours. Variable topics in history of photography that reflect interests of individual regular and/or visiting faculty members.

M172. Armenian Painting, 17th to 20th Century. (4). (Same as Armenian M172.) Lecture, three hours. Overview of development of modern Armenian painting out of its matrix in 17th and 18th centuries. P/NP or letter grading.

C180A. Art and Empire. (4). Lecture, three hours. Examination of relationship between art and imperial ideologies and introduction to current issues in colonial studies and postcolonial criticism. Concurrently scheduled with course C180B. P/NP or letter grading.

C180C. Modern and Contemporary South Asian Art. (4). (Formerly numbered C180C.) Lecture, three hours; discussion, one hour (when scheduled). Topics in modern and contemporary South Asian art from 1947 to present. Concurrently scheduled with course C250C. P/NP or letter grading.

195. Museum Studies Internship. (2 to 4). Tutorial, four hours; fieldwork, three hours. Requisite: course C103A or C103B. Limited to junior/senior Art History majors, internship in supervised setting at participating host museum at UCLA or in greater Los Angeles area. Participation in ongoing museum projects and operations, with specific work to be determined by host institution in consultation with faculty mentor. Course or educational, community, or public relations, and development work may be included, as well as assistance at public programs and related events. Students meet on regular basis with faculty mentor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty mentor required. P/NP grading.

197. Individual Studies in Art History. (2 to 4). Tutorial, to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. Individual intensive study for majors, with scheduled meetings to be arranged between faculty and student. As assigned reading and tangible evidence of mastery of subject matter required. May be repeated for maximum of 8 units. Eight units may be applied toward major. Individual contract required. P/NP or letter grading.
Graduate Courses

200. Art Historical Theories and Methodologies. (4). Seminar, three hours. Critical examination of history of discipline of art history, with studies of various theoretical, critical, and methodological approaches to visual arts from antiquity to present. May be repeated for credit with consent of adviser. S/U or letter grading.

201. Topics in Historiography of Art History. (4). Seminar, three hours. Critical examination of historiographic trends and areas of the discipline of art history, concentrating on particular time periods, geographical areas, artistic traditions, or work of one or more authors. May be repeated for credit with consent of adviser. S/U or letter grading.

202. Topics in Theory and Criticism in Art History. (4). Seminar, three hours. Focused studies of various theoretical and critical traditions within art history, concentrating on particular issues, authors, or methodologies. May be repeated with consent of adviser. S/U or letter grading.

203. Conservation and Management of Art. (4). Seminar, two hours. Laboratory, four hours. Conservation and technical methods by which material constituents of works of art are studied. Development of basic theoretical knowledge on dating, connoisseurship, authorship, and authenticity, originality, fakes, and forgeries in art. Overview of problems inherent in concept of authenticity and description of many examples of problems related to this concept in series of discussions based on objects from various cultures. Introduction to subject of fakes and account of three different areas of connoisseurship that are essential component of production, study, and scientific examination of fakes. Nature of art connoisseurship described in many examples from Renaissance and earlier panel paintings, as well as antiques and traditional African arts. Background of art restoration and art conservation discussed in relationship to authenticity and technical studies. Scientific tools that form basis of another kind of connoisseurship described in terms of dating techniques that can be applied directly to works of art and technical methods by which material constituents of works of art are studied. Concurrently scheduled with course C103D. Letter grading.

205. Imaging Black African History, Art History, and Art. (4). Seminar, two hours. Laboratory, two hours. Basic and advanced techniques on digital photography, computer-aided recording/text recording tools, art to determine and document condition (defects) and technological features of anthropological and ethnographic material. Development of basic theoretical knowledge on imaging and photographic processes of black African American artists whose works provide insightful critical analysis of black visual production and racism. Concurrently scheduled with course CM112F. Letter grading.

211. Topics in Aegean Art. (4). Seminar, two hours. May be repeated for credit with consent of adviser. Concurrently scheduled with course C109A. S/U or letter grading.

210. Egyptian Art. (4). Seminar, two hours. Requisites: courses M101A, M101B, M102A. Art in Egypt during Late period and Greco-Roman period. Students should be ready to prepare for every meeting by briefing of topic from archaeological memoirs, not to exceed 10 minutes. Some lectures may be repeated for credit with consent of adviser. S/U or letter grading.

211. Topics in Aegean Art. (4). Seminar, two hours. Requisites: courses M101A, M101B, M102A. Art and architecture of Aegean Bronze Age (3000 to 1000 B.C.). Monuments or theoretical problems related to art and culture of ancient Greece, Cyclades, or Western Anatolia. May be repeated for credit with consent of adviser. S/U or letter grading.

212A. American Art before Civil War. (4). Lecture, three hours. Painting, sculpture, and architecture in U.S. from Colonial period through Civil War. May be repeated for credit with consent of adviser. Concurrently scheduled with course C112A. S/U or letter grading.

212B. American Art in Gilded Age, 1860 to 1900. (4). Lecture, three hours. Painting, sculpture, and architecture in U.S. from Civil War to turn of century. May be repeated for credit with consent of adviser. Concurrently scheduled with course C112B. S/U or letter grading.

212C. American Art, 1900 to 1945. (4). Lecture, three hours. Painting, sculpture, and photography in U.S. from 1900 to 1945. May be repeated for credit with consent of adviser. Concurrently scheduled with course C112C. S/U or letter grading.

212D. African American Art. (4). (Same as African American Studies CM212D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists. May be repeated for credit with consent of adviser. Concurrently scheduled with course CM112D. S/U or letter grading.

212F. Imaging Black Popular Culture. (4). (Same as African American Studies CM212F.) Lecture, three hours. Critical examination of media ranging from African American painting and sculpture to MTV and advertising, with emphasis on relationship between black visual production and racism. Documenting, political resistance, and notions of blackness. Concurrently scheduled with course CM112F. S/U or letter grading.

213. Advanced Studies in Islamic Art. (4). Seminar, two hours. Art and architecture of Islamic world (Spain to Iran) from 7th to 17th century. Monuments or theoretical problems related to Islamic culture and artistic production. May be repeated for credit with consent of adviser. S/U or letter grading.

214. Problems in Islamic Art. (4). Seminar, three hours. Monuments or theoretical problems related to Islamic art and artistic production. May be repeated for credit with consent of adviser. Concurrently scheduled with course C104C. S/U or letter grading.

215J. Fieldwork in Archaeology. (8). Fieldwork, eight hours. Course may be repeated every other year, once in the vicinity of Los Angeles. May be repeated for credit with consent of adviser. Concurrently scheduled with course C104C. S/U or letter grading.
spent in field participating in excavation and labora-

C216C. Contemporary Arts of Africa. (4). Lecture, three hours; discussion, one hour (when scheduled). Surveys African visual practices since mid-20th cen-
tury, with special emphasis on changing meaning of art object, status of African artist, global reception of contemporary African art, and very definitions of cont-
emporary African art. Concurrently scheduled with course C119C. S/U or letter grading.

C216D. Architecture and Urbanism in Africa. (4). Lecture, three hours. Survey of African built environ-
ment at various moments and in different places from about 200 C.E. to present, with emphasis on cultural, social, and historical contexts of architecture, gender, and space, and contemporary African cities. Concur-
rently scheduled with course C119D. S/U or letter grading.

217. Primitivism and Art. (4). Lecture, three hours. History of primitivism in visual arts and its institutional base from ancient Greece to present, with emphasis on relevance to contemporary issues, critiques, and theory. May be repeated for credit with consent of ad-
viser. S/U or letter grading.

C218A. Pre-Columbian Art of Mexico. (4). Lecture, three hours. Requisite: course 55B. Study of art of se-
lected Maya-speaking cultures from circa 1200 B.C. to Conquest, with emphasis on historical and iconographic problems. May be repeated for credit with consent of adviser. Concurrently sched-
uled with course C117A. S/U or letter grading.

C218B. Pre-Columbian Art of Maya. (4). Lecture, three hours. Requisite: course 55B. Study of art of se-
lected Maya-speaking cultures of southern Meso-
america from circa 2000 B.C. to Conquest, with par-\nticular emphasis on iconography. May be repeated for credit with consent of adviser. Concurrently sched-
uled with course C117B. S/U or letter grading.

C218C. Pre-Columbian Art of Andes. (4). Lecture, three hours; discussion, one hour. Requisite: course 55B. Study of art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from circa 4000 B.C. to Conquest, with particular emphasis on history and iconography of art of Peru. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117C. S/U or letter grading.

C218D. Aztec Art. (4). Lecture, three hours. Requi-
site: course 55B. Study of art of Mexico. Painting, sculp-
ture, and other arts of Nahua-speaking peoples of central Mexico in centuries before Spanish con-
quest, with emphasis on their social and historical contexts and major scholarly debates. May be re-
peated for credit with consent of adviser. Concurrently sched-
uled with course C117D. S/U or letter grading.

218E. Colonial Latin American Art. (4). Lecture, three hours. Hybrid visual cultures created in after-
math of this cultural collision in Mexico, former Vice-
royalty of New Spain, from 16th to 18th century. Topics include theories of conquest and colonization; role of art and architecture in conquest, conversion, and colonization; indigenous artistic responses and creation of hybrid visual practices in featherwork, manuscripts, painting, sculpture, and architecture; maps and geography of colonization; urban planning and utopian ideals; Counter-Reformation and politics of representation; saints' cults and gender ideologies; Aztec and Hispanic Catholic blood sacrifice imagery; processions; and alchemical iconography. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117E. S/U or letter grading.

219A. Oceanic Art. (4). Seminar, three hours. Studies in selected topics in art of Pacific Islands. May be re-
peated for credit with consent of adviser. S/U or letter grading.

219B. Pre-Columbian Art. (4). Seminar, three hours. Studies in selected topics in art of pre-Hispanic Latin America. May be repeated for credit with consent of adviser. S/U or letter grading.

219C. African Art. (4). Seminar, three hours. Studies in selected topics in art of sub-Saharan Africa. May be repeated for credit with consent of adviser. S/U or letter grading.

219D. Native North American Art. (4). Seminar, three hours. Studies in selected topics in art of Amer-
ican Indians. May be repeated for credit with consent of adviser. S/U or letter grading.

225. Medieval Art. (4). Seminar, two hours. Preparation: knowledge of Latin, working knowledge of Late, Workshop approach to documents pertaining to artistic commissions from 15th to 17th century in Italy to study various aspects of handwriting in official and private deeds, corre-
spendence, treatises, and inscriptions. May be re-
peated for credit with consent of adviser. S/U or letter grading.

229. Renaissance and Baroque Paleography. (4). Seminar, two hours. Preparation: knowledge of Italian, working knowledge of Late, Workshop approach to documents pertaining to artistic commissions from 15th to 17th century in Italy to study various aspects of handwriting in official and private deeds, corre-
spendence, treatises, and inscriptions. May be re-
peated for credit with consent of adviser. S/U or letter grading.

230. Italian Renaissance Art. (4). Seminar, two hours. Preparation: knowledge of Italian. Study of various aspects of Leonardo's theoretical app-
proach to art in terms of sources and impact on followers. May be re-
peated for credit with consent of adviser. S/U or letter grading.

231. Leonardo and Renaissance Theory of Art. (4). Seminar, two hours. Preparation: knowledge of Italian. Study of various aspects of Leonardo's theoretical ap-
proach to art in terms of sources and impact on followers. May be repeated for credit with consent of adviser. S/U or letter grading.

235. Northern Renaissance Art. (4). Seminar, two hours. Preparation: knowledge of German. Emphasis on selected topic (e.g., particular artist, trend, or problem). Research papers and oral reports required. May be repeated for credit with consent of adviser. S/U or letter grading.

240. Baroque Art. (4). Seminar, two hours. Emphasis on selected topic (e.g., particular artist, trend, or problem). Research papers and oral reports required. Language requirements depend on area of focus. May be repeated for credit with consent of adviser. S/U or letter grading.

241A-M241B. Seminars: Modern European His-
tory (4-4). (Same as History M230A-M230B.) Sem-
inar, three hours. Course M241A is requisite to M241B. May be repeated for credit with consent of adviser. In Progress (M241A and S/U or Letter (M241B) grade).

242A. History of Korean Painting. (4). Lecture, three hours. Preparation: course 114E. Korean painting his-
tory from Three Kingdom period to 19th century, with special emphasis on Choson dynasty (1392 to 1910). Concurrently scheduled with course C140A. S/U or letter grading.

242B. History of Korean Ceramics. (4). Lecture, three hours. Preparation: course 114E. History of Ko-
rean ceramics from Neolithic period to 19th century, with special emphasis on technological and stylistic developments. Concurrently scheduled with course C140B. S/U or letter grading.

242C. History of Korean Buddhist Art. (4). Lecture, three hours. Preparation: course 114E. History of Ko-
rean Buddhist art from Three Kingdom period to Choson dynasty, with emphasis on Buddhist sculpture, painting, and architecture. Concurrently scheduled with course C140C. S/U or letter grading.

242D. Selected Topics in Korean Art. (4). Lecture, three hours. Preparation: course 114E. Variable topics in Korean art that reflect interests of individual regular and/or visiting faculty members. Concurrently sched-
uled with course C140D. S/U or letter grading.

243. Topics in European Art, 1700 to 1900. (4). Seminar, two to three hours. May be repeated for credit with consent of adviser. S/U or letter grading.

245. European Art, 1700 to 1900. (4). Seminar, two hours. Preparation: knowledge of German. Emphasis on selected topic (e.g., particular artist, trend, or problem). Research papers and oral reports required. May be repeated for credit with consent of adviser. S/U or letter grading.

246. Modern Art, 1900 to 1950. (4). Lecture, three hours; discussion, one hour. Inquiry into 20th-century modernism from Fauvism to abstract expressionism. Topics include primitivism, gender, and sexuality in modernist art; origins of abstraction, collage, photo-

C247. Modern Art, 1900 to 1950. (4). Lecture, three hours; discussion, one hour. Inquiry into 20th-century modernism from Fauvism to abstract expressionism. Topics include primitivism, gender, and sexuality in modernist art; origins of abstraction, collage, photo-

C248. Surrealism, 1924 to 1939. (4). Lecture, three hours; discussion, one hour (when scheduled). Study of art, literature, and film associated with surrealist movement in France, with special attention to dissi-

C249. Dada, 1915 to 1923. (4). Lecture, three hours; discussion, one hour (when scheduled). Introduction to modernism and historical avant-garde of early 20th century, tracing in detail emergence of Dada avant-
garde in its various geographic locales during and after World War I. Visual art, literature, film, and per-
formance addressed, with special attention to inven-
tion of series of avant-garde strategies crucial to Dada: ready-made, collage, montage, and ready-made; rise of automatism and chance procedures; art, utopia, and political revolu-
tion; antimodernism and fascism; mass culture, ma-

C250. Contemporary Art, 1940s to 1950s. (4). Lecture, three hours. Preparation: knowledge of Late, Workshop approach to documents pertaining to artistic commissions from 15th to 17th century in Italy to study various aspects of handwriting in official and private deeds, corre-
spendence, treatises, and inscriptions. May be re-
peated for credit with consent of adviser. S/U or letter grading.

C251. Contemporary Art, 1960s to 1970s. (4). Lecture, three hours. Preparation: course 54. Study of major artistic and cultural trends following World War II in U.S. and Europe, covering abstract expres-
sionism to pop art. Concurrently scheduled with course C150A. S/U or letter grading.

252C. Mexican Art in the Modern Age. (4). Lecture, three hours. Mexican art of 19th and 20th centuries, from foundation of academy in 1785 to present day. Study of art and revolution, muralism, surrealism, indigenism, modernism, and postmodernism in painting, sculpture, prints, photography, and architecture. Concurrently scheduled with course C110L. S/U or letter grading.

253. Modern Art. (4). Seminar, two hours. Changing topics in modern art (including illustration and other popular forms) that reflect interests of particular faculty members. Political and economic factors affecting arts of France and Germany at various times. May be repeated for credit with consent of adviser. S/U or letter grading.

254. Latin American Art of 20th Century. (4). Lecture, three hours; discussion, one hour (when scheduled). Mainstream modern and contemporary art and architecture of selected Latin American countries, including both modernist and postmodernist forms, considered in context of social and political concerns, both national and international. May be repeated for credit with consent of adviser. Concurrently scheduled with course C110H. S/U or letter grading.

M256. Topics in African American Art. (4). (Same as African American Studies M256.) Seminar, three hours. Requisite: course CM112D or CM112E or CM112F. Topics in African American art from 18th century to present. May be repeated for credit with consent of adviser. S/U or letter grading.

257. Advanced Indian Art. (4). Lecture, three hours. Requisite: course 114A. Study in Indian sculpture and architecture. May be repeated for credit with consent of adviser. Concurrently scheduled with course C115A. S/U or letter grading.

260A. Indian Art. (4), Lecture, two hours. Advanced studies in secular and religious artistic traditions of India. May be repeated for credit with consent of adviser. S/U or letter grading.

260C. Japanese Art. (4), Lecture, two hours. Advanced studies in secular and religious artistic traditions of Japan. May be repeated for credit with consent of adviser. S/U or letter grading.

C251A. Art and Material Culture, Neolithic to 210 B.C. (4). Lecture, three hours. Genesis of Chinese civilization in light of new archaeological finds, including sites and works of art (e.g., ceramics, bronzes, jades). May be repeated for credit with consent of adviser. Concurrently scheduled with course C115D. Extensive research paper required of graduate students. S/U or letter grading.

C261B. Art and Material Culture of Early Imperial China, 210 B.C. to A.D. 906. (4). Lecture, three hours. Palaces and tombs of early imperial dynasties, impact of Buddhist art (cave temples), rise of new media and technologies. May be repeated for credit with consent of adviser. Concurrently scheduled with course C115E. S/U or letter grading.

C261C. Art and Material Culture of Late Imperial China, 906 to 1911. (4). Lecture, three hours. Secular and religious (Buddhist and Taoist) architecture, painting, sculpture, and various luxury industries (lace, porcelain, textiles, jade, bronze, furniture, wood and bamboo carving, etc.). May be repeated for credit with consent of adviser. Concurrently scheduled with course C115F. S/U or letter grading.

C261D. Art in Modern China. (4), Lecture, three hours. Concentrated look at major schools and masters of Chinese art from turn of 20th century to present, with focus on interaction with foreign cultures and issues of self-identity, assimilation, modernity, tradition, and continuity. Consideration of recent developments in Chinese art in global context. Concurrently scheduled with course C115G. S/U or letter grading.

C261E. Selected Topics in Chinese Art. (4). Lecture, three hours. Variable topics in Chinese art that reflect interests of individual regular and/or visiting faculty members. Concurrently scheduled with course C115I. S/U or letter grading.

M262A. Topics in Asian Archaeology. (4). (Same as Anthropology M216.) Lecture, three hours. Designed for graduate students. Topics may include identification of ethnic groups in archaeology, archaeology of religion, archaeological reflections of commerce and trade and their influence on social development, archaology of language dispersal, cultural contact and nature of cultural “influence.” Letter grading.

265. Fieldwork in Archaeology. (2 to 8). Fieldwork, to be arranged. Participation in archaeological excavations or other archaeological research under supervision of staff. May be repeated for credit with consent of adviser. S/U or letter grading.

C271A-C271B-C271C. History of Photography. (4-4-4). Lecture, three hours; discussion, one hour. Concurrently scheduled with courses C171A-C171B-C171C. S/U or letter grading.

C271A. 1839 to 1910. Study of origin, social functions, and development of photography in 19th and early 20th centuries, from Niépce to Atget. C271B. 1910 to Present. History of photography in 20th century, with special attention to photography’s entrance into project of avant-garde and its role in formation of postmodern aesthetic. C271C. Selected Topics. Variable topics in history of photography that reflect interests of individual regular and/or visiting faculty members.

C280A. Art and Empire. (4). Lecture, three hours. Examination of relationship between imperial ideologies and introduction to current issues in colonial studies and postcolonial criticism. Concurrently scheduled with course C180A. Letter grading.

280C. Modern and Contemporary South Asian Art. (4). (Formerly numbered C280C.) Lecture, three hours. Topics in modern and contemporary South Asian art from 1900 to present. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4). Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Teaching Art History. (1 to 4). Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Described for graduate students. Required of all new teaching assistants during Fall Quarter of their teaching assistant appointment. Workshop/seminar in teaching techniques and pedagogical issues, consisting of readings, discussions, and guest speakers on selected topics from fall quarter through M.A. or Ph.D. course requirements. S/U grading.
lics in inner-city settings. Study of core issues in arts education, creativity, and social justice as students develop, implement, and assess original syllabi, lesson plans, and community learning projects for multiple publics in inner-city schools and arts organizations. Collaboration with partner schools in planning, teaching, and evaluation of arts education programs in dance, music, and visual arts. P/NP or letter grading.

M192. Arts Education Undergraduate Practicum: Preparation, Observation, and Practice. (4), (Formerly numbered 192.) Seminar, three hours. Required courses: courses M102, M112. Limited to juniors/seniors. Continuation of arts education training and supervised practicum for advanced undergraduate students participating in Visual and Performing Arts Education minor. Study projects for individual contract needs for personal enrichment by preparing them either for advanced graduate studies or for life after college as citizens, employees, and entrepreneurs.

Victor Bascara, Ph.D.
Lucy M. Burns, Ph.D.
Keith Lujan Camacho, Ph.D.
Grace Kyungwon Hong, Ph.D.
Vinay Lai, Ph.D.
Anna S. Lau, Ph.D.
David Wong Louie, M.F.A.
Purnima Maniak, Ph.D.
Allee Moon, Ph.D.
Vinit Mukhija, Ph.D.
Thu-huong Nguyen-vio, Ph.D.
Kyeoung Park, Ph.D.
Robert Chao Romero, J.D., Ph.D.

Lecturers
Stewart Kowth, J.D.
Glenn K. Omanstu, M.A.
Duong Pham, Ph.D.

Adjunct Assistant Professor
Tritia Toyota, Ph.D.

Scope and Objectives
The Department of Asian American Studies, founded in 2004, is a national and international leader in promoting the study of Asian and Pacific Islander Americans across a number of fields and disciplines.

Follow ing the tradition of civil rights struggles of the 1960s and 1970s, the department values the social relevance of its curriculum and its ability to address the needs of students and the community. The department also grants two concurrent M.A. degrees—one jointly with the Fielding School of Public Health and one with the Social Welfare Department. The teaching and research methods used by faculty members in the department have been interdisciplinary and comparative, with a healthy mix of quantitative, qualitative, interpretive, and applied approaches. These methods develop out of the dynamic cross-fertilization among faculty expertise that registers both major intellectual shifts in the field and notable trends from disparate disciplines, professional practices, and epistemological traditions.

Undergraduate Study
The Asian American Studies major is a designated capstone major. Students are required to complete either a community-based applied research project or an independent scholarly or creative expression project. Those who select the community-based project are expected to use their scholarly knowledge and analytical skills to examine problems facing Asian American and/or Pacific Islander populations, think creatively and innovatively about evidence-based solutions, and to produce reports that benefit community stakeholders. Those who select to design and complete an independent scholarly or creative expression project pursue a key idea or theme of personal interest that is related to their prior coursework and to the experiences and realities of Asian Americans and/or Pacific Islanders. Through their capstone work, all students are expected to demonstrate their skills in using and synthesizing knowledge gained in disparate courses and communicating effectively their findings and conclusions in a final paper, report, or project and in a public forum.

Asian American Studies B.A. Capstone Major
The B.A. program in Asian American Studies provides a general introduction for students who anticipate advanced work at the graduate level or careers in research, public service, and community work related to Asian Pacific Americans. An overall grade-point average of 2.0 or better is required for admission to the major.
Asian American Studies

Preparation for the Major
Required: Two courses from Asian American Studies 10 or 10W, 20, 30 or 30W, 40, 50.

Transfer Students
Transfer applicants to the Asian American Studies major with 90 or more units must complete as many of the following courses as possible prior to admission to UCLA: two lower division Asian American studies courses or two courses that focus on Asian Americans.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major
Required: A total of 12 upper division courses, including one scholarly and creative communications in Asian American studies course (Asian American Studies 101); one multidisciplinarity course selected from 103 through M129 and M172C; one creative expression course selected from 112C, 120, 121B, 142A, 142B, 142C; one diversity course selected from 115, M116, 120, 130A, M130B, M130C, 143B, M143C, M165, 167, 168, 174A, 175A; one global/transnational course selected from 122A, 123, 170, 171A, 171B, 171C, M172C, 174B, 175B; one engaged scholarship course selected from 140SL, 141A, 141B, M143A, 195; five Asian American Studies elective courses selected from 103 through 199; and one capstone project course selected from 185 or 187.

No more than 12 graded units of Asian American Studies 195, 197, 198, and 199 may be applied toward the major. Courses 192 and 196 may not be applied toward the major.

Each course applied toward the major must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), and each must be at least 4 units.

Honor's Program
Admission
The honors program is open to junior and senior Asian American Studies majors who have (1) 90 or more total units, (2) a grade-point average of 3.5 or better in upper division Asian American studies courses and an overall cumulative GPA of 3.0 or better, and (3) completed two lower division Asian American studies courses and one upper division research methods course selected from a list maintained in the Student Advising Office. Applications must be submitted no later than the end of the fifth week of classes during Winter Quarter each academic year. For application forms and further information, contact the undergraduate counselors.

Requirements
Honors students must take Asian American Studies 198A during Spring Quarter of the junior year. During Fall and Winter Quarters of the senior year, they take courses 198B and 198C, in which they write a thesis or its equivalent under the direction of a faculty member.

Asian American Studies Minor
The Asian American Studies minor is designed for students who wish to gain understanding of and competence in Asian American studies.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed two lower division Asian American studies courses, and file a petition with the undergraduate counselors, Asian American Studies Department, 3336 Rolfe Hall.

Required Lower Division Courses (10 units):
Two courses from Asian American Studies 10 or 10W, 20, 30 or 30W, 40, 50.

Required Upper Division Courses (20 units):
A total of five upper division courses as follows: one multidisciplinarity course selected from Asian American Studies 103 through M129 and M172C; one creative expression course selected from 112C, 120, 121B, 142A, 142B, 142C; one diversity course selected from 115, M116, 120, 130A, M130B, M130C, 143B, M143C, M165, 167, 168, 174A, 175A; one global/transnational course selected from 122A, 123, 170, 171A, 171B, 171C, M172C; and one engaged scholarship course selected from 140SL, 141A, 141B, M143A, 195.

No more than 4 graded units of Asian American Studies 195, 197, and 199 may be applied toward the minor. Courses 192 and 196 may not be applied toward the minor. Only courses in the department or those multiple-listed with the department may be taken to fulfill requirements for the minor.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), each must be at least 4 units, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaaa /library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Asian American Studies offers the Master of Arts (M.A.) degree in Asian American Studies. Two concurrent degree programs (Asian American Studies M.A./Public Health M.P.H. and Asian American Studies M.A./Social Welfare M.S.W.) are also offered.

Asian American Studies
Lower Division Courses
10. History of Asian Americans. (5). Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 10W. Multidisciplinary examination of history of Asians and Pacific Islanders in U.S. P/NP or letter grading.

10A. History of Asian Americans. (5). Lecture, three hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 10. Multidisciplinary examination of history of Asians and Pacific Islanders in U.S. Satisfies Writing II requirement. Letter grading.

20. Contemporary Asian American Communities. (5). Lecture, three hours; discussion, one hour. Multidisciplinary introduction to contemporary Asian American populations and communities in U.S. Topics include contemporary immigration, demographic trends, sociocultural, economic, and political issues, and interethnic relations. P/NP or letter grading.

30. Asian American Literature and Culture. (5). Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 30W. Multidisciplinary introduction to Asian American literature and cultural production, with examination of some combination of novels, short stories, poetry, drama, performance, film, visual art, music, and/or new media. P/NP or letter grading.

30W. Asian American Literature and Culture. (5). Lecture, three hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 30. Multidisciplinary introduction to Asian American literature and cultural production, with examination of some combination of novels, short stories, poetry, drama, performance, film, visual art, music, and/or new media. Satisfies Writing II requirement. Letter grading.

50. Asian American Women. (5). Lecture, three hours; discussion, one hour. Overview of history of feminist theory and intersection of gender, class, race/ethnicity from cross-cultural perspectives, with focus on Asian American women’s lived experiences in U.S. Topics include Asian American women’s roles in family life, work, community organization, social change, and cultural creativity. Examination of broader structural forces that affect women in society, such as racialization, immigration, global capitalism, colonialism and postcolonialism, and social movements. P/NP or letter grading.

97. Variable Topics in Asian American Studies. (1 to 2). Tutorial, one to two hours. Current topics and particular research methods in Asian American studies through readings and other assignments. May be repeated for credit. P/NP grading.

Upper Division Courses
101. Scholarly and Creative Communication in Asian American Studies. (4). Lecture, three hours. Requisites: course 10 or 10W or 20, and either 10 (or 10W) or 20, or one additional course from 30, 30W, 40, or 50. Designed for advanced junior/senior Asian American Studies majors and minors. Examination of alternative modes of expression to effectively reach academic and nonacademic audiences, including written text, visual materials, and performance. Explo-
ration of scholarly works by looking at how narratives are developed, ideas and values are framed, or knowledge is generated and transmitted, through either traditional or electronic mediums. It involves the use of discursive and popular forms, stylistic patterns, and communicative practices. Themes and content vary by term. Independent research related to course objective may be pursued with guidance from instructor. Sharing and critiquing of other student works in progress. P/NP or letter grading.

104A. Internships in Asian Pacific Communities. (4). Fieldwork, eight hours minimum. Requisite: course 104A or another Asian American studies course (except 195). Integrates academic and ethno-cultural variables. Not open to students who have used wide range of sources that may include archival materials, oral history, material culture, and more. P/NP or letter grading.

105. Historical Research Methods. (4). Seminar, three hours. Requisite: course 10. Introduction to methods used to locate and analyze source materials for research on Asian American history. Historians have used wide variety of sources that may include archival materials, oral history, material culture, and more. P/NP or letter grading.

111. Asian Americans and War. (4). Lecture, three hours. Interdisciplinary examination of role that war has played in history and culture of Asian Americans, drawing on diverse set of materials ranging from Asian American history, oral history, and Hollywood films to anti-war propaganda to political speeches, Supreme Court decisions, and protest culture, to evaluate relationships between Asian American communities and geopolitical conflicts from late-19th century to contemporary period. P/NP or letter grading.

112A. Historical Survey of Asian American Literature. (5). [Same as English M102A.] Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of Asian American literature either produced from or thematically reflecting pre-1980 period. Issues include immigration, diaspora, generational conflict, appropriation of cultural traditions, ethnic/student/migration, interethnic dynamics, and social movement. Works by such authors as Edith Euston, Younghill Kang, Carlos Bulosan, Bao-Ni Huynh, Victor T. Ng, John Okada, Frank Yen, and Maxine Hong Kingston. P/NP or letter grading.

112B. Contemporary Asian American Literature. (6). Lecture, four hours. Study of Asian American plays, students required to compose one act based on their own experience using lessons learned in class. Exploration of scene study and acting exercises. P/NP or letter grading.

112C. Asian American Creative Writing. (4). Seminar, four hours. Enforced requisite: English Composition 3 or 3H. Designed for juniors/seniors. Examination of several dimensions of Asian American society, including politics and political relevance to current issues. How movement participants linked struggle for change with own personal transformation and growth. P/NP or letter grading.

113. Asian Americans and Law. (4). Lecture, four hours. Survey of major federal and California case and legislative law directly or specifically toward Asian Americans from 1850 to World War II and incarceration. Major subject areas include anti-Asian labor legislation, legal prohibitions against Asians’ right to testify, Executive Order 9066, and equal educational opportunity for Asians. P/NP or letter grading.

114. Asian American Education and Schooling. (4). (Same as Education M103.) Seminar, four hours. Examination of existing body of research from various disciplines on Asian/Pacific American educational experiences. Letter grading.

116. Asian American Social Movements. (4). (Same as Labor and Workplace Studies M116E.) Lecture, three hours. Designed for juniors/seniors. Examination of several dimensions of Asian American social movements, including grassroots, mass movements, social justice, environmental justice, and women’s issues. Focus on works of Asian American studies critique builds. Emphasis on works that approach study of empire through comparative racial formation, postcolonialism, transnationalism, and studies of migration. P/NP or letter grading.

117. Asian American Personality and Mental Health. (4). (Same as Psychology M107.) Lecture, four hours. Condition of Asian American mental health. Topics include culture, family patterns, achievements, stressors, resources, and immigrant and minority group status. P/NP or letter grading.

118. Asian American Religious History. (4). Lecture, four hours. Examination of religion as thematic thread within context of Asian American history, primarily during period before World War II. Basic groundings in early religions, development of role of religion in various communities. P/NP or letter grading.

119. Asian American and Pacific Islander Labor Issues. (4). [Same as Workplace Studies M119.] Lecture, three hours. Examination of historical and contemporary labor issues in Asian and Pacific Islander American communities, with emphasis on key role that Asian and Pacific Islander American student/ workers can play in supporting labor struggles of low-income immigrants. P/NP or letter grading.

120. Asian American History through Lenses. (4). Lecture, three hours. Exploration of documentary film, both as genre and as vehicle to present Asian American perspectives on history of Asian American individuals, communities, and cultures. P/NP or letter grading.

122A. Indigeneity, Empire, and Resistance in Pacific Islands. (4). Lecture, three hours. Introduction to indigenous and colonial histories of Pacific Islands. Discussions, film screenings, guest speakers, and writing assignments, with focus on issues of cultural survival, empire, indigeneity, migration, resistance, sovereignty, and war. P/NP or letter grading.

122B. Gender and Film in Pacific. (4). Lecture, three hours. Enforced requisite: course 122A. Exploration of rise of film in Pacific Islands during 20th century, with attention to history of gender and to films that engage students in textual and visual readings of feature-length films about Pacific. Discussions, film screenings, and guest speakers, with focus on aesthetics, culture, economics, gender, political, and cultural dimensions of films. P/NP or letter grading.

129. Health Issues for Asian Americans and Pacific Islanders: Myth or Model? (4). [Same as Community Health Sciences M140.] Lecture, three hours; fieldwork, one hour. Introductory overview of mental and physical health issues of Asian Americans and Pacific Islanders; identification of gaps in health status indicators and barriers to both care delivery and research for these populations. Letter grading.

130C. Chinese Immigration. (4). [Same as Sociology M153.] Lecture, three hours; discussion, one hour. Survey of sociological studies of Chinese immigration, with focus on international context, organization, and institutions of Chinese America and its interactions with social environment. P/NP or letter grading.

133. Filipino American Experience. (4). Lecture, three hours. Not open to freshmen. Survey of immigration history, settlement patterns, and experiences of Filipino Americans. Examination of historical and con-
temporary sociocultural, economic, and political issues as they affect status of Filipino Americans and their community. P/NP or letter grading.

140SL. Power to People: Asian American and Pacific Islander Community-Based Learning. (4). Lecture, two hours; fieldwork, four hours. Enforced requisite: course 10 or 20 or 40. Service-learning course to engage and critically examine community organizing and community-based organizations (CBOs) in Asian American and Pacific Islander communities related to issues such as arts and culture, community health, and applied research. P/NP or letter grading.

141A. Asian American and Pacific Islander Leadership Development Project Part I: Leadership. (4). Lecture, three to four hours. Limited to juniors/seniors. First term of two-term series on leadership development, with focus on intellectual and practical learning of leadership theories, models, and skills. Progress grading (credit to be given only on completion of course 141B).”

141B. Asian American and Pacific Islander Leadership Development Project Part II: Field Studies. (4). Lecture, three hours; fieldwork, three hours. Enforced requisite: course 141A. Limited to juniors/seniors. Second term of two-term series on leadership development, with focus on Asian American, Pacific Islander, and other ethnic communities in Los Angeles. Examination of different approaches and strategies to community building and maintenance, P/NP or letter grading.

142A. Ethnocommunications I: Introduction to Creating Community Media. (4). Seminar, three hours. Introduction to ethnocommunications theory and methodology, developed to allow diverse peoples and cultures to reclaim and promote their histories. Viewing of films from mainstream and alternative independent media for critique and discussion and basic instruction in use of digital video technology to preserve culture, communities, and experiences. P/NP or letter grading.

142B. Ethnocommunications II: Intermediate Creating Community Media. (4). Laboratory, three hours. Continuing instruction in use of digital technology and concepts and methods of Asian Pacific American community preservation. Topics include scriptwriting, budgeting, video image and sound control through camcorder functions, basic composition/lighting, sound recording, film editing, and editing. Completion of community profile project required. P/NP or letter grading.

142C. Ethnocommunications III: Advanced Creating Community Media. (2 to 4). Laboratory, two to three hours. Enforced requisite: course 142B. Advanced instruction in use of digital technology and concepts and methods of Asian Pacific American community preservation. Topics include scriptwriting, budgeting, video image and sound control through camcorder functions, basic composition/lighting, sound recording, film editing, and editing. Completion of community profile project required. P/NP or letter grading.

142D. Visualizing History: Introduction to Creating Community Media. (4). Laboratory, three hours. Rapid developments in video and digital technologies have made possible the mass production of previously neglected or submerged communities to visually document issues around their migration, settlement, cultural imagery, and artistic expressions. Introduction to ethnocommunications theory and methodology, developed to allow diverse peoples and cultures to reclaim and promote their histories, experiences, and contributions through study, analysis, and vigorous usage of new media technologies. P/NP or letter grading.

143A. Fieldwork in Asian American and Pacific Islander Communities. (4). (Formerly numbered 143A) (Same as Anthropology M139P) Lecture, three hours; discussion, one hour. Introduction to qualitative research methods and application of techniques in data collection, analysis, and reporting. Critical reflection of issues related to identity, migration, multi-cultural histories, and social and political issues.

143B. Politics of Race, Ethnicity, Migration, and Multiculturalism in Hawaii. (4). Lecture, three hours; discussion, one hour. Critical examination of historical and contemporary experiences of various people in Hawai‘i. Investigation of historical, economic, and political contexts of migration and experiences of Asian and ethnic groups. P/NP or letter grading.

143C. Ethnic Identity and Ethnic Relations in Hawai‘i. (4). (Formerly numbered 143C) (Same as Anthropology M177P) Lecture, three hours; discussion, one hour. Critical examination of historical and contemporary experiences of various people in Hawai‘i. Overview of theoretical approaches to and development of ethnic identity and ethnic relations. Discussion of historical and contemporary aspects of ethnic identity and ethnic relations in Hawai‘i. Given in Hawai‘i. P/NP or letter grading.

M160. Culture, Media, and Los Angeles. (6). (Same as African American Studies M102 and Honors Colloquium M102.) Lecture, four hours; screenings, two hours. Designed for seniors. Role of media in social construction of the self; ethnic identity; and media representation as they pertain to race, ethnicity, gender, and sexuality. P/NP or letter grading.

M164. Women, Violence, Globalization: India, Philippines, Singapore, Vietnam. (4). (Same as Gender Studies M164A.) Lecture, four hours. Study of various forms of violence done on women not only in and of themselves but in light of larger systems of oppression, with focus on Filipinos, Vietnamese, Singaporeans, and South Asians. Letter grading.

M165. Race, Gender, Class. (5). (Same as Comparative Literature M175.) Seminar, three hours. Theoretical and literary readings combined to explore three main aspects of social and cultural experience (race, gender, class) and their interconnected spheres affecting both minority and majority populations in U.S. Examination of these issues from comparative perspectives. P/NP or letter grading.

M166A. Immigrant Rights, Labor, and Higher Education. (4). (Same as Chicana and Chicano Studies M156A and Labor and Workplace Studies M166A) Seminar, three hours. New immigrant rights movement, with particular attention to labor and higher education. Overview of history of immigrant rights movement and examination of development of coalition efforts between labor movement and immigrant rights movement nationally and locally. Special focus on issue of immigrant students in higher education, challenges facing undocumented immigrant students, and legislative and policy issues that have emerged. Students’ role in social movements, research on immigration and immigrant rights, write poetry and spoken word about immigrant experience, and work to collectively develop student publication on immigrant students in higher education. P/NP or letter grading.

M166B. Research on Immigration Rights, Labor, and Higher Education. (4). (Same as Chicana and Chicano Studies M156B and Labor and Workplace Studies M166B) Seminar, two hours. Students conduct oral histories, family histories, research on issue of immigrant students in higher education, and engage in organizing work with local immigrant rights group targeting specific immigrant populations. Letter grading.

M166C. Worker Center Movement. New Wave Organizing for Justice for Immigrant Workers. (4). (Same as African American Studies M167, Chicana and Chicano Studies M130, and Labor and Workplace Studies M167) Seminar, three hours. Development of theoretical and practical understanding of worker center movement, with focus on historical factors that have led to emergence and growth of worker centers. Role of worker center movement in promoting multilingual and multiracial campaigns for workplace and economic justice. Transnational cross-border solidarity issues and rights of undocumented workers. Letter grading.

M168. Student-Initiated Retention and Outreach Issues in Higher Education. (4). (Same as African American Studies M118, American Indian Studies M118, and Chicana and Chicano Studies M118) Lecture, four hours. Exploration of issues in outreach and retention of students in higher education, especially through student-initiated programs, efforts, activities, and services, with focus on student voice. May be repeated twice for credit. Letter grading.

M169. Constructing Race. (4). (Same as African American Studies M159P and Anthropology M159P) Lecture, three hours. Examination of race, socially constructed category, from anthropological perspective. Consideration of development of racial categories over time and in different regions, racial passing, and contemporary experiences of various people in Hawai‘i. Investigation of historical, economic, and political contexts of migration and relations between indigenous peoples, migrants, and existing racial and ethnic groups. P/NP or letter grading.

170. Transnational Perspectives on Asian America. (4). Lecture, three hours. Recommended preparation: background in Asian Pacific American social and legal history. Assignment curated for juniors/seniors. Examination of transformations that have occurred in Asian America in last four decades as consequence of global economic restructuring and new immigration. Introduction to and survey of recent studies on understanding these changes in postmodern Asian Pacific American communities, using theories of transnationalism and Asian American political and racial history. Readings and discussion on transnational aspects of wide range of historical and contemporary topics in context of Asian/Asian American experience. Building of linkages between roots of social constructions of race and multiracial social processes that now constitute globalization Asian America. Theoretical readings assigned. P/NP or letter grading.

17.1. Critical Issues in U.S.-Korea Relations. (4). Lecture, three hours. Not open to freshmen. Critical examination of U.S.-Korea relations in areas of political economy; security; and defense cooperation. May be repeated for credit. P/NP or letter grading.

M171D. Critical Issues in U.S.-Philippine Relations. (4). (Same as History M144C.) Lecture, three hours; discussion, one hour (when scheduled). Recommended for seniors/juniors. Examination of complex interrelationships between U.S. colonialism, Philippine nationalism, history of Filipino Americans, and Philippine diaspora in 20th century. P/NP or letter grading.

M172A. Indian Identity in U.S. and Diaspora. (4). (Same as History M172A.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History of overseas Indian communities; transformations of Hinduism in diaspora; emergency conditions; and cultural forms such as bhangra and chutney music; relations between Indians and other racial and ethnic groups; Indian women as embodiment of Indian culture; diasporic identities. P/NP or letter grading.

17.2B. Gender in South Asian Communities at Home and Abroad. (4). Seminar, three hours. Examination of centrality of gender to histories and identities of men and women of South Asian affiliation across multiple historical and geopolitical contexts. Focus on colonial South Asia, South Asian diasporas in U.K., South Asian Americans in U.S., and transnational South Asian public cultures. Theoretical approaches to study of South Asian in comparative frame and consideration of how transnational perpectives enable revisioning South Asian American experiences and to rethink relationship between Asian American studies, diaspora studies, and area studies. P/NP or letter grading.

M172C. Transnational Bollywood. (4). (Formerly numbered 172C) (Same as Communication Studies M172C.) Lecture, three hours; discussion, one hour. Study of how popular Bollywood cinema materializes colonial and postcolonial formations pertaining to gender, class and caste, sexuality, race, and economic liberalization in South Asia, and in diaspora, with Asian communities in North America, U.K., and Africa. Examination of how complex relationships between Bollywood and transnational South Asian diasporas enable us to better understand South Asian American communities. P/NP or letter grading.

M173. Topics in Vietnamese Cinema and/or Literature. (4). (Same as Vietnamese M155S.) Lecture, three hours; discussion, one hour. Kith and Ethnology of Vietnam not required. Critical and historical examination of literary and/or filmic representations connected to social practices such as empire, nation, diaspora, and globalization. Original language course not available to interested students. P/NP or letter grading.

18.5. Capstone Community-Based Research. (4). Seminar, one hour; fieldwork, three hours. Limited to senior departmental majors and minors. Designed to serve as complement to service learning requirement for major and minor and may be used to fulfill capstone requirement for major and minor. Students work as research team, are matched with one or more community groups, and must complete minimum of 40 fieldwork hours. Duties and collaborations collaboratively determined by instructor, students, and sponsoring organizations. Readings determined in consultation with instructor. Letter grading.

18.7. Capstone Research Seminar. (4). Seminar, three hours. Limited to senior departmental majors and minors. Synthesis and application of knowledge students have acquired through prior departmental courses so they can conduct in-depth research or creative-expression project. Themes may vary by instructor and term. Students pursue independent work related to course theme with guidance from instructor, then share and critique other student work in progress. Letter grading.

18.7A. Special Courses in Research Methodologies. (4, when scheduled). Limited to juniors/seniors. Variable topics in multidisciplinary research methodologies in Asian American studies. May be repeated for credit with topic change. P/NP or letter grading.

18.7B. Special Courses in Asian American Themes. (4). Lecture, three hours; discussion, one hour (when scheduled). Limited to juniors/seniors. Variable topics in selected Asian American themes, including issues in cultural formation, religion, education, social class, economic development, social movement, politics, and public policy. May be repeated for credit with topic change. P/NP or letter grading.

18.7D. Special Courses in Comparative Race, Ethnicity, Gender, and Sexuality. (4). Lecture, three hours; discussion, one hour (when scheduled). Limited to juniors/seniors. Variable topics in selected issues on race, ethnicity, gender, and sexuality from comparative perspective. May be repeated for credit with topic change. P/NP or letter grading.

18.7E. Special Courses in Transnationalism and Diasporas. (4). Lecture, three hours; discussion, one hour (when scheduled). Limited to juniors/seniors. Variable topics in historical and contemporary issues pertaining to different Asian-origin subgroups and their respective communities. May be repeated for credit with topic change. P/NP or letter grading.

19.1A. Topics in Research Methodologies. (4). Seminar, three to four hours. Limited to juniors/seniors. Variable topics in multidisciplinary research methodologies in Asian American studies. May be repeated for credit with topic change. P/NP or letter grading.

19.1B. Topics in Asian American Themes. (4). Seminar, three to four hours. Limited to juniors/seniors. Variable topics in selected Asian American themes, including issues in cultural formation, religion, education, social class, economic development, social movement, politics, and public policy. May be repeated for credit with topic change. P/NP or letter grading.

19.1C. Topics in Asian American Populations and Communities. (4). Seminar, three to four hours. Limited to juniors/seniors. Variable topics in historical and contemporary issues pertaining to different Asian-origin subgroups and their respective communities. May be repeated for credit with topic change. P/NP or letter grading.

19.1D. Topics in Comparative Race, Ethnicity, Gender, and Sexuality. (4). Seminar, three to four hours. Limited to juniors/seniors. Variable topics in selected issues on race, ethnicity, gender, and sexuality from comparative perspective. May be repeated for credit with topic change. P/NP or letter grading.

19.1E. Topics in Transnationalism and Diasporas. (4). Seminar, three to four hours. Limited to juniors/seniors. Variable topics in selected comparative and international issues pertaining to transnationalism and diasporas. May be repeated for credit with topic change. P/NP or letter grading.

19.1F. Topics in Asian American Literature. (5). (Same as English M191C.) Seminar, three or four hours. Enforced requisite: English Composition 3 or 3P. Variable topics in interdisciplinary Asian American literature. Topics may include genres (auto-biography, novel, poetry, short fiction, or drama); specific nationalities within Asian American community; theories of transnational narratives and representations; intercultural, interstitial, and inter-racial negotiation; and gender and queer politics. Reading, discussion, and development of culminating project. May be repeated for credit with topic or instructor change. P/NP or letter grading.

192. Undergraduate Practicum in Asian American Studies. (2 or 4). Seminar, two or four hours. Limited to juniors/seniors. Training and practicum for advanced undergraduate students in Asian American studies courses. Students assist in preparation of materials and development of innovative programs with guidance of faculty members in small course settings. May not be applied toward departmental major or minor requirements. May be repeated for credit. P/NP grading.

195. Community or Corporate Internships in Asian American Studies. (4). Tutorial, two hours; fieldwork, eight hours. Requisites: courses 10 or 10W, and 20. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students must select a field in which they wish to participate and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

M195CE. Comparative Approaches to Community and Corporate Internships. (4). (Same as African American Studies M195CE, American Indian Studies M195CE, Chicana and Chicano Studies M195CE, and Gender Studies M195CE.) Tutorial, one hour; fieldwork, eight to ten hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Learning. Comparative study of race, gender, and interconnections between social and work place dynamics. Students complete weekly written assignments, attend biweekly meetings with graduate student coordinator, and write final research paper. Faculty sponsor and graduate student coordinator construct series of reading assignments that examine issues related to internship site. Individual contract with supervising faculty member required. P/NP or letter grading.

196. Research Apprenticeship in Asian American Studies. (2 to 4). Tutorial, three hours per week per unit. Limited to juniors/seniors. Entry-level research apprenticeship for undergraduates under guidance of faculty mentor to learn skills and techniques. May not be applied toward departmental major or minor requirements. May be repeated for credit. Individual contract required. P/NP grading.

197. Individual Studies in Asian American Studies. (2 to 4). Tutorial, three hours. Requisites: courses 10 or 10W or 20 or comparable knowledge in Asian American studies, 3.0 grade-point average or better. Limited to juniors/seniors. Direct reading of scholarly work or supervised research between student and faculty member. No original research or project expected, but tangible evidence of mastery of subject required. May not be applied toward departmental major or minor requirements. May be repeated for credit. Individual contract required. P/NP grading.

198A. Honors Research in Asian American Studies. (4). Tutorial, three to four hours. Requisites: two courses from 10 (or 10W), 20, or 30 (or 30W) and one course from 104A through M108, 187A, or 191A. Introduction to research techniques and applications of methodology in Asian American studies. Limited to seniors in U.S. Development of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. P/NP grading.

198B-198C. Honors Researh in Asian American Studies. (4-). Tutorial, three hours. Limited to seniors in U.S. Development of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. P/NP grading.
research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. In Progress (198B) and letter (198C) grading.

199. Directed Research or Senior Project in Asian American Studies. (2 to 4). Tutorial, three hours. Preparation: 3.0 overall grade-point average. Requisites: courses M215A/B and 20 or comparable knowledge in Asian American studies. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating research project report required. May be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

Graduate Courses

200D. Asian American Literature and Culture. (4). Seminar, three hours. Examination of questions arising from Asian American literary and cultural criticism from mid-1980s to present, with focus on assumptions, possibilities, and limitations of certain theoretical perspectives and positions that have become important in Asian American critical practice. S/U or letter grading.

215A-215B. Asian American Jurisprudence. (215A: 3 or 4/215B: 1 or 2). (Formerly numbered M215A.) Lecture, three hours. Course 215A is enforced requisite to 215B. Designed for graduate students. Through judicial opinions, commentary, and historical readings, examination of how American law has functioned as methods of social control, order, and surveillance in Asia and Pacific. S/U or letter grading.

M239. Race, Ethnicity, and Culture as Concepts in Praxis and Research. (4). (Same as Community-Health Sciences M239.) Seminar, three hours. Integration of cross-cultural findings in healthcare with current American (U.S.) healthcare system paradigms to foster designing culturally based public health programs and train culturally competent practitioners. Letter grading.

M260. Topics in Asian American Literature. (4). (Same as English M260A.) Seminar, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. May be repeated for credit. S/U or letter grading.

M261. Theorizing Third World. (4). (Same as Comparative Literature M271A.) Seminar, three hours. Investigation of politics of power, gender, and race in complex relationships between so-called First World and Third World, using both theoretical and textual approaches. S/U or letter grading.

297B. Asian Migration to U.S. (4) Seminar, three hours. Emphasis on Asia as main regional source for international migrants. Topics include patterns and theories of international migration and their relevance to Asian experience, sending and receiving country perspectives, research and policy issues. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4). Seminar, three hours. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. Unit credit may be applied toward full-time equivalence but not toward 11-course requirement for M.A. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students. (2). Lecture, one hour; discussion, one hour. Practice in writing reports, grant proposals, abstracts, theses, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various Asian American journals helps students improve both their prose style and editorial abilities. Four units may be applied toward M.A. degree requirements. May be repeated once for credit. S/U grading.

495. Supervised Teaching of Asian American Studies. (4). Seminar, three hours. Preparation: apprentice personnel appointment as teaching assistant in Asian American studies. Designed for graduate students. Required of all new teaching assistants. Special course for teaching assistants designed to deal with problems and techniques for teaching introductory Asian American studies courses. Unit credit may be applied toward full-time equivalence but not toward course requirements for M.A. S/U grading.

596. Directed Individual Study or Research. (2 to 8). Tutorial, to be arranged. S/U or letter grading.

Gyanam Mahajan, Ph.D.
Jae-eun I. Mitsunaga, Ph.D.
Thu Ba Nguyen-Hoai, Ph.D.
Yoko Nogami, M.A.
Scopes and Objectives

The Department of Asian Languages and Cultures offers a wide range of courses in the languages, literatures, religions, and cultural heritage of China, Japan, and Korea, as well as South and Southeast Asia. The department offers training in many specialized fields such as archaeology, film, folklore, history, linguistics, literature, mythology, religious studies, and cultural studies. Courses prepare students for careers in business, government service, international relations, journalism, law, publishing, teaching, and academic professions. Undergraduate majors earn a Bachelor of Arts degree. The graduate program offers Master of Arts and Ph.D. degrees. At all levels of study, various major fields are possible.

For undergraduates, the department offers majors that combine language study with courses taught in English that examine the rich cultural heritage of China, Japan, and Korea, as well as South and Southeast Asia. The majors also provide opportunities for education abroad in an Asian country. The language courses aim to develop the four skills of speaking, aural comprehension, reading, and writing in a balanced and mutually supportive manner. The lecture and seminar courses aim to develop critical thinking and writing skills through in-depth study of a culture within a broader historical and comparative context. Undergraduate majors who wish to pursue graduate degrees are encouraged to apply for admission to the honors program.

At the graduate level, the department offers a program leading to an M.A. degree in several fields of Asian culture. The M.A. degree is preparatory to entrance into the Ph.D. program. The Ph.D. program, which is very selective, trains research scholars for academic careers in specialized fields.

Courses for Nonmajors

The department offers many courses in which knowledge of Asian languages is not required. A current list is available in the department office (290 Royce Hall) and at http://www.alc.ucla.edu.

Undergraduate Study

The department offers two majors in the study of Asian cultures—B.A. in Asian Humanities and B.A. in Asian Religions—and three majors in Asian literatures—B.A. in Chinese, B.A. in Japanese, and B.A. in Korean. Each course in the majors must be taken for a letter grade. The department also offers two minors—Asian Humanities minor and Asian Languages minor. Each course in the minors must be taken for a letter grade.

Students considering a major or minor in the department should consult the departmental undergraduate adviser as soon as possible in their University career, but in no case later than the point at which they are about to begin taking upper division courses. Students should select courses to fulfill major or minor requirements in consultation with the undergraduate adviser. The approved list of courses for each category of major or minor requirements is available in the department office (290 Royce Hall) and at http://www.alc.ucla.edu.

At least 24 upper division units required for the majors must be completed successfully while in residence at UCLA.

Placement in Language Courses

Students are not placed in Chinese, Japanese, and Korean language courses automatically according to their years of previous study. Students with any prior knowledge or study of an Asian language who wish to take courses in that language at UCLA are required to take the appropriate departmental language placement examination (see the Schedule of Classes or http://www.alc.ucla.edu for more information). The examination determines which course is most appropriate for the student’s current level of proficiency. Students who have obtained college credit for Asian language courses may not repeat those same courses for credit. Prospective majors who place out of the upper division modern language requirement are expected to substitute an equivalent number of other units to be selected in consultation with the departmental undergraduate adviser.

Language Acquisition Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced Asian language course with focus on conversation, grammar, and/or composition.

Asian Humanities B.A.

Preparation for the Major

Required: Completion of the intermediate sequence in one Asian language offered by the department (e.g., Chinese 6, 10, Filipino 6, Hindi–Urdu 6, Indonesian 6, Japanese 6, 10, Korean 6, 10, Thai 6, Vietnamese 6, or equivalent) and one civilization course (e.g., Chinese 50, Japanese 50, 70, Korean 50) or one introduction to religions course (e.g., Asian M60, M60W, M61, Chinese M60, M60W, Korean M60, South Asian M60, Southeast Asian M60) within the department.

Transfer Students

Transfer applicants to the Asian Humanities major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of Chinese, Japanese, Filipino/Tagalog, Hindi, Indonesian, Thai, or Vietnamese and either one civilization course on Asia or one introduction to Buddhism course or one introduction to Asian religions course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm _tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Three upper division language courses in one Asian language offered by the department and eight upper division electives within the department, including at least one course from at least four of the following areas: China, Japan, Korea, South Asia, or Southeast Asia.

Asian Religions B.A.

Preparation for the Major

Required: Completion of the intermediate sequence in one Asian language offered by the department (e.g., Chinese 6, 10, Filipino 6, Hindi–Urdu 6, Indonesian 6, Japanese 6, 10, Korean 6, 10, Thai 6, Vietnamese 6, or equivalent) and one introduction to religions course from Asian M60, M60W, M61, Chinese M60, M60W, Korean M60, South Asian M60, or Southeast Asian M60.

Transfer Students

Transfer applicants to the Asian Religions major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of Chinese, Japanese, Korean, Filipino/Tagalog, Hindi, Indonesian, Thai, or Vietnamese, or one year of Sanskrit, and one introduction to Buddhism course or one introduction to Asian religions course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm _tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Three upper division language courses in one Asian language offered by the department; six upper division Asian religions courses within the department, including at least one course each concerning religions in China, Japan, Korea, and either South Asia or Southeast Asia; and two electives within the department.

Chinese B.A.

Preparation for the Major

Required: Chinese 6 or 6A or 10 or equivalent, and one course from 50, M60, M60W, 70, or 70W.

Transfer Students

Transfer applicants to the Chinese major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of Chinese and one Chinese civilization course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm _tr.htm for up-to-date information regarding transfer selection for admission.
The Major

Required: Eleven courses (42 to 44 units) as follows: (1) five language courses selected from either modern Chinese (Chinese 100A and 100B and 100C or 101I, 101A, 101B, 102A, C107A, C120, 130A or 130B, 135) or from premodern Chinese (110A, 110B, 110C, 140A through 140D, 165)—at least two language courses must be in the premodern language; (2) one literature course selected from 130A, 130B, 131, 135, 140A through 140D, C150A, 150B, 151, 152, or M153, (3) three elective courses on China selected from C138, 139, 154, 155, C156, CM160, 165, 174, C175, 176, 180, 184, 185, 186, 187, 191A, 191B, or from items 1 and 2 above not used to fulfill another requirement, and (4) two additional upper division elective courses within the department but outside China.

Japanese B.A.

Preparation for the Major

Required: Japanese 6 or 10 or equivalent, and 50 or 70.

Transfer Students

Transfer applicants to the Japanese major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of Japanese and one Korean civilization course.

To qualify for graduation with departmental highest honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.8 or better in upper division courses required for the major and an overall GPA of 3.5 or better, and (3) complete Asian 198A-198B-198C with a grade of A in each course.

Asian Humanities Minor

The Asian Humanities minor is designed to recognize a serious commitment to the study of Asian cultures. Lower division survey courses in civilizations and religious traditions provide students with a solid foundation in the diverse cultural heritages of Asia. Students may fulfill upper division requirements from a wide variety of courses in all aspects and historical periods of Asian humanities.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 45 units at UCLA and all lower division requirements for the minor, and consult with the departmental undergraduate adviser.

Required Lower Division Courses (10 units): Two courses from Asian M60, M60W, M61, Chinese 50, M60, M60W, Japanese 50, 70, Korean 50, M60, South Asian M60, Southeast Asian M60.

Required Upper Division Courses (20 units): Five courses in the department concerning Asian culture (e.g., film, folklore, history, linguistics, literature, mythology, religious studies). A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least 16 units must be taken in residence at UCLA.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Asian Languages and Cultures
Required Lower Division Courses (10 units): Completion of the intermediate sequence in one Asian language offered by the department (e.g., Chinese 50, Japanese 50, Korean 50) or one civilization course (e.g., Chinese 5Q, Japanese 5Q, Korean 5Q) or one introduction to religions course (e.g., Asian M60, M60W, M61, Chinese M60, M60W, Korean M60, South Asian M60, Southeast Asian M60) within the department.

Required Upper Division Courses (20 units): Three language courses in one Asian language offered by the department and two electives within the department.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least 16 units must be taken in residence at UCLA.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa /library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Asian Languages and Cultures offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Asian Languages and Cultures.

Asian

Lower Division Courses

M20, Visible Language: Study of Writing. (5). (Same as Indo-European Studies M20, Near Eastern Languages M20, Slavic M20, and Southeast Asian M20.) Lecture, three hours; discussion, one hour. Consideration of concrete means of language representation in writing systems. Earliest representations of language known are those of Near East dating to end of 4th millennium B.C. While literate civilizations of Egypt, Indus Valley, China, and Mesoamerica left little evidence of corresponding earliest developments, their antiquity and, in case of China and Mesoamerica, their evident isolation mark these centers as loci of independent developments in writing. Basic characteristics of early scripts, assessment of modern alphabetic writing systems, and presentation of conceptual basis of semiotic language representation. Origins and development of early non-Western writing systems. How Greco-Roman alphabet arose in 1st millennium B.C. and how it compares to other modern writing systems. P/NP or letter grading.

M60. Introduction to Buddhism. (5). (Formerly numbered 60W.) (Same as Religion M60W.) Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language 3 or 3C. Knowledge of Asian languages not required. General survey of Buddhist worldview and lifestyle, with focus on those religious doctrines and meditative practices most essential to various Asian traditions of Buddhism. Letter grading.

M60W. Introduction to Buddhism. (5). (Formerly numbered 60W.) Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language 3 or 3C. Knowledge of Asian languages not required. General survey of Buddhist worldview and lifestyle, with focus on those religious doctrines and meditative practices most essential to various Asian traditions of Buddhism. Letter grading.

M61. Introduction to Zen Buddhism. (5). (Formerly numbered 61L.) (Same as Religion M61L.) Lecture, three hours; discussion, one hour. Knowledge of Asian languages not required. Introduction to Zen traditions and to interplay between Zen and other fundamental cultural and religious concerns in East Asia. Topics include role of Zen within Buddhist thought and practice, artistic and literary arts, society, and daily life. Letter grading.

120. Languages and Cultures of East Asia. (4). Lecture, three hours; discussion, one hour. Recommended preparation: course M60 (or Religion M60A) and knowledge of one Asian language. History and development of early non-Western writing systems. How Greco-Roman alphabet arose in 1st millennium B.C. and how it compares to other modern writing systems. P/NP or letter grading.

120L. Readings in East Asian Languages. (2). Seminar, two hours. Requisite: Chinese 6 or 6A or 6C or Japanese 6 or Korean 6 or 6A. Enforced corequisite: course 120. Additional work in major East Asian languages to enrich and augment work assigned in course 120, including reading, writing, and other exercises in Chinese, Japanese, and Korean. P/NP or letter grading.

121. Field Methods in Asian Languages and Cultures. (4). (Formerly numbered Southeast Asian 120.) Lecture, three hours; discussion, one hour. Recommended preparation: at least one year of one Asian language. Examination and application of methodologies to better understand development and nature of culture and language by working directly with native speaker of Asian language and/or through available materials. One language per term to be selected from languages spoken in Southeast Asia, South Asia, and East Asia. May be repeated for credit. P/NP or letter grading.

126. Topics in East Asian Religions. (4). Lecture, three hours. Knowledge of Asian languages not required. In-depth examination of selected topics in one or more religious traditions of Asia. Topics vary, but may include death, gender, and state and religion. May be repeated for credit with topic change. Letter grading.

161. Buddhism across Boundaries. (4). Lecture, two hours; discussion, one hour. Recommended preparation: prior course on Buddhism or traditional Asian religions. Knowledge of Asian languages not required. Investigation of various themes in development of Buddhist traditions across historical periods as well as national and cultural boundaries, including issues of praxis, politics, and translation. Letter grading.

162. Buddhist Meditation Traditions. (4). Lecture, three hours; discussion, one hour. Knowledge of Asian languages not required. Survey of theory and practice of meditation in Buddhism, with emphasis on Theravada and Zen schools. Topics include various typologies of meditation, symbolic relationship between meditation and soteriology, and processes by which doctrinal innovation prompts changes in meditative praxis. Letter grading.

170A. Approaches to Study of Religion. (4). Seminar, three hours. Investigation of many ways in which religion and religions may be studied, including anthropological, sociological, historical, and philosophical approaches. Readings from primary and secondary sources of modern scholarship. Concurrently scheduled with course C270. Letter grading.

190. Research Colloquia in Asian Languages and Cultures. (1). Seminar, one hour. Corequisite: course 198A or 198B or 198C or 199. Designed to bring together advanced undergraduate students undertaking individual supervised tutorial research in seminars setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

191A. Variable Topics Research Seminars: Life Writing in East Asia. (4). Seminar, three hours. Research seminar on selected topics. Readings of biographical and autobiographical work as elements of East Asian cultural traditions, with focus rotating between China, Japan, and Korea. Readings in English and relevant East Asian languages, discussion, and development of culminating project. May be repeated for credit. Letter grading.

191B. Variable Topics Research Seminars: Buddhist Studies. (4). Seminar, three hours. Limited to juniors/seniors. Research seminar on selected topics in Buddhist studies. Readings and research leading to develop-ment of culminating project. May be repeated for credit. Letter grading.

193. Speaker Series Seminars: Asian Languages and Cultures. (2). Seminar, two hours. Limited to Undergraduate students. Introduction to latest scholarship on each of Asian studies. May be selected as an On-campus seminar presented by a guest speaker, as selected by seminar coordinator or as a selected scholarly presentation, as well as sessions with faculty adviser to discuss presentations and published works of speakers. May be repeated for credit. P/NP grading.
195. Community Internships in Asian Languages and Cultures. (4). Tutorial, one hour; fieldwork, eight hours. Limited to juniors/seniors. Internship in supervised setting in community cultural or organizational setting. Students meet on regular basis with instructor and provide periodic journal reports of their experience. Final paper that combines academic research and knowledge gained from community experience required. Individual contract with supervising faculty member required. P/NP or letter grading.

198A-198B-198C. Honors Research in Asian Languages and Cultures. (4-4-4). Tutorial, three hours. Limited to junior/senior departmental majors. May be repeated for credit. Individual contract required. 198A. Preparation: one undergraduate departmental seminar. Development of honors thesis under direct supervision of faculty member. Letter grading. 198B. Enforced requisite: course 198A. Continuation of work initiated in course 198A. Presentation of research and relevant progress to supervising faculty member. Letter grading.

199. Directed Research in Asian Languages and Cultures. (2 to 8). Tutorial, to be arranged. Recommended preparation: advanced reading knowledge of one Asian language. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated once with consent of instructor. Individual contract required. Letter grading.

Graduate Courses

201. Proseminar: Approaches to Buddhist Studies. (4). Seminar, three hours. Designed for graduate students in Buddhist studies. Introduction to history of field, bibliography, relations with other disciplines, and current issues and research trends. S/U or letter grading.

202. Proseminar: Functional Approaches to Japanese/Korean Linguistics. (4). Seminar, four hours. Preparation: three years of Japanese or Korean, one year of any East Asian language, one functional linguistics course, and native ability in the language. Credit cannot be given for both this course and one of ACHJ 299 or JAS 299.

203. Variable Topics in East Asian Linguistics. (4). Seminar, three hours. Advanced course that explores topics in East Asian linguistics through critical reading of current studies. Preparation: knowledge of one Asian language. Credit cannot be given for this course and one of ACHJ 299 or JAS 299. May be repeated for credit.

205. Variable Topics in East Asian Culture and History. (4). Seminar, three hours. Selected topics in East Asian culture and history, with focus on China, Japan, and Korea. May be repeated for credit with topic change. S/U or letter grading.

210. Proseminar: Cultural and Comparative Studies. (4). Seminar, three hours. Designed for graduate students. Introduction to theoretical topics relevant to comparative study of East Asian cultures in modern period. Readings include Western theoretical works balanced with texts taking congruent approaches to East Asian topics. S/U or letter grading.

216. Seminar: History and Asia. (4). Seminar, three hours. Designed for graduate students. Readings and discussion of major historiographical trends, with focus on how they have been applied to Asia. Topics include Marxist histories, Annales school and cultural history, microhistories, gender, space, historical memory, postcolonial histories, subalterns, and modernity and Asia. S/U or letter grading.

220A-220B. Seminars: Topics in Cultural Studies. (4-4). Seminar, three hours. Complements course 210. Further investigation of methodology and materials of cultural studies in connection with specific topics selected by instructors. May be repeated for credit. In Progress (220A) and letter (220B) grading.

223A-223B. Seminars: Corpus Linguistics. (4-4). Formerly numbered 222A-222B. (Same as Applied Linguistics M225A-M225B). Seminar, three hours. Construction and exploitation of computerized language corpora for study of areas such as lexicology, discourse grammar, language change and variation, language learning, and teaching. Discussion of special issues in working with East Asian language corpora. In Progress (M222A) and S/U or letter (M222B) grading.

230A-230B. Seminars: Theoretical Topics in East Asian Literature. (4-4). Seminar, three hours. Preparation: reading knowledge of at least one East Asian language. Credit cannot be given for this course and one of ACHJ 299 or JAS 299. May be repeated for credit. In Progress (230A) and letter (230B) grading.

240A-240B. Seminars: Topics in East Asian Literary History. (4-4). Seminar, three hours. Preparation: reading knowledge of at least one East Asian language. Credit cannot be given for this course and one of ACHJ 299 or JAS 299. May be repeated for credit. In Progress (240A) and letter (240B) grading.

245A-245B. Seminars: Position of Modernity in East Asian Literature. (4-4). Seminar, three hours. Preparation: at least five years of one East Asian language. Designed for graduate students. Course 245A concerned with conceptual architecture and archaeology of modernity, with readings largely from Euro-pean sources. In-class debate probes relevance of these issues to East Asia, including theories of modernity. Focus on East Asian writings in course 245B. In Progress (245A) and letter (245B) grading.

255. Topics in Southeast Asian Literature and/or Cinema. (4). Seminar, three hours. Knowledge of one Southeast Asian language (Japanese, Korean, Thai) not required but not required. Theoretical concerns raised by works from Southeast Asia, one Southeast Asian nation, and/or Southeast Asian diasporas. Critical and historical examination of literary and/or film representations connected to practices of empire, nation, diaspora, and globalization. May be repeated for credit. S/U or letter grading.

265A-265B. Seminars: Selected Topics in Buddhist Studies. (4-4). Seminar, three hours. Coverage varies. May be repeated for credit. In Progress (265A) and letter (265B) grading.

270. Approaches to Study of Religion. (4). Seminar, three hours. Investigation of many ways in which religion and religions may be studied, including anthropological, sociological, psychological, phenomenological, political, reductionist, and other approaches. Readings of primary and secondary sources of modern scholarship. Concurrently scheduled with course C170. Letter grading.

281A-281B. Field Methods for Study of East Asian Oral Traditions. (4-4). Seminar, three hours. Description and evaluation of modern approaches to collecting and documenting oral tradition as text, performance, and sociocultural setting. Follows hands-on experience in fieldwork and archiving methods. Consideration of approaches ranging from written transcription and textualization to audio and video preservation. In Progress (281A) and S/U or letter (281B) grading.

282. Japan in Age of Empire. (4). Same as Anthropology M275 and History M286.) Seminar, three hours. Designed for graduate students. Since late 19th century, Japan expanded its empire into East and Southeast Asia. Coverage of that period and array of anthropological studies conducted in Japan’s colonies and occupied areas in this hardly explored area. Cross-references to anthropological, sociological, psychological, phenomenological, political, reductionist, and other approaches. Critical reading and discussion of many ways in which religion and religions may be studied, including anthropological, sociological, psychological, phenomenological, political, reductionist, and other approaches. Readings of primary and secondary sources of modern scholarship. Concurrently scheduled with course C170. Letter grading.

299. Independent Study. (2 to 6). Tutorial, to be arranged. Designed for graduate students. Guided research. In the initial year, research paper may be repeated, but only 4 units may be applied toward M.A. degree. May not be applied toward Ph.D. degree. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4). Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit.

495. Teaching Asian Languages at College Level. (4). Seminar, three hours. Preparation: appointment as teaching assistant in East Asian languages and cultures or South and Southeast Asian languages and cultures. Study in team-teaching setting, developing methodology, developing course materials, and testing. Participation in peer observations and workshops required. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U or letter grading.

496C. Computer Technologies for Teaching College-Level Chinese. (2). Lecture, two hours. Intended for current or potential teaching assistants in Chinese. Introduction to tools and technology designed to enrich classroom learning, help effectively manage student records, and expose students to
current computer software and web resources. May not be applied toward degree requirements. S/U grading.

496E. Computer Technologies for Teaching College-Level East Asian Languages. (2) Lecture, two hours. Intended for current or potential teaching assistants in Korean. Introduction to tools and technology designed to enrich classroom learning, help effectively manage student records, and expose students to current computer software and web resources. May not be applied toward degree requirements. S/U grading.

496K. Computer Technologies for Teaching College-Level Japanese. (2) Lecture, two hours. Intended for current or potential teaching assistants in Japanese. Introduction to tools and technology designed to enrich classroom learning, help effectively manage student records, and expose students to current computer software and web resources. May not be applied toward degree requirements. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged; consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

598. Research for and Preparation of M.A. Thesis. (4 to 8) Tutorial, to be arranged. Maximum of 8 units may be applied toward M.A. degree requirements. S/U grading.

Chinese

Lower Division Courses

1. Elementary Modern Chinese. (5) Lecture, two hours; discussion, three hours. Required preparation: placement test. Designed for students who are beginners. (For students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Intro-duction to fundamentals of standard Chinese, including pronunciation, grammar, and Chinese characters, with emphasis on all four basic language skills—speaking, listening, comprehension, reading, and writing. P/NP or letter grading.

2A. Elementary Modern Chinese for Advanced Beginners. (5) Lecture, two hours; discussion, three hours. Enforced requisite: course 1A with grade of C or better or Chinese placement test. First-year Chinese. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 1A. P/NP or letter grading.

3. Elementary Modern Chinese. (5) Lecture, two hours; discussion, three hours. Enforced requisite: course 2 with grade of C or better or Chinese placement test. Designed for students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 2. P/NP or letter grading.

3A. Elementary Modern Chinese for Advanced Beginners. (3) Lecture, two hours; discussion, three hours. Enforced requisite: course 2A with grade of C or better or Chinese placement test. First-year Chinese. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 2A. P/NP or letter grading.

4. Intermediate Modern Chinese. (5) Lecture, five hours. Enforced requisite: course 3 or B with grade of C or better or Chinese placement test. Second-year Chinese. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Designed for students who already have certain listening and speaking skills in Mandarin or other Chinese dialects at elementary levels. Training in all four basic language skills (speaking, listening, reading, and writing). P/NP or letter grading.

4A. Intermediate Modern Chinese for Advanced Students. (5) Lecture, five hours. Enforced requisite: course 3A with grade of C or better or Chinese placement test. Second-year Chinese. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Designed for students who already have certain listening and speaking skills in Mandarin or other Chinese dialects at elementary levels. Training in all four basic language skills (speaking, listening, reading, and writing). P/NP or letter grading.

5. Intermediate Modern Chinese. (5) Lecture, five hours. Enforced requisite: course 4 with grade of C or better or Chinese placement test. Second-year Chinese. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 4. P/NP or letter grading.

5A. Intermediate Modern Chinese for Advanced Students. (5) Lecture, five hours. Enforced requisite: course 4A with grade of C or better or Chinese placement test. Second-year Chinese. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 4A. P/NP or letter grading.

5C. Mandarin for Cantonese Speakers. (5) Lecture, four hours. Enforced prerequisite: course 5 or Chinese placement test. Designed for students who are Cantonese speakers and familiar with Chinese characters and who need to improve their pronunciation of standard Mandarin. P/NP or letter grading.

6. Intermediate Modern Chinese. (5) Lecture, five hours. Enforced requisite: course 5 with grade of C or better or Chinese placement test. Second-year Chinese. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 5. P/NP or letter grading.

6A. Intermediate Modern Chinese for Advanced Students. (5) Lecture, five hours. Enforced requisite: course 5A with grade of C or better or Chinese placement test. Second-year Chinese. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 5A. P/NP or letter grading.

6C. Mandarin for Cantonese Speakers. (5) Lecture, four hours. Enforced requisite: course 5C or Chinese placement test. Designed for students who are Cantonese speakers and familiar with Chinese characters and who need to improve their pronunciation of standard Mandarin dialect. Completion of course 6C is equivalent to completion of course 6. P/NP or letter grading.

8. Elementary Chinese: Intensive. (15) Lecture, 10 hours; discussion, 10 hours. Not open to students who already have learned, from whatever source, enough Chinese to qualify for more advanced courses. Intensive course equivalent to courses 1, 2, and 3. Introduction to fundamentals of standard Chinese, including pronunciation, grammar, Chinese characters, with emphasis on all four basic language skills—speaking, listening, comprehension, reading, and writing. Offered in summer only. P/NP or letter grading.

8A. Elementary Modern Chinese for Advanced Beginners. (15) Lecture, 10 hours; discussion, 10 hours. Intensive course equivalent to courses 1A, 2A, and 3A. Designed for students who already have learned, from whatever source, enough Chinese to qualify for more advanced courses. Continuation of course 2A. P/NP or letter grading.

10. Intermediate Modern Chinese: Intensive. (15) Lecture, 10 hours; discussion, 10 hours. Recommended prerequisite: course 3A, 4A, or 5A. Chinese placement test or courses equivalent to elementary-level Chinese. Second-year Chinese. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Intensive course equivalent to courses 4, 5, and 6. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar reviews, knowledge of idiomatic expressions, and both traditional and simplified characters. Completion of course 10 is equivalent to completion of course 6. Offered in summer only. P/NP or letter grading.

50. Chinese Civilization. (5) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 50W. Knowledge of Chinese not required. Introduction and most important aspects of Chinese culture. Topics include early Chinese civilization, historical development of Chinese society, issues of ethnicity, Chinese language and philosophy, and early scientific and technological innovation. P/NP or letter grading.

50W. Chinese Civilization. (5) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 50W. Knowledge of Chinese not required. Introduction and most important aspects of Chinese culture. Topics include early Chinese civilization, historical development of Chinese society, issues of ethnicity, Chinese language and philosophy, and early scientific and technological innovation. Satisfies Writing II requirement. Letter grading.

M60. Introduction to Chinese Religions. (5) (Formerly numbered 60) (Same as Religion M60B) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course M60W. Introduction to Chinese religions and theories of religious life in China, with emphasis on everyday religious practice over doctrine, and themes common to Buddhism, Daoism, and Confucianism. P/NP or letter grading.

M60W. Introduction to Chinese Religions. (5) (Formerly numbered 60W) (Same as Religion M61W) Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language 3A or 3B. Not open for credit to students with credit for course M60. Knowledge of Chinese not required. General survey of religious life in China, with emphasis on everyday religious practice over doctrine, and themes common to Buddhism, Daoism, and Confucianism. Satisfies Writing II requirement. Letter grading.
70. Classics of Asian Languages and Culture. (5). Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 70W. Prior knowledge of Chinese language or language other than English is not required. Introduction to pre-20th-century Chinese literary traditions, including selections from poetry, prose, fiction, and drama. P/NP or letter grading.

70W. Classics of Asian Languages and Culture. (5). Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 70W. Prior knowledge of Chinese language or language other than English is not required. Introduction to pre-20th-century Chinese literary traditions, including selections from poetry, prose, fiction, and drama. Sample texts. Letter grading.

80. Chinese Cinema: Pictures, Frames, Products, Projections. (5). Lecture, two hours; discussion, one hour; film viewing, three hours. Knowledge of Chinese not required. Introduction to history and major themes of Chinese cinema. Representative films studied in contexts of culture, society, politics, and economics, with reflections on changing meanings of both Chinese and cinema. May not be repeated for credit. P/NP or letter grading.

89. Variable Topics in Chinese Culture. (4). Lecture, three hours. Knowledge of Chinese language or culture not required. Variable topics course covering many different aspects of Chinese culture. Schedule of offerings to be offered in specific term. May be repeated for credit with topic change. P/NP or letter grading.

100A-100B-100C. Advanced Modern Chinese. (4-4-4). Lecture, three hours; discussion, two hours. Enforced requisite: course 6 or 10 with grade of C or better or Chinese placement test. Course 100A with grade of C or better or Chinese placement test is enforced requisite: course 100B with grade of C or better or Chinese placement test is enforced requisite to 100C. Third-year Chinese. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Materials selected from contemporary Chinese publications, with emphasis on social sciences. Texts analyzed for their linguistic features and social and cultural background. Readings, compositions, informal debates on topical issues, and oral presentations. P/NP or letter grading.

100D-100E-100F. Advanced Modern Chinese for Heritage speakers. (4-4-4). Lecture, three hours; discussion, two hours. Enforced requisite: course 6A with grade of C or better or Chinese placement test. Course 100D with grade of C or better or Chinese placement test is enforced requisite to 100E; course 100E with grade of C or better or Chinese placement test is enforced requisite to 100F. Third-year Chinese for heritage speakers. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Materials selected from contemporary Chinese publications, with emphasis on social sciences. Texts analyzed for their linguistic features and social and cultural background. Readings, compositions, informal debates on topical issues, and oral presentations. P/NP or letter grading.

101A-101B. Advanced Readings in Modern Chinese. (4-4). Lecture, two hours; discussion, two hours. Enforced requisite: course 100C or 100I or Chinese placement test. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Advanced readings and discussion for students planning to do advanced work or research on China. Topics from magazines, journals, and books related to humanities and social sciences. Each course may be taken independently for credit. Letter grading.

102A. Advanced International Business. (4). Lecture, two hours; discussion, two hours. Recommended preparation: one to two years of college-level Chinese. Designed to improve student language skills. Topics include ground language learning in authentic social cultural settings. Oral and written business communication, social etiquettes in business conduct, Chinese economic and political background, business law and regulations, resources and environment, and business case studies. May be taken independently for credit. Letter grading.

103. Topics in Chinese Language and Culture. (4). Lecture, three hours. Chinese language and culture for special purposes. May be repeated for credit, P/NP or letter grading.

107A-C107B. Academic/Professional Chinese. (4-4). Lecture, three hours; discussion, one hour. Enforced requisite: course 101B or Chinese placement test. Intended to improve reading and writing skills in specific academic and professional subject areas for students who have studied general Chinese at advanced level, with coverage in Chinese humanities and social sciences, science and technology, medicine, and applied linguistics. Concurrently scheduled with courses C207A-C207B. P/NP or letter grading.

108FL. Special Studies: Readings in Chinese. (2). Seminar, two hours. Enforced requisite: course 100C or 100I or Chinese placement test. Students must be concurrently enrolled in main course. Additional work in Chinese to augment work assigned in main course, including reading, writing, and other exercises. May be repeated for credit. P/NP or letter grading.

110A-110B-110C. Introduction to Classical Chinese. (4-4-4). Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or Chinese placement test. Course 110A is enforced requisite to 110B, which is enforced requisite to 110C. Grammar and readings in selected premodern texts. P/NP or letter grading.

130A-130B. Readings in Modern Chinese Literature. (4-4). Lecture, three hours; discussion, one hour. Enforced requisite: course 100B or Chinese placement test. Readings and discussion of works of modern Chinese literature. Each course may be taken independently for credit. Letter grading.

131. Writing from Margin: Global Politics of Sino-phone Literature. (4). Lecture, three hours; discussion, one hour. Readings in original language. Explores Chinese cinema as analytic trajectory for literature written in Sinitic languages by ethnic minority writers in and outside China, especially in Taiwan, Hong Kong, Malaysia, and U.S. Letter grading.

135. Language Film and Culture. (4). Lecture, two hours; discussion, one hour; film viewing, three hours. Enforced requisite: course 100C or 100I or Chinese placement test. Viewing and discussion of Chinese films, along with relevant readings in Chinese. Letter grading.

151. Chinese Literature in Translation: Modern Literature. (4). Lecture, three hours; discussion, one hour. Requisite: English Composition 1A, 1B, 1C, 1D. Knowledge of Chinese not required. Lectures and reading of representative works from 1900 to present in English translation. Letter grading.

152. Topics in Contemporary Chinese Literature and Culture. (4). Lecture, two hours; discussion, one hour. Knowledge of Chinese not required. Investigation of various topics in contemporary Chinese literature and culture, including politics and poetics of Chinese postmodernism, nativism, feminism, mass culture, and media. Letter grading.

154. Introduction to Chinese Cinema. (4). Lecture, two hours; discussion, one hour; film viewing, three hours. Knowledge of Chinese not required. History of Chinese-language cinemas, with emphasis on mainland China. Examination of film style and aesthetics, as well as contextual factors of gender, politics, culture, and society. May not be repeated for credit. Letter grading.
155. Topics in Chinese Cinema. (4). Lecture, two hours; discussion, one hour; film viewing, three hours. Knowledge of Chinese not required. Critical study of films from China, Hong Kong, Taiwan, and Chinese diaspora. Examination of aesthetics, genres, directors and stars, other arts and media, and cultural and political histories. May be repeated for credit with topic change. P/NP or letter grading.

157. Contemporary Chinese Popular Culture. (4). Lecture, three hours; discussion, one hour. Examination of various aspects of modern and contemporary popular culture in China, Taiwan, and Hong Kong from cultural studies perspective. Genres and media include literature, print culture, cinema, martial arts film and fiction, television, radio, pop music, visual arts, fashion, advertising, and cyberculture. P/NP or letter grading.

165. Introduction to Chinese Buddhist Texts. (4). Lecture, three hours; discussion, one hour. Recommended requisite: course 100A or 110B or Japanese 110 or Korean 100A or Chinese placement test. Readings in premodern Buddhist texts written in literary Chinese and translated from Sanskrit, and indigenous exegetical materials, Chinese apocryphal scriptures, and Ch'an writings. Problems in translation from Indic-European languages into Chinese; evolution of Chinese Buddhist terminology. Coverage varies. May be repeated for credit with consent of instructor. Letter grading.

C175. Introduction to Chinese Thought. (4). Lecture, three hours; discussion, one hour. Knowledge of Chinese not required. Survey of Chinese thought as represented in the period leading up to the early Han periods (circa 1000 to 200 B.C.E.), with focus on invention of Confucian tradition (including Five Classics) and on defenses of that tradition against challenges from Mohists, Taoists, and other groups of thinkers. Concurrently scheduled with course C275. Letter grading.

176. Neo-Confucianism. (4). Lecture, three hours; discussion, one hour. Knowledge of Chinese not required. Examination of movement to revitalize and reinterpret teachings of Confucius during Tang, Song, Yuan, and Ming dynasties, with consideration of both neo-Confucian philosophy and social action. Letter grading.

180. Chinese Mythology and Supernatural. (4). Lecture, three hours; discussion, one hour. Knowledge of Chinese not required. Survey of corpus of traditional Chinese mythology, with focus on examples preserved in variety of early texts, with evidences in dramatic and fictional works, and evidence from visual arts. Letter grading.

182. Archaeology of Early Global Trade and Piracy. (4). Lecture, three hours; discussion, one hour. Explores origins of trade and piracy at the heath of globalization (13th to 17th century), with focus on continuity and transformation in Asian trade network in response to early global trade. Examination based on archaeological study of porcelain, tracing movement from Kilns around Chinese trading ports to shipwrecks and consumer societies in Southeast Asia and colonial Americas. As one of most important commodities on trans-Pacific voyage, close association of porcelain production and trade with international piracy in traditional historiography generates new angle for understanding dynamics of early global trade and industries. Letter grading.

183. Archaeological Landscapes of China. (4). (Same as Anthropology M116A.) Lecture, three hours; discussion, one hour. Declasified space images from Cold War era and open remote sensing data of 21st century provide new opportunities for studying landscape from prehistory to modernity. Examination of landscape from satellite images and on-ground analysis of archaeological sites on satellite images, investigation of changing historical and archaeological landscape in China during last 5,000 years. Social processes at various scales, from emergence of early cities to rise of metropolitan centers and formation of imperial landscapes. Letter grading.

184. Crime, Law, and Punishment in Traditional China. (4). Lecture, three hours; discussion, one hour. Preventing crime and administering justice are important parts of any society, but these are not straightforward or simple processes. What is crime? Are there crimes they merit special kinds of punishment? How is punishment decided and by whom? What happens if justice is not carried out? Consideration of these questions as they apply to premodern China. Topics include: legal codes and casebooks, literary re-imaginings of trials, depictions of postmortem punishment, and tales of supernatural retribution. Discussion of how legal and penal systems of China have been represented in Western literature. Letter grading.

186. Archaeology in China. (4). Lecture, three hours; discussion, one hour. Knowledge of Chinese not required. Early Chinese study of their own past, types of artifacts, beginnings of scientific archaeology, and surveys of major excavations of sites at all periods. Letter grading.

187. Chinese Etymology and Calligraphy. (4). Lecture, three hours; discussion, one hour. Recommended requisite: course 3. Coverage of (1) development of Chinese writing from pottery inscriptions 6,000 years ago to modern simplified forms and studies of six scripts that were used to form Chinese characters and (2) aesthetic training of calligraphic art and its appreciation, with focus on ways of recognizing and interpreting cursive style, common form of handwriting. Letter grading.

191B. Variable Topics Research Seminars: 20th-Century China and Taiwan. (4). Seminar, three hours. Designed for juniors/seniors. Research seminar on selected topics in modern and contemporary literature and culture from China and Taiwan. Reading, discussion, and development of culminating project. May be repeated for credit. Letter grading.

197. Individual Studies in Chinese. (4). Tutorial, to be arranged. Limited to juniors/seniors and graduate students who desire more advanced or specialized instruction in Chinese. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. See undergraduate adviser. P/NP or letter grading.

199. Variable Topics Research Seminars: Asian Languages and Cultures. (4-4). Seminar, three hours; film-viewing laboratory, two hours. Advanced topics in Chinese-language cinema. Examination of theory and methodology, historiography, industry and institutions, style and aesthetics, major genres and artists, other arts and

Graduate Courses

200A. Research Methods in Chinese. (4). Seminar, three hours; field work. Required for research and discussion designed to develop basic skills in using traditional Chinese research materials. Topics include classical dictionaries; sinological indices; bibliographies; biographical, biographical, and historical sources; encyclopedias; anthologies; rare editions; illustrated matter and calligraphy. Letter grading.

200B. Proseminar: Premodern Chinese Literature. (4). Seminar, three hours; film viewing. Major bibliographical and methodological resources in field of premodern Chinese literature, with focus on research tools in field and on scholarship in English on major literary genres, periods, and authors. Letter grading.

200C. Proseminar: Modern Chinese Literature and Cinema. (4). Seminar, three hours. Introduction to major bibliographical and methodological resources in fields of modern Chinese literary and cinematic studies, with focus on theoretical tools, historical knowledge, and critical trends. Letter grading.

202. China Studies: Discipline, Methods, Debates. (2). (Same as History M202.) Seminar, two hours. Introduction to major methodologies practiced in humanities and social sciences disciplines. S/U grading.

C207A-C207B. Academic/Professional Chinese. (4-4). Lecture, three hours; discussion, one hour. Enforced requisite: course 101B or Chinese placement test. Intended to improve reading and writing skills in specific academic and professional subject areas for students who have studied general Chinese at advanced level, with coverage in Chinese humanities and social sciences, science and technology, medicine, and applied linguistics. Concurrently scheduled with courses C107A-C107B. S/U or letter grading.

209. Issues in Sinophone Literature. (4). Seminar, three hours. Exploration of selected topics and issues in Sinophone literature, written in Sinitic languages by ethnic minority writers in China, and literature written by those living outside China across world, especially in Malaysia, Taiwan, Singapore, and the U.S. S/U or letter grading.

211A-211B. Seminars: Classical Chinese Poetry. (4-4). Seminar, three hours. Preparation: reading knowledge of literary Chinese. Topics rotate among major textual traditions and chronological periods. Emphasis on philological, critical, and historical approaches. May be repeated for credit with consent of instructor. In Progress (211A) and letter (211B) grading.

212. Topics in Chinese Poetry. (4). Readings/discussion, three hours. Selected readings from classical poetic tradition, with focus on individual poets, themes, or other critical issues. May be repeated for credit with consent of instructor. Letter grading.

213A-213B. Chinese-Language Cinemas. (4-4). Seminar, three hours; film-viewing laboratory, two hours. Advanced topics in Chinese-language cinema. Examination of theory and methodology, historiography, industry and institutions, style and aesthetics, major genres and artists, other arts and
1. **Introductory Filipino.** (5) Lecture, two hours; discussion, three hours. Coverage of basic Filipino/Tagalog grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

2. **Introductory Filipino.** (5) Lecture, two hours; discussion, three hours. Enforced requisite: course 1 with grade of C or better. Coverage of basic Filipino/Tagalog grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

3. **Introductory Filipino.** (5) Lecture, two hours; discussion, three hours. Enforced requisite: course 2 with grade of C or better. Coverage of basic Filipino/Tagalog grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

4. **Intermediate Filipino.** (5) Lecture, two hours; discussion, three hours. Enforced requisite: course 3 with grade of C or better. Reinforcement of basic Filipino/Tagalog grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. P/NP or letter grading.

5. **Intermediate Filipino.** (5) Lecture, two hours; discussion, three hours. Enforced requisite: course 4 with grade of C or better. Reinforcement of basic Filipino/Tagalog grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. P/NP or letter grading.

6. **Intermediate Filipino.** (5) Lecture, two hours; discussion, three hours. Enforced requisite: course 5 with grade of C or better. Reinforcement of basic Filipino/Tagalog grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. P/NP or letter grading.

7. **Elementary Filipino:** Intensive. (15) Lecture, 10 hours; discussion, 10 hours. Intensive course equiva- lent to courses 1, 2, and 3. Coverage of basic Filipino/Tagalog grammar, with equal emphasis on reading, writing, conversation, and comprehension. Offered in summer only. P/NP or letter grading.

**Upper Division Courses**

100A. Advanced Filipino: Reading and Writing. (4) Lecture, three hours. Enforced requisite: course 6 with grade of C or better or Filipino/Tagalog placement test. Designed to move students with intermediate level of proficiency toward greater proficiency and fluency in reading, writing, speaking, and listening in Filipino language. Coverage of skills in effective use of language: description, narration, exposition, and argumentation. How to analyze different elements of writing and reading of pieces from several genres of contemporary Filipino writing. P/NP or letter grading.

109. **Advanced Tutorial Instruction in Filipino.** (2) Tutorial, two hours. Requisite: course 6 or Filipino/Tagalog placement test. Tutorial and guided independent study to help students develop advanced subject competence in spoken and written Filipino. May be repeated for credit. P/NP or letter grading.

130A. Filipino Short Story. (4) Lecture, three hours. Enforced requisite: course 6 or Filipino/Tagalog placement test. General background knowledge on how Filipino short stories view themselves and society, historically and diachronically. Sample of short stories

---

**Filipino Lower Division Courses**

1. Introduction to Chinese, (5) Lecture, two hours; discussion, three hours. Coverage of classical Chinese literature, art, and culture. Readings in classical Chinese literature. May be repeated for credit with topic change. Concurrently scheduled with course C115. Letter grading.

---

**Filipino Upper Division Courses**

100A. Advanced Filipino: Reading and Writing. (4) Lecture, three hours. Enforced requisite: course 6 with grade of C or better or Filipino/Tagalog placement test. Designed to move students with intermediate level of proficiency toward greater proficiency and fluency in reading, writing, speaking, and listening in Filipino language. Coverage of skills in effective use of language: description, narration, exposition, and argumentation. How to analyze different elements of writing and reading of pieces from several genres of contemporary Filipino writing. P/NP or letter grading.

109. **Advanced Tutorial Instruction in Filipino.** (2) Tutorial, two hours. Requisite: course 6 or Filipino/Tagalog placement test. Tutorial and guided independent study to help students develop advanced subject competence in spoken and written Filipino. May be repeated for credit. P/NP or letter grading.

130A. Filipino Short Story. (4) Lecture, three hours. Enforced requisite: course 6 or Filipino/Tagalog placement test. General background knowledge on how Filipino short stories view themselves and society, historically and diachronically. Sample of short stories
written in Filipino/Tagalog language with some written in English for purposes of contrasting rhetoric, themes, and sensibilities. P/NP or letter grading.

Hindi-Urdu Lower Division Courses

1. Introductory Hindi-Urdu. (5). Lecture, two hours; discussion, three hours. Coverage of basic Hindi grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

2. Introductory Hindi-Urdu. (5). Lecture, two hours; discussion, three hours. Enforced requisite: course 2 with grade of C or better. Coverage of basic Hindi grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

3. Introductory Hindi-Urdu. (5). Lecture, two hours; discussion, three hours. Enforced requisite: course 2 with grade of C or better. Coverage of basic Hindi grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

4. Intermediate Hindi-Urdu. (5). Lecture, two hours; discussion, three hours. Enforced requisite: course 5 with grade of C or better. Reinforcement of basic Hindi grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. P/NP or letter grading.

5. Intermediate Hindi-Urdu. (5). Lecture, two hours; discussion, three hours. Enforced requisite: course 5 with grade of C or better. Reinforcement of basic Hindi grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. P/NP or letter grading.

6. Intermediate Hindi-Urdu. (5). Lecture, two hours; discussion, three hours. Enforced requisite: course 2 with grade of C or better. Reinforcement of basic Hindi grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. P/NP or letter grading.

Upper Division Courses

100A-100B-100C. Advanced Indonesian. (4-4-4). Lecture, three hours. Course 100A with grade of C or better is requisite to 100B; course 100B with grade of C or better is requisite to 100C. Preparation for more advanced study of specialized academic subjects, including but not limited to social sciences and humanities. Students read authentic materials in Indonesian concerning various issues. P/NP or letter grading.

Japanese Lower Division Courses

1. Elementary Modern Japanese. (5). Lecture, two hours; discussion, three hours. Not open to students who have learned enough Japanese to qualify for more advanced courses. Coverage of basic Japanese grammar, with emphasis on reading, writing, listening, and speaking skills. P/NP or letter grading.

2. Introductory Indonesian. (5). Lecture, five hours. Enforced requisite: course 1 with grade of C or better. Not open to students who have learned enough Indonesian to qualify for more advanced courses. Coverage of basic Indonesian grammar, with equal emphasis on reading, writing, listening, and speaking skills. P/NP or letter grading.

3. Introductory Indonesian. (5). Lecture, five hours. Enforced requisite: course 2 with grade of C or better. Not open to students who have learned enough Indonesian to qualify for more advanced courses. Coverage of basic Indonesian grammar, with equal emphasis on reading, writing, listening, and speaking skills. P/NP or letter grading.

4. Intermediate Indonesian. (5). Lecture, five hours. Enforced requisite: course 4 with grade of C or better. Designed to expand language skills acquired in introductory courses and to equip students with good command of communicative competence in Indonesian. P/NP or letter grading.

5. Intermediate Indonesian. (5). Lecture, five hours. Enforced requisite: course 4 with grade of C or better. Designed to expand language skills acquired in introductory courses and to equip students with good command of communicative competence in Indonesian. P/NP or letter grading.

70. Images of Japan: Literature and Film. (5). Lecture, three hours; discussion, one hour. Knowledge of Japanese language or literature not required. Introduction to visual and textual images of Japan’s literary heritage, including documentary films and feature films based on Japan’s literary classics. Letter grading.

90. Japanese Civilization. (5). Lecture, three hours; discussion, one hour. Knowledge of Japanese not required. Introduction to Japanese aesthetics in theory and practice, including study of ritual and specific trends in Japanese aesthetics such as imperfection, asymmetry, suggestion, miniaturization, indirectness, wabi, sabi, hiekare, yugen, as reflected and practiced in tea ceremony. P/NP or letter grading.

Upper Division Courses

100A-100B-100C. Advanced Modern Japanese. (4-4-4). Lecture, five hours; Enforced requisite: course 6 or with grade of C or better or Japanese placement test. Course 100A with grade of C or better is requisite to 100B; course 100B with grade of C or better is requisite to 100C. Preparation for more advanced study of specialized academic subjects, including but not limited to social sciences and humanities. Students read authentic materials in modern Japanese, with emphasis on comprehension and structural analysis. Offered in summer only. P/NP or letter grading.

110. Intermediate Modern Japanese: Intensive. (5). Lecture, ten hours; discussion, ten hours. Enforced requisite: course 3 with grade of C or better or Japanese placement test. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Intensive course equivalent to courses 4, 5, and 6. Readings in modern Japanese, with emphasis on comprehension and structural analysis. Offered in summer only. P/NP or letter grading.

115. Japanese Civilization. (5). Lecture, three hours; discussion, one hour. Knowledge of Japanese not required. Introduction to Japanese aesthetics in theory and practice, including study of ritual and specific trends in Japanese aesthetics such as imperfection, asymmetry, suggestion, miniaturization, indirectness, wabi, sabi, hiekare, yugen, as reflected and practiced in tea ceremony. P/NP or letter grading.
vanced courses. May be taken concurrently with course 100A. Development of overall competency in understanding grammar and practical expression in written and oral Japanese, as well as expansion of knowledge in social, cultural, and historical aspects of Japanese society. (4).

104. Business Japanese. (4) (Formerly numbered 103.) Lecture, three hours; discussion, one hour. Enforced requisite: course 100C or 100S or Japanese placement test. Designed to improve skills in Japa- nese-English business communication, as well as to bring students to a sufficient level of Japanese to be able to function effectively in business situations in Japanese. Should not be taken by students who have already completed course 100A or 100B. Letter grading.

108FL. Special Studies: Readings in Japanese. (2) Seminar, two hours. Enforced requisite: course 100C or 100I or Japanese placement test. Students must be concurrently enrolled in affiliated main course. Additional work in Japanese to augment work assigned in main course, including reading, writing, and other exercises. May be repeated for credit. P/NP or letter grading.

110A. Introduction to Classical Japanese: Basic Grammar. (4) (Formerly numbered 110.) Lecture, three hours; discussion, one hour. Enforced requisite: course 100C or 100S or Japanese placement test. Introduc- tion to fundamentals of classical Japanese. Grammar and reading of selected premodern texts. P/NP or letter grading.

110B. Introduction to Classical Japanese: Reading Proficiency. (4) (Formerly numbered 110.) Lecture, three hours; discussion, one hour. Enforced requisite: course 100A or 100S or Japanese placement test. Further development of advanced knowledge of classical Japanese grammar with emphasis on reading of selected premodern texts. P/NP or letter grading.

M120. Introduction to Japanese Linguistics. (4) (Same as Linguistics M116.) Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or 100S or Japanese placement test. To familiarize student with Japanese language, grammar and linguistic expressions. P/NP or letter grading.

130A-130B-130C. Readings in Modern Japanese Literature. (4-4-4). Seminar, three hours. Enforced requisite: course 100C or 100I or Japanese placement test. Readings and discussion of works by modern Japanese writers. Each course may be taken independently for credit. Letter grading.

C131. Nation in Modern Japanese Intellectual Dis- course. (4) Lecture, three hours. Enforced requisite: course 100C or 100I or Japanese placement test. Reading of texts in original Japanese, with focus on late Taisho and early Showa periods. Various ways that modern Japanese thought (mizuko) course through discourses of this period, particularly in relation to politics of imperialism. Concurrently scheduled with course C231. Letter grading.

151. Japanese Literature in Translation: Modern. (4) Lecture, three hours; discussion, one hour. Requi- site: English Composition 3 or 3H or one course from Comparative Literature 1A, 1B, 1C, 1D, Knowledge of Japanese not required. Survey of Japanese literature from 16th century to post-World War II. P/NP or letter grading.

154. Postwar Japanese Cinema through Literature. (4) Lecture, three hours; discussion, one hour. Requi- site: English Composition 3 or 3H or one course from Comparative Literature 1A, 1B, 1C, 1D, Knowledge of Japanese not required. Use of fiction and film to ex- plore Japanese culture in postwar era in broad cross-disciplinary and cross-cultural context. P/NP or letter grading.

M156. Literature and Technology. (4) (Same as Comparative Literature M176.) Lecture, three hours. Knowledge of Japanese not required. Examination of representation of technology in 20th-century fiction. Discussion of impact of technology on shifting images of gender, subjectivity, and national identity. P/NP or letter grading.

174 / Asian Languages and Cultures

130A-130B-130C. Readings in Modern Japanese Literature. (4-4-4). Seminar, three hours. Enforced requisite: course 100C or 100I or Japanese placement test. Readings and discussion of works by modern Japanese writers. Each course may be taken independently for credit. Letter grading.

170. Japanese Tales of Supernatural. (4). Lecture, three hours; discussion, one hour. Knowledge of Japanese not required. Readings of fictional works that feature supernatural beings, including kitsune, Buddha, bodhisattvas, Yin-yang diviners, ghosts, various types of demons, shape-shifting foxes and raccoon dogs, snakes, and dragons. Exploration of different cultural representations of the supernatural from ancient to modern times, and of relationship between supernatural literature and expressions of fear, cruelty, violence, misogyny, desire, hope, compassion, and humor. Letter grading.

Examination of changes related to notion of kaihitsu (kias of music, dance, storytelling, visual and auditory presentation, drama, mimetic and competitive acrobatic arts, with special emphasis on religious magical purposes and symbolic structure of these arts. In Progress (270A) and letter (270B) grading.

Korean

Lower Division Courses

1. Elementary Modern Korean. (5). Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Continuation of course 1. P/NP or letter grading.

2. Intermediate Korean for Korean-Heritage Speakers. (5). Lecture, two hours; discussion, three hours. Enforced requisite: course 1A with grade of C or better or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Designed for students who are from Korean-speaking family background and have some limited knowledge of Korean. Emphasis on formal aspects of standard Korean (basic grammar, reading, daily conversation, polite forms, basic writing). P/NP or letter grading.

3. Elementary Modern Korean. (5). Lecture, two hours; discussion, three hours (when scheduled). Enforced requisite: course 2A with grade of C or better or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Continuation of course 2. P/NP or letter grading.

4. Intermediate Modern Korean. (5). Lecture, three hours; discussion, two hours. Enforced requisite: course 3A with grade of C or better or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Continuation of course 3. Conversation, composition, and readings with structural analysis in modern Korean. P/NP or letter grading.

5. Intermediate Modern Korean. (5). Lecture, three hours; discussion, two hours. Enforced requisite: course 4A with grade of C or better or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Designed for students who seek training in written components of standard Korean (spelling, writing, reading, and grammar) at intermediate level. Continuation of course 4A. P/NP or letter grading.

6. Intermediate Modern Korean. (5). Lecture, three hours; discussion, two hours. Enforced requisite: course 5 with grade of C or better or Korean placement test. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Designed for Korean-heritage learners. Emphasis on four skills (spelling, grammar, readings, and conversation in modern Korean). P/NP or letter grading.

7. Intermediate Modern Korean. (5). Lecture, five hours. Enforced requisite: course 4A with grade of C or better or Korean placement test. Not open to students who attended elementary school in Korea for more than one year or who have learned, from whatever source, enough Korean to qualify for more advanced courses. Designed for students who seek training in written components of standard Korean (spelling, writing, reading, and grammar) at intermediate level. Continuation of course 5. P/NP or letter grading.

8. Intermediate Modern Korean. (5). Lecture, five hours. Enforced requisite: course 5 with grade of C or better or Korean placement test. Not open to students who attended elementary school in Korea for more than one year or who have learned, from whatever source, enough Korean to qualify for more advanced courses. Designed for Korean-heritage learners. Emphasis on four skills (spelling, grammar, readings, and conversation in modern Korean). P/NP or letter grading.

9. Intermediate Modern Korean. (5). Lecture, five hours. Enforced requisite: course 4A with grade of C or better or Korean placement test. Not open to students who attended elementary school in Korea for more than one year or who have learned, from whatever source, enough Korean to qualify for more advanced courses. Designed for Korean-heritage learners. Emphasis on four skills (spelling, grammar, readings, and conversation in modern Korean). P/NP or letter grading.
rean). Continuation of course 5A. Completion of course 6A is equivalent to completion of course 6. P/NP or letter grading.

8. Elementary Korean: Intensive. (15). Lecture, 10 hours; discussion, 10 hours. Open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Intensive course equivalent to courses 4, 5, and 6. Conversation, composition, and readings with structural analysis in modern Korean. Offered in summer only. P/NP or letter grading.

10. Intermediate Modern Korean: Intensive. (15). Lecture, 10 hours; discussion, 10 hours. Recommended preparation: course 3, 5A, or 5B, or Korean placement test, or courses equivalent to elementary-level Korean, Second-year Korean, for students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Intensive course equivalent to courses 4, 5, and 6.

40. Korean Wave: Globalization of South Korean Popular Culture. (5). Lecture, three hours; discussion, one hour. Knowledge of Korean not required. Examination of South Korean popular culture in transnational social and political contexts. P/NP or letter grading.

8. Elementary Korean: Intensive. (15). Lecture, 10 hours; discussion, 10 hours. Open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Intensive course equivalent to courses 4, 5, and 6. Conversation, composition, and readings with structural analysis in modern Korean. Offered in summer only. P/NP or letter grading.

40. Korean Wave: Globalization of South Korean Popular Culture. (5). Lecture, three hours; discussion, one hour. Knowledge of Korean not required. Examination of South Korean popular culture in transnational social and political contexts. P/NP or letter grading.

M60. Introduction to Korean Religions. (5). Formerly numbered 60). (Same as Religion M60C.) Lecture, three hours; discussion, one hour. Knowledge of Asian languages not required. General survey of history of religions in Korea—Shamanism, Buddhism, Confucianism, Daoism, Christianity, Tonghak, and some new religions—with focus on religious discourse, religious rituals, and religious practices. P/NP or letter grading.

103A-103B-103C. Readings in Sino-Korean Characters. (4-4-4). Lecture, three hours; discussion, one hour. Knowledge of Korean not required. Exposure to transnational social and political contexts. P/NP or letter grading.

CM120. Structure of Korean. (4). Formerly numbered C150. (Same as Linguistics CM120.) Lecture, two hours; discussion, one hour. Recommended preparation: two years of Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean as a linguistic universal, with brief introduction to formation, typological features, and phonological structure of Korean. Concurrently scheduled with course CM220. Letter grading.

150. Korean Literature in Translation: Classical. (4). Lecture, three hours. Recommended preparation: English Composition 3 or 3H or one course from Comparative Literature 1A, 1B, 1C, 1D. Reading and discussion of major modern Korean literary texts. Each course may be taken independently for credit. P/NP or letter grading.

154. Introduction to Korean Cinema. (4). Lecture, two hours; discussion, one hour; film viewing, two hours. Knowledge of Korean not required. Critical and historical examination of Korean cinema from its inception to present. P/NP or letter grading.

165. Introduction to Korean Buddhist Texts. (4). Lecture, three hours; discussion, one hour. Recommended preparation: course 100A or Chinese 110C or Korean placement test. Introduction to reading pre-modern Korean Buddhist texts written in Sino-Korean.
and taken from indigenous doxographic materials and philosophical writings, Korean Buddhist apocryphal scriptures, native exegetical commentaries, and Son (Zen) texts. Texts may be read in either Sino-Korean or literary Chinese. May be repeated with consent of instructor. Letter grading.

172. Topics in Korean Christianity. (4). Lecture, three hours; discussion, one hour. Knowledge of Korean not required. Historical development of Christi-anity in Korea, beliefs and practices, impact of Christi-anity on modern Korean culture and society. Cov-erage varies. May be repeated for credit with consent of instructor. Letter grading.

175. Introduction to Traditional Korean Thought. (4). Lecture, three hours; discussion, one hour. Knowl-edge of Korean not required. General survey of Ko-rean thought from earliest records to 19th century, in-cluding shamanism, Taoism, Buddhism, Christianity, and neo-Confucianism. Korean traditions and those found in India, China, Japan, and West. P/NP or letter grading.

176. Introduction to Korean Confucian Texts. (4). Lecture, three hours. Enforced prerequisite: course 100C or Chinese 110C or Korean placement test. Reading in premodern Koryo and Choson texts on politics, soci-ety, and human values. Texts may be read in either Sino-Korean or literary Chinese. May be re-peated with consent of instructor. P/NP or letter grading.

180A-180B-180C. Cultural History of Korea. (4-4-4). Lecture, three hours; discussion, one hour. Requis-ite: course 100C. Knowledge of Korean not required. Survey of Korean thought in late 19th and 20th centuries, in-cluding religious thought, political thought, feminism, nationalism, and economic thinking and practice. P/NP or letter grading.

191A. Variable Topics Research Seminars: Tradi-tional Korea. (4). Seminar, three hours. Research seminar on selected topics of interpretation in Korean history from earliest times through mid-19th century. Coverage varies from term to term and includes such topics as state formation, international relations, or "sprouts of capitalism" thesis. Reading, discussion, and development of culminating project. May be re-peated for credit. Letter grading.

191B. Variable Topics Research Seminars: Con-temporary Korean Society and Culture. (4). Sem-inar, three hours. Prerequisite: course 177 or 180C. Re-search seminar on selected topics in modern Korean history. Reading, discussion, and development of culminating project. May be repeated for credit. Letter grading.

197. Individual Studies in Korean. (4). Tutorial, to be arranged. Limited to juniors/seniors and graduate stu-dents who desire more advanced or specialized in-struction in Korean. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required; see undergraduate adviser. P/NP or letter grading.

184. Women of Premodern Korea. (4). Lecture, three hours; discussion, one hour. Knowledge of Ko-rean not required. Examination of premodern Korean history from 1260 through 1876; women’s roles in soci-ety within context of political and institutional in-stitutions. Consideration of how gender roles and identities were socially (re)con-structed over time, with focus on continual negotia-tion by women and men within larger processes of political, social, and cultural changes such as forma-tion of centralized bureaucratic systems, rise of aris-tocratic social order, and propagation of Confucian social values. Letter grading.

186B. Women of Modern Korea. (4). Lecture, three hours; discussion, one hour. Knowledge of Korean not required. Examination of modern Korean history from perspective of women since mid-19th century. Consideration of how gender roles and identities were socially (re)constructed over time, with focus on con-tinual negotiation by women and men within larger processes of political, social, and cultural transforma-tions. Discussion of changes in women’s education, employment, social/legal status, especially in context of colonialism, war, democratiza-tion, and economic development. P/NP or letter grading.

Comparative survey of intertwined and parallel histories of Korea and Vietnam, organized chronologically, by key themes that serve as basis for comparison. Modern experi-ences of colonized Vietnam and Korea have many significant parallels, including imposition of colonial control, transition to modernized societies within con-text of colonialism, and shared experiences of World War II. Both were also divided after war between communistic regime and anti-communis-tic regimes in South. Each also experienced warfare after division and direct involvement of U.S. during height of cold war between 1950s and 1970s. P/NP or letter grading.

201. Reading/Korean Language/History. (4). Seminar, three hours. Advanced course that explores Ko-rean cultural through in-depth reading of Korean-lang-ue texts and/or visual documents. Topics include literary essays, folk literature, history, language, and society. May be repeated for credit. S/U or letter grading.

202A-C202B-C202C. Reading Korean Academic Texts. (4-4-4). Lecture, three hours. Requisite: course 101C or Korean placement test. Intended to improve reading skills for students who have studied Korean to advanced level, with coverage of Korean texts on topics concerning Korean history, culture, and society. Each course may be taken independently for credit. Con-currently scheduled with courses C102A-C102B-C102C. S/U or letter grading.

210. Thought and Society in Korea. (4). Readings/ discussion. Three hours; discussion, one hour. Preparation: reading knowledge of Korean. Designed for graduate students. Critical analysis of list of topics that serve as basis for comparison. Modern experi-ences of colonized Korea and Vietnam have many significant parallels, including imposition of colonial control, transition to modernized societies within con-text of colonialism, and shared experiences of World War II. Both were also divided after war between communistic regime and anti-communis-tic regimes in South. Each also experienced warfare after division and direct involvement of U.S. during height of cold war between 1950s and 1970s. P/NP or letter grading.

212. 19th-Century Korea. (4). Seminar, three hours; discussion, one hour. Requisite: course 180B or 180C. Seminar covering crucial period from coro-nation of Sunjo in 1800 to annexation of Korea by Japan in 1910, including major historical scholarship on political, diplomatic, social, economic, intellectual, and cultural history. Letter grading.

215. Korean Literary History. (4). Lecture, three hours. Designed for graduate students. Critical history of de-vlopment of traditional Korean literature, with em-phasis on canon and ideology, literary systems, hier-archy of genres, rise of literary kinds and forms, peri-odization, and critical issues in literary history. One area of particular focus to be national canon that governs literary studies in Korea and West. Letter grading.

220. Structure of Korean. (4). Lecture, three hours; discussion, two hours. Recommended preparation: two years of Korean, or consent of instructor. Knowledge of modern Korean expected. Consideration of basic features of Korean language texts and/or visual documents. Topics may include modern Korean literature, and survey of basic bibliographical material. In addition, introduc-tion to most important primary sources in student’s field of specialization. Letter grading.

250A-250B-250C. Topics in Korean Cultural History. (4). Seminar, three hours. Advanced course that explores Ko-rean culture through in-depth reading of Korean-lang-ue texts and/or visual documents. Topics include literature, folklore, folk literature, history, language, and society. May be repeated for credit. S/U or letter grading.

C220A-C220B-C220C. Seminars: Selected Topics in Korean Linguistics. (4-4-4). Seminar, three hours. Critical reading and discussion of selected topics in Korean functional linguistics (grammaticalization, discourse, pragmatics, sociolinguistics, syntax, morphology) and pedagogy. In Progress (224A) and letter (224B) grading.

Asian Languages and Cultures / 179

230A-230B. Seminars: Literary Translation from Korean. (4-4). Seminar, three hours. Preparation: reading knowledge of Korean. In consultation with instructor, students select works to be translated. Devoted to skill of producing accurate and readable translations, with emphasis on problems and techniques unique to poetry and prose. At end of term, students produce publishable translations. May be repeated once with consent of instructor. In Progress (230A) and letter (230B) grading.

235A-235B. Seminars: Topics in Modern Korean Literature. (4-4). Seminar, three hours. Preparation: at least five years of Korean. Recommended: reading knowledge of Chinese or Japanese. Limited to graduate students. Study of selected period, movement, theme, or 20th-century Korean literature, with critical review of secondary works in Western and Korean languages. May be repeated for credit with consent of instructor. In Progress (235A) and letter (235B) grading.

295A-295B. Seminars: Topics in Traditional Korean Cultural History. (4-4). Seminar, three hours. Preparation: reading knowledge of Korean or literary Chinese. Discussion and research on major topics in Korean cultural history, such as Confucianization of Korean society, Practical Learning movement of late Choson dynasty, or Korean reactions to Western learning and enlightenment movements of 19th century. May be repeated for credit. In Progress (295A) and letter (295B) grading.

296A-296B. Seminars: Topics in Modern Korean Cultural History. (4-4). Seminar, three hours. Preparation: reading knowledge of Korean. Designed for graduate students. Graduate research seminar on selected topics in modern Korean history. In Progress (296A) and letter (296B) grading.

South Asian Lower Division Course

M60. Religion in Classical India. Introduction. (5). (Formerly numbered 60). (Same as Religion M80D). Lecture, three hours; discussion, one hour. Introduction to religions of classical India—Vedic, Brahmanical, Hindu, Jain, and Buddhism—paying equal attention to the words what learned Buddhists wrote and ordinary Buddhists said, and how it compares to other modern writing systems. P/NP or letter grading.

110A. Elementary Sanskrit. (4). Lecture, three hours. Introduction to script and grammar, with reading exercises and attention to Sanskrit for understanding of other Indo-European languages. P/NP or letter grading.

110C. Advanced Sanskrit. (4). Lecture, three hours. Requisite: course 110B. Reading of entire Bhagavadgita or comparable amount of other Sanskrit literature. P/NP or letter grading.

115. Readings in Sanskrit. (4). Lecture, three hours. Requisite: course 110C. Extensive reading in such texts as best serve students needs. May be repeated for credit with consent of instructor. P/NP or letter grading.

150. Classical Indian Literature in Translation. (4). Lecture, three hours. Knowledge of Sanskrit language not required. Survey of some landmarks of classical Indian literature from second millennium B.C.E. into second millennium C.E., including both poetry and prose, “high” art and more popular genres, and secular and religious texts, examined in their social and institutional contexts. P/NP or letter grading.

CM160. Buddhism in India. (4). (Formerly numbered C160). (Same as Religion M161D). Lecture, three hours; discussion, one hour. Knowledge of Indian languages not required. Overview of social and doctrinal history of Buddhism from its origin to its disappearance in India, based not only on texts but on archaeological, art historical, and inscriptive sources. Examination of both formal doctrine and actual practices and on what learned Buddhists did and what ordinary Buddhists did, saw, and made. Concurrently scheduled with course CM160. Letter grading.

Southeast Asian Lower Division Courses

M60. Religious Traditions in Southeast Asia. (4). (Formerly numbered 60). (Same as Religion M20E). Lecture, three hours. Introduction to historical development and contemporary practice of religions in Southeast Asia. Examination of indigenous religious
beliefs and major textually based religions introduced to region, including Hinduism, Buddhism, Islam, and Christianity. P/NP or letter grading.

70. Modern Thai Language and Literature. (5). Lecture, three hours; discussion, one hour. Introduction to modern literatures of Southeast Asia. Designed to expose students to range of literatures, predominantly novels and short stories, that were written across this region in response to dramatic changes caused by colonialism and its aftermath. P/NP or letter grading.

70. Modern Southeast Asian Literature. (4). Lecture, three hours. Knowledge of Southeast Asian languages not required. Exploration of diversity of Southeast Asian literatures in such areas as traditional culture, modernization, politics, and literature through modern literary texts. P/NP or letter grading.

Upper Division Courses

130. Topics in Southeast Asian Literature. (4). Lecture, three hours. Requisite: one course from Comparative Literature 1A, 1B, 1C, 1D, 2AW, 2BW, 2CW, or English Composition 3 or 3H. Knowledge of Southeast Asian languages not required. Advanced exploration of Southeast Asia through in-depth reading of texts from region. Topics include censorship, politics, language, and literature. P/NP or letter grading.

135. Religion and Society in Southeast Asia. (4). Lecture, three hours; discussion, one hour. Critical issues related to major religious traditions in Southeast Asia, with emphasis on reading and reflecting on recent scholarship regarding complex interactions between religion, state, and society in contemporary Southeast Asia. P/NP or letter grading.

140. Zomia: Peoples, Societies, and Cultures of Upland Southeast Asia. (4). Lecture, three hours; discussion, one hour. Recommended requisite: prior course in Asian cultures or history. Multidisciplinary survey of peoples of upland Southeast Asia and critical issues affecting them. Topics include history, culture, human rights, ethnicity, religion, politics. P/NP or letter grading.

157. Gender Issues in Southeast Asia. (4). Seminar, three hours. Critical examination of gender issues in one or more Southeast Asian countries as they connect to social historical contexts nationally, regionally, or globally. May be repeated for credit. P/NP or letter grading.

170A-170B-170C. Topics in Southeast Asian Studies. (4-4-4). Lecture, three hours. Exploration of Southeast Asian culture through in-depth reading of texts and/or visual documents. Topics include literature, religion, folklore, cultural history, and society. P/NP or letter grading.

197. Individual Study in Southeast Asian. (4). Tutorial, to be arranged. Limited to juniors/seniors and graduate students who desire more advanced or specialized treatment of one language offered in program beyond introductory and intermediate courses currently offered. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required; see academic coordinator. P/NP or letter grading.

Vietnamese

Lower Division Courses

1. Introductory Vietnamese. (5). Lecture, five hours. Coverage of basic Vietnamese grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

2. Introductory Vietnamese. (5). Lecture, five hours. Enforced requisite: course 1 with grade of C or better. Coverage of basic Vietnamese grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

3. Introductory Thai. (5). Lecture, five hours. Enforced requisite: course 2 with grade of C or better. Coverage of basic Thai grammar, with equal emphasis on reading, writing, conversation, and comprehension. P/NP or letter grading.

3R. Thai Scripts. (5). Lecture, five hours. Recommended preparation: speaking and listening skills in Thai and Thai placement test. Training in reading and writing at introductory level. Completion of course 3R is equivalent to completion of one year of college-level Thai. P/NP or letter grading.

4. Intermediate Thai. (5). Lecture, five hours. Reinforcement of basic Thai grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. P/NP or letter grading.

5. Intermediate Thai. (5). Lecture, five hours. Enforced requisite: course 4 with grade of C or better. Reinforcement of basic Thai grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. P/NP or letter grading.

5R. Thai Speech. (5). Lecture, five hours. Enforced requisite: course 5 with grade of C or better. Reinforcement of basic Thai grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts. P/NP or letter grading.

Upper Division Courses

100A-100B-100C. Advanced Thai. (4-4-4). Lecture, three hours. Course 100A with grade of C or better is requisite to 100B; course 100B with grade of C or better is requisite to 100C. Reinforcement of basic Thai grammar and vocabulary acquired at beginning and intermediate levels. Coverage of more advanced topics on various aspects of Thai society. Broadening of skills in conversation and composition. Reading of selected texts and authentic materials. P/NP or letter grading.

100. Advanced Tutorial Instruction in Thai. (2). Tutorial, two hours. Requisite: course 6 or Thai placement test. Tutorial and guided independent study to help students develop advanced to superior proficiency in oral and written Thai. May be repeated for credit. P/NP or letter grading.

102. Intermediate Vietnamese. (5). Lecture, two hours; discussion, three hours. Enforced requisite: course 5 with grade of C or better. Reinforcement of basic Vietnamese grammar and coverage of more advanced topics. Broadening of skills in conversation and composition. Reading of selected texts. P/NP or letter grading.

103. Intermediate Vietnamese. (5). Lecture, two hours; discussion, three hours. Enforced requisite: course 6 with grade of C or better. Reinforcement of basic Vietnamese grammar and coverage of more advanced topics. Broadening of skills in conversation and composition. Reading of selected texts. P/NP or letter grading.

104. War in Vietnamese Popular Culture. (5). Lecture, three hours; discussion, one hour. Knowledge of Vietnamese not required. Focus on popular culture produced and consumed by, or about, people in Vietnam and diasporas. Materials include theoretical and other scholarly texts, as well as literature, music, visual art, films, and comics. Reading of scholarly writings for argument, date, and methods, and learning to apply theoretical frameworks in readings and lectures to analysis of popular cultural productions. P/NP or letter grading.

Upper Division Courses

100A-100B-100C. Advanced Vietnamese. (4-4-4). Lecture, three hours. Enforced requisite: course 6 with grade of C or better or Vietnamese placement test. Designed to strengthen and build on language skills previously acquired at beginning and intermediate levels. Content-based readings and discussion, with various aspects of Vietnam, particularly its culture. Readings include both authentic original works and simplified texts. Each course may be taken independently for credit. P/NP or letter grading.
109. Advanced Tutorial Instruction in Vietnamese. (2) Tutorial, two hours. Requisite: course 5 or Vietnamese placement test. Tutorial and guided independent study to help students develop advanced to superior proficiency in oral and written Vietnamese. May be repeated for credit. P/NP or letter grading.

M155. Topics in Vietnamese Cinema and/or Literature. (4) (Same as Asian American Studies M173.) Lecture, three hours; discussion, one hour. Knowledge of Vietnamese not required. Critical and historical examination of literary and/or filmic representations connected to social practices such as empire, nation, diaspora, and globalization. Original language course materials available for interested students. P/NP or letter grading.

155FL. Readings in Vietnamese. (2) Seminar, two hours. Requisite: course M155. Additional work in Vietnamese to augment work assigned in course M155, including reading, writing, and other exercises in Vietnamese. P/NP or letter grading.

170. Variable Topics in Vietnamese Linguistics, Languages, and Cultures. (4) Lecture, three hours. Knowledge of Vietnamese may be required. Critical analysis of language and culture in Vietnam, exploring notions of Vietnam as culture area, surveying literary landscape through poetry and short stories. May be repeated for credit. P/NP or letter grading.

180A. Vietnam: History and Civilization to 1858. (4) Lecture, three hours; discussion, one hour. Recommended preparation: at least one Asian history course. Exploration of Vietnamese society and culture from origins to early 19th century, with emphasis on examination of ways in which interactions between indigenous and Chinese/Southeast Asian political and cultural forces helped shape religious, literary, and social traditions. P/NP or letter grading.

180B. Vietnam: History and Civilization, 1858 to Present. (4) Lecture, three hours; discussion, one hour. Recommended preparation: at least one Asian history or civilization course. Exploration of Vietnamese history and civilization during colonial and postcolonial eras, with emphasis on profound changes that swept through Vietnamese society during period of extended political and military conflict. P/NP or letter grading.

M186. Korea and Vietnam: Comparative Modern Histories. (4) (Same as Korean M186.) Seminar, three hours. Comparative survey of intertwined and parallel histories of Korea and Vietnam, organized chronologically, but structured around key themes that serve as basis for comparison. Modern experiences of colonized Vietnam and Korea have many significant parallels, including imposition of colonial control, relation to modernized societies within context of colonialism, and shared experiences of World War II. Both were also divided after war between communist regimes in north and strongly anticom- munist regimes in south. Each also experienced warfare after division and direct involvement of U.S. during height of cold war between 1950s and 1970s. P/NP or letter grading.

Graduate Course

297B. Topics in Contemporary Vietnamese Culture. (4) Seminar, three hours. Selected topics in Vietnamese contemporary culture, including diasporic culture, with emphasis on cultural production. Primary materials combined with theoretical readings. S/U or letter grading.

Anita Leinweber, Ph.D.

Scope and Objectives

The atmospheric and oceanic sciences present a wide variety of problems of compelling scientific interest and increasing social concern. This is exemplified by efforts to improve air quality, dependences caused by severe storms and floods, attempts to control or modify weather phenomena, problems of long-range weather forecasts, climate change, and predictions, and expanding scientific frontiers into our outer atmosphere and atmospheres of other planets.

The Department of Atmospheric and Oceanic Sciences offers a broad curriculum in dynamic and synoptic meteorology, atmospheric physics and chemistry, and upper atmosphere and space physics.

The Bachelor of Science degree qualifies students for entry-level technical positions or representatives valuable background for training in other professions. Master of Science and Ph.D. degree holders work in universities, research centers, laboratories, and government services and, increasingly, in the rapidly burgeoning private sector.

Undergraduate Study

Atmospheric, Oceanic, and Environmental Sciences B.S.

Preparation for the Major

Required: Two courses from Atmospheric and Oceanic Sciences 1/1L, 2/2L, 3/3L; Chemistry and Biochemistry 14A and 14B, or 20A and 20B; Mathematics 3A, 3B, and 3C, or 31A, 31B, 32A, 32B, 33A, and 33B; Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, and 4BL, or 6A, 6B, and 6C; Program in Computing 10A.

Students interested in pursuing graduate studies in atmospheric and oceanic sciences or obtaining employment with the National Weather Service or other government agencies are strongly urged to select the Mathematics 31A through 33B sequence and the Physics 1 sequence.

Transfer Students

Transfer applicants to the Atmospheric, Oceanic, and Environmental Sciences major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one year of calculus, one year of calculus-based physics with laboratory, one general chemistry course with laboratory for majors, and one C++ programming course.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/admission transfer.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Four courses from Atmospheric and Oceanic Sciences 101, 102, 103, 104, 105, three additional upper division atmospheric sciences courses selected in consultation with the undergraduate advisers, and two upper division courses from a list of chemistry, mathematics, physics, and statistics courses selected in consultation with the undergraduate advisers.

Students preparing for graduate studies in atmospheric chemistry should take Chemistry and Biochemistry 20B, 103, Mathematics 115A, 136, Physics 131, 132; students preparing for graduate studies in atmosphere and space physics should take Mathematics 115A, Physics 110A, 110B, M122; students preparing for graduate studies in atmospheric
Atmospheric and Oceanic Sciences Minor

The Atmospheric and Oceanic Sciences minor provides a formal vehicle for students specializing in other science fields to pursue interests in the atmospheric and oceanic environment. It is designed to be flexible, recognizing that many topics in this field cross traditional disciplinary boundaries.

To enter the minor, students must have an overall grade-point average of 2.0 or better and must make an appointment with a departmental undergraduate adviser for approval in selecting appropriate courses from within the department and related disciplines. For further information, contact the department at (310) 825-1217.

Required Courses (28 units): Seven 4-unit courses, including (1) three from Atmospheric and Oceanic Sciences M100, 101, 102, 103, 104, M105, M106, C110, C115, M120, 125, 130, 141, 145, 150, C160, C170, 180 and (2) four additional courses, two of which must be upper division, from any of the above atmospheric and oceanic sciences courses beyond the minimum four required or from Atmospheric and Oceanic Sciences 1, 2, 3, 186 (must be taken twice), Chemistry and Biochemistry 103, 110A, 110B, 113A, C113B, 114, Earth, Planetary, and Space Sciences 15, Ecology and Evolutionary Biology 109, C119A, 122, 123A or 123B, 147, 148, Mathematics 115A, 115B, 132, 135, 146, 170A, 170B, Physics 110A, 110B, 112, M122, 131, 132. Other relevant courses from related disciplines may be substituted with prior approval of the department. At least five courses approved for the minor must be upper division.

Groups of courses relevant to specific subareas of atmospheric sciences include (1) atmospheric chemistry: Atmospheric and Oceanic Sciences 104, Chemistry and Biochemistry 103, 110A, C113B, 114; (2) atmospheric and oceanic sciences 101, 104, Ecology and Evolutionary Biology 109, C119A, 122; (3) atmospheric dynamics: Atmospheric and Oceanic Sciences 101, 102, 125, Physics 112, 131, 132; (4) atmospheric dynamics and mathematical modeling: Atmospheric and Oceanic Sciences 101, 125, 180, Mathematics 115A, 115B, 132, 135, 136, 142, 146; (5) oceanography and biology: Atmospheric and Oceanic Sciences 101, 103, 104, Ecology and Evolutionary Biology 109, 123A or 123B, 147, 148; (6) upper atmosphere: Atmospheric and Oceanic Sciences 101, M120, C170, Physics 110A, 110B, M122.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

One course may be taken on a Passed/Not Passed basis; each of the other minor courses must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, course descriptions, and notices of the schools, departments, and programs.

Graduate Degrees

The Department of Atmospheric and Oceanic Sciences offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Atmospheric and Oceanic Sciences.

Atmospheric and Oceanic Sciences

Lower Division Courses

1. Climate Change: From Puzzles to Policy. (4). Lecture, three hours; discussion, one hour. Overview of fundamentals of Earth’s climate, including greenhouse effect, water and chemical cycles, outstanding features of atmospheric and ocean circulation, and feedback between different system components. Exciting and contentious scientific puzzles of climate system, including causes of ice ages, greenhouse warming, and El Niño. Importance of climate science and prediction to society, with emphasis on science’s role in identifying, qualifying, and solving environmental problems such as ozone hole and greenhouse warming. P/N or letter grading.

2. Air Pollution. (4). Lecture, three hours; discussion, one hour. Causes and effects of high concentrations of pollution in atmosphere. Topics include nature and sources of gaseous and particulate pollutants, their transport, dispersion, modification, and removal, with emphasis on atmospheric processes on scales ranging from individual sources to global effects; interaction with biosphere and oceans; stratospheric pollution. P/N or letter grading.

4. Introduction to Atmospheric Environment Laboratory. (1). Lecture, one hour. Enforced corequisite: course 3. Investigations and demonstrations supporting material in course 3, including greenhouse effect, atmosphere and ocean circulation, past, present, and future climates, and role of science in climate change politics. P/N or letter grading.

5. Climates of Other Worlds. (4). Lecture, three hours; discussion, one hour. Introduction to atmospheres of planets and their satellites in solar system using information obtained during recent planetary exploration program. Elementary description of origin and evolution of atmospheres on planets. Climates on planets, conditions necessary for evolution of life, and its resulting effect on planetary environment. P/N or letter grading.

Upper Division Courses

M100. Earth and Its Environment. (4). Same as Environment M111). Lecture, three hours. Overview of Earth as system of distinct physical, chemical, and biological processes important to environmental science. Laboratory exercises to augment lectures. Letter grading.

98. Lower Division Seminar. (4). Seminar, three hours. Variable topics; consult Schedule of Classes or department for topics to be offered in specific term. P/N or letter grading.

102. Climate Change and Climate Modeling. (4). Lecture, three hours; discussion, one hour. Enforced requisites: Mathematics 3C or 32A, Physics 1B or 6C, with grades of C or better. Global environmental issues in climate change due to human activities or natural climate variations. Options to gain an understanding of new science of climate modeling to understand and predict these changes. Physical processes in climate system. Atmospheric and oceanic circulation. El Niño and year to year climate prediction. Greenhouse effect and global warming. P/N or letter grading.

104. Fundamentals of Air and Water Pollution. (4). Lecture, three hours; discussion, one hour. Requisite: Chemistry 14B or 20B. Chemistry and physics of air and water pollution, including photochemistry, acid rain, air pollution meteorology and dispersion, groundwater and surface water pollution, chemical cycling, air/water interface, global atmospheric change. Letter grading.

M105. Introduction to Chemical Oceanography. (4), Same as Ecology and Evolutionary Biology M139.) Lecture, three hours; discussion, one hour. Introductory course for physical sciences, life sciences, and engineering majors interested in oceanic environment. Chemical composition of oceans and nature of
physical, chemical, and biological processes governing this composition in past and present. Cycles of major and minor oceanic constituents, with focus on those that are most important for life (i.e., carbon, nitrogen, phosphorus, silicon, and oxygen). Investigation of primary production, export production, remineralization, diagenesis, air-sea gas exchange processes, and internal geologic processes.

C115. Mesoscale Meteorology. (4). Lecture, three hours. Requisite: course 110. Illustrations of phenomena with talent levels ranging from 20 km to 2,000 km. Topics include polar lows, airmass thunderstorms, multicell storms, supercell tornadoes, gust fronts, downbursts, microbursts, and dry line. Discussions on design of field project. Concurrently scheduled with course C228. P/NP or letter grading.

145. Atmospheric Physics: Radiation, Clouds, and Aerosols. (4). Lecture, three hours; discussion, one hour. Requisites: Physics 1A, 1B, and 1C, or 6A, 6B, and 6C. Theory and application of atmospheric radiation, cloud physics, and atmospheric processes. Topics include radiative transport, cloud and rain formation, aerosol properties, impact of aerosol and clouds on climate. Letter grading.

150. Oceanic and Atmospheric Sciences Laboratory. (5). Lecture, one hour; laboratory, six hours. Requisites: Mathematics 3B or 31B, Physics 1B and 1C (or 6B and 6C). Many of today's environmental problems, such as stratospheric ozone hole, current rise of greenhouse gas concentrations, and various severe weather phenomena, were first discovered and investigated using accurate observational techniques. Direct experimental observations remain crucial component in today's efforts to better understand weather, climate, and pollution of atmosphere and ocean. Introduction to experimental/approaches in atmospheric and oceanic sciences. Students work in small groups to gain hands-on experience with phenomena of atmosphere and ocean, and replace development of different experiments. Introduction to underlying principles of these experimental methods and basic data analysis tools. Letter grading.

155. Introduction to Ecosystem-Atmosphere Interactions. (4). Lecture, three hours; discussion, one hour. Exchanges of energy, moisture, atmospheric trace gases, and momentum between terrestrial ecosystem, oceans, atmosphere, and hydrosphere. Feedbacks between physical environment and physiological status of plants and soils. Topics include canopy structure and function, leaf energy balance, and carbon and water fluxes between plants, soils, and atmosphere. Letter grading.

160. Remote Sensing. (4). Lecture, three hours. Requisite: Physics 1C or 6B. Theory and techniques of remote sensing, atmospheric spectroscopy, methods to remove atmospheric correction, and extinction processes; passive and active techniques; inversion methods; remote sensing of terrestrial meteorological parameters and trace constituents; remote sensing of surface and canopy transpiration; remote sensing of planes and features within the atmosphere. Concurrently scheduled with course C240B. P/NP or letter grading.

C182. Data Analysis in Atmospheric and Oceanic Sciences. (4). Lecture, three hours; laboratory, one hour. Enforced requisite: course 101 through 110 or M105. Recommended: one probability course. Overview of data analytic methods in common use in atmospheric and oceanic research. Linear models, principal components, canonical orthogonal coordinate systems (rotation), time-series analysis, and clustering methods. Model validation and evaluation, significance tests, error analysis, bias detection. Emphasis on practical applications, with specific examples from atmospheric and oceanic sciences. Concurrently scheduled with course C280. P/NP or letter grading.

186. Operational Meteorology. (2). Laboratory, six hours. Requisite: course C110. Limited to junior/se- nior Atmospheric, Oceanic, and Environmental Sciences majors. Daily contact with weather data and forecasting, satellite and radar data. Introduction to weather forecasting, satellite interpretation, marine weather, fire weather, and public use. Includes daily weather map discussions and visits to observing, radio-dioxide, and radar installations. Letter grading.

197. Individual Studies in Atmospheric and Oceanic Sciences. (2 to 4). Tutorial, to be arranged. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of work completed. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research in Atmospheric and Oceanic Sciences. (2 to 4). Tutorial, to be arranged. Limited to seniors for Mathematics/Aerosol and Oceanic and Atmospheric Sciences majors. Super- vised individual research or investigation under guid- ance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

200B. Introduction to Dynamics of Earth System. (4). Lecture, three hours. Overview of general circula- tion of atmosphere and ocean; global energy bal- ances; coupled circulations (such as el niño); meso- scale, synoptic, and tropical phenomena; boundary layers, clouds, and convection; biogeochemical cy- cles; climate variability and change. S/U or letter grading.

201C. Atmospheric and Oceanic Turbulence. (4). Lecture, three hours. Requisite: course 200A. Recom- mended: course 201A. Turbulent flows that occur on relatively small scales (<~10 km) in both atmosphere and ocean. Classical homogeneous, shear, convec- tive, and boundary-layer turbulence and its geophys- ical and engineering implications. Direct numerical simulations, and water phase changes. S/U or letter grading.

M203A. Introduction to Atmospheric Chemistry. (4). (Same as Civil Engineering M262A.) Lecture, three hours. Requisite: undergraduate Chemistry 20B. Principles of chemical kinetics, thermochromy, spectroscopy, and photochemistry; chemical compo- sition and history of Earth's atmosphere; biogeo- chemical cycles of key atmospheric constituents; basic photochemistry of troposphere and strato- sphere, upper atmosphere chemical processes; air pollution; chemistry and climate. S/U or letter grading.

M203B. Introduction to Ocean Chemistry. (4). Lecture, three hours; discussion, one hour. Principles of radiative transfer, absorption, emission, and scat- tering of solar and infrared radiation; radiation budget considerations; aerosols and cloud processes; principles of water droplet and ice crystal formation; diffusion and accretion; precipitation processes; radiative forcings of clouds/aerosols and climate feedback. S/U or letter grading.
205A. Introduction to Solar System Plasmas. (4). Lecture, three hours; discussion, one hour. Introduc-
tion to basic plasma physical processes occurring in sun, solar corona, interplanetary space, and lithosphere of planets, using simple fluid (magneto-hydrodynamic) models as well as individual particle (radiation belt dy-
namics) approach. Solar-planetary coupling pro-
ceses. Geomagnetic, auroral, Magnetospheric. Con-
currently scheduled with course C170. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

205B. Introduction to Solar-Terrestrial Physics. (4). Lecture, three hours; discussion, one hour. Solar, inter-
planetary, magnetospheric, auroral, geomagnetic phenomenological and theoretical background for studies in space physics. Contextual understanding and literacy in space physics termsi-
nology provided. S/U (for majors with consent of in-
structor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

205C. Planetary Upper Atmospheres. (4). Lecture, three hours; discussion, one hour. Aeronomy of upper atmospheres of Earth and other planets and some of their satellites—thermospheric structure and morphol-
y, circulation, and disturbances; ionospheres as collisional-ionized layers, and ionospheric and magnetospheric phenomena. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

206. Introduction to Biophysical Modeling of Land Surface Processes and Land/Air/Atmosphere Interactions. (4). (Same as Geography M206.) Lecture, two hours; laboratory, one hour; reading, one hour. Designed for graduate students. Presenta-
tion of introductory level for graduate students to current issues in projections of future anthropogenic climate change; design and use of resources from Coupled Model Intercomparison Projects (CMIPs), topics from current climate assessments including Intergovernmental Panel on Climate Change (IPCC), Issues in modeling current climate, including natural climate variability, paleoclimate, and global change under standardized scenarios for future an-
thropogenic greenhouse gases and aerosols. May be repeated for credit. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

Dynamic and Synoptic Meteorology

210. Dynamics of Planetary Circulations. (4). Lecture, three hours; requisites: course 201A. Mean at-
ospheric circulation and its low-frequency vari-
bility. Persistent anomalies and multiple flow re-
gimes. Fasciation in laboratory models of atmospheric flows and intraseasional oscillations. Wind-driven ocean circulation and its interannual vari-
bility. Hierarchical modeling of atmospheric and oce-
anic flows. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

211. Planetary Wave Dynamics and Teleconnec-
tions in Atmosphere/Ocean. (4). Lecture, three hours. Requisite: course 201C. Cloud con-
vection and the boundary layer in tropics. Clouds and mesoscale convection systems. Interac-
tion of cumulus convection with large-scale environment. Tropospheric and stratospheric meteo-
ology. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

212A. Numerical Modeling of Geophysical Fluid Dy-
namics. (4). Lecture, three hours. Requisite or coreq-
quisite: course 201A. Basic numerical methods for ini-
tial-boundary value problems in fluid dynamics, with emphasis on two-, three-dimensional ocean-
ographic problems. Finite-difference methods and truncation error. Linear and nonlinear computational instability. Computation and modeling of baroclinic instabilities. Spectral methods. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

212B. Numerical Modeling of Atmosphere I. (4). Lecture, three hours. Requisites: courses 201B, 212A. Dynamics of numerical weather prediction and cli-
mate models and their computational design. Basic, governing equations. Vertical and horizontal coordi-
nates. Quasi-geostrophic and balanced models. Shallow-water equation model. Three-dimensional primitive equation model. Quality control area modeling. S/U (for majors with consent of instructor after suc-
cessful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

212C. Numerical Modeling of Atmosphere II. (4). Lecture, three hours. Requisite: course 201C. Formu-
lization of physical processes in numerical weather pre-
diction and climate models. Planetary boundary layer processes. Turbulence closure models. Conden-
sation processes. Parameterization of moist-convective pro-
cesses. Cloudiness parameterization. Parameteriza-
tion of precipitation. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

214. Theoretical Climatic Dynamics. (4). Lecture, three hours. Radiative transfer and energy-balance models (EBMs). Multiple equilibrium climates and their stability. Coupled EBMs of atmosphere and oceans. Climatic history of our planet. Continous mechanics of ice sheets and mantle. Oscillatory models of Quaternary glaciation cycles. Transitions from equilibrium to periodic and aperiodic climate behav-
ior. Examination of relationships between ocean circulations and smaller-scale motions and atmospheric flows, convection, stably stratified flows, and geos-
trophic motions. Examination of relationships be-
tween circulation and its transport effects on general circulations. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

215. Ocean Circulation. (4). Lecture, three hours. Requisites: courses 200A, 201A. Phenomena, theory, and modeling of ocean circulations with global to re-
gional scope. Circulation types include thermohaline and wind-driven currents. Examination of relation-
ships between ocean circulations and smaller-scale motions, atmospheric climate, and biogeochemical transport. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

216A. Tropical Motions with Moist Processes. (4). Lecture, three hours; requisites: course 201C. Cu-
mulonimbus and the convection boundary layer in tropics. Cloud layers and mesoscale convection systems. Interac-
tion of cumulus convection with large-scale environment. Tropospheric and stratospheric meteo-
ology. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

al wave disturbances. Tropical 50–day oscillation. Quasi-biennial and semiannual oscillations. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

217. Mesoclimates. (4). Lecture, three hours. Global distribution of climate regimes with spatial scales smaller than 100 km. Mechanisms maintaining meso-
climates against much larger-scale atmospheric gener-
bative motion and isolation of mesoscale-ecosystem interaction. S/U or letter grading.

218. Dynamics of Atmosphere/Ocean System. (4). Lecture, three hours. Transfer of properties between atmosphere and ocean; wind-driven ocean currents; coastal upwelling. Air/sea interactions. Effects of storms on oceans at climate. S/U (for majors with consent of in-
structor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

220. Dynamics of Middle Atmosphere. (4). Lecture, three hours. Requisite: course 201A. Structure and composition of middle atmosphere. Waves in middle atmosphere, including tides, planetary waves, and gravity waves. Q. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

221. Geophysical Turbulence. (4). Lecture, three hours. Requisites: courses 200A, 201A. Phenomena, theory, and modeling of turbulence in Earth’s oceans and atmosphere—from fine structure to planetary scale motions. Regimes of turbulence and its transport effects on atmospheric and ocean behavior. Climatic predictability. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

224A. Atmospheric Turbulence. (4). Lecture, three hours. Kinematics of homogeneous and shear flow turbulences. Surface and planetary boundary layers, including heat transfer and turbulent convection. Survey of field and laboratory observations and the-
interpretation by theory. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

225. Thermodynamic Dispersion and Air Pollution. (4). (Same as Civil Engineering M262B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusiv-
ion from point, line, and areal sources. Pollutant dispersion in urban complexes; meteorological fac-
tors and air pollution potential; meteorological as-
pects of air pollution. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

227. Advanced Dynamic and Synoptic Meteorol-
y. (6). Laboratory, six hours. Requisite: course 101. Weather map analysis, thermodynamic diagrams, sat-
elite interpretation, severe weather forecasting, isen-
tropic analysis, frontogenesis, quasi-geostrophic omega equation. Concurrently scheduled with course C110. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.

228. Mesoclimatology. (4). Lecture, three hours. Requisite: course 101. Observations of phenomena with length scales ranging from 20 km to 2,000 km. Topics include polar lows, armask thunderstorms, mesoscale and supercell tornadoes, tornados, downbursts, microbursts, and dry line. Discussions on design of field project. Concurrently scheduled with course C115. S/U (for majors with consent of inst-
structor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department) or letter grading.
Atmospheric and Oceanic Sciences / 185

229. Mesoscale Modeling. (4). Lecture, three hours. Requisites: courses 201C, 222B. Numerical and analytical modeling of convective and mesoscale motions, from shallow heating sources to large complex systems. Model frameworks, assumptions, parameterizations, and solution techniques. Role of modeling efforts in understanding dynamic structure and behavior of systems. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department or letter grading).

Atmospheric Physics and Chemistry

230A. Atmospheric Chemistry I. (4). Lecture, three hours. Requisite: course 203CA. Photochemistry of troposphere; physical chemistry of surfaces and solutions; precipitation chemistry and acid rain; atmospheric organic chemistry; regional and global biogeochemical cycles; current issues in global change. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department or letter grading).

230B. Atmospheric Chemistry II. (4). Lecture, three hours. Requisite: course 230A. Photochemistry of stratosphere and mesosphere; basic ionospheric processes; stratospheric pollution and ozone layer; physical chemistry of upper atmosphere clouds and aerosols; atmospheric chemistry of planetary atmospheres; observational techniques and results. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department or letter grading).

232. Chemical Transport Modeling. (4). Lecture, three hours. Requisites: courses M203A, 230A, 230B. Equations of tracer transport and chemical kinetics model the transport of reactive tracers; dimensional; numerical techniques; coupled simulations of gas-phase and aerosol microphysics and chemistry; computational versus observational results; current problems in tracer modeling. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department or letter grading).

234A. Cloud and Precipitation Physics I. (4). Lecture, three hours. Requisite: course 233B. Microstructure of atmospheric clouds; structure of three phases of water substance, including surface effects; thermodynamic theory for equilibrium between three phases of water substance; radiative forcing and surface effects; theory of homogeneous and heterogeneous nucleation of water drops and ice crystals. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department or letter grading).

234B. Cloud and Precipitation Physics II. (4). Lecture, three hours. Requisite: course 234A. Theory of growth and evaporation of water drops and ice crystals by diffusion of water vapor; hydrodynamics of rigid bodies in viscous medium; hydrodynamics of cloud drops, rain drops, and atmospheric ice particles; growth of cloud drops and atmospheric ice particles by collision. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department or letter grading).

M235. Ocean Biogeochemical Dynamics and Climate. (4). (Same as Ecology and Evolutionary Biology M238.) Lecture, three hours. Interaction of ocean biogeochemical cycles with climate, with emphasis on practical applications, with specific examples from oceanic, ice sheets and marine ice, lithosphere and mantle. Climatic impact of changes in constant solar, insolation, and volcanic eruptions. Radiative forcing in global climate models: clouds and aerosols. Role of radiation in numerical simulation of interannual variability. S/U or letter grading.

Upper Atmosphere and Space Physics

250A. Solar System Magnetohydrodynamics. (4). Lecture, three hours. Requisite: course C220A, Derivation of MHD equations with two fluid aspects, generalization of Ohm’s law, small amplitude waves, discontinuities, shock waves, and instabilities. Applications to statics and dynamics of solar wind and planetary magnetospheres and to solar wind/magnetosphere/ionosphere coupling. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department or letter grading).

250B. Solar System Microscopic Plasma Processes. (4). Lecture, three hours. Requisite: course C250A. Adiabatic charged particle dynamics; incoherent radiation from large scale effects on plasma; propagation characteristics of electrostatic and electromagnetic waves; introduction to resonant interaction between charged particles and plasma waves. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department or letter grading).

256. Ionospheric Electrodynamics. (4). Lecture, three hours. Ionospheric structure, currents, and electric fields; equatorial and high-latitude ionospheres; ionospheric control of magnetospheric phenomena. S/U (for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department or letter grading).

C260. Data Analysis in Atmospheric and Oceanic Sciences. (4). Lecture, three hours; laboratory, one hour. Enforced requisites: one course from 101 through M105. Overview of data analytic methods in common use in atmospheric and oceanic research. Linear models, principal component analysis (empirical orthogonal function), time-series analysis, and clustering methods. Model validation and evaluation, significance tests, error analysis, bias detection. Emphasis on practical applications, with specific examples from atmospheric and oceanic sciences. Concurrently scheduled with course C182. S/U or letter grading.

Special Studies

270. Seminar: Atmospheric Sciences. (2). Seminar, one hour. May be repeated for credit. S/U or letter grading.

271. Seminar: Atmospheric Dynamics. (2). Seminar, one hour. May be repeated for credit. S/U or letter grading.

M272A–M272B–M272C. Seminars: Climate Dynamics. (2 to 4 each). (Same as Earth, Planetary, and Space Sciences M270A-M270B-M270C.) Seminar, two hours. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout geological past. Rheology and dynamics of climatic subsystems; ocean circulation, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

273. Seminar: Atmospheric Physics. (2). Seminar, one hour. May be repeated for credit. S/U or letter grading.

274. Seminar: Atmospheric Chemistry. (2). Seminar, one hour. May be repeated for credit. S/U or letter grading.

276. Seminar: Mesoscale Processes. (2), Seminar, one hour. Selected topics of current research interest in convection, extratropical cyclones, and fronts. May be repeated for credit. S/U or letter grading.

277. Seminar: Coastal Ocean. (2), Seminar, one hour. Selected topics of current interdisciplinary research in marine and coastal sciences, including physical oceanography, biogeochemistry, marine biology, coastal engineering, atmospheric processes, and health-related issues. May be repeated for credit. S/U grading.

281. Special Topics in Dynamic Meteorology. (2 to 4), Lecture, two hours. Individual meetings with instructor to be arranged. Content varies from year to year. S/U or letter grading.

282. Special Topics in Oceanography. (2 to 4), Lecture, two hours. Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

283. Special Topics in Atmospheric Physics. (2 to 4), Lecture, two hours. Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

284. Special Topics in Atmospheric Chemistry. (2 to 4), Lecture, two hours. Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

285. Special Topics in Solar Planetary Relations. (2 to 4), Lecture, two hours. Individual meetings with instructor to be arranged. Selected topics of current research interest in solar-wind, magnetospheric, or ionosphere physics. S/U or letter grading.

296A–296L. Advanced Topics in Atmospheric Sciences. (2 each), Discussion, two hours. Advanced study and analysis of current topics in atmospheric sciences. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading:

296A. Numerical Modeling of Atmosphere.
296B. Boundary Layers, Clouds, and Climate.
296C. Numerical Mesoscale Modeling.
296D. Climate Dynamics.
296E. Numerical Modeling of Atmosphere and Ocean.
296F. Hierarchical Modeling of Ocean/Atmosphere System.
296G. Upper Atmosphere and Space Physics.
296H. Recent Advances in Atmospheric Chemistry.
296I. Upper Atmospheric Dynamics.
296J. Experimental Mesoscale Meteorology.
296K. Tropical Meteorology.
296L. Geophysical Fluid Dynamics, Oceanography, and Climate.
296M. Radiation and Remote Sensing.
296N. Tropospheric Chemistry and Climate Modeling and Analysis.
296P. Atmospheric Chemistry of Air Pollution, Aerosols, and Climate.

375. Teaching Apprentice Practicum. (1 to 4), Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Teaching Atmospheric and Oceanic Sciences. (2), Seminar, one hour; two-day intensive training session prior to Fall Quarter. Required of all new teaching assistants and recommended for new Ph.D. students and graduate students intending to be teaching assistants during academic year. Introduction to classroom teaching for general education and upper division departmental courses. Topics include pedagogical techniques, preparation, academic integrity, and integration of technology and electronic communications. S/U grading.

596. Directed Studies for Graduate Students. (2 to 8), Tutorial, to be arranged. S/U grading.

597. Preparation for M.S. Comprehensive Examination. (2 to 8), Tutorial, to be arranged. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 8), Tutorial, to be arranged. S/U grading.

Benjamin M. Wu, D.D.S., Ph.D., Chair
Daniel T. Kamei, Ph.D., Vice Chair

**Professors**

Denise Aberle, M.D.
Mark S. Cohen, Ph.D., D.B.A., in Residence
Ian Cook, Ph.D., in Residence
Linda L. Demer, M.D., Ph.D.
Timothy J. Deming, Ph.D.
James C. Dunn, M.D., Ph.D.
Robin L. Garrett, Ph.D.
Warren S. Grundfest, M.D., FACS
Chih-Ming Ho, Ph.D. (Ben Rich Lockheed Martin Professor of Aeronautics)
Dean Ho, Ph.D.
Bahram Jafari, Ph.D.
Chang-Jin Kim, Ph.D.
Deibiao Li, Ph.D., in Residence
James C. Liao, Ph.D. (Ralph M. Parsons Foundation Professor of Chemical Engineering)
Wentai Liu, Ph.D.
Aydogan Ozcan, Ph.D.
Kalyanam Shivkumar, M.D., Ph.D., in Residence
Ren Sun, Ph.D.
Yi Tang, Ph.D.
Michael A. Teitel, Ph.D.
Cun-Yu Wang, D.D.S., Ph.D.
Gerard C.L. Wong, Ph.D.
Benjamin M. Wu, D.D.S., Ph.D.
Yang Yang, Ph.D.

**Professor Emeritus**

Edward R.B. McCabe, M.D., Ph.D. (Mattel Executive Endowed Professor Emeritus of Pediatrics)

**Associate Professors**

Pei-Yu Chiou, Ph.D.
Chi On Chui, Ph.D.
Dino Di Carlo, Ph.D.
Daniel B. Ennis, Ph.D., in Residence
Daniel T. Kamei, Ph.D.
Jacob J. Schmidt, Ph.D.

**Assistant Professors**

Andrea M. Kasko, Ph.D.
Stephanie K. Seidlits, Ph.D.

**Adjunct Professor**

Howard Winet, Ph.D.

**Adjunct Associate Professor**

Bill J. Tawil, M.B.A., Ph.D.

**Adjunct Assistant Professors**

Kayan Niazi, Ph.D.
Thomas A. Zangle, Ph.D.

**Scope and Objectives**

Faculty members in the Department of Bioengineering believe that the interface between biology and engineering is an exciting area for discovery and technology development in the twenty-first century. They have developed an innovative curriculum and created state-of-the-art facilities for cutting-edge research.

The bioengineering program is structured offering of unique forward-looking courses dedicated to producing graduates who are well-grounded in the fundamental sciences and highly proficient in rigorous analytical engineering tools necessary for lifelong success in the wide range of possible bioengineering careers. Combined with a strong emphasis on research, the program provides a unique engineering educational experience that responds to the growing needs and demands of bioengineering.

**Undergraduate Study**

The bioengineering program is accredited by the Engineering Accreditation Commission of ABET. See http://www.abet.org.

The Bioengineering major is a designated capstone major. Utilizing knowledge from previous courses and new skills learned from the capstone courses, undergraduate students work in teams to apply advanced knowledge of mathematics, science, and engineering principles to address problems at the interface of biology and engineering and to develop innovative bioengineering solutions to meet specific sets of design criteria. Coursework entails construction of student designs, project updates, presentation of projects in written and oral format, and team competition.

**Bioengineering B.S. Capstone Major**

**Preparation for the Major**

**Required:** Bioengineering 10; Chemistry and Biochemistry 20A, 20B, 20L, 30A, 30AL, 30B; Civil and Environmental Engineering M20 or Computer Science 31 or Mechanical and Aerospace Engineering M20; Life Sciences 2 (satisfies HSSEAS GE life sciences requirement), 3, 23L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL.

**The Major**

Students must complete the following courses:

1. Bioengineering 100, 110, 120, 165EW (or Engineering 183EW or 185EW), 167L, 176, 180, Electrical Engineering 100; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; two capstone design courses (Bioengineering 177A, 177B)

2. Two major field elective courses (8 units) from Bioengineering C101, C106, C131, C155, M260 (a petition is required for M260)
Upper Division Courses

CM102. Human Physiological Systems for Bioengineering I. (4). (Formerly numbered Biomedical Engineering C102.) (Same as Physiology Science C102.) Lecture, three hours; discussion, one hour; laboratory, two hours. Preparation: human molecular biology, biochemistry, and cell biology. Not open for credit to Physiology Science majors. Broad overview of basic biological activities and processes in human systems. (organ/tissue) to system basis, with particular emphasis on molecular basis. Modeling/simulation of functional aspects of biological systems included. Actual demonstration of physiological systems, as well as visits to biomedical facilities. Concurrently scheduled with course CM202. Letter grading.

CM103. Human Physiological Systems for Bioengineering II. (4). (Formerly numbered Biomedical Engineering C103.) (Same as Physiology Science C103.) Lecture, three hours; laboratory, two hours. Preparation: human molecular biology, biochemistry, and cell biology. Not open for credit to Physiology Science majors. Molecular-level understanding of human anatomy and physiology in selected organ systems (digestive, skin, musculoskeletal, endocrine, immune, urinary, reproductive). System-specific modeling/simulation of wound healing, muscle mechanics and energetics, acid-base balance, excretion. Functional basis of biomedical instrumentation (dialysis, artificial skin, pathogen detectors, ultrasound, magnetic resonance). Concurrently scheduled with course C203. Letter grading.

C104. Physical Chemistry of Biomacromolecules. (4). (Formerly numbered M104.) Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: Chemistry 20A, 20B, 20A, Life Sciences 2, 3, 23L. To understand biological materials and design synthetic replacements, it is imperative to understand their physical chemistry. Biomacromolecules such as protein or DNA can be analyzed and characterized by applying fundamentals of polymer physical chemistry. Investigation of polymer structure and conformation, bulk and solution thermodynamics and phase behavior, polymer networks, and viscoelasticity. Application of engineering principles to problems involving biomacromolecules such as protein conformation, solvation of charged species, and separation and characterization of biomacromolecules. Concurrently scheduled with course C204. Letter grading.

C105. Engineering of Bioconjugates. (4). (Formerly numbered M105.) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: Chemistry 20A, 20B, 20L. Highly recommended: one organic chemistry course. Bioconjugate chemistry is science of coupling biomolecules for wide range of applications. Diagonostics may be coupled to one surface in gene chip, or one protein may be coupled to one polymer to enhance its stability in serum. Wide variety of bioconjugates are used in delivery of pharmaceuticals, in sensors, in medical diagnostics, and in tissue engineering. Basic concepts of chemical ligation, including choice and design of conjugate linkers depending on type of biomolecule and desired application, such as degradable vehicles, nondegradable linkers, and discussion of design and synthesis of synthetic bioconjugates for some sample applications. Concurrently scheduled with course C205. Letter grading.

C106. Topics in Bioengineering. (4). (Formerly numbered M106.) Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisites: Chemistry 20B, Life Sciences 2, 3, 23L, Mathematics 32B, 107B. Coverage in depth of physical processes associated with biological membranes and channel proteins, with specific emphasis on electrophysiology. Basic principles governing electrodynamics in dielectric media, building on complexity to ultimately address action potentials and signal propagation in nerves. Topics include Nernst/Planck and Poisson/Boltzmann equations, Nernst potential, Donnann equilibrium, GHK equations, energy barriers in ion channels, cable equation, action potentials, Hodgkin/Huxley equations, impulse propagation, axon geometry and conduction, electrodlectic integration. Concurrently scheduled with course C206. Letter grading.

C107. Polymer Chemistry for Bioengineers. (4). (Formerly numbered M107.) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: course C104 or C105. Fundamental concepts of polymer synthesis, including step-growth, chain growth (ionic, radical, metal catalyzed), and ring-opening, with focus on factors that can be used to control molecular weight, chain-end functionality, chain copolymerization, and stereochemistry in polymerizations. Presentation of applications of use different polymerization techniques. Concepts of synergetic growth, ring-opening, and coordination polymerization, and effects of synthesis route on polymer properties. Lectures include both theory and practical issues demonstrated through examples. Concurrently scheduled with course C207. Letter grading.

110. Biortransplant and Bioreaction Processes. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: course 100, Mathematics 32B. Introduction to analysis of fluid flow, heat transfer, mass transfer, binding events, and biochemical reactions in systems of interest to bioengineers, including cells, tissues, organs, human body, extracorporeal devices, tissue engineering systems, and bioartificial organs. Introduction to pharmacokinetic analysis. Letter grading.

C131. Nanopore Sensing. (4). (Formerly numbered M131.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 100, 120, Life Sciences 2, 3, 23L, Physics 1A, 1B, 1C. Analysis of sensors based on measurements of fluctuating ionic conductance through artificial or protein nanopores. Physics of pore conductance. Application to single molecule detection, DNA sequencing. Review of current literature and technological applications. History and instrumentation of resistive pulse sensing, theory and instrumentation of electrical measurements in electrolytes, nanopore fabrication, ionic conductance through pores and GHK equation, patch clamp and single channel measurements and instrumentation, noise issues, protein engineering, molecular basis of DNA sequencing, DNA sequencing through nanopore, and future directions of field. Concurrently scheduled with course C231. Letter grading.
C139A. Biomolecular Materials Science I. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Overview of chemical and physical foundations of biomolecular materials science that concern materials aspects of molecular biology, cell biology, and bioengineering. Understanding of different basic types of biomolecules, including proteins, nucleic acids, carbohydrates, lipids, and lipoproteins. Application of these ideas using examples from bioengineering and biomedical engineering. May be taken independently for credit. Concurrently scheduled with course C239A. Letter grading.

C139B. Biomolecular Materials Science II. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Course C139A is not required to take C139B. Overview of chemical and physical foundations of biomolecular materials science that concern materials aspects of molecular biology, cell biology, and bioengineering. Understanding of different basic types of biomolecules, including proteins, nucleic acids, carbohydrates, lipids, and lipoproteins. Application of these ideas using examples from bioengineering and biomedical engineering. May be taken independently for credit. Concurrently scheduled with course C239A. Letter grading.

CM140. Introduction to Biomechanics. (4). (Formerly numbered Biomedical Engineering CM140.) (Same as Mechanical and Aerospace Engineering CM140.) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: Mechatronics and Robotics CM102, Fluid Mechanics APME 101, and APME 156A or 166A. Introduction to biomechanics as a broad field of study that concerns the mechanical properties of living systems. Focus on the physics of human systems and the use of engineering principles to understand and design prostheses. Preparation of drawings and consideration of design, manufacture, and testing of biomedical devices. Examination of complex procedures to current biomedical engineering research and development of tissue-engineering devices. Concurrently scheduled with course C247. Letter grading.

CM150. Introduction to Micromachining and Microelectromechanical Systems (MEMS). (4). (Formerly numbered Biomedical Engineering CM150.) (Same as Electrical Engineering CM150L and Mechanical and Aerospace Engineering CM150L.) Lecture, two hours; discussion, one hour; outside study, seven hours. Enforced requisites: course CM150L, Physics 20A, 20L, and Chemistry 1A, 1B, 1C, 4AL, 4BL. Introduction to micromachining technologies and microfabrication (MEMS). Methods of micromachining and how these methods can be used to produce variety of MEMS, including microstructures, microsystems, and microactuators. Students go through process of fabricating MEMS devices. Concurrently scheduled with course CM250A. Letter grading.

C155. Fluid-Particle and Fluid-Structure Interactions in Micromachined Flow Problems. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: course 110. Introduction to Navier/Stokes equations, assumptions, and simplifications. Analytical and numerical techniques for calculating simple flows and numerical methods to solve and gain intuition for complex flows. Forces on particles in Stokes flow and finite-inertia flows. Flows induced around particles with and without finite inertia and implications for particle-particle interactions. Secondary flows induced by structures and particles in confined flows. Particle separations by fluid dynamic forces: field-flow fractionation, inertial focusing, and structure-induced separations. Application concepts in internal biological flows and separations for biotechnology. Helps students become sufficiently fluent with fluid mechanics vocabulary to take more advanced courses in micromachined biofluidic systems to manipulate fluids, cells, and particles, and develop strong intuition for how fluid and particles behave in arbitrarily structured microchannels over range of scales. Concurrently scheduled with course CM255. Letter grading.

165EW. Bioengineering Ethics. (4). Lecture, four hours; discussion, three hours; outside study, five hours. All professions have ethical rules that derive from moral theory. Bioethics is well-established discipline that addresses ethical problems of the field. Enforced requisites: courses 167L, 176. Lectures, seminars, and project management. Working in teams, students complete research projects. Exploration of different experimental and clinical research designs, intellectual property, entrepreneurship, regulatory requirements, and project management. Working in teams, students complete research projects. May be taken independently for credit. Concurrently scheduled with course CM245. Letter grading.

C147. Applied Tissue Engineering: Clinical and Industrial Perspective. (4). (Formerly numbered Biomedical Engineering CM147.) Lecture, three hours; discussion, two hours; outside study, seven hours. Emphasis on research and writing within engineering environments. Preparation of drawings and consideration of design, manufacture, and testing of biomedical devices. Examination of complex procedures to current biomedical engineering research and development of tissue-engineering devices. Concurrently scheduled with course CM147. Letter grading.

C172. Design of Minimally Invasive Surgical Tools. (4). (Formerly numbered M172.) Lecture, three hours; discussion, two hours; outside study, seven hours. Required: course 110. Introduction to Navier/Stokes equations, assumptions, and simplifications. Analytical and numerical techniques for calculating simple flows and numerical methods to solve and gain intuition for complex flows. Forces on particles in Stokes flow and finite-inertia flows. Flows induced around particles with and without finite inertia and implications for particle-particle interactions. Secondary flows induced by structures and particles in confined flows. Particle separations by fluid dynamic forces: field-flow fractionation, inertial focusing, and structure-induced separations. Application concepts in internal biological flows and separations for biotechnology. Helps students become sufficiently fluent with fluid mechanics vocabulary to take more advanced courses in micromachined biofluidic systems to manipulate fluids, cells, and particles, and develop strong intuition for how fluid and particles behave in arbitrarily structured microchannels over range of scales. Concurrently scheduled with course CM271. Letter grading.

C177. Bioengineering Capstone Design I. (4). (Formerly numbered 182B.) Lecture, two hours; laboratory, six hours; outside study, four hours. Required: courses 167L, 176. Lectures, seminars, and discussions on topics of biomedical device and therapeutic design, including topics such as need finding, intellectual property, entrepreneurship, regulation, and project management. Working in teams, students develop innovative solutions to current problems in medicine and biology. Sourcing and ordering of materials and supplies relevant to student projects. Exploration of different experimental and computational methods. Scientific presentation of progress. Letter grading.

C178. Bioengineering Capstone Design II. (4). (Formerly numbered 182C.) Lecture, two hours; laboratory, six hours; outside study, four hours. Required: introduction to tissue engineering and biocompatibility. Course for physical sciences, life sciences, and engineering majors. Introduction to optical spectroscopy principles, design of spectroscopic measurement devices, optical properties of tissues, and fluorescence and biocomputing. Concurrently scheduled with course CM272. Letter grading.
students with computational and systems biology interests. Presentations by individual UCLA researchers discussing their active computational and systems biology research laboratory. Analysis of concepts related to both modeling and experimentation of endocytosis and intracellular trafficking mechanisms. Analysis of diffusion of drugs, coupled with computational and engineering mathematics approaches. Concurrently scheduled with course C101. Letter grading.

CM202. Human Physiological Systems for Bioengineering II. (4). (Formerly numbered Biomedical Engineering C202.) (Same as Physiology Science CM202.) Lecture, three hours; laboratory, two hours. Preparation: human molecular biology, biochemistry, and cell biology. Not open for credit to Physiology Science majors. Broad overview of basic biological activities and organization of human body in system (organ/tissue) to system basis, with particular emphasis on molecular basis. Modeling/simulation of functional aspect of biological system included. Actual demonstration of biomedical instruments, as well as visits to biomedical facilities. Concurrently scheduled with course CM102. Letter grading.

CM204. Topics in Bioelectricity for Bioengineers. (4). (Formerly numbered Biomedical Engineering C204.) Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: Chemistry 20A, 20B, 20L. Highly recommended: one organic chemistry course. Bioconjugate chemistry is science of coupling biomolecules such as protein or DNA can be analyzable functional. Principles for designing and understanding delivery of genes and drug conjugates. New therapeutics require comprehensive understanding of complex biological systems and drug release. Introduc- tion to host cellular response to biomaterials: vascular response, inter- face, and clotting, biocompatibility, animal models, in- flammation, infection, human microarray, microarray technology, and role of mechanical forces. Concurrently scheduled with course C207. Letter grading.

CM205. Topics in Bioelectricity for Bioengineers. (4). (Formerly numbered Biomedical Engineering C205.) Lecture, three hours; discussion, one hour; outside study, seven hours. Enforced requisites: Chemistry 20A, 20B, 20L. Highly recommended: one organic chemistry course. Bioconjugate chemistry is science of coupling biomolecules such as protein or DNA can be analyzable functional. Principles for designing and understanding delivery of genes and drug conjugates. New therapeutics require comprehensive understanding of complex biological systems and drug release. Introduc- tion to host cellular response to biomaterials: vascular response, inter- face, and clotting, biocompatibility, animal models, in- flammation, infection, human microarray, microarray technology, and role of mechanical forces. Concurrently scheduled with course C207. Letter grading.

CM206. Topics in Bioelectricity for Bioengineers. (4). (Formerly numbered Biomedical Engineering C206.) Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisites: Chemistry 20A, 20B, 20L. Highly recommended: one organic chemistry course. Bioconjugate chemistry is science of coupling biomolecules such as protein or DNA can be analyzable functional. Principles for designing and understanding delivery of genes and drug conjugates. New therapeutics require comprehensive understanding of complex biological systems and drug release. Introduc- tion to host cellular response to biomaterials: vascular response, inter- face, and clotting, biocompatibility, animal models, in- flammation, infection, human microarray, microarray technology, and role of mechanical forces. Concurrently scheduled with course C207. Letter grading.
C207. Polymer Chemistry for Bioengineers. (4). (Formerly numbered Biomedical Engineering C207.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course C204 or C205. Fundamental concepts of polymer synthesis, including step-growth, chain-growth (ionic, radical, metal-catalyzed), and ring-opening, with focus on factors that can be used to control chain length, chain length distribution, and chain-end functionality, chain copolymerization, and stereochemistry in polymerizations. Presentation of applications of use of different polymerization techniques. Concepts of step-growth, chain-growth, ring-opening, and coordination polymerization, and effects of synthesis route on polymer properties. Lectures include both theory and practical issues demonstrated through examples. Concurrently scheduled with course C106. Letter grading.

M215. Biochemical Reaction Engineering. (4). (Formerly numbered Biomedical Engineering M215.) Lecture, four hours; discussion, one hour. For graduate students. Provided for credit for undergraduate students with permission of departmental adviser. Introduction to basic concepts related to networking at several levels: low-level (TCP/IP services), medium-level (network topologies), and high-level (distributed computing, Web-based services) implementations. Common medical ontologies, coding schemes, and standardized indices/terminologies (SNOMED, UMLS). Letter grading.

M221. Human Anatomy and Physiology for Medical Imaging Informatics. (4). (Formerly numbered Biomedical Engineering 221.) Lecture, four hours; discussion, eight hours. Requisite: course 220A. Overview of human anatomy and physiology, with particular emphasis on understanding and visualization of anatomy and physiology through medical images. Topics relevant to acquisition, representation, and visualization of medical knowledge in computerized clinical applications. Topics include heart, cardiac, neurology, gastrointestinal/generative, endocrine, and musculoskeletal systems. Emphasis on understanding and visualization of anatomy and physiology. Letter grading.

M222A-222B-222C. Laboratory Programs for Medical Imaging Informatics 1, II, III (4-4-4). (Formerly numbered Biomedical Engineering M222A-222B-222C.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 221C. Laboratory programs to support coursework in other medical imaging informatics core curriculum courses. Exposure to programming concepts for medical applications, with focus on basic abstraction techniques used in image processing and medical information system infrastructures. Letter grading. Requisite: course 221B. Requisite: Computer Science 31, 32, Program in Computing 20A, 20B. Course 222A is required to be taken with course 221A. Credit is not allowed for both courses 222A and 222B. Course 222B is required to be taken with course 221B. Comparisons of algorithms for correlation, and chain growth (ionic, radical, metal-catalyzed, and ring-opening, with focus on factors that can be used to control chain length, chain length distribution, and chain-end functionality, chain copolymerization, and stereochemistry in polymerizations. Presentation of applications of use of different polymerization techniques. Concepts of step-growth, chain-growth, ring-opening, and coordination polymerization, and effects of synthesis route on polymer properties. Lectures include both theory and practical issues demonstrated through examples. Concurrently scheduled with course C106. Letter grading.

M223. Physics and Informatics of Medical Imaging. (4). (Formerly numbered Biomedical Engineering C231.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 221A. Overview of information retrieval technology and applications in medical informatics. Topics include signal generation, localization, and quantization. Image representation and analysis techniques such as Markov random fields, spatial characterization (atlasses), denoising, energy representation, and clinical imaging workstation design. Provides basic understanding of issues related to basic image formation (e.g., perception, presentation). Review of current literature and technological applications. History and instrumentation of resistive pulse sensors, telemetry, and instrumentation of electrical measurements in electro-
lytes, nanopore fabrication, ionic conductance through pores and GHRK equation, patch clamp and single channel measurements and instrumentation, noise, dendrites, permeability, molecular sensor, DNA sequencing, membrane engineering, and future directions of field. Concurrently scheduled with course C131. Letter grading.

233A. Developing and Implementing Medtech Solutions. (4). Lecture, three hours; discussion, three hours; outside study, six hours. Enforced requisite: course 233A. Designed for graduate and professional students in engineering, dentistry, and medicine to develop and implement new medtech devices that increase quality of clinical care and result in improved patient outcomes in hospital system. Introduction to intellectual property basics and various medtech business models. Letter grading.

233B. Advancing Biomechanics innovations: Devel-опment and Integration of Micromechanical Systems (4). Lecture, three hours; outside study, nine hours. Enforced requisite: course 233A. Designed for graduate and professional students in engineering, dentistry, and medicine to develop and implement new medtech devices for unmet clinical needs previously identified in course 233A. Steps necessary to commercialize viable medtech solutions. Exploration of concept selection, business plan development, intellectual property filing, financing strategies, and device prototyping. Letter grading.

C239A. Biomolecular Materials Science I. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Overview of chemical and physical foundations of biomolecular materials science that concern materials aspects of molecular biology, cell biology, and physiology. Understanding of different types of interactions that exist between biomolecules, such as van der Waals interactions, tetramodulated electrostatic interactions, hydrophobic interactions, hydration and solvation interactions, polymer-mediated interactions, depletion interactions, molecular recognition, and others. Illustration of these ideas using examples from bioengineering and biomedical engineering. Students should be able to make simple calculations and estimates that allow them to engage broad spectrum of bioengineering problems, such as those in drug and gene delivery and tissue engineering. May be taken independently for credit. Concurrently scheduled with course C239B. Letter grading.

C239B. Biomolecular Materials Science II. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Topics include biophysical properties of biological materials, structure and operation. Emphasis on engineering design and development of tissue-engineering devices. Concurrently scheduled with course C2147. Letter grading.

M248. Introduction to Biological Imaging. (4). Formerly numbered Biomedical Engineering M248.) (Same as Biomedical Physics M248 and Pharmacology M248.) Lecture, four hours; laboratory, five hours; outside study, seven hours. Exploration of role of biological imaging in modern biology and medicine, including imaging physics, instrumentation, image processing, and applications of imaging for range of modalities. Practical experience provided through series of imaging laboratories. Letter grading.

CM250A. Introduction to Micromachining and Microelectromechanical Systems (MEMS). (4). Formerly numbered Biomedical Engineering CM250A.) (Same as Electrical Engineering CM250A and Mechanical and Aerospace Engineering CM250A.) Lecture, four hours; discussion, one hour; outside study, seven hours. Topics include biophysical properties of biological materials, structure and operation. Emphasis on engineering design and development of tissue-engineering devices. Concurrently scheduled with course C2147. Letter grading.

M250B. Microelectromechanical Systems (MEMS) Fabrication. (4). Formerly numbered Biomedical Engineering M250B.) (Same as Electrical Engineering M250B and Mechanical and Aerospace Engineering M250B.) Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisite: course CM150 or CM250A. Advanced discussion of micromachining processes for MEMS. Overview of many lithographic, deposition, and etching processes, as well as their combination in process integration. Materials issues such as chemical resistance, corrosion, mechanical properties, and residual intrinsic stress. Letter grading.

CM250L. Introduction to Micromachining and Microelectromechanical Systems (MEMS) Labaro- ratory. (4). Formerly numbered Biomedical Engineering CM250L.) (Same as Electrical Engineering CM250L and Mechanical and Aerospace Engineering CM280L.) Lecture, one hour; laboratory, four hours; outside study, one hour. Requisites: course CM250A, Chemistry 20A, 20L, Physics 1A, 1B, 1C, 1L, 4BL, 4BH.

Hands-on introduction to micromachining technologies and microelectromechanical systems (MEMS) laboratory. Methods of micromachining and how these methods can be used to produce varieties of MEMS, including microstructures, microsensors, and microactuators. Students go through process of fabricating MEMS device. Concurrently scheduled with course CM150L. Letter grading.

M260. Neuroengineering. (4). Formerly numbered Biomedical Engineering M260.) (Same as Neuroscience Engineering M255 and Neuroscience M260.) Lecture, four hours; laboratory, three hours; outside study, five hours. Requisites: Mathematics 32A, Physics 1B or 6B. Introduction to principles and technologies of bio- electricity and neural signal recording, processing, and stimulation. Topics include bioelectricity, electrophysiology (action potentials, local field potentials, EEG, EOG), intracellular and extracellular recording, microelectrode technology, neural signal processing (neural signal frequency bands, filtering, spike detection, spike sorting, stimulus artifact removal), brain-machine interfaces, and prosthetics. Letter grading.

M263. Neuroanatomy: Structure and Function of Nervous System. (4). Formerly numbered Biomedical Engineering M263.) (Same as Neuroscience M263.) Lecture, three hours; discussion/laboratory.
three hours. Anatomy of central and peripheral nervous system at cellular histological and regional systems level, with emphasis on contemporary experimental approaches to morphological, neurochemical and macroscopic techniques for characterizing structure and properties of biomaterial interfaces, and methods for designing and fabricating biomaterials with prescribed structure and properties in vitro and in vivo. Letter grading.

C283. Targeted Drug Delivery and Controlled Drug Release. (4). (Formerly numbered Biomedical Engineering C283.) Lecture, four hours; outside study, seven hours. Requisites: Chemistry 20A, 20B, 20L. New therapeutics require comprehensive understanding of modern biology, physiology, pharmacology, targeted delivery of drugs and controlled release are important in treatment of challenging diseases and relevant to tissue engineering and regenerative medicine. Drug pharmacodynamics and clinical pharmacokinetics. Application of engineering principles (diffusion, transport, kinetics) to problems in drug formulation and delivery to establish rationale for design and development of novel drug delivery systems that can provide spatial and temporal control of drug release. Introduction to biomaterials with specialized structural and interfacing properties. Exploration of both chemistry of materials and physical presentation of devices and components used in delivery and release. Concurrently scheduled with course C183. Letter grading.

C284. Functional Neuroimaging: Techniques and Applications. (4). (Formerly numbered Biomedical Engineering M284.) (Same as Biomedical Physics M285, Neuroscience M285, Psychiatry M285, and Psychology M272.) Lecture, three hours. In-depth examination of principles and physical properties of functional MR imaging, PET, SPECT and electrophysiological methods, data acquisition and analysis, experimental design, and results obtained thus far in human systems. Strong focus on understanding neural and systems interactions in the brain, imaging paradigms, and how to interpret results. Laboratory visits and design and implementation of functional MRI experiment. S/U or letter grading.

C295. Introduction to Tissue Engineering. (4). (Formerly numbered Biomedical Engineering C295.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: course CM102 or CM202, Chemistry 20A, 20B, 20L. Tissue engineering applies principles of biology and physical sciences with engineering approach to regenerate tissues and organs. Guiding principles for proper selection of three basic components for tissue engineering: cells, scaffolds, and molecular signals. Concurrently scheduled with course C185. Letter grading.

CM286. Computational Systems Biology: Model ing and Simulation of Biological Systems. (5). (Formerly numbered Biomedical Engineering CM296E.) (Same as Computer Science CM286.) Lecture, four hours; laboratory, three hours; outside study, eight hours. Corequisites: Electrical Engineering 102. Dynamic systems modeling and computer simulation methods for studying biological/biomedical processes and systems at multiple levels of organization. Control system, multiparameter, predator-prey, pharmacokinetic (PK), pharmacodynamic (PD), and other structural modeling methods applied to life sciences problems at molecular, cellular (biochemical pathways/networks), organ, and organismic levels. Both theory and numerical simulation results. Focus on translating biomodeling goals and data into mathematical models and implementing them for simulation and analysis. Basics of numerical simulation algorithms, with model development in Matlab and PC laboratory assignments. Concurrently scheduled with course CM186. Letter grading.

CM287. Research Communication in Computational and Systems Biology. (2 to 4). (Formerly numbered Biomedical Engineering CM287.) Lecture, four hours; outside study, eight hours. Requisite: course CM286. Closest directed, interactive, and real research experience in active quantitative systems biology research laboratory. Direction on how to focus on topics of current relevance in scientific community, appropriate to student interests and capabilities. Critiques of oral presentations and written progress reports explain how to proceed with search for research results. Major emphasis on effective research reporting, both oral and written. Concurrently scheduled with course CM186. Letter grading.

C295A. Biomaterial Research.

C295B. Biomaterials and Tissue Engineering Research.

C295C. Biomimetic System Research.

C295D. Minimally Invasive and Laser Research.

C295E. Hybrid Device Research.

C295F. Molecular Cell Biomechanics Research.

C295G. Biopolymer Materials and Chemistry.

C295H. Biomicrofluidics and Bionanotechnology Research.

C295I. Biomimetic System Research.

CM296A. Advanced Modeling Methodology for Dynamic Biomedical Systems. (4). (Formerly numbered Biomedical Engineering M296A.) (Same as Computer Science M296A and Medicine M270C.) Lecture, four hours; outside study, eight hours. Requisites: Electrical Engineering 141 or 142 or Mathematics 115A or Mechanical and Aerospace Engineering 171A. Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems. Control system, multiparametal, nonparametal, and input/output models, linear and nonlinear. Emphasis on model applications and limitations, and techniques used in medical sciences and other limited data environments. Problem solving in PC laboratory. Letter grading.

CM296B. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4). (Formerly numbered Biomedical Engineering M296B.) (Same as Biostatistics M270, Computer Science M296B, and Medicine M270D.) Lecture, four hours; outside study, eight hours. Requisites: Electrical Engineering 141 or 142 or Mathematics 115A or Mechanical and Aerospace Engineering 171A. Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems. Control system, multiparametal, nonparametal, and input/output models, linear and nonlinear. Emphasis on model applications and limitations, and techniques used in medical sciences and other limited data environments. Problem solving in PC laboratory. Letter grading.

CM296C. Advanced Topics and Research in Biomechanics, Biomedical Systems Modeling and Computing. (4). (Formerly numbered Biomedical Engineering M296C.) (Same as Computer Science M296C and Medicine M270E.) Lecture, four hours; outside study, eight hours. Requisites: course CM296B. Research techniques and experience on special topic involving models, modeling methods, and model/computing in biological and medical sciences. Review and critique of literature. Research problem searching and formulation. Approaches to solving real-life problems, translating modeling goals and data into mathematical models and implementing them for simulation and analysis. Basics of numerical simulation algorithms, with model development in Matlab and PC laboratory assignments. Concurrently scheduled with course CM186. Letter grading.

CM296D. Introduction to Computational Cardiology. (4). (Formerly numbered Biomedical Engineering M296D.) (Same as Computer Science M296D.) Lecture, four hours; outside study, eight hours. Requisite: course CM186. Introduction to mathematical modeling and computer simulation of cardiac electrophysiological process, ion models of action potential (AP) theories and one- and two-dimensional cardiac tissue. Simulation on sequential and parallel supercomputers, choice of numerical algorithms, to optimize accuracy and to provide computational stability. Letter grading.

CM296E. Introduction to Tissue Engineering. (4). (Formerly numbered Biomedical Engineering C296E.) Lecture, four hours; outside study, eight hours. Requisite: course CM186. Introduction to tissue engineering approaches to study, eight hours. Requisite: course CM186. Introduction to tissue engineering approaches to study, eight hours. Requisite: course CM186.
Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gsasaa /library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Bioinformatics Program offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Bioinformatics.

Bioinformatics Graduate Courses

M202. Bioinformatics Interdisciplinary Research Seminar. (4). (Same as Chemistry M202.) Seminar, two hours; discussion, two hours. Concrete examples of how biological questions about genomics data map to and are solved by methodologies from other disciplines, including statistics, computer science, and mathematics. May be repeated for credit. S/U or letter grading.

M224. Computational Genomics. (4). (Same as Computer Science CM224.) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: Computer Science 32 or Program in Computing 10C with grade of C+ or better, and one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Designed for engineering students as well as students from biological sciences and medical school. Introduction to computational analysis of genetic variation and computational interdisciplinary research in genetics. Topics include introduction to genetics, identification of genes involved in biology; development human population history, technologies for obtaining genetic information, and genetic sequencing. Focus on formulating interdisciplinary problems as computational problems and then solving those problems using computational techniques from statistics and computer science. Letter grading.

M252. Seminar: Advanced Methods in Computational Biology. (3). (Same as Chemistry M252 and Human Genetics M252.) Seminar, one hour; discussion, one hour. Designed for advanced graduate students. Examination of computational methodology in bioinformatics and computational biology through presentation of current research literature. How to select and apply methods from computational and mathematical disciplines to problems in bioinformatics and computational biology; development of novel methodologies. S/U or letter grading.

M260A. Introduction to Bioinformatics. (4). (Same as Chemistry CM260A, Computer Science CM221, and Human Genetics M260A.) Lecture, four hours; discussion, two hours. Enforced requisites: Computer Science 32 or Program in Computing 10C with grade of C+ or better, and one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Prior knowledge of biology not required. Designed for engineering students as well as students from biological sciences and medical school. Introduction to bioinformatics and methodology in bioinformatics. Focus is on concepts and inventing new computational and statistical techniques to analyze biological data. Focus on sequence analysis and alignment algorithms. S/U or letter grading.

M260B. Algorithms in Bioinformatics and Systems Biology. (4). (Same as Chemistry CM260B and Computer Science CM222.) Lecture, four hours; discussion, two hours. Enforced requisites: Computer Science 32 or Program in Computing 10C with grade of C+ or better, and one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Course M260A is not requisite to M260B. Designed for engineering students as well as students from biological sciences and medical school. Development and application of computational approaches to biological questions, with focus on formulating interdisciplinary problems as computational problems and then
solving these problems using algorithmic techniques. Computational techniques include those from statistics and computer science. Letter grading.

M271. Statistical Methods in Computational Biology. (4). (Same as Biomathematics M271 and Statistics M254.) Lecture, three hours; discussion, one hour. Preparation: elementary probability concepts. Requisite: course M260A or Statistics 100A or 200A. Introduction to statistical methods developed and widely applied in several branches of computational biology, such as gene expression, sequence alignment, motif discovery, comparative genomics, and biological networks, with emphasis on understanding of basic statistical concepts and use of statistical inference to solve biological problems. Letter grading.

296. Seminar: Research Topics in Bioinformatics. (2). Seminar, to be arranged; discussion, three hours. Advanced study and analysis of current research topics in bioinformatics. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4). Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research in Bioinformatics. (2 to 12). Tutorial, to be arranged. May be repeated for credit. S/U grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12). Tutorial, to be arranged. May be repeated for credit. S/U grading.

598. M.S. Thesis Research and Writing. (2 to 12). Tutorial, to be arranged. May be repeated for credit. S/U grading.

S. Larry Zipursky, Ph.D.

Professors Emeriti

Robert J. DeLange, Ph.D.

John Edmond, Ph.D.

Peter A. Edwards, Ph.D.

Armand J. Fuclo, Ph.D.

Dohn G. Glitz, Ph.D.

Harvey R. Herschman, Ph.D. (Crump Professor Emeritus of Medical Engineering)

Bruce D. Howard, M.D.

Stephen E. Jacobsen, Ph.D.

Kevin McEntee, Ph.D.

David I. Meyer, Ph.D.

Elizabeth F. Neufeld, Ph.D.

Sidney Roberts, Ph.D.

Patrice J. Zamenhof, Ph.D.

Associate Professors

Hilary A. Colier, Ph.D.

Alison R. Frand, Ph.D.

Feng Guo, Ph.D.

Timothy F. Lane, Ph.D.

James A. Wohlschlegel, Ph.D.

Assistant Professors

Dulio D. Casscio, Ph.D.

Pascal F. Eega, Ph.D.

Jason Ernst, Ph.D.

Adjunct Professor

Lenore Arab, M.Sc., Ph.D.

Adjunct Assistant Professors

Michaela B. Elowitz, Ph.D.

Eryn Ujiia Lee, Ph.D.

Scope and Objectives

The biological chemistry graduate program prepares students for careers as independent research scientists and scholars. Laboratory research is the central element. Biological chemistry has grown to include studies of cellular, molecular, and developmental biology, molecular genetics and genetic engineering, and many aspects of the health sciences. The research activities of the department include these areas as well as the classic topics of metabolism, enzymology, and biomolecular structure. Courses and seminar programs are designed to provide students with the necessary background and approach to encourage their continuing growth in these rapidly changing areas of science.

Interaction with other graduate programs provides access to scientists in a variety of related disciplines. Through its primary affiliation with the Geffen School of Medicine, the Department of Biological Chemistry is also involved in the basic education of students who will be physicians, dentists, and other health professionals. Many of these students become involved in laboratory research in the department. In part because of this breadth of experiential students find careers in many aspects of basic and applied scientific research and education. The department emphasizes study for the Ph.D., but candidates for the M.S. degree may be accepted under special circumstances.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa图书馆/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Biological Chemistry offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Biological Chemistry.

Biological Chemistry

Upper Division Courses

M140. Cell Biology: Cell Cycle. (3). (Same as Molecular Biology, Cell, and Developmental Biology M140.) Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A, 14B, or 14BL, or 20A, 20B, and 20L, Life Sciences 3, 4, 23L. Not open for credit to students with credit for Molecular, Cell, and Developmental Biology 100, 165A, or 165B. Satisfies premedical requirements. Eukaryotic cellular structures and biochemistry at molecular level. Biochemical and genetic analysis of cell cycle, signal transduction, and their involvement in development and cancer. Protein sorting and transport across cell membranes. Cytoskeletal components and cell-attachment. Letter grading.

194. Research Group Seminars: Biological Chemistry. (2). Seminar, two hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field of research of faculty members or students. May be repeated for credit. P/NP grading.

195. Directed Research or Senior Project in Biological Chemistry. (2 to 8). Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for maximum of 16 units. Individual contract required. P/NP or letter grading.

Graduate Courses

201A-201B. Biological Chemistry. (5-5). Lecture, five hours. Preparation: organic chemistry. Open to nonmedical students with consent of instructor. Primarily for first-year medical students and runs throughout School of Medicine's second semester. General biochemistry with emphasis on mammalian systems. Structure, function, and metabolism of major cellular components. To receive credit, both courses must be taken together in same academic year. In Progress (201A) and S/U (201B) grading.

204. Human Biological Chemistry and Nutrition Laboratory. (3). Laboratory, four hours. Open to nonmedical students with consent of instructor. Experiments illustrating techniques and procedures in medically related biochemistry and nutrition, analysis of experimental results. S/U or letter grading.

220A-220B-220C. Research Laboratory Rotations. (2 to 8 each). Laboratory, two to eight hours. Students arrange apprenticeships in laboratories of one or more departmental faculty members and engage in research project under close faculty direction. Allows students to acquire in-depth laboratory experience in...
specific research areas and facilitates informed deci- 
sion on their part in selection of thesis/research ad-
viser. S/U grading.

M229S. Seminar: Current Topics in Bioinformatics. 
(4) (Same as Computer Science M229S and Human 
Genetics M229S.) Seminar, four hours; outside study, 
eight hours. Designed for graduate engineering stu-
dents, as well as students from biological sciences and 
medical school. Introduction to current topics in 
bioinformatics, genomics, and computational ge-
etics and preparation for computational interdisci-
plinary research in genetics and genomics. Topics in-
clude genome analysis, regulatory genomics, associ-
ation analysis, association study design, isolated and 
admixed populations, population substructure, 
human structural variation, model organisms, and ge-
monic technologies. Computational techniques in-
clude those from statistics and computer science. 
May be repeated for credit with topic change. Letter 
grading.

M234. Genetic Control of Development. (4). (Same 
as Molecular, Cell, and Developmental Biology M234.) 
Lecture, four hours. Topics at forefront of molecular 
developmental biology, including problems in ogen-
esis and early embryogenesis, pattern formation and 
determination, nervous system development, cellular 
morphogenesis, and cell-cell and cell-matrix interac-
tions. S/U or letter grading.

M237. Molar and Molecular Basis of Disease. 
(4). (Same as Pathology M237.) Lecture, two hours; 
laboratory, two hours. Preparation: one course each 
in molecular biology, cell biology, and biological 
chemistry. Discussion of key issues in disease mech-
anism, with emphasis on experiments leading to un-
derstanding of these mechanisms. Identification of 
important questions still remaining unanswered. 
Letter grading.

251A-251B-251C. Seminars: Transcriptional Regu-
lation. (2-2-2). Seminar, two hours. Advanced 
courses on mechanisms of gene transcription in both 
eukaryotes and prokaryotes intended for students ac-
tively working or highly interested in transcription. S/U 
grading.

M263. Metabolism and Its Regulation. (4). (Same 
as Chemistry M263.) Lecture, three hours. Requisites: 
courses 201A and 201B, or Chemistry 110A and one 
course from 153B, 153C, or 156. Thermodynamic and 
kinetic aspects of metabolism; regulatory properties 
of enzymes; metabolic regulation; consideration of 
comparative aspects of metabolism in relation to physi-
ological function. S/U or letter grading.

266A-266B-266C. Seminars: Cell, Stem Cell, and 
Developmental Biology. (2-2-2). Seminar, two hours. 
Open to undergraduate students with consent of in-
structor. Advanced courses in cell, stem cell, and de-
velopmental biology intended for graduate students 
working or rotating in laboratories of new cell and de-
velopmental biology home area. S/U grading.

296. Research Seminar Series in Biological Chem-
istry. (1). Seminar, one hour. Limited to biological 
chemistry students. Research presentations from sec-
ond- through fourth-year graduate students re-
lated to their research. Designed to be highly interac-
tive, with time for questions from fellow graduate stu-
dents, postdoctoral students, and faculty members 
during and after presentations. May be repeated for 
credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4). Sem-
inar, to be arranged. Preparation: apprentice per-
sonnel employment as teaching assistant, associate, 
or fellow. Teaching apprenticeship under active guid-
ance and supervision of regular faculty member re-
sponsible for curriculum and instruction at UCLA. 
May be repeated for credit. S/U grading.

596. Directed Individual Study and Research. 
(2 to 12). Tutorial, to be arranged. S/U or letter grading.

597. Preparation for Examinations. (2 to 4). Tutorial, 
to be arranged. Individual study for Ph.D. qualifying 
examinations or M.S. comprehensive examination. 
S/U grading.

598. Preparation of M.S. Thesis. (4). Tutorial, to be 
arranged. Preparation of research data and writing of 

599. Research for and Preparation of Ph.D. Disser-
tation. (2 to 12). Tutorial, to be arranged. Preparation 
of research data and writing of Ph.D. dissertation. S/U 
grading.

Adjunct Instructor

Jeffrey Gornbein, Dr.P.H.

Scope and Objectives

As biology advances rapidly in quantitative re-
search methods, both the need for and possi-
Bility of closely associated theoretical research 
increases. On numerous medical and medical 
science frontiers—such as genetics, molecular 
biology, oncology, pharmacology, neurosci-
ences, and physiology—biomathematics is 
contributing both in its basic research and the 
development of specialized computer software 
to support investigation and healthcare. UCLA 
has one of the few departments in this rapidly 
evolving field.

The department's orientation is away from ab-
stract modeling and toward theoretical re-
search vital to the advancement of current 
biomedical research frontiers. The doctoral 
program reflects this in requirements for ad-
vanced training in a biomedical research spe-
cially and for the mathematical and computing 
skills required to contend realistically with 
complex phenomena encountered in biology 
and medicine. The art of biomathematical re-
search is developed individually from the first 
year on. The master's program adapts to the 
needs of researchers desiring supplemental 
biomathematical training.

The Department of Biomathematics welcomes 
both undergraduate and graduate students in 
other majors to its courses in modeling, bio-
medical computing, and statistics. Premedical 
juniors with mathematical/computer interests 
can receive early guidance toward an M.D./ 
Ph.D. program in Biomathematics. The depart-
ment also provides statistical and biomathe-
matical training in the medical curriculum and 
postgraduate medical programs.

Graduate Study

Official, specific degree requirements are de-
tailed in Program Requirements for UCLA 
Graduate Degrees, available at the Graduate 
Division website, http://grad.ucla.edu/gasaa 
/library/pgmqrintro.htm. In many cases, more 
detailed guidelines may be outlined in an-
nouncements, other publications, and websites 
of the schools, departments, and programs.

Graduate Degrees

The Department of Biomathematics offers 
Master of Science (M.S.) and Doctor of Philos-
ophy (Ph.D.) degrees in Biomathematics and 
the Master of Science (M.S.) degree in Clinical 
Research.

Biomathematics

Upper Division Courses

1. Introduction to Cellular Modeling. (4). Lecture, 
four hours; computer laboratory, two hours. Prepara-
tion: some computer programming. Requisite: Mathe-
matics 32A. Designed for upper division science ma-
jors and biomedical graduate students. Introduction 
to modeling cells and cell systems, including intracel-
lular biochemical networks, applications to cancer re-
search. How to develop one's own computer models 
using IMSL mathematics subroutines. P/NP or letter 
grading.

Lecture, four hours; computer laboratory, two hours. 
Preparation: some computer programming. Requisite: 
Mathematics 32A. Designed for upper division sci-
ence majors and biomedical graduate students. Survey 
of wide variety of topics in neurobiological 
modeling, current neuronal modeling systems, Devel-
opment of skills to formulate and program one's own 
models using IMSL mathematics subroutines. P/NP or 
letter grading.

110. Elements of Biomathematics. (4). Lecture, 
three hours; laboratory, three hours. Preparation: cal-
culus. Analysis of deterministic models. Conditions 
under which deterministic and probabilistic descrip-

tions of biological phenomena are appropriate. Both approaches applied to selected examples in physiology and biology. P/NP or letter grading.

160. Introductory Biomathematics for Medical and Biological Research. [4]. Lecture, four hours; discussion, 90 minutes. Elementary statistics course that focuses on statistical concepts and critiques literature, with an emphasis on clinical research. Output from statistical computer packages discussed in class, but students do not use computer themselves. Topics include descriptive statistics, hypothesis testing, sample size and power, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination, article interpretation. P/NP or letter grading.

170A. Introductory Biomathematics for Medical Investigators. [4]. Lecture, three hours; discussion, one hour. Intensive elementary statistics course emphasizing design and applications to observational studies and experiments. Statistical topics include descriptive statistics, elementary probability and distributions, confidence intervals and hypothesis testing, sample size and power, linear regression and correlation, analysis of variance, nonparametric statistics. Applications to biomedical literature and design of clinical trials. Letter grading.

170B. Statistical and Mathematical Modeling in Medical and Biological Research. [4]. Lecture, four hours; discussion, one hour. Preparation: knowledge of calculus, differential equations, and partial differential equations. Introduction to mathematical biology, focusing on mathematical descriptions of biological systems, evolutionary principles, and approximations that describe structure and function of biological systems, evolutionary principles, and network design and dynamics. Topics include cancer initiation and progression, gene expression, epistasis, response to fluctuating environments, network structure, and functional traits. S/U or letter grading.

203. Stochastic Models in Biology. [4]. Same as Human Genetics M203X. Lecture, four hours. Required: knowledge of probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and variety of other biological and medical disciplines. S/U or letter grading.

204. Biomedical Data Analysis. [4]. Lecture, four hours. Quantity and quality of observations have been greatly enhanced by use of computers. Problem-oriented study of latest methods in statistical data analysis and use of such arising in laboratory and clinical research. S/U or letter grading.

204. Introduction to Mathematical Oncology. [4]. Lecture, four hours; computer laboratory, two hours. Preparation: ordinary differential equations, computer programming course. Deterministic and stochastic modeling of cell metabolism, colony growth, drug resistance, and immunotherapeutic agents applied to carcinogenesis, therapy, emergence of resistance to therapy. Simulation, optimization methods introduced. Current literature reviewed. Second course in mathematical methods. Topics include randomization methods, intermediate experimental design, contingency table analysis, analysis of variance, multiple linear regression, methods of classification, model checking, basic mathematical models including compartment models, and statistical computer software. Students have opportunity to design their own experiments and analyze them on computer, and to analyze previously collected data. P/NP or letter grading.

190HA-190HB. Honors Research in Biomathematics. [4-4]. Lecture, two hours. Limited to juniors/seniors. Individual research in some aspect of biotechnology designed to acquaint students in depth with mathematical models and computer applications in biology. Must be taken at least two terms and for total of at least 8 units. Thesis required. P/NP or letter grading.

204. Directed Research or Senior Project in Biomathematics. (2 to 8). Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

201. Deterministic Models in Biology. [4]. Lecture, three hours; laboratory, three hours. Preparation: knowledge of linear algebra and differential equations. Examination of conditions under which deterministic approaches can be employed and conditions where they may be expected to fail. Topics include compartmental analysis, enzyme kinetics, physiological control systems, and cellular/animal population models. S/U or letter grading.

M203. Stochastic Models in Biology. [4]. Same as Human Genetics M203X. Lecture, four hours. Required: knowledge of probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and variety of other biological and medical disciplines. S/U or letter grading.

204. Biomedical Data Analysis. [4]. Lecture, four hours. Quantity and quality of observations have been greatly enhanced by use of computers. Problem-oriented study of latest methods in statistical data analysis and use of such arising in laboratory and clinical research. S/U or letter grading.

204. Introduction to Mathematical Oncology. [4]. Lecture, four hours; computer laboratory, two hours. Preparation: ordinary differential equations, computer programming course. Deterministic and stochastic modeling of cell metabolism, colony growth, drug resistance, and immunotherapeutic agents applied to carcinogenesis, therapy, emergence of resistance to therapy. Simulation, optimization methods introduced. Current literature reviewed. Second course in mathematical methods. Topics include randomization methods, intermediate experimental design, contingency table analysis, analysis of variance, multiple linear regression, methods of classification, model checking, basic mathematical models including compartment models, and statistical computer software. Students have opportunity to design their own experiments and analyze them on computer, and to analyze previously collected data. P/NP or letter grading.

204. Theoretical Genetic Modeling. [4]. Same as Biostatistics M272 and Human Genetics M207A. Lecture, three hours; discussion, one hour. Required: knowledge of basic computer programming. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetic experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

207B. Applied Genetic Modeling. [4]. Same as Biostatistics M237 and Human Genetics M207B. Lecture, three hours; laboratory, one hour. Required: Requisites: Biostatistics 110A, 110B. Methods of computer-oriented human genetic analysis. Topics include statistical methodology underlying genetic analysis of both quantitative and qualitative complex traits. Laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements M207A; students may take either and are encouraged to take both. S/U or letter grading.

208A. Modeling in Neurobiology for Mathematicians. [4]. Lecture, four hours; laboratory, two hours. Preparation: introductory ordinary partial differential equations, programming experience. Introduction to electrophysiology, ion channels, and neuronal function and mathematical and computational methods for studying this, appropriate for physicists, engineers, and mathematicians. Survey of current leading research areas and software systems. S/U or letter grading.

208B. Modeling in Neurobiology for Biologists. [4]. Lecture, four hours; laboratory, two hours. Preparation: lower division calculus, some elementary programming experience. Introduction to neuronal modeling, including how to formulate models and study them with existing computer software (e.g., NODUS) or one’s own simple programs that use IMSL subroutines. Survey of current leading research areas. S/U or letter grading.

209. Mechanisms and Modeling in Bioanalytical Assays. [4]. Lecture, three hours. Preparation: knowledge of basic physical mechanisms and mathematical and computational methods for studying this, appropriate for physicists, engineers, and mathematicians. Survey of current leading research areas and software systems. S/U or letter grading.

212. Nonlinear Dynamics in Biological Systems. [4]. Lecture, three hours; discussion, one hour. Required preparation: elementary knowledge of ordinary differential equations, partial differential equations, and computer programming. Mathematical bases of nonlinear dynamics and self-organization in temporal and spatial systems, with applications to biological systems. Topics range from bifurcation theory in low dimension to pattern formation in high dimension. Use of biologically important examples to illustrate applications of these dynamics, including gene regulation and protein-protein interaction networks, glycolysis, and metabolic oscillatory rhythms, cell cycle controls, intracellular calcium cycling, pattern formation in morphogenesis, and action potential models and electrical wave formation and propagation in nerve and cardiac systems. S/U or letter grading.

230. Computed Tomography: Theory and Applications. [4]. Same as Biomedical Physics M230. Lecture, four hours. Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming active research area in biomedicine. Basic principles of computed tomography (CT), various reconstruction algorithms, special characteristics of CT, physics in CT, and various biomedical applications. S/U or letter grading.

231. Statistical Methods for Categorical Data. [4]. Same as Biostatistics M231. Lecture, three hours; discussion, one hour. Required: Biostatistics 100B or 110B, Statistics 100B. Statistical techniques for analysis of categorical data; discussion and illustration of their applications and limitations. S/U or letter grading.

232. Statistical Analysis of Incomplete Data. [4]. Same as Biostatistics M232. Lecture, three hours; discussion, one hour. Required: Biostatistics 100B. Dis- cussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighing, likelihood-based methods,
and nonrandom nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading.

M234. Methodology in Clinical Trials. (4) (Same as Biostatistics M234.) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: Biostatistics 200A and 202B (or Statistics 100C). Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

258. Introduction to Clinical Trials. (2) Lecture, two hours. Requisites: courses 170A, 266A. Limited to M.S. in Clinical Research students. Introduction to basic principles of good clinical trial design, trial implementation, and analysis. Letter grading.

259. Advanced Data Analysis. (4) Lecture, one hour; discussion, one hour. Preparation: completion of professional health sciences or M.D. degree. Required of all M.S. in Clinical Research students. Discussion of major data analysis methods. Students will analyze datasets of known trials with students, one invited clinical faculty member, and course director. Development of critical ability to evaluate trial design and pitfalls. S/U or letter grading.

M260A-M260B. Methodology in Clinical Research I, II, (4-4). (Same as Medicine M260A-M260B) Lecture, four hours. Recommended preparation: M.D., Ph.D., or dental degree. Requisites: courses 170A, 265A, and 266A, or permission of instructor. Application of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

M260C. Methodology in Clinical Research III. (4). (Same as Medicine M260C.) Discussion, four hours. Recommended preparation: M.D., Ph.D., or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

M261. Responsible Conduct of Research Involving Humans. (2) (Same as Medicine M261.) Lecture, two hours; discussion, two hours. Preparation: completion of one basic course in protection of human research subjects through Collaborative Institutional Training Initiative (CITI). Discussion of current issues in responsible conduct of clinical research, including reporting of research, basis for authorship, issues in genetic research, principles and practice of research on humans, conflicts of interest, Institutional Review Board (IRB), and related topics. S/U or letter grading.

M262. Communication of Science. (2) (Same as Psychiatry M262.) Lecture, two hours; discussion, one hour. Presentation of various types of scientific writing and their general practice. Details of writing specific articles: methods, results, discussion, writing of review article. Grant submissions: aims, background, results, design, Role of appendices. Communication with lay public. S/U or letter grading.

M263. Clinical Pharmacology. (2) (Same as Medicine M263 and Psychiatry M263.) Lecture, two hours. Preparation: completion of professional health sciences degree (M.D., D.D.S., D.N.Sc., or Ph.D.). Overview of clinical pharmacology, especially as they relate to clinical and translational medicine and to advances in contemporary medicine such as targeting, gene therapy, and genomics. Letter grading.

265A. Data Analysis Strategies I. (4) Lecture, two hours; laboratory, two hours. Preparation: M.D. or Ph.D. degree. Requisite: course 170A. Designed to provide students with hands-on experience developing and testing hypotheses using various types of databases. Topics include developing testable hypothesis, data management, and analysis strategies and written presentation of findings. Experience with full process of hypothesis generation, operationalization of variables, selection of analysis techniques, and presentation of findings so students are better prepared to complete data analysis, interpretation of results, and presentation of findings (e.g., for master’s thesis and subsequent articles). Students are encouraged to provide their own data. Databases provided for use in completing exercises for those without available data. Letter grading.

265B. Data Analysis Strategies II. (2) Lecture, one hour; laboratory, one hour. Requisite: course 265A. Continuation of course 265A; use of SAS computer language. Letter grading.

266A. Applied Regression Analysis in Medical Sciences. (4). (Formerly numbered 171.) Lecture, three hours; laboratory, one hour. Requisite: course 170A. Proficiency in applied regression analysis, with focus on interpretation of results and performing computation. Primary topics include simple linear regression, multiple regression, regression model selection, analysis of variance, logistic regression, and survival analysis. Letter grading.

266B. Advanced Biostatistics. (4). (Formerly numbered 266B.) Lecture, three hours; discussion, one hour. Requisite: course 266A. Continuation of course 266A. Some traditional multivariate methods, such as principal component, factor analysis, cluster analysis, and more contemporary methods, including recursive partitioning and missing data. Multilevel and longitudinal analysis. Letter grading.

M270. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4) (Same as Bioengineering M296B, Computer Science M296B, and Medicine M270D.) Lecture, four hours; outside study, eight hours. Requisites: course 220 or Bioengineering CM286 or M296A. Estimation methodology and model parameter estimation algorithms for fitting dynamic system models to biomedical data. Model discrimination methods. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on optimal sampling schedule design for kinetic models. Exploration of PC software for model building and optimal experiment design via applications in physiology and pharmacology. Letter grading.

M271. Statistical Methods in Computational Biology. (4) (Same as Bioinformatics M271 and Statistics M271.) Lecture, three hours; discussion, one hour. Preparation: elementary probability concepts. Requisite: Bioinformatics M260A or Statistics 100A or 100B. Introduction to statistical methods developed and widely applied in several branches of computational biology, such as gene expression, sequence alignment, motif discovery, comparative genomics, and biological networks, with emphasis on understanding of basic statistical concepts and use of statistical inference to solve biological problems. Letter grading.

273. Stochastic Modeling in Molecular Cellular Biophysics. (4). Lecture, three hours; discussion, one hour. Requisite: Mathematics 170A or equivalent experience in probability, lower division physics, or physical chemistry. Most molecular systems are large collections of stochastic processes, and the behavior of such systems is stochastic. Mathematical descriptions of biochemical reactions with and without energy dissipation, molecular structures, and biological techniques that measure various biological processes. S/U or letter grading.

M282. Longitudinal Data. (4) (Same as Biostatistics M236.) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: Biostatistics 200A, one other 200-level biostatistics or statistics course. Longitudinal data analysis, graphing longitudinal data, specifying predictors, modeling variances and covariance, inference, computing hierarchical models, and random effects. S/U or letter grading.

M284. Methodology of Clinical Trials. (4). (Same as Biostatistics M238.) Lecture, three hours; discussion, two hours. Requisites: course M291, Biostatistics 200A. Methodological principles of clinical trials, actual practice and principles of trials. Considerable focus on phase two trials and multiclinical phase three trials. Emphasis on major inferential issues. S/U or letter grading.

285. Introduction to High-Throughput Data Analysis. (4) Seminar, three hours. Requisites: courses M260A, M260B. Introduction to high-throughput data analysis, including DNA microarray technologies and next-generation sequencing technology. Presentation of statistical methods and software for handling complex data produced by experiments using these technologies. Some hands-on training on data analysis. S/U or letter grading.

296A-296B. Advanced Topics in Clinical Pharmacology. (2-2). Lecture, one hour; discussion, one hour. Review of pharmacokinetics, drug metabolism and transport, assessment of drug effects, drug therapy in special populations, and contemporary drug development. S/U or letter grading.

299. Special Topics in Clinical Research. (2 to 6). Seminar, three hours. Requisites: courses M260A, M260B. In depth and advanced analysis of current topics in clinical research. Discussion of current research and literature in research specialty of faculty member teaching course. Content varies from term to term and may include lectures from visiting scientists. May be repeated for credit with consent of instructor. S/U or letter grading.

596. Directed Individual Study or Research in Bio- mathematics. (2 to 12). Tutorial, to be arranged. Individual study on topics not yet covered by offerings of department. May be repeated for credit with topic change. S/U or letter grading.

597. Preparation for M.S. or Ph.D. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8). Tutorial, to be arranged. Individual study. S/U grading.

Graduate Courses

200B. Nuclear Medicine Instrumentation. (4). Lecture, one hour; laboratory, three hours. Requisite: course 200A. Introduction to nuclear medicine instrumentation, including well ionization chambers, probe and well scintillation detectors, scintillation cameras, and single photon and positron emission computed tomography. S/U or letter grading.

201. Medical Radiation Accelerator Design. (4). Lecture, three hours. Requisite: course 216. Overview of physical principles involved in design of current particle accelerators (electron, proton, heavy particle) and analysis of characteristics of current accelerators and facility design. S/U or letter grading.

202A-202B. Applications of Medical Physics to Clinical Problems. (4-4-4). Clinic, four hours. Selected topics in clinical use of radioisotopes. S/U or letter grading.

205. Physics of Diagnostic Radiology. (4). Lecture, three hours; laboratory, one hour. Production of X-rays, basic interactions between X-rays and matter, X-ray system components, physics principles of medical radiography, radiographic image quality, fluoroscopy, image intensifiers, special procedures, X-ray protection. Laboratory experiments illustrate basic theory. S/U or letter grading.

208A. Medical Physics Laboratory: Medical Imaging. (4). Discussion, two hours; laboratory, four hours. Requisite: course 205. Hands-on experience performing acceptance testing and quality control checks of imaging equipment such as fluoroscopy, digital subtraction angiography, mammography, ultrasound, magnetic resonance imaging, computed tomography, and computed radiography. S/U or letter grading.

209. Digital Techniques in Radiological Sciences. (4). Lecture, three hours; discussion, one hour. Prerequisites: one course in C or another computer language. Basic principles of digital technology used in radiological sciences. Concepts and experience necessary to undertake radiological research in diverse computing environment. Discussion of relationship between computer and diagnostic equipment with regard to data acquisition, equipment interfacing, and data analysis. C language programming taught. S/U or letter grading.

210. Computer Vision in Medical Imaging. (4). Lecture, three hours; discussion, one hour. Recommended requisites: Mathematics 155, Program in Computing 10A. Study of image segmentation, feature extraction, object recognition, classification, and visualization with biomedical applications. Topics include region-growing, edge detection, mathematical morphology, clustering, neural networks, and volume rendering in lectures, case studies, and programming projects. S/U or letter grading.

211. Medical Ultrasound. (4). Lecture, 90 minutes; laboratory, two hours. Preparation: one calculus course. Production of real-time ultrasound images, transducer modeling and design, Doppler and color flow imaging, intravascular ultrasound, image postprocessing, immersion sonography, ultrasound physics, and physical properties of diagnostic ultrasound. S/U or letter grading.

212. Biochemical Basis of Positron-Emission Tomography (PET). (4). Lecture, three hours; discussion, one hour. Introduction to biochemical processes and application of radioisotopes to study metabolism noninvasively by positron-emission tomography (PET). Validation of kinetic models to derive quantitative information from PET. Introduction to clinical and experimental application of PET. S/U or letter grading.

213. Quantitative Autoradiography. (4). Lecture, three hours; discussion, one hour. Application of quantitative autoradiography for estimating brain and heart functions. Topics include 2-deoxyglucose method for metabolic rate; iodopyrine method for blood flow; amino acid method for protein synthesis; quantitative receptor autoradiography; neuroanatomy and neurophysiology of autoradiogram and PET scan interpretation. S/U or letter grading.

217. Statistics and Data Analysis in Biomedical Physics. (2 to 4). Tutorial, two hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Cumulative paper required. May be repeated for credit. Individual contract required. P/NP or letter grading.
218. Radiologic Functional Anatomy. (2), Lecture, two hours. Introduction to human anatomy, cell biology, and physiology as visualized through microscopy, molecular imaging, radiography, CT, MRI, ultrasound, PET, and SPECT. Letter grading.

M219. Principles and Applications of Magnetic Resonance Imaging. (4). (Formerly numbered 219.) (Same as Biocomputation M219.) Lecture, three hours; discussion, one hour. Basic principles of magnetic resonance (MR), physics, and image formation. Emphasis on hardware, Bloch equations, analytic expressions, imaging contrast mechanisms, spin and gradient echoes, Fourier transform imaging methods, structure of pulse sequences, and various scanning parameters. Introduction to advanced techniques in rapid imaging, quantitative imaging, and spectroscopy. Letter grading.

220A-220D. Laboratory Rotations in Biomedical Physics. (2-2). Laboratory, two hours. Laboratory projects to provide students with introduction to field. One oral and one written presentation required. S/U grading. 220A. Biophysics; 220B. Medical Imaging; 220C. Therapeutic Medical Physics; 220D. Radiation Biology and Experimental Radiation Therapy.

221. Applied Health Physics. (4). Lecture, three hours; discussion, one hour. One course credit. Basics of radiation safety as applied to medical applications. Introduction to all regulatory issues pertaining to medical use of radiation. Letter grading.

223. Seminar: Radiation Biology. (4). Seminar, four hours. Exploration of physiologic and molecular mechanisms that impact on response of normal and malignant tissues to ionizing radiation, with particular emphasis on critical and high in-depth analysis of approaches through which such responses can be modified in therapeutic setting. Understanding of rationale for integrating biological information into process of treatment planning and delivery. S/U grading.

225. Contrast Mechanisms and Quantification in Magnetic Resonance Imaging. (4). Lecture, four hours; discussion, one hour. One course credit. Introduction to magnetic resonance contrast mechanisms and quantification techniques in magnetic resonance imaging. Topics include exogenous and endogenous contrast mechanisms, macromolecular-, tissue perfusion- and permeability-, advanced diffusion and q-space analysis, chemical exchange and magnetization transfer imagining, and relaxometry. Letter grading.

227. Human Disease: Current and Future Role of Biomedical Physics. (4). Lecture, three hours; discussion, one hour. Present and future roles of biomedical physics in diagnosis and treatment of human disease, with focus on interdisciplinary nature of this field. Exploration of two diseases in depth with detailed description of roles of physics-based diagnostic imaging and therapeutic options for each disease. Discussion of emerging future technologies as well as techniques that exploit interaction between diagnosis and therapy. Letter grading.

229. Advanced Topics in Magnetic Resonance Imaging. (4). Lecture, four hours. Enforced requisites: course 219, one course credit. Introduction to magnetic resonance contrast mechanisms and quantification techniques in magnetic resonance imaging. Topics include exogenous and endogenous contrast mechanisms, macromolecular-, tissue perfusion- and permeability-, advanced diffusion and q-space analysis, chemical exchange and magnetization transfer imagining, and relaxometry. Letter grading.

228. Magnetism and Molecular Imaging. (4). Lecture, four hours; discussion, one hour. One course credit. Focus on microscale mechanisms of magnetic resonance imaging (MRI); implications for use of MRI in studies of macromolecules, molecular imaging, and molecular biology. Letter grading.

230. Computed Tomography: Theory and Applications. (4). (Same as Biocomputation M230.) Lecture, four hours; discussion, one hour. Overview of computerized tomography (CT) and magnetic resonance imaging (MRI) as imaging techniques. Letter grading.

M256. Functional Neuroimaging: Techniques and Applications. (3). (Same as Biocomputation M256 and Psychiatry M256.) Lecture, four hours; discussion, two hours. Advanced techniques for analyzing brain activation images. Letter grading.

M259. Microscopy in the Biological Sciences. (3). (Same as Chemistry and Biochemistry M259.) Lecture, one hour. One outside study; seven hours. Exploration of role of biological imaging in modern biology and medicine, including imaging physics, instrumentation, image processing, and applications of imaging for range of medical and biological applications. Practical experience provided through series of imaging laboratories. Letter grading.

M268. Radiopharmaceutical Chemistry. (4). Lecture, four hours; discussion, two hours. Preparation: successful completion of at least two of the following courses: Biomedical Physics 221, Magnetic Resonance Imaging 223, and Nuclear Physics 225. Letter grading.

M269. Seminar: Medical Imaging. (1). Seminar, one hour. Preparation: successful completion of at least two of the following courses: Biomedical Physics 221, Magnetic Resonance Imaging 223, and Nuclear Physics 225. Letter grading.

M270. Medical Imaging. (1). Seminar, one hour. Preparation: successful completion of at least two of the following courses: Biomedical Physics 221, Magnetic Resonance Imaging 223, and Nuclear Physics 225. Letter grading.

M286. Radiopharmaceutical Chemistry. (4). Lecture, four hours; discussion, two hours. Preparation: successful completion of at least two of the following courses: Biomedical Physics 221, Magnetic Resonance Imaging 223, and Nuclear Physics 225. Letter grading.

M424. Functional Magnetic Resonance Imaging Journal Club. (2). (Same as Psychiatry M424.) Discussion, 90 minutes. Limited to 10 students. Preparation: successful completion of at least two of the following courses: Biomedical Physics 221, Magnetic Resonance Imaging 223, and Nuclear Physics 225. Letter grading.

M495. Special Studies in Biomedical Physics. (4). Seminar, two hours; laboratory, four hours. Preparation: successful completion of at least two of the following courses: Biomedical Physics 221, Magnetic Resonance Imaging 223, and Nuclear Physics 225. Letter grading.

Scope and Objectives

The Biomedical Research minor is designed to incorporate research into undergraduate science education at UCLA. Applications may be submitted by any UCLA student who meets the requirements.

Robert I. Jennrich, Ph.D.

Associate Professors
Catherine M. Crespi, Ph.D., in Residence
Damil Senturk, Ph.D., in Residence
Catherine A. Sugar, Ph.D., in Residence

Assistant Professors
Donatello Teleca, Ph.D.

Lecturers
Jeffrey A. Gornbein, Dr.P.H.
Fei Yu, Ph.D.

Adjunct Professors
David Elashoff, Ph.D.
David W. Gjertson, Ph.D.
Martin L. Lee, Ph.D.
James W. Sayre, Dr.P.H.

Adjunct Assistant Professors
Karabi Nandy, Ph.D.
Angela P. Presson, Ph.D.

Scope and Objectives

In recent years biostatistics has become one of the most stimulating areas of applied statistics. The field encompasses the methodology and theory of statistics as applied to problems in the life and health sciences. Biostatisticians are trained in the skilled application of statistical methods to the solution of problems encountered in public health and medicine. They collaborate with scientists in nearly every area related to health and have made major contributions to our understanding of AIDS, cancer, genetics, bioinformatics, and immunology, as well as other areas. Further, biostatisticians spend a considerable amount of time developing and evaluating the statistical methodology used in those projects. The Department of Biostatistics offers M.S. and Ph.D. degrees in Biostatistics and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in biostatistics (see Public Health Schoolwide Programs). All students receive a balanced education, blending theory and practice.

A degree in biostatistics prepares students for work in a wide variety of challenging positions in government, industry, and education. Graduates have found careers involving teaching, research, and consulting in such fields as medicine, public health, life sciences, and survey research. There has always been a strong demand for well-trained biostatisticians; graduates have had little difficulty finding employment well suited to their particular interests.

the admission requirements and has the potential to satisfy the requirements. Students explore the scientific questions and experimental approaches of biomedical research. Faculty members and staff facilitate early placement of students into laboratories on campus for independent research. Students are trained to analyze research literature, present their research in oral and poster formats, and appreciate the ethical, historical, and philosophical issues facing biomedical research.

Undergraduate Study

Biomedical Research Minor

Admission to the Biomedical Research minor is competitive, and application follows completion of Biomedical Research 5HA, 10H, Honors College 70A, or an approved alternative course. Applications (see http://www.biomedresearchminor.ucla.edu) must be submitted no later than the first term of the junior year. Students must be in good academic standing and demonstrate a genuine interest in research. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by the College of Letters and Science.

Required Lower Division Courses (9 units): Biomedical Research 5HB (or an approved alternative course) and Molecular, Cell, and Developmental Biology 60.

Required Upper Division Courses (24 units): 193H. Journal Club Seminars: Current Topics in Biomedical Research. (2), Seminar, three hours. Limited to Biomedical Research minor students. Preparation of oral presentations based on recent literature in biomedicine. Letter grading.

194H. Research Group Seminars: Data Presentation in Biomedical Research. (2), Seminar, three hours. Limited to Biomedical Research minor students. Preparation of oral presentations on student laboratory research at UCLA. May be repeated for credit. Letter grading.

199, Directed Biomedical Research. (4), Tutorial, 12 hours. Limited to Biomedical Research minor students. Supervised individual research under guidance of faculty mentor. Culminating report describing progress and signed by student and faculty mentor required. May be repeated for credit. Individual contract required. Letter grading.

Biomedical Research

Lower Division Courses

5HA. Biomedical Research: Concepts and Strategies. (4), Lecture, three hours. Designed for freshmen/sophomores. Exploration of scientific concepts and experimental approaches through seminars by UCLA faculty members on their cutting-edge research. Topics may include areas of study such as cancer, stem cells, and infectious disease, as well as more basic research in cell and molecular biology. Letter grading.

5HB. Biomedical Research: Essential Skills and Concepts. (4), Lecture, three hours; discussion; one hour. Requisite: course 5HA. Designed for freshmen/sophomores. Exploration of scientific concepts and experimental approaches through seminars by UCLA faculty members on their cutting-edge research. Topics may include areas of study such as cancer, stem cells, and infectious disease, as well as more basic research in cell and molecular biology. Student investigation of one or more laboratories on campus and presentation of brief synopsis of single research project from one laboratory. Letter grading.

10H. Research Training in Genes, Genetics, and Genomics. (6), Formerly numbered Life Sciences 10H). Lecture, 90 minutes; laboratory, six hours; computer laboratory, 90 minutes. Limited to 30 students. Basic training in biological research, including techniques in genetics, model organism, bioinformatics, functional genomics, electron microscopy. Part of Undergraduate Research Consortium in Functional Genomics sponsored by Howard Hughes Medical Institute Professors Program. Letter grading.

193H. Journal Club Seminars: Current Topics in Biomedical Research. (2), Seminar, three hours. Limited to Biomedical Research minor students. Preparation and discussion of recent papers from primary literature in biosciences. Letter grading.

194H. Research Group Seminars: Data Presentation in Biomedical Research. (2), Seminar, three hours. Requisite: course 193H. Limited to Biomedical Research minor students. Preparation of oral presentations based on student laboratory research at UCLA. May be repeated for credit. Letter grading.

199, Directed Biomedical Research. (4), Tutorial, 12 hours. Limited to Biomedical Research minor students. Supervised individual research under guidance of faculty mentor. Culminating report describing progress and signed by student and faculty mentor required. May be repeated for credit. Individual contract required. Letter grading.
Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Division. Available at the Graduate Division website, http://grad.ucla.edu/gasaa /library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Biostatistics offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Biostatistics.

Biostatistics
Upper Division Courses

100A. Introduction to Biostatistics. (4). Lecture, three hours; discussion, one hour; laboratory, one hour. Preparation: one biological or physical sciences course. Suitable for juniors/seniors. Students who have completed courses in statistics may enroll only with consent of instructor. Not open for credit to students with credit for course 110A. Introduction to methods and concepts of statistical analysis. Sampling with special attention to those occurring in biological sciences. Topics include distributions, tests of hypotheses, estimation, types of error, significance and confidence levels, sample size. P/NP or letter grading.

100B. Introduction to Biostatistics. (4). Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 100A. Not open for credit to students with credit for course 110B. Introduction to analysis of variance, linear regression. S/U or letter grading.

110A. Basic Biostatistics. (4). Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 110A. Designed for master’s and doctoral students in fields outside biostatistics. Topics in linear regression and other related methods. When and how to use linear regression and related methods and how to properly interpret results. Heavy emphasis on practical application as opposed to theoretical development. S/U.

110B. Topics in Applied Regression. (4). (Formerly numbered 201B.) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 101A. Further studies in multiple linear regression, including applied multiple regression models, regression diagnostics and model assessment, factorial and repeated measure analysis of variance models, non-linear regression, logistic regression, propensity scores, matching versus stratification, Poisson regression, and classification trees. Applications to biomedicine and public health scientific problems. Letter grading.

202A. Theoretical Principles of Biostatistics. (4). (Formerly numbered 295B.) Lecture, three hours; discussion, one hour. Recommended preparation: two years of calculus and linear algebra. Introduction to main principles of probability, random variables, discrete and continuous distributions, bivariate distributions, and distributions of functions of random variables. Letter grading.

250A-250B:250C. Statistics in Psychiatric and Biobehavioral Research. (2-2-2). (Same as Psychiatry M266A-M266B-M268C.) Seminar, 90 minutes. Requisite: course 202B. Designed for graduate students. Examples from psychiatric literature used to illustrate statistical ideas and analysis strategies. Topics include experimental designs, sample size calculations, parametric versus nonparametric tests, regression, ANOVA, factor analysis, defining composite variables, causal inference. Computer used to illustrate basic data analysis. S/U or letter grading.

250C. Statistical Modeling in Epidemiology. (4). (Same as Epidemiology M212.) Lecture, four hours. Preparation: two terms of statistics (three terms recommended). Requisite: Epidemiology M204 or M211. Principles of modeling, including meanings of models, prior model specification, translation of models into explicit population assumptions, model selection, model diagnostics, hierarchical (multilevel) modeling. S/U or letter grading.

2510. Statistical Methods for Categorical Data. (4). (Same as Biostatistics M231.) Lecture, three hours; discussion, one hour. Prerequire: course 100B or 110B, Statistics 100B. Statistical techniques for analysis of categorical data; discussion and illustration of their applications and limitations. S/U or letter grading.

M220. Advanced Experimental Statistics. (4). (Same as Psychological Science M217.) Lecture, four hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. S/U or letter grading.

230. Statistical Graphics. (4). Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: courses 110A, 110B. Graphical data analysis emphasizes use of visual displays of quantitative data to obtain insight into data structure by exploring patterns and relationships, and to enhance classical numerical analyses, especially assumption validity checking. Principles of graph construction, graphical methods, and perception issues. S/U or letter grading.

M232. Statistical Analysis of Incomplete Data. (4). (Same as Biostatistics M232.) Lecture, three hours; discussion, one hour. Requisite: Statistics 100B. Discussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and non-random nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading.

M234. Applied Bayesian Inference. (4). (Same as Biostatistics M234.) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses 200A, and 200B (or Statistics 100C). Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

M236. Longitudinal Data. (4). (Same as Biomathematics M282.) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: course 200A, one other 200-level biostatistics or statistics course. Longitudinal data analysis, graphing longitudinal data, specifying predictors, modeling variances and covariance, inference, computing, hierarchical models, and random effects. S/U or letter grading.

M237. Applied Genetic Modeling. (4). (Same as Biomathematics M207B and Human Genetics M207B.) Lecture, three hours; laboratory, one hour. Requisites: courses 1 T-S of computer analysis of genetic data; laboratory reports required. Course complements M272; students may take either and are encouraged to take both. S/U or letter grading.

M239. Mathematical and Statistical Phylogenetics. (4). (Same as Biomathematics M211 and Human Genetics M237.) Lecture, three hours; laboratory, one hour. Requisites: courses 110A, 110B, Mathematics 170A. Theoretical models in molecular evolution, with focus on phylogenetic techniques. Topics include evolution, tree reconstruction methods, studies of viral evolution, phylogeny, and coalescent approaches. Examples from evolutionary biology and medicine. Laboratory for hands-on computer analysis of sequence data. S/U or letter grading.

240. Master's Seminar and Research Resources for Graduating Biostatistics M.S. Students. (4). Seminar, three hours. Introduction to resources for finding statistical consulting, discussion of principles, and methods of making statistical presentations and how to write statistical reports, including writing abstracts and choice of key words. Discussion of journal article preparation and submission process. Focus on process to help students make progress on their master's reports. Letter grading.

250A-250B. Linear Statistical Models. (4-4). Lecture, three hours; discussion, one hour. Preparations: one upper division theoretical statistics course. Topics include linear algebra, applied to linear statistical models, distribution of quadratic forms, Gauss/Markov theorem, fixed and random component models, balanced and unbalanced designs. Letter grading.

251. Multivariate Biostatistics. (4). Lecture, three hours; discussion, one hour. Requisite: course 250A. Multivariate analysis as used in biological and medical situations. Topics from multivariate distributions, component analysis, factor analysis, discriminant analysis, MANOVA, MANCOVA, longitudinal models with random coefficients. S/U or letter grading.

256. Advanced Mathematical Statistics. (4). Lecture, three hours; discussion, one hour. Requisites: courses 202A, 202B, 255. Survey of advanced topics in mathematical statistics, with special emphasis on applications to biostatistics. Topics include finite sample and asymptotic criteria in decision theory, basic concepts from empirical processes theory, minimum distance estimation in parametric and nonparametric models, minimax and Bayes procedures, testing hypotheses and confidence procedures for discrete and continuous data. S/U or letter grading.

M272. Theoretical Genetic Modeling. (4). (Same as Biomathematics M207A and Human Genetics M207A.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 115A, 131A, Statistics 100B. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

285. Advanced Topics: Recent Developments. (4). Lecture, three hours; discussion, one hour. Advanced topics and developments in biostatistics not covered in Biostatistics M210 through 219 or 270 through 276 or in other courses. Possible topics include time-series analysis, classification procedures, correspondence analysis, etc. S/U or letter grading.

296. Seminar: Research Topics in Biostatistics. (1 to 4). Seminar, two hours. Advanced study and analysis of current topics in biostatistics. Discussion of current research and literature during the semester, speciality of faculty member teaching course. S/U grading.

400. Field Studies in Biostatistics. (2 or 4). Fieldwork, to be arranged. Field observation and studies in selected community organization to promote medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; 4 units may be applied toward 44-unit minimum total required for M.P.H. degree. Letter grading.

402A. Principles of Biostatistical Consulting. (2). Lecture, one hour; discussion, one hour. Requisite: course 100B or 110B. Introduction to practical issues in management and analysis of data using SAS programming language. Cross-sectional and longitudinal population-based data sets to be used throughout to illustrate principles of data management and analysis for addressing biomedical and health-related hypotheses. Letter grading.

405. Applied Multivariate Biostatistics. (4). Lecture, three hours; laboratory, one hour. Preparations: at least two upper division research courses. Requisites: course 100B. Use of multiple regression, principal components, factor analysis, discriminant function analysis, logistic regression, and canonical correlation in biomedical data analysis. S/U (optional only for nondivision majors) or letter grading.

409. Doctoral Statistical Consulting Seminar. (2). Seminar, one hour; laboratory, four hours. Designed for graduate students. Development of experience and expertise in collaborating with faculty in Schools of Public Health and Medicine. Students meet with investigators and develop design and protocol for data analysis, implement data protocol when data is obtained, and write up study with lead investigators. S/U grading.

410. Statistical Methods in Clinical Trials. (4). Lecture, three hours; discussion, two hours. Requisites: course 200A, 100B. Designed to assess antitumor response; randomization, historical controls, p-values, size of study, and stratification in human experimentation; various types of controls; prognostic factors, survivorship studies, and design of prognostic studies; organization of clinical trials—administration, comparability, protocols, clinical standards, data collection and management. S/U (optional only for nondivision majors) or letter grading.

412. Statistical Methods for Case-Control Studies. (4). Lecture, three hours. Requisite: course 200A. Statistical designs, sampling statistics, and analytic models of case-control studies. Special topics such as exploratory analyses, multiplicity of analyses, cross-validation, small sample performances of variance estimators, measurement error in covariates, and incomplete data. S/U or letter grading.

413. Introduction to Pharmaceutical Statistics. (4). Lecture, three hours; discussion, one hour. Requisites: courses 100A, 100B. Exploration of various types of statistical techniques used in pharmaceutical and related industries. Topics include bioassay and other assay techniques (e.g., ELISAs and FACS analysis), quality control techniques, and pharmacokinetic and pharmacodynamic modeling. S/U or letter grading.

419. Special Topics: Applied Statistics. (4). Lecture, three hours; discussion, one hour. Requisite: course 100B. Special topics in applied statistics not covered in other courses in professional series. S/U or letter grading.

495. Teacher Preparation in Biostatistics. (2). Seminar, two hours. Preparation: consent of UCLA graduate advisor. Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. To be arranged. Preparation: consent of UCLA graduate advisor. Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8). Tutorial, to be arranged. Enforced requisites: courses 110A, 110B, 400, 402A. Students meet weekly with their advisor and also work independently on their proposed project. Course fosters abilities of students to select relevant design and analysis techniques, synthesize knowledge, and apply insights to address public health problems. Oral examination and written report describing how students have used biostatistical methods to assess data from public health study required. May be repeated for credit. S/U grading.

595. Effective Integration of Biostatistical Concepts in Public Health Research. (4). Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research. (2 to 8). Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H., and M.S. minimum total course requirement. May be repeated for credit. Letter grading.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 12). Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research. (2 to 12). Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**Scope and Objectives**

The Department of Chemical and Biomolecular Engineering conducts undergraduate and graduate programs of teaching and research that focus on the areas of biomolecular engineering, systems engineering, and advanced materials processing and span the general themes of energy/environment and nanotechnology. Students are expected to be able to design a chemical or biological system, component, or process that meets technical and economical design objectives, with consideration of environmental, social, and ethical issues, as well as sustainable development goals. In addition, they should be able to apply their knowledge of mathematics, physics, chemistry, biology, and chemical and biological engineering to analysis and design of chemical and biochemical processes and products; function on multidisciplinary teams; identify, formulate, and solve complex chemical and biological engineering problems; and communicate effectively, both orally and in writing.

**Chemical Engineering B.S. Capstone Major**

The chemical engineering curricula provide a high quality, professionally oriented education in modern chemical engineering. The biomedical engineering, biomolecular engineering, environmental engineering, and semiconductor manufacturing engineering options provide students an opportunity for exposure to a subfield of chemical and biomolecular engineering. In all cases, balance is sought between engineering science and practice.

**Chemical Engineering Core Option**

**Preparation for the Major**

Required: Chemical Engineering 10; Chemistry and Biochemistry 20A, 20B, 20L, 30A, 30AL, 30B; Civil and Environmental Engineering M20 or Mechanical and Aerospace Engineering M20; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1c, 14AL, 48L.

**The Major**

Environmental Engineering Option
Preparation for the Major
Required: Chemical Engineering 10; Chemistry and Biochemistry 20A, 20B, 20L, 30A, 30AL, 30B; Civil and Environmental Engineering M20 or Mechanical and Aerospace Engineering M20; Life Sciences 2, 3; Chemistry 101A, 101B, 101C, 102A, 102B, 103, 104A, 104B, 106, 107, 109, Atmospheric and Oceanic Sciences 104, Chemistry and Biochemistry 113A, 153A; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; two capstone analysis and design courses (Chemical Engineering 108A, 108B) and two elective courses (8 units) from Chemical Engineering 113, 118, 119, 121, 125, 126, 135, 1340.

For information on University and general education requirements, see the College and Schools section earlier in this catalog.

Biomedical Engineering Option
Preparation for the Major
Required: Chemical Engineering 100, 101A, 101B, 101C, 102A, 102B, 103, 104A, 104B, 106, 107, 109, Chemistry 113A, 153A; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; two capstone analysis and design courses (Chemical Engineering 108A, 108B); and one biomedical elective course (4 units) from Chemical Engineering C115, C121, C124, C125, CM127, C135, or CM145 (another chemical engineering elective may be substituted for one of these with approval of the faculty adviser).

For information on University and general education requirements, see the College and Schools section earlier in this catalog.

Biomolecular Engineering Option
Preparation for the Major
Required: Chemical Engineering 100, 101A, 101B, 101C, 102A, 102B, 103, 104A, 104B, 106, 107, 109, Chemistry and Biochemistry 113A, 153A; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; two capstone analysis and design courses (Chemical Engineering 108A, 108B); and two elective courses (8 units) from Chemical Engineering 113, 118, 119, 121, 125, 135, C140 (another chemical engineering elective may be substituted with approval of the faculty adviser).

For information on University and general education requirements, see the College and Schools section earlier in this catalog.

Graduate Degrees
The Department of Chemical and Biomolecular Engineering offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Chemical Engineering.

Chemical Engineering
Lower Division Courses
2. Technology and Environment. (4). Lecture, four hours; outside study, eight hours. Natural and anthropogenic flows of materials at global and regional scales. Case studies of natural cycles include global warming (CO2), cycles, stratospheric ozone depletion (chlorine and ozone cycles), and global nitrogen cycles. Flow of materials in industrial economies compared and contrasted with natural flows; presentation of lifecycle methods for evaluating environmental impact of processes and products. P/NP or letter grading.

10. Introduction to Chemical and Biomolecular Engineering. (5). Lecture, four hours; outside study, two hours. General introduction to field of chemical and biomolecular engineering. Description of how chemical and biomolecular engineering analysis and design skills are applied for creative solution of current technological problems in production of microelectronic devices, design of chemical plants for minimum environmental impact, application of nanotechnology to chemical sensing, and genetic-level design of recombinant microbes for chemical synthesis. Letter grading.

Upper Division Courses
100. Fundamentals of Chemical and Biomolecular Engineering. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: Mathematics 32B (may be taken concurrently), P/NP. Introduction to analysis and design of industrial chemical processes. Material and energy balances. Introduction to programming in MATLAB. Letter grading.

101C. Mass Transfer. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: course 101B. Introduction to analysis of mass transfer in systems of interest to chemical engineering practice. Fundamentals of mass species transport. Fick law of diffusion, diffusion in chemically reacting flows, interphase mass transfer, multicomponent systems. Letter grading.

102A. Thermodynamics I. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Introduction to thermodynamics of chemical and biological processes. Work, energy, heat, and first law of thermodynamics. Second law, extremum principles, entropy, and free energy. Ideal and real gases, property evaluation. Thermodynamics of flow systems. Applications of first and second laws in biological processes and living organisms. Letter grading.

103. Separation Processes. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: courses 100, 101B. Application of principles of thermodynamics and momentum transport to design and operation of separation processes such as distillation, gas absorption, filtration, and reverse osmosis. Letter grading.

104A. Chemical and Biomolecular Engineering Laboratory II. (4). Formerly numbered 104AL. Lecture, two hours; laboratory, six hours; outside study, four hours. Enforced requisite: course 100. Enforced corequisite: course 101B. Recommended: course 102B. For students who have completed the full Design and Performance of one original experimental study involving transport, separation, or another aspect of chemical and biomolecular engineering. Basic statistical theory needed. May be repeated for credit. Writing of sections of technical reports and their contents; writing clearly, concisely, and consistently; importance of word choices and punctuation in multilingual engineering environments and of following required formatting. Letter grading.

104B. Chemical and Biomolecular Engineering Laboratory II. (8). Lecture, four hours; laboratory, eight hours; outside study, four hours; other, two hours. Enforced requisites: courses 101C, 103, 104A. Course consists of four experiments in chemical engineering unit operations, each of two weeks duration. Students present their results both written and orally. Written report includes sections on theory, experimental procedures, scaleup and process design, and error analysis. Letter grading.

104C. Semiconductor Processing. (3). Lecture, four hours; outside study, one hour. Enforced requisite: course 101C. Enforced corequisite: course 104CL. Basic engineering principles of semiconductor unit operations, including fabrication and characterization of semiconductor devices. Investigation of processing steps used to make CMOS devices, including wafer cleaning, oxidation, diffusion, lithography, chemical vapor deposition, plasma etching, metallization, and statistical design of experiments and 3σ analysis. Presentation of student results in both written and oral form. Letter grading.

104CL. Semiconductor Processing Laboratory. (3). Laboratory, four hours; outside study, five hours. Enforced requisite: course 101C. Enforced prerequisite: course 104C. Series of experiments that emphasize basic engineering principles of semiconductor unit operations, including fabrication and characterization of semiconductor devices. Investigation of processing steps used to make CMOS devices, including wafer cleaning, oxidation, diffusion, lithography, chemical vapor deposition, plasma etching, and metallization. Hands-on equipment includes transistors, diodes, and capacitors. Letter grading.

107. Process Dynamics and Control. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: courses 101C, 103 or 125, 106 or C115. Principles of dynamics modeling and start-up behavior of chemical engineering processes. Design and applications of chemical process computer control. Letter grading.

108A. Process Economics and Analysis. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: courses 103 or (125), 104A, 106 or (C115). Integration of chemical engineering fundamentals such as transport phenomena, thermodynamics, operations, and reaction engineering and simple economic principles for purpose of designing chemical processes and evaluating alternatives. Letter grading.

108B. Chemical Process Computer-Aided Design and Analysis. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: courses 103 or (C125), 106 or (C115), 108A. Civil and Environmental Engineering M20 (or Mechanical and Aerospace Engineering M20), Introduction to application of some mathematical and computing methods to chemical engineering design problems; use of simulation programs as automated method of performing steady state material and energy balance calculations. Letter grading.

109. Numerical and Mathematical Methods in Chemical and Biological Engineering. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 101C. Civil and Environmental Engineering M20 or Mechanical and Aerospace Engineering M20, Enforced corequisite: course 101A. Numerical methods for computation of solution of systems of linear algebraic equations, ordinary differential equations, and partial differential equations. Chemical and biomolecular engineering examples used throughout to illustrate application of these methods. Use of MATLAB as platform (programming environment) to write programs based on numerical methods to solve various problems arising in chemical engineering. Letter grading.

110. Intermediate Engineering Thermodynamics. (4). Lecture, four hours; outside study, eight hours. Enforced requisite: course 102B. Principles and engineering applications of statistical and phenomenological thermodynamics. Engineering applications of partition function in terms of simple molecular models and spectroscopic data; nonideal gases; phase transitions and adsorption; nonequilibrium thermodynamics and coupled transport. Letter grading.

111. Cryogenics and Low-Temperature Processes. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: courses 102A, 102B (or Materials Science 130). Fundamentals of cryogenics and cryogenic engineering science pertaining to industrial low-temperature processes. Basic approaches to analysis of cryofluids and envelopes needed for operation of cryogenic systems; low-temperature refrigeration, liquefaction, compression, and storage. Cryogenic surfaces and other special conditions. Concurrently scheduled with course C211. Letter grading.

113. Air Pollution Engineering. (4). Lecture, four hours; preparation, four hours; outside study, seven hours. Enforced requisites: courses 101C, 102B, Integrated approach to air pollution, including concentration of atmospheric pollutants, air pollution standards, and pollution sources and control technology, and relationship of air quality to emission sources. Links air pollution to multimedia environmental assessment. Letter grading.

114. Electrochemical Processes and Corrosion. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 102A, 102B (or Materials Science 130), Fundamentals of electrochemistry and engineering applications to industrial electrochemical processes and metallic corrosion. Primary emphasis on fundamental approach to analysis of electrochemical and corrosion processes. Specific topics include corrosion of metals and semiconductors, metal and semiconductor surface finishing, passivity, electrodeposition, electrolecution, batteries and fuel cells, electrochemistry and bioelectrochemical processes. May be concurrently scheduled with course C214. Letter grading.

115. Biochemical Reaction Engineering. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 101C. Use of previously learned concepts of biophysical chemistry, thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. May be concurrently scheduled with course CM215. Letter grading.

116. Surface and Interface Engineering. (4). Lecture, four hours; discussion, one hour; outside study, five hours. Enforced requisite: course 101A. Microscopic and nanoscopic view of solid-state electronic devices. Topics include classification of crystals and surfaces, analysis of structure and composition of crystals and their surfaces and interfaces. Examination of engineering applications, including catalytic surfaces, interfaces in microelectronics, and molecular electronics. Concurrently scheduled with course C216. Letter grading.

C212. Membrane Science and Technology. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: courses 101A, 101C, 103. Fundamentals of membrane science and technology, separations at micro, nano, and molecular/angstrom scale with membranes. Relationship between structure/morphology of dense and porous membranes and their
separation characteristics. Use of nanotechnology for design of selective membranes and models of membrane transport (flux and selectivity). Examples provided from various fields/applications, including bioengineering, microelectronics, chemical processes, sensors, and biomedical devices. Concurrently scheduled with course C221. Letter grading.

C124. Cell Material Interactions. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Life Sciences 2, 3, 23L. Introduction to design and synthesis of biomaterials for regenerative medicine, tissue culture, and drug delivery. Biological principles of cellular microenvironment and design of extracellular matrix analogs using biological and engineering principles. Biomaterials for growth factor delivery and gene delivery and their application in tissue engineering and cellular imaging. May be concurrently scheduled with course CM245. Letter grading.

188. Special Courses in Chemical Engineering. (4). Seminar, four hours outside study, eight hours. Special topics in chemical engineering for undergraduate students who are part of research group. Discussion of research methods and current literature in field. May be repeated for credit with instructor change. Letter grading.

194. Research Group Seminars: Chemical Engineering. (4). Seminar, four hours; outside study, eight hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field. May be repeated for credit with instructor change. Letter grading.

199. Directed Research in Chemical Engineering. (2 to 8). Tutorial, to be arranged. Limited to juniors and seniors. Supervised individual research or investigation of selected topic under guidance of faculty mentor. Culmination of project is required. May be repeated for credit with school approval. Individual contract required; enrollment petitions available in Office of Academic and Student Affairs. Letter grading.

Graduate Courses

200. Advanced Engineering Thermodynamics. (4). Lecture, four hours; outside study, eight hours. Requisite: course 102B. Phenomenological and statistical thermodynamics of chemical and physical systems with emphasis on materials science and chemical engineering applications. Presentation of role of atomic and molecular spectra and intermolecular forces in interpretation of thermodynamic properties of gases, liquids, solids, and plasmas. Letter grading.

201L. Materials for Fuel Cells. (4). Lecture, four hours; outside study, eight hours. Requisite: course 200 or Chemistry C223A or Physics 215A. Modern simulation techniques for classical molecular systems. Monte Carlo and molecular dynamics in various ensembles. Applications to liquids, solids, and polymers. Letter grading.

211L. Cryogenic and Low-Temperature Processes. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 102A, 102B (or Materials Science 130). Fundamentals of cryogenics and cryoenineering science pertaining to industrial low-temperature processes. Basic approaches to analysis of cryofluids and envelopes needed for operation of cryogenic systems; low-temperature behavior of matter, optimization of cryosystems and other special conditions. Concurrently scheduled with course C111. Letter grading.

214. Electrochemical Processes and Corrosion. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 102A, 102B (or Materials Science 130). Fundamentals of electrochemistry and engineering applications to industrial electrochemical processes and metallic corrosion. Primary emphasis on fundamental approach to analysis of electrochemical and corrosion processes. Specific topics include corrosion of metals and semiconductor, electrochemical metal and semiconductor surface finishing, passivity, electrodeposition, electrodesposition, batteries and fuel cells, electrochemistry and biochemical processes. May be concurrently scheduled with course C115. Letter grading.

CM215. Biomedical Reaction Engineering. (4). (Same as Bioengineering M215.) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 101C. Use of previously learned concepts of chemical thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. May be concurrently scheduled with course C115. Letter grading.

C216. Surface and Interface Engineering. (4). Lecture, four hours; discussion, one hour; outside study, eight hours. Enforced requisite: Chemistry 113A. Introduction to surfaces and interfaces of engineering materials, particularly catalytic surface and thin films for solid-state electronic devices. Topics include classification of crystals and surfaces, analysis of structure and composition of crystals and their surfaces and interfaces. Examination of engineering applications, including catalytic surfaces, interfaces in microelectronics, and solid-state laser. May be concurrently scheduled with course C116. Letter grading.

217. Electrochemical Engineering. (4). Lecture, four hours; outside study, eight hours. Requisite: course C114. Transport phenomena in electrochemical systems; relationships between molecular transport, convective and electrode kinetics, along with applications to industrial processes to industrial processes and technologies involving design, and modern battery technology. Letter grading.

220. Advanced Mass Transfer. (4). Lecture, four hours; outside study, eight hours. Requisite: course 101C. Advanced treatment of mass transfer, with applications to industrial separation processes, gas cleaning, pulmonary bioengineering, controlled release systems, and reactor design; molecular and constitutive theories of diffusion, interfacial transport, membrane transport, convective mass transfer, concentration boundary layers, turbulent transport. Letter grading.

C221. Membrane Science and Technology. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisites: courses 101A, 101C, 103. Fundamentals of membrane science and technology, with emphasis on separations at micro, nano, and molecular/angstrom scale with membranes. Relationship between structure and morphology of dense and porous membranes and their separation characteristics. Use of nanotechnology for design of selective membranes and models of membrane transport (flux and selectivity) provided from various fields/applications, including bioengineering, microelectronics, chemical processes, sensors, and biomedical devices. Concurrently scheduled with course C121. Letter grading.

223. Design for Environment. (4). Lecture, four hours; outside study, eight hours. Limited to graduate chem- ical engineering, materials science and engineering, or Master of Engineering program students. Design of products for meeting environmental objectives; life- cycle inventories; lifecycle impact assessment; design for energy efficiency; design for waste minimization, computer-aided design tools, materials selection methods. Letter grading.

CM225. Bioseparations and Bioprocess Engineer- ing. (4). (Same as Bioengineering M225.) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced corequisite: course 101C. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biological reac- tors. Concurrently scheduled with course C125. Letter grading.

CM227. Synthetic Biology for Biofuels. (4). (Same as Chemistry CM227.) Lecture, four hours; discus- sion, one hour; outside study, seven hours. Requi- sites: Course CM103 or Life Sciences 3 or 23L. En- gineering microorganisms for complex phenotype is common goal of metabolic engineering and synthetic biology. Production of advanced biofuels involves de- signing and constructing novel metabolic networks in cells. Such efforts require profound understanding of biochemistry, protein structure, and biological regula- tion and are aided by tools in bioinformatics, sys- tems biology, and molecular biology. Fundamentals of metabolic biochemistry, protein structure and func- tion, and bioinformatics. Use of systems modeling for metabolic networks to design microorganisms for en- ergy production. Concurrently scheduled with course CM127. S/U or letter grading.

234. Plasma Chemistry and Engineering. (4). Le- cture, four hours; outside study, eight hours. Designed for graduate students. Fundamentals of Appli- cation of chemistry, physics, and engineering princi- ples to design and operation of plasma and ion-beam reactors used in etching, deposition, oxidation, and etching of materials. Examination of atomic, molecu- lar, and ionic phenomena involved in plasma and ion-beam processing of semiconductors, etc. Letter grading.

C235. Advanced Process Control. (4). Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: course 107. Introduction to advanced process control. Topics include (1) Lyapu- nov stability for autonomous nonlinear systems in- cluding converse theorems, (2) input to state stability, interconnection systems, and small gain theorems, (3) design of nonlinear and robust controllers for various classes of nonlinear systems, (4) model predictive control, linear systems, (5) advanced methods for tuning of classical controllers, and (6) in- troduction to control of distributed parameter sys- tems. Concurrently scheduled with course C135. Letter grading.

236. Chemical Vapor Deposition. (4). Lecture, four hours; outside study, eight hours. Enforced requisites: courses 210, 221E. Chemical vapor deposition is widely used to deposit thin films that comprise microelectronic de- vices. Topics include reactor design, transport phe- nomena, gas and surface chemical kinetics, structure and composition of deposited films, and relationship between process conditions and film properties. Letter grading.

C240. Fundamentals of Aerosol Technology. (4). Lecture, four hours; outside study, eight hours. En- forced requisite: course 101C. Technology of particle/ gas systems with applications to (1) gas depolymerization of fine particles, and catalysis. Particle transport and deposition, optical properties, experimental methods, dynamics and control of par- ticle formation, are concurrently scheduled with course C140. Letter grading.

CM245. Molecular Biotechnology for Engineers. (4). (Same as Bioengineering CM245.) Lecture, four hours; discussion, one hour; outside study, seven hours. Enforced requisite: Life Sciences 3, 23L. Selected topics in molecular biology that form foundation of biotechnology and biomedical industry today. Topics include recombinant DNA technology, molecular re- search, tools, protein expression, in vitro selection, di- rected mutagenesis and protein engineering, DNA- based diagnostics and DNA microarrays, antibody and protein-based diagnostics, genomics and bioin- formatics, isolation of human genes, gene therapy, and tissue engineering. Concurrently scheduled with course CM145. Letter grading.

250. Computer-Aided Chemical Process Design. (4). Lecture, four hours; outside study, eight hours. Requisite: course 108B. Application of optimization methods in chemical process design; computer aids in process engineering; process modeling; systematic flowsheet invention; process synthesis; optimal de- sign and operation of large-scale chemical processing systems. Letter grading.

270. Principles of Reactor and Transport Phe- nomena. (4). Lecture, four hours; laboratory, eight hours. Fundamentals in transport phenomena, chem- ical reaction kinetics, and thermodynamics at molecu- lar level. Topics include Boltzmann equation, micro- scopic chemical kinetics, transition state theory, and statistical analysis. Examination of applications and calculations related to state-of-art research areas in chem- ical engineering. Letter grading.

270R. Advanced Research in Semiconductor Manufactur- ing. (6). Laboratory, nine hours; outside study, nine hours. Limited to graduate chemical engineering students in M.S. semiconductor manufacturing op- tion. Supervised research in processing semicon- ductor materials and devices. Letter grading.

M280A. Linear Dynamic Systems. (4). (Same as Electrical Engineering M280A and Mechanical and Aerospace Engineering M270A.) Lecture; four hours; outside study, eight hours. Requisite: Electrical Engi- neering 141 or Mechanical and Aerospace Engi- neering 141 or Aerospace Engineering M272A. State-space representations of linear systems: time- invariant (LTI) and time-varying (LTV) systems in con- tinuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Jordan/Hamiltonian form, solution of state equations; stability, controllability, ob- servability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function tech- niques. Letter grading.

283C. Analysis and Control of Infinite Dimensional Systems. (4). Lecture, four hours; outside study, eight hours. Requisites: courses M280A, M282A. Designed for graduate students. Introduction to advanced dynamical analysis and controller synthesis methods for nonlinear infinite dimensional systems. Topics include (1) linear operator and stability theory (basic results on Banach and Hilbert spaces, semigroups, convergence theory in function spaces), (2) nonlinear model reduction (linear and nonlinear Galerkin method, proper orthogonal decomposition), (3) nonlinear and robust control of nonlinear hyperbolic and parabolic partial differential equations (PDEs), (4) applications to transport-reaction processes. Letter grading.
290. Special Topics. (2 to 4). Seminar, four hours. Requisites for each offering announced in advance by department. Advanced and current study of one or more aspects of chemical engineering, such as chemical process dynamics and control, fuel cells and batteries, membrane transport, advanced chemical engineering analysis, polymers, optimization in chemical process design. May be repeated for credit with topic change. Letter grading.
M297. Seminar: Systems, Dynamics, and Control Topics. (2). Same as Electrical Engineering M248S and Mechanical and Aerospace Engineering M299A.) Seminar, two hours; outside study, six hours. Limited to graduate engineering students. Presentations of research topics by leading academic researchers from fields of systems, dynamics, and control. Students who work in these fields present their papers and results. S/U grading.
298A-298Z. Research Seminars. (2 to 4 each). Seminar, to be arranged. Requisites for each offering announced in advance by department. Lectures, discussions, student presentations, and projects in areas of current interest. May be repeated for credit. S/U grading.
299. Departmental Seminar. (2). Seminar, two hours. Limited to graduate chemical engineering students. Seminars by leading academic and industrial chemical engineers on development or application of recent technological advances in discipline. May be repeated for credit. S/U grading.
375. Teaching Apprentice Practicum. (1 to 4). Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.
495A. Teaching Assistant Training Seminar. (2). Seminar, two hours; outside study, four hours; one-day intensive training at beginning of Fall Quarter. Limited to graduate chemical engineering students. Required of all new teaching assistants. Special seminar on communicating chemical engineering principles, concepts, and methods; teaching assistant preparation, organization, and presentation of material, including use of grading, advising, and rapport with students. S/U grading.
495B. Teaching with Technology for Teaching Assistants. (2). Seminar, two hours; outside study, four hours. Limited to graduate chemical engineering students. Designed for teaching assistants interested in learning more about effective use of technology and ways to incorporate that technology into their classrooms for benefit of student learning. S/U grading.
596. Directed Individual or Tutorial Studies. (2 to 8). Tutorial, to be arranged. Limited to graduate chemical engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

Jeffrey I. Zink, Ph.D.

**Professors Emeriti**

Frank A.L. Anet, Ph.D.

Daniel E. Atkinson, Ph.D.

Kyle D. Bayes, Ph.D.

Paul M. Beyer, Ph.D. (Nobel laureate)

Richard E. Dickerson, Ph.D.

Mostafa A. El-Sayed, Ph.D.

Jay D. Gralla, Ph.D.

E. Russell Hardwick, Ph.D.

M. Frederick Hawthorne, Ph.D.

Charles K. Hobart, Ph.D.

Charles A. West, Ph.D.

**Associate Professors**

Delory A. Baugh, Ph.D.

Paul J. Dion, Ph.D.

Yung-Ya Lin, Ph.D.

Craig A. Merlic, Ph.D.

**Assistant Professors**

Anastassia N. Alexandrova, Ph.D.

Louis S. Bouchard, Ph.D.

Sriram Kosuri, Ph.D., (Linda and Fred Wudl Professor)

Margot E. Quinlan, Ph.D., (John F. Endowed Professor of Molecular Biology and Biophysics)

Jorge Torres, Ph.D. (John McTague Career Development Professor of Chemistry and Biochemistry)

**Senior Lecturer S.O.E.**

Arlene A. Russell, Ph.D.

**Senior Lecturers**

Steven A. Hardinger, Ph.D.

Laurence Lavelle, Ph.D.

**Lecturer**

Erik R. Scrib, Ph.D.

**Adjunct Professors**

R. Stanley Williams, Ph.D.

Omar M. Yaghi, Ph.D.

**Scope and Objectives**

Chemistry is concerned with the composition, structure, and properties of substances, the transformations of these substances into others by reactions, and the kinds of energy changes that accompany these reactions. The Department of Chemistry and Biochemistry is organized in four interrelated and overlapping...
subdisciplines that deal primarily with the chemistry of inorganic substances (inorganic chemistry), the chemistry of carbon compounds (organic chemistry), the chemistry of living systems (biochemistry), and the physical behavior of substances in relation to their structures and chemical properties (physical chemistry). The Chemistry/Materials Science major is designed for students who are interested in the applications of chemistry for the design, synthesis, and study of new materials.

**Undergraduate Study**

**Admission**

Students entering UCLA directly from high school who declare a Chemistry, Biochemistry, or Chemistry/Materials Science major at the time of application are automatically admitted to that major.

UCLA students who wish to enter one of the majors must have a minimum grade of C– in each of the preparation for the major courses completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed courses for the major must also average at least 2.0.

**Transfer Students**

Transfer applicants to the departmental majors with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general chemistry with laboratory for majors, one and one half years of calculus, and either one year of calculus-based physics with laboratory or one year of organic chemistry for majors. Biochemistry majors must also complete courses equivalent to Life Sciences 2 and 3; Chemistry majors should have completed the equivalent of Mathematics 32B; Chemistry/Materials Science majors in the organic materials concentration must complete a full year of organic chemistry with laboratory in addition to the other courses listed above.

Entering transfer students who have successfully completed a year course (including laboratory) in general college chemistry intended for science and engineering students should enter course 30A. Transfer students should consult the Undergraduate Advising Office in 4006 Young Hall for assistance with the articulation of transfer coursework.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm转让guide.htm](http://www.admissions.ucla.edu/prospect/adm转让guide.htm) for up-to-date information regarding transfer selection for admission.

**Advanced Placement in Chemistry**

Students who have taken the Advanced Placement (AP) Chemistry Examination and obtained a score of 4 or 5 receive 8 units of chemistry credit and may petition for chemistry and biochemistry equivalency, or may take course 20A at UCLA. If students received a score of 3 on the AP Chemistry Examination, they receive 8 units of chemistry credit but no course equivalency.

**Credit Limitations**

Students may not take or repeat a chemistry or biochemistry course for credit if it is a prerequisite for a more advanced course for which they already have credit. This applies in particular to the repetition of courses (e.g., if students wish to repeat Chemistry and Biochemistry 20A, they must do so before completing course 20B).

**Undergraduate Majors**

The department offers four majors: Chemistry (with concentrations in chemistry and physical chemistry), Biochemistry, General Chemistry, and Chemistry/Materials Science. The Chemistry and Biochemistry majors are designed to prepare students for graduate studies in each field, for entry into professional schools in the health sciences, and for careers in industries and businesses that depend on chemically and biochemically based technology. The General Chemistry major is intended for students who wish to acquire considerable chemical background in preparation for careers outside chemistry. The Chemistry/Materials Science major provides appropriate preparation for graduate study in fields that emphasize research involving chemistry, engineering, and applied science.

Each course used to fulfill any of the requirements for any of the departmental majors must be taken for a letter grade. Seminar courses, individual study courses, and research courses (e.g., 194, 199) may not be applied toward the requirements for the majors.

Requirements for the majors are outlined below. For additional information, contact the Undergraduate Advising Office in 4006 Young Hall.

**Chemistry B.S.**

The Chemistry major is for students who intend to pursue a career in chemistry.

**Chemistry Concentration**

**Preparation for the Major**

Required: Chemistry and Biochemistry 20A (or 20AH), 20B (or 20BH), 20L, 30A, 30AL, 30B, 30BL, 30C, 30CL; Mathematics 31A, 31B, 32A, 32B, 32B, 33B; Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 4BL.

**The Major**

Required: Chemistry and Biochemistry 110A, either 110B or 111B, 113A, 114 (or 114H), either 136 or 144, 153A, 153L, 171, 172, and two other upper division or graduate courses in the department, including at least one additional laboratory course from 136, 144, 154, C174, 184, 185.

**Physical Chemistry Concentration**

The physical chemistry concentration is designed primarily for students who are interested in attending graduate school in physical chemistry/physics or related areas.

**Preparation for the Major**

Required: Chemistry and Biochemistry 20A (or 20AH), 20B (or 20BH), 20L, 30A, 30AL, 30B, 30BL, 30C, 30CL; Mathematics 31A, 31B, 32A, 32B, 33B; Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 4BL.

**The Major**

Required: Chemistry and Biochemistry 110A, 110B, 113A, 113B, 114 (or 114H), 153A, 171, 172; one additional upper division chemistry, electrical engineering, or physics laboratory course; and three elective upper division or graduate courses approved by the physical chemistry adviser. Refer to the Undergraduate Advising Office website at [http://www.chemistry.ucla.edu/undergraduate](http://www.chemistry.ucla.edu/undergraduate) for a list of approved electives.

By the junior year, students are strongly encouraged to join a research group within the physical chemistry division to obtain firsthand experience with state-of-the-art physical chemistry research.

**Biochemistry B.S.**

The Biochemistry major is for students preparing for careers in biochemistry or other fields requiring extensive preparation in both chemistry and biology.

**Preparation for the Major**

Required: Chemistry and Biochemistry 20A (or 20AH), 20B (or 20BH), 20L, 30A, 30AL, 30B, 30BL, 30C, 30CL; Life Sciences 2, 3, 4; Mathematics 31A, 31B, 32A (33A strongly recommended); Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH) and 4BL, or 6A, 6B, and 6C (or 6AH, 6BH, and 6CH).

**The Major**

Required: Chemistry and Biochemistry 110A, 153A, 153B, 153C, 153L, 154, 156; one additional upper division or graduate course in chemistry and biochemistry; and three elective upper division or graduate courses (12 units) approved by the undergraduate adviser (Microbiology, Immunology, and Molecular Genetics 101 highly recommended). Refer to the Undergraduate Advising Office website at [http://www.chemistry.ucla.edu/undergraduate](http://www.chemistry.ucla.edu/undergraduate) for a list of approved electives.

**General Chemistry B.S.**

The General Chemistry major is for students who wish to acquire considerable chemical background in preparation for careers outside chemistry. The requirements are accordingly quite flexible. The major may be appropriate for some students who plan to enter professional schools, such as those of pharmacy, dentistry, or public health. This major cannot be taken as part of a double major. Students must declare the major before reaching 135 units.

**Preparation for the Major**

Required: Chemistry and Biochemistry 20A (or 20AH), 20B (or 20BH), 20L, 30A, 30AL, 30B, 30BL, 30C, 30CL; Mathematics 31A, 31B, 32A, 32B, 33B; Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 4BL.
Students must complete the preparation courses with at least a 2.0 grade-point average.

The Major
Required: Chemistry and Biochemistry 110A, 153A, 153L, 171; three additional upper division courses in the department (at least one must be a laboratory course); six additional upper division courses. A 2.0 grade-point average is required in all upper division courses in the department. Acceptance into the major is based on an original written proposal that is coherent in terms of student interests and objectives. The proposal should specify which courses students plan to apply toward the major and requires the approval of the faculty adviser.

Chemistry/Materials Science B.S.
The Chemistry/Materials Science major is designed for students who are interested in chemistry with an emphasis on material properties and provides students the opportunity to gain expertise in both chemistry and the science and engineering in materials such as semiconductors, photonic materials, polymers, biomaterials, ceramics, and nano-scale structures. Students explore the reactivity of such materials in different environments and gain understanding of how chemical compositions affect properties. The major provides appropriate preparation for graduate studies in many fields emphasizing interdisciplinary research, including chemistry, engineering, and applied science.

Preparation for the Major
Required: Chemistry and Biochemistry 20A (or 20AH), 20B (or 20BH), 20L, 30A, 30AL, Mathemastics 31A, 31B, 32A, 32B, 32B, Physics 1A, 1B, 1C, 4BL.

The Major
Required: Chemistry and Biochemistry 110A, 113A, 171, 172 or C180 or C181, 185, 4 units from 110B, C113B, 172, C174, C175, C176, C180, C181; Materials Science and Engineering 104, 110, 110L, 120, 121, 150 or 160, 131, 8 units from C111, 121, 122, 132, 150, 160, 162, C180; 7 laboratory units from Chemistry and Biochemistry 114, 184, Materials Science and Engineering 121L, 131L, 161L. The following courses may be applied once toward the major: Chemistry and Biochemistry 110A, 110B, C181, Materials Science and Engineering 121, 150, 160.

Organic Materials Concentration
Preparation for the Major
Required: Chemistry and Biochemistry 20A (or 20AH), 20B (or 20BH), 20L, 30A, 30AL, 30B, 30BL, 30C, 30CL, Mathematics 31A, 31B, 32A, 32B, 32B, Physics 1A, 1B, 1C, 4BL.

The Major
Required: Chemistry and Biochemistry 110A, 113A, 136, 171, 185, 4 units from 110B, C113B, C143A, 144, 172, C174, C175, C176, C180, C181; Materials Science and Engineering 104, 110, 110L, 120, 150, 4 units from C111, 121, 122, 131, 132, 160, 162, CM180; 7 laboratory units from Chemistry and Biochemistry 114, 184, Materials Science and Engineering 121L, 131L, 161L.

Honors Program
Admission
The honors program provides exceptional Chemistry and Biochemistry Department majors with the opportunity to do research culminating in an honors thesis. Junior and senior majors who have completed all university-level coursework, including all preparation courses and requirements for the major, with an overall grade-point average of 3.0 or better and a 3.5 GPA or better in the required major courses, may apply for admission. Students must have the sponsorship of an approved faculty adviser.

For further information and application forms, students should consult the Undergraduate Advising Office, 4006 Young Hall, early in their educational planning. Completed applications must be submitted at least two weeks prior to the term in which students plan to begin the honors program.

Requirements
The core of the program consists of at least one approved undergraduate seminar course from Chemistry and Biochemistry 193A or 193B and three research courses (12 units minimum) from 196A, 196B, or 199, culminating in a thesis.

To qualify for graduation with departmental honors, students must satisfactorily complete all requirements for the honors program and the major and obtain a cumulative grade-point average of 3.5 or better in coursework required for the major. On recommendation of the faculty sponsor, and with the approval of the thesis by the departmental honors committee, students are awarded no honors, honors, or highest honors.

Students who have a grade-point average of 3.6 or better, both overall and in the major, and demonstrated exceptional accomplishment on the research thesis are awarded highest honors at the discretion of the departmental honors committee.

Computing Specialization
Majors in Chemistry and Biochemistry may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, and one course from 10C, 15, 20A, 30, or 60, and (3) completing two computational chemistry courses from Chemistry and Biochemistry C126A, C145, CM160A. Courses need to be completed with a combined grade-point average of at least 2.0. Students must petition for admission to the program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Undergraduate Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa /library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Chemistry and Biochemistry offers Master of Science (M.S.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Chemistry and Master of Science (M.S.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Biochemistry and Molecular Biology.

Chemistry and Biochemistry
Lower Division Courses
2. Introductory Chemistry. (4). Lecture, two hours; discussion, two hours. Not open to students with credit for course 14A or 20A. Concept of submicroscopic world of chemistry, ranging from protons to proteins in subject matter. P/NP or letter grading.

7. Nanoscience and Nanotechnology Laboratory. (2). Seminar, discussion, and laboratory, 32 hours. Limited to high school students. Key concepts of nanoscience and nanotechnology, including various approaches to nanofabrication (bottom-up and top-down). Fabrication of nanostructures and devices, collection of scientific data using those devices, analysis of data, and presentations of student results. Offered in summer only. P/NP grading.

14A. Atomic and Molecular Structure, Equilibria, Acids, and Bases. (4). Lecture, three hours; discussion, one hour. Preparation: high school chemistry or equivalent background and three and one half years of high school mathematics. Not open to students with credit for course 20A. Introduction to physical and general chemistry principles; atomic structure based on quantum mechanics; atomic properties; trends in periodic table; chemical bonding (Lewis structures, VSEPR theory, hybridization, and molecular orbital theory); gaseous and aqueous equilibria; properties of inorganic and organic acids, bases, buffers; titrations. P/NP or letter grading.

14B. Thermodynamics, Electrochemistry, Kinetics, and Organic Chemistry. (4). Lecture, three hours; discussion, one hour. Enforced requisite: course 14A with grade of C– or better. Requisite or corequisite: Life Sciences 30A or Mathematics 3A or 31A with grade of C– or better. Not open to students with credit for course 20A, 20B, or 30A. Phase changes; thermodynamics, first, second, and third laws of thermodynamics; free energy changes; electrochemistry and its role as energy source; chemical kinetics, including catalysis, reaction mechanisms, and enzymes; coordination compounds; general classes and naming of organic molecules; structure, conformations, and relative energies of organic molecules; application of thermodynamics and kinetics to organic and biochemical reactions; use of molecular modeling software to illustrate molecular structures and their relative energies. P/NP or letter grading.

14BL. General and Organic Chemistry Laboratory I. (3). Lecture, one hour; laboratory, three hours. Enforced requisite: course 14A with grade of C– or better. Enforced corequisite: course 14B. Not open to students with credit for course 20L. Introduction to volumetric, spectrophotometric, and potentiometric analysis. Use and preparation of buffers and pH me-
Course 30A. P/NP or letter grading.

14C. Structure of Organic Molecules. (4). Lecture, three hours; discussion, one hour. Enforced requisite: course 14B with grade of C– or better. Not open to students with credit for course 30A. Continuing studies in structure of organic molecules, with emphasis on biological applications. Resonance, stereochemistry, conjugation, and aromaticity; spectroscopy (NMR, IR, and mass spectrometry); introduction to effects of physical and chemical properties; survey of biomolecular structure. P/NP or letter grading.

14CL. General and Organic Chemistry Laboratory II. (4). Lecture, one hour; laboratory, six hours. Enforced requisites: courses 14B and 14BL, with grades of C– or better. Enforced corequisite: course 14C. Synthesis and analysis of compounds; purification by extraction, chromatography, recrystallization, and sublimation; characterization by mass spectroscopy, UV, NMR, and IR spectroscopy, optical activity, electrochemistry, pH titration. P/NP or letter grading.

14D. Organic Reactions and Pharmaceuticals. (4). Lecture, three hours; discussion, one hour. Enforced requisite: one hour. Enforced requisite: course 30A (or 30AH) and course 30AL, with grades of C– or better. Enforced corequisite: course 30B. Basic experimental techniques in organic synthesis (distillation, extraction, and performing reactions) and organic analytical chemistry (melting and boiling point, refractive index, chromatography, IR, NMR, GC). Single and multistep synthesis of known compounds. Organic spectros- copy, including mass spectrometry, infrared spectroscopy, and proton and carbon nuclear magnetic resonance spectroscopy. P/NP or letter grading.

30BL. Organic Chemistry Laboratory I. (3). Lecture, one hour; laboratory, four hours. Enforced requisites: courses 30A (or 30AH) and 30AL, with grades of C– or better. Enforced corequisite: course 30B. Basic experimental techniques in organic synthesis (distillation, extraction, and performing reactions) and organic analytical chemistry (melting and boiling point, refractive index, chromatography, IR, NMR, GC). Single and multistep synthesis of known compounds. Organic spectros- copy, including mass spectrometry, infrared spectroscopy, and proton and carbon nuclear magnetic resonance spectroscopy. P/NP or letter grading.

103. Environmental Chemistry. (4). Lecture, four hours; discussion, one hour. Requisites: courses 30B, 30BL, 110A, 153A (or 153AH), 153L. Chemical aspects of air and water pollution, solid waste disposal, energy resources, and pesticides. Chemical re- actions in environment and effect of chemical pro- cesses on environment. P/NP or letter grading.

105. Introduction to Chemistry of Biology. (4). Lecture, three hours; discussion, one hour. Enforced requisite: course 153A with grade of C– or better. In- troduction to chemical biology. Topics include com- putational chemical biology, utility of synthesis in bio- chemical research, peptidomimetics, designed re- agents for cellular imaging, natural product biosynthesis, protein engineering and directed evolu- tion, cell biology of metal ions, metal-containing drugs. Concurrently scheduled with course C200. P/NP or letter grading.

Chemistry and Biochemistry / 211

C100. Genomics and Computational Biology. (5). Lecture, three hours; discussion, one hour. Enforced requisite: course 153B. Molecular Cell, and Developmental Biology 144, or 165B. Intro- duction for biochemistry students of technologies and experimental data of genomics, as well as computa- tional tools for analyzing them. Biochemistry and mo- lecular biology dissected life into its component parts, one gene at a time, but lacked integrative mechanisms for putting this information back together to predict in- teractions across whole organisms, populations, and species. Spectral computational tools such as database becomes essential daily activity for biomedical scientists. Core principles and methodologies for analyzing genomics data to answer biological and medical questions, with focus on concepts that guide data analysis rather than algorithm details. Concurrently scheduled with course C200. P/NP or letter grading.

Upper Division Courses

110A. Physical Chemistry: Chemical Thermody- namics. (4). Lecture, three hours; discussion, one hour; tutorial, one hour. Requisites: course 20B, Mathematics 32A or 3C (for life sciences majors), Physics 1A, 1B, and 1C (may be taken concurrently), or 1AH, 1BH, and 1CH (may be taken concurrently), or 1A, 2A, and 6C (may be taken concurrently). Fundamentals of thermodynamics, chemical and phase equilibria, thermodynamics of solutions, electrochemistry. P/NP or letter grading.

113A. Physical Chemistry: Introduction to Quantum Mechanics. (4). Lecture, three hours; discussion, one hour; tutorial, one hour. Requisites: course 20B, Mathematics 32A, 32B, 33B, Physics 1A, 1B, and 1C, or 1AH, 1BH, and 1CH, or 6A, 6B, and 6C, with grades of C– or better. Departure from classical mechanics: Schrödinger versus Newton equations; molecular dynamics; harmonic oscillator; rigid rotor, and hydrogen atom; approximation methods: perturbation and variational methods; many-electron spin, and Pauli principle; chemical bonding. P/NP or letter grading.

C113B. Physical Chemistry: Introduction to Molecular Spectroscopy. (4). Lecture, three hours; discussion, one hour; tutorial, one hour. Requisite: course 113A. Intersects with matter, microscopic spectroscopy, infrared and Raman spectroscopy, vibrations in polyatomic molecules, electronic spectroscopy, magnetic resonance spectroscopy. Concurrency is required with course C213B. P/NP or letter grading.

114. Physical Chemistry Laboratory. (5). Lecture, two hours; laboratory, eight hours. Enforced requisites: courses 30AL, 110A, and 113A, with grades of C– or better. Enforced conquisite: course 110B or C113B. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes spectroscopy, thermodynamic measurement and chemical dynamics. P/NP or letter grading.

114H. Physical Chemistry Laboratory (Honors). (5). Lecture, two hours; laboratory, eight hours. Enforced requisites: courses 30AL, 110A, and 113A, with grades of B or better. Enforced conquisite: course 110B or C113B. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes topics in physical chemistry to be selected in consultation with instructor. P/NP or letter grading.

C115A-C115B. Quantum Chemistry. (4–4). Lecture, four hours; discussion, one hour. Requisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A, with grades of C– or better. Recommended: knowledge of differential equations equivalent to Mathematics 134 or 135 or Physics 131 and of analytic mechanics equivalent to Physics 106A. Course C115A or Physics 115B with grade of C– or better is requisite to C115B. Students entering course C115A are normally expected to take course C115B in following term. Designed for students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; waves; oscillators; angular momentum; hydrogen molecules; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C215A-C215B, P/NP or letter grading.

M117. Structure, Patterns, and Polyhedra. (5). (Same as Honors Collegium M180.) Lecture, four hours; activity, two hours. Exploration of structures and their geometric underpinnings, with examples and applications throughout (space frames, domes), biology (enzyme complexes, viruses), chemistry (symmetry, molecular cages), design (tiling), engineering (space filling), and physics (crystal structures) to explore the underlying symmetry, two-dimensional patterns, and three-dimensional solids. P/NP or letter grading.

118. Colloidal Dynamics Laboratory. (4). Lecture, two hours; laboratory, eight hours. Requisites: courses 151A or 153A of Grades of B or better, or equivalent statistical mechanics courses from engineering, mathematics, or physics. One aspect of dispersions of microscale particles in viscous liquids is that such dispersions can be used as model visual systems for studying phases that chemistry under- graduate students typically learn about for nanoscale and molecular systems, yet they do not see. Temperature continuously excites molecules and causes rearrangements, giving dynamic views of macromolecules and particles in many fields, including cell and molecular oncology, physical, chemical, materials science, and physics. Letter grading.

M120. Soft Matter Laboratory. (4). (Same as Physics M180G.) Laboratory, four hours. P/NP or letter grading.

121. Special Topics in Physical Chemistry. (4). Lecture, four hours. Requisite: course 110B. Recommended: course 113A. Topics of considerable research interest presented at level suitable for students who have completed junior-year courses in physical chemistry. P/NP or letter grading.

C126A. Computational Methods for Chemists. (4). Lecture, four hours; laboratory, four hours. Preparation: programming experience in either Basic, FORTRAN, C, ++Java, or Pascal. Requisites: courses 110A, 113A, Mathematics 33B. Theoretical, numerical, and programming tools for constructing new chemical applications, including simple force fields and resulting statistical mechanics for simple molecules, simple ab-initio methods for organic molecules and nanotubes, and classical dynamics and spectroscopy. Concurrently scheduled with course C226A. P/NP or letter grading.

CM127. Synthetic Biology for Biofuels. (4). (Same as Chemical Engineering CM127.) Lecture, four hours; discussion, one hour. Requisite: course 153A, Life Sciences 3, 23L. Engineering microorganisms for complex phenotype is common goal of metabolic engineering and synthetic biology. Production of advanced biofuels involves designing and constructing novel metabolic networks in cells. Such efforts require profound understanding of biochemistry, protein structure, and biological regulations and are aided by tools in bioinformatics, systems biology, and molecular biology. Fundamentals of metabolic biochemistry, protein structure and function, and bioinformatics. Use of systems modeling for metabolic networks to design and optimize metabolic configurations. Concurrently scheduled with course CM227. Letter grading.

136. Organic Structural Methods. (5). Lecture, two hours; laboratory, eight hours. Requisites: courses 30C and 30CL, with grades of C– or better. Laboratories in course focus on structure determination by chemical and spectroscopic methods: microtechniques, P/NP or letter grading.

C140. Biomolecular Technology. (4). Lecture, three hours. Requisite: course 153A and 30C, with grades of C– or better. Laboratory course in organic structure determination by chemical and biological principles in biomolecular technology: materials and strategies for top-down and bottom-up fabrication of ordered biologically derived molecules; characterization of synthetic chemistry, techniques, and biomimetic materials and applications at nanoscale. Concurrently scheduled with course C240. P/NP or letter grading.

C143A. Structure and Mechanism in Organic Chemistry. (5). Lecture, two hours; discussion, one hour. Requisite: courses 30C and 30CL (may be taken concurrently), 110B, and 113A, with grades of C– or better. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochem- istry; pericyclic reactions. May be concurrently scheduled with course C243A. P/NP or letter grading.

C143B. Mechanism and Structure in Organic Chemistry. (4). Lecture, three hours; discussion: one hour. Requisite: course C143A with grade of C– or better. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C243B. P/NP or letter grading.

144. Practical and Theoretical Introductory Organic Synthesis. (5). Lecture, two hours; laboratory, eight hours. Enforced requisites: courses 30C and 30CL, with grades of C– or better. Lectures on modern synthetic reactions and processes, with emphasis on ste- reospecific methods for carbon-carbon bond forma- tion. Laboratory methods of synthetic organic chem- istry, including reaction techniques, synthesis of natural products, and molecules of theoretical in- terest. P/NP or letter grading.

C145. Theoretical and Computational Organic Chemistry. (4). Lecture, two hours; discussion: one hour; computer laboratory, one hour. Requisites: courses 30C, 113A. Applications of quantum me- chanical concepts and methods to understand and predict organic structures and reactivities. Computa- tional modeling methods, including laboratory experi- ence with force-field and quantum mechanical computer calculations. Concurrently scheduled with courses C245A-C245B.

147. Careers in Chemistry and Biochemistry. (2). Seminar, two hours. Limited to juniors/seniors. Explo- ration of employment and career opportunities avail- able to students. Different speakers will give short pre- sentations on careers in their respective area such as industry, government, research and development, education, law, and healthcare, explain how their educa- tion in chemistry and biochemistry helped them be- come successful, and what actual chemistry was used in their particular professions. Students learn and understand real-life applications of chemical con- cepts found in their coursework. P/NP grading.

153A. Biochemistry: Introduction to Structure, Enzymes, and Metabolism. (4). Lecture, four hours; discussion, one hour. Requisite: course 14D or 30B, with grade of C– or better. Recommended: Life Science 1, 2, 3, 23L. Structure of proteins, carbohydrates, lipids, and nucleic acids; enzyme catalysis and principles of metabol- ism, including glycolysis, citric acid cycle, and oxy- dative phosphorylation. P/NP or letter grading.

153AH. Biochemistry: Introduction to Structure, Enzymes, and Metabolism. (4). Lecture, three hours; discussion, one hour; tutorial, one hour. Requisite: course 14D or 30B, with grade of C– or better. Recommended: Life Sciences 2, 3, 23L. Enzyme structure and function. Enzyme regulation and inhibition. P/NP or letter grading.

153B. Biochemistry: DNA, RNA, and Protein Syn- thesis. (4). Lecture, three hours; discussion, one hour; tutorial, one hour. Enforced requisites: course 153A or 153AH, Life Sciences 2, 3, 23L. Nucleotide metabolism; DNA replication; DNA repair; transcript-
tion machinery; regulation of transcription; RNA structure and processing; protein synthesis and processing. P/NP or letter grading.

153B. Biochemistry: DNA, RNA, and Protein Synthesis (Honors). (4). Lecture, three hours; discussion, one hour; tutorial, one hour. Enforced requisites: course 153A or 153AH. Metabolism of carbohydrates, fatty acids, amino acids, and lipids; photosynthetic metabolism and assimilation of inorganic nutrients; regulation of these processes. P/NP or letter grading.

153C. Biochemistry: Biosynthetic and Energy Metabolism and Its Regulation. (4). Lecture, three hours; discussion, one hour; tutorial, one hour. Requisite: course 153A or 153AH. Metabolism of carbohydrates, fatty acids, amino acids, and lipids; photosynthetic metabolism and assimilation of inorganic nutrients; regulation of these processes. P/NP or letter grading.

153CH. Biochemistry: Biosynthetic and Energy Metabolism and Its Regulation (Honors). (4). Lecture, three hours; discussion, two hours. Requisite: course 153A or 153AH. Honors course parallel to course 153B. P/NP or letter grading.

153D. Introduction to Protein Structural Biology. (4). Lecture, three hours; discussion, one hour. Enforced requisites: course 153A, Life Sciences 23L. Proteins are diverse set of macromolecules that perform critical biological functions, ranging from enzymes that catalyze metabolic reactions to proteins that enable pathogens to cause disease. Introduction to field of protein structural biology, that seeks to understand molecular basis of protein function through utilizing atomic structures and by investigating how alterations in protein structure affects function. Students gain fundamental understanding of protein structure and its relationship to function and its manipulation and computational methods are used to determine three-dimensional structures of proteins. Hands-on training in computer graphics programs and online tools used to visualize and analyze protein structures. Letter grading.

153L. Biochemical Methods I. (4). Lecture, two hours; laboratory, four hours. Enforced requisites: courses 14BL and Life Sciences 23L, or 20L and 30AL, and 153A or 153AH (may be taken concurrently). Lecture, three hours; discussion, two hours. Requisite: course 153A. Metabolism of carbohydrates, fatty acids, amino acids, and lipids; photosynthetic metabolism and assimilation of inorganic nutrients; regulation of these processes. P/NP or letter grading.

154. Biochemical Methods II. (5). Lecture, two hours; laboratory, five hours. Enforced requisites: courses 153A or 153AH, 153B or 153BH, and 153L, with grades of C– or better. Recommended: course 156. Two to three major laboratory projects using biochemical approaches to investigate contemporary problems in biochemistry. Topics include transcription activation, molecular basis of DNA-protein interactions, biochemical basis of platelet activation, and initiation of blood clotting cascade. Experiments entail characterizing function of proteins, nucleic acids, and lipids involved in these processes. P/NP or letter grading.

156. Physical Biochemistry. (4). Lecture, four hours; discussion, one hour. Requisites: courses 110A, 153A. Biochemical kinetics; solution thermodynamics of biochemical systems; multiple equilibria; hydrodynamic interactions; energy levels, spectroscopy, bonding; topics from structural, statistical, and electrochemical methods of biochemistry. P/NP or letter grading.

159A. Mechanisms in Regulation of Transcription I. (2 to 4). Lecture, four hours. Requisites: courses 153B, 154. Eukaryotic general transcribed apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways, stress, and embryogenesis. Concurrently scheduled with course C259B. P/NP or letter grading.

159B. Mechanisms in Regulation of Transcription II. (2). Second five weeks. Lecture, four hours. Requisites: courses 153B, 154. Eukaryotic general transcribed apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways, stress, and embryogenesis. Concurrently scheduled with course C259B. P/NP or letter grading.

171. Intermediate Inorganic Chemistry. (4). Lecture, three hours; discussion, one hour. Requisite: course 30B with grade of C– or better. Systematic approach to modern inorganic chemistry, structure and bonding of inorganic molecules and solids, structure/reactivity relationships, electronic structure of metal ions, and catalysis. P/NP or letter grading.

172. Advanced Inorganic Chemistry. (4). Lecture, three hours; discussion, one hour. Requisite: course 171 with grade of C– or better. Systematic approach to modern inorganic chemistry, structure and bonding of inorganic molecules and solids, structure/reactivity relationships, electronic structure of metal ions, and catalysis. P/NP or letter grading.

C174. Inorganic and Metalorganic Laboratory Methods. (5). Lecture, two hours; laboratory, eight hours. Enforced requisites: courses 30CL and 172, with grades of C– or better. Survey of inorganic and organometallic compounds, transition metals in catalysis and biology. P/NP or letter grading.

acterization methods, and special topics such as con- ductive and biomedical polymers and polymeric re- agents in synthesis. Concurrently scheduled with course C289. P/NP or letter grading.

184. Chemical Instrumentation. (Lecture, two hours; laboratory, eight hours. Enforced requisites: courses 30CL and 110A, with grades of C– or better. Theory and laboratory techniques of chemical and structural analysis, including atomic absorption spectroscopy, gas chromatography, mass spectrometry, nuclear magnetic resonance, polarograph- y, X-ray absorption spectroscopy, gas chromatography, and other modern methods. P/NP or letter grading.

192A–192B. Undergraduate Practicum in Chemis- try and Biochemistry. (4–4). Lecture, one hour; labora- tory, four hours; workshop, two hours. Enforced requisites: courses 30AL, 110A, 113A, 30CL. Hands-on experi- ence in the undergraduate chemistry major with approved course work on secondary school teaching. Intended for students who are planning careers in secondary science chem- istry teaching. Through the service learning California Teach science courses that involve teaching field experiences in middle school and high school classrooms. Examination of chemistry issues such as chemical safety, management, labora- tory organization, safety, and techniques. P/NP or letter grading.

192C–192D. Undergraduate Assistant Education Practicum in Chemistry and Biochemistry. (4–4). Seminar, one hour; assigned setting, six hours (course 192C) or five hours (course 192D). Limited to juniors/ seniors. Training and supervised practical for advanced undergraduate students to learn algorithms in chemistry and biochemistry lectures. Students assist in preparation of materials and development of innovative pro- grams under guidance of faculty members and teaching assistants. May not be applied toward course requirements for any departmental major. Indi- vidual contract required. Information and contracts may be obtained from department. P/NP grading.

193A. Journal Club Seminars: Chemistry and Biochemistry. (2). Seminar, three hours. Limited to under- graduate students. Discussion of readings se- lected from current literature in particular field. May be repeated for credit. P/NP grading.

194. Research Group Seminars: Chemistry and Bio- chemistry. (1). Seminar, three hours. Designed for graduate students who are part of research group. Advanced study and analysis of current topics in physical, organic, or inorganic chemistry or bio- chemistry. Discussion of current research and litera- ture in research specialty of faculty member teaching course. May be repeated for credit. P/NP grading.

196B. Research Apprenticehip in Chemistry and Biochemistry. (2 to 4). Tutorial, three hours per week per unit. Limited to juniors/seniors. Enrolled students may take up to one unit of this course to fulfill the four-unit requirement for upper division students under guidance of faculty mentor. Limited to 10 students per semester. Consent of faculty required for upper division students under guidance of faculty mentor. Consult department for additional information regarding requirements, enrollment petitions, and written proposal deadlines. May be repeated for credit. P/NP or letter grading.

Graduate Courses

C200. Genomics and Computational Biology. (5). Lecture, three hours; discussion, one hour. Enforced requisites: course 153B, Microbiology 132, Molecular, Cell, and Developmental Biology 144, or 165B. Intro- duction to biochemistry students of technologies and experimental data of genomics, as well as computa- tional tools for analyzing them. Biochemistry and mole- cular biology dissected life into its component parts, one gene at a time, but lacked integrative mechanisms for putting this information back together to predict what would happen in complete organism. Over 80 percent of drug candidates fail in clinical trials. High- throughput technologies such as sequencing, mi- croarrays, mass-spect, and robotics have given biolo- gists incredible new capabilities to analyze complete genomes, expression patterns, functions, and inter- actions across whole organisms, populations, and species. Use and analysis of such datasets becomes essential research tool. Concepts, tools, and methods of chem- principles and methodologies for analyzing genomics data to answer biological and medical questions, with focus on concepts that guide data analysis rather than algorithm details. Concurrently scheduled with course C100. S/U or letter grading.

201. Scientific Proposal Writing. (2). Lecture, three hours. Enrolled students of graduate biochemistry and mole- cular biology students. How to write scientific pro- posals to be submitted to funding agencies. How to develop curricula vitae, put together grant proposals, and critique proposals. Letter grading.

202. Bioinformatics Interdisciplinary Research Seminar. (4). (Same as Bioinformatics M202.) Seminar, two hours; discussion, one hour. Enrolled students. Discussion of examples and practice of organic and inorganic mass spectrometry. Topics include El, CI, IPMS, GC/MS, LC/MS, LC/MS, MALDI, MS/MS protein identification, and proteomics. Enrolled students are normally expected to take course C215B in follow-

C208. Mass Spectrometry for Chemists and Bio- chemists. (2). Lecture, one hour; laboratory, four hours. Enrolled students. Application of chemistry to mass spectrometry, inference of molecular weights, proteins, peptides, and ionization efficiency. Enrolled students are encouraged to take course C202M to develop skills in protein and peptide identification. Enrolled students are normally expected to take course C215B in follow-
Mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; NMR; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C115A-C115B. S/U or letter grading.

215D. Molecular Spectra, Diffraction, and Structure. (4). Lecture, three hours; discussion, one hour. Requisite: course C215B, Physics 131. Selected topics from electronic spectra of atoms and molecules; vibrational, rotational, and Raman spectra; magnetic resonance spectra; X-ray, neutron, and electron diffraction; coherence effects. S/U or letter grading.

218. Physical Chemistry Student Seminar. (2). Seminar, two hours. Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students on material pertinent to credit. S/U grading.

219A-219Z. Seminars: Research in Physical Chemistry. (2 each). Seminar, three hours. Advanced study and analysis of current topics in physical chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

219E. Dynamics of Molecule-Molecule and Molecule-Surface Reactions. (4).

219F. Spectroscopy of Isolated Molecules, Complexes, and Clusters. (4).

219J. Chemistry and Biophysics of Interfaces. (4).

219S. Nanoscience. (4).

219V. Complex Fluids: Composition, Structure, and Rheology. (4).

221A-221Z. Advanced Topics in Physical Chemistry. (2 to 4 each). Lecture, two to four hours. Each course encompasses one recognized specialty in physical chemistry, generally taught by faculty members whose research interests embrace that specialty. S/U or letter grading.

222. Mathematical Methods for Chemistry. (4). Lecture, four hours. Enforced requisites: Mathematics 31A, 31B, 32A, 32B. Review of basic mathematics necessary to study physical chemistry at graduate level, with focus on review of vectors, linear algebra, elementary complex analysis, and solution of ordinary and partial differential equations. Development of problem-solving skills through homework based on these mathematical techniques, with examples from physical chemistry. Concurrently scheduled with course C122. S/U or letter grading.

222A-222B. Classical and Statistical Thermodynamics. (4-4). Lecture, four hours; discussion, one hour. Requisite: course 110B or 115. Recommended: course 113A. Presentation of fundamentals of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and perfect gas. Applications of classical and statistical thermodynamics selected from diatomic and polyatomic gases, solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogens, chemical equilibria, reaction rates, imperfect gas, nonelectron theory and electrolyte solutions, surface phenomena, high polymers, and radiation. May be concurrently scheduled with courses C215B and C223B. S/U or letter grading.

2226A. Computational Methods for Chemists. (4). Lecture, four hours; laboratory, four hours. Preparation of programming experience in either BASIC, FORTRAN, C, C++, Java, or Pascal. Requisites: courses 110A, 113A, Mathematics 33B. Theoretical, numerical, and programming topics in constructing new chemical computer programs, including simple force fields and resulting statistical mechanics for simple molecules, simple ab-initio methods for organic molecules and nanotubes, and classical dynamics and spectroscopy. Concurrently scheduled with course C125A. S/U or letter grading.

2227. Synthetic Biology for Biofuels. (4). (Same as Chemical Engineering CM227.) Lecture, four hours; discussion, one hour. Requisites: course 153A, Life Sciences 3, 23L. Engineering microorganisms for complex phenotype is common goal of metabolic engineering and synthetic biology. Production of advanced biofuels involves designing and constructing novel metabolic networks in cells. Such efforts require profound understanding of biochemistry, protein structure, and biological regulations and are aided by tools in bioinformatics, systems biology, and molecular biology. Fundamentals of metabolic biochemistry, protein structure and function, and bioinformatics. Use of systems modeling for metabolic networks to design microbial applications. Concurrently scheduled with course CM127. S/U or letter grading.

228. Chemical Physics Seminar. (2). Seminar, two hours. Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

229. Introduction to Physical Chemistry Research. (2). Lecture, 90 minutes. Designed primarily for entry or graduate physical chemistry students. S/U grading.

230B. Structural Molecular Biology. (4). (Same as Molecular, Cell, and Developmental Biology M230B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins; nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

230D. Structural Molecular Biology Laboratory. (2). (Same as Molecular, Cell, and Developmental Biology M230D.) Laboratory, 10 hours. Corequisites: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building. S/U or letter grading.

235F. Synthetic Methods and Synthesis of Natural Products. (4).

235L. Fullerene Chemistry and Materials Science. (4).

235N. Target- and Diversity-Oriented Synthesis of Natural Products and Product-Like Molecules. (4).

235O. Polymer Chemistry and Biomaterials. (4).

235P. Reaction Discovery and Total Synthesis of Complex Molecules. (4).

236. Spectroscopic Methods of Organic Chemistry. (4). Lecture, three hours. Requisite or corequisite: course C243A. Problem solving using proton and carbon 13 nuclear magnetic resonance, infrared spectroscopy, and mass spectrometry; new techniques in NMR, IR, and MS, with emphasis on Fourier Transform techniques. S/U or letter grading.

2340. Biocatalysis. (4). Lecture, three hours. Requisites: courses 30C, 110A. Basic physical, chemical, and biological principles of biocatalysis, materials and strategies for top-down and bottom-up fabrication of biologically derived molecules, characterization and detection techniques, and biomimetic materials and applications at nanoscale. Concurrently scheduled with course C140. S/U or letter grading.

241A-241Z. Special Topics in Organic Chemistry. (2 to 4 each). Lecture, two to four hours. Requisite or corequisite: course C243A. Each course encompasses one recognized specialty in organic chemistry, generally taught by faculty members whose research interests embrace that specialty. S/U or letter grading.

243A. Structure and Mechanism in Organic Chemistry. (4). Lecture, three hours; discussion, one hour. Requisites: courses 30C and 30CL (may be taken concurrently), 110B, and 113A, with grades of C– or better. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory and photochemistry; pericyclic reactions. May be concurrently scheduled with course C143A. S/U or letter grading.

244S. Theoretical and Computational Organic Chemistry. (4). Lecture, two hours; discussion, one hour; computer laboratory; one hour. Requisites: course 113A. Application of quantum mechanical concepts and methods to understand and predict organic structures and reactivities. Computational modeling methods, including laboratory experience with force-field and quantum mechanical computer calculations. Concurrently scheduled with course C145S. S/U or letter grading.

Chemistry and Biochemistry / 215
247. Organic Colloquium. (2). Seminar, two hours. Seminars in organic chemistry and related areas presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

248. Organic Chemistry Student Seminar. (2). Seminar, two hours. Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

250. Advanced Topics in Biochemistry and Molecular Biology. (2). Lecture, two hours. Critical analysis of experimental design and methods in biochemistry and molecular biology. In-depth analysis of literature in one or more areas of current research. May be repeated for credit. S/U or letter grading.

259B. Mechanisms in Regulation of Transcription II. (2). Second five weeks. Lecture, four hours. Eukaryotic transcription: effect of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course C159B. S/U or letter grading.

260A. Introduction to Bioinformatics. (4). Same as Bioinformatics M260A. Computer Science CM221, and at least one of Mathematics 170A, or Statistics 100A. Prior knowledge of biology not required. Designed for engineering students as well as students from biological sciences and medical school. Introduction to bioinformatics and methodologies, with emphasis on concepts and inventing new computational and statistical methods to answer biological questions. Focus on sequence analysis and alignment algorithms. Concurrently scheduled with course CM160A. S/U or letter grading.

256A-256Z. Seminars: Research in Biochemistry. (2 each). Seminar, three hours. Advanced study and analysis of current topics in biochemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

256A. Biochemistry of Plasma Proteins.

256B. Biochemistry of Protein Function.

256D. Transcriptional Control Mechanisms in Drosohila Embryogenesis.

256F. Current Topics in Prokaryotic Development.

256G. Nucleic Acid Structure Determination by NMR.

256H. Basic Mechanisms of Promoter Activation.

256J. Contractile Proteins in Muscle Contraction and Cell Motility.

256K. Biochemistry and Molecular Biology of Chlamydomonas.

256L. Literature of Structural Biology.

256M. Mechanism and Regulation of Transcription Termination in Eukaryotic Organisms.

256N. Advanced Topics in Structural Biology.

256O. Membrane Biophysics.

256P. Analysis of Protein Structure.

256Q. Biochemistry and Function of Ubiquitin in Yeast and Higher Eukaryotes.

256R. Biomolecular Nuclear Magnetic Resonance Spectroscopy and Protein Structure.

256S. Proteome Bioinformatics.

256T. RNA Processing and RNA Genomics.

256U. Mitochondrial Biogenesis and Link to Disease.

256V. Proteomics and Mass Spectrometry.

256W. Cytoskeletal Dynamics during Drosophila Oogenesis.

256X. Microtubule-Based Structures and Human Disease.

257. Physical Chemistry of Biological Macromolecules. (4). Lecture, one hour; discussion, one hour; laboratory, four hours. Requisite: course 153A. Theory of hydrodynamic, thermodynamic, and optical techniques used to study structure and function of biological macromolecules. S/U or letter grading.

258. Biochemistry and Molecular Biology of Protein Translation Systems. (3). Lecture, two hours; discussion, two hours. Requisites: courses 269A through 269D. Protein translocation into nucleus, mitochonrdia, peroxisome, chloroplast, endoplasmic reticulum, and protein export in bacteria. Letter grading.

259A. Metabolism and Its Regulation. (4). Same as Biological Chemistry M263. Lecture, three hours. Requisites: course 110A, and one course from 153B, 153C, or 156, or Biological Chemistry 210A and 210B. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of comparative aspects of metabolism in relation to physiological function. S/U or letter grading.

264. Free Radicals in Biology and Medicine. (2 to 4). Lecture, three hours. Enforced requisites: courses 153A and either 153B or 153C, with grades of C– or better. Biochemical reactivity of oxygens, its role in mitochondrial metabolism, neurodegenerative diseases, apoptosis, and aging. Discussion of radical reactions, how they are harnessed to achieve enzyme catalysis, and how free radicals contribute to or regulate essential biological processes. These same reactions "run amok" under certain types of stress and can contribute to wide variety of diseases, including neurodegenerative diseases (e.g., Huntington's, Parkinson's, and Alzheimer's), mitochondrial diseases, atherosclerosis, and aging. Concurrently scheduled with course C165. S/U or letter grading.

267. Nanoscience and Chemistry. (4). Lecture, four hours. Enforced requisites: courses 110A, 113A, 171, 172. Designed for advanced undergraduate and graduate students. Why nanoscience is important and interesting and critical role of chemistry in nanoscience. Chemistry and physical properties of inorganic nanostructures, including metallic nanostructures (nanocrystals, nanorods, nanowires), semiconductor nanostructures (quantum dots/rods, nanowires, nanotubes, graphene). Discussion of synthetic approaches, structures, and physical properties, as well as potential technological opportunities of each. Letter grading.

268. Biochemistry Research Seminar. (2). Seminar, two hours. Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students on topics of current biological research interest. May be repeated for credit. S/U or letter grading.

269B. Biocatalysis and Bioenergetics. (2). Lecture, five hours; discussion, two hours. Requisites: courses 153A, 153B, 153C, 156. Three-dimensional structure of DNA and RNA. Sequence-specific recog-
nition of DNA and RNA. RNA-catalyzed processes, including self-splicing and peptide bond formation. Letter grading.

270. Biochemistry and Molecular Biology of Photosynthetic Apparatus. (2 to 4). Lecture, two to three hours; discussion, zero to two hours. Requisites: courses 153A and 153B, or Life Sciences 3 and 23L, and course 153L. Recommended: courses 153C, 154, Life Sciences 4. Light harvesting, photosynthesis, electron transfer, carbon fixation, carbohy-

271. Advanced Topics in Inorganic Chemistry. (2 to 4). Lecture, two to four hours. Each offering encompasses one recognized specialty in inorganic chemistry, generally taught by faculty members whose re-

272A-272Z. Seminars in Inorganic Chemistry. (2 each). Seminar, three hours. Advanced study and analysis of current topics in inorganic chemistry, including current research and literature in research specialty of faculty member teaching course. S/U grading.

272A. Chemistry of Materials.

272B. Metalorganic, Inorganic Biomolecular Chemistry.

272C. Inorganic Spectroscopy.

272D. Bioinorganic Chemistry and Biology of Transition Metals and Oxygen.

272G. Issues in Chemical Education.

272I. Organometallic Chemistry.

272K. Reticular Chemistry.

274A. Inorganic and Metalorganic Laboratory Methods. (5). Lecture, two hours; laboratory, eight hours. Enforced requisites: courses 30CL and 172, with grades of C– or better. Synthesis of inorganic compounds, including air-sensitive materials; Schlenck techniques; chromatographic and ion exchange methods; spectroscopic characterization and literature applications. Concurrently scheduled with course C174. S/U or letter grading.

275. Inorganic Reaction Mechanisms. (4). Lecture, three hours. Requisites: courses 110A, 110B, 113A, and 172, with grades of C– or better. Survey of inorganic reactions; mechanistic principles; electronic structure and transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free/ radical, photoreactions, and photochemistry. Requisites: courses 133A and 172, with grades of C– or better. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C175. S/U or letter grading.

276B. Physical Methods in Inorganic Chemistry. (4). Lecture, three hours. Requisite: course C276A. Theory and applications of spectroscopic techniques, including magnetic resonance and vibrational spectroscopy. May be concurrently scheduled with course C276A. S/U or letter grading.

277. Crystal Structure Analysis. (4). Lecture, three hours; discussion, one hour. Requisites: courses 175A, 175B, 175C. Crystallography, with emphasis on practical experience in structure determination. Topics include crystallographic symmetry, scattering theory, data collection, Fourier analysis, heavy atom techniques, direct methods, isomorphous replacement, crystallographic refinement, error analysis, and common pitfalls. S/U or letter grading.

278. Inorganic Chemistry Student Seminar. (2). Seminar, two hours. Seminars presented by staff, out-

279. Biological Inorganic Chemistry. (4). Lecture, three hours. Requisites: courses 133A (or 133AH); 171. Role of metal ions in biology. Topics include interactions of metal ions with proteins, nucleic acids, and other biological molecules; mechanisms of actions of metal ions; transition-metal enzymes encoding those compo-

281. Polymer Chemistry. (4). Lecture, three hours; discussion, one hour. Requisites: courses 30B, 110A. Synthesis of organic and inorganic macromolecules, thermodynamic and statistical chemical descriptions of unique properties of polymers, polymer char-

282. Introduction to Inorganic Chemistry Research. (2). Lecture, two hours; discussion, one hour. May be repeated for credit. S/U grading.

283. Evolution of Devices from Concept to Product. (2). Seminar, 90 minutes. Discussion of cur-

284. Materials Creation Training Program Brown-Bag Seminar. (2). Seminar, one hour. Required of students in Materials Creation Training Program. Training in funda-

M370A. Integrated Science Instruction Methods. (4). (Same as Earth, Planetarian, and Space Sciences M370B and Physics M370A) Lecture, two hours; dis-

M370B. Integrated Science Instruction Methods. (4). (Same as Earth, Planetarian, and Space Sciences M370A and Physics M370B) Application of learning theory to science instruction and classroom management, including use of technology, collabora-

400. Safety in Chemical and Biochemical Research. (2). Lecture, two hours. Survey of safe labo-

495. Teaching College Chemistry. (2). Seminar, two hours; discussion, two hours; 20 hours training during week prior to Fall Quarter. Course for teaching assis-

598. Research for and Preparation of M.S. Thesis. (2 to 16). Tutorial, to be arranged. Each faculty member supervises research of M.S. students and holds research group meetings, seminars, and discussions with students. May be repeated for credit. S/U or letter grading.

599. Research for and Preparation of Ph.D. Disser-

Abel Valenzuela, Jr., Ph.D., Chair

Professors
Judith F. Baca, M.A.
Rosina M. Becerra, Ph.D.
The mission of the UCLA César E. Chávez Department of Chicana and Chicano Studies is to train a new generation of scholars to research and analyze the history, culture, and life of Mexican-origin people both within and outside the U.S., as well as of other Latina/Latino and indigenous populations in the Americas.

Addressing local, national, and transnational contexts, the Chicana/Chicano studies curriculum at UCLA explores race, class, gender, and sexuality paradigms as they have shaped the history of the field, as well as new directions in the study of Chicanas/Chicanos and Latinas/Latinos, including (1) border and transnational studies, (2) expressive arts, (3) history, literature, and language of Americas, and (4) labor, law, and policy studies.

Departmental faculty members, situated in one of the most diverse cities in the world, utilize Los Angeles as a laboratory for studying the social transformations taking place in California, the Southwest, and the U.S. The department provides students with the interdisciplinary research tools necessary to advance knowledge in the field, provide academic leadership, and serve community needs with academic resources.

Undergraduate Study

The Chicana and Chicano Studies Department offers a designated capstone program for undergraduate majors. Students have options for completing a senior honors thesis, individual research, or senior project under the direction of a faculty member. Alternatively, students may elect to complete an upper division course that includes additional coursework culminating in completion of a capstone paper or creative project. Through their capstone work, students are expected to demonstrate working knowledge of the major findings and methods of the disciplines from which they have drawn their Chicana and Chicano studies coursework, show their capacities for conceiving and executing a research project on a self-selected topic as well as identifying and evaluating relevant documentation pertaining to that project, demonstrate appropriate levels of scholarly discourse on their selected topic, and develop greater capacity to be of lifelong service to the Chicana/Chicano and Latina/Latino community and to global society in the tradition of César Chávez and scholar activist exemplars.

Chicana and Chicano Studies B.A.

Capstone Program

The B.A. program in Chicana and Chicano Studies is comprised of the practice of different forms of scholarship and pedagogy and to the promotion of critical thinking about such issues as gender, sexuality, social action, languages, race, ethnicity, class, assimilation/acculturation paradigms, and indigenous traditions. The literary and visual arts often function as vehicles for social change and creative empowerment, and so they constitute one focus of the curriculum, that aims to strike a balance among the social sciences, humanities, arts, and the professions. The major prepares students for graduate education in academic and professional fields and for a variety of positions that involve community and social service in the U.S. and abroad.

Preparation for the Major

Required: Chicana and Chicano Studies 10A, 10B, Spanish 5 or equivalent.

Transfer Students

Transfer applicants to the Chicana and Chicano Studies major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one interdisciplinary Chicana/Chicano history and culture course, one interdisciplinary Chicana/Chicana social structure and contemporary conditions course, and five quarter terms of Spanish.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: A total of 11 upper division courses, including Chicana and Chicano Studies 101; one service learning course from 100SL or M170SL or from the approved list available in the department office each term; two related study courses from the approved list of courses outside the department (related study includes courses that provide a comparative perspective to Chicana and Chicano studies and/or a contextualization of Chicana and Chicano communities in the world); one advanced seminar course from 191 or another course by petition to the department chair; and a concentration of four courses in one area listed below and two courses in a second area:

Border and Transnational Studies: Chicana and Chicano Studies CM110, 120, M124, M125, M126, C123, 143, M144, CM147, 151, 152, 153, 154, 155, M156A, 163, 176, 184, 191

No more than 8 units of 188, 191, and 199 courses may be applied toward the major; enrollment in the courses must be approved in writing by the department chair.

Each major course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better.

Honors Program

The Chicana and Chicano Studies honors program provides the opportunity for motivated and dedicated students to undertake a year-long research or creative project with the guidance and supervision of a faculty member. The program is open to all juniors and seniors who have (1) a 3.5 grade-point average in the major, (2) a cumulative GPA of 3.0 or better, and (3) completed 90 or more total units, including Chicana and Chicano Studies 10A, 10B, 101, and one course from 89, 89HC, 189, or 189HC.

The application for admission must be submitted in Spring Quarter of the year prior to admission to the program, with the advice and consent of a faculty sponsor. The proposal, research, data collection, analysis, and writing of the thesis (or the creative equivalent to this process) take place in Chicana and Chicano Studies 189A, 189B, and 189C, which may not be applied toward the major requirements. An honors thesis of at least 30 pages or a significant creative project is required.

Students who are currently undertaking the optional multidisciplinary senior thesis, and who are eligible for the honors program may opt to switch to the honors program (provided it does not delay their progress toward the degree) with the approval of the department.

Optional Multidisciplinary Senior Thesis

Chicana and Chicano Studies majors have the option during their senior year to enroll in two 199 courses with the intention of producing an undergraduate thesis. The first term includes thesis conceptualization and formulation, along with preliminary data collection for the thesis. The second term entails completion of the data collection, analysis of the data, and writing of the thesis. Enrollment in the two 199 courses is with the advice and consent of a faculty member.
Chicana and Chicano Studies Minor

The Chicana and Chicano Studies minor complements study in another traditional field. Students participating in the minor are required to complete both a departmental major in another discipline and the Chicana and Chicano Studies minor.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 45 units, and file a petition with the student adviser in 7351 Bunche Hall.

Required Lower Division Courses (10 units): Chicana and Chicano Studies 10A, 10B.

Required Upper Division Courses (20 units minimum): Chicana and Chicano Studies 101 and four elective courses (20 units minimum) selected from the approved list (available in the department office each term).

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa/library/pgmrgnintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The César E. Chávez Department of Chicana and Chicano Studies offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Chicana and Chicano Studies.

Chicana and Chicano Studies

Lower Division Courses

10A. Introduction to Chicana/Chicano Studies: History and Culture. (5) Lecture, three hours; discussion, one hour. Interdisciplinary survey of diverse historical experiences, cultural factors, and ethnic/racial paradigms, including indigenousness, gender, sexuality, language, and borders, that help shape Chicana/Chicano identities. Emphasis on critical reading and writing skills. Letter grading.

10B. Introduction to Chicana/Chicano Studies: Social Structure and Contemporary Conditions. (5) Lecture, three hours; discussion, one hour. Multidisciplinary examination of representation, ideologies, and material conditions of Chicana/Chicanos, including colonialism, race, labor, immigration, poverty, assimilation, and patriarchy. Emphasis on critical reading and writing skills. Letter grading.

88. Sophomore Seminars: Chicana and Chicano Studies. (2) Seminar, two hours. Limited to 24 division students. Readings and discussions designed to introduce students to current research in Chicana/Chicano studies. Culminating project may be required. May not be applied toward departmental major or minor requirements. May be repeated for credit with topic change. P/NP or letter grading.

97. Variable Topics in Chicana and Chicano Studies. (2, Seminar, two hours. Requisite: course 10A or 10B. Current topics and particular research methods in Chicana and Chicano studies through readings and other assignments. May be repeated for credit. P/NP or letter grading.

98. Professional Schools Seminars. (2) Seminar, two hours. Limited to 20 students. Introduction to issues of professional (nonacademic) settings and decision-making processes through readings and other assignments. P/NP or letter grading.

Upper Division Courses

100SL. Barrio Service Learning. (4) Seminar, two hours; field placement, eight hours. Limited to juniors/seniors. Service learning placement in community-based organization, labor union, or service-oriented nonprofit organization. Study of role that these organizations play in immersion and change of Chicana/Chicano communities. Students meet on regular basis with instructor and provide periodic reports of their experience. Individual contract with supervising faculty member to culminate with grading.

M102. Mexican Americans and Schools. (4) Same as Education M102.) Seminar, four hours. Theoretical and empirical overview of Chicana/Chicano educational issues in U.S., with special emphasis on disenfranchising tactics of race, gender, class, and immigrant status on Chicana/chicano educational attainment and achievement. Examination of how historical, social, political, and economic forces impact Chicana/Chicano educational experience. P/NP or letter grading.

M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement. (5) Same as Theater M103D.) Lecture, three hours. Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical traditions that led to emergence of Chicano Theater. Letter grading.

104. Comedy and Culture: Your Humorous Life. (4) Lecture, four hours; discussion, one hour. In mining our humorous life adventures from students' cultural identities and turning those unique experiences into humorous literature. Students acquire skills to read their stories out loud, with emphasis on comedy in their pieces through art of storytelling and performance. P/NP or letter grading.

M105A. Early Chicana/Chicano Literature, 1400 to 1920. (5) Same as English M105A.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicano literature from poetry of Triple Alliance and Aztec Empire through end of Mexican Revolution (1910) and written forms (poetry, corridos, testimonios, folklore, novels, short stories, and drama) by writers such as Nezahualcoyotl (Hungry Coyote), Cabaza de Vaca, Lorenzo de Zavala, María Amparo Ruiz de Burton, Eusebio Chacón, Daniel Venegas, and Lorena Villegas de Magón. P/NP or letter grading.

M105B. Chicana/Chicano Literature from Mexican Revolution to el Movimiento, 1920 to 1970s. (5) (Not same as course M105B prior to Fall Quarter 2011.) Same as English M105B.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Chicana/Chicano literature from 1920s through Great Depression and World War II, ending with Chicana civil rights movement. Oral and written narratives by writers including Conrado Espinoza, Jovita González, Cleofas Jiménez, Daniel Valdez, Oscar Acosta, and Evangelina Vigil. P/NP or letter grading.

M105C. Chicana/Chicano Literature since el Movimiento, 1970s to Present. (5) (Formerly numbered M105B.) Same as English M105C.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicano literature since 1970s, with particular emphasis on how queer and feminist activism as well as Central and South American migration have shaped 21st-century chicandian. Oral, written, and graphic fiction, poetry, and drama by writers including John Rechy, Gloria Anzaldúa, Los Bros Hernández, Ana Castillo, and Dagoberto Gilb guide exploration of queer and feminist studies, Reagan generation, immigration debates, and emerging Latina/Latino majority. P/NP or letter grading.

M105D. Introduction to Latina/Latino Literature. (5) (Same as English M105D.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of U.S. Latina/Latino literature and introduction to its major thematic trends, with emphasis on groups of Caribbean, Mexican, South American, and Central American origin. Representative works read in relation to such topics as relationship between Latina/Latino populations and U.S. cultural sphere, struggle for self-determination, experiences of exile and migration, border zones, enclaves and language, and mestizaje and its impact on cultural production. P/NP or letter grading.

M105E. Studies in Chicana/Chicana or Latina/Latina Literature. (5) Same as English M105E.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Variable topics course to give students broad introduction to issues and themes in Chicana/Chicana and/or Latina/Latina literature. Topics include border, immigration, revolution, language, gender, sexuality, and diaspora, among others. May be repeated for credit with topic or instructor change. P/NP or letter grading.

105F. Gender, Fiction, and Social Change. (4) (Formerly numbered M105C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of essays, novels, short narratives, and plays written by Chicanas/Latinas. Required readings represent writers with focus on themes of identity, ethnicity, gender, and cross-overs leading to social change. Critical reading and analysis of works, searching for strengths and flaws, to point out unique contribution of each work to greater body of U.S. literature. P/NP or letter grading.

M105SL. Seminar: Chicana and/or Latina/Latino Literature—Service Learning. (5) Same as English M105SL.) Seminar, three or four hours; field placement, three or four hours. Enforced requisite: English Composition 3 or 3H. Taught in Chicana/Chicano studies in Chicana/Chicano and/or Latina/Latina literature. En-depth study of various topics related to Chicano/ Latina communities in Southern California, including Chicana/Chicano visions of Los Angeles; immigration, migration, and exile; autobiography and historical change; Chicana/Chicano journalism; and labor and literature. Service learning component includes minimum of 20 hours of meaningful work with agency. P/NP or letter grading.

CM106. Health in Chicano/Latino Population. (4) (Formerly numbered M106.) Same as Public Health M106.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Examination of Chicano/ Latina health status through life expectancy, causes of death, reportable disease, services utilization, pro-

M108A. Music of Latin America: Mexico, Central America, and Caribbean Isles. (5). (Same as Ethnicmusicology M108A) Lecture, four hours; discussion, one hour. Survey of traditional and contemporary musical culture. P/NP or letter grading.

CM110. Chicana Feminism. (4). (Formerly numbered M110) (Same as Gender Studies M132) Lecture, four hours. Enforced requisite: course 10A or Gender Studies 10. Examination of theories and practices of women who identify as Chicana feminist. Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within Chicana/Chicano community and dominant society. Attention to Anglo-European and Third World Chicana feminist writing. Concurrently scheduled with course CM214. P/NP or letter grading.

111. Chicana/Chicano and Latina/Latino Intellec- tual Traditions. (5). Lecture, five hours. General view of philosophical, cultural, and social thought as well as intellectual traditions in Americas. Roles of writers as intellectuals and cultural/political strategists, and as defenders of (national) identity, social reality, and struggles of liberation. Letter grading.

113. Day of Dead Ritual. (4). Lecture, four hours. Introduction to history and evolution of tradi- tional celebration of Day of Dead ritual. Contempla- tion of indigenous, Spanish, Mexican, Chicano, and other influences and manifestations of this ritual. Special attention to indigenous language and worldview re- lated to this ancient ritual, such as ancient calendar systems. Designed to motivate critical thinking about what is observed in altars today and impact globaliza- tion has on tradition. P/NP or letter grading.

117. Chicana/Chicano Images in Mexican Film and Literature. (4). Lecture, four hours. Preparation includes adequate understanding of Spanish-language films without English subtitles. Throughout its rich history, spanning more than 100 years, Mexican cinema has produced various genres and films that deal with Chicanas/Chicanos. Examination of the roles of race, class, and gender together play important roles in shaping these experiences. Discussion of roles of structure and space for agency in each context. RQ required; concurrent with course C212. P/NP or letter grading.

M118. Student-Initiated Retreat and Outreach Issues in Higher Education. (4). (Same as African American Studies M118, American Indian Studies M118, and Asian American Studies M118) Lecture, four hours. Exploration of issues in outreach and re- tention of students in higher education, especially through student-initiated initiatives and service-learning and volunteer experiences, with focus on UCLA as case. May be re- peated twice for credit. Letter grading.

120. Immigration and Chicano Community. (4). Lecture, three hours. Discussion on relationship be- tween international immigration and development of Chicano/Latino community. Examination of U.S. im- migration policy and relationship between Mexican-origin population and other Latin American immi- grants. P/NP or letter grading.

M121. Issues in Latina/Latino Poverty. (4). (Same as Labor and Workplace Studies M121 and Urban Planning M140) Lecture, four hours. Examination of nature and extent of urban and rural poverty con- fronting Latina/Latino population in U.S. Special em- phasis on anti-poverty policies of government and nonprofit organizations and social planning and eco- nomic development strategies. Attention also to liter- ature on underclass. Letter grading.

123. Applied Research Methods in Latino Commu- nities. (4). Lecture, three hours. Through combination of lectures, key readings, and several experiments, in- troduction to several applied research methods that are highly effective in producing sound and method- ologically rigorous studies on poor and/or Latino communities, including important data that can be used for critical analysis and policy recommenda- tions. Letter grading.

M124. Latino Immigration History and Politics. (4). (Same as Honors Columbian M143.) Lecture, four hours. Overview of immigration in 20th century, ex- amining social, political, and economic contexts out of which different forms of Chicana/Chicanas im- migration to U.S. has occurred. Letter grading.

M125. U.S./Mexico Relations. (4). (Same as Labor and Workplace Studies M125.) Lecture, four hours. Examination of the complex dynamic relationship be- tween Mexico and U.S., focusing political economy ap- proach to study of asymmetrical integration between advanced industrial economies and developing coun- tries. P/NP or letter grading.

M127. Farmerworker Movements, Social Justice, and United Farm Workers Legacy. (4). (Same as Labor and Workplace Studies M127,) Lecture, four hours. Designed for juniors/seniors. Introduction to history and organization of labor movement in U.S. and North America. Discussion of race, class, and gender issues raised within movement, and various strategies for social change and economic equity purs- sued through organized labor and other means. Letter grading.

129. Field Research Methods in Labor and Work- place Studies. (5). Lecture, four hours; field studies, two hours. Designed for juniors/seniors. Discussion of roles of union and nonunion worker organizations in society and in improvement of quality of life for Latina/ Latino communities. Request and application of field research methods to labor organizations and work- place sites, especially participant observation, inter- view techniques, and grounded theory and other methods of data analysis. Letter grading.

131. Barrio Popular Culture. (4). Lecture, three hours. Construction of model by which to organize study of Chicana/Chicana popular culture by focusing on barrio metaphor for community organization of beliefs, myths, and values of Chicanas/Chicanos and their representations in icons, heroes, legends, stereotypes, and popular art forms through literature, film, video, music, mass media, and oral history. Letter grading.

C132. Border Consciousness. (4). (Formerly numbered 132.) Lecture, three hours. Investigation through history, popular culture, and mass media of bilingual and bicultural identities produced by geo- graphical and cultural space between Mexico and U.S. Special attention to border consciousness as site of conflict and resistance currently scheduled with course C231. Letter grading.

C136. Chicana Latina Feminism. (4). (Same as Gender Studies CM136) Lecture, four hours; discussion, one hour. Goal is to gain nuanced understanding of Chicano cinema as political, socio- economic, cultural, and aesthetic practice. Examina- tion of representation of Mexican American and Chicanas in four Hollywood genres—silent greaser films, social problem films, Westerns, and gang films—that are major genres that account for films about or with Mexican American produced between 1908 and 1980. Examination of recent Chicano-produced films by Chicanas both within Chicana/Chicano community and dominant society. Attention to Anglo-European and Third World Chicana feminist writing. Concurrently scheduled with course CM214. P/NP or letter grading.

M141. Chicano/Latino and Latina/Latino Intellec- tual Traditions. (5). Lecture, five hours. General view of philosophical, cultural, and social thought as well as intellectual traditions in Americas. Roles of writers as intellectuals and cultural/political strategists, and as defenders of (national) identity, social reality, and struggles of liberation. Letter grading.

143. Chicana/Latina and Latina/Latino Intellec- tual Traditions. (5). Lecture, five hours. General view of philosophical, cultural, and social thought as well as intellectual traditions in Americas. Roles of writers as intellectuals and cultural/political strategists, and as defenders of (national) identity, social reality, and struggles of liberation. Letter grading.

C144. Chicana Latina Feminism. (4). (Same as Ethnicmusicology CM144) Lecture, four hours; discussion, one hour. Examination of Chicano cinema as political, socio- economic, cultural, and aesthetic practice. Examina- tion of representation of Mexican American and Chicanas in four Hollywood genres—silent greaser films, social problem films, Westerns, and gang films—that are major genres that account for films about or with Mexican American produced between 1908 and 1980. Examination of recent Chicano-produced films by Chicanas both within Chicana/Chicano community and dominant society. Attention to Anglo-European and Third World Chicana feminist writing. Concurrently scheduled with course CM214. P/NP or letter grading.

M145. Chicana Latina Feminism. (4). (Same as Ethnicmusicology M145) Lecture, four hours; discussion, one hour. Examination of Chicano cinema as political, socio- economic, cultural, and aesthetic practice. Examina- tion of representation of Mexican American and Chicanas in four Hollywood genres—silent greaser films, social problem films, Westerns, and gang films—that are major genres that account for films about or with Mexican American produced between 1908 and 1980. Examination of recent Chicano-produced films by Chicanas both within Chicana/Chicano community and dominant society. Attention to Anglo-European and Third World Chicana feminist writing. Concurrently scheduled with course CM214. P/NP or letter grading.
mandatory; need not be bilingual to enroll. Technical proficiency required; enrollment in Spanish 101 and 102 recommended. Historical, political, and social context of the Chicanas/Chicanos movement to be discussed. Opportunities for involvement in community and political activism. Letter grading.

M153. Central Americans in U.S. (4). Lecture, four hours. Interdisciplinary survey of social, historical, political, economic, educational, and cultural experiences of Central American immigrants in the U.S. Historical context to contemporary issues will be discussed. Letter grading.

M155. Latinos in U.S. (4). (Same as Sociology M155.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Exploration of history and social conditions of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in larger social structure and on comparisons with other minority groups. Topics include migration, family, education, and work issues. P/NP or letter grading.

M156A. Immigrant Rights, Labor, and Higher Education. (4.) (Same as Asian American Studies M166A and Labor and Workplace Studies M166A.) Seminar, three hours. New immigrant rights movement, with particular attention to labor and higher education. Overview of history of immigrant rights movement and examination of development of coalition efforts between labor movement and immigrant rights movement nationally and locally. Special focus on issue of immigrant students in higher education, challenges facing undocumented immigrant students, and legislation and policy issues surrounding them. Students conduct oral histories, family histories, research on immigration and immigrant rights, write poetry and spoken word about immigrant experience, and work to collectively develop a strategy on immigrant students in higher education. P/NP or letter grading.

M156B. Research on Immigration Rights, Labor, and Higher Education. (4.) (Same as Asian American Studies M166B and Labor and Workplace Studies M166B.) Seminar, two hours. Requisite: course M156A. Expansion of research conducted by students in course M156A involving oral histories, research on immigration and immigrant rights, and evaluation of legislation and legal issues impacting undocumented students. Letter grading.

157. Chico Mexican Movement and Its Political Legacies. (Same as Gender Studies M166B.) Lecture, four hours. Examination of the Chico Mexican Movement of 1960s and 1970s and analysis of its political legacies. Grounded in historiographic inquiry and social movement theory, investigation of mobilization of diverse sectors of el movimiento, including immigrants, workers, artists, youth, community activists, and women. Exploration of myriad issues and struggles that compelled Chicanas/Chicanos to resist, such as land occupation, anti-war movements, community autonomy, police brutality, political inclusion, cultural recovery, racism, sexism, and class exploitation. Investigation of diverse ideologies and strategies of the Chicoan Movement through analysis of Chicanas/Chicanos' motivations for organizing, modes, strategies, innovations, challenges, and articulation of new political subjectivities. P/NP or letter grading.
165. Language in Education. (4). Lecture, three hours. Examination of language issues pertinent to educational systems, including language inequity, literacy, testing, and assessment, as well as institutional ideologies. Letter grading.

166. Paolo Freire for Chicana/Chicana Classroom. (4). Seminar, four hours. Introduction to pedagogy of Paulo Freire and examination of historical and contemporary problems circumscribing Chicana/Chicana education. Central focus to offer Freirean alternative to answer theoretical, methodological, practical, and policy questions about schooling in Chicanas/Chicanos in U.S. P/NP or letter grading.

167SL. Taking It to Street: Spanish in Community. (5). (Same as Applied Linguistics M165SL and Spanish M165SL). Seminar; three hours; fieldwork, 10 hours. Enforced requisite: Spanish 25 or 27. Service learning course to give students opportunity to use cultural and linguistic knowledge acquired in Spanish classes in real-world settings. Students required to spend minimum of eight to 10 hours per week at agreed on site in Latino community. P/NP or letter grading.

168A. Latinos: Print Media. (4). Lecture, four hours. Examination of systemic (mis)representations of Latinos in print media (print and mass media times) by means of critical discourse analysis and metaphor theory. Investigation of empirical basis for theories of racism in language in this context. Student projects range from immigration to education and crime to culture. Letter grading.

169. Representations of Indigenous Peoples in Americas. (4). Lecture, four hours. Strongly recommended requisite: course 101. Introduction to different forms of representation of indigenous peoples and their presence in Americas, with emphasis on Mesoamerica and Andes. How indigenous images are expressed, perceived, and constructed at point of contact with Europeans during development of indigenous and in current period. Discussion of how these relate to Chicana/Chicano identity construction. Letter grading.

170SL. Latinos, Linguistics, and Literacy. (5). (Same as Applied Linguistics M170SL, Honors College M170SL, and Spanish M170SL). Seminar; four hours; field project, four to six hours. Recommended requisites: English 140A-B, and one additional course in Chicana/o/Latina/o studies. Two major threads of that experience. Topics include technology, located within the context of its present. Chapter 6: Use of survey and social welfare of Latinos (Chicanos, Puerto Ricans, and Cubans) in U.S. through assessment and critical analysis of social policy issues affecting them. Survey of Chicana/o/Latina/o studies to be sustained by future UCLA students. Work at partner school sites and demonstration of firm grasp of concepts of conflict resolution through weekly reflective journals, discussion through biweekly meetings, and final journal entry. Application of critical thinking, review of literature from earlier courses, and reflection on student field experiences to deepen understanding of violence, its causes, and what schools can do to mitigate it. Letter grading.

175. Chicana Art and Artists. (4). (Same as Art M176 and World Arts and Cultures M176). Lecture, four hours. Introduction to Chicana art and artists. Examination of Chicana aesthetic. Chicana artists have developed unique experience and identity as artists and Chicanas. Letter grading.

176. Globalization and Transnationalism: Local Historical Dynamics and Praxis. (4). Lecture, four hours. Analysis of dynamics of Chicana/Chicano transnational community formation in comparative global perspective, exploring changing roles of and key actor in local dynamics of transnationalization in California’s relation to world. Analysis of Chicana/Chicana experience in California as both highly linked node and local microcosm of dynamics of globalization that is both affected by as well as influences course of alternative scenarios of globalization. Designed to help students develop critical political economy analysis of interplay between globalization and local transnational dynamics that together are giving meaning to and constructing new social identities and strategies for struggle throughout world. P/NP or letter grading.

177. Latino Social Policy. (4). Lecture, three hours. Examination of social welfare of Latinos (Chicanos, Puerto Ricans, and Cubans) in U.S. through assessment and critical analysis of social policy issues affecting them. Survey of social, economic, cultural, and political circumstances affecting ability of Latinos to access public benefits and human services. Letter grading.

178. Latinos/Latinas and Law: Comparative and Historical Perspectives. (4). Lecture, four hours. Survey of experiences of Latinos/Latinas with U.S. legal system. Examination of landmark appellate decisions, litigation efforts, voting rights, language, public accommodations, education,

179. LA Art. Policies in U.S.: Comparative History. (4). (Formerly numbered 179.) (Same as Applied Linguistics M179.) Lecture, four hours. Survey of language policies and language in context to understanding social, legal, and political constraints on bilingualism. Review of federal, state, and institutional language policies and politics, with focus on schooling, administration of government, justice, and workplace. P/NP or letter grading.

182. Understanding Whiteness in American History and Culture. (4). (Formerly numbered M182.) (Same as History M151C.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. History, construction, and representation of whiteness in U.S. society. Seminar discussions trace evolution of white identity and explore its significance to historical construction of race class, and gender. Limited to students concurrently scheduled with course C256. Letter grading.

183. History of Los Angeles. (4). (Same as History M155.) Lecture, three hours; discussion, one hour (when scheduled). Designed for juniors/seniors. Social, economic, cultural, and political development of Los Angeles and its environs from time of its founding to present. Emphasis on diverse peoples of area, changing physical environment, various interpretations of city, and Los Angeles’ place among American urban centers. P/NP or letter grading.

185. Whose Monument Where: Course on Public Art. (4). (Same as Art M185 and World Arts and Cultures M126.) Lecture, four hours. Recommended corequisite: course M186A, M186B, or M186C. Examination of public monuments in U.S. as basis for cultural politics in light of Chicana and Chicano view of American values and perspective of artist. Use of urban Los Angeles as textbook in urban space issues such as who is public, what is private, who benefits at the expense of others, who defines neighborhoods, and how different ethnic populations use public space differently. P/NP or letter grading.

186A. Beyond Mexican Mural: Beginning Muralism and Community Development. (4). (Same as Art M186A and World Arts and Cultures M125A.) Studio/lecture, four hours. Corequisite: course M186AL. Investigation of muralism as method of community education, development, and empowerment. Exploration of issues through development of large-scale collaborative digitally created image and/or painting for placement in community. Students research, design, and work with community participants. Continuation of project through stages of production to full scale and community approval. P/NP or letter grading.

186B. Beyond Mexican Mural: Advanced Muralism and Community Development. (4). (Same as Art M186B and World Arts and Cultures M125B.) Studio/lecture, four hours. Requisites: courses M186A, M186AL Corequisite: course M186CL. Continuation of investigation of muralism as method of community education, development, and empowerment. Exploration of issues through development of large-scale collaborative digitally created image and/or painting for placement in community. Students research, design, and work with community participants. Continuation of project through installation, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

188. Special Courses in Chicana and Chicano Studies. (4), Seminar, three hours. Some sections may require prior coursework. Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit. P/NP grading.

190. Research Colloquium in Chicana and Chicano Studies. (2). Seminar, two hours. Designed to bring together students undertaking supervised tutorial research in seminar setting with one or more faculty mentor. Students may present research methods, attend biweekly meetings with graduate student and faculty mentor. Participation in all aspects of research project, including library research, reading materials, and compilation of data, with scheduled meetings throughout term with faculty mentor for discussion of project. May not be applied toward departmental major or minor requirements. May be repeated for credit. P/NP grading.

191. Variable Topics Research Seminars: Chicana and Chicano Studies. (4), Seminar, three hours. Limited to juniors/seniors. Research seminar organized around readings and engaged discussion of critical topics of interest in field. Exploration of issues, theoretical implications for field, and practical implications for communities students are researching. May be repeated for credit. P/NP or letter grading.

192A. Undergraduate Practicum in Chicana and Chicano Studies. (4), Formerly numbered 192.) Seminar, four hours. Limited to juniors/seniors. Training and supervised practicum for advanced undergraduate students who assist in preparation of materials and/or development of innovative programs or courses of study under guidance of faculty members in small seminars. May not be applied toward departmental major or minor elective requirements. May be repeated for credit. P/NP or letter grading.

193. Readings/Speaker Series Seminars: Chicana and Chicano Studies. (1-4) Tutorial, four hours. Limited to undergraduate Colloquia Series students. Reading of journal articles associated with speaker topics to enliven postcolloquium discussions. May not be applied toward departmental major or minor elective requirements. May be repeated for credit. P/NP grading.

194. Research Group Seminars: Chicana and Chicano Studies. (2). Seminar, one hour. Designed for undergraduate students who are part of research group. Discussion of current literature in field or of research group project. May be repeated for credit. P/NP grading.

195. Community Internships in Chicana and Chicano Studies. (4), Tutorial, two hours; field placement, eight hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

196. Research Apprenticeship in Chicana and Chicano Studies. (2 to 4). Tutorial, three hours per week per unit. Requisite: course 10A or 10B. Limited to juniors/seniors. Entry-level research apprenticeship for undergraduate students under guidance of faculty mentor. Participation in all aspects of research project, including library research, reading materials, and compilation of data, with scheduled meetings throughout term with faculty mentor for discussion of project. May not be applied toward departmental major or minor requirements. May be repeated under different contract; consult department. Individual contract required. P/NP grading.

197. Individual Studies in Chicana and Chicano Studies. (2 to 4). Tutorial, four hours. Examinations. Courses 10A, 10B. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty mentor and student. Assignment of reading and tangible evidence of mastery of subject matter required. May be repeated for maximum of 8 units. Individual contract required. P/NP or letter grading.

197C. Individual Capstone Studies. (2), Tutorial, one hour. Requisites: courses 10A and 10B, or 101. Limited to departmental junior/senior majors. Guided study led by faculty supervisor. Instructor meets with student to help design culminating capstone project so it conforms to departmental capstone project guidelines. Must be taken in conjunction with one upper-division departmental course. May not be repeated for credit. Individual contract required. Letter grading.

families in U.S. society and how these intersections also help shape individual experiences within families. Examination of family, race, class, and gender as sociocultural productions and experiences of diverse Latina/Latino groups in U.S., with special emphasis on immigrants, and analysis of how race, class, and gender together play important roles in shaping these experiences. Discussion of roles of structure and space for agency in each context. Concurrently scheduled with course C107. Letter grading.

CM214. Chicana Feminism. (4). (Same as Gender Studies CM232A.) Lecture, four hours. Enrolled required to complete course work in English or Spanish. Examination of theories and practices of women who identify as Chicana feminist. Analysis of writings of Chicanas who do not identify as feminist but whose practices attest to gender and Chicana identity among Latinas and Latinas within Chicana/Chicano community and dominant society. Attention to Anglo-European and Third World women. Concurrently scheduled with course CM110. S/U or letter grading.

232. Aesthetics of Place in Chicana/Chicano Expressive Culture. (4). Seminar, three hours. Examination of several place-based aesthetic traditions, including indigenous, Santería, diaporic, and Aztlán aesthetics, in Chicana/Chicano visual art, film, performance, and literature. Special focus on place as site of identity, history, memory, and creative production. S/U or letter grading.

233. Community Cultural Development in Public Art: From Neighborhood to Global. (4). Seminar, three hours; laboratory, one hour. Designed for graduate students. Applications of research of local and global communities through aesthetic practices in visual arts, spoken word, visual performance, music, and dance that include participatory audience inclusion and foster civic dialogue and community advocacy and activism. Issues of cultural democracy based in cultural retention and affirmation. Case studies of artist projects in community cultural development provide contemporary examples of evolving field of work and basis for critical analysis. S/U or letter grading.

252. Cultural Representations in Americas. (4). Seminar, three hours. Analysis of Latina/Latino and Latin American fictional and nonfictional narratives and films, with emphasis on gender issues, diaspora, and global transformation. Use of aesthetic and formal analytical perspectives and several conceptual frameworks—cultural studies, postcolonial studies, postcolonial studies, neoliberalism, intersectionality, and feminisms. Focus of study of these cultural productions as expression of intersectionalities and differences among Latina/Latino and Latin American cultural workers, as well as among diverse populations and changing experiences their works refer to. S/U or letter grading.

253. Tenth Muscas of Chicana Theory. (4). Seminar, three hours. Chicana lesbian feminist theory in its multiple and historical manifestations, beginning in 17th century with early proto-feminist work of Sor Juana Inés de la Cruz, Mexican nun/scholar/poet known world over as first feminist of Americas. Exploration of Sor Juana’s feminist legacy in 20th-century Chicana lesbian and Chicana feminist theorists and scholars, such as Gloria Anzaldúa, Cherríe Moraga, Emma Pérez, Chela Sandoval, Norma Alarcón, and AliciaARRAY. Discuss in foundational theoretical concepts such as Anzaldúa’s foundational concepts of mistería, norteño, nepantla, mestiza, mujer, mujer, mujer, and conocimiento; Pérez’s sitio y lengua and decollo- real and decolonized imaginary; Sandoval’s methodology of oppressed, differential consciousness, and hermeneutics of love; and Ariztía’s postcolonial queer mes- tizaje. How to apply several of these theories in de colonization of one revered cultural icon, la Virgen de Guadalupe. S/U or letter grading.

255. Mass Media Research Methods. (4). Seminar, three hours. Limited to students with standing major in Chicana and Chicano Studies. Survey of range of qualitative and quantitative communication methods and findings regarding Chicana/Chicano and Latina/Latino topics for all media types in both English and Spanish, with emphasis on research findings across this expansive field and design of complex research problems. S/U or letter grading.

257. Bilingual Writing Workshop. (4). Seminar, four hours. Limited to graduate students. Writing sample required. Course webpage mandatory; need not be bilingual to enroll. Technical instruction, analysis, and theoretical discussion of bilingual creative expression through genre of short fiction. Bilingualism as both politics and aesthetics to be central theme. Discussion and analysis of Chicana/Chicano and Latina/Latino short story collections. Peer critique of weekly writing assignments. Emphasis on narrative techniques such as characterization, plot, setting, point of view, and dialogue, and magical realism as prevailing Chicanesque/Latinesque style. Some attention to process of manuscript preparation, public reading, and publication. Concurrently scheduled with course CM135. Letter grading.

258. Laughter, Political Humor, and Social Control. (4). Seminar, three hours. Limited to graduate students. Investigation of power of political humor, one social justice tool, and its influence on discrimination and stereotyping in interpersonal settings and mass media. With goal of developing set of principled methods to investigate its manifestations, reading of outstanding humanistic contributions across history of its social function and power, development of classification of types and settings of political humor, and critical evaluation of recent social scientific models of its nature. S/U or letter grading.

279. Globalization and Transnationalism. (4). Seminar. Three hours. Interdisciplinary seminar that integrates political-economic, historical-sociological, and anthropological perspectives to help students develop critical political-economic analysis of interplay between globalization (of flows of people, material goods, information, and political-cultural influences) and localized transnational dynamics that together are giving meaning and constructing new social identities and strategies for struggle throughout world. S/U or letter grading.

280. Urban Social Inequality. (4). Seminar, three hours. Examination of several key social and urban inequalities in U.S. Survey of several key contemporary issues of inequality primarily from sociology and urban planning studies: income distribution (poverty), work and employment (labor), and neighborhoods (space/geography). Through wide range of methods, approaches, and theoretical frameworks examined, exposure to key research on inequality. S/U or letter grading.

281. Central American Migration and Integration. (4). Seminar. Three hours. Through empirical research cycle and informed with relevant theoretical frameworks, students develop research questions based on migration and integration experiences of Central American immigrants in greater Los Angeles area. Students conduct qualitative research, analyze original data, and write final papers that contextualize needs findings within existing social scientific literature. S/U or letter grading.

282. Chicana/Chicano Legal History. (4). Seminar, three hours. Legal history of Chicana/Chicanos in U.S. and Mexico. 15th to 19th century to present, with emphasis on critical race theory. Examination of landmark legislation and key appellate decisions that have impacted Chicano/Latino community. Topics include critical race theory, Treaty of Guadalupe-Hidalgo, legal construction of Mexican American racial identity, historic educational segregation, contemporary educational issues, jury rights, Chicano movement, and undocumented immigration. S/U or letter grading.

291. Variable Topics Research Seminars: Chicana and Chicano Studies. (4). Seminar, three hours. Limited to graduate students. Research seminar organized around readings and engaged discussion of critical topic of interest in field. Exploration of issue, its theoretical implication for field, and practical implications for communities. Topics vary according to participating faculty members. Final research project required. May be repeated for credit with consent of director of graduate studies. S/U or letter grading.

375. Teaching Practice Practicum. (1 to 4). Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Learner-Centered Teaching in Chicana/Chicana Studies. (4). Seminar, four hours. Designed for graduate students and required of all new department teaching apprentices. Interactive forum for discussing learner-centered teaching in Chicana/Chicana studies. Exploration of diverse classroom strategies and pedagogical techniques open to interdisciplinary field. Topics include preparing for discussion sections, promoting discussion among students, using class websites, office hours, grading, and campus resources. May be repeated once for credit. S/U grading.

596. Directed Individual Study or Research. (4 to 12). Tutorial, to be arranged. Directed individual research and study in area related to Chicana/Chicana studies or subjects not offered as regular courses, arranged individually by student and instructor. May be repeated for maximum of 12 units. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12). Tutorial, to be arranged. Limited to departmental graduate students. Reading and preparation for M.A. comprehensive examination or Ph.D. qualifying exams, mandates and supplemental reading lists prepared by student advisory committees. May be repeated for maximum of 12 units. S/U grading.

598. Research for M.A. Thesis. (4 to 12). Tutorial, to be arranged. Limited to departmental graduate students who have completed all M.A. coursework requirements. Research for and preparation of M.A. thesis under direction of thesis committee chair. May be applied toward M.A. degree requirements. May be repeated for maximum of 12 units. S/U grading.

CIVIC ENGAGEMENT

Interdisciplinary Minor

College of Letters and Science

Michael C. Lens, Ph.D., Chair

Faculty Committee

Joel D. Aberbach, Ph.D. (Political Science, Public Policy)
Michelle F. Erai, Ph.D. (Gender Studies)
Jan de Leeuw, Ph.D. (Statistics)
Barbara Drucker, M.F.A. (Art)
Jennifer A. Jay, Ph.D. (Civil and Environmental Engineering)
Michael C. Lens, Ph.D. (Urban Planning)
Reynaldo F. Macias, Ph.D. (Applied Linguistics, Chicana and Chicano Studies, Education)
Meredith Phillips, Ph.D. (Public Policy, Sociology)
Robert Chao Romero, J.D., Ph.D. (Asian American Studies, Chicana and Chicano Studies)
Olga T. Yokoyama, Ph.D. (Applied Linguistics)
David K. Yoo, Ph.D. (Asian American Studies)

Scope and Objectives

The Civic Engagement minor is designed to provide students with a core analytical, experimental, and theoretical framework for understanding issues of community building, governance, and the use of civic resources. It examines the connections between individual success and societal structures, while exploring traditions of service and the history of civic movements. The minor can be paired with any major as an applied and active way of putting disciplinary tools to use and is intended for highly motivated students of any ideological perspective who are committed to education among a broader community of learners.

Students complete a core curriculum, elective courses, an internship, and a capstone project involving research on a public policy issue. Three internship programs are available: local Los Angeles area internships, state internships through the University of California Center in Sacramento (UCCS) program, and national internships through the Center for American Politics and Public Policy (CAPPP) program in Washington, DC.

Undergraduate Study

Civic Engagement Minor

The Civic Engagement minor integrates local, state, and national internships with an academic context that enriches the valuable learning gained through meaningful work.

To enter the minor, students must (1) have an overall grade-point average of 2.7 or better, (2) submit a completed application endorsed by a faculty sponsor, and (3) submit a written statement describing how civic engagement relates to their academic interests or career goals. Applications are available in A265 Murphy Hall.

Students who complete the minor with a grade-point average of at least 3.5 in their minor coursework, an overall GPA of 3.5, and Civic Engagement 198 for their capstone experience qualify for graduation with College Honors.

Required Core Courses (12 to 15 units): Civic Engagement M115 with a grade of B or better; one service learning course from American Indian Studies C122SL, Arts and Architecture M192SL, Asian American Studies C180SL, Chicana and Chicano Studies C180SL, Civic Engagement 100SL, 105SL, 133SL, 163SL, Edu-
Local Los Angeles area internships span three consecutive terms at the same internship location. Students enroll in three of the upper division courses to satisfy the internship requirement. Applications for the UCCS program are available at http://uccs.ucdavis.edu.

National internships span one term through participation in the Center for American Politics and Public Policy (CAPPP) program in Washington, DC. In the Fall or Spring Quarter program, students enroll in History/Political Science/Sociology M191DC and M195DC; in the Winter Quarter program, students enroll in History/Political Science/Sociology M194DC and M195DC plus one 4-unit elective course. Students must enroll in a minimum of 12 units of upper division courses to satisfy the internship requirement. Applications for the CAPPP program are available at http://www.cappp.ucla.edu.

Required Upper Division Capstone Courses (6 units): Civic Engagement 194 with a grade of B or better, and 198 or 199. Prior to enrolling in course 198 or 199, students must complete Civic Engagement 194 and all other requirements for the minor, with the exception of the three-term local internship which may be completed concurrently with the capstone course. The capstone experience for the minor requires an integrative final paper or project that incorporates the required curriculum and elective courses. Students complete the capstone experience under the guidance of a faculty sponsor and enroll in either Civic Engagement 198 or 199 in the final term of the minor. The faculty sponsor approves the proposed readings as well as the length and scope of the final paper or project based on guidelines developed by the faculty committee for the minor. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 3.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Civic Engagement

Lower Division Courses

10. Introduction to Engaged Scholarship. (2), Seminar, two hours. Limited to students participating in preserved UCLA civic engagement programs. Introduction to history, research, and philosophy of general University/community partnerships, as well as specific opportunities for active engagement by undergraduate students at UCLA. Offered in summer only. P/NP grading.

18. Bruin Leaders: Model for Social Change. (1), Lecture, two hours; fieldwork, one hour. Introduction to leadership development and civic engagement through community service. Based on nonhierarchical mode of leadership developed by UCLA Graduate School of Education and Information Studies. Topics include diversity issues, organizational skills and team-building development, and personal growth development. Community service goals. Participation in first-week orientation session required. Consult Schedule of Classes for topics to be offered in specific term. May not be repeated for credit. P/NP grading.

95A-95B. Introduction to Community-Based Internships. (2-4), Tutorial, one hour; fieldwork, four hours (course 95A) and 10 hours (course 95B). Course 95A is prerequisite to 95B. Introduction to community-based work for students in specialized UCLA scholarship programs. Platform for preplanned, organized, structured, and supervised off-campus experiences with academic context. Acceptable placements include corporate, nonprofit, and governmental organizations that meet criteria for undergraduate internships as established by Center for Community Learning. Individual contract with supervising faculty member required. P/NP or letter grading.

95CE. Introduction to Community-Based Internships. (2), (Formerly numbered 95.), Tutorial, one hour; fieldwork, four hours. Introduction to community-based work for the study of advanced social conditions. The course includes a minimum of 90 fieldwork hours completed. Fieldwork is preplanned, organized, structured, and supervised off-campus experiences with academic context. Acceptable placements include corporate, nonprofit, and governmental organizations that meet criteria for undergraduate internships as established by Center for Community Learning. Individual contract with supervising faculty member required. P/NP or letter grading.

100SL. Client-Based Program Evaluation and Research. (4). Seminar, three hours; fieldwork, 10 hours. Limited to juniors/seniors. Service learning course for undergraduate students who work with community partners through which students learn theory and practice of program evaluation. Evaluation of nonprofit organizations in Los Angeles by research teams. Offered in summer only. Letter grading.

110SL. Community-Based Studies of Popular Literature. (5). (Same as English M110SL). Lecture, four hours; discussion, one hour (when scheduled); fieldwork, two hours. Enrollment by English Composition 3. Service learning course that examines history and development of one or more genres of popular literature, with attention to contemporary communities of readers and writers and formation of civil society. Topics vary and may include children’s literature and childhood literacy, mass market fiction and book club culture, or science fiction and science policy. Service-learning component includes meaningful work with local nonprofit organizations selected in advance by instructor. May be repeated for credit with topic change. P/NP or letter grading.

115SL. Citizenship and Public Service. (4). (Same as Political Science M115SC). Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: Political Science 10. Designed for juniors/seniors. Study of ways in which political theory has been conceived of as a citizen and public service, how these ideas have changed over time, and frameworks for thinking about citizenship in era of markets and globalization. P/NP or letter grading.

133SL. Community-Based Research: Theory and Practice. (5), Seminar, three hours; fieldwork, three hours. Limited to juniors/seniors. Service learning course in research methods. Community-based research, in collaboration with community organizations, on theme of client rights: activism and advocacy. Offered in summer only, Letter grading.

150. Social Innovation Theory and Application. (4), Seminar, three hours. Limited to students in UCLA Summer Social Innovation Research Program. Study of social innovation as the role of civic engagement, with particular emphasis on how social innovators have transformed way we address entrenched social issues. Study of elements of existing social innovation models and strategies for employing them in social change on campus and in communities, Offered in summer only. Letter grading.

163SL. Civic Engagement and Public Use of Knowledge: Special Topics. (5), Seminar, three hours; fieldwork, three hours. Limited to juniors/seniors. Service learning course that examines variable topics related to University/community partnerships and role of civic education in higher education. May be repeated for credit with topic or instructor change. Letter grading.

175SL. Addressing Social Determinants in Racial/ Ethnic Minority Communities to Reduce and Prevent Health Disparities. (4), Seminar, two hours; fieldwork, 10 hours. Examination of how addressing social determinants in racial/ethnic minority communities can reduce or eliminate physical and mental health disparities. Currently in racial and ethnic minority communities, health status of individuals can be function of built environment, exposure to pollutants and toxics, scarcity of supermarkets or stores with fresh produce and nutrient-dense foods, and variety of other stressors and unhealthy conditions. Health interventions are often focused on individual-level change or increases in access to health care with little in way of changing risk environments. Designed to identify and provide opportunities to understand how to address social determinants related to negative health outcomes in racial/ethnic minority
neighborhoods and communities and to experience how to use social determinants literature in service of collaborative activities with community organizations. P/NP or letter grading.

180. Access to Justice: Hope and Reality. (4). Seminar, three hours. Limited to UCLA students who are members of JusticeCorps program through AmeriCorps. JusticeCorps was established as innovative approach to solving one pressing issue faced by courts around country today: providing equal access to justice. Examination of promise of justice system in America to provide meaningful access to courts for all who seek it. What premises underlie structure of U.S. legal system? Exploration of sociopolitical context for current legal system, including origins and current status of legal services and self-help movements, including role of JusticeCorps. Were these strategies designed to make promise of equal justice a reality or have they inadvertently, or intentionally, resulted in two-tiered legal system—one for those with means and another for those without? P/NP or letter grading.

194. Capstone Research Seminar. (2). (Formerly numbered M194.) Seminar, two hours. Required capstone research project. Integration of off-campus work with academic theories and concepts within field of civic engagement. Students report on their internship experiences and analyze relationship between internship and issues of policy, ethics, systemic responses to community needs, or personal and intellectual transformations. Students identify one faculty mentor and develop proposal for required capstone research project. Letter grading.

194A. Astin Civic Engagement Research Seminar. (2). Seminar, two hours. Limited to students in Astin civic engagement spring training program. Integration of off-campus work with academic theories and concepts within field of civic engagement. Students report on their internship experiences and analyze relationship between their internship and issues of policy, ethics, systemic responses to community needs, or personal and intellectual transformations. Students identify one faculty mentor and develop proposal for civic engagement research project. Letter grading.

195. Community or Corporate Internships in Civic Engagement. (4). Tutorial, one hour; fieldwork, eight hours. Limited to juniors/seniors in Civic Engagement minor. Internship in supervised setting in corporate, governmental, or nonprofit setting, using knowledge base created in civic engagement. Students submit weekly writing assignments and final paper that examine civic issues related to meaningful work at internship site. Students expected to learn ways in which individuals and groups can organize to solve problems, analyze issues, or bring about change in democratic society. Must be repeated for three consecutive terms to fulfill minor requirements. Individual contract with supervising faculty member required. Letter grading.

195CE. Community and Corporate Internships in Civic Engagement. (4). Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated through Center for Community Learning. Students complete weekly written assignments and attend biweekly meetings with graduate student coordinator, and write final research paper. Faculty sponsor and graduate student coordinator construct series of reading assignments that examine issues related to internship site. May be repeated for credit with consent of Center for Community Learning. Individual contract with supervising faculty member required. Letter grading.

199. Directed Research or Senior Project in Civic Engagement. (4). Tutorial, one hour. Required capstone course to Civic Engagement minor. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. Individual contract required. Letter grading.

Scope and Objectives

The Department of Civil and Environmental Engineering programs at UCLA include civil engineering materials, earthquake engineering, environmental engineering, geotechnical engineering, hydrology and water resources engineering, structural engineering, and structural mechanics.

The civil engineering undergraduate curriculum leads to a B.S. in Civil Engineering, a broad-based education in environmental engineering, geotechnical engineering, hydrology and water resources engineering, and structural engineering. This program is an excellent foundation for entry into professional practice in civil engineering or for more advanced study. The department also offers the undergraduate Environmental Engineering minor.

At the graduate level, M.S. and Ph.D. degree programs are offered in the areas of civil engineering materials, environmental engineering, geotechnical engineering, hydrology and water resources engineering, and structures (including structural/earthquake engineering and structural mechanics). In these areas, research is being done on a variety of problems ranging from basic physics and mechanics problems to critical problems in earthquake engineering and in the development of new technologies for pollution control and water distribution and treatment.

Undergraduate Study

The civil engineering program is accredited by the Engineering Accreditation Commission of ABET. See http://www.abet.org.

The Civil Engineering major is a designated capstone major. In each of the major field design courses, students work individually and in groups to complete design projects. To do so, they draw on their prior coursework, research the needed materials and possible approaches to creating their device or system, and come up with creative solutions. This process enables them to integrate many of the principles they have learned previously and apply them to real systems. In completing their projects, students are also expected to demonstrate effective oral and written communication skills, as well as their ability to work productively with others as part of a team.

Civil Engineering B.S.

Capstone Major

Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering 1, M20 (or Computer Science 31); Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL; one natural science course selected from Civil and Environmental Engineering 58SL, Earth, Planetary, and Space Sciences 3, 15, 16, 17, 20, Environment 12, Life Sciences 1, 2, Microbiology, Immunology, and Molecular Genetics 5, 6, or Neuroscience 10.
To enter the minor, students must be in good academic standing (2.0 grade-point average or better) and file a petition in the Office of Academic and Student Affairs; at least nine units must be from one of the two selected tracks, and at least nine additional elective options.

Environmental Engineering: Required: Civil and Environmental Engineering 155 and one capstone design course from 157A or 157C; recommended courses: 154, 163, 164, M165, M166; laboratory courses: 156A, 156B.

Geotechnical Engineering: Required: One capstone design course (Civil and Environmental Engineering 121); recommended courses: C104, 123, 125, C182, Earth, Planetary, and Space Sciences 139; laboratory course: Civil and Environmental Engineering 128L.

Hydrology and Water Resources Engineering: Required: One capstone design course (Civil and Environmental Engineering 151); recommended courses: 152, 157A; laboratory course: 157L.

Structural Engineering and Mechanics: Required: Civil and Environmental Engineering 135B, one lecture course from 130, M155C, 137, 141, or 142, and one capstone design course from 141 or 143; recommended courses: C104, 121, 125, 130, 137, 141, 142, 143, 144, 147, C182; laboratory courses: 130L, 135L, 137L, 140L, 142L.

Additional Elective Options: Atmospheric and Oceanic Sciences 141, Civil and Environmental Engineering 180, 181, Earth, Planetary, and Space Sciences 100, 101, Environment 157, Mechanical and Aerospace Engineering 166C, M168; laboratory course: Civil and Environmental Engineering 129L.

For information on University and general education requirements, see the College and Schools section earlier in this catalog.

Environmental Engineering Minor

The Environmental Engineering minor is designed for students who wish to augment their major program of study with courses addressing issues central to the application of environmental engineering to important environmental problems facing modern society in developed and developing countries. The minor provides students with a greater depth of experience and understanding of the role that environmental engineering can play in dealing with environmental issues.

To obtain the Environmental Engineering minor, students must be in good academic standing (2.0 grade-point average or better) and file a petition in the Office of Academic and Student Affairs; at least nine major field elective courses (36 units) that must include one capstone design course from Civil and Environmental Engineering 123, 144, 147, 152, 157B, or 157C, as well as the required courses in two of the following tracks and at least two laboratory courses, one of which must be from each of the two selected tracks, and the other from any separate track or a laboratory course from the list of additional elective options:

Environmental Engineering: Required: Civil and Environmental Engineering 155 and one capstone design course from 157B or 157C; recommended courses: 154, 163, 164, M165, M166; laboratory courses: 156A, 156B.

Geotechnical Engineering: Required: One capstone design course (Civil and Environmental Engineering 121); recommended courses: C104, 123, 125, C182, Earth, Planetary, and Space Sciences 139; laboratory course: Civil and Environmental Engineering 128L.

Hydrology and Water Resources Engineering: Required: One capstone design course (Civil and Environmental Engineering 151); recommended courses: 152, 157A; laboratory course: 157L.

Structural Engineering and Mechanics: Required: Civil and Environmental Engineering 135B, one lecture course from 130, M155C, 137, 141, or 142, and one capstone design course from 141 or 143; recommended courses: C104, 121, 125, 130, 137, 141, 142, 143, 144, 147, C182; laboratory courses: 130L, 135L, 137L, 140L, 142L.

Additional Elective Options: Atmospheric and Oceanic Sciences 141, Civil and Environmental Engineering 180, 181, Earth, Planetary, and Space Sciences 100, 101, Environment 157, Mechanical and Aerospace Engineering 166C, M168; laboratory course: Civil and Environmental Engineering 129L.

For information on University and general education requirements, see the College and Schools section earlier in this catalog.

Upper Division Courses

1. Civil Engineering and Infrastructure. (2). Lecture, two hours; outside study, four hours. Examples of infrastructure, its importance, and manner by which it is designed and constructed. Role of civil engineers in infrastructure development and preservation. P/NP grading.

2. Introduction to Computing for Civil Engineers. (2). Lecture, two hours; laboratory, two hours; outside study, two hours. Introduction to computer programming using MATLAB. Selected topics in programming, with emphasis on numerical techniques and methodology, as applied to civil engineering programs. Letter grading.

4. Climate Change, Water Quality, and Ecosystem Functioning. (5). Lecture, four hours; service learning, two hours; outside study, nine hours. Science related to climate change, water quality, and ecosystem health. Topics include carbon and nutrient cycling, hydrologic cycle, ecosystem structure and services, biodiversity, basic aquatic chemistry, and impacts of climate change on ecosystem functioning and water quality. Participation in service education projects to elementary or middle school audience. Letter grading.

5. Professional Practice Issues in Structural Engineering. (2). Seminar, two hours; outside study, four hours. Introduction to issues related to professional practice in structural engineering. Content and organization of model building codes and material-specific reference standards. Interpretation of structural and design drawings and specifications. Material-independent structural calculations such as tributary area, multistory column loads, and estimation of simple seismic and wind loads. P/NP grading.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Civil and Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Civil Engineering.

Civil and Environmental Engineering

Lower Division Courses

1. Civil Engineering and Infrastructure. (2). Lecture, two hours; outside study, four hours. Examples of infrastructure, its importance, and manner by which it is designed and constructed. Role of civil engineers in infrastructure development and preservation. P/NP grading.

2. Introduction to Computing for Civil Engineers. (2). Lecture, two hours; laboratory, two hours; outside study, two hours. Introduction to computer programming using MATLAB. Selected topics in programming, with emphasis on numerical techniques and methodology, as applied to civil engineering programs. Letter grading.

4. Climate Change, Water Quality, and Ecosystem Functioning. (5). Lecture, four hours; service learning, two hours; outside study, nine hours. Science related to climate change, water quality, and ecosystem health. Topics include carbon and nutrient cycling, hydrologic cycle, ecosystem structure and services, biodiversity, basic aquatic chemistry, and impacts of climate change on ecosystem functioning and water quality. Participation in service education projects to elementary or middle school audience. Letter grading.

5. Professional Practice Issues in Structural Engineering. (2). Seminar, two hours; outside study, four hours. Introduction to issues related to professional practice in structural engineering. Content and organization of model building codes and material-specific reference standards. Interpretation of structural and design drawings and specifications. Material-independent structural calculations such as tributary area, multistory column loads, and estimation of simple seismic and wind loads. P/NP grading.

Upper Division Courses

2. Applied Numerical Computing and Modeling in Civil and Environmental Engineering. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Requirements: course M20, Mathematics 33B (may be taken concurrently). Introduction to numerical computing with specific applications in civil and environmental engineering. Topics include error and computer arithmetic, root finding, curve fitting, numerical integration and differentiation, solution of systems of linear and nonlinear equations, numerical solution of ordinary and partial differential equations. Letter grading.

100. Introduction to Probability and Statistics for Engineers. (4). Lecture, four hours; discussion, one hour (when scheduled); outside study, seven hours. Requisites: Mathematics 32A, 33A. Recommended: course M20. Introduction to fundamental concepts and statistical methods commonly used in civil engineering, with focus on how these concepts are used in experimental design and sampling, data analysis, risk and reliability analysis, and project design under uncertainty. Includes basic probability concepts, random variables and analytical probability distributions, functions of random variables, estimating parameters from observational data, regression, hypothesis testing, and Bayesian concepts. Letter grading.

120. Principles of Soil Mechanics. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 108. Soil as foundation for structural and hydraulic systems; construction, classification, physical and mechanical properties, soil compaction, earth pressures, consolidation, and shear strength. Letter grading.

121. Geotechnical and Earth Structures. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 120. Design methods for foundations and earth structures. Site investigation, including evaluation of soil properties for design of foundations and piles, including load-bearing and settlement calculations. Design of slopes and earth retaining structures. Letter grading.

123. Advanced Geotechnical Engineering. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 121. Analysis and design of earth dams, including seepage, piping, and slope stability analyses. Case history studies involving landslides, settlement, and expansive soil problems, and design of repair methodologies for those problems. Within context of above technical problems, emphasis on preparation of professional engineering documents such as proposals, work acknowledges, figures, plans, and reports. Letter grading.

128L. Soil Mechanics Laboratory. (4). Lecture, one hour; laboratory, eight hours; outside study, three hours. Requisite or corequisite: course 120. Laboratory experiments to be performed by students to obtain soil parameters required for assigned design problems. Soil classification, grain size, Atterberg limits, specific gravity, compaction, expansion index, consolidation, shear strength determination. Design problems, laboratory report writing. Letter grading.

129L. Engineering Geomatics. (4). (Formerly numbered 129L) Lecture, two hours;recitation, two hours; laboratory, four hours; outside study, four hours. Collection, processing, and analysis of geospatial data. Ellipsoid and geoid models of shape of Earth, Earth rotation, gravity, and earthquake ground motion. Data collection, analysis, and mapping. Quantitative terrain analysis and change detection. Hydrogeomatics: seafloor mapping. Letter grading.

135A. Elementary Structural Analysis. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course M20, 103, 108. Introduction to structural analysis: classification of statically determinate and indeterminate structures, free body diagrams, deflections in elementary structures; virtual work; analysis of indeterminate structures using force method; introduction to displacement method and energy concepts. Letter grading.

135B. Intermediate Structural Analysis. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 135A. Analysis of frames and trusses using matrix methods; matrix displacement method; analysis concepts based on theorem of virtual work; moment distribution method. Letter grading.

135C. Introduction to Finite Element Methods. (4). (Same as Mechanical and Aerospace Engineering M168.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 130 or Mechanical and Aerospace Engineering 156A or 166A. Introduction to basic concepts of finite element methods (FEM) and applications to structural and solid mechanics and heat transfer. Direct matrix structural analysis; weighted residual, least squares, and Ritz approximation methods; shape functions; convergence properties; isoparametric formulation of multidimensional heat flow and elasticity; numerical integration. Practical application of finite element design concepts and analytical modeling; preprocessing and postprocessing techniques; term projects with computers. Letter grading.

140L. Structural Components and Systems Testing Laboratory. (4). Lecture, two hours; laboratory, six hours; outside study, two hours. Requisite: course 130. Introduction to the finite element method. Letter grading.
151. Introduction to Water Resources Engineering. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 150, Mechanical and Aerospace Engineering 103. Recommended: courses 103, 110. Principles of hydraulics, flow of water in open channels and pressure conduits, reservoirs and dams, hydraulic machinery, hydrometric power, irrigation systems, flood analysis and design, applied to water resources engineering. Letter grading.

152. Hydraulic and Hydrologic Design. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: courses 150, 151. Analysis and design of hydraulic and hydrologic systems, including stormwater management systems, potable and recycled water distribution systems, wastewater collection systems, and constructed wetlands. Emphasis on practical design components, including reading/interpreting professional drawings and documents, environmental impact reports, permitting, agency coordination, and engineering ethics. Project-based course includes analysis of alternative designs, use of engineering economics, and preparation of written engineering reports. Letter grading.

154. Chemical Fate and Transport in Aquatic Environments. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisite: course 153. Fundamental physical, chemical, and biological principles governing movement and fate of chemicals in surface waters and groundwater. Topics include physical transport in various aquatic environments, air-water exchange, acid-base equilibria, oxidation-reduction chemistry, chemical sorption, biodegradation, and bioaccumulation. Practical quantitative problems solved considering both reaction and transport of chemicals in environment. Letter grading.

156A. Environmental Chemistry Laboratory. (4). Lecture, four hours; laboratory, four hours; outside study, four hours. Enforced study, four hours. Requisites: course 153 (may be taken concurrently). Chemistry 20A, 20B. Basic laboratory techniques in analytical chemistry related to water and wastewater analysis. Selected experiments include gravimetric analysis, titrmetric spectrophotometry, gas chromatography, pH and electrical conductivity. Concepts to be applied to analysis of real water samples in course 156B. Letter grading.

156B. Environmental Engineering Unit Operations and Processes Laboratory. (4). Laboratory, six hours; discussion, two hours; outside study, four hours. Requisites: Chemistry 20A, 20B. Characterization and analysis of typical natural waters and wastewaters for inorganic and organic constituents. Selected experiments include analysis of solids, nitrogen species, oxygen demand, and chloride residual, that are used in unit operation experiments that include reactor dynamics, gas stripping, coagulation/flocculation, and membrane separation. Letter grading.

157A. Hydrologic Modeling. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 150 or 151. Introduction to hydrologic modeling, including derived from real systems, open-channel flow, including one-dimensional steady flow and unsteady flow, (2) pipe flow and water distribution systems, (3) rainfall-runoff modeling, and (4) groundwater flow and contaminant transport modeling, with focus on use of industry and/or research standard models with locally relevant applications. Letter grading.

157B. Design of Water Treatment Plants. (4). Lecture, two hours; discussion, two hours; laboratory, four hours; outside study, four hours. Requisites: course 150. Overview of design of water treatment plants, design of unit operations, predesign of water treatment plants, hydraulics of plants, process control, and cost estimation. Letter grading.

157C. Design of Wastewater Treatment Plants. (4). Lecture, four hours; outside study, eight hours. Requisite: course 155. Process design of wastewater treatment plants, including primary and secondary treatment, detailed design review of existing plants, process control, and economics. Letter grading.

157L. Hydrologic Analysis. (4). Lecture, two hours; laboratory, four hours; outside study, six hours. Requisite: course 150. Collection, compilation, and interpretation of data from precipitation and discharge event measurements. Use of hydrologic variables and parameters for development, construction, and application of analytical models for selected problems in hydrology and water resources. Letter grading.

157M. Hydrology of Mountain Watersheds. (4). Lecture, one hour; fieldwork, four hours; laboratory, three hours; outside study, six field trips. Requisite: course 150 or 157L. Advanced field- and laboratory-based course with focus on study of hydrologic and geomorphic processes in snow-domi- nated and montane ecosystems. Students measure and quantify snowpack properties, snowmelt, discharge, evaporation, infiltration, soil properties, and local hydrology, as well as investigate geomorphological processes. Ex- ploration of rating curves, stream classification, and flooding potential. Extended field trip required. Letter grading.

M165. Environmental Nanotechnology: Implications and Applications, (4). (Same as Engineering M103). Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisites: Engineering M101. Introduction to potential implications of nanotechnology to environmental systems as well as potential applications in both environmental protection. Technical contents include three multidisciplinary areas: (1) chemical, physical, and biological properties of nanomaterials, (2) transport, reactivity, and stability of nanoscale materials in natural environmental systems, and (3) use of nano- technology for energy and water production, plus en- vironmental protection, monitoring, and remediation. Letter grading.

M166. Environmental Microbiology. (4). (Same as Environmental Health Sciences M166L) Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisite: course 153. Micro- biological and metabolic capabilities, microbial ge- netics and its potentials, growth of microbes and ki- netics of growth, microbial ecology and diversity, mi- crobiology of wastewater treatment, probing of microbes, public health microbiology, pathogen con- trol. Letter grading.

M166L. Environmental Microbiology and Biotechnology Laboratory. (1). (Same as Environmental Health Sciences M166LL) Laboratory, two hours; outside study, two hours. Corequisite: course M166. Introduction to laboratory practice within environmental mi- crobiology, sampling of environmental samples, class- and modern molecular techniques for enumeration of microbes from environmental samples, tech- niques for determining identity in environmental samples, laboratory setups for studying environmental biotechnology. Letter grading.

180. Introduction to Transportation Engineering. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Designed for juniors/seniors. Applications of traffic flow theories; data collection and analyses; intersection capacity analysis; simulation models; signal design, signal timing design, implementation, and perfor- mance evaluation; Intelligent Transportation Systems concept, architecture, and integration. Letter grading.

C182. Rigid and Flexible Pavements: Design, Materials, and Serviceability. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Recommended requisites: courses C104, 108, 120, Materials Science 104. Correlation, analysis, and metrical- tion of aspects of pavement design, including mate- rials selection and traffic loading and volume. Special attention to aspects of pavement distress/service/dis- ability and factoring of these into metrics of pavement performance. Discussion of potential choices of pavement materials (i.e., asphalt and concrete) and their specific strengths and weaknesses in paving ap- plications. Unification and correlation of different vari- ables that influence pavement performance and high- light their relevance in pavement design. Concurrently scheduled with course C282L. Letter grading.

188. Special Courses in Civil and Environmental Engineering. (2 to 8). Lecture, four hours; fieldwork/laboratory, two hours; outside study, six hours. Designed for ju- niors/seniors. Applications of traffic flow theories; data collection and analyses; intersection capacity analysis; simulation models; signal design, signal timing design, implementation, and perfor- mance evaluation; Intelligent Transportation Systems concept, architecture, and integration. Letter grading.

192. Undergraduate Practicum in Civil and Environmental Engineering. (4). Laboratory, four hours; activity, four hours; outside study, four hours. Prepa- ration: completion of high school-focused California Teach course or engineering major with approved co- herent proposal, directed a secondary school teaching career. Development of pedagogical assign- ments. Students assist with relevant readings and discussions from pedagogical literature, experimenta- tion with existing and new teaching and learning equipment, mini-lectures and demonstrations to en- roled course students, and implementation of innova- tive curriculum during laboratory sessions. Students gain experience in leading courses, teaching engi- neering courses and obtain hands-on course devel- opment experience under guidance of faculty mem- bers. Letter grading.

194. Research Group Seminars: Civil and Environmental Engineering. (2 to 8). Lecture, four hours; fieldwork/laboratory, two hours; outside study, four to 16 hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field or field of research interests or students. May be repeated for credit. Letter grading.
Graduate Courses

C204. Structure, Processing, and Properties of Civil Engineering Materials. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Discussion of aspects of cement and concrete materials, including manufacture of cement and production of concrete. Aspects of cement composition and basic chemical reactions, microstructure, properties of plastic and hardened concrete, chemical admixtures, and quality control and acceptance testing. Development and testing of fundamentals for complete understanding of overall response of all civil engineering materials. By end of term, successful utilization of fundamental materials science concepts to understand, explain, analyze, and describe engineering performance of civil engineering materials. Concurrently: course C104. Letter grading.

225. Geotechnical Engineering. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 220, 245 (may be taken concurrently). Analysis of earthquake-induced ground failure, including soil liquefaction, cyclic softening of clays, seismic compression, surface fault rupture, and seismic slope stability. Ground response effects on earthquake ground motions. Soil-structure interaction, including inertial and kinematic interaction and foundation deformations under seismic loading. Letter grading.

226. Geoenvironmental Engineering. (4). Lecture, four hours; outside study, eight hours. Requisite: courses 120, 256A, 245; concurrent enrollment involves application of geotechnical principles to environmentally relevant problems. Topics include environmental regulations, waste characterization, geosynthetics, soil and water landfills, subsurface barrier walls, and disposal of high water content materials. Letter grading.

227. Numerical Methods in Geotechnical Engi- neering. (4). Lecture, four hours; outside study, eight hours. Requisite: course 220. Introduction to basic concepts of finite element method, and to constitutive modeling based on elasticity and plasticity theories. Special emphasis on numerical applications and identification of modeling concerns such as instability, bifurcation, nonuni- formity, and nonuniqueness of solutions. Letter grading.

M230A. Linear Elasticity. (4). (Same as Mechanical and Aerospace Engineering M235A.) Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 156A or 166A. Linear elastostatics. Cartesian tensors; infinitesimal strain tensor; Cauchy stress tensor; strain energy; equilibrium equations for linear constitutive relations; plane elastostatic problems; holes, corners, inclusions, cracks; three-dimensional problems of Kelvin, Boussinesq, and Cerrutti. Introduction to boundary integral equation methods. Letter grading.

M230B. Nonlinear Elasticity. (4). (Same as Mechanical and Aerospace Engineering M256B.) Lecture, four hours; outside study, eight hours. Requisite: course M230A. Kinematics of deformation, material and spatial coordinates, deformation gradient tensor, nonlinear and linear strain tensors, strain displacement relations; balance laws, Cauchy and Piola stresses, Cauchy and Piola derivatives of motion; balance of energy; stored energy; constitutive relations, elasticity, hyper- elasticity, thermoelasticity; linearization of field equations; solution of selected problems. Letter grading.

232. Theory of Plates and Shells. (4). Lecture, four hours; outside study, eight hours. Requisite: course 130. Small and large deformation theories of thin plates; energy methods; free vibrations; membrane theory of shells; axisymmetric deformations of cylin- drical and spherical shells, including bending. Letter grading.

234. Advanced Topics in Structural Mechanics. (4). Lecture, four hours; outside study, eight hours. Limited to graduate engineering students. Current topics in composite materials, computational methods, finite element analysis, structural synthesis, nonlinear me- chanics, and structural mechanics of very small and large strains. Topics may vary from term to term. Letter grading.

235A. Advanced Structural Analysis. (4). Lecture, four hours; outside study, eight hours. Requisite: course 135A. Recommended: course 135B. Review of matrix force and displacement methods of structural analysis; virtual work theorem, virtual forces, and displacements; theorems on stationary value of total and complementary potential energy, minimum total potential energy, Maxwell/Betti theorems, effects of approximations. Introduction to finite element analysis. Letter grading.

235B. Finite Element Analysis of Structures. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 130A, 256A, 245; concurrent enrollment involves application of finite element methods for deformable systems; solution methods for linear equations; analysis of structural systems with one-di- mensional elements; introduction to variational cal- culus; discrete elements and force, and mixed methods for membrane, plate, shell structures; instability effects. Letter grading.

235C. Nonlinear Structural Analysis. (4). Lecture, four hours; outside study, eight hours. Requisite: course 235B. Classification of nonlinear effects; material nonlinearities; conservative, nonconservative material behavior; geometric nonlinearities, La- grangian, Eulerian description of motion; finite ele- ment methods in geometrically nonlinear problems; postbuckling behavior of structures; solution of non- linear equations; incremental, iterative, programming methods. Letter grading.

243A. Behavior and Design of Reinforced Con- crete Structural Elements. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 143, 142. Advanced topics on design of reinforced concrete struc- tures, including stress-strain relationships for plain and confined concrete, moment-curvature analysis of sections and design methods. Footings, sheet piling, low-rise walls, as well as design of beam-column joints. Introduction to displacement-based design and applications of strut-and-tie models. Letter grading.
243B. Response and Design of Reinforced Concrete Structural Systems. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 243A, 246. Information on response and behavior of reinforced concrete buildings to earthquake ground motions. Topics include use of elastic and inelastic response spectra, role of strength, stiffness, and ductility in earthquake response, nonlinear time history analyses, capacity design, and seismic safety analysis; calculation of capacity reduction factors. Letter grading.

247. Earthquake Hazard Mitigation. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 130, and M237A or 246. Concept of seismic isolation, linear theory of base isolation, visco-elastic and hysteretic behavior, elastomeric bearings under compression and bending, buckling of bearings, sliding bearings, passive energy dissipation devices, response of structures with isolation and passive energy dissipation devices, static and dynamic analysis procedures, code provisions and design methods for seismically isolated structures. Letter grading.

249. Selected Topics in Structural Engineering, Mechanics, and Geotechnical Engineering. (2). Lecture, two hours; outside study, six hours. Review of recent research and developments in structural engineering, structural mechanics, and geotechnical engineering. Structural analysis, finite elements, structural stability, dynamics of structures, structural design, earthquake, ground motion, elasticity, plasticity, structural mechanics, mechanics of composites, constitutive modeling, geom Mechanics, and geotechnical engineering. May be repeated for credit. S/U grading.

250A. Surface Water Hydrology. (4). Lecture, four hours; outside study, eight hours. Requisite: course 150. In-depth study of surface water hydrology, including discussion and interrelationship of major topics such as rainfall and evaporation, snow and ice, interception, ground water, lakes and reservoirs, rivers and streams, water quality, and water resources. Letter grading.

250C. Hydrodynamics. (4). Lecture, four hours; outside study, eight hours. In-depth study of hydrodynamic processes. Role of hydrology in climate system, precipitation and evaporation processes, atmospheric radiation, exchange of water, energy, and heat between soil and vegetation surface and overlying atmosphere, flux and transport in turbulent boundary layer, basic remote sensing principles. Letter grading.

250D. Water Resources Systems Engineering. (4). Lecture, four hours; outside study, eight hours. Requisite: course 151. Application of mathematical programming techniques to water resources systems. Topics include reservoir management and operation; optimal timing, sequencing and sizing of water resources projects; and multiprojective planning and conjunctive use of surface water and groundwater. Emphasis on management of water quantity. Letter grading.

251A. Rainfall-Runoff Modeling. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 250A, 251B. Introduction to hydrologic modeling concepts, and including rainfall-runoff analysis, input data, uncertainty, modeling, estimation and sensitivity analysis, and application of models for flood forecasting and prediction of streamflows in water resource applications. Letter grading.

251C. Remote Sensing with Hydrologic Applications. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 250A, 250C. Introduction to basic physical concepts of remote sensing as they relate to surface and atmospheric hydrologic processes. Applications include radiative transfer modeling and parameter estimation of vegetation, land cover, and water surface. Letter grading.

251D. Hydrologic Data Assimilation. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 250A, 250C. Introduction to basic concepts of classical and Bayesian estimation theory for purposes of hydrologic data assimilation. Applications geared toward assimilating disparate observations into dynamic models of hydrologic systems. Letter grading.

252. Engineering Economic Analysis of Water and Environmental Planning. (4). Lecture, four hours; outside study, eight hours. Requisites: course 106A, one or more courses from Economics 1, 2, 11, 100, 101. Economic theory and applications in analysis and management of water and environmental problems; application of price theory to water resource management and renewable resources; benefit-cost analysis with applications to water resources and environmental planning. Letter grading.

255A. Physical and Chemical Processes for Water and Wastewater Treatment. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 254A, 255A. Fundamentals of environmental engineering microbiology; kinetics of microbial growth and biological oxidation; applications for activated sludge, gas transfer, fixed-bed processes, aerobic and anaerobic digestion, sludge disposal, and biological nutrient removal. Letter grading.

255B. Biological Processes for Water and Wastewater Treatment. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 254A, 255A. Membrane separations to desalination, water reclamation, brine disposal, and ultrapure water systems. Discussion of reverse osmosis, ultrafiltration, electrolysis, and the fundamentals of biological and practical and theoretical standpoints. Letter grading.

256A. Introduction to Atmospheric Chemistry. (4). Lecture, four hours; outside study, eight hours. Requisite: course 256A. In-depth study of selected topics related to biological treatment of waters and wastewaters, such as biodegradation of xenobiotics, pharmaceuticals, and emerging pollutants, toxicity, and nutrients. Discussion of reactions in the environment, including fate and transport of pollutants in aquatic environments, and their effect on aquatic life. Letter grading.

258A. Membrane Separations in Aquatic Systems. (4). Lecture, four hours; outside study, eight hours. Requisites: course 258A. Membrane separations to desalination, water reclamation, brine disposal, and ultrapure water systems. Discussion of reverse osmosis, ultrafiltration, electrolysis, and the fundamentals of biological and practical and theoretical standpoints. Letter grading.

259A. Selected Topics in Environmental Engineering. (2 to 4). Lecture, four hours; outside study, eight hours. Review of recent research and developments in environmental engineering. Water and wastewater treatment systems, nonpoint pollution, multimedia impacts. May be repeated for credit. S/U grading.

259B. Selected Topics in Water Resources. (2 to 4). Lecture, four hours; outside study, eight hours. Review of recent research and developments in water resources. Water supply and hydrology, global climate change, economic planning, optimization of water resource development. May be taken for maximum of 4 units. Letter grading.

260. Advanced Topics in Hydrology and Water Resources. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 250A, 250B, 250D. Current research topics in inverse problem of parameter estimation, experimental design, conjunctive use of surface and groundwater, multimedia water resource planning, and optimization of water resource systems. Topics may vary from term to term. Letter grading.

261B. Advanced Biological Processes for Water and Wastewater Treatment. (4). Lecture, four hours; outside study, eight hours. Requisite: course 256A. In-depth study of selected topics related to biological treatment of waters and wastewaters, such as biodegradation of xenobiotics, pharmaceuticals, and emerging pollutants, toxicity, and nutrients. Discussion of theoretical aspects, experimental observations, and recent literature. Application to important and emerging environmental problems. Letter grading.

M262A. Introduction to Atmospheric Chemistry. (4). Same as Atmospheric and Oceanic Sciences M203A. Lecture, three hours. Requisite for undergraduate students: 203B. Introduction to atmospheric chemistry; thermodynamics; spectroscopy, and photochemistry; chemical composition and history of Earth’s atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of tro-

263A. Physics of Environmental Transport. (4). Lecture, four hours; outside study, eight hours. Described for graduate students. Transport processes in surface water, groundwater, and atmosphere. Emphasis on exchanges across phase boundaries: sediment-water interface; air-water gas exchange; particulates, droplets, and bubbles; small-scale dispersion and mixing; effect of reactions on transport; linkages between physical, chemical, and biological processes. Letter grading.

263B. Advanced Topics in Transport in Environmental Interfaces. (4). Lecture, four hours; outside study, eight hours. Requisite: course 263A. In-depth treatment of selected topics involving transport phenomena at environmental interfaces between solid, fluid, and gas phases, such as aquatic sediments, porous aggregates, and vegetative canopies. Discussion of theoretical models and experimental observations. Application to important environmental engineering problems. Letter grading.

265A. Mass Transfer in Environmental Systems. (4). Lecture, four hours; computer applications, two hours; outside study, eight hours. Designed for graduate environmental engineering program students. Physical chemistry and mass transfer fundamentals related to contaminant fate and transport in soil, air, and water systems, including soil/water sorption and desorption, contaminant retardation, vaporization and dissolution of nonaqueous phase liquids (NAPL), and other environmental systems. Letter grading.

267. Environmental Applications of Geochemical Modeling. (4). Lecture, four hours; outside study, eight hours. Requisite: course 254A. Geochemical modeling is important tool for predicting environmental impacts of contamination. Hands-on experience in modeling using geochemical software packages commonly found in environmental consulting industry to gain better understanding of governing geochemical principles pertaining to movement and transformation of contaminants. Types of modeling include speciation, mineral solubility, surface complexation, reaction path, inverse mass balance, and reactive transport modeling. Case studies involve acid mine drainage, waste disposal, bioavailability and risk assessment, mine tailings and mining waste, deep well injection, landfill leachate, and microbial respiration. Research/modeling project required. Letter grading.

C282. Rigid and Flexible Pavements: Design, Materials, and Serviceability. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Correlation, analysis, and metrication of aspects of pavement design, including materials selection and traffic loading and volume. Special attention to aspects of pavement distress/serviceability and factoring of these into metrics of pavement performance. Discussion of potential choices of pavement materials (i.e., asphalt and concrete) and their specific strengths and weaknesses in paving applications. Unification and correlation of different variables that influence pavement performance and highlight their relevance in pavement design. Concurrently scheduled with course C182. Letter grading.

296. Advanced Topics in Civil Engineering. (2 to 4). Seminar, to be arranged. Discussion of current research and literature in research specialty of faculty member teaching team assigned course, S/U grading.

297. Seminar: Current Topics in Civil Engineering. (2 to 4). Seminar, to be arranged. Lectures, discussions, and student presentations and projects in areas of current interest in civil engineering. May be repeated for credit. S/U grading.

298. Seminar: Engineering. (2 to 4). Seminar, to be arranged. Limited to graduate civil engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4). Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

498. Teaching Assistant Training Seminar. (2). Seminar, two hours. Preparation: appointment as teaching assistant in Civil and Environmental Engineering Department. Seminar on communication of civil engineering principles, concepts, and methods; teaching assistant preparation, organization, and presentation of material, including use of visual aids; grading, advising, and rapport with students. S/U grading.

596. Directed Individual or Tutorial Studies. (2 to 8). Tutorial, to be arranged. Limited to graduate civil engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination. (2 to 12). Tutorial, to be arranged. Limited to graduate civil engineering students. Reading and presentation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16). Tutorial, to be arranged. Limited to graduate civil engineering students. Reading and presentation for Ph.D. preliminary examination. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 16). Tutorial, to be arranged. Limited to graduate civil engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

Ann L.T. Bergren, Ph.D.
Bernard D. Frischer, Ph.D.
Sander M. Goldberg, Ph.D.
Michael W. Haslam, Ph.D.
Steven Lattimore, Ph.D.
Philip Levine, Ph.D.
Jan Puhvel, Ph.D.

Associate Professors
Robert A. Curval, Ph.D.
Alex C. Purves, Ph.D.
Mario Telò, Ph.D.

Assistant Professors
Chris J. Johanson, Ph.D.
Francesca K. Martelli, D. Phil.
Kathryn J. McDonnell, Ph.D.

Adjunct Associate Professor
Catherine Atherton, Ph.D.

Scope and Objectives
The civilizations of ancient Greece and Rome are the focus of research and teaching in the Department of Classics. These areas of study are important in their own right and for their contributions to the political, cultural, intellectual, and artistic development of the Western world. To this end, the department offers a wide variety of interdisciplinary courses in classical civilization (multiple-listed in the Art History, Philosophy, and Political Science Departments), as well as elementary and advanced courses in ancient Greek and Latin language, literature, and linguistics. Classical civilization courses include such topics as Greek and Latin literature in translation (genres of epic, comedy, tragedy, biography), classical mythology, religion, law, gender, and sexuality, politics, philosophy, art and archaeology, and the reception of the ancient world in modern cultures (cinema and classics).

The department offers Bachelor of Arts degrees in Classical Civilization, in Greek, in Latin, and in Greek and Latin and the Ph.D. degree in Classics. Students can earn Master of Arts degrees in Classics (Greek and Latin), in Greek, or in Latin only after they have been admitted to the Ph.D. program.

Undergraduate Study
Students considering a major in the department should consult the adviser as soon as possible in their University career, but in no case later than the point at which they are about to take upper division courses.

The majors offered in the Classics Department are designated capstone majors. Undergraduate students take a capstone seminar in which they use the skills and expertise acquired in earlier coursework to research, analyze, and complete a written paper or project. They identify and analyze ancient classical documents.

The author of the Classics Department offers Bachelor of Arts degrees in Classical Civilization, in Greek, in Latin, and in Greek and Latin and the Ph.D. degree in Classics. Students can earn Master of Arts degrees in Classics (Greek and Latin), in Greek, or in Latin only after they have been admitted to the Ph.D. program.
material evidence, or other forms of primary sources and demonstrate their critical skills by engaging in presentations and weekly discussion with their peers.

**Classical Civilization B.A.**

**Capstone Major**

The civilizations of ancient Greece and Rome have made important contributions to the political, social, artistic, and intellectual development of the Western world. The purpose of the Classical Civilization major is to provide a formal and balanced introduction to the historical and cultural experiences of the ancient Greeks and Romans. The program of study is structured, yet not rigid. Lower division survey courses and requirements in elementary language study, ancient history, and classical art establish an essential background of knowledge, while electives encourage individual and specialized interests. The program offers a broad range of courses in the fields of language, literature, history, mythology, religion, philosophy, art, and archaeology. The major serves as excellent and rewarding preparation for a professional career in medicine, law, business, journalism, communications, or the arts.

**Preparation for the Major**

**Required:** Classics 10, 20; Greek 3 or 16 or Latin 3 or 16, and two courses from 30, 40W, 41W, 42, 51A, 51B, 60, 87GE, 88GE.

**Transfer Students**

Transfer applicants to the Classical Civilization major with 19 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one classical Greek culture course, one Roman civilization course, and one course in Greek or Roman literature in translation, classical mythology, or classical archaeology.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** (1) Ten upper division courses in the department (courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser)—no more than three may be selected from Greek 100 through 133 or Latin 100 through 133, and Classics 198A and 198B may be applied as only one course toward the major and (2) one capstone seminar (Classics 191). All other courses in the 190 series may be substituted only by petition.

**Greek B.A.**

**Capstone Major**

**Preparation for the Major**

**Required:** Classics 10, 20; Greek 1, 2, 3, 20, or equivalent. Greek 16 may be substituted for Greek 1, 2, 3.

**Transfer Students**

Transfer applicants to the Greek major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one year of Greek and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** (1) Seven upper division Greek courses, including course 110; Greek 197 and 199 may be applied only by petition; (2) three upper division courses in classical civilization and/or ancient history (History 112A through M112E, 113A, 113B, 114A, 114B, 114C, 115). Courses in related fields not offered by the department may be substituted by petition and with approval of the faculty undergraduate adviser; (3) one capstone seminar (Classics 191).

**Greek and Latin B.A.**

**Capstone Major**

**Preparation for the Major**

**Required:** Classics 10, 20; Greek 1, 2, 3, 20 and Latin 1, 2, 3, 20, or equivalent. Greek 16 may be substituted for Greek 1, 2, 3.

**Transfer Students**

Transfer applicants to the Greek and Latin major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one year of Greek and of Latin and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

Courses in related fields not offered by the department may be substituted by petition and with approval of the faculty undergraduate adviser; (3) one capstone seminar (Classics 191).

**Latin B.A.**

**Capstone Major**

**Preparation for the Major**

**Required:** Classics 10, 20; Latin 1, 2, 3, 20, or equivalent. Latin 16 may be substituted for Latin 1, 2, 3.

**Transfer Students**

Transfer applicants to the Latin major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one year of Latin and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** (1) Seven upper division Latin courses, including course 110; Latin 197 and 199 may be applied only by petition; (2) three upper division courses in classical civilization and/or ancient history (History 112A through M112E, 113A, 113B, 114A, 114B, 114C, 115). Courses in related fields not offered by the department may be substituted by petition and with approval of the faculty undergraduate adviser; (3) one capstone seminar (Classics 191).

Note: Students in the Greek, Latin, and Greek and Latin majors are permitted to take Greek 200A, 200B, 200C and Latin 200A, 200B, 200C with consent of the instructor.

**Honors Program**

**Admission**

The honors program is open to all departmental majors with a cumulative grade-point average of 3.5 or better in departmental courses and an overall GPA of 3.25 or better. Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors.

**Requirements**

All honors students are required to take Classics 191 (or an equivalent undergraduate seminar) in their junior year before beginning work on the honors thesis. Students must then enroll in Classics 198A and 198B in consecutive terms, in which they write the thesis under the direct supervision of a faculty member. They may take courses 198A and 198B concurrently or be exempt from course 198A only with approval of the faculty undergraduate adviser. In course 198A students submit an annotated bibliography and preliminary outline of their thesis. In course 198B, they submit at least one initial draft and the final revised version of the thesis. Only course 198B may be applied toward the upper division classical civilization requirement for departmental majors.

To qualify for graduation with departmental honors, students must (1) have a cumulative grade-point average of 3.5 or better in departmental courses and an overall GPA of 3.25 or better and (2) complete Classics 198A and 198B with grades of A– or better.

To qualify for graduation with departmental highest honors, students must (1) have a cumulative GPA of 3.85 or better in departmental...
courses and an overall GPA of 3.65 or better and (2) complete Classics 198A and 198B with grades of A.

Classical Civilization Minor

The Classical Civilization minor is designed to recognize a serious commitment to the study of the cultures and civilizations of ancient Greece and Rome. Lower division survey courses in classical studies, classical literature, mythology, and film provide an essential introduction to the imagination and power of the ancient world. Students may fulfill upper division requirements from a variety of courses in classical civilization and related fields, including political and social history, literature, art and archaeology, religion, mythology, philosophy, and cultural studies of ethnicity, gender, and sexuality in antiquity.

To enter the minor, students must have an overall grade-point average of 2.0 or better. Required Lower Division Courses (15 units): Classics 10, 20, and one course from 30, 40W, 41W, 42, 51A, 51B, 60.

Required Upper Division Courses (20 units): Five upper division courses in classical civilization offered by the department. One course in a related field may be substituted with approval of the faculty undergraduate adviser. Classics 191 may be applied, but all other courses in the 190 series may be substituted only by petition.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Latin Minor

The Latin minor is designed to recognize a serious commitment to the study of the Latin language. After a year of elementary Latin (Latin 1, 2, 3) or its equivalent, students select departmental upper division reading courses in classical (and/or late antique and medieval) Latin prose and poetry that provide close analysis of individual texts, with attention to their historical, literary, and cultural context. Subjects of study include Roman comedy, epic, lyric, elegy, satire, history, rhetoric, philosophy, epistolology, and the novel.

To enter the minor, students must have an overall grade-point average of 2.0 or better. Required Lower Division Courses (14 units): Latin 2, 3, 20, or equivalent. Latin 16 may be substituted for Latin 2 and 3.

Required Upper Division Courses (20 units): Five courses selected from Latin 100 through 133.

A minimum of 20 units applied toward the major requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa/grad/programintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Classics offers the Master of Arts (M.A.) degree in Greek, Master of Arts (M.A.) degree in Latin, and Master of Arts (M.A.) degree in Classical Philology. (C.Phil.) and Doctor of Philosophy (Ph.D.) degrees in Classics. M.A. degrees can be earned only after students have been admitted to the Ph.D. program.

Classics Lower Division Courses

10. Discovering Greeks. (5) Lecture, three hours; discussion, one hour. Knowledge of Greek not required. Study of Greek life and culture from age of Homer to Roman conquest. Readings focus on selections from works of ancient authors in translation. Lectures illustrated with images of art, architecture, and material culture. P/NP or letter grading.

20. Discovering Romans. (5) Lecture, three hours; discussion, one hour. Knowledge of Latin not required. Study of Roman life and culture from time of city's legendary foundations to end of classical antiquity. Readings focus on selections from works of ancient authors in translation. Lectures illustrated with images of art, architecture, and material culture. P/NP or letter grading.

30. Classical Mythology. (5) Lecture, three hours; discussion, one hour. Introduction to myths and legends of ancient Greece and/or Rome, role of those stories in their societies. American approaches to studying them. P/NP or letter grading.

40W. Reading Greek Literature: Writing-Intensive. (5) Lecture, two hours; discussion, two hours. Enforced requisites: English Composition 3 or 3H or English as a Second Language 36. Exploration in detail and from variety of critical perspectives of carefully selected literary texts characteristic of ancient Greece and significant in Western literary tradition. Satisfies Writing II requirement. Letter grading.

41W. Reading Roman Literature: Writing-Intensive. (5) Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Exploration in detail and from variety of critical perspectives of carefully selected literary texts characteristic of ancient Rome and significant in Western literary tradition. Satisfies Writing II requirement. Letter grading.

51A. Art and Archaeology of Ancient Greece. (5) Lecture, three hours; discussion, one hour. Survey of major period, theme, or medium of Greek art and archaeology at discretion of instructor. P/NP or letter grading.

51B. Art and Archaeology of Ancient Rome. (5) Lecture, three hours; discussion, one hour. Survey of major period, theme, or medium of Roman art and archaeology at discretion of instructor. P/NP or letter grading.

60. Fantastic Journey: Antiquity and Beyond. (5) Lecture, two and one-half hours; discussion, one hour. Investigation of phenomenon of fantastic or imaginary journey, from Homer’s Odyssey to Stanley Kubrick’s 2001: A Space Odyssey. Examination of ways in which travel to strange or new worlds is presented through number of texts (and occasionally films) across different cultures and periods, with focus primarily on antiquity but also looking at how important motifs from ancient Greek and Roman travel narratives have endured to present day. Issues include cultural relativism, what makes space either familiar or alien, rebuilding of home in fantastic territories, methods of travel (both fantastic and mundane), methods of measuring time and distance across space, modern classifications of fantasy and science fiction, and to what extent these terms are applicable to ancient world. P/NP or letter grading.

87GE. General Education Seminar Sequences. (5) Seminar, three hours. Enforced requisite: course 20. Focused study of one aspect of ancient Greek or Roman culture or reception of classical tradition. Topics are interdisciplinary in nature (literature, arts, religion, politics, culture) and make connections between ancient and postclassical eras. P/NP or letter grading.

88A-88Z. Lower Division Seminars. (4 each) Seminar, three hours. Variable topics; consult Schedule of Classes or department for topics to be offered in specific term. P/NP or letter grading.

88GE. General Education Seminar Sequences. (5) Seminar, three hours. Enforced requisite: course 20. Focused study of one aspect of ancient Greek or Roman culture or reception of classical tradition. Topics are interdisciplinary in nature (literature, arts, religion, politics, culture) and make connections between ancient and postclassical eras. Topics include rediscovery of Pompeii and Herculaneum; Roman reli-
143B. Ancient Comedy. (4). Lecture, three hours. Requisite: course 10 or 20. Survey of comedy as it developed in Greek and Roman worlds. P/NP or letter grading.

144. Topical Studies in Ancient Culture. (4). Lecture, three hours. Requisite: one course from 10, 20, 30, 40W, or 41W. Investigation of one problem in ancient culture that involves discussion of both Greek and Roman material. May be repeated for credit with topic change. P/NP or letter grading.

M145A. Ancient Greek and Roman Philosophy. (4). (Same as Philosophy M103A.) Lecture, three hours. Study of some major Greek and Roman philosophico-technical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphases on historical and cultural setting of texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues. P/NP or letter grading.

M145B. Later Ancient Greek Philosophy. (4). (Same as Philosophy M103B.) Lecture, three hours. Requisite: one course from M145A. Philosophy 1, 100A, M101B, or M102. Study of some major texts in Greek philosophy of Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

M146A. Plato—Earlier Dialogues. (4). (Same as Philosophy M101A.) Lecture, three hours; discussion, one hour. Preparation: course M146A. Study of selected topics in early and middle dialogues of Plato. P/NP or letter grading.

M146B. Plato—Later Dialogues. (4). (Same as Philosophy M101B.) Lecture, three hours; discussion, one hour. Preparation: Requisite: course M146A. Study of selected topics in middle and later dialogues of Plato. P/NP or letter grading.

M147. Aristotle. (4). (Same as Philosophy M102.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected works of Aristotle. P/NP or letter grading.

150A. Female in Greek Literature and Culture. (4). Lecture, three hours. Requisite: course 10. Interdisciplinary study of concept of Female in Roman literature and culture. P/NP or letter grading.

150B. Female in Roman Literature and Culture. (4). Lecture, three hours; discussion, one hour. Requisite: course 20. Interdisciplinary study of concept of Female in Roman literature and culture. P/NP or letter grading.

C151E. Archaeological Field Techniques. (12). Off-campus field archaeology, 36 hours. Preparation: at least one classical archaeology course. Training in techniques of archaeological research in field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C251E. P/NP or letter grading.

152A. Ancient City: Greek World. (4). Lecture, three hours. Enforced requisite: course 10 or 51A or Art History 50 or History 1A. Knowledge of Greek and Latin not required. General introduction to study of Ancient Greek, and Roman architecture, sculpture, and painting. May be repeated for credit with department consent. P/NP or letter grading.

M153L. Greco-Roman Architecture. (4). Lecture, three hours. Requisite: course 10 or 51A, 51B, Art History 50, or History 1A. Knowledge of Greek and Latin not required. General introduction to study of Ancient Greek, and Roman architecture, sculpture, and painting. May be repeated for credit with department consent. P/NP or letter grading.

153M. Greeks and Romans on Bay of Naples. (4). Lecture, three hours; fieldwork, 21 hours. Recommended preparation: one course from 10, 20, 51A, 51B, or Art History 50. Four-week intensive study of history and cultures of Bay of Naples in classical antiquity. Survey of period from first settlements and colonization by Greeks in 8th century B.C.E. to destruction of Roman towns of Pompeii and Herculeum in 1st century C.E. Daily lectures and site visits. Field trips to Naples, Cumae, Pozzuoli, Paestum, Pompeii, Herculeum, Capri, Oplontis, and Bosco-reale. Part of UCLA Summer Travel Program. P/NP or letter grading.

161. Women's History in Ancient Mediterranean. (4). Lecture, three hours. Overview of approaches to problem of writing women's history in ancient Mediterranean world. Topics include law, medicine, work, religion (pagan, Christian, Jewish), and literature, with particular attention to themes of war, slavery, and sex trafficking. Exercises train students in critical use of primary documents and ancient sources, including inscriptions and other forms of material culture. P/NP or letter grading.
162. Classical Myth in Literature. (4). Lecture, three hours. Use of myth in principal authors and genres of Greek and Roman literature, with examples of its influence on later literature. P/NP or letter grading.

163. Ovid and Consequences. (4). Lecture, three hours. Study of Ovid’s Metamorphoses and persistence and extent of Roman poet’s influence on subsequent literature, art, and film. Close analysis of Ovid’s seminal text before turning to poem’s classical, medieval, Renaissance, and modern imitators, from Apuleius to Shakespeare to Picasso and beyond. P/NP or letter grading.

165. Ancient Athletics. (4). Lecture, three hours. Requires: course 10 or History 1A. Study of ancient Greek and Roman athletics and their connections with religion, politics, literature, and art. P/NP or letter grading.

M167. Magic in Ancient World. (4). (Same as Aegean 167.) Lecture, three hours; discussion, two hours (when scheduled). Requires: course 10 or 20. Exploration of art of influencing natural course of events by occult means as practiced in ancient world at large. Coverage of beliefs in supernatul forces, rites aimed at controlling these forces ef-fectively, and character and social roles of ritual ex-perts in various cultures of ancient world. Source material includes types of magical spells, literary texts about magic, and artifacts such as amulets and ritual implements. P/NP or letter grading.

168. Comparative Mythology. (4). Lecture, three hours. Requires: course 30, or GE Clusters 30A, 30B, and 30CW. Religions, mythical, and/or historical traditions of Greece and Rome compared with each other and with other traditions worldwide. P/NP or letter grading.

169. Sex in Ancient World. (4). Lecture, three hours. Requires: course 10 or History 1A. Examination of sex and gender systems of Greek and Roman cultures in ancient Mediterranean world. What Greek and Roman sex/gender systems were, how they changed over time, and why they matter. Readings include both modern theories about sex and history as foun-dation for course and broad range of ancient texts in translation. P/NP or letter grading.

180. Introduction to Classical Linguistics. (4). Lecture, three hours. Topics include Greek and Latin language. Intuitive approach to Greek and Latin, including Indo-European background, etymology, pronunciation, al-phabets, sociolinguistics (dialects, bilingualism), and applications to classical literature. P/NP or letter grading.

190. Research Colloquia in Classics. (1). Seminar, one hour. Limited to juniors/seniors. Designed to bring together students undertaking supervised tuto-rial research in seminar setting with one or more fac-ulty members to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP grading.

191. Capstone Seminar: Classics. (5). Seminar, three hours. Requires: courses 10, 20, at least four upper division major courses. Limited to declared ju-nior or senior departmental majors or minors may be ad-mitted with consent of instructor. Topical research seminar on important themes, periods, genres of an cient Greek and Roman world. Intended to provide students opportunity for serious engagement with research in discipline under close faculty supervise-ment. Readings, discussions, oral presentations, and final research paper or project. May be repeated for credit. Letter grading.

197. Individual Studies in Classics. (2 to 4). Tutorial, two hours. Limited to juniors/seniors. Individual inten-sive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research in Classics. (2 to 4). Tutorial, two hours. Limited to juniors/seniors. Supervised indi-vidual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract re-quired. P/NP or letter grading.

Graduate Courses

201B. Topics in Ancient History: Roman World. (2 or 4). Seminar, three hours. Introduction to basic methods and approaches to study of Roman history by intensive examination of selected topics, including readings of ancient texts and modern scholarship. S/U or letter grading.

M218. Paleography of Latin and Vernacular Manu-scripts, 900 to 1500. (4). (Same as English M215, French M210, and History M218.) Lecture, three hours; discussion, two hours. Introduction to history of Latin and vernacular manuscript book from 900 to 1500 to (1) train students to make informed judg-ments with regard to place and date of origin, (2) pro-vide training in accurate reading and transcription of later medieval scripts, and (3) examine manuscript book as witness to changing society that produced it. Focus on relationship between Latin manuscripts and Latin vernacular manuscripts with regard to their respective presentation of written texts. S/U or letter grading.

220A. Interfaces: Transmission of Roman Literature. (4). Lecture, three hours. Examination of trans-mission of Latin classical literature in late antiquity, Middle Ages, and Renaissance to understand pro cesses by which Latin literature has been preserved. S/U or letter grading.

245. Computing and Classics. (4). Discussion, three hours. Introduction to processing and analysis of digi-tized texts of classical authors for purposes of literary history and criticism. Letter grading.

251A. Seminar: Classical Archaeology—Aegean Bronze Age. (2 or 4). Seminar, three hours. S/U or letter grading.

251D. Seminar: Classical Archaeology—Greco-Roman Painting. (2 or 4). Seminar, three hours. Studies in style and iconography of various periods of Aegean, Greek, and Roman painting. May be repeated for credit with consent of instructor. S/U or letter grading.

C251E. Archaeological Field Techniques. (12). Off-campus field archaeology, 36 hours. Preparation: at least one classical archaeology course. Training in techniques of archaeological research in field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C151E. S/U or letter grading.

252. Topography and Monuments of Athens. (2 or 4). Lecture, two or four hours. Detailed studies in to-pography and monuments of Athens, combining evi-dence of literature, inscriptions, and actual remains. S/U or letter grading.

260. Topics in Ancient Religion. (2 or 4). Seminar, three hours. S/U or letter grading.

287. Graduate Colloquium in Classical Literature. (2 to 4). Seminar, three hours. Students may design methods of study and approaches to classical scholarship, including textual criticism, literary interpretation and theory, hermeneutics, interdisciplinary studies, and computer applications to classics. Emphasis varies from year to year, depending on instructor(s). May be repeated for credit with topic change. S/U grading.

288. Literary Theory. (2 or 4). Discussion, three hours. Designed for graduate students. Introduction to chief texts in literary theory and criticism for readers of classical literature, with application to classical texts. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4). Sem-inar, to be arranged. Preparation: apprentice per-sonnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guid-ance and supervision of regular faculty member re-sponsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Teaching Classics. (2). Seminar, two hours. Normally to be taken by all graduate students in term before or during their first assignments as teaching assistants. Seminar/workshop in various pedagogical issues and strategies in preparation for teaching clas-sical civilization, Greek, and/or Latin undergraduate courses. Readings and group discussions in topics related to teaching in field of classics. May not be ap-plicated toward M.A. or Ph.D. course requirements. S/U grading.
Greek

Lower Division Courses

1. Elementary Greek. (5). Lecture, three hours; discussion, two hours. P/NP or letter grading.

2. Elementary Greek. (5). Lecture, three hours; discussion, two hours. Enforced requisite: course 1. P/NP or letter grading.

4. 8A-8B-8C. Elementary Modern Greek. (4–4–4). (Formerly numbered 8.) Lecture, three hours. Course 8A is enforced requisite to 8B, which is enforced requisite to 8C. Introductory modern Greek sequence, with emphasis on spoken modern Greek. P/NP or letter grading.

5. 9A-9B-9C. Intermediate Modern Greek. (4–4–4). Lecture, three hours. Enforced requisite: course 8C. Course 9A is enforced requisite to 9B, which is enforced requisite to 9C. Intermediate-level program in modern Greek language study from communicative and task-based approach. Continued development of student understanding and use of Greek syntax and morphology through oral and written activities, reading, and listening. Students master basic communication skills, communicate in everyday real-life situations, comprehend simple passages, announcements, and advertisements, master basic rules of modern Greek grammar and syntax, read fluently, and write accurately. P/NP or letter grading.

6. 101A. Homer: Iliad. (4). Lecture, three hours. Enforced requisite: course 9A. Topics vary from year to year and include “Iliad,” “Odyssey” and “Homeric Hymns.” Each course may be taken independently for credit. P/NP or letter grading.

13. 107. Hesiod. (4). Lecture, three hours. Requisite: course 100. Reading of Theogony and excerpts from Works and Days, with emphasis on Hesiod’s place in Greek literature and his role in transmission of Greek mythology. P/NP or letter grading.

24. 131. Readings in Later Greek. (4). Lecture, three hours. Requisite: course 100. Topics vary from year to year and include “Longus,” “On Sublime; Marcus Aurelius; Arrian; Second Sophistic; Plutarch; later epic; epigram; epistolarity Graeci. P/NP or letter grading.

27. 200A-200B-200C. History of Greek literature. (4–4–4). Lecture, three hours. Lectures are given on the history of Greek literature, supplemented by reading of Greek texts in original language. Each course may be taken independently for credit. S/U (2-unit course) or letter (4-unit course) grading.

28. 201A-201B. Homer: Iliad. (2 or 4 each). Lecture, three hours. Course 201A is requisite to 201B. S/U (2-unit course) or letter (4-unit course) grading.

29. 202A-202B. Homer: Odyssey and Epic Cycle. (2 or 4 each). Lecture, three hours. Course 202A is requisite to 202B. S/U (2-unit course) or letter (4-unit course) grading.

30. 203. Hesiod. (2 or 4). Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

31. 204. Homeric Hymns. (2 or 4). Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

32. 205. Aeschylus. (2 or 4). Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

33. 206A-206B. Sophocles. (2 or 4 each). Lecture, three hours. Course 206A is requisite to 206B. S/U (2-unit course) or letter (4-unit course) grading.

34. 207A-207B. Euripides. (2 or 4 each). Lecture, three hours. Course 207A is requisite to 207B. S/U (2-unit course) or letter (4-unit course) grading.

35. 208A-208B. Aristophanes. (2 or 4 each). Lecture, three hours. Course 208A is requisite to 208B. S/U (2-unit course) or letter (4-unit course) grading.

36. 209A-209B. Seminars: Hellenistic Poetry. (2 or 4 each). Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

38. 211A-211B. Herodotus. (2 or 4 each). Lecture, three hours. Course 211A is requisite to 211B. S/U (2-unit course) or letter (4-unit course) grading.

39. 212A-212B. Thucydides. (2 or 4 each). Lecture, three hours. Course 212A is requisite to 212B. S/U (2-unit course) or letter (4-unit course) grading.

40. 213. Greek Historiography. (2 or 4). Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

41. 214. Demosthenes. (2 or 4). Lecture, three hours. S/U (2-unit course) or letter (4-unit course) grading.

42. 215. Early Greek Orators. (2 or 4). Seminar, three hours. Studies in works of Antiphon, Andocides, and Lysias. S/U (2-unit course) or letter (4-unit course) grading.

43. 216. Menander. (2 or 4). Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

44. 217A-217B. Greek Lyric Poetry. (2 or 4 each). Seminar, three hours. Each course may be taken independently for credit. S/U (2-unit course) or letter (4-unit course) grading.

45. 221A. Archaic Lyric. Study of lyric poetry of Archaic period, both choral and monodic, with elegiac and iambic included. 217B. Pindar and Bacchylides. Study of choral odes of Pindar and Bacchylides, with special attention to conventions of epinician.

46. 220. Greek Novel. (2 or 4). Seminar, three hours. Study of Greek romance and its place in Greek literature. Two texts (Chariton: Chaereas and Callirhoe and Longus: Daphnis and Chloe) studied in some detail. S/U (2-unit course) or letter (4-unit course) grading.

47. 221. Pre-Socratic Philosophers. (2 or 4). Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

48. 222A-222B. Plato. (2 or 4 each). Lecture, three hours. Course 222A is requisite to 222B. S/U (2-unit course) or letter (4-unit course) grading.

49. 223A-223B. Aristotle. (2 or 4 each). Lecture, three hours. Course 223A is requisite to 223B. S/U (2-unit course) or letter (4-unit course) grading.

50. 224. Post-Aristotelian Philosophy. (2 or 4). Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

51. 229. Sight Translation. (2 or 4). Seminar, three hours. Preparation: graduate-level knowledge of ancient Greek. Practice in translating previously unseen texts from variety of authors and genres. Topics include peculiarities of style and vocabulary of distinct genres, literary versus scholarly translation, semantic properties of particular words and constructions. S/U grading.
240A-240B. History of Greek Language. (2 or 4 each). Lecture, four hours. S/U or letter grading.
243. Mycenaean Greek. (2 or 4). Seminar, three hours. Script, language, and grammar of Linear B inscriptions; their relevance to ancient Greek linguistic and cultural history. S/U or letter grading.
244. Greek Papyrology. (4). Lecture, three hours. Preparation: reading knowledge of Greek. Introduction to Greek papyri, considered both as historical documents and as carriers of literature. S/U or letter grading.
250. Topical Studies of Ancient Greece. (2 or 4). Lecture, three hours. Advanced study of some aspect of ancient Greek language, literature, and/or culture. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.
597. Directed Individual Study or Research. (2 to 8). Tutorial, to be arranged. S/U grading.

Latin

Lower Division Courses

1. Elementary Latin. (5). Lecture, three hours: discussion, two hours. P/NP or letter grading.
2. Elementary Latin. (5). Lecture, three hours: discussion, two hours. Enforced requisite: course 1 or 2. P/NP or letter grading.
15. Intensive First-Year Latin. (12). Lecture, nineteen hours. Eight-week intensive introduction to Latin language equivalent to courses 1, 2, and 3. Offered in summer only. P/NP or letter grading.

Upper Division Courses

105A. Beginning Vergil: Selections from Aeneid I-VI. (4). Lecture, four hours. Requisite: course 100. Reading of one or more books from first half of Aeneid, designed especially for students with only limited experience in reading Latin poetry. May be repeated for credit with change in readings and consent of instructor. P/NP or letter grading.
105B. Advanced Vergil. (4). Lecture, three hours. Requisite: course 105A. Reading and discussion of Vergil’s Eclogues, Georgics, and/or second half of Aeneid. May be repeated for credit with change in readings. P/NP or letter grading.
109. Roman Satire. (4). Lecture, three hours. Requisite: course 100. Readings from author(s) of Roman satire, including Horace, Persius, and Juvenal, or selected satiric texts. May be repeated for credit with change in readings and consent of instructor. P/NP or letter grading.
119A. Readings in Roman Prose. (4). Lecture, three hours. Requisite: course 100. Readings of selected Roman prose author(s). Topics may vary from year to year and may be organized in terms of chronology (Republican or imperial), literary genre (Roman biography, antiquarian learning, or science), and/or theme. May be repeated for credit with topic change. P/NP or letter grading.
119B. Readings in Roman Poetry. (4). Lecture, three hours. Requisite: course 100. Readings of selected Roman poetry author(s). Topics may vary from year to year and may be organized in terms of chronology (Republican or imperial), epic, lyric, elegy, and/or theme. May be repeated for credit with topic change. P/NP or letter grading.
121. Patristic Texts. (4). Lecture, three hours. Requisite: course 100. Reading and discussion of one or more Latin patristic texts (especially works of Ambrose, Augustine, and/or Jerome), with emphasis on specific features of patristic, as opposed to classical, Latin. P/NP or letter grading.
197. Individual Studies in Latin. (2 to 4). Tutorial, two hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

200A-200B-200C. History of Latin Literature (4-4-4). Lecture, three hours. Lectures on history of Latin literature, supplemented by reading of Latin texts in original language. Each course may be taken independently for credit. S/U or letter grading.
201. Roman Epic Tradition. (2 or 4). Seminar, three hours. Close study of one epic poet other than Vergil (e.g., Ennius, Lucan, Valerius Flaccus, Statius, Stilus Ilitacus), with attention to literary tradition of epic. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.
202. Seminar: Catullus. (2 or 4). Seminar, three hours. Delineated concern of entire Catullan corpus. S/U (2-unit course) or letter (4-unit course) grading.
203A. Elegiac Poetry. (2 or 4). Lecture, three hours. S/U or letter grading.
203B. Propertius. (2 or 4). Lecture, three hours. Close study of one epic poet other than Vergil. S/U or letter grading.
204A-204B. Vergil’s Aeneid. (2 or 4 each). Lecture, three hours. Course 204A is requisite to 204B. S/U (2-unit course) or letter (4-unit course) grading.
205A. Seminar: Vergil’s Bucolics. (2 or 4). Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.
205B. Seminar: Vergil’s Georgics. (2 or 4). Seminar, three hours. Course 205A is not requisite to 205B. Close reading of Vergil’s text; careful evaluation of influential criticism on poem, much of it recent; examination of work’s place within tradition of rural poetry. S/U (2-unit course) or letter (4-unit course) grading.
206. Horace. (2 or 4). Lecture, three hours. S/U (2-unit course) or letter (4-unit course) grading.
207. Roman Comedy. (2 or 4). Seminar, three hours. Survey of history of Roman comedy. S/U (2-unit course) or letter (4-unit course) grading.
208. Ovid. (2 or 4). Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.
209. Seminar: Roman Satire. (2 or 4). Seminar, three hours. Detailed study of one individual satirist, with attention to his position in development of satirical genre in Roman literature. Choice of author varies from year to year. Close study of text, of characteristics of writer as social critic and artist, and of contemporary literary and social environment. S/U (2-unit course) or letter (4-unit course) grading.
211A-211B-211C. Seminars: Roman Historians. (2 or 4 each). Seminar, three hours. Study of considerable portions of writings of following historians. Each course may be taken independently for credit. S/U (2-unit course) or letter (4-unit course) grading. 211A. Sallust; 211B. Livy; 211C. Tacitus.

214. Ancient Biography: Roman Lives. (2 or 4). Seminar, three hours. Study of biography in ancient Rome. Literary survey or focused readings on lives of Cornelia Nepos, Suetonius, Tacitus, or imperial chroniclers of 4th century C.E. S/U (2-unit course) or letter (4-unit course) grading.

215. Seminar: Roman Novel. (2 or 4). Seminar, three hours. Works such as Petronius' Satyricon and Apuleius' Metamorphoses: study of literary problems. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.

216. Roman Rhetoric. (2 or 4). Seminar, three hours. Close study of one rhetorical text (e.g., Rhetorica ad Herenium, Cicero's De Oratore, Seneca's Controversiae or Suaeiae, Quintilian's Institutio), with attention to its place in rhetorical tradition. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.

220. Cicero's Orations. (2 or 4). Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

221A. Cicero's Philosophical Works. (2 or 4). Lecture, three hours. S/U (2-unit course) or letter (4-unit course) grading.

221B. Cicero: De Natura Deorum. (2 or 4). Lecture, three hours. Course 221A is not requisite to 221B. S/U (2-unit course) or letter (4-unit course) grading.

222. Seminar: Roman Stoicism. (2 or 4). Seminar, three hours. S/U (2-unit course) or letter (4-unit course) grading.

223. Lucretius. (2 or 4). Lecture, three hours. S/U (2-unit course) or letter (4-unit course) grading.

224. Seneca. (2 or 4). Seminar, three hours. Detailed study of one work of prose or poetry by younger Seneca. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.

229. Sicht Translation. (2 or 4). Seminar, three hours. Preparation; graduate-level knowledge of Latin. Practice in translation of previously unseen texts from variety of authors and genres. Topics include peculiarities of style and vocabulary of distinct genres, literary versus scholarly translation, semantic properties of particular words and constructions. S/U grading.

231A-231B. Seminars: Medieval Latin. (2 or 4 each). Seminar, three hours. Preparation: at least one upper division Latin course. Course 231A is not requisite to 231B. Studies in various areas of language and literature of medieval Latin. May be repeated for credit with consent of instructor. S/U (2-unit course) or letter (4-unit course) grading.

232. Vulgar Latin. (2 or 4). Lecture, three hours. History and characteristics of popular Latin; its development into early forms of Romance languages. S/U or letter grading.

235. Late Latin Poetry. (2 or 4). Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several poets who flourished between death of Ovid and fall of Roman Empire. May be repeated for credit with change in author. S/U or letter grading.

236. Late Latin Prose. (2 or 4). Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several prose authors who flourished between death of Tacitus and fall of Roman Empire. May be repeated for credit with change in author. S/U or letter grading.

245. Neo-Latin. (2 or 4). Seminar, three hours. Preparation: at least two upper division Latin courses. Require: course 100. Survey of texts by one or more authors from Renaissance to present, written on related topics. S/U or letter grading.

250. Topical Studies of Ancient Rome. (2 or 4). Seminar, three hours. Advanced study of some aspect of Latin language or literature or Roman culture. May be repeated for credit with topic change. S/U (2-unit course) or letter (4-unit course) grading.

495. College Teaching of Latin. (2, Seminar, to be arranged. Preparation: appointment as teaching assistant. Methodology of instruction in conjunction with classroom practice. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 8). Tutorial, to be arranged. S/U grading.

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8). Tutorial, to be arranged. S/U grading.

Scope and Objectives
The major in Communication Studies is an interdisciplinary curriculum leading to a Bachelor of Arts degree. It seeks to provide students with a comprehensive knowledge of the nature of human communication, the symbol systems by which it functions, the environments in which it occurs, its media, and its effects. Employing critical and empirical approaches, the major draws its resources from the social sciences, humanities, and fine arts. Four areas of focus are offered: communication technology and digital systems, interpersonal communication, mass communication and media institutions, and political and legal communication.

Undergraduate Study
Communication Studies B.A.

Students fulfilling the major in Communication Studies must complete the seven required lower division courses and a minimum of 11 upper division courses as set forth below. Enrollment in the major is limited. Admission to the major is by application to the committee in charge. Applications are available at http://www.commstudies.ucla.edu to regularly enrolled UCLA students during Spring Quarter.

Preparation for the Major

Students are encouraged but not required to complete as many lower division preparation for the major courses as possible before admission to the program.

Required: Communication Studies 1, 10, one course selected from Anthropology 33, Communication Studies M70, or Linguistics 1, one statistics course from Economics 41 or Statistics 10. Three additional courses must be selected from Political Science 40, Psychology 10, Sociology 1 or 5 or Political Science 30.

Transfer Students

Transfer applicants to the Communication Studies major with 90 or more units must complete at least four of the following seven lower division required courses: Communication Studies 10 or one interpersonal communication and one mass communication course, one public address course, one linguistics course, one statistics course, and three courses from psychology, American government, sociology, and microeconomics or political economy.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Students must complete 11 upper division courses as follows:

Required Core Courses: Communication Studies 100, 150.
Students must petition for admission to the program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Counseling Office). Students graduate with a bachelor's degree in communication studies and a specialization in Computing.

Communication Studies

Lower Division Courses

1. Principles of Oral Communication. (4). Lecture, four hours. Introduction to the construction of Entries-Level Writing requirement. Examination of foundations of communication and public speaking. Consideration of number of basic theories related to study of communication and development of skills to enable composition and delivery of speeches in accordance with specific rhetorical concepts. Improvement of ability to analyze, organize, and critically think about communicative messages while becoming better equipped to articulate ideas. P/NP or letter grading.

2. Public Speaking for Nonnative Speakers. (4). Lecture, four hours. Designed for nonnative speakers of English to increase fluency and vocabulary while improving presentational usage, reasoning, style, and delivery. Conversation and pronunciation practice. Focus on theory and practice of public speaking, including selection of content, organization of ideas, language, and delivery. Practice in extemporaneous and manuscript speaking. Critical analysis of speeches in both contemporary and historical settings. Special emphasis on group discussions, evaluations, practice of both public and private speaking skills. Offered in summer only. P/NP or letter grading.

3. Learning American English and Culture from Movies. (4). Lecture, four hours. Advancement of students' fluency in American English while increasing their awareness of American popular culture. Primer on American-style colloquial English and nuances of contemporary customs and values offered through guided immersion in popular cinema. Offered in summer only. P/NP or letter grading.

4. Inside Hollywood with Hollywood Insiders. (4). Lecture, three hours. Survey of historical and cultural traditions in American entertainment industries, with focus on questions of policy and development and how they have shaped contemporary American film and television. Examination of historical and policy issues, with guest lectures. MT72A-MT72B. (Same as GE Cluster M72A-M72B. Lecture, three hours; discussion, one hour. P/NP or letter grading.

5. Principles of Oral Communication. (4). Lecture, four hours; discussion, one hour. Introduction to fields of mass communication and interpersonal communication. Study of modes, media, and effects of mass communication, interpersonal processes, and communication theory. Letter grading.

6. Origin of Language. (5). (Same as Ger M70 and Indo-European Studies M70.) Lecture, three hours; discussion, one hour. Theoretical and methodological issues surrounding origin of language. Topics include evolutionary theory, evolution of man, how language is organized in brain, and science of language, including physiology of speech, phonetics, and comparative reconstruction. Letter grading.

7. Sex from Biology to Gendered Society. (6-8-6). (Same as GE Clusters MT72A-MT72B-MT72C, and Sociology MT72A-MT72B-MT72C.) Course MT72A is enforced requisite to MT72B, which is enforced requisite to MT72C. Limited to first-year freshmen. MT72A. Lecture, three hours; discussion, two hours. Examination of many issues entailed in rights of freedom of expression, access to audience, and access to information. Study of court decisions governing freedom of communication in U.S. P/NP or letter grading.

9. Basic Preparation; Basic Law. (4-4). Lecture, three hours. Participation in on-campus and intercollegiate forensic activities, including exposure to fundamentals of competitive forensic events. Students practice public address, interpretation of literature, debate, oratory, and extemporaneous speaking and engage in independent research and analysis. P/ NP or letter grading.

10. Analysis and Briefing. (4). Lecture, three hours. Study of entrepreneurial communication from foundations in internal and external communication and development of presentation, discussion, and presentational skills utilized in existing, as well as in development of, contemporary innovative businesses. P/ NP or letter grading.

11. Gender and Communication. (4). Lecture, four hours. Understanding gender is fundamental part of understanding who we are as human beings. Exploration of crucial role of gender in spheres of life involving communication and role and origins of gender differences in communication. Contexts of communication include family, workplace, sexuality, and intimate relationships. Discussion of how media influence conceptions of personal identity, social construction of gender, and reproduction of these gender differences. Letter grading.

12. Current Issues in Vocal Communication. (4). Seminar, three hours. Course 118 or 120. Examination of contemporary issues in evolvement of vocal communication. Topics include analysis of communication in advertising, social communication, and speech production and perception. P/ NP or letter grading.
M113. Nonverbal Communication and Body Language. (4). (Formerly numbered 113.) (Same as Psychology M137B.) Lecture, three hours. Examination of how variations in nonverbal communication convey meaningful information to perceivers, with focus on both production and perception of multiple communication formats (e.g., affect expression of face and voice). Emphasis on understanding the role of context in nonverbal communication, with strong emphasis on body language. Readings from variety of related fields. P/NP or letter grading.

114. Understanding Relationships, (4). Lecture, four hours. Examination of interpersonal communication that occur in close relationships, especially romantic relationships. In-depth coverage of variety of relationship topics, including intimacy, stages of intimate relationships, which roles people get involved in, and how people use nonverbal cues as they interact. Satisfies Writing II requirement. P/NP or letter grading.

116. Communication and Conflict in Couples and Families. (4). Lecture, three hours. Examination of (1) dysfunctional communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family dysfunction (e.g., separation and divorce). P/NP or letter grading.

M117. Negotiation. (4). (Formerly numbered 117.) (Same as Labor and Workplace Studies M117.) Lecture, four hours. Art and science of negotiation in securing agreements between independent parties. Theory and practice that underlie successful negotiation. Experiential course in which students learn broad array of negotiation skills, including identifying one’s own (and others’) communication style, identifying and incorporating components of successful negotiation, and resolving conflict between parties. Letter grading.

119. Voice and Its Perception. (4). Lecture, four hours. Focus on how human voice conveys information about identity of speakers, physical characteristics, personality, and emotional state, and on how listeners utilize this information to make judgments about speakers. Letter grading.

120. Group Communication. (4). Lecture, four hours. Examination of group communication from perspectives of sociology, communication, and psycholinguistics. Topics include evolution of cooperation, ingroup and outgroup dynamics, gossips, music improvisation, and conversational behavior. P/NP or letter grading.

121. Talk and Mass Communication. (4). Lecture, three hours. In recent years there has been sea change in broadcast news and public affairs programming. News was once packaged and presented to audiences in form of scripted narrative or story, but increasingly news is organized around spontaneous interactional encounters between some combination of journalists, public figures, and ordinary citizens. Examination of interactional forms, with emphasis on news interviews, presidential press conferences, and political speeches before live audiences, from standpoint of their historical development and consequences for media, political communication, and public sphere. Primary focus on inner workings of each form of talk—social norms and practices that organize participation and that distinguish forms of broadcast talk from other forms of conversation. Letter grading.

122. Promoting Dialogue between Diverse Worlds. (4). Lecture, three hours. Exploration of issues related to management of conflict between major areas of world, with focus on historical background, perception gaps, and political context. Communication approaches based on nonviolence and management of moral conflict offered as alternatives to clash of civilizations. Letter grading.

M123W. Talk and Body. (5). (Same as Anthropology M148W and Applied Linguistics M161W.) Lecture, four hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H or English as a Second Language. Examination of relationship between language and human body raises host of interesting topics. New approaches to phenomena such as embodiment become possible when body is analyzed, not as isolated entity but as part of wider affective and anthromorphic self. Examinations lodged within both processes of human interaction and rich settings where people pursue courses of action that count in their lives. Satisfies Writing II requirement. P/NP or letter grading.

124. Psychology of Language and Gender. (4). (Formerly numbered M124.) Lecture, three hours. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated languages in children; women’s and men’s language in interracial settings. P/NP or letter grading.

M125. Talk and Social Institutions. (4). (Same as Sociology CM125.) Lecture, four hours; discussion, one hour. Examination of practices of communication and social interaction in number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. P/NP or letter grading.

126. Evolution of Interpersonal Communication. (4). Lecture, four hours. Examination of current issues in interpersonal communication from perspectives of evolutionary psychology and biology. Topics include coevolution of signaler and receiver adaptations, nonverbal communication, courtship behavior, miscommunication, and implications of implied language use, and deception. Letter grading.

128. Play and Entertainment. (4). Lecture, three hours. Entertainment is significant component of both interpersonal and mass communication. Examination of evolutionary history, cognitive mechanisms, and social functions of play and entertainment, as well as their possible pedagogical effects. Letter grading.

129. Gaming Mind. (4). Lecture, three hours. Exploration of various aspects of online computer games that are becoming increasingly popular and technologically sophisticated, with focus on what people learn from games, how they learn it, and whether learning is potentially useful. Letter grading.

130. Cultural Factors in Interpersonal Communication. (4). Lecture, three hours. Study of cultural factors as they affect quality and processes of interpersonal communication: exercises in participation, analysis, and criticism of interethnic and intercultural communications in small group configuration. P/NP or letter grading.

131. Culture versus Media? (4). Lecture, three hours. Invention of meaning of cultural texts, analysis of representation of particular groups, and consideration of how audiences read those meanings and uses to such texts, with focus on media in relation to issues of globalization, consumption, class, race, gender, youth, and sexuality. Letter grading.

133. Decoding Media Strategies. (4). Lecture, three hours. Today’s mass media are thriving business, central part of cultural identity, and vital component of democracy. How do these different and often conflicting functions determine content of mass media? Examination of psychological dynamics of advertising, nature of entertainment and mass culture, political propaganda, and effects of media ownership. Assessment of impact of mass media on individuals and social institutions. Letter grading.

134. Organizational Communication. (4). Lecture, three hours. Introduction to issues and literature related to communication within organizations. Organizational communication concerns theories (exploration of the nature of behavior in organizations, study of bureaucracy and its alternatives, metaphors for organizational communication, power, conflict, and strategic communication in organizations), focus on behavior of individuals and teams within organizations. Letter grading.

135. Narrative in Mass Communication. (6). (Same as Honors College M135.) Seminar, four hours. Examination of narrative as primary function of mass media, beginning with origins of narrative, cultural, and rhetorical functions of storytelling and basic elements of narrative, then applying these to study of film, television, and print media. P/NP or letter grading.

136. Media Portrayals of Gays and Lesbians. (4). Lecture, three hours. How mass media have portrayed gays and lesbians and why. Media’s depiction, portrayal, and handling of homosexuality, with particular focus on how gays and lesbians have been negatively stereotyped, portrayed unrealistically, and often not portrayed at all. Exploration not only of how gays and lesbians have been represented, but also why certain portrayals have tended to dominate. P/NP or letter grading.

M137. Transnational Bollywood. (4). (Same as Asian American Studies M172C.) Lecture, three hours. Study of how popular Bollywood cinema is studied as colonial and postcolonial formations pertaining to gender, class and caste, sexuality, race, and economic liberalization in South Asia, as well as across South Asian communities in North America, U.K., and Africa. Examination of how complex relationships between Bollywood and transnational South Asian diasporas enable us to better understand South Asian American communities. P/NP or letter grading.

138. Political Marketing. (4). Lecture, three hours. Examination of theory and practice of political marketing in U.S. and impact of such marketing on democracy to prepare students to critically analyze and evaluate political communication and to advocate political goals, as well as to become more equipped to disseminate such messages. P/NP or letter grading.

141. Films of Persuasion: Social and Political Advocacy in Mass Society. (4). Lecture, four hours. Films often provide commentary about public issues. Examination of how films communicate to large audiences about history, society, and politics. Critical evaluation of these works to understand power and limitations of films as social persuasion. Letter grading.

142. Communicating Diversity in Organizations. (4). Lecture, three hours. Knowledge, skills, and abilities needed for students to understand and address various components of diversity in organizations, with emphasis on areas related to personnel, ethics, poli—
cies, initiatives, staff needs, staff development, and social interrelations. Students learn to think critically about various organizational situations. Designed to give students a better understanding of the role that discussions, debates, and perspectives related to organizations. Exploration of such areas as power, gender, race, social class, sexuality, ability, and age. Examination of relationship between these areas to organizational communication concepts such as assimilation and socialization, power, culture, employee conflict, and relationships. P/NP or letter grading.

143. Rhetoric of Popular Culture. (4). Lecture, three hours. Rhetorical approach to study of U.S. popular culture. Examination, both at theoretical level and through specific case studies, of ways in which popular cultural texts perform rhetorically to influence political and social struggles shaping everyday life. How do particular artifacts or communicative texts constitute source for (re)negotiation of cultural meanings as well as greater understanding of ways language functions as vehicle for human action. Letter grading.

M144A-M144B. Conversational Structures I, II. (4-4). (Same as Sociology M124A-M124B.) Lecture, three hours; discussion, one hour. P/NP or letter grading. Introduction to some structures that are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited developmental analysis. Requisite: course M141. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

145. Situation Comedy and American Culture. (4). Lecture, three hours. Historical analysis of situation comedy genre from its beginning in late 1940s to present. Investigation of how sitcoms have influenced American life and culture and how American life and culture have influenced sitcoms. Exploration of issues of family, race and ethnicity, class and economy, gender roles, and political culture. P/NP or letter grading.

146. Evolution of Mass Media Images. (5). Lecture, four hours; discussion/laboratory, one hour. Analysis of evolutionary psychology as basis for images selected by media portraying women and/or minorities in entertainment, advertising, and informational communication. Letter grading.

M147. Sociology of Mass Communication. (4). (Same as Sociology M176.) Lecture, four hours; discussion, one hour (when scheduled). Studies in relationship between mass communication and social organization. Historical analysis of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society. P/NP or letter grading.

M149. Media: Gender, Race, Class, and Sexuality. (5). (Same as Gender Studies M149 and Labor and Workplace Studies M149.) Lecture, four hours; activity, one hour. Limited to junior/senior Communication Studies and Gender Studies majors and Labor and Workplace Studies minors. Examination of manner in which media culture influences people to perceive various dominant and dominated and/or colonized groups of people. Ways in which women, gay, lesbian, bisexual, transgendered, racial, and ethnic marginalized peoples, class relations, and other subaltern or subordinate groups are presented and often misrepresented in media. Investigation and employment of practical applications of communications and feminist theories for understanding ideological nature of stereotyping and politics of representation through use of media, guest presentations, lectures, class discussions, and readings. Introduction to theory and practice of cultural studies. Letter grading.

150. Methodologies in Communication Research. (5). Lecture, four hours; discussion, one hour. Requisites: Statistics 10 or 11, and 12. Limited to Communication Studies majors and graduate students. Critical analysis of qualitative and quantitative methodologies in communication research. Letter grading.

151. Computer-Mediated Communication. (4). Lecture, four hours. Examination of use of computer technology, particularly Internet, has influenced patterns of human communication. History and distinctiveness of computer-mediated communication (CMC), CMC’s influence on modern, economic, political, and social interaction. Letter grading.

154. Social Communication and New Technology. (4). Lecture, four hours. Internet’s digital core was designed for military command. Yet emerging network was gradually employed to perform communicative functions such as gossip, dating, news, entertainment, and trade. Exploration of history, social effects, and possible futures of digital communication. Letter grading.

155. Social Aspects of New Electronic Media: Introduction to Information Society. (4). Lecture, three hours. Examination of evolution and social implications of new information and communication technologies (e.g., cell phones, e-mail, social networking sites: Facebook, MySpace, Friendster, You Tube) through social network analysis and other social science research methods. P/NP or letter grading.

156. Social Networking. (4). Lecture, three hours. Investigation of how new online social networks have facilitated interpersonal interactions for knowledge sharing, romance, business, politics, and entertainment. Critical investigation of current popular social networking sites (e.g., MySpace, Friendster, You Tube) through social network analysis and other social science research methods. P/NP or letter grading.

157. Celebrity, Fame, and Social Media. (4). Lecture, three hours. Analysis of how following personal lives of media-created celebrities impacts self-esteem, connectedness, and personal relationships from cultural and media perspective (e.g., vlogger, blogging, perspectives, and how celebrities contribute to measurable financial gain. Topics include celebrity gossip and privacy, news sharing, public relations, and impact of social media on fan support, image construction, and damage control. P/NP or letter grading.

158. Revolutions in Communication Technology. (4). Lecture, four hours. Study of role assigned to technology in theories of communication. Examination of origins and societal implications of major revolutions in communication technology throughout history. Survey of origins and societal implications of major development, starting with emergence of speech itself. Letter grading.

M159. Pornography and Evolution. (4). (Same as Gender Studies M159.) Lecture, three hours. Discussion of theories and research on why pornography exists and its effects. Use of topic to illustrate evolution of communication to scientific societies generally. Letter grading.

160. Political Communication. (4). Lecture, four hours; discussion, one hour. Study of nature and function of communication in political sphere; analysis of how new online communication technologies are employed to project ideas to foreign publics in 20th and 21st centuries. Discussion of forces that influence communication as they affect quality of communication content. Letter grading.

161. Electoral Politics: Mass Media and Elections. (4). (Same as Political Science M141D) Lecture, three or four hours; discussion, one hour (when scheduled). Designed to assess how communication is conducted in American politics of manner in which Americans’ political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of mass attitude formation and change, different types of media “effects,” and role of media in American political process. P/NP or letter grading.

162. Presidential Communication. (4). Lecture, three hours. Examination of historical evolution of presidential communication environment, resources, and strategies, as well as how presidential campaign communication has evolved and implications for how presidents govern. Letter grading.

M165. Agitational Communication. (4). (Formerly numbered 165.) Lecture, four hours; discussion, one hour (when scheduled). Study of theory of agitational communication as force for change in existing institutions and policies and for initiating new and change-oriented social movements. Intensive study of selected agitational movements and techniques and content of their communications. Letter grading.

166. Communicative Dynamics in Film and Televisive Production. (4). Illustration of how motivation and creativity interact with business interest, research, and policies in producing entertainment for mass market. Letter grading.

167. Sex, Politics, and Race: Free Speech on Campus. (4). Lecture, three hours. Focus on concept of freedom of expression on campus during postsecondary education. How First Amendment, case law, and federal and state statutes affect students’ and teachers’ abilities to speak on and off campus. Discussion of harassment and campus speech codes, campus demonstrations, student publications, student conduct regulations, and restrictions on displays or announcements on campus. Letter grading.

168. Free Speech in Advertising. (4). Lecture, three hours. Exploration of First Amendment and commercial speech within context of product and service advertising (e.g., tobacco, alcohol, illegal drugs, gambling; pharmaceutical drugs; and political advertisements). Examination of when, where, and how (time/place/manner) restrictions imposed on advertising and commercial speech, with specific reference to shopping malls, news tabloid racks, and billboards, among other places. P/NP or letter grading.

171. Theories of Freedom of Speech and Press. (4). Lecture, three hours. Exploration of relationship between freedom of speech and press and values of liberty, self-realization, self-government, truth, dignity, respect, justice, equality, association, and community. Study of significance of these values examined in connection with issues such as obscenity, def-

Field Program Supervisor
Michael L. Prelip, D.P.A., M.P.H., C.H.E.S.

Scope and Objectives
The Department of Community Health Sciences is concerned with social and behavioral research applied to health, health promotion, and public health practice. The focus is on programs, strategies, and actions that can improve health in the context of social, cultural, political, economic, and environmental factors. Of particular interest is how social and cultural factors, social programs, the healthcare system, and social policies influence health beliefs and perceptions, health behaviors, and health status within populations.

The department offers schoolwide professional (M.P.H. and Dr.P.H.) and academic (M.S. and Ph.D.) degree programs. Graduates of the professional programs assume positions in the planning, administration, and evaluation of public health programs and policies in the U.S. and abroad. Graduates of the academic programs assume teaching, research, and managerial positions in universities, government agencies, nongovernmental organizations, international health agencies, and research centers.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa /library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Community Health Sciences offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Community Health Sciences and a Master of Public Health for Professional (M.P.H., HP) degree.

Community Health Sciences
Lower Division Courses
60. Intergroup Dialogue: Peer Dialogue. (2). Seminar, two hours. Discussion on issues of difference, conflict, and community to facilitate understanding between social/cultural groups. Student participation in semi-structured face-to-face meetings with students from other social identity groups to learn from each others’ perspectives, read and discuss relevant reading material, and explore their own and other groups’ experiences in various social and institutional contexts. Exploration of ways of taking action to create change and bridge differences at interpersonal and social/community levels. P/N/P or letter grading.

80. FITTED: Fitness Improvement Training through Exercise and Diet. (1). Lecture, one hour, activity, two hours. Success in undergraduate experience is very much influenced by attributes beyond intellectual competence. Examination of personal, social, and environmental factors that influence college students’ eating behaviors, physical activity patterns, and body image. Development of individualized student plans for eating well, being active, and feeling good about their bodies. Learning of practical skills with application to nutrition, physical activity, positive body image, stress management, and other aspects of wellness as students participate in critical evaluation of popular diets, healthy body weights, fitness, supplements, fad diets, or ideals, and self-destructive thoughts. P/N/P grading.

90. Aging Frontier: Public Health Perspective. (4). Lecture, three hours; discussion, one hour. Introduction to gerontology from public health perspective, emphasizing prevention and promotion of healthy aging. Special attention to health and aging among women and racial/ethnic minorities. Letter grading.

91. Peer Health Counselor Training. (4), Lecture, four hours. Limited to students in Peer Health Counselor Program. Analysis of student healthcare issues as related to campus healthcare delivery system and to healthcare consumer. Identification of health needs, determination of appropriate resources, delivery of preventive and self-care education, and delineation of peer health counselor’s role. P/N/P or letter grading.

Upper Division Courses
100. Introduction to Community Health Sciences. (4). Lecture, four hours. Limited to students in Public Health minor and graduate students. Introductory course to provide non-Community Health Sciences M.P.H. students and qualified undergraduate students with broad and comprehensive overview of concepts, empirical research, and public health practice in community health sciences, with emphasis on social context and determinants of population health and principles of planning interventions to protect and improve public health. Ways to define and measure health and illness, social construction of illness, social and behavioral determinants of health, and disparities, including socioeconomic status, race/ethnicity, gender, and age. Social and behavioral theories of health-related behavior change, health promotion strategies and methods, and public policy. Case studies of evidence-based health promotion programs provided. Letter grading.

130. Nutrition and Health. (4). Lecture, three hours; laboratory, one hour. Preparation: one biology course, one chemistry course. Basic and clinical nutrition theory and practice for students in health sciences curriculum. P/N/P or letter grading.

132. Health, Disease, and Health Services in Latin America. (4). Lecture, four hours. Introduction to health, disease, and health services in Latin America, with emphasis on epidemiology, health administration, medical anthropology, and nutrition. P/N/P or letter grading.

M140. Health Issues for Asian Americans and Pacific Islanders: Myth or Model? (4). (Same as Asian American Studies M129.) Lecture, three hours; fieldwork, one hour. Introductory overview of mental and physical health issues of Asian Americans and Pacific Islanders; identification of gaps in health status indicators and barriers to both care delivery and research for these populations. Letter grading.

160. Intergroup Dialogue: Theory and Practice of Peer Facilitation. (4). Lecture, four hours. Recommended requisite: course 60. Discussion on issues of difference, conflict, and community to facilitate understanding between social/cultural groups. Peer facilitator training course to develop understanding of the-
246 / Community Health Sciences

oretical and research foundations of intergroup dia-
logue, peer-facilitated discussions involving relation-
ship building (and coalition building) through thought-
ful engagement around different social identity issues. Study of variety of techniques, tools, and strategies to support students in their capacity to implement sus-
tained dialogues with students from other social iden-
ty groups. Letter grading.

161. Intergroup Dialogue: Training Practicum. (4). Seminar, four hours. Enforced requisite: course 160. Application and further development of content and skills learned in intergroup dialogue and social identity workshops. Facilitated dialogues with students on specific identity theme and further development of knowledge and tech-
niques in areas of group dynamics, conflict interven-
tion, communication, and cross-cultural and ethnic health effects of structural inequality as they relate to discussions of social justice and multicultural issues. Readings in these areas and discussions of ongoing dialogue dynamics. May be repeated once for credit. Letter grading.

Graduate Courses

200. Global Health Problems. (4). Lecture, two hours; discussion, two hours. Overview of health profile of world in the century. Global health problems and methods by which they have been dealt in context of Alma Ata goal of health for all by year 2000. Letter grading.

205. Immigrant Health. (4). Lecture, two hours; dis-
cussion, one hour. Limited to graduate students. Overview of key topics in public health for docu-
mented immigrants and refugees in U.S.Demographics, health status, behavioral risk factors, and social determinants, health and human rights, and access to healthcare and prevention ser-

206. Introduction to Demographic Methods. (4). (Same as Biostatistics M206, Economics M206, and Sociology M213A.) Lecture, four hours. Preparation: one introductory statistics course. Introduction to methods of demographic analysis. Topics include de-

gométric rates, standardization, decomposition of differences, life tables, survival analysis, cohort anal-

ysis, birth interval analysis, models of population growth, stable populations, population projection, and demographic diversity. Letter grading.

210. Community Health Sciences. (4). Lecture, three hours. Preparation: one social sciences course. Basic concepts, relationships, and policy issues in field of community health, variability in definitions of health and illness, correlates of health and illness be-
havior, impact of social and community structure on health status, major contemporary approaches to health promotion and health education at community level. Use of comparative international perspective. Letter grading.

211A-211B. Program Planning, Research, and Evaluation in Community Health Sciences. (4-4). Lecture, three hours; discussion, one hour, outside assignments, eight hours. Course 211A is requisite to 211B. Development, planning, and administration of public health programs in community settings. Intro-
duction to a range of research design and techniques used in designing and conducting health research, with particular emphasis on evaluation of community-
based public health programs. Course organized into three modules. Letter grading.

211B. Requisites: courses 211A, 211B, and Biostatistics 100A or Epidemiology 100.

212. Advanced Social Research Methods in Health. (4). Lecture, four hours; laboratory, two hours; outside assignments, eight hours. Requisites: courses 211A, 211B, Biostatistics 100B, 406. Problems of health survey design and data collection; measure-
ment issues in data analysis and interpretation; use of computer for analysis of large-scale survey data using various statistical techniques. Letter grading.

213. Research in Community and Patient Health Education. (4). Lecture, three hours; discussion, two hours. Preparation: course 210. Application of concep-
tual, theoretical, and empirical knowledge to community-
based health education risk-reduction programs. Computer applications, data management, and re-
search methodologies taught through microcom-
puter and mainframe computer management and analysis of program databases. Letter grading.

214. Issues in Program Evaluation. (4). Discussion, three hours; reading and research paper, one hour. Preparation: course 210. Familiarization with funda-
mentals that explore problems of planning and implementing evalu-
ation research in context of local demonstration proj-
ects. Letter grading.

M216. Qualitative Research Methodology. (4). Seminar, three hours; laboratory, one hour. Enforced requisite: seminar in qualitative research methodology. Emphasis on using qualitative methods and techniques in re-
search and evaluation related to healthcare. Letter grading.

M218. Questionnaire Design and Administration. (4). (Same as Epidemiology M218.) Lecture, four hours. Requisites: courses 211A and 211B, or Epide-
miology 200B and 200C. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaires. Letter grading.

219. Theory-Based Data Analysis. (4). Seminar, three hours. Enforced requisites: Biostatistics 100A, 100B, 406. Translation of theory into data analytic plan, its application to real data, and interpretation of results obtained through multivariate analysis. Anal-

ysis of quantitative data using range of multivariate techniques, such as linear multiple regression and lo-
gistic regression. Analysis of theoretical problem using student quantitative data or public use data. Letter grading.

220. Racism and Public Health. Social Epidemi-
ologic Approaches. (4). Seminar, three hours; dis-
cussion, one hour. Requisite: Biostatistics 100B. Integra-
tion of social epidemiologic methods and critical ap-
proaches to study of racial stratification and public health. Focus on (1) the role of race and class-re-
lated factors as social determinants of health, (2) building methodological competence for conducting research on racial and ethnic differences in health, and (3) developing critical self-consciousness to better understand how persons’ racial- or racism-rel-
ed perspectives and experiences might inform their research. Letter grading.

221. Introduction to Sociocultural Aspects of Health. (4). Lecture, three hours; discussion, one hour. Examination of how social stratification and cul-
ture relate to health and health-related behavior. Con-

sideration of four major status characteristics (age, ethnicity, gender, and socioeconomic status). Description of epidemiological patterns and discussion of so-

cial meaning of those four characteristics. Letter grading.

222. Understanding Fertility: Theories and Meth-
ods. (4). (Same as Sociology M206.) Lecture, three hours. Preparation: one formal or social demography course. Requisite: Biostatistics 100A. Application of concep-
tual, theoretical, and empirical knowledge to under-
standing key proximate determinants of fertility, with emphasis on under-
standing key proximate determinants of fertility. For advanced students. Focus on interrelation of knowledge, attitudes, and behavior choices of indi-

viduals. Introduction to prevention interventions, ces-
sation interventions, anti-tobacco efforts in U.S., and international trends in tobacco use. Letter grading.

224. Social Determinants of Nutrition and Health. (4). Lecture, three hours: discussion, one hour. Prepa-
ration: one basic nutrition course. Health promotion strategies aimed at reducing chronic disease risk through lifestyle changes have not been particularly successful in addressing needs of socioeconomically disadvantaged groups. Overview of literature sup-
porting relationship between socioeconomic disad-
antage and food-related health conditions such as obesity, diabetes, and osteoporosis; ex-
ploration of plausible pathways from perspectives of multi-
disciplines (economics, nutrition, sociology, and more) with focus on linkages between social and physical environment (including built environment) and food equity/access; discussion of how food may be catalyst for improving social capital and health. Discussion of examples of local and international ef-
fors to improve access to healthy foods and/or limit access to unhealthy foods. Exploration of methods for assessing social capital and food-related aspects of neighborhood environments. S/U or letter grading.
225. Writing for Publication in Public Health. (4). Seminar, four hours. Requisites: course 219, two graduate biostatistics courses, one graduate epidemiology course, and skills at graduate level for advanced and doctoral students in producing peer-review-quality research papers, with focus on theoretically informed empirical research papers. Examination of other types of manuscripts (e.g., reviews) included. Letter grading.

229. Policy and Public Health Approaches to Violence Prevention. (4). Lecture, four hours. How policies relate to violence and development of skills to transmit this knowledge. Examination of wide range of policy topics and how each might be associated with reduction/increase in violence/violent injury. Letter grading.

230. Family and Sexual Violence. (4). Lecture, three hours; community, three to four hours. Examination of rape, incest, spousal abuse, and elder abuse. Presentation of definitions, causes, outcomes of research on family and sexual violence, as well as response of social service, medical, and criminal justice systems. Letter grading.

M232. Determinants of Health. (4). (Same as Health Policy M242.) Lecture, three hours; discussion, one hour. Designed for graduate students. Critical analysis of models for what determines health and evidence for social, economic, environmental, genetic, health system, and other factors that influence health of populations and defined subgroups. Letter grading.

M234. Obesity, Physical Activity, and Nutrition Seminar. (4). (Same as Health Policy M255.) Seminar, three hours; outside study, one hour. Designed for graduate students. Interdisciplinary introduction to graduate level to epidemiology, physiology, and current state of preventive and therapeutic interventions for obesity in adults and children, including public health policy approaches to healthy nutrition and physical activity promotion. S/U or letter grading.

235. Influence of Social and Physical Environment on Racial Health Disparities. (4). Seminar, three hours. Preparation: at least one biostatistics or epidemiology course, and a graduate statistics course. Examination of how community stressors and neighborhood resources may contribute to health disparities. Discussion of multiple factors that contribute to environmental injustice and their potential solutions. Do health disparities arise because minorities and low-income populations live in harmful environments? Is relationship between environment and health disparities mediated by biological, cultural, or physical hazards, or are there psychosocial mechanisms at community level that act above or beyond effects of physical environment? Letter grading.

236. Managing Drug Abuse from Public Health Perspective. (4). Lecture, four hours. Exploration of numerous areas of public health impacted by drug use; public health options for controlling associated problems; positive and problematic aspects of drug use in terms of costs and benefits; variety of information resources such as scientific literature, surveys, in institutional databases, key indicators, key informants, and expert opinions; and use and application of specific decision-tools such as decision tree analyses, benefit-risk analyses, Delphi panels or other consensus-building approaches, and basic epidemic models when developing public health policies having to do with substance use and misuse. Letter grading.

M237. International Paradigms of Prevention: Interventions in Early Childhood. (4). (Same as Health Policy M290.) Seminar, three hours; fieldwork, one hour. Designed for graduate students. Introduction to use of early childhood intervention as prevention against adverse health and developmental outcomes. Concepts of developmental vulnerability, approaches to assessment, models of service delivery, evaluation and cost-benefit analyses, funding, and other policy issues. Letter grading.

238. Evolving Paradigms of Prevention: Interventions in Adolescence. (4). Seminar, three hours. Adolescent health and interventions, with focus on sex, alcohol, and drug use. What is normative during this period, what is not, what is associated with these behaviors (e.g., peer influence), and how these behaviors may affect youth during this developmental period (e.g., changes in brain). How to intervene with youth in community-based settings. Building of skills to work with adolescent populations. Several practitioners in field to be guest lecturers. Letter grading.

M239. Race, Ethnicity, and Culture as Concepts in Public Health. (4). (Same as American Studies M239.) Seminar, three hours. Integration of cross-cultural findings in healthcare with current American (U.S.) healthcare system paradigms to facilitate culturally based public health programs and train culturally competent practitioners. Letter grading.

240. Child and Reproductive Health in Communities Worldwide: The Environmental Perspective. (4). Lecture, three hours. Recommended requisites: course 100, Epidemiology 100. Limited to graduate students. Examination of global issues of child and reproductive health in relation to environmental factors in interplay with socioeconomic and biological factors. Environmental influences are responsible for one quarter of total burden of disease worldwide, and for more than one third of burden among children—most of them living in resource-poor countries and communities. Discussion of impacts of qualitatively different, and potentially modifiable, factors such as access to safe water and sanitation/environmental contribution to high-burden outcomes in childhood and reproduction. Focus on lower income settings and discussion of relevant population-based approaches to assessment and intervention. Letter grading.

M244. Advanced Seminar: Medical Anthropology. (2-4). (Same as Anthropology M263Q, Nursing M273, and Psychiatry M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

246. Women’s Roles and Family Health. (4). Lecture, two hours; discussion, one hour. Rapidly changing roles of women throughout world are having important effects on women’s own health and that of their families. Interdisciplinary research from both developing and industrialized countries to provide basis for in-depth discussion of programmatic and policy implications. Letter grading.

248. Women’s Mental Health. (4). Discussion, three hours. Designed for graduate students. Prevalence of psychological distress and mental health disorders among women, with emphasis on impact of social and cultural factors, including gender roles and socialization, stratification and inequality, work and family roles, diagnosis, help-seeking behavior, and treatment. Letter grading.

M249L. Ethical Theory and Applications in Public Health. (4). (Same as Health Policy M285.) Lecture, four hours. Requisites: Health Policy 200A, 200B. Introduction to ethical theories and critical ethical issues pertaining to healthcare policy and healthcare management. Research, writing, and discussion on variety of topics related to health and human rights to enhance professionalism, leadership, and systems thinking and improve student sensitivity to needs of patients, coworkers, and fiduciary shareholders. How ethics are foundation of leadership. Letter grading.

M250. HIV/AIDS and Culture in Latin America. (4). Lecture, two hours. Seminar, three hours. Exploration of cultural, political, and public health context for people living with and at risk for HIV/AIDS, and their responses in Latin American Public health context, including epidemiology, morbidity concerns and community interventions, medical anthropological study of experience of those impacted, and grass-roots responses, as well as political/economic context addressing poverty and structural violence. Letter grading.

M251. Nutritional Epidemiology I. (4). (Same as Epidemiology M254.) Lecture, two hours; discussion/labatory exercise, one hour; preparatory reading. Introductory biostatistics and epidemiology courses. Review of all aspects of contemporary nutrition sciences that require application of epidemiologic principles and methods. Application of methods employed in food-borne outbreak investigation to evidence-based regulatory assessment of health claims for foods. Experience in actual world of collecting, analyzing, and interpreting data related to health and disease outcomes. S/U or letter grading.

M256. Interdisciplinary Response to Infectious Disease Emergencies: Public Health Perspective. (4). (Same as Epidemiology M236A, Biology M256.) Lecture, two hours; discussion, one hour. Designed to instill in professional students ideas of common emergency health problems and coordinated response, with specific attention to bio-terrorism. Examination of tools to help students prevent, detect, and intervene in infectious disease emergencies. Interdisciplinary sessions also attended by students in Schools of Dentistry, Law, Medicine, Nursing during weeks two through five. Letter grading.

258. Cooperative Interagency Management in Disasters. (4.) Lecture, four hours. Requisite: course 295. Designed for graduate students. Broad overview of how different agencies involved in disaster responses work together to handle impact of mass population evacuation. Identification of roles of local, state, and federal governments, nonprofit and private sector organizations, media, and healthcare facilities in disaster situations. Students meet with representatives of different agencies involved in disaster responses and visit one of area’s state-of-art emergency management operations facilities. Letter grading.

265. Images of Aging and Illness. (4.) Lecture, three hours. Designed for graduate students. Images of aged that students hold, images that serve various professional and commercial interests in society, and images aged themselves hold, to make sense out of their experiences. Letter grading.

270A-270B. Foundations of Community Health Sciences. (4-4.) Lecture, four hours. Enforced requisite: course 210. Course 270A is enforced requisite to 270B. Limited to foundation doctoral students. In-depth analysis of theories, methods, and research on which community health sciences is based. Letter grading.

272. Social Epidemiology. (4.) (Same as Epidemiology M272.) Lecture, two hours; discussion, one hour. Requisite: Epidemiology 100. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on lifestyle and other sociocultural factors associated with general susceptibility to disease. Lecture grading.

273. Social Epidemiology of Chronic Disease. (4.) Lecture, two hours; discussion, one hour. Requisite: Epidemiology 100. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of chronic diseases. Topics include hypertension, coronary heart disease, and cancer. Emphasis on lifestyles and other sociocultural factors associated with chronic diseases. Letter grading.

275. Health and Illness Behavior. (4.) (Same as Sociology M204B.) Seminar, three hours. Designed for graduate students. Seminar discussion based on student responses to readings on medicalization, health promotion as moral enterprise and consumerism, and preoccupation with body. S/U or letter grading.

277. Advanced Community Health Education. (4.) Lecture, two hours; discussion, two hours. Requisite: course 210. Before proceeding, educational components of health program, one must assess behaviors and factors influencing health problem. Conceptual, theoretical, and evaluative skills developed and applied in constructing community-based educational program. Letter grading.

278. Work and Health. (4.) (Same as Environmental Health Sciences M270.) Lecture, three hours; practicum, one hour. Recommended preparation: graduate level methods course, gradic epi- demiology. Designed for graduate students. Exploration of impact of work on physical and psychological health in context of newly emerging discipline. Focus on psychosocial models, measurement (including hands-on experience), contextual factors (gender, ethnicity, social class), and how work stressors can be ameliorated. S/U or letter grading.

281. Capstone Seminar: Health Promotion and Education. (4.) Seminar, three hours; discussion, 90 minutes. Requisite: course 210. Current problems and findings in health promotion and education (e.g., nutrition, family health, AIDS/HIV, minority health); learning from pressing issues, discussion of master's project reports completed under faculty supervision. Letter grading.

282. Social Marketing for Health Promotion and Communication. (4.) Seminar, three hours; discussion, one hour. Requisite: course 210. Planning, creating, implementation, and evaluation of comprehensive health communication campaigns, including use of social marketing practices and strategies of audience research, marketing psychology, creative message development, branding, comprehensive media use for dissemination, transmedia. Competencies: conducting focus group interviews, creating and evaluating effective health campaigns, critical assessment of existing campaigns. Letter grading.

283. Evidence-Based Health Promotion Programs for Older Adults. (4.) Seminar, three hours. Requisite: course 210. Graduate seminar intended to explore sociocultural determinants of health-related behaviors among aged. Letter grading.

284. Sociocultural Aspects of Mental Health. (4.) Discussion, three hours. Designed for graduate students. Examination of mental health of its members and lives of those who have been identified as mentally ill. Group differences (e.g., gender, ethnicity) in disorder and how it is socially constructed. Letter grading.

285. Aging, Health, and Society. (4.) Lecture, three hours; discussion, one hour. General introduction to major social issues affecting health of elderly in America. Leading gerontological theories and major issues that affect aged, showing how those theories and issues influence health status, health promotion, and illness among elderly. S/U or letter grading.

288. Drug Abuse in Pregnancy: Special Focus on Adolescents and Young Adults. (4.) Lecture, three hours; discussion, one hour. Requisites: course 210 or prior social sciences courses. Media utilization, media effects, media content, media advocacy, media literacy, health journalism, video and audio storytelling techniques, new media, entertainment education, and transmedia. Competencies: media content analysis, production (blogs, journalism), creating and evaluating effective communications using popular media. Letter grading.

291. Health Policy and Aged. (4.) Lecture, three hours; discussion, one hour. Examination of political, economic, and cultural forces that influence health policy for aged, identifying failings in those policies within framework of broader health policy problems. Letter grading.

292. Information Technology for Health Promotion and Communication. (4.) Lecture, three hours; field practice, one hour. Requisites: course 210 or prior social sciences courses. Health literacy, Internet use and information search, new media, social marketing principles and techniques, health education, and use of digital media that integrates practice and theory and includes websites, print materials, short videos, curricula, and training materials. Laboratory sessions for materials production. Competencies: creating health communication materials for diverse audiences using new media information technology applied to website, social media, print media, video and audio platforms. Letter grading.

293. Social and Behavioral Research in AIDS: Roundtable Discussion (1 to 4). Discussion, two hours; individual consultation, two hours. Review and discussion of research programs directed toward identification of psychosocial, biobehavioral, environmental, and community factors related to prevention and control of AIDS/HIV. Letter grading.

M294. Social and Behavioral Factors of HIV/AIDS: Global Perspective. (4.) (Same as Psychiatry M288.) Lecture, four hours. Requisites: courses 100 and Epidemiology 100, or prior social sciences courses. Overview of social and behavioral factors that influence both transmission and prevention of HIV/AIDS throughout world. Lecture grading.

295. Overview of Emergency Public Health. (4.) Lecture, four hours. Designed for graduate students. Overview of issues involved in disaster preparedness and response for public health agencies, Introduction to theoretical and practice aspects of field of emer-
gency public health. Examination of disaster cycle and various natural and human-induced hazards from public health perspective. Letter grading.

298. Mental Health Topics in Community Health Sciences. (2 to 4). Discussion, two to four hours. Advanced study and analysis of current topics in community health sciences. Discussion of current research and future trends in research specialty of faculty member teaching course. May be repeated for credit. S/U or letter grading.

M299. Intervention to Reduce HIV and Its Consequences. (4). (Same as Psychiatry M289.) Lecture, three hours; discussion, one hour. Examination of interventions to reduce HIV/AIDS transmission. Review of theory and research supporting efficacy of HIV interventions for variety of high-risk populations. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4). Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

400. Field Studies in Public Health. (2 or 4). Fieldwork, to be arranged. Field observation and studies in selected organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.P.H. course requirement; 4 units may be applied toward 60-unit minimum total required for M.P.H. degree. Letter grading.

401. Measuring Sensitive Topics. (4). Lecture, two hours; discussion, two hours. Limited to School of Public Health doctoral students. Data collection methods and designs and how to think analytically about them, ethics in measurement of sensitive topics, review of current best practices in measuring important matters in new areas. Letter grading.

M406. Preparing for Smallpox or Other Bioterrorist Events. (2). (Same as Epidemiology M406.) Lecture, two hours. Major current public health issue is mass effort to prepare for possible bioterrorist events. Practical application of principles of epidemiology and public health in preparing for smallpox or other bioterrorist events. Letter grading.

M411. Issues in Cancer Prevention and Control. (4). (Same as Health Policy M411.) Lecture, four hours. Designed for juniors/seniors and graduate students. Introduction to causes and characteristics of cancer epidemic, cancer control goals for nation, and interventions designed to encourage smoking cessation/prevention, cancer screening, and other dietary, psychosocial, and lifestyle changes. Letter grading.

M418. Rapid Epidemiologic Surveys in Developing Countries. (4). (Same as Epidemiology M418.) Lecture, two hours; discussion, two hours. Examination of interventions to reduce HIV/AIDS transmission. Review of theory and research supporting efficacy of HIV interventions for variety of high-risk populations. Letter grading.

M420. Reproductive Health: Demographic Application. (4). Seminar, two hours. Designed for graduate students. Examination of foundations of reproductive health from medical perspective, with particular attention to implications for public health programs, health services, and policy. Topics include anatomy and physiology of male and female reproductive health tracts, methods of birth control, medical and surgical abortion, infertility, maternal care, and sexual violence and trauma. S/U or letter grading.

M433. Reproductive Health: Demographic Application. (4). Lecture, four hours. Introductory aspects of population dynamics; reproductive biology (male and female); contraceptive methods; fertility-related behaviors; STDs; methods to measure contraceptive (life tables) and program (evaluation) effectiveness. Letter grading.

426. School-Linked Services: Integrated Health, Education, and Social Services for Children in Communities. (4). Seminar, three hours; fieldwork, one hour. Examination of school services in context of other dramatic changes, scope of problems facing youth, roles that schools may serve as organizers/delivery sites for comprehensive services; local, state, federal and international issues affecting development of appropriate school service models. Letter grading.

427. Reproductive Health in Sub-Saharan Africa. (4). Lecture, three hours. Preparation: requisite: course 247. In-depth understanding of reproductive health challenges facing sub-Saharan Africa and main programs designed to address them. Topics include family planning, STDs, abortion, HIV/AIDS, and refugees. Letter grading.

M428. Child and Family Health Program Community Leadership Seminar. (2). (Same as Health Policy M428.) Seminar, two hours. Designed for graduate students. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations. Letter grading.

M436A-M436B. Child Health, Programs, and Policies. (4-4). (Same as Health Policy M449A-M449B.) Lecture, four hours. Requirements: Health Policy 100. Course M436A is requisite to M436B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations. Letter grading.

437. Principles and Practice of Preventive Medicine. (4). Lecture, two hours; discussion, two hours. Major current public health issue is mass effort to prepare for possible bioterrorist events. Practical application of principles of epidemiology and public health in preparing for smallpox or other bioterrorist events. Letter grading.

447. Nutrition Education and Training: Third World Considerations. (4). Lecture, two hours; discussion, one hour; student participation, one hour. Preparation: course 434A. Problems and priorities in nutrition education and training for families and health workers in Third World countries, including new concepts in primary healthcare services, mass media, communication, and governmental and international interventions. S/U or letter grading.

448. Anthropometric and Dietary Aspects of Nutritional Assessment. (4). Lecture, two hours; laboratory, two hours. Preparation: course 443. Practical skills in anthropometric and dietary assessment, including selection of appropriate methods, data gathering and analysis, and presentation. Letter grading.

449. Nutrition Education and Training: Third World Considerations. (4). Lecture, two hours; discussion, one hour; student participation, one hour. Preparation: course 434A. Problems and priorities in nutrition education and training for families and health workers in Third World countries, including new concepts in primary healthcare services, mass media, communication, and governmental and international interventions. S/U or letter grading.

447. Health and Social Context in Middle East. (4). Lecture, four hours. Preparation: backgrounds in Islamic or Middle Eastern studies. Examination of current topics in Middle Eastern countries. Phases include community needs identification; goal setting; budget and work plan development; funding; staffing; evaluation design; data and cost analysis; and project presentation. Letter grading.

444. Anthropometric and Dietary Aspects of Nutritional Assessment. (4). Lecture, two hours; laboratory, two hours. Preparation: course 443. Practical skills in anthropometric and dietary assessment, including selection of appropriate methods, data gathering and analysis, and presentation. Letter grading.

434A. Maternal and Child Health in Developing Areas. (4). Lecture, four hours. Preparation: course 231. Major health problems of mothers and children in developing areas, with emphasis on prenatal care, maternal and child health. Letter grading.

445. Community Health Sciences / 249

Community Health Sciences / 249
Undergraduate Study

Comparative Literature B.A.

Preparation for the Major

Required: (1) Two courses from the Comparative Literature 1, 2, or 4 series (with approval of the director of undergraduate studies, a comparable and appropriate lower division course in another department may be substituted for one of the courses), (2) completion of the College Writing requirement, and (3) literary proficiency in at least one language other than English, to be demonstrated by admission into one upper division literature course in the original language.

Transfer Students

Transfer applicants to the Comparative Literature major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one English composition course, two literature survey courses, at least one of which must be world literature, and the equivalent of at least one year of foreign language.

Refer to the UCLA Transfer Admissions Guide at http://www.admissions.ucla.edu/prospect/adm/trans.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Ten courses, of which (1) five must be from comparative literature offerings, including Comparative Literature 100 and at least four additional comparative literature courses selected from M101 through 197, (2) three upper division literature courses using original language texts in the primary language area, and (3) two upper division literature courses using original language texts in the secondary language area (students may petition the undergraduate adviser to take two upper division literature courses in translation if their primary language area is in a language other than English).

Honors Program

The honors program is open to Comparative Literature majors with a 3.5 departmental and a 3.25 overall grade-point average. Eligible interested students should contact the undergraduate adviser to enter the program.

Honors candidates must complete all requirements for the major and an honors research paper (in addition to regular course requirements) in two of the four required upper division comparative literature courses. Candidates must also complete a fourth course in the primary literature area and Comparative Literature 198 with a core faculty member in which they write a senior honors paper of approximately 25 pages.

Comparative Literature Minor

The Comparative Literature minor offers students interested in literature and the humanities the opportunity to gain insight into the critical problems and theories addressed by comparative literature and to apply that knowledge in literature and comparative literature courses.

To enter the minor students must have fulfilled the College Writing requirement, have completed 40 units with an overall grade-point average of 2.0 or better, have taken at least one year or equivalent of a language other than English, and file a petition with either the faculty or staff undergraduate adviser, 350B Humanities Building, (310) 825-7650.

Required Courses (28 units minimum): (1) Four upper division comparative literature courses (one course from Comparative Literature 1A through 4DW may be substituted), (2) two upper division courses in one literature (e.g., Arabic, Chinese, English, French, German, Korean, Russian, Spanish) in the original language, and (3) one upper division course in a second literature in the original language (one level six foreign language course may be substituted). If students complete two upper division courses in a language other than English, they may petition to take one upper division course taught in English translation to fulfill the third requirement.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa/library/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees

The Department of Comparative Literature offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Comparative Literature.

Comparative Literature

Lower Division Courses

1A. World Literature: Antiquity to Middle Ages. (5). Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to students with credit for course 2AW or 4AW. Study of major texts from Antiquity to Middle Ages, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Chaucer, Dante, Cervantes, Shakespeare, Calderon, Moliere, and Racine. P/NP or letter grading.

1B. World Literature: Middle Ages to 17th Century. (5). Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to students with credit for course 2B or 4BW. Study of major texts in world literature, with emphasis on Western civilization. Texts include works and authors such as Chaucer’s Canterbury Tales, Dante’s Divine Comedy, Boccaccio’s Decameron, Cervantes’ Don Quixote, Shakespeare, Calderon, Moliere, and Racine. P/NP or letter grading.

1C. World Literature: Age of Enlightenment to 20th Century. (5). Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to students with credit for course 2CW or 4CW. Study of major texts in world literature, with emphasis on Western civilization. Authors include Swift, Voltaire, Diderot, Rousseau, Goethe, Ibsen, Strindberg, M. Shelley, Dostoevsky, Kafka, Joyce, Woolf, and Stevens. P/NP or letter grading.

1D. Great Books from World at Large. (5). Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Entry-Level Writing requirement. Not open for credit to students with credit for course 2DW or 4DW. Study of major literary texts usually overlooked in courses that focus only on canon of Western literature. Texts from at least three of following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. P/NP or letter grading.

2AW. Survey of Literature: Antiquity to Middle Ages. (5). Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 1A or 4AW. Study of selected texts from antiquity to Middle Ages, with emphasis on literary analysis and expository writing. Texts include works and authors such as Odyssey, Gilgamesh, Sappho, Greek tragedies, Aeneid, Petronius, Beowulf, Ma Sien-France, Tristan and Isolde, 1001 Nights, Popul Vuh. Satisfies Writing II requirement. Letter grading.

2BW. Survey of Literature: Middle Ages to 17th Century. (5). Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 1B or 4BW. Study of selected texts from Middle Ages to 17th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Chaucer, Dante, Cervantes, Marguerite de Navarre, Shakespeare, Calderon, Moliere, and Racine. Satisfies Writing II requirement. Letter grading.

2CW. Survey of Literature: Age of Enlightenment to 20th Century. (5). Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 1C or 4CW. Study of selected texts from Age of Enlightenment to 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, M. Shelley, Dostoevsky, Kafka, James Joyce, Garcia Marquez, and Jamaica Kincaid. Satisfies Writing II requirement. Letter grading.

2DW. Survey of Literature: Great Books from World at Large. (5). Lecture, two hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 1D or 4DW. Study of major literary texts usually overlooked in courses that focus only on canon of Western literature, with emphasis on literary analysis and expository writing. Texts from at least three of following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. Satisfies Writing II requirement. Letter grading.

4AW. Literature and Writing: Antiquity to Middle Ages. (5). Discussion, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for course 1A or 2AW. Study and discussion of selected texts from antiquity to Middle Ages, with emphasis on literary analysis and expository writing. Texts include works and authors such as Odyssey, Gilgamesh, Sappho, Greek tragedies, Aeneid, Petronius, Beowulf, or Marie de France. Satisfies Writing II requirement. Letter grading.
4BW. Literature and Writing: Middle Ages to 17th Century. (5), Discussion, four hours. Enforced requisites: English Composition 3 or 3H or English as a Second Language for credit, students with credit for course 1B or 2BW. Study and discussion of selected texts from Middle Ages to 17th century, with emphasis on literary analysis and expository writing. Texts and authors such as Chaucer, Dante’s Divine Comedy, Cervantes’ Don Quixote, Shakespeare, 1001 Nights, Christine de Pizan, Proust, Melville, and Racine. Satisfies Writing II requirement. Letter grading.

4CW. Literature and Writing: Age of Enlightenment to 20th Century. (5), Discussion, four hours. Enforced requisites: English Composition 3 or 3H or English as a Second Language for credit, students with credit for course 1D or 2DW. Study and discussion of major literary texts usually overlooked in courses that focus only on canon of Western literature, with emphasis on literary analysis and expository writing. Texts from at least three of following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. Texts may include works by authors such as Ngugi, Desai, Kincaid, Emecheta, El Saidawli, Achebe, Pak, Can Xue, Neruda, and Rushdie. Satisfies Writing II requirement. Letter grading.

4DW. Literature and Writing: Great Books from World at Large. (5), Discussion, four hours. Enforced requisites: English Composition 3 or 3H or English as a Second Language for credit, students with credit for course 1D or 2DW. Study and discussion of major literary texts usually overlooked in courses that focus only on canon of Western literature, with emphasis on literary analysis and expository writing. Texts from at least three of following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. Texts may include works by authors such as Ngugi, Desai, Kincaid, Emecheta, El Saidawli, Achebe, Pak, Can Xue, Neruda, and Rushdie. Satisfies Writing II requirement. Letter grading.

Upper Division Courses

100. Introduction to Literary and Critical Theory. (5), Lecture, four hours. Preparation: satisfaction of Entry-Level Writing and College Writing requirements. Requisites: two courses from Comparative Literature 1 or 2 series or English 10 or Spanish 60 series, etc. Seminar-style introduction to discipline of comparative literature presented through series of texts illustrating its formation and practice. Letter grading.

102. Classical Tradition: Epic. (4), Seminar, three hours. Designed for upper division literature majors. Analysis of Iliad, Odyssey, Aeneid, Germania, Liberryta, and Paradise Lost both in relation to their contemporary societies and to literary traditions. Emphasis on how poets build on work of their predecessors. P/NP or letter grading.

103. People on Run: Migrants, Minorities, and Multiculturalism in Europe. (4), Seminar, three hours. Problem of migrants and refugees in ongoing crisis of European Union. Examination of contemporary crisis of European Union and of European multiculturalism in particular. Overview of history of European integration since World War II, as well as more focused examination of ways in which culture and migration have come to define and influence the future of European Union. Today’s migrants have already been conceived of as one economic union. Offered in summer only. P/NP or letter grading.

C105. Comic Vision. (4), Lecture, three hours. Designed for upper division literature majors. Literary masterpieces that are comic or satiric, selected to demonstrate varieties of comic expression. May be concurrently scheduled with course C205. Undergraduate students read all works in translation. P/NP or letter grading.

106. Archetypal Heroes in Literature. (4), Seminar, three hours. Designed for juniors/seniors. Survey and analysis of function and appearance of such archetypes in literature, myth, film, theater, and opera. For example, Odysseus and Orpheus in literature from antiquity to modern period. All works read in translation. P/NP or letter grading.

108. Autobiography in Francophone and Anglophone Worlds. (5), Seminar, three hours. Designed for juniors/seniors. Focus on number of narratives that use autobiographical mode to situate self in relation to history of family members. Introduction to theories of subjectivity and to genre of self-writing in France, Africa, and Caribbean. Comparison of serial autobiographies of Assia Djebar, Nadia Murad Biga, Amin Maalouf with works of male authors. Also will study Mo- understand limits of genre. Texts represent different limit cases of autobiography and can be read as biography, autobiography, and auto/historiography. Examination of differences that emerge between autobiographical pact (Lejeune) that some authors create with their readers and liberties that others take with history. Attention to way visual culture (painting, photography, film) helps authors realize their point, access memory, or create metaphors of self. P/NP or letter grading.

M110. Thousand and One Nights/Aif Layla Wa-Layla. (4), Same as Arabic M110). Lecture, three hours. Designed for juniors/seniors. Medieval tales of Arabian Nights and their appearance in European in 1704, Thousand and One Nights is most well-known work of Arabic literature in West. Examination of cycle of tales more commonly known as Arabian Nights, including history of its translation, contemporary oral performances of tales in Arabic-speaking world, literary emergence of vernacular language in relation to classical Arabic, and Western readings of Shahnameh. Read in music, film, Gunther, and Disney. P/NP or letter grading.

111. Histories and Methodologies of Comparative Literature. (5), Seminar, four hours. Designed for upper division literature majors. Broad survey of comparative literature discipline and variety of central methodological past and present debates concerning nature of discipline. Introduction to several key theoretical texts from early 20th century to present, addressing these and other related questions: what does it mean to read comparatively? What is significance of reading literature across national, cultural, linguistic, and temporal boundaries? What are criteria for conducting such comparative readings? Is comparative reading more concerned with finding similarities or differences? P/NP or letter grading.

M119. Al-Andalus: Literature of Islamic Spain. (4), Same as Arabic M115). Lecture, three hours. Study of literature of Islamic Spain to learn about interaction of Arabic and Western and Arabic and Jewish cultures and to recognize Islamic culture as vital force in European life and letters. P/NP or letter grading.

C122. Renaissance Drama. (4), Lecture, three hours. Designed for upper division literature majors. Broad introduction to subject matter and types of plays in Renaissance, with consideration of historical and literary influences on plays. Readings includes works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with course C222. Undergraduate students read all works in translation. P/NP or letter grading.

M123. Oral Literature and Performance of Arab World. (Same as Arabic M123). Lecture, three hours. Knowledge of Arabic not required. Introduction to study of living oral traditions of troubadours, storytellers, oral poets, and performers in Arabic-speaking Middle East. May be concurrently scheduled with course C222. Undergraduate students read all works in translation. P/NP or letter grading.

M148. Contemporary Arab Film and Song. (4). (Same as Arabic M148). Seminar, three hours. Exploration of intersections between Arab film and song and between popular cultures and cultures of commitment (lititzam), with possible focus on specific genres such as realist/neorealist Arab film; formation of Arab film and song; topics such as nation, gender, and representation or democracy and human rights or censorship, reception, and resistance. Possible examination of various national cinemas, such as Egyptian, Moroccan, Algerian, and Palestinian. Various musical genres such as Rai, Mizoued, and Hip-hop also examined in relation to emergence not only of national cinemas, national music industries, and iconic singers but also of video clip, satellite, TV, star academy, and reality shows—all products of transnational and pan-Arab mass media. P/NP or letter grading.

C152. Symbolism and Decadence. (5), Seminar, four hours. Designed for upper division literature majors. Study of symbolist and decadent movements in 19th- and 20th-century English and French poetry and prose, including authors such as Baudelaire, Rimsky-Korsakov, and Rilke. May be concurrently scheduled with course C252. Undergraduate students may read all required French texts in translation. P/NP or letter grading.

M153. Post-Symbolist Poetry and Poetics. (5), Seminar, four hours. Designed for upper division literature majors. Study of specific poets and poetic relations to them during first half of 20th century. Texts may include poets such as W.B. Yeats, Ezra Pound, T.S. Eliot, Paul Valéry, F.M.asan, and Wallace Stevens. May be concurrently scheduled with course C253. Undergraduate students may read all works in translation. P/NP or letter grading.

C156. Fantastic Fictions. (4), Seminar, three hours. Designed for upper division literature majors. Time and again in modern literature, corpses become conduits for catalysts of revolution and catalysts of change. May be concurrently scheduled with course C256. Undergraduate students read all works in translation. P/NP or letter grading.

160. Literature and Visual Arts. (4). Lecture, three hours. Designed for upper division literature majors. Artistic value of literature frequently cannot put to rest, and what is their connection to national history or nation language or narrative? Readings from James Joyce, John Bar- ville, Henry James, Toni Morrison, Adolfo Bioy Casares, Juan Carlos Onetti, Juan Rulfo, and Carlos Fuentes, with films by Alejandro Amenabar, Andrei Tarkovsky, and Keri Mizoguchi. May be concurrently scheduled with course C256. Undergraduate students read all works in translation. P/NP or letter grading.

C161. Fiction and History. (4), Seminar, three hours. Designed for upper division literature majors. Interdisciplinary analysis of use of historical events, situations, and characters in literary works of Renaissance and/or modern period. Texts and individual assignments range from Re-
naissance historical narratives (Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendhal, Verga, Tomasi di Lampedusa, Carpentier, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors’ choice and use of historical materials. Students will concurrently scheduled with course C261. P/NP or letter grading.

M162. Israel Seen through Its Literature. (4). (Same as Jewish Studies M162.) Lecture, three hours. Attempt to impart profound understanding of Israel as seen through its literature. Examination of variety of literary texts—stories, novels, and poems—and reading of them in context of their historical backgrounds. P/NP or letter grading.

C163. Crisis of Consciousness in Modern Literature. (5). Seminar, three hours. Designed for upper division literature majors. Study of modern European and American works that are concerned both in subject matter and artistic methods with growing self-consciousness of human beings and their society, with focus on works of Kafka, Fikre, Woof, Sartre, and Stevens. May be concurrently scheduled with course C263. Undergraduate students may read all works in translation. P/NP or letter grading.

C164. Modern European Novel. (5). Seminar, three hours. Designed for upper division literature majors. Study of modern European novel’s development from 19th- and 20th-century authors such as Hardy, Strindberg, Lagerkvist, Gide, Proust, Musil, Kafka, Woof, Nabokov, Grass, Christa Wolf, and Enquist to focus on development of themes such as shifting authority, gender conflicts, change versus stability, exoticism, and representation, and self-consciousness in narrative. May be concurrently scheduled with course C264. Undergraduate students may read all works in translation but are encouraged to read in original language whenever possible. P/NP or letter grading.

M165. Holocaust in Literature. (4). (Same as Jewish Studies M187.) Lecture, three hours. Investigation of how Holocaust informs a variety of literary and cinematic works and raises wide range of aesthetic and moral questions. P/NP or letter grading.

M166. Modern Jewish Literature in English: Diaspora Literature. (4). (Same as Jewish Studies M151A.) Lecture, three hours. Study of literary responses of Jews to modernity, its challenges, and threats. Readings in texts originally written in English or translated from Hebrew, Yiddish, German, Russian, French, and Italian. Analyzes formal aspects of each work. P/NP or letter grading.

M167. Modern Arabic Literature in English. (4). (Same as Arabic M151.) Lecture, three hours. Designed for upper division literature majors. Topics include structures of otherness in modern Arab culture; East-West debate; memory, trauma, and mourning; violence, narrativity, and ethics; globalization, oil, and cultural insurgency; Arab culture in transnational context or questions of reception, exoticism, translation, and marketing. Genres may include prison narratives; novel of terror; memoirs by women and/or by refugees and exiles; 19th- and 20th-century travel narratives; Arabic romantic poetry; literature of pre-1948; rise of Arab novel. Areas may range from generic look at Arab world to narrow focus on Maghreb or on Arab Israeli literature. Includes study of Egypt, Palestine, Lebanon, Syria, Jordan, Iraq, and Iran. May also be organized around Arab literatures written in one specific language, namely English, Arabic, or French. Letter grading.

169. Continental African Authors. (4). Lecture, three hours. Study from 1A, 1B, 2A, 2B, 2CW, or English Composition 3 or 3H. Introductions to new set of African authors and attempt to discuss similarities or differences they may have with major authors such as Achebe, Ngugi, Amiri Baraka, Soyinka, etc. P/NP or letter grading.

CM170. Alternate Traditions: In Search of Female Voices in Contemporary Literature. (5). (Formerly numbered M170.) (Same as Gender Studies CM170.) Seminar, three hours. Designed for upper division literature majors. Investigation of narrative texts by contemporary French, German, English, American, Spanish American, African, and Asian women writers from cross-cultural perspective. Common themes, problems, and techniques. Concurrently scheduled with course CM270. P/NP or letter grading.

M171. Chinese Immigrant Literature and Film. (4). (Same as Asian American Studies M130B and Chinese M153.) Lecture, three hours; discussion, one hour. Examination of Chinese-American works in-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race to inform thinking and discussion of relevant issues. Concurrently scheduled with course C272. Undergraduate students read all works in translation. P/NP or letter grading.

M175. Race, Gender, Class. (5). (Same as Asian American Studies M165.) Seminar, three hours. Theoretical and literary readings combined to explore three main aspects of social and cultural experience (race, gender, and class) as separate but interconnected spheres affecting both minority and majority populations in U.S. Examination of these issues from comparative perspectives. P/NP or letter grading.

M176. Literature and Technology. (4). (Same as Japanese M176.) Seminar, three hours. Focus on issues in U.S. Examination of these issues from comparative perspectives. P/NP or letter grading.

177. Comparative Literature of Francophone and Anglophone Caribbean. (5). Seminar, three hours. Designed for juniors/seniors. Introduction to literature and culture of Caribbean basin from New Orleans to Haiti, Martinique, Guadeloupe, Jamaica, Antigua, or Trinidad. Topics include history of French and English colonial influences and rivalries, Haitian revolution and its literary legacies, emergence of nationalist discourses, courses of colonial development, adherence of the French to West African culture, and representation of African experience in U.S. Examination of representation of technology in 20th-century fiction. Discussion of impact of technology on shifting images of gender, subjectivity, and national identity. P/NP or letter grading.

C178. India ink: Literature and Culture of Modern South Asia. (5). Seminar, three hours. Survey of significant issues in literature of modern Indian culture and life, focusing on modern Indian culture by means of texts by Rabindranath Tagore, Satyajit Ray, Faiz Ahmed Faiz, and U.R. Ananthapuri Murthy, including novels, short stories, poetry, films, music, and works in cultural criticism and historical scholarship. Central and defining issue for 20th-century Indian culture is experience of British colonial rule and massive cultural and material changes that accompanied it. Exploration of manner in which literature and culture have developed in interaction with powerful social forces, such as struggle for national independence from British rule and changes in national political thought, as expressed in literature by Mahatma Gandhi and leaders of the Indian National Congress. Concurrently scheduled with course C271. P/NP or letter grading.

C187. Reading across Culture. (5). Seminar, three hours. What is it we do when we try to understand words, habits, gestures, and beliefs not our own? How is this task mediated or informed by our own culture? How do we understand something foreign to us by immersing ourselves in it or by standing apart? Does ability to understand something foreign imply taking universal standpoint? Can we make judgments about beliefs other than those of our own cultural tradition? Cultural interpretations have long history across both Western and non-Western cultures. Discussion of history of questions about cross-cultural interpretation and comparative literary criticism, focusing on comparative literature and cultural anthropology. Reading of some very complex and influential works by such writers as Claude Lévi-Strauss, Amitav Ghosh, James Clifford, Edward Said, Gayatri Spivak, and Erich Auerbach. Concurrently scheduled with course C287. P/NP or letter grading.

190. Research Colloquia in Comparative Literature. (2). Seminar, three hours. Designed to bring together students undertaking supervised tutorial research in seminar setting with one or more faculty members to discuss their own work or related work in discipline. Led by one supervising faculty member. May be repeated for credit. P/NP or letter grading.

191. Variable Topics in Comparative Literature. (4). Seminar, three hours. Designed for juniors/seniors. Study and discussion of semester topics. Emphasis on special issues and approaches in literary theory, especially in relation to other modes of discourse such as history, philosophy, psychology, linguistics, anthropology. Development of culminating project required. Consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. P/NP or letter grading.

197. Individual Studies in Comparative Literature. (2 to 4). Tutorial, three hours. Limited to juniors/seniors. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Assigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

198. Honors Research in Comparative Literature. (4). Tutorial, three hours. Designed for junior or senior comparative literature honors students. Development and completion of honors thesis or comprehensive project on comparative topic selected by student and written under direction of core faculty member. Students expected to meet regularly with supervisor throughout term. No more than one course may be used to fulfill four-course requirement for Comparative Literature majors. May be repeated once for maximum of 8 units. Individual contract required. Letter grading.

199. Directed Research or Senior Project in Comparative Literature. (2 to 4). Tutorial, three hours. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit with consent of tutor. Individual contract required. P/NP or letter grading.

Graduate Courses

200A. Theory of Comparative Literature. (6). Seminar, three hours. Study of theory of literature, with emphasis on methodology and textual criticism. P/U or letter grading.

202. Classical Tradition: Epic, Tragedy, or Comedy. (4). Seminar, three hours. Preparation: reading knowledge of Greek, Latin, or Italian. Analysis of Greek and Roman works and their re-creations in Renaissance and modern periods. Emphasis on how poets build on work of their predecessors. Reading may range from Iliad or Odyssey to tragedies by Sophocles and Euphorion or satires by Aristophanes. S/U or letter grading.

C205. Comic Vision. (4). Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Literary masterpieces, both dramatic and non-dramatic, selected to demonstrate varieties of comic expression. May be concurrently scheduled with course C105. Graduate students required to prepare papers based on texts read in original languages and to present group one additional hour each week. S/U or letter grading.

206. Archetypal Heroes in Literature. (4). Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Survey and analysis of function and appearance of such archetypal heroes
as Achiles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to modern period. S/U or letter grading.

210. Comparative Studies in Autobiography. (5). Seminar, three hours. Limited to graduate students. Introduction to theories of autobiography and subjectivity and to genre of autobiography in literatures in French and English and across centuries. Topics include early modern approaches to self-writing, Rousseau and emergence of modern self, women's autobiography, postcolonial autobiography, cultural studies and turn toward self-representation, serial autobiography, and virtual selves. Theorists may include Georges Gusdorf, Philippe Lejeune, Paul de Man, Jacques Derrida, Helene Cixous, Michel Foucault, Pierre Bourdieu, and Toril Moi. S/U or letter grading.

C222. Renaissance Drama. (4). Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Broad introduction to subject matter and types of plays in Renaissance, with consideration of historical and literary influences on plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with course C122. Graduate students required to prepare papers based on texts read in original languages and to meet as group one additional hour each week. S/U or letter grading.

M251. Literatures and Cultures of Maghreb. (4). (Same as Arabic M255.) Seminar, three hours. Limited to graduate students. Examination of traditionally diverse literatures of Maghreb in their multiple and competing contexts of language and gender politics, religious and cultural formations, Pan-Arabism and postcolonial nationalities, Third-Worldism and economic development, reform from modernization, immigration and citizenship, soccer industry and Rai music, mass media and Star Academy Maghreb, and more. Readings of literatures in English and in English translations of literatures in Arabic languages (partially Arabic and French) in conjunction with theories of language and linguistic pluralism, cultural translation, deconstruction, and host of other related theories of gender, globalization, and postcolonial cultural studies. S/U or letter grading.

C252. Symbolism and Decadence. (5). Seminar, four hours. Preparation: reading knowledge of French. Study of symbolist and decadent movements in 19th- and 20th-century French poetry and prose, including authors such as Baudelaire, Rimbaud, Verlaine, Mallarmé, Wilde, Yeats, and Eliot. May be concurrently scheduled with course C152. Graduate students required to prepare papers based on texts read in original languages and may meet as group one additional hour each week. S/U or letter grading.

C253. Post-Symbolist Poetry and Poetics. (5). Seminar, four hours. Study of specific poets and poetics related to them during first half of 20th century. Texts may include poets such as W.B. Yeats, Ezra Pound, T.S. Eliot, Paul Valéry, R.M. Rilke, Gunnar Ekelöf, and Wallace Stevens. May be concurrently scheduled with course C153. Graduate students may meet as group one additional hour each week. S/U or letter grading.

C256. Fantastic Fictions. (4). Seminar, three hours. Time and again in modern literature, corpses become conduits or catalysts for revelation. What are ghosts that fiction frequently cannot put to rest, and what is their connection to the notion of national or national narrative? Readings from James Joyce, John Banville, Henry James, Toni Morrison, Adolfo Bioy Casares, Juan Carlos Onetti, Juan Rulfo, and Carlos Fuentes, among others. Includes American, Argentine, Russian, Tarkovsky, and Kenji Mizoguchi. May be concurrently scheduled with course C156. Graduate students have additional meetings and theoretical readings by Benjamín, Frei Betto, Alain Rabate, Rickels, and Caruth. S/U or letter grading.

C260. Literature and Visual Arts. (4). Lecture, three hours. Knowledge of art history valuable but not required. Assuming that literature and visual arts are in some degree expressions of cultural and philosophical patterns of eras, study of relationships between writers and movements in painting, architecture, and sculpture, and development of interplay of similarities and differences between plastic and verbal arts in comparative study. May be repeated for credit with instructor and/or topic change. May be concurrently scheduled with course C160. Graduate students required to read works in original languages. S/U or letter grading.

C261. Fiction and History. (4). Seminar, three hours. Analysis of ways in which narrative fiction is, and has been, used to address historical modes of expression through which Arab artists working in different genres have engaged with some persistent and recurrent questions related to their mission, vocation, and commitment (iltsam) to fundamental concerns of Arab world, to responsible rhetoric and poetics within contexts of profound asymmetries of power, temporariness, and actualities. S/U or letter grading.

CM270. Alternate Traditions: In Search of Female Voices in Contemporary Literature. (5). (Same as Gender Studies CM270.) Seminar, four hours. Designed for graduate students. Study of specific poets and poetics related to them during first half of 20th century. Texts may include poets such as W.B. Yeats, Ezra Pound, T.S. Eliot, Paul Valéry, R.M. Rilke, Gunnar Ekelöf, and Wallace Stevens. May be concurrently scheduled with course C153. Graduate students may meet as group one additional hour each week. S/U or letter grading.

C272. Postmodern Novel. (4). Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study of postmodern novel as it developed out of modernism. Postmodernism defined in three different ways—philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with course C172. Graduate students required to meet as group one additional hour each week. S/U or letter grading.

C274. Theorizing Third World. (4). (Same as Asian American Studies M274.) Seminar, three hours. Investigation of politics of power, gender, and identity in Third World, including relations between First World and Third World, using both theoretical and textual approaches. S/U or letter grading.

C276. Reading Modern Bodies. (4). (Same as Japanese M276.) Seminar, three hours. Designed for graduate students. Exploration of construction of human body through various modern technologies and discourses, including those of disease, diet, race, gender, and sexuality. Examination of texts from variety of locales, with particular emphasis on Japan. S/U or letter grading.

C277. Caribbean Literature from Negritude to Diaspora. (4). Seminar, three hours. Historical approach to modern Anglophone and Francophone Caribbean literature, retracing search for identity beginning with negritude movement's claim to Africa as expressed in Aimé Césaire's classic poem Cahier d'un retour au pays natal and ending with consideration of dispersion of identities in work of writers and intellectuals who contend with problem of diasporic Caribbean culture. S/U or letter grading.

C278. India Ink: Literature and Culture of Modern South Asia. (5). Seminar, three hours. Survey of significant issues in history of 20th-century Indian literature and culture. Great works of modern Indian culture such as figures such as Rabindranath Tagore, Satyajit Ray, Faiz Ahmed Faiz, and U.R. Anantha Murthy, including novels, short stories, poetry, films, music, and works in cultural criticism and historical scholarship. Central and defining issue for 20th-century Indian culture: emergence of India as an expansive cultural and material changes that accompanied it. Exploration of manner in which literature and culture have developed in interaction with powerful social forces, including struggle for national independence from Britain under leaders like Mahatma Gandhi and expansion of Indian diaspora. Concurrently scheduled with course C178. S/U or letter grading.

C279. Subaltern Studies: Colonial Histories and Cultural Critique. (5). Seminar, three hours. Examination of certain links between practice of cultural criticism and problems in historiography of colonial and postcolonial societies. Use of key texts by members of Subaltern Studies collective to explore some central issues arising from this relationship. What kind of interdisciplinary space is produced
by dialog of history and literary and cultural theory? Attention to literary texts to practice such interdisciplinary criticism. Nature of modernity in colonial setting. What is nature of bourgeoisie in colonial society? What kind of modernization does it seek? What is relationship of modern metropolitan bourgeoisie to indigenous one? S/U or letter grading.

282. Three approaches to likely coexistence in Arab cultural material—literary, critical, philosophical, artistic. Techniques students need to render scholarly presentation of student work for discussion. Opportunity for students to determine whether they have desire and talent to pursue literary translation as part of their professional education. S/U or letter grading.

283. Workshop: Science, Technology, and Society. (4). Seminar, three hours; tutorial, one hour. Preparation: solid reading knowledge of at least one foreign language. Designed for graduate social sciences students. Prerequisites: students need to render scholarly texts in their fields from language they use in their research into English and to advance their knowledge of language to stage where they can use it more effectively in all aspects of their research, as well as advantage of translation techniques they have learned. S/U or letter grading.

285. Translation Workshop. (4). Seminar, three hours. Preparation: solid reading knowledge of at least one foreign language. Open to qualified undergraduates with proper language preparation. Introduction to principles of literary translation heuristically, that is, on basis of texts participating students translate, and presentation for discussion. Opportunity for students to determine whether they have desire and talent to pursue literary translation as part of their professional education. S/U or letter grading.

287. Reading across Culture. (5). Seminar, three hours. What is it we do when we try to understand words, habits, gestures, and beliefs not our own? Do we understand something foreign to us by immersing ourselves in it or by standing apart? Does ability to understand something foreign imply taking universal standpoints? Can we make judgments about values other than our own? Questions of cultural interpretation have long history in both Western and non-Western cultures. Discussion of history of questions about interpretation and cross-cultural interpretation of cultures in both comparative literature and cultural anthropology. Reading of some very complex and influential works by such writers as Claude Levi-Strauss, Amitav Ghosh, James Clifford, Edward Said, Gayatri Spivak, and Erich Auerbach. Concurrently scheduled with course C187. S/U or letter grading.

M288. Modern Arab Thought. (4). (Same as Arabic M288.) Seminar, three hours. While much has been written and said about resurgence and spread of political Islam after collapse of ideology of secular nationalism and failure of Arab left to apprehend exigencies of postrevolution/postcolonial moment, little has been devoted to less sensational topic of modern Arab thought despite unmistakable proliferation of critical work by Arab thinkers and artists in aftermath of 1967. Course addresses and redresses this glaring imbalance by considering new cultural material—literary, critical, philosophical, artistic, and journalistic—produced before and after al-Nahda but mostly before and after 1967 and fosters insightful approaches to unlikely coexistence in Arab contemporary world of ever-deepening and generalized crisis and steady and consolidated development (if not effervescence) of cultural and artistic production. S/U or letter grading.

289. Theory of Film and Literature. (6). Seminar, three hours; film screening, two hours. Study of definition and principles of theories of film and literature. Approaches vary by instructor (e.g., postcoloniality, psychoanalysis, semiotics, transnationalism, gender theory). S/U or letter grading.

Xinshu Grace Xiao, Ph.D. (Integrative Biology and Physiology)

Scope and Objectives
The major in Computational and Systems Biology is designed primarily for highly motivated undergraduate students interested in interdisciplinary studies in life sciences, behavioral and social sciences, and computer science. Preparation for the major consists of a broad foundation in basic sciences—chemistry, biology, physics, and mathematics, plus an introduction to computing. The major itself provides foundations in mathematical modeling, information processing, and control and system analysis, with an emphasis on quantitative ideas and methodologies. Mathematical and other analytical skills are essential in the major.

Computational and Systems Biology majors have several options for in-depth studies: a concentration in any one of the five designated concentrations in bioinformatics, biomedical systems, computers and biosystems, neurosystems, or systems biology. The major is appropriate preparation for employment or for graduate studies in any of these areas, with emphasis on interdisciplinary activities. It is also appropriate preparation for professional school studies in dentistry, engineering, management, medicine, and public health.
Undergraduate Study

The Computational and Systems Biology major is a designated capstone major. The capstone experience is a junior-level sequence of two courses integrating the discipline via mathematical modeling, simulation, and active research and report writing. Students are expected to demonstrate critical thinking skills and familiarity with research techniques needed to successfully pursue a research project in computational and systems biology, conceive and execute a research project on which they engage current methods and theory, communicate original scholarly findings to peers both in oral and written form, and work productively with others as part of a research team. The experience culminates with completion of the senior thesis requirement.

Computational and Systems Biology majors select a coherent integration of courses from one of five designated concentrations: bioinformatics, biomedical systems, computers and biosystems, neurosystems, or systems biology. The synergy for all concentrations is integrative systems, information, and computational systems modeling sciences in biology. The focus is primarily quantitative, as mastery of advanced quantitative skills is essential for multidisciplinary understanding. Each concentration emphasizes different systems or modalities, and modeling or other computational approaches. For students interested in broad options for postgraduate studies in life sciences and related fields of medicine, the systems biology concentration covers the widest spectrum of quantitative systems studies at all levels. The other concentrations are more focused. For example, bioinformatics is more focused on computational aspects of genetics and biology at molecular and cellular levels. Students normally select one, but because the concentrations have substantial methodologic overlap, well-justified combinations are also possible.

The bioinformatics concentration is designed for students interested in computational discovery and management of biological data, primarily genomic, proteomic, or metabolomic data. Bioinformatics emphasizes computational, statistical, and other mathematical approaches for mining, modeling, and analyzing high-throughput biological data, and the inherent structure of biological information. Example research problems include finding statistical patterns that reveal genomic or evolutionary or developmental information, or how regulatory sequences give rise to programs of gene expression, or how the genome encodes the capabilities of the human mind.

The biomedical systems concentration is designed for students interested in computational discovery and management of biological data, primarily genomic, proteomic, or metabolomic data. Bioinformatics emphasizes computational, statistical, and other mathematical approaches for mining, modeling, and analyzing high-throughput biological data, and the inherent structure of biological information. Example research problems include finding statistical patterns that reveal genomic or evolutionary or developmental information, or how regulatory sequences give rise to programs of gene expression, or how the genome encodes the capabilities of the human mind.

Computational and Systems Biology B.S.

Capstone Major

Computational and Systems Biology Premajor

Students entering UCLA directly from high school or first-term transfer students who declare the Computational and Systems Biology premajor at the time of application are automatically admitted. Current UCLA students need to file a petition with the Undergraduate Advising Office in 4436 Boelter Hall.

All students are identified as premajors until they satisfy the preparation for the major requirements by (1) achieving a minimum 2.7 grade-point average in all premajor mathematics courses, (2) achieving a minimum 2.7 GPA and a minimum grade of C in all premajor courses, and (3) filing a petition to declare the Computational and Systems Biology major.

Preparation for the Major

Required: A minimum of 82 to 94 units (depending on the computer programming course and physics sequence selected), including Chemistry and Biochemistry 20A, 20B, 20L, 30A; Computer Science 31 or Program in Computing 10A; Life Sciences 1, 2, 3, 4; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 115A; Physics 1A, 1B, and 1C, or 1A4H, 1BH, and 1CH.

Students following the bioinformatics or the computer systems concentration must also complete Computer Science 32, or Program in Computing 10B and 10C.

Transfer Students

Transfer applicants to the Computational and Systems Biology major with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one year of general chemistry with laboratory for majors, two years of calculus for majors, one year of calculus-based physics, one year of biology with laboratory for majors, one psychology course, and one programming course using C++.

Transfer applicants must meet the same academic requirements as current UCLA students, based on all courses transferred from another institution that satisfy major requirements, and must have completed one 12-unit term of residence in regular session at UCLA.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Admission to the major is by petition only and is based on successful completion of all preparation for the major courses and requirements (2.7 grade-point average in mathematics, 2.7 GPA overall, and a minimum grade of C in each preparation for the major course).

The major consists of a methodology core of six courses (23 units), a concentration of five upper division courses (20 units minimum), and a two-course capstone research requirement (9 units). Each course in the major must be passed with a grade of C or better.

Methodology Core

Required: (1) Computational and Systems Biology M184, 185, (2) two probability and statistics courses from one of the following groups: (a) Statistics 100A and 100B or (b) Mathematics 170A and Statistics 100B or (c) Electrical Engineering 131A and Statistics 100B, and (3) two signals, systems, and control systems courses: (a) Electrical Engineering 102 and (b) Electrical Engineering 141 or Mechanical and Aerospace Engineering 171A.
Concentrations

**Required:** A minimum of five courses (20 to 30 units) from the concentrations listed below. No 199 course may be applied toward any concentration. An approved list of courses for each concentration is available in the program office and at [http://www.cs.ucla.edu/C&SB/](http://www.cs.ucla.edu/C&SB/).

**Bioinformatics (at least 20 units):** Computer Science CM121, CM124, Molecular, Cell, and Developmental Biology M140 (or 144), 172 (or Physiological Science 125), and one additional course from the bioinformatics approved course list. Note: Computer Science 32, or Program in Computing 10B and 10C are completed in the premajor.

**Biomedical Systems (at least 20 units):** Bioengineering CM102, CM103, Electrical Engineering 103 (or Mathematics 151A), and two additional courses from the biomedical systems approved course list.

**Computers and Biosystems (at least 20 units):** Bioengineering CM102 (or CM103 or Molecular, Cell, and Developmental Biology M140 or 144 or Physiological Science 166), Computer Science 170A (or Electrical Engineering 103 or Mathematics 151A), 180, and two additional courses from the computers and biosystems approved list. Note: Computer Science 32, or Program in Computing 10B and 10C are completed in the premajor.

**Neurosystems (20 units):** Neuroscience M101A, M101B, 102 (or Electrical Engineering 113 or Mathematics 155), and two additional courses from the neurosystems approved list.

**Systems Biology (at least 20 units):** Ecology and Evolutionary Biology 170 (or Physiological Science 166), Molecular, Cell, and Developmental Biology 100 (or 144), 172 (or Physiological Science 125), and two additional courses from the systems biology approved list.

**Capstone Research Requirement**

**Required:** Computational and Systems Biology M186 to be taken in the sophomore or junior year and M187 to be taken in the junior or senior year after completion of course M186.

**Honors Program**

Students with a grade-point average of 3.5 or better in required major courses and a 3.0 cumulative GPA may apply for admission to the honors program. Honors or highest honors may be granted at the discretion of the faculty sponsor and the faculty committee to students demonstrating exceptional ability on the senior research thesis.

**Mathematical Biology Minor**

The Mathematical Biology minor introduces undergraduate students to an active interdisciplinary research field at UCLA. The minor core examines biological systems in a holistic and quantitative manner by emphasizing systems and integrative principles in biology. Students who complete the minor have sufficient training to apply the knowledge they learn in graduate school or employment of their choice. Students complete a core curriculum and an elective course. The minor consists of lower division courses basic to the minor and four core courses and one option course that provide the needed background in mathematical biology, molecular and cell biology, statistics and probability, and mathematical modeling and simulation methods for biological systems.

To enter the minor, students must (1) be in good academic standing (2.0 grade-point average or better) and have completed Computer Science 31 or Program in Computing 10A with a grade of C or better; (2) submit an application essay supporting their interest in pursuing the minor and detailing any projects that they have already undertaken, and (3) file a petition in the administrative office, 4436 Boelter Hall, after appropriate counseling.

**Required Lower Division Courses (8 units):** Mathematics 33A, 33B.

**Required Upper Division Courses (22 units):** Chemistry and Biochemistry 153A, M230B, Computational and Systems Biology M184, Microbiology, Immunology, and Molecular Genetics 105, and two elective courses selected from Biostatistics 100A, Chemistry and Biochemistry M117, 156, Electrical Engineering 102, 113, Statistics 100A, 100B.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Systems Biology Minor**

The Systems Biology minor introduces undergraduate students to an active interdisciplinary quantitative biosciences research and teaching field at UCLA. It provides a coherent course plan encompassing basic foundations of the field. Beside broadening student knowledge in systems biology, the minor provides enhanced perspective about computational and systems biology methods and applications and better prepares students to make more informed choices about their future directions and careers. The minor consists of lower division courses basic to the minor, a survey seminar course, and four core courses and one option course that provide the needed background in molecular and cell biology, computational and systems engineering, and mathematical modeling and simulation methods for biological systems.

To enter the minor, students must (1) be in good academic standing (2.0 grade-point average or better) and have completed Computer Science 31 or Program in Computing 10A with a grade of C or better, (2) submit an application essay supporting their interest in pursuing the minor and detailing any projects that they have already undertaken, and (3) file a petition in the administrative office, 4436 Boelter Hall, after appropriate counseling.

**Required Lower Division Courses (8 units):** Mathematics 33A, 33B.

**Required Upper Division Courses (20 units):** Computational and Systems Biology M184, M186, Mathematics 170A or Electrical Engineering 131A or Statistics 100A, Molecular, Cell, and Developmental Biology M140 or 144, Statistics 100B, and one elective course selected from Biomathematics 106, 108, Electrical Engineering 102, Mathematics 134, 136, 171, Molecular, Cell, and Developmental Biology 172, or Physiological Science 125.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.
Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Computational and Systems Biology

Upper Division Courses

M184. Introduction to Computational and Systems Biology. (2). (Same as Bioengineering M184 and Computer Science M184.) Lecture, two hours; outside study, four hours. Enforced requisites: one course from Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Life Sciences 2, 3, 4. Introduction to research opportunities in computational and systems biology to prepare students for active engagement in research. Presentation of potential projects by faculty members and student visits to individual laboratories and participation in ongoing projects. P/NP grading.

M186. Computational Systems Biology: Modeling and Simulation Of Biological Systems. (5). (Same as Bioengineering CM186 and Computer Science CM186.) Lecture, four hours; laboratory, three hours; outside study, eight hours. Corequisite: Electrical Engineering 102. Dynamic biosystems modeling and computer simulation methods for studying biological/biomedical processes and systems at multiple levels of organization. Control system, compartmental, predator-prey, pharmacokinetic (PK), pharmacodynamic (PD), and other structural modeling methods applied to life sciences problems at molecular, cellular (biochemical pathways/networks), organ, and organismal levels. Both theory- and data-driven modeling, with focus on translating biomodeling goals and data into mathematics models and implementing them for simulation and analysis. Basics of numerical simulation algorithms, with modeling software exercises in class and PC laboratory assignments. Letter grading.

M187. Research Communication in Computational and Systems Biology. (2 to 4). (Formerly numbered M186C.) (Same as Bioengineering CM187 and Computer Science CM187.) Lecture, four hours; outside study, eight hours. Requisite: course M186. Closely directed, interactive, and real research experience in active quantitative systems biology research laboratory. Direction on how to focus on topics of current interest in scientific community, appropriate to student interests and capabilities. Critiques of oral presentations and written progress reports explain how to proceed with search for research results. Major emphasis on effective research reporting, both oral and written. Letter grading.

196. Honors Research in Cybernetics. (4). Tutorial, to be arranged. Limited to juniors/seniors. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

Associate Professors
Jungwoo (John) Cho, Ph.D.
Eleazar Eskin, Ph.D.
Todd D. Millstein, Ph.D.
Glenn D. Reinman, Ph.D.
Yuval Tamar, Ph.D.

Assistant Professors
Tyson Condle, Ph.D.
Jason Ernst, Ph.D.
Alexander Sherstov, Ph.D.

Senior Lecturers S.O.E.
Paul R. Eggert, Ph.D.
Leon Levine, M.S., Emeritus
David A. Smallberg, M.S.

Adjunct Professors
Deborah L. Estrin, Ph.D.
David E. Heckerman, Ph.D.
Van Jacobsen, M.S.
Alan C. Kay, Ph.D.
Rupak Majumdar, Ph.D.
Peter S. Pao, Ph.D.
Peter L. Reiher, Ph.D.

Adjunct Associate Professors
Edward W. Kohler, Ph.D.
Giovanni Pao, Ph.D.

Adjunct Assistant Professors
Carey S. Nachenberg, Ph.D.
Ani Nahapetian, Ph.D.

Visiting Assistant Professors
Louis-Noel Pouchet, Ph.D.
Fabien Scalzo, Ph.D.

Scope and Objectives

Computer science is concerned with the design, modeling, analysis, and applications of computer-related systems. Its study at UCLA provides education at the undergraduate and graduate levels necessary to understand, design, implement, and use the software and hardware of digital computers and digital systems. The programs provide comprehensive and integrated studies of subjects in computer system architecture, computer networks, distributed computer systems, programming languages and software systems, information and data management, artificial intelligence, computer science theory, computational systems biology and bioinformatics, and computer vision and graphics.

The undergraduate and graduate studies and research projects in the Department of Computer Science are supported by significant computing resources. In addition to the departmental computing facility, there are over a dozen research laboratories specializing in areas such as distributed systems, multimedia computer communications, distributed sensor networks, VLSI systems, VLSI CAD, embedded and reconfigurable systems, computer graphics, bioinformatics, and artificial intelligence. Also, the Cognitive Systems Laboratory is engaged in studying computer systems that emulate or support human reasoning. The Bioinformatics Laboratory is devoted to multidisciplinary research involving the application of engineering and computer science methods to problems in biology and medicine.

The B.S. degree may be attained either through the Computer Science and Engineering major or through the Computer Science major described below.

In addition to the B.S. in Computer Science and Engineering and the B.S. in Computer Science, HSSSEAS offers M.S. and Ph.D. degrees in Computer Science, as well as minor fields for graduate students seeking engineering degrees. In cooperation with the John E. Anderson Graduate School of Management, the Computer Science Department offers a concurrent degree program that enables students to obtain the M.S. in Computer Science and the M.B.A. (Master of Business Administration).
Undergraduate Study

The computer science and engineering program is accredited by the Computing Accreditation Commission of the Engineering Accreditation Commission of ABET. See http://www.abet.org.

The computer science program is accredited by the Computing Accreditation Commission of ABET. See http://www.abet.org.

The Computer Science and Engineering and Computer Science majors are designated capstone majors. Computer Science and Engineering students complete a major product design course, while Computer Science students complete either a software engineering or a major product design course. Graduates are expected to apply the basic mathematical and scientific concepts that underlie modern computer science and engineering; design a software or digital hardware system, component, or process to meet desired needs within realistic constraints; function productively with others as part of a team; identify, formulate, and solve computer software- and hardware-related engineering problems; and demonstrate effective communication skills.

Computer Science and Engineering B.S.

Capstone Major

The computer science and engineering curriculum at UCLA provides the education and training necessary to design, implement, test, and utilize the hardware and software of digital computers and digital systems. The curriculum has components spanning both the Computer Science and Electrical Engineering Departments. Within the curriculum students study all aspects of computer systems from electronic design through logic design, MSI, LSI, and VLSI concepts and device utilization, machine language design, implementation and programming, operating system concepts, systems programming, networking fundamentals, higher-level language skills, and application of these to systems. Students are prepared for employment in a wide spectrum of high-technology industries.

Preparation for the Major

Required: Chemistry and Biochemistry 20A; Computer Science 1, 31, 32, 33, 35L, M51A; Electrical Engineering 10, 11L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 1A, 1B, 1C, 4AL, 4BL.

The Major

Required: Computer Science 111, 118, 131, M151B, M152A, 180, 181; one course from Civil and Environmental Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A; one capstone software engineering or design course from Computer Science 130 or 152B; 20 units of elective courses selected from Computer Science 111 through CM187 or Electrical Engineering 133A, at least one of which must be Computer Science CM121, CM122, 143, 161, or 174A; and 12 units of technical breadth courses selected from an approved list available in the Office of Academic and Student Affairs.

Credit is not allowed for both Computer Science 170A and Electrical Engineering 133A unless at least one of them is applied as part of the technical breadth area. Four units of either Computer Science 194 or 199 may be applied as an elective by petition.

For information on University and general education requirements, see the College and Schools section earlier in this catalog.

Bioinformatics Minor

The Bioinformatics minor introduces undergraduate students to the emerging interdisciplinary field of bioinformatics, an active area of research at UCLA combining elements of the computational sciences with the biological sciences. The minor organizes the many course offerings in different UCLA departments into a coherent course plan providing students with significant training in bioinformatics in addition to the training they obtain from their major. Students who complete the minor will be strong candidates for admission to Ph.D. programs in bioinformatics as well as have the relevant training to obtain jobs in the biotechnology industry.

Students complete a core curriculum and an elective course and are strongly encouraged to participate in undergraduate research as early as possible in one of the many groups offering research opportunities in bioinformatics.

To enter the minor, students must be (1) in good academic standing (2.0 grade point average or better), (2) have completed at least two of the lower division requirements with minimum grades of C, and (3) file a petition in the Office of Academic and Student Affairs of the Henry Samueli School of Engineering and Applied Science, 6426 Boelter Hall.

Required Lower Division Courses (14 units minimum): Computer Science 32 or Program in Computing 10C, Life Sciences 3, 23L, Mathematics 33A.

Required Upper Division Courses (18 units minimum): Computational and Systems Biology M184 (or Computer Science M184), Computer Science 180 (or Mathematics 182), two courses from Computer Science CM121 (or Chemistry and Biochemistry CM160A) or CM122 (or Chemistry and Biochemistry CM160B) or CM124 (or Human Genetics CM124), and one bioinformatics elective course selected from Computational and Systems Biology M186, Computer Science CM121, CM122, CM124, 170A, Ecology and Evolutionary Biology 135, Electrical Engineering 102, 141, Human Genetics C144, Molecular, Cell, and Developmental Biology 144, 172, Physiological Science 125, Statistics 100A, 100B. Eight units of either Bioinformatics 199 or Computer Science 194 or 199 may be applied as an elective by petition.

Students are strongly encouraged to take Computer Science M184 as early as possible to obtain an overview of computational biology.
A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.

If students complete some of the minor requirements as part of their major program, they can take additional courses from the bioinformatics elective course list.

All minor courses must be taken for a letter grade, and students must have a minimum grade of C (2.0) in each and an overall C average. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaaa liberary/pgmqrintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degrees
The Department of Computer Science offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Computer Science. A concurrent degree program (Computer Science M.S./Management M.B.A.) is also offered.

Bioinformatics
Upper Division Course
199. Directed Research in Bioinformatics. (2 to 4).
Tutorial, six to 12 hours. Limited to juniors/seniors. Supervised individual research under guidance of faculty mentor. Culminating paper required. May be repeated for credit. Individual contract required. Letter grading.

Computer Science
Lower Division Courses
1. Freshman Computer Science Seminar. (1).
Seminar, one hour; discussion, one hour. Introduction to department resources and principal topics and key ideas in computer science and computer engineering. Assignments given to bolster independent study and writing skills. Letter grading.

2. Great Ideas in Computer Science. (4).
Lecture, four hours; discussion, two hours; outside study, eight hours. Broad coverage for liberal arts and social sciences students of computer science theory, technology, and implications, including artificial and natural machine intelligence, computability limits, virtual reality, cellular automata, artificial life, programming languages survey, and philosophical and societal implications. P/NP or letter grading.

Lecture, four hours; discussion, two hours; outside study, six hours. Introduction to computer science via theory, applications, and programming. Basic data types, operators and control structures. Input/output. Procedural and data abstraction. Introduction to object-oriented software development. Functions, recursion, Strings, arrays, pointers. Abstract data types, object-oriented programming. Examples and exercises from computer science theory and applications. Letter grading.

32. Introduction to Computer Science II. (4).

33. Introduction to Computer Organization. (5).
Lecture, four hours; discussion, two hours; outside study, nine hours. Enforced requisite: course 32. Introductory course on computer architecture, assembly language, and interfacing with fundamental systems. Number systems, machine language, and assembly language. Procedure calls, stacks, interrupts, and traps. Assemblers, linkers, and loaders. Operating system concepts, process and program management, input/output (I/O) programming, memory management, file systems. Letter grading.

35L. Software Construction Laboratory. (2).
Laboratory, four hours; outside study, two hours. Enforced requisite: course 33. Computer-aided design of computer programs. Emphasis on software development and debugging skills. Letter grading.

51. Introduction to Computing. (2).
Lecture, one to four hours; discussion, zero to two hours. Enforced requisite: course 32 or Program in Computing 10C. Introduction to computer science via computer programming. Focus on algorithms and methodologies for solving computational problems. Letter grading.

(Same as Electrical Engineering M51A.) Lecture, four hours; discussion, two hours; outside study, six hours. Introduction to digital systems. Specification and implementation of combinational and sequential systems. Standard logic modules and programmable logic arrays. Specification and implementation of algorithms in systems: data and control sections. Number systems and arithmetic algorithms. Error correction codes for digital information. Letter grading.

97. Variable Topics in Computer Science. (1 to 4).
Lecture, one to four hours; discussion, zero to two hours. Designed for freshmen/sophomores. Variable topics in computer science not covered in regular computer science courses. May be repeated once for credit with topic or instructor change. Letter grading.

Upper Division Courses
111. Operating Systems Principles. (5).
Lecture, four hours; laboratory, two hours; outside study, nine hours. Enforced requisite: courses 32, 33, 35L. Introduction to operating systems design and evaluation. Computer software systems performance, robustness, and functionality. Kernel structure, bootstrapping, input/output (I/O) devices and interrupts. Processes and threads; address spaces, memory management, and virtual memory. Scheduling, synchronization. File structure, performance, robustness. Distributed systems: networking, remote procedure call (RPC), asynchronous RPC, distributed file systems, transactions, protection and security. Exercises involving both formal models and internals of real-world operating systems. Letter grading.

Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 111 and one course from Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Enforced requisite: courses 32, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Prior knowledge of biology not required. Designed for engineering students as well as students from biological sciences and medical school. Introduction to bioinformatics and methodologies, with emphasis on concepts and inventing new computational and statistical techniques to analyze biological data. Focus on sequence analysis and alignment algorithms. Concurrently scheduled with course CM221, P/NP or letter grading.

CM121. Introduction to Bioinformatics. (4).
(Same as Chemistry CM160A.) Lecture, four hours; discussion, two hours. Enforced requisite: course 32 or Program in Computing 10C with grade of C– or better, and one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Credit for course M171L. Introduction to fundamental concepts of systems biology, identification of genes involved in disease, introduction to fundamental principles to analyze biological data. Focus on sequence analysis and alignment algorithms. Enforced requisite: course 32 or Program in Computing 10C with grade of C– or better, and one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Designed for engineering students as well as students from biological sciences and medical school. Introduction to bioinformatics and methodologies, with emphasis on concepts and inventing new computational and statistical techniques to analyze biological data. Focus on sequence analysis and alignment algorithms. Concurrently scheduled with course CM221. P/NP or letter grading.

CM122. Algorithms in Bioinformatics and Systems Biology. (Same as Chemistry CM160B.) Lecture, four hours; discussion, two hours. Enforced requisite: course 32 or Program in Computing 10C with grade of C– or better, and one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Course CM121 is not requisite to CM122. Designed for engineering students as well as students from biological sciences and medical school. Introduction to bioinformatics and methodologies, with emphasis on concepts and inventing new computational and statistical techniques to analyze biological data. Focus on sequence analysis and alignment algorithms. Concurrently scheduled with course CM222. Letter grading.

(Same as Human Genetics CM160E.) Lecture, discussion, two hours; outside study, six hours. Enforced requisite: course 32 or Program in Computing 10C with grade of C– or better, and one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Designed for engineering students as well as students from biological sciences and medical school. Introduction to computational and algorithmic aspects of genetic variation and computational interdisciplinary research in genetics. Topics include introduction to genetics, identification of genes involved in disease, including human population history, technologies for obtaining genetic information, and genetic sequencing. Focus on formulating interdisciplinary problems as computational problems and then solving these problems using algorithmic techniques. Computational techniques include those from statistics and computer science. Concurrently scheduled with course CM222. Letter grading.

(Same as Electrical Engineering M117.) Lecture, two hours; discussion, two hours; laboratory, two hours; outside study, six hours. Enforced requisite: for credit with course M117L. Introduction to fundamental computer communication concepts underlying and supporting modern networking technologies, including communications and media access layers of network protocol stack. Systems include wireless LANs (IEEE802.11) and ad hoc wireless and personal area networks (WPAN). Bluetooth, home networking, experimental project based on mobile radio-equipped devices (smart phones, tablets, etc.) as sensor platforms for personal applications such as wireless health, positioning, and environment awareness, and experimental laboratory sessions included. Letter grading.

Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 111. Designed for juniors/seniors. Introduction to design and performance evaluation of computer networks, including such topics as what protocols are, layered network architecture, Internet protocol architecture, network applications, transport protocols, routing algorithms and protocols, internetworking, congestion control, and link layer protocols including Ethernet and wireless channels. Letter grading.

CM121. Introduction to Bioinformatics. (4).
(Same as Chemistry CM160A.) Lecture, four hours; discussion, two hours. Enforced requisite: course 32 or Program in Computing 10C with grade of C– or better, and one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Prior knowledge of biology not required. Designed for engineering students as well as students from biological sciences and medical school. Introduction to bioinformatics and methodologies, with emphasis on concepts and inventing new computational and statistical techniques to analyze biological data. Focus on sequence analysis and alignment algorithms. Concurrently scheduled with course CM221, P/NP or letter grading.

CM122. Algorithms in Bioinformatics and Systems Biology. (Same as Chemistry CM160B.) Lecture, four hours; discussion, two hours. Enforced requisite: course 32 or Program in Computing 10C with grade of C– or better, and one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Course CM121 is not requisite to CM122. Designed for engineering students as well as students from biological sciences and medical school. Introduction to bioinformatics and methodologies, with emphasis on concepts and inventing new computational and statistical techniques to analyze biological data. Focus on sequence analysis and alignment algorithms. Concurrently scheduled with course CM222. Letter grading.

(Same as Human Genetics CM160E.) Lecture, discussion, two hours; outside study, six hours. Enforced requisite: course 32 or Program in Computing 10C with grade of C– or better, and one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Designed for engineering students as well as students from biological sciences and medical school. Introduction to computational and algorithmic aspects of genetic variation and computational interdisciplinary research in genetics. Topics include introduction to genetics, identification of genes involved in disease, including human population history, technologies for obtaining genetic information, and genetic sequencing. Focus on formulating interdisciplinary problems as computational problems and then solving these problems using algorithmic techniques. Computational techniques include those from statistics and computer science. Concurrently scheduled with course CM222. Letter grading.
solving those problems using computational techniques from statistics and computer science. Concurrently scheduled with course CM224. Letter grading.

130. Software Engineering. (4). Lecture, four hours; laboratory, two hours; outside study, six hours. Enforced requisites: courses 111, 131. Design and use of programming languages, in-depth study of basic tools. Topics include design and use of programming languages, including functional, object-oriented, and logic programming. Letter grading.

131. Programming Languages. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: courses 33, 35L. Basic concepts in design and use of programming languages, including abstraction, modularity, control mechanisms, types, expressions, and scoping. Study of several different language paradigms, including functional, object-oriented, and logic programming. Letter grading.

133. Parallel and Distributed Computing. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: courses 111 (may be taken concurrently), 131. Design and use of shared memory and shared memory parallel architectures; asynchronous parallel languages: MPI, Maiss; primitives for parallel computation: specification of parallelism, interprocess communication and synchronization; design of parallel programs for scientific computation and distributed systems. Letter grading.

136. Introduction to Computer Security. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 111. Introduction to basic concepts of information security necessary for students to understand risks and mitigations associated with protection of systems and data. Topics include computer systems, architecture, security threats and risk analysis, access control and authentication/authorization, cryptography, network security, social, and technology constraints. Use of design tools. Development and implementation of secure applications and systems. Letter grading.

144. Web Applications. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 143. Important concepts and theory for building effective and safe Web applications and first-hand experience with basic tools. Topics include basic Web architecture and protocol, XML and XML query language, mapping between XML and relational models, information retrieval model and theory, security and user model, Web services and distributed transactions. Letter grading.

145. Introduction to Data Mining. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 180. Introductory survey of data mining (process of automatic discovery of patterns, changes, associations, and anomalies in massive databases), knowledge engineering, and wide spectrum of data mining application areas such as bioinformatics, e-commerce, environmental studies, financial markets, multimedia data processing, network monitoring, and social service analysis. Letter grading.

M151B. Computer Systems Architecture. (4). (Same as Electrical Engineering M116C.) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: courses 33, and M51A or Electrical Engineering M16. Recommended: courses 111, and M152A or Electrical Engineering M116L.

Computer system organization and design, implementation of CPU datapath and control, instruction set design, memory hierarchy (caches, main memory, virtual memory) organization and management, input/output subsystems (bus structures, interrupts, DMA), performance evaluation, pipelined processors. Letter grading.

152B. Digital Design Project Laboratory. (4). Laboratory, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course M151B or Electrical Engineering M16. Hands-on design, implementation, and debugging of digital logic circuits, use of computer-aided design tools for schematic capture and simulation, implementation of complex circuits using programmed array logic, design projects. Letter grading.

M171L. Data Communication Systems Laboratory. (2 to 4). (Same as Electrical Engineering M117L.) Laboratory, four to eight hours; outside study, two to four hours. Recommended preparation: course M152A. Laboratory exercises and projects with credit for course M117. Introduction to analog-signaling aspects of digital systems and data communications through experience in using contemporary test instruments to generate and display signals in relevant laboratory setups. Use of oscilloscopes, pulse and function generators, baseband spectrum analyzers, desktop computers, terminals, modems, PDAs, and workstations to simulate communications impairments, waveforms and their spectra, modem and terminal characteristics, and interfaces. Letter grading.

174A. Introduction to Computer Graphics. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 123. Basic principles behind modern two- and three-dimensional computer graphics systems, including complete set of steps that modern graphics pipelines use to create realistic images in real time. How to position and manipulate objects in scene using geometric and camera transformations. How to render objects using perspective and orthographic transformations. Basics of modeling primitives such as polygonal models and implicit and parametric surfaces. Basic ideas behind color spaces, illumination models, shading, and texture mapping. Letter grading.

174B. Introduction to Computer Graphics: Three-Dimensional Photography and Rendering. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 174A. State of art in three-dimensional photography and image-based rendering. How to use cameras and light to capture shape and appearance of objects and scenes. Process provides simple way to acquire three-dimensional models of unparalleled detail and realism. Applications of techniques from entertainment (reverse engineering and post-processing of movies, generation of realistic synthetic objects and characters) to medicine (modeling of biological structures from imaging data), mixed reality (augmentation of video), and security (visual surveillance). Fundamental analytical tools for modeling and inferring geometric (shape) and photometric (reflectance, illumination) properties of objects and scenes, and for rendering and manipulating them. Letter grading.

C174C. Computer Animation. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 174A. Designed for juniors/seniors. Introduction to computer animation, including basic principles of physics-based animation, forward and inverse kinematics, forward and inverse dynamics, motion capture animation techniques, physics-based animation of particles and systems, and motor control. Concurrently scheduled with course C274C. Letter grading.

180. Introduction to Algorithms and Complexity. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 32, and Mathematics 61. Introduction to algorithms, computational complexity, cryptography, computer security, and basic concepts from probability and statistics. Enforced requisite: course 180. Introduction to algorithms and complexity. Selection of typical algorithms; choice of data structures and representations; complexity measures: time, space, upper, lower bounds, asymptotic complexity; NP-completeness. Letter grading.

181. Introduction to Formal Languages and Automata Theory. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisites: course 180. Designed for junior/senior Computer Science majors. Introduction to design and analysis of algorithms. Design techniques: divide-and-conquer, greedy methods, dynamic programming; selection of prototypical algorithms; choice of data structures and representations; complexity measures: time, space, upper, lower bounds, asymptotic complexity; NP-completeness. Letter grading.

183. Introduction to Cryptography. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Preparation: knowledge of basic probability theory. Enforced requisites: course 180. Introduction to cryptography, computer security, and basic concepts and techniques. Topics include one-way functions, hard-core bits, pseudorandom generators, pseudorandom functions and pseudorandom permutations, semantic security, public-key and private-key encryption, key-agreement, homomorphic encryption, private information retrieval and voting protocols, message authentication, digital signatures, interactive proofs, zero-knowledge proofs, commitment protocols, and two-party secure computation with static security. Letter grading.

M184. Introduction to Computational and Systems Biology. (Same as Bioengineering M184 and Computational and Systems Biology M184.) Lecture, two hours; outside study, six hours. Enforced requisites: one course from 31, Civil Engineering M20, Mechanical and Aerospace Engineering M20, or Program in Computing 10A, 10B, and Mathematics 38B, 31B.
Survey course designed to introduce students to computational and systems modeling and computation in biology and medicine, providing motivation, theory, cultural background, and contributions in computational biosciences and aiming for more informed basis for focused studies by students with computational and systems biology interests. Presentations by individual UCLA researchers discussing their active computational and systems biology research. P/NP grading.

CM186. Computational Systems Biology: Modeling and Simulation of Biological Systems. (4). Formerly numbered CM186B. (Same as Bioengineering CM186 and Computational and Systems Biology M186.) Lecture, four hours; laboratory, three hours; outside study, eight hours. Requisites: course CM186. Closely directed, interactive, and real research experience in active quantitative systems biology research laboratory. Direction on how to focus on topics of current interest in scientific community, appropriate study methods and capabilities. Critiques of oral presentations and written progress reports explain how to proceed with search for research results. Major emphasis on effective research reporting, both oral and written. Concurrently scheduled with course CM287. Letter grading.

CM197. Research Communication in Computational and Information Science. (2 to 4). Formerly numbered CM197. (Same as Bioengineering CM187 and Computational and Systems Biology M187.) Lecture, four hours; outside study, eight hours. Requisites: course CM186. Designed for graduate computer science and electrical engineering students as well as students from biological sciences and other disciplines. Topics include: research conventions and writing; preparing for and attending conferences; giving presentations; writing technical reports; oral and written presentations and their delivery. Concurrently scheduled with course CM287. Letter grading.

188. Special Courses in Computer Science. (4). Lecture, four hours; discussion, two hours; outside study, six hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field of or research of faculty members or students. May be repeated for credit with topic or instructor change. Letter grading.

194. Research Group Seminars: Computer Science. (4). Seminar, four hours; outside study, eight hours. Designed for undergraduate students who are part of research group. Discussion of research methods and current literature in field of or research of faculty members or students. May be repeated for credit. Letter grading.

199. Directed Research in Computer Science. (2 to 8). Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit with school approval. Individual-bid contract required; enrollment petitions available in Office of Academic and Student Affairs. Letter grading.

Graduate Courses

201. Computer Science Seminar. (2). Seminar, four hours; outside study, two hours; tutorial. Designed for graduate computer science students. Seminars on current research topics in computer science. May be repeated for credit. S/U grading.

202. Advanced Computer Science Seminar. (4). Seminar, four hours; outside study, eight hours. Preparation: completion of major field examination in computer science. Current computer science research literature and research trends in theory of analysis and synthesis of, and applications of information processing systems. Each member completes one tutorial and one or more original pieces of work in one specialized area. May be repeated for credit. Letter grading.

211. Networks Protocols and Systems Software Design for Wireless and Mobile Internet. (4). Lecture, four hours; outside study, eight hours. Requisites: course 118. Designed for graduate students. In-depth study of network protocols and systems software design in area of wireless and mobile Internet. Topics include (1) networking fundamentals: design of routing protocols, TCP/IP: end-to-end arguments, and protocol design of TCP/IP: transport, network, and application layer protocols; (2) performance analysis: network design and optimization; network protocols; routing and flow control; battery modeling and control; and (3) protocol validation: network simulation and measurement. Corequisite: Electrical Engineering M212B. Letter grading.

212B. Queueing Applications: Scheduling Algorithms and Queueing Networks. (4). Lecture, four hours; outside study, eight hours. Requisites: course 212A. Priority queues and applications to time-sharing scheduling algorithms: F8, Round Robin, Conservation Law, Bounds. Queueing networks: definitions; flow balance; product form solutions—local balance, M/M/m; computational algorithms for performance measures; asymptotic behavior and bounds; approximate techniques—diffusion—iterative techniques; applications. Letter grading.

213A. Embedded Systems. (4). Same as Electrical Engineering M202A. Lecture, four hours; outside study, eight hours. Requisites: course 111. Designed for graduate computer science and electrical engineering students. Methodologies and technologies for design of embedded systems. Topics include hardware and software platforms for embedded systems, techniques for modeling and specification of system behavior; software organization, real-time operating system selection, device driver communication, and packet scheduling, low-power battery and energy-aware system design, timing synchronization, fault-tolerance, software debugging, and hardware/software tradeoffs. Theoretical foundations as well as practical design methods. Letter grading.

213B. Energy-Aware Computing and Cyber-Physical Systems. (4). Same as Electrical Engineering M202B. Lecture, four hours; outside study, eight hours. Requisites: course M51A or Electrical Engineering M16. Recommended: courses 111, and M51B or Electrical Engineering M116. System-level management and cross-layer methods for power and energy consumption in computer and communication at various scales ranging across embedded, mobile, personal, distributed control and access in computer networks, satellite packet switching; ground radio packet switching; local networks; commercial network services and architectures. Optional topics: computer and system power control techniques; modems; SDLG, HDLC, X.25, etc.; protocol verification; network simulation and measurement; integrated networks; communication processors. Letter grading.

214. Distributed Multiaccess Control in Networks. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 212A, 215. Topics from field of distributed control and access in computer networks, including terrestrial distributed computer networks; satellite packet switching; ground radio packet switching; local network architecture and control. Letter grading.

219. Current Topics in Computer System Modeling Analysis. (4). Lecture, eight hours; outside study, four hours. Review of current literature in area of computer system modeling analysis in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor. Letter or S/U grading.

CM211. Introduction to Bioinformatics. (4). (Same as Bioinformatics M260A, Chemistry CM260A, and Human Genetics M260A.) Lecture, four hours; discussion, two hours. Enforced requisites: course 32 or Program in Computing 100 with grade of C or better, and one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 170A. Prior knowledge of biology not required. Designed for engineering students as well as students from biological sciences and medical school. Introduction to bioinformatics and methodologies, with emphasis on concepts and inventions in new computational and statistical techniques to analyze biological data. Focus on sequence analysis and alignment algorithms. Concurrently scheduled with course CM121. S/U or letter grading.

CM222. Algorithms in Bioinformatics and Systems Biology. (4). (Same as Biology and Chemistry CM260B.) Lecture, four hours; discussion, two hours. Enforced requisites: course 32 or Program
in Computing 10C with grade of C– or better, and one course from Biostatistics 100A, 110A, Civil Engineering 110, Electrical Engineering 131A, Mathematics 170A, or Statistics 100A. Course CM221 is not requisite to CM222. Designed for engineering students as well as students from biological sciences and medical school. Development and application of computational approaches to biological questions, with focus on formulating interdisciplinary problems as computational problems and then solving these problems using algorithmic techniques. Computational techniques include those from statistics and computer science. Concurrently scheduled with course CM122. Letter grading.

CM224. Computational Genetics. (4). Same as Bioinformatics M224 and Human Genetics CM224.) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 32 or Program in Computing 10C with grade of C– or better, and one models and semantics, propositional logic, first-order logic, logic programming. Functional models: expressions, equations, evaluation; combinator; lambda calculus; functional programming. Program models: programming languages and systems, including imperative and object-oriented programming languages. Lecture, four hours; outside study, eight hours. Requisites: courses 131, 181, Paradigms, models, frameworks. Letter grading.

231. Types and Programming Languages. (4). Lecture, four hours; outside study, eight hours. Requisite: course 131. Introduction to static type systems and their usage in program language design and software reliability. Optional topics, computer science. Topics include basic principles and goals of computer security, common security tools, use of cryptographic protocols for security, security tools (firewalls, virtual private networks, honeypots), virus and worm protection, security assurance and testing, design of secure systems, application of security principles to realistic problems, and new and emerging threats and security tools. Letter grading.

239. Current Topics in Computer Science: Programming Languages and Systems. (2 to 12). Lecture, four hours; outside study, eight hours. Review of current literature in area of computer science programming languages and systems in which instructor has developed special proficiency. Topics may be selected from instructor's research interests. May be repeated for credit with topic change. Letter grading.

240A. Databases and Knowledge Bases. (4). Lecture, four hours; outside study, eight hours. Requisite: course 131. Knowledge of database technology, knowledge-based systems, and advanced programming environments. Rule-based knowledge representation, spatio-temporal reasoning, and logic-based declarative querying/programming are salient features of this technology. Other topics include object-relational systems and data mining techniques. Letter grading.

241B. Pictorial and Multimedia Database Management. (4). Lecture, three and one-half hours; discussion, 30 minutes; laboratory, one hour; outside study, seven hours. Requisite: course 143. Multimedia data: alphanumeric, long text, images/pictures, video, and voice. Multimedia information systems requirements. Data models, Searching, and databases. Databases and access across Internet by alphanumeric, image, video, and audio content. Querying, visual languages, and multimedia applications. Introduction to multimedia streaming. Other topics at discretion of instructor. Letter grading.

244A. Distributed Database Systems. (4). Lecture, four hours; outside study, eight hours. Requisites: courses 215 and/or 241A. File allocation, intelligent directory design, transaction management, deadlock, strong and weak concurrency control, commit protocols, semantic queries, and query languages. Object database systems, fault recovery techniques, network partitioning, examples, trade-offs, and design experiences. Letter grading.

264 / Computer Science

dynamic pipelining, superscalar and VLIW processors, branch prediction, speculative execution, software support for instruction-level parallelism, simulation-based performance analysis and evaluation, state-of-art design examples, introduction to parallel architectures. Letter grading.

251B. Parallel Computer Architectures. (4). Lecture, four hours; outside study, eight hours. Prerequisite: course M151B. Recommended: course 251A. SIMD and MIMD systems, symmetric multiprocessors, distributed-shared-memory systems, messages-passing systems, systems, interconnection networks, host-network interfaces, switching element design, communication primitives, cache coherency, memory consistency models, synchronization primitives, statistical models. Letter grading.

254A. Computer Memories and Memory Systems. (4). Lecture, four hours; outside study, eight hours. Prerequisite: course 251A. Generic types of memory systems; control, access modes, hierarchies, and localization algorithms; system organization, and device considerations of ferroelectric memories, thin film memories, and semiconductor memories. Letter grading.

255A. Discrete and Random Processes. (4). Lecture, four hours; outside study, eight hours. Prerequisites: courses 215 and/or 251A. Task partitioning and allocation, interprocess communications, task response time modeling, process scheduling, message passing protocols, replicated file systems, interface, cache memory, actor model, fine grain multiprocessors, distributed operating system kernel, error recovery strategy, performance modeling, and measurement, scalability and maintainability, prototypes, and commercial distributed systems. Letter grading.

256A. Advanced Scalable Architectures. (4). Lecture, four hours; outside study, eight hours. Prerequisite: course M151B. Recommended: course 251A, State-of-art scalable multiprocessors. Interdependency among implementation technology, chip microarchitecture, and system architecture. High-performance building blocks, such as chip multiprocessors (CMPs), On-chip and off-chip communication, Mechanisms for exploiting parallelism at multiple levels. Current research areas. Examples of chips and systems. Letter grading.

258H. Analysis and Design of High-Speed VLSI Interconnects. (4). Lecture, four hours; outside study, eight hours. Prerequisites: courses M258A, 258F. Detailed study of various problems in analysis and design of high-speed VLSI interconnects at both integrated circuit (IC) and packing levels, including interconnect capacitance and resistance, lossless and lossy transmission lines, cross-talk and power distribution, clock distribution, signal integrity driven design, interconnect topology and geometry optimization, and clocking for high-speed systems. Letter grading.

259. Current Topics in Computer Science: System Design/Architecture. (2 to 12). Lecture, four hours; outside study, eight hours. Review of current literature in area of computer science system design in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. Letter grading.

260. Machine Learning Algorithms. (4). Lecture, four hours. Enforced prerequisite: course 180. Problems of identifying patterns in data. Machine learning allows computers to learn potentially complex patterns from data and to make decisions based on these patterns. Introduction to fundamentals of this discipline to provide both conceptual grounding and practical experience with several learning algorithms. Techniques and examples used in areas such as health-care, financial systems, commerce, and social networking. Letter grading.

261. Language and Thought. (4). Lecture, four hours; outside study, eight hours. Prerequisites: course 130 or 131 or 161. Introduction to natural language processing (NLP), with emphasis on semantics. Presentation of problems models for various tasks, including question answering, paraphrasing, machine translation, word-sense disambiguation, narrative and editorial comprehension. Examination of both symbolic and statistical approaches to language processing and acquisition. Letter grading.

262A. Reasoning with Partial Beliefs. (4). Lecture, four hours; outside study, eight hours. Prerequisite: course 112 or Electrical Engineering 131A. Review of several formalisms for representing and managing uncertainty in reasoning systems; presentation of comprehensive description of Bayesian inference using belief networks representation. Letter grading.

262B. Knowledge in Causal Modeling, Inference, and Reasoning. (4). (Same as Statistics 241.) Lecture, four hours; outside study, eight hours. Prerequisite: one graduate probability or statistics course such as course 262A, Statistics 201B or 202B, Review of Bayesian networks, causal Bayesian networks, and structural equations. Learning causal structures from data. Identifying causal effects. Covariate selection and instrumental variables in linear and nonparametric models. Simpson paradox and confounding control. Logic and algorithmization of counterfactuals. Probabilities of counterfactuals. Direct and indirect effects. Testing for causation. Identifying causes of events. Letter grading.

262Z. Current Topics in Cognitive Systems. (4). Lecture, four hours; outside study, eight hours. Prerequisite: course 262A. Additional prerequisites for each offering announced in advance by department. Theory and implementation of systems that emulate or support human reasoning. Current literature and individual studies in artificial intelligence, knowledge-based systems, decision support systems, computational psychology, and heuristic programming theory. May be repeated for credit with topic change. Letter grading.

263. Language and Thought. (4). Lecture, four hours; outside study, eight hours. Prerequisite: course 130 or 131 or 161. Introduction to natural language processing (NLP), with emphasis on semantics. Presentation of problems models for various tasks, including question answering, paraphrasing, machine translation, word-sense disambiguation, narrative and editorial comprehension. Examination of both symbolic and statistical approaches to language processing and acquisition. Letter grading.

263B. Connectionist Language Processing. (4). Lecture, four hours; outside study, eight hours. Prerequisite: course 161 or 263A. Examination of connectionist/ANN models of natural language processing, issues include localist versus distributed representations, variable binding, instantiation and inference via spreading activation, acquisition of language and world knowledge (for instance, via back propagation in PDP networks and competitive learning in self-organizing feature maps), and grounding of symbols in sensory/motor experience. Letter grading.

263C. Animats-Based Modeling. (4). Lecture, four hours; outside study, eight hours. Prerequisite: course 130 or 131 or 161. Animats are mobile/sensing animals or software agents embedded in simulated dynamic environments. Emphasis on modeling: goal-oriented behavior via neurocontrollers, adaptation via reinforcement learning, evolutionary programming. Animat-based tasks include foraging, maze finding, predation, navigation, predator avoidance, cooperation, nest construction, communication, and parenting. Letter grading.

264A. Automated Reasoning: Theory and Application. (4). Lecture, four hours; outside study, eight hours. Prerequisite: course 265. Introduction to theory and practice of automated reasoning using propositional and first-order logic. Topics include syntax and semantics of logic; algorithms for logical reasoning, including satisfiability and entailment; syntactic and semantic restrictions on knowledge bases; effect of these restrictions on ex-
presiveness, compactness, and computational tractability; applications of automated reasoning to diagnosis, planning, design, formal verification, and reliability analysis. Letter grading.

M266B. Statistical Computing and Inference in Vision and Image Science. (4.) (Same as Statistics M232B.) Lecture, three hours. Preparation: basic statistics, linear algebra (matrix analysis), computer vision. Introduction to broad range of algorithms in statistical learning that could be used in vision, pattern recognition, speech, bioinformatics, data mining. Topics include Markov chain Monte Carlo computing, sequential Monte Carlo methods, belief propagation, partial differential equations. S/U or letter grading.

267A. Neural Models. (4.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Review of major neurophysiological milestones in understanding brain architecture and processes. Focus on brain theories that are important for modern computer science and, in particular, on models of sensory perception, sensor-motor coordination, and cerebellar and cerebral state function. Students are required to prepare papers analyzing research in one area of interest. Letter grading.

267B. Artificial Neural Systems and Connectionist Computing. (4.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Analysis of major connectionist computing paradigms and underlying models of biological and physical processes. Examination of recent implementations of artificial neural networks along with their applications to associative knowledge processing, general multi-sensor pattern recognition including speed and vision, computer vision, and control. Students are required to prepare papers analyzing research in one area of interest. Letter grading.

268S. Seminar: Computational Neuroscience. (2.) Seminar, two hours; outside study, four hours. Designed for students undertaking thesis research. Discussion of advanced topics and current research in computational neuroscience. Neural networks and connectionism as paradigm for parallel and concurrent computation in application to problems of perception, vision, multisensory integration, and robotics. Letter grading.

269. Seminar: Current Topics in Artificial Intelligence. (4.) Seminar, to be arranged. Review of current literature and research pracitcin in area of artificial intelligence in which instructor has developed special interest. S/U grading. No credit for research interests. Students report on selected topics. May be repeated for credit with topic change. Letter grading.

270A. Computer Methodology: Advanced Numerical Methods. (4.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 103 or Mathematics 115B, or permission of instructor. Computer methodology and the use of numerical computing. Designed for graduate computer science and engineering students. Principles of computer implementation of selected numerical problems in algebraic and differential systems; transforms and spectra, data acquisition and reduction; emphasis on concepts pertinent to modeling and simulation and application of successful developments in numerical software. Computer exercises. Letter grading.

271C. Seminar: Advanced Simulation Methods. (2.) Seminar, four hours; outside study, six hours. Requisite: course 271A. Discussion of advanced topics in simulation of systems characterized by ordinary and partial differential equations. Topics include (among others) simulation languages, dataflow machines, array processors, and advanced mathematical modeling techniques. Topics vary each term. May be repeated for credit.

272. Advanced Discrete Event Simulation and Modeling Techniques. (4.) Lecture, four hours; outside study, eight hours. In-depth study in discrete event simulation and modeling techniques, including building valid and credible simulation models, output analysis of systems, comparisons of alternative system configurations. Variance reduction techniques, simulation models of computer systems and manufacturing systems. Letter grading.

274C. Computer Animation. (4.) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 174A. Introduction to computer animation, including basic principles of character modeling, forward and inverse kinematics, forward and inverse dynamics, motion capture animation techniques, physics-based animation of particles and systems, and motor control. Concurrently scheduled with course C274C. Letter grading.

275. Artificial Life for Computer Graphics and Vision. (4.) Lecture, four hours; outside study, eight hours. Enforced requisite: course 174A. Recommended: course 161. Investigation of important role that concepts from artificial life, emerging discipline that spans computational and biological sciences, can play in construction of advanced computer graphics and vision models for virtual reality, animation, interactive games, active vision, visual sensor networks, robotics, interactive systems, etc. Focus on comprehensive models that can realistically emulate variety of living things (plants and animals) from lower animals to humans. Exposure to effective computational modeling of phenomena of life and their incorporation into sophisticated, self-animating graphical entities. Specific topics include modeling plants using L-systems, biomechanical simulation and control, behavioral animation, reinforcement and neural-network learning of locomotion, cognitive modeling, artificial animals and humans, human facial animation, and artificial life. Letter grading.

M276A. Pattern Recognition and Machine Learning. (4.) (Same as Statistics M231.) Lecture, three hours. Designed for graduate students. Fundamental concepts, theories, and algorithms for pattern recognition and machine learning that are used in computer vision, image processing, speech recognition, data mining, statistics, and computational biology. Topics include Bayesian decision theory, parametric and nonparametric learning, clustering, complexity (VC-dimension, MDL, AIC), PCA/ICA/TCA, MDS, SVM, boosting. S/U or letter grading.

276B. Structured Computer Vision. (4.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Methods for computer processing of image data. Systems, concepts, and algorithms for image analysis, radiologic and robotic applications. Letter grading.

276C. Speech and Language Communication in Artificial Intelligence. (4.) Lecture, four hours; outside study, eight hours. Requisite: course M276A or 276B. Topics in human-computer communication: interface with speech pictures, sound and symbol generation by humans and machines, semantics of data, systems for speech recognition and understanding. Use of speech and text for computer input and output in machine learning.

M278. Probabilistic Models of Cognition. (4.) (Same as Statistics M239.) Seminar, three hours; discussion, one hour. Requisites: courses 180, Mathematics 134A, Statistics 100B. Modeling aspects of human cognition, designing artificial intelligence systems. Introduction to conceptual foundations and basic mathematical and computational techniques. Topics illustrated on different aspects of cognition. S/U or letter grading.

279. Current Topics in Computer Science: Methodology. (2 to 12) Lecture, four hours; outside study, eight hours. Review of current literature in area of computer science methodology in which instructor has developed special proficiency as consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. Letter grading.

280A-280ZZ. Algorithms. (4. each) Lecture, four hours; outside study, eight hours. Requisite: course 180. Additional requisites for each offering announced in advance by department. Selections from design, analysis, and optimization of algorithms; computational complexity and general theory of algorithms; algorithms for particular applications, etc. Subsets of some current sections: Principles of Design and Analysis (280A); Distributed Algorithms (280D); Graphs and Networks (280G). May be repeated for credit with consent of instructor and topic change. Letter grading.

280AP. Approximation Algorithms. (4.) Lecture, four hours; outside study, eight hours. Requisite: course 180. Background in discrete mathematics helpful. Theoretically sound techniques for dealing with NP-Hard problems. Inability to solve these problems efficiently means algorithmic techniques are based on approximation—finding solution that is near to best possible in efficient running time. Coverage of approximation techniques for different problems, with algorithm design techniques that include primal-dual method, linear program rounding, greedy algorithms, and local search. Letter grading.

281A. Computability and Complexity. (4.) Lecture, four hours; outside study, eight hours. Requisite: course 181 or compatible background. Concepts fundamental to study of discrete information systems and theory of computing, with emphasis on regular sets of strings, Turing-recognizable (recursively enumerable) sets, closure properties, machine characterizations, nondeterminism, decidability, unsolvable problems, “easy” and “hard” problems, PTIME/NP-TIME. Letter grading.
Scope and Objectives

Students study for an M.A. degree in Conservation of Archaeological and Ethnographic Materials, with emphasis on the multiple values and meanings that archaeological and ethnographic artifacts may hold for society, and how they impact decisions on the conservation and use of those materials. In the conservation philosophy that underpins the program, there is a strong interdisciplinary component, essential to effective working practices in the future. The three-year graduate program is a collaborative venture with the Getty Trust and is based in specifically designed facilities at the Getty Villa site in Malibu.

The aim of the program is to provide students with a solid educational base and practical training in the conservation of both archaeological and ethnographic materials, as well as an appreciation of the often complex issues related to significance, access, and use of these materials that can be very different from the criteria for conservation of fine art or historical materials. The special focus of the program and its interdisciplinary curriculum serves the archaeological, scientific, native, and cultural minority communities alike and offers a nexus at the boundaries of conservation, archaeology, ethnography, the natural sciences, and engineering.

The partnership between UCLA and the Getty in creating the program ensures that both a major research university and an institution with a major mandate for conservation of the artistic heritage of the world are working to create a rich and vibrant conservation training opportunity. The program helps students develop working relationships with a wide array of colleagues in the Getty Conservation Institute, the J. Paul Getty Museum, other local museums and cultural organizations, and different departments and programs at UCLA, including but not limited to the Departments of Anthropology, Art History, Chemistry and Biochemistry, Earth, Planetary, and Space Sciences, and Materials Science and Engineering, and the Interdepartmental Program in Archaeology.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

Graduate Degree

The Conservation of Archaeological and Ethnographic Materials Program offers a Master of Arts (M.A.) degree in Conservation of Archaeological and Ethnographic Materials.
268 / Conservation of Archaeological and Ethnographic Materials

M215. Cultural Materials Science I: Analytical Imaging and Documentation in Conservation of Materials. (4) (Same as Art History M204A.) Lecture, two hours; laboratory, one hour. Basic and advanced techniques in digital, computer-aided recording tools and scientific imaging to identify and determine condition (defects) and technological features of materials. Preparation and response to documentation, analytical (forensic) photography, and advanced imaging techniques. Letter grading.

M216. Science of Conservation Materials and Methods I. (4) (Same as Science Museum Science M216.) Seminar, one hour; laboratory, three hours. Required requisite: Materials Science 104. Introduction to physical, chemical, and mechanical properties of conservation materials (employed for preservation of archaeological and ethnographic materials), including what should be preserved and why, as well as lectures on technology of metallic works of art, relationship between composition (chemistry), structure (crystals, molecular arrangement, and microstructure), and properties of metallic artifacts and composite objects containing metals (copper and copper alloys, and silver). Corrosion of ancient metals and their deterioration processes, corrosion problems in stability, issues with composite objects, their deterioration and stabilization, cleaning, joining, and gap-filling. Letter grading.

224. Issues in Preservation and Management of Selection and Properties in Baskets They Are Treating. (4) Seminar, one hour; laboratory, three hours. Recipients of in situ cultural heritage and movable archaeological materials in emergency situations (rescue excavations, disasters, conflicts), with emphasis on readi- ness, first response and recovery. Research focuses on preparedness and preventive measures, including reburials, shelters, rescue excavations, and documentation as well as developing inventories and awareness campaigns. First aid responses cover development of on-site emergency risk assessments to evaluate damage and putting triage into practice, salvage rescue operations, emergency tempo- rary in situ stabilization and protection (using locally available materials), and training. Recovery is based on documentation, lifting methods, handling, trans- portation, and storage. Emphasis on finding practical solutions to prevent and mitigate damage and to recover and safeguard archaeological artifacts. Concurrently scheduled with course C120. Letter grading.

221. Principles, Practice, and Ethics in Conservation. (4) Lecture, three hours; activity, one hour. Introduction to preservation of cultural heritage materials, including what should be preserved and why, as well as who should be involved in decision-making pro- cess. Use of appropriate methods and treatment options for preservation of cultural heritage materials both in museum and outdoor environment contexts. Materials and techniques used to make cultural heritage materials, in relation to preservation efforts needed to prevent decay and loss. Introduction to ex- ample conservation issues related to sites, buildings, monuments, and collections. Ethical and con- textual aspects with reference to changing values in conservation of cultural materials, illustrating how cultural materials may have been treated differently ac- cording to those values. Letter grading.

222. Conservation and Ethnography. (4) Laboratory, four hours. Designed for graduate conservation stu- dents. Introduction to conservation of cultural materials in living museums and collections. Students learn different models for tribal museums and cultural centers, and importance of material se- lection and properties in treatments they are treating. Letter grading.

224. Issues in Preservation and Management of Archaeological and Cultural Sites. (4) Seminar, three hours. Designed to offer practitioners of preservation and management planning for heritage sites that reflect real case-study scenarios. Adaptive management planning following iterative processes for sustainable heritage preservation addressing threats and challenges such as climate change and global warming, conflicts, and neglect. Consideration of significance and value of heritage sites and role of stakeholders. Investigation of methods of evaluation of physical condition and development of risk assessments to address physical risks of decay. Site response and recovery. Readiness for site response and recovery. Development of basic theoretical knowledge on imaging and photonics technology and practical skills on conservation of cultural heritage. Letter grading.

232. Conservation Laboratory: Organic Materials I. (4) Laboratory, four hours. Required requisite: course 262. Designed for conservation students. How to recognize characteristic deterioration problems found in organic materials from archaeological and ethnographic contexts and introduction to typical treatments used historically and currently for these materials. Materials focus on wood, bark and barkcloth, paper, and plastics and rubber. Letter grading.

239. Conservation Laboratory: Metals II. (4) Laboratory, four hours; outside study, eight hours. En- forced requisites: courses 234, 262. Recommended: courses M210, M215. Conservation problems of metallic artifacts made of iron, steel, cast iron, gold, zinc, and aluminum that have some impor- tance in ethnographic practices. Practical work on me- tallic artifacts. Letter grading.

240. Environmental Protection of Collections for Museums, Libraries, and Archives. (4) (Same as Information Studies M238.) Lecture, two hours; laboratory, two hours. Required: Information Studies 432. Required of graduate conservation students. Review of environmental and biological agents of deterioration, including light, temperature, relative humidity, pollution, insects, and fungi. Emphasis on monitoring to identify agents and understanding of materials sen- sitivities, along with protective measures for collec- tions. Letter grading.

242. Managing Collections for Museums, Librar- ies, and Archives. (4) (Formerly numbered 242.) Lecture, two hours; activity, two hours. Designed for graduate conservation students. A studio course in which conservators work together with curators, collection managers, mount makers, designers, and registrars to permit collections to be both accessed and preserved. Con- current, scheduled with Conservation Techniques M124. Letter grading.

M246. Ancient and Historic Metals: Technology, Microstructure, and Corrosion. (4) (Same as Mat- erials Science CM233.) Lecture, two hours; laboratory, 90 minutes; current course M215. Required: Materials science course. Processing of extraction, alloying, surface patination, metallic coatings, corro- sion, and microstructure of ancient and historic metals. Conservation laboratory and examination of metallic samples under microscope, as well as lectures on technology of metallic works of art. Practical instruction in metallographic micro- copy, Exploration of phase and stability diagrams of common alloying systems and environments and an- alytical techniques appropriate for examination and characterization of metallic artifacts. Letter grading.

M250. Conservation Laboratory: Rock Art, Wall Paintings, and Mosaics. (4) (Same as Art History M203F and Materials Science M215.) Laboratory, four hours. Required requisites: courses M210 (or Mate- rials Science M216 or C112), 210L, 264. Recommend: course M215. Conservation laboratory on conservation of rock art, wall paintings (archaeo- logical and modern composites on cements), mo- sas, and decorated architectural surfaces. Experi- ment with techniques and art of these disciplines (using materials science and reverse engineering processes) for characterization of technology, constituent mate- rials, and alteration products; development of conser- vation treatment proposals, testing of conservation products, and methods and conservation treatment. Letter grading.

262. Structure, Properties, and Deterioration of Materials: Organics. (4) Lecture, three hours. General introduction to different types of organic materials used to produce cultural heritage: wood, bark, paper, bast fibers, grasses, skin and leather, hair and wool, quills and feathers, bone and ivory, plastics and com- posites. Relationship between composition (chemical, process, and manufacturing) and properties of natural and man- factured materials using basic concepts from bi- ology and chemistry. Structural stability and deterioration phenomena of these materials as found in cultural collections. Letter grading.

No-Hee Park, D.M.D., Ph.D., Dean

Scope and Objectives
The UCLA School of Dentistry offers the following courses for general campus students. Dentistry 199 and 199H are individual special studies courses for UCLA undergraduates with definitive research interests and abilities applicable to dentistry. The subject areas include oral biology, clinical research, and dental health policy. Interested students should contact the associate dean of research at (310) 825-6401 to obtain the names and areas of interest of participating School of Dentistry faculty members.

Dentistry
Upper Division Courses
199. Individual Special Studies. (2 to 8). Tutorial, to be arranged. Studies in dentistry and related subject areas appropriate for training of particular students, with required reading assignments or laboratory work leading to final oral or written examination. May be repeated for maximum of 16 units. P/NP or letter grading.

199H. Individual Special Studies (Honors). (2 to 8). Tutorial, to be arranged. Studies in dentistry and related subject areas appropriate for training of particular students, with required paper submitted at end of course in addition to final examination (paper to be of publication quality as judged by course mentor). May be taken for maximum of 8 units. P/NP or letter grading.

Graduate Courses

441C. Introduction to Healthcare. (2). Lecture, two hours. Description and analysis of American dental care system from historical, ethical, and legal perspectives. Assessment of how dentistry fits within general provision of healthcare services in America, with comparisons to dental care provisions in other countries. S/U grading.

Victoria Vesna, M.F.A., Ph.D.

Professors Emeriti
James W. Bassler, M.A.
William C. Brown, M.A.
Mitsuru Kataoka, M.A.
J. Bernard Kester, M.A.
Lionel J. March, Sc.D.
Vasa V. Minich

Associate Professors
Ramesh Srinivasan, Ph.D.
Eddo I. Stern, M.F.A.

Scope and Objectives
The Department of Design | Media Arts offers the Bachelor of Arts and Master of Fine Arts degrees. The B.A. degree focuses on visual communication design, with emphasis on digital media. The M.F.A. degree focuses on media arts. These uniquely challenging programs invite students to balance aesthetic sensibility with logical reasoning, formal theories with practical application, and contemporary thought with historical perspective.

The undergraduate program begins with the study of basic design elements and processes: form, color, drawing, letterforms and typography, motion, and interaction. Historical perspectives and social issues are also introduced. At the upper division level, studio courses explore current uses of interactive media and new directions in visual communication design, including the study of time and motion, as well as virtual form and space in computer-generated environments. Through a balance of courses in theory, criticism, and practice, students develop an understanding of design principles. Most courses are taught as studios of no more than 20 students, which encourages individual growth and fosters a sense of community within the department.

The two-year Master of Fine Arts (M.F.A.) program fosters mature, professional-quality work utilizing the most current technologies in the field of media arts. The program focuses on developing an individual thesis project that

DANCE
See World Arts and Cultures/Dance
incorporates in-depth research and theoretical exploration of a topic, culminating in a final exhibition of work.

Facilities and equipment in the department enable students to create work in two, three, and four dimensions. They expand opportunities for students to develop interactive multimedia applications in a networked environment and advanced computer graphics. The department's equipment combines high-end PC and Macintosh computers with facilities for sound and video editing.

The Department of Design | Media Arts reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

### Undergraduate Study

The Design | Media Arts major is a designated capstone major. Students are required to complete an advanced project of their own that entails full engagement with the design process. Through their capstone work, students demonstrate their capacities for research, ideation/concept development, creative and design direction, communication strategy, design, production/fabrication, and critical analysis. Capstone courses focus on career choice, and final projects are showcased at the spring Senior Show.

#### Design | Media Arts B.A.

#### Capstone Major

**Preparation for the Major Required:** Design | Media Arts 8, 10, 21, 22, 23, 24, 25, 28.

**The Major Required:** Eleven upper division courses, including Design | Media Arts 101, 104, 153, 154, 157, 161, 163, two courses selected from 160, 171, 172, 173, and two capstone courses selected from 159A, 159B, 159C.

It is recommended that students have each term's program approved by the departmental adviser. Note: Consult the Schedule of Classes for courses limited to majors only.

### Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaaa/libRARY/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

#### Graduate Degrees

The Department of Design | Media Arts offers the Master of Fine Arts (M.F.A.) degree in Design | Media Arts.

### Design | Media Arts Lower Division Courses

1. **Graphic Design.** (2). Studio, 30 hours. Limited to high school students. Basic and advanced photography skills using digital cameras. Alteration/manipulation of photos using techniques from latest version of Adobe Photoshop. Uploading of images on Web or in print. Production of digital and print portfolio of student work. Field trips to surrounding West Los Angeles locales to shoot photos. May be repeated for credit without limitation. Offered only as part of Summer Institute. P/NP grading.

2. **Web Design.** (2). Studio, 30 hours. Limited to high school students. How Web design works: basic hand coding and creation of personalized homepages with Macromedia Director and Flash software. Photograph scanning and manipulation of images in Adobe Photoshop to incorporate student Web designs. Critique of various Web pages to analyze successful use of Web design and understand enormous potential of Internet. May be repeated for credit without limitation. Offered only as part of Summer Institute. P/NP grading.

3. **Game Design.** (2). Studio, 30 hours. Limited to high school students. Creation of a video game and digital art. Beginning with storyboard and learning how to bring game design to life. Creation and animation of three-dimensional characters and objects by using Maya, same software used by professional video game developers. Analysis of popular games to understand what is involved in producing modern games. Visits from professional game designer to help guide students own game design projects. May be repeated for credit without limitation. Offered only as part of Summer Institute. P/NP grading.

4. **Audio Video Design.** (2). Studio, 30 hours. Limited to high school students. Creation of a video. Storyboard for short documentary, commercial, or music video. Students shoot and edit their own work by learning fundamentals of preproduction and postproduction using latest digital software, Adobe Premiere and After Effects, to create their work. Burning of DVD of finished productions. Visits from professional video producer to help guide students in creating their own videos. May be repeated for credit without limitation. Offered only as part of Summer Institute. P/NP grading.

5. **Introduction to Design | Media Arts.** (4). Studio, 40 hours; discussion, four hours. Introduction to and exploration of variety of media such as graphic, web, and video design with goal of combining and integrating these media to express and realize their narrative projects. Students work with most current software and technology in each discipline area, developing diverse skill sets while cultivating conceptual capabilities around storytelling project, and with experienced instructors and professionals in field to develop projects utilizing this comprehensive and integrative approach. Culminates in portfolio that may be used for college applications. Field trips.

6. **Art/Science and Technology Studio/Laboratory.** (4). Studio/laboratory, 40 hours. Limited to high school students. Two-week summer course, including lectures, required screenings, laboratory visits, field trips, and outside study. Exploration of creative aspects of scientific research and innovation to gain broad understanding of impact of science on contemporary art and popular culture, with focus on new sciences of biotechnology and nanotechnology. Development of proposals and ideas that could serve as prototypes for either art projects or scientific research study. P/NP grading.

7. **Media Histories.** (5). Lecture, three hours; outside study, 12 hours. Synthetically of optical and aesthetic movements covering past two centuries: photography and industrialism (1850 to 1900), cinema and modernism (1900 to 1950), television and postmodernism (1950 to 2000), and digital media and modernism (2000 to 2050). How such movements can inform generative work and how understanding these media becomes essential in emerging era of digital humanities. P/NP or letter grading.

8. **Art, Science, and Technology.** (5). Lecture, three hours; outside study, 12 hours. Exploration and survey of cultural impact of scientific and cultural innovations, technology-driven art inspired by science, and art/science collaborative projects. Introduction to vast array of cutting-edge research taking place on campus; scientific guest lectures. Emphasis on art projects that use technology and respond to new scientific concepts. P/NP or letter grading.

9. **Design | Media Arts B.A. Capstone Major

#### Preparation for the Major

**Required:** Design | Media Arts 8, 10, 21, 22, 23, 24, 25, 28.

**The Major

**Required:** Eleven upper division courses, including Design | Media Arts 101, 104, 153, 154, 157, 161, 163, two courses selected from 160, 171, 172, 173, and two capstone courses selected from 159A, 159B, 159C.

It is recommended that students have each term's program approved by the departmental adviser. Note: Consult the Schedule of Classes for courses limited to majors only.

In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

#### Graduate Degrees

The Department of Design | Media Arts offers the Master of Fine Arts (M.F.A.) degree in Design | Media Arts.
102. Introduction to Digital Image Creation and Manipulation. (5). Lecture, three hours; outside study, 12 hours. Overview of digital imaging technology and its application in design, media arts, and entertainment from both technical and content-based points of view. P/NP or letter grading.

104. Design Futures. (5). Lecture, three hours; outside study, 12 hours. Preparation: completion of preparation for major courses. Open to nonmajors with consent of instructor. Critical examination of design practice and theory of 20th and 21st centuries, incorporating historical as well as speculative methodologies. Consideration of how various design practices and techniques related to each other across cultures and media, with strong emphasis on communication and creative thinking. P/NP or letter grading.

153. Video (5). (Formerly numbered 153A.) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Use of video technology (video systems, cameras, displays, editing, and storage) to integrate image, sound, time, and motion. Emphasis on expression, continuity, and sequential patterns for video communication. P/NP or letter grading.

154. Word + Image. (5). (Formerly numbered 154A.) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Enforced requisite: course 101 or 104. Focus on relationship of type to content, image, and materials. Acquisition of knowledge of and sensitivity to typography in context of complex communication problems in print and digital media. Research, concept and content development, and articulation of methodologies of visualization. P/NP or letter grading.

157. Game Design. (5). (Formerly numbered 157A.) Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Enforced requisite: courses 22, 28, and 101 or 104. Introduction to game design, with focus on developing conceptual and practical skills that form basis for both digital and nondigital game development. Development of four playable game projects that explore various aspects of game design: rule design, game balance, multiplayer strategy, complexity, randomness, polemics, narrative, physical interaction, and aesthetic and pragmatic aspects of physical game design. P/NP or letter grading.

159A-159B-159C. Capstone Senior Project. (5-5-5). Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major courses. Enforced requisite: course 160, 171, 172, or 173. Limited to seniors. Focus on creating final project that can be showcased at Senior Show. Students can take two different courses in different terms or the same course in different terms. Total units for courses 159A, 159B, and 159C may not exceed 10 units, with maximum of 5 units per term. Letter grading. 159A. Interactivity and Games. Interactive media, including game design, interactive installations, dynamic websites, creative coding and electronics. 159B. Video and Animation. Linear media, including storyboard, video, animation, modeling, editing, postproduction, and lighting. 159C. Visual Communication and Image. Visual communication, editorial design, photography, typography, branding, and narrative environments.

160. Studio: Topics in Design | Media Arts. (5). Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major course and major courses. Selected topics in design and media arts explored through variety of approaches that may include projects, readings, discussion, research papers, and oral presentations. Topics announced in advance. May be repeated for maximum of 10 units. Letter grading.

171. Topics in Interactivity and Games. (5). Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major and major courses. Provides wider understanding of arts that parallels world of 20th-century visual languages. Study of story of one art form to another in richer context. Letter grading.

172. Topics in Video and Animation. (5). Studio, six hours; outside study, nine hours. Preparation: completion of preparation for major and major courses. Selected topics in interactive media and games explored through variety of approaches that may include projects, readings, discussion, research papers, and oral presentations. Topics announced in advance. May be repeated for maximum of 10 units. Letter grading.

173. Topics in Visual Communication and Image. (5). Studio, six hours. Preparation: completion of preparation for major and major courses. Selected topics in visual communication and image explored through variety of approaches that may include projects, readings, discussion, research papers, and oral presentations. Topics announced in advance. May be repeated for maximum of 10 units. Letter grading.

195A-195B. Community or Corporate Internships in Design | Media Arts. (2-4). Tutorial, six and 12 hours. Limited to juniors/seniors. Internship in supervised setting in community agency or business related to design. Students meet on regular basis with instructor and provide periodic reports of their experience. Courses 195A and 195B may be repeated for combined maximum of 8 units. Individual contract with supervising faculty member required. P/NP or letter grading.

198. Honors Research in Design | Media Arts. (4). Tutorial, two hours. Preparation: 3.0 grade-point average overall. Limited to juniors/seniors. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated once for credit. Individual contract required. Letter grading.

199. Directed Research in Design | Media Arts. (2 to 4). Three hours. Preparation: 3.0 grade-point average in major. Limited to juniors/seniors. Supervised individual research or investigation under direct supervision of faculty member. May be repeated once for credit. Individual contract required. Letter grading.

200. Design | Media Arts Faculty Seminar. (2). Seminar, two hours. Limited to graduate design | media arts majors. Seminar to familiarize new graduate students with departmental faculty members and their creative work and research to help students select their faculty advisors. S/U or letter grading.

207. Mathematical Techniques in Design and Media Arts I. (4). Lecture, three hours. Designed for graduate students. Survey of mathematical techniques used in design and computation theory. Sets, relations, functions, lattices, and Heyting algebras, formal languages and production systems. May be repeated for credit with consent of adviser. S/U or letter grading.

208. Mathematical Techniques in Design and Media Arts II. (4). Lecture, three hours. Designed for graduate students. Survey of mathematical techniques used in design and computation theory. Theory of descriptive geometry, spatial transformations, matrix representations, symmetry and groups, graphs, maps and triangulations. May be repeated for credit with consent of adviser. S/U or letter grading.

M241. Programming Computer Applications in Architecture and Urban Design. (4). (Same as Architecture and Urban Design M227A.) Lecture, three hours; outside study, nine hours. Introductory course in logic of computing through experiments in computer graphics programming. Investigation of both procedural and object-oriented approaches to programming. May be repeated for credit with consent of adviser. S/U or letter grading.

M242. Introduction to Geometric Modeling. (4). (Same as Architecture and Urban Design M227B.) Lecture, three hours; outside study, nine hours. Required course M241 or mathematic language. Programming techniques for implementing modern computer-user interfaces, specifically focusing at issues relevant to building software tools. Use of computer-aided architecture and design. May be repeated for credit with consent of adviser. S/U or letter grading.

249. Advanced Seminar: Computer Applications. (4). Seminar, three hours; outside study, 12 hours. Preparation: course M241 or Architecture and Urban Design M227A. Survey of various roles computers may play in design; development of new applications. Topics include representation, search, evaluation, and communication. May be repeated for credit with consent of adviser. S/U or letter grading.

252A. Programming Media 1. (3). Studio, three hours; outside study, six hours. Limited to majors. Introduction to computer programming within context of art and design. Exploration of conceptual space enabled by electronic media through exercises, presentations, discussions, and critiques. Weekly exercises balance concept and technique to reveal potential of computer as medium and tool. Experience with programming includes procedural and object-oriented programming, two- and three-dimensional graphics, computer game design, color models, and image processing. Letter grading.

252B. Programming Media 2. (3). (Formerly numbered C252B.) Studio, three hours; outside study, six hours. Enforced requisite: course 252A. Limited to majors. Exploration of use of mechanical actuators and sensors, custom interface design, microcontroller programming, and building kinetic and interactive physical artworks. Practical electronics theory, programming for embedded systems, two-dimensional and three-dimensional CAD, basic milling, laser cutting, mold making, circuit building, and other sculptural electronics fabrication techniques. Letter grading.

256. Interactive Environments. (4). Lecture/studio, six hours. Designed for graduate design | media arts majors. Emphasis on understanding fundamental principles of interaction and virtual environments. May be repeated for credit with consent of adviser. Letter grading.

Data and Media Arts A. (4). (Same as Statistics M237.) Studio, six hours. Through web-based and social networking of telecommunications networks and general advancement of data collection technologies, almost every aspect of our lives can be rendered in data. Contemplation of use of data in creation of media art and examination of each step in process of data collection,

Scope and Objectives

The Digital Humanities minor is an interdisciplinary minor that studies the foundations and futures of the digital world. Digital humanities interprets the cultural and social impact of the new information age as well as creates and applies new technologies to answer cultural, social, and historical questions, both those traditionally conceived and those enabled by new technologies. The interdisciplinary curriculum draws on faculty members from more than 15 departments, five schools, and three research clusters. Students work in collaborative teams to realize digital research projects with real-world applications. Students use tools and methodologies such as three-dimensional visualization, data-mining, network analysis, and digital mapping to conceptualize and advance research projects. Students have the opportunity to contribute to scholarship in fields ranging from archaeology and architecture to history and literature. By preparing students to be active participants in the design and production of new knowledge, the minor emphasizes the critical thinking skills, creativity, and collaborative methodologies necessary for success in the digital information age.

Undergraduate Study

Digital Humanities Minor

The Digital Humanities minor is intended to provide students with literacy in creating, interpreting, and applying the technologies of the digital world. It examines the cultural and social impact of new technologies and enables students to harness these technologies to develop their own research projects in a wide range of fields.

To apply for the minor, students must (1) have an overall grade-point average of 2.7 or better and (2) submit an application essay supporting their interest in pursuing the minor and enumerating any digital projects that they have already undertaken. On acceptance to the minor, students are expected to identify an academic area of digital humanities in which they intend to specialize. Information about the minor is available at http://www.digitalhumanities.ucla.edu. To submit an application for the minor, see the website and click on DH Minor.

Required Lower Division Course (4 to 6 units):

Required Upper Division Courses (25 to 28 units):

A minimum of 20 units applied toward the minor requirement must be in addition to units applied toward major requirements or another minor.

Each minor course must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

Digital Humanities

Upper Division Courses

101. Introduction to Digital Humanities. (5). Lecture, four hours; discussion, one hour. Foundation course for students in Digital Humanities minor, providing theoretical and conceptual framework for understanding genesis of digital world. Use of contemporary cultural-historical methodology to focus on rise of
new media and information technologies in 19th, 20th, and 21st centuries, such as photography, film, radio, television, Internet, and World Wide Web and their impact on how individuals, groups, and cultures experienced their worlds. Letter grading.

150. Advanced Topics in Digital Humanities. (4). Seminar, three hours. Requisite: course 101. Introduction to advanced research methods or thematic issues in digital humanities such as database and visualization technologies, social media technologies, application programming interfaces, and digital mapping to acquire familiarity with particular set of technologies by learning practical research methods and theoretical issues to carry out advanced research in this area. Consult Schedule of Classes for topics to be offered in specific term. May be repeated for credit with topic change. Letter grading.

194. Research Group Seminars: Digital Humanities. (2). Seminar, two hours. Requisite: courses 101, completion of two other minor courses. May be taken concurrently with course 195 or 196. Designed for undergraduate students who are part of research group. Discussion of research methods, tools, and current literature in field or of research of faculty members and students. May be repeated for credit. P/NP or letter grading.

195. Community or Corporate Internships in Digital Humanities. (4). Tutorial, two hours; fieldwork, eight hours. Limited to juniors/seniors. May be taken concurrently with course 194. Internship in supervised setting in community agency or business. Placements to be arranged by instructor. Students meet on regular basis with instructor and provide periodic reports of their experience. May be repeated for credit. Individual contract required with supervising faculty member required. Letter grading.

196. Research Apprenticeship in Digital Humanities. (4). Tutorial, three hours per week per unit. Limited to juniors/seniors. Entry-level research apprenticeship for upper division students under guidance of faculty mentor. May be repeated for credit. Individual contract required. P/NP grading.

Undergraduate Courses

201. Introduction to Digital Humanities. (5). Seminar, three hours; laboratory, one hour. Introduction to field of digital humanities. Historical overview of field from its beginning in post-World War II era to present, highlighting major intellectual problems, disciplinary paradigms, and institutional challenges that are posed by digital humanities. Examination of major epistemological, methodological, technological, and institutional challenges posed by digital humanities through number of specific projects that address fundamental problems in creating, interpreting, preserving, and transmitting human cultural record. How digital technologies and tools, ranging from map visualizations and modeling environments to database structures and interface design, are arguments that make certain assumptions about, and even transform, objects of study. Letter grading.

250. Special Topics in Digital Humanities. (4). Seminar, three hours. Requisite: course 201. Introduction to advanced research method or thematic issue in digital humanities, such as digital textual analysis, digital mapping database and visualization technologies, or social media technologies. Acquisition of daily life with particular set of technologies by learning practical research methods and theoretical issues to carry out advanced research in this area. Examination of critiques of theoretical underpinnings of such technologies and issues that they raise. May be repeated for credit with topic change. Letter grading.

299. Special Projects in Digital Humanities. (2 to 4). Tutorial, one hour. Enforced requisite: course 201. Limited to and required of graduate students in Digital Humanities Graduate Certificate Program. Supervised research and investigation under guidance of faculty mentor. Culminating project required. May be repeated for maximum of 12 units. Letter grading.

596. Directed Individual Study or Research. (2 to 12). Tutorial, three hours. To be arranged with faculty member who directs study or research. S/U or letter grading.

DISABILITY STUDIES

Interdisciplinary Minor

College of Letters and Science

UCLA
A265 Murphy Hall

Victoria E. Marks, B.A., Chair

Faculty Committee

Bruce L. Baker, Ph.D. (Psychology)
Anurima Banerji, Ph.D. (World Arts and Cultures / Dance)
Helen Deutsch, Ph.D. (English)
Victoria E. Marks, B.A. (World Arts and Cultures / Dance)
Mary J. O’Connor, Ph.D. (Psychiatry and Biobehavioral Sciences)

Scope and Objectives

The Disability Studies minor introduces undergraduate students to the emerging interdisciplinary field of disability studies, offering a new lens for thinking about the body, society, and culture. The field reorients a marginalized phenomenon at the center of our experience, transforming what is often misconceived as an abnormality of daily life into one of its most basic realities. Faculty members from applied fields in the professional schools (e.g., education, law, medicine, nursing, public health, public policy, and urban planning) collaborate with faculty from academic disciplines across the College of Letters and Science and the School of the Arts and Architecture (e.g., anthropology, English, history, linguistics, psychology, and world arts and cultures) to provide a critical framework for questioning and connecting topics related to disability in these established disciplines.

Through a core course, carefully selected electives, a required two-term internship or research apprenticeship, and a senior capstone project, students in the minor obtain both breadth and depth in their understanding of the concept and practical implications of disability.
Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 3.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Disability Studies**

### Upper Division Courses

101. Perspectives on Disability Studies. (5). Lecture, one hour; discussion, two hours. Not open for credit to students who have completed course 101W. Introduction to disability studies, in-depth examination of critical framework for understanding concept of disability from sampling of disciplinary perspectives. Organized around productive and central tension in disability studies—between disability as lived subjective experience that is both individual and communal, and disability as objective, medical, legal, and sometimes stigmatized category. Students encouraged to make connections between units and to create their own perspectives on disability in field that defines itself by how it changes. Satisfies Writing II requirement. Letter grading.

102. Disability and Violence. (4). Seminar, three hours. Relationship between disability and violence from three angles: (1) review of disproportionate incidence of violence committed against people with disabilities, whether specifically as form of hate crime or based on dependency and/or vulnerability that accompany some types of disability, (2) study of role of disability and participation in representations of criminality and violence, and (3) disablement or emergent disability (injuries, illnesses, and impairments created by societal inequity) as consequence of intersecting forms of racial, gender, sexual, and class subordination, or as result of state or interpersonal violence. Consideration of possible coalition-based strategies for transformative social marketing strategies that are vital to documenting and organizing movement to improve lives of people with disabilities as well as parent perceptions. P/NP or letter grading.

M103. Studies in Disability Literatures. (8). (Same as English M103.) Lecture, four hours; discussion, one hour (when scheduled). Enforced requisite: English Composition 3 or 3H. Survey of modes of disability in literature, with specific emphasis on thematic concerns. Topics may include introduction to disability studies; race, gender, and disability; disability narratives; etc. May be repeated for credit with topic or instructor change. P/NP or letter grading.

110. Disability and Popular Culture. (4). Lecture, four hours. Drawing from disability studies, media studies, and theories of representation, examination of increasing visibility of people with disabilities in popular culture. How disability is represented and perceived on television and film across the United States to changes on ground in development to theories of human rights, sociology of disability, and media studies. Review of social and cultural factors that determine how society and medical profession understand autism as diagnostic category. Study of processes involved in identifying autism as represented in film and television, neuro- science, and disability studies. Review of social versus medical model of disability and analysis of dominant as well as counter discourse on autism. Overview of broad cultural understanding of children living with disabilities as well as parent perceptions. P/NP or letter grading.

M139. Perspectives on Autism and Neurodiversity. (4). (Same as Psychology M139.) Seminar, three hours. How do parents deal with diagnosis of child with autism, and particularly mental illness in representations of some types of disability, (2) study of role of disability dependency and/or vulnerability that accompany violence committed against people with disabilities, (3) disablement or emergent disability (injuries, illnesses, and impairments created by societal inequity) as consequence of intersecting forms of racial, gender, sexual, and class subordination, or as result of state or interpersonal violence. Consideration of possible coalition-based strategies for transformative social marketing strategies that are vital to documenting and organizing movement to improve lives of people with disabilities as well as parent perceptions. P/NP or letter grading.

150. Human Rights, International Development, and Disability. (4), (Same as Economics M150.) Lecture, three hours. Basic introduction to theories of human rights, sociology of development, and contemporary rights-based development theory and practice. International disability rights movement to serve as case study, following passage of U.N. Convention on Rights of Persons with Disabilities in 2006 to changes on ground in developing countries that are occurring today. Offered in summer only. P/NP or letter grading.

M157. Rechoreographing Disability. (Same as Dance M157.) Seminar, four hours. Through study of range of performance by, featuring, or about people who identify as disabled, reading and discussion of range of writing about disability and development to theories of human rights, sociology of disability, and media studies. Review of social and cultural factors that determine how society and medical profession understand autism as diagnostic category. Study of processes involved in identifying autism as represented in film and television, neuro-science, and disability studies. Review of social versus medical model of disability and analysis of dominant as well as counter discourse on autism. Overview of broad cultural understanding of children living with disabilities as well as parent perceptions. P/NP or letter grading.

M164A. Documentary Production for Social Change: Mobility in Los Angeles. (5). (Same as Urban Planning M164A.) Seminar, three hours; fieldwork, two hours. Exploration of documentary filmmaking as catalyst for social change, using daily commute in Los Angeles as case study. Introduction to issues of race, ethnicity, gender, disability, and class on experiences of commuting, access to public transportation, and car-based versus alternative (bike and pedestrian) forms of commuting. Exposure to observational, interview-based, and participatory documentary shooting and editing techniques, as well as social marketing strategies that are vital to documentary production and distribution. Letter grading.

194. Capstone Research Seminar. (2). (Formerly numbered 194.) Seminar, two hours. Enforced requisite: course 195SC. Required of students pursuing Disability Studies minor. Integration of off-campus work with academic theories and concepts within field of disability studies. Focus on final year of internship experiences and analyze relationship between their internship and issues of policy, ethics, systemic responses to community needs, or personal
and intellectual transformations. Students identify one faculty mentor and develop proposal for required capstone research project. Letter grading.

195CE. Community and Corporate Internships in Disability Studies. (4). Tutorial, to be arranged; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting. Coordinated through Center for Community Learning. Students complete weekly written assignments, attend biweekly meetings with graduate student coordinator, and write final research paper. Faculty sponsor and graduate student coordinator construct series of reading assignments that examine issues related to internship site. May be repeated for credit with consent of Center for Community Learning. Individual contract with supervising faculty member required. Letter grading.

198. Honors Research in Disability Studies. (6 to 8). Tutorial, one hour. Enforced requisite: course 194. Limited to juniors/seniors. Required capstone course to Disability Studies minor for students pursuing College Honors. Development and completion of honors thesis or comprehensive research project under direct supervision of faculty member. May be repeated for credit. Individual contract required. Letter grading.

199. Senior Project in Disability Studies. (6 to 8). Tutorial, one hour. Enforced requisite: course 194. Limited to juniors/seniors. Required capstone course to Disability Studies minor. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. Letter grading.

Aradhna K. Tripathi, Ph.D.

**Scope and Objectives**

The disciplines of geology, geochemistry, geophysics, paleobiology, and space physics are concerned with the structure and evolution of the solar system, Earth, and life; essentially, the physical environment and its interaction with biota. These studies entail the application of fundamental physics and chemistry to a broad subject area stretching from astronomy at one extreme to biology at the other. Areas that are emphasized in the Department of Earth, Planetary, and Space Sciences include isotope and trace element analyses, petrology and mineralogy, sedimentology, paleobiology and organic geochemistry, structural geology and tectonophysics, seismology, the Earth’s interior, planetary physics, and space plasmas.

The variety of techniques applied lead to several concentrations within the five main disciplines. Students completing their studies with a B.S. or M.S. degree usually are employed by industry. Many are employed in environment-related activities; others are involved in mineral or oil exploration or in construction. Students attaining the Ph.D. degree are usually employed by universities or governmental and industrial research groups.

The Bachelor of Arts program in Earth and Environmental Science is intended to provide a broad background in Earth sciences that is especially appropriate for students intending to become K through 12 teachers in Earth, physical, or life sciences. It may also be of interest to students who plan careers in business, dentistry, environmental sciences, government, journalism, law, medicine, or public health. Those who intend to become professional geologists, geochemists, or geophysicists and/or to continue into graduate studies in Earth or space sciences are urged to pursue one of the B.S. degrees.

**Undergraduate Study**

All of the majors offered in the Earth, Planetary, and Space Sciences Department are designated capstone majors. While the specific nature of the capstone experience varies by major, students are required to use skill and knowledge sets from previous coursework to complete a field-based research project from conception to written report. Projects must be placed into context within the current state of understanding, and results are presented at a research symposium or published as a brief report.

**Earth and Environmental Science B.A.**

**Capstone Major**

**Preparation for the Major**

**Required:** Earth, Planetary, and Space Sciences 1, 5 or 8 or 13 or 15 or 16 or 17 or 20, 51, 61; Chemistry and Biochemistry 14A, 14B, and 14BL; or 20A, 20B, and 20L; Life Sciences 1; another introductory organismic biology course; Mathematics 3A and 3B, or 31A and 31B; Physics 1A or 6A or 6AH. Each course must be passed with a minimum grade of C–.

**Transfer Students**

Transfer applicants to the Earth and Environmental Science major with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory for majors, and one calculus course. One introductory biology course with laboratory and one calculus-based physics course with laboratory are recommended.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/admtchtm for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** Three courses from Earth, Planetary, and Space Sciences 103A, 103B, 111, 116, 119; one capstone 199 research course in the senior year; three additional upper division courses from Earth, Planetary, and Space Sciences other than 100; two courses from Geography 100 and 100A, 101 and 101A, 104, 105 and 105A, M107, M109, 110, 120, 121, 124, 125, M127, M131.

**Geology B.S.**

**Capstone Major**

**Preparation for the Major**

**Required:** Earth, Planetary, and Space Sciences 1, 51, 61; Chemistry and Biochemistry 14A, 14B, and 14BL, or 20A, 20B, and 20L; Life Sciences 1; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; Civil and Environmental Engineering 15 or Program in Computing.
10A or knowledge of Fortran or C++ demonstrated by examination. Each course must be passed with a minimum grade of C–.

**Transfer Students**

Transfer applicants to the Geology major with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory for majors, and one year of calculus. One introductory biology course with laboratory, one year of calculus-based physics with laboratory, and one introductory computer programming course are recommended.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** Earth, Planetary, and Space Sciences 103A, 103B, 103C, 111, 112, 116, 133, 136A, one capstone field research course (121), and two additional courses from C106, C107, C109, 119, 125, C126, C132, 136C, 137, 139, C141, 150, 171, Civil and Environmental Engineering 128L, 151, 155, Geography 100.

**Geology/Paleobiology B.S.**

**Capstone Major**

**Preparation for the Major**

**Required:** Earth, Planetary, and Space Sciences 1, 3, 16 or 17, 51, 61; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, and 14CL, or 20A, 20B, 20L, 30A, and 30L; Life Sciences 2, 3, 4; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, and 4AL, or 6A and 6B. Each course must be passed with a minimum grade of C–.

**Transfer Students**

To be admitted as Geology/Paleobiology majors, transfer students with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course, one introductory biology course with laboratory, two general chemistry courses with laboratory for majors, and one year of calculus. One calculus-based physics course with laboratory is recommended.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

**Geophysics/Applied Geophysics B.S.**

**Capstone Major**

**Preparation for the Major**

**Required:** Earth, Planetary, and Space Sciences 1 or 5 or 8 or 9 or 15, 51, 61; Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 33A; Physics 1A, 1B, 1C, 4AL, 4BL; Civil and Environmental Engineering 15 or Program in Computing 10A or knowledge of Fortran or C++ demonstrated by examination. Recommended: Mathematics 32B. Each course must be passed with a minimum grade of C–.

**Transfer Students**

Transfer applicants to the Geophysics/Applied Geophysics major with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course, one introductory biology course with laboratory, one year of calculus-based physics with laboratory, and one introductory computer programming course are recommended.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** Earth, Planetary, and Space Sciences 1, 9; Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL, 17, 18L; Civil and Environmental Engineering 15 or Program in Computing 10A or knowledge of Fortran or C++ demonstrated by examination. Each course must be passed with a minimum grade of C–.

**Geophysics/Geophysics and Space Physics B.S.**

**Capstone Major**

**Preparation for the Major**

**Required:** Earth, Planetary, and Space Sciences 1 or 5 or 8 or 9 or 15, 51, 61; Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL; Civil and Environmental Engineering 15 or Program in Computing 10A or knowledge of Fortran or C++ demonstrated by examination. Each course must be passed with a minimum grade of C–.

**Transfer Students**

Transfer applicants to the Geophysics/Geophysics and Space Physics major with 90 or more quarter units (60 semester units) must have completed one introductory Earth sciences course, one general chemistry course with laboratory for majors, and one year of calculus. A second year of calculus, one year of calculus-based physics with laboratory, and one introductory computer programming course are recommended.

Refer to the UCLA Transfer Admission Guide at [http://www.admissions.ucla.edu/prospect/adm_tr.htm](http://www.admissions.ucla.edu/prospect/adm_tr.htm) for up-to-date information regarding transfer selection for admission.

**The Major**

**Required:** Earth, Planetary, and Space Sciences M140, 152, 153, 154, 155, 171; one capstone 199 research course in the senior year; Physics 105A, 105B, 110A, 110B, 112, 131; two upper division courses from the physical sciences, engineering, or mathematics (must be approved by the undergraduate adviser).

Students planning to do graduate work in specialized careers in Earth sciences should, when possible, take appropriate courses in departments outside the major in addition to those already specified. Suggested graduate programs for various fields of emphasis are available in the Student Affairs Office, 3683 Geology, and provide guidelines in selecting upper division courses.

Qualified undergraduate students may, with consent of their advisers and the instructor, take Earth, Planetary, and Space Sciences graduate courses numbered from 200A through 248.
**Honors in Geology or Geophysics**

The honors program in geology or geophysics is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a faculty member. Requirements for admission to candidacy are the same as those required for admission to the Honors Programs of the College of Letters and Science. Qualified students wishing to enter the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geology or geophysics are awarded at graduation to those students who have a cumulative grade-point average of 3.5, have completed at least 90 graded units at the University of California, and have completed a minimum of two terms (8 units) of Earth, Planetary, and Space Sciences 198 leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.

**Earth and Environmental Science Minor**

In the Earth and Environmental Science minor students study the interaction of the solid Earth, oceans, and atmosphere with human activities. The minor provides background in Earth sciences that is especially appropriate for students intending to become K through 12 teachers in Earth, physical, or life sciences. It may also be of interest to students who plan careers in business, dentistry, environmental sciences, government, journalism, law, medicine, or public health.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

**Required Lower Division Courses (8 units):**
- Earth, Planetary, and Space Sciences 1, one course from 5, 13, 15, or 61.

**Required Upper Division Courses (20 units minimum):**
- A minimum of 20 upper division units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.
- Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Geology Minor**

Geology is the study of the surface of the Earth and the rocks and processes that created it. Field methods, interpretation of rocks, and modern plate-tectonic models are emphasized, with the goals of finding valuable or hazardous materials and inferring geologic history. These skills are valuable in engineering, urban planning, and environmental and resource studies.

To enter the Geology minor, students must have an overall grade-point average of 2.0 or better.

**Required Lower Division Courses (8 units):**
- Earth, Planetary, and Space Sciences 1, 51.

**Required Upper Division Courses (20 to 26 units):**
- Two courses from Earth, Planetary, and Space Sciences C106, C107, C109, and three courses from 103A, 103B, 103C, C106 or C107 or C109 (whichever course was not applied above), 152, 153.
- A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.
- Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Geophysics and Planetary Physics Minor**

Classical physics, supported by field data, mathematics, and computing, is used to understand diverse processes from ocean circulation and earthquakes to the formation of planets and the flow of particles and electromagnetic fields in space. These skills are valuable in environmental, engineering, and resource studies and more broadly in any kind of career that requires quantitative analysis.

To enter the Geophysics and Planetary Physics minor, students must have an overall grade-point average of 2.0 or better.

**Required Lower Division Courses (12 units):**
- Earth, Planetary, and Space Sciences 1, 8, 9.

**Required Upper Division Courses (20 units):**
- Earth, Planetary, and Space Sciences 136A, 171, and three courses from M140, 152, 153, 154, 155.
- A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor.
- Each minor course must be taken for a letter grade, and students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Graduate Degrees**

The Department of Earth, Planetary, and Space Sciences offers Master of Science (M.S.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Geophysics, Master of Science (M.S.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Geology, and Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Geophysics and Space Physics.

### Earth, Planetary, and Space Sciences

#### Lower Division Courses

1. **Introduction to Earth Science.** (5).
- Lecture, three hours; laboratory, two hours; field days. Not open to students with credit for or currently enrolled in course 100 or former courses 1F and 1H. Elements of Earth science; study of Earth materials; nature and interpretation of geologic evidence; study of geologic processes; historical aspects of geology. Mandatory field trips introduce students to solving of geologic problems in field. P/NP or letter grading.

2. **Astrobiology.** (5).
- Lecture, three hours; discussion, one hour; two field days. Origin, evolution, distribution, and future of life on Earth and in universe, paralleling major scientific initiative of NASA. Course material primarily from planetary and Earth science, paleontology and biology, astronomy, chemistry, and physics, with relatively little from mathematics. P/NP or letter grading.

3. **Environmental Geology of Los Angeles.** (4).
- Lecture, three hours; discussion, two hours; field trips. Geologic hazards and natural resources of greater Los Angeles region. Topics include Los Angeles geologic hazards such as earthquakes, landslides, and floods; Southern California oil fields; gold and gem mining in region; local beach processes; and Los Angeles water resource problems. Field trips to San Andreas fault, California aqueduct, active landslides, and historic gold mines. P/NP or letter grading.

- Lecture, four hours. Concepts of plasma physics. Dynamic sun, solar wind, and Earth’s magnetosphere and ionosphere. Space storms and substorms and their impacts on astronauts, spacecraft, and surface power and communication grids. P/NP or letter grading.
71. Introduction to Computing for Geoscientists. (3). Lecture, two hours; laboratory, two hours; outside computing study, three hours. Introduction to writing program code, using a suite of geoscience data, and comparison with models. Letter grading.

Upper Division Courses

100. Principles of Earth Science. (4). Lecture, three hours. Designed for nonmajors. Not open to students with credit for course 101. Introduction to geology and Earth history; major problems of geology, including examination of fallacies and philosophical problems that arise. Topographic and physical geology; major problems of geology, including examination of fallacies and philosophical problems that arise. Topographic and physical geology, and atmosphere. History of climate. Questions related to the Earth and its environment. Not open to students with credit for course 101. Earth's energy resources (fossil fuels and alternatives) from Earth science and sustainability perspectives. P/NP or letter grading.

101F. Earth's Energy with Fieldwork. (5). Lecture, three hours; laboratory, two hours; two required field trips. Preparation: one lower division atmospheric sciences, chemistry, Earth sciences, or physics course. P/NP or letter grading.

101A. Igneous Petrology. (5). Lecture, two to three hours; laboratory, six hours. Enforced requisites: course 51, Chemistry 14B and 14BL, or 20B, Mathematics 3B or 31B. Petrologic structure of crust and mantle and its relation to seismology. Lecture, three hours; laboratory, six hours; field trips. Enforced requisites: course 51, Chemistry 14B and 14BL, or 20B, Mathematics 3B or 31B. Examination of how these natural phenomena affect quality of human life. P/NP or letter grading.

103B. Sedimentary Petrology. (5). Lecture, two to three hours; laboratory, six hours; field trips. Enforced requisites: course 103A. Study of sedimentary rocks based on characteristics of sedimentary particles and dynamics of depositional processes. P/NP or letter grading.

119. Continental Drift and Plate Tectonics. (4). Lecture, two hours; laboratory, two hours; field trips. Enforced requisites: course 1 or 1H. Alfred Wegener's theory of continental drift and its current status. P/NP or letter grading.

and atmospheres; molecular spectra, radiative transfer, and planetary observations; dynamics of oceans and atmospheres. S/U or letter grading.

200D. Planetary Surfaces. (4). Lecture, three hours. Introduction to planetary surfaces (both exoge- nic and endogenic) shaping solid surfaces in solar system and description of their optical and thermo- physical properties, with emphasis on simple physics-based approach. Discussion of current literature. S/U or letter grading.

200E. Planetary Origins and Evolution. (4). Lecture, four hours. Designed for graduate students who are interested in origins of planetary systems and history of solar system. Open to advanced undergraduate students with consent of instructor. Provides background needed to understand and/or participate in research related to formation and evolution of solar system and exoplanetary systems. Description of proto-planet formation process and subsequent evolution of planetary systems by integrating observations and theory. Fosters interdisciplinary knowledge and communication between Departments of Earth and Space Sciences and Physics and Astronomy graduate students and faculty members. S/U or letter grading.

210. Geochronometers and Geochemistry. (4). Lecture, three hours. Requisite: course 51. Basic principles of physical chemistry for geologic applications. Thermody- namics and kinetics of reactions among minerals, nat- ural waters, and magmas; construction and interpre- tation of phase diagrams; case studies of important geologic applications. Topics include radiometric and molecular evolution. Concurrency scheduled with course C106. Additional independent research project and oral presentation required of graduate students. S/U or letter grading.

220. Geodynamics. (4). Lecture, two and one-half hours: discussion, 30 minutes. Requisite: Mathe- matics 33A. Basic concepts of heat transfer applied to solutions of geophysical and geophysical problems, including problems of the Earth and Moon. Solidification of magmas, thermal and subsidence history of sedimentary basins, frictional heating on fault zones, mantle geotherms, tempera- ture in descending slabs, thermosolutio in geo- thermal regions. S/U or letter grading.

211. Mathematical Methods of Geophysics. (4). Lecture, four hours. Requisites: Physics 105A, 110A, 112, 131. Recommended: Physics 132D. Designed to provide mathematical background required for stu- dents pursuing Ph.D. in Geophysics and Space Physics, as well as related programs in department. Extensive survey of mathematical methods applicable to geophysical applications consistent with needs that geophysics students encounter in their research. Letter grading.

213. Biological and Environmental Geochemistry. (4). Lecture, three hours. Requisites: Chemistry 14A and 14B (or 20A and 20B), Mathematics 3A, 3B, and 3C (or 31A and 31B). Recommended: at least one lower division Earth, planetary, and space sciences course. Intended for junior and senior students in the physical sciences. Study of chemistry of Earth’s surface environment and interplay between biology, human activity, and geology. Introduction to origin and com- position of Earth, including atmospheres, crust, and hydrosphere. Examination of how these reservoirs are affected by biological cycles and feedbacks to biolog- ical evolution and diversity. Local and global-scale movements of biologically important elements like carbon, nitrogen, and phosphorus. Concurrently scheduled with course C113. S/U or letter grading.

216. Evolutionary Biology. (4). (Same as Ecology and Evolutionary Biology M200A.) Lecture, two hours; discussion, two hours. Current concepts and topics in evolutionary biology, including microevolution, speci- fication and species concepts, analytical biogeog- raphy, adaptive radiation, mass extinction, commu- nity evolution, molecular evolution, and development of evolutionary thought. S/U or letter grading.

217. Molecular Evolution. (4). (Same as Ecology and Evolutionary Biology M231.) Lecture, two hours; discussion, two hours. Molecular evolution in molecular evolution, with special emphasis on molec- ular phylogenetics. Topics may include nature of ge- nome, neutral evolution, molecular clocks, concerted evolution, phylogenetic systematics, statistical and phylogenetic algorithms. Themes may vary from year to year. May be repeated for credit. S/U or letter grading.

220. Principles of Paleobiology. (4). Lecture/discus- sion, three hours. Limited to graduate science stu- dents. Designed to provide qualitative and visual back- ground in physical sciences students with consent of instructor. Current and classic problems in paleobiology, with emphasis on interdisciplinary problems involving as- pects of biology, geology, and cosmochemistry, and cosmology. Content varies from year to year. May be repeated for credit. S/U or letter grading.

221. Field Geology. (4). Lecture, one hour; discus- sion, one hour; fieldwork, 10 days. Requisite: course 121 or 184G. Planning, execution, and presentation of geologic mapping projects at professional level. Res- olution of problems in Southern California geology from synthesis of new and published research. Field area varies from year to year. May be repeated for credit. S/U or letter grading.

222. Introduction to Seismology. (4). Lecture, three hours. Types of seismic waves; travel-time seis- mology; epicenter location; amplitude variations; seis- mological theory: exploration seismology; elastic- ity, focal conditions; surface wave analysis; microseisms and S/U or letter grading.

225A. Physics and Chemistry of Planetary Interiors I. (4). Lecture, four hours. Chemical compositions of Earth and planets; high-pressure and temperature ef- fects and transition equations; equilibrium and stabi- lity conditions; surface wave analysis; microseisms and S/U or letter grading.

225B. Physics and Chemistry of Planetary Interiors II. (4). Lecture, four hours. Lateral inhomogeneities in Earth: seismic velocities, petrology, geothermal and gravitational variations; evidence of motion; rema- nent magnetism, seismic motions; postglacial re- bound; plate tectonics; rheology of mantle; thermal convection; S/U or letter grading.

226. Advanced Igneous Petrology. (4). Lecture, three hours; laboratory; three hours; field trips. Requi- site: course 103A. Designed for graduate students. Understanding genesis of rock types based on geochemical, tectonophysical, and other geological evidence and principles. Concurrently scheduled with course C126. Graduate students required to read more recommended references, make class presen- tations on particular topics resulting from that reading, and lead seminar-type discussions on their selected topics. S/U or letter grading.

228. Introduction to Planetary Dynamos. (4). Lecture, three hours; laboratory; three hours. Requisite: courses 200A, 200B, 200C. Designed for graduate students. Basic principles of planetary dy- namo generation. Planetary core dynamics and core convection; mean field dynamos and dynamo theory; survey of modeling techniques and re- sults. S/U or letter grading.

229. Planetary Atmospheres. (4). Lecture, three hours. Requisite: course 200B. Planetary atmos- pheric structure, dynamics, and composition. Includes spacecraft observations; origin and evolution of at- mospheres; photochemistry, radiation mechanisms, and transport; atmospheric waves and general circu- lation; wave-mean flow and turbulence; remote sensing and inversion techniques. S/U or letter grading.

X-ray, reciprocal lattice theory, single crystal X-ray methods, diffraction symmetry and elementary crystal structure analysis. S/U or letter grading.

231. Historical Geology. (4).
Lecture, three hours; laboratory, one hour. Requi-
site: course 51. Geology 105B-105C.

Lecture, three hours; laboratory, one hour. Requi-
site: course 51. Geology 105B-105C.

Lecture, three hours; laboratory. Interrelation of physical properties of rock-forming minerals: optical reflectivity, refractive index, sound velocity, elastic constants, specific heat, and thermal expansivity. Determination of pressure, volume, and temperature relationships and planet-forming compounds. Variation of elastic constants with temperature and pressure. Application of shock-wave experiments to equations of state. S/U or letter grading.

234. Petrologic Phase Equilibria. (4).
Lecture, three hours; discussion, three hours. Requisites: course 51, Chemistry 110B. Principles governing homogeneous and heterogeneous equilibria, with selected applications to mineral stability relations in igneous and metamorphic rocks (fractional crystallization, partial melting, hydrothermal solutions, element partitioning in contrasting phases). S/U or letter grading.

235A-235B-235C. Current Research in Geochemistry. (1-1-1). Discussion, one hour. Limited to graduate Earth and space sciences students. Seminars presented by staff, outside speakers, and graduate students. Seminar in Earth and planetary chemistry. May be repeated for credit. S/U grading.

238. Metamorphic Petrology. (4).
Lecture, three hours; laboratory, six hours. Preparation: one introductory petrology and petrographic course. Interpretation of metamorphic rocks in light of observation, theory, and experiment. Geological relations, petrographic evidence, metamorphic zoning, thermodynamic state of phase equilibria, projections, chromo-
graphic relationships, use of zircon and other rare minerals. Rayleigh depletion model, isotopic fractionation, envi-
ronmental factors of metamorphism. Laboratory study of representative metamorphic rocks and suites of rocks. Concurrently scheduled with course 238A. May be repeated for credit. S/U grading.

Lecture, three hours. Requisite: course 200C or Physics 210A. Physics of plasma in space, including treatments based on magnetohydrodynamics and kinetic theory. Applications to solar or planetary winds, steady-state magnetospheres, magnetosheath convection, substorm processes, magnetic merging, field-aligned currents and magnetospheric/ionosphere coupling, ring current dynamics, and wave particle instabilities. S/U or letter grading.

Lecture, three hours; laboratory, three hours. Requisites: courses 103B, 111. Mechanisms of sedimentary basin development, flexural and thermal subsidence, isostasy, subsidence analysis, quantitative basin modeling, sediment proven-
cance, and basin analysis. Concurrently scheduled with course 241A. S/U or letter grading.

Lecture, two hours; laboratory, four hours. Requisite or corequisite: course 241A. Petrographic study of sandstones, with emphasis on diagenetic processes. S/U or letter grading.

Lecture, three hours; field trips. Requisites: courses 103B, 111. Fluid dynamics, sediment transport, and sedimentology of nonmarine and marine depositional systems, including fluvial, alluvial fan, lacustrine, eolian, and shallow-marine to deep-marine clastic and carbonate environments. Letter grading.

244. Tectonics of Sedimentary Basins. (4).
Lecture, two hours; discussion, two hours; field trips. Requi-
sites: courses 103B, 119. Recommended: course 241A. Basin analysis, stratigraphy, paleoenvironments, sedi-
tectonic problems. S/U or letter grading.

245A-245B-245C. Current Research in Tectonics. (1-1-1). Seminar, one hour. Limited to graduate Earth and space sciences students. Seminars presented by staff, outside speakers, and graduate students on current research in tectonics and/or sedimentology. May be repeated for credit. S/U grading.

Lecture, three hours. Requisite: course 202 or Civil Engineering 108. Over-
coring, hydrofracture, fault plate solutions, seismic stress drops; effects of erosion, cooling, Earth elliptic-
ticity, topography, and density anomalies. State of stress in plate boundaries and interiors. Application of finite element and analytic methods to stress determina-
tion. S/U or letter grading.

248. Advanced Structural Geology. (4).
Lecture, three hours; discussion, two hours. Requisite: course 111. Principles governing fracture, folding, and flow of rock masses. Problems of structural interpretation of geologic bodies of small and large scales; regional tectonic problems. S/U or letter grading.

250. Mars. (4).
Lecture, three hours. Mars geology, geophysics, geodynamic processes, magnetic merging, field-aligned currents and atmospheres, geodynamics and volcanism, polar caps, atmos-
phere, climate. S/U or letter grading.

251. Seminar: Mineralogy. (4).
Seminar, three hours. Examination of groups of rock-forming minerals (e.g., feldspars), integrating such aspects as crystal struc-
ture, chemical composition, and metamorphic history. S/U or letter grading.

252. Seminar: Geochemistry. (4).
Seminar, two hours; discussion, two hours. Phase equilibria under crustal conditions, chemistries, recent and ar-
cient sediments, structure and chemistry of upper mantle, geochronology, cosmochemistry, and cos-
mochemistry. S/U or letter grading.

Seminar, three hours. Problems of igneous or metamorphic petrology; methods of evaluating physical conditions of meta-
morphism; diffusion in mineralogic systems; origin of ultramafic rocks and problems of mantle; element fractionation among coexisting phases; other current subjects in field. S/U or letter grading.

Seminar, three hours. Processes of sediment transport and deposition; deep sedimentary basins; theories of carbonate, sandstones, limestones, and strata; stratigraphy; pe-
loenvironmental studies. S/U or letter grading.

Seminar, three hours. Flow and fracture in Earth's crust from microscopic to continental scale and in ex-
periments. Examples may include metamorphic terranes, glaciers, plutons, volcanoes, and consolidated or unconsolidated sediments. Modern concepts of oceanic basins; processes leading to segmentation of continental-type rocks. S/U or letter grading.

Seminar/discussion, three hours. Advanced topics in paleobiology, biostro-
igraphy, paleoecology, and paleobiogeography, with emphasis on relations to other disciplines. S/U or letter grading.

Seminar, two hours; discussion, two hours. Requisite: course 244A. Basin evolution and paleogeography, with emphasis on Phanerozoic of Western U.S. S/U or letter grading.

260. Field Seminar. (2 to 6).
Fieldwork, two to six hours. Field study of significant problems in the state of California. Concurrently scheduled with course 260A. S/U or letter grading.

Lecture, four hours. Lectures, discussions, and exercises on specific advanced topics in magneto-
spheric plasma physics. Courses examined magnetic storms, magnetospheric substorms, ultralow frequency waves, and adiabatic particle motion in Earth's radiation belts. S/U or letter grading.

Fieldwork, five hours; laboratory, two hours. Requi-
site: course 150. Application of remote-sensing tech-
niques to field situations. Digital analysis and interpre-
tation of near-infrared, thermal-infrared, and micro-
wave data from satellites and aircraft. Field observation of study site in California desert for testing hypotheses during week between Winter and Spring Quarters. Concurrently scheduled with course C162. S/U or letter grading.

Lecture, two hours; discussion, two hours. Under-
standing and prediction of critical phenomena (de-
defined as abrupt overall changes) in Earth's crust, mathematic modeling and analysis of data from seismicity, remote sensing, and hydrology. Extensions to critical phenomena in engineering and socioeco-
nomic systems. Letter grading.

Lecture, three hours. Introduction to concepts and methods of nonlinearity, chaos theory, fractals, intermittency, self-organization, cooperativity, criticality, spatio-temporal chaos, turbulence, dis-
order, and fluctuations. Applications to tectonics, earthquakes, geomorphology, meteorology, evolution, biology. S/U or letter grading.

Seminar, two hours; discussion, two hours. Seismology, geophysical pros-
cpecting, electromagnetic prospecting. Selected topics in Earth physics. Content varies from year to year. May be repeated for credit. S/U or letter grading.

(Same as Astronomy M285.) Lecture, four hours. Dy-
namical problems of solar system; chemical evid-
ces from geochemistry, meteorites, and solar at-
mosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic pro-
cesses, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

286A-286B-286C. Seminars: Planetology. (2-2-2). Seminar, two hours. Problems of current interest con-
cerning moon, planets, and meteorites. May be re-
peated for credit. S/U grading.

287A-287B-287C. Seminars: Seismology and Earth's Interior. (2-2-2). Seminar, two hours. Pro-lems of current interest concerning Earth's in-
terior. May be repeated for credit. S/U grading.

(Same as Atmospheric and Oceanic Sciences M288A-288B-288C.) Problems of current interest concerning particles and fields in space. May be repeated for credit. S/U grading.
M370B. Integrated Science Instruction Methods. (4). (Same as Chemistry M370B and Physics M370B.) Lecture, two hours; discussion, one hour. Requisite: course M370A or Chemistry M370A or Physics M370A. Application of learning theory to science instruction and classroom management, including use of technology, collaborative learning, laboratory safety, ethical issues, field experiences, and professional development. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4). Seminar, to be arranged. Preparation: apprentice personnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

495. Teaching Earth and Space Sciences. (2). Seminar, one hour; discussion, two hours. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. Special emphasis on integration of technology in classroom. S/U grading.

501. Cooperative Program. (2 to 8). Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study and/or Research. (2 to 12). Tutorial, to be arranged. May be repeated. S/U or letter grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8). Tutorial, to be arranged. S/U grading.

**Scope and Objectives**

The Master of Arts degree in East Asian Studies provides an interdisciplinary and highly flexible program of study. With opportunities to take a range of advanced courses in the social sciences and humanities, students are able to tailor their programs to emphasize particular methodological and disciplinary approaches and to focus in depth on the region as a whole and on its dynamics in particular countries. Coursework and language offerings range from the ancient to the contemporary and allow students to prepare for a broad range of individual needs and career interests with a thorough grounding in the history and culture of the region.

Information on the undergraduate major in Asian Studies can be found in the International and Area Studies section later in this catalog.

---

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa /library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

The Bachelor of Science degrees combine essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as advanced in-depth exposure to some of them. The Master of Science and Ph.D. degrees provide opportunities for advanced, concentrated study. The Master of Science degree requires, in addition to specified coursework, completion of either a comprehensive examination or the performance of original research culminating in a thesis. The Ph.D. degree requires independent and innovative research that ultimately results in a dissertation.

Undergraduate Study

Students may earn a Bachelor of Science degree in one of three different majors within the department: Biology (general biology); Ecology, Behavior, and Evolution; and Marine Biology. The majors build on similar lower division introductory courses and differ primarily in the upper division requirements. The Biology major is designed for students who desire exposure to a wide range of biological subjects. The remaining two majors—Ecology, Behavior, and Evolution and Marine Biology—provide more specialized instruction and strong preparation for employment or subsequent graduate study in the respective disciplines.

Two of the majors offered in the department are designated capstone majors: Ecology, Behavior, and Evolution and Marine Biology. In both programs students apply theory and technique learned through four years of classroom and laboratory experience to their own independent projects. The main purpose of the capstone is to provide a unique field experience that involves designing and executing a research project. Students are aided in the scientific process of learning about a new ecosystem, developing relevant questions, designing conceptually based projects, troubleshooting and completing the work, and writing a publication-ready manuscript. They are also expected to exhibit strong teamwork, problem-solving, and communication skills.

Biology B.S.

The Biology major is designed for students with a broad interest in biology who desire to pursue careers in a wide range of biological and related fields. It provides excellent background preparation for postgraduate training in medicine and other health sciences, in tracks leading to academic and public service careers in biology, in biological industries, and even in nonbiological careers such as business, agriculture, and law. Emphasis is on breadth of training to expose students to all levels of modern biology.

Preparation for the Major

Life Sciences Core Curriculum

Required: Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Life Sciences 1, 2, 3, 4, 23L; Mathematics 3A, 3B, 3C, and Statistics 13, or Mathematics 31A, 31B, 32A, and Statistics 13, or Life Sciences 30A, 30B, and Statistics 13; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

Transfer applicants to the Biology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm _transfer for up-to-date information regarding transfer selection for admission.

The Major

Students must complete the following courses:

1. Chemistry and Biochemistry 153A
2. At least 8 units (two courses) from Ecology and Evolutionary Biology 100, 109, 116, 120, 121
3. At least 8 laboratory units (two courses) from Ecology and Evolutionary Biology 100L (if completed Fall Quarter 2011 and thereafter), 101, 103, 105, 109/109L (count as one course), 110, 111, 112, 113A, 114A, 115, 117, 128, 136, 152/162L (count as one course), 162/162L (count as one course), 170, C174, 181. Four units from the Field Biology Quarter or Marine Biology Quarter may be applied, and one course from Molecular, Cell, and Developmental Biology C150/150AL or Physiological Science 166 may be included. Students with credit for Ecology and Evolutionary Biology 170 cannot also take Physiological Science 166
4. At least 8 units (two courses) from Ecology and Evolutionary Biology 100, 101, 103, 105, 107, 109, 110, 111, 112, 113A, 114A, 115, 116, 117, C119A, C119B, 120, 121, 122, 126, M127 (or Environment M127 or Geography M127), 128, 129, 130, M131 (or Geography M117), 133, 135, 136, 137, M139 (or Atmospheric and Oceanic Sciences M105), 142, M145 (or Earth, Planetary, and Space Sciences M118), 151A,
152, 153, 154, 155, 160, 162, 170, M171, C173, C174, 175, 176 (counts as one-half course), C179, 180A (counts as one-half course), 180B, 185, 186, 187, 198A and 198B (must take both), 199 (4 units), Molecular, Cell, and Developmental Biology 138, 163A. Eight units from the Field Biology Quarter or Marine Biology Quarter may be included, and any departmental course not applied under item 2 or 3 above may be applied in this category. Students with credit for Ecology and Evolutionary Biology 120 cannot also take course 185

5. At least 12 units (three courses) from the following: Anthropology 120 and/or one course from 124A, 124P, or 128A, Atmospheric and Oceanic Sciences M105 (or Ecology and Evolutionary Biology M139) or one course from 102, 103, 104, or 130, Biomathematics 110 and/or Biostatistics 100B, chemistry (except Chemistry and Biochemistry 193A through 199; Chemistry and Biochemistry 193A through 199, Environmental Science 116, Ecology and Evolutionary Biology (except 190 through 196), Environment 194, Geography 112 and/or one course from 108 or 111, Human Genetics C144 or one course from Life Sciences 100HA, 100HB, or 100HC, mathematics (except Mathematics 105A, 105B, 106, 191 through 199), microbiology, immunology, and molecular genetics (except Microbiology, Immunology, and Molecular Genetics 193A through 199), molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 190A through 199D), Neuroscience M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A), M101B (or Molecular, Cell, and Developmental Biology M175B or Physiological Science M180B or Psychology M117B), M101C (or Molecular, Cell, and Developmental Biology M175C or Physiological Science M180C or Psychology M117C), 102, M130 (or Molecular, Cell, and Developmental Biology M181 or Physiological Science M181 or Psychiatry M181 or Psychology M117J), M148, physics (except Physics 190 through 199), physiological science (except Physiological Science 191 through 199), Psychology 180C, 114A, 148, (except Physics 190 through 199), psychology and evolutionary science (except Physiological Science 191 through 199), Psychology 115. Any remaining units from the Field Biology Quarter or Marine Biology Quarter not applied in item 3 or 4 may be applied and any course not applied under item 2, 3, or 4 above may be included in this category.

A maximum of 8 units of the Ecology and Evolutionary Biology 198 series or 4 units of Ecology and Evolutionary Biology 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.

Each course applied toward requirements for preparation for the major and the major must be taken for a letter grade. Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

Ecology, Behavior, and Evolution B.S.

Capstone Major

The Ecology, Behavior, and Evolution major is appropriate for students preparing for graduate study in ecology, behavior, and evolution or for employment in areas such as environmental biology, animal behavior, conservation, teaching, museum work, and governmental positions dealing with environmental issues of wide importance and impact. A strong field component involving study in terrestrial and marine locales such as coastal, desert, and mountain environments in California and the Southwest and in the Neotropics is required.

Preparation for the Major

Life Sciences Core Curriculum

Required: Chemistry and Biochemistry 14A, 14B, 14BL, 14C, and 14D, or 20A, 20B, 20L, 30A, 30AL, and 30B; Life Sciences 1, 2, 3, 4, 23L; Mathematics 3A, 3B, 3C, and Statistics 13, or Mathematics 31A, 31B, 32A, and Statistics 13, or Life Sciences 30A, 30B, and Statistics 13; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

Transfer applicants to the Ecology, Behavior, and Evolution major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, and one semester of organic chemistry or one year of general biology and one semester of calculus. Preference for the Marine Biology Quarter (MBQ) is given to Ecology, Behavior, and Evolution majors. It is strongly recommended that students complete Ecology and Evolutionary Biology 120 prior to applying for the Marine Biology Quarter. Courses offered as part of the Field Biology Quarter (FBQ) are open to all qualified students, but strict priority is given to students who are Ecology, Behavior, and Evolution majors, and gaining seniors, have taken a broad range of ecology, behavior, and evolution coursework, and have maintained a good grade-point average.

Each course applied toward requirements for preparation for the major and the major must be taken for a letter grade. Ecology, Behavior, and Evolution majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

As requisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 13 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution and Marine Biology majors. It is strongly recommended that students complete Ecology and Evolutionary Biology 109 and 109L prior to applying for the Marine Biology Quarter. Con-
suit the Undergraduate Advising Office for all requirements for the Marine and Field Biology Quarters.

**Marine Biology B.S.**

**Capstone Major**
The Marine Biology major is designed for students who wish to specialize in the area of marine sciences. Completion of this major provides students with both an excellent background in biology and specialization in various disciplines such as oceanography, subtidal and intertidal ecology, and physiology of marine organisms. Graduates are well prepared for postgraduate opportunities in the marine sciences, many other areas of biology, and medicine. The major provides valuable field experience with concomitant individual research opportunities in marine biology.

**Preparation for the Major**

**Life Sciences Core Curriculum**

*Required: Atmospheric and Oceanic Sciences 1 or Earth, Planetary, and Space Sciences 15; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Life Sciences 1, 2, 3, 4, 23L; Mathematics 3A, 3B, 3C, and Statistics 13, or Mathematics 31A, 31B, 32A, and Statistics 13, or Life Sciences 30A, 30B, and Statistics 13; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.*

Each core curriculum course must be passed with a grade of C– or better, and all courses must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

**Transfer Students**

Transfer applicants to the Marine Biology major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/admission for transfer selection for admission.

**The Major**

Students must complete the following courses:

1. Ecology and Evolutionary Biology 109 and 109L
2. At least 4 laboratory units (one course) from Ecology and Evolutionary Biology 101, 105, 110, 112, 136, 170, or 181
3. At least 4 marine organismic biology or physiology units (one course) from Ecology and Evolutionary Biology 101 (unless taken under item 2), 105 (unless taken under item 2), 107, 112, 128, 137, 142, 170 (unless taken under item 2), C174, or Physiological Science 166. Students with credit for Ecology and Evolutionary Biology 170 cannot also take Physiological Science 166
4. At least 4 ecology and behavior units (one course) from Anthropology 128A, Ecology and Evolutionary Biology 100, 116, C119A, 122, 126, 128, 129, M131, 133, 136, 137, 142, 151A, 152, 154, 155, 162, 170, or Geography M117
5. At least 4 evolution units (one course) from Ecology and Evolutionary Biology 116, 120, 121, 130, 133, 135, M171, C173, C174, 175, 185, or 186. Students with credit for Ecology and Evolutionary Biology 120 cannot also take course 185
6. One capstone field quarter consisting of 12 to 16 units from the Marine Biology Quarter (MBQ) or preapproved equivalent (see undergraduate adviser)
7. One additional physical, chemical, or geological oceanography course from Atmospheric and Oceanic Sciences 102, 103, 104, M105 (or Ecology and Evolutionary Biology M139), 130, Chemistry and Biochemistry 103, 153A, Earth, Planetary, and Space Sciences 100, 116, 119, C141, 153, Ecology and Evolutionary Biology M131 (or Geography M117), 153, 198B, 199, Environment 184, Geography 100, 101, 103, M106 (or Atmospheric and Oceanic Sciences M106), 123, 130, 169, Mechanical and Aerospace Engineering 103, or 150A, Molecular, Cell, and Developmental Biology 172

Credit for 199 courses from other departments may not be applied.

Each course applied toward requirements for preparation for the major and the major must be taken for a letter grade. Marine Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

As requisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 13 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution and Marine Biology majors. Students must complete Ecology and Evolutionary Biology 109 and 109L prior to participating in the Marine Biology Quarter. Consult the Undergraduate Advising Office for all requirements for the Marine and Field Biology Quarters.

**Field Biology**
The department offers two quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ) and the Marine Biology Quarter (MBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter involves some combination of Ecology and Evolutionary Biology 103, 113B, 114B, 115, 118, 124A, 124B, 125, 126, 132, 134B, and 151B. The Marine Biology Quarter includes some combination of Ecology and Evolutionary Biology 102, 106, 123A, 123B, 147, 148, 163, 164, 165, and 182. The Field and Marine Biology Quarters occur during Fall and Spring Quarters. To participate, students must enroll in all courses in the respective program. Participants in both programs are selected by personal interview during Fall or Winter Quarter. Information and applications are available in the Undergraduate Advising Office.

**Honors Program**

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Ecology and Evolutionary Biology 198A and 198B.

**Computing Specialization**

Majors in Biology, Ecology, Behavior, and Evolution, and Marine Biology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science CM186, Psychology 186A, or 186B. A grade of C– or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Undergraduate Advising Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

**Conservation Biology Minor**

The Conservation Biology minor is designed for students who wish to augment their major program of study with courses addressing issues central to the conservation and sustainability of biodiversity and natural ecosystem processes. The minor seeks to provide students with a greater depth of experience and understanding of the role that science can play in developing conservation policy.

To enter the minor, students must (1) be in good academic standing (2.0 grade-point average or better), (2) have completed Life Sciences 1, Ecology and Evolutionary Biology 100, and 116 (or Environment 121) with minimum grades of C or better, and (3) file a petition in the Undergraduate Advising Office, 101 Hershey Hall. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by the College of Letters and Science.
Non-life sciences majors wishing to minor in Conservation Biology should be aware that preparation courses in chemistry, life sciences, mathematics, and physics are requisites to some of the upper division courses accepted for the minor.

**Required Lower Division Course (5 units):** Life Sciences 1.

**Required Upper Division Courses (28 units minimum):** Ecology and Evolutionary Biology 100, 116 (or Environment 121), and four to six courses (19 units minimum) from 101, 103, 105, 106, 109, 111, 112, 114A, 114B, 122, 129, 131, 151A, 153, 154, 155, C174, 176, 180A. Courses completed as part of the Field Biology Quarter and Marine Biology Quarter may be applied if not taken to fulfill a field quarter requirement; consult the undergraduate counselors for more information.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval; consult the undergraduate counselors before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have a minimum grade of C (2.0) in each and an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Evolutionary Medicine Minor**

The Evolutionary Medicine minor is designed for students who wish to augment their major program of study with courses that combine the disciplines of ecology and evolutionary biology, anthropology, psychology, and zoology with medicine to create new paradigms for investigating and understanding disease. The minor provides students with a greater depth of experience and understanding of the integration of evolutionary biology and medical education.

To enter the minor, students must (1) be in good academic standing (2.0 grade-point average or better), (2) have completed Ecology and Evolutionary Biology 100, and 120 or 185 with minimum grades of C or better, and (3) file a petition in the Undergraduate Advising Office, 101 Hershey Hall. All degree requirements, including the specific requirements for this minor, must be fulfilled within the unit maximum set forth by the College of Letters and Science.

Non-life sciences majors wishing to minor in Evolutionary Medicine should be aware that preparation courses in chemistry, life sciences, mathematics, and physics are requisites to some of the upper division courses accepted for the minor.

**Required Research Project or Internship (4 units minimum):** Ecology and Evolutionary Biology 195 or 199 or a suitable research internship from another department.

Participation in the Annual Biology Research Symposium (Poster Session) sponsored by the department in Spring Quarter is highly recommended.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major requirements or another minor, and at least 20 units applied toward the minor must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval; consult the undergraduate counselors before enrolling in any courses for the minor.

Each minor course must be taken for a letter grade, and students must have a minimum grade of C (2.0) in each and an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaga /library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

**Graduate Degrees**

The Department of Ecology and Evolutionary Biology offers Master of Science (M.S.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Biology.

**Ecology and Evolutionary Biology**

**Lower Division Courses**

10. **Plants and Civilization.** (4.) Lecture, three hours; discussion, one hour. Designed for nonmajors. Origin of crop plants; man’s role in development, distribution, and modification of food, fiber, medicinal, and other plants in relation to their natural history. P/NP or letter grading.

11. **Biomedical Research Issues in Minority Communities.** (6.) Discussion, four hours. Limited to 30 students. Discussions and student presentations on biomedical research as it affects minority communities, with emphasis on methodology, design, consequences, and ethics of current research. Discussion leaders provide information on preparation and training for research careers. P/NP or letter grading.

12. **Biodiversity and Extinction: Crisis and Conservation.** (4.) Lecture, three hours; discussion, one hour. Examination of ecological and evolutionary principles necessary to understand nature and importance of worldwide environmental crisis. Research by students of specific conservation issues and presentation of results to class. P/NP or letter grading.

13. **Evolution of Life.** (4.) Lecture, three hours; discussion, one hour. Not open to life sciences majors. Limited to 100 students. Introduction to biology within framework of evolutionary theory. Relationships of evolutionary thought to other areas of knowledge and society. Natural selection and origin of variation examined in context of genetics, molecular biology, physiology, phylogeny, population dynamics, behavior, and ecology. Emphasis on critical role of historical processes. P/NP or letter grading.

17. **Evolution for Everyone.** (5.) Lecture, three hours; discussion, two hours. Exploration of data in Darwinian natural selection, with emphasis on evidence and implications for modern problems people and societies face, including antibiotic resistance to pesticides, and coevolution of pollinators with crop plants. Nature of science in context of questions about ongoing real-time Darwinian processes. Letter grading.

18. **Why Ecology Matters: Science Behind Environmental Issues.** (5.) Lecture, three hours; laboratory, two hours. Basic ecological concepts, scientific method, and ecological basis for local and global environmental issues. Major challenges to be faced in this century, including need to find interdisciplinary and collaborative solutions to world’s worsening environmental problems (e.g., global climate change, biodiversity loss, deforestation, pollution, declining water resources, declining fisheries). Environmental literacy to equip students to become leaders in growing green economy and to help forge solutions to current and future environmental crises that threaten natural resource base. P/NP or letter grading.

20. **Self-Organization and Emergence in Biology: Complex Adaptive Systems Approach.** (5.) Lecture, four hours; laboratory, two hours. No prior mathematics, science, or computer knowledge required beyond that needed to enter UCLA. Discovery of how exciting new sciences of complexity address cutting-edge research and practical applications of interdisciplinary approaches to biological systems. Such system-processes range from machinery of cell through transnational epidemics to global climate change. Complex systems processes seek to bridge gaps among social, natural, and applied sciences (including engineering, management, and health sciences) and humanities to better conditions for humans and nonhumans alike. Exploration of existing computer simulations (similar to video games), experimenting on what-if world's to determine outcomes of nonlinear, chaotic, complex, and far-from-equilibrium processes in cellular, organismal, ecological, and evolutionary biology. Letter grading.

21. **Field Biology.** (4.) Lecture, three hours; discussion, two hours, or field trips, three to four hours. Recommended preparation: Life Sciences 15. Not open for credit to students with credit for course 122 or Life Sciences 1. Introduction to natural history of Western North America, especially Southern California. Classification, distribution, and ecology of common plants and animals. P/NP or letter grading.

25. **Living Ocean.** (5.) Lecture, three hours; discussion, two hours, or field trips, three to four hours. Recommended preparation: Life Sciences 15. Not open for credit to students with credit for course 122 or Life Sciences 1. Introduction to natural history of Western North America, especially Southern California. Classification, distribution, and ecology of common plants and animals. P/NP or letter grading.

50. **Desert Life.** (4.) Lecture, four hours; laboratory, two hours. Introduction to fundamental structural, physiological, and behavioral features of desert organisms, with special emphasis on deserts of Western North America. P/NP or letter grading.
95. Lower Division Internship in Biology. (4). Tutorial/fieldwork, three hours per week per unit. Internship course for lower division students to be supervised by Center for Community Learning, fieldwork site, and faculty adviser. Consult Undergraduate Office for more information. May be repeated twice. Individual contract with supervising faculty member required. P/NP grading.

96A. Communicating Science: Bringing Complex Concepts to Life. (1). Seminar, three hours. Limited to Ecology and Evolutionary Biology Department majors. Consult each quarter for course topics and prerequisites for enrollment. May be repeated for credit with consent of instructor. Credit/no credit. P/NP grading.

96B. Communicating Science: Life Sciences Researchers. (1). Seminar, three hours. Limited to Ecology and Evolutionary Biology Department majors. Consult each quarter for course topics and prerequisites for enrollment. May be repeated for credit with consent of instructor. Credit/no credit. P/NP grading.

96C. Communicating Science: Life Sciences Today. (1). Seminar, four hours. Limited to Ecology and Evolutionary Biology Department majors. Key to effectively communicating science is to be able to synthesize complex scientific concepts into one unified whole. Research and storytelling techniques learned in prior two terms used to research and synthesize big-picture topic in life sciences, with focus on evolutionary biology, systematics, morphology, and behavior. Students get to know life sciences researchers and what life scientists do by developing and producing one short video about one life sciences researcher. Letter grading.

97X. PEERS Forum: Pathways in Science. (1). Lecture, one hour. Limited to students in Program for Excellence in Education and Research in Sciences (PEERS). Faculty and workshops of doctoral students with practice of science, opportunities available to participate in research as undergraduate students, and careers available to graduates with science degree. May be repeated twice, but only unit may be applied toward graduation. P/NP or letter grading.

Upper Division Courses

101. Plant Evolution and Systematics. (5). Lecture, three hours; laboratory, three hours; field trips. Requisites: Life Sciences 1, 4. Evolution, systematics, morphological and molecular techniques, phylogenetic analysis, speciation, and natural history of plants. Letter grading.

102. Biology of Invertebrates. (6). Lecture, three hours; laboratory; field trips, six hours. Requisite: Life Sciences 1. Introduction to systematics, evolution, natural history, morphology, and physiology of invertebrates. P/NP or letter grading.

106. Experimental Marine Invertebrate Biology. (4 or 6). Lecture, two hours; laboratory, 12 hours. Requisites: course 105, Physiological Science 166 (may be taken concurrently). Offered either as 6-unit quarter-long course or 4-unit semester-long course. Advanced course of natural history, morphology, and physiology of invertebrates, with emphasis on independent laboratory and field investigations. P/NP or letter grading.

107. Evolution, Development, and Function of Invertebrate Animals. (6). Lecture, three hours; laboratory, three hours; three weekend field trips. Requisite: course 105 or completion of Marine Biology Quarter course. Advanced invertebrate biology course exploring evolutionary and genetic aspects of animal organization and the evolution and development of biochemical function of invertebrate form, and form and function that they relate to marine invertebrates. Letter grading.

109L. Introduction to Marine Science Laboratory. (2). Lecture, three hours; laboratory, 12 hours. Requisite: course 109 (may be taken concurrently), Life Sciences 1. Introduction to marine environments and methods used to study them. Exploration of variety of concepts in marine science, sea animals, and ecosystems. P/NP or letter grading.

110. Vertebrate Morphology. (6). Lecture, three hours; laboratory, five hours. Requisites: Life Sciences 1, 2, 3, 4, 23L. Study of vertebrate morphology, function, and evolution from viewpoint of comparative anatomy of adult forms, biomechanics, development, and paleontology of laboratory study of selected vertebrates. Letter grading.

111. Biology of Vertebrates. (5). Lecture, three hours; laboratory, three hours; four one- to two-day field trips. Requisite: Life Sciences 1. Adaptations, behavior, and physiology of vertebrates. Letter grading.

113A. Herpetology. (5). Lecture, three hours; laboratory, three hours; field trips, three and one half days per term. Requisite: Life Sciences 1. Recommended: course 100. Vertebrate zoology course restricted to biology of reptiles and amphibians of world, covering current systematics, ecology, behavior, morphology, and physiology of these animals. Letter grading.

114A. Field Ornithology. (5). Lecture, three hours; laboratory; field trips, three hours. Requisite: Life Sciences 1. Recommended: course 100. Not open for credit to students with credit for course C219A, C219B. Field research projects followed by lecture course and offered only as part of Field Biology Quarter. Biology, particularly ecology and behavior, of birds in their natural habitat. Letter grading.

114B. Field Ornithology. (8). Requisite: Life Sciences 1. Recommended: course 100. Two to three weeks of off-campus research projects followed by lecture course and offered only as part of Field Biology Quarter. Biology, particularly ecology and behavior, of birds in their natural habitat. Letter grading.

116. Conservation Biology. (4). Lecture, three hours; discussion, two hours. Requisite: Life Sciences 1. Recommended: course 100. Two to three weeks of off-campus research projects followed by lecture course and offered only as part of Field Biology Quarter. Biology, particularly ecology and behavior, of birds in their natural habitat. Letter grading.

117. Evolution of Vertebrates. (5). Lecture, three hours; laboratory, three hours. Requisites: Life Sciences 1, 2, 3, 4, 116. Evolution of Vertebrates. (5). Lecture, three hours; laboratory, three hours. Requisites: course 100. Five-week course offered only as part of Field Biology Quarter. Field-oriented introductory course by which vascular plants adapt themselves to their abiolic and biotic environments using community, population, and ecophysiological levels of integration. Letter grading.

119A. Mathematical and Computational Modeling in Ecology. (4). Formerly numbered C119A. Lecture, three hours; discussion, one hour. Enforced requisites: Mathematics 3B or 31A. Recommended: courses 100, 122, Life Sciences 1, Mathematics 3C. Introduction to modeling dynamics of ecological systems, including formulation and analysis of mathematical models, basic techniques of scientific programming, probability and stochastic modeling, and methods to relate models to data. Examples from ecology but techniques and principles applicable throughout life and physical sciences. Concurrently scheduled with course C119B. P/NP or letter grading.

C119B. Modeling in Ecological Research. (4). Lecture, two hours; discussion, two hours. Requisite: course C119A. Advanced techniques in mathematical and computational modeling of ecological dynamics and other population dynamic problems. Independent research projects developed by students. Topics include model formulation, stochastic models, fitting models to data, sensitivity analysis, presentation of model results, and other topics from current literature. Concurrently scheduled with course C219B. P/NP or letter grading.

120. Evolution. (4). Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, 2, 3, 4, 23L, Mathematics 3A and 3B, or 31A. Designed for department majors specializing in environmental and population biology. Introduction to mechanisms and processes of evolution, with emphasis on natural selec-
121. Molecular Evolution. (4). Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4, 23L. Molecular biology, with emphasis on evolutionary aspects. DNA replication, RNA transcription, protein synthesis, intrinsic growth, expression, and molecular evolution. Letter grading.

122. Ecology. (4). Lecture, three hours; discussion, two hours. Requisites: course 100, Life Sciences 1, Mathematics 3B or 31A. Highly recommended: Math- ematics 3B or Life Sciences 3. Field and laboratory research, with emphasis on population and community ecology, with emphasis on growth and distributions of populations, interactions among species, natural selection, evolutionary relationships among organisms, principles and application of biological nomenclature. Letter grading.

123.1-123B. Field Marine Ecology. (4 or 8 each). (Formerly numbered 123.) Lecture, five hours; laboratory, 15 hours; field trip, 15 hours. Requisites: courses 111, 120, 122. Offered either as 4- or 8-unit five-week intensive course given off campus as part of Marine Biology Quarter that is in residence at research station located overseas or off campus, or at research station. Survey of current topics in marine ecology, including analysis of primary research literature combined with field study of ecology of marine organisms, populations, communities, and ecosystems. Original research project required. Letter grading.

124A-124B. Field Ecology. (4 or 8 each). (Formerly numbered 124.) Lecture, five hours; laboratory or field trip, 15 hours. Requisites: course 100, Life Sciences 1, Mathematics 23L. Recommended: courses 111, 120, 122. Offered as part of Field Biology Quarter that is in residence at research station located overseas or off campus, or at research station. Survey of current topics in marine ecology, including analysis of primary research literature combined with field study of ecology of marine organisms, populations, communities, and ecosystems. Original research project required. Letter grading.

125. Tropical Animal Communication. (4 or 6). Requisites: course 100, Life Sciences 1. Offered either as 4-unit quarter-long course or as 8-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, two hours. Animal communication behavior, morphology, and evolution of social behavior. Eight-unit course covers same basic lecture material in five or six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Letter grading.

126. Behavioral Ecology. (4 or 8). Requisites: course 100, Life Sciences 1, Mathematics 3C or 32A. Recommended: courses 111, 120, 122. Offer either as 4-unit quarter-long course or as 8-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, morphology, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Letter grading.

127. Soils and Environment. (4). (Same as Environment M127 and Geography M127.) Lecture, three hours; discussion, one hour; field trips. General treatment of soils and environmental implications: soil development, worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. Letter grading.

128. Plant Physiological Ecology. (5). Lecture, three hours; laboratory, three hours; one two-day field trip. Requisites: Life Sciences 1, Physics 1C and 4BL, or 6C or 6CH. Study of plant/environment interactions under natural conditions. Transpiration and photosynthesis, leaf temperatures, and water movement in soil/plant/atmosphere continuum. Letter grading.

129. Animal Behavior. (4). Lecture, three hours; discussion, two hours. Requisites: course 100, Life Sciences 1. Introduction to behavioral ecology. Methods and results of evolutionary approaches to study of animal behavior, including foraging strategies, social competition, sexual selection, mating systems, cooperation, and social organization. Letter grading.

131.1-131B. Ecosystem Ecology. (4). (Same as Geog- raphy M117.) Lecture, three hours; field trips. Requisites: Geographical M120 or Life Sciences 1. Recommended: courses 110, 117 or Earth, Planetary, and Space Sciences 116. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil records, methods of rock record, and procedures for dating from stable isotopes, functional morphology, phylegnetics, and developmental biology. P/NP or letter grading.

132. Field Behavioral Ecology. (8). Lecture, two hours; field trip, 10 hours. Requisites: course 100, Life Sciences 1. Recommended: course 129. Five-week course offered only as part of Field Biology Quarter. Field research in behavioral ecology, emphasizing design and execution of individual and small group field projects during extended field trip. Letter grading.

133. Elements of Theoretical and Computational Biology. (4). Lecture, one hour; discussion, one hour. Introduction of basic core mathematical ideas and models necessary to understand contemporary ecology and evolutionary biology. Population ecology and growth, community ecology, population genetics, natural selection. P/NP or letter grading.

134B. Field Physiological Ecology of Desert Animals. (8). Field course. Requisites: Life Sciences 1. Recommended: course 100. Two weeks of off-campus research projects with two-week course lecture (four hours per day) and offered only as part of Field Biology Quarter. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals employ to achieve their survival in arid habitats. Students carry out supervised research projects, then write up and orally present their results in seminar fashion. Letter grading.

136. Ecology, Behavior, and Evolution Laboratory. (6). Lecture, four hours; laboratory, eight hours; field trips, six and one half days per term. Requisites: course 100, Life Sciences 1, Mathematics 3C or 32A. Strongly recommended: course 120 or 122 or 129. Designed for Ecology, Behavior, and Evolution majors. Laboratory and field exercises on population genetics, growth, and regulation; competition and predation; behavioral interactions; species’ diversity and distribution. Results of research from theoretical models and computer simulations to laboratory and garden experiments to fieldwork. Mandatory field trips, including two weekend trips. Letter grading.

137. Chemical Communication. (4). Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL. Lecture, three hours; discussion, one hour. Chemical signals are produced, transported, and influence behavior of microbes, plants, and animals. Synthetic approach, with emphasis on applications to cell biology, physiology, and ecology. P/NP or letter grading.

138. Introduction to Chemical Oceanography. (4). Same as Atmospheric and Oceanic Sciences M103.) Lecture, three hours; discussion, one hour. Introduction to the major processes and subdisciplines of oceanography, including physical, chemical, and biological processes that govern the composition of oceanic waters. Emphasis will be placed on the role of major and minor oceanic constituents, with focus on those that are most important for life (i.e., carbon, nitrogen, phosphorus, silicon, and oxygen). Investigation of primary production, export production, remineralization, diagenesis, air-sea gas exchange processes. Letter grading.

145. Advanced Paleontology. (4). (Same as Earth, Planetary, and Space Sciences M115.) Lecture, three hours; Discussion, one hour. Requisites: course 110, or Earth, Planetary, and Space Sciences 116. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil records, methods of rock record, and procedures for dating from stable isotopes, functional morphology, phylegnetics, and developmental biology. P/NP or letter grading.

151A. Tropical Ecology. (4). Lecture, one hour; dis- cussion, two hours. Requisites: Life Sciences 1. Broad introduction to biodiversity, tropical forest ecosystems and dynamics and ecosystem function of range of tropical forest habitats. Discussion of such themes as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. P/NP or letter grading.

151B. Field Tropical Ecology. (8). Lecture, three hours; fieldwork, five hours. Requisites: course 100, Life Sciences 1. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of Field Biology Quarter. Introduction to biodiversity, community structure, and dynamics and ecosystem function in tropical forest habitat. Letter grading.

152. World Vegetation Ecology and Ecophysiology. (4). Lecture, three hours; discussion, one hour. En- forced requisites: Life Sciences 1. Diversity of physio- logical and ecological adaptations in biomes of world, explaining distribution and dynamics of world vegetation types. Focus on processes across scales from cells to ecosystem to globe, instrumentation for envi- ronmental and ecophysiological studies, and experiments used to make discoveries about plant adaptation. Letter grading.

153. Ecological Responses to Environmental Chal- lenges. (4). Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, and 20L. Life Sciences 1. Recommended: Life Sciences 2, 3, 4, Physics 6A. Chemical and phys-
ical principles pertinent to understanding functional responses of organisms to environment challenges, including those due to anthropogenic causes. Integrative focus provides comprehensive training in basic sciences of environmental processes, organismal acclimation and adaption, and consequences of individual performance for populations and communities. Course includes challenges associated with global warming, ocean acidification, low oxygen availability and dead zones, and changes in mass transport due to unprecedented variation in air and water motions. P/NP or letter grading.

154. California Ecosystems. (5). Lecture; three hours; laboratory or field trip, four hours. Requisite: Life Sciences 1. Recommended: course 100. Introduction to structure and dynamics of California ecosystems, with focus on Southern California, and impact of human activities on these systems. P/NP or letter grading.

155. Community Ecology. (4). Lecture, three hours; discussion, one hour. Enforced requisite: Life Sciences 1. Recommended: course 100 or 122. Community ecology is study of biodiversity in ecological context: structure and dynamics of natural species assemblages in space and time, and ecological and evolutionary mechanisms that determine which species are present or absent from particular assemblages. Examination of existing theories of community organization and dynamics, both observational and experimental, bearing on these theories. Consideration of diverse array of communities—plant, animal, microbial, terrestrial, and marine—to give appreciation of evolutionary history and diversity of life on Earth as it exists in its living ecological context. Discussion of how ecological communities are responding now and will respond in future to anticipated climate change and conservation implications of these changes. Letter grading.

160. Introduction to Plant Biology. (4). Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 152. Introduction to aspects of plant biology. Topics include plant body, reproduction, plant diversity, gene expression, and basic plant function. Letter grading.

162. Plant Physiology. (4). Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 2, 3, 23L. Basic aspects of plant function, including photosynthesis, carbon and nitrogen metabolism and its regulation; organellar interactions and compartmentation. Water relations, ion transport, flowering, hormone action, and plant responses to stress. Letter grading.

162PL Plant Physiology and Ecophysiology Laboratory. (2) Laboratory, four hours. Enforced requisite: Life Sciences 1, 2, 3, 23L. Enforced corequisite or requisite: course 152 or 162. Focus on whole-plant physiology and ecophysiology from biochemical and molecular processes to whole-plant function and field performance to gain understanding and appreciation of plant function, including dynamic processes of growth, development, and reproduction. Exercises provide training in approaches and instrumentation such that students become scientists, applying physiological techniques to answer questions on plant function. Letter grading.

165. Ecological Physiology of Marine Vertebrates. (4). Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 13L, 14L, and 30L; Ocean Sciences 1, 2, 3, 23L. Recommended: Mathematics 3C or 32A, Physics 1C and 4BL, or 6C or 6CH. Five-week intensive course offered only as part of Marine Biology Quarter. Introduction to physiological adaptations of marine vertebrates to major physicochemical variables in world oceans and to major marine habitats. Given off campus at marine science center. Letter grading.

170. Animal Environmental Physiology. (8). Lecture, three hours; laboratory, six hours. Requisites: Chemistry 14D, or 30B and 30BL, Life Sciences 1, 2, 3, 4, 23L, Mathematics 3C or 32A, Physics 1C and 4BL, or 6C or 6CH. Not open for credit to students with credit for Physical Science 166. Designed for Ecology, Behavior, and Evolution majors. Introduction to physiology (function) of animals’ organs and organ systems, with emphasis on environmental interactions and ecological adaptations. Letter grading.

C173. Earth Process and Evolutionary History. (4). Lecture, three hours; discussion, one hour. Enforced requisites: Chemistry 14A, 14B, Life Sciences 1, 2, 3, 4, Physics 8A, 8B. Recommended: one course from Atmospheric and Oceanic Sciences 100, 101, 102, 103, M105, Ecology and Evolutionary Biology 109, 116, 120, 121, M131, 135, 142, 152, 154, Geography 100, 101, or 103. Exploration of relationship between physical processes affecting surface of Earth, such as tectonics and climate, and biological evolution. Geo- logical history of Earth from its formation and history of scientific advancement. Changes through time in Earth’s systems. Examination of terms in their effects on biological process and biodiversity. Climate issues considered in this historical context of global process. Modern anthropogenic climate change placed in context of geologic record of climate change. Use of data and methods from disciplines such as historical geology, genetics, and geochemistry in reconstructing past events to be applied to problems considered. Concurrently scheduled with course C228. Letter grading.

C174. Comparative Biology and Macroevolution. (4). Lecture, three hours; laboratory, three hours. Requisite: Life Sciences 1. Recommended: one introductory statistics course. Modern comparative biology provides framework for studying broad questions in evolution—How do body shapes evolve? What are dynamics of evolutionary arms race? Why are there so many species? Are there so many beetles and so few crocodiles? Did dinosaurs put brakes on diversification of mammals? Examination of why tree of life is essential to understanding patterns of diversification of mammals? Examination of existing theories of community organization and dynamics, both observational and experimental, bearing on these theories. Consideration of diverse array of communities—plant, animal, microbial, terrestrial, and marine—to give appreciation of evolutionary history and diversity of life on Earth as it exists in its living ecological context. Discussion of how ecological communities are responding now and will respond in future to anticipated climate change and conservation implications of these changes. Letter grading.

180A-180B. Seminars: Biology and Society. (2-4). Seminar, two hours (course 180A) and four hours (course 180B). Investigations and discussions of current socially important issues involving substantial biocultural considerations, either or both as background for policy and as consequences of policy. May be repeated once for credit with instructor change. Letter grading.

181. Parasitology. (6). Lecture, three hours; laboratory, six hours. Requisites: Life Sciences 1, 3. Introduction to principles, biology, and evolution of infectious diseases, symbiosis, and parasitism, emphasizing protozoan and helminth parasites, including those of man. Letter grading.

185. Evolutionary Medicine. (4). Lecture, two and one-half hours; discussion, one hour. Enforced requisite: Life Sciences 1. Recommended: courses 112, 180. Five-week intensive course offered only as part of Marine Biology Quarter. Examination of existing theories of community organization and dynamics, both observational and experimental, bearing on these theories. Consideration of diverse array of communities—plant, animal, microbial, terrestrial, and marine—to give appreciation of evolutionary history and diversity of life on Earth as it exists in its living ecological context. Discussion of how ecological communities are responding now and will respond in future to anticipated climate change and conservation implications of these changes. Letter grading.

186. Evolutionary Medicine: Clinical Perspective on Medical, Surgical, and Psychiatric Disorders. (4). Lecture, three hours; discussion, one hour. From breast cancer and heart failure to self-injury, obsessive-compulsive and eating disorders, all contemporary medical issues have evolutionary roots. Understanding of application of ideas brought to issues faced by physicians, veterinarians, psychologists, and other healthcare providers. Development of awareness and understanding of evolutionary roots of these disorders provides future healthcare providers with expanded perspective that enhances their practice and benefits their patients in whatever field they enter. Letter grading.

187. Variable Topics in Ecology and Evolutionary Biology. (4). Lecture, discussion, one hour. Requisites: Life Sciences 1, 2, 3, 4, 23L. Investigation, discussion, and study of current important is...
sues involving substantial biological considerations in ecology and evolutionary biology. Contact Undergraduate Advising Office for current topics. May be repeated for credit.

188. Special Courses in Ecology and Evolutionary Biology. (2), Seminar, two hours. Departmentally sponsored experimental or temporary courses, such as those taught by visiting faculty members. May be repeated for credit. P/NP or letter grading.

190. Research Colloquia in Ecology and Evolutionary Biology. (1), Seminar, one hour. Designed to bring together students undertaking supervised tutorial research in ecology and evolutionary biology. Consult Undergraduate Advising Office for current topics. May be repeated for credit. S/U or letter grading.

192A–192B. Undergraduate Assistant in Ecology and Evolutionary Biology. (4–2), Seminar, 12 hours (course 192A) and six hours (course 192B). Limited to juniors/seniors. Designed to train practiced and advanced undergraduate students in assisting with courses related to biology. Students assist in preparation of materials and development of innovative programs with guidance of faculty members in small course settings. Consult Undergraduate Advising Office for further information. May not be applied toward course requirements for departmental majors. May be repeated for credit. P/NP grading.

193. Journal Club Seminars: Ecology and Evolutionary Biology. (1), Seminar, two hours. Enforced corequisite: one course from 198A through 198D or 199. Limited to undergraduate students. Development of in-depth understanding of and ability to discuss current literature in field of students' own research. May be repeated for credit. P/NP grading.

194A. Research Group or Internship Seminars: Access to Research Careers. (2), Seminar, six hours. Designed for groups of students or those who have strong commitment to pursue graduate studies in molecular, biochemical, physiological, or biomedical fields. Weekly presentation and discussion of papers from current literature. No more than four units may be applied toward departmental majors. May be repeated for credit. Letter grading.

194B. Research Group or Internship Seminars: Ecology and Evolutionary Biology. (1), Seminar, two hours. Corequisite: one course from 198A through 198D or 199. Designed to encourage participation and stimulate progress in specific research areas for undergraduate students who are part of departmental research group or internship. Discussion of use of specific research methods and current literature in field or of research of faculty members or students. May be repeated for credit. P/NP or letter grading.

195. Community or Corporate Internships in Ecology and Evolutionary Biology. (4), Lecture, two hours; laboratory, six hours; discussion, two hours. Experiences related to investigations of physiology (energetics, nutrition, osmoregulation), ecology (population and community organization), and behavior (foraging, breeding, sociability). S/U or letter grading.

202. Oceanography. (4). Lecture, four hours; discussion, two hours. Experiences related to investigations of physiology (energetics, nutrition, osmoregulation), ecology (population and community organization), and behavior (foraging, breeding, sociability). Given off campus at marine science center. S/U or letter grading.

203. Marine Botany and Physiology. (4). Lecture, two hours; discussion, one hour; laboratory, six hours; experimental project. Designed for graduate students. Structure, reproduction, life histories, and biology of marine algae, with emphasis on physiological ecology and biochemistry. Techniques in culture and physio- logical, ecological, and biochemical investigation of algae. Given off campus at marine science center. S/U or letter grading.

204. Advanced Biology of Algae. (4). Lecture, four hours; discussion, one hour. Consideration of current research in experimental phycology. Topics include discussion of appropriate aspects of chemical and physical oceanography; algal physiology; biochemistry, physiological ecology, and algal processes in ocean and freshwater habitats. S/U or letter grading.

206. Advanced Ichthyology. (4). Lecture, three hours; laboratory, three hours. Requisite: course 111 or 112. Advanced study of various aspects of fish biology. Theme varies from year to year. May be repeated for credit. S/U or letter grading.

209. Behavior of Arthropods. (4). Lecture, three hours; discussion, one hour. Advanced study of topics in behavior of terrestrial arthropods, including communication, feeding, reproductive, and social behavior. Emphasis on both mechanistic and adaptive approaches toward understanding behavior. Independent project required. S/U or letter grading.

210. Advanced Ornithology. (4). Lecture, two hours; laboratory, six hours; field project. Requisite: course 114A. Advanced study of topics in modern avian biology. Emphasis on experimental approaches to investigations of physiology (energetics, nutrition, osmoregulation), ecology (population and community organization), and behavior (foraging, breeding, sociability). S/U or letter grading.

C219A. Mathematical and Computational Modeling in Ecology. (4). (Formerly numbered C219.) Lecture, three hours; discussion, one hour. Enforced requisites: Mathematics 3B or 3A. Recommended: courses 100, 122, Life Sciences 1, Mathematics 3C. Introduction to modeling dynamics of ecological systems, including formulation and analysis of mathematical models, basic techniques of scientific programming, probability and stochastic modeling, and methods to relate models to data. Examples from ecology but techniques and principles applicable throughout life and physical sciences. Concurrently scheduled with course C219B. S/U or letter grading.

C219B. Modeling in Ecological Research. (4). Lecture, two hours; discussion, two hours. Requisite: course C219A. Advanced techniques in mathematical and computational modeling of ecological dynamics and population dynamics problems. Independent research projects developed by students. Topics include model formulation, stochastic models, fitting models to data, sensitivity analysis, presentation of model results, and other topics from current literature. Concurrently scheduled with course C211B. S/U or letter grading.

M226. Global Health Measures for Biological Emergencies. (4). (Same as Epidemiology M226.) Lecture, four hours; discussion, one hour. Mitigation of bioterrorism falls outside traditional public health programs and public health graduate education. Because of seriousness of such threats, it is important that individuals trained in public health understand and respond to threats, and be able to do so. C228. Earth Process and Evolutionary History. (4). Lecture, three hours; discussion, one hour. Enforced requisites: Chemistry 14A, 14B, Life Sciences 1, 2, 3, 4, Physics 6A, 6B. Recommended: one from Atmospheric and Oceanic Sciences M101, 101, 102,
M231. Molecular Evolution. (4). Molecular methods are used to test macroevolutionary hypotheses of biological diversity and how phylogenetic comparisons of evolutionary arms races? Why are there

differences placed in context of geologic record of climate change. Use of data from methods such as historical geology, genetics, and geochemistry in reconstructing past events to be applied to problems considered. Concurrently scheduled with course C173. S/U or letter grading.

C230. Comparative Biology and Macroevolution. (4). Lecture, three hours; laboratory, three hours. Recommended: one introductory statistics course. Modern comparative biology provides framework for studying broad questions in evolution—How do body shapes evolve? What are dynamics of evolutionary arms races? Why are there so many species in topics? Why are there so many beetles and so few crocodiles? Did dinosaurs put brakes on diversification of mammals? Examination of why and how species understanding patterns of biological diversity and how phylogenetic comparative methods are used to test macroevolutionary hypotheses. Concurrently scheduled with course C174. S/U or letter grading.

M231. Molecular Evolution. (4). (Same as Earth, Planetary, and Space Sciences M217.) Lecture, two hours; discussion, two hours. Series of advanced topics in molecular evolution, with special emphasis on molecular phylogenetics. Topics may include nature of genome, neutral evolution, molecular clocks, concerted evolution, molecular systematics, statistical tests, and phylogenetic algorithms. Themes may vary from year to year. May be repeated for credit. S/U or letter grading.

232. Advanced Ecology. (4). Lecture, three hours; discussion, one hour; field trip, three hours. Required: course 122. Concepts and topics in ecology, evolutionary or behavioral ecology, or theoretical ecology. Topics vary from year to year and may include island biogeography, tropical biology, biodiversity, modeling in ecology, habitat selection, community structure and organization, and ecology and evolution of reproductive rates. May be repeated for credit. S/U or letter grading.

237. Communicating Science to Informal Audience: Teaching, three hours; discussion, one hour; laboratory or fieldwork, two hours. Enforced requisite: one course from course 25, Atmospheric and Oceanic Sciences M10, Chemistry 2, 14A, 20A, Earth, Plantary, and Space Sciences 1, 1F, 1S, Environmental M10, or Life Sciences 1. Designed for juniors/seniors. Combined instruction in inquiry-based teaching methods and learning pedagogy, with six weeks of supervised teaching experience at Santa Monica Pier Aquarium. Students practice communicating scientific knowledge and receive mentoring on how to improve their presentations to develop ocean science literacy and to encourage broad public understanding of science and environmental stewardship. Need for young scientists to learn how to communicate about their science to audiences is especially critical when considering that Americans are expected to comprehend and respond to increasingly complex issues, such as global climate change, with limited understanding of how natural world works. Concurrently scheduled with course C179. Letter grading.

M238. Ocean Biogeochemical Dynamics and Climate. (4). (Same as Atmospheric and Oceanic Sciences M233.) Lecture, three hours. Interaction of oceanic, biogeochemical, and climate systems. Biogeochemical processes controlling carbon dioxide and oxygen in oceans and atmosphere over time-scales from few million years to several years. Attribution of global carbon cycle and climate. Response of ocean ecosystems to past and future global changes. Use of isotope study to ocean biogeochemical cycles and climate. Interactions between biogeochemical cycles of ocean (8) and in ocean. S/U or letter grading.

240. Physiology of Marine Animals. (4). Lecture, four hours; discussion, one hour. Designed for graduate students. Lecture and laboratory studies on cellular, tissue, organ, and animal physiology, regulatory biology; metabolic characteristics of cells, energy transformations. Given off campus at marine science center. S/U or letter grading.

243. Animal Communication. (4). Lecture, three hours; discussion, two hours. Required: Requisites: Mathematics 3C or 32A, and Physics 1C and 4BL, or 6C or 6CH. Physical properties of animal signals and physiological mechanisms underlying their generation and reception, neural basis of communication, and transduction, and receptor design in light of constraints placed on each sensory modality. Examples of communication systems using visual, auditory, chemical, electrical, and magnetic cues, with emphasis on biological adaptations for efficiently signaling species-specific information. S/U or letter grading.

244. Advanced Insect Physiology. (4). Lecture, two hours; laboratory, five hours. Detailed discussion of current problems in insect physiology, with advanced laboratory. S/U or letter grading.

247. Advanced Plant Biology. (4). Lecture, three hours; discussion, two hours. Required: course 162 or Molecular, Cell, and Developmental Biology C141. Open to undergraduates with consent of instructor. Designed to expose first-year graduate students to topics of current interest in plant biology. Subjects include plant genetics, growth and development, organellar structure, development and function, and plant-specific metabolic processes (photosynthesis, nitrogen fixation, metabolism of small molecules). S/U or letter grading.

250. Professional Skills for Biological Research. (2 to 3). Seminar, two hours. Preparation, writing, and submission of research proposals. Collection and maintenance of field and laboratory data, preparation of scientific papers, and preparation of scientific papers, and publishing strategies. Optional field trip offered during some years for 1 extra unit. S/U or letter grading.

251. Seminar: Systematics. (2). Seminar, two to four hours. Current topics in systematic biology, including methods development and specific applications in study of phylogeny. Theme varies from year to year. May be repeated for credit. S/U or letter grading.

259. Seminar: Herpetology. (2). Seminar, three hours. Seminar on current approaches to herpetology. Main theme varies from year to year in areas such as biogeography, ecology, behavior, environmental physiology. S/U or letter grading.

263. Seminar: Population Genetics. (2 or 4). Seminar, three to six hours. Seminar on topics of current interest in population genetics, such as kin selection, sexually antagonistic coevolution, conservation genetics, etc. S/U or letter grading.

264. Seminar: Stomatal Function. (4). Seminar, two hours; discussion, two hours. Open to undergraduates with consent of instructor. Topics include structure and function of guard cells; gas exchange; environmental and hormonal regulation of stomatal responses; sensory transduction; stomatal adaptations. S/U or letter grading.

273. Seminar: Entomology. (2). Seminar, two hours. Discussion of specific topics in entomology and related fields. Main theme varies from year to year, but usually emphasizes areas such as behavior, ecology, and evolution. S/U grading.

279. Seminar: Evolutionary Biology. (2). Seminar, two hours. Required: course M231. Emphasis on particular issue in evolutionary biology, varying in topic whenever offered. Topics may include advances in phylogenetic methodology; relationship between development and evolution; biogeography, climate change, and faunal evolution; dispersal mechanisms and macroevolutionary patterns; adaptation and diversification; macroevolutionary patterns in fossil record. S/U or letter grading.

282. Seminar: Ichthyology. (2). Seminar, two hours. Required: course 111 or 112. Student presentations and discussion of specific topics in ichthyology. Theme varies from year to year. May be repeated for credit. S/U or letter grading.

M286. Seminar: Statistical Problem Solving for Population Biology. (2). (Same as Statistics M286.) Seminar, two hours. Designed for graduate students. Statistical solutions to complex data analysis and/or experimental design problems encountered by biology graduate students in their own research. S/U or letter grading.

M290. Seminar: Comparative Physiology. (2). (Same as Physiological Science M290.) Seminar, two and one-half hours. Discussion of specific topics in comparative physiology of animal. Topics vary from year to year, with emphasis on systems physiology, neuroethology, or behavioral physiology. S/U or letter grading.

The undergraduate major provides analytical training in reference to socioeconomic phenomena and offers an excellent theoretical background for those pursuing graduate education in economics, law, management, public administration, journalism, social welfare, architecture and urban planning, and education.

The graduate program is designed primarily for students pursuing the Ph.D. degree. The doctorate is awarded to those students who have achieved the level of study and training required for a professional economist. The degree recognizes students’ ability to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas.

Undergraduate Study

Economics B.A.

Admission
Application for the Economics major should be filed at the undergraduate counselors office in 2263 Bunche Hall. To apply, students must have completed at least 72 quarter units (but no more than 137 quarter units), one 12-unit term in residence in regular session at UCLA, and all courses listed under Preparation for the Major. In addition, they must be enrolled in UCLA regular session at the time of application.

Economics Premajor
While students are completing the lower division preparation courses for the major, they may be classified as Economics premajors.

Preparation for the Major

Required: Economics 1, 2, 11, 41; one Writing II course or English Composition 129B; Mathematics 31A, and 31B or 31E. Each course must be taken for a letter grade. A 2.0 (C) grade is required in each premajor course. To enter the major, students must have a minimum 2.5 grade-point average in the economics and mathematics preparation courses and a GPA of at least 2.0 in any upper division courses taken for the major before applying.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major.

Transfer Students
Transfer applicants to the Economics major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one microeconomics course, one macroeconomics course, two calculus courses from the mathematics/physical sciences sequence, and one English critical reading and writing course.

Transfer students are required to take Econom ics 41 at UCLA rather than prior to transfer.

Transfer credit for any of the above is subject to department approval; consult an undergraduate counselor before enrolling in any courses for the major.
Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Ten upper division economics courses as follows: Economics 101, 102, 103, 103L; one course from at least three different fields in economics selected from the major fields list below; and three Economics Department upper division elective courses. No more than two of the elective courses may also be selected from Management 120A, 120B, 122, 127A, 130A, 130B.

Each course must be taken for a letter grade. Former courses 100, 110, and 120 may not be included among the 10 upper division courses. Transfer credit is subject to department approval; consult an undergraduate counselor before enrolling in any courses for the major.

To graduate, students must have at least a 2.0 grade-point average in their upper division major courses, with grades of C– or better in Economics 101, 102, 103, and 103L.

Major Fields

Applied microeconomics (courses 106H, 130, 131, M134, M135, 137, 150, 151, 183); industrial organization (courses 106E, 106I, 106P, 106T, 170); international and development economics (courses 111, 112, 121, 122); mathematical economics and econometrics (courses 106D, 106G, 107, 141, 142, 143, 145); money and banking (courses 106F, 106M, 106V, 160, 161, 164).

Economics B.A./Applied Economics M.S. Dual Program

An intercampus dual degree program between UCLA and UC Santa Cruz allows students to obtain a B.A. in Economics from UCLA and an M.S. in Applied Economics from UC Santa Cruz in five years. Consult the economics undergraduate counselor for additional information.

Business Economics B.A.

The Business Economics B.A. program offers a major for students seeking a business orientation in their study of economics. It does not replicate the traditional undergraduate business school curriculum. Instead, it offers a more tightly focused curriculum that is guided by the rigorous logic and integrative perspective of economics. It is designed to prepare students for graduate education in business, economics, and law. The program requires students to include specific courses offered by the department and the John E. Anderson Graduate School of Management (see The Major).

Admission

Enrollment in the program is limited. Applications for admission are handled exclusively by the Department of Economics. To apply, students must have completed at least 72 quarter units (but no more than 137 quarter units), one 12-unit term in residence in regular session at UCLA, and all courses listed under Preparation for the Major. In addition, they must (1) be enrolled in UCLA regular session at the time of application, (2) have a 2.0 (C) minimum grade in each preparation course, (3) have a minimum 3.0 (B) overall average in all preparation courses except the writing course, and (4) have a minimum 2.0 (C) grade-point average in their upper division courses taken for the major before applying (Economics 101 applies on the major preparation grade-point average).

The requisite grade-point averages plus completion of the preparation for the major courses do not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration.

Business Economics Premajor

While students are completing the preparation courses for the major, they may be classified as Business Economics premajors. (Transfer students who wish to enter UCLA as Business Economics premajors must meet the admission screening requirements. For information, contact the Office of Undergraduate Admissions and Relations with Schools.)

Preparation for the Major

Required: Economics 1, 2, 11, 41, 101; one Writing II course; Management 1A, 1B; Mathematics 31A, and 31B or 31E. Each course must be taken for a letter grade.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major.

Transfer Students

Transfer applicants to the Business Economics major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one microeconomics course, one macroeconomics course, two calculus courses from the mathematics/physical sciences sequence, one English critical reading and writing course.

Transfer students are required to take Economics 41 at UCLA rather than prior to transfer.

Transfer credit for any of the above is subject to department approval; consult an undergraduate counselor before enrolling in any courses for the major.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/adm_tr.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: Economics 102, 103, 103L, and at least two courses from the 106 series; English Composition 131B; five upper division elective courses in economics and management (no more than three management courses from Management 108, 120A, 120B, 122, 123, 124, 126, 127A, 127B, 130A, 130B, 140 may be applied toward the elective requirement). In addition to Economics 103 and 103L, at least two economics courses with laboratories must be completed and may be selected from either the Economics 106 series or an economics elective.

Each upper division major course must be taken for a letter grade. Transfer credit for any of the major courses is subject to department approval; consult an undergraduate counselor before enrolling in any courses for the major.

To graduate, students must have a minimum 2.0 grade-point average in their upper division major courses, with at least a C– in each course. (Economics 101 applies on the preparation for the major, therefore requiring a minimum grade of C.)

Economics/International Area Studies B.A.

The Undergraduate Council of the UCLA Academic Senate suspended admissions to the Economics/International Area Studies major effective Spring Quarter 2010. Continuing students who successfully completed the premajor courses by the end of Fall Quarter 2010 were admitted to the major. Students currently in the major and transfer students admitted to the premajor for Fall Quarter 2010 are not affected by the admissions suspension.

The Economics/International Area Studies B.A. program is for students who wish to attain specialized knowledge of a particular geographical area in addition to the economics analysis provided by the major. It should be useful to those who plan careers in international business or government service. The department encourages participation in the University of California Education Abroad Program or other recognized international study programs. Experience in foreign firms or institutions would be an advantage but yields no academic unit credit toward the major.

Admission

Qualified students must apply for the major through the undergraduate counselors office in 2263 Bunche Hall. To apply, students must have completed at least 72 quarter units (but no more than 137 units), one 12-unit term in residence in regular session at UCLA, and all courses listed under Preparation for the Major (except for the second year of foreign language). In addition, they must be enrolled in UCLA regular session at the time of application. Each course must be completed for a letter grade. A minimum 2.0 (C) grade is required in each premajor course, with a combined 3.0 GPA in the economics and mathematics courses. Students must also have a 2.0 (C) grade-point average in their upper division courses taken for the major before applying. Language course preparation need not be completed at the time of admission but must be completed before preparing the research paper required in Economics 199B. The program as a whole must be approved by an Economics Department counselor before students are admitted to the major.
Economics/International Area Studies Premajor

While students are completing the preparation courses for the major, they may be classified as Economics/International Area Studies premajors.

Preparation for the Major

Required: Economics 1, 2, 11, 41, 101, 102; Mathematics 31A, and 31B or 31E. Students also must complete at least the first year (or equivalent) of the two required years of a modern foreign language which is spoken in the geographical area of their major concentration. Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major.

Transfer Students

Transfer applicants to the Economics/International Area Studies major with 90 or more units must complete the following introductory courses prior to admission to UCLA: one microeconomics course, one macroeconomics course, two calculus courses from the mathematics/physical sciences sequence, and one year of a modern foreign language related to the geographical concentration.

Transfer students are required to take Economics 41 at UCLA rather than prior to transfer.

Transfer credit for any of the above is subject to department approval; consult an undergraduate counselor before enrolling in any courses for the major.

Refer to the UCLA Transfer Admission Guide at http://www.admissions.ucla.edu/prospect/admintro.htm for up-to-date information regarding transfer selection for admission.

The Major

Required: A total of 12 upper division courses selected from economics and the approved noneconomics courses listed below for the concentration. Eight economics courses are required, including Economics 103, 121, 122, 199B, and four economics courses from at least two different fields (selected from the major fields listed under the Economics major). Economics 101 and 102 (which are required for the premajor) cannot be used to satisfy this requirement; former courses 100, 110, and 120 may not be included as electives. The four remaining upper division courses are social sciences courses related to the concentration and must be selected from the approved courses listed below. Students are required to include selections from at least two different departments. Economics 199B must be completed in the last year before graduation and includes the preparation of a research paper on the economy of the country or region of the concentration. In addition, students must show two-year proficiency (or equivalent) in a modern foreign language related to their concentration. The economics courses, the research paper, and the language learned must show consistency of purpose. Each major course must be taken for a letter grade.

One or two courses from Management 120A, 120B, 122, 127A, 130A, 130B may be substituted for one or two of the economics electives.

To graduate, students must achieve a minimum 2.0 grade-point average for both economics and noneconomics courses, with a grade of C– or better in each course.

Major Concentrations

When students declare the major, they must also select a concentration that includes a geographical area where the foreign language they have taken is spoken. They must complete four of the approved noneconomics courses listed, including courses from at least two different departments. Students may not use courses that are not on their concentration list unless they have petitioned and received approval in advance. Consult an undergraduate counselor in 2263 Bunche Hall about the petition process.

East Asia

Languages: Chinese, Japanese, Korean

Europe

Languages: French, German, Italian, Portuguese, Spanish

Latin America

Languages: Portuguese, Spanish

Middle East

Languages: Arabic, Hebrew, Persian, Turkish

Approved Noneconomics Courses: Geography 187, History 105C, 105B, Jewish Studies M142, Political Science 132A, 157, Turkic Languages 180

Former Soviet Union

Languages: Armenian, Russian

Individual Concentration

Language, geographical area, and noneconomics courses to be approved in advance by the economics/international area studies faculty adviser

Mathematics/Economics B.S.

See the Mathematics/Economics listing for a description of the major.

Honors Program

The departmental honors program is open to majors in Economics, Business Economics, and Economics/International Area Studies who have a cumulative grade-point average of at least 3.5 in the major and in all courses taken at UCLA prior to application.

To qualify for departmental honors at graduation, students must (1) select at least seven of the required upper division economics courses from the approved list designated for departmental honors, (2) complete a two-semester senior thesis acceptable to the departmental honors committee in Economics 198A and 198B, and (3) complete the major requirements with at least a 3.5 grade-point average in the economics courses. Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

Economics 198A and 198B, the courses required for thesis preparation, may be counted as upper division courses toward the field in which the thesis is written (for purposes of satisfying the requirements for the major). Further information and application forms are available from an undergraduate counselor in 2263 Bunche Hall.

Computing Specialization

The specialization in Computing is not a major, but a supplement to the three departmental majors. It provides an extensive education in elementary computer science and an introduction to its applications in economics.

Majors in Economics, Economics/International Area Studies, and Business Economics may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major and (2) completing Mathematics 61, Program in Computing 10A, 10B, two courses from Program in Computing 10C, 15, 20A, 20B, 30, 40A, 60, and at least two courses from Economics 103, 106P, 141, 143, 151, 199A, with a minimum grade of C– in each course and a combined grade-point average of at least 2.0. Students must petition for admission to this program in the undergraduate counselors office, 2263 Bunche Hall, and are advised to do so after they complete Program in Computing 10B and are officially admitted to one of the above majors. Students graduate with a bachelor's degree in their major and a specialization in Computing.

Graduate Study

Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa/library/pgmrqintro.htm. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.
Graduate Degrees
The Department of Economics offers Master of Arts (M.A.), Candidate in Philosophy (C.Phil.), and Doctor of Philosophy (Ph.D.) degrees in Economics.

Economics
Lower Division Courses
1. Principles of Economics. (4). Lecture, three hours; discussion, one hour. Not open to students with credit for former course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on intuitive understanding rather than on rigorous arguments; concepts illustrated with applications in economics. P/NP or letter grading.

2. Principles of Economics. (4). Lecture, three hours; discussion, one hour. Enforced requisite: course 1. Not open to students with credit for former course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on intuitive understanding rather than on rigorous arguments; concepts illustrated with applications in economics. P/NP or letter grading.

3. Partial Differentiation and Elementary Integral Calculus. (4). Formerly numbered 188B. Seminar, three hours. Enforced requisites: courses 11, 101, 102. Enforced corequisite: course 106A. Students, in groups of four, address three small problems and one more complex problem. Discussion of student-proposed solutions to problems in their groups, with small-group discussions to student presentations of results in class. Emphasis on intuitive understanding rather than on rigorous arguments; concepts illustrated with applications in economics. P/NP or letter grading.

5. Introductory Economics. (4). Lecture, three hours. Not open to students with credit for course 1, 2, or former course 100. Principles of economics as tools of analysis. Presentation of set of concepts with which to analyze wide range of social problems that economic theory illuminates. May not be used to fulfill entrance requirements for any Economics Department major. P/NP or letter grading.

6. Microeconomic Theory. (4). Lecture, three hours; discussion, one hour. Enforced requisites: courses 1, 2, one course from Mathematics 31B, 31BH, 31E, 32A, Laws of demand, supply, returns, and costs; price and output determination in different market situations. P/NP or letter grading.

7. Microeconomic Theory. (4). Lecture, three hours; discussion, one hour. Enforced requisites: courses 1, 2, one course from Mathematics 31B, 31BH, 31E, 32A, Laws of demand, supply, returns, and costs; price and output determination in different market situations. P/NP or letter grading.

9. Economic Toolkit. (2). Lecture, two hours. Should be taken prior to taking course 11. Coverage of essential mathematical and spreadsheet tools that Economics majors use in their core courses and upper division elective courses. Review of algebra (graphing lines, solving systems of equations), geometry (determining areas), calculus (first derivatives, partial differentiation, elementary integral calculus), and Business calculus (cost, revenue, marginal cost, marginal revenue, marginal profit). Hands-on data collection, using simple mathematical, mathematical, and financial functions, use of Solver). Offered in summer only. P/NP grading.

Upper Division Courses
101. Microeconomic Theory. (4). Lecture, three hours; discussion, one hour. Requisite: course 11. Theory of factor pricing and income distribution; general equilibrium; implications of pricing process for optimum allocation of resources; interest and capital. P/NP or letter grading.

103. Introduction to Econometrics. (4). Lecture, three hours; discussion, one hour. Enforced requisites: courses 11, 101, 102, 170A or Statistics 100A. Enforced corequisite: course 103L. Introduction to theory and practice of econometrics, with goal to make students effective consumers and producers of research in econometrics. Emphasis on intuitive understanding rather than on rigorous arguments; concepts illustrated with applications in economics. P/NP or letter grading.

103L. Econometrics Laboratory. (1). Lecture, one hour; laboratory, one hour. Requisites: courses 11, 41 or Statistics 11 or 100A. Enforced corequisite: course 103. Econometric analysis of case-based studies. Hands-on data collection and problem solving. Use of econometric software. P/NP or letter grading.

106A. Economics in Practice. (4). Formerly numbered 188B. Seminar, three hours. Enforced requisites: courses 11, 101, 102. Enforced corequisite: course 106A. Students, in groups of four, address three small problems and one more complex problem. Discussion of student-proposed solutions to problems in their groups, with small-group discussions to student presentations of results in class. Emphasis on intuitive understanding rather than on rigorous arguments; concepts illustrated with applications in economics. P/NP or letter grading.

106AL. Economics in Practice Laboratory. (1). Lecture, one hour; laboratory, one hour. Enforced requisites: courses 11, 101, 102. Enforced corequisite: course 106A. Case-based analysis requiring students to apply material from course 106A to real-world problems regarding issues such as economic theory and empirical methods. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

106B. Economics in Practice Laboratory. (1). Lecture, one hour; laboratory, one hour. Enforced requisite: course 106F. Case-based analysis requiring students to apply theory from course 106F to real-world problems regarding topics such as discounted cash flow analysis, CAPM model, applications to public policy, and more. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

106C. Introduction to Game Theory. (4). Lecture, three hours; discussion, one to two hours (when scheduled). Requisite: course 101. Enforced corequisite: course 106C. Enrolment priority to Business Economics majors. Introduction to basic ideas of game theory and strategic thinking. Discussion of ideas such as dominance, backward induction, Nash equilibrium, commitment, credibility, asymmetric information, and signaling, with application to examples from economics, politics, business, and other real-life situations. Letter grading.

106L. Organization of Firms. (4). Lecture, three hours. Requisites: courses 11, 101. Enrollment priority to Business Economics majors. Focus on the development of firms to patterns observed in financial markets and to understand when it is that further theoretical refinements are required to better account for certain observed patterns. Development of understanding of potential effects of monetary and regulatory policies on financial markets. Topics include bond market, stock market, foreign exchange market, financial crises, and financial regulators. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

106M. Financial Markets and Financial Institutions. (4). Lecture, three hours; discussion, one hour. Requisite: courses 11, 101, 102. Enforced corequisite: course 106M. Application of analytical tools of economics and finance to real-world problems in financial markets. Introduction to pattern models students have learned in prior courses to patterns observed in financial markets and to understand when it is that further theoretical refinements are required to better account for certain observed patterns. Development of understanding of potential effects of monetary and regulatory policies on financial markets. Topics include bond market, stock market, foreign exchange market, financial crises, and financial regulators. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

106PB. Finance Laboratory. (1). Formerly numbered 106FL. Lecture, one hour; laboratory, one hour. Requisite: course 102. Enforced corequisite: course 106F. Case-based analysis requiring students to apply theory from course 106F to real-world problems regarding topics such as discounted cash flow analysis, CAPM model, applications to public policy, and more. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

106PL. Pricing and Strategy Laboratory. (1). Lecture, one hour; laboratory, one hour. Requisite: course 101. Enforced corequisite: course 106P. Case-based analysis requiring students to apply material from course 106P to real-world problems involving linear programming and shadow pricing, peak load pricing, two-part pricing, strategic pricing, and auctions and bidding. Hands-on data collection and problem solving presented in student analyses in writing. P/NP or letter grading.

106T. Economics of Technology and E-Commerce. (4). Lecture, three hours. Requisites: courses 11, 101. Enforced corequisite: course 106TL. Use of rigorous economic tools to analyze world of technology and e-commerce. Examination of economic theory, empirical analysis, and case studies to study variety of new markets. Topics include bidding in online auctions, two-sided markets, network markets, and reputation mechanisms. Written case on one particular firm and presentation required. P/NP or letter grading.

106TL. Economics of Technology and E-Commerce Laboratory. (1). Lecture, one hour; laboratory, one hour. Requisite: course 11, 101. Enforced corequisite: course 106T. Case-based analysis requiring students to apply theory from course 106T to real-world problems regarding issues such as bidding in online auctions, two-sided markets, network markets, and reputation mechanisms. Written analysis on one particular firm and presentation required.

106VL. Investments Laboratory. (1). Lecture, one hour; laboratory, one hour. Requisite: course 102. Recommended: course 106V. Enforced corequisite: course 106V. Use of rigorous economic tools to analyze world of technology and e-commerce. Examination of economic theory, empirical analysis, and case studies to study variety of new markets. Topics include bidding in online auctions, two-sided markets, network markets, and reputation mechanisms. Written case on one particular firm and presentation required. P/NP or letter grading.

111. Theories of Economic Growth and Development. (4). Lecture, three hours. Requisites: courses 11, 101, 103. Application of theoretical and empirical tools from microeconomics to provide insights into problems confronting low-income countries today and to evaluate policies that are likely to be effective in improving well-being of poorest on globe. P/NP or letter grading.

122. International Finance. (4). Lecture, three hours; discussion, one hour. Requisite: course 102. Enforced corequisite: course 122L. International Finance Laboratory. (1). Lecture, one hour; laboratory, one hour. Requisite: course 102. Enforced corequisite: course 122L. Case-based analysis requiring students to apply material from course 122 to real-world problems involving international finance. Topics and analysis include balance of payments and exchange rates under various monetary standards, capital movements, exchange controls, and international monetary organization. P/NP or letter grading.

122L. International Finance Laboratory. (1). Lecture, one hour; laboratory, one hour. Requisite: course 102. Enforced corequisite: course 122L. Case-based analysis requiring students to apply material from course 122 to real-world problems involving international finance. Topics and analysis include balance of payments, exchange rates under various monetary arrangements, capital flows, exchange controls, and international monetary organization. Hands-on data collection and problem solving and presentation of student analyses in writing. P/NP or letter grading.

123. Foreign Exchange Market and Exchange Rate Forecasting. (4). Lecture, three hours. Enforced requisites: courses 11, 101. Survey of broad range of policy and theoretical issues that are raised when economic analysis is applied in urban setting. Topics include urbanization and urban growth, housing markets, location decisions of households and firms, transportation, urban labor markets, and local public sector. P/NP or letter grading.

130L. Public Economics Laboratory. (1). Lecture, one hour; laboratory, one hour. Requisites: courses 11, 101, 103. Enforced corequisite: course 130L. Case-based analysis requiring students to apply theory from course 130 to real-world problems regarding government spending programs, taxation, deficit financing, and federal credit programs. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

132. Topics in Taxation and Social Insurance. (4). Lecture, three hours; discussion, one hour. Requisites: courses 11, 101. In-depth examination of selected topics related to current policy debates. Topics vary from year to year but include social insurance and policy or social insurance. Topics may include optimal taxation; tax inefficiencies and their implications for labor supply, savings, and investment; income redistribution and personal income tax; corporate taxation and implications for firms’ investment and financing decisions; Social Security and SSDI reform; and welfare programs. P/NP or letter grading.

M134. Environmental Economics. (4). (Formerly numbered M134A). Enforced requisite: course 102. Lecture, three hours. Requisites: course 101 or Statistics 12 or 13, and course 101 may be waived with consent of instructor. Introduction to major ideas in natural resources and environmental economics, with emphasis on designing incentives to protect environment. Highlights important role of using empirical data to test hypotheses about pollution’s causes and consequences. P/NP or letter grading.

M135. Economic Models of Public Choice. (4). (Same as Political Science M105.) Lecture, three or four hours; discussion, one hour (when scheduled). Preparation: two upper division courses in political science and economics. Enforced requisite: course 11. Designed for juniors/seniors. Analysis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-rider problems, voting and majority choice, demand revelation, and political bargaining. P/NP or letter grading.

137. Introduction to Urban and Regional Economics. (4). Lecture, three hours. Requisite: course 11. Survey of broad range of policy and theoretical issues that are raised when economic analysis is applied in urban setting. Topics include urbanization and urban growth, housing markets, location decisions of households and firms, transportation, urban labor markets, and local public sector. P/NP or letter grading.

140. Inequality: Mathematical and Econometric Approach. (4). Lecture, three hours. Requisites: courses 101, 103, and Mathematics 33A or 115A. In past decade economists have learned remarkable amount about how society works. Increased understanding through application of distinctively economic models and use of techniques to analyze the economic determinants of inequality—education, income, earnings, wealth, income distribution, and the economic causes of inequality. Introduction to major ideas in inequality—education and health. P/NP or letter grading.

141. Topics in Microeconomics: Mathematical Finance. (5). (Formerly numbered 141A). Lecture, three hours; computer laboratory, one hour. Requisite: course 11, Mathematics 32A, either Statistics 100A or Mathematics 170A. Economics of financial markets, competitive equilibrium with time and uncertainty, one period security market model, market completeness. P/NP or letter grading.

143. Advanced Econometrics. (4). Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 103. Not open for credit to students who have credit for former course 143. Use of rigorous economic tools to analyze phenomena such as insurance, job search, and stock market behavior. Optimal production and consump- tion under uncertainty. Probability of and interpretation of alternative measures of risk and risk aversion. P/NP or letter grading.
144. Economic Forecasting. (4). Lecture, three hours. Preparation: familiarity with data analysis software (e.g., R, Excel, MATLAB, Stata) and/or programming experience. Enforced requirements: courses 101, 103, 103L. Survey of theory and application of time-series methods to forecasting in economics, business, and government. Topics include modeling and forecasting techniques, seasonal adjustment cycles, discussion of stochastic trends, volatility measure, and evaluation of forecasting techniques. Hands-on approach to real-world data analysis with widely used business and other professionals. P/NP or letter grading.

145. Topics in Microeconomics: Mathematical Economics. (4). Lecture, three hours. Requisite: course 101. Possible topics include game theory; comparative statics; analysis; examples of market failure and role for market intervention. P/NP or letter grading.

C16A-C16B-C16C. Seminars: Asset Pricing. (4-4-4). Seminar, three hours. Requisites: courses 11, 101, 102. Limited to seniors. Overview of most current developments in monetary economics and macroeconomics for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C276A-C276B-C276C. P/NP or letter grading.

150L. Labor Economics Laboratory. (1). Lecture, one hour; laboratory, one hour. Requisite: courses 11, 101, 103. Enforced corequisite: course 150. Case-based analysis requiring students to apply theoretical tools to course 150 to real-world problems involving labor economics. Topics include labor supply decisions, household production decisions, life-cycle aspects of labor supply, short-run and long-run labor demand, monopsony in labor market, quasi-fixed labor costs and labor demand, human capital, and other extended topics. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

151. Topics in Labor Economics. (4). Lecture, three hours. Requisites: courses 101, 105. Selected topics in labor market theory; income distribution; business cycles and unemployment; investments in human capital and its role on fertility; marriage and divorce, etc. P/NP or letter grading.

C156A-C156B-C156C. Seminars: Labor Economics. (4-4-4). Seminar, three hours. Requisites: courses 11, 101, 102. Limited to seniors. Overview of most current developments in labor economics for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C276A-C276B-C276C. P/NP or letter grading.

170L. Industrial Organization: Theory and Tactics Laboratory. (1). Lecture, one hour; laboratory, one hour. Requisite: course 101. Enforced corequisite: course 170L. Case-based analysis requiring students to apply material from course 170 to real-world problems involving monopoly, collusion, strategic firm behavior, pricing practices, antitrust and other topics. Hands-on data collection and problem solving and presentation of student analyses both orally and in writing. P/NP or letter grading.

173A-173B. Introduction to Social Entrepreneurship. (4-4). Lecture, one hour; research group meeting, two hours. Course 173A is requisite to 173B. Fully developed business plans for social enterprises. Students are assigned in teams to develop business plans for social enterprises to which they are assigned. Teams receive support from M.B.A. students who act as advisors. Topics include collaboration and team building, importance of culture, marketing, strategy, evaluation of opportunities, management skills, and financial management. P/NP or letter grading.

186L. Advanced Topics in Macroeconomics: Theory of Economic Growth Laboratory. (1). Laboratory, one hour. Enforced corequisite: course 186L. Course in macroeconomics that employs both theoretical and empirical tools to analyze wide range of topics related to economic growth. Topics include labor markets, human capital formation, international trade, and distribution of income. P/NP or letter grading.

187. Upper Division Research Seminar: Applications of Economic Theory. (4). Seminar, three hours. Limited to seniors. Overview of most current developments in economic history for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C264A-C264B-C264C. P/NP or letter grading.

188. Career Development. (1). Lecture, one hour. Enrollment priority to departmental majors. Designed to provide Business Economics majors with key knowledge and practical skills used in real world that complement traditional academics to maximize inter- view, communication, and presentation skills and strengthen résumé building. Coverage of career paths in business profession in various aspects to broaden students' knowledge of career opportunities. Review of course materials and current information on careers, income, unemployment, banking crises, market up- dates, and all related business topics. P/NP or letter grading.

195A-195B. Community or Corporate Internships in Economics I, II. (4-4)-T. Tutorial, to be arranged. Requisite: courses 11, 101. Limited to junior/senior Economics, Business Economics, Economics/International Area Studies, and Mathematics/Economics majors. Internship to be supervised by Economics Department. Further supervision to be provided by business, community, or corporate sponsor. Individual contract is to be arranged by student and Economics Department. Students meet on regular basis with instructor and provide periodic reports of their experience. May not be applied toward major requirements. Only 8 units from courses 195A and 195B may be applied toward undergraduate degree. Individual contract with supervising faculty member required. P/NP grading.

195C. Community and Corporate Internships in Economics, 195CE, 195CF, 195CG, 195CH, 195CI, 195CJ, 195CK, 195CL, to be arranged; fieldwork, eight to 10 hours. Requisites: courses 11, 101. Limited to juniors/seniors. Internship in corporate, governmental, or nonprofit setting coordinated by Economics Department. Students complete weekly written assignments, attend biweekly meetings with graduate student coordinator, and write final research paper. Faculty sponsor and graduate student coordinator construct series of reading assignments that examine issues related to internship site. May not be applied toward major requirements. May be repeated for credit with consent of department. Students must secure contract with supervising faculty member required. P/NP or letter grading.

198A. Honors Research in Economics I. (4). Tutorial, three hours. Requisite: courses 11, 101, 102. Limited to senior departmental honors program students. First term of two-term sequence in which students develop honors thesis or comprehensive research project under direct supervision of faculty member. Individual contract required. In Progress grading (credit to be given only on completion of course 198B).

198B. Honors Research in Economics II. (4). Tutorial, three hours. Requisite: course 198A. Limited to senior departmental honors program students. Second term of two-term sequence in which students complete honors thesis or comprehensive research project under direct supervision of faculty member. Individual contract required. Letter grading.

199A. Directed Research in Economics. (4). Tutorial, three hours. Requisites: courses 11, 101, 102. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Open only to students who have completed major requirements. May be repeated twice but may be applied only once toward major requirements. Individual contract required. P/NP or letter grading.

199B. Directed Research in Economics/International Area Studies. (4). Tutorial, four hours. Requisites: courses 103, and 121 or 122. Limited to senior Economics/International Area Studies majors. Students prepare research papers under guidance of faculty mentor on economy of country or region of specialization. May be repeated for credit. Individual contract required. Letter grading.

Graduate Courses

200. Mathematical Methods in Economics. (4). Lecture, three hours. Should be taken prior to enrollment in course 201A. Examination of mathematical methods used in graduate-level courses in microeconomics, macroeconomics, and quantitative methods. Topics include real analysis, linear algebra and matrices, calculus of many variables, static optimization, convex analysis, and dynamic systems. P/NP grading.

200B. Mathematical Methods in Economics II. (4). Lecture, three hours; laboratory, two hours. Should be taken prior to enrollment in course 201B. Linear algebra and its application to linear difference equations. Basic real analysis, normed vector space, Banach space, Hahn/Banach theorem, Schauder fixed point theorem, and theory of correspondences. S/U grading.

201A-201B-201C. Microeconomics. (4-4-4). Lecture, three hours. S/U or letter grading.

204A-204B-204C. Applications of Economic Theory. (4 each) Lecture, three hours. S/U or letter grading.

204B-204B-204C. California Population Research Seminar Series. (4-4-4) Formerly numbered 204A. Same as Sociology M225A. Seminar, three hours. Discussion of cutting-edge and timely topics in demography, health, aging, labor, and broad array of topics con-cerned with effects of economic, social, and political transformations on human behavior both in U.S. and abroad. Each course may be taken independently for credit. S/U grading.

204M. Microeconomic Theory. (4) Lecture, three hours. S/U or letter grading.

205. Economic Modeling. (4) Lecture, three hours. Development of model-building techniques involved in econometric courses. In past decade economists have learned remarkable amount about how society works. Increased understanding has come about through application of mathematical methods of research—explicitly mathematical models and ecletic statistical techniques—to topics such as healthcare, crime, education, and immigration. Taken together this work has led to increased understanding of inequality, how to measure it, how inequality has in-creased in U.S., how America differs from other rich countries and, most important, what causes in-equality, Study of this work, with focus on two im-portant influences on inequality—education and health—which are two areas in which knowledge is accumulating most rapidly. S/U grading.

206. Law and Economics Workshop. (2 or 3). Seminar, two hours. Requisites: course 210A or Management 405. Knowledge of empirical methods and basic calculus required. Interdisciplinary speakers series bringing together outside speakers with scholars and students from UCLA Law School and academic de-partments. Topics include contracts, torts, intellectual property, and business law. Students write graded re-ports. May be repeated for credit. Concurrently scheduled with Law 648 and Management 294. S/U or letter grading.

207. History of Economic Thought. (4) Lecture, three hours. Topics from classical economics, in-cluding work of Smith, Ricardo, and Mill, and develop-ments from 1870s, including contributions of major figures of marginalistic revolution, socialist contro-versy, and history of welfare economics. S/U or letter grading.

M208. Introduction to Demographic Methods. (4). (Same as Biostatistics M208, Community Health Sciences M208, and Sociology M213A) Lecture, four hours. Preparation: one introductory statistics course. Introduction to methods of demographic analysis. Topics include demographic rates, standardization, decomposition of differences, life tables, survival analysis, cohort analysis, birth interval analysis, models of population growth, stable populations, population projection, and demographic data sources. Letter grading.

Economic Theory

211B. Economics of Uncertainty, Information, and Games. (4). Lecture, three hours. Preparation: intro-ductory probability. Enforced requisite: course 201C. Theory of individual decision making under uncer-
tainty, applied to topics such as asset pricing models, adverse selection, moral hazard, bargaining, signaling, auctions, and search. S/U or letter grading.

211C. EconomicApplications. (4). Lecture, three hours. Preparation: introductory probability. Enforced requisite: course 201C. Intended for students who are interested in doing research in microeconomic or macroeconomic theory for students who want to acquire good theory background to do applied work. Coverage of combination of standard results in field and topics of current research, including notions of equilibrium in static and dynamic games, reasoning in games, repeated games, games of incomplete information, and experiments. S/U or letter grading.

212A-212Z. Topics in Advanced Theory. (4 each). Lecture, three hours. Current research in microeconomic theory and macroeconomic theory. In this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

212B. Applied Game Theory. (4). Lecture, three hours. Preparation: calculus, introductory probability. Use of theory of Bayesian games to study bargaining, monetary theory, and oligopoly. Use of theory of mechanisms to study auction design and imperfectly competitive markets. May be repeated for credit. S/U or letter grading.

213A-213B. General Equilibrium and Game Theory. (4-4). Lecture, three hours. Requisite: course 201C. Selected advanced theoretical topics of current interest and introduction to modern mathematical economics, including general equilibrium theory and game theory. S/U or letter grading.

214A-214Z. Topics in Mathematical Economics. (4 each). Lecture, three hours. Requisite: course 213B. Current research in mathematical economics. Content varies. Ordinarily only two courses in this sequence given every year. May be repeated for credit. S/U or letter grading.

214A. General Equilibrium Theory. (4). Lecture, three hours. Requisite: course 201C. Core convergence theorem, cooperative and noncooperative approach to competitive equilibrium theory, perfectly competitive equilibria, no-subsidiary condition, and applications to mechanism theory and incomplete market models. May be repeated for credit. S/U or letter grading.

218A-218B-218C. Proseminars: Economic Theory. (4-4-4). Seminar, three hours. Quarterly seminars for predissertation and dissertation writers. Discussion of advanced topics and recent developments in game theory, information and uncertainty, and general equilibrium theory. Presentation of recent papers published and unpublished in economic theory as well as research of instructor and students. In-class presentation and discussion on recent work in game theory. S/U or letter grading.

219A-219B-219C. Workshops: Economic Theory and Mathematical Economics. (4-4-4). Lecture, three hours. Workshops for predissertation and dissertation writers. Research in progress presented, discussed, and critiqued by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading. Also see Management 230A (decision theory)

Monetary Economics

221A-221D. Monetary Economics I to IV. (4 each). Lecture, three hours. S/U or letter grading.

221D. Monetary Economics IV. (4). Lecture, three hours. Requisites: courses 202A, 202B, 202C. Emphasis on applied macroeconomics, with topic change each year. Students select one particular data set to set to study. Current research in monetary economics and macroeconomics for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and critiqued by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C166A-C166B-C166C. S/U (C226B) and S/U or letter (C226A, C226C) grading.

228A-228B-228C. Proseminars: Monetary Economics. (4-4-4). Seminar, three hours. Workshops for predissertation and dissertation writers. Literature surveys or research in progress presented, discussed, and critiqued by visiting experts, UCLA faculty members, advanced graduate students. Research paper or presentation required. S/U grading.

229A-229B-229C. Workshops: Monetary Economics. (4-4-4). Lecture, three hours. Workshops for predissertation and dissertation writers. Research in progress presented, discussed, and critiqued by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading. Also see Management 239A, 239B, 239C (Ph.D. sequence in finance), 239D (advanced topics in finance), 239X, 239Y, 239Z (finance workshops)

Econometrics

232A. Bayesian Econometrics. (4). (Same as Political Science M208E.) Lecture, three hours. Requisites: courses 231A, 231B. Introduction to decision theory, Bayesian analysis of regres- sion, sensitivity analysis, simplification of models, criti- cism. May be repeated for credit. S/U or letter grading.

Economic History

246A-C246B-C246C. Seminars: Economic His- tory. (4-4-4). Seminar, three hours. Designed for pre- dissertation and dissertation writers. Overview of most current developments in economic history for advanced undergraduate and graduate students. In- troduction to graduate-level research in this field. Different topic each week, with presentation and discus- sion of new papers. Research in progress presented, discussed, and critiqued by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C186A-C186B-C186C. S/U grading.

246A-246B-246C. Workshops: History of Entrepreneurship in U.S. Economy. (4-4-4). Lecture, three hours. Designed for graduate students. Workshops for advanced graduate students. Research in progress discussed by visiting experts, UCLA faculty members, graduate students. Concurrently scheduled with courses C186A-C186B-C186C. S/U grading.

Public Finance

251A. Theory and Policy of Taxation. (4). Lecture, three hours. Examination of influence of taxation on economic efficiency and income distribution in first part of course. Topics include tax equivalences, Ramsey rules, and alternative forms of taxation. Spe-
cial tax provisions, tax incentives, and progressiveivity in taxation in second part of course. S/U or letter grading.

251B. Cost-Benefit Analysis of Public Projects and Programs. (4) Lecture, three hours. Requisite: course 251A. Presentation of those aspects of applied capital theory that are relevant in decisions concerning investment in public projects. Differences between social and private benefits and costs (shadow prices) for foreign exchange, capital, and labor, with applications to public investment decisions, in second part of course. S/U or letter grading.

252. Economics of Federalism. (4) Lecture, three hours. Theories of perfect games and social organization. Role of government, collective goods, collective defense, local public goods, spillovers, and intergovernmental relations. S/U or letter grading.

254A-254B-254C. Workshops: Public Economics. (4-4-4). Lecture, three hours. Workshops for advanced graduate students. Workshops for advanced graduate students. Research in progress presented, discussed, and critiqued by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U or letter grading.

Industrial Organization

271B. Industrial Organization, Price Policies, and Regulation II. (4) Lecture, three hours. Requisite: course 271A. Study of firm organization and pricing under conditions of less than perfect competition; information costs and advertising; economic and legal analysis of marketing practices such as discrimination, tying, exclusive dealing, territorial arrangements. S/U or letter grading.

262D. Development Economics. (4) Lecture, three hours. Preparation: completion of first-year graduate microeconomics and econometrics courses. Coverage of important topics in microeconomics of development, such as health, education, risk coping, savings, credit, and household economics. Discussion of empirical methods. S/U or letter grading.

262F. Public Sector Microeconomics. (4) Lecture, three hours. Preparation: completion of first-year graduate microeconomics and econometrics courses. Coverage of topics related to tax incidence, deadweight loss, public expenditure, income taxation and transfer programs, with emphasis on impacts of such programs on labor supply and savings, social security, unemployment insurance, and other insurance programs. S/U or letter grading.

C266A-C266B-C266C. Seminars: Labor Economics. (4-4-4). Seminar, three hours. Dedicate to predissertation and dissertation writers. Overview of most current developments in labor economics for advanced undergraduate and graduate students. Introduction to graduate-level research in this field. Different topic each week, with presentation and discussion of new papers. Research in progress presented, discussed, and critiqued by visiting experts, UCLA faculty members, and advanced graduate students. Concurrently scheduled with courses C176A-C176B-C176C. S/U (C266A) and S/U or letter (C266B, C266C) grading.

268A-268B-268C. Proseminars: Labor and Population. (4-4-4). Seminar, three hours. Quarterly seminars for predissertation and dissertation writers working on empirical issues in areas of labor and population, broadly defined. Presentation of work-in-progress or background material for proposed thesis topics, to be discussed and critiqued by faculty and fellow students. Research paper or research paper required. S/U or letter grading.

International Economics

Development Economics

286B. Cost-Benefit Analysis of Development Projects. (4) Lecture, three hours. Requisite: course 286A. Methodology for evaluating investment projects, with special attention to types of issues that arise in developing countries. Discussion of social versus private-rate evaluation criteria; applications to highway, electricity, and irrigation projects. S/U or letter grading.

287A-287Z. Topics in Development Economics. (4 each). Lecture, three hours. Current research in development economics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

287B. Economic Development in East Asia. (4) Lecture, three hours. Recent economic history of East Asia, focusing on postwar development of Japan, Korea, and China. Emphasis on role of international investment and trade, especially in area's economic development. May be repeated for credit. S/U or letter grading.

287C. Topics in Economic Development. (4) Lecture, three hours. Designed for graduate students. Topics in monetary and exchange rate policy in developing countries. Students expected to develop analytical tools and underlying policy issues. May be repeated for credit. S/U or letter grading.

Professors
Walter R. Allen, Ph.D. (Allan Murray Cartter Professor of Higher Education)
Alison L. Bailey, Ed.D.
Li Cai, Ph.D.
Mitchell J. Chang, Ph.D.
Christina A. Christie, Ph.D.
Sol Cohen, Ph.D.
Megan L. Franke, Ph.D.
Louis M. Gomez, Ph.D. (MacArthur Foundation Professor of Digital Media and Learning)
Sandra H. Graham, Ph.D. (Presidential Professor of Education and Diversity)
Tyrone C. Howard, Ph.D.
Sylvia Hurtado, Ph.D.
Connie L. Kasari, Ph.D.
Douglas M. Kellner, Ph.D. (George F. Kneller Professor of Education and Philosophy)
Reynaldo F. Macias, Ph.D.
Teresa L. McCarty, Ph.D.
Patricia M. McDonough, Ph.D.
Marjorie Faulstich Orellana, Ph.D.
Robert A. Rholes, Ph.D.
John S. Ryan, Ph.D.
Linda J. Sax, Ph.D.
Michael H. Seltzer, Ph.D.
Daniel G. Solórzano, Ph.D.
Carola E. Suárez-Orozco, Ph.D.
Marcelo M. Suárez-Orozco, Ph.D.
Carlos A. Torres, Ph.D.
Norine M. Webb, Ph.D.

Professors Emeriti
Marvin C. Alkin, Ed.D.
Alexander W. Astin, Ph.D. (Allan Murray Cartter Professor Emeritus of Higher Education)
Helen S. Astin, Ph.D.
Eva L. Baker, Ed.D.
Gordon L. Berry, Ed.D.
Nicholas G. Blarton Jones, Ph.D.
James S. Catterall, Ph.D.
Arthur M. Cohen, Ph.D.
Donald A. Erickson, Ph.D.
Frederick D. Erickson, Ph.D. (George F. Kneller Professor Emeritus of Education and Anthropology)
Norma D. Feshbach, Ph.D.
Patria C. Gándara, Ph.D.
Simon González, Ed.D.
John I. Goodlad, Ph.D., L.H.D., LL.D.
Kris D. Gutiérrez, Ph.D.
Sandra Harding, Ph.D.
John N. Hawkins, Ph.D.
Charles G. Healy, Ph.D.
Carolee Howes, Ph.D.
Barbara K. Keogh, Ph.D.
Marilyn L. Kouriński, Ph.D.
Peter L. McLaren, Ph.D.
John D. McNiel, Ed.D.
Bengt Muthén, Ph.D.
Don T. Nakankisho, Ph.D.
Jeanne L. Oakes, Ph.D. (Presidential Professor Emerita of Educational Equity)
Gary A. Orfield, Ph.D.
W. James Popham, Ed.D.
Mike A. Rose, Ph.D.
Val D. Rust, Ph.D.
Rodney W. Skager, Ph.D.
Romelia Tiidwell, Ph.D.
Carl Weinberg, Ed.D.
Richard C. Williams, Ph.D.
Welford W. Wilms, Ph.D.
Charles Z. Wilson, Ph.D.

Associate Professors
Robert Cooper III, Ph.D.
Noel D. Enyedy, Ph.D.
Kimberley Gomez, Ph.D.
José-Felipe Martinez, Ph.D.
Rashmita S. Mistry, Ph.D.
Edith Mukubi Omwami, Ph.D.
William A. Sandoval, Ph.D.
Concepción M. Valadez, Ph.D.
Jeffrey J. Wood, Ph.D.

Assistant Professors
M. Kevin Eagan, Jr., Ph.D., in Residence
David G. Garcia, Ph.D.
Jennie K. Grammer, Ph.D.
Mark P. Hansen, Ph.D., in Residence
Thomas M. Philip, Ph.D.
Jane E. Pizzato, Ph.D.
Federica Raia, Ph.D., in Residence
Gerardo Ramirez, Ph.D.

Adjunct Professors
Diane Durkin, Ph.D.
Elloise Lopez Metcalfe, Ph.D.
Faye C. Pelzman, Ph.D.
Jody Z. Plisse, Ed.D.
Linda P. Rose, Ph.D.
Eugene Tucker, Ed.D.
Richard L. Wagoner, Ph.D.

Scope and Objectives
As one of the top-ranked public graduate programs in education in the nation, the Department of Education is guided by a commitment to integrate theory and practice and to improve educational practice and policy. The department attracts prominent scholars and is internationally recognized for its research centers in evaluation, higher education, child development, and urban education. Whether students choose to pursue a Ph.D., an Ed.D., or a master’s
degree, or a services or instructional credential, they graduate with a broad understanding of educational theory and tested practice.

Undergraduate Study

Education Studies Minor

The Education Studies minor is intended to address the diverse information needs of the UCLA undergraduate community to (1) allow students to learn more about the multitude of contemporary professional research issues confronting the field of education, (2) understand the complex interactions between the legal, social, political, and economic forces that influence and shape educational policies in America, (3) provide an introductory course sequence for students who wish eventually to pursue careers in education either as teachers or researchers, and (4) provide an analysis of current educational practices by which UCLA students can become better consumers of educational services as future parents, taxpayers, and citizens.

To enter the minor, students must have completed one minor course from the approved course list, have at least sophomore standing with a minimum overall 2.3 (C+) grade-point average, and file an application with the Office of Student Services, 1009 Moore Hall, to address the diverse information needs of the UCLA undergraduate community to (1) allow students to learn more about the multitude of contemporary professional research issues confronting the field of education, (2) understand the complex interactions between the legal, social, political, and economic forces that influence and shape educational policies in America, (3) provide an introductory course sequence for students who wish eventually to pursue careers in education either as teachers or researchers, and (4) provide an analysis of current educational practices by which UCLA students can become better consumers of educational services as future parents, taxpayers, and citizens.

To enter the minor, students must have completed one minor course from the approved course list, have at least sophomore standing with a minimum overall 2.3 (C+) grade-point average, and file an application with the education studies academic adviser in the Office of Student Services, 1009 Moore Hall, to address the diverse information needs of the UCLA undergraduate community to (1) allow students to learn more about the multitude of contemporary professional research issues confronting the field of education, (2) understand the complex interactions between the legal, social, political, and economic forces that influence and shape educational policies in America, (3) provide an introductory course sequence for students who wish eventually to pursue careers in education either as teachers or researchers, and (4) provide an analysis of current educational practices by which UCLA students can become better consumers of educational services as future parents, taxpayers, and citizens.

Graduate Degrees

The Department of Education offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Education, Master of Education (M.Ed.) degree, Doctor of Education (Ed.D.) degree, Doctor of Philosophy (Ph.D.) degree in Special Education (with California State University, Los Angeles), and Doctor of Education (Ed.D.) degree in Educational Administration with UC Irvine.

One articulated degree program (Education M.Ed./Latin American Studies M.A.) and one concurrent degree program (Education M.Ed., M.A., Ed.D., or Ph.D./Law J.D.) are also offered.

Education

Lower Division Courses

10. Introduction to Humanities, Social Sciences, and Scientific Inquiry. (4). Lecture, 30 hours; laboratory, eight hours. Introduction to range of critical concepts in humanities, social sciences, and hard sciences. Use of multicultural texts that represent variety of genres and disciplines to develop critical reading and writing skills. Development of scientific inquiry skills relevant to study of mathematics and science in medical professions. Weekly compositions, critical thinking journals, and participation in laboratory experiments. Application of these concepts to critical issues facing migrant farmworker communities and similar groups throughout state and country; with focus on issues such as identity, language, culture, and central social, health, and educational issues facing Latino community. Offered in summer only. P/NP or letter grading.

80. Understanding Collegiate Experience. (4). Lecture, three hours; discussion, 90 minutes. Designed to help students better understand their experience within college environment by learning about research that has been done on college students and impact of college. Examination of diverse issues ranging from reasons why students go to college and how students are ultimately influenced by college experience. Letter grading.

85A-85B-85C. Evaluation for Practitioners. (1-1-2). Tutorial, one hour. Provides participating Student Initiated Access Center (SIAC) program staff with basic understanding of evaluation skills. Students learn how to describe programs in terms of inputs, activities, outputs, and outcomes and are able to frame relevant and measurable evaluation questions based on program needs. P/NP grading.

92C. Dynamics of Peer Mentoring. (4). Seminar, three hours. First course in series of three designed to provide experience in learning principles and procedures relevant to peer mentoring. Undergraduate students present College of Letters and Science academic support workshops to their peers with intent of enhancing academic and career perspectives. Letter grading.

92D. Development of Peer Mentoring. (4). Seminar, three hours. Requires: course 92C. Second course in series of three designed to provide proficiency in learning principles and procedures relevant to peer mentoring. Undergraduate students present College of Letters and Science academic support workshops to their peers with intent of enhancing academic and career perspectives. Concentration on relationship between creativity and presentation. P/NP or letter grading.

92E. Evaluation of Peer Mentoring. (4). Seminar, three hours. Requires: course 92D. Third course in series of three designed to provide proficiency in learning principles and procedures relevant to peer mentoring. Undergraduate students present College of Letters and Science academic support workshops to their peers with intent of enhancing academic and career perspectives. Concentration on program assessment. P/NP or letter grading.

92F. Academic Success in Undergraduate Experience. (2). Lecture, one hour; discussion, one hour. Designed for first-year or transitioning students to promote understanding of factors involved in making adjustments to college experience, both academic and social. Letter grading.

98. Critical Issues in Education. (4). Seminar, 30 minutes; laboratory, 30 minutes. Introduction to critical educational issues and approaches taken by researchers, policymakers, and education advocates as they respond to these issues. Portion of course engages students in small research groups where they acquire background on particular issue of interest, learn about social sciences research, and conduct mini-research projects. May be repeated for credit. Letter grading.

Upper Division Courses

M102. Mexican Americans and Schools. (4). Same as Chicana and Chicano Studies M102.) Seminar, four hours. Examination of historical and empirical aspects of Chicana/Chicana educational issues in U.S., with special emphasis on disenfranchising effects of race, gender, class, and immigrant status on Chicana/Chicana educational attainment and achievement. Examination of how historical, social, political, and economic forces impact Chicana/Chicana educational experience. P/NP or letter grading.

M103. Asian American Education and Schooling. (4). Same as Asian American Studies M114.) Seminar, four hours. Examination of existing body of research from various disciplines on Asian/Pacific Islander educational experiences. Letter grading.

M104. Introduction to Arts Education for Multiple Publics: Theory and Practice. (4). (Same as Arts and Architecture M102.) Seminar, three hours; outside study, nine hours. Introductory course with focus on arts education for multiple publics in inner-city settings. Study of core issues in arts education, creativity, and social justice as students develop, implement, and assess original syllabi, lesson plans, and community learning projects for multiple publics in inner-city schools and arts organizations. Collaboration with partner schools in planning, teaching, and evaluation of arts education programs in dance, music, theater, and visual arts. P/NP or letter grading.

M108. Sociology of Education. (5). (Same as Sociology M175.) Lecture, four hours; discussion, one hour. Study of how U.S. educational system both promotes socioeconomic opportunities and maintains social economic inequalities: historical and theoretical perspectives on role of education in U.S. society; trends in educational attainment; ways in which family background, class, race, and gender affect educational attainment and attainment: stratification between and within schools; effects of education on socioeconomic attainment, family, health, attitudes, and social participation; educational policies to improve school quality and address socioeconomic inequalities. Letter grading.

M112. Inner and Outer Worlds of Children: Social Policies. (4). (Same as Honors Collegium M112.) Seminar, four hours. Practices and analysis of social policies impacting on children. Topics include assess-
ment, social justice and geographical space, temporal orientation, and classical theories of adolescent de-
velopment. Letter grading.

118. Literacy in Society. (5), Lecture, four hours. Lit-
eracy plays significant role in cognition and language, political governance and law, and economic, social, and personal well-being. Exploration of these aspects of literacy results in applications for teaching and learning. Examination of literacy in workplace, health-
care, and community. Consideration of new literacies, interrelationship between literacy and technology, and impact of illiteracy on income and opportunity. Letter grading.

120. Early Childhood Development. (5), Seminar, four hours. Development of positive social behaviors and their enhancement. Broad overview of children’s psychological development, with emphasis on per-
sonal, social, and emotional attributes of preschool and elementary school child. Aspects of prosocial be-
havior and aggression. Enhancement of prosocial be-
havior and modification of such negative behaviors as aggression. Review and evaluation of contemporary educational programs for promoting positive social behaviors in elementary schools. Methodological as-
psects of conducting educational research. Overview of early child-
hood education and issues related to role of family, school, and television in child development. Letter grading.

121. Introduction to K-12 Issues in American Pub-
ic Education. (5), Seminar, four hours. Examination of American schooling experience (K-12) and analysis of various school and social policies that impact on children and adolescents. Systematic examination of major participants in American school process (parents, students, teachers, geographical space of school environment, school organizations, and so-
ciety) and their roles and the consequences associated with American schooling experience. Discussion of contemporary themes such as risk behaviors, SAT controversy, high school exit examinations, social promotion, technol-
ogy, and psychosocial development of children, school reform, equal educational opportu-
nity, affirmative action, and educational assessment. Letter grading.

122. Perspectives on American College. (5), Sem-
inari, four hours. Examination of role colleges and uni-
versities play in larger cultural life of U.S. society. Use of analysis of student movements as vehicle for ex-
ploration of key sociological, political, and cultural de-
velopmental issues. Emphasis on interrel-
ated research, academic, social, and policy issues underlying diverse system of higher education. Letter grading.

123. Teaching Profession. (5), Seminar, four hours. Exploration of traditional and alternative teaching practices and public responses to teachers teaching and students learning. Examination of education in socioeconomics and context and discussion of some phil-
osophical questions that challenge teaching profes-
sion. Letter grading.

C124. History of Higher Education. (5), Seminar, four hours. Exploration of major eras in history of higher education. Topics include issues concerning access, diversity, parental choice, cultural literacy, teacher empowerment, and role of popular media. Concurrently scheduled with course C209A. Letter grading.

C125. Politics of Education. (5), Lecture, two hours; discussion, two hours. Political dimensions of educa-
tion institutions as organizations. Relationships be-
 tween education institutions and political institutions in society. Political theory as foundation for public policy analysis; interest groups in education policy formation and implementation; and focus on Freirean pedagogy. Concurrently scheduled with course C207. P/NP or letter grading.

C126. Educational Anthropology. (5), Seminar, four hours. Research seminar designed to familiarize stu-
dents with discipline of anthropology and subfield of anthropological education. Exploration of concept of culture, anthropological perspec-
tives, with focus on theories of culture, cultural trans-
mission and acquisition, and cultural reproduction and production for understanding schooling and its outcomes. Examination of research methodologies in anthropology, as well as critical historical overview of discipline and current debates and dilemmas of doing, anthropological research in educational settings. Is-
sues of race, gender, sexual orientation, and class, and consideration of application of anthropological theory and method to educational research and re-

127. Educational Psychology. (5), Lecture, two hours; discussion, two hours. Exploration of theory and methods to educational practice and re-
search. Analysis of effectiveness of organizations and/or poli-
cies to understand effects of change and adapta-
 tion. Focus of adolescent development to be psychosocial in nature. Understanding of how one’s identity, personal developmental, and relation-
ships with other individuals and society at large. Study of psychological and education theories that apply to teaching adolescents (e.g., women and adolescents of color), as well as those that are relevant to population of youth at large. Letter grading.

128. Education and Law. (5), Seminar, four hours. Research seminar providing overview of high-profile legal controversies that shape so many policy de-
bates at both K-12 and higher education levels. Major are-
as include: legal context of educational reform and re-
sources, education law and policy, educational equity, and public policy right to equal educational opportunity, and Internet-related issues and concerns. Letter grading.

130. Race, Class, and Education Inequality in U.S. (5), Seminar, two hours; discussion, two hours. Focus on understanding educational experi-
ences of following groups in U.S.: African Americans, Asian Americans and Pacific Islanders, Chicaros/Chi-
canos/Latinas/Latinos, and low-income white Ameri-
cans. Examination of how historical development of public education in U.S. has influenced its present-

131. Issues in American Education: Perspectives from History and Popular Culture. (4), Seminar, four hours; fieldwork, three hours. Research seminar focusing on different kinds of texts to illuminate critical issues in American sec-
ondary education. Issues include transformation in secondary education from 1890 to present, politics of educational opportunity and equality, and political and social representations of secondary education. Letter grading.

132. Education of Exceptional Individuals. (5), Seminar, four hours; fieldwork, two hours. Research seminar focusing on characteristics and re-
lated educational needs of students (elementary through high school age) who vary exceptionally from normal in mental, physical, psychological, and social characteristics. Exploration of roles of disabilities and area of gifted/talented education. Emphasis on edu-
cational implications; legal, social, and philosophical issues also addressed. Letter grading.

133. Topics in Child Development and Social Poli-
cies. (5), Seminar, four hours; fieldwork, two hours. Research seminar designed to enable students to (1) gain basic understanding of ways in which public pol-
cies are established and implemented, (2) learn about policy processes, and major social and historical forces in shaping public policies relating to children and youth in society, and (3) use scientific research on children’s cognitive and social development to evaluate and understand effects of social and economic policies. Letter grading.

134. Educational Leadership, Organizational Theo-
ry, and Policy. (5), Seminar, four hours. Designed for students interested in developing understanding and appreciation for breadth of leadership theories and para-
theses in education, including traditional, entrepre-
neural, behavioral, and relationship-based models. Analysis of effectiveness of organizations and/or poli-
cies through case studies of educational develop-
ment of personal leadership profile in context of alter-
native models of leadership relevant to education. Letter grading.

135. Introduction to Educational Inquiry. (5), Sem-
inari, five hours. Limited to juniors/seniors. Introduc-
tion to educational inquiry, with special attention to dif-
ferent ways of conducting research in field of edu-
cation. Focus on different ways authors have concep-

137. Public Policy in Higher Education. (5), Lecture, four hours. Introduction to range of contemporary and ongoing higher education public policy issues, and conceptual and theoretical frameworks typically used to understand them. Development of fluency in public policy language, with focus on national, state, and in-
stitutional policy issues. Letter grading.

138. Critical Pedagogy and Cultural Studies in U-
ber Education. (5), Lecture, two hours; discussion, two hours. Consideration of potential of conceptual and methodological work in critical pedagogy and cultural studies to reform, contemporary chal-
len ges faced in urban education today. Study of theory and research of critical pedagogists such as Paulo Freire, Peter McLaren, and others. Letter grading.

139. Educational Program Evaluation. (5), Seminar, four hours. Stages and methods for conducting eval-
uations of educational and social programs, with em-
phasis on evaluation approaches that are theoretically grounded, methodologically rigorous, practical, and useful. Letter grading.

140. Time and Behavior in Educational Organiza-
tions. (4), Seminar, three hours. Designed for juniors/ seniors. Exploration of psychosocial perspective of how temporal orientation and time investments im-
pact and shape human behavior, with specific em-
phasis on educational issues related to school reform, teen pregnancy, school violence, teacher burnout, teacher midlife crisis, cultural diversity, information-seeking behaviors, and academic attainment. Letter grading.

141. Writing to Learn: Teaching Writing in Ele-
mentary and Secondary Schools. (4), Seminar, four hours. Ways to teach writing at elementary and secondary level through examination of related concepts of ideas, evidence, part, and whole, and writing process. Emphasis on how reading, writing, and making ex-
cises engage students and lead them to develop their own ideas. Letter grading.

142. Reflections of Education Abroad Program Study. (4), Seminar, two hours; activity, two hours. Designed to provide returned Education Abroad Pro-
gram (EAP) students with structured opportunity to deepen their reflections on their time abroad through contact with literature, academic articles, and speakers. Provides EAP reciprocity students with op-
portunity to analyze their transition to UCLA and al-
lows both returned and reciprocity students chances to learn through service learning.

143. Understanding Pathways to College. (4), Lec-
ture, two hours; discussion, two hours. Examination of inequality across K-12 and higher education to un-
derstand how college admissions are stratified across race, class, and gender. Focus on educational path,
nequalities, and higher education admissions, families, and students in promoting equal educational opportunity. Course is good preparation for students interested in working in UCLA programs such as Outreach Programs that serve students in Los Angeles area schools. Letter grading.

144. Advanced Undergraduate Research Seminar. (4), Seminar, four hours. Limited to juniors/seniors. Advanced independent skills course of joint interest to professor and student. Research topics deal with
K-12 American educational experience, with specific emphasis on diversity, assessment, technology, at-risk, geographical space, and psychosocial development of children. Letter grading.

M145A-M145B. Restoring Civility: Understanding, Using, and Resolving Conflict. (4-4). (Same as Chicana and Chicano Studies M174A-M174B.) Lecture, one hour; discussion, two hours. Course M145A is enforced requisite to M145B. Designed for students who want to learn principles of dialogue and mediation, as alternatives to violence, and practice how to apply these skills in settings. In Progress (M145A) and letter (M145B) grading.

M145C. Alternatives to Violence: Peer Mediation in Public Schools. (4). (Same as Chicana and Chicano Studies M174C.) Lecture, one hour; fieldwork, three hours. Required of juniors/seniors. Application of student knowledge and experience to help students in partner schools to develop peer mediation programs to be sustained by future UCLAs. Work at partner school sites and demonstration of firm grasp of concepts of conflict resolution through weekly reflective journals, discussion through biweekly meetings, and final journal entry. Application, review of literature from earlier courses, and reflection on student field experiences to deepen understanding of violence, its causes, and what schools can do to mitigate it. Letter grading.

Research Apprenticeship in Peer Counselor Training. (4). Seminar, four hours. Limited to juniors/seniors. Highly interactive, student-centered course designed to provide hands-on experience in academic peer advising and development of understanding of underlying theories, principles, and related issues. Students advise their peers in Education Studies minor courses and build community among those students. Letter grading.

Research Apprenticeship in Peer Advising and Leadership. (4). Seminar, four hours. Enforced requisite: course M146A. Limited to juniors/seniors. Highly interactive course designed to provide hands-on experience in academic peer advising and leadership and understanding of underlying theories, principles, and related issues. Students advise their peers in Education Studies minor courses and build community among those students. Letter grading.

M148. Women in Higher Education. (4). (Same as Chicana and Chicano Studies M174A.) Lecture, one hour; fieldwork, three hours. Required of juniors/seniors. Application of student knowledge and experience to help students in partner schools to develop peer mediation programs to be sustained by future UCLAs. Work at partner school sites and demonstration of firm grasp of concepts of conflict resolution through weekly reflective journals, discussion through biweekly meetings, and final journal entry. Application, review of literature from earlier courses, and reflection on student field experiences to deepen understanding of violence, its causes, and what schools can do to mitigate it. Letter grading.

M146A. Research Apprenticeship in Peer Counseling. (4). Seminar, four hours. Limited to juniors/seniors. Highly interactive, student-centered course designed to provide hands-on experience in academic peer advising and leadership and understanding of underlying theories, principles, and related issues. Students advise their peers in Education Studies minor courses and build community among those students. Letter grading.

M146B. Research Apprenticeship in Peer Advising and Leadership. (4). Seminar, four hours. Enforced requisite: course M146A. Limited to juniors/seniors. Highly interactive course designed to provide hands-on experience in academic peer advising and leadership and understanding of underlying theories, principles, and related issues. Students advise their peers in Education Studies minor courses and build community among those students. Letter grading.

M147. Lesbian, Gay, Bisexual, and Transgender Issues in Education and Law. (4). Lecture, four hours. Lesbian, gay, transgender-related conquests that arise in schools, colleges, and universities today and how they are being addressed by legal and educational communities. In particular, examination of real-life scenarios of current laws and exploration of what might be done to make things better for all persons. Letter grading.

149. Innovation and Social Entrepreneurship in Education. (5). Lecture, two hours; laboratory, two hours. Exploration of various types of charter schools as well as alternative methods for social change. Examination of in-depth social entrepreneurship, its theoretical constructs, and its application to charter schools as social enterprises. Letter grading.

Student Development in Theory and Practice. (2). Seminar, two hours. Introduction to field of student affairs and contribution of student development theory. General overview of various student affairs functions and programs, along with key theories that inform practice. Letter grading.

Student Development in Theory and Practice: Strategic Career Decision Making. (2). Seminar, two hours. Importance of making informed career decisions and understanding how cultural and values played a role in career development process. Through interactive lessons and projects, development of strategies to anticipate and effectively deal with lifelong challenges such as work/life balance, career fulfillment, and career transitions. P/NP grading.

C160. Theory and Practice of Intergroup Dialogue: Building Facilitation Skills. (4). Seminar, four hours. Topics include social psychology of intergroup relations, intercultural and dialogic communication theories, and building facilitation skills in schools and communities, research and evaluation of intergroup dialogues and other educational interventions for improving intergroup relations, and core competencies for planning, delivery, and evaluating intergroup dialogues in multicultural settings. While providing foundational grounding in theory and pedagogy of intergroup dialogue, particular attention to relationships between ethnocentrism, structural inequalities, systems of privilege and oppression, and mental health outcomes and disparities among populations. Concurrently scheduled with course C244. Letter grading.

Policy Analysis and Real Politics of Education. (3). Lecture/discussion, three hours. Exploration of relationship between scholarly policy analysis and actual workings of policy systems. Selected topics include: legislative, administrative, school finance, equal access to education, and school reform. Letter grading.

Race and Education: Access, Equity, and Achievement. (5). Seminar, four hours. Social/pedagogical perspectives of particular attention to race, ethnicity, and inequality. Study of structural, social, and personal determinants of educational outcomes. Consideration of relationships of schools to social context and other societal institutions. Examination of how education sets life trajectories in America and effects of race/ethnicity on access to educational opportunity in our society. Letter grading.

170A. Experiential Learning: Community-Based Outreach Programs. (2). Fieldwork, four hours. Enforced corequisite: course 192A. Training and supervised practice for undergraduate students interested in raising their academic achievement and that of high school and middle school students. Letter grading.

170B. Experiential Learning: America Reads. (2). Fieldwork, four hours. Enforced corequisite: course 192B. TB test required prior to first day of instruction. Training and supervised practice for undergraduate students, including tutoring and mentoring of K-3 students. Letter grading.

CM176. Critical Media Literacy and Politics of Gender: Theory and Production. (4). (Same as Gender Studies CM176.) Seminar, three hours. Corequisite: course CM178L. Use of range of pedagogical approaches to theory and production of media literacy that necessarily involves understanding of new technologies and media forms. Study of both theory and production techniques to inform student analysis of media and critical media literacy projects. Concurrently scheduled with course CM176B. Letter grading.

CM176L. Critical Media Literacy and Politics of Gender: Laboratory. (2). (Same as Gender Studies CM176L.) Laboratory, two hours. Corequisite: course CM178L. Hands-on production experience as integral component of course CM176B. Concurrently scheduled with course CM176B. Letter grading.

M182A. Language, Literacy, and Human Development. (4). (Same as African American Studies M182A.) Fieldwork, three hours. Enforced corequisite: course M194A. Students visit after-school site on weekly basis and use ethnographic methods to document learning. Opportunity for students to connect theories of development and language and literacy learning with practice. Letter grading.

M182B. Language, Literacy, and Human Development. (3). (Same as African American Studies M182B.) Fieldwork, six hours. Enforced corequisite: course M194A. Students visit after-school site on weekly basis and use ethnographic methods to document learning. Opportunity for students to connect theories of development and language and literacy learning with practice. Letter grading.

M183A. Language, Literacy, and Human Development. (3). (Same as African American Studies M183A.) Fieldwork, six hours. Enforced corequisite: course M194A. Students visit after-school site on weekly basis and use ethnographic methods to document learning. Opportunity for students to connect theories of development and language and literacy learning with practice. Letter grading.

M183B. Culture, Gender, and Human Development Ethnography. (3). (Same as African American Studies M183B.) Fieldwork, six hours. Enforced corequisite: course M194B. Students visit after-school site on weekly basis and use ethnographic methods to document learning. Opportunity for students to connect theories of development and language and literacy learning with practice. Letter grading.

M183C. Culture, Communications, and Human Development Ethnography. (3). (Same as African American Studies M183C.) Fieldwork, six hours. Enforced corequisite: course M194C. Students visit after-school site on weekly basis and use ethnographic methods to document learning. Opportunity for students to connect theories of development and language and literacy learning with practice. Letter grading.

Community Service Learning for Academic Achievement. (4). Lecture, six hours; fieldwork, two hours. Must be taken prior to course 192A. Emphasis on cognitive learning and motivation theories and their relevance to strategies for developing curricular instructional techniques and training that contribute to tutoring, counseling, and other instructional assistance in various school settings. P/NP or letter grading.

M196. School Rights and Unequal Education. (4). (Same as Political Science M183 and Public Policy M186.) Lecture, four hours. Exploration of contradictions between American beliefs about equal opportunity and racial equality and inequalities that exist in public education. Three major topic areas in education as vehicles for understanding philosophical and empirical complexities of issues surrounding equality in American education and life. Examination of issues from sociological, political, and economic perspectives. Arguments range from Martin Luther King to Ronald Reagan, and legal cases include Plyessey versus Ferguson to Brown versus Board of Education, as well as cases still pending in court. Letter grading.

Variable Topics in Education. (5). Seminar, five hours. Limited to juniors/seniors. Variable topics course organized around disciplinary knowledge central to development of core understandings of educational and learning processes, phenomenon, policies, methods, and instruction. Development of culminating project. Consult with advisor topics and instructors. May be applied as core credit for Education Studies minor students. May be repeated three times for credit. Letter grading.

Arts Education Undergraduate Practicum: Production and Observation. (2). (Same as Arts and Architecture M192.) Seminar, three hours. Enforced corequisite: course M104. Limited to juniors/ seniors. Training and supervised practice for advanced undergraduate students participating in Visual and Performing Arts Education minor. Students implement and evaluate original arts education programs under guidance of faculty members in small course settings. P/NP or letter grading.
M190SL. Arts Education Undergraduate Practicum and Capstone Project. (4). (Same as Arts and Architecture M192SL) Seminar, three hours; practical, three hours; outside study, six hours. Enforced requisites: courses M104, M180. Limited to juniors/seniors. Continuation of arts education training and supervised practicum for advanced undergraduate students participating in Visual and Performing Arts Education minor. Students continue to implement and evaluate original arts education programs under the guidance of the training and supervised guiding teachers in K-12 public school settings. May be repeated for credit with consent of instructor. P/NP or letter grading.

191A-191X. Current Issues in Education. (4 each). Seminar, two hours. Emphasis on current issues, topics and instructors. May be repeated for credit. Letter grading.

192A. Undergraduate Practicum in Community-Based Outreach Programs. (2), Seminar, two hours. Required of all students. Recommended to juniors/seniors. Enforced corequisite: course 170A. Limited to juniors/seniors. Training and supervised practicum for advanced undergraduate students to study learning and developmental factors as well as cultural, social, and environmental factors that affect student academic achievement. Exploration, testing, and application of various learning styles that enable students to become more effective learners. Letter grading.

192B. Undergraduate Practicum in America Reads. (2), Seminar, two hours. Enforced corequisite: course 170B. Limited to juniors/seniors. TB test required prior to first day of instruction. Training and supervised practicum for advanced undergraduate students that provides opportunity to reflect on both content and experience pertaining to America Reads sites. May be repeated for credit. Letter grading.

193Y-193Z. High School Advising Program. (4-4). Discussion, two hours; fieldwork, five hours. Service learning courses designed to provide students with information and techniques sufficient to allow them to undertake academic advising in low socioeconomic high schools. Letter grading.

M194A. Language, Literacy, and Human Development Research Group Seminars. (5). (Same as African American Studies M194A) Seminar, three hours; laboratory, two hours (when scheduled). Enforced corequisite: course M182B or M183B. Research seminar designed to provide opportunity to combine theory and practice in study of human development in educational contexts. Focus on relationship between theories of development, culture, and language. May be taken independently for credit. Letter grading.

M194B. Culture, Gender, and Human Development Research Group Seminars. (5). (Same as African American Studies M194B) Seminar, three hours; laboratory, two hours (when scheduled). Enforced corequisite: course M182B or M183B. Research seminar designed to provide opportunity to combine theory and practice in study of human development in educational contexts. Focus on relationship between theories of development, culture, and gender. May be taken independently for credit. Letter grading.

M194C. Culture, Communications, and Human Development Research Group Seminars. (5). (Same as African American Studies M194C) Seminar, three hours; laboratory, two hours (when scheduled). Enforced corequisite: course M182C or M183C. Research seminar designed to provide opportunity to combine theory and practice in study of human development in educational contexts. Focus on relationship between theories of development, culture, and technology. May be taken independently for credit. Letter grading.

195. Community Internships in Education. (4). Tutorial, one hour; fieldwork, eight to 10 hours. Internship in the arts community to be supervised by Center for Community Learning and faculty sponsor. Students meet biweekly with teaching assis-

tant, write reflective journals, and prepare final paper. May be repeated for credit. Individual contract with supervising faculty member required. Letter grading.

195CE. Community or Corporate Internships in Education. (4), Tutorial, one hour; fieldwork, eight to 10 hours. Limited to juniors/seniors. Internship in supervised preapproved K-12 settings coordinated through Center for Community Learning. Students meet on regular basis with faculty sponsor or designee to construct series of reading and writing assignments that examine educational issues related to meaningful work. Students are expected to learn ways in which urban schools are structured, organized, and operate. May be repeated for credit. Individual contract with supervising faculty member required. P/NP or letter grading.

196C. Instructional Apprenticeship in Teaching and Learning at UCLA Lab School. (4), Tutorial, 10 hours. Limited to juniors/seniors. Training and supervised apprenticeship for advanced undergraduate students at UCLA Lab School (Corinne A. Seeds campus). K-8 elementary school on UCLA campus. Students gain understanding of innovative educational work that goes into teaching and learning at UCLA Lab School through seminars, readings, observations, and discussions. Individual meetings with faculty mentor throughout term. May be repeated for credit. Individual contract required. Letter grading.

196D. Instructional Apprenticeship through UCLA Lab School Community Education Partners. (4), Tutorial, 10 hours. Limited to juniors/seniors. Introduction to K-12 teaching profession through training and supervised off-campus experiences at UCLA partner schools (Nora Perry Elementary School, Brookton Elementary School, Emerson Middle School, University High School, UCLA Community School, or other LAUSD schools to be coordinated by students). Students gain grounded understanding of social issues in education through readings, observations, direct support in classrooms, and tutoring activities. Individual meetings with faculty mentor throughout term. May be repeated for credit. Individual contract required. Letter grading.

196R. Research Apprenticeship in Education. (2 to 4). Tutorial, three hours per week per unit. Limited to juniors/seniors. Entry-level research apprenticeship for upper division students under guidance of faculty mentor. May be repeated for credit. Individual contract required. P/NP grading.

197. Individual Studies in Education. (2 to 4). Tutorial, one hour; fieldwork, eight to 10 hours. Enforced corequisite: course 200B or 200A. Individual intensive study, with scheduled meetings to be arranged between faculty member and student. Asigned reading and tangible evidence of mastery of subject matter required. May be repeated for credit. Individual contract required. P/NP or letter grading.

199. Directed Research or Senior Project in Education. (2 to 4). Tutorial, to be arranged. Limited to juniors/seniors. Supervised individual research or investigation under guidance of faculty mentor. Culminating paper or project required. May be repeated for credit. Individual contract required. P/NP or letter grading.

Graduate Courses

200A. Historical Research and Writing. (4). Lecture, four hours. Methods of historical research and writing for students who are or who will be engaged in research and in report or paper or thesis writing, regardless of their field of specialization. May be repeated for credit. Letter grading.

200B. Survey Research Methods in Education. (4). Lecture, four hours. Requisite: course 230A. Problems of conceptualization, organization, and gathering nonexperimental and quasi-experimental quantita-
tive and qualitative data. S/U or letter grading.

200C. Analysis of Survey Data in Education. (4). Lecture, three hours; laboratory, two hours. Requisite: course 200B. Introduction to techniques of pro-
cessing and analyzing nonexperimental and quasi-ex-
perimental quantitative data. S/U or letter grading.

201C. History of American Education. (4). (Same as History M264.) Discussion, three hours. History of educational thought and of social forces impinging on American education from 1880s to present. Analysis of relation between educational thought and practice and of American education today. S/U or letter grading.

202. Evaluation Theory. (4). Lecture, four hours. Prevailent evaluation theories, systems for categorizing theories, and productive uses of develop-
ment in educational evaluation. S/U or letter grading.

203. Educational Anthropology. (5). Seminar, four hours. Research seminar designed to familiarize stu-
dents with discipline of anthropology and subfield of comparative and cross-national studies in education. Exploration of concept of culture through various anthropological perspec-
tives, with focus on theories of culture, cultural transmission, and acquisition, and cultural reproduction and production for understanding schooling and its outcomes. Examination of research methodologies in anthropology, as well as critical historical overview of discipline and current debates and dilemmas of doing anthropological research in educational settings, is-
suces of race, gender, sexual orientation, and class, and consideration of application of anthropological theory and methods to educational practice and re-
search. Concurrency scheduled with course C126. Letter grading.

204A. Introduction to Education and Social Science.

204B. Introduction to Comparative Education. (4). Lecture, four hours. Exploration of international and methodological questions underlying comparative edu-

cation. Particular attention to development of field and to styles of social analysis that may be applied to comparative and cross-national studies in education. S/U or letter grading.

204C. Education and National Development. (4). Lecture, four hours. Designed for graduate students. Analysis of various social sciences perspectives and methodologies (including dependency, Marxist, neo-Marxist, liberation theory, and world-system theories of change and development) and changing notions of role of education in develop-
ment of less-industrialized countries of world. S/U or letter grading.

204D. Minority Education in Cross-Cultural Perspec-
tive. (4). Lecture, four hours. Historical and con-
temporary analyses of social issues with regard to ethnicity, religion, and linguistic minorities through selected national and international case studies. Introduction to cross-cultural education in representative countries in relation to social, political, and economic systems. S/U or letter grading.

204E. International Efforts in Education. (4). Lect-

ture, four hours. Designed for graduate students. Crit-
ical analysis of complex world of “development coop-
eration,” with particular emphasis on globalization and multilateral efforts in education. S/U or letter grading.

204F. Nonformal Education in Comparative Per-

tive. (4). Lecture, four hours. Comparative and interna-
tional study of organized and systematic edu-
cational activity for children, youth, and adults carried

on outside of schools. Types of programs include, among others, consciousness raising, community ac-
tion, skills training, literacy, and extension programs. S/U or letter grading.

205. Computers in Educational Process. (4). Lecture, four hours. Introduction to theory, experimenta-
tion, evaluation, and future of computer systems in education with emphases on computer assisted in-
struction (CAI), and use of computers to teach pro-
gramming and to foster development of writing, com-
putational, and filing skills. S/U or letter grading.
206A. Philosophy of Education: Introduction. (4). Lecture, four hours. Systematic introduction to field, indicating ways in which philosophy serves to elucidate educational policy, content, methods, and values. S/U or letter grading.

C207. Politics of Education. (5). Lecture, two hours; discussion, two hours. Political dimensions of education institutions, developments. Relationships between education institutions and political institutions in society. Political theory as foundation for public policy analysis; interest groups in education policy formation; and focus on Freirean pedagogy. Concurrently scheduled with course C125. S/U or letter grading.

208A. Perspectives on Sociology of Education. (4). Lecture, four hours. Sociological perspectives on current issues in educational policy and practice, including desegregation, decentralization, equality of educational opportunity, structure of educational organization, teacher/student relationships, reform in education at elementary, secondary, postsecondary levels. S/U or letter grading.

208B. (Im)Migrant Youth, Ethnicity, and Education. (4). Seminar, four hours. Exploration of experiences of immigrant youth in U.S. schools, with focus on language, culture, and educational equity in urban settings. Letter grading.

208C. Explanation in Social Sciences and Educational Research. (4). Lecture, two hours; discussion, two hours. Lecture and discussion of basic strategies and forms of explanation relevant to inquiry in education from vantage point of various social and behavioral sciences disciplines. S/U or letter grading.

C209A. History of Higher Education. (5). Seminar, four hours. Exploration of major eras in history of higher education. Topics include issues concerning access, diversity, parental choice, cultural literacy, teacher education, and role of professionals. Concurrently scheduled with course C124, S/U or letter grading.

209C. Research and Evaluation in Higher Educa- tion. (4). Lecture, four hours. Development of conceptual and practical understanding of research and evaluation in higher education. Topics include basic statistics, survey design, data analysis, assessment issues, and research proposal writing. Letter grading.

210. Education as Profession: Theory, Research, and Practice. (4). Lecture, 90 minutes; discussion, two and one-half hours. Introduction to major issues and approaches in educational research through series of faculty presentations, selected readings, and writing assignments. Letter grading.

211C. Advanced Item Response Theory. (4). Lecture, four hours. Requisites: course 211A or 211B or Psychology 255A, Psychology 255B. Review of standard item response theories involving different distributional models, multiple group models and models with covariates, item and person parameter estimation, differential item functioning analysis, testing model fit, linking and equating, computerized adaptive testing. S/U or letter grading.

212A. Learning and Education. (4). Lecture, four hours. Models of learning, modeling, reinforcement, motivation, encoding, memory, transfer, individual differences, and instruction. S/U or letter grading.

213C. Group Counseling Theory and Process. (4). Lecture, three hours; discussion, one hour. Requisite: counseling (M210 or M211) or permission of instructor. Focus on theory and practice of group counseling with emphasis on group formation, processes, group dynamics, and group facilitation. S/U or letter grading.

213D. Assessment in Counseling and Student Af- fairs. (4). Lecture, four hours. Overview of assessment issues and methods used in counseling and student affairs. Topics include various tools for assessment and evaluation in higher education. Topics include basic psychoeducational tests of cognitive abilities (e.g., attention, memory, learning), personality assessment, academic achievement assessment, and evaluation. S/U or letter grading.

214C. American Professoriate: Faculty Status, Role, and Performance. (4). Seminar, four hours. Focus on historical aspects of the American professoriate, and role of professionals in academic culture, teaching and research, reward structure, faculty development. Letter grading.

217A. Social Development and Education. (4). Formerly numbered M217A. Seminar, four hours. Biographical and social psychology of children; development in context of current research and theory. S/U or letter grading.

217B. Cognitive Development and Education. (4). Lecture, two hours; discussion, two hours. Designed for graduate students. Critical review of theories and research. Emphasis on work of Piaget and Vygotsky, and relation of this work to issues in educational practice. S/U or letter grading.

217D. Language Development and Education. (4). Lecture, four hours. Research and theory on how children develop their first language; sociolinguistic and psycholinguistic issues in preschool and primary years; bilingual and dialectical issues. S/U or letter grading.

217E. Emerging into Adulthood. (4). Seminar, four hours. Examination of theories and research related to transition to adulthood and role of family, gender, and immigration status in shaping development. Topics include historical and cross-cultural comparisons of emerging adulthood; ethnic, racial, and gender identity; family relationships and expectations; college opportunities and experiences; entering workforce; alternative pathways (incarceration and military); and civic engagement. Letter grading.

M217F. Adolescent Development. (4). Same as Psychology M217F. Four hours. Designed for graduate students. Review of current research on physical, cognitive, social, and psychological development during second decade of life. Topics include psychological development, changing relationships, role of peers, identity development, high-risk behaviors, stress and coping, and school adjustment. Letter grading.

218. Measurement of Educational Achievement and Aptitude. (4). Lecture, four hours. Requisite: course 230A. Critical study of tests of achievement and aptitude, with emphasis on group tests; relation of achievement to aptitude; social implications of measurement of intelligence; elements of validity and reliability. S/U or letter grading.

219. Laboratory: Advanced Topics in Research Methodology. (4). Laboratory, four hours. Provides advanced training in design of research and execution of data to advanced students from other divisions. Coverage of special topics not included in other courses on research methods. S/U or letter grading.

222A. Introduction to Qualitative Methods and De- sign Issues in Educational Research. (4). Lecture, three hours; discussion, one hour. Introductory course for students interested in epistemology, theories, and styles of qualitative research in educational settings. Theory and practice of naturalistic, qualitative research design covered in second half of course. Letter grading.

222B. Participant-Observation Field Methods. (4). Lecture, two hours; discussion, two hours. Requisite: course 222A. First of two courses on participant-observation field methods. Key skills (e.g., observation, recording, interviewing, role management, data
storage) learned through classroom lectures and simulations, and by conducting actual field-based research project. Letter grading.

222C. Advanced Literature Reduction and Analysis. (4). Lecture, two hours; discussion, two hours. Requisite: course 222B. Continuation of fieldwork project started in course 222B, with focus on practical skills and conceptual/methodological issues involved in reducing and analyzing qualitative data. Letter grading.

222D. Qualitative Inquiry: Special Topics. (4). Lecture, four hours. Special topics course on some field or aspect of qualitative inquiry. Topics may include classical, advanced, ethnographic writing and/or multimedia design, discourse analysis, and microethnography of social interaction. S/U or letter grading.

224. Problems and Issues in Bilingual and Multicultural Education. (4). Lecture, two hours; discussion, two hours. Introduction to development and implementation of bilingual and multicultural programs in U.S. Analysis of program goals, models, typologies, and effectiveness. S/U or letter grading.

225A. Issues in Education of Exceptional Individuals. (4), Lecture, four hours. Designed for graduate students. Analysis of major research regarding contemporary application of educational, psychological, and social issues for exceptional individuals; consideration of commonalities and differences among exceptional individuals. S/U or letter grading.

225B. Advanced Issues in Education of Exceptional Individuals. (4). Lecture, four hours. Synthesis of developmental and educational theory relevant to study of exceptional individuals, including consideration of historical context of current research and applied issues in special education. S/U or letter grading.

226. Seminar: Special Topics in Writing, Rhetoric, and Educational Methodology. (4), Seminar, four hours. Special topics seminar in writing in education that covers research on applications of writing about education, social and political dimensions of it, its variation by discipline, and its uses in professional and public contexts. Letter grading.

227A. Research on Learning Characteristics of Exceptional Individuals. (4), Lecture, four hours. Requisite: course 225B. Overview of research and theory regarding learning characteristics of exceptional individuals and discussion of application of this work to educational practice. S/U or letter grading.

227C. Research on Behavioral and Social Characteristics of Exceptional Individuals. (4), Lecture, four hours. Requisite: course 227B. Analysis of social and emotional development of exceptional individuals and development of social competence in special education programs. S/U or letter grading.

228. Observation Methods and Longitudinal Studies. (4), Lecture, two hours; discussion, two hours. Requisite: course 230A. Design of observational and longitudinal studies; study of selection concerns influencing children’s development. Conduct of observations; processing and analysis of data. Use of portable computers for recording observations. S/U or letter grading.

229. Seminar: Special Topics in Urban Schooling. (4), Seminar, four hours. Research on selected topics in fields of administration, policy, curriculum, and teaching studies and on conceptualization of hypoth- eses for research programs on division topics and issues. Letter grading.

230B. Linear Statistical Models in Social Science Research: Linear Regression Analysis. (4), Lecture, four hours. Requisite: course 230A or passing score on screening examination. Solid and comprehensive training in regression-based methods for analyzing quantitative social science data. Letter grading.

231C. Analysis of Categorical and Other Nonnormal Data. (4), Lecture, four hours. Requisites: courses 230B, 230C. Regression analysis with dichotomous and polytomous dependent variables, logistic regression, decision rules for association for categorical variables, factor analysis, and structural equation modeling. Letter grading.

M231E. Statistical Analysis with Latent Variables. (4), (Same as Statistics M244.) Lecture, three hours. Requisites: courses 231A, M231B. Extends path analysis (causal modeling) by considering models with measurement errors and multiple indicators of latent variables. Confirmatory factor analysis, covariance structure modeling, multigroup analysis, identification, estimation, testing, and model building considerations. Letter grading.

233. Professional Writing in Education. (4), Lecture, four hours. Intended to assist in professional development as writers, with focus on style and organization, scholarly genres, modes of discourse, and broader issues of conceptualization and method. Letter grading.

235. Law and Urban Education. (4), Lecture, four hours. Examination of recent legal controversies that measure the ability of urban schools to meet needs of students in multicultural society, with special emphasis on such equity-related issues as desegrega- tion, school finance, standardized testing, and rights of language minority students. Letter grading.

236. Human Abilities. (4). Lecture, four hours. Comparative study of national systems of higher education: their division of work, basic values, structures of authority, modes of national integration, and types of change. S/U or letter grading.

237. Organization and Governance of Educational Systems. (4), Lecture, four hours. Academic organizations, precolligate and postsecondary, are most appropriately studied by history of institutionalized organizations. Emphasis on characteristics of educational institutions and systems as organizations: environmental relations, governance structures, processes, and patterns of decision making and policy making. S/U or letter grading.

238. Cross-National Analysis of Higher Education. (4), Lecture, four hours. Comparative study of national systems of higher education: their division of work, basic values, structures of authority, modes of national integration, and types of change. S/U or letter grading.

239. Immigration and Children’s Education. (4), Seminar, four hours. Examination of immigrant child and youth experience, with primary focus on educational outcomes. Topics include historical changes in experiences of immigrant youth, dynamics of immigrant families, cultural, ethnic, and socioeconomic statuses, and experiences of immigrant youth, dynamics of immigrant families, cultural, ethnic, and socioeconomic statuses.

240. Immigrant Children and Education. (4), Seminar, four hours. Examination of immigrant child and youth experience, with primary focus on educational outcomes. Topics include historical changes in experiences of immigrant youth, dynamics of immigrant families, cultural, ethnic, and socioeconomic statuses.

241. Research Methodology in School Administration. (4), Lecture, four hours. Examination of research problems and strategies in school administration. S/U or letter grading.

244. Theory and Practice of Intergroup Dialogue: Building Facilitation Skills. (4), Seminar, four hours. Topics include social psychology of intergroup relations, intercultural and dialogic communication theories, methods for reconciling and bridging differences in schools and communities, research and evaluation of intergroup dialogues and other educational methods for improving social competencies, and core competencies for planning, delivering, and evaluating intergroup dialogues in multicultural settings. While providing foundational grounding in theory and pedagogy of intergroup dialogue, attention to relationships between intergroup dynamics, structural inequalities, systems of privilege and oppression, and mental health outcomes and disparities among populations. Concurrently scheduled with course C160. Letter grading.

246A. Decision Analysis and Advanced Computer Methods in Education Policy and Planning. (4). Seminar, four hours. Requisite: course 242. How information technology and decision analysis impact K-12 schooling, higher education, and technical training/writing with research paper, oral presentation, and two research briefs; students can pursue decision analysis areas of special interest to their professional and career objectives. S/U or letter grading.

247. Special Topics in Law and Educational Policy. (4). Lecture, four hours. Policy-based inquiry with focus on specific law-related debates that inevitably influence both K-12 and higher education communities. Identification of strategies that have been successfully employed by those who have sought to use law to shape educational policy. Letter grading.

248. Seminar: Special Topics in Child Development and Education. (4). Seminar, four hours. Content varies, limited to 12 students, and set by individual instructor. S/U or letter grading.

250A. Fundamentals of U.S. Higher Education System. (4). Lecture, four hours. Designed for graduate students. Two-course sequence designed to orient new students to issues, ideas, and literature that constitute this discipline, with emphasis on underlying social and political issues that shape higher education and organizational change. Letter grading.

250B. Organizational Analysis of Higher Education. (4). Lecture, four hours. Designed for graduate students. Two-course sequence designed to orient new students to issues, ideas, and literature that constitute this discipline, with emphasis on underlying social and political issues that shape higher education and organizational change. Letter grading.

250C. Theoretical Frameworks of Higher Education. (4). Lecture, four hours. Designed for graduate students. Overview of various social theories used to analyze institutions and issues of contemporary higher education. Examination of how theory and methodology affect research design and framing of research questions in studies of higher education. Letter grading.

252B. Educational Enterprise. (4). Lecture, two hours; discussion, two hours. Requisite: course 252A. Limited to Educational Leadership Program students. Use of structural, human resource, political, and symbolic frames to study K-16 education, with focus on educational environments, organizations, and curricula and instruction. Letter grading.

253A. Seminar: Current Problems in Comparative Education. (4). (Same as Gender Studies M253A.) Seminar, four hours. Examination of some of most influential critical theorists, including Marx, Nietzsche, Freud, Marcuse, Foucault, Fanon, and de Beauvoir and their contributions to critique of contemporary education, society, and politics. S/U or letter grading.

253B. Seminar: African Education. (4). Seminar, four hours. Designed for graduate students. Contempory issues in educational systems, including questions of access and equity, quality and efficiency, relevance and responsiveness, links between schools and communities, and policy and practice in education. Letter grading.

253E. Seminar: European Education. (4). Seminar, four hours. S/U or letter grading.

253F. Seminar: Education in Revolutionary Societies. (4). Seminar, four hours. Multidisciplinary and comparative study of socialist educational theory examined through writings of Marx, Lenin, Mao, and others. Implementation of this theory in specific case studies, along with comparative assessments of non-socialist nations. S/U or letter grading.

253G. Seminar: Asian Americans and Education. (4). Seminar, four hours. Basic issues and topics related to Asian Americans in field of education. Examples of issues and topics include Asian Americans in higher education, classroom environment, and community work transition and language question. S/U or letter grading.

253H. Seminar: Chicanos/Hispanics and Education. (4). Seminar, four hours. Basic issues and topics related to Chicans and other Hispanic groups in education. Review of literature on specific educational levels and Chicano/Hispanic student progress (e.g., early childhood, elementary, higher education); specific topics: assessment, access, tracking, segregation; implications for schooling. S/U or letter grading.

253I. Education and Social Change in Middle East and Islamic World. (4). Seminar, four hours. Critical and analytic examination of historical and current role of traditional and modern (Western) education in affecting social, political, and economic changes in countries of Middle East and Islamic world (including Pacific Rim, South and Central Asia). S/U or letter grading.

255A-255B-255C. Seminars: Special Topics. (4-4-4). Seminar, four hours. May be repeated for credit. S/U or letter grading.

255B. Seminar: Special Topics in Development. (4). Seminar, four hours. S/U or letter grading.

256. Seminar: Research in Counseling Psychology. (4). Seminar, four hours. In-depth analysis of selected research approaches/areas in counseling psychology. S/U or letter grading.

256B. Seminar: Special Topics in Development. (4). Seminar, four hours. S/U or letter grading.

259. Administration of International Programs in Higher Education. (4). Seminar, four hours. Introduc- tion to theory and practice of internationalization in U.S. higher education, looking at meaning of concept of comprehensive internationalization across campus, issues of effective leadership and management, and individual aspects of internationalization, including study abroad program development and implementation, international student recruitment and support services, international curriculum—area and language studies, English as a second language programs, international internships and careers, faculty development in international travel and research, international partnerships/branch campuses, international development and grant projects, international alumni, distance learning/massive open online courses (MOCOs)/hybrid models. Letter grading.

261E. Higher Education Seminar: Diversity Issues and Research Perspectives. (4). Seminar, four hours. Examination of how racial diversity and its related dynamics have transformed and at same time been reshaped by institutions of higher education, with focus specifically on student experiences, curricula, institutional climate, educational policies, and administrative practices. Letter grading.

261F. Seminar: Cognitive and Personal Development of College Students. (4). Seminar, four hours. Examination of cognitive development of college students; issues of personal and social development, including leadership, and interpersonal relations and skills. S/U or letter grading.

262B. Seminar: Reading. (4). Seminar, four hours. S/U or letter grading.

262F. Seminar: Research Topics in Bilingual/Multicultural Education. (4). Seminar, four hours. S/U or letter grading.

M266. Feminist Theory and Social Sciences Research. (4). Same as Gender Studies M266. Lecture, four hours. Examination of how diverse feminist social theories of last quarter century have both challenged and strengthened conventional social sciences theories and their methodologies, with a focus especially on feminist standpoint theory, distinctive critical theory methodology now widely used in social sciences. Letter grading.

268. Theorizing Reading: Rhetorics of Academic Discourse. (4). Lecture, two hours; discussion, two hours. Designed for graduate students. Introduction to theoretical approaches to teaching reading, such as post-structuralist, feminist, deconstruction, reader reception, and semiotics, and to core ideas of some leading theorists of reading, such as Roland Barthes, Wolfgang Iser, Barbara Johnson, Stanley Fish, and Gayatri Spivak. Letter grading.

269. Representations of Education in Cinema. (4). Lecture, two hours; discussion, two hours. Designed for graduate students. Exploration of ways in which we narrate on diverse “texts,” particularly films set in or around schools, to illuminate contemporary issues in American secondary education (e.g., issues pertaining to representation of teachers, students, parents, and administrators, and curriculum) in popular films about high school and adolescents. Letter grading.

270. Introduction to Cultural Studies. (4). Lecture, four hours. Investigation of current trends in cultural studies through examination of different methods of cultural interpretation, seminal texts in cultural studies, and practical criticism engaging popular artifacts of media culture. Emphasis on developing critical media literacy as goal of cultural studies. Letter grading.

271A. Proseminar: Educational Psychology. (2). Seminar, two hours. Introduction to variety of research methods in field of educational psychology, including topics related to human development, learning and instruction, counseling, and special education, and to different methodological approaches used to study them. S/U grading.

272. Case-Study Research in Education Policy and Practice. (4). Discussion, four hours. Use of case-study methods in education research, providing opportunities for applying methodological skills to actual case-study research problems. Student research on and multiple case studies that investigate issues in education policy and practice. Letter grading.

273A. Structure and Dynamics of Educational Systems. (4). Lecture, two hours; discussion, two hours. Overview of school administration, teaching, curriculum, and policy studies. Focus on American educa-
tion as institutional system wherein federal, state, and local policy, school administration, curriculum theory and design, and teaching are inextricably connected in delivery of education.

273B. Social Foundations of Education. (4), Seminar, four hours. Introduction to literature on multiculturalism and teachings in diverse social, cultural, and economic contexts. Examination of debates over multiculturalism and teaching for democratic citizenship by review of diverse number of anthropological, sociological, educational curricula and literatures. Letter grading.

274. Science, Technology, and Social Research after Eurocentrism. (4), Lecture, four hours. Philosophy of natural sciences for social scientists that examines challenges to conventional research assumptions raised by multicultural and postcolonial science and technology studies that have emerged since World War II. Focus on sciences and technologies in three-world development projects, comparative ethnocentrism movements, and new theories of knowledge and how to do maximally objective research emerging from these literatures. Letter grading.

275. Race and Education. (4), Seminar, four hours. Designed for graduate students. Examination of role of race in American education. Analysis of broad interpretation of how schools contribute to racial stratification and inequality by linking sociological and sociopsychological theories of race, racial attitudes, and conflict to historical policy analysis. Letter grading.

276. Contemporary Theories of Writing. (4). Lecture, four hours. Review of current theories of writing and literacy research and examination of relationships among writing and literacy, culture, and human development. In particular, examination of history of writing research in over last three decades as part of broader intellectual history. Letter grading.

CM278. Critical Media Literacy and Politics of Gender: Theory and Production. (4), (Same as Gender Studies CM278), Seminar, three hours. Corequisite: course CM287B. Use of range of pedagogical approaches to theory and practice of critical media literacy that necessarily involves understanding of new technologies and media forms. Study of both theory and production, and to inform student analysis of media and critical media literacy projects. Concurrently scheduled with course CM178L. Letter grading.

CM278L, Critical Media Literacy and Politics of Gender: Laboratory, two hours. Corequisite: course CM278. Hands-on production experience as integral component of course CM278. Concurrently scheduled with course CM178L. Letter grading.

279. History of Urban Schooling. (4), Lecture, four hours. Designed for graduate students. Survey of major events, political and economic forces, and ideas that shaped urban schools since 1860. Examination of changing roles and meaning of education across range of political/ideological perspectives. Letter grading.

280A. Seminar: Selected Topics in Special Education. (2 to 6), Seminar, two to six hours. Focus on research and clinical problems in special education. Introduction to theoretical principles and research strategies. Exploration of current topics in field. S/U or letter grading.

280B. Seminar: Exceptional Individuals. (4), Seminar, two hours. Limited to doctoral students. S/U or letter grading.

281. College Access Seminar. (4), Seminar, two hours; discussion, two hours. Knowledge of changing dynamics of college access at individual, organizational, and policy levels and how access and equity between K-12 and postsecondary stratification and how educational advantage and disadvantage accumulate throughout education and affects equity in college access. Letter grading.

283. Social Research in Multicultural and Postcolonial World. (4), Lecture, four hours. Philosophy of social science. Seminar, four hours. Focus on how to think critically about two issues: (1) inevitability of nonneutral procedures and results of research conducted within liberal state that must be committed to value-neutrality and (2) challenges that multicultural and postcolonial social theory have raised to conventional research theories and methodologies. Letter grading.

284. Critical Theory in Education: Power, Politics, and Liberation. (4), Lecture, four hours. Designed for graduate students. Introduction to major themes, issues, and methodologies within what has come to be known as “critical and educational tradition,” including some major theoretical writings in liberal, neo-Marxist, left liberal/postmodernist, and Marxist streams of critical educational tradition. Letter grading.

M286. Culture, Brain, and Development. (4), (Same as Anthropology M286, Applied Linguistics M286, Neuroscience M286, and Psychology M286), Seminar, three hours. Focus on graduate students' integration of knowledge across different disciplines to understand interrelations of culture, brain, and development, where development includes both human ontogeny and human phylogeny. S/U or letter grading.

287. Research on Language Issues in Education. (4), Seminar, four hours. Roles of language(s) in formal and informal education, including study of opportunities and challenges offered by language variation found in schools. Examination of language acquisition theories along with those of language ideologies, language policies, and multilingualism. Letter grading.

288. Research on Language Issues in Education. (2). Discussion, two hours. Course facilitates mentorship model of training Ph.D. students in education, with focus on development of graduate student research topics. Assignment of credit for these topics; students have opportunity to offer and receive feedback. May be repeated for credit. S/U grading.

M289A-M289B. Immigration, Racial Change, and Education in 21st-Century Metropolis. (4-4), (Same as Political Science M289A-M289B, Public Policy M289A-M289B, and Sociology M289A-M289B), Seminar, four hours. Examination of metropolitan American society and institutions at beginning of 21st century. Focus on reliable information on patterns of settlement, changing functions of urban space and institutions, and issues of opportunity linked to urban structure in society facing unprecedented demographic change that will end primarily European domination of our society by mid-century, creating democracy with no racial or ethnic majority. How this demographic transition and postindustrial transformation, changing functions of urban space and interaction to shape opportunity and inequality. Vast economic transformations raised by multicultural and postcolonial science and technology studies that have emerged since 1990s. May be repeated for credit. S/U grading.

M289A-M289B. Research in Education: Persistent Failure, Urgent Challenges. (1 to 2 each), (Formerly numbered 289A-289B) (Same as Law M243A-M243B, Seminar, four hours. Course M289A is en- forced requisite to M289B. Research seminars with focus on what is probably most serious and neglected problem in American educational reform. In past half century our educational progress in preschool and gains in achievement in early grades have been prod- uced, and very well-regarded system of higher education has been established—but reform of high school has failed. Exploration of institutional and policy roots of these problems and assessment of available research on key dimensions to help students launch original research in one related area. Presentations by experts actively involved in high school reform efforts included. In Progress (M289A) and S/U or letter (M289B) grading.

295. Freire, (4), Seminar, four hours. Requisite: course C125 or C207 or prior knowledge of Freire’s work. Analysis of influence of Paulo Freire linked to social context in which it took place. Study of his life and work in five phases: Brazilian Experience (1921 to 1964); Chilean Experience, where he published Education as Practice of Freedom and Pedagogy of Oppressed, as well as other lesser-known works, while also devoting most of this period to empirical research in literacy training (1964 to 1988); his work at Harvard, and then World Council of Churches in Geneva (1970 to 1980), including his consulting with postcolonial revolutionary governments in Africa; his return to Brazil and his work as Secretary of Education of Brazil (1992 to 1995); and his global travels from 1980 until his death in 1997. Focus on work left incomplete before his death (including eco-pedagogy and citizen’s schools), and by implication, his analyses, critiques, and impact in world, his methodology of generative word, and comparisons with other theoretical referents. Letter grading.

296A-296F. Seminars: Research Topics in Education. (2 each). Seminar, three hours. Advanced study and analysis of current topics in education. Discussion of current research and literature in research specialties of faculty member teaching course. S/U grading.

296G. Research Topics in Education: Legal Aspects of Educational Management. (2), Lecture, two hours. Examination and analysis of legal issues, especially as they apply to school organizations. Letter grading.

296H. Research Topics in Education: Organization Theory. (2). Lecture, two hours. Examination and analysis of organizational theories, especially as they apply to school organizations. Letter grading.

M297. Interdisciplinary Relationship Science. (4), (Same as Anthropology M297A-Sociology M297A), Seminar, four hours. Examination of relationship science in fields of anthropology, education, psychology, and sociology. Focus on theme of understanding biological, behavioral, and cultural aspects of relationships through diverse theoretical and methodological approaches. Use of broad definition of interpersonal relationships, including relationships such as parent-child, teacher-student, sibling, peer, kin, romantic relationships, marriages, and friendships. S/U or letter grading.

M298A-M298B. Research in Education: Persistent Failure, Urgent Challenges. (2-2-2), (Same as Anthropology M298A-M298B, Sociology M298A, and Psychology M298A), Seminar, four hours. Examination of multicultural American society and institutions at beginning of 21st century. Focus on reliable information on patterns of settlement, changing functions of urban space and institutions, and issues of opportunity linked to urban structure in society facing unprecedented demographic change that will end primarily European domination of our society by mid-century, creating democracy with no racial or ethnic majority. How this demographic transition and postindustrial transformation, changing functions of urban space and interaction to shape opportunity and inequality. Vast economic transformations raised by multicultural and postcolonial science and technology studies that have emerged since 1990s. May be repeated for credit. S/U grading.

290. Educational Policy Analysis: Research, Theory, and Practice. (4), Seminar, four hours. Broad overview of development of educational policy from 1950s to present. Examination of issues and debates within educational policy in U.S. through different theoretical lenses. Exploration of major bodies of research on educational policy and alternative paradigms. Letter grading.
speakers from diverse fields, including anthropology, education, psychology, and sociology. May be repeated for credit. S/U grading.

329A-299B-299C. Research Practicum: Educa-
tion. (4 to 8 each). Clinical, to be arranged. May be repeated for credit. S/U or letter grading.

330. Dissertation Writing Workshop: Interdivisional Seminar. (4). Seminar, one hour; discussion, two hours; laboratory, up to limited enrollment. Introduction for doctoral candidates to dissertation writing as genre that can be analyzed or broken down with its constituent parts and, vice versa, which is constructed out of materials that can be identified and analyzed. S/U grading.

301. Introduction to Information and Presentation Tools. (2). Laboratory, two hours. Limited to creden-
tial program students. Sequence of laboratory ses-
sions providing preservice teachers with introduction to education technology infrastructure and classroom presentation tools. Introduction to resources and ser-
dices, e-mail functions and Internet, and presentation software and multimedia elements. S/U grading.

305. Health Education for Teachers. (2). Lecture, two hours. Limited to Teacher Education Program students. Teaching/learning process as applied to personal and public health. Topics include

308. Principles and Methods for Teaching Manda-
tine and secondary schools. Expansion of instructional programs and analyses and practices of instructional methods for teaching K-6 content, with emphasis on interdisciplinary approach that integrates content areas and infuses literacy, technology, and strategies for second language learners. Aligned with California state frameworks and California content standards for grades K-12 that address needs and interests of di-
verse students. S/U grading.

318B. Integrated Methods for Elementary Teach-
ers. (4). Lecture, four hours. Examination and devel-
oment of instructional programs and analyses and practices of instructional methods for teaching K-6 content, with emphasis on interdisciplinary approach that integrates content areas and infuses literacy, technology, and strategies for second language learners. Aligned with California state frameworks and California content standards. (4).

320A-320B-320C. Secondary Content and Literacy
Methods. (3–3–3). Lecture, one hour; discussion, one hour; fieldwork, one hour. Examination and develop-
ment of instructional programs and analyses and practices of instructional methods for teaching con-
tent in grades 7-12. Emphasis on interdisciplinary ap-
proach that integrates content areas and infuses liter-
acy, technology, and strategies for second language learners. Methods courses are aligned with California state frameworks and California content standards for grades K-12, including English Language Develop-
ment Standards—all of which address needs and var-
ious interests of diverse students. S/U grading.

327. Principles and Methods for Teaching Spanish Effective-ly. (2 to 6). Lecture, two to six hours. Emphasis on proficiency-based foreign language teaching methods incorporating language assess-
ment skills, modeling, hands-on experiences, and de-

328. Principles and Methods for Teaching Manda-
rin Effectively. (2 to 6). Lecture, two to six hours. Emphasis on proficiency-based foreign language teaching methods incorporating language assess-
ment skills, modeling, hands-on experiences, and de-

330A. Observation and Participation. (2 to 6). Site-
based fieldwork. 10 to 15 hours. Students are as-
signed to school sites with racially, culturally, and lin-
guistically diverse student populations. Throughout observation and participation period, students ana-
lyze effective strategies for achieving learning for all students, including sociocultural approaches and ap-
propriate use of educational technology. S/U grading.

330B. Student Teaching. (4 to 8). Site-based field-
work, 10 to 20 hours. Requisite: course 330A. Stu-
dents are assigned to student teach in designated
school sites with racially, culturally, and linguistically
diverse student populations. Throughout student teaching period, students as novice teachers plan, implement, and assess daily lessons and units, as well as actively engage in reflecting on issues specific to school/community relations. S/U grading.

330C. Student Teaching. (4 to 8). Site-based field-
work, 10 to 30 hours. Requisite: course 330A. Stu-
dents are assigned to student teach in designated
school sites with racially, culturally, and linguistically
diverse student populations. Throughout student teaching period, students as novice teachers plan, implement, and assess daily lessons and units, as well as actively engage in reflecting on issues specific to school/community relations. Increased daily re-
sponsibilities. S/U grading.

330D. Classroom Residency and Teaching. (4). Site-based fieldwork, 40 hours. Students are em-
ployed by local school districts to teach as residents in designated school sites with racially, culturally, and linguistically diverse student populations. Students also work in collaborative teams through Teacher Ed-
ucation Program to initiate change project in their local school and/or complete case study on project. S/U grading.

330A-390A-390BCC. Seminar, two hours. Analysis of basic principles and con-
cepts of planning, conducting, and evaluating units of curriculum and instruction. Emphasis on study and utilization of constructivist strategies and their appli-
cation in elementary and secondary schools. Exam-
nation of different methods of computer literacy and teaching subject matter. Students may conduct eth-
ographic inquiry of local community of their design-
ation partnership district. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4). Sem-
inari, to be arranged. Preparation: apprentice per-
sonnel employment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guid-
ance and supervision of regular faculty member re-
 sponsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

390A-390B. Colloquium Series: Psychological
Studies in Education. (1-1). Seminar, one hour. Re-
quired of first- or second-year Psychological Studies
in Education (PSE) Ph.D. students. Training to con-
duct research that has practical implications as well
as theoretical significance within field of applied
human development. Children's cognitive, language,
personality, and social development in educationally
relevant settings such as schools and daycare pro-
grams that use unity approaches. Series addresses is-

340. Structure and Functions of Schools as Com-
plex Organizations. (4). Lecture, four hours. Critical analysis of alternative assumptions about organiza-
tions, how they function, and why people in organiza-
tions behave as they do. Application to special cir-
cumstances of schools and to contemporary issues and problems in school leadership, improvement, and reform. S/U or letter grading.

400. Curriculum Principles and Practices. (4). Le-
cture, four hours. Critical analysis of major concepts, underlying assumptions, policy issues, and processes in development and implementation of curriculum in educational setting. Problems in formulation of pur-
poses, selection of learning experiences, organization of curriculum, and curriculum evaluation. S/U or letter grading.

424A. Social Studies in Curriculum. (4). Lecture, four hours. Advanced study in social studies curriculum development in defining scope and sequence of social studies; critical review of literature on cognitive and affective learning in social science, with emphasis on experimental study of instructional programs. S/U or letter grading.

424B. Reading in Curriculum. (4). Lecture, four hours. Requisite: course 230A. Study of reading curricula and instructional procedures, with emphasis on rationale and research underlying their development and research comparing their effectiveness. S/U or letter grading.

424G. Curriculum Design for Bilingual Educational. (4). Lecture, four hours. Advanced study of curriculum design for bilingual educational programs. Philosophical basis for bilingual programs; theories of teaching and instruction applied to bilingual learner; language assessment; development of instructional component; program evaluation. S/U or letter grading.

426A-426B. Program Development and Program Evaluation in Student Affairs. (2-2). Lecture, two hours. Introduction to program development and planning, as well as to assessment and program review. Development of and in programs that provide support for learning within context of student affairs, as well as knowledge of and skill in developing, implementing, and analyzing assessment projects within student affairs context. Study of basic theoretical perspectives underlying program design/implementation and program review/assessment and application by developing, implementing, and assessing effectiveness of one program. In Progress (426A) and Letter (426B) grading.

433A. Design of Learning Environments. (4). Discussion, four hours. Theory and practice of design of technology-supported learning environments. Examination of how theories of learning guide design and enactment of learning environments in classrooms and informal settings and how research on such environments informs theory and design. Letter grading.

433B. Development of Educational Media. (4). Discussion, four hours. Current issues and trends in design of interactive educational media. Design and development of prototype educational media applications on personal computers; planning and focus on experimental educational media into formal learning settings, or evaluations of specific learning environments. Letter grading.

440C. Administration of Instructional Programs. (4). Lecture, four hours. Examination of current educational problems in society and strategies of their solution through curriculum policy and practice; instructional design and operation; in-service training of teaching staffs. S/U or letter grading.

441A. Instructional Supervision A. (4). Lecture, four hours. Analysis of teaching in light of research-substantiated elements of instruction: task analysis, appropriate objectives, principles that increase motivation, principles of transfer and transfer, monitoring and adjusting instruction to meet needs and capacities of learners. S/U or letter grading.

442B. Legal Aspects of Educational Management and Practice. (4). Lecture, four hours. Examination of structures and kinds of law governing educational systems in U.S.; constitutional dimensions of church/ state relations; students’ civil rights and legal aspects of hiring, firing, and negotiating procedures; student attendance, control, and civil rights. S/U or letter grading.

443. Policy Analysis in Education. (4). Lecture, four hours. Overview of political, economic, and legal context of educational policy formation. Included are issues that impact on minorities (e.g., bilingual education, desegregation, affirmative action, role of subordinants in policy-making process). S/U or letter grading.

444B. Building of Educational Opportunity through Desegregation and Finance Case Law. (4). Lecture, four hours. Requisite: course 442B. Concentrated review of definition of educational opportunities, techniques being developed by courts in specific cases concerning desegregation and educational finance. S/U or letter grading.

447. Seminar: Educational Policy and Planning, Special Studies. (1 to 4). Seminar, one to four hours. S/U or letter grading.

448A. Urban School Leadership. (4). Lecture, four hours. Analysis of problems of urban school leader. Emphasis on changing nature of urban principalship, with considerable attention to role of school and community that interact with urban school leaders. S/U or letter grading.

448B. Urban Leadership Laboratory. (4). Lecture, four hours. Analysis of and opportunity to practice human relations skills. Focus on success as urban school leader. Topics include negotiations, conflict resolution, applied computer technology, and effective communication. Activities include gaming, simulation, computer programming, and group dynamics. S/U or letter grading.

450. Leadership Capacity Building. (4). Lecture, one hour; discussion, three hours. Limited to Educational Leadership Program students. Course taken in year three of Educational Leadership Program. Intended to assist students with their communication and leadership capacities. S/U or letter grading.

451. Foundations of Organizations and Leadership. (4). Lecture, four hours. Limited to Educational Leadership Program students. Promotion of understanding of traditional and contemporary conceptions of leadership and organizational theory, with application of these conceptions to student professional work settings. Letter grading.

452A-452B. Educational Enterprise. (4-4). Lecture, two hours; discussion, two hours. Limited to Educational Leadership Program students. Use of structural, human resource, political, and symbolic frames to shape and direct educational work in K-16 education. Focus on purposes of education governance, finance, access, and equity. 452B: Requisite: course 452A. Focus on educational environments, organizations, and curriculum development.

453. Technology in Education: Learning and Leading with Technology. (2). Lecture, two hours; discussion, two hours. Limited to Educational Leadership Program students. Examination of roles of technology in educational institutions and leadership issues associated with these roles. Letter grading.

454A. Action Research: Collaboration in Change. (4). Lecture, one hour; discussion, two hours; small group work, one hour. Limited to Educational Leadership Program students. Study of cycle of action research at educational site. Projects done in teams as students hone and assess their collaboration abilities. Exploration of qualitative and quantitative data gathering methods and analyses. Letter grading.

454B. Action Research: Collaboration in Change. (4). Lecture, one hour; discussion, two hours; small group work, one hour. Limited to Educational Leader- ship Program students. Second course in two-course sequence on learning how to do and use action research. Honing of team processes and team roles while collaborating on data collection and analysis at educational site. Letter grading.

455. Writing and Inquiry. (4). Lecture/workshop, eight hours per month; discussion, one hour; laboratory, one hour. Limited to doctoral students in Educa- tional Leadership Program. Intended to assist stu- dents’ professional development as writers, addressing style and organization, scholarly genres, modes of discourse, and broader issues of conceptual- ity and method. Letter grading.

456. Altering Structure and Culture of Schooling. (4). Lecture, four hours; discussion, four hours. Limited to Educational Leadership Program students. Using applied orientation, examination of variety of approaches to organizational change and ways to sustain change. Letter grading.

460. Seminar: Special Issues in Evaluation. (2 or 4). Seminar, one or two hours; discussion, one or two hours. Topics and instructors vary each term. Recent emphases included evaluation methodology and cost- effectiveness of evaluation. S/U or letter grading.

462. Seminar: Community College. (4). Seminar, four hours. Topics include problems and practices in community college formation, instruction, student flow, administration, and/or evaluation. S/U or letter grading.

466. Critical Media Literacy: Teaching Youth to Critically Read and Create Media. (4). Lecture, four hours. Preparation for educators to teach K-12 stu- dents to explore their own alternative media messages and critically questioning media representations and creating their own alternative media messages. Critical media literacy combines theoretical foundations of cultural
studies and critical pedagogy with practical classroom applications of new digital media as well as traditional print-based means of communication. Explo- ration of curriculum representations of race, class, gender, sexual orientation, and other identity markers. Edu- cators critically question media and technology, as well as explore new alternatives for creating multimedia messages in their own classrooms and the creation of media projects related to teaching required. Letter grading.

482B, Instructional Strategies in Urban Education: English Language Learners. (4). Lecture, four hours. Emphasis on instructional practices that support En- glish language learners in urban public schools. Study and analysis of delivery of comprehensive specialized instruction for English learners and debriefing of field experiences implementing adopted instructional pro- grams for development of academic language, compre- hension, and knowledge in core academic curric- ulum. Letter grading.

482C, Instructional Strategies in Urban Education: Special Populations. (4). Lecture, four hours. Em- phasis on instructional practices that support special populations in urban public schools. Continuation of study of statutory provisions, curriculum, instruction, and assessment issues related to teaching students with disabilities, students who are at risk, and stu- dents who are gifted and talented. Research opportuni- ties, additional methods in content areas for ad- vanced study, and preparation of M.Ed. inquiry in- cluded. Letter grading.

482D, Instructional Strategies in Urban Education: Visual and Performing Arts. (4). Lecture, two hours; dis- cussion, two hours. Emphasis on instructional practices that integrate visual and performing arts into urban classrooms. Debriefing of field experiences im- plementing subject-centered arts instruction, instruc- tion connecting arts disciplines, and instruction con- necting arts and other core disciplines. Advanced ex- ploration of elements of each art form, as well as content and emotional scaffolding strategies and re- flection strategies to make learning accessible, en- gaging, and relevant. Letter grading.

485, Advanced Study of Health Education. (1). Lec- ture, four hours. Student meetings with instructors, field specialists, and team cohorts to study and ana- lyze delivery of comprehensive support for physical, cognitive, emotional, and social well-being of stu- dents in K-12 classrooms. Topics include prevention and intervention strategies, accessing local and com- munity resources, curriculum and instruction, and major state and federal laws related to student health and safety. Letter grading.

490A, Instructional Decision Making. (4). Lecture, four hours. Analysis of instructional models relevant to public school education. Assumptions, procedures, and constraints of each strategy considered in terms of learner and task variables. Laboratory experiences

in classroom settings permit students systematically to apply and evaluate alternative instructional strate- gies. S/U or letter grading.

498A-498B-498C. Resident Seminars. (4-4-4). Seminar, two hours; site-based fieldwork, two hours. Students meet in individual sessions with instructors and other field support faculty and in team and cluster cohorts for university-school partnership, in addition to regular seminars to debrief field experiences and continue study of curriculum, instruction, and assess- ment issues. Research opportunities, additional methods in content areas, and preparation of M.Ed. portfolio included. Letter grading.

498A-498B-498C. Directed Field Experience. (2 to 8 each). Clinical, to be arranged. Field experiences designed to increase understanding of student fields of study. May be repeated for credit. S/U or letter grading.

499A-499B-499C. Advanced Directed Field Experi- ence. (4 to 8 each). Clinical, to be arranged. May be repeated for credit. S/U or letter grading.

501, Cooperative Program in Special Education. (2 to 8). Tutorial, to be arranged. Preparation for and participation in UCLA academic adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Limited to UCLA doctoral students in special education. Used to record enrollment in practicum courses taken under cooperative arrangements with USC. S/U grading.

596, Directed Independent Study. (4 to 12). Tutorial, to be arranged. Individual study for or research for graduate students. May be re- peated for credit. S/U or letter grading.

597, Preparation for Master's Comprehensive Ex- aminations or Doctoral Qualifying Examinations. (4 to 8 each). Tutorial, to be arranged. Individual study for master's comprehensive examinations or for Ph.D. or Ed.D. qualifying examinations. May be repeated for credit. S/U or letter grading.

598, Thesis Research. (4 to 8 each). Tutorial, to be arranged four hours for every 4 units. Individual study or research for graduate students. May be re- peated for credit. S/U or letter grading.

599, Dissertation Research. (4 to 8 each). Tutorial, to be arranged four hours for every 4 units. Research for and preparation of doctoral dissertation. May be re- peated for credit. S/U or letter grading.

Paulo Tabuada, Ph.D., Vice Chair, Graduate Affairs
Oscar M. Stafsudd, Jr., Ph.D., Vice Chair, Undergraduate Affairs
Jason C.S. Woo, Ph.D., Vice Chair, Industry Relations

Professors
Asad A. Abidi, Ph.D.
Abeer A.H. Alwan, Ph.D.
Katsushi Arisaka, Ph.D.
M.-C. Frank Chang, Ph.D., (Wintek Endowed Professor of Electrical Engineering)
Panagiotis D. Christofides, Ph.D.
Jingsheng Jason Cong, Ph.D.
Babak Daneshrad, Ph.D.
Suhail N. Digavi, Ph.D.
Warren S. Grundfest, M.D., FACS
L. He, Ph.D.
Diana L. Huffaker, Ph.D.
Tatsuo Itoh, Ph.D. (Northrop Grumman Professor of Electrical Engineering)
Bahram Jalali, Ph.D. (Northrop Grumman Opto-Electronic Professor of Electrical Engineering)
Mona Jarrahi, Ph.D.
Chandrashekar J. Joshi, Ph.D.
William J. Kaiser, Ph.D.
Alan J. Laub, Ph.D.
Kuo-Nan Liu, Ph.D.
Jia-Ming Liu, Ph.D.
Wentai Liu, Ph.D.
Warren B. Mori, Ph.D.
Ali Mosleh, Ph.D.
Stuart J. Osher, Ph.D.
Thomas S. Otis, Ph.D.
Aydogan Ozcan, Ph.D.
C. Kumar Patel, Ph.D.
Gregory J. Pottie, Ph.D.
Yahya Rahmat-Samii, Ph.D. (Northrop Grumman Professor of Electrical Engineering)
Electromagnetics
Behzad Razavi, Ph.D.
Wvani P. Roychowdhury, Ph.D.
Izhak Rubin, Ph.D.
Henry Samueli, Ph.D.
Majid Sarrafzadeh, Ph.D.
Ali H. Sayed, Ph.D.
Stefano Soatto, Ph.D.
Jason L. Speyer, Ph.D.
Mani B. Srivastava, Ph.D.
Oscar M. Stafsudd, Jr., Ph.D.
Dwight C. Streit, Ph.D.
Paulo Tabuada, Ph.D.
King-Ning Tu, Ph.D.
Lieven Vandenberghe, Ph.D.
Mihaela van der Schaar, Ph.D.
John D. Villasenor, Ph.D.
Kang L. Wang, Ph.D. (Raytheon Company Professor of Electrical Engineering)
Chee Wei Wong, Ph.D.
Richard D. Wesel, Ph.D.
Jason C.S. Woo, Ph.D.
C-K. Ken Yang, Ph.D.
Kung Yao, Ph.D.
Lixia Zhang, Ph.D.

Professors Emeriti
Frederick G. Allen, Ph.D.
A.V. Balakrishnan, Ph.D.
Francis F. Chen, Ph.D.
Harold R. Fetteman, Ph.D.
Stephen E. Jacobsen, Ph.D.
Rajeev Jain, Ph.D.
Nhan N. Levan, Ph.D.
Dee Son Pan, Ph.D.
Richard D. Wesel, Ph.D.
Mona Jarrahi, Ph.D.
Bahram Jalali, Ph.D.
Rajeev Jain, Ph.D.
Chee Wei Wong, Ph.D.
Kang L. Wang, Ph.D. (Raytheon Company Professor of Electrical Engineering)
Choe Wei Wong, Ph.D.
Richard D. Wesel, Ph.D.
Jason C.S. Woo, Ph.D.
C-K. Ken Yang, Ph.D.
Kung Yao, Ph.D.
Lixia Zhang, Ph.D.

Pedram Khalili Amiri, Ph.D.
Adjunct Assistant Professors
Eli Yablonovitch, Ph.D.

Scope and Objectives
The Department of Electrical Engineering fosters a dynamic academic environment that is committed to a tradition of excellence in teaching, research, and service and has state-of-the-art research programs and facilities in a variety of fields. Departmental faculty members are engaged in research efforts across several disciplines in order to serve the needs of industry, government, society, and the scientific community. Interactions with other disciplines are strong. Faculty members regularly conduct collaborative research projects with colleagues in the Geffen School of Medicine, Graduate School of Education and Information Studies, School of Theater, Film, and Television, and College of Letters and Science.

There are three primary research areas in the department: circuits and embedded systems, physical and wave electronics, and signals and systems. These areas cover a broad spectrum of specializations in, for example, communications and telecommunications, control systems, electromagnetics, embedded computing systems, engineering optimization, integrated circuits and systems, microelectromechanical systems (MEMS), nanotechnology, photonics and optoelectronics, plasma electronics, signal processing, and solid-state electronics.

The program grants one undergraduate degree (Bachelor of Science in Electrical Engineering) and two graduate degrees (Master of Science and Doctor of Philosophy in Electrical Engineering). The graduate program provides students with an opportunity to pursue advanced coursework, in-depth training, and research investigations in several fields.

Undergraduate Study
The electrical engineering program is accredited by the Engineering Accreditation Commission of ABET. See http://www.abet.org.

The Electrical Engineering major is a designated capstone major. Undergraduate students complete a design course in which they integrate their knowledge of the discipline and engage in creative design within realistic and professional constraints. Students apply their knowledge and expertise gained in previous mathematics, science, and engineering coursework. Within a multidisciplinary team structure, students identify, formulate, and solve engineering problems and present their projects to the class.

Electrical Engineering B.S. Capstone Major
The undergraduate curriculum provides all Electrical Engineering majors with preparation in the mathematical and scientific disciplines that lead to a set of courses that span the fundamentals of the discipline in the three major departmental areas of signals and systems, circuits and embedded systems, and physical wave electronics. These collectively provide an understanding of inventions of importance to society, such as the electrical grid, integrated circuits, photonic devices, automatic computation and control, and telecommunication devices and systems.

Students are encouraged to make use of their electrical engineering electives and a two-term capstone design course to pursue deeper knowledge within one of these areas according to their interests, whether for graduate study or preparation for employment. Students may further specialize by making use of their three courses in the technical breadth area (12 units required). For example, students wishing to specialize in computer engineering may select Computer Science 33 instead of Electrical Engineering 101B under the major, are encouraged to take Computer Science 35L, and then take three 4-unit upper division computer science elective courses. Students wishing to specialize in bioengineering and informatics may pursue some combination of Bioengineering 100, C101, CM102, 110, and Chemistry and Biochemistry 20B, together with elective courses such as Electrical Engineering 114, 133B, and 180DA and 180DB (the capstone design sequence).

Preparation for the Major
Required: Chemistry and Biochemistry 20A; Computer Science 31, 32; Electrical Engineering 2, 3, 10, 11L, M16 (or Computer Science M51A); Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

Students wishing to specialize in computer engineering are encouraged to take Computer Science 35L in preparation for upper division computer science courses.

The Major
Required: Electrical Engineering 101A, 101B (or Computer Science 33), 102, 110, 111L, 113, 115A, 115AL, 121B, 131A, 132A, 133A, 141, 170A; three technical breadth courses (12 units) selected from an approved list available in the Office of Academic and Student Affairs; and three major field elective courses (12 units), consisting of either three additional upper division electrical engineering courses, or two upper division electrical engineering courses and one upper division computer science course; and one two-term electrical engineering capstone design course (8 units).

For information on University and general education requirements, see the College and Schools section earlier in this catalog.

Graduate Study
Official, specific degree requirements are detailed in Program Requirements for UCLA Graduate Degrees, available at the Graduate Division website, http://grad.ucla.edu/gasaa. Further information. Letter grading.

Graduate Degrees
The Department of Electrical Engineering offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Electrical Engineering.

Electrical Engineering
Lower Division Courses
2. Physics for Electrical Engineers. (4).
Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisite: Physics 1C. Introduction to concepts of modern physics necessary to understand solid-state devices, including elementary quantum theory, Fermi energies, and concepts of electrons in solids. Discussion of electrical properties of semiconductors leading to operation of junction devices. Letter grading.

3. Introduction to Electrical Engineering. (5).
Lecture, two hours; laboratory, two hours; outside study, five hours. Prerequisite: Physics 1B. Introduction to field of electrical engineering. Basic circuits techniques with application to explanation of electrical engineering inventions such as telecommunications, electrical grid, automatic computing and control, and enabling device technology. Research frontiers of electrical engineering. Introduction to measurement and design of electrical circuits. Letter grading.

Lecture, four hours; discussion, one hour; outside study, seven hours. Prerequisites: course 3 (or Computer Science 1 or Materials Science 10), Mathematics 33A, Physics 1B, Corequisites: course 11L (enforced), Mathematics 33B. Introduction to linear circuit analysis. Resistive circuits, capacitors, inductors and ideal transformers, Kirchhoff laws, node and loop analysis, first-order circuits, second-order circuits, Thévenin and Norton equivalent circuits, superposition, transient and steady state analysis. Letter grading.

11L. Circuits Laboratory I. (1).
Lecture, one hour; laboratory, one hour; outside study, one hour. Enforced corequisite: course 10. Experiments with basic circuits containing resistors, capacitors, inductors, and transformers. Ohm’s law voltage and current division, Thévenin and Norton equivalent circuits, superposition, transient and steady state analysis. Letter grading.

(Same as Computer Science M51A.) Lecture, four hours; discussion, two hours; outside study, six hours. Introduction to digital systems. Specification and implementation of combinational and sequential systems. Standard logic modules and programmable logic arrays. Specification and implementation of algorithmic systems: data and control sections, Number systems and arithmetic algorithms. Error control codes for digital information. Letter grading.
Upper Division Courses

100. Electrical and Electronic Circuits. (4). Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: Mathematics 33A, 33B, Physics 1C. Not open for credit to students with credit for course 110. Electrical quantities, linear circuit elements, Kirchhoff’s laws, superposition, node admittance, mesh admittance, transient and steady state circuit behavior, semiconductor diodes and transistors, signal models, and operational amplifiers. Letter grading.

101A. Engineering Electromagnetics. (4). Formerly numbered 101A. Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Mathematics 32A and 32B, or 33A and 33B, Physics 1C. Electromagnetic field concepts, waves and phasors, transmission lines and Smith chart, transient responses, vector analysis, introduction to Maxwell equations, static and quasi-static electric and magnetic fields. Letter grading.

101B. Electromagnetic Waves. (4). Formerly numbered 161L. Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 101A. Time-varying fields and Maxwell equations, plane wave propagation and interaction with media, energy flow and Poynting vector, guided waves in waveguides, phase and group velocity, radiation and antennas. Letter grading.

110. Circuit Theory II. (4). Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: courses 10, 102. Enforced corequisite: course 111L. Sinusoidal excitation and phasors, AC steady state analysis, AC steady state power, network functions, poles and zeros, frequency response, mutual inductance, ideal transformer, application of Laplace transforms to circuit analysis. Letter grading.

110L. Circuit Measurements Laboratory. (2). Labo- ratory, four hours; discussion, two hours. Requisite: course 100 or 110. Experiments with basic circuits containing resistors, capacitors, inductors, and op-amps. Ohm’s law voltage and current measurement, AC circuits, circuit behavior, transient and steady state analysis, and frequency response principles. Letter grading.

111L. Circuits Laboratory II. (1). Lecture, one hour; laboratory, one hour; outside study, one hour. Enforced corequisite: courses 10, 11L. Enforced require- site: course 110. Experiments with electrical circuits containing resistors, capacitors, inductors, transformers, and op-amps. Steady state power analysis, frequency response principles, op-amp-based circuit synthesis, and two-port network principles. Letter grading.

113DA-113DB. Digital Signal Processing Design. (4–4). Real-time implementation of digital signal processing algorithms on digital processor chips. Experi- ments include A–D and D–A conversion, aliasing, digital filtering, sinusoidal oscillators, Fourier transforms, and finite wordlength effects. Course project involving original design and implementation of signal processing algorithms, use of communication (speech, audio, or video using DSP chip. 113DA. (Formerly numbered 113D.) Lecture, two hours; laboratory, four hours; outside study, six hours. Enforced requisite: course 113. In progress grading (credit to be given only on completion of course 113D). 113DB. Labora- tory, four hours; outside study, eight hours. Enforced requisite: courses 113, 113DA. Completion of projects begun in course 113DA. Letter grading.

114. Speech and Image Processing Systems De- sign. (4). Lecture, four hours; outside study, two hours; outside study, six hours. En- forced requisite: course 113. Design principles of speech and image processing systems. Speech pro- duction, analysis, and modeling in first half of course. Image design techniques for image enhancement, filtering, and transformation in second half. Lectures supplement by laboratory implementation of speech and image processing designs. Letter grading.

115AL. Analog Electronics Laboratory I. (2). Labo- ratory, four hours; outside study, two hours. Enforced requisite: courses 110L or 111L, 115A. Experimental determination of device characteristics, resistive diode circuits, operational amplifier stages, effect of feedback on single-stage amplifiers, operational amplifiers, and operational ampli- fier circuits. Introduction to hands-on design experi- ence based on student hardware design and implementation platforms. Letter grading.

115BL. Analog Electronics Laboratory II. (4). Labo- ratory, four hours; outside study, eight hours. En- forced requisite: course 115B. Recommended coreq- uisite: course 115D. Study of high-frequency effects in discrete circuit design. Laboratory experiments in- clude transmission lines, tuned amplifiers, oscillators, mixer, and broadband amplifiers. Hands-on experi- ence in implementation of basic electronic circuits and their characterization. Letter grading.

115E. Computer Systems Architecture. (4). (Same as Computer Science M151B.) Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 115A. Computer Science M51A, Computer Science 33. Recom- mended: course 115BL or Computer Science M51A, Computer Science 111. Computer system organization and design, implementation of CPU data- path and control, instruction set design, memory hi- erarchy (caches, main memory, virtual memory) orga- nization and management, input/output subsystems (bus structures, interrupts, DMA), performance evalu- ation, pipelined processors. Letter grading.
