CALENDAR FOR 1900-1901.

FIRST TERM.

Entrance examinations and admission on credentials,
Thursday, September 6, 1900
Examinations for advanced standing and to remove conditions,
Friday, September 7, 1900
Term opens - - - - - Tuesday, September 11, 1900
Term closes - - - - - Thursday, January 31, 1901
Holiday vacation - - December 21, 1900, to January 2, 1901

SECOND TERM.

Entrance examinations and admission on credentials,
Friday, February 1, 1901
Term opens - - - - - Wednesday, February 6, 1901
Mid-term vacation - - - - - April 12 to 22 exclusive
Term closes - - - - - Thursday, June 27, 1901
BOARD OF TRUSTEES, 1899-1900.

HENRY T. GAGE - - - - - - - - - - - - - - - Governor.
THOMAS J. KIRK - - - - - - - - - - - - - Supt. Public Instruction.
N. P. CONREY, - - - - - - - - - - - - - Los Angeles.
R. H. F. VARIEL, - - - - - - - - - - - - - Los Angeles.
HENRY O’MELVENY, - - - - - - - - - - - - - Los Angeles.
JOHN S. COLLINS, - - - - - - - - - - - - - Ventura.
E. J. LOUIS, - - - - - - - - - - - - - San Diego.

Officers of the Board.
N. P. CONREY, - - - - - - - - - - - - - President.
R. H. F. VARIEL, - - - - - - - - - - - - - Vice-President.
EDWARD T. PIERCE, - - - - - - - - - - - - - Secretary.

Executive Committee.
N. P. CONREY R. H. F. VARIEL,
JOHN S. COLLINS.
FACULTY, 1900-1901.

NORMAL DEPARTMENT.

✓ EDWARD T. PIERCE, LL.B., Ph.D., PRESIDENT,
School Economy.

✓ MELVILLE DOZIER, B.P., VICE-PRESIDENT,
Mathematics and Bookkeeping.

✓ GEORGE F. JAMES, A.M., Ph.D.,
Professor of Psychology and Pedagogy, and
Supervisor of Training School.

✓ ISABEL W. PIERCE, PRECEPTRESS,
English.

✓ SARAH P. MONKS, A.M., CURATOR OF MUSEUM,
Zoology and Botany.

✓ HARRIET E. DUNN, LIBRARIAN,
History.

✓ CHARLES H. HUTTON, A.M., REGISTRAR,
Mathematics.

✓ JOSEPHINE B. SEAMAN,
English.

✓ MAY A. ENGLISH,
Chemistry.

✓ JAMES H. SHULTS, A.M., M.D.,
Physics and Physiology.

✓ EVERETT SHEPARDSON, A.M.,
Psychology and Pedagogy.

✓ ADA M. LAUGHLIN,
Drawing.

✓ JAMES F. CHAMBERLAIN,
Geography and Physics.

✓ CHARLES M. MILLER,
Sloyd.

✓ CHARLES DON VON NEUMAYER,
Reading.

✓ SARAH J. JACOBS,
Director of Physical Training.

✓ ETTA E. MOORE, A.M.,
English.
FACULTY OF NORMAL DEPARTMENT—Continued.

B. M. DAVIS, M.S.,
Biology and Physiology.

KATE BROUSSEAU,
Psychology and Mathematics.

MARY M. SMITH,
Drawing and Sloyd.

JENNIE HAGAN,
Music.

AGNES ELLIOTT,
History and Geography.

MARY G. BARNUM, B.L.,
English.

LOU HELLMUTH, Ph.B., M.L.,
English.

JESSICA C. HAZARD,
Domestic Science and Domestic Art.

LUCY J. ANDERSON,
Domestic Science and Reading.

J M. EVA BLAKE taught Sewing during last half of the year 1899-1900.

KINDERGARTEN TRAINING DEPARTMENT.

FLORENCE LAWSON, Director.
GERTRUDE LAWSON, Assistant.

TRAINING SCHOOL.

nitie Teachers.
FRANCES H. BYRAM, City Principal.
EMMA W. EDWARDS, M.L.
CARRIE REEVES.

ALBERTINA SMITH.
CLARA M. PRESTON.

EMPLOYEES.

MATTIE M. TOWNSEND, Typewriter and Office Assistant.
ELIZABETH H. FARGO, Assistant Librarian.
EDWIN P. CARR, Engineer and Carpenter.
LUKE GALLUP, Janitor of Gymnasium.
JOHN D. BARRIE, Resident Janitor.
THOMAS FARNHAM, Gardener.
C. H. LAWRENCE, Janitor.
The object of the Normal School is to train students for the work of teaching in the public schools of California. Those who wish simply to prepare to pass an examination and thus acquire a teacher's certificate cannot be admitted. We are always glad, however, to welcome teachers who wish to make better preparation for their work. Every facility will be given such for observation or for special study. Courses will be planned for those holding Grammar Grade certificates, and they will be given an opportunity to complete the work and obtain the diploma of the school in the shortest time possible consistent with their thorough training professionally. The large number of teachers and of High School and College graduates entering during the past two years leads the management to hope that but a short time will elapse before only those who have had such preparation will be admitted. It is hoped, therefore, that all who find it possible to do so will complete a course equivalent to that of an accredited High School before coming to the Normal. Such students have more purpose and more determination than those entering with less preparation, and are much more likely to complete the course than the latter. Applicants, however, who are not fully accredited to the University in all subjects need not hope to complete the professional course outlined for High School graduates in two years.

Friends of education who believe in the professional training of teachers will not advise those to enter the Normal School who are not above the average in intelligence and ability to work and who have not fully made up their minds that they want to become teachers.

The Normal School, both in size, earnestness, and ability of its Faculty, and in its facilities for the thorough training of teachers, has made rapid strides during the past five years. The new building now in process of construction will enable us to give most complete manual training for teachers in public schools. The addition of a number of rooms to our Training School and the number of pupils that can be accommodated in that department will make it possible for student-teachers to take entire charge of a room and thus more completely test their ability to instruct than is possible in many Normal Schools. Friends of education are always welcome to visit the school and inspect the work of the various departments.
CONDITIONS OF ADMISSION AND GRADUATION.

For admission to any class, the following qualifications are requisite:

(i) The applicant must be sixteen years of age, and strong mentally, morally, and physically.

(ii) To be admitted without examination, an applicant must (a) hold a valid teacher's certificate of any grade from any county or city of California; or (b) hold a diploma of graduation from a California High School; or (c) a diploma from the ninth year of the public schools under conditions named below; (d) applicants presenting High School diplomas of graduation, or first grade teachers' certificates granted in other States than California, may be admitted without examination at the discretion of the Faculty. For further regulations concerning the admission of High School graduates see page 17.

Graduates from the ninth year of the public schools of California will be admitted without examination when the diploma is accompanied by a statement as to standing and a special recommendation from teachers. The record must show a high standing in all subjects. Blanks to be filled out may be obtained of the County Superintendent.

ADMISSION ON EXAMINATION.

Examinations for admission to the Junior Class will be given, at the dates named in the calendar, September 6th, for the fall term, and February 1st, for the spring term. A fair knowledge of the following subjects will be required: Arithmetic, English, Geography, United States History, Reading, Spelling, Penmanship, and Vocal Music.

The requirements in Arithmetic will include the following points: Accurate work in the fundamental operations; reduction in common and decimal fractions; simple processes in weight, measurement, and volume; forms in analysis; applications of percentage, with special reference to the use of elemental principles.

In English the applicant for examination should be able to distinguish readily the various parts of speech in their usual construction. He should analyze quickly simple prose or verse, giving the various kinds of sentences and the relation of the parts. He should be able to summarize in his own words the thought of any simple text placed before him. The exercise in Composition will be based on the readings required. The subjects chosen will demand a clear grasp of the author's thoughts, rather than memory of technical details. The composition must be reasonably correct in spelling, grammar, and punctuation, and must show some knowledge of paragraphing.
LIST OF READINGS.
I. (a) "Alhambra"; (b) "Sleepy Hollow Legend"; (c) "Rip Van Winkle."
II. (a) "Evangeline"; (b) "Miles Standish"; (c) "Hiawatha."
III. (a) "Lady of the Lake"; (b) "Lay of the Last Minstrel."
IV. (a) "Snow-Bound"; (b) "Tent on the Beach."
Every student must be prepared on one work from each group of the above. He must be able to quote some good passage of at least ten consecutive lines from the verse that he had studied.

The Geographical knowledge of students seeking to enter the Normal School should comprise an intelligent conception of the world, including location of most important countries, their chief productions and characteristics of the people. The great grain, cotton, timber, fruit, grazing, and mineral belts of our own country should be known, as well as the cause of their distribution. A knowledge of the manners and customs of the people in the different parts of the country is also required. Ability to think well will cover the lack of many technical points in the work.

The course in the History of the United States deals chiefly with the growth and character of the Government, including a careful study of the Constitution and its workings. In order to pursue this course intelligently, the applicant should have a good knowledge of the main facts of our history, especially through the colonial and revolutionary periods. The examinations are given with a view to testing preparation in this particular.

Applicants for admission will be examined in Spelling upon words in common use, such as may be found in the California State Speller, and are expected to spell a large percentage of any selected list of such words at dictation.

The Natural Vertical system of penmanship is taught; and, as a prerequisite to admission, a student must write a plainly legible hand, not necessarily the vertical, having a reasonable regard to regularity and neatness.

In Music, the student must be able to sing the major scale, and to both sing and write the diatonic intervals.

(3) Every one admitted to the school must present a certificate of good moral character, signed by the County Superintendent of Schools, or by two School Trustees, or by any two reputable and permanent residents of the district from which such pupil comes.

(4) According to a regulation of the Board of Trustees, each applicant must present evidence of being strong physically and free from chronic defects that would prevent successful work in the school or would militate against his or her fitness as a teacher of children. The Faculty
are therefore authorized, when they deem it necessary, to require of any student a physician's certificate of health and freedom from physical defects. This may be made out by the family physician of any student according to the following form, or the examination may be made by the school physician, a lady, at an expense of one dollar, or without expense by Dr. Shults, of the Faculty, also a regular physician:

FORM: I, ——, a physician in good and regular standing, residing at ——, do certify that —— is strong physically, and able to do the work of the Normal School so far as —— health is concerned, and that —— has no chronic disease or physical defect of speech or hearing or appearance that would militate against —— usefulness and success as a teacher.

Physician.

Before students are allowed to finish the course they must present certificates of vaccination.

Applicants should be here at 9 A. M. on the days indicated, viz.: September 6, 1900, and February 1, 1901.

Those entering on past examinations, credentials, or previous membership in the school, should also be here on the above dates and report to the President.

To graduate, one must be at least eighteen years old; must have been not less than one year in the school; must have passed creditably in all the studies of the prescribed course, and must have shown, by actual and continued teaching in the Practice School, an ability and fitness for governing and teaching well.

Applicants for admission are required to make and sign the following declaration:

I hereby declare that my purpose in entering the school is to fit myself for teaching, and that I intend to teach in the public schools of California.

All entering the school are also required to sign the following blank:

I have carefully read the rules and regulations of the State Normal School, and hereby enroll myself as a student in the institution with a full understanding of them, and promise to the best of my ability to conform thereto in all respects so long as I shall be connected with the institution.

(Signed) —— ——,
of ——, County of ——.

Parents and guardians will be required to sign the following:

For myself as —— of the student whose name is signed above, I also accept on my part the conditions specified and upon my part agree to withdraw —— from the school upon receiving notice from the President that the Faculty requested the same.

(Signed) —— ——.

A deposit of five dollars is made with the President, to be refunded on leaving, if all library books have been returned, and if there are no charges for injury to reference books, building or furniture. This will be required without fail before the student is enrolled.
ADVICE TO THOSE WHO WISH TO ENTER THE SCHOOL.

1. If possible complete a good High School course. Ask yourself if you have an earnest desire to become a well-prepared teacher and if you possess the ability mentally and physically to do the hard work required. Determine whether you will abide by every regulation and will earnestly strive to build up such a character as should distinguish the worthy model for children that every teacher should be.

2. Bring with you a statement of good moral character, signed by two of the School Trustees, or other resident citizens of your district. This reference must be presented before the applicant is registered as a student.

3. Text or reference books which you may have will be useful here, and should be brought with you.

EXPENSES.

The expenses are as light as they are at any school on this coast. Tuition is free. Books cost on an average about $5 per term. Instruments and material for work in the different sciences will cost from $10 to $20 during the four years. One dollar per term will be charged for materials in the Physical Laboratory work, and $2.50 for the same purpose in the work in Chemistry; fifty cents per year will be charged for material in Sloyd work, and twenty-five cents per year as a library fee to cover wear and tear and losses. Board in private families costs from $3.50 to $5.00 per week. Rooms may be had by students if they wish to board themselves. The cost of living may then be reduced to $2.50 per week. Many of the students also find it possible to work for a part, or the whole, of their board. When this is done, it is advisable for the student not to attempt to take the entire work of any class, but to take a year longer and thus avoid overtasking himself.

DISCIPLINE.

The aim of the administration is to lead students to be self-governing. An effort is made to create a feeling of responsibility and lofty purpose, such as should characterize Normal School students.

As an aid to this end there is at present an organization known as “The Associated Body of Students.” This organization has for its object the management of many matters that tend to the well-being of
the school. The students have regular meetings and discuss many
questions that look to their own government and the welfare of the
Normal School. They thus make it possible for the Faculty to impose
few arbitrary restrictions and positive rules and penalties.

**BOARDERS AND BOARDING.**

The Board of Trustees of the school have adopted the following regu-
lations, which the Faculty of the school are required to see fully observed:

All pupils attending any department of the school, who do not board
and room with their parents or legal guardians, and who are not under
the immediate charge of parents or such guardians, shall be considered
as boarders, and shall be subject to the following rules:

1. Pupils must consult the Preceptress or President before selecting
boarding-places. This rule is imperative and applies to all, whether
they have been in the school before or are new pupils.

2. Pupils must board at places endorsed by the Preceptress or President.

3. Ladies and gentlemen shall not be allowed to board in the same
house. This rule shall apply equally when the house is occupied by two
or more families.

4. Permission must in every case be obtained from the Preceptress
when pupils desire to board in families where boarders are taken who
are not connected with the school. It is not expected that permission
will be asked which conflicts with the preceding regulation.

5. Brothers and sisters shall be allowed to board in the same house,
provided no other boarders are received into the house.
STATE NORMAL SCHOOL, LOS ANGELES.

COURSE OF STUDY.

The regular course of study occupies four years.
Any student who shall accomplish the work prescribed in the Course of Study shall be graduated on the recommendation of the Faculty, provided that one entire year must be passed in the school.

### Fourth, or Senior, Year

<table>
<thead>
<tr>
<th>SENIOR B.</th>
<th>SENIOR A.</th>
</tr>
</thead>
</table>

The work of Senior B has been arranged with the guiding principle of direct preparation for teaching, and each subject is presented also from the method point of view. The work of Senior A carries forward the same idea with supervision of Training School practice and discussions of principles applied in the teaching of various studies. These “method” talks are by the special teachers of the respective subjects.
A SHORT COURSE FOR HIGH SCHOOL GRADUATES.

1. A two years course has been arranged for graduates of accredited High Schools who are recommended to the State University for satisfactory work in the following subjects:
   English Grammar, Composition, and Literature (1a and b & 14); Algebra through quadratics (3); Plane and Solid Geometry (4 & 12a); Greek and Roman and Medieval and Modern History (10a and b & 13); Government of the United States (5); Physics (11); Chemistry (12b); Botany or Zoology (12b & c); three years of Latin (7), or an equivalent in Greek, French, or German.
   (Note. One half year's satisfactory work in Botany or Zoology will admit conditionally to the course in Biology. A recommendation in Latin excuses from all word work except Spelling, which may be taken by examination.)

2. Graduates of accredited High Schools not recommended in all the above subjects will be required to pass by examination or to pursue in class those subjects in which they are deficient, thus lengthening the course to five or more terms.

3. Applicants for the two years' course must hold credentials in the form required for admission to the State University. They should present these in person to the High School Committee between nine and twelve o'clock of the day fixed in the calendar for the term when they wish to enter. Applicants fully accredited will find it advantageous to enter in September.

4. Graduates from High Schools of other States and from non-accredited schools of this State will be given such advanced standing as in the opinion of the Faculty their credentials may justify.

APPLICATION FOR ADMISSION.

Application for admission to the Kindergarten Department shall be made to a committee consisting of the President of the Normal School, the Director of the Kindergarten, and the Professor of Pedagogy of the Normal School.

Graduates of accredited High Schools who are fully recommended for entrance to the State University will be admitted to a two years' course after having passed the following examinations: Music, Instrumental, ability to read simple airs with reasonable facility, in good time and with fair touch; Vocal, ability to sing simple songs with accuracy and expression. Drawing, ability to draw simple objects in outline and light and shade in good perspective.

Applicants not having such credentials must satisfy the Kindergarten Committee that their qualifications are equivalent to those required for admission to the regular two years' course (see page 17) or to the work of the first two years of the regular course.

Those who are pursuing the regular Normal course and have finished the work of its first two years, may elect the two years' Kindergarten training course if they show peculiar fitness for that work.

Any advanced standing in the required work for Kindergartners necessitates an examination in all the subjects completed in the first year of the special Kindergarten course. This examination shall cover both the Academic and Kindergarten training of the year specified in addition to the regular entrance examination, but holders of diplomas from the four years' course of California Normal Schools may be admitted to a special course in Kindergarten training, shortening the time as the committee may deem advisable.

A class will be admitted in September of each year.

Students who do not show some natural fitness for the work by the end of the first half year will be required to withdraw.

BRIEF EXPLANATION OF THE COURSE OF STUDY AND THE METHODS PURSUED.

Believing that the true object of education is mental development as well as the acquisition of knowledge, the teachers of the Normal School seek in their work to accomplish this purpose. Although the students make use of text-books in the study of some subjects, they are led to see that this is only one of many useful helps. Our large and growing library is constantly made use of in getting a knowledge of the best that has been given to the world on any subject. All subjects admitting of such a course are studied and recited topically, and original research along special lines is encouraged.

The class work consists of discussions and comparisons of the results of individual research. Much written work is required, thus testing exactness and thoroughness of study.

All of the members of the Faculty are in close touch with the work of the Training Department. It is the duty of some one teacher of each subject to visit the grades as often as possible and then in consultation with his or her associates so shape the work of the Normal Department as to give the greatest help to student-teachers. Thus all become teachers of Pedagogy and the whole of the work of the institution centers in the Training Department. That this end may be furthered and that all may become interested in all of the departments of the school and especially in the pedagogical side of every subject, weekly seminar meetings are held for the discussion of questions that will directly aid the Faculty in an understanding of the needs of the public schools. This knowledge is then made use of in the more thorough and practical preparation of the students for their responsible work.

PROFESSIONAL WORK.

The special preparation for teaching afforded in this Normal School is planned with several guiding principles. That a truly professional spirit may prevail throughout, all courses from the first are arranged with definite reference to the needs of the future teacher and attention is constantly called to the methods proper to the different subjects of instruction. Those studies which bear a direct relation to the strictly professional work are placed so as to lead naturally in this; e. g. the neural physiology immediately precedes and forms the basis of the first course of psychology. While the students in each year are brought to
consider the aims and plans of their life work and thus live so to speak in the professional atmosphere, the great part of the technical training is concentrated in the last few terms. The ordinary studies of the public school are reviewed in the Senior classes and discussions on the methods of these studies are continued during the practice period in the Training School.

Psychology is studied during two half years with both a cultural and a distinctly professional aim. The method followed includes "experimental introspection" and much reference reading and discussion on various theories in reference to the mental activities. The Senior B course in pedagogy is essentially practical. Special attention is given to the psychological topics that bear closest relation to pedagogy, and retrospective and observational studies are made of school-room problems in both elementary and secondary schools. School hygiene (including the hygiene of instruction) is given such attention in both psychological and pedagogical courses as time and student ability warrant.

The outlines of educational history and philosophy are given in a three-hour course in connection with much outside reading and frequent oral and written reports. Short courses in school economy and school law during the last term aim to give the future teacher the greatest possible practical assistance and direction in these important matters.

The work of the last half year is divided between professional studies in the Normal School and practice teaching (one half day for twenty weeks) in the Training School. Throughout this term there are weekly meetings of the training class with the teachers of the Normal and Training schools to discuss various phases of common school work. A professional thesis is required of every student before graduation.

OUTLINE OF WORK IN ENGLISH.

First Year.

First Term.—Grammar.
Second Term.—1. Composition. 2. Classic Myths.
Text-books for the year:
   Revised State Series Grammar.
   Gayley's Classic Myths.

Second Year.

First Term.—1. Figures; Versification; Composition continued.
   2. Study of poems selected from the following list:
      Lowell: Vision of Sir Launfal.
      Lanier: Song of the Chattahoochee.
      Read: Drifting.
      Tennyson: Morte d'Arthur; The Lotus Eaters; Ulysses.
      Shelley: The Skylark; The Cloud; To the West Wind.
      Coleridge: The Ancient Mariner.
Second Term.—Word Work: History of Language; Word Analysis; Synonyms; Spelling.

Text-books for the year:
Waddy's Rhetoric.
Kellogg and Reed's Word Building.

Third Year.

First Term.—English Prose:
Emerson or Carlyle: Selected essays.
Webster: Bunker Hill Orations.
Burke: Speech on Conciliation.
Lincoln: Gettysburg Address.
Lincoln: First Inaugural Address.
Matthew Arnold: Culture and Anarchy.

Second Term.—1. Shakespeare: Selected plays.
2. Historical Summary of English Literature.

Text-books for the term:
Pancoast's Introduction to English Literature.
Palgrave's Golden Treasury.

Fourth Year.

First Term.—1. Grammar in the graded schools.
2. Reference to teaching-method.

Second Term.—English Literature in the common schools; use of school libraries.

Text-book for the term:
Whitney's Essentials of English Grammar.

SCIENCE

The courses in Science (Physics, Physiography, Chemistry, and Biology) have in view not only the contribution to training and culture usually expected of such subjects in secondary schools, but are so correlated as to strengthen one another, and the subject-matter is selected with the particular aim of helping the prospective teacher.

Much of the work is reproduced in Nature Study and Geography by the student-teacher in the Training School. As far as possible the students are trained to be independent and to make use of the environment which they will have when they become teachers, thus rendering the Science work in the highest sense professional. Five large, well-equipped laboratories afford every means necessary for carrying out all the work attempted. Besides these laboratory facilities, additional opportunity for study is afforded by a museum of carefully selected types of animals and plants, and by a garden and pond for outdoor Biology.

All the important books of reference, periodicals, manuals, advanced texts, and guides relating to the different Sciences are in the general library, and are always accessible to students.
GEOGRAPHY.

Geography is the study of the relations between man and his environment. It is therefore essentially human in its interests.

In the first year twenty weeks are devoted to physical geography and physiography. Class-room instruction is supplemented by field-work, where students are required to interpret actual geographic forms by applying principles previously discussed.

A course in general geography is given in the third year. The several continents are studied in a broad way and a few areas in detail. At least one raised map of a continent is made by each student.

One hour each week is set apart for a study of the pedagogy of the subject. Model lessons are given, a course of study planned, and the relation of geography to all other subjects discussed.

The laboratory is well equipped with globes, maps, sand-trays, and pictures, while the library contains a large number of the best geographical works and books on travel.

HISTORY.

Aims of the work: 1. To give a knowledge of the great periods of history; to prepare the student for citizenship by enabling him to make use of the experience of the past; to promote interest in the subject, correct habits of study, ability to read readily and intelligently, to distinguish essentials from non-essentials, and to form correct judgments, especially with reference to the social, political, and economic questions of the day.

2. To show that history is not made up of detached events and sudden changes which must be held by mere force of memory, but of occurrences closely related, though often distant in time and without apparent connection; that permanent progress is always the result of slow growth; and that the character of the present is determined, in the main, by the past.

3. To prepare the student to teach the subject by giving him a knowledge of original sources and other authorities and the proper manner of using them; by discussing and illustrating different methods of presentation; by impressing upon him the importance of vitalizing the work by connecting history with geography, biography, and literature; by furnishing him with suggestive outlines and with lists of reference and collateral reading; by keeping before him the difference between a child's point of view and that of an adult.

MATHEMATICS.

The work in Arithmetic, being designed especially for preparation to teach that subject, aims to develop (a) thought-work and not mere
mechanical processes, (b) clearness and exactness in statement, (c) accuracy and rapidity in all operations, (d) investigation of principles involved, whereby to formulate rules, (e) careful analysis-synthesis, (f) special attention to the logical presentation in the discussion of problems.

It is very desirable to devote careful attention to the algebraic method of solution, since it enables the pupil to develop the result by the direct method, thereby avoiding much of the complexity arising from the older form of analysis.

Students are made familiar with short processes, combinations of numbers, forms of statement, analytic and synthetic drill with problems, all of which become a part of their outfit as teachers. Ability to impart clearly the knowledge one possesses is an indispensable characteristic for a teacher, so oral statements and solutions, clearly given, are continuous parts of the work.

Geometry, in its concrete form, is developed in the course of the subject, so that the method of presentation in the class-room may be shown. Measurements, adaptation to the many daily concerns of life and business are shown; careful and close reasoning in the steps of demonstration are required; the practical bearing of much of the work is noticed.

In Algebra, tact and skill in the manipulation of equations, ability to see results and combinations, clear and concise interpretation of problems, are all points to which attention is always being directed.

**Reading.**

In the subject of Reading our purpose is to avoid the two opposite faults—one, that of relying on mere mechanical training; the other, the theory that comprehension and sympathy with ideas of an author will necessarily result in right expression. In the teaching of the subject, analysis and technique go hand in hand.

The time given to the subject is divided into three terms, one occurring in the first year, one in the second year, and one in the fourth year. In the first term the work is devoted exclusively to the management of the breath, to quality of voice—vocal power, enunciation, and thorough study of the elements of speech.

In the second year begins the work of logical analysis and grouping. Classification of ideas for reading. In this year the text-book used is "The Essentials of Reading," by Prof. Mark Bailey, A.M.

In the third term the advanced student is instructed as to the best means of applying the knowledge gained in the two previous terms. Systems and methods of the teaching of reading are discussed and an original plan of work from each student is required to be used in the Training School.

Advanced analytical work is accomplished, two of Shakespeare's plays being used for that purpose.

Second Year—Voice and ear training. Continued development of major scales through all keys. Natural minor. Sight reading.

N. B.—In all grades song work to emphasize tone quality, phrasing and spirit of song.

DRAWING.

Middle D, Third Term: 1. Light and shade—objects and plant form. 2. Clay modeling and composition continued. 3. Color—with the brush. Objects and nature. 4. Pen and ink—objects and nature.

Middle B, Fifth Term: 1. Drawing from casts in different mediums. 2. Composition. 3. Water color.

Senior B, Seventh Term: Method term. General review.

Senior A, Eighth Term: One period per week in methods and helps for work in the Training School.

SLOYD.

The manual training consists of a variety of occupations. The materials used are clay, paper, wire, cardboard, and wood.

This subject was introduced and is maintained as an educational factor in school life. Every conscious act of the outward bodily life is first rehearsed in the inner thought life, and as every step in manual training is a voluntary act, so every exercise in Sloyd becomes a problem to be solved.

The cardboard work is divided into three series: 1. Plain geometrical forms. 2. A folded series representing type form solids. 3. A series of useful cover paper models.

The wood sloyd embodies mechanical drawings, execution in woodwork, sharpening of tools, chip and relief carving, analysis of models, and theory of manual training.
DOMESTIC ART AND DOMESTIC SCIENCE.

It is believed that teachers need special training in the application of knowledge to healthful and economical living. Hence during the coming year departments of Domestic Art and of Domestic Science will be organized. No definite outline of the work can be given at this time, as it must be a matter of growth, dependent upon the possible facilities for carrying on the work as well as upon the needs of our students. Work in Chemistry, Physiology, Bacteriology, Biology, and Physics will have in view the practical application of their facts and principles to better and truer living. Laboratory work will become practical when it finds its application in the domain of the home. "The instant the State assumes the right to teach manual training, that moment has it included household arts in such training: while those who are discontented with the unproductive utilities of knowledge see in extension of manual training the road to self-support and patriotic citizenship."

The improvements in the building now under way have been especially planned with this work in view. There will be a large, well-equipped kitchen, and a commodious lunch room. Work will be so planned that noon-luncheon can be furnished to students as a practical outcome of the instruction and work of the several classes.

PHYSICAL TRAINING.

The aim of this department is, primarily, health—to promote the general health, to develop the body symmetrically, and thus assist in the mental development of each student. In order to reach the best results as rapidly as possible, physical measurements are taken of all the entering students: they are arranged in groups, and systematic gymnastic work, carefully graded to suit the needs of the groups, is given, besides special prescription exercises for individual students. Supplementing the gymnastic work of the first year, a series of talks on personal hygiene is given.

First Year—The work of the first year is largely corrective work, to train correct habits of standing, sitting, and walking and to conserve nervous energy. For this purpose we use free movements, marching, elementary apparatus work, and games.

Second Year—More advanced free movements, apparatus work for training strength and endurance, and games.

Third Year—In addition to the physical exercises the theory of gymnastics is introduced, methods of conducting class work are discussed, students teach, and observe and criticise student-teachers.

Fourth Year—Methods of teaching children.

Throughout the course, students are encouraged to take plenty of outdoor exercise, walking, cycling, tennis, and basket ball.

Hygienic dress is insisted upon during gymnastic periods.
THE LIBRARY.

The library contains about eighty-seven hundred volumes, accurately classified and arranged on low shelves, to which the students have free access. The use of the library is further facilitated by a card catalogue containing, besides the title of every book and the name of its author, about three thousand references to magazines and other works whose titles do not indicate their contents. These references are mainly on the subjects of geography, history, and literature, and have been prepared by the teachers of those subjects.

While the desirability of supplying good reading for leisure hours has not been overlooked in the choice of books, the main purpose has been to provide the means of pursuing the branches prescribed in the course of study. The subjects most fully represented are: Psychology and education, science, travel, history and government, and literature. In addition to the above there are files of the leading literary and educational periodicals.

The annual additions to the library have averaged about five hundred volumes; great care has been taken in the selection of books, and the free use made of them by students shows that the collection is well adapted to the purpose for which it is intended.

SOCIETY LIFE.

There are the usual Societies, Christian Associations, Glee Clubs, Tennis Clubs, Athletic Clubs, etc., for the promotion of the literary, Christian, and social life, and the amusement of students that are active in most schools of this class. Everything consistent with the main purpose of the school is done by the Faculty to make the social life of students as pleasant and varied as possible.
STATE NORMAL SCHOOL, LOS ANGELES.

CATALOG OF STUDENTS.

FOURTH YEAR—SENIOR A.

Abbott, Arthur .............. Compton.
Adams, Romola .............. Los Angeles.
Amick, Myrtle .............. Oceanside.
Austin, Juanita ............ Long Beach.
Bailey, Alice .............. Alameda.
Bailey, Letha .............. Los Angeles.
Baker, Julia .............. Los Angeles.
Ball, Kate ............... San Bernardino.
Barnes, Mabel .............. Los Angeles.
Barron, Pearl .............. Compton.
Bean, Jane .............. San José.
Blind, Linnian .............. Los Angeles.
Boden, George .............. Los Angeles.
Boehncke, George ........ Prospect Park.
Borthwick, Isabel ........ Ontario.
Bosbyshell, Mary C. ....... Los Angeles.
