Administrative Officers and Staff

Chancellor:
Charles E. Young, Ph.D.

Executive Vice Chancellor:
William D. Schaefer, Ph.D.

Vice Chancellor—Graduate Programs and Dean of the Graduate Division:
Victoria A. Fromkin, Ph.D.

Deans Emeriti of the Graduate Division:
Vern O. Knudsen, Ph.D. (Deceased) (1934–1958)
Horace W. Magoun, Ph.D. (1962–1972)

Associate Deans:
Thomas J. La Belle, Ph.D.
Leo M. Snowiss, Ph.D.

Ellen Benkin, Assistant Dean and Supervisor, Student and Academic Affairs
Diane E. Brandt, Senior Editor, Graduate Division Publications
Marie Demir, Assistant to the Dean, Recruitment
Mabel O. Dempsey, Assistant to the Dean, Budget and Personnel
Mary Earl, Special Assistant to the Dean
C. Sari Halasz, Director, Graduate Admissions
James Henson, Institutional Researcher, Office of Graduate Information Systems
Charles J. Johnson, Systems Analyst, Office of Graduate Information Systems
Helen Kaneko, Secretary to the Associate Dean

Hazel Love, Assistant Dean and Director, Graduate Affirmative Affairs Office
Louise Noodelman, Assistant Dean and Director, Fellowships and Assistantships
Carmen Taub, Secretary to the Associate Dean
Elizabeth Thoren, Assistant to the Dean
Ethel Toki, Systems Analyst, Office of Graduate Information Systems

Graduate Council:
Marcella (Hughes) Beeman, Coordinator and Assistant to the Chair

Graduate Students Association:
Scot Spicer, Administrative Officer
Tom Morgan, Internal Affairs Officer
Louis Armand, External Affairs Officer

UCLA (USPS 646-680)
Volume 21, Number 11 • July 10, 1981
A series of administrative publications of the University of California, 405 Hilgard Avenue, Los Angeles, California 90024. Second-class postage paid at Los Angeles, California. Fifteen a year—two issues in January, February, April and September; two issues in July, August and December; five issues in June.

Other Information...

Other information about UCLA may be found in the announcements of the schools of Architecture and Urban Planning, Dentistry, Education, Engineering and Applied Science, Law, Library and Information Science, Management, Medicine, Nursing, Public Health, and Social Welfare; and in the announcement of the College of Fine Arts and the Undergraduate Catalog.

This book was produced by UCLA Publication Services Department.

Please note

Every effort has been made to insure the accuracy of the information presented in the Graduate Catalog. However, all courses, course descriptions, instructor designations and curricular, degree requirements and fees described herein are subject to change or deletion without notice. You may consult the appropriate department, school, college, or division mentioned in the Catalog for further information.

The City
A Preface
by Jack Smith
of the Los Angeles Times

Herb Caen, the debonair columnist of the San Francisco Chronicle, once flew down to Los Angeles to do an article on it for a national magazine, but went home disappointed. He said he couldn't find Los Angeles. It wasn't there.

He had a point. In a sense Los Angeles is invisible. As Gertrude Stein said in one of her more lucid moments, "There is no there there." Miss Stein happened to be speaking of Oakland, but newcomers to Los Angeles are sometimes overcome by a sense of being nowhere, and temporarily imagine that there is no here here.

What they miss, perhaps, is a dramatic landmark like those used in movies to set a locale with one brief image: the Eiffel Tower, Big Ben, the Statue of Liberty, Golden Gate Bridge. What landmark do we have that instantly and unmistakably says Los Angeles?

Our City Hall seems unique. What other 28-story phallic symbol incorporates Italian classic, Mayan and Byzantine architectural styles and has a Greek tomb at the top with a panoramic view of the Los Angeles plain from the Queen Mary to Forest Lawn? But the City Hall usually escapes the notice of visitors descending toward International Airport, several miles to the south; and besides, it has been known to be mistaken for the Nebraska State Capitol, which was designed by the same architect.

Of course there is Grauman's Chinese Theater on Hollywood Boulevard. This exotic temple is probably known to more foreigners than any other of our monuments, but in the eyes of some it merely underlines the canard that Los Angeles is the capital of kitsch. The Queen Mary is a landmark, unlikely as that may be for a ship, but unfortunately she has been retired in the horizontal rather than the vertical position, which much reduces her visibility.

Downtown Los Angeles once looked like any other medium-sized Midwestern town, it then being thought that thirteen stories was about as high as a building ought to go on land that lay astride a notorious fault. But modern structural engineering has discredited that notion, and civic pride could no longer abide that stubby look. Now our banks and oil companies have gone up sixty stories and more, creating almost overnight a rather handsome little skyline. Of course it is not to be compared with New York City's, but nonetheless it can be seen from an incoming airliner, on a clear day, and recognized for what it is – the downtown of the Nowhere City, Cuckooland, the Big Tomato Factory, Surfurbia, Double Dubuque and Taco Belle – to recall but a few of the wonderful epithets Los Angeles has inspired.

Surely Los Angeles is the most maligned large city in the world, with each new generation of Eastern and foreign critics rewriting the cliches of the last one. Half a century ago H.L. Mencken came out to "the coast" to verify his suspicions and went back to Baltimore to report that "the whole place stank of orange blossoms." In a word, he said, it was "Moronia." Half a century after Mencken the playwright Neil Simon has one of his characters (a New Yorker, of course) complain that "it smells like an overripe cantaloupe." In the 1930s the
dyspeptic Westbrook Pegler suggested that Los Angeles be committed as incompetent and placed in the care of a guardian; and half a century after Pegler the Chicago columnist Mike Royko now proposes that the entire state be fenced in to protect the rest of the nation from its lunatics.

Not the least of this city's likable qualities is its capacity for both inspiring and enjoying such rococo insults, and it is not without some regret that we note a turning of the tide against this debilitated genre. More and more, the old myths have been exposed for what they are, the old clichés rejected. Ironically, it has not been our American critics so much as Europeans who have brought a fresh and unprejudiced insight to bear on this so-called cultural wasteland. Reyner Banham, professor of the history of architecture at University College, London, has called Los Angeles "one of the world's leading cities in architecture;" the French novelist and diplomatist Romain Gary, a Parisian, has described it as "One of the most beautiful and exciting cities in the world;" and the British writer Jan Morris recently observed in Rolling Stone that "every development of Western thought... finds its niche, its expression and its encouragement somewhere in this metropolis."

Can this be Mencken's Moronia? One reason that Los Angeles is so hard to get down on paper and so hard to photograph is that it has no easily recognizable look: no ancient squares, no medieval alleys, no rows of brownstone houses. Los Angeles has been created on a spacious coastal plain by a westering people who were bound by no traditions, cowed by no academy of peers or elders, suppressed by no entrenched elite. They were young, uninhibited, playful and sometimes gauche, but always energetic and creative.

It is a place in which an immigrant Italian tile setter could spend 30 years building three fantastic towers out of junk, because he loved America and "wanted to do something big;" it is a place where an entrepreneur could erect a hot dog stand in the shape of a hot dog without being laughed out of town; where Frank Lloyd Wright could scatter his genius on two dozen sites; where Walt Disney made art of an amusement park; where Coca-Cola could build a bottling plant that looked like an art deco ocean liner; where a manufacturer of automobile tires could build a factory that looked like a 3,000-year-old Assyrian palace and a billionaire oilman could build a museum that looked like an ancient Roman villa dug up at Herculaneum, because they wanted to.

Even today the houses that Nathanael West described in Day of the Locust are to be found in the Hollywood Hills. Bungalows in the guise of miniature castles, Swiss chalets, Tudor houses, Chinese pagodas, Islamic mosques—all constructed of two-by-fours and plaster, and still lived in and cherished by a new generation who believe in make-believe and aren't afraid to be different.

Since the whole city had somewhat the look of a movie set, it is not surprising that, back in the middle 1920s, Westwood Village was built in the Spanish colonial style, and UCLA began its Westwood campus on the adjoining hills with four buildings in the Romanesque style of medieval Northern Italy. The place and the climate were hospitable to any architectural fancy.
Though high rise and contemporary design have intruded on these original conceptions, they have not been obliterated, and from one of the new towers to the south of the village, on Wilshire Boulevard, one looks down today on what might loosely be described as a Romanesque-modern Camelot.

Westwood is of course one of the great learning centers of the world, a city within a city, not only emanating its intellectual energy to the metropolis that surrounds it, but also attracting and absorbing the life and vitality of that metropolis. In a sense, UCLA is the heart and source of Los Angeles. It is our well. Its shows, lectures and concerts draw sellout crowds from the general community, and citizens who have no academic connection with the University will find excuses to enjoy its beautiful trees, greens, walks and gardens and mingle with its beautiful people. The village, with its cluster of first-run movie theaters, its good small shops and restaurants and its exhilarating mix of students, faculty and townspeople, has become the most popular rendezvous and walking place in Los Angeles.

Campus and village, in turn, are enclosed like the pearl of an oyster in a community of enormous wealth, vitality and good humor. In nearby Bel Air, Pacific Palisades and Beverly Hills, one might drive for days without passing a house worth less than half a million dollars, and few would be that cheap. They would be English cottages, French Chateaux, Spanish castles, colonial mansions, Georgian country houses, Egyptian temples — side by side in a sort of insouciant harmony. And living in them, among the nabobs and philistines, would be one of the highest concentrations of creative people in the world, living the bountiful Los Angeles life with their maids and Alfa Romeos and swimming pools and Afghan hounds and of course their amusing hangups.

Critics have despised us in Los Angeles as worshippers of money, health, sex, surf and sun. Not quite true. We don't worship those things; we just rather get used to them, since they happen to be so available. We also love education, music, the theater, football, auto racing, ballet, skiing, tennis, good food, good wine and casual clothing, and we take them for granted, because they are here, along with our magnificent beaches, from Laguna to Malibu, our visible mountains, our nearby deserts, our museums, our galleries and our spring weather, which comes in January and lasts through November.

There is a visible Los Angeles. It may be seen in some of the most imaginative and beautiful churches, shopping centers, colleges and public buildings in America, in our freeways, which move traffic better than those of any other large American city, and are nothing less than works of art, among the modern wonders of the world; in our stadiums and palms and eucalyptus trees and our lilac foothills; in our mansions and our houses with yards, in our boulevards and marinas, and in our “big dumb ocean,” as an Eastern critic once strangely described it.

But the Los Angeles that makes us stay here, including the critics, who rarely go home again after their second visit, is invisible. It is space, newness, openness, tolerance, energy, optimism and exuberance, and the probable truth that, as Will Rogers said, we are all a little bit cuckoo.

Besides all that, or because of it, perhaps, Los Angeles is simply the freest city in the world. “To be able to choose what you want to be and how you want to live,” Jan Rowan wrote some years ago in Progressive Architecture, “without worrying about social censure, is obviously more important to Angelenos than the fact that do not have a Piazza San Marco.”

No Piazza San Marco? An oversight. One of our cuckoo billionaires will build one tomorrow.
The City Within The City

A Message from Dean Fromkin

UCLA is a city within a city. It offers its graduate students a center for study just five miles from the Pacific Ocean and its expanse of beaches, and thirty minutes from downtown Los Angeles. You will read in the Graduate Catalog about our campus, our libraries, research centers, art museums, theaters, recreation centers, restaurants. You will also read of the medical complex, the professional schools, the diversity of fields of study offered here.

We have attempted to include in this catalog a wide range of information about UCLA. But, until you walk through the sculpture garden looking up at a Rodin or a Lachaise or a Lipchitz, or meditate in the serenity of the Japanese Gardens, or hear a noon concert at Schoenberg Hall, or move from the octagonal domes and Lombardian doorways reminiscent of 6th century Italian cathedrals in the North Campus, to the contemporary new buildings of the South Campus, UCLA will not yet be a part of your life. UCLA is a living, vital place, made so by our distinguished faculty and students. We welcome you as a new or continuing graduate student into our city; it is you for whom we exist.

Cordially,

Victoria A. Fromkin
Vice Chancellor—Graduate Programs
and Dean of the Graduate Division

Introduction

History of Graduate Study at UCLA

In the 43 years since the award of its first Ph.D. degree, the advances in graduate training and research at UCLA have transformed a small branch of the University into a major institution of a system of higher education which now embraces nine campuses throughout the State.

First established in 1919, the Southern Branch of the University of California was officially renamed UCLA in 1927 and moved in 1929 to its present home on a 411-acre campus in Westwood, a suburb of metropolitan Los Angeles overlooking the Pacific. Graduate study was first authorized for the M.A. degree in 1933, with graduate enrollments limited to approximately 125 students. The M.A. was offered in 16 fields that first year, and UCLA's total student population was then 6,080. The Graduate Division was established in 1934, and in 1936 authorization for graduate education at UCLA was extended to the Ph.D. degree with four departments offering programs. In 1938, the first doctorate was awarded at UCLA, and graduate student enrollments had increased to 538 with the number of fields for the Ph.D. increasing to 21.

In the Fall of 1980, total UCLA enrollments numbered 34,031. Of these, 8,099 students were enrolled in the Graduate Division, and an additional 3,925 in graduate professional programs in Dentistry, Law, and Medicine. During the year, 1979-80, 2,332 graduate degrees in a variety of fields were awarded to students enrolled in the Graduate Division.

Graduate Education: Nature and Objectives

Undergraduate study concerns itself primarily with the transmission of existing knowledge and concepts and is designed to provide a broad base in the arts and sciences and an understanding of contemporary society. Graduate study, on the other hand, is intended to deepen the student's grasp of a chosen field of knowledge, to introduce him/her to the tools and techniques of research and to develop his/her capacity eventually to make significant contributions to his/her field.

The first stage of graduate education leads to the degree of Master of Arts, or of Science, or of one of several professional degrees (e.g., Master of Business Administration, Master of Education, etc.). The degree is intended to develop the mastery of a field and to prepare the student for school or college teaching or for practice of a profession.

The second stage leads to a doctoral degree (Ph.D., Ed.D., etc.) and is designed to prepare the student for creative activity and research, often in association with teaching at a university or college. Doctoral study requires rigorous intellectual discipline, meticulous scholarship, and full dedication to the field of study.

Like all distinguished universities, UCLA subscribes to the three chief hallmarks of graduate education: excellence in scholarship, creative productivity in research, style and skill in the transmission—both written and oral—of knowledge.

The Graduate Division

The Graduate Division has surveillance over students holding the bachelor's degree or its equivalent. It is also responsible for master's, doctoral, and certain graduate professional degrees and for scholars engaged in postdoctoral work.

The Graduate Division is headed by a Dean, who also serves as the Vice Chancellor—Graduate Programs, appointed by the Chancellor with the approval of the Regents. She is assisted by two Associate Deans and the Graduate Division staff in such matters as graduate fellowships, assistantships, recruitment, admissions, and all aspects of graduate student and academic affairs.

The Graduate Council

The Graduate Council is a standing committee of the faculty Academic Senate and is selected to give proper representation to the academic departments, colleges, professional schools, and interdepartmental programs which offer graduate curricula. The Council consists of 19 members, including the Dean of Graduate Division who serves ex officio. In addition, three student representatives are appointed to the Graduate Council by the Graduate Students Association.

The Graduate Council makes policy for all graduate education at UCLA, including the establishment, changes in, or discontinuation of degree programs and the periodic reviews of current graduate programs for their quality and appropriateness.

A Combined Effort

Together, the Graduate Division and the Graduate Council provide information in departments, establish graduate standards for the campus as a whole, approve admissions, programs, examinations, and degrees of graduate students, review graduate students' petitions, encourage and approve new academic programs, advise the Chancellor in matters concerning graduate study and support, promote graduate study on this campus, and protect the quality of graduate programs.
Student Life at
UCLA

The Cultural Community
Public lectures, concerts, art exhibits, dance recitals, and the theater are an integral part of the University community. Professional artists of national and international fame, as well as distinguished guests in many fields, augment the year-round cultural life at UCLA. Outstanding student and professional productions and programs highlight the regular on-campus cultural calendar, providing opportunity to enjoy the best in art exhibits and lectures, plays, motion pictures, dance and music of all kinds—symphonic, operatic, choral, chamber—classical and contemporary as well as ethnic.

The Performing Arts
The UCLA Center for the Performing Arts offers a wealth of cultural events during the 1980-81 season. At a brief glance, such noted celebrities as the famed bass-baritone Cesare Siepi, soprano Elly Ameling, the legendary guitarist Sabicas and harpsichordist Igor Kipnis, in concert with the talented Joshua Rifkin and the Bach Ensemble, were presented in recital. Appearing in Royce Hall were pianists Ilana Vered, Alicia De Larrocha, Jean-Philippe Collard, Anthony Di Bonaventura and Mark Westcott, plus a special concert by the top-ranked Los Angeles Philharmonic.

A special Bicentennial Celebration gift from our sister-city of Berlin was presented in the form of the Berlin/Los Angeles 200 Festival. Highlights of the Festival events sponsored at UCLA included the American premieres of "The Sinking of the Titanic," a participatory opera, and the Triadic Ballet. The Festival also included the Kreuzberger String Quartet, Musikalische Compagnie, Gruppe Neue Musik, the Free Music Production and violinist Christiane Edinger. The San Quentin Drama Workshop presented Samuel Beckett's "Krapp's Last Tape" and "Endgame," directed by Beckett himself for the first time, while "Realism and Expressionism in Berlin Art" and "Phantasy and Realism in Architecture" exhibitions were housed in the Wight Gallery and Architecture Gallery. In addition, two panels were presented, "Women Filmmakers of Berlin" and "The Current Berlin Literature Scene."

Dance-wise, UCLA presented the San Francisco Ballet, Pilobolus and a Bicentennial salute to Los Angeles dance, plus the Erick Hawkins, Murray Louis, UCLA, Rudy Perez and Bella Lewitzky Dance Companies.

Special events throughout the year included the Fujian Hand Puppets, Actors from the Royal Shakespeare Company, National Theater of the Deaf, Claude Kipnis Mime Theater, Pat Carroll in "Gertrude Stein," "Critic's Choice—Japan's Best Film of the Year, 1931-78" and a "Henry King, American Filmmaker" series.

These are just a sampling of the stellar performances offered for the season. Each year, the program is dedicated to presenting the best from internationally famous artists to new talent. Special student tickets and discounted faculty/staff tickets are available to these events.

Recruitment Services and Facilities
The UCLA campus provides extensive recreation areas, facilities, and opportunities. In addition to the men's and women's gymnasiums, which are equipped with swimming pools and facilities for organized competition, informal play, physical exercise, and skill development, there are 21 tennis courts, 5 handball courts, and several sports fields open daily. Pauley Pavilion seats 13,000 persons for athletic events, convocations, and educational and cultural events. An extensive recreation club program offers opportunities for graduate students to participate in more than 40 different activities on and off campus. Students may also pursue their recreational interests in the extensive intramural sports program or the noncredit activity instruction classes. Nearby beaches, mountains, and deserts also offer diverse leisure-time activities.

Sunset Canyon Recreation Center
The Sunset Canyon Recreation Center is a recreational and cultural facility aesthetically designed to serve the University community. It is open all year, seven days a week, for formal and informal use on both an individual and a group basis. Located in the hills of the west campus adjacent to the residence halls, it features an Olympic-sized Park Pool, a family pool, picnic-barbecue areas, multipurpose play fields, and an outdoor amphitheater. Rooms are available for meetings, receptions, symposia, dances, catered luncheons and dinners. The Center sponsors programs of poetry readings, informal concerts, exhibitions and art and dance classes for adults and children. An extensive aquatic program includes swim classes for children and adults.

Graduate Students Association
The Graduate Students Association (GSA) is the sole, campuswide student organization established for the purpose of representing the interests of graduate students. Departmental representatives coupled with a campuswide Forum and an executive branch comprise GSA's representative network. The location of the GSA office is in 301 Kerckhoff Hall (phone (213) 825-4584 or 825-4585).
The GSA is financed by mandatory student government fees paid by all graduate students. Departmental graduate student organizations receive pro rate funds from the GSA. Additional funds are available upon request from the GSA Executive Cabinet. Early application for funds is advisable.

The GSA appoints representatives to the ASUCLA Board of Control, the Communications Board, University Policy Commission, Registration Fee Committee, Wooden Center Board of Governors, and Students' Programming Board as well as to committees of the Academic Senate and various administrative committees. In addition to these appointments, the GSA funds community service projects the Melnitz Movie Series, and programs of interest to the academic community.

Graduate student activities vary widely from one department to another. Included in the range of activities are: participation on such key committees as admissions, fellowships, curriculum, and appeals; organizing symposia and publications; preparing guides to survival in graduate school; and sponsoring guest lectures, social events, and orientation sessions for new students.

Living Accommodations

Note: Rates and information are subject to change without notice.

Early application is important for students interested in University accommodations. For off-campus rentals, students should plan to arrive at UCLA at least 14 to 21 days prior to the date of registration to give themselves a fair chance in the competition for housing. Persons interested in temporary accommodations may obtain a list of hotels and motels by writing to the UCLA Housing Office, 78 Dodd Hall.

The Office of Residential Life

The Office of Residential Life advises student governments in University-owned residence halls and Married Student Housing and assists them in developing social, educational and recreational programs. A live-in staff of professional and student advisers in the residence halls help students become acquainted with the University, with the residence halls' environment, and with each other. The staff enforces rules, counsels individuals on normal student problems and makes referrals to specialized services as needed.

University Residence Halls

Four 800-student, and one 335-student, on-campus, coed residence halls combine social, cultural and recreational opportunities with complete living and dining facilities. For Fall 1981, additional on-campus housing will be available in the 708-bed Residential Suite Complex. At the time of this printing, the allocation of University housing between undergraduates and graduate students is under review. In the past, graduate students have been housed in Hershey Hall (335 beds).

Graduate students must return the housing information request form from their admissions packet in order to obtain an application. Assignment procedures for housing are included with the application form.

The rate for room and board (19 meals per week) covers the Fall, Winter and Spring Quarters; but it does not include University academic holidays and the recesses between quarters. There is also a residence hall association fee to cover social events within the halls.

Married Student Housing

University-owned housing for married students, single parents, and their immediate families (spouse and children only) is provided at Married Student Housing. These units are located approximately five miles from campus near a direct city bus line. The buildings are two-storied and have furnished one, two, and three-bedroom apartments. Ample play area is provided for children in the apartment complex and in the nearby Mar Vista Playground. Rental rates for Fall 1981 will be determined in June, 1981.

Information pertaining to rental rates, eligibility, and assignment procedures may be obtained from: Married Student Housing Office, 3240 Sawtelle Boulevard, Apt. #1, Los Angeles, CA 90066, (213) 391-0686. Applicants can anticipate an average wait of 18 to 24 months.

Cooperative Residences

Privately-owned and cooperative residence halls for men and women are located close to the campus. In these non-profit organizations governed by the members, students work from 4-5 hours a week as part-payment for room and board (14-20 meals per week). A small fee for social activities is usually required.

Membership is open to all students. To apply or to request further information, write directly to the cooperatives: The University Cooperative Housing Association (men and women), 500 Landfair Avenue, Los Angeles, CA 90024; YWCA (women), 574 Hilgard Avenue, Los Angeles, CA 90024; Stevens House (women), 638 Landfair Avenue, Los Angeles, CA 90024; Hillel House (Co-op), Westwood Bayhill House, 619 Landfair Avenue, Los Angeles, CA 90024; Asher Foundation (men and women), 936 Hilgard Avenue, Los Angeles, CA 90024.

Off-Campus Housing

Many apartments and rooms in private homes are listed in the UCLA Housing Office. The University does not inspect these accommodations; listings simply provide basic information. The University requires that the landlord not engage in practices which are discriminatory, unhealthy, unsafe or unfair to the student. Landlords who do so and are reported are not included in future listings.

Rents vary from $100-$200 per month for rooms in private homes; $170-$350 per month for a bachelor; $250-$450 per month for a furnished single. One-bedroom apartments range from $325-$600 per month; two-bedrooms range from $450-$1,000. Rental rates depend upon furnishings and distance from campus; utilities (except water) are usually not included.

Most married students live in apartments and rented houses in the area. Up-to-date listings are available in the UCLA Housing Office. Students should check listings in person since they change from day to day.

The UCLA Housing Office also provides area maps, bus schedules, and information to students regarding their rights and obligations as tenants, guides students in evaluating rental opportunities and leases, mediates landlord-tenant disputes, and refers students to other agencies when necessary.

University Apartments

Additional University-owned housing for single students is provided in three off-campus apartment complexes. For Fall 1980, housing accommodations in all of these apartment complexes were available to both single graduate and undergraduate students. However, at the time of this printing, the allocation of all University housing between undergraduate and graduate students for academic year 1981-1982 is under review. Students sharing all University-owned apartments must be of the same sex. The rental rates will be determined in June, 1981.

The University Landfair Apartments are conveniently located within walking distance of campus. Furnished bachelors, singles and one-bedroom with den apartments are available. The bachelors accommodate one student, singles accommodate two, and one-bedroom with den apartments accommodate four.

The University Glenrock Apartments are located approximately four blocks from campus, also within walking distance. The two-three-storied buildings have furnished single, one-, two- and three-bedroom apartments available. Single and one-bedroom apartments accommodate two students, the two-bedrooms accommodate four, and the three-bedrooms accommodate five or six, depending upon size.

The University Venice-Barry Apartments are located 5-6 miles from campus. There is no direct city bus line from the apartments to campus so the University provides a shuttle bus to the campus during weekdays. The complex has 122 furnished units made up of executive suites and one-bedroom apartments accommodating three students and two-bedroom apartments accommodating four to five students.

Privately-owned apartments must be of the same sex. The University-owned apartments must be of the same sex. Additiona
All University-owned apartment complexes do not permit pets. For rental rates and assignment information, visit or write to the UCLA Housing Office, 78 Dodd Hall, Los Angeles, CA 90024, (213) 825-4491.

Child Care

Child Care Center
The Child Care Center provides part-time and full-time care, depending upon parents' needs, for children 2 months to 6 years. Fees range from $27-$60 per week depending on full or part-time care.

The Child Care Center is located in Parking Lot 1, behind the Ackerman Union and the BRI trailers at 10833 Le Conte. For information regarding fees call Child Care Services at (213) 825-5086.

Family Day Care
This care is provided in homes in the community which are licensed by Los Angeles County and participate in training and enrichment by the Child Care Services staff. Full and part-time care is available; fees and hours may be arranged with individual caregivers. For more information, telephone (213) 825-8474.

UCLA Parent Toddler Group
Located in the Married Student Housing complex 4 miles south of campus (3327 S. Sepulveda Blvd., telephone (213) 391-9155 or (213) 398-8739), a cooperative pre-school is open to all members of the UCLA community: full-time students, faculty and staff.

The program is designed to help toddlers aged 18 months to 3 years develop a sense of independence, self-worth and the ability to relate to other children and to adults outside their own families. Some structured activities which encourage mobility and dexterity are available, but the children are encouraged to make their own choices and decisions.

Tuition is on a sliding scale, according to parental income. Parents participating in this cooperative scheme are required to work at school one morning in every four that their child attends. The Parent Toddler Group operates mornings, Monday through Friday, 9:00 a.m. to 12:00 p.m. The afternoon sessions meet 12:15 p.m. to 4:00 p.m., 3 days a week.

University Parents Cooperative Nursery School
Located in the Marred Student Housing complex 4 miles south of campus (3327 S. Sepulveda Blvd., telephone (213) 397-2735), the University Parents Cooperative Nursery School offers a warm, supportive, educational environment to children of the UCLA community. The school provides parents of varied cultural backgrounds the opportunity to gain insights and skills in the art of being a good parent. Care is provided for children ages 3-6 years. The hours are Monday through Friday, 9:00 a.m. to 12:00 p.m. and 12:00 p.m. to 3:45 p.m. with extended care available 3:45 p.m. to 5:30 p.m.

Transportation and Parking

There are several other means of personal transportation than the automobile for commuting to and from the campus. Alternatives such as carpooling, public transportation and bicycling are described in the brochure, How to Get to UCLA Without Using Your Car, distributed by the Transportation Services Administration. This brochure is available at Campus Parking Service, and includes bus route maps and a UCLA Ridesharing application.

UCLA Parking Permits
A limited number of parking permits are sold to students for Fall, Winter and Spring Quarters. Students who wish to obtain parking permits may obtain UCLA Student Parking Requests from the Campus Parking Service. Parking assignments will be based on the information on the completed Requests. Because of space limitations, all students who submit Student Parking Requests may not receive parking assignments. Parking permits assigned and purchased for the Fall Quarter may be renewed for the Winter and Spring Quarters without submitting a new Request. Students who are assigned parking in any quarter, must reapply for subsequent quarters. New or reentering students for each quarter must file Requests. Permits are not renewable from Spring Quarter for the following Fall Quarter.

Deadlines for returning a completed UCLA Student Parking Request to the Campus Parking Service will be established for each quarter and are listed in each quarter's Schedule of Classes. Students with physical disabilities which preclude walking long distances may apply for parking permits through Student Health Service. Parking permits for Summer Quarter are available on a first-come, first-service basis from the Campus Parking Service. Parking Permits are not transferable and may be purchased only from the Campus Parking Service.

Students may obtain UCLA Student Parking Requests and instructions for filing, including current deadlines and fees, by either writing to the Campus Parking Service, 405 Hilgard Avenue, Los Angeles, CA 90024, or by calling (213) 825-9871.

The Escort Service—Campus Police

The Escort Service is provided for members of the UCLA community who are employed in the Department of Police/Community Safety. They can be identified by the bright yellow shirts or jackets with "University Police" emblems which they are required to wear on duty. In addition to the distinctive shirts, escorts carry a Police Department I.D. Card and a police radio.

Persons wishing to request an escort should phone UCLA Police at 825-1492 or 825-1493. To ensure prompt service, women students are encouraged to phone 15 minutes before they will need an escort.

The Escort Service is provided free of charge and is funded through Registration Fees, ASUCLA Board of Control, and the Department of Police/Community Safety. For further information, contact the UCLA Police at 825-9800.

ASUCLA Services

The Associated Students UCLA (ASUCLA), under the control of the ASUCLA Board of Control, manages the Ackerman Union-Kerckhoff Hall complex. In these facilities, the campus community will find a complete student store, daily food service, places to relax, have meetings and engage in leisure activities. Among other services offered by ASUCLA for the campus' convenience are a check cashing service, travel service, print shop, and photographic center. Some of these services are described below.

Food Service

ASUCLA offers the campus many distinct food service facilities, each unique in its makeup and atmosphere. The Treehouse is on the first floor of Ackerman Union in the heart of the campus. This unit features the Savory Slice and Salad Society which includes carved-to-order hot roast beef sandwiches and a make-your-own fresh salad bar, in addition to the traditional cafeteria fare. The newest addition is the La Quiche-terie serving quiche baked daily, fresh breads, and spinach salads with an array of garnishes. The Truck Farm, also in the Treehouse, is a vegetarian's delight offering fresh raw vegetables and fruit, as well as a variety of cheeses, cold soups, natural sandwiches and fresh baked cakes. The Treehouse is open from 7:00 a.m. to 9:00 p.m.
Housed within the Treehouse is the Sandwich Room. This facility carries a variety of low-cost, made-to-order hot and cold sandwiches as well as a breakfast specialty, Belgian waffles. The Sandwich Room is open from 7:45 a.m. to 4:00 p.m.

The Coop, a fast food unit, is currently closed for remodeling. An entirely new look and menu will be featured when construction is complete in the Cooperage.

The wood and brass decor of the Kerckhoff Coffee House creates an environment not found on most college campuses. Located on the second floor of Kerckhoff Hall, the Coffee House offers ice cream specialties, a variety of teas and coffees, plus an assortment of gourmet potages. Open during the week from 7:30 a.m. until 1:00 a.m. and weekends from 11:00 a.m. to 12:00 midnight, the Coffee House provides UCLA students with a relaxed atmosphere featuring live entertainment almost every evening.

The Campus Corner is located on Bruin Walk directly outside Ackerman Union. The oldest of the ASUCLA Food Service facilities, the Campus Corner features pita bread pocket sandwiches, the traditional fare of hamburgers and hot dogs, and frozen yogurt with your favorite topping. The Campus Corner is open Monday through Thursday from 7:30 a.m. to 5:00 p.m., Friday from 7:30 a.m. to 4:00 p.m., Saturday from 11:00 a.m. to 4:00 p.m. and Sunday from 12:00 noon to 4:00 p.m.

Located in the southern portion of campus, in the Court of Science, is the Bombshelter Deli and Burger Bar. This unit specializes in authentic delicatessen fare, and also offers falafels, hamburgers and hot dogs. A favorite luncheon spot, the Bombshelter features outdoor patio dining and is open through the week from 7:30 a.m. to 5:00 p.m., and on Saturdays from 10:00 a.m. to 3:00 p.m.

The largest ASUCLA Food Service is the North Campus Student Center, located between the Research Library and Campbell Hall. It is known for its newly-added Pasta Factory as well as its established reputation of serving fresh baked donuts, Pot Au Feu entrees, deli sandwiches, a full salad bar, and its broiler area. North campus is open for breakfast, lunch and dinner Monday through Thursday from 7:30 a.m. to 11:00 p.m., Friday 7:30 a.m. to 6:00 p.m. and Sunday 11:00 a.m. to 8:00 p.m.

Potlatch, a lounge on the first floor of the Graduate School of Management (GSM 1323A), offers sandwiches, snacks and beverages. Hours are Monday through Thursday 8:00 a.m. to 9:00 p.m., Friday 8:00 a.m. to 2:00 p.m.

ASUCLA also provides a Catering Service within the Student Union complex ranging from waiter-served functions and buffets to coffee service. Arrangements can be made through the catering office located in 1311 Ackerman Union.

In addition, the ASUCLA Food Service furnishes concession service in season or during events at the Sunset Canyon Recreation Center, Pauley Pavilion, and Drake Stadium.

Students' Store

The ASUCLA Students' Store is actually a "mini department store" with three locations on campus: Ackerman Union, the Center for the Health Sciences, and the North Campus Student Center. The Students' Store offers a wide variety of textbooks, general books, school and art supplies, dental and medical supplies, electronics, sporting goods, "UCLA" merchandise (Bearwear), casual and fashion clothing, food, health aids, greeting cards, and Lecture Notes. The main store is located on B-level of Ackerman Union; telephone 825-7711. It is open Monday through Thursday 7:45 a.m. to 7:30 p.m., Friday 7:45 a.m. to 6:00 p.m., Saturday 10:00 a.m. to 5:00 p.m., and Sunday 12:00 noon to 5:00 p.m. during school session; and
Monday through Friday 8:30 a.m. to 5:30 p.m.,
Saturday and Sunday 12:00 noon to 5:00 p.m.
during school breaks.

Graphic Services
ASUCLA Graphic Services is the campus center for photographic, printing, typographical and other related services. It is located on the first floor lobby of Kerckhoff Hall. Services include Xerox and book copying, quick offset, custom printing, color Xerox, typesetting, color portraits, commercial photography, passport photographs, "Perma Plaques", film, darkroom supplies, and discount photofinishing. Hours are: Monday through Thursday 7:45 a.m. to 7:30 p.m.; Friday, 7:45 a.m. to 6:00 p.m., Saturday, 10:00 a.m. to 5:00 p.m.; phone (213) 825-0611, Ext. 291.

Check Cashing
Students, staff and faculty with current UCLA identification may cash a personal check for up to $50 a day, with a 15-cent service charge for each check at the Service Center in 140 Kerckhoff Hall. Postdated checks may also be cashed for up to $50 with a 35-cent service charge. The check will be held up for two weeks before being sent to the bank. Only one postdated check per 2-week postdating period is allowed. Traveler's checks in amounts of up to $50 per day may be cashed with a 15-cent service charge. Check cashing hours are: Monday through Friday, 9:00 a.m. to 4:00 p.m. Weekend check cashing is available Saturdays, 10:00 a.m. to 5:00 p.m.; Sundays 12 noon to 5:00 p.m. at the Main Cashier's Office, A-Level Ackerman Union. No postdated checks may be cashed during the weekend hours.

Money Orders
At the money order window in 140 Kerckhoff Hall, students may purchase money orders for up to $200, with the exception of those to the UC Regents which can be over this limit. There is a 35-cent service charge for each money order. Hours are: Monday through Friday, 8:30 a.m. to 4:30 p.m.

Post Office Boxes
These are available to students, staff and faculty in 140 Kerckhoff Hall for $4.50 per quarter for a small box or $5.50 per quarter for a large box. The Post Office Box Rental Window is open Monday through Friday, 8:30 a.m. to 4:30 p.m.

Meeting Rooms and Lounges
The following rooms are available for the use of the entire campus community, with special attention to students and groups: five meeting rooms, two large activity rooms, and the Grand Ballroom in Ackerman Union; three meeting rooms in Kerckhoff Hall; and two meeting rooms in the North Campus Student Center.

Public lounges include the Upstairs Lounge located on the third floor of Kerckhoff Hall; the Downstairs Lounge and the Alumni Lounge, on the second floor of Kerckhoff Hall; and a lounge in the North Campus Student Center.

Students may reserve space for a meeting in Ackerman Union or Kerckhoff Hall by visiting the Information Desk on the first floor of Ackerman Union or by phoning (213) 825-0611, and may reserve space at the North Campus Student Center by visiting the information area at North Campus or by phoning (213) 825-0611, Ext. 331.

Travel Service
The ASUCLA Travel Service is located on the A-Level lobby of Ackerman Union and provides a complete selection of scheduled air ticketing service, charter flights, student-oriented packages and tours, U.S. and European rail tickets, as well as other travel-related services. The Travel Service is open Monday through Friday, 9:00 a.m. to 6:00 p.m.; and Saturday, 9:00 a.m. to 1:00 p.m.; or phone (213) 825-9131.

Central Ticket Office
The Central Ticket Office serves the UCLA community through two locations—the Ticket Office in the James E. West Alumni Center (ground floor) and at the trailer at 650 Westwood Plaza (across from the Police Station). Tickets for all UCLA events are sold at both locations. In addition, the following special ticket services are provided at each location:

The James E. West Alumni Center location offers student tickets to athletic events at reduced prices. Tickets to off-campus events are also sold, through both the Ticketron system and the Mutual Ticket Agency. Bus tickets for the RTD and Santa Monica bus systems (discount rides for students), and special student discount tickets for local motion picture theaters are also available.

The 650 Westwood Plaza location offers student tickets for on-campus cultural events at reduced prices, subsidized by the Student Committee for the Arts. For all student tickets, students must present their Registration Card and Photo I.D. Card. There is a limit of two tickets per person. Watch the Daily Bruin ads for ticket sales dates.

Student Health Service
Benefits
Student Health Service benefits include: outpatient care for general, and some specialized medical and surgical conditions, gynecological and family-planning services; dental care; psychiatric counseling; laboratory, x-ray, and pharmacy services. Students may obtain services for general care by making an advance appointment (phone 825-2463) or by walking in without an appointment. Most benefits are provided without additional charge; service charges, when applicable, are moderate. Presently, there are charges for all prescription medications, dentistry, routine immunizations and physical examinations, orthopedic supplies, missed appointments, contraceptive medications and devices, and required health evaluations. The full costs of hospitalization, and of specialized diagnostic and clinical services, unavailable within Student Health and ordered in the UCLA Medical Center or other community outpatient facilities, are the student's responsibility.

Location and Hours
Student Health Service is located on the A-Floor of the Medical Center, Room A2-130, Center for Health Sciences. Office hours are: Monday through Friday, 8:00 a.m. (9:00 a.m. on Tuesdays) to 11:30 a.m. and 1:00 p.m. to 4:30 p.m.; emergencies only 11:30 a.m. to 12 noon and 4:30 p.m. to 5:00 p.m. A small satellite office, in Pauley Pavilion, is open from 1:30 p.m. to 6:00 p.m., Monday through Friday, mainly for sports injuries, but open to all students. Emergency care after-hours, on weekends and holidays is available in the UCLA Hospital Emergency Room, on a fee-for-service basis.

Eligibility
Graduate students paying full registration fees are eligible for all benefits of Student Health Service during each quarter for which they are enrolled. A UCLA registration card and photo I.D. must always be presented for service. Students who do not pay full registration fees may obtain benefits, upon written confirmation of eligibility information, phone 825-1655. Literature and information on campus events, concerts, exhibits, lectures, and recreation areas are kept on hand in the Center.

Visitors Center
The Visitors Center, which is located in 100 Dodd Hall (phone: (213) 825-4338, domestic; 825-4467, foreign), has a reception area where visitors are met, welcomed, and assisted. Campus appointments for both domestic and foreign visitors, including escorting and interpreting, are part of the services offered.

Campus tours for the public are frequently offered, and personalized campus tours are arranged on special request for visitors and guests of University staff and faculty.
Hospitalization and Insurance

Necessary hospitalization may be arranged by Student Health Service, but the costs of inpatient hospital care at UCLA or at any hospital ARE NOT COVERED as a University benefit. Students are personally responsible for all such costs, and should be sure that they have adequate, health insurance. Foreign students are required by University policy to have health insurance as a condition of registration.

Students without adequate insurance coverage are encouraged to purchase the UCLA-sponsored Student Supplemental Health Insurance Plan which is available at the beginning of each quarter. Extended coverage, at additional cost, is available for dependents of insured students. For additional insurance information, phone 825-1856.

Requirements

All registering graduate students must complete and return the insurance application and waiver form, whether or not they are purchasing insurance. All new and re-entering students in the Graduate Schools of Dentistry, Education, Medicine, Nursing or Social Welfare must complete and return the health evaluation form provided to them. All foreign students, new and re-entering, must complete and return the health evaluation form, and must be cleared for adequacy of health insurance and the absence of active tuberculosis before completing registration.

Exclusions

No coverage is provided through Student Health Service nor through Student Insurance for cosmetic surgery, care of chronic diseases, or rehabilitation. Dependents of students, whether insured or not, are not eligible for care or rehabilitation. Dependents of students, whether insured or not, are not eligible for care or rehabilitation. Dependents of students, whether insured or not, are not eligible for care or rehabilitation. Dependents of students, whether insured or not, are not eligible for care or rehabilitation. Dependents of students, whether insured or not, are not eligible for care or rehabilitation.

Further Information

Inquire at the Student Health Service directly, or by telephone—(213) 825-4073. Deaf and hard-of-hearing students may communicate with the Student Health Service via the UCLA Hospital Interpreter Translation Service at 825-7275, or the Office of Special Services at 206-6083.

Psychological and Counseling Services

The Psychological and Counseling Services includes two separate divisions—The Behavioral Division and The Counseling Division. They provide professional services focusing upon student development, and are for the voluntary use of any regularly enrolled student.

Behavioral Division

The Behavioral Division (4223 Math Science Building, 825-4207) offers counseling for students who want to increase their effectiveness in handling specific problems encountered in university life.

The staff is composed of professional psychologists. Both individual and group programs are offered. Students should call or come in to arrange an appointment or to receive further information. Evening hours can often be arranged.

Counseling Division

The Counseling Division (4223 Math Science Building, 825-0768) offers individual and group counseling for students who are experiencing any of the number of general concerns, dilemmas, crises or indecisions which are often encountered by students. Educational and career interest inventories can be taken upon request. Marital and premarital counseling, and counseling related to problems encountered in other forms of relationships, is also available.

The staff is composed of counseling psychologists and other professionals familiar with the needs and interests of college students. Students should call or come in to arrange an appointment (immediate appointments are possible, if indicated) or to receive further information. Evening hours can often be arranged.

Placement and Career Planning Center

The Placement and Career Planning Center offers career development and placement services to students of all disciplines and all degree and class levels. It is comprised of three functional divisions: Career Development, Student Employment, and Educational Career Services. Services are located in the Placement and Career Planning Center building and in two satellite locations: 1349 GSM, specializing in Management, and 5289 Boelter Hall, specializing in Engineering and the Physical Sciences.

Career Development

A staff of career counselors is available to assist in career exploration, choice, and the job search. The Career Resources Library furnishes information for planning further education and alternative careers. The Campus Interview Program provides convenient access for students to interview with employers and graduate school representatives. A more diverse array of job opportunities is posted for direct referral to the employer.

Student Employment

A job listing and referral system is provided for currently enrolled students and their spouses who are seeking part-time, temporary, or vacation employment. Career-related opportunities (including paid and non-paid internships) are available either through the listings or through personal search with the assistance of this unit.

Educational Career Services

Specialized information and counseling is available to assist students and alumni seeking positions in universities, colleges, community colleges, and secondary and elementary schools. Current listings of educational job opportunities, internships in educational institutions, and a professional file service are included.

Special Services and Veterans Affairs

The Office of Special Services, A-255 Murphy Hall, certifies the enrollment status of students who receive direct educational assistance benefits from the U.S. Veterans Administration and the Social Security Administration. The Office also issues fee deferments to students sponsored by the California Department of Rehabilitation and fee waivers to dependents of deceased or disabled California veterans as authorized by Education Code 10652. Physically disabled students may receive assistance through the Office in such areas as registration and enrollment, parking permits, readers for the blind, interpreters for the deaf, proctoring examinations, van service, and minor repairs to students’ wheelchairs.

Office of International Students and Scholars

The Office of International Students and Scholars (formerly called the Foreign Student Office) exists for the purpose of assisting the 5,000 international students and scholars to achieve the objectives for which they came to UCLA. Its staff, including both professional and peer counselors, is uniquely attuned to the questions and concerns of persons from other cultures. Matters commonly brought to this office include financial issues, questions relating to the Immigration and Naturalization Service, offices and departments at UCLA and outside agencies including sponsors and consular offices, academic and career decisions, interpretation of the American educational system, and the nature of interpersonal relations in this country. In addition, the Office serves to bring together American and foreign students for the exchange of information, opinions and for a variety of cross-cultural experiences.

The Office works closely with the International Student Center, located adjacent to campus, which provides an informal gathering place where American and foreign students meet with the local community.
scholars and the general public, the Museum offers assistance with instruction, research field work, exhibitions, and seminars, and sponsors exhibitions, lecture programs, symposia, and publications.

The Museum directs a satellite museum program which organizes and mounts exhibitions that are located throughout greater Los Angeles, and a pre-history program which is designed to make children familiar with museum objects in a classroom setting. Trained volunteers teach classes in prehistoric archaeology in the Los Angeles City School System. The Museum has an 1,800 square foot multi-purpose facility which is used primarily for exhibits directly related to teaching and research, a focus for classes, seminars, and lectures. Designed as a home for many University, Museum, and community activities, the gallery enhances the effectiveness of existing programs and gives impetus to further development. The exhibitions highlight various aspects of the Museum’s collections.

Christopher B. Donnan, Director

Special Facilities

The UCLA Film Archives, located in 1438 Melnitz Hall, currently holds approximately 12,000 titles, making it the largest film center west of the Library of Congress.

Strongest in American sound cinema, the Archives’ holdings are mainly in 35mm studio prints, making the collection excellent for detailed studies of all aspects of cinematic styles. Other areas of strength include animation, “B” westerns, “Exploitation” films and documentaries.

These films are regularly exhibited at UCLA. The Archives is open from 9:00 a.m. to 5:30 p.m., Monday through Friday. Viewing appointments can be made in person or by calling 825-4414.

The UCLA Radio Archives, located in 1438 Melnitz Hall, offers an opportunity to examine a form of mass media that dominated popular culture long before television. It contains more than 10,000 broadcasts from the early 1930’s to the present.

The Archives’ greatest strengths are in the areas of dramatic, comedy and variety programs. A significant collection of programs (1939-1955) donated by the Hallmark Company includes 700 broadcasts. Among the highlights of the personal collections are 700 Jack Benny programs. Other personal collections feature Dick Powell, Bing Crosby and other famous radio personalities. The Cleve Roberts Collection joins other news and documentary material in giving the radio archives a wealth of radio history.

The Radio Archives is open from 9:00 a.m. to 5:30 p.m., Monday through Friday. The phone number is 825-7357.

Under the joint auspices of the Academy of Television Arts and Sciences (ATAS) and UCLA, the ATAS-UCLA Television Archives strives to make television programs accessible to the public and researchers. The kinescope, telefilm and video tape collection currently totals 20,000 titles, making the Archives the largest university collection in the United States.

The holdings include examples from all types of broadcasting but are particularly strong in dramatic and comedy-variety programming from 1947 to the present. Documentaries and public affairs programs are well-represented also.

The ATAS-UCLA Television Archives is located in 1438 Melnitz Hall and is open from 9:00 a.m. to 5:30 p.m., Monday through Friday. Appointments can be made in person or by calling 825-4480.

The 6-acre Mildred E. Mathias Botanical Gardens contain a useful teaching and research collection of about 4,000 species of plants of the world. Included are a native section, desert garden, lath-house, and experimental field. Adjoining is the Plant Physiology Building, with glass houses and growth chambers. The Herbarium contains a teaching and research collection of about 250,000 specimens representative of the flora of the world, with special collections of the native flora and of ornamental species cultivated in Southern California. Arthur Gibson, Director

The Office of Academic Computing (OAC) is responsible for all general-purpose computing activities on the UCLA campus. In support of instructional and research activities, OAC provides a broad range of computing services to the UCLA academic community and, through a nationwide computer network, to institutions throughout the United States. The principal computing resource is an IBM System/370, 3033 computer. The 3033 is available to all departments and schools within UCLA, and timesharing terminals and remote-job-entry stations are located throughout the campus.

Both interactive and batch methods are available for performing work on the 3033. Interactive terminal-oriented systems available are VS/APL (IBM’s version of A Programming Language), TSO (IBM’s Time Sharing Option), and WYLBUR. The 3033 supports standard MVS batch services as well as a fast, student-oriented batch service (QUICKRUN). Turnaround for jobs run on the 3033 typically ranges from under a minute for student jobs to under an hour for jobs requiring extensive setup operations.

OAC also maintains a DEC (Digital Equipment Corporation) PDP-10KA computer, principally for student use. Any member of the UCLA student body or faculty can individually establish an account for using the PDP-10. Other noteworthy equipment provided to OAC users is special equipment for graphics work: two plotters (a CalComp 936 Drum Plotter and a Versatec 1200A Electrostatic Plotter) and several Tektronix graphics display devices (models 4081, 4051, and 4013).

Computing activities are supported by an extensive library of application programs, consulting services, and reference documentation. The applications program library for the 3033 includes a wide range of statistical, engineering, and mathematical software. Several FORTRAN and PL/I compilers, as well as other esoteric computer languages, are also supported on the 3033.

W.B. Kehl, Director

The Division of Laboratory Animal Medicine is the centralized animal resource facility responsible for the procurement, husbandry and general welfare of animals required for teaching and investigative services. The Division’s veterinary and support staff administers the veterinary medical and husbandry programs throughout the campus. The Division’s veterinary programs and physical facilities have been approved for full accreditation by the American Association for Accreditation of Laboratory Animal Care.

Jessie O. Washington, D.V.M. Director

The University of California Natural Land and Water Reserves System offers 25 reserves statewide to be used for field studies in unspoiled natural sites and for protected scientific experiments. Graduate students at UCLA regularly use several of these for thesis and dissertation research, including the 14,000-acre Boyd Deep Canyon Desert Research Center and the 56,000-acre Santa Cruz Island Reserve, both of which have field stations. A complex of three Santa Monica Mountain Reserves administered by UCLA is close enough to the campus for easy daily access.

Walt Westman, Campus Representative

Zoological collections of the Department of Biology include a research collection of marine fishes, primarily from the eastern Pacific and the Gulf of California, and the Dickey Collection of birds and mammals, primarily from the western United States, western Mexico, and Central America. The Department also maintains a more limited collection of amphibians, reptiles and fossil vertebrates. Through a cooperative arrangement, the large zoological collections of the Los Angeles County Museum, containing both fossil and recent specimens, are available for research by qualified students.

The Department also maintains an extensive collection of algae, and a smaller collection of fungi and bacteria (including photosynthetic bacteria). These collections, which are part of the culture facility, are available for both teaching and research.

UCLA is a member of the Organization for Tropical Studies, a consortium created to promote research and educational programs in the New World tropics. Fellowships are available for subsistence in field-oriented programs in Central America.
Other Programs and Training

A variety of other programs, projects, facilities and specialized research units are presently in operation at UCLA. Inquiries concerning these activities should be addressed to the Dean of the Graduate Division, 1237 Murphy Hall, University of California, Los Angeles, California 90024.

Research

Facilities at UCLA

Recognizing the value of an interdisciplinary approach to the search for knowledge, the University maintains Regentally-designated organized research units and other research programs outside the usual departmental structure. An organized research unit consists of an interdepartmental group of faculty and students engaged in research with them. Such units aid research and may enhance the teaching of participating members of the faculty, but they do not offer regular academic curricula or confer degrees. They may provide research training to graduate students employed in research programs with faculty supervision. These units, along with more specialized activities in focal fields, provide significant support to the educational program and enhance the overall academic quality of the institution.

African Studies Center

The African Studies Center provides a framework for furthering teaching and research on Africa involving social sciences, education, linguistics, humanities, fine arts, law, the health sciences and the natural sciences. The Center participates in an interdisciplinary master's degree program in African Area Studies, an articulated degree program with the School of Public Health, and in an undergraduate program in conjunction with degrees in the social sciences or African languages. The Center has also become increasingly involved in special programs which entail the dissemination of knowledge about Africa to the larger community. Through its Research Committee, the Center makes grants to assist UCLA faculty members and students with research on Africa. It participates in administering the NDEA Title VI fellowship awards for the study of African languages, and offers a limited number of supplemental grants-in-aid to students both in master's and in doctoral programs whose focal point is Africa. The Center provides information to faculty and students on extramural sources of research support and employment opportunities which require knowledge of Africa. It also brings Africanists to the University for lectures or as Visiting Professors or Research Associates, and sponsors interdisciplinary colloquia focused on integrative and innovative themes. Other Center activities include the publication of quarterly journals, African Arts, UFAHAMU, a student journal, Studies in African Linguistics, and The Journal of African Studies, African Law Studies, The African Studies Center Newsletter, Research in Progress, as well as occasional papers and books based on the interdisciplinary colloquia. The Center also provides facilities for a student organization, the African Activist Association, which is active in sponsoring events that focus public attention on important aspects of African culture or politics.

Michael F. Lotchile, Director

Institute of American Cultures

The Institute of American Cultures is charged with promoting and coordinating the activities of the four ethnic centers—the Center for Afro-American Studies, the American Indian Studies Research Center, the Asian American Studies Center, and the Chicano Studies Research Center. The Institute conducts no research itself, but fulfills its purpose by making research funds available to the ethnic centers and by encouraging and coordinating the efforts of the centers to recruit faculty and develop new institutional programs. The Institute is guided by an Executive Committee consisting of the four center directors, three faculty members (one of whom serves as the chair), and the Vice Chancellor-Research Programs (ex officio). The Director of the Institute is the Executive Vice Chancellor.

The Center for Afro-American Studies is an organized research unit established on the UCLA campus in 1969. Its basic mission is to encourage and support research that enhances the interpretation of the Afro-American experience. Pursuant to this objective, it provides faculty and graduate student research grants, sponsors in-house research projects, offers fellowship and scholarship awards, supports interdisciplinary symposia, encourages related curriculum development, and most important, relates these findings to the community at large via lectures, publications, and cultural programs. In addition, the Center participates with an interdepartmental degree committee responsible for administering an interdisciplinary master's degree program and an undergraduate program in Afro-American Studies.

Claudia Mitchell-Kernan, Director

The American Indian Studies Center acts as an educational catalyst in a variety of ways. It encourages new programs of study, promotes faculty development and systematic research, and develops library materials and curricula related to American Indian studies. In addition, the Program is involved with cultural activities of the Indian community and sponsors lectures, symposia, conferences, and workshops relevant to American Indian development. Special emphasis is placed upon coordinating the educational needs of American Indian students with the University and the community.

Charlotte Heth, Acting Director

The Asian American Studies Center seeks to provide a deeper understanding of a particular area of study by the development of related human and material resources. It promotes the systematic development of material resources related to Asian American studies through an aggressive library acquisitions program, coordinated interdisciplinary research, and a broad publications program. Human resources are nurtured by vigorous curriculum development efforts, and courses have been designed with degree-granting programs at both the undergraduate and graduate levels. The Center supports and encourages promising graduate students and postdoctoral scholars to pursue their interests in this vital field of study, as well as sponsoring a variety of conferences, lectures, symposia, and cultural events. In addition, the Center supports a wide variety of projects designed to channel the resources of the University and the fruits of the Center's other areas of activity to Asian American communities.

Lucie Cheng Hirata, Director

The Chicano Studies Research Center is an organized research unit established at UCLA in 1969. Its main purpose is to facilitate interdisciplinary academic research related to the Chicano experience. Pursuant to this primary purpose, the Chicano Studies Research Center seeks the development of Chicano Studies as a unique and scholarly area of activity recognizing that the University and national development of Chicano Studies are interrelated. The objectives of the Chicano Studies Center are (1) to identify, explore and document original research on critical issues facing the Chicano-American community; (2) to initiate and support faculty and student development in Chicano Studies; (3) to assist in, support and encourage the development of undergraduate and graduate curricula in Chicano Studies, emphasizing graduate curricula; (4) to facilitate public service by focusing the unique research, publications, and materials collection development resources of the University on the Chicano community; and (5) to support the creation and development of Chicano Studies at other institutions, and the organization of professional associations, conferences, and meetings devoted to Chicano Studies.
The range of Center activities has been varied and extensive. It has included faculty and student recruitment, support, and development; promoting and sponsoring research; supporting and developing Chicano Studies coursework; providing a public service to communities; meeting the research training needs of faculty and students; maintaining and expanding a nationally recognized Chicano Studies Research Library; and disseminating research and other materials on the Chicano through the Publications Unit of the Chicano Studies Research Center.

Juan Gomez-Quinones, Director

Institute of Archaeology

The Institute of Archaeology was established in the summer of 1973 for the purpose of developing and coordinating all aspects of activities relating to archaeology. Its goal is to contribute to the ideal of a comprehensive interdisciplinary reconstruction of the human past, as evidenced especially from artifactual remains.

The Institute includes faculty members from 11 academic units at UCLA, as well as faculty from various other UC campuses. It provides an intellectual focus for all University of California archaeologists, facilitating the exchange of views on theoretical models and technical developments. It does so by sponsoring lectures, seminars, symposia and arranging for visiting faculty; it also helps support excavation programs of the individual archaeologists active on campus. Through the Archaeological Survey, the Institute serves the needs of California archaeology, especially in the Southern part of the state. Besides occasional publications, the Institute issues a yearly journal, a series of technical monographs and a series devoted to major archaeological reports and investigations. The Institute has recently expanded its laboratory facilities for the analysis of ceramics, bones, metals and other materials. These are largely manned by graduate students in archaeology. Its archives, such as those devoted to rock art and archaeological sites in Southern California, provide an important research resource for archaeologists, historians, folklorists, art historians and other interested scientists. Given the considerable amount of public interest in archaeology, the Institute promotes a variety of activities which serve a broadly based need in the off-campus community, such as an Extension curriculum in archaeology, field trips, public lectures and publications for the interested lay public.

Giorgio Buccellati, Director

Laboratory of Biomedical and Environmental Sciences

The Laboratory of Biomedical and Environmental Sciences conducts research in the fields of biomolecular and cellular science, environmental biology, and nuclear medicine. It is funded through a contract with the Department of Energy (formerly ERDA and AEC). Research and training in nuclear medicine is conducted at the Center for Health Sciences. Most of the remaining program is conducted in Warren Hall, located on the West Medical Campus.

Warren Hall is well-equipped with modern research tools including a cobalt radiation source with an activity of 10,000 curies at the time of installation. The Laboratory also operates a biomedical cyclotron at the Center for Health Sciences which produces isotopes and is capable of activation procedures in support of its research programs. The Laboratory staff consists of about 190 scientists, technicians and supporting personnel representing many disciplines. Graduate student and postgraduate research programs are supervised by the staff in several fields.

O.R. Lunt, Director

Brain Research Institute

The Brain Research Institute provides an environment for research in the neurological and behavioral sciences for investigators particularly from the behavioral, health and life sciences fields but also from the physical sciences and engineering. Three principal goals of the Institute are: (1) to support and conduct research which contributes to an understanding of brain mechanisms and behavior; (2) to contribute to the training of predoctoral and postdoctoral students for professional careers in brain science; (3) to develop and disseminate information about brain function in the interest of the social and scientific communities. Located in the Center for the Health Sciences, the Institute conducts programs which are largely interdisciplinary. General activities include attention to such broad fields of interest as neurobiology, neurophysiology, neurochemistry, neuroanatomy, neuropharmacology, neuroendocrinology, neuropsychiatry, biophysics and communications, neuroimmunology, behavior and neuropathology.

Carmine D. Clemente, Director

Center for the Study of Comparative Folklore and Mythology

The Center for the Study of Comparative Folklore and Mythology is an interdisciplinary research facility that supports and coordinates the comparative study of folklore
and mythology from throughout the world. Research facilities in the Center suite include the Wayland D. Hand Library of Folklore and Mythology, the Western Folklore Archive, the John Edwards Memorial Foundation, a recording studio and sound laboratory, and collections of field recordings, phonograph records, films, and slides. Center-sponsored research projects include such diverse subjects as the mythologies of the Indo-European peoples, American popular beliefs and superstitions, American legends, Anglo-American ballads, Irish narrative songs, Chicanos' traditional arts and oral history.

Patrick K. Ford, Director

The Crump Institute for Medical Engineering

The Institute joins medicine and certain aspects of engineering, especially chemical engineering and materials science. Its research interest includes: 1) pharmacokinetics (the analysis and modeling of drug and hormone distribution, and metabolism), 2) design of optimal experimental strategies for identifying pharmacokinetic models, 3) design of new therapeutic systems for the controlled delivery of drugs, 4) physiological systems analysis by combined animal experimentation and computer simulation, 5) development of synthetic polymers with programmed surfaces (chemically coded) to provoke selective bonding to certain tissues, 6) analysis of transports of air and soil pollutants, with emphasis on risk assessment, 7) development of an extended statistical, irreversible thermodynamic approach to the understanding of complex systems, including nervous systems.

F. Eugene Yates, Director

Dental Research Institute

The Dental Research Institute, located mainly on the seventh floor of the School of Dentistry, involves faculty, graduate and professional students doing original research in six program areas as follows: (1) Immunology/Immunogenetics; (2) Periodontal Disease/Oral Ulcerations Disease; (3) Ultrastructure and Cell Biology; (4) Oral Neurology; (5) Craniofacial Biology, and (6) Biomaterials Science. M.S. and Ph.D. students are sponsored by individual Institute faculty members. An informational brochure outlining current studies of Institute members is available from the Office of the Director (CHS 43-180, Ext. 55478).

William H. Hildemann, Director

The Institute of Geophysics and Planetary Physics

The Institute of Geophysics and Planetary Physics is engaged in interdisciplinary programs of studies of the interior of the earth, moon, and other planets, the fluid and gaseous parts of the planets, and interplanetary space. Major research programs being actively explored in the laboratories of the Institute include investigations into the origin of the magnetic field; the configuration of the earth's magnetic field in space; the earth-sun interaction; structure and properties of the lunar surface and interior; meteories; origin of the earth's magnetic field; the history of the solar system; astrophysical plasmas; high energy astrophysics; ocean-atmosphere interactions; seismology; earthquake control and prediction; internal structure of the earth; earth tides; continental drift and plate tectonics; properties of materials under high pressures and temperatures; mineral synthesis; radiocarbon archaeology; geochronology; glaciology; petrology and metamorphism; isotope geochemistry; origins of life; man's interaction with the environment.

The laboratory facilities of the Institute and its faculty are available to guide the dissertation research of students in the physical sciences, including the Departments of Earth and Space Sciences, Physics, Chemistry, Mathematics, Atmospheric Sciences, Astronomy, Engineering and Anthropology.

Leon Knopoff, Associate Director

Gustave E. von Grunebaum Center for Near Eastern Studies

The Gustave E. von Grunebaum Center for Near Eastern Studies was established to promote individual and collaborative research and training in this area. The Center encourages the research of individual faculty members and collaborates in the solution of basic research problems which require institutional backing. The Center also sponsors lectures, seminars and conferences on various topics falling within the scope of Near Eastern studies, and actively promotes an extensive publication program.

Speros Vryonis, Jr., Director

Institute of Industrial Relations

The Institute of Industrial Relations, authorized by the Legislature of the State of California in 1945, is concerned with two principal types of activity. The first is an interdisciplinary research and publishing program directed primarily toward the study of labor-management relations, wages and related problems, economic security programs, the labor market, occupational safety and health, the quality of working life, the status of disadvantaged groups in the work force, labor law, labor history, comparative studies, and employment problems. Research staff members of the Institute are usually drawn from the regular faculties of the Graduate School of Management, the Departments of Economics, History, Political Science, Psychology, and Sociology; and the School of Law. This program affords opportunities to graduate students specializing in personnel management and industrial relations to engage in investigative work under expert guidance. The second main activity consists of community and labor relations programs serving unions, management, the public, and other groups interested in industrial relations. The programs consist of public lectures, conferences, symposiums and institutes of varying duration, and include a series of courses through University Extension leading to a Certificate in Industrial Relations.

Daniel J.B. Mitchell, Director

The Jerry Lewis Neuromuscular Research Center

The Jerry Lewis Neuromuscular Research Center is located in the northwest corner of the Center for Health Sciences (off Westwood Boulevard — phone (213) 825-3733) adjacent to the Reed Neurological Research Center, Brain Research Institute (BRI), and Neuropsychiatric Institute (NPI). It houses the research programs of members of several departments, with a common focus of interest in the physiology, anatomy and biochemistry of nerves and muscles and of pathological conditions affecting muscles.

Alan D. Grinnell, Director

Jules Stein Eye Institute

The Jules Stein Eye Institute is a comprehensive facility located within the Center for the Health Sciences, devoted to research in the sciences related to vision, the care of patients with eye disease and the dissemination of knowledge in the broad field of ophthalmology. Incorporated in this structure are outpatient, inpatient and operating room facilities for the care of patients with ophthalmic disorders; areas for research in the sciences related to vision; and facilities for scientific reading, lectures and seminars. The Institute affords a unique opportunity for the training of students in the School of Medicine, residents and graduate physicians, as well as postgraduate and postdoctoral fellows in fields related to vision science. A close relationship with graduate and undergraduate research and teaching facilities at UCLA is maintained.

B.R. Straatsma, Director
Latin American Center

The Latin American Center is an organized research unit providing support for the multidisciplinary study of Latin America. With over 90 affiliated faculty and visiting scholars, the Center is a major resource for individual and collaborative research activities in the social sciences, arts, humanities, and professions. Cooperation between the Center and seven colleges and professional schools of the University is facilitated by the Dean’s Advisory Committees for Latin American Studies.

Designated as a “center of excellence” by the U.S. Department of Education, the NDEA Latin American Language and Area Studies Center at UCLA supports the interdisciplinary B.A. and M.A. degree programs in Latin American Studies and coordinates articulated graduate degree programs with the Schools of Public Health, Library and Information Science, Management, Education, and Engineering and Applied Science. NDEA Title VI fellowships, research assistantships, and grants-in-aid are available to students in the graduate degree programs.

The Center also sponsors an extensive program of lectures, films, colloquia, and other special events for the University and general public. Additional outreach activities include pre-collegiate curriculum development, special offerings through University Extension, programs for community college instructors, and participation in the Southern California Conference on International Studies.

The Center publishes a series of documentary and scholarly publications, among which are the Statistical Abstract of Latin America, the Latin American Studies Series, the Reference Series, the Journal of Latin American Lore, and the Hispanic American Periodicals Index (HAPI).

Ludwig Lauerhass, Jr., Executive Director

Center for Medieval and Renaissance Studies

The Center for Medieval and Renaissance Studies is an organized research unit of the University of California. The Center does not currently offer courses or degrees, but it contributes to the goals of the institution in various ways.

The Center seeks to encourage multi-disciplinary attitudes and skills as it promotes, among some 20 UCLA departments, the study of Western civilization between 300 and 1650 A.D., from the early Christian period through the time of Milton. Accordingly, the Center encompasses the arts and sciences, history and languages, and it embraces the Latin West, Byzantium, Islam, Judaism, the minor Christian communities, and the various Slavic communities, as well as the Germanic and Celtic worlds. The Center seeks to furnish opportunities, facilities, and assistance for individual research and interdepartmental exchanges; it appoints postdoctoral associates and visiting professors; it sponsors lectures and organizes coordinated cultural enterprises such as conferences and colloquia. Through books and television programs, it makes the findings of scholars available to the academic community and the general public.

Of special interest to graduate students is the Center’s program for training research assistants. Each year the Center offers several research assistantships on a competitive basis to graduate students from the United States and abroad who plan to work at UCLA toward the Ph.D. degree. Three of these are designated for Byzantine studies. Each assistant is assigned to one or more faculty members in his/her own or related field. For further information and application forms, please write to the Director of the Center for Medieval and Renaissance Studies, 11365 Bunche Hall, UCLA, 405 Hilgard Avenue, Los Angeles, California 90024. Note that admission to graduate status at UCLA is a separate procedure; details are available from the Dean of the Graduate Division.

Since 1973, the Center has sponsored the publication of Comitatus, an annual journal containing articles in the field of Medieval and Renaissance Studies by University of California graduate students. The editorial board is composed entirely of students, with a faculty advisory committee.

Additionally, the Center houses a Graduate Student Association (GSA). The GSA meets informally during the academic year to exchange information and distribute material; it publishes a quarterly newsletter and arranges colloquia.

Students working in Medieval and Renaissance fields enjoy excellent resources at UCLA. Among the major research tools available on campus are the Berenson photographic file and the Princeton Index of Christian Art, the Bell Library of Vinciana, the Biomedical Library’s collections in the history of medicine, and the manuscript holdings in the Music Department and in the Research Library’s Special Collections. As of 1979, UCLA was estimated to have more than 390,000 volumes in the fields of special interest to the Center, supplemented by growing collections in Judaica and Near Eastern Studies. Nearby are the manuscripts and printed riches of the Huntington and Clark Libraries.

Paul D. Boyer, Director

Mental Retardation Research Center

The Mental Retardation Research Center provides laboratories and clinical facilities for basic and applied research and research training in mental retardation and related aspects of human development. Its interdisciplinary activities range from molecular biology to epistemology. The Center is closely allied with a Professional Education and Clinical Services Facility, which promulgates interdisciplinary training in the evaluation and treatment of mentally retarded and otherwise disturbed children and their families. Together, these two units comprise a total program directed toward a major public health program.

Nathaniel A. Buchwald, Director

Molecular Biology Institute

The Molecular Biology Institute was established to serve various interested departments of the biological, medical, and physical sciences in the coordination, support, and enhancement of research and training in molecular biology. Interests and activities of the Institute encompass all approaches which aim to explain biology at a molecular level, with particular emphasis on correlation of structure and function. These include study of structure and function of macromolecules, molecular genetics and virology, bioenergetics, catalysis and control, molecular basis of cellular architecture, development, evolution, neurobiology and oncology. Staff members from departments in biological, physical, and medical sciences participate in Institute programs, and the Institute aids departments in graduate training and postdoctoral programs in the general area of molecular biology.

Most of the Institute staff are housed in the Molecular Biology Institute building completed in 1976. Approximately one-half of the building space is devoted to the Parvin Cancer Research Laboratories. The Institute building is located adjacent to the Chemistry, Biology and Bacteriology Departments and close to the School of Medicine.

Paul D. Boyer, Director

National Center for Intermedia Transport Research (NCITR)

A National Center for Intermedia Transport Research (NCITR) has been established at UCLA with the support of the U.S. Environmental Protection Agency (EPA). At the Center, studies will be conducted of the transport of particles and gases across interfaces and of chemical conversion processes involving particulate matter at interfaces. Of special interest will be the transport of chemical species such as trace metals and organic compounds of pollution concern. The Center will emphasize the
fundamentals of these processes. At the same time, however, the Center will apply the results of these and other studies to systems of practical interest such as emissions from the new synthetic fuel technologies and the chemical and petrochemical industry. For this purpose, theoretical and modeling approaches will be employed in the evaluation of field and monitoring data collected by EPA and others.

Participants in the Center include faculty and students from the Departments of Chemical Engineering and Atmospheric Sciences, and the Institute of Geophysics and Planetary Physics. Professor S.K. Friedlander, Vice Chairman, Chemical Engineering, serves as Center Director and Professor Hans. R. Pruppacher, Chairman, Atmospheric Sciences, as Associate Director.

S.K. Friedlander, Director

Neuropsychiatric Institute (NPI)
The Neuropsychiatric Institute (NPI), in the UCLA Center for the Health Sciences, is an organized activity of the University of California devoted to education, research, and patient care in psychiatry, neurology, and related fields. The mission of the Institute is threefold: (1) acquiring new knowledge about the factors affecting mental health, mental retardation, and diseases of the nervous system within an interdisciplinary setting; and (2) developing and utilizing the most effective techniques of diagnosing and treating these disorders.

Louis Jolyon West, M.D., Director

Center for Russian and East European Studies
The Center for Russian and East European Studies was established to promote, assist and coordinate research and teaching on Russia and the countries of Eastern Europe. It furthers the research of individual faculty members and graduate students, sponsors colloquia, seminars and lectures, organizes conferences, and participates, with other universities, in academic exchange programs with Russia and Eastern Europe.

Baráta Krkic, Director

Institute for Social Science Research (ISSR)
The Institute for Social Science Research (ISSR) undertakes basic and policy studies on a broad spectrum of contemporary sociological, psychological, political and economic problems and other social-related community issues. The Institute encourages collaborative research between faculty in the various social science departments as well as cooperative projects that involve members of the professional schools. The core staff of the Institute provides research consultation and supportive services to University faculty members engaged in research investigations as well as advice on the designing and funding of projects. From time to time, the Institute offers special opportunities for graduate students to gain research experience. As funds permit, the Institute provides seed-funding for project development and pilot studies.

An integral part of the Institute is the Survey Research Center (SRC) which not only serves the UCLA faculty but investigators from other universities and research groups in the local and national social research community.

The current research program includes studies in medical care, mental health, human development, housing, law, demography, economic resources, gerontology, energy and economic behavior. Director to be announced.

Western Management Science Institute
The Western Management Science Institute fosters research and advanced study in management science and operations research, with special emphasis on developments needed for more effective practical applications. The Institute conducts mathematical and computer-oriented studies on a variety of subjects. These include the construction of optimization models for production and distribution systems, finance and marketing policies, conservation of natural resources, and resource allocation in organizations. Appropriate tools of decision analysis, mathematical programming, and simulation are being developed and applied. The basic economics of decision and information systems are also being studied.

In addition to its research programs, the Institute is engaged in developing faculty resources and graduate curricula in the management sciences, and in sponsoring workshops and seminars such as the Jacob Marschak Interdisciplinary Colloquium on Mathematics in the Behavioral Sciences.

Although composed largely of faculty members of the Department of Management, the Institute staff is interdisciplinary. Fruitful collaborative relationships have occurred with the Departments of Economics, Engineering, Mathematics, Political Science, Psychology.

J.C. LaForce, Director

White Mountain Research Station
The White Mountain Research Station, an organized research unit of the University of California, was established (1) to provide laboratory facilities for any qualified research investigator who wishes to utilize a high-mountain environment in his/her work; and (2) to serve as a teaching facility for field courses conducted in the region. Located in the vicinity of Bishop, California, the Station includes four separate laboratory sites: (1) the Owens Valley Laboratory, 3 miles east of Bishop at an elevation of 4,050 feet above sea level; (2) the Crooked Creek Laboratory on the White Mountain Range northeast of Bishop at an elevation of 10,150 feet, used in conjunction with the U.S. Forest Service; (3) the Barcroft Laboratory at an elevation of 12,470 feet; and (4) the Summit Laboratory atop White Mountain Peak at an elevation of 14,250 feet. The three laboratories above 10,000 feet are within the Inyo National Forest, and their operation is subject to the regulations of the U.S. Forest Service, as well as to those of the University of California. General operational policy for the Station is set by the President's Advisory Committee for the White Mountain Research Station (WMRS), which includes faculty representatives from every campus of the University.

In the more than 25 years of its existence, several hundred scientists have used the laboratories to conduct research in the agricultural, biological, and physical sciences, and have come to the Station from universities and colleges, government laboratories, and industrial research laboratories located both in this country and abroad. The facilities also have been used by several hundred undergraduate students enrolled in field courses conducted at the WMRS by a number of academic institutions. Primary emphasis of the Station is high altitude research. The administrative offices of the WMRS are located at UCLA in 3805 Geology Building (phone: (213) 825-2093).

Clarence A. Hall, Jr., Director
Special Programs and Training

Certificate Programs
UCLA offers graduate programs leading to the following certificates: Certificate of Specialization in Architecture/Urban design (School of Architecture and Urban Planning), Certificate of Specialization in Engineering and Applied Science (School of Engineering and Applied Science), Certificate in the Teaching of English as a Second Language (Department of English), Certificate of Specialization in Library and Information Science (Graduate School of Library and Information Science), Certificate of Postgraduate Medical Study, for interns and residents (School of Medicine), postgraduate certificate programs in Dentistry (School of Dentistry), teaching and other advanced credentials for public school service (Graduate School of Education). Further information can be obtained from the Dean of the appropriate school or the departmental Graduate Adviser.  

Defense Language Institute—Presidio of Monterey
University of California graduate students (who are currently enrolled and have completed one quarter of graduate work) and faculty have a unique opportunity to acquire fluency in one of 34 foreign languages taught at the U.S. Defense Language Institute, Presidio of Monterey.  

Each year 30 persons certified by the University of California Language Training Advisory Committee may be admitted.  

Regulations and procedures for applicants, and application forms, may be obtained from the Fellowship and Assistantship Section, Graduate Division. For further information, write to the Secretary, University of California Language Training Advisory Committee, Cottle College, University of California, Santa Cruz, California 95064, or call UC Santa Cruz extension 2054 (message center 2609).  

Departmental Scholar Program
Departments may nominate exceptionally promising undergraduate students (juniors and seniors) as Departmental Scholars to pursue bachelor's and master's degree programs simultaneously. Qualifications include the completion of 24 courses (96 quarter units) at UCLA, or the equivalent at a similar institution, the requirements in preparation for the major, and eligibility for participation in the honors program in the college or school in which the student is resident. To obtain both the bachelor's and master's degrees the Departmental Scholar must be provisionally admitted to the Graduate Division. He/she will fulfill requirements for each program and maintain a minimum average of B. No course may be used to fulfill requirements for both degrees.  

The Department Chairperson submits the student's nomination to the dean of the undergraduate college for recommendation to the Dean of the Graduate Division, on or before the application dates for admission to graduate standing (see Calendar, page viii). Interested students should consult their departments well in advance of these dates for admission to graduate standing.  

Under provisional admission to the Graduate Division, Departmental Scholars are accorded the usual privileges of graduate students with the exception of leaves of absence and participation in the Intercampus Exchange Program.  

Education Abroad Program
Graduate students may, with the approval of the departmental Graduate Adviser and the Dean of the Graduate Division, participate in the Education Abroad Program at the University's study centers overseas. Such students remain under the academic direction of their home campus departmental Graduate Adviser but may seek assistance from the Director of the Study Center when appropriate. Participation in the Education Abroad Program may prove especially valuable to doctoral candidates who have been advanced to candidacy and are engaged in independent study and research directed toward their dissertations. By approval of the Graduate Council, courses (units) to be applied toward an advanced degree shall be accepted only under all of the following conditions: a) students, after returning, must present a transcript (or equivalent) showing work done abroad under the Education Abroad Program; b) the major department indicates its approval of those courses which it recommends for credit toward an advanced degree; c) the recommendations of the department are then submitted to the Dean of the Graduate Division for approval. For further information, graduate students should consult the Education Abroad Office, 2221-B Bunche Hall, 825-4869, where applications may be obtained. A graduate student is eligible to participate after completion of one full academic year of study at a UC campus. Applications should be filed with that office well in advance of the planned period of study.  

The Graduate Cross-Enrollment Program
As an integral part of a Regentally-approved program in Academic Resource Sharing, which links UCLA with USC, the Graduate Cross-Enrollment Program makes possible graduate student exchanges in many departments. The program is limited to specialized course offerings which would not otherwise be available to UCLA students.  

With the approval of the instructor and Department Chairperson on the host campus, the UCLA student signs up for a 501 course with his/her UCLA adviser and completes the College and University Regional Student Exchange Petition for Enrollment and Certification of Grade. The completed form must be filed with the Graduate Dean's Office on the host campus by the third week of the UCLA quarter in which 501 credit is requested. Upon completion of the period of study at the host institution, the student will be evaluated by the instructor on that campus, who will forward the grade (S or U) to the UCLA Graduate Adviser, to be recorded against the 501 course and submitted to the UCLA Registrar. There is a credit limit of 8 units of such courses applicable toward the requirements for the master's degree. These 8 units cannot be used to satisfy the 5-graduate-course requirement.  

The UCLA student must have completed at least a year of graduate study here, must make petition for study at the host campus in the manner detailed above, and must have registered and paid his/her other fees to UCLA before permission to cross-enroll will be granted. Library privileges will be extended at the host institution, but other privileges or services cannot be proffered.  

Limited programs in specialized language courses and in special education with the State University and College System are also available through the College of Letters and Science or the Graduate School of Education.  

Intercampus Exchange Program
The Intercampus Exchange Program makes resources of all campuses of the University of California available to graduate students in good standing who have completed at least one quarter of graduate study in the University. It is reserved for use by those students whose graduate study may be enhanced by work with distinguished faculty or use of facilities and resources accessible only on another campus. Applications must be approved by the graduate Department Chairperson in the student's home department and by the Department Chairperson in the department (or departments) in which he/she expects to work on the host campus, as well as by the Deans of the Graduate Divisions on both campuses. The student will register, pay fees, and earn credit toward academic residence requirements on his/her home campus, but the host campus will
An interested person should first contact the department or research unit with which he/she would like to become associated. After informal acceptance by the department, all Postdoctoral Scholars must enroll through the Fellowship and Assistantship Section of the Graduate Division. Upon written request from the Scholar's faculty supervisor and recommendation by the Department Chairperson or Unit Head, a Certificate of Postdoctoral Study is issued to the Scholar to confirm satisfactory completion of the approved program of research and training.

General information on Postdoctoral Scholar Status and privileges may be obtained from the Fellowship and Assistantship Section of the Graduate Division, 1226 Murphy Hall.

**Visiting Scholars**

Facilities of the University are made available whenever possible to senior scholars and distinguished visitors with doctoral degrees from U.S. institutions or their foreign equivalents, who wish to become associated with UCLA to pursue independent research or advanced study for a limited period of time, normally not to exceed one calendar year. Such persons are "Visiting Scholars." Ordinarily, they are self-supported, or with adequate support funds from other sources outside the University. Thus, they should be clearly distinguishable from Postdoctoral Scholars who "enroll" with the Graduate Division for an approved postdoctoral research or training objective under faculty supervision, and from academic appointees who are primarily employees.

Prospective Visiting Scholars should communicate in advance with the Chairperson of the department, or Head of the academic unit, with which they wish to become associated. On recommendations of the Chairperson of the department, indicating that the necessary faculty sponsorship and facilities are available, formal invitations are issued by the Dean of the Graduate Division.

General information on Visiting Scholar status and privileges may be obtained from the Fellowship and Assistantship Section of the Graduate Division.
Application for admission to graduate status is limited to Fall, Winter, and Spring Quarters of the regular academic year. Some departments limit admission to Fall Quarter only, because of their sequential arrangement of courses and seminars. Such restrictions are listed in the UCLA Information for Graduate Applicants pamphlet. Enrollment in courses in the Summer Sessions does not constitute admission to graduate status (see Enrollment in Summer Sessions, page 19).

Applications and supporting papers for those interested in applying for the 1982-83 academic year should be submitted to Graduate Admissions, Graduate Division, on or before the following dates:
- October 1, 1982 for the Winter Quarter, 1983.
- December 30, 1982 for the Spring Quarter, 1983.

Applications postmarked after the published deadlines will be considered only in accordance with enrollment limitations, and availability of funds remaining for financial support.

The following materials should accompany the application:
1. Application fee of $25.00 (nonrefundable), by check or money order payable to the Regents of the University of California.
2. Official transcripts of record, in duplicate, from each college or university at which the applicant has completed work. (Transcripts should accompany or immediately follow the application and are nonreturnable.) One set of transcripts will become a part of the Graduate Admissions file, and the other set will be sent to the major department to assist in the evaluation of the applicant's past record and for advisory purposes regarding his/her graduate study. The letters are typically used to augment, validate or explain the information provided in the formal application, Statement of Purpose, and/or essay. For some applicants, the information provided in these letters will mean the difference between acceptance and rejection.

Letters of Recommendation

Though letters of recommendation are not a Graduate Division requirement, most graduate professional schools, departments and interdepartmental programs require applicants to submit three letters of recommendation attesting to the ability of the applicant to succeed in graduate study. The letters are typically used to augment, validate or explain the information provided in the formal application, Statement of Purpose, and/or essay. For some applicants, the information provided in these letters will mean the difference between acceptance and rejection.

Foreign Applications

Foreign applicants should submit official transcripts of record, in duplicate, for all college and university work. Official records are defined as original documents issued by the institution which bear the actual—not a photocopy—signature of the Registrar and the seal of the issuing institution. Applicants should not send the original of an academic record which cannot be replaced, but should obtain a properly certified copy instead. College and university transcripts must show subjects studied, examination grades achieved, and award of degrees. Specific instructions are given in the information pamphlet for admission requirements and required credentials. (For detailed information, see UCLA Information for Graduate Applicants.

Foreign Applicants are advised not to come to UCLA until they receive formal notice of admission from the Director of Graduate Admissions. They are notified by airmail as soon as a decision has been reached and, if requested on the application, the I-20 form necessary to secure the student visa is enclosed with the notification of admission. Foreign applicants who have been accepted are encouraged to report to Graduate Admissions as well as to the Office of International Students and Scholars as soon as possible after they arrive at UCLA in order to receive assistance in completing admission and registration procedures.

English as a Second Language Placement Examination (ESLPE)

Since English is the language of instruction at UCLA and success in graduate study depends largely on facility in its use, foreign students whose first language is not English are required to take a proficiency examination before the term in which they are to register. The achievement in this examination determines whether they will be required to include English courses in their program or will be permitted to carry a full or a moderate graduate program. If they should be required to take English courses, they should anticipate spending a longer period of time at the University than they normally would require to complete a degree program. Admission of an applicant who fails to pass this examination will be deferred until the applicant has acquired the necessary proficiency in the use of English.

Foreign students who hold a bachelor’s or higher degree from a university located in the United States or in another country in which English is the spoken tongue and the medium of instruction, or who have completed at least two years of full-time study at such an institution, are not required to take the UCLA English Examination.

As a preliminary screening test, nonetheless, foreign applicants are urged to take the Test of English as a Foreign Language (TOEFL), administered by the Educational Testing Service in some 95 foreign centers. Applications for the TOEFL Examination may be obtained from the Educational Testing Ser-vice, Box 995, Princeton, New Jersey 08540. It is a useful and important way of helping students determine whether they are well enough prepared to undertake graduate study conducted in English before they make extensive plans for graduate study in the U.S.A. The TOEFL, however, may not substitute for the required examination in English, which must be taken at UCLA on arrival. As a matter of policy, neither is any other English test (i.e., Michigan Test) accepted in place of the examination given at UCLA.
Even though the TOEFL examination is not a general University requirement, some departments request it and will not make a recommendation unless the test result is submitted. ([Consult UCLA Information for Graduate Applicants pamphlet.]

**Application Review and Notice of Admission**

Graduate Admissions screens all applicants to determine whether or not they meet University minimum requirements for graduate status. Ordinarily, only the applications of those students who have fulfilled at least the minimum requirements are then referred to the department. There they are subjected to a more specific and intensive review. Although, at this stage, departments may choose to make contact with applicants, Graduate Admissions alone is empowered to make the formal offer of admission, taking the departmental recommendation into full consideration. Thus, the official admission letter is issued by the Director of Graduate Admissions.

To applicants offered admission, Graduate Admissions sends with the formal notification instructions on required registration procedures.

Applicants who are offered admission with work in progress are reminded that their admission is contingent upon receipt of evidence of satisfactory completion of this work, plus statement of award of degrees and all other required materials upon which admission is contingent. The applicant should also be aware of any conditions placed on his/her admission as given in the admission letter or as received from the department.

**Duplication of Degrees**

The University of California, in general, discourages the duplication of advanced degrees. At the same time, it recognizes that a professional degree does not duplicate an academic one, and that the holders of either an academic or professional degree may have the pressing need to earn another degree in an area quite different from that of their first endeavors.

All applicants for a second academic graduate degree at the same level as, or at a lower level than the graduate degree they already hold, will be required to show compelling cause to the department before it reviews and recommends admission by the Dean of the Graduate Division.

If admitted for a second graduate degree, students will be held to all the usual degree requirements and University regulations pertaining to fees, registrations, examinations, advancement to candidacy, residency, etc. Courses already applied to the earlier degree cannot be applied to the second degree.

**Enrollment in Summer Session Courses**

Enrollment of prospective graduate students in Summer Session courses does not constitute admission to graduate status in the University, which is possible only through application for graduate admission during the regular academic year. Students who wish to apply Summer Session courses to their subsequent graduate programs should consult in advance with their departmental graduate advisers concerning this possibility. This is true also for students readmitted to graduate status who wish to resume their study in the Summer Sessions. (See Readmission, below.)

Information and applications may be obtained from the Office of Summer Sessions, 1254 Murphy Hall, University of California, Los Angeles, California 90024. The 1982 Summer Session bulletin will be available from that office by March 1.

**Renewal of Application**

An offer of admission is valid for a specific quarter only. Applicants who filed applications but were not admitted, or who failed to register in the quarter for which they were accepted in graduate status, but who wish to reapply, are required to file a Renewal of Application form. Such forms are obtained from Graduate Admissions, or from the departments, and should be submitted to Graduate Admissions, Graduate Division, 1247 Murphy Hall, UCLA, Los Angeles, California 90024. Filing dates are the same as those for new applications. The Renewal of Application should be accompanied by official transcripts, in duplicate, of any college or university work completed since the former application. Acceptance for admission at any earlier date does not guarantee approval of the Renewal of Application.

Only one renewal of application will be accepted without the $25.00 (nonrefundable) application fee. The application fee is due with each renewal of application filed after the first one.

Applicants seeking admission more than two years after their original application, file new applications rather than Renewal of Application forms, since records are not retained more than two years.

**Readmission**

Current University requirements state that unless granted a formal leave of absence, continuing graduate students who fail to register are considered to have withdrawn from the University and must compete for readmission with all other applicants. Thus, applicants who have registered at any time as a graduate student at UCLA, whether having completed a graduate program or not, must file the "Application for Graduate Admission/Fellowship and Financial Aid" form. Instead, they should request an "Application for Readmission" form from Graduate Admissions, Graduate Division, 1247 Murphy Hall, UCLA, Los Angeles, California 90024.

Applications for readmission should be accompanied by:

(a) Application fee of $25.00 (nonrefundable), by check or money order payable to the Regents of the University of California. Fee verification from another University of California campus is not acceptable.

(b) Official transcripts of record, in duplicate, for all college and university work completed since last registration at UCLA.

(c) The "Graduate Petition for Change of Major," if applicable. This form should be requested with the "Graduate Application for Readmission" if reapplying in a "new" major.

Formal application for readmission, however, is not required of a student returning from an official leave of absence.

**Admission to Concurrent and Articulated Degree Programs**

In addition to those programs offered in an individual discipline, it is possible to complete studies leading toward two degrees through concurrent and articulated degree programs. Both of the programs have the advantage of allowing the student to acquire two degrees in less time than normally required if the courses of instruction are taken in sequence. The aim of these programs is to provide an integrated curriculum of greater breadth between the two disciplines. The programs differ in that concurrent programs are designed to allow a specified amount of credit to apply toward both degrees, while articulated programs do not allow any credit overlap.

Programs leading to concurrent degrees have been approved in the following disciplines:

- Architecture and Urban Planning, M.A.—Law, J.D.
- Education, M.A., Ph.D., M.Ed., or Ed.D.—Law, J.D.
- History, M.A.—Library and Information Science, M.L.S.
- Management, M.B.A.—Latin American Studies, Interdepartmental M.A.
- Management, M.B.A.—Law, J.D.
- Management, M.B.A.—Public Health, M.P.H.
- Management, M.B.A.—Library and Information Science, M.L.S.
The Fellowship and Assistantship Section of the Graduate Division publishes an annual general information brochure which describes the following types of funds available to graduate students: 1) Teaching Assistantships provide teaching experience of undergraduates with faculty supervision; 2) Research Assistantships provide experience working on faculty-supervised research projects; 3) Fellowships and Registration Fee Grants provide stipends and fees for graduate study; and 4) Nonresident Tuition Waivers provide tuition payment for U.S. and foreign students who are not residents of the State of California (Other types of financial assistance are described below.)

Entering graduate students who wish to be considered for University-administered awards should complete the combined "Application for Graduate Admission, Fellowship and Financial Aid" form which may be obtained from the Graduate Admissions Office. Completed applications must be returned to that office by the December 30 published deadline. Some departments have earlier deadlines and therefore students should consult the information pamphlet which accompanies this application for details.

Students who have applied to Graduate Admissions within the last two years, but did not register, or those who have registered previously at UCLA as graduate students, should request either the "Renewal of Application" or the "Graduate Application for Readmission" form.

All of the above forms contain a "Graduate Financial Awards Section" where students may check the types of University-administered awards for which they wish to be considered.

Some restricted fellowships programs require a special application form which is available in both the "Application for General Admission, Fellowship and Financial Aid" and in the UCLA Graduate Student Support Resources brochure.

Continuing graduate students should complete the "Fellowship and Assistantship Application for Continuing Students" form which is available in departments, organized research units, and the Fellowship and Assistantship Section. Continuing students must file a separate application with the Financial Aid Office in order to be considered for funds (grants, loans and work-study jobs) based on need.

The In-Candidacy Fee Offset Grant Program provides financial assistance to eligible Ph.D. students who have been advanced to candidacy and who will complete their degree requirements within the normative time set by their departments. The grant pays a student's Educational Fee (currently $120 per quarter). This program is described in detail under Doctoral Degrees, page 37.

The Fellowship and Assistantship Section maintains a library of reference materials on extramural funding. The library is located in Room 1228 Murphy Hall. Program descriptions and information regarding application procedures are cataloged according to the following: research and/or dissertation year; travel; by discipline; other institutions; information on teaching/study abroad; minority students; women; foreign nationals; arts/writers; study/research abroad; postdoctorals; miscellaneous.

In addition, the following publications are also available for reference: Annual Register of Grant Support; The Grants Register; The Foundation Directory; Directory of Internships; Grants and Aid to Individuals in the Arts; Handbooks on Study Abroad Programs (IIIE); NSF Program Guides; NIH Program Guide; UNESCO Study Abroad.

Supplementation Policy
Supplementation refers to the provision of funds to graduate students in addition to support provided by fellowships, grants and assistantships. During an academic year, the aggregate amount of University-administered financial support which may be received by any student may not exceed the salary level paid to a 50% time Teaching Fellow plus $500 for each dependent.

Supplementation by employment within the University is restricted to policies set forth in the Academic Apprentice Personnel Manual. It is intended that the same restrictions apply to off-campus employment, although this is difficult to monitor. Students who are recipients of federal, state or privately funded fellowships must adhere to the supplementation limits, if any, of the individual funding agency. Students who receive need-based aid from the Financial Aid Office and the Graduate Affirmative Affairs Office may not supplement their awards during the academic year if the combined amount of support results in a total income greater than the students' eligibility as determined by the Financial Aid needs analysis.

Any questions regarding these policies may be directed to the Fellowship and Assistantship Section of the Graduate Division, 1228 Murphy Hall.

Teaching Assistant Advance Loan Check
Each graduate student appointed as a Teaching Assistant, Teaching Associate or Teaching Fellow is eligible to receive, upon application, an interest-free advance loan check through the Fellowship and Assistantship Section of the Graduate Division. These advance loans are discharged by payroll deductions with one-half of the loan deducted from the second paycheck and the remaining amount from the third paycheck of the quarter. Authorization forms may be obtained from the student's department.
The Graduate Affirmative Affairs Office

The Graduate Affirmative Affairs Office was established to increase the graduate enrollment of students from those groups which, as a result of economics or societal inequities, have been traditionally unrepresented in the University.

Financial support is available for students from groups with historically low participation in graduate work such as American Indians, Asian Americans, Blacks, and Chicanos, in graduate study leading to the master’s or doctoral degree in the sciences, humanities, social sciences, and the arts, including the Schools of Architecture and Urban Planning, Library and Information Science, and Education.

Out-of-state applications in the applied and pure sciences are particularly encouraged, as well as those fields in which manpower availability pools for ethnic minorities must be increased.

Applicants must be U.S. citizens or permanent California residents and admitted to graduate status, in order to be eligible for these awards. In certain instances, an additional departmental application for admission is required. Students should contact the major department for full details on admission requirements. Students interested in the professional fields listed below should address their inquiries to the professional school of their choice.

Management
Dentistry
Engineering
Computer Science
Law
Medicine
Nursing
Public Health
Social Welfare

Applications for other areas of study may be obtained by contacting the Graduate Affirmative Affairs Office, 1248 Murphy Hall.

Awards are made on the basis of academic record and promise and are need-limited. A financial aid application must be submitted. A limited number of awards are in the form of fellowships. Fellowships are awarded for a period of one academic year, may be renewed for a second year upon application but are limited to a period of two academic years. Fellowships are departmentally awarded and are merit-based. For applications, deadlines and further information, write to Graduate Affirmative Affairs Office, 1248 Murphy Hall, University of California, Los Angeles, California 90024.

The Graduate Opportunity Fellowship Program

This program was established in 1978 to increase the number of ethnic minorities and women in fields of study where they have been traditionally underrepresented. Fellowships are awarded for a period of one academic year, may be renewed for a second year upon application but are limited to a period of two academic years. Fellowships are departmentally awarded and are merit-based. For applications, deadlines and further information, write to Graduate Affirmative Affairs Office, 1248 Murphy Hall, University of California, Los Angeles, California 90024.

Other Financial Assistance

Graduate students are eligible for other forms of financial assistance including various types of grants, loans, and work-study jobs. These awards are based on need computed according to Federally-accepted criteria. Need is determined by subtracting an applicant’s resources from allowable school-related expenses. These resources include a student’s assets and expected earnings, parental contributions, a spouse’s earnings, University support, and funds provided by non-University sources.

Entering graduate students who wish to be considered for financial aid should check the appropriate box in the financial-aid awards section of the "Application for Graduate Admission/Fellowship and Financial Aid." The Financial Aid Office will forward a complete packet containing application forms, detailed instructions, and general information to each student checking this box. Continuing students may obtain the graduate financial-aid application packet at window A128 Murphy Hall in November of the preceding year.

International students holding F-1 and J-1 student visas or other temporary visas are not eligible to apply for financial aid for their first year of study at UCLA. They are urged, therefore, to make every effort to secure funds from other sources. International students who have completed at least one year of study at UCLA are eligible to apply for University grants and President's Work-Study awards.

A financial aid "package" is usually a combination of grants, loans, and work-study job opportunities.

A grant is an outright gift and does not have to be repaid. There are several federal, state, and University grants.

Loans include the Educational Fee Deferral Loan, the National Direct Student Loan, Health Profession Loans, Nursing Loans, and Regents’ and University Loans. Most of the loans awarded through the Financial Aid Office are interest-free during the time an individual is a registered student. Repayment of principal plus 3% to 7% interest begins 6, 9, or 12 months after a student is no longer registered at the University, depending on the type of loan.

The Financial Aid Office also administers the Federal and California Guaranteed Student Loan Programs enabling students to negotiate loans with private lending institutions. (Applications are available throughout the year at window A217 Murphy Hall.)

Emergency loans of $75 or less are available to all registered students from the Office of Student Loan Services, A227 Murphy Hall. Emergency loans are repayable within one month.

Work-study employment provides on-campus jobs and jobs with non-profit off-campus agencies. Whenever possible, work-study employment is provided in a student's particular academic field of interest.

Further information on financial aid and applications for assistance can be obtained at the Financial Aid Office, A129B Murphy Hall.

General Information and Regulations

Graduate Courses

Courses numbered in the 200, 400, and 500 series are ordinarily open only to students who have completed those courses basic to the subject matter of the course. Graduate courses and seminars which can fulfill the minimum graduate course requirement of any advanced degree are numbered in the 200 series. All graduate courses especially designed for programs leading to graduate degrees other than the M.A., M.S., and Ph.D. are numbered in the 400 series; these may not be used to satisfy the minimum graduate course requirements for M.A. or M.S. degrees. Courses numbered in the 500 series are directed individual study or research at the graduate level (see Individual Study or Research Courses, below). Courses numbered in the 300 series are professional courses or preprofessional experience and are not applicable toward University minimum requirements for graduate degrees.

Individual Study or Research Courses

Graduate individual study or research courses are numbered as follows: 596 (directed individual study or research); 597 (preparation for the master’s comprehensive examination or doc-
toral qualifying examinations); 598 (master's thesis research and preparation); and 599 (doctoral dissertation research and preparation). Certain 500 series courses, with limitations as to their use, have been approved by the Graduate Council for Satisfactory/Unsatisfactory grading for application to the minimum course requirements for master's degrees, or for repetition for credit. The same method of grading (either by letter grade or on an S/U basis) is determined in advance for all of the students enrolled in a particular course. Before enrolling, students should obtain full information from the Graduate Adviser in the department which offers the course.

No more than two courses in the 500 series shall apply toward the Divisional minimum of nine courses required for a master's degree; and only one of these two courses may be counted toward the minimum of five graduate courses required for the degree.

Master's degree programs requiring more than the minimum nine courses may allow proportionately more 500 series courses, as follows: for programs of 10 to 11 courses, two 500 series courses; for programs of 12-15 courses, three 500 series courses; and for programs of 16-18 courses, four 500 series courses.

Scholarship Probation

Graduate students are considered in probationary status and subject to dismissal if their cumulative scholarship average in all work attempted in graduate status falls below a B (3.0), or if their work in any two consecutive quarters falls below a B (3.0) average. The Dean of the Graduate Division, in consultation with the student's major department, determines his/her eligibility to continue graduate study. Students who are allowed to continue in probationary status are required to make expeditious progress toward improvement of their scholarship.

Disqualification and Appeal of Disqualification

The record for any student who is subject to disqualification for reasons other than failure to maintain a grade point average greater than 3.0 will be reviewed by the Graduate Division, in consultation with the student’s Graduate Adviser. Unless there are indications of procedural or other substantive mitigating factors to explain the student’s record, the student will then be disqualified from further registration in graduate status on the campus, and will be given written notice stating the reasons for this action.

A student who is subject to disqualification or who has been disqualified may submit a written appeal for reconsideration for cause to the Dean of the Graduate Division. Such appeals will be considered only if based upon appropriate cause such as: (a) procedural error, (b) judgments based upon non-academic criteria, (c) personal bias, or (d) specific mitigating circumstances contributing to the student’s performance. Alleged errors in academic judgment or evaluation will not be considered as appropriate bases for consideration of a student’s appeal from disqualification. In cases of appropriate cause, the Dean of the Graduate Division will refer the appeal to the Graduate Council’s standing Committee on Instruction and Degree Requirements.

In all cases of student appeals, the student must submit a written statement of the basis for his/her appeal and is entitled to a personal appearance before the Committee on Instruction and Degree Requirements. The Committee may solicit information on the matter from any other person or office. This Committee will make a recommendation to the Dean as to the disposition of the case and the Dean of the Graduate Division will make the final decision. In reporting the final decision of the Dean to the student, the basis for the decision, its effective date, and the nature of the recommendations of the Committee on Instruction and Degree Requirements will be included.
Grading Regulations

General
The instructor in charge of a course is responsible for determining the grade of each student in the course. The standards for evaluating student performance are based on the course description as approved by the appropriate course committee.

The final grade in the course is based upon the instructor's evaluation of the student's achievement in the course. When an examination or other work submitted by a student, the student is suspected of having engaged in plagiarism or otherwise having cheated, the suspected infraction is to be reported to the appropriate administrative officer of the University for consideration of disciplinary proceedings against the student. Until such proceedings, if any, have been completed, the grade DR (deferred report) is assigned for that course. If in such disciplinary proceedings, it is determined that the student did engage in plagiarism or otherwise cheat, the administrative officer, in addition to imposing discipline, reports back to the instructor of the course involved, the nature of the plagiarism or cheating. In light of that report, the instructor may replace the grade DR with a final grade that reflects an evaluation of that which may fairly be designated as the student's own achievement in the course as distinguished from any achievement that resulted from plagiarism or cheating.

If an instructor in charge of a course has been determined by the Committee on Privilege and Tenure to have assigned a grade on any basis other than academic grounds, the Committee on Privilege and Tenure shall communicate that information to the Academic Senate Chairperson. Within a period of two weeks after notification, guided by the Committee on Committees, the AcademicSenate Chairperson shall establish an ad hoc committee to determine whether the grade shall be changed. The ad hoc committee shall consist of at least three members, with at least one member a representative of the department involved. The ad hoc committee will obtain whatever records are available and use these records to make a final decision concerning the grade. If the records are not adequate, then the committee may assign a grade of Pass, or allow the student to repeat the course without penalty. The ad hoc committee will report to the Academic Senate Chairperson, who shall report the change of grade to the Registrar. In order to protect the student, the grade shall be changed, if warranted within four weeks following the formation of the ad hoc committee.

Grading of Graduate Students
The work of all graduate students is reported in terms of the following grades: A (superior achievement), B (satisfactorily demonstrated potentiality for professional achievement in the field of study), C (passed the course but did not do work indicative of potentiality for professional achievement in the field of study), F (fail), I (Incomplete), IP (in progress), DR (deferred report), S (satisfactory), U (unsatisfactory). The passing grades A, B and C may be modified by plus (+) or minus (−) suffixes. Grade points per units are assigned by the Registrar as follows: A−4, B−3, C−2, F−0. "Plus" grades (except A+) carry three-tenths grade point more per unit and "minus" grades carry three-tenths grade point less per unit than unsuffixed grades. The grade A+ carries 4.0 grade points per unit, the same as for an unsuffixed A; but when A+ is reported it represents extraordinary achievement. Courses in which a student receives an S grade may be counted in satisfaction of degree requirements, but courses in which either an S, U, DR, I, or IP has been awarded are disregarded in determining a student's grade point average.

The grades A, B, and S denote satisfactory progress toward a degree. A graduate student is subject to dismissal if his/her cumulative grade point average falls below 3.0.

The "I" Grade
The grade "I" may be assigned when a student's work is of passing quality, but is incomplete. The grade "I" is only assigned when it is established to the instructor's satisfaction that the student's work is incomplete for good cause. When the instructor assigns the grade "I" on the grade sheet, the grade should be accompanied by a notation specifying what work must be done to remove the Incomplete. The student is entitled to have the grade "I" replaced by a passing grade and to receive unit credit and grade points provided he/she satisfactorily completes the work of the course by the end of the next full quarter that he/she is in residence in regular session following the quarter in which the "I" was received. The Dean of the Graduate Division has authority to extend the deadline for completion in the event of unusual circumstances that would clearly impose an unfair hardship on the student if the original deadline were maintained. If the work is not completed, the grade "I" is automatically replaced with F, NP or U as appropriate.

The Graduate Council may establish rules under which the authority to approve limited extensions of time for graduate students is delegated to departmental advisers.

The S and U Grades
With the approval of the Graduate Council, and the consent of the departments involved, individual study or other work undertaken for credit toward a degree by a graduate student may be evaluated by means of the grades S and U. A graduate student in good standing may enroll each term in one course graded on an S/U basis. This course shall be outside the major field and in addition to those individual study and research courses (500 series) graded S/U in the student's major field. A grade of S is awarded only for work which would otherwise receive a grade of B or better.

The IP Grade
(In Progress). For courses authorized to extend over more than one quarter and where evaluation of the student's performance is deferred until the end of the final term, a provisional grade of IP is assigned in the intervening term(s). The provisional grade is replaced by the final grade(s) if the student completes the full sequence. The Graduate Council is authorized to regulate the award of credit in cases where the full sequence is not completed. Authorization for the use of IP grades in graduate courses shall be by the Graduate Council.

Correction of Grades
All grades, except DR, I, and IP are final when filed by an instructor in the end-of-term course report. However, the Registrar is authorized to change a final grade a) upon written request of the instructor, provided that a clerical or procedural error is the reason for the change; or b) upon written request of the Chairperson of the Division in cases where it has been determined by the Committee on Privilege and Tenure that an instructor has assigned a grade on any basis other than academic grounds. No change of grade may be made on the basis of reexamination, or with the exception of the I and IP grades, the completion of additional work. Any grade change request made more than one year after the original filing must be validated for authenticity of the instructor's signature by the Department Chairperson. Any grade change request made by an instructor who has left the University must be countersigned by the Department Chairperson.

Repetition of Courses
Unless repetition of the course for credit has been authorized by the Committee on Undergraduate Courses and Curricula or the Graduate Council, repetition is subject to the following conditions:
A student may repeat only those courses in which he/she received a grade of C−, F, or U. Courses in which a grade of C− or F has been received may not be repeated on a S/U basis.

Repetition of a course more than once requires approval by the Dean of the Graduate Division in all instances.
Degree credit for a course is given only once, but the grade assigned at each enrollment is permanently recorded. All courses attempted and graded on the A, B, C, F, basis and modifications thereto, including repeated courses, are used in computing the grade point average.

The DR Grade

The grade DR (deferred report) is entered on the student's record: a) when to the faculty member's knowledge, the student's work in the course is complete, but the faculty member is not able to assign a grade; or b) when disciplinary proceedings are in progress. The DR is not calculated in any way in the student grade point average. The DR is changed to a grade, or perhaps to an Incomplete, only when the Registrar receives a written request from the instructor which indicates that the student has clarified the situation.

The report of the grade DR must be accompanied by a letter from the instructor to the Dean of the Graduate Division, and to the student stating the basis of the action. For students enrolled in a course approved by the Graduate Council, the Dean of the Graduate Division is the Dean of Record. The Dean establishes a date or a specific circumstance terminating the period of the Deferral of Report and informs the Registrar, the instructor and the student. Unless changed by the instructor as specified in the preceding paragraph, the DR automatically becomes an F grade.

Satisfactory/ Unsatisfactory Grading

Graduate students in good standing may, with the consent of the instructor, enroll for Satisfactory/Unsatisfactory grading in one graduate or upper division course each quarter, outside their major field and in addition to any S/U graded 500 series individual study or research courses in which they may wish to enroll. S/U graded courses in the major may not be counted toward degree requirements, since such enrollment is prohibited by divisional regulations. Except in the case of interdepartmental majors, Satisfactory/Unsatisfactory graded courses outside the major may apply, if the course itself is applicable to degree requirements. With the exception of 500 series courses and any courses outside the major under the statement above, S/U graded courses are not applicable to University or Senate-approved departmental minimum course requirements or to academic residence requirements for graduate degrees (see also Individual Study or Research Courses, pages 21-22).

Program changes involving a change to or from S/U grading may not be made after the regular deadline for dropping courses (see Calendar, page viii).

Removal of ‘‘I’’ (Incomplete) Grade

The grade I (Incomplete) is assigned when a student's work is of passing quality but is incomplete for good cause. If a student wishes to receive an Incomplete grade, the "Request for Granting of Incomplete Grade" form should be obtained from the instructor or departmental office. The student completes the upper portion of the form (name, student number, course, quarter, and reason for request). If the instructor agrees to granting the Incomplete grade, he/she signs the form and stipulates the conditions to be satisfied for removal of the I grade. A grade I (assigned after July 1, 1972) will not be taken into account in calculating the grade point average. The student is entitled to have the grade I replaced by a grade and to receive unit credit and grade points providing he/she satisfactorily completes the work of the course by the end of the next full quarter that he/she is in academic residence in regular session following the quarter in which the I grade was received. If the work is not completed by the end of the next quarter of residence, the I grade will automatically be replaced with the grade F or U (Unsatisfactory) as appropriate. On the other hand, it is not necessary for a student to be registered at the time he/she completes the work to remove an I grade.

The work for a course for which the I grade has lapsed to an F or U may, with the permission of the instructor, be completed in a subsequent quarter and the appropriate earned grade assigned. Until that time, however, the F or U grade will appear on the student's record and be calculated in the grade point average. A student filing to remove an I grade which has lapsed to an F or U follows the procedures for removing an I grade described below. When the grade is assigned by the instructor, the Registrar will remove the lapsed F or U and replace it with the earned grade.

While completing the conditions for removal of the I grade, the student obtains "Petition for Removal of Incomplete Grade" forms at the departmental office, completes a petition for each course (name, address, instructor, course, quarter), submits it to the instructor for signature, pays the $5 fee (one fee for all petitions submitted together) at Main Cashier, 1125 Murphy Hall, and files the petition with the Registrar at Information Window "A", Murphy Hall.

The "Petition for Removal of Incomplete Grade" should be filed not later than the sixth week of instruction in the next quarter of registration after the Incomplete grade was assigned. Coursework must be completed by the end of the quarter to avoid lapse to grade F (see UCLA Grading Regulations, page 23). When the required work has been completed, the instructor fills out the "Petition for Removal of Incomplete Grade," on which the final grade is entered, and attaches the original of the "Request for Granting of Incomplete Grade" and forwards both to the Registrar. The grade I cannot be removed until both forms are received by the Registrar.

Summer Sessions

Enrollment of prospective graduate students in Summer Session courses does not constitute admission to graduate status in the University, which is possible only through application for graduate admission during the regular academic year. This is true also for students admitted to graduate status who wish to resume their study in Summer Sessions. Graduate students should register continuously in the Fall, Winter, and Spring Quarters. Enrollment in either Summer Session does not constitute a substitution for the requirements of continuous registration.

Students who wish to enroll in Summer Session courses and apply them to requirements for graduate degrees or University-recommended credentials should consult in advance with their departmental graduate advisers concerning this possibility.

Academic Residence

Enrollment in two six-week Summer Sessions (must be consecutive for doctoral candidates) counts as one quarter of residence provided the candidate is enrolled in each session for the equivalent of at least 2 units of upper division and/or graduate work as given in a regular quarter. Enrollment in an eight-week Summer Session counts as one quarter of residence provided the candidate is enrolled for the equivalent of at least 4 units of upper division and/or graduate work as given in a regular quarter. Academic residence that is earned through enrollment in Summer Sessions is limited to one-third of the degree requirements.

Course Credit

Regular session courses offered in Summ Session at UCLA by regular faculty qualify automatically for credit toward a higher degree. Regular session courses offered in Summ Session at UCLA by visiting faculty may app provided the chairperson of the department recommends, in advance, to the Gradu Dean.

Summer Session courses offered elsewhere may not apply, unless approved in advance the Committee on Instruction and Degree requirements of the Graduate Council. Recom mendations for such credit should be made the department chairperson of the study involved.

Applications and information on course offerings may be obtained from the Office Summer Sessions, Room 1254 Murphy.
Credit by Examination
Graduate students in good standing may petition to the appropriate instructors, the department, and the Dean of the Graduate Division for permission to take courses for credit by examination, up to a maximum of three courses. To be eligible for this privilege a student must be registered in graduate status at the time of the examination. Credit earned by examination may be applied toward the minimum course requirements for master's degrees, but it cannot apply to academic residence requirements for master's and doctoral degrees.

Forms for this purpose are available in the Student and Academic Affairs Section of the Graduate Division. There is a $5.00 fee for each credit by examination petition.

Registration and Enrollment Procedures

Registration
Registration is the payment of fees, enrollment in classes and the filing of various informational forms. Students' names are not entered on official rolls of the University unless the registration process is complete as published by the Registrar in the Registration Circular and the Schedule of Classes. Students who fail to complete and file all forms by the established deadlines may be delayed or even prevented from receiving credit for work undertaken.

Registration is divided into two equal, but separate processes. Registration materials (the "registration packet") are issued by the Registrar and include cards for payment of the term fees and a Study List Card for requesting enrollment in classes. When fee payment and enrollment are complete, students are considered duly registered and enrolled for the quarter.

Registration by Mail. In advance of the quarter, the registration process may be completed through the mail. All eligible students are encouraged to register by mail. "Registration packets" for currently registered students are available approximately the fifth week of the term in progress. Dates and place of packet issuance are announced in the campus newspaper, the Daily Bruin and on official campus bulletin boards. New and reentering students eligible to register by mail are not issued specific times for registration in person, but are advised to observe the registration time recommended in the Registrar’s publications. By observing the suggested time schedule for reporting to registrar, students can complete the registration procedure with a minimal delay. New and reentering students processed for registration in person will be mailed an Appointment to Register in Person by the admitting (or readmitting) officer upon receipt of their Statement of Intent to Register and after classification for tuition purposes is completed from the Statement of Legal Residence. The Appointment to Register in Person is the student's notice of the date, time, and location that the Registrar will be prepared to issue individualized materials for the registration process.

While a combination of both processes (by mail/in person) may be used to pay fees and enroll in classes, the University requires that the full amount of fees be paid by the Friday before instruction begins. If fees are not paid by that date, all course enrollment is dropped and the student must register late.

Any student allowed to register on or after the first day of instruction is subject to a late fee. Late registration with payment of the late fee is accepted during the first 10 days of instruction. Any student who requests registration after the 10th day of classes will be subject to the late registration fee and the late payment fee. In addition, the student must submit to the Graduate Division, a memo from his/her major department supporting the late registration and a Study List approved by the authorized departmental adviser.

Graduate students studying out-of-state may make advance arrangements with the Registration Supervisor, 1134 Murphy Hall, regarding the release of registration materials for the duration of their absence.

Continuing students out of the Los Angeles area during the registration period may request the packet be mailed by writing to the Registration Supervisor, 1134 Murphy Hall, 405 Hilgard Avenue, Los Angeles, CA 90024. In the request, students must give their full name as it appears on University records, the student ID number, major, address for receipt of the packet, and include $1.00 for postage and handling.

Hold on Registration
Students with outstanding obligations to the University, primarily financial (overdue bills or loan repayments), academic, or administrative will not be allowed to register until such obligations are satisfied.

Enrollment
A student's name is entered on official rolls of the University only after the registration process is complete as published in the Schedule of Classes. This quarterly publication is available in June for the Fall Quarter, in November for the Winter Quarter, and in February for the Spring Quarter at the Students' Store, Ackerman Union. It is available by mail and students may write to: Attn: Mail out, ASUCLA Students' Store, 306 Westwood Plaza, Los Angeles, CA 90024; include $1.50 check or money order, payable to ASUCLA.

Enrollment requests are processed by the Registrar's Office from the completed Study List Card contained in the "registration packet." The graduate student files the Study List Card, after obtaining his/her adviser's signature, with his/her major department. Students are assured enrollment in courses offered in their major department as shown on the Study List Card. If a major has recently been changed and is not reflected on the Study List Card, the student must include a copy of the Graduate Division approval. For assured enrollment in restricted or possibly closed (enrollment capacity reached) courses outside the major department, an approved "Permission to Enroll Form" must be submitted with the Study List Card.

The approved Study List Card may be filed with the major department during the Registration by mail period or by the third day of instruction. Tentative Study Lists showing the results of the enrollment are mailed at the end of the pre-enrollment period (10 days before the term begins) and/or during the first week of classes. Enrollment changes may be made without fee on the Change in Study List Card through the end of the second week of classes. The adviser's signature is required on the Study List Card and on the Change in Study List Card as it signifies departmental acceptance of the proposed plan of study and assures enrollment in all departmental courses.

A student's Study List of enrolled courses becomes official on the 10th day of instruction. A computer-printed Official Study List is mailed to each registered student by the Registration/Enrollment Office. A student is responsible for all courses and the grading basis as listed on the Official Study List. To make changes in the Official Study List or to correct any errors or omissions, students must obtain a Change in
Continuous Registration

Unless granted a formal leave of absence, or unless eligible for the Filing Fee, graduate students are to register in all three quarters of each academic year, including the quarter in which their degree or certificate is to be awarded. A student must be registered in order to take any University examination with the exception of those, stated in the section below, that are permitted by payment of the Filing Fee.

Registration in the Final Quarter for the Award of the Degree

A student completing courses, using faculty time, library facilities, laboratories, or other University resources, is required to register in the final quarter in which he/she expects to receive his/her degree.

When the award of a degree is expected at the end of a given quarter, but special circumstances over which the student has no control prevent the completion of all requirements before the first day of instruction in the next quarter, a student may petition for a waiver of registration for that quarter. Such petitions must be accompanied by a letter from the Graduate Adviser or Department Chairperson elaborating the exceptional circumstances of the case. Consideration is necessarily limited to situations in which the faculty delays in reading the thesis or dissertation or in conducting the final examination, or in which minor corrections or additions constitute the only steps necessary before approval of the thesis or dissertation.

If a student was registered for the preceding quarter and has completed all requirements for a degree in the interval between quarters (before the first day of instruction), he/she is not required to register to receive his/her degree at the end of the following quarter. During the interim between completion of requirements and awarding of the degree, the Registrar's Office will issue, upon request, a Certificate of Completion.

The Filing Fee

If a student has completed, as a registered student, all requirements for a degree except the filing of the thesis or dissertation and/or the final examination (master's comprehensive or doctoral final oral examination), he/she may be eligible to pay a $78.00 Filing Fee during the quarter in which his/her degree is to be awarded instead of registering. Four conditions must be satisfied to be eligible for this fee: (1) All formal requirements for the degree, except for filing the thesis/dissertation and/or taking the master's comprehensive/doctoral final oral examination, must be completed before the first day of classes; (2) Since last being registered and up to the first day of classes, the combined use by the student of University facilities and faculty time must not exceed 12 hours; (3) During the quarter in question, the thesis/dissertation committee suggested only stylistic and/or typographical changes in the thesis/dissertation OR, in the case of master's comprehensive examinations, the faculty only administered the comprehensive examination; and (4) The student must not be a participant in the doctoral In-Candidacy Fee Offset Grant Program.

To establish eligibility to pay the Filing Fee, the student submits a Filing Fee Application approved by the departmental Graduate Adviser and the chairperson of his/her thesis committee or doctoral committee certifying that all the above requirements have been met. Forms for this purpose are available in the Student and Academic Affairs Section of the Graduate Division and should be returned to that office after certification and payment of the fee.

A student who pays the Filing Fee is not eligible for the privileges normally accorded regularly registered students, such as the use of University facilities, other than the attention of the faculty necessary for the final reading of the dissertation or thesis and/or the taking of a doctoral final oral examination or master's comprehensive examination. Students may not use this fee for the purpose of taking coursework of any kind. Students who are fellowship or assistantship holders, aliens with particular visas, or others whose status depends on maintenance of a particular course load are not eligible to use the Filing Fee.

If, after paying the Filing Fee in any one quarter, a candidate should find it necessary to use the educational facilities of the University in any way other than requiring the attention of the faculty sufficient for a final reading of the dissertation or thesis or the taking of a doctoral final oral examination or master's comprehensive examination, he/she must resume registration as a student. If this should occur during a quarter in which he/she has already paid the Filing Fee, the amount of that payment will be refunded. A student who pays the Filing Fee and fails to file his/her dissertation or thesis or who is required to repeat the doctoral final oral examination or master's comprehensive examination must either register as a student or pay an additional Filing Fee in the quarter in which the final requirement for the degree is completed. The Filing Fee will not be refunded because the dissertation or thesis was not filed or the examination not taken or passed.
**Full-Time Graduate Program/Normal Progress**

Full-time enrollment for graduate students (except Teaching Assistants and Research Assistants) consists of at least two full graduate and/or upper division courses per quarter, or the equivalent of 8 units. Whenever possible, students are encouraged to expedite progress toward degrees by taking an optimal program of three courses per academic quarter.

In order to remain eligible for educational assistance benefits from the Veterans Administration or other direct federal and state subsidies, students are required to maintain normal progress toward their degree objective. Students should consult with their Graduate Advisor to determine the department’s appropriate standards of progress. Additionally, students may consult the Office of Special Services, located in Murphy Hall A-253, for information concerning regulations of the Veterans Administration and other governmental agencies that may apply to their graduate studies.

Students enrolled for less than a full program may obtain the appropriate forms from the Student and Academic Affairs Section of the Graduate Division, 1225 Murphy Hall.

**Programs for Teaching and Research Assistants and University Administered Fellowship Holders**

Teaching and Research Assistants are required to take at least one course per quarter, or the equivalent of 4 units, throughout their appointments. This minimum establishes their full-time enrollment status. During the first quarter of their appointment they may not take more than two courses, or the equivalent of 8 units. If a Teaching or Research Assistant finds it necessary to request a leave of absence or to withdraw, his/her appointment is terminated.

Departmental recommendations for exceptions to these standards must be approved by petition to the Student and Academic Affairs Section of the Graduate Division, 1225 Murphy Hall.

Graduate students holding fellowships administered by the University are required to take at least two courses per quarter, or the equivalent of 8 units, both before and after advancement to candidacy. These courses may be in the 500 series (individual study or research).

Departmental recommendations for exceptions to this policy must be approved by petition to the Fellowship and Assistantship Section of the Graduate Division, 1228 Murphy Hall.

**Health Evaluation**

All new students and those students reentering after an absence of more than one quarter, who are enrolling in the graduate Schools of Dentistry, Education, Medicine, Nursing, or Social Welfare, must complete and return to the Student Health Service the Health Evaluation form provided to them by their respective departments.

All new and reentering foreign graduate students must obtain clearance in person at the Student Health Service by completing and returning a Health Evaluation form, by verifying adequate health insurance coverage, and by establishing absence of active tuberculosis. For information, call (213) 825-4073.

**Change of Address**

The Registrar should be notified as soon as possible of any change in address that occurs after the return of the student data card from the registration packet. Forms for this purpose are available at the Registration/Enrollment Office, 1134 Murphy Hall. Veterans receiving benefits must also notify the Office of Special Services.

**Change of Name**

In case of change of name, forms available at the Registrar’s Office, Information Window “A,” should be filed before the beginning of the next quarter. Since changes require approximately three months to be processed, students should continue to use their former name until notified that the records reflect the change.

**Registration and Other Fees**

All graduate students pay the following fees each quarter at the time of registration, irrespective of the number of courses for which they expect to enroll:

1. A Registration Fee of $156 per quarter, which covers expenses related to use of the library and athletic and gymnasium facilities, as well as such consultations, medical advice, hospital care, or dispensary treatment as can be furnished by the Student Health Service.
2. An Educational Fee of $120 per quarter.
3. A Student Union fee of $4 per quarter.
4. A Graduate Students Association membership fee of $2 per quarter.

No part of these fees can be remitted to students who may not desire to use any or all of these privileges, nor is there a reduction for less than full-time enrollment. Refunds on a graduated basis are allowed when students formally withdraw or are approved for leave of absence from the University within the first five weeks of the term. Forms are available in the Student and Academic Affairs Section, Graduate Division, 1225 Murphy Hall. Failure to attend classes, neglect of courses, or stopping payment on checks tendered for registration do not constitute notice of withdrawal. A claim for remission of fees will not be considered unless it is presented during the fiscal year to which the claim is applicable. Information on refunds is published in the quarterly Schedule of Classes.

For graduate students the nonresident tuition is $960 per quarter regardless of the number of courses undertaken. A limited number of waivers of the nonresident tuition ($2,880/academic year) are available each year. They are awarded to graduate students with distinguished academic records by departmental recommendation, until departmental waiver quotas are filled. Applicants must be enrolled in a full-time program of study and may not be recipients of awards from federal, state, or private foundations that provide tuition coverage. The nonresident tuition may not be waived for students financially sponsored by foreign governments. Note: Continuing students who the Office of the Registrar’s Residence Deputy determines to be eligible for reclassification and who choose not to be so reclassified are not eligible to apply for nonresident tuition waivers.

**Registration in Absentia**

Continuing graduate students who are doing study or research outside the State of California, throughout the quarter, are eligible to register in absentia. Such students will be required to pay only one-half of the $156 Registration Fee, plus all other fees in full. Eligibility for the reduced fee may be requested by petition to the student’s major department and the Fellowship and Assistantship Section of the Graduate Division, 1228 Murphy Hall. Forms for this purpose may be obtained at either place.

**Residence for Tuition**

All entering graduate students and students returning to the University after a period of absence are required to submit a Statement of Legal Residence upon acceptance of admission or readmission. The form will be provided by the admitting office and must be returned with the Statement of Intention to Register. Registration materials cannot be prepared until the residence determination is completed.

**Nonresident Tuition Fee**

Students who are not classified as residents of the State of California for tuition purposes by the Residence Deputy are charged, in addition to all other fees, a quarterly tuition fee of $960 which is payable with other registration fees. (See Calendar, page viii for deadline.)
Residence for Tuition Purposes at the University of California

Tuition Fee for Nonresident Students

Students who have not been residents of California for more than one year immediately prior to the residence determination date for each term in which they propose to attend the University are charged, along with other fees, a nonresident tuition fee. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Law Governing Residence

The rules regarding the establishment of legal residence for tuition purposes at the University of California are governed by the California Education Code and by the Standing Orders for the Regents of the University of California. Under these rules, residence for tuition purposes can be established by adult citizens or by certain classes of aliens. There are also particular rules applicable to the residence classification of minors (under 18) in that such residence is generally regarded as being derived from the parent or parents with whom the minor last resided.

Who is a Resident?

In order to be classified a resident for tuition purposes, an individual must have established his or her residence in California for more than one year immediately preceding the residence determination date for the term during which he or she proposes to attend the University and relinquished any prior residence. An individual must couple his or her physical presence within this state for one year with objective evidence that such presence is consistent with his or her intent in making California his or her permanent home and, if these steps are delayed, the one-year durational period will be extended until both presence and intent have been demonstrated for one full year. Indeed, physical presence within the state solely for educational purposes does not constitute the establishment of California residence under state law, regardless of the length of his or her stay. A woman's residence shall not be derivative from that of her husband or vice versa.

Establishing the Requisite Intent to Become a California Resident

Relevant indicia which can be relied upon to demonstrate one's intent to make California his or her permanent residence include the following: registering to vote and voting in California elections; designating California as his or her permanent address on all school and employment records, including military records if one is in the military service; obtaining a California driver's license or if a nondriver, a California Identification Card; obtaining California vehicle registration; paying California income taxes as a resident, including income earned outside California from the date residence established; establishing an abode where one's permanent belongings are kept within California; licensing for professional practice in California; and the absence of these indicia in other states during any period for which residence in California is asserted. Documentary evidence may be required. All relevant indicia will be considered in the classification determination.

Adult Aliens

A student who is an adult alien is entitled to resident classification if the student has been lawfully admitted to the United States for permanent residence in accordance with all applicable laws of the U.S. and has thereafter established and maintained residence in California for more than one year immediately prior to the residence determination date.

Nonresident aliens present in the United States under the terms of visa classifications A, E, G, I, or K who can demonstrate California residence for more than one year prior to the term while holding such visa may be entitled to resident classification. Inquiries should be directed to the Residence Deputy.

General Rules Applying to Minors

The residence of the parent with whom an unmarried minor (under age 18) child maintains his/her place of abode is the residence of the unmarried minor child. The residence of an unmarried minor who has a parent living cannot be changed by his/her own act, by the appointment of a legal guardian, or by the relinquishment of a parent's right of control. When the minor lives with neither parent, residence is that of the parent with whom the student maintained the last place of abode. The minor may establish residence when both parents are deceased and a legal guardian has not been appointed.

Where the residence of the minor is derived, the California residence of the parent from whom it is derived must satisfy the one year durational requirement.

Specific Rules Applying to Minors

1. Minor Aliens. A student who is a minor alien shall be entitled to resident classification if the student and the parent have been lawfully admitted to the United States for permanent residence in accordance with all applicable laws of the U.S., provided that the parent has had residence in California for more than one year after admission to permanent residence prior to the residence determination date for the term applicable.

2. Divorced/Separated Parent Situations. The student must move to California to live with the California resident parent while the student is still a minor (before his or her 18th birthday) in order to receive derivative California resident status. Otherwise, he or she will be treated like any other adult coming to California to establish his or her legal residence.

3. Parent of Minor Moves from California. A student who remains in the state after his or her parent, who was theretofore domiciled in California for at least one year immediately prior to leaving and has, during the student's minority and within one year immediately prior to the residence determination date established residence elsewhere, shall be entitled to resident classification until the student has attained the age of majority and has resided in the state the minimum time necessary to become a resident so long as, once enrolled, he or she maintains continuous attendance at an institution.

4. Self-Support. Nonresident students who are minors or 18 years of age and who have demonstrated the intent to make California their permanent home and can evidence that they have been self-supporting and actually present within California for the entire year immediately prior to the residence determination date may be eligible for resident status.

5. Two Year Care and Control. A student shall be entitled to resident classification if immediately prior to the residence determination date, he or she has lived with and been under the continuous direct care and control of any adult or adults other than a parent for not less than two years, provided that the adult or adults having such control have been California residents during the year immediately prior to the residence determination date. This exception continues until the student has attained the age of majority and has resided in the state the minimum time necessary to become a resident student, so long as continuous attendance is maintained at an institution.

Exemptions from Nonresident Tuition

6. Member of the Military. A student who is a member of the United States military stationed in California on activity duty, except a member of the military assigned for educational purposes to a state-supported institution of higher education, may be exempted from the nonresident tuition fees until he or she has re-
sidered in the state the minimum time necessary to become a resident. He/she must provide the Residence Deputy with a statement from the commanding officer or personnel officer stating the assignment to active duty in California is not for educational purposes and must include the dates of assignment to the state.

7. Spouse or Other Dependents of Military Personnel. Exemption from payment of the nonresident tuition fee is available to a spouse or to a natural or adopted child or stepchild who is a dependent of a member of the United States military stationed in California on active duty. Such exemption shall be maintained until the student has resided in California the minimum time necessary to become a resident. The student must petition for this exemption each term he or she is eligible. If a student is enrolled in an institution and (1) the member of the military is transferred on military orders to a place outside this state where he or she continues to serve in the armed forces or (2) the member of the military retires from active duty immediately after having served in California on active duty, the student shall retain this exemption under conditions set forth above.

8. Child or Spouse of Faculty Member. The unmarried, dependent child under age 21 or the spouse of a member of the University faculty who is a member of the Academic Senate may be eligible for a waiver. Confirmation of the faculty member's membership on the Academic Senate shall be secured each term before this waiver is granted.

9. Child of University Employee. The unmarried, dependent child under age 21 of a full-time University employee whose assignment is outside California (e.g., Los Alamos Scientific Laboratory) and who has been employed by the University for more than one year may be entitled to a waiver of the nonresident fee. The parent's employment status with the University shall be ascertained each term that the student requests the waiver.

10. Children of Deceased Public Law Enforcement or Fire Suppression Employees. Children of deceased public law enforcement or fire suppression employees, who were California residents and who were killed in the course of fire suppression duties or law enforcement duties, may be entitled to an exemption of the nonresident fees.

Maintaining Residence During a Temporary Absence
A student's temporary absence from the state for business or educational purposes will not necessarily constitute loss of California residence unless the student has acted inconsistently with the claim of continued California residence during his or her absence from the state. The burden is on the student to show retention of California residence during an absence from the state. Steps a student (or parent of a minor student) should take to retain California resident status for tuition purposes include:

1. Continue to use a California permanent address in all records—educational, employment, etc.

2. Satisfy California resident income tax obligation. It should be noted that individuals claiming permanent California residence are liable for payment of income taxes on their total income from the date they establish California residence. This includes income earned in another state or country.

3. Retain California voter's registration, voting by absentee ballot.

4. Maintain California driver's license and vehicle registration. If it is necessary to change driver's license and/or vehicle registration while temporarily residing in another state, these must be changed back to California within the time prescribed by law. i.e., within 10 days for the driver's license and within one year or when registration expires (whichever comes first) for vehicle registration.

Reclassification Petitions
Student must petition in person at the Registrar's Office for a change of classification from nonresident to resident status. All changes of status must be initiated prior to the late registration period for the term of attendance for which the student seeks reclassification.

Time Limitation on Providing Documentation
It additional documentation is required for either an initial residence classification or reclassification but is not readily accessible, the student will be allowed a period of time no later than the end of the applicable term to provide such documentation.

Incorrect Classification
All students classified incorrectly as residents are subject to reclassification and to payment of all nonresident fees not paid. In incorrect classification results from false or concealed facts by the student, the student is also subject to University discipline. Resident students who become nonresidents must immediately notify the Residence Deputy.

Inquiries and Appeals
For inquiries regarding residence requirements, determination, and/or recognized exceptions, please consult the Campus Residence Deputy, Office of the Registrar, 1134 Murphy Hall, 405 Hilgard Avenue, Los Angeles, CA 90024; telephone (213) 825-3447 or the Legal Analyst—Residence Matters, 590 University Hall, 2200 University Avenue, Berkeley, CA 94720. No other University Personnel are authorized to supply information relative to residence requirements for tuition purposes. The student is cautioned that this summation is not a complete explanation of the law regarding residence. A copy of regulations adopted by the Regents of the University of California is available for inspection in the Registrar's Office. Please note that changes may be made in the residence requirements between the publication date of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the Residence Deputy, may make a written appeal to the Legal Analyst within 120 days of the notification of the final decision by the Residence Deputy.

Privacy Notice
All of the information requested on the Statement of Legal Residence is required (by the authority of Standing Order 110.2 (a)-(d) of the Regents of the University of California) for determining whether or not you are a legal resident for tuition purposes. Your registration cannot be processed without this information. The Office of the Registrar on campus maintains the requested information. You have the right to inspect University records containing the residence information requested on this form.

Cancellations/Withdrawals

Cancellation of Registration
Prior to the first day of instruction, a student may cancel his/her registration upon written notice and return of the student photo I. D. card and current Registration card to the Registration/Enrollment Office, 1134 Murphy Hall. A service charge of $10 is deducted from the amount of fees paid.

Withdrawal
A student withdrawing from the University within the course of a quarter must file an acceptable "Notice of Withdrawal" and return the student photo I.D. card and current Registration card. Failure to return the photo I.D. card and current Registration card will result in a $14.25 deduction from any refund. The withdrawal form containing complete instructions is issued at the Student and Academic Affairs Section of the Graduate Division, 1225 Murphy Hall or Registrar's Information Window "A", Murphy Hall. Failure to attend classes, neglect of courses, or stopping payment on checks tendered for registration do not constitute notice of withdrawal.

With approval of the Dean of the Graduate Division, a student who is eligible for further registration in the University and who is not under disciplinary disqualification is entitled to a statement of honorable withdrawal. However, the Dean may attach comments to this statement.
A registered student who withdraws from the University before the end of the quarter without authorization duly certified by the Registrar shall receive a grade of "F" or, where appropriate, "Unsatisfactory" in each course in which he/she is enrolled.

A percentage of the registration fees paid is refunded according to the calendar date on which the official notice of withdrawal is submitted to the Registrar. See current Schedule of Classes for refund schedule.

A student who completes a quarter and fails to register or take a leave of absence for the following quarter is presumed to have withdrawn from the University. If such a student wishes to register for a subsequent quarter, he/she will be required to be readmitted to the Graduate Division. (See page 19 for Readmission procedures.)

**Refunds**

**Refund Procedures**

The Schedule of Refunds listed below refers to Calendar days, beginning with the first day of instruction (Day 1). Percentages listed (Days 1-35) should be applied respectively to each Tuition, Educational Fee, University Registration Fee, and other student fees. The effective date for determining a refund is the date the student files his/her official notice of withdrawal with the University, and it is presumed that no University services will be provided to the student after that date. Students are required to return their valid Registration card and photo I.D. card or $14.25 will be deducted from any refund.

No claim for refund will be considered unless presented within the fiscal year to which the claim is applicable.

**All Continuing, Readmitted and New Graduate Students (Except Medicine and Dentistry Students)**

There is a service charge of $10 for cancellation of registration before the first day of instruction. Beginning with the first day of instruction, the Schedule of Refunds (see below) is applied to the total of fees assessed.

**Medicine and Dentistry Students**

Prior to the first day of instruction, the fees that have been paid are refunded in full, except for the Deposit. Day 1 and after the Deposit is withheld from the fees assessed and the Schedule of Refunds (see below) is applied to the balance of the fees assessed.

In the case of continuing students, the Schedule of Refunds is applied to the total of the fees assessed.

**Penalty Fees**

**Late Registration**

Students who are not registered (fees paid) before the first day of instruction may register with an additional $25 late fee during the first 10 days of classes. Each registrant reports to the Registrar's Office, Window Q, 1134 Murphy Hall, for clearance to register. Late registration is processed from 10:00 a.m. to 4:00 p.m. Monday through Friday.

**Schedule of Refunds***

This schedule applies to the procedures described above.

**Lapse of Status**

Failure on the part of any student to meet certain obligations may result in lapse of his/her status until such time as the obligation has been discharged and his/her status restored. A student's status may be lapsed for failure to: settle financial obligations when due, or make satisfactory arrangements with the Cashier if payment cannot be made; or respond to official University notices.

A student whose status is lapsed is not entitled to any University services except assistance toward reinstatement.

If such action becomes necessary, a petition for reinstatement is submitted to the agency recommending lapse of status; if approved, the petition is then submitted to the Registrar's Office with a $10.00 fee for reinstatement. Reinstatement is not official until the student's petition has been approved by the lapsing agency and filed with the Registrar's Office.

*If no credit for courses is received, a full refund of the Registration Fee of the regular session will be granted to all students entering the armed forces prior to the 6th week of the quarter. No refund thereafter.
Late Payment of Fees
All requests which are an exception to a published deadline or retroactive to a previous quarter will be subject to a PENALTY fee of $10.00 in addition to the normal processing fee.

</table>

*All fees are subject to change without notice.
**Note: These fees are payable as follows: for copyright of doctoral dissertations, excess words in abstract, abstract reprints and/or positive films (when applicable) to University Microfilms Library Service, Xerox Corporation, Ann Arbor, Michigan; for academic apparel rental to ASUCLA.
***Supplies or equipment not returned before the close of the fiscal year must be paid in full; return after that date is not permitted.

Third Party Fee Payment
The University assumes no contractual or other obligation to any third party who pays any University fees on behalf of a student unless the University has expressly agreed thereto in writing. In this regard, no request for a refund of fees by such a third party will be honored, and if the student withdraws from the University with a refund due, such refund will be paid to the student.

Additional Fees Where Applicable

Candidacy Fee
There is a $25 Advancement to Candidacy Fee for all doctoral degrees. No student can be formally advanced to candidacy without payment of this fee. There is no graduation fee at UCLA.

The Filing Fee
Candidates who have fulfilled all requirements for the degree except for the filing of the dissertation or thesis and/or taking of a doctoral final oral examination or master's comprehensive examination may establish eligibility to pay the $78.00 Filing Fee in lieu of the Registration and Educational Fees (and the Nonresident Tuition Fee, where applicable). This fee and the conditions under which it may be used are described more fully on page 28.

Optional Health Service Fee
During an unregistered academic quarter, graduate students who present official written confirmation of current sponsorship and continuing degree candidacy for that quarter from a faculty advisor or department chairperson, may obtain the benefits of the Student Health Service on either a Fee-for-Service basis, or by pre-payment of the Optional Health Service Fee. During the academic year, this fee must be paid within 30 days of the first day of the quarter. Any continuing student, not registered during the summer sessions, but wishing to use the Student Health Service, may elect to pay the Optional Health Service Fee within 30 days of the first day of the First Summer Session or, if purchasing the Optional Health Plan for the Second Summer Session only, within 14 days of the first day of the Second Summer Session.

In all cases when the SHS Optional Health Plan is purchased, the student's eligibility for services at Student Health begins either on the date of purchase or on the first day of the appropriate quarter/session, whichever is later.

Rental Fee for Caps, Gowns, and Hoods
Academic regalia for Commencement exercises is reserved in the UCLA Academic Ap-
Diplomas

Diplomas are not distributed at Commencement. During the period between final checking of degrees and the distribution of diplomas, a Certificate of Completion is sent to every student entitled to receive a diploma. Recipients are notified when their diplomas are available at the Registrar’s Office, Information Window “A,” Murphy Hall. There is no diploma fee. Upon request, diplomas are sent to the student by certified mail, with a mailing charge of $3.00 ($6.00 abroad).

Petitions

There are three kinds of petitions used by graduate students: (1) Request for Granting of Incomplete Grade (no fee); (2) Petition for Removal of Grade I (fee, $5 per petition); and (3) Petition for Change in Study List, also known as a “drop-add” petition (fee, $3 per petition). These forms may be obtained from the student’s department.

Transcripts of Record

Transcripts will be issued upon application to the Registrar at a cost of $2 each; $1.00 for each additional copy ordered at the same time. Transcripts showing final grades normally cannot be issued earlier than three to six weeks after the end of the quarter. Those showing a degree earned during the quarter cannot be issued earlier than six to eight weeks after the end of the quarter.

Grades

An unofficial copy of a student’s record is available (without charge) quarterly (approximately four weeks after the end of the quarter) at the Registrar’s Information Window “A,” Murphy Hall. This copy of the student grade report may be mailed if a student deposits a stamped, self-addressed envelope in the labeled box near Window “A.”

Students who must have earlier confirmation of grades may leave a postcard with each instructor at the time of the final examination. Students should pick up their grades each quarter (even if postcards are sent) to check for errors or omissions.

Change of Major

A continuing graduate student may petition for a change of major after discussing his/her plans with his/her “new” department. Forms for this purpose are available in the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall, and should be returned to that office.

Deadlines for this petition generally are the same as those for the graduate admissions procedure but students should also consult with and be guided by the departments before filing an application.

The student must be coded in the major in which he/she is to receive his/her degree at the time the degree is awarded. Also, enrollment is processed by college/major codes on the registration materials unless a copy of the approved major change is filed with the Study List Card.

Leaves of Absence

Only persons who are registered are entitled to the use of University facilities (an exception is the Library, to which the public-at-large has access if a fee is paid) or faculty time. A student who is anticipated to use as much as 12 or more hours of University facilities and/or faculty time (excluding the Library) in any quarter, is not eligible for a leave of absence or an extension of a leave of absence and must register. A student who has accumulated as much as 12 or more hours of use of University facilities and/or faculty time (excluding the Library) since last being registered is not eligible for an extension of a leave of absence and must register for the next quarter. All usages of faculty time are to be considered, including reading and suggesting revisions to drafts of theses and dissertations.

On recommendation of the student’s department and subject to the conditions stated in the paragraph above, a leave of absence may be granted by the Graduate Division to continuing graduate students in good standing (3.0 g.p.a.), who have completed at least one quarter in graduate status at UCLA. “Request for a Leave of Absence” forms are available at the Student and Academic Affairs Section of the Graduate Division, 1225 Murphy Hall. If registration fees have been paid for the quarter in which the leave is to begin, a percentage of the fees paid is refunded according to the calendar date on which the approved leave request is submitted to the Graduate Division. All leaves must be requested before the end of the second week of class of the quarter in which the leave of absence or extension of leave of absence is to begin. Deadlines are published for each quarter in the Graduate Catalog (see Calendar, page viii) and in the quarterly Schedule of Classes.

A leave is normally granted for periods of one to three quarters. Leaves may be extended for a total of five years (15 quarters) at the request of the student, on the recommendation of the department involved, and with the approval of the Graduate Division. Students wishing to return to their graduate studies after a period of five years must apply for readmission to the Graduate Division. If a student can demonstrate that the process of applying for annual renewals of leave would be exceedingly difficult, the Graduate Division, upon the recommendation of the student’s department, may grant a leave of absence for a period of more than one year.

Chairs of doctoral committees will be asked by the Graduate Division to verify that students applying for leaves or extensions of leaves will not be using University facilities or faculty time while on leave in accordance with the policy in paragraph 1.

A student granted a leave for any period of time may not keep a fellowship, grant, or sabbatical position without the approval of the department. Furthermore, the granting of a leave of absence does not relieve a student from meeting the requirements for the degree as they were stated in the catalog published and in effect at the time the student first registered as a graduate student at UCLA.

Application for a leave of absence to accept University employment must be accompanied by a letter from the Department Chairperson or other employing officer elaborating the reasons for which the leave is requested. In supporting such a request, the employing unit is obligated to demonstrate that such employment is essential to its program, that the departmental need results from an unforeseen circumstance, and that employment is for a specified and limited period of time.

Graduates scheduled to return from a leave of absence will be mailed preliminary information about registering by the Readmission Clerk, Office of the Registrar, 1105 Murphy Hall, along with the Statement of Intention to Register. The intention to register materials must be returned not less than six weeks before the first day of the quarter or the student may be assessed a late registration fee.

A student returning before the end of the period of his/her leave should notify the Registrar at least six weeks prior to the beginning of the quarter in which he/she plans to register, so that his/her registration packet may be prepared in advance. Failure to give at least six weeks notice will result in liability for any and all late registration/late enrollment fees assessed by the Registrar.

A request for extension of a leave of absence should be addressed in writing to the Student and Academic Affairs Section, Graduate Division, which will send the student an extension of leave of absence request form.

Leaves of Absence for Foreign Students

Leaves of absence for foreign students holding J-1 or F-1 visas are allowed only under the following conditions: if they will be out of the United States during the term of their leave of absence; or if they have just received the master’s degree and have been accepted to pursue the doctorate, but wish to gain practical training in their field before resuming their doctoral studies. All non-immigrant foreign students, including those who have permanent residence, must have their applications for leave of absence approved by the Office of International Students and Scholars.
Graduate Student Complaints
Because of the separation of functions within the University, it is sometimes unclear to students where they should direct their complaints. The following information may be helpful in advising students who wish to do so. Graduate students with complaints of a scholastic or professional character involving faculty, should take them up with the faculty member concerned or, if that is not feasible, with the Chairperson of the Department. If the Chairperson of the Department as a whole is involved, the matter should be taken to the appropriate Divisional Dean; or to the appropriate dean in the School concerned.

If the issue is not resolved at that level, the student may appeal to the Dean of the Graduate Division, 1237 Murphy Hall.

A graduate student or a group of graduate students wishing to lodge a complaint of a misconduct against another student or group of students, should go to the Office of the Dean of Students, 2224 Murphy Hall.

Graduate students who wish to make complaints concerning alleged violation of the policies and regulations governing graduate study, should see the Dean or Associate Dean of the Graduate Division, 1237 Murphy Hall.

A student who wishes to complain about a violation of University policy regulating the individual conduct of a faculty member should contact the Charges Committee of the Academic Senate, 3125 Murphy Hall.

The Ombudsman

The purpose of the Ombudsman Office is to seek to resolve personal grievances of members of the University community emerging from policy, practices, and/or personalities. As an independent agent with investigatory powers, the Ombudsman accepts grievances only after the grievant has tried to resolve his/her problems through regular channels and when there is evidence that adverse decisions are questionable.

The Ombudsman also serves on the University Policies Commission which reviews and recommends policy changes. The office is located in 274 Kinsey Hall (phone 825-7627) and is open to all University-related persons.

Certificate of Completion

Satisfactorily completed a research project over a period of nine months or more. The award of this certificate is recommended by the chairperson of the student’s major department. Request for the Certificate of Resident Study should be made to the Registrar at least a week prior to the opening of the final examination period.

Verification of Progress and Completion

The Registrar’s Office provides official records of a student’s academic progress, completion of requirements, and degree award, for the information of prospective employers and loan agencies and for other purposes, as follows:

- On a signed request from the student, transcripts of record are issued at a cost of $2 for all undergraduate and graduate work completed at UCLA. Transcripts showing final grades cannot be issued earlier than three to six weeks after the end of the quarter; those showing a degree earned during the quarter cannot be issued earlier than six to eight weeks after the end of the quarter.

A Certificate of Completion is issued to all students approximately three to four weeks after the end of the quarter in which they complete all degree requirements, certifying their eligibility for the degree. A Certificate of Graduation, issued only on individual student requests, certifies award of the degree in lieu of the diploma (which is ordinarily not available until approximately four to five months after official award of the degree).

If students request the chairperson of their department or of their thesis or doctoral committee to supply letters of recommendation and/or information on progress in examinations or preparation of the thesis or dissertation, this statement does not serve as official confirmation of completion of all requirements. Such a statement does not take into account the effect of incomplete grades, lapse of status, or disciplinary actions on students’ eligibility for the degree.

Student requests for degree or Certificates of Graduation should be submitted at Window A, Registrar’s Office, or may be mailed to that office.

The Registrar’s Office, Transcript Window “E,” Murphy Hall, will be able to verify current quarter registration and full time enrollment status for loan forms (and various non-campus certifications) beginning with the 12th day of classes. Valid photo identification is required for service. Hours are 10:00 a.m. to noon and 1:00-3:00 p.m., Monday through Friday.

Temporary verification of current quarter registration for campus use is available at the Registration/Enrollment Office, 1134 Murphy Hall on or after the first day of the term. Identification is required for service.

Requests for verification to be issued for prospective employers or other agencies should be addressed to the Registrar.

Disclosure of Information from Student Records

Pursuant to the Federal Family Educational Rights and Privacy Act of 1974 and the University of California Policies Applying to the Disclosure of Information from Student Records, students at UCLA have the right: 1) to inspect and review records pertaining to themselves in their capacity as students, except as the right may be waived or qualified under the Federal Act and the University Policies; 2) to have withheld disclosure, absent their prior consent for release, personally identifiable information from their student records, except as provided by the Federal Act and the University Policies; 3) to inspect records maintained by the University of disclosures of personally identifiable information from their student records; 4) to seek correction of their student records through a request to amend the records and subsequently through a hearing; 5) to file complaints with the Department of Education regarding alleged violations of the rights accorded them by the Federal Act.

The University may publish, without the student’s prior consent, items in the category of “public information”, which are name, address, telephone number, date and place of birth, major field of study, dates of attendance, degrees and honors received, the most recent previous educational institution attended, participation in officially recognized activities, including but not limited to intercollegiate athletics, and the name, weight and height of participants on intercollegiate athletic teams. Students who do not wish all or part of the items of “public information” disclosed may, with respect to address and telephone number, so indicate on the student data card in the registration packet, and with respect to the other items of information, by filing out a “Decline to Release Public Information Form” available in the Registrar’s Office, 1105 Murphy Hall.

Student records which are the subject of the Federal Act and the University Policies may be maintained in a wide variety of offices. Students are referred to the UCLA Directory, pages 1 through 25, which lists all the offices which may maintain student records, together with their campus address, telephone number and unit head. Students have the right to inspect their student records in any such office subject to the terms of the Federal Act and the University Policies.

A copy of the Federal Act, the University Policies and the UCLA Directory may be inspected in, and information concerning these matters and the students’ hearing rights may be obtained from the Office Legal Coordinator, 2135 Murphy Hall.
Degrees and Requirements

The graduate student earns his/her master's or doctoral degree by distinguished achievement in advanced study and research, rather than by merely completing stipulated courses while in academic residence. There are various means of evaluating his/her achievement in study, of which the foremost are qualifying and comprehensive examinations. Assessing the merits of his/her thesis or dissertation is the chief way of evaluating his/her achievement in research.

Preparation
An applicant for any advanced degree must possess a bachelor's degree from an institution of acceptable standing and must have completed the prerequisites for graduate study at UCLA in his/her field. He/she should consult the department in which he/she wishes to study concerning special departmental requirements or other aspects of graduate study in addition to those common to all UCLA graduate programs which are described in this catalog.

Master's Degree

Plan
At the option of his/her major department, the student follows either the Thesis Plan or the Comprehensive Examination Plan. The University minimum standards are the same under either plan, but a department may set higher standards and require additional courses and/or examinations to evaluate the candidate's capability in his/her field. The departmental Graduate Adviser should be consulted concerning such requirements. Information regarding standards and examinations may also be found in the Graduate Programs section of this catalog which lists the individual school and department degree requirements.

University Minimum Standards

Courses.*
The program of courses consists of at least nine graduate and upper-division courses completed in graduate status, of which at least five must be graduate. For the M.A., M.S., and M.A.T. (Master of Arts in Teaching), the five graduate courses may be in the 200 series (graduate courses and seminars) and, in limited number, the 500 series (directed individual study or research for graduate students). For other master's degrees, they may be in the 400 series (graduate professional courses) as well as the 200 and 500 series. (See also Individual Study or Research Courses, page 21.)

Standard of Scholarship
UCLA requires at least a B (3.00) average in all courses taken in graduate status on any campus of the University of California and in all courses applied toward the master's degree.

Transfer of Credit
Units and grade points for courses completed in graduate status on other University of California campuses may, upon petition, apply to master's programs at UCLA. Such courses may fulfill up to one-half the total course requirement, one-half the graduate course requirement, and one-third the academic residence requirement.

Also by petition, with the approval of the student's major department and the Dean of the Graduate Division, courses completed with a minimum grade of B in graduate status at institutions other than the University of California may apply to UCLA master's programs. A maximum of two such courses (the equivalent of 8 quarter-units or 5 semester-units) may apply, but these courses will not fulfill either the 5-graduate-course requirement or the academic residence requirement. (See also Enrollment in Summer Session Courses, page 19.)

Courses taken for any degree awarded at another institution may not be used to apply toward a degree at UCLA.

Credit for University Extension Courses
University Extension courses (100 series) taken before July 1, 1969 (identified with an asterisk in the University Extension bulletin of the appropriate year), may apply on approval by the department and Dean of the Graduate Division. No more than two such courses (8 units) may apply, and they must have been completed after the student received his/her bachelor's degree.

Courses in University Extension taken after July 1, 1969, may not apply to the University minimum of nine courses required for master's degrees, with the following exception. By petition to the Dean of the Graduate Division and with the recommendation of the major department, a maximum of two concurrent* courses (100, 200, or 400 series) completed through the University Extension, (with a grade of B or

**Concurrent courses are courses which are offered by the University for regularly registered students in degree programs, and in which Extension students also may petition to enroll.

*Under the quarter system at UCLA, the term "course" refers to a full course (4 quarter-units). With this as a standard, departments may offer a half course (2 quarter-units), a course and a half (6 quarter-units), or a double course (8 quarter-units). The requisite 9-course minimum for a master's degree may be fulfilled through combinations of such courses.
better, after the student has received his/her bachelor's degree) may be counted toward the 9-course University minimum requirement and toward the 5-graduate-course requirement for the master's degree. Therefore, the program for the master's degree shall include at least three graduate courses in the 200 or 500 series for academic degrees or three graduate courses in the 200, 400, or 500 series for professional degrees, completed after admission to regular graduate status.

Any program which requires more than nine courses for the master's degree may accept concurrent courses completed through Extension, (with a grade of B or better, after the student has received his/her bachelor's degree) to meet one-half the course requirements over and above the University minimum of nine.

Grades earned in University Extension are not included in computing grade averages for graduate students nor for the removal of graduate scholarship deficiencies.

Correspondence courses are not applicable to graduate degrees.

**Academic Residence**

The student is required to complete at least three quarters of academic residence in graduate status at the University of California, including at least two quarters at UCLA. He/she is in academic residence if he/she completes at least one letter-graded course (4 units) in graduate or upper-division work during a quarter.

**Foreign Language**

If the degree program includes a foreign language requirement, every effort should be made to fulfill this before the beginning of graduate study or as early as possible thereafter so that the language skill will be of maximum benefit. Additional information and a list of departmental foreign language requirements, including, in certain cases, language requirements for admission, appear on pages 42-45.

**Advancement to Candidacy**

Advancement to candidacy forms for the master's degree must be filed in the student's major department no later than the second week of the quarter in which he/she expects the award of his/her degree. However, advancement to candidacy may not occur until all requirements, including the foreign language examination, have been satisfied. Forms for this purpose are available in the Student and Academic Affairs Section of the Graduate Division. Petitions and transcripts pertinent to the master's program should accompany the advancement to candidacy form. Candidates may have one calendar year after completion of course requirements in which to complete all requirements for the degree. Any change in program after filing for advancement to candidacy should be reported in writing to the Registrar's Office by the Department Chairperson or Graduate Adviser.

**Thesis or Comprehensive Examination**

**Master's Thesis**

The student's thesis is a report on the results of his/her original investigation. Before beginning work on the thesis, the student obtains approval of the subject and general plan from the faculty members concerned and from his/her thesis committee.

The thesis committee is nominated by the chairperson of the department or interdepartmental degree committee, after consultation with the student. The "Nomination of Thesis Committee" form is forwarded to the Dean of the Graduate Division who officially appoints the committee. The thesis committee may be appointed before the student is formally advanced to candidacy.

The thesis committee consists of at least three faculty members who hold regular professional appointments in the University of California—professors, associate professors, assistant professors, visiting professors (all ranks), and professors-in-residence (all ranks). Acting assistant professors, adjunct professors (all ranks), and lecturers who teach graduate courses may serve as regular members but not as chairpersons. Adjunct professors (all ranks) and distinguished lecturers may serve as chairpersons only on approval by the Dean of the Graduate Division.

For guidance in the final preparation of the manuscript, the student should consult the Manuscript Adviser, Office of the University Archivist, 134 Powell Library, and the Graduate Division publication, Standards and Procedures for Theses and Dissertations, available in the Student and Academic Affairs Section or in the Archivist's office. Students planning to submit theses during the current academic year are encouraged to attend one of the orientation meetings on manuscript preparation and filing procedures which are conducted by the Manuscript Adviser and the Graduate Division at the beginning of each quarter. Orientation meeting dates are listed in the Calendar, page viii, and announcements are posted each quarter in departmental offices and libraries.

The manuscript may be submitted in the form of either camera-ready copy for microfilming or paper copies for binding, when departmental requirements do not conflict. Sufficient time should be allowed for typing and proofreading the manuscript, drafting charts, maps, and graphs, arranging for photographic work, and making final revisions and corrections. If approved by the thesis committee, reports of research undertaken during graduate study which have been published or accepted for publication in appropriate media may be accepted by the Dean of the Graduate Division as the master's thesis.

When the student's thesis has final approval by his/her thesis committee he/she submits the original thesis signature (approval) page and the original title page to the Student and Academic Affairs Section, Graduate Division, for verification of completion of the degree requirements. After final approval by the Dean of the Graduate Division, the student files with the Manuscript Adviser one or more copies of the thesis, in accordance with the number required for the method of manuscript preparation he/she has followed (complete instructions are included in the publication cited above). Students are urged to keep the abstract of the thesis within the 150-word limit. The deadline for filing the thesis is approximately two weeks before the date when the degree is to be awarded (see Calendar, page viii).

See also the section, Registration in the Final Quarter for the Award of the Degree, page 26.

**Master's Comprehensive Examination**

The comprehensive examination is administered by a committee consisting of at least three faculty members appointed by the department. Information concerning this examination and its form (written or oral, or both) may be obtained from the departmental Graduate Adviser. In some departments the comprehensive examination may serve as a screening examination for admission to their doctoral programs. (See Registration in the Final Quarter for the Award of the Degree, page 26.)

**Master's Degrees Other Than The M.A. and M.S.**

For master's degrees other than the M.A. and M.S. there may be specific University minimum requirements in addition to the foregoing information on these may be obtained from the departmental Graduate Adviser.

**The Master of Arts Degree Is Offered in the Following Fields**

- African Area Studies
- Afro-American Studies
- Anthropology
- Archaeology
- Architecture and Urban Planning
- Art

The academic residence requirement consists of four quarters in academic residence, three of which (ordinarily the last three) must be spent in continuous residence at UCLA. (See also academic residence requirements for doctoral programs, page 37.)

Students in departments authorized to offer the C.Phil. may state on the doctoral advancement to candidacy form whether they wish this degree. If they have been advanced to candidacy within an approved time limit before approval of the departmental proposal to offer the C.Phil., they will be supplied by their departments with special application forms for the degree.

The C.Phil. may not be conferred after or simultaneously with the award of the Ph.D. Students in the Ph.D. programs should consult their departmental Graduate Advisers for further information. (See also the section, Registration in the Final Quarter for the Award of Degree, page 26.)

Candidate in Philosophy Degree
In those departments for which the Graduate Council has approved formal proposals for its award, the intermediate degree, Candidate in Philosophy (C.Phil.), may be awarded to qualified students upon advancement to candidacy in existing Ph.D. programs.

The C.Phil. is not a terminal degree. This means that a department cannot recommend a student for advancement to doctoral candidacy and at the same time disqualify him/her for continued registration and further study or research on his/her dissertation. If a student withdraws from the University after advancement to candidacy and award of the C.Phil., then the department must be willing to readmit him/her at some subsequent date, provided the period of absence has not exceeded the maximum time limit which the department has officially set with the Graduate Division between advancement to candidacy and the award of the Ph.D. Any student, of course, may decide not to proceed beyond the C.Phil. degree.

Academic requirements for the C.Phil., like those for advancement to candidacy for the Ph.D., include the departmental program of study, the written, and in some departments, oral qualifying examinations, such foreign language (or substitute program) requirements as the department has established as prerequisite to advancement to candidacy, and the oral candidacy examination which is administered by the doctoral committee.

†Department admits only applicants whose objective is the Ph.D.

*Master of Arts in Teaching
†Department admits only applicants whose objective is the Ph.D.
Doctoral Degree

The doctorate is awarded candidates who have displayed understanding in depth of the subject matter of their discipline as well as ability to make original contributions to knowledge in their field. The degree is an affidavit of critical aptitude in scholarship, imaginative enterprise in research, and proficiency and style in communication.

University Minimum Standards

Program of Study

The student’s program of study is planned in consultation with his/her advisor and/or departmental guidance committee, who supervise his/her activities until the appointment of his/her doctoral committee. This program, designed with flexibility for individual needs and interests, lies within the scope of the departmental or interdepartmental program which has been approved by the Graduate Council. The student fulfills formal University requirements for scholarship, academic residence, foreign language proficiency, written and, in some departments, oral qualifying examinations, an oral candidacy examination, and the dissertation, as well as any additional departmental requirements. The University does not specify course requirements for doctoral programs, and the doctoral student completes such courses as his/her department may require or recommend for knowledge in his/her field and for preparation for qualifying examinations. The 500 series of directed individual study or research courses is designed for graduate research, preparation for examinations, and preparation of the dissertation.

Standard of Scholarship

UCLA requires at least a B (3.0) average in all courses taken on any campus of the University of California for the entire time the student has been in graduate status.

Academic Residence

The student is required to complete at least two years of academic residence in graduate status at the University of California, including one year, ordinarily the second, in continuous residence at UCLA.* In most cases, however, a longer period of academic residence is necessary, and from three to five years is generally considered optimal. A graduate student is in academic residence if he/she completes at least one letter-graded course (4 units) in graduate or upper-division coursework during a quarter.

Foreign Language

Every effort should be made to complete foreign language requirements before the beginning of graduate study or as early as possible thereafter so that the language skill will be of maximum benefit. In any case, students in doctoral programs requiring one or more languages must complete at least one language before the oral qualifying examination. Additional information and a list of departmental foreign language requirements, including in certain cases language requirements for admission, appear on pages 42-45.

Departmental Guidance Committee and Written and Oral Qualifying Examinations

The first phase of the student’s program is supervised by a departmental adviser and/or departmental guidance committee. This committee administers the written, and in some departments, oral qualifying examinations after completion of courses and other preparatory work recommended or required by the department. (See requirements for registration for any University examination under Continuous Registration, page 26.)

After completion of all departmental requirements and the appropriate foreign language (if required, see pages 42-45), the chairperson of the department nominates a doctoral committee.

Doctoral Committee

Membership

A doctoral committee must consist of a minimum of five members, having appointments as professor (any rank), professor or associate professor emeritus, professor-in-residence (any rank), adjunct professor (any rank), or visiting professor or associate professor at the University of California. Three members, the “inside” members, must hold appointments at UCLA in the student’s major department and two, the “outside” members, must not. At least three members of the committee must hold an appointment as associate professor or professor (regular series), or professor or associate professor-in-residence (any rank) in a department or school having a Ph.D. program. Committees of more than five members may be appointed. In such cases, all members of the committee have the same voting rights. (See Section on Duties and Responsibilities.)

The chairperson of a doctoral committee must hold an appointment at UCLA in the student’s major department or interdepartmental program as professor (any rank), as professor-in-residence (any rank), or as professor or associate professor emeritus. If a committee has co-chairpersons, at least one must be from the student’s major department or interdepartmental program at UCLA.

Individuals permanently approved to chair doctoral committees shall be counted as if their appointment were in the regular professorial series.

For good cause, individuals who do not hold the appointments listed above, but who have equivalent qualifications, by petition may be nominated as one of the minimum five committee members or chairperson. (See Section on Appointment.)

For good cause, a faculty member resident on another campus of the University, who if appointed at UCLA could be a member of the student’s major department, by petition may serve as either an “inside” or “outside” member.

The appointment of non-faculty, such as a person in private industry or on the staff of a museum, as the sixth member of a doctoral committee in situations in which they can provide special expertise to the dissertation project, is acceptable.

Appointment

Doctoral committees are appointed by the Dean of the Graduate Division, acting for the Graduate Council, upon nomination by the chairperson of the department or interdepartmental program committee, after consultation with the student. The committee must be appointed prior to holding the oral qualifying examination.

Regarding implementation of Membership, paragraph 4, the Dean of The Graduate Division may approve exceptions in individual cases. If permanent approval for appointment to doctoral committees or to serve as chairperson is requested, certification of qualification is to be made by the Graduate Council Committee on Instruction and Degree Requirements.

Recommendation for reconstitution of a doctoral committee is made jointly by the chairperson of the department and the chairperson of the doctoral committee, after consultation with the members of the committee who are in residence and the student. Reconstitution is approved by the Dean of the Graduate Division, acting for the Graduate Council.

Duties and Responsibilities

The Doctoral Committee

1) Conducts an oral qualifying examination, and at its option a written examination, to determine whether the candidate is qualified for advancement to candidacy for a doctoral degree. This examination is open only to the committee members and the student. All members of the committee must be present at the examination. It is the duty of the chairperson to see that all members of the committee are present. Each member of the committee reports the examination as “passed” or “not passed”. A student may not be advised to candidacy if more than one member votes “not passed” regardless of the size of the committee. Upon majority vote of the doctoral committee, the oral qualifying
examination may be repeated once.

b) Approves the subject for the dissertation and provides the guidance required for progress toward the degree.

c) Decides, by unanimous agreement, to waive the final oral examination on the dissertation in cases where it is not required for all students by departmental regulations (but see paragraph f below). If such an examination is required, the entire committee must be in attendance (it is the duty of the chairperson to see that all members of the committee are present) and each member must record a decision of "passed" or "not passed." A student will not be considered to have passed the final oral examination with more than one "not passed" vote regardless of the size of the committee.

d) Selects from its membership, by unanimous agreement, the certifying members who will read, approve, and certify the dissertation. A minimum of three members must be certifying members, two of whom are from the student's department and one from an "outside" department. The chairperson of the committee must serve as a certifying member. If a committee has co-chairpersons, both must serve as certifying members. At least two "inside" and one "outside" certifying members must hold professional appointments at the University of California. Each committee has co-chairpersons, both must serve as certifying members. If a committee has co-chairpersons, both must serve as certifying members. At least two "inside" and one "outside" certifying members must hold professional appointments at the University of California.

e) The certifying members (whether the entire committee or a subcommittee selected by the entire committee) read, approve, and certify the dissertation. In cases where fewer than the entire membership have been chosen as certifying members, approval of the dissertation must be unanimous. If the entire committee is acting as certifying members, the dissertation is considered as approved with one negative decision. A negative decision is indicated by a refusal to sign the dissertation approval page and by a letter from the chairperson of the committee to the Dean of the Graduate Division reporting the fact.

f) Even though the doctoral committee has agreed to its waiver, any member of the subcommittee which has been chosen to certify the dissertation must require that a final oral examination, in defense of the dissertation, be held. If a final oral examination is required, the entire doctoral committee must attend and vote.

g) In addition to the above duties and responsibilities, the "outside" members have the responsibility to see that standards of performance on a campuswide and universitywide basis are maintained.

Doctoral Committees for Interdepartmental Programs

a) The chairperson of the committee to administer an interdepartmental doctoral program will supply the Graduate Division with a list of individual faculty members who actively participate in the program. The minimum of three "inside" members will be selected from this list; the minimum of two "outside" members will be selected from eligible faculty whose names do not appear on that list. An "outside" member may belong to the same department as one or more of the "inside" members, provided he/she is not one of the "active participants" listed. However, at least three different departments must be represented among the five members of the doctoral committee.

Each interdepartmental committee must establish criteria for the determination of its list of active participants. The list is not necessarily limited to the membership of the interdepartmental committee itself. It may include a larger or smaller number of faculty members.

b) Faculty members from other campuses of the University of California may serve as "outside" members of the committee. They may be from any field, provided that the requirement concerning representation of three different departments on the committee is met, as stipulated above.

c) As with departmental doctoral committees, the chairperson of the interdepartmental program committee may nominate additional members beyond the minimum of five; such additional members will have full voting responsibilities on the committee.

d) The procedures to be followed in the event of a vacancy or change in the committee membership, or the absence of a committee member at the oral examination, will be the same as in the case of departmental committees.

Advancement to Candidacy

After passing the oral candidacy examination and completing any additional departmental requirements, the student is eligible for advancement to doctoral candidacy. He/she completes the advancement to candidacy form, which is mailed to him/her by the Registrar's Office. This form, bearing the approval signature of his/her doctoral committee chairperson and the Cashier's stamp in payment of the $25 advancement to candidacy fee, is then submitted to the Student and Academic Affairs Section, Graduate Division. On approval by the Dean of the Graduate Division, the student receives formal notice of advancement to candidacy. (See also Candidate in Philosophy Degree, page 36.)

Dissertation

The candidate demonstrates his/her ability for independent investigation by completing a dissertation in his/her principal field of study. His/her choice of subject must be approved by his/her doctoral committee which usually reviews and approves the dissertation prospectus at the time of the oral candidacy examination. Subsequently, the doctoral committee guides the candidate's progress toward completion of the dissertation. A minimum of three members of the doctoral committee, including at least two members from the candidate's department and at least one outside member, must read and certify that, in their judgment, the dissertation satisfies the research requirements for the doctoral degree. These members are selected by unanimous agreement of the doctoral committee, usually at the time of the oral qualifying examination. In cases where fewer than the entire membership have been chosen as certifying members, approval of the dissertation must be unanimous. If the entire doctoral committee is acting as certifying members, the dissertation is considered as approved with one negative decision. A negative decision is indicated by a refusal to sign the dissertation approval page and by a letter from the chairperson of the committee to the Dean of the Graduate Division reporting this fact.

For guidance in the final preparation of the manuscript, the student should consult the Manuscript Adviser, Office of the University Archivist, 134 Powell Library, and the Graduate Division publication, Standards and Procedures for Theses and Dissertations which is available in the Student and Academic Affairs Section or in the Archivist's office. Students planning to submit dissertations during the current academic year are encouraged to attend one of the orientation meetings on manuscript preparation and filing procedures which are conducted by the Manuscript Adviser and the Graduate Division at the beginning of each quarter. Orientation meeting dates are listed in the Calendar, page viii, and announcements are posted each quarter in departmental offices and libraries.

The manuscript may be submitted in the form of either camera-ready copy for microfilming or paper copies for binding, when departmental requirements do not conflict. Sufficient time should be allowed for typing and proofreading the manuscript, drafting charts, maps, and graphs, arranging for photographic work, and making final revisions and corrections. If approved by the doctoral committee, reports of research undertaken during graduate study which have been published or accepted for publication in appropriate media may be accepted by the Dean of the Graduate Division as the doctoral dissertation.

University Microfilms is authorized by UCLA to prepare and store the negatives of dissertations and dissertation abstracts, to publish the abstracts in Dissertation Abstracts International, and to send a positive copy of the dissertation to the Library of Congress. It is also authorized to publish at demand authorized facsimiles by microfilm-xerography when such materials are ordered as a result of their being noticed in Dissertation Abstracts International. The process of authorization will be explained in the next paragraph. Students are urged to keep the dissertation abstract within the 350-word limit.
The student signs a microfilm agreement with University Microfilms concerning the microfilming of the dissertation and the printing of the abstract. If the student wishes to copyright the dissertation, the Student and Academic Affairs Section of the Graduate Division can provide him/her a form that he/she should complete before submitting it to the Office of the University Archivist, 134 Powell Library, with a certified check or money order in the amount of $20, made payable to University Microfilms, to cover the copyright fee.

When the student's dissertation has final approval by his/her doctoral committee he/she submits the original dissertation signature (approval) page and the original title page to the Graduate Division, for verification of completion of the degree requirements. After final approval by the Dean of the Graduate Division, the student files with the Manuscript Adviser one or more copies of the dissertation, in accordance with the number required for the method of manuscript preparation he/she has followed (complete instructions are included in the publication cited above). Deadlines for filing the dissertation are approximately two weeks before the date the degree is to be awarded (see Calendar, page viii).

See also the section, Registration in the Final Quarter for the Award of the Degree, page 26.

**Final Oral Examination**

A final oral examination may be required at the option of the doctoral committee, and in some departments it is required of all candidates. The Graduate Division is notified of the committee's decision to require or waive this examination on the Report on the Oral Qualifying Examination form. If a final oral examination is required, all members of the committee must attend and vote. It is the duty of the chairperson to see that all members of the committee are present. A student may pass with one negative vote. Notification is sent to the Graduate Division on the Report on the Final Oral Examination form. The examination may be held before the candidate has prepared the final copy of the dissertation, but passing the examination does not imply approval of the final copy of the dissertation. In case of failure, the doctoral committee shall determine whether or not the candidate may be reexamined.

Even though the doctoral committee has agreed to the waiver of the final oral examination, any member of the certifying committee may require that a final oral examination, in defense of the dissertation, be held. Students should consult their doctoral committee chairperson or departmental Graduate Adviser for further information (see also Registration in the Final Quarter for the Award of the Degree, page 26).

**In Candidacy Fee Offset Grant Program**

The In-Candidacy Fee Offset Grant Program has been established to provide an incentive for early advancement to candidacy and for completion of degree requirements within the normative time proposed by the department and approved by the Graduate Council. The grant covers the Educational Fee (presently $120 per quarter). Students in professional doctorate programs are not included in this program.

All students who begin graduate study at the University of California, Los Angeles, after September, 1979 will be covered by this grant program. Those students with graduate standing prior to September 1, 1979 may elect to be included, and in that event, will be subject to all of the provisions. Eligible students may receive the grant from the time of their advancement to candidacy until the department's normative time-to-degree is reached. Students in the program must register for each regular academic session until all degree requirements are completed, unless a formal leave of absence is approved by the Dean of the Graduate Division.

To be eligible for the grant, the student must attain formal candidacy for the Ph.D. prior to the first day of classes of the academic session for which the grant is sought, and remain in good standing with a minimum 3.0 grade point average. The accrued time, which is the time since first enrollment at UCLA as a graduate student, as determined by the Graduate Dean, must be less than the established normative time for completion of the Ph.D. in that program. A candidate for the Ph.D. whose status lapses will be ineligible for the In-Candidacy Fee Offset Grant until, following readmission and registration, that student is again advanced to candidacy.

The amount of the grant shall be reduced by the amount of financial aid the student may receive from non-University sources to pay all or a portion of the Educational Fee. If the student is being provided with a package of financial aid, any component of which is need-based aid, the total amount of aid given to him/her, including the grant, may not exceed the student's total need, as determined by the Financial Aid Office.

Payment of the grant shall be in the form of an offset of the Educational Fee. In the event that the student has paid the Educational Fee prior to authorization of the grant, the award will be made as a reimbursement.

A Ph.D. candidate must apply for the In-Candidacy Fee Offset Grant on a form provided by the Graduate Division. All information necessary to establish eligibility and the time accrued to that date must be supplied as part of this application.

A students' accrued time, which includes all quarters since first registration as a graduate student at UCLA, may be reduced to take into account formal leaves of absence (up to three quarters), work in a major that is not related to the Ph.D. major, the quarters the student was not registered after the receipt of a degree, and quarters the student was unable to devote full-time study toward the doctorate.

The Dean of the Graduate Division will determine the accrued time to date and certify the student's eligibility for the grant, if all of the relevant criteria are satisfied. The Graduate Division will be responsible for initiating the fee offset transaction(s) and for taking corrective action in the event a student becomes ineligible.

No time will be accrued from graduate study at another institution or UC campus except in the case of a student who enters a graduate program following enrollment at UCLA through the Intercampus Exchange Program.

The student will be notified of the length of time he/she is eligible for the grant when the Graduate Division computes his/her accrued time. Any appeal to correct an alleged error in the determination of eligibility or of accrued time must be submitted by the student to the Graduate Dean promptly, in writing.

If a student in the In-Candidacy Fee Offset Grant Program fails to register for any regular academic session, in residence or in absentia (those students engaged in research outside the State of California throughout a regular academic session), and has not been granted a formal leave of absence, all status as a graduate student and as a candidate for the Ph.D. degree will lapse. A student whose candidacy lapses, may, after readmission, be required by a department to retake the written qualifying examinations and may also be required by the doctoral committee to retake the oral qualifying examinations. The student will be required to refill an Application for Candidacy and pay the Candidacy Fee.

At least one quarter of registration subsequent to advancement or reinstatement to candidacy will be required before the Ph.D. will be conferred upon a readmitted student. Thus, a student whose candidacy lapses will be required to register for a minimum of two quarters prior to award of the degree (one quarter of registration to be readvanced to candidacy and an additional quarter in which the degree may be awarded).

A student who completes all requirements for the Ph.D., including the final examination and submission of the dissertation, prior to the beginning of classes in the academic session in which the degree is to be conferred need not register for that quarter provided that: 1) no other University policy requires registration for that session; 2) the continuous registration re-
quirement has been met; and 3) the student was registered in the preceding regular academic session.

For further information, please contact the department concerned or the Student and Academic Affairs Section, Graduate Division, 1225 Murphy Hall.

Individual Ph.D. Program

The Individual Ph.D. Program has been established to allow superior students to pursue well-defined, scholarly, coherent programs that cannot be carried out within any existing doctoral program on any campus of the University of California. To be approved for an Individual Ph.D. Program, a student submits a proposal to the Graduate Council after having been a full-time graduate student at UCLA for at least one year, having proved qualified to pursue a departmental Ph.D. program, and having gained the support of at least three sponsoring members of the faculty. University minimum standards with regard to courses, standards of scholarship, residence, and dissertation apply.

Students should be aware of the fact that individual doctoral degrees may be of less value in the marketplace than standard departmental degrees. As a rule, departments in universities and colleges prefer to appoint individuals whose training is in a traditional field. It is likely that the same preference holds in relation to other opportunities for employment.

Further information regarding this program and the requirements for approval are available from the Graduate Division, 1225 Murphy Hall, University of California, Los Angeles, California 90024.

Doctoral Degrees Other Than The Ph.D.

Requirements for the Ed.D. (Doctor of Education), D.Env. (Doctor of Environmental Science and Engineering), Dr.P.H. (Doctor of Public Health), and D.S.W. (Doctor of Social Welfare) are stated in the announcements of the schools of Education, Public Health, and Social Welfare, and of the interdepartmental program in Environmental Science and Engineering. Further information may be obtained from the respective Graduate Advisers.

The Doctor of Philosophy Degree Is Offered in the Following Fields

- Anatomy
- Applied Linguistics
- Anthropology
- Archaeology
- Art History
- Astronomy
- Atmospheric Sciences
- Biochemistry
- Biological Chemistry
- Biology
- Biostatistics
- Chemistry
- Classics
- Comparative Literature
- Computer Science
- Economics
- Education
- Engineering
- English
- Experimental Pathology
- Folklore and Mythology
- French
- Geochemistry
- Geography
- Geology
- Geophysics and Space Physics
- Germanic Languages
- Hispanic Languages and Literatures
- History
- Indo-European Studies
- Islamic Studies
- Italian
- Kinesiology
- Library and Information Science
- Linguistics
- Management
- Mathematics
- Medical Physics
- Microbiology
- Microbiology and Immunology
- Molecular Biology
- Music
- Near Eastern Languages and Cultures
- Neuroscience
- Oriental Languages
- Pharmacology
- Philosophy
- Physics
- Physiology
- Political Science
- Psychology
- Public Health
- Romance Linguistics and Literature
- Slavic Languages and Literatures
- Sociology
- Special Education*
- Theater Arts
- Urban Planning

A Professional Doctorate Degree Is Offered in the Following Fields

- Education (Ed.D.)
- Environmental Science and Engineering (D.Env.) (Interdepartmental)
- Public Health (Dr.P.H.)
- Social Welfare (D.S.W.)

Graduate Foreign Language Requirements

Each department, school, or interdepartmental degree committee determines whether or not it will require a command of foreign languages for a degree. The chart on the following pages is a summary of the foreign language requirements for master's and doctoral degrees. These requirements have been set by the departments, schools, or committees with the approval of the Graduate Council.

A student normally meets the foreign language requirements by completing the Educational Testing Service Graduate School Foreign Language Test, the UCLA foreign language examination, or a departmental foreign language examination. Some departments permit fulfillment either by examination or by completing course 5 (with a minimum grade of C) or the equivalent (five quarters of language study with a minimum grade of C in each course). If a program requires special proficiency in a language, this is fulfilled by a higher than normal ETS score or by a special examination. In addition, some departments have approved substitute programs which may fulfill the language requirement.

For further information on these requirements and for additional departmental requirements for specific programs, students should consult their major departments. Questions concerning the examinations should be addressed to the Student and Academic Affairs Section, Graduate Division.

Educational Testing Service (ETS) Examinations

In French, German, Russian, and Spanish, the student takes the Educational Testing Service (ETS) Graduate School Foreign Language Test in which the UCLA minimum passing score is 500. The fee for each ETS examination is $20, and each student registers for the examination at the University Extension Cashier's Office (10995 Le Conte Avenue). Information regarding registration procedures may be obtained from the Student and Academic Af-
Substitute Programs

In departments for which the Graduate Council has approved the use of substitute programs, a special program of coursework may be offered in place of a foreign language. The student should consult the departmental Graduate Adviser for advance planning of such a program. The program is formulated within the department which notifies the Graduate Division after its completion.

Timing

Students in master’s programs must complete the language requirement before advancement to candidacy. Students in doctoral programs requiring one or more foreign languages must complete at least one language before the oral candidacy examination. If a substitute program is offered in place of one language, the language must be completed before the oral candidacy examination.

The following requirements are those formally administered by the Graduate Division and include the principal languages which departments normally require or recommend. Departments should be consulted as they may accept other languages or may require additional languages, special competence, or special procedures for fulfillment, depending upon the student’s program.

Articulated and Concurrent Degree Programs

Articulated and concurrent degree programs have the advantage of allowing the student to acquire two degrees in less time than normally required if the courses of instruction are taken in sequence. The aim of these programs is to provide an integrated curriculum or greater breadth between the two disciplines. Inquiries should be directed to the departments or schools involved.

Programs leading to concurrent degrees (specified amount of credit applied toward both degrees) have been approved in the following disciplines:

- Architecture and Urban Planning, M.A.—Law, J.D.
- Education, M.A., Ph.D., M.Ed., or Ed.D.—Law, J.D.
- History, M.A.—Library and Information Science, M.L.S.
- Management, M.B.A.—Latin American Studies, Interdepartmental M.A.
- Management, M.B.A.—Law, J.D.
- Management, M.B.A.—Public Health, M.P.H.

Management, M.B.A.—Library and Information Science, M.L.S.

Management, M.B.A.—Architecture and Urban Planning M.A.

Programs leading to articulated degrees (no credit overlap) are offered in the following disciplines:

- African Area Studies, Interdepartmental M.A.—Public Health, M.P.H.
- Latin American Studies, Interdepartmental M.A.—Library and Information Sciences, M.L.S.
- Latin American Studies, Interdepartmental M.A.—Public Health, M.P.H.
- Medicine, M.D.—Any Graduate Division major, Ph.D.
- Oral Biology, M.S.—Dentistry, D.D.S. or Certificate

Interdepartmental Degree Programs

In addition to graduate degree programs offered in schools and departments, interdisciplinary graduate programs, involving two or more participating departments, are also offered. These programs are administered by interdepartmental faculty committees appointed by the Dean of the Graduate Division, acting for the Graduate Council.

- African Area Studies (M.A.)
- Afro-American Studies (M.A.)
- Applied Linguistics (Ph.D.)
- Archaeology (M.A., Ph.D.)
- Asian American Studies (M.A.)
- Comparative Literature (M.A., Ph.D.)
- Environmental Science and Engineering (D.Env.)
- Folklore and Mythology (M.A., Ph.D.)
- Indo-European Studies (Ph.D.)
- Islamic Studies (M.A., Ph.D.)
- Latin American Studies (M.A.)
- Molecular Biology (Ph.D.)
- Neuroscience (Ph.D.)
- Romance Linguistics and Literature (M.A., Ph.D.)

If you would like further information, please contact the Chairperson or Graduate Adviser of the Interdepartmental Degree Program.

### Courses

The following symbols are used in the departmental faculty rosters and course listings.

**Faculty Roster Symbols**

1. In Residence summer only.
2. In Residence fall only.
3. In Residence winter only.
4. In Residence spring only.
5. On leave summer.
6. On leave fall.
7. On leave winter.
8. On leave spring.
9. On leave summer and fall.
10. On leave fall and winter.
11. On leave fall and spring.
12. On leave winter and spring.
13. On leave spring and summer.
15. Recalled to active service.
16. Member of Brain Research Institute.
17. Member of the Institute of Geophysics and Planetary Physics.
18. Joint Appointment.

### Course Listing Symbols

- **Given alternate years, not offered 1980-1981.
- *Offered as schedule and staff allow.
- **Not offered every year.
- *Offered alternate years; offered 1980-1981.
- *Offered Fall 1980 only.
- *Offered Winter 1981 only.
- *Offered Spring 1981 only.
- *Offered on request depending upon enrollment.
- *Consult department for details.
- *Not applicable to M.A. degree.
- *Native speakers not normally eligible.
- *A and B offered in alternate years.
- *Enrollment is limited. Consult Office of Undergraduate Affairs.
- *Determined on basis of change in course content.
- *Only course C to be offered.
- **Courses A and B to be offered.
- *Open only to Engineering Executive Program students.
- *Not offered Fall, 1980.
- **Not offered Winter, 1981.
- *Not offered Spring, 1981.
- **This course may not be applied toward the requirements of any graduate degree offered by SEAS in the School of Engineering and Applied Science.

### Graduate Courses

Graduate courses (numbered 200-299, 400-499, 500-599) are normally open only to students admitted in graduate status. Under special circumstances some courses in the 200-299 series are open to undergraduate enrollment with proper departmental and instructor consent.

### Professional Courses

Teacher-training course (numbered 300-399) are highly specialized courses dealing with methods of teaching, and are acceptable toward the bachelor's degrees only within the limitations prescribed by the various colleges or schools.

### Cross-Listed Courses

Concurrently Scheduled Courses: Concurrent scheduling is defined as pairs of courses, usually within a single department or program, which are offered at the same time and place, with the same instructor, but for which credit is given at two levels—usually graduate and undergraduate.
For concurrently scheduled courses, suitably separate activities and/or standards for performance and evaluation will be applied for graduates and undergraduates.

A capital "C" before the initial number of a course indicates that the course has been approved for concurrent scheduling. Course descriptions 200 and above will be found in the Graduate Catalog, and 199 and below in the Undergraduate Catalog.

Multiple-listed courses: A capital "M" before the initial number identifies courses, ordinarily at the same level, but listed as offerings in two or more different departments. These courses will be taught at the same time and place, with the same instructor, but students will receive credit from the department or program in which they choose to enroll.

Course Listings
Each course in the following listings by departments, as in the samples that follow, has the credit value of a full course unless otherwise noted. Thus, a listing, Mathematics 210A-210B-210C, Algebra, indicates three full courses, 210A, 210B, and 210C; while a listing, Dance, 114A-114F, Advanced Contemporary Dance, (½ course each), indicates six half courses, 114A, 114B, 114C, 114D, 114E, and 114F.

Where noted, credit for specific course is dependent upon completion of a subsequent course.

African Area Studies

(Interdepartmental)

The Master of Arts Degree

Admission Requirements. In addition to the University minimum requirements, applicants are required to take the Graduate Record Examination and submit three letters of recommendation.

Advising. The Master of Arts in African Area Studies is supervised by an interdepartmental faculty committee appointed by the Dean of the Graduate Division. The Chairperson of this committee is Professor Michael F. Lofchie. The Graduate Advisers are Professors Michael F. Lofchie (social sciences) and John Povey (arts and humanities). The Assistant to the Graduate Adviser for the M.A. in African Area Studies is Ms. Joy Williams, African Studies Center, 10250 Bunche Hall. Students are expected to remain in continuous contact with Ms. Williams about their programs and their academic progress.

Admission to Master’s Program. In addition to meeting the requirements of the Graduate Division, the student must have adequate preparation in undergraduate fields related to the program. Required preparation for the master’s degree in African Area Studies is a degree of Bachelor of Arts in the social sciences or arts and humanities.

Major Fields or Subdisciplines. Students concentrate their studies in a major and minor discipline in the social sciences, arts and humanities, or professional school. For more information, prospective students should contact the African Studies Center.

Foreign Language Requirement. The student is required to satisfy the language requirement in one of the following ways: a) take three quarter-length courses (12 units) in an African language, with an average grade of B, or better. These courses will not count toward the nine courses required for the degree; b) pass a Linguistics Department examination in an African language not regularly offered; c) prove that the student is a native speaker of an African language; d) prove that the student has a Foreign Service Institute rating of 3, or above in an African language.

Course Requirements. A minimum of nine courses are required for the M.A. At least five courses must be at the graduate level. The courses must be distributed between disciplines as follows: a) Major discipline: a minimum of four courses, of which two must be at the graduate level. Sociology and Anthropology may be taken as a combined major. Other combined majors must be approved by the Graduate Adviser; b) Minor discipline: a minimum of two courses of which one must be at the graduate level; c) Third discipline: the student must take a course on Africa, preferably of the survey type, in a third discipline, e.g. African Languages 100.

Thesis or Comprehensive Examination Plan. There is no Thesis Plan. Each candidate for the master’s degree in African Area Studies will be required to take a written examination administered by a 3-person committee. This committee will normally consist of two faculty members from the candidate’s major field and one faculty member from the candidate’s minor field. It is the student’s responsibility to make arrangements for this examination with faculty members in the appropriate departments. Exceptions will be granted only by consent of the Graduate Adviser. The examination will normally be four hours in length with major and minor fields being given equal time. For grading purposes the major field will count for 60 per cent; the minor field, 40 per cent. An oral examination may be held at the discretion of the examining committee after it has read the candidate’s written examination. A student who fails the Comprehensive Examination may be permitted to retake it only with the approval of the Graduate Adviser. No student will be allowed to retake the examination more than once.

Time to Degree. Normal progress from graduate admission to award of the degree: five quarters.

500 Series Course Limitation. One course in the 500 series shall apply toward the minimum of nine courses required for a master’s degree. That one course may be counted toward the minimum of five graduate courses required for the degree. By permission of the Graduate Adviser, another 500 level course may be allowed, but may not be applied toward the minimum of five graduate courses required for the degree.

Teaching Experience: Teaching experience is not a requirement for the degree.

Disqualification and Appeal of Disqualification: The recommendation of disqualification is made by the Graduate Adviser and will be approved by the Interdepartmental Committee. Students may appeal the case to the Committee. Disqualification may be recommended for failure to maintain a minimum grade point average of 3.0, failure of the master’s examination, insufficient progress toward the degree and infractions of academic standards such as plagiarism.

Articulated Degree Program:

African Area Studies (M.A.) and Public Health (M.P.H.). The School of Public Health and the Interdepartmental Degree Program in African Area Studies have now created an arrangement whereby a student can work sequentially for the master's degree in African Area Studies (M.A.) and a master's degree in Public Health (M.P.H.). By planning a major field emphasis in Public Health while working toward the M.A. degree in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees. Students interested in working for these two degrees should be aware that this is not a concurrent degree program. The articulated degree program operates in a sequential manner. The normal pattern of graduate study for a student working in this articulated degree program will begin with admission to the M.A. program in African Area Studies. While enrolled in this program, a student will consult with faculty members in the School of Public Health and, on their advice, take a specified series of courses in the field of Public Health. This coursework will enable students to establish a solid basis upon which they may build their academic credibility for subsequent application to the M.P.H. degree.

Admission for the M.A. in African Area Studies does not automatically confer admission into the M.P.H. program since each of these degree programs retains complete jurisdiction over its own admissions. Admission to the
M.P.H. program will normally occur in the following manner. While continuing in the M.A. in African Area Studies program, the student will file a petition for a change of major to Public Health. This will ordinarily occur during the quarter in which the student anticipates completion of the M.A. degree in African Area Studies. If this petition is approved by the School of Public Health, the student will enter the M.P.H. program the following quarter.

Students should be aware that no course may be used for credit toward more than one degree. Thus, courses that have been applied toward the completion of the M.A. degree in African Area Studies may not also be counted toward the M.P.H. in Public Health.

Students interested in the articulated program should write to Ms. Joy Williams, Assistant to the Graduate Adviser, M.A. Program in African Area Studies, African Studies Center, UCLA, Los Angeles, CA 90024.

Other Relevant Information. A) Application of S/U graded courses to the M.A. in African Area Studies: No more than one course graded on an S/U basis may be counted toward the minimum of nine courses required for the M.A. degree, except by permission of the Graduate Adviser; B) Students are expected to complete the M.A. degree by the close of their seventh quarter of full-time enrollment. A brochure describing the graduate African Area Studies Program is available to interested students in the Assistant to the Graduate Adviser’s office, 10250 Bunche Hall.

African Area Course List: All courses are not offered every academic year. Students should verify courses with respective departments.

Anthropology 107A-107B. Introduction to African Societies and Modes of Thought.
109. Old Stone Age Archaeology.
111A-111B. Fossil Man and His Culture.
112. Hunting and Gathering Societies.
113. Civilizations of Sub-Saharan Africa.
119. Culture Stability and Culture Change.
141. Social and Psychological Aspects of Myth and Ritual.
143. The Individual in Culture.
144. Aesthetic Anthropology.
M158. Health in Culture and Society.
200. Social Anthropology.
M283. Medical Anthropology.
M290. Legal Anthropology.
M271. African Cultures.
290. Anthropological Theory.

234. Seminar in Spatial Development Policy.
Art 118C. The Arts of Sub-Saharan Africa.
119A. Advanced Studies in African Art: Western Africa.
119B. Advanced Studies in African Art: Central Africa.
220. The Arts of Africa, Oceania and Pre-Columbian America.

Dance 140A. Dance of Africa.
171B. Dance of Ghana.
111. Theories of Economic Growth and Development.
211. Economic Development.
212. Applied Topics in Economic Development.
Education 204A. Topics and Issues in International and Comparative Education.
204B. Introduction to Comparative Education.
204C. Education and National Development.
207. Politics and Education.
253A. Seminar in Current Problems in Comparative Education.
253B. Seminar: African Education.
253F. Seminar in Education in Revolutionary Societies.
English 114. World Literatures in English.
French 121A. Franco-African Literature.
221A. Introduction to the Study of French-African Literature.
221B. French-African Literature of Madagascar and Bantu Africa.
221C. French-African Literature of Berber-Sudanese and Arabo-Islamic Africa.
122. Man and Environment in Africa.
188. North Africa.
189. Middle and Southern Africa.
286. Seminar in Regional Geography: Northern Africa.
289. Middle and Southern Africa.
Germanic Languages 101B. Elementary Afrikaans.
101E. Intermediate Readings in Afrikaans.
112. Dutch, Flemish and Afrikaans Literature in Translation.
135. Introduction to Afrikaans Literature.
175A. Topics in African History: Prehistoric Africa: Technological and Cultural Traditions.
175B. Topics in African History: Africa and the Slave Trade.
175C. Topics in African History: Africa in the Age of Imperialism.
176A. History of West Africa: From Earliest Times to 1800.
176B. History of West Africa: Since 1800.
177. Ethiopia and the Horn of Africa.
178A-178B. History of East and Central Africa.
179A. History of Southern Africa: From Origins to 1870.
179B. History of Southern Africa: Since 1870.
244A-244B. Seminar in British Empire History.
276. African Archaeology: Field Techniques.
277. African Archaeology: Data Analysis.
278A-278B. Seminar in African History.
Linguistics 220. Linguistic Areas (Africa).
225. Linguistics Structures.
Language 1A-1B-1C. Elementary Swahili.
7A-7B-7C. Elementary Zulu.
8A-8B-8C. Intermediate Zulu.
9A-9B-9C. Elementary Xhosa.
10A-10B-10C. Intermediate Xhosa.
11A-11B-11C. Elementary Yoruba.
12A-12B-12C. Intermediate Yoruba.
13A-13B-13C. Elementary Igbo.
14A-14B-14C. Intermediate Igbo.
21A-21B-21C. Elementary Fula.
31A-31B-31C. Elementary Bambara.
41A-41B-41C. Elementary Hausa.
103A-103B-103C. Advanced Swahili.
133A-133B-133C. Advanced Bambara.
143A-143B-143C. Advanced Hausa.
150A-150B-150C. African Literature in English Translation.
190. Survey of African Languages.
201A-201B. Comparative Negro-Congo.
270. Seminar in African Literature.
Mueac 143A-143B. Music of Africa.
190A-190B. Proseminar in Ethnomusicology.
255. Seminar in Musical Instruments of the Non-Western World.
280. Seminar in Ethnomusicology.
Near Eastern Languages
Arabic 1A-1B-1C. Elementary Arabic.
103A-103B-103C. Advanced Arabic.
111A-111B-111C. Spoken Arabic.
220A-220B-220C. Islamic Texts.
240A-240B-240C. Arab Historians and Geographers.
102A-102B-102C. Advanced Berber.
120A-120B-120C. Introduction to Berber Literature.
130. The Berbers.
Political Science 139A-139Z. Special Studies in International Relations.
166A-166B-166C. Government and Politics in Sub-Saharan Africa.
167. Ideology and Development in World Politics.
250E. African Studies.
271. Seminar in Political Change.
Public Health 111. Human Disease and Public Health.
113. Infectious Diseases and Public Health.
186. The World’s Population and Food.
214. Infectious and Tropical Disease Epidemiology.
216A. Ecology of Exotic Diseases.
216B. Viral Diseases of Man.
218A-218B. Protozoal Diseases of Man.
472A. Maternal and Child Health in Developing Areas.
The Master of Arts Degree

Admission Requirements: Applicants for admission must possess a baccalaureate degree in the Social Sciences or the Humanities and show an interest in Afro-American studies either through their previous course of study or their future plans. Students are selected on the basis of the following criteria:

1. Three academic letters of recommendation.
2. A minimum of 3.00 or "B" average in the junior-senior years of college.
3. A statement of purpose describing the applicant's background in Afro-American studies, proposed program of study, and future career plans.
4. The results of the applicant's scores on the Verbal and Quantitative sections of the Graduate Record Examination.

Course Requirements: A total of 14 upper division and graduate courses are required for the degree. Of that number, only two can be selected from upper division listings. The program has a structured core of seven required courses. The student is required to take Afro-American Studies 200A (Afro-American History) and two courses from the Afro-American Studies 200B through 200E series. These courses should normally be taken in the first year of study. The second year is devoted to the acquisition of disciplinary competence in the student's chosen cognate field. Afro-American Studies 200A-B is required of all students, and in addition, Afro-American Studies 270A-B, a two quarter research seminar, is to be taken in conjunction with work in the discipline of each student's choice. This seminar is expected to facilitate completion of the student's thesis.

Thesis Plan: The guidance committee, constituted at the beginning of the second year of residence, supervises and reviews the student's progress on the thesis. When the thesis meets the standards of the guidance committee, the committee will recommend to the Interdepartmental Committee to Administer the M.A. in Afro-American Studies that the paper be accepted in fulfillment of the thesis requirement for the degree.

Time to Degree: It is estimated that six quarters in residence are required from the time of admission to award of degree. This presumes full-time student status and normal progression through coursework.

Interdisciplinary Courses

Graduate Courses

M200C. Selected Problems in urban Sociology (Same as Sociology M202). Seminar. Prerequisite: consent of instructors. Mr. Harrison, Mr. Oliver
M200E. Studies in Afro-American Literature (Same as English M203). Seminar. Prerequisite: consent of instructors. An intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on the esthetic, cultural, and social backgrounds of Afro-American writing. Mr. Yarborough, Mr. Keys

220A. Research Methods. Seminar. Prerequisite: consent of instructor. An introduction to a variety of research methods, including experimental, quasi-experimental, observational and survey research methodologies. The course will cover the following topics: the functions of research, research proposal writing, theory development and hypothesis testing, sampling theory, data collection, data processing and analysis and interpretation. Also included are the ethics of research and preparing the research report.

220B. African-American Psychology. Seminar. Prerequisite: consent of instructor. Survey of the psychological literature as it pertains to persons of African-American descent. The course provides a critical review of the implications of "mainstream" research of African-Americans. This approach includes a discussion of research on the family, academic achievement and psychological assessment (testing). A second focus is concerned with theoretical approaches advanced by African-American scholars: African philosophy, perspectives on racism in psychology, and research in the black community.

The Staff
Anatomy

(Department Office, 73-235 Health Sciences Center)

George W. Bernard, D.D.S., Ph.D., Professor of Den\n\n\n\ntry (Oral Biology) and Anatomy.

P. Dean Bok, Ph.D., Professor of Anatomy.

Nathaniel A. Buchwald, Ph.D., Professor of Biobeha\n\n\ngorical Sciences and Anatomy in Residence.

Caroline D. Clemente, Ph.D., Professor of Anatomy.

Edward L. Cooper, Ph.D., Professor of Anatomy.

E. Eldred, M.D., Professor of Anatomy (Vice Chair\n\n\nman, Gross Anatomical Teaching Resources).

Jerome Engel, M.D., Ph.D., Professor of Neurology and Anatomy.

Louis J. Goldberg, D.D.S., Ph.D., Professor of Den\n\n\ntistry (Oral Biology) and Anatomy.

Roger A. Gorski, Ph.D., Professor of Anatomy (Chairman of the Department.)

Lawrence Kruger, Ph.D., Professor of Anatomy and Anesthesiology.

Richard N. Lolley, Ph.D., Professor of Anatomy in Residence.

David S. Maxwell, Ph.D., Professor of Anatomy and Biobehavioral Sciences.

Daniel C. Pease, Ph.D., Professor of Anatomy.

Charles H. Sawyer, Ph.D., Professor of Anatomy.

Arnold B. Scheibel, M.D., Professor of Anatomy and Psychiatry.

John D. Schlag, M.D., Professor of Anatomy.

Joseph P. Segundo, M.D., Professor of Anatomy.

G. Douglas Silva, F.D.S., M.R.C.S., Professor of Den\n\n\ntistry and Medicine.

M. B. Stetman, Ph.D., Professor of Anatomy and Biobehavioral Sciences in Residence.

Anna N. Taylor, Professor of Anatomy in Residence.

Bernard Tovar, M.B., Ch.B., L.R.C.P., Professor of Pediatrics and Anatomy.

Jame R. Villablanca, M.D., Professor of Biobehavioral Sciences and Anatomy in Residence.

Charles D. Woody, M.D., Professor of Psychiatry and Anatomy in Residence.

Richard W. Young, Ph.D., Professor of Anatomy.

Mary A.B. Brazier, Ph.D., Emeritus Professor of Anatomy and Physiology in Residence.

John D. French, M.D., Emeritus Professor of Anatomy.

H.W. Magoun, Ph.D., Emeritus Professor of Anatomy.

Richard E. Ottmann, M.D., Emeritus Professor of Radiology and Anatomy.

Peklar F. Sognaes, Ph.D., Emeritus Professor of Dentistry (Oral Biology) and Anatomy.

Anthony M. Adinolfi, Ph.D., Associate Professor of Anatomy and Biobehavioral Sciences (Vice Chairman, Graduate and Postdoctoral Programs).

John H. Campbell, Ph.D., Associate Professor of Anatomy.

Emilio E. Decima, M.D., Associate Professor of Anatomy.

Eileen R. Dickson, Ph.D., Associate Professor of Anatomy.

Rafael Elul, M.D., Associate Professor of Anatomy.

Ronald M. Harper, Ph.D., Associate Professor of Anatomy.

Guido A. Zampighi, D.D.S., Ph.D., Associate Professor of Anatomy.

Emery G. Zimmermann, M.D., Ph.D., Associate Professor of Anatomy.

Gary W. Arendash, Ph.D., Assistant Research Anatomist.

Michael Chase, Ph.D., Professor of Physiology in Residence, and Research Anatomist.

Earle C. Crandall, M.D., Ph.D., F.A.C.S., Assistant Clinical Professor of Anatomy.

Klaus D. Doehler, Ph.D., Visiting Associate Research Anatomist.

Thelma Estrin, Ph.D., E.E., Professor of Computer Sciences in Residence and Research Engineer in Anatomy.

Deborah B. Farber, Ph.D., Associate Professor of Ophthalmology in Residence and Associate Research Anatomist.

James D. Grant, M.D., Assistant Research Anatomist.

Stanley J. Gross, M.D., Adjunct Professor of Anatomy.

Francis S. Grover, Ph.D., Adjunct Professor of Anatomy.

Noriok Kokka, Ph.D., Assistant Research Pharmacologist in Anatomy.

Raymond J. Last, M.D., F.R.C.S., Visiting Professor of Anatomy.

Bessie H. Lee, Ph.D., Assistant Research Anatomist.

Carlos A. E. Lemmi, Ph.D., Adjunct Associate Professor of Anatomy.

Robert D. Lindsay, Ph.D., Associate Research Anatomist.

Rafael Lorente de Nó, M.D., Visiting Professor of Anatomy and Surgery.

James F. McGinnis, Ph.D., Adjunct Associate Professor of Anatomy and Associate Research Biologist.

Dennis J. McGinty, Ph.D., Adjunct Associate Professor of Psychology and Associate Research Anatomist.

Hirohara Noda, M.D., Ph.D., Adjunct Professor of Physiology and Anatomy.

William T. O'Day, Ph.D., Associate Research Anatomist.

Antonino R. Pineda, M.D., Associate Clinical Professor of Anatomy.

Madeleine L.H. Schlag-Rey, Ph.D., Associate Research Anatomist.

Sant S. Sekhon, Ph.D., Associate Research Anatomist.

Gary C. Siek, Ph.D., Assistant Research Anatomist.

James R. Soares, Ph.D., Assistant Research Anatomist.

Elizabeth A. Stern, Ph.D., Assistant Research Anatomist.

Alfred Weinstock, D.D.S., Ph.D., Clinical Professor of Dentistry and Anatomy.

David I. Whitmoyer, Ph.D., Assistant Research Anatomist.

Wanda Wyrwicka, Ph.D., Research Anatomist.

Advising. Dr. A.M. Adinolfi is the Vice Chairman for Graduate and Postdoctoral Programs, Department of Anatomy, UCLA School of Medicine, Los Angeles, CA 90024. Dr. Adinolfi and members of the Department's Graduate Student Affairs Committee will serve to advise students of their eligibility for the master's degree and in the selection of courses. Students are expected to affiliate with the first year with a staff member with similar research interests and obtain more selective guidance.

Major Fields or Subdisciplines. The major fields in which graduate research may be undertaken in the Anatomy Department include a) neuroanatomy and neurophysiology, b) neuroendocrinology, and c) cell and developmental biology.

Foreign Language Requirement. No foreign language is required.

Course Requirements. A total of 36 units of coursework are required, 8 of which can be in the 500 series, and 20 of which must be graduate courses. The following courses are required of all Master's degree candidates: two of the major anatomy courses chosen from Anatomy 101, 206A-206B and 207A-207B; one departmental graduate seminar; other courses as necessary to the candidate's particular program.

Thesis or Comprehensive Examination Plan. Candidates may elect either the thesis or examination plan. For the thesis plan, a committee of the student's adviser and two departmental members approves the thesis proposal after all coursework is completed (usually at the start of the second academic year). For the examination plan, the candidate must demonstrate a knowledge of general principles of anatomy, as well as competence in a restricted area of science. A committee of three members, appointed by the Vice Chairman for each candidate, administers a written examination, restricted to basic anatomical science. If a student fails this examination, the opportunity for re-examination will be decided by the Graduate Student Affairs Committee.

Time to Degree. The time to degree is normally 18-24 quarters or two academic years.

500-Series Course Limitations. Eight units of Anatomy 598 (2-12 units, S/U grading) may be applied toward the total course requirement, and only 4 toward the minimum graduate course requirement.

Teaching Experience: Teaching experience is not required for the degree.

Disqualification and Appeal of Disqualification. A student may be disqualified for (a) failure to maintain a grade point average of at least 3.0, (b) failure to comply with the graduate program requirements of the Department of Anatomy, or (c) violation of the standards of conduct as specified in the Student Conduct Code.

The student may present an appeal of disqualific-
fication in writing to the Graduate Student Affairs Committee of the Department of Anatomy.

The Ph.D. Degree

Admission Requirements. Students entering the Ph.D. program in the Department of Anatomy must have a bachelor's degree in a physical or biological science or in a premedical curriculum. Introductory courses in zoology and vertebrate embryology are required, as well as one year of general and organic chemistry and one year of college physics. Deficiencies in these courses must be made up before the student is admitted. Courses in comparative anatomy, cell biology, genetics, elementary statistics and the philosophy of science are recommended.

Students must submit the results of the Graduate Record Examination including the Advanced Test in Biology or in their undergraduate major. We require three letters of recommendation from professors evaluating potential for successful completion of graduate studies and independent research.

Further departmental information and brochures can be obtained by writing the Vice Chairman for Graduate and Postdoctoral Programs, Department of Anatomy, UCLA, School of Medicine, Los Angeles, CA 90024.

Advising. Dr. A.M. Adinolfi is the Vice Chairperson for Graduate and Postdoctoral Programs. His office is Room 73-245 Center for the Health Sciences. He and the members of the Graduate Student Affairs Committee advise students in selection of courses and other matters. When a student selects a faculty adviser for the dissertation research, his/her adviser assists in making out the student's program, helps to prepare for the qualifying examinations, and suggests to the Vice Chairperson the members of the doctoral committee.

Major Fields or Subdisciplines. The major fields in which graduate research may be undertaken in the Anatomy Department include a) neuroanatomy and neurophysiology, b) neuroendocrinology, and c) cell and developmental biology.

Foreign Language Requirement. A foreign language is not required for a Ph.D. in Anatomy. See #4 in Course Requirements for information on foreign language as an option.

Course Requirements. The Anatomy Department strives to produce graduates soundly qualified both for teaching of the anatomical subjects in medical or dental schools and for the conduct of productive research in a related area. Therefore, the general objectives of our program are:

A. to impart knowledge of the subject matter in the major subdivisions of Anatomy and the closely allied basic sciences, and to provide an opportunity to acquire skill and experience in the art of teaching;

B. to impart the informational background, practice in scientific method, exercise of critical judgment, and technical skill sufficient to enable the conduct of independent, imaginative research, and to provide experience in communication of these results.

In accord with these objectives, the following are required:

1. Basic knowledge of the fields of gross and microscopic anatomy and of the physiology and biochemistry of the mammalian organism. Normally this requirement is satisfied by successful completion of these major courses: a) human gross anatomy, b) human microscopic anatomy, c) neurosciences, d) mammalian physiology, and e) biological chemistry. Students with advanced training who have already passed courses similar to a), b), or c) may be asked to assist in their instruction.

2. Participation in at least two departmental seminars.

3. Completion of such other courses as are essential or supportive to the student's research interest.

4. Completion of a "Research Tool Requirement" which consists of the equivalent of 8 units of work selected by the student and his/her adviser to augment the dissertation project. This may be satisfied by a foreign language examination.

If the student elects the foreign language option, ability to read a foreign language must be shown by passing either (a) the Graduate School Foreign Language Test or (b) an intradepartmental exam.

If the student elects to take coursework to complete the Research Tool Requirement, a cohesive program of courses in a distinct discipline is selected which is in the student's general field of research. The program must be approved in writing by the faculty adviser and the Graduate Student Affairs Committee. Approval will not be given to courses which one would be expected to take to prepare for a major field of interest, nor to a program which appears to demand less preparation than that required for the equivalent of two courses (8 units) of upper division work.

Written and Oral Qualifying Examinations. Successful completion of the qualifying examinations is expected. Part I is a written examination administered by an ad hoc committee appointed by the Vice Chairperson, and is intended to evaluate the capacity to organize and integrate information derived from the five major required courses listed under I. above. Satisfactory completion of Part I is a necessary prerequisite for taking Part II, an oral examination conducted by the doctoral committee. The oral examination follows in two weeks to six months and often probes the student's dissertation proposal as well as an understanding of the field of specialization, the philosophy of science and the history of anatomy.

The Anatomy Department may decline to admit any student to the qualifying examination if, in its judgment, the student is inadequately prepared, is not sufficiently interested in those fields of research in which the Department can offer qualified and sufficient guidance, or is for other reasons not adaptable to the Department's program.

Time to Degree. Normal progress toward the Ph.D. is as follows:

<table>
<thead>
<tr>
<th>Academic Quarters</th>
<th>Calender Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>A. From graduate admission to selection of faculty adviser</td>
<td>3 - 6</td>
</tr>
<tr>
<td>B. From graduate admission to completion of required courses</td>
<td>6</td>
</tr>
<tr>
<td>C. From graduate admission to the Written and Oral Qualifying Examination</td>
<td>6 - 9</td>
</tr>
<tr>
<td>D. From graduate admission to advancement to candidacy</td>
<td>2 - 3</td>
</tr>
<tr>
<td>E. From advancement to candidacy to the Final Oral Examination</td>
<td></td>
</tr>
<tr>
<td>F. From graduate admission to award of the degree</td>
<td>12 - 15</td>
</tr>
</tbody>
</table>

Final Oral Examination. A dissertation must be completed and successfully defended in a final examination. Only exceptionally will approval be given to a dissertation problem on a subject unrelated to the general fields of research followed by the various faculty members.

Teaching Experience. Student teaching activities are coordinated by the Vice Chairperson. In general, these activities consist of participation in two of the major departmental courses. Teaching activities occupy a limited portion of time (two to three quarters).

Disqualification and Appeal of Disqualification. A student may be disqualified for (a) failure to maintain a grade point average of at least 3.0, (b) failure to comply with the graduate program requirements of the Department of Anatomy, or (c) violation of the standards of conduct as specified in the Student Conduct Code.

The student may present an appeal of disqualification in writing to the Graduate Student Affairs Committee of the Department of Anatomy.
Upper Division Courses

101. Microscopic Anatomy (2 courses) Four three-hour sessions per week in the fall quarter. Prerequisite: enrollment in School of Dentistry or consent of instructor. Lectures, demonstrations and laboratory procedures necessary to an understanding of correlation of microscopic anatomy with dissection of the human cadaver.

Mr. Dikeman and the Staff

102A-102B. Gross Anatomy of the Human Body. (1 course, 2 courses) (Formerly numbered 100 and 102.) One hour of lecture and four hours of lab per week in the winter quarter; four hours of lecture and twelve hours of lab per week in the spring. Prerequisite: enrollment in School of Dentistry or consent of instructor. Course 102A is prerequisite to 102B. This course is offered on an In-Progress basis, which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for all quarters of work. Systemic and topographical human anatomy with dissection of the human cadaver.

Mr. Harper and the Staff

M103A-M103B. Basic Neurology. (¾ course, ¾ course) (Same as Physiology M103A-M103B.) Two one-hour sessions and one three-hour session per week of the last three weeks of the winter quarter; two two-hour sessions and three three-hour sessions per week in the spring quarter. Prerequisite: Medical school status or consent of instructor. Lectures, conferences, demonstrations and laboratory procedures necessary to the understanding of the nervous system. In-Progress grading.

Mr. Schlag and the Staff

104. Mammalian Histology. (1½ courses) Three three-hour sessions per week in the fall quarter. Prerequisite: enrollment in School of Dentistry or consent of instructor. Lectures, demonstrations and laboratories dealing with the structural organization of tissues and organs at the microscopic level.

Mr. Campbell and the Staff

106. Mammalian Neurology. One-hour session and one four-hour session per week in the winter quarter. Prerequisite: consent of instructor. Lectures, demonstrations and laboratories dealing with the fundamental structure and functional organization of the nervous system.

Mr. Kruger and the Staff

Graduate Courses

201. Structure and Function of Cells and Tissues. (½ course) One hour of lecture and one hour of discussion per week in the fall quarter. Prerequisite: course 101 (which may be taken concurrently) and consent of instructor. Current topics on structural and functional aspects of microscopic anatomy. Graded on an S/U basis only. May be repeated for credit. The Staff

M203. Oral Embryology. (Same as Oral Biology M203.) Four hours per week in the spring quarter. Lectures and laboratory instruction in the development and histological structure of the facial region and the oral and peri-oral organs and tissues.

Mr. Bernard

M205A-M206B. Neurosciences: The Introductory Course for Graduate Students. (1½ courses, 1½ courses) (Same as Neurosciences M206A-M206B.) Three hours of lecture and two hours of lab per week in the winter quarter, five hours of lecture and two hours of lab per week in the spring quarter. Prerequisite: a course (or equivalent) in basic and/or general physiology (such as Physiology 101) or consent of instructor. This course is offered on an In Progress basis, which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for all quarters of work. Introductory course in the basic principles of the nervous system for graduate students as a prerequisite to more advanced courses. Fundamental approaches to neuroanatomy (winter quarter), neurophysiology (spring quarter), and the brain mechanisms for behavior (spring quarter) will be stressed.

Mr. Decima, Mr. Scheibel and the Staff

207A-207B. Gross Anatomy. (2 courses, 1 course) Four four-hour sessions per week in the fall quarter; one three-hour, one four-hour and one five-hour session per week in the winter quarter (first seven weeks). Prerequisite: consent of instructor. Offered on an In Progress basis. Lectures and dissection of the human body. Medical students must enroll for all quarters. Mr. Sawyer and the Staff

208A-208B. Electromyography for Neuroscientists. Two hours of lecture and four hours of lab per week in the fall and winter quarters. Prerequisite: consent of instructor. To develop an understanding of the electronic mechanisms which underlie brain function, exploring methods of passive networks, operational amplifiers, semicon- ductor theory, digital logic, waveform generation, signal conditioning, data acquisition methods and neurophysiological instrumentation systems. Mr. Whitmoyer

209. Fine Structure and Function of the Central Nervous System. (½ course) Two one-hour sessions per week in the fall quarter of even-numbered calendar years. Prerequisite: Basic Neurology. Lectures and discussions of the fine structure of selected areas of the central nervous system, together with related electrical and biochemical patterns of activity.

Mr. Scheibel

210A-210B. Inflammatory Neoplasms. (1½ courses) One two-hour session per week in the fall quarter with labs scheduled by instructor. lectures, conferences, demonstrations and laboratory procedures necessary to the understanding of the central nervous system. In-Progress grading.

Mr. Lemmi and the Staff

211. Cellular Basis of Learned Behavior. (½ course) One two-hour lecture and demonstration per week in the fall quarter with labs scheduled by instructor. Prerequisite: Microscopic Anatomy, Mammalian Physiology, Anatomy and physiology of cerebral processes in alerting, learning, focusing attention and memory.

Mr. Woody

212. Neural Mechanisms of Inhibition, (½ course) Two hours per week in the fall quarter of even-numbered calendar years. Prerequisite: Basic Neurology. A systematic consideration of inhibitory processes in the nervous system from the synapse to the integrative brain. Special attention is given to the recent concepts of inhibition at the behavioral level and their implications for learning, emotion and mental health.

Mr. Stemman

M213. Multigene Families. (Same as Biology M213) Four hours of lecture or discussion per week in the fall quarter. Prerequisites: Biology M132 and M134 or equivalent and consent of instructor. Analysis of the molecular structure, developmental regulation, and evolution of multigene families. Topics to be discussed will include the hemoglobins, immunoglobulins, histones, ribosomal RNAs, satellite DNAs, and histocompatibility antigens. Grading basis S/U only.

Mr. Campbell, Mr. Tobin

214. Data Acquisition in Behavioral Neurophysiology. Two hours per week in the fall quarter of odd-numbered calendar years. Special emphasis is placed on the recent development of new physiological techniques in behavioral studies; data acquisition systems and computer analysis of neurophysiological data.

Mr. Harper and the Staff

221. Gross Anatomy of the Head and Neck. Two hours of lecture, one hour of discussion and one hour of lab per week. Prerequisite: course 102A-102B or 105A-105B or 207A-207B. Intensive and advanced study of the head and neck with relevant study of the thorax and axilla. Special emphasis is placed on applied anatomy and on understanding basic organizational concepts. This course is intended for those who anticipate research or professional school teaching. Enrollment limited to 12. Offered in the spring quarter only of even-numbered calendar years.

Mr. Harper and the Staff

M224A. Structure and Composition of Connective Tissue. (½ course each) (Same as Oral Biology M224A-M224B.) Two hours of discussion per week in the fall and winter quarters. Prerequisite: histology, biochemistry. A seminar course designed for graduate study. Discussion of basic science and clinical implications of current topics in the biology of connective tissue. Mr. Weinstock and the Staff

M225. Biology of Bone. (½ course) (Same as Oral Biology M214.) Two hours of lecture and one hour of discussion per week in the winter quarter. Prerequisite: consent of instructor. Embryology of bone tissue; bone as an organ; growth and development of specific bones; biochemistry and physiology of bone, remodeling of bone; histogenesis; histological configuration and correlation of biochemical pathways to periostal pathology. In-Progress grading.

Mr. Goldberg, Mr. Chandler

M226A. Brainstem Control of Rhythmic Movements. (Same as Oral Biology M227A and Kinesiology M224A.) Lecture, two hours. Discussion of the central nervous system mechanisms which coordinate and control the contraction patterns of the muscles which are involved in movement such as suckling, chewing, swallowing, speech, respiration and respiration. Emphasis on the interaction among brain stem reflexes, pattern generators and "voluntary" control centers. To be offered in the Fall Quarter.

Mr. Goldstein, Mr. Chandler

M228B. Brainstem Control of Rhythmic Movements. (Same as Oral Biology M227B and Kinesiology M243B.) Lecture, two hours. Prerequisite: course M226A or Oral Biology M227A or Kinesiology M224A. For description, see Anatomy M226A.

Mr. Cooper

251. Problems in Developmental and Comparative Immunology. (1½ course) One two-hour session per week in the winter quarter. Prerequisite: consent of instructor. Review of current literature emphasizing early development and evolution of immune competence.

Mr. Cooper

252. Seminar on Basic and Quantitated Neurophysiology. (1½ course) One 90-minute session of discussion per week in the fall quarter. Prerequisite: consent of instructor. Lectures on basic neurophysiology. Early lectures by invited specialists on their specific fields. Later lectures, one per student and on a topic chosen and prepared in collaboration with the instructor. Offered in the spring quarter only of even-numbered years.

Mr. Segundo
253. Communication and Coding in Nervous Systems. Two 90-minute sessions and one two-hour session per week. Prerequisite: consent of instructor. Presentation, discussion and critique of efforts to quantify neuronal function, where the essence of the mathematics is expressed in qualitative and physiologically meaningful terms. For example: stability, neurons as analyzers of spike trains, identification of synaptic operators. Offered in the spring quarter only of odd-numbered years. Mr. Segundo

255A-255D. Seminar in Endocrinology. (½ course each) One two-hour lecture per week in the winter and spring quarters. Prerequisite: consent of instructor. Mr. Sawyer and the Staff

256. Seminar in Cell Structure and Function. (½ course) One hour of lecture and one of discussion per week in the winter and spring quarters. Prerequisite: consent of instructor. Selected topics in cell biology emphasizing those areas which are of current interest. Includes an analysis of the various techniques being used to study the cell. Ms. Dirksen and the Staff

257. Journal Reviews in Experimental Anatomy. (½ course) One two-hour session per week. Research frontiers in various fields of experimental anatomy are reviewed and mutually discussed by graduate students and professors. The Staff

258. Seminars in Neuroscience. (½ course) Two hours per week in the fall quarter of odd-numbered years and winter quarter of even-numbered calendar years. Prerequisite: a course in basic neurology and course 209. Topics of current interest or ongoing research projects are presented, and both content and method of presentation are examined. May be repeated for credit. Mr. Scheibel

M260. Fundamental Concepts of Neuroendocrinology. (Same as Neuroscience M260.) Two hours of lecture and two hours of discussion per week in the winter quarter of odd-numbered calendar years. Prerequisite: Biochemistry 101C, Anatomy 206A and 206B, or consent of instructor. Basic concepts of neuroendocrine integration including analysis of the current literature and research techniques. Mr. Gorski

M261. Neuronal Circuit Analysis. (½ course) (Same as Neuroscience M261.) Three hours of lecture or discussion per week offered during the winter quarter. Prerequisite: Anatomy 206A and 206B or equivalent. The course will be run in a seminar form with strong emphasis on specific reading assignments. It will present an integrated view of neuronal circuit analysis at an advanced level and examine the layout and performance of a variety of basic neuronal circuits serving different control functions. Mr. Schlag

265. Evolution of Cancer. (½ course) Two hours of lecture or discussion per week during the winter quarter. Prerequisite: consent of instructor. Review of current literature emphasizing the appearance of tumors and neoplasms in representative invertebrates, fishes, amphibians and reptiles. Theories of cancer development from the evolutionary viewpoint. Mr. Cooper

390A-390B. The Peer Review System. (½ course each) Two hours of discussion per week in the winter and spring quarters of odd-numbered calendar years. Prerequisite: advancement to candidacy in integrative or systems biology or consent of instructor. Offered on an In Progress basis. Introduction to the peer review system for the evaluation of research proposals. After consideration of the grant review process, each student prepares an abbreviated grant application which is evaluated in a mock peer review session moderated by the faculty. Mr. Gorski

495. Communicating Scientific Information. (½ course) Two hours of lecture per week in the winter quarter. Prerequisite: enrollment as a candidate for advanced degree in Anatomy. Student papers and lectures serve as the basis for group discussions of the art and science of effective written and oral communication of scientific information. May be repeated for credit. The Staff

501. Cooperative Program. (½ to 2 courses) Prerequisite: approval of UCLA Graduate Adviser and Graduate Dean. Approval of host campus Instructor, Department Chairman and Graduate Dean. The course is used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. To be graded S/U. The Staff

Individual Study and Research

596. Directed Individual Study or Research. (½ course to 3 courses) The Staff

597. Preparation for the Master's Comprehensive Examination or the Doctoral Qualifying Examination. (½ course to 3 courses) The Staff

598. Thesis Research for Master's Candidates. (½ course to 3 courses) The Staff

599. Dissertation Research for Ph.D. Candidates. (½ course to 3 courses) The Staff

Medical History Division

(Department of Anatomy)

Franklin D. Murphy, M.D., Sc.D., Professor of Medical History.

Mary A.B. Brazier, Ph.D., Emeritus Professor of Medical History.

John Field, II, Ph.D., Emeritus Professor of Medical History and Physiology.

L.R.C. Agnew, M.D., Associate Professor of Medical History.

Robert G. Frank, Jr., Ph.D., Associate Professor of Medical History and History.

Ynez V. O'Neill, Ph.D., Associate Professor of Medical History and History.

Elizabeth R. Lomax, M.D., Ph.D., Adjunct Lecturer. Frances Keddie O'Malley, M.D., Research Medical Historian.

Medical history includes the theory and practice of medicine in the context of general history. While medicine can be learned and practiced without knowledge of its past, a sound knowledge of medical history will make a physician more appreciative of his/her profession's achievements, and less likely to repeat mistakes of the past. Furthermore, medical history illuminates current ethical and social aspects of medicine.

Upper Division Courses

107A-107B. Historical Development of Medical Sciences. (Same as History M106E-M106F.) Mr. Frank

110. Medicine and Society in 20th Century America. Mr. Frank

M197. The Biomedical Sciences in the 19th Century. Mr. Frank

Graduate Courses

240A-240B. History of Medical Sciences. (½ course each) One hour of lecture per week in the fall and winter quarters. Survey of the development of scientific and medical thought from ancient times to the present.

241A-241B. History of Clinical Sciences. (½ course each) One hour of lecture per week in the fall and winter quarters. Survey of the development of the clinical specialties and comparison of medical practice in western civilization with that developed in other parts of the world. Mr. Agnew

242. History of Pathology. (½ course) One hour per week in the fall quarter. Survey of the history of pathology and related sciences from antiquity to the 20th century, tracing the development of pathological theory, practice, organization and education and comparing them to current practice. Mr. Agnew

243. History of Surgery. (½ course) One hour per week in the winter quarter. Survey of the history of surgery and related sciences from antiquity to the 20th century, tracing the development of surgical theory, practice, organization and education and comparing them to current practice. Mr. Agnew

244. History of American Medicine. (½ course) One hour per week in the spring quarter. Survey of the history of medicine in the United States from the colonial period to the present. Mr. Agnew

246. History of Neurophysiology: Its Impact on Psychology and Medicine. Eight one-hour lectures and eight two-hour seminars in the winter quarter covering the development of experimental neuropsychology from its scientific roots in the 17th century through the recognition of the excitability of the nervous system, to the use of this characteristic in revealing the functions of the central nervous system. The seminar will complement the lectures through a discussion of the interaction of neurophysiological ideas with contemporaneous philosophy and medicine. The lectures may be audited independently. Ms. Brazier, Ms. O'Neill, Ms. Lomax

250. History of Medical Psychology. (½ course) One hour per week in the winter quarter. An examination of the themes underlying modern mental health theories. Beginning with a review of contemporary thinking, the lectures focus upon the various factors shaping present concepts of mental disorders, and provide a framework for the understanding of current issues. Ms. Lomax, Ms. O'Neill

Individual Study and Research

596. Directed Individual Studies in Medical History. Investigation of subjects in medical history selected by students with the advice and direction of the instructor in the fall, winter and spring quarters. Independent readings and oral presentation. Mr. Frank

599. Research for and Preparation of the Doctoral Dissertation. (1 to 2 courses) Investigation of materials relative to the doctoral dissertation, their evaluation and written presentation. The Staff
Anesthesiology

Robert O. Bauer, M.D., Professor of Anesthesiology and Pharmacology.
J. Weldon Bellville, M.D., Professor of Anesthesiology.
Verne L. Brechner, M.D., Professor of Anesthesiology.
Walter Corner, M.D., Adjunct Professor of Anesthesiology.
Edward Deland, Ph.D., Adjunct Professor of Anesthesiology.
Werner E. Flacke, M.D., Professor of Anesthesiology in Residence.
Ronald L. Katz, M.D., Professor of Anesthesiology (Chairman of the Department).
Lawrence Kruger, Ph.D., Professor of Anesthesiology and Anatomy.
Richard Patterson, M.D., Professor of Anesthesiology.
Eduardo Rubinstein, M.D., Ph.D., Professor of Anesthesiology and Physiology in Residence.
Stuart F. Sullivan, M.D., Professor of Anesthesiology (Executive Vice Chairman of the Department).
Leonard F. Walks, M.D., Professor of Anesthesiology.
John F. Vilipen, M.D., Adjunct Professor of Anesthesiology (Vice Chairman of the Department).
Joan W. Flacke, M.D., Adjunct Associate Professor of Anesthesiology.
Ching-Muh Lee, M.D., Associate Professor of Anesthesiology.
Jordan D. Miller, M.D., Associate Professor of Anesthesiology.
Robert C. Reynolds, M.D., Ph.D., Associate Professor of Anesthesiology.
Joseph Cadranell, M.D., Assistant Clinical Professor of Anesthesiology.
Selma H. Calmes, M.D., Assistant Professor of Anesthesiology in Residence.
Marcos Canas, M.D., Adjunct Assistant Professor of Anesthesiology.
Chauol Chanti, M.D., Adjunct Assistant Professor of Anesthesiology.
Kenneth A. Conklin, M.D., Ph.D., Assistant Professor of Anesthesiology.
James T. Conner, M.D., Assistant Professor of Anesthesiology.
Theresa Ferrer-Brechner, M.D., Assistant Professor of Anesthesiology.
George P. Herr, M.D., Assistant Professor of Anesthesiology.
Kumiko Iwamoto, M.D., Assistant Professor of Anesthesiology.
Robert D. Kaufman, M.D., Assistant Professor of Anesthesiology.
Richard J. Kroening, M.D., Adjunct Assistant Professor of Anesthesiology and Lecturer in Dentistry.
Arnold Lee, Assistant Adjunct Professor of Anesthesiology.
Stanley Schneider, M.D., Assistant Clinical Professor of Anesthesiology.
Janice Silverton, M.D., Adjunct Assistant Professor of Anesthesiology.
Young-Zin Sohn, M.D., Adjunct Assistant Professor of Anesthesiology.
Frank A. Takacs, M.D., Adjunct Assistant Professor of Anesthesiology.
Susan Ward, Ph.D., Assistant Professor of Anesthesiology in Residence.

John DeAngelis, M.D., Clinical Instructor of Anesthesiology.
Vladimir Golovchinsky, M.D., Assistant Researcher in Anesthesiology.
Emil Hackner, M.D., Clinical Instructor of Anesthesiology.

Leah E. Katz, CRNA, B.S.N., M.A., Lecturer in Anesthesiology.
Felice Miller, Ph.D., Clinical Instructor of Anesthesiology.
Hon Chung Poon, M.D., Specialist in Acupuncture.
Yam Ying Tsai, M.D., Clinical Instructor of Anesthesiology.
Ronald Wender, M.D., Clinical Instructor of Anesthesiology.

The Master of Science Degree (Nurse Anesthesia)

The Department of Anesthesiology in the School of Medicine offers a program leading to the M.S. degree in Nurse Anesthesia. This program prepares qualified Registered Nurses in the specialty of anesthesiology and qualifies the graduate to sit for the certification examination given by the Council on Certification of Nurse Anesthetists. The graduate attains a high level of clinical competence combined with an extensive body of didactic knowledge relevant to the specialty. The program is designed to lead to careers in the clinical practice of nurse anesthesiology and the teaching of nurse anesthesiology with the opportunity for participating in research in the area.

Admission Requirements

1. Graduation from an accredited nursing program satisfactory to the Program of Nurse Anesthesia and the UCLA Graduate Division. Students may be required to enroll in certain additional undergraduate courses prior to final consideration of the application by the Program.

2. Licensure as a Registered Nurse prior to entry into clinical coursework. Evidence of status as a Registered Nurse in the State of California is mandatory.

3. Completion of a minimum of one year experience as a graduate nurse in an acute care area of nursing, preferably an intensive care unit.

4. Professional and academic competence attested through three letters of recommendation.

5. Graduate record examination aptitude test results submitted to the Program of Nurse Anesthesia.

6. Successful completion of the following undergraduate level courses:
   a. Inorganic Chemistry, Organic Chemistry and Biochemistry
   b. Introductory Physics
   c. Biology
   d. Anatomy
   e. Physiology
   f. English
   g. Psychology
   h. Statistics
   i. A course in Methods of Research is highly recommended.

7. A scholarship record satisfactory to the Graduate Division, University of California, Los Angeles, and the Program of Nurse Anesthesia. Transcripts must be sent to both the Graduate Division and the Program of Nurse Anesthesia.

8. Interview with the Program Director or designee and observation in the clinical practicum.

9. Interview with members of the final selection committee.

10. Approximately five to six students will be selected for admission in September by the final selection committee which meets annually in January.

Information regarding the program may be obtained by writing for the departmental brochure at the following address: Program of Nurse Anesthesia, UCLA Center for Health Sciences 56-125, Los Angeles, California 90024

Additional information may be obtained by phone at (213) 825-4123. All applicants must apply to both the Department and the Graduate Division.

Advising: All entering students are assigned an adviser on the first day of the quarter. Appointments with an adviser may be made prior to that time by contacting the Program.

Monthly written clinical evaluation by all clinical faculty with whom the student has worked and subsequent counseling by an assigned faculty member or the Graduate Adviser occurs during the first quarter. In subsequent quarters, overall assessment of the student's progress is made through tri-monthly written evaluation and counseling.

All students meet with the Graduate Adviser for at least one scheduled period each quarter of the curriculum. Written records are kept of all evaluations and interviews.

Graduate Adviser: Leah Katz, UCLA Center for Health Sciences 56-125, Los Angeles, California 90024 (213) 825-4123.

Foreign Language Requirement. There is no foreign language requirement for the M.S. degree.

Course Requirements

Total courses required for the degree: 13 1/4
Total graduate courses required for the degree: 13 1/4

Thesis or Comprehensive Examination Plan

Written Qualifying Examination: A student may elect either an oral comprehensive examination or a prepared thesis option for degree completion. Each student shall take a written comprehensive examination for course completion, regardless of his/her choice of options.
**Thesis Plan:** The Thesis Committee is established during the second year of the Program. The thesis proposal is written and approved during the Winter or Spring Quarter of the second year. The thesis committee consists of a minimum of three Department members.

**Oral Qualifying Examination:** Students electing this option will have demonstrated didactic and clinical competence in the field, and completed selected Physiology or Pharmacology and Education courses. The Graduate Division will be notified of the readiness for the examination and the Committee for Examination will consist of: Chairperson, Department of Anesthesiology and two additional faculty members, at least one representing a related field such as physiology, anatomy or pharmacology.

Students electing the oral examination option must, in addition to the required curriculum in anesthesia, successfully complete designated courses in curriculum, testing and evaluation, and instruction to meet the accreditation requirements for teachers of anesthesia. The oral examination is general in scope and may include information from all aspects of the curriculum. Examinations are offered quarterly.

**Time to Degree.** Eight quarters

**500 Series Course Limitations.** Completion of 598A may be repeated two times but only two of the courses will count toward the degree. Letter grading is utilized in 500 series courses.

**Disqualification and Appeal of Disqualification.** The Program reserves the right to dismiss any student who appears academically, clinically and/or personally unable to carry out the professional responsibility of the nurse anesthetist. The didactic portion of the curriculum follows UCLA academic requirements and conditions under which students are subject to academic dismissal are those found in the UCLA Graduate Catalog. For the clinical portion of the program, courses (400A, B, C, D, E, F, G) the clinical evaluation committee of the Department recommends dismissal to the Program Director and Department Chairperson. They will review the recommendation with the student and determine subsequent action which may include dismissal. The Department maintains documentation of all clinical and didactic work. Each student is evaluated on a trimestral basis in written form. An appeal process is available within the Department and terminates in a due process committee which includes outside representation. All students must maintain a GPA of 3.0 in order to remain in good academic standing.

**Other relevant information**

1. It is necessary that students complete all didactic and clinical work to earn the Master of Science degree.

2. The Program does not discriminate on the basis of race, color, national origin, religion, sex or handicap unless the handicap is determined by the Selection Committee to be of such nature as to preclude the safe clinical practice of anesthesia.

3. All students must complete a minimum of 550 cases as the primary anesthetist for program completion.

4. All students must meet the requirements for application to sit for the Certification Examination of the AANA for program completion.

**Graduate Courses**

**210A. Chemistry and Physics of Nurse Anesthesia I.** (1/4 course) Lecture, two hours; discussion, one hour. A study of the principles of chemistry and physics as applied specifically to the practice of anesthesia. Mr. Katz

**210B. Chemistry and Physics of Nurse Anesthesia II.** (1/4 course) Lecture, two hours; discussion, one hour. Prerequisite: Chemistry and Physics of Nurse Anesthesia I. A continuation of the study of the principles of chemistry and physics as applied specifically to the practice of anesthesia. Mr. Katz

**210C. Chemistry and Physics of Nurse Anesthesia III.** (1/3 course) Lecture, two hours; discussion, one hour. Prerequisite: Chemistry and Physics of Nurse Anesthesia II. A continuation of the study of chemistry and physics as related to anesthesia management with specific emphasis on biochemistry as related to acid-base balance and theories of narcosis. Mr. Katz

**215A. Pharmacology of Nurse Anesthesia I.** (1/4 course) Lecture, four hours; discussion, one hour. Introduction to basic pharmacological principles as applied to administration of anesthesia. A study of uptake and distribution, mechanism of action, fate and toxicity as related to anesthetic agents. Mr. Katz

**220A. Respiratory Anatomy and Physiology for Nurse Anesthetists I.** (1/2 course) Lecture, two hours; discussion, one hour. A study of the structure and function of the respiratory system with emphasis on anatomy and physiology at the cellular level. Ms. Ward

**220B. Respiratory Anatomy and Physiology for Nurse Anesthetists II.** (1/2 course) Lecture, two hours; discussion, one hour. A continuation of respiratory anatomy and physiology with emphasis on the respiratory system as related to anesthesia administration and relevant problems. Ms. Ward

**220C. Respiratory Anatomy and Physiology for Nurse Anesthetists III** (1/2 course) Lecture, two hours; discussion, one hour. A continuation of the study of respiratory anatomy and physiology as related to anesthesia administration and relevant problems. Ms. Ward

**221. Cardiovascular Anatomy and Physiology for Nurse Anesthetists.** (1/4 course) Lecture, four hours; discussion, one hour. An integrated study of the anatomy and physiology of the C-V system as related to the management of anesthesia administration. Ms. Katz

**M222. Biological Control Systems.** (formerly numbered Engineering M222F). (Same as System Science M222F) Lecture, four hours. Prerequisite: Engineering 122A or equivalent. Introduction to the application of control theory to the modeling and analysis of biological control systems, such as the respiratory system, cardiovascular system and neuromuscular system. Emphasis on solving problems of current interest in biomedicine. Mr. Wilberg (Sp)

**223. Anatomy and Physiology of the Endocrine and Excretory System for Nurse Anesthetists.** Lecture, four hours; one to two hours. An integrated study of the endocrine and excretory systems as relevant to the management of anesthesia administration. Ms. Katz

**225. Anatomy and Physiology of the Nervous System for Nurse Anesthetists.** Lecture, four hours; one to two hours. An integrated study of the anatomy and physiology of the nervous system as it relates to the management of anesthesia administration. Mr. Katz

**290. Anesthesia Seminar for Nurse Anesthetists.** (1/4 course) Discussion, two to three hours. Discussion of special problems in anesthesia of interest to the student. Mr. Katz and the Staff

**400A. Basic Clinical Anesthesia for Nurse Anesthetists I.** (1/3 course) Lecture, three hours; laboratory, thirty hours. Prerequisite: Fundamentals of Anesthesia Practice for Nurse Anesthetists. Correlation of techniques of anesthesia administration with basic science knowledge as applied in the clinical area with supervised practice. Graded S/U only. Ms. Katz

**400B. Basic Clinical Anesthesia for Nurse Anesthetists II.** (1/2 course) Lecture, two hours; laboratory, thirty hours. Prerequisite: Basic Clinical Anesthesia Practice for Nurse Anesthetists I. A continuation of the practice of techniques of anesthesia administration as applied in the clinical area with supervised practice. Graded S/U only. Ms. Katz

**400C. Basic Clinical Anesthesia for Nurse Anesthetists III.** (1/2 course) Lecture, two hours; laboratory, thirty hours. Prerequisite: Basic Clinical Anesthesia Practice for Nurse Anesthetists II. A continuation of techniques of anesthesia administration as applied in the clinical area with supervised practice. Graded S/U only. Ms. Katz

**400D. Clinical Anesthesia for Nurse Anesthetists IV.** (1/2 course) Lecture, two hours; laboratory, thirty hours. Prerequisite: Basic Clinical Anesthesia Practice for Nurse Anesthetists III. A practice of refinement of anesthesia techniques with emphasis on specialized areas of anesthesia administration with supervised practice. Graded S/U only. Ms. Katz

**400E. Clinical Anesthesia for Nurse Anesthetists V.** (1/2 course) Lecture, two hours; laboratory, thirty hours. Prerequisite: Clinical Anesthesia for Nurse Anesthetists IV. A practice of refinements of anesthesia techniques with emphasis on specialized areas of anesthesia administration with supervised practice. Graded S/U only. Ms. Katz

**400F. Clinical Anesthesia for Nurse Anesthetists VI.** (1/2 course) Lecture, two hours; laboratory, thirty hours. Prerequisite: Clinical Anesthesia for Nurse Anesthetists V. A practice of refinements of anesthesia techniques with emphasis on specialized areas of anesthesia administration with supervised practice. Graded S/U only. Ms. Katz

**400G. Clinical Anesthesia for Nurse Anesthetists VII.** (1/2 course) Lecture, two hours; laboratory, thirty hours. Prerequisite: Clinical Anesthesia for Nurse Anesthetists VI. A practice of refinements of anesthesia techniques with emphasis on specialized areas of anesthesia administration with supervised practice. Graded S/U only. Ms. Katz

**401. Orientation to Nurse Anesthesia.** (1/4 course) Lecture, two hours; discussion; one-half to one hour. Orientation to history, ethics and legal aspects of nurse anesthesia. Psychology related to patient undergoing surgery and anesthesia. Mr. Katz

**402. Fundamentals of Anesthesia Practice for Nurse Anesthetists.** Lecture, six hours; discussion, one to two hours. Introduction to basic principles of anesthesia administration including pre-anesthetic assessment, physical examination, techniques, procedures and anesthesia for specialized techniques and surgery. Ms. Katz
Anthropology

(Department Office, 341 Haines Hall)

Walter R. Goldschmidt, Ph.D., Professor of Anthropology

James N. Hill, Ph.D., Professor of Anthropology

Jerome Maquet, Ph.D., Professor of Anthropology (Chairman of the Department)

Clement W. Meinhard, Ph.D., Professor of Anthropology

Michael Moerman, Ph.D., Professor of Anthropology

Henry B. Nicholson, Ph.D., Professor of Anthropology

Wendell H. Oswald, Ph.D., Professor of Anthropology

Johannes Wilbert, Ph.D., Professor of Anthropology

Bobby Williams, Ph.D., Professor of Anthropology

Donald G. Lindburg, Ph.D., Adjunct Associate Professor of Anthropology

Pamela J. Brink, Ph.D., Associate Professor, School of Nursing and Anthropology

Bernard G. Campbell, Ph.D., Adjunct Professor of Anthropology

Brian Dillon, Ph.D., Lecturer in Anthropology

Robert B. Edgerton, Ph.D., Professor of Anthropology and Psychiatry

John G. Kennedy, Ph.D., Adjunct Professor of Psychiatry and Anthropology

L.L. Langness, Ph.D., Professor of Anthropology and Psychiatry

Donald G. Lindburg, Ph.D., Adjunct Associate Professor of Anthropology

Merrick Posansky, Ph.D., Professor of History and Anthropology

Douglas Price-Williams, Ph.D., Professor of Anthropology and Psychiatry

Hirosi Wataatsuma, Ph.D., Adjunct Professor of Anthropology

Thomas S. Weinsner, Ph.D., Assistant Professor of Anthropology and Psychiatry

C. Rainer Berger, Ph.D., Professor of Anthropology

Geography and Geophysics

William O. Bright, Ph.D., Professor of Linguistics and Anthropology

History and Theory are courses that deal in-depth with the history of anthropological thought and problems of anthropological methods of research (as distinct from courses in fieldwork or laboratory methods special to the several fields).

Admission Requirements. The University requires for admission to the Graduate Division a B.A. degree or the equivalent with a grade point average of 3.0 from a recognized college or university. The following documents must be received by Graduate Admissions, Graduate Division, 1247 Murphy Hall, UCLA, Los Angeles, California 90024:

1. Official Application,
2. Statement of Purpose,
3. Official transcripts of record, in duplicate, from each college or university at which the applicant has completed work.

The Department of Anthropology accepts students in the graduate program only in the Fall Quarter. The deadline for applicants is December 30, 1981, for the academic year 1982-83. The Department does not require an undergraduate major in anthropology though this is desirable. Promising students with a B.A. or M.A. in another field may be admitted, in which case a program of background studies based on the student's previous training and current objectives will be formulated. Knowledge of a foreign language is not required for admission, but completion of the language requirement before beginning work is highly recommended and students who have a record showing such completion are at an advantage in the selection process. In addition to the documents required by the University, students must submit directly to the Department of Anthropology:

1. Three letters of recommendation (preferably from Anthropologists),
2. GRE Scores,
3. Research or Term Paper.

These documents should be sent to: Graduate Counselor, Department of Anthropology, 341 Haines Hall, Los Angeles, California, 90024.

Once the applicant's file is complete it is submitted to the Departmental Admissions Committee. This committee reviews the file and forwards it to faculty members with related intellectual interests for sponsorship into the graduate program. The Department requires the sponsorship of two faculty members before a student is accepted. Upon departmental acceptance into our program, the recommendation is forwarded to the Graduate Admissions Office and the applicant will be officially notified by the Dean of the Graduate Division.

For further information on the departmental program, in general, a graduate syllabus is available which may be obtained without charge by writing to the above departmental address.
Disqualification and Appeal of Disqualification. A graduate student failing to maintain the University scholarship requirements, or the Departmental degree requirements will be recommended for termination from graduate status to the Dean of the Graduate Division. This recommendation will be made by the Chairperson of the Department after a vote of the faculty at the quarterly student review. Before the recommendation is sent to the Dean of the Graduate Division, the student will be notified and given two weeks (upon receipt of the notification) to respond to the decision in writing to the Chairperson. The matter will be reviewed by the Departmental Executive Committee which will make the final Departmental recommendation to the Dean.

The Masters of Arts Degree

Advising. All questions regarding graduate admissions and graduate student procedures are handled by the Graduate Counselor (Department of Anthropology, 314 Haines Hall, (231) 845-2511). The student is expected to contact his or her sponsors upon arrival to the Department to consult with them on guidance and formulating a program of courses. One of the sponsors will serve the student as chairperson of the M.A. Guidance Committee, and must thereafter be consulted at least once each quarter for evaluation of progress and approval of the Study List. The Committee chairperson (or if unavailable, the other sponsor or alternate committee member) must sign the official Study List Card to signify approval of the student's program at the beginning of each quarter. By the second quarter of residence, the student is expected to have selected a committee of three faculty members, at least one of whom must have the rank of Associate or Full Professor, to serve on the M.A. Guidance Committee.

This Guidance Committee is responsible for assisting the student in his or her progress toward the M.A. degree. It advises the student with respect to course program, evaluates the M.A. Examination, helps in the formulation of the student's M.A. paper and evaluates it, and finally recommends to the Department Faculty whether the student should be awarded the M.A., be admitted to the Ph.D. program, or be terminated. The Department, at the quarterly student review, makes the decision on these matters. The student will be notified of the departmental action by mail.

Students may at any time request changes in the membership of their Guidance Committee by formal written request. Approval of such a request requires written consent of both the newly added and the replaced committee member.

The Graduate Counselor maintains a file on each student which includes the materials submitted in the application, course grades and individual evaluations submitted by faculty members and all actions taken that fulfill requirements for the degree.

It is the student's responsibility to ensure that the materials listed below have been submitted to the Graduate Counselor:
1. The current composition of the M.A. Guidance Committee;
2. The departmental form indicating how the M.A. language requirement was fulfilled;
3. Advancement to Candidacy form indicating coursework completed;
4. The M.A. research paper and signature page.

The file will be open to students on written request to the Chairperson of the Department.

Foreign Language Requirement. M.A. language requirements for foreign language competency may be met by:
1. Passing the Educational Testing Services (ETS) examination in a foreign language with a score of 3 or better or the GSFLT with a score of 500 or better (may be taken at any time including undergraduate years);
2. Other demonstrations of proficiency in a foreign language by petition to the Chairperson of the Department of Anthropology. Such demonstrations may require examination by examiners within or outside the Department of Anthropology.

Bases for acceptable petitions include language training in the National Defense Institute, State Department, or Peace Corps, successful work in foreign universities in which the teaching is in another language, or other evidence that the student has foreign language proficiency.

Students whose native language is not English may petition to have the requirement waived. They are in effect credited with English as a second language. Formal written application for such waiver should be submitted to the student's Guidance Committee.

Core Course Requirements. Students may demonstrate their basic knowledge in the five Fields by: 1) taking (either as undergraduates or graduates) the core course with a passing grade of B or better, 2) by petition that work taken elsewhere constitutes the equivalent of such courses, or 3) by passing a special examination in each, in the spring quarter of their first year in residence. Courses taken while in graduate status to meet these field requirements may also serve to meet course unit demands for the M.A. degree.

Course Requirements. The minimum course load is two courses (8 units) per quarter, but it is highly recommended that students take three courses a quarter (12 units). An M.A. degree requires nine courses (36 units) with at least a 3.0 grade point average. All of the nine courses for the M.A. must be taken for a letter grade.

1. Four courses may be upper division (100 series);
2. At least five must be graduate seminars (200 series);
3. Three courses may be outside the major with the approval of the student's Guidance Committee;
4. Two of the courses may be anthropology independent studies (see Department for course numbers) with the approval of the student’s committee.

Master's Examination and Research Paper. The Department Masters' Degree Program is on the Comprehensive Examination Plan. The examination consists of two parts: 1) a written one-day examination and 2) a masters' paper.

The Written Examination. Each M.A. candidate must pass an examination in one of the five Fields to demonstrate competence and intellectual promise in the field of the student's specialization. This examination is to be taken in the third quarter of residence and may be taken a second time the following year, if a student fails to pass on the first effort. The M.A. examination for each Field will be written by those faculty members identified with the Field, but each student's examination will be evaluated by his or her M.A. Guidance Committee.

The Master's Paper. Each student is to submit an original paper based on field, laboratory or library research. This paper is due by the end of the student's fifth quarter of residence. The paper is intended to demonstrate the student's ability to generate or assemble a body of data, analyze it and indicate its relevance to established anthropological thought, and to demonstrate the student's ability to write lucid prose. The final paper should not exceed 40 pages in length and shall be presented in a form suitable for journal publication. The student's Guidance Committee is responsible for assisting the student in formulating a research paper, monitoring its progress, and evaluating the paper when submitted. In this assignment, students are urged to work closely with their adviser, within the constraints in time and resources available to them.

Normal Progress Toward the Masters Degree. Students will normally be accepted in the graduate program only in the Fall Quarter. Normal progress toward the degree is as follows:

<table>
<thead>
<tr>

</table>

*must be completed before advancement to candidacy to the M.A. Degree.
nated to the Dean of the Graduate Division, who officially appoints it. The Committee assesses the student’s overall progress, administers the Ph.D. Oral Qualifying Examination, supervises the student’s dissertation research, and administers the Final Oral Examination upon completion of the dissertation.

Foreign Language Requirement. The student must satisfy the Ph.D. language requirement before formally nominating the 5-member Ph.D. Committee and before taking the Qualifying Examinations. Any language useful for field study or/or library research is acceptable, and the format of the examination is determined by the student’s Departmental Doctoral Committee. The student must submit to his or her committee a comprehensive annotated bibliography, constituting a corpus of works relevant to his or her field of specialization and must demonstrate familiarity with the content of the bibliography by taking a written or oral examination. Students who speak English as a second language may waive the language requirement by petition with the approval of their Departmental Doctoral Committee. Under unusual circumstances, the Department will consider alternate means of fulfilling the requirement by petition to the Departmental Doctoral Committee, the Department Chairperson, and the Dean of the Graduate Division. The annotated bibliography and examination must be placed in the student’s file.

Course Requirements. The student must be in residence for one year between receipt of the M.A. degree and advancement to candidacy. During this time, coursework must be done with at least three different members of the faculty. Students must be enrolled in a minimum of 8 units at all times unless on an official leave of absence.

Written and Oral Examinations. The timing of the qualifying examinations will be set by the student in consultation with members of the Doctoral Committee. It may not take place earlier than the third quarter after receiving the M.A. degree. The Written Qualifying Examination is conducted by the 3-member Anthropology Doctoral Committee who will examine the student in three subfields of his or her choice. Two of these three subfields will be drawn from the student’s dissertation research, and the third will be specific to the needs and interests of the student and the dissertation plans that have been formulated. All students will be expected to have competence in general anthropological theory. The Department does not require this to be a closed book examination. The format of the examination is to be determined by the Departmental Doctoral Committee and might consist of sets of timed examinations administered in the Department, take home examinations, or sets of questions selected from a list previously known to the student. Written examinations must be completed at least four weeks prior to the last day of instruction in a quarter, and taken no less than two weeks prior to the Oral Qualifying Examinations. Students must submit the original and three copies of the written examinations to the Department Counselor, who will distribute them to the student’s committee. Each committee member must read and evaluate the entire examination, not just the questions in his or her own field, and this must be done within one week after receiving them. After consultation, the committee members for the written examination must make a unanimous decision as to whether the examination is to be graded pass or not pass. This decision will be reported on the departmental Written Qualifying Examination report. Upon successful completion of this examination, the student’s Doctoral Committee (including outside members) administers the Oral Qualifying Examination to the student. The committee determines the conditions for reexamination should the student fail either examination.

Normal Progress Toward Ph.D. Degree. For a full-time student admitted without deficiencies, normal progress after receiving an M.A. degree is considered to be:

Other Relevant Information. Graduate students are encouraged to participate in the Graduate Student Association which plays an important part in curriculum planning, speakers programs and departmental administration. The graduate students of Anthropology also publish Anthropology UCLA, a journal and Crossroads, a graduate student newsletter. The Department has a typing room and reading room with a large selection of anthropological journals. Participation in the Institute of Archaeology and the Museum of Cultural History is also encouraged.
Graduate Courses

Admission to all graduate courses is subject to the instructor's approval and completion of appropriate course requirements (when so indicated). Graduate courses are normally non-repetitive in content and may be repeated for credit with the consent of instructor and approval of the Graduate Counselor.

210-219. Archaeology

210. Analytical Methods in Archaeological Studies. (Formerly numbered 210A.) Prerequisites: one quarter of statistics and consent of instructor. This course will cover data analysis procedures in archaeological. The emphasis will be on the conceptual framework for the analysis of archaeological data. It will begin at the level of the attribute and end at the level of the region.

Mr. Read

211. Regional Analysis in Archaeology. (Formerly numbered 210B.) Prerequisite: consent of instructor. Anthropology 210P (formerly numbered 210A) is not a prerequisite for this course. This course surveys the analytical methods used in archaeology to study prehistoric settlement systems. Specific issues addressed include settlement distribution with respect to natural resources, settlement hierarchy and patterns of exchange.

Mr. Earle

212. Selected Topics in Hunter-Gatherer Archaeology. (Formerly numbered 214E.) Prerequisite: consent of instructor. Regional studies in the development of early human culture. This course may be repeated for credit.

Mr. Meighan

212G. Problems in Southwestern Archaeology. (Formerly numbered 205.) Prerequisite: consent of instructor. A consideration of prehistoric cultural systems in the American Southwest, with emphasis on the description and explanation of organizational variability and change. Specific research questions will vary with each course offering. This course may be repeated for credit.

Mr. Hill

213. Selected Topics in Problems in Old World Archaeology. (Formerly numbered 214F.) Prerequisite: consent of instructor. This course may be repeated for credit.

Mr. Sackett

214. Selected Topics in Prehistoric Civilizations of the New World. (Formerly numbered 214G.) Prerequisite: consent of instructor. The Mesoamerican and Andean civilizations will normally constitute the major focus of this seminar. This course may be repeated for credit.

Mr. Donnan, Mr. Nicholson

215. Field Training in Archaeology. (1 to 2 courses) (Formerly numbered 214J.) Prerequisite: previous experience in archaeology. Advanced training in archaeological excavation techniques, including organization of projects, supervision of field crews, methodology of field recording and preliminary analysis of field data. This course may be repeated for credit.

Mr. Meighan

216. Dating Techniques in Environmental Sciences and Archaeology. (Formerly numbered M214A.) (Same as Geography M278.) Prerequisite: consent of instructor. A colloquium devoted to topics in dating techniques in environmental sciences, archaeology, and biological anthropology as well as laboratory instruction and experimental work. This course may be repeated for credit.

Mr. Berger

217. Explanation of Societal Change. (Formerly numbered 234.) Prerequisite: consent of instructor. Examination of the processes of sociocultural evolution, emphasizing the usefulness of a variety of explanatory models drawn from General Systems Theory, ecology, anthropology, and other sources. Specific research questions will vary with each course offering. This course may be repeated for credit.

Mr. Hill

18. Historical Reconstruction and Archaeology. (Formerly numbered 219G.) Prerequisite: consent of instructor. A study of the processes of historical development through archaeological research. Application of ethnohistory to archaeological problems. This course may be repeated for credit.

Mr. Meighan, Mr. Nicholson

M219A-M219B. Graduate Core Seminar in Archaeology. (Same as Archaeology 210A-210B.) Seminar discussions based on a carefully selected list of 30-40 major archaeological works. These core courses provide the student with a foundation in the breadth of knowledge required by a professional archaeologist. The courses comprise archaeological historiography, a survey of world archaeology and archaeological techniques. Emphasis will be placed on an appreciation of the multidisciplinary background of modern archaeology and of the relevant interpretative strategies. This course is required of all Archaeology Graduate Students in Anthropology.

The Staff

220-226. Biological Anthropology

220. Current Problems in Biological Anthropology. Prerequisite: consent of instructor. A detailed examination of current research in Biological Anthropology: specific topics to be announced. Emphasis upon the nature of hypotheses and their testing in on-going student and faculty research. This course may be repeated for credit.

The Staff

221A-221B. The Fossil Evidence for Human Evolution. Prerequisite: consent of instructor. Course 221A is prerequisite to 221B. No credit will be allowed for course 221A without course 221B. An examination and analysis of the fossil evidence for man's evolution.

Ms. Kennedy

222P. Population Genetics of Man. (Formerly numbered 222A.) Prerequisite: consent of instructor. An introductory course in genetics. The study of population concepts, probability, the conditions of gene frequency equilibria and factors causing gene frequency change.

Mr. Williams

222Q. Probability Models and Statistical Methods in Genetics. (Formerly numbered M222B.) (Same as Biomathematics M246.) Prerequisites: Graduate Standing, two quarters of statistics, Mathematics 3A, Anthropology 222P (formerly numbered 222A.) An introduction to probability models and statistical methods in genetics. Maximum likelihood methods for estimating genetic parameters will be introduced and discussed in detail. (This course is a prerequisite for Anthropology 222R, formerly numbered 222C.)

Mr. Read

222R. Modeling in Genetic Analysis. (Formerly numbered M222C.) Prerequisites: Graduate Standing M222Q (formerly numbered M222B) or consent of instructor. Basic concepts of human genetics with emphasis on methods of computer-oriented genetic analysis. Topics include segregation analysis, genetic linkage, quantitative models and population structure.

Ms. Spence

222S. Population Genetics. (Formerly numbered 229E.) Prerequisite: consent of instructor. A consideration of some of the special methods of the genetics of human populations and their current application in research. This course may be repeated for credit.

Mr. Williams

223. The Roots of Human Behavior. (Formerly numbered 291.) Prerequisite: consent of instructor. An examination of the behavior of living non-human primates and of the evolution and biological basis of human behavior. This course may be repeated for credit.

The Staff

224. Selected Topics in Field Training in Biological Anthropology. Prerequisite: consent of instructor. Examination of current hypotheses in student and faculty field research. Emphasis upon new approaches to field training in archaeology, laboratory involvement in the investigations of primate ecology, behavior, anatomy, physiologic and evolution. Specific topics to be announced. This course may be repeated for credit.

Mr. Russell

225. Analysis of Biological Anthropology Field Data. (Formerly numbered 224.) Other field training courses or consent of instructor. Pragmatic and theoretical aspects of research on wild primates from planning and expedition through final data analysis. Discussion topics to be announced. This course may be repeated for credit.

Mr. Russell

226. Biological Anthropology Colloquium. (Formerly numbered 229F.) To be graded on an S/U basis only. Selected topics on the status of current research in biological anthropology. This course may be repeated for credit.

The Staff

230-239. Cultural Anthropology

230P. Ethnology. (Formerly numbered 269F.) Prerequisite: consent of instructor. A seminar on ethnological method and theory concentrating on idealist systems. This course may be repeated for credit.

Mr. Wilber

230Q. Cultural Anthropology. (Formerly numbered 269E.) Prerequisite: consent of instructor. Special problems in cultural anthropology. This course may be repeated for credit.

Mr. Goldschmidt

231. Asian-Americans: Personality and Identity. (Formerly numbered 253.) Prerequisite: Graduate Standing. This seminar will examine the effect of class, caste and race on the Asian-American personally within the framework of anthropological theories.

The Staff

232P. Cultural Modes of Thought. (Formerly numbered 245.) Prerequisite: consent of instructor. An examination of the influences of culture on learning, perception, and intelligence. The course to cover the fields of cross-cultural psychology in addition to cognitive anthropology. The focus is on learning and thinking in non-Western cultures but would include problems of education in ethnic areas within the U.S.

Mr. Price-Williams

232Q. Myth and Ritual. (Formerly numbered 269Q.) Prerequisite: consent of instructor. This seminar discusses nature and function of myth and ritual in non-industrialized societies. Its associated value systems and philosophies are examined as infrastructure of culture rather than as phenomena proposed by structuralist rationalism and cultural material empiricism. This course may be repeated for credit.

Mr. Wilber

233R. American Folklore and Mythology Studies. (Formerly numbered M252.) (Same as Folklore and Mythology M257.) Prerequisite: Anthropology 174P (formerly numbered 105A) or consent of instructor. An examination of oral traditions and related ethnological data from various South American Indian societies against the background of the religious systems of these people.

Mr. Wilber

233P. Symbolic Anthropology. (Formerly numbered 269P.) Prerequisite: consent of instructor or Anthropology 133R (formerly numbered 144). Nature and development of symbolic relations (as distinguished from other referential ones), significance of symbolic systems (in terms of action, cognition, affectivity, contemplation), symbolic and isomorphic logic (as opposed to ideational ones), and among the questions to be selected for analysis and discussion in this course. This course may be repeated for credit.

Mr. Maquet
230. Aesthetic Anthropology. (Formerly numbered 269R.) Prerequisite: Anthropology 139 (formerly numbered 269) or consent of instructor. This course examines anthropological issues in the field of aesthetic anthropology. The staff.

230Q. Analysis of Field Data. (Formerly numbered 263.) Prerequisite: Anthropology 239P (formerly numbered 265) or other field training course. Students will work with their own as well as general project data in the preparation of articles for professional journals. This course may be repeated for credit. The Staff.

240-248. Linguistic Anthropology

240. Seminar in Language and Culture. (Formerly numbered 200.) Prerequisite: consent of instructor. The development of anthropological linguistics, modern linguistic theory and its application to the study of non-linguistic aspects of culture, including relationship of language to world view; comparative historical linguistics to prehistory, lexico-semantic, semantic analysis, linguistic acculturation and socio-ethnic linguistics. Mr. Kroskrity.

241. Topics in Linguistic Anthropology. (Formerly numbered 201C.) (Same as Linguistics 246C.) Prerequisite: consent of instructor. Problems in relations of language, culture and society. This course may be repeated for credit. The Staff.

242. The Ethnography of Communication. Prerequisite: Consent of instructor. This course represents a seminar devoted to examining representative scholarship from the fields of sociolinguistics and the Ethnography of Communication. Particular attention is devoted to theoretical developments in the relationships of the Ethnography of Communication to such disciplines as Anthropology, Linguistics, and Sociology. Topical loci include style and strategy, speech variation, variety of non-casual speech genres, languages and ethnicity, and non-verbal communication behavior. Mr. Kroskrity.

243P. American Indian Ethnolinguistics and Sociolinguistics. Prerequisite: prior coursework in either Anthropology, Linguistics, or American Indian Studies and consent of instructor. This course examines the social and cultural aspects of language use in Native North American speech communities. Specific loci include both micro-sociolinguistic topics (such as multilingualism, cultural differences regarding appropriate communicative behavior, and variation within speech communities) and macro-sociolinguistic topics (such as language contact, language change, and language in American Indian education). Graduate students must obtain consent of instructor for research and participate in group discussion. Mr. Kroskrity.

245. Linguistic and Intra-Cultural Variation. (Formerly numbered 203.) Prerequisite: consent of instructor. The course addresses the problems of variation and its implications on the disciplines of Anthropology and Linguistics. Among the objectives of the course are the following: to acknowledge the importance of speech variation in anthropological linguistics research; to critically assess a broad and representative sample of modern scholarship devoted to the study of intra- and inter-individual variation, and to evaluate the utility and potential applicability of recent linguistic models to anthropological and linguistic sociocultural theory. Mr. Kroskrity.

246. Research Design and Field Training in Linguistic Anthropology. (Formerly numbered 204A.) Prerequisite: consent of instructor. Supervised collection of linguistic information in the field. Students will spend full time in the field for most of the period. Graded S/U or letter grade. This course may be repeated for credit. The Staff.

247. Analysis of Linguistic Field Data. Prerequisite: course 246 (formerly numbered 204A), other field training course or consent of instructor. Supervised analysis of linguistic field data by students who have participated in a related field training course. Students will work with their own as well as general project data in the preparation of articles for professional journals. Graded S/U or letter grade. This course may be repeated for credit. The Staff.

247A. Ethnographic Film. (Same as Theater Arts M209C.) Prerequisite: Graduate Standing and consent of instructor. The ethnographic film as a form of cinéma vérité and its relation to social anthropology. Offered in the Fall Quarter. Mr. Hawkins, Mr. Moerman.

248. Practicum in a Field Language (1 to 2 courses). (Formerly numbered 268.) Prerequisite: consent of instructor. Intensive training in an indigenous language as preparation for work in the field. The Staff.
257. Social Interaction. (Formerly numbered 270F.) Prerequisite: consent of instructor. The course will focus on issues for ethnographic theory and practice raised by developments in anthropological, sociological, psychological, linguistic and ethnological contributions to our understanding of the organization of face-to-face behavior. This course may be repeated for credit.

258. Comparative Studies of Intentional Communities. (Formerly numbered 269S.) Prerequisite: Anthropology 157 or consent of instructor. Questions concerning the ideational, societal, and individual significance of intentional communities will be selected and discussed in depth with reference to particular collectivities. This course may be repeated for credit.

Mr. Maquet

260-270. Anthropology for Social Action

260. Urban Anthropology. (Formerly numbered 236.) Prerequisite: Anthropology 167 (formerly numbered 160) or consent of instructor. An intensive anthropological examination of the urban setting as a human environment.

The Staff

261. Comparative Minority Relations. (Formerly numbered 269P.) Prerequisite: consent of instructor. An analysis of the major theoretical and methodological issues in the study of minority relations from a comparative perspective. Consensus, conflict, and pluralistic constructs will be analyzed and their strengths as explanatory devices investigated as they pertain to dependent populations in North America, Latin America, Southern Africa, India, Asia and the Euro-Slavic continent. This course may be repeated for credit.

Mr. Velez-I.

262. The Cultural Context of Health Care. (Formerly numbered 241.) Prerequisite: consent of instructor. Concepts and treatment of illness and disease in cross-cultural perspectives, with an emphasis on research problems and methods. The course introduces the anthropological approach to health-related research, then explores the intersections of anthropology and public health and psychology (such as epidemiology, fertility regulation, socialization, and developmental disabilities).

Mr. Johnson

M263. Medical Anthropology. (Formerly numbered 269N.) (Same as Nursing M217.) Prerequisite: course M208 (formerly numbered 269D). Any of the topics covered in upper division course M168 will be selected each quarter, for intensive literature review and independent projects. The course may be repeated for credit.

Mr. Velez-I.

264. Ethnography of the Mexican/Chicano People in North America. (Formerly numbered 269T.) Prerequisite: Graduate standing or consent of instructor. It is recommended that students have taken the Anthropology 172T (formerly numbered 160G) but it is not imperative. A graduate research course on topics in the ethnography of the Mexican/Chicano people in North America. Topics may include the following: social organization, economic and political systems, beliefs and value systems, linguistic and expressive adaptations, and individuals and their cultural contexts. Topics will vary according to interest and the instructor will announce the topic(s) prior to the beginning of the quarter. This course may be repeated for credit.

Mr. Velez-I.

265. Public Archaeology. Prerequisite: consent of instructor. Archaeology as part of the national heritage, both in the U.S. and other countries. Legal, ethical, cultural, and scholarly aspects of salvage and contact archaeological work are stressed. Designed for research, both theoretical and practical, in the study of cultural resources.

Mr. Meighan

M267B-M267C. Ethnographic Film Direction. (1 to 2 courses) (Formerly numbered M294B-M294C.) (Same as Theater Arts M265A-M265B.) Prerequisite: course 269C. Graduate standing and consent of instructor. Advanced study of problems in the production of ethnographic films. M267B is offered in the Winter Quarter and M267C is offered in the Spring Quarter.

Mr. Hawkins, Mr. Moerman

M270E. Legal Anthropology. (Same as Law M352.) Prerequisite: Anthropology M223 (Law M152) Anthropological Approaches to Law or consent of instructor. An intensive examination of a particular aspect of law.

Ms. Moore

271-274. Regional Cultures

271. African Cultures. (Formerly numbered 254.) Prerequisite: consent of instructor. Survey of literature and problems of African culture.

Mr. Mendonsa

272. Indians of South America. (Formerly numbered 255.) Prerequisite: consent of instructor. Survey of the literature and research topics related to Indian cultures of South America. This course may be repeated for credit.

Mr. Wilbert

273. Cultures of the Middle East. (Formerly numbered 255.) Prerequisite: course 176 (formerly numbered 110) or consent of instructor. Survey literature and problems of the various cultures of the Middle East.

The Staff

274. Cultures of the Pacific Islands. (Formerly numbered 269Z.) Prerequisite: consent of instructor. Topics in the contemporary sociocultural anthropology, and classic ethnography for Melanesia, Polynesia and Micronesia. This course may be repeated for credit.

Mr. Newman

280-283. History and Theory

280. Anthropology Theory. (Formerly numbered 230A-230B.) Prerequisite: Anthropology Graduate Standing or consent of instructor. This course examines the range of theories that anthropologists have employed in describing and explaining variability in sociocultural phenomena. The organization of particular theories, as well as issues that separate different theoretical perspectives will be explored. Emphasis will be placed on up-to-date examples of different theoretical perspectives. Major perspectives to be considered include the following: Evolutionism, Cultural Ecology, British Functionalism, French Functionalism, Structuralism, Cultural and Personality, Psychological Anthropology (Freudian, Neo-Freudian, non-Freudian), Behavioral Anthropology, Cognitive Anthropology and Ethnosemantics.

The Staff

281. Selected Topics in the History of Anthropology. Prerequisite: consent of instructor. This seminar will deal in-depth with particular problems in the history of anthropology as dictated by the interests of student and faculty. This course may be repeated for credit.

282. Research Design in Cultural Anthropology. (Formerly numbered 261.) Prerequisite: consent of instructor. Primarily intended for graduate students preparing for fieldwork. The unique position of anthropology among the sciences and the resulting problems for scientific research design are discussed. Lectures and readings review typical research problems and appropriate methods. Students prepare their own research designs and present them for class discussion.

Mr. Johnson

283. Mathematical Models in Anthropology. (Formerly numbered 292.) Prerequisite: consent of instructor. The course will be organized around current topics and issues in mathematical anthropology. An overview of a variety of mathematical approaches relevant to theory, systems theory, decision theory, Markov processes, etc., will be presented and discussed.

Mr. Read

291. The Roots of Human Behavior. (Formerly numbered 299.) Prerequisite: consent of instructor. An examination of the behavior of living non-human primates and of the evolution and biological basis of human behavior.

The Staff

501-599. Individual Studies/Research Courses

501. Cooperative Program. (1/2 to 2 courses) Prerequisite: approval of UCLA Adviser and Graduate Dean Approval of host campus Instructor, Department Chairman and Graduate Dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. To be graded S/U.

596. Individual Studies for Graduate Students. (1/2 to 2 courses) Prerequisite: consent of instructor. Directed individual studies. May be taken for a letter grade.

597. Preparation for the Doctoral Qualifying Examination. (1/2 to 3 courses) The Staff

598. Research for Preparation of the Master's Thesis. (1/2 to 2 courses) Prerequisite: consent of instructor (faculty advisor). Preparation of research data and writing of master's thesis. To be graded S/U.

599. Research for Dissertation. (1/2 to 3 courses) Prerequisite: consent of instructor. Ph. D. dissertation research or writing. Student will have completed qualifying examination and ordinarily will take no other course work.

The Staff

Applied Linguistics

(Interdepartmental)

Admissions Requirements. The basic requirement for admission is the completion of the UCLA master's degree in Teaching English as a Second Language or in Linguistics, or the equivalent of one of these. Applicants with a graduate degree in TESL, Linguistics, Applied Linguistics, Psycholinguistics, or Sociolinguistics from another recognized institution may be admitted provided they then make up the courses in one of the other of the two UCLA M.A. programs whose equivalents they have not yet taken. Students with graduate degrees in other related disciplines (such as a foreign language, English, education, psychology, sociology, or anthropology) would probably have quite a number of courses to make up. Unless much of their previous work can be shown to be particularly applicable to one of the four areas of specialization, it will be advisable for them to complete the UCLA M.A. in Linguistics or TESL before seeking admission to the Ph.D. program.

Prospective candidates are required to submit: (1) Three letters of recommendation from professors who are well acquainted with the students' academic background; (2) As definite and complete a statement as possible of the type of dissertation they hope to prepare; (3) Copies of any relevant professional publications, M.A. theses, or substantial papers they
may have written. Applicants whose native-language is English should take the Aptitude Test of the Graduate Record Examinations (GRE). Applications for admission for the Fall Quarter in September should reach the Graduate Admissions Office by the preceding December 30 and the supporting materials should reach the Program Office no later than February 15.

Advising. Program Office, Ph.D. in Applied Linguistics 3306 Rolfe Hall, UCLA.

All students entering the doctoral program must discuss their proposed course of study and research at an early date with the Ph.D. Program Adviser and with other interested faculty members in ESL and in Linguistics. Study Lists for each quarter must be signed by the Program Adviser. At the beginning of each quarter the Adviser reviews each student's record and advises him or her of the progress in the program and the remaining requirements that must be met.

Admission to the Doctoral Program. Criteria that will be taken into consideration in admitting students include their graduate and undergraduate grade point averages, their relevant professional experience, their command of foreign language, the quality of their M.A. thesis, and any language-related publications they may have written.

Admission is almost always for the Fall Quarter beginning in September. To insure their admission, Ph.D. aspirants must enroll in the quarter for which they were admitted. If they cannot do so, it will be necessary for them to reapply for a subsequent quarter, and there is no assurance that they will be given preference at that time over other applicants who may be judged more qualified.

Major Fields and Specializations. Four areas of specialization are available: language analysis, language education, language acquisition and language use. The specialization in language analysis is designed to prepare researchers to deal with such areas as sociolinguistics, descriptive phonologies, contrastive analyses, etc. and to carry out similar empirically-orientated pursuits. The specialization in language education concerns various forms of language instruction: English as a second or foreign language, the teaching of other languages, and language in bilingual/bicultural or bidialectal education. It is designed to prepare graduates competent to serve in the areas of curriculum development, language consultation, language testing, materials preparation, and teacher training. The specification in language acquisition involves psycholinguistics. It refers to both child-language acquisition and second-language acquisition. It is intended to equip students to conduct research on language learning in clinics, laboratories, classrooms, and also in informal natural settings. The specialization in language use relates generally to sociolinguistics, and specifically to language planning, language policy in the United States and abroad, as well as to the analysis of discourse. It is aimed at the development of competence in such areas as educational consultation, program planning and evaluation, language surveys, and literacy campaigns.

Foreign Language Requirement. Before advancement to candidacy, students must demonstrate a knowledge of two foreign languages at the effective level. For one language, an effective reading knowledge is required. For the other, a knowledge of oral proficiency may, at the option of the student, be demonstrated instead of a reading knowledge. The language chosen should be especially relevant to the student's intended dissertation topic or professional plans. A student whose native language is a language other than English is exempted from this foreign language requirement. Language-proficiency examinations for the Ph.D. in Applied Linguistics are administered by a special ad hoc committee. Information regarding the nature and administration of the examinations is available from the Program Office.

Required Courses. In addition to fulfilling the general University requirements for the doctorate, candidates for the Ph.D. in Applied Linguistics must meet the program requirements listed below.

Basic Preparation. Any of the following courses not already taken must be completed as early as possible and before advancement to candidacy for the degree: Linguistics 120A (Linguistic Analysis: Phonology); 120B (Linguistic Analysis: Grammar); 165A (Linguistic Theory: Phonology), and 165B (Linguistic Theory: Grammar); English 370K (The Teaching of English as a Second Language), 250K (Contrastive Analysis and Error Analysis in the ESL Context), and 380K (Supervised Teaching: English as a Second Language or Dialect). English 370K, which is organized as a general orientation to the ESL Section, must be taken at UCLA. If a student can establish that he/she has taken courses equivalent to any of the remaining courses at another institution, he/she will not be required to take them at UCLA. If he/she has at least one year of experience in teaching a second language, he/she can be exempted from English 380K.

Units and Courses. As a breadth requirement, all candidates must take at least 32 units of graduate-level coursework (in the 200, or 500 series). These 32 units may not include courses taken while completing the M.A. courses listed above as basic preparation, Linguistics 275, English 400K, or Applied Linguistics 597 or 599. No more than 8 of the 32 units may be in 596 individual study courses, and these should be in Applied Linguistics 596, if possible.

The 32 units (eight courses) must include at least two courses in each of the specializations of language analysis and language education as well as two courses in either language acquisition or language use. (None of the aforementioned six courses may be 596 individual study courses taken in departments other than Linguistics or English). An additional two courses are required in the specialization in which the candidate chooses to do his/her dissertation research. Thus, a student who opt for a dissertation in language acquisition would take a minimum of four courses in that area, plus two in language analysis and two in language education.

Appropriate graduate courses taken at UCLA after completion of the M.A. but before admission to the doctoral program may be counted toward fulfillment of the 8-course requirement for the Ph.D. Credit may be transferred for up to two courses taken at another institution, but only for graduate-level courses taken after completion of the M.A. and preferably taken within the framework of UCLA's course, Applied Linguistics 501.

Within the limits imposed by the Graduate Division, undergraduate courses taken as prerequisites to needed graduate courses, unrequired undergraduate courses, reading courses in a foreign language, graduate courses taken in addition to the required 32 units, Applied Linguistics 501 and 597-599, English 400K, and Linguistics 275 may be taken on a Satisfactory/Unsatisfactory basis. All other courses must be taken for letter grades.

Written and Oral Qualifying Examinations. In lieu of a Written Qualifying Examination, the student will submit two original research papers of publishable quality in different areas of specialization. These may be revised or extended seminar papers but must be prepared after admission to the Ph.D. program. (If the student at the time of his/her admission has already published papers of the required quality, he/she may petition to have one of these accepted in partial fulfillment of this requirement). The topics of these papers are to be chosen by the student, in consultation with appropriate faculty members and with the approval of the Ph.D. Program Adviser (Chairperson of the Interdepartmental Committee that administers the program). Each of the finished papers is evaluated by two faculty members chosen by the student in consultation with the Program Adviser. Any paper or papers judged unsatisfactory by either of the two readers must be revised to that reader's satisfaction. For each paper, one of the two readers may be from outside Linguistics and ESL, and one of the two must be willing to serve on the student's doctoral committee.

Doctoral Committee. The doctoral committee for the student is nominated by the Ph.D. Program Adviser after consultation with the student, and is then appointed by the Dean of the Graduate Division. The doctoral committee will
include a minimum of five members, two of whom hold no appointment in Linguistics or ESL. Upon appointment, the chairperson of the doctoral committee becomes the student's chief source of guidance. The doctoral committee administers to the student an Oral Candidacy Examination, the focus of which will be a prospectus of his/her dissertation which the student must submit to the committee prior to the examination. The committee also has the responsibility for determining the adequacy of the student's preparation for writing the dissertation. If prospects and preparation are judged adequate, the choice of the dissertation topic is thereby approved and the student becomes eligible for advancement to doctoral candidacy. In case of failure, the doctoral committee determines whether or not the candidate may be reexamined and if further courses must be taken before the reexamination.

Dissertation. All candidates are required to prepare a dissertation as a demonstration of their ability to carry out original research under the guidance of their doctoral committee. A minimum of three members of the doctoral committee, suggested by the committee chairperson and approved by all committee members at the time of the Oral Candidacy Examination, must read each dissertation and certify that it satisfies the research requirements of the Ph.D. These three readers must include at least two faculty members from ESL or Linguistics and at least one member from another department.

Time to Degree. From first enrollment in the doctoral program to advancement to candidacy: two to three years. From first enrollment to dissertation: two to three years. From first enrollment to doctoral program to advancement to candidacy: seven calendar years from first enrollment.

Disqualification and Appeal of Disqualification. If a student has not been awarded the degree by the end of seven years, it will be the responsibility of the Program Adviser to request that the Dean of the Graduate Division disqualify that student from further participation in the program. The disqualification of a student for other reasons may be requested if a majority of his/her doctoral committee so votes. Disqualification for any reason may be appealed to the Interdepartmental Committee which administers the program.

Other Relevant Information. An informational brochure giving more detailed information is available from the Program Office, 3306 Rolfe Hall.

Graduate Courses
501. Cooperative Program. (½ to 2 courses) Prerequisite: approval of Ph.D. Program Adviser and Graduate Dean. Approval of host campus Instructor, Department Chairman and Graduate Dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. To be graded S/U.

596. Directed Individual Study. (1 to 2 courses) Prerequisite: admission to doctoral program. Independent study in an area of Applied Linguistics. May be repeated for credit. Up to eight units of 596 credit applicable to course requirements for Ph.D. in Applied Linguistics.
The Program in Archaeology, interdisciplinary in approach, brings together interests and specialities represented by those academic units offering courses in archaeology, as well as other units offering courses which may be relevant to archaeology. Its primary purpose is to train scholars in archaeology for university-level teaching and research, although other vocational objectives may also be served. Its resources are intended for those archaeology students whose academic goals cannot be met within any single department and who, consequently, require an individually designed plan of study combining academic preparation in two or more departments. Applications are especially encouraged from students whose interests may form bridges with disciplines and departments not offering archaeology (e.g., botany, geology, mathematics, statistics, zoology, etc.). Those archaeology students whose scholarly interests lie mostly within a single department (in such fields as ancient history, anthropology, art history, classics, Indo-European studies, near eastern languages and cultures, and oriental languages) should refer to the separate degree program offered by the appropriate department. The Graduate Adviser for the Archaeology Program and for the various departments will provide counselling to ensure that each applicant selects the department or program (and degree objective) best suited to his/her interests.

Active archaeological research is underway in various parts of the world, and field training in archaeology is offered. There are opportunities for participation in a variety of laboratory and field researches in both the Old and New Worlds.

Major Fields or Subdisciplines

Africa
Ancient Near East
Andean South America
China and the Far East
Classical Greece and Rome
Dating Techniques
Europe
India and Central Asia
Meso-America
Western North America

Other areas of specialization are also available.

Admission Requirements. For General requirements, see the University minimum standards. Any undergraduate major may be considered for admission to the Archaeology Program although those applicants who have had little previous archaeological education may be admitted under probationary status and required to take a series of courses to make up deficiencies. A Graduate Record Examination (Aptitude Test) Report is required. The following application materials should be submitted directly to the Chairperson of the Archaeology Program: an acceptable Plan of Study (including a statement of the applicant's objectives, an outline of projected coursework and a general indication of an M.A. paper or dissertation topic); three letters of recommendation; a research paper preferably (but not necessarily) relevant to archaeology, or comparable evidence of scholarly work. Applicants are accepted for admission for the Fall Quarter only. The Archaeology Program's "Guidelines" brochure will be sent to applicants upon request to the Chairperson, Archaeology Program, UCLA, Los Angeles, California 90024.

Advising. The Chairperson, 288 Kinsey Hall, serves as the Graduate Adviser of the Archaeology Program. Each student, however, has a committee chairperson, who acts as principal adviser. (Prior to a student's acceptance, his/her dossier is forwarded to a prospective adviser who is invited to indicate his/her willingness to serve.) Each student's progress toward his/her degree is discussed every academic quarter by the members of the Executive Committee. In addition, each quarter, the student receives a written checklist of his/her progress, a copy of which is sent to his/her adviser.

The Master of Arts Degree

Foreign Language Requirement. The ability to read at least one modern foreign language (relevant to the student's field of interest and approved by his/her adviser) is required for the M.A. There are three options:

a. A student may pass an examination administered by ETS with a score of 500 or better. This examination may be taken prior to registration at UCLA.

b. A student may complete the third course in an introductory sequence of the selected language at UCLA with a minimum grade of A. (The course must be a regular language course.)

c. With the consent of his/her committee, a student may take an examination, (in Spanish, French or German), administered by the Archaeology Program in the following manner:

1. A roster of faculty qualified for evaluating the examination is on file with the Graduate Division.

2. A student will submit, in consultation with his/her adviser, a bibliography representing at least 250 pages of reading.

3. One of the qualified faculty (but not the student's adviser) will assign a passage of approximately 500 words chosen from the preselected corpus to be translated accurately into English; the use of a dictionary will be permitted. The examination will last two hours. The criterion for a pass will be, "Can the student use the language as a scholarly tool?"
4. If the student fails the examination, he/she may repeat if after a period of not less than two months.

NOTE: The foreign language requirement must be completed by the end of the sixth quarter in residence, unless an earlier deadline is imposed by the student's adviser. A student who does not meet this deadline will apply to the Chairperson of the Program for a leave of absence of one quarter during which the requirement should be fulfilled. If the examination is still not passed, the student will be terminated from the Program and asked to apply for readmission after the language requirement has been fulfilled. Additional language skills may be required by the student's committee depending on the field of specialization; if so, details as to methods of preparing for and taking the examination must be included in the student's Plan of Study.

Course Requirements. A minimum of 42 units, (distributed among a minimum of nine courses), taken for a letter grade, are required, to be distributed as follows:

Graduate Courses 200 and 500 series (five courses) (minimum of 26 units).
1. Archeology 200, Archeology Colloquium, (six units), required of all students.
2. Archeology 201A, 201B, Graduate Core Seminars in Archeology, (6 units each), required of all students.
*2 Elective Graduate Courses, one of which may be Archeology 596, Individual Studies for Graduate Students.

Upper Division Courses (100 series)**
*4 Elective Upper Division Courses (excluding 199's) (minimum of 16 units).

Comprehensive Examination Plan. Students will take a comprehensive core examination during the fourth quarter of residence. The examination will be graded as "high pass," "pass," or "not pass." The student must receive at least a "pass" or be terminated from the M.A. program.

a. The Chairperson of the Archaeology Program appoints a 3 or 4-member Comprehensive Core Examination Committee.
b. A written, 12-hour examination is based on a reading list of about 30 volumes, selected by the Committee. All students are responsible for mastering the content of these readings during their first year in residence.

c. The reading list and core examination cover material considered to be important in the education of any professional archaeologist. Questions on the examination should allow the student to make use of (and demonstrate) his/her area of other specific expertise.
d. The examination may be repeated one time.

Time to Degree. There is a ceiling of seven quarters for the completion of the M.A. degree. A student who does not meet this deadline should expect to be denied permission to continue in the program.

Periods of normal progress:
1. From initial registration to selection of the M.A. Committee: three quarters
2. From initial registration to submission of Reassessed Plan of Study: three quarters
3. From initial registration to fulfillment of foreign language requirement: six quarters (unless prescribed earlier by student's adviser)
d. From initial registration to submission of M.A. paper: six quarters plus three weeks
e. From initial registration to completion of all requirements: seven quarters

500 Series Course Limitations. Archaeology 596 (Individual Studies for Graduate Students) may be taken twice for a maximum of 12 units, but only 6 units may be counted toward the minimum graduate course requirement. A letter grade is given for the course.

Teaching Experience. Teaching experience is not a requirement.

Disqualification and Appeal of Disqualification. The Executive Committee may recommend disqualification of a student under one or more of the following conditions:

a. If normal progress toward the degree is not manifest;
b. G.P.A. below 3.0;
c. Failure (twice) of core examination;
d. Failure to fulfill foreign language requirement;
e. Unsatisfactory M.A. paper.

A student who wishes to appeal the decision may request a hearing by the Executive Committee to state his/her case.

Other Relevant Information

a. Field Work. The general standard holds that no graduate degree will be awarded until the candidate for the degree has worked in the field and has demonstrated his/her competency to direct field research in archaeology. Both theoretical and practical knowledge of methods and techniques used in the field are, accordingly, necessary.

This requirement may be met in several ways: ordinarily the student will take a regular UCLA field course such as Anthropology 170A (which satisfies the M.A. field course requirement) or Archaeology 259, Ancient Near East 261, or History 276 (which satisfy both the M.A. and Ph.D. field requirements) or similar courses offered by other departments. Comparable courses offered by other institutions may also be accepted. An informal report, (without grades or academic course credit), submitted by the director of an excavation, describing work performed by the student under his/her supervision, may be sufficient. In any case, excepting the four courses listed above, the applicability of any given formula to fulfill the requirement will have to be cleared in advance with the Chairperson of the Archaeology Program.

b. Plan of Study. Normally, a student submits before admission, a Plan of Study, listing the courses he/she intends to take. This plan is often preliminary and tentative, especially for the student applying from outside UCLA. Before the end of the first year in residence, after selecting his/her committee, each student must submit a reassessment of the original Plan of Study, which is to include the following:

1) The number and title of courses (whether already taken or still to be taken) with an indication of the quarter for which they are projected; for 500 series courses, an indication of the instructor who is expected to supervise the research;

2) The field work requirement—indicating where, when and how it is to be fulfilled. This is not reflected in the student's transcripts, it will be the student's responsibility to provide a statement from the field director attesting to the nature and quality of the student's work;

3) The foreign language—specifying which language(s) has been chosen, why it was chosen and how and when the student plans to demonstrate his/her proficiency therein;

4) Advancement to Candidacy; expected time of completion of all requirements except the M.A. paper, at which time the student will file for advancement to candidacy;

5) The M.A. paper title with a brief description (about 100 words) of its content and expected completion date;

6) M.A. Committee—it is the student's responsibility to obtain the consent of three professors (including the main adviser) who will supervise the program of study and the writing of the M.A. paper; all members of the M.A. committee must sign the Reassessed Plan of Study.

Item (5) above must be approved by the Chairperson of the Archaeology Program before the Plan of Study becomes part of the student's dossier.

c. M.A. Paper. By the end of the third week of the seventh quarter, the student must submit a nonreturnable copy of his/her M.A. paper to the Chairperson of the Archaeology Program. The paper will have already been graded by the members of the student's committee as "high pass," "pass," or "not pass." It is to be of professional quality (publication of suitable papers will be encouraged).
The Ph.D. Degree

Admission Requirements. Completion of a master's program is required. A student completing an M.A. in the Archaeology Program does not automatically continue for the Ph.D. A decision will be reached in each case by the Chairperson of the Program upon: 1) written recommendation by all three members of the student's M.A. committee; 2) submission by the student of a Plan of Studies, including projected coursework, choice of foreign language(s), description of qualifying examination components, and dissertation topic; and 3) quality of M.A. Core Exam results. Doctoral students entering the Archaeology Program with an M.A. from another university will be required to pass the Comprehensive Core Examination (see Master's Degree) unless they can demonstrate to the Chairperson of the Archaeology Program and the members of the Awards and Admissions Committee that the examination should be waived.

Foreign Language Requirement. Research competence in two modern foreign languages (relevant to the student's research interests) is normally required. Competence may be demonstrated in the ways outlined for the Master's Degree, Foreign Language Requirement, omitting item b. When proficiency in two foreign languages is not mandated by a student's interest, a petition outlining the justification for waiving the second language may be prepared. After the petition has been unanimously endorsed by the student's committee members, it can be presented to the Executive Committee of the Archaeology Program for approval. In some instances, a student's committee might require more than two languages if mandated by the student's specific research interests. This should be clearly indicated in the Reassessed Plan of Study submitted during the third quarter of the student's doctoral program.

Course Requirements. Students must be enrolled in a minimum of 8 units per quarter; Archaeology 200 is required if it has not been taken already; there are no other restrictions or requirements concerning the courses a student may take.

Written and Oral Qualifying Examinations. Written Qualifying Examination: By the end of the fourth quarter of the doctoral program, assuming the foreign language requirement is fulfilled, the student will take a Written Qualifying Examination which will consist of segments covering at least the following three areas:

a. Topical Specialization: Detailed knowledge of a particular topic or research question. The dissertation will ordinarily develop out of the topical specialization. Such specialization must be problem-oriented (whether involving theory, regional culture history, method or technique).

b. Analytical Theory, Method and Technique: All candidates must have knowledge of the diversity of theoretical orientations, general methods, and techniques employed by archaeologists today. They must also exhibit detailed knowledge of the theory, methods and techniques that are involved in their own research interests. They must be familiar with the basic statistical procedures for the definition of artifact types, and for describing their distributions in space and time.

c. Regional Culture History: Candidates must have detailed knowledge of the regional cultural histories of one or more areas of the world. These areas must be relevant to the student's topical specialization ("a" above). The areas need not be continental in size, but will be selected to be broader than the study of local sequences. Examples: The Southwestern United States, Andean South America, The Mediterranean, China, Mesoamerica.

At least three of the student's committee members must contribute questions to the examination; each of the three must also be involved in approving all the questions as well as reading and grading the answers. A form must be filled out by the three committee members, who will in this way indicate their evaluations of the written examination. If the Chairperson of the Program agrees that the evaluations comprise a "pass," the student may then proceed to make arrangements to take the oral examination. If the written examination or any portion thereof is failed, the student may make one further attempt if his/her committee deems it appropriate.

A maximum of two weeks will be permitted for taking and passing all segments of the written examination. Normally, it is anticipated that all segments will be completed within the span of one week. The scope of the material to be prepared, the nature of the examinations, and the intervals between the various written segments and the oral examination will be determined by the Chairperson and members of the student's committee (in consultation with the student and the Chairperson of the Program). These will be described in detail in his/her Plan of Study. (The student's Written Qualifying Examination, which will have been read and graded by at least three of the doctoral committee members, will be available to the entire committee during the oral examination.)

Oral Qualifying Examination: The Ph.D. Oral Qualifying Examination must be taken by the end of the sixth quarter of the doctoral program. The candidate will be required to submit to the doctoral committee a formal dissertation proposal (of about 10 pages) indicating the particular research problem and the present state of knowledge in that field as evidenced in an appended bibliography. The student will further be expected to indicate the research methods that he/she intends to use, as well as his/her anticipated conclusions. At the oral examination, the student will meet with the members of his/her committee to discuss and be questioned on the validity and feasibility of the proposal. Related questions of a wider range may also be raised.

Students may be examined in the fields previously covered by the written examination if any of the answers were considered inadequate by the members of the committee.

Doctoral Committee. A Ph.D. committee must be selected before the end of the first year of doctoral work. The signatures of the members of the Ph.D. committee, indicating their willingness to serve, must be filed with the Chairperson of the Archaeology Program. The Ph.D. committee is officially appointed by the Dean of the Graduate Division after being nominated by the Chairperson of the Program. The Ph.D. committee consists of:

a. Three eligible faculty members (i.e., members of the Academic Senate), selected from those names in the first section of this entry. (One of the three must also be a member of the Executive Committee of the Archaeology Program.)

b. Two additional eligible faculty members who are not listed in the first section referred to above. They may be from departments not offering archaeology at all.

At least three different academic departments must be represented among the five (or more) members of the doctoral committee. The Chairperson of the Ph.D. committee will serve as a special adviser to the student; the student will typically be in close contact with his/her chairperson for consultation and advice on his/her program, especially with regard to the dissertation. The student is strongly advised, however, to be in close contact with all members of his/her committee.

Time to Degree. The normative time to the completing of the Ph.D. degree in Archaeology is 21 quarters of graduate work; however, if an entrant to the program already possesses an M.A., it is expected by the program that he/she will complete all work to obtain the Ph.D. degree within 14 quarters.

a. From admission to the doctoral program to selection of the Ph.D. Committee: three quarters

b. From admission to the doctoral program to submission of the Reassessed Plan of Study: three quarters

c. From admission to the doctoral program to the Written Qualifying Examination: four quarters

d. From admission to the doctoral program to the Oral Qualifying Examination: six quarters

e. From admission to the doctoral program to completion of all Ph.D. requirements: 14 quarters
Final Oral Examination. The Final Oral Examination is optional with the doctoral committee.

Teaching Experience. Teaching experience is not a requirement for the degree.

Disqualification and Appeal of Disqualification. The Executive Committee may recommend disqualification of a student under one or more of the following conditions:

a. If normal progress toward the degree is not manifest;

b. G.P.A. below 3.0;

c. Failure (twice) of Written Qualifying Examination;

d. Performance on Oral Qualifying Examination so poor as to be denied a second chance by doctoral committee;

e. Second failure of Oral Qualifying Examination;

f. Unsatisfactory dissertation.

A student who wishes to appeal the decision may request a hearing by the Executive Committee to state his/her case.

Other Relevant Information

a. Residence: A student must be in residence for a minimum of two years, including the time necessary for writing the dissertation.

b. Plan of Study: Before the end of the third quarter of the doctoral program, after selecting his/her Ph.D. committee, each student must submit a Reassessed Plan of Study which is to include the following:

1. The numbers and titles of courses (whether taken already or still to be taken) with an indication of the quarter for which they are projected (there are no limitations on 500 series courses at the Ph.D. level).

2. Field work (as for the M.A. program).

3. Foreign language(s)—specify the language program chosen, why it was chosen, how and when the demonstration of proficiency therein is projected; a statement attesting to the above from the Ph.D. committee is also required.

4. Written Qualifying Doctoral Examination—offer a short description (about 100 words) of each of the three components, including the names of the committee members (at least three) who will jointly write and grade the exam, and the quarter in which the exam will be taken (no later than the fourth quarter); the signatures of the committee members appended to the Plan of Study will signify approval of the examination fields as well.

5. Oral Qualifying Examination—the Plan of Study will indicate the projected range of material to be covered and its anticipated date (no later than the sixth quarter).

6. Dissertation topic—including proposed title, a short description (about 200 words) and the expected completion date;

7. Ph.D. committee—include names and signatures of the five (or more) professors chosen by the student in consultation with his/her main adviser.

8. The Reassessed Plan of Study must be approved (signed) by the Chairperson of the Archaeology Program.

c. Dissertation: Once approved, the dissertation must be filed with the Dean of the Graduate Division. An additional copy of the dissertation is to be filed with the Chairperson of the Archaeology Program. The deadlines for filing are listed in the Calendar which appears in this publication.

Graduate Courses

Prerequisite for all courses: consent of the instructor. All courses may be repeated for credit upon recommendation of adviser. Of the following graduate courses only Archaeology 200 is required.

200. Archaeology Colloquium. (6 units) (Required of all M.A. students.) Seminar, two hours. Prerequisite: Archaeology major or consent of instructor. The development of archaeology as a discipline. Major intellectual trends and current issues in archaeology. Scientific and humanistic viewpoints presented by archaeologists from different academic departments. May be taken repeated for credit; however, M.A. candidates may apply this course only twice toward the fulfillment of the departmental M.A. requirements.

M201A-M201B. Graduate Core Seminar in Archaeology. (6 units each) (Required of all M.A. students.) Prerequisite: consent of instructor. Seminar discussions based on a carefully selected list of 30-40 major archaeological works. The course core courses provide the student with a foundation in the breadth of knowledge required by a professional archaeological. The courses comprise archaeological historiography, a survey of world archaeology and archaeological techniques. Emphasis will be placed on an appreciation of the multidisciplinary background of modern archaeology and of the relevant interpretative strategies.

The Staff 259. Field Work in Archaeology. (2-8 units) Participation in archaeological field excavations or museum research under supervision of staff archaeologists. Field work of one month of field time away from the campus is required.

The Staff

Individual Study and Research

596. Individual Studies for Graduate Students. (1 to 3 courses) Hours to be arranged. Prerequisite: consent of instructor.

597. Preparation for Doctoral Qualifying Examinations. (1 to 3 courses) Prerequisite: completion of formal course work and passing of language examinations before enrollment. Graded S/U.

598. M.A. Paper Preparation. (1 to 3 courses) Prerequisite: consent of instructor. Graded S/U.

599. Dissertation Research and Preparation. (1 to 3 courses) Prerequisite: consent of instructor. Graded S/U.

The Staff Related Courses in Other Departments

Most archaeology courses are taught in the various departments. The following is a listing of such courses, by topic and department. They are listed here for reference; students should consult the departmental course lists for full descriptions and prerequisites. No attempt is made to list relevant courses in other disciplines.

METHODOLOGY AND HISTORY

Anthropology 115P. Archaeological Field Training.

115Q. Archaeological Research Techniques.

115R. Strategy of Archaeology.

116P. Laboratory Analysis in Archaeology.

M116Q. Dating Techniques in Environmental Sciences and Archaeology (Same as Geography M178).

118A-118B. Museum Studies.

121A. Fossil Man and His Culture.

121B. Australopithecines.

121C. Evolution of the Genus Homo.

129P. Laboratory Methods in Biological Anthropology: Skeletal.

132. Technology and Environment.

158. Hunting and Gathering Societies.

183. History of Archaeology.

186A-186B. Quantitative Methods Models in Anthropology.

211. Regional Analysis in Archaeology.

218. Reconstruction and Archaeology.

M216. Dating Techniques in Environmental Sciences and Archaeology (Same as Geography M278).

OTHER RELATED PROGRAMS
Related courses (not listed individually) include regional geography, ancient and regional history, ethnography, folklore, and history of technology. Also recommended are the appropriate modern and ancient languages for the student’s area of study. Students are encouraged to examine the course listings of any and all departments whose offerings may contribute to a truly interdisciplinary course of study.

Architecture and Urban Planning

projects to provide graduate students with opportunities to gain practical experience. It also affords faculty opportunities for professional service. Reflecting the nature of the problems and the opportunities associated with the creation and maintenance of environments of the future, the projects are ongoing and programmatic. They range from pure research, applied research, development and prototype testing to full-scale implementation. UIG provides a bridge between pure academic pursuits and professional practice.

Architecture and Urban Design Program

The program in Architecture and Urban Design is organized around areas of study which represent major current directions within the fields of architecture and urban design.

Admissions Requirements

Master of Architecture I.
The M.Arch. I program is open to students holding a baccalaureate degree or its equivalent, comparable in standards and content to a bachelor's degree from the University of California. Applications are accepted from students with a variety of backgrounds. No academic or experiential training in architecture is required, although many students have had experience in this field prior to admission.

Master of Architecture II.
The M.Arch. II program emphasizes advanced studies in architecture and requires that applicants have completed a 5-year professional degree in architecture, and hold a B.Arch. degree.

Master of Arts in Architecture and Urban Planning.

This program offers an academic degree and prepares students to do specialized research or teaching in fields related to the architectural profession. Applicants are required to hold a baccalaureate degree, or its equivalent, comparable in standards and content to a bachelor's degree from the University of California. Applicants should possess the experience and knowledge that would allow them to do advanced research in whatever aspect of architecture they plan to explore within the context of the master's program.

Applicants to all three programs are required to submit three letters of recommendation, academic transcripts, a statement of purpose and a "creative" portfolio. In accordance with the policy followed by the University's Office of Graduate Admissions, the Department generally requires that applicants have maintained a grade point average of at least 3.0 in their upper division and graduate work. No admissions tests are required. In addition to the Application to Graduate Status, applicants should submit the "Departmental Supplement" that is contained within the program description. These brochures may be obtained from: Admissions Office, Architecture/Urban Design, Graduate School of Architecture and Urban Planning, UCLA, 405 Hilgard Avenue, Los Angeles, CA 90024.

Individuals who have further questions should contact the departmental Graduate Adviser at (213) 825-0525 or 825-7857.

Advising

Graduate Adviser: Deborah Hatheway, Graduate School of Architecture and Urban Planning, Room B-302, Phone: (213) 825-0525.

M.Arch. I students select a faculty adviser at the beginning of their second year in the 3-year program. This faculty member discusses the curriculum, approves selection of courses, authorizes program cards each quarter and is available for special counseling as needed. Students in the Advanced Graduate Studies program (M.Arch. II and M.A. students) are assigned a temporary adviser when they enter the School. At the conclusion of this first year, the student selects a permanent faculty adviser. If a student wishes to change advisers, he or she should gain the consent of the new faculty adviser and discuss this change with the Graduate Adviser. The faculty advisers and the Graduate Adviser attempt to work together in explaining curricular requirements and in dealing with any personal or academic difficulties that may occur.

At the end of their first year in the M.Arch. I program, students undergo a comprehensive review conducted by the faculty in order to determine whether their work merits entrance into second year courses. Decisions regarding students' status are reached by a vote of faculty members. A similar review process takes place at the conclusion of the second year and prior to the commencement of thesis work.

There is currently no formal review process established for students in the Advanced Graduate Studies program. Individual faculty advisers make final determinations regarding which courses a student is permitted to take, and also approve each student's decision to begin thesis work.

All students meet with their faculty adviser (with the exception of first year M.Arch. I students who do not have a faculty adviser) and with the Graduate Adviser at least once a quarter. Records are not usually kept in regard to these meetings, unless the end product of a meeting is a written petition or document.

Major Fields or Subdisciplines

No indepth specialization is required within the context of the M.Arch. I program. However, students are required to concentrate several of their elective courses within a single area of concentration. A minimum of three elective courses must be taken within a single curriculum area, including two courses in theory and one studio application, during the second year of study.

M.Arch. II students are required to choose both a primary and secondary field of specialization, while M.A. candidates are asked to focus their work on a specific academic area or professional issue.

Specializations are currently available in the following areas:

- Design Methods
- Urban Design
- Energy Conserving Design
- Housing
- Systems Building
- Computer Aided Design
- Social Building

In addition, students enrolled in the M.A. program have the option of the "Open M.A." wherein they structure their own area of interest from the courses offered by the School.

Foreign Language Requirement

There is no foreign language requirement for these degrees.

Course/Degree Requirements

M.Arch. I Program

Required Courses: M.Arch. I students must complete a minimum of 27 courses in order to graduate, of which at least 24 must be taken at the graduate level. The total number of units required is 108. The required courses are listed below, and these must be taken in the sequence indicated. Students with previous background in the topic covered by any of the required courses may petition the M.Arch. I Curriculum Committee to waive specific required courses and replace them with electives. However, this will not reduce the minimum number of 27 courses required in the M.Arch. I program, or the three-year residency requirement.

Degree Requirements
First Year

Fall  411  Introductory Design Studio
      421  Architectural Drawing
      191  Modern Architecture

Winter  412  Building Design Studio
        437  Building Construction
        431  Structures I

Spring  413  Building Design with Landscape Studio
        442  Building Climatology
        432  Structures II

Second Year

Fall  414  Major Building Design Studio I
      433  Structures III
      291  Architectural Programming
          ... Elective
Winter  415  Major Building Design Studio II
        441  Environmental Control Systems
          ... Elective
          ... Elective
Spring  401  Elective Studios and Projects
          ... Elective
          ... Elective

Third Year

Fall  416  Comprehensive Design Studios
          ... Elective
          ... Elective
Winter  461  Professional Practice and Ethics
          ... Elective
Spring  598A Thesis Preparation/Comprehensive Project

Elective Courses: Elective course offerings are designed to allow students to explore in depth specific subject areas and to gain exposure to a variety of topics. The student is required to take a minimum of seven elective courses. At least four of these must be taken within the Graduate School of Architecture and Urban Planning. During the second year at least two electives must be in preparation for undertaking a specific studio or project in the Spring of the second year.

M.Arch. II Program

1. M.Arch II students are expected to be in residence at UCLA for at least two years and undertake six quarters of study.
2. A thesis or a comprehensive project is required. Three faculty members (at least two from the School) will serve as members of the Thesis Project Committee. When all three have signed the thesis proposal, the student may sign up for Preparation for Thesis course (598A) and may begin work on the thesis itself. This course should be taken at some point during the last year of study.
3. Students working towards a professional degree, M.Arch. II (Master of Architecture), are required to complete a minimum of 18 courses, of which at least 15 must be taken at the graduate level. A total of at least 72 units are required. The courses must be distributed in the following way:

   One core sequence (three courses) should be chosen from the area of Theory and Methods.

   One core sequence (three courses) should be chosen from the area of Professional Application.

   One of the above sequences should be taken as a primary area of specialization and the other as a secondary area. The student is advised to take all the recommended courses in his/her primary area of specialization. The secondary area may be taken as a sequence of core courses only.

   In certain primary areas of specialization a Letter of Certification is conferred at graduation.

4. Eleven courses are to be electives. Among these are the recommended courses in an area of primary specialization. Three electives may be taken at large from upper division or graduate courses offered campuswide. For students requiring greater interdisciplinary study, permission may be granted by the Curriculum Committee to increase this number.
5. At least five of the above courses must be numbered in the 400 professional series. Three of these must be studios.
6. Thesis Preparation course (598A) must be taken at least once.

M.A. in Architecture and Urban Planning (Architecture/Urban Design Program)

1. Candidates for the M.A. are expected to be in residence at UCLA for at least two years and undertake six quarters of study.
2. A thesis or a comprehensive project is required. Three faculty members (at least two from the School) will serve as a thesis project committee. When all three have signed the thesis proposal, the student may sign up for Preparation for Thesis course (598A) and begin work on the thesis itself. The 598A course should be taken at some time during the last year of study.
3. Students working towards a M.A. are required to complete a minimum of 16 courses (with a total of at least 64 units) of graduate or upper division work. At least 12 of these courses must be taken at the graduate level.
4. The M.A. student is required to choose and pursue one area of specialization.
5. Up to seven courses may be taken from upper division or graduate courses offered campuswide.
6. The University of California minimum requirements for the Master of Arts degree must be completed.
7. Thesis Preparation course (598A) must be taken at least once.

Thesis or Comprehensive Examination Plan

M.Arch I students generally present a large-scale design project that functions as a design thesis at the end of their 3-year course of study. Occasionally, students who have already demonstrated superior design skills will elect to do more research-oriented work in place of this design presentation. These final projects are presented to a team of instructors, selected by the Department, who evaluate the work. Because of the format required by the nature of an architectural presentation, the projects are all classified as "Comprehensive Examinations."

Students should obtain faculty approval of project topics at least three months, and preferably six months, before their presentation dates.

M.Arch. II and M.A. students can choose to present a design project (Comprehensive Examination Plan) or to do a research thesis. They should make this determination at least three months prior to their anticipated date of graduation.

Regardless of the format they select, students in the Advanced Graduate Studies program each have an advisory committee composed of three faculty members, one of whom may be from an outside field. Selection of these committee members is confirmed at the time the student files an Advancement to Candidacy petition (at least three months prior to graduation). These committees approve theses and comprehensive design projects at their discretion.

Aside from the thesis or final design project, no other written or oral examination is required.

Time to Degree

The normal length of time for completion of the M.Arch. I degree is nine academic quarters (three years). The average length of study for the M.Arch. II and M.A. degrees is six academic quarters (two years). There is no summer program offered by the Graduate School of Architecture and Urban Planning.
500 Series Course Requirements

All students in the M.Arch. I, M.Arch. II and M.A. programs must enroll in at least 4 and no more than 8 units of 598, Thesis Preparation. Students may also apply a limited amount of 596 elective coursework toward the unit requirements for graduation.

Students who wish to enroll in a 596 course must first obtain the permission of their advisor. A student in the M.Arch. I program who wishes to apply more than 8 units must first obtain the permission of the M.Arch. I Curriculum Committee. A student in the M.A. program or in the M.Arch. II program who wishes to apply more than 12 units must first obtain the permission of the Advanced Graduate Studies Curriculum Committee. A student in any program who wishes to apply more than 16 units must petition the Graduate Division for permission to exceed the limitation. No more than 8 units of the total 596 coursework taken outside the School of Architecture and Urban Planning may be applied toward graduation.

All independent work must be undertaken with the guideline and approval of an Architecture/Urban Design faculty member and will be evaluated on a Satisfactory/Unsatisfactory basis.

Disqualification and Appeal of Disqualification

Students enrolled in the M.Arch. I program are reviewed by the faculty at least once a year. This involves a comprehensive review of their progress. Students who demonstrate real problems in their academic work are generally required to take some remedial course of action. In rare cases, students who subsequently to this review do not improve their marginal status, may be asked to leave the program. Students who wish to appeal this decision may petition both the M.Arch. I Curriculum Committee and the Program Head.

Students enrolled in the M.Arch. II or M.A. programs who demonstrate only marginal scholarship, may be referred to the Advanced Graduate Studies Curriculum Committee for review.

Other Relevant Information

Currently, UCLA does not offer a doctoral degree in Architecture.

Urban Planning Program

The Urban Planning Program in the School of Architecture and Urban Planning offers a curriculum leading both to the Master of Arts and the Ph.D. degrees.

Admission Requirements. Each September, the Graduate School of Architecture and Urban Planning publishes a Program Statement which provides descriptions of the programs offered and contains the Departmental Supplement Application. Prospective "Urban Planning" students may obtain this brochure and an Application for Graduate Admission by writing to: Admission, Urban Planning Program, Graduate School of Architecture and Urban Planning, University of California, Los Angeles, 405 Hilgard Avenue, Los Angeles, CA 90024.

Applications to the program are reviewed by an Admissions Work Group of 10 to 12 members including both faculty and students. The group is chaired by a faculty member who is appointed by the Head of the Program.

Grade point averages, letters of evaluation, a statement of purpose, and relevant experience are all considered in the review process for admission. Applicants are encouraged to submit GRE scores. The Test of English as a Foreign Language (TOEFL) is required of applicants whose native language is not English, unless they have completed at least two years of university-level coursework at an English language institution.

The statement of purpose should be no more than two or three pages in length. It should include a concise description of past and present education and employment experiences, how these experiences relate and have led to the choice of urban planning as a career objective, and a statement describing a specific focus in planning in terms of research interests or practice-oriented goals. This is especially important for applicants to the doctoral program.

Three letters of recommendation should be submitted, written by persons, such as instructors or employment supervisors, who are in a position to describe the applicant's intellectual and professional capabilities in depth. A maximum of two work samples may be submitted in support of the application (e.g., reports, papers, slides, etc.). If team reports are submitted, the applicant's individual contribution must be clearly indicated. Samples written in a foreign language cannot be considered. Work samples will be returned only upon request. (Applicants in the U.S. must enclose a self-addressed, stamped envelope.)

Personal interviews are sometimes requested by the Admissions Work Group on an individual basis after application materials have been reviewed.

To apply to the Urban Planning Program at UCLA, the following materials, in addition to those required by the Graduate Admissions Office, must be submitted to the departmental address indicated above.*

1. the Departmental Supplement to the graduate application (contained in the School Program Statement),
2. three letters of recommendation,
3. a statement of purpose and goals,
4. one copy of transcripts from each college attended (Applicants educated outside the U.S. should send two copies of transcripts to Graduate Admissions for evaluation; one copy will then be forwarded to the department.),
5. TOEFL scores (as stated above).

The Urban Planning Program admits students for the Fall Quarter only. Students who are admitted but do not enroll are not guaranteed admission at a later date.

Advising. Graduate Counselor: Barbara Vineyard, Graduate School of Architecture and Urban Planning, UCLA, 405 Hilgard Avenue, Los Angeles, CA 90024.

The Graduate Counselor assigns temporary faculty advisers to new students on the basis of similarities in student-faculty interests. Students are expected to select a permanent adviser by the end of the Winter Quarter of their first year.

Ongoing evaluations of students' progress are made at the beginning of each quarter, when students meet with their advisers to determine a course of study which best suits their needs and interests within the context of the general departmental and University requirements.

Areas of Concentration. All students should choose an area of concentration by the end of their first quarter in the program. The areas of concentration distinguish between different kinds of issues and contexts in which planners characteristically become engaged, as a professional career or a field of research. They are not meant to be mutually exclusive.

The four areas of concentration are:

Urban and Regional Development. Rural poverty and urban migration, unemployment, the problems of economically depressed areas, the deterioration of inner city neighborhoods present problems which call for comprehensive analysis and integrated solutions. Planning, in these contexts, characteristically starts from a concern with the region or community as a whole, and works towards a coordinated set of social, economic, political and spatial actions, designed to reinforce each other.

Within this area, students are expected to choose an emphasis either on developments within the United States and other advanced industrial nations, or on problems of development in newly industrializing countries.

Social Policy and Public Services. While the urban and regional development concentration approaches issues through relationships between communities and regions, this field of study concentrates on services, approaching questions of equity and social structure through the planning and analysis of services.
Master of Arts in Architecture and Urban Planning (Urban Planning Program)

Admission to Master’s Program. For entrance to the master’s program, a baccalaureate degree from an accredited institution is required. Applicants should have a minimum of 3.0 or “B” grade point average during their junior and senior undergraduate years. Previous experience in planning or a planning-related field is also recommended.

Applications should have completed at least one college-level course each in microeconomics and in mathematics. Examples of courses which fulfill the mathematics prerequisite are finite mathematics, algebra, precalculus or calculus. Students who have not fulfilled these requirements by the time they register will be required to take equivalent courses during their first year of studies as a condition of enrollment. Credit for these courses will not normally count toward the master’s degree. The Admissions Work Group will determine at the time of review whether an applicant will be required to make up deficiencies in these two subjects.

Course Requirements. Master’s students must complete a minimum of 72 units. Students generally take 12 units per quarter, completing the program in two years.

A minimum of 13 courses must be graduate courses (all 200 series courses with the exception of up to two courses or 8 units of 500 series courses) in urban planning or a related field.

The remaining five courses (not more than 20 units) may be any combination of 100, 200, or 400 series courses. A limited number of “elective” 500 series courses may also apply toward the degree (see below, 500 Series Course Limitations).

Core Course Requirement:
The core areas comprise knowledge common to all areas of planning, regardless of the specific focus of the student. Seven core courses are required:

- AUP 220B-Quantitative Analysis in Urban Planning II is required.
- AUP 207—Public Resource Allocation is required.

Two core courses in “Theory and Context” are required.

Three additional core courses are required from a selection of 15 remaining core courses in “Methods”, “Theory and Context”, and/or “Practice.”

Area Course Requirement:

Master’s students must select an area of concentration. A list of courses is prepared for each area of concentration, from which students are required to choose at least five, two are generally specified.

Two Field Projects Courses (8 units) are required (subject to waiver).

Students are encouraged to seek waivers for requirements which have been met in their previous education.

Thesis or Comprehensive Examination Plan. In partial fulfillment of the requirements for the M.A. degree, students are required to complete either a thesis or one of the two comprehensive examinations (Plan A or Plan B). These three options are described in detail below.

Master’s Thesis. The thesis is intended to provide a student with the opportunity for independent scholarly research and should be the length and quality of a publishable journal article. In order to meet established deadlines, students are urged to commence thesis work not later than the Fall Quarter of their second year. The thesis is accepted after it meets the approval of the thesis committee, consisting of three faculty and general University thesis requirements.

Comprehensive Examination Plan A (long-term project). A client-oriented project is recommended for students who are more interested in practical application of what they have learned in their coursework than in scholarly research. The time-span and magnitude of the final project should approximate that of the thesis. Academic credit for project involvement will be given through course 597P (Preparation for Comprehensive Examination). Guidance of the long-term project will rest with a committee consisting of at least two faculty members and a representative of the client.

Students are encouraged to take the Comprehensive Planning Project Course (AUP 217AB) that is offered each year to fulfill the Comprehensive Exam requirement. This project course is taught by at least two faculty members, normally representing different Areas of Concentration, and brings students of varying backgrounds and interests together in the joint solution of a problem. Each project counts as the equivalent of two courses, and normally spans two quarters.

Comprehensive Examination Plan B (2-week examination). Examinations for all Areas of Concentration are normally offered during the break between the Winter and Spring Quarters. (By offering the examination early, the student who writes an inadequate response will receive feedback in time to rewrite part or all of the exam, and still be eligible for graduation by the end of Spring Quarter.) Each area of-concentration faculty constitutes a committee for offering, reading, and grading the examination.

Time to Degree. From admission to the master’s program, normative time to award of the degree is six quarters (12 units of coursework per quarter).
Education in law leads to mastery of institutionalized treatment of urban problems. The concurrent curriculum is open to students interested in any of the areas of concentration in the planning program.

Admissions. Persons interested in the concurrent degree program must apply and be admitted to the School of Law, the Urban Planning Program, and the Graduate Division. Applicants should contact the Law School Admissions Office regarding admission requirements and application procedures and deadlines for the School of Law. In addition, applicants should follow the normal procedures for application to the Urban Planning Program and the Graduate Admissions Office.* Applications to the concurrent program by first-year law students will also be considered.

Degree Requirements. The concurrent degree program requires the application of some of the same coursework towards both the J.D. and M.A. degrees. During the first year, the student follows the required law curriculum. During the second and third years, the student takes (a) the equivalent of 36 quarter units** to be applied toward the urban planning degree, and (b) the necessary courses required to complete the law degree.† Of the 36 quarter units toward planning, three courses must be taken from the list below, and the balance will be taken from planning courses. The student's fourth year will be spent completing the coursework necessary for the planning degree (i.e., 36 additional quarter units). At the end of the fourth year, the student will be awarded both the J.D. and M.A. degrees. Fulfillment of the field work requirement in Urban Planning will be handled on an individual basis. For additional information, contact the Graduate Counselor.

Cross-Listed Courses. The School of Law is on the semester system and therefore Fall courses begin several weeks prior to the beginning of urban planning courses. Please consult the School of Law for scheduling of the following courses:

- Law M286 (3 Semester units) (Same as AUP M202A, 3 or 4 quarter units) Public Control of Land Development.
- Law M285 (2 or 3 Semester units) (Same as AUP M202B, 3 or 4 quarter units) Governance: State, Regional, Local
- Law M526 (2 Semester units) (Same as AUP M202C, 3 quarter units) Seminar-Urban Affairs.
- Law M287 (2 or 3 Semester units) (Same as AUP M231, 3 or 4 quarter units) Urban Housing and Community Development.
- Law M290 (2 or 3 Semester units) (Same as AUP M264, 3 or 4 quarter units) Environmental Law and Policy.

M.B.A./M.A. Concurrent Degree Program

The Graduate School of Management and the Urban Planning Program offer a concurrent degree program leading to the award of a double degree, to be awarded at the completion of three years. The aim of the concurrent program is to provide an integrated set of courses for students who seek careers which draw on general and specialized skills in Urban Planning and Management. By merging knowledge of the workings of the private and public sectors, the Program aims to educate individuals who are not only qualified for careers in private industry or public service but who have acquired the necessary skills to move easily from one sector to the other.

Admissions. Persons interested in the M.B.A./M.A. Concurrent Degree Program must apply and be admitted to the Graduate School of Management and the Urban Planning Program. Applicants should contact the M.B.A. Admissions Office, Graduate School of Management, regarding M.B.A. admission requirements, application procedures and deadline for receipt of applications. In addition, applicants should also submit the Urban Planning Program Departmental Supplement Application directly to the M.B.A. Admissions Office. GMAT and TOEFL scores are required. All application materials should be clearly marked "M.B.A./M.A. (Urban Planning)." Applications are reviewed by a joint committee from both schools. Enrollment in the program is limited to approximately 20 students at any one time.
**Degree Requirements.** A total of 35 courses (140 units) is required for the M.B.A./M.A. Concurrent Degree Program: from 18 to 23 courses in the Graduate School of Management and from 12 to 17 courses in the Graduate School of Architecture and Urban Planning. All core and concentration requirements for each program must be met, but where the two programs' core courses are substantially the same, students may choose from either program's offerings. A maximum of six courses count toward unit requirements for both degrees. Students complete all first-year M.B.A. requirements during the first year of residence and the second and third years of study are divided between both programs.

Further details may be obtained by writing to the Graduate Counselor, Urban Planning Program.

**Ph.D. in Urban Planning**

**Admission to the Doctoral Program.** Students admitted to the Ph.D. program in Urban Planning must have a master's degree in planning or a closely related field from UCLA or another institution. Master's students in Urban Planning at UCLA should inform the Graduate Counselor before December 30 of their second year if they wish to be considered for the Ph.D. program for the following Fall.

Students must have a minimum of 3.5 grade point average in all graduate work completed for consideration for the Ph.D. Program. Employment experience in planning or a closely related field is strongly recommended.

**Foreign Language Requirements.** A foreign language is not required either for admission to or completion of the doctoral program. However, students who are expecting to do dissertation research abroad are strongly advised to obtain the necessary language skills prior to beginning such research.

**Course Requirements: Written and Oral Qualifying Examinations.** Doctoral students must demonstrate a high level of competence in an Area of Concentration (major field), a minor field, and in the Planning Theory core area as measured by coursework and doctoral examinations. In addition, doctoral students are required to take at least 6 units of course 208AB (Seminar in Advanced Research Methods) to aid in preparation of dissertation research. Students may receive academic credit for the preparation of the exam by enrolling in 597P. Students are expected to satisfy the Core Examination requirement prior to taking the Major Field Examination.

**Quantitative Methods Requirement.** The quantitative methods field covers a variety of quantitative techniques that are useful in collecting, organizing, processing, and analyzing information for planning decisions. The quantitative methods field includes probability theory, probability distribution, sampling, survey methods, estimation techniques, hypothesis testing, analysis of variance, correlation, regression, and factor analysis.

To fulfill the quantitative methods requirement, students are required to complete an approved sequence of three courses, beyond the introductory level, with a grade of "B" or better.

**Major Field Examination.** The Major Field Examination is designed to test the student's in-depth knowledge and understanding of his/her major field (area of concentration). The student is expected to demonstrate a level of competence equivalent to teaching a beginning course in that field and should be prepared to make policy recommendations for the solution of those problems he/she defines as being critical in the area covered by the examination. The examination has two parts, one written, one oral, and in addition, requires submission of an acceptable written "Statement of Interest".

The Major Field examining board will consist of three faculty in the student's major field, who will write and grade the written examination and administer the oral examination. The Major Field Exam is given twice a year for each major field and is usually taken within six months after completion of the Core Examination. Students may receive academic credit for the preparation of the exam by enrolling in 597P. Students are expected to satisfy the Core Examination requirement prior to taking the Major Field Examination.

**Minor Field Requirement.** The Minor Field Requirement is intended to provide students with a breadth of knowledge which extends beyond the specific area of the major field. This requirement is flexible and closely adjusted to the dissertation focus of the student. It can be fulfilled in two ways:

1. Twelve units of coursework which (a) constitute a coordinated package of courses in the subject of the minor field, (b) are taken in an area of concentration other than the student's major field, and/or in another department (not necessarily in a single department), and (c) in which a passing grade ("B" or better) must be received, or
2. Passing the written portion of a Major Field Examination in an area other than the student's major field.

**Oral Candidacy Examination.** After successful completion of the Core Examination, Quantitative Methods Requirement, and the Major and Minor Field Examinations, the student will petition the Graduate Division for approval of his/her doctoral committee.

The doctoral committee administers the Oral Candidacy Examination at which the student defends his/her dissertation prospectus. To assist the student in the development of the proposal, Ph.D. students are required to complete 6 units of the Seminar in Advanced Research Methods (208AB).

**Time to Degree.** Normal progress toward the degree, from admission to the doctoral program, is as follows:

1. First and second years: 18 to 23 courses.
2. Third year: 12 to 17 courses.

**Projects in Architecture and Urban Design**

Note: While the required courses are regularly scheduled, the elective courses are not all offered every year.

401. Projects in Architecture. Laboratory, three hours. Prerequisite: consent of instructor. A number of different projects in relevant problem areas will be offered by faculty members from which the student may choose. May be repeated for credit. The Staff would inform the Graduate Division of Program.
402. Projects in Urban Design. Laboratory, three hours. Prerequisite: consent of instructor. A number of different projects in relevant problem areas will be offered by faculty members from which the student may choose. May be repeated for credit. The Staff

403. Projects in Specific Topic. (1 to 4 hours) Prerequisite: previous courses of particular sequence or consent of instructor. May be repeated for credit. The Staff

403A. Projects in Systems Building.

403B. Projects in Energy Conserving Design.

403C. Projects in Man-Environment Relations.

403D. Projects in Educational Facilities.

403F. Projects in History.

403G. Projects in Design Methodology.

403H. Projects with Specific Topic: Projects in Computer Aided Design. (1 to 4 hours) Prerequisite: previous course(s) in particular sequence or consent of instructor. May be repeated for credit. The Staff

411. Introductory Design Studio. Studio, twelve hours. Prerequisite: consent of instructor. Architectural composition is initially studied in terms of its separate elements. After each is studied by means of a manipulative exercise which allows for experimentation of its intrinsic possibilities, the student then undertakes to study the relationship of these elements by means of exercises dealing with combining the elements. The latter part of the course is spent in the design of a small building, in which previously acquired knowledge is synthesized into a single design. The Staff

412. Building Design Studio. Studio, twelve hours. Prerequisite: course 411 or consent of instructor. The design of the project starts with the exploration of the architectural program in relation to the design process and particularly the implications of the program on architectural forms and concepts. In a second phase structural elements are introduced to fulfill the program requirements and to support and further develop the intended forms and concepts. The Staff

413. Building Design with Landscape Studio. Studio, twelve hours. Prerequisites: courses 411, 412 or consent of instructor. Building Design and Site Planning in relation to water, land forms and plants in natural landscape, with special attention to natural light, heat and ventilation. The Staff

414. Major Building Design I. Studio, twelve hours. Prerequisites: courses 411, 412 or consent of instructor. Building Design and Site Planning in relation to water, land forms and plants in natural landscape, with special attention to natural light, heat and ventilation. The Staff

415. Major Building Design II. Studio, twelve hours. Prerequisites: courses 411, 412 or consent of instructor. Building Design and Site Planning in relation to water, land forms and plants in natural landscape, with special attention to natural light, heat and ventilation. The Staff

421. Architectural Drawing: Discussion, three hours; laboratory, three hours. Description of architectural drawing techniques and skills, including: sketching, diagramming, freehand drawing, drafting techniques, introduction to axonometric projection and perspective.

422. Advanced Architectural Drawing. (1 to 4 hours) Discussion, three hours; laboratory, three hours. Prerequisite: course 421, or consent of instructor. The course continues with an emphasis on the exploration of the interrelationship between drawing and design. More advanced design strategies and modes of graphic exploration and presentation are developed. The Staff

Methodology and Computer Aided Design

224. Methodology: Design Theory. Lecture, three hours. A survey of the literature on systematic methods and design including problem-solving, information handling, artificial intelligence, and decision-making in the design process.

225A. Information Systems. Discussion, three hours. Prerequisite: consent of instructor. Information processing models of design. The relations between information flows and organizational structure. New techniques for information handling and design: storage and retrieval systems, automated document production, computer-assisted design techniques.

227A. Computer Graphics. Discussion, three hours. Prerequisite: consent of instructor. Assuming a basic familiarity with computer programming, the course provides an introduction to the theory, techniques, and applications of computer graphics in architecture. It consists of a series of lecture/seminars on technical topics, plus intensive practical work conducted on two storage-tube graphics terminals.

227B. Computer Aided Design. Discussion, three hours. Prerequisite: consent of instructor. An examination of existing computer-based systems for aiding decision-making. Topics will include artificial intelligence, self-organizing systems, and hardware capabilities and limitations. An attempt will be made to develop and test components of a computer design partner.

228A. Mathematical Models in Architectural Design. Lecture, three hours. Prerequisite: consent of instructor. An introduction to concepts and techniques of mathematical modeling in architecture. Basic mathematics needed to develop models. The formal description of built form: data structures. Practical case studies and exercises dealing with the use of mathematical models in architectural design.

228B. Research in Design Methods. Lecture, three hours. Prerequisite: consent of instructor. Developmental work in a specific method of design. Theoretical and operational problems of a design method: degree of systemization, man-machine relationships, areas of application, problems of translation and compatibility with other methods.

Environmental Technology

433. Structures III. Lecture, three hours. Prerequisite: Structures II, consent of instructor. Introduction to statically indeterminate analysis. Structural materials and loads. Wind loads: distribution with height, design for comfort, structure behavior under lateral loads. Steel construction: beams and columns, internal forces and compatibility. Reinforced concrete: theory: elastic and ultimate strength analysis and design of beams, columns and slabs. Case studies. The Staff

436. Construction Documents. Lecture, eight hours. This course considers the relationship of the design processes from schematic design through the production of all of the documents for the construction contract. A simple structure will be designed and the design development will be carried through working drawings and an outline form of specifications.

437. Building Construction. Lecture, four hours. Introduction to the first principles of structure and building construction. Building elements are not only explored for their structural qualities and possibilities of their production and assembly, but also concerning their formal and functional properties, and particularly their application and role within a building. The Staff

439. Methods in Building Systems Development. Base for open building systems: reference system, component compatibility, measurement regulation, modular coordination, in-depth study of past and present research and developments, such as SCSO, SAR.

441. Environmental Control Systems. Lecture, three hours. Prerequisite: consent of instructor. The design of the mechanical systems necessary for the functioning of large buildings: air handling, fire and life safety, plumbing, vertical and horizontal circulation, communication and electrical power distribution, analysis of the interaction of these systems and their integrated effects on the architectural form of a building.

442. Building Climatology. Lecture, three hours. Prerequisites: basic physics, completion of first year in Master of Architecture I, consent of instructor. The design of buildings which specifically respond to the local climatic conditions of temperature, humidity, human thermal comfort; sun motion and sun control devices; use of plant materials and land form to modify microclimate.

Mr. Givoni, Mr. Johnson
443. Passively Integrated Solar Systems. Lecture, four hours. Prerequisites: Building Climatology, 442, and consent of instructor. The course will analyze the different passive integrated solar systems for heating and cooling, consider their anticipated performance and suitability for different climates and building types. The course will be focused on quality aspects, including calculations of performance in terms of energy saving and expected indoor comfort conditions. Mr. Givoni

444. Light and the Visual Environment. Lecture, four hours. Prerequisite: Structures II, or consent of instructor. Explores the extent to which the physical form of a building controls the luminous environment of its occupants; the design of naturally and artificially illuminated environments; parameters of human visual comfort. Mr. Milne

445. Sound and the Auditory Environment. Lecture, four hours. Prerequisite: Structures II, or consent of instructor. Explores the extent to which the physical form of a building controls the acoustic environment of its occupants; the design of spaces for auditory privacy and for auditory enhancement; parameters of human audition. Mr. Milne

446. Introduction to Energy Conserving Design. Prerequisite: Master of Architecture I students must have taken Building Climatology or equivalent. Other: consent of instructor. A professional practice-oriented view of introductory energy flow and thermal comfort concepts. Review of existing and developing Energy Conserving Design and Management “active” and “passive” techniques. Application of solar technology to architectural design within the ECD/M context. Explanation of historical as well as current and proposed energy/resource consuming, climate responsive buildings and cities. May be repeated for credit. Mr. Schoen

Socio-Physical Research and Design

192. Housing and Settlement Patterns. Patterns of spatial organization in housing and small settlements in a range of cultures. Interaction between spatial patterns and prevailing social attitudes toward the individual, the family, land ownership and toward authority, aggression, and communalism. The Staff

254. Research In Human-Environment Relations. (1/2 to 2 courses) Selected topics for research in social and behavioral relations to the environment. This course is intended to provide a teaching space for visiting teachers in the social and behavioral sciences. It may be repeated since its contents are not set and differ each time it is offered. The Staff

292. Social Building Theory. Prerequisite: consent of instructor. Review of basic literature on application of social science theory and data to the design and development of socio-technical systems. Mr. Rand

294. Environmental Psychology and Sociology. Prerequisite: consent of instructor. Environmentally based and interpreted approach to psychological states and individual and social behavior. Territoriality, density, stress and adaptation, environmental cognition, aesthetics and preferences are considered. Mr. Rand

295. Cognitive Processes of Design. Lecture, three hours. Review of concepts of perception and conception (e.g., imagery, reasoning, memory, representation, communication) as they apply to the design process. Special emphasis on the role of visual and schematic thinking in design problem-solving. The Staff

296. Social Analysis of Buildings and Settings. Prerequisite: consent of instructor. The class will conduct a ten-week evaluation of a building in Los Angeles, designed and built within the past five years, where the architect, builder, initiator or other parties involved in the inception process are available for cooperative review of the facility. The structure of the course involves a review of evaluation theory in the first three weeks, and a series of exercises performed on a single building, looking at its effectiveness and character through a variety of approaches to evaluation. The class will produce a comprehensive evaluation using multiple-methods for each building evaluated. Mr. Rand

297. Group Process in Design. Prerequisite: consent of instructor. This course aims to equip students with the knowledge and skills needed to work effectively in design processes with other professionals and with client and user groups in organizational and other settings where interaction is important in determining design outcomes. The Staff

298. Social Meaning of Space. Discussion, three hours. Traces the evolution of the concept of space from its origins in ritual and primitive social organizations. Concentrates on the child’s evolving conception of space, literature on perceptual development and theories of adaptation to the spatial configuration of the human-made environment. Mr. Rand

299. Application of Behavioral Research to the Design Process. Lecture, three hours. Prerequisite: course 256 or consent of instructor. Application of behavioral research to the design process. This course attempts to begin the difficult task of bridging the gap between research and design by building upon the ideas and techniques generated in SAUP 258 and applying them to research in a field situation and the translation of the results of this research into a preliminary design solution in a selected community. Emphasis will be placed upon problem definition, the generation of meaningful research questions and understanding the research/design interface, and novel ways of presenting design ideas. May be repeated for credit. The Staff

Architectural and Urban Analysis

218A-218B. Urban Structure: Analysis and Modeling. Discussion, three hours. Prerequisite: consent of instructor. Generation of conceptual frameworks on the urban structure based on empirical data, urban theories, and mathematical models. Individual and group research on selected aspects of urban systems. Application of models in decision-making, particularly in urban design projects. Mr. Lang

236. Research in Architectural and Urban Analysis. Discussion, three hours. Prerequisite: consent of instructor. Selected topics in architectural and urban systems. Documentation and project work; field work. The Staff

255. Urban Morphology: Definitions and Consequences. Lecture, three hours. An analysis of urban spatial form and its socio-economic and behavioral bases and consequences. Special emphasis is placed on ecological approaches (e.g., social area analysis, urban growth models, factorial ecology) and behavioral analysis (cognitive mapping, urban imagery, attitudes toward human and material resources). Mr. Stea

271. Elements of Urban Design. Lecture, three hours. Introduction of basic knowledge of elements and methods of urban design. A multidisciplinary approach leading to an understanding of the political, socio-economic and technological framework of urban systems and its dynamic interrelations.

Mr. Lang, Mr. Schultz

275. Urban Form. Discussion, four hours. Seminar on recent and historical urban design projects, elucidating the planning objectives, design intentions, operational characteristics, physical components, and environmental consequences of each project. Development of a definitional framework, analytical criteria, and practical direction in the examination of urban form. The Staff

279A. Housing for Developing Countries. Discussion, three hours. Considerations of socio-cultural, economic, and political factors, materials, structural systems, shelter accessibility, and marketing techniques relevant to the priorities of developing countries in housing policies and the planning and design of shelter. Mr. Aroni

289. Special Topics in Architecture and Urban Design. (1 to 2 courses) Prerequisite: consent of instructor. Selected academic topics initiated by students, student teams or faculty and directed by a member of the faculty. May be repeated for credit.

290. Design Seminar in Educational Systems and Facilities. Laboratory, six hours. Explores education as an environmental system, including: modular structural, functions, technology, interactions with other social systems, and possible innovations. Examines implications for design of educational structures, facilities, equipment, and arrangements. Requires design and critique of alternative physical or functional features. May be repeated for credit. Mr. Vreeland

Environmental Management

203A-203B. Decision-Making in Planning and Design. Lecture, three hours. Statistical decision theory and alternative design solutions for coping with different degrees of future uncertainty in planning; nature of models for rational behavior in presence of conflicts of interest; individual and group decision-making under uncertainty. Mr. Adelson

204. Imaging the Future. Lecture, three hours. Introduction to social and technological forecasting, including: nature and limitations of forecasting; ideology and values in forecasting, review of integrative forecasting techniques, and the role of forecasting in environmental planning, design and management processes. Mr. Adelson

291. Architectural Programming and Theory. Discussion, four hours. The first part of the course explores concepts and methods of architectural programming and its interrelation to the design process; planning of the design process; various techniques for the determination of program contents, basic conditions, resources and constraints; the identification of solution types for given situations. In the second part of the course, the theoretical background is applied in the development of a program for the thesis. The Staff

460. Architectural Management. Lecture, three hours. Problems of land development and real estate. The professions of architecture and planning: traditional and innovative organizational forms. Manufacturing, distribution, transport, and on-site construction/assembly. Controls and resources: government programs and restrictions; financing and administration; costs estimation, materials and labor availability. The Staff

461. Professional Organization and Practice. Lecture, three hours. The profession of architecture: historical development, relationship to other professions and disciplines, the changing role of the architect. Architecture and professional societies: The American Institute of Architects, state and national registration boards, educational accreditation. Legal and ethical questions relating to the practice of architecture. Emerging forms of architectural practice. Mr. Phelps
Architectural Theory, History and Criticism

189. Pre-Modern and Post Modern Architecture. Consideration of nineteenth century revivals and the response of architects to a growing historical awareness. Issues of eclecticism within the Beaux Arts and Art Nouveau movements will be studied. These same themes will be re-considered in terms of the modern era. Mr. Jenkins

191. Modern Architecture. A brief examination of the tenets of Western Architecture after the Renaissance, the accelerating eclecticism of the nineteenth century, the basis of the revolutionary movements of the twentieth century, new currents in Britain, Italy, France and the United States, and the subsequent extension and rejection of those movements after World War II. Though the “International Style” is the central figure of this drama, its ancestors occupy the stage as well. Mr. Moore

201A. Architectural Theory. (½ to 1 course) Lecture, three hours. Varying present-day and historical descriptive and normative frameworks for the discussion of architecture and its relation to other aspects of the environment. The effects of literary, art, and other forms of criticism on architectural theory. Epochs and styles, ideologies and social settings for architecture. The Staff

202A. Image and Cultural Symbolization. Lecture, three hours. This course will demonstrate how modern architecture is a language that sometimes fails to communicate its intended messages. It will treat the division between elitist and popular architecture and suggest means of designing to overcome this division. Basically by the discipline’s “codes” of architectural meaning. Students will be expected to either analyze a building semiotically, or design a building using the various “codes.” Mr. Aran

286. History of Specific Building Types. Lecture, three hours. Consideration of socio-economic and historical factors involved in the development of a specific building type, i.e., theaters, schools, museums and hospitals. May be repeated for credit. Mr. Aran

Architectural Theory: The Mediterranean Area. Prerequisite: consent of instructor. The aim of this course is to study the influence of the physical and social environments on building activity throughout the history of societies around the Mediterranean. Special consideration is given to architectural development in Greece and Rome. Mr. Aran

288. Architectural History: Medieval Period. Prerequisite: consent of instructor. A survey of European architecture from the year one thousand with selected buildings and environments considered in terms of the cultural contexts. Mr. Aran

Planning Theory

197. Planning for Minority Communities. Lecture, three hours. This course will introduce the student to inner city policy issues on three separate levels: (1) each student will develop a comprehensive inner city urban program using materials from the Alternatives inner City Future Exercise, (2) each student will prepare a minimum of a 10-page paper on a conjectured and theorized social justice implicit or explicit in alternative intervention programs, and (3) each student is expected to participate in class discussions with the purpose of minority issues will be subject implementation. Mr. Estrada

200. The Good Society. An exploration of alternative value premises in planning and social construction, the course will undertake a critical appraisal of contemporary American society and examine socialist and communalist alternatives of social organization. Mr. Friedmann

201B. Colloquium in Planning Theory. Prerequisite: enrollment limited to Ph.D. students. An in-depth and critical examination of major issues in Planning Theory. Faculty and students jointly select topics of importance for discussion. This course is graded S/F. Dr. Frick

209. Special Topics in Planning Theory. (½ to 2 courses) Lecture, three hours. Seminar on topics in planning theory selected by the faculty. May be repeated for credit. The Staff

212. Planning Theory: Time and the Future. Analyzes how time is, and can be, used as a factor in urban decisions and actions. Focuses on concepts and methods for dealing with the middle- and longer-range future, including asset accounting, time- and goal-oriented systems analysis, and different approaches to “planning for a better future.” Mr. Perloff

223A. Professional Development Series. Lecture, three hours. A lecture-seminar-project course offering an introduction to the planning profession and, more specifically, to the Urban Planning Program at UCLA. An overview of the forces that shaped its practice over time and an exploration of various professional roles for planners. Planning education will be viewed as a response to changing needs and as a catalytic force for emerging professional roles. Several short projects are designed to expose students to real world planning problems and to various viewpoints and methods that the Areas of Policy Specialties would bring to bear on the problems. Generally taken Fall Quarter of the first year as an introduction to 223B and 223C. Mr. Heskin

Planning Methods

206. Urban Data Analysis. Lecture, four hours. This course will review research methods integrated by a common planning theme. Among the methods covered are observational methods, data collection techniques, including survey methods, and the use of available data (i.e., census data, administrative data, etc.). Analytical techniques such as index construction, standardization, and trend analysis, will also be discussed. Each method technique will involve exercises during the semester. Generally taken in the first year. The Staff

207. Public Resource Allocation. Lecture, three hours. Prerequisite: a previous course in introductory micro-economics. Overview of welfare economics and its application to planning. Discussion of the operation of private markets, with an emphasis on market imperfections, including natural monopolies, externalities, and collective goods, and the implications for public action. Discussion of public policy objectives and criteria for policy appraisal. Introduction to economics of political organization. Brief review of alternative economic systems. Mr. Shoup and the Staff

208A-208B. Seminar in Advanced Research Methods. (1 course, ½ course) Prerequisites: Ph.D. status or permission of instructor. Students required to participate in an independent study course (from 2-4 units) in order to prepare dissertation topics to be discussed in 208B. The 208A course, offered Fall, will consist of 15 lecture-discussions on research methods; (2) lecture-discussions by visitors, mostly members of the Urban Planning faculty, leading to the identification of dissertation topics; and (3) potential topics developed by each student. The 208B course will also include an introduction to the use of the computer as a tool in planning-related research. Ms. Liggett

220A. Quantitative Analysis in Urban Planning I. Lecture, three hours. Prerequisite: college course in mathematics. An introduction to statistical concepts and methods with applications in urban planning. The course will include basic mathematical concepts fundamental to planning methods and cover descriptive statistics, probability and sampling techniques. The course will include the use of the computer as a tool in analysis of planning-related data. Ms. Liggett

220B. Quantitative Analysis in Urban Planning II. Lecture, three hours. Prerequisite: course 220A or equivalent (demonstrated by passing score on a one-hour proficiency examination given on first day of 220A course). An introduction to concepts of statistical inference and modeling with an emphasis on urban planning applications. Topics to be covered include hypothesis testing, analysis of variance, correlation, regression and causal modeling. Applications will include such planning problems as forecasting population growth and change, estimating the use and need for public facilities, and analyzing the changing social and economic characteristics of urban populations. Case studies will be presented which cover the design and analysis of typical urban planning research projects. The course will also include use of the computer as a tool in statistical analysis and modeling. Ms. Liggett

221A. Evaluation Research. Prerequisite: course 220A and 207 or equivalent. This course focuses on the conceptual approach, methods and problems encountered in conducting evaluative research. Topics covered will begin with the purposes of evaluation, and follow through with steps involved in the evaluative process, and conclude with some discussion on the uses and future of evaluation in planning. Case studies will be used as examples. Students will develop a comprehensive evaluation design for a social action program as a class project. Ms. Hill Scott

221B. Project Evaluation Methods. Prerequisite: course 207. Major topics include benefit-cost analysis; goals-achievement matrices (and variants); panels of experts (Delphi, etc.); citizen participation; policy evaluation; sensitivity analysis; brief exposure to complementary approaches (cross-impact matrices, graphics, advocacy, domains analysis, systems analysis, Goal-Quest variants, goals programming and models frameworks) Mr. Shoup

228. Special Topics in Planning Methods. (½ to 2 courses) Seminar on topics in planning methodology selected by the faculty. May be repeated for credit. The Staff
Projects in Planning

M20C. Seminar: Urban Affairs. (1/2 course) (Same as Law M256.) The purpose of the course is to explore a concrete case setting the application of legal tools to the solution of planning and land use problems. Real situations are selected in which significant planning problems exist that appear to be amenable to solution by use of some or all of the legal tools. A number of case studies are selected so that students may choose one which directly interests them. For each case a specific client works with the class in presenting to it the problem that client is facing, and remains available through the course of the project for consultation; the end product for each case is the presentation of a formal report. Clients include the City Planning Commission, the Environment Department, the Housing Authority, and others. Letter grade for M20C.

Mr. Hagan

217A-217B. Comprehensive Planning Project. Prerequisite: second year standing. The comprehensive project is offered by at least two faculty members representing different Areas of Policy Concentration in the Urban Planning Program and brings together students of varying backgrounds and interests in joint solution of a problem in urban planning and development. Each project is selected by the Special Staff of M223C with one quarter of 496F or 490 to meet their field work requirement. The Staff focuses on developing methods which integrate theory and practice through readings and individual and collective analyses of each student's experience. 223C continues the processes of 223B with the addition of a larger look at the planning profession by bringing noted professionals to the classroom to dialogue with the students. 223A is highly recommended as a prerequisite but not required. Students may wish to combine either 223B or 223C with one quarter of 496F or 490 to meet the one field work requirement.

The Staff

Urban and Regional Development

(Area of Concentration)

M231. Urban Housing and Community Development. (1 to 1 course) (Same as Law M287.) Lecture, three hours. This course is an introduction to law as an urban system and is directed primarily toward those interested in social and advocacy planning. The course will be organized around a number of current urban problems such as employment, housing, social welfare and land use and examine the law's role as a partial cause and cure of these problems. Although certain legal principles will be stressed, the course examines specific ways as to how the law is or may be used to affect the development of the law.

Mr. Heskin

232. Spatial Planning: Regional and International Development. An examination of the theory and practice of spatial planning at the regional, national, and international scales, including an evaluation of regional growth strategies, national settlement policy, growth center concepts, and the normative-ideological issues involved in international development planning. Generally taken in the first year.

Mr. Soja

233. The Political Economy of Urbanization. An introduction to the basic concepts and analytical approaches of urban political economy, with a major emphasis on American urban problems. Topics to be covered include the historical geography of urbanization, the development and transformation of urban spatial structure, suburbanization, and metropolitan political fragmentation, urban fiscal crisis, and the role of urban social movements.

Mr. Soja

234. Seminar in Spatial Development Policy. Prerequisite: course 232 or some background in analytical methods and the ability to express thoughts in writing. An advanced course dealing with the analysis, measurement, and interpretation of spatial change in developing countries, particularly in East and West Africa. It combines an in-depth examination of spatial development theory (especially with regard to spatial diffusion and settlement systems models), comparative studies in the geography of development, and a detailed assessment of some current African regional development plans. Generally taken in the second year.

Mr. Soja

235A-235B. Regional Approaches to National Development. Prerequisite: consent of instructor. A two-quarter sequence dealing with questions of urbanization and rural development in the Third World countries. Generally taken in the second year.

Mr. Friedmann

236A-236B. Urban and Regional Economic Development. Prerequisite: course 207. Economic growth policies and development planning in cities and regions. 236A will cover basic principles of urban and regional economics as they bear upon public policy formation and urban and regional planning. 236B will focus on local economic development issues and community planning, stressing the social implications of economic change.

The Staff

Social Policy and Public Services

(Area of Concentration)

240. Advanced Seminar in Social Policy and Public Services. Lecture, three hours. Prerequisite: consent of instructor. A seminar dealing with the general system within which services are supplied publicly or semi-publicly, and the problems of evaluating the system, and analytical techniques for evaluating the efficiency and effectiveness of services delivered to the public.

Mr. Shoup

241A. Urban Transportation Planning I. (Same as Engineering Systems M288B.) Lecture, four hours. Prerequisites: course M241A; 220A or equivalent. Economic and social basis for urban transportation planning and the current political and administrative frameworks for planning; the relationship between transportation systems and urban form, historical review of automobile and the public role of systems; urban highway and transit planning programs; the financing of urban transportation; environmental and social impacts of transportation systems; current policy dilemmas; controlling the automobile, promoting mass transit, energy issues, needs of elderly and handicapped.

Mr. Wachs

241B. Urban Transportation Planning II. (Same as Engineering Systems M288B.) Lecture, four hours. Prerequisites: courses M241A, 220A or equivalent. Another year in the history and development of urban transportation planning and the current political and administrative frameworks for planning; the relationship between transportation systems and urban form, historical review of automobile; public role of systems; urban highway and transit planning programs; the financing of urban transportation; environmental and social impacts of transportation systems; current policy dilemmas; controlling the automobile, promoting mass transit, energy issues, needs of elderly and handicapped.

Mr. Wachs

241C. Urban Transportation Planning III. (Same as Engineering Systems M288C.) Lecture, four hours. Prerequisites: courses M241A-M241B. Urban systems in the Third World; international development; transportation systems and planning; planning a road system and downtown people mover for Los Angeles; community dial-a-ride services; express buses on freeways; the San Francisco freeway Diamond Lane project; decision-making in the case of the Century Freeway; a Parking Management Program for Los Angeles; carpooling and vanpooling programs; field trips and guest speakers.

Mr. Ceisler

242. Introduction to Housing Markets. Lecture, four hours. Prerequisite: AUP 207 (or equivalent), may be taken concurrently. The ways that housing markets should but sometimes don't work in developed economies. Interaction of demand factors such as population distribution, household formation, income, and credit is emphasized, as well as particular impacts on groups of the population. Topics include filtering, housing search, segregation, pricing, mortgage programs, and the specific sectors of the construction industry, market failure, and appropriate policy responses.

Mr. Burns
245. Finance of Local Public Services. Lecture, three hours. Prerequisite: course 207 or consent of instructor. An examination of the major types of local government revenue sources (taxes, user charges, intergovernmental aid) and the public sector’s role in intergovernmental and interjurisdictional relationships, potential strategies for revenue sharing, and the role of revenue sharing in achieving policy objectives and administrative instruments. Mr. Marris

246. Housing in Social and Economic Developm¬ent. Policy. Lecture, three hours. Prerequisite: course 207 or equivalent or consent of instructor. Seminar on the position of housing in national and regional development strategies with a focus on policies for Third World nations. Topics include the nature of housing “need,” market responses, evolution of housing policy, theory of intervention, alternative policies for increasing the housing supply. Numerous case studies. Mr. Burns

249. Special Topics in Social Policy and Public Services. (½ to 2 courses) Lecture, three hours. Seminar topics in social policy and public services selected by the faculty. May be repeated for credit. The Staff

251. Planning for Multiple Publics. Lecture, three hours. Prerequisite: recommended background in statistics and research design. Course is designed to explore the planning needs of various social groups in urban settings. Students will be required to explore existing literature on selected topics and develop appropriate mechanisms of planning for multiple publics. The course will have students analyze communities in the Los Angeles metropolitan area as a means of gaining insights into the practical, theoretical, and normative sociological processes for multiple publics. Generally taken in the first year. Mr. Grigsby

252A. Human Lives in Development. Lecture, three hours. Covers the growth and development of the individual throughout the life cycle. In-depth attention given to various theories regarding human development, drawing implications for planning approaches. Emphasis is on psycho-social basis of individual development. Some proposed approaches are also offered for using human development information in social impact analysis. Ms. Hill Scott

252B. Social Policy in Human Development. Prerequisite: course 252A or consent of instructor. Seminar that explores the use of lifestyle and life cycle information in the planning process. Multidisciplinary background reading on exemplary planning studies that have attempted to consider behavioral needs and potentials during the planning process are analyzed. Case examples of the converse approach to planning and its consequences for social development are also discussed. Ms. Hill Scott

253. Social Theory for Planners. Lecture, three hours. Prerequisite: some prior knowledge of sociological theory would be useful but not essential. The course relates the sociological tradition of the concept of change, the role of the state, and the relationship between knowledge and values as they affect planning. The course will concentrate on the insights and crucial issues which have arisen from social theory, as they relate to the concerns of planning and social policy. Contemporary developments in urban sociolo¬gy will also be discussed. Mr. Marris

254. Social Research Methods. Prerequisite: course 220A or equivalent is recommended. Course reviews basic methods commonly used in planning or in applied social research. However, the emphasis is on the research process as a whole rather than specific techniques of research. Topics include: conceptualizing the research problem; developing a research plan; sampling, interviewing, and data collection; and time management of a research study. Mr. Estrada, Ms. Hill Scott

256. Social Impact Analysis. Lecture, three hours. Prerequisite: recommended: 220A-220B, a course in advanced statistics, a course in survey research and methodology, or consent of instructor. This course will explore ways of creating methods for assessing and determining social impacts on communities. Intent will be to develop both methodologies and policy formulation for assisting in community development. Enrollment limited. Generally taken in the second year. Mr. Grigsby

260. Advanced Seminar Natural Environment and Resources (Area of Concentration) M196. Engineering and Environmental Geology. (Same as Geography M112, Engineering M112) Three to five hours. Prerequisite: Geology 1 or 100; 111A recommended. Principles and practice of soil mechanics and foundation engineering in light of geologic conditions, recognition, prediction and control or abatement of subsidence, landslides, earth¬quakes, and other geologic aspects of urban planning and subsurface disposal of liquids and solid wastes. Mr. Merfield

261A. Introduction to Environmental Analysis. Lecture, three hours. Discussion of basic ecological principles relevant to environmental planning, including characteristics of ecosystems, energy transfer, biogeochemical cycles, dominance and niche theory, diversity and stability, species-area relations, etc. Attention will be drawn to the human role in modifying ecosystems. Generally taken in the first year. Ms. FitzSimmons

261B. Environmental Management. Lecture, three hours. Prerequisite: course 261A or consent of instructor. Application of ecological principles to the analysis of environmental impacts and the management of natural and urban/regional resources. The Staff

262. Residuals Management. (½ to 1 course) Lecture, three hours. Prerequisite: course 207 or consent of instructor. Advanced seminar covering a selected topic (to be specified each time that the course is offered) in the management of atmospheric emissions or solid wastes or nuclear radiation, etc. Emphasis is, although not restricted to, students specializing in Natural Environment and Resources. May be repeated for credit. Ms. FitzSimmons

263. Natural Resource Conservation. Lecture, three hours. This seminar explores, through presentations, readings, and discussion, the meaning of resource conservation, its desirability, and ways of achieving it. The focus is generally on minerals, although water, timber, wilderness may also be considered. The Staff

264. Environmental Law and Policy. (¼ to 1 course) Same as Law M290.) The course first examines, from perspectives meaningful to legal institu¬tions, the nature and background of problems. It then considers the means by which law has responded, and can and should respond, to problems of environmental quality. Both common law and legislative and administrative measures are considered. The course uses the air pollution problem as the primary vehicle for study. Ms. FitzSimmons

266. Seminar on Land-Use Planning. Lecture, three hours. Prerequisite: consent of instructor. A seminar-discussion course that builds on the basic planning concepts and knowledge discussed in other planning courses. The topics of discussion include the current practice of land-use planning, issues and problems, land-use planning as a tool for environmental protection and enhancement, and evolving policy. Mr. FitzSimmons

271. Site Planning. Introduction to principles of site planning for urban areas including new towns, towns-in-town, shopping centers, industrial parks, office parks, housing, and recreation areas. Discussion of case studies in Southern California, exercises at the scale of the small city, the urban neighborhood, and the superblock. Mr. Kamitner

272. Real Estate Development for Planners and Architects. Introduction to the real estate develop¬ment process specifically geared to students in Planning, Urban Design and Architecture. Financial deci¬sion model, market studies, designs, loan package, development plan and feasibility study. Lectures and projects which integrate the development process with proposed design solutions which are iteratively modified to meet economic feasibility tests. Mr. Kamitner

273. Comparative Settlement Forms. Comparative Settlement Forms examines the nature and morpholo¬gy of human settlements in the Third World and in the Fourth Worlds and in traditional areas of industrialized nations. The starting point of this analysis has been a set of “determinants” of form suggested by Amos Rapoport’s House Form and Culture and subse¬quent publications, but applied to a larger scale of habitation. The primary vehicle will be a sequence of case studies, including Native American and Native Canadian villages, Anasazi settlements, cooperative and traditional housing in Hawaii, Malay fishing villages, Bal¬inese Kampungs, Maori, Samoan, and other Poly¬nesian groups and examples in South America, Euro¬pe, and the Middle East. Mr. Stea

274. Introduction to Environmental Design and Planning. Lecture, three hours. Overview of the influe¬nces of other resources (e.g., water, timber, wilder¬ness) on the scale of the small city, the urban neighbor¬hood, and the superblock. Mr. Kamitner

276. Planning Workshop. (1 to 2 courses) Labo¬ratory, six hours. Prerequisite: 421 or 422 or Art 153A or 153B or demonstrated background in architectural design or consent of instructor. Planning workshops with a focus on physical planning. Emphasis on SYNTHETIC combined with iterative evaluation of the emerg¬ing solutions. Projects may be reality bound, hypothet¬ical, or in the form of exploring the impact of non¬physical forces on the physical environment. Development of presentation skills, both graphic and verbal, is an essential component of this workshop. Mr. Kamitner

277. Rural Planning With Native Americans. Treats past, present, and possible future directions of planning in Native American rural areas (reservations, communities, and national park). The course examines case studies in Native American reservation planning, such as the Rincon General Plan, or the Owens Valley, Morongo, Salt River Pima-Mariopa, and Na¬vajo Plans, as well as certain “critical” comparative studies of the Great Plains and the Northern Cheyenne reserva¬tions in Montana). Mr. Stea
281. Introduction to the History of the Built Environment in the United States. The built environment in the United States has evolved through complex decisions about the use of land and natural resources, the placement of towns, the development of transportation systems and the settlement. Lectures will cover the American and European settler societies, the Shakers and their perfectionism, the romantic suburbs of Downing and Olmsted; the crowded slums of major cities; the cooperative housing and the housing of design. The course will start with a review of certain concepts and methods used in practice. Starting with an overview of the planning field, the course addresses itself to physical planning for redevelopment, for projects in expanding areas and for new communities. Lectures will be illustrated by examples, field visits and presentation of the students' own projects. The course will introduce students to the kinds of problems that arise in creating and maintaining an environment for urban activities and the approaches and methods of architectural planning and housing in helping to cope with such problems. The students are exposed to the complexities involved in giving expression to human needs and desires in the provision of shelters and movement systems: to the possibilities and limitations of technology and building forms; and the issues involved in relating the human to the natural environment. The students are encouraged to comprehend the major urban issues both as citizens and as potential technical experts.

Mr. Kamnizer

190. The Human Environment: An Introduction to Architecture and Urban Planning. This course aims to introduce students to the kinds of problems that arise in creating and maintaining an environment for urban activities and the approaches and methods of architectural planning and housing in helping to cope with such problems. The students are exposed to the complexities involved in giving expression to human needs and desires in the provision of shelters and movement systems: to the possibilities and limitations of technology and building forms; and the issues involved in relating the human to the natural environment. The students are encouraged to comprehend the major urban issues both as citizens and as potential technical experts.

Mr. Perloff

226A. Computer Applications in Architecture and Urban Planning (Introductory). Lecture, three hours. Introduction to electronic computers and the FORTRAN IV programming language, with emphasis on writing and executing programs specifically applied to architecture and urban planning. The course will also provide an introduction to computer mapping techniques. No prerequisite or prior knowledge of computing is required.

Ms. Liggett

226B. Computer Applications in Architecture and Urban Planning (Advanced). Lecture, three hours. Prerequisite: course 226A or equivalent. Seminar on advanced computing techniques and modeling as applied to architecture and urban planning. This course will introduce the PC-111 programming language but will assume students have previous computing experience in another language.

Ms. Liggett

278. Research Methods in Human-Environment Relationships. (1/2 to 2 courses) Lecture, three hours; discussion, two hours. A survey of a variety of research methods applicable to problems on the human-environment interface, including both those now frequently employed (e.g., survey research) and others not so well known (e.g., ecological psychology, ethnography, and political science). Emphasis will be placed on understanding the nature of research, upon data collection, advantages and disadvantages, of the various methods rather than upon the learning of techniques. The course will start with a review of certain concepts background philosophy of science, emphasize practice in the application of research methods to selected exercises and a specific field situation, and conclude with some commentary upon the nature and future of statistical methods in the study of human-environment relations.

Mr. Sicha
Martin J. Powers, Ph.D., Assistant Professor of Art History
Adrian Saxo, B.F.E., Assistant Professor of Art.
Madeleine Sunkees, B.Ed., Emeritus Assistant Professor of Art, Emeritus.

Donald Roberts, Lecturer in Art.
Robert Wark, Ph.D., Lecturer in Art History.
Jean Weiss, M.A., Lecturer in Art History.

The Master of Arts Degree

Design

Admission requirements. An acceptable portfolio is required, in the form of slides (maximum 25). Acceptance is by a majority vote of the Design faculty. Formal Design Area faculty review of graduate applicant portfolios takes place toward the end of the Fall, Winter, and Spring Quarters.

For applicants who have a B.A. degree or equivalent, it is possible to be admitted on an Unconditional Basis, or on a Provisional Basis. Further explanation follows:

Advising. Unconditional Admission: Immediately upon an applicant’s acceptance on an Unconditional Basis, an initial Advisory Committee will be formed by the Chairperson of the Design Area and/or the Graduate Affairs Assistant of the Department. This committee will be composed of the student’s two sponsors, one of whom will serve as the student’s adviser, and at least one other member of the Design faculty. It is the adviser’s responsibility, along with other members of the committee, to observe the student’s progress and give advice until the student is considered ready to select his/her Graduate Guidance Committee for the graduate degree. Members of this initial Advisory Committee may or may not eventually become members of the student’s Graduate Guidance Committee.

Provisional Admission: Provisional Admission for two quarters only is recommended when an applicant shows great promise, but the grade point average is below 3.0; preparation for the graduate area of specialization is insufficient as demonstrated in the portfolio; undergraduate preparation is inadequate as indicated in transcripts.

Immediately upon acceptance on a Provisional basis, an Advisory Committee for Provisional Students will be formed by the Chairperson of the Design Area and/or the Graduate Affairs Assistant of the Department. This committee will be composed of the student’s adviser, and at least one other member of the Design faculty. It is the adviser’s responsibility, along with other members of the committee, to consider the inadequacy which prompted Provisional Admission and outline a program of study that will strengthen the student sufficiently to allow him/her to continue on an Unconditional basis.

No later than the final week of instruction of the second quarter of Provisional Admission, the Advisory Committee will meet with the student to determine whether Provisional status is to be removed or the student dismissed. The recommendation of the committee will stand as the final decision in each case.

No later than the end of the fourth quarter of full-time residency, the Graduate Guidance Committee shall be established. The student, in consultation with his/her adviser, is responsible for selection of committee members as specified in the following:

1) Committee Chairperson: the student’s adviser, and a member of the Academic Senate, unless petitioned otherwise.
2) Second member: a faculty member from the Design area.
3) Third member: a person of academic rank or equivalent professional standing from outside the Department of Art, Design, and Art History (possibly outside the University).

The Advisory Committee and/or the Graduate Guidance Committee is charged with the responsibility of reviewing the student’s progress at least once every quarter that the student is enrolled. A record of these reviews shall be placed in the student’s file, open for his/her inspection.

Major Fields or Subdisciplines. Communication imagery, image transfer, electronic imagery, costume, ceramics, glass, fiber structures, textiles, landscape design, industrial design or exhibition design.

Course Requirements. A minimum of 36 quarter units in the Department of Art (or non-departmental courses with the Graduate Adviser's approval) in courses numbered 100 to 299 (and possibly 596), with a "B" average, including a minimum of 20 quarter units of design numbered above 200, of which at least 8 units must be the Design Seminar, Art 290 A, B, C, and at least 8 units devoted to a comprehensive project in the student's area of study. In addition, 8 quarter units of art history; or if the student has a B.A. or B.F.A. in Art which includes a background in the history of art, he/she may in conference with his/her faculty adviser, substitute 8 units in other courses that are germane to his/her graduate pursuit.

Comprehensive Examination Plan. The Comprehensive Examination (offered each quarter) consists of an oral examination and a concentrated body of work which is presented as the master's statement. Also required, is an accompanying record of the project consisting of documentation in the form of slides of physical work, research material, other visual material, which may include a written statement as determined by the Graduate Guidance Committee. This examination is conducted by the student's Graduate Guidance Committee.

Time to Degree. From graduate admission to award of the degree: normally six quarters.

500 Series Course Limitations. No more than two 596 courses (8 units) may apply towards the 36 required for the degree.

Disqualification and Appeal of Disqualification. If, by virtue of a review by the student’s Graduate Guidance Committee, the student’s work is not deemed to be of graduate quality/quantity, the Guidance Committee may recommend termination.

Other Relevant Information. The M.A. degree reflects mature creative achievement demonstrated within the various disciplines of design, identifying the degree recipient as having developed an advanced level of original work.

Art

Admission Requirements. Regular admission requires a B.A. or equivalent and faculty approval following the annual review of applicants' creative work in one of two kinds of presentations. 1. slides only. 2. the original creative works, both presentations limited to a maximum of 20, minimum of 10 works showing media emphasis and potential for advanced study.

Provisional admission may be granted for work with faculty sponsors for three quarters, pending reconsideration of regular admission.

The M.A. is not prerequisite to the M.F.A. Admission to the M.F.A. program is usual, with a possible decision deferred to conclude an M.A. only, or before the M.F.A. The unit requirements applied to concluding the M.A. will not apply to the M.F.A., with the exception of the accumulative Art History units.

The annual review of applicants' work is in February, for admission in the next Fall Quarter, together with reviews of scholarship and teaching assistantship applications. Students are admitted for Fall Quarter only.

Admitted graduates who do not enroll, drop out, or take a leave of absence must be reviewed for readmission at the next annual review, except by petition.

Advising. For general advising: Graduate Affairs Assistant. Faculty advisers are available for new students, by referral and mutual consent, usually related to media specialization. Continuing Graduate Reviews are held toward the end of each quarter, with the entire faculty in attendance. Results of these reviews are placed in the student’s file, and available for inspection by students.

Major Fields or Subdisciplines. Drawing, Painting, Sculpture, Printmaking, Photography, Video, New Forms and Concepts. No limits to the variations, extent, or value of these designations is intended.

Course Requirements for the M.A. A minimum total of 36 quarter units in the Department of Art, Design, and Art History from 100 to 299, are required, with a B or better average.
Within those 36 units, a minimum of 20 quarter units in the 200 series must be taken in the field of specialization.

A minimum total of 36 quarter units must be taken in art history, theory and criticism, in undergraduate and graduate study. Subjects (by petition) related to the special interest of the student may be substituted.

Comprehensive Examination Plan. Each degree is granted upon the basis of the quality of the student’s work as demonstrated in the exhibition which accompanies the final Comprehensive Examination. The number of units of credit attained is irrelevant to this judgment. By mutual consultation and consent of student and individual faculty, an Advisory and Examining Committee, with a chair, must be established not less than three quarters before the Comprehensive Examination. Committee members may not change in these three quarters except to provide for faculty absence.

The M.A. committee shall consist of a minimum of three members from the PSGA curriculum. A preconcluding review of work precedes the Final Comprehensive Examination. The Examination, usually oral, includes a formal exhibition of work, and, as a document: of vita, photo records of works and a statement of the artist. The document is retained as property of the University.

Time to Degree. From graduate admission to award of the degree: six quarters.

500 Series Course Limitations. A maximum of two 596 courses (8 units) may be applied toward the 36 units required for the degree.

Teaching Experience. Teaching experience is not a requirement for the degree.

Disqualification and Appeal of Disqualification. Following reviews, verbal and written notice may be given of probationary status, pending the next review. Unresolved difficulties may conclude in termination. Appeal to the Vice Chairperson in Art, Design, and Art History.

Art History

Admission Requirements. A minimum grade point average of 3.25 overall and 3.50 in upper division art history courses is required. The Graduate Record Examination is required, although no cutoff score has been established. Three letters of recommendation (preferably from art historians) are required. The Statement of Purpose submitted with the application is given weight in the evaluation and should be as specific as possible about the applicant’s interests in art history. In addition, the student must have completed six full courses in the history of art, distributed over at least four of the following seven categories such that three fall within categories a. through d., and three within categories e. through g.

a) Egypt, Ancient Near East, Classical
b) Medieval (Western European; Byzantine)
c) Renaissance, Baroque, Prints and Drawings
d) Modern European, Modern American, Prints and Drawings
e) Chinese, Japanese
f) African, Oceanic, Native North America, Pre-Columbian
g) Islamic, Indian

Applicants demonstrating exceptional promise who lack some or all of the six required courses may, at the discretion of the Graduate Review Committee, be admitted on condition that they make up those courses. Deficiencies must be made up during the first two quarters of residence and will not count toward the 10 courses required for the degree. Instead of taking a course, the student may elect to substitute a competency examination in the deficient area. Applicants are expected to possess some fluency in at least one of the two languages for which they will be responsible (see Foreign Language Requirement) and are encouraged to take either the ETS or the UCLA Art, Design, and Art History Department examination in one of those languages at the time of application. Prospective students may contact the Graduate Affairs Assistant, Department of Art, Design, and Art History for brochures, etc. The Department has no special departmental application.

Advising. Address: Graduate Adviser, Department of Art, Design, and Art History. Personal advisers are selected as follows: By the end of the third quarter in residence, a student chooses his/her major and minor advisers; the choice is determined by the fields of study. Changes are made by petition to the Graduate Review Committee; the basis for change will normally be change in field. Internal grading and evaluation consists of comments made by professors about students’ performance in seminars; these comments are put into students’ files which are available to them. Overall assessment of a student’s work is made by the personal adviser. The major adviser must be consulted at least once each quarter to review progress and plan the program. Records are not kept of these meetings. The student’s major and minor advisers constitute the guidance committee.

Major Fields or Subdisciplines. Egyptian, Ancient Near East, Classical, Medieval (Western European; Byzantine), Renaissance, Baroque, Prints and Drawings, Modern European, Modern American, Chinese, Japanese, African, Oceanic, Native North American, Pre-Columbian, Islamic, Indian.

Foreign Language Requirement. A reading knowledge of French and German is required of all students except those intending to major in Asian (i.e., Chinese, Japanese, Indian) or Pre-Columbian art history. Students majoring in Chinese or Japanese art history (who are not native speakers of the relevant language) must substitute either Chinese or Japanese respectively for either French or German. Those majoring in Indian art history must substitute, for either French or German, an appropriate classical research language of India. In all cases, the final decisions regarding choice must be made in consultation with, and with the consent of, the major adviser. Students majoring in Pre-Columbian art history must substitute Spanish for French. With the exception of Asian art history majors, all students must demonstrate reading fluency in both foreign languages in any of the following ways: a) by passing the Art, Design, and Art History Department language examination, b) by passing the ETS examination with a minimum score of 600, c) by enrolling in and completing with a minimum grade of B, the UCLA courses French 5, German 5, and/or Spanish 25. One of these language requirements must be satisfied by the end of the second quarter of residence and the other by the end of the fourth. Students majoring in an Asian art history area must satisfy their European language requirement by the end of the second quarter of residence and may do so in any of the three ways listed above. Their Asian language requirement, however, is normally satisfied by enrolling in an appropriate course sequence for six consecutive quarters (normally beginning with the first quarter of graduate study) and by maintaining a grade of B or better in those courses. Details and/or exceptions must be worked out with the student’s major adviser. A student who has passed a required foreign language examination at another institution should consult the Chairperson of the Art Department Language Committee to determine if his/her previous examination is acceptable.

Course Requirements. The M.A. degree requires the completion of a major and two minors. Students intending to major in areas included in categories e. through g. (see Admission Requirements) will choose at least one minor from categories a. through d. Conversely, students intending to major in areas included in categories a. through d. will choose at least one minor from areas included in categories e. through g. Students are required to take a minimum of 10 graduate and upper division courses, of which at least eight must be in art history, and of which at least six must be graduate courses (i.e., in the 200 and 500 series). At least four of these, including course 201 (Historiography of Art), must be in the 200 series, and no more than two may be "directed studies" (596) projects. All students must take: (1) course 201 (Historiography of Art), (2) four courses in the major and (3) two courses in each minor.
Thesis Plan. The thesis committee is established upon completion of all course requirements. The thesis committee consists of the student's major adviser and two other UCLA faculty members, one of whom must be a member of the art history faculty. Normally, the student's two minor advisers serve in this capacity. At the same time, the student selects a thesis topic in his/her major field. This thesis should deal succinctly with the topic in an independent, critical and original fashion while taking fully into account the present state of research on the problem.

Time to Degree. From graduate admission to award of the degree: two to three years.

500 Series Course Limitations. See Course Requirements above.

Teaching Experience. Teaching experience is not a requirement for the degree.

Disqualification and Appeal of Disqualification. If the thesis is rejected by one member of the student's committee, it may, at the request of the major adviser, be submitted to the Graduate Review Committee for final judgment; otherwise, the student's candidacy is terminated.

The Master of Fine Arts Degree

Design

Admission Requirements. Admission requirements and procedures are essentially the same as for the M.A. in Design with the following difference in emphasis:

The M.F.A. degree is the highest academic degree awarded in studio disciplines of art and is conferred on the basis of outstanding achievement and consistent demonstration of quality throughout an original body of creative work. A higher standard of demonstrated ability and preparation in the area of intended study is usually applied in the portfolio review of applicants seeking admission directly to the M.F.A. program in comparison to M.A. applicants. M.F.A. applicants are usually not admitted on a provisional basis when there are deficiencies in the applicant's portfolio, preparation or academic record.

Course Requirements. A minimum of 72 quarter units of Design numbered 100 to 299, of which at least 8 units must be the Design seminar (Art 290 A, B, C) and of which at least 12 units must be devoted to a comprehensive project in the student's area of study; a minimum of 40 quarter units of art history in undergraduate and graduate study. The student, with the approval of his/her faculty adviser, may substitute a maximum of 12 units in other courses that are germane to his/her graduate pursuits.

Comprehensive Examination Plan. The Comprehensive Examination (offered each quarter) consists of an oral examination and concentrated body of work which is presented as the master's statement. Also required, is an accompanying record of the project consisting of documentation in the form of slides of physical work, research material, other visual material, and which may include a written statement as determined by the Graduate Guidance Committee. This examination is conducted by the student's Graduate Guidance Committee.

Time to Degree. From graduate admission to award of the degree: normally nine quarters.

500 Series Course Limitations. No more than three 596 courses shall apply towards the 72 units required for the M.F.A. degree.

Disqualification and Appeal of Disqualification. If, by virtue of a review by the student's Graduate Guidance Committee, the student's work is not deemed to be of graduate quality/quantity, the Guidance Committee may recommend termination.

Art

Admission Requirements. Regular admission requires a B.A. or equivalent, and, faculty approval following the annual review of applicants' creative work in one of two kinds of presentations, 1. slides only, or 2. the original creative works, both presentations limited to a maximum of 20, minimum of 10 works showing media emphasis and potential for advanced study.

Provisional admission may be granted for work with faculty sponsors for three quarters, pending reconsideration of regular admission.

The M.A. is not prerequisite to the M.F.A. Admission to the M.F.A. program is usual, with a possible decision deferred to conclude an M.A. only, or, before the M.F.A. The unit requirements applied to concluding the M.A. will not apply to the M.F.A., with the exception of the cumulative Art History units.

The annual review of applicants' work is in February, for admission in the next Fall Quarter, together with reviews of scholarship and teaching assistantship applications. Students are admitted for the Fall quarter only.

Admitted graduates who do not enroll, drop out, or take a leave of absence must be reviewed for readmission at the next annual review, except by petition.

Students may contact Maggie Keefer, Graduate Affairs Assistant, to obtain departmental brochures.

Advising. For general advising: Graduate Affairs Assistant. Faculty advisers are available for new students, by referral and mutual consent, usually related to media specialization. Continuing Graduate Reviews are held toward the end of each quarter, with the entire faculty in attendance. Results of these reviews are placed in the student's file, and are available for inspection by students.

Major Fields or Subdisciplines. Drawing, Painting, Sculpture, Printmaking, Photography, Video, New Forms and Concepts. No limits to the variations, extent or value of these designations is intended.

Course Requirements. A minimum total of 72 quarter units in the Department of Art, from 100 to 299, with a B or better average.

Within those 72 units, a minimum of 44 quarter units in the field of specialization, including a minimum of 40 quarter units in the 200 series.

A minimum of 40 quarter units in art history, theory and criticism in undergraduate and graduate study. Subjects (by petition) related to the special interest of the student may be substituted.

Comprehensive Examination Plan. Each degree is granted upon the basis of the quality of the student's work as demonstrated in the exhibition which accompanies the Final Comprehensive Examination. The number of units of credit attained is irrelevant to this judgment.

By mutual consultation and consent of student and individual faculty, an Advisory and Examining Committee, with a Chair, must be established not less than three quarters before the Comprehensive Examination. Committee members may not change in these three quarters except to provide for faculty absence. A preconcluding review of work precedes the Final Comprehensive Examination.

The Examination, usually oral, includes a formal exhibition of work, and, a document of: vita, photo records of works and a statement of the artist. The document is retained as property of the University.

The M.F.A. committee shall consist of four Art faculty members. One additional member from a curriculum outside Art may be selected. The outside member may be a faculty member from a department other than Art, Design, and Art History or from another curriculum in the Department.

Time to Degree. From graduate admission to award of the degree: nine quarters.

500 Series Course Limitations. A maximum of three 596 courses (12 units) may be applied toward the 72 units required for the degree.

Teaching Experience. Teaching experience is not a requirement for the degree.

Disqualification and Appeal of Disqualification. Following reviews, verbal and written notice may be given of probationary status, pending the next review. Unresolved difficulties may conclude in termination. Appeal to the Vice Chairperson in Art, Design, and Art History may be made.
The Ph.D. Degree

Art History

Admission Requirements. The M.A. in Art history is required for admission to the Ph.D. degree program. An M.A. in Art history from another institution may be accepted as equivalent to that from UCLA or the holder may be accepted into the program at a stage determined by the Graduate Review Committee. All incoming Ph.D. students must show evidence of having taken and passed with a grade of B or better, at least two courses (upper division and/or graduate) in areas not related to the proposed major (as outlined in M.A. course requirements, art history). Deficiencies must be made up during the first two quarters of residence and will not count toward the eight courses required for the Ph.D.

The student's application to the Department must include, in addition to official transcripts submitted to the Admissions Office, all of the following:

a) A standard, approximately 400-word, statement of purpose.

b) A copy of the applicant's M.A. thesis, or if no thesis was written, one major research paper written at the M.A. level in the major, or intended major, field.

c) Three or more letters of recommendation from individuals familiar with the applicant's scholarly work, of which one must be a detailed letter of assessment and endorsement from the individual who served as the applicant's major adviser for the M.A.

d) A written statement from the applicant's intended major adviser at the Ph.D. level of his/her willingness to supervise the applicant's Ph.D. work.

e) Evidence of reading fluency in two appropriate foreign languages.

Students applying directly to the Ph.D. program from the M.A. in Art History program at UCLA follow a slightly modified procedure. For details, see the Graduate Affairs Assistant.

A reading knowledge of French and German is requisite for admission at the Ph.D. level for those majoring in all areas except Asian and Pre-Columbian. Students may demonstrate this knowledge by submitting proof of an ETS score of 600 or better, taking and passing the relevant UCLA Art, Design, and Art History Department language examination(s), or submitting proof of completion of UCLA courses German 5 and/or French 5 with a grade of B or better.

Students intending to major in an Asian art history area must demonstrate, by the means outlined above, reading fluency in either French or German. In addition, they must present proof of completion—with a grade of B or better—of six consecutive quarter courses (or their equivalent) in an appropriate Asian language. Determination of the appropriate language and acceptable equivalencies should be worked out in advance with the applicant's intended major adviser.

Students intending to major in Pre-Columbian art history must demonstrate by the means outlined above, reading fluency in German and Spanish. In the case of the latter, UCLA's course, Spanish 25, passed with a grade of B or better, fulfills the requirement.

A student who has passed a required foreign language at another institution should consult the chairperson of the Art, Design, and Art History Department Language Committee to determine if his/her previous examination is acceptable.

Prospective students may contact the Graduate Affairs Assistant, Department of Art, Design, and Art History for brochures and other information. The Department has no special departmental application.

Advising. At the time of application to the Ph.D. program, the student selects a major field of study; by the end of the second quarter of residence, he/she selects, in addition, two minors. The faculty members responsible for these fields serve as the student's minor advisers. Each adviser is responsible for the student's course of study and completion of requirements within his/her own field. In addition, the major adviser must be consulted regarding the student's overall course of study at least once every quarter.

Admission to the Doctoral Program. (See Admission Requirements.) In addition, the Graduate Record Examination is required.

Major Fields or Subdisciplines.

a) Egypt, Ancient Near East, Classical
b) Medieval (Western European; Byzantine)
c) Renaissance, Baroque, Prints and Drawings
d) Modern European, Modern American, Prints and Drawings
e) Chinese, Japanese
f) African, Oceanic, Native North American, Pre-Columbian
g) Islamic, Indian

Foreign Language Requirement. Students in the Ph.D. program are normally required to demonstrate, no later than the time of their Oral Qualifying Examination, reading fluency in one or more additional foreign languages. Among those fields requiring reading fluency in one or more additional foreign languages are: Egypt, Ancient Near East, Classical, Medieval, Renaissance, Islamic, Pre-Columbian, and all Asian areas. The applicability of this requirement, the language(s) required and the exact means of satisfying the requirement are determined in consultation with the student's major adviser.

Course Requirements. The Ph.D. requires demonstrated competence in a major and two minors. If the student chooses two art history minors, one must be unrelated to his/her major. That is, students intending to major in areas included in categories a. through g. (see Major Fields or Subdisciplines) will choose at least one minor from categories a. through d. Conversely, students intending to major in areas included in categories a. through d. will choose at least one minor from areas included in categories e. through g.

As an option, one minor may be extradepartmental but must be related to the major field in art history. Extradepartmental minors may be interdisciplinary in scope, but one of the participating extradepartmental faculty must agree to serve as the adviser for that minor.

All students must have taken a minimum of four courses (at least one a graduate course) in one or more unrelated areas during the course of the M.A. and/or Ph.D. Credit may be given for coursework at another institution.

In all, a minimum total of eight graduate and upper division courses are required, of which at least three must be art history courses on the graduate (200 and 500) level. Of this total, students must take at least three, and may take up to five, extradepartmental upper division and/or graduate courses, which have to be approved by their major adviser.

Written and Oral Qualifying Examinations. Upon completion of coursework and language study, the student takes the Ph.D. Written Comprehensive Examination. This examination includes a 6-hour examination in the major field of study, designed and graded by the student's major adviser, and a 3-hour examination, designed and graded by the appropriate minor adviser, in each of the two minor fields. The purpose of the examination is to test the student's breadth and depth of knowledge in his/her three areas of specialization. If a student fails to pass the examination, or any part thereof, any failed portion may be repeated during the subsequent quarter of residence. No further repetition will be allowed.

Upon passing the Written Comprehensive Examination, the student, in consultation with his/her major adviser, selects a dissertation topic; the members of his/her doctoral committee are then nominated, and the committee is appointed by the Dean of the Graduate Division.

After having conducted considerable exploratory research and preparation for his/her dissertation, the student submits to the committee, a dissertation proposal. The student then meets with the members of his/her committee to be orally examined on the validity and feasibility of the proposed topic and on the methods employed, as well as on the soundness of his/her tentative conclusions. The committee then reports the examination "passed" or "not passed." Assuming there is no more than one "not passed" vote, the student may initiate the procedure to become advanced to candidacy. If the student fails the examination, it may be
repeated once. The doctoral committee may decide, by unanimous agreement, to waive the Final Oral Examination (not normally required) and selects a minimum of three members—two from art history and one from outside the Department—who will read, approve, and certify the final draft of the dissertation.

**Time to Degree.** From graduation admission to award of the degree including time spent on the M.A. degree:

For students majoring in Asian, Classical and Medieval: 21 quarters.

For all others: 18 quarters.

**Final Oral Examination.** If a Final Oral Examination is not required by the student’s committee (see above), it is held after the final draft of the dissertation has been circulated among the committee members. All members of the committee attend and vote. A student may pass with one negative vote so long as that vote is not that of his/her major adviser. In case of failure, the doctoral committee decides, by unanimous agreement, whether or not the candidate may be reexamined.

**Teaching Experience.** Teaching experience is not a requirement for the degree.

**Disqualification and Appeal of Disqualification.** The Ph.D. Written Comprehensive Examination may be repeated once. If failed the second time, the student is terminated. Oral examination is considered “not passed” with more than one negative vote. Upon majority vote of the committee, the examination may be repeated once. If failed a second time, the student is terminated. The Final Oral Examination may be passed with one negative vote (provided this vote is not that of the major adviser). The candidate may be reexamined upon unanimous agreement of the committee. Appeals are made to the Graduate Review Committee via the Graduate Adviser.

**Graduate Courses**

Prerequisite for all courses: consent of the instructor. All courses may be repeated for credit upon recommendation of adviser. Not open to undergraduate students. See College of Fine Arts, Unit Requirement. Course 201 through 265; exact topics of both graduate lecture courses and seminars vary.

201. **Historiography of Art History.** Seminar, two hours. A critical study of the various approaches to art history through the centuries. The course may concentrate on one time period, on the work of one or more authors, or on a particular methodology.

*The Staff in Art History*

202. **Methodology of Art History.** (½ to 2 courses) Sections oriented to the development and refinement of specialized research skills appropriate to particular periods and areas in the history of art.

*The Staff in Art History*

203. **Museum Studies.** Seminar, two hours. Course will focus on various aspects of museum activities: concepts and historical evolution of art museums and collecting, methodology of exhibitions; problems involved in acquisition and evaluation of works of art.

*The Staff in Art History*

204. **Restoration, Preservation and Conservation.** Seminar, two hours. Course may not be repeated.

*Mr. Bloch*

205. **Studies in Printa.** Seminar, two hours. Critical studies in the history and connoisseurship of the graphic arts in the western world. Group or individual studies often culminate in professionally directed exhibitions produced by the Grunwald Center for the Graphic Arts.

*Mr. Bloch*

206. **Studies in Drawings.** Seminar, two hours. Critical studies in the history and connoisseurship of draughtsmanship in the western world. Individual studies emphasize professional presentation. Group studies may culminate in exhibitions sponsored by the Grunwald Center for the Graphic Arts.

*Mr. Bloch*

210. **Egyptian Art.** Seminar, two hours. Prerequisites: course 101A, 101B, 101C, 102. A course designed to cover art in Egypt during the Late Period and the Greco-Roman Period. Students should be ready to prepare for every meeting a briefing of a topic from archaeological memoirs, not to exceed ten minutes. There will be some lectures.

*Mr. Badawy*

213. **Problems in Islamic Art.** Seminar, two hours. The art and architecture of the Islamic world from Spain to Iran from the 7th to the 17th century. The seminar will deal with either monuments or theoretical problems relating to Islamic culture and artistic production.

216. **The arts of Africa, Oceania and Pre-Columbian America.** Seminar, two hours. Typically dealing with some aspect of art in Africa, Oceania, or Native America, or cross-cultural and comparative topics. Interdisciplinary approaches and historical, cultural, social and economic issues are emphasized. Twenty minute oral presentation and 12-15 page paper are required.

*Ms. Klein, Mr. Rubin*

211. **Topica in Classical Art.** Lecture, two to three hours. Studies in Parthan art. A site by site survey of the Near East (Afghanistan, Iran, Iraq, Syria) during the period of Greek and Parthan control.

*Ms. Downey*

223. **Classical Art.** Seminar, two hours. Studies in Greco-Roman art and archaeology. Studies of specific periods, sites, or art media.

*Ms. Downey*

255. **Medieval Art.** Seminar, two hours. Studies in selected topics in Byzantine and European Medieval art. Ms. Kalavrezou-Maxeiner, Mr. Werckmeister

226A-226B. **Medieval Art and Architecture.** Studies in selected topics in Byzantine and European Medieval art. Seminar extends over two consecutive quarters.

*Ms. Kalavrezou-Maxeiner\nMr. Werckmeister*

223. **Italian Renaissance Art.** Seminar, two hours. A study of various aspects of Leonardo’s theoretical approach to art in terms of sources and the impact on followers. Italian required.

*Mr. Pedretti, Ms. Weisz*

Leonardo and Renaissance Theory of Art. Seminar, two hours. A study of various aspects of Leonardo’s theoretical approach to art in terms of sources and impact on followers. Italian required.

*Mr. Pedretti*

255. **Northern Renaissance Art.** Seminar, two hours. The seminar will focus on a selected topic (e.g., a particular artist, trend, or problem). Research papers and oral reports required. German required.

*Mr. Pedretti*

240. **Baroque Art.** Seminar, two hours. The seminar will focus on a selected topic (e.g., a particular artist, trend, or problem). Research papers and oral reports required. Language requirements depend on area of focus.

*Mr. Marbach*

244. **Topics in European Art from 1700-1900.** Lecture, two to three hours.

*Mr. Wark*

245. **European Art from 1700 to 1900.** Seminar, two hours.

The Staff

246. **Art and Architecture of Georgian England.** Seminar, two hours.

Mr. Reiff

253. **Modern Art.** Seminar, two hours. Changing topics in Modern Art (including illustration and other popular forms) which reflect the interests of particular faculty members. Political and economic factors affecting the arts of France and Germany at various times are emphasized.

Mr. Boime, Mr. Kunzle, Mr. Werckmeister

255. **American Art.** Seminar, two hours. Advanced studies in the evolution of American art, chiefly architecture and painting from the eighteenth to the early twentieth century. Criticism and evaluation of scholarship in the field with innovative research directed toward professional presentation.

Mr. Bloch

259. **Topica in Asian Art.** Lecture, two to three hours. Lectures concerned with the secular and religious art of India, China, Japan and adjacent regions. Topics with depth will vary from term to term.

Ms. Klimburg-Salter, Mr. McCallum, Mr. Powers

260. **Asian Art.** Seminar, two hours. Advanced studies in the secular and religious art traditions of India, China, Japan and adjacent regions. Topics and geographical areas treated vary each term.

Ms. Klimburg-Salter, Mr. McCallum, Mr. Powers

265. **Field Work in Archaeology.** (½ to 2 courses) Participation in archaeological excavations or other archaeological research under supervision of the staff.

The Staff

271. **Graduate Painting.** (½ to 2 courses) Hours to be arranged. Tutorial studies in traditional, new forms and concepts media as well as in our media specializations. Independent development and original research are fundamental objectives to this course.

The Staff

272. **Graduate Printmaking.** (½ to 2 courses) Tutorial studies in traditional and experimental printmaking. Selected studies in intaglio, lithograph, woodcut, silkscreen, photo printmaking and mixed media.

Mr. Brown

273. **Graduate Sculpture.** (½ to 2 courses) Tutorial with specific attention given to the on-going nature, specificity and approach to the student’s particular discipline. Individual studio visits and consultation.

The Staff

274. **Graduate Photography.** (½ to 2 courses) A tutorial or seminar seminar course concerned with the particular artistic development of each student’s personal photographic art work. Emphasis on the expressive, original, humanistic values of individual art. Adjacent projects of the history and theory of the photographic medium.

Mr. Heineken

Mr. Nunes

280. **Communication Imagery.** (½ to 2 courses) Laboratory, two to four hours. Exploration of graphic processes in visual systems. Design theory and procedures related to typographic, letter form, photography and the graphic film as they communicate visually (i.e., poster, brochure, book, film and exhibition).

Mr. Neuhart

281. **Image Transfer** (½ to 2 courses) Laboratory, two to four hours. Development of experimental work in print processes. Employment of the fixed image, such as offset lithography, offset or letter press, screen printing and emulsion printing, through photographic means.

Mr. Jennings

282. **Electronic Imagery.** (½ to 1 course) Laboratory, two to four hours. Development of expressive and design applications in video and computer generated forms. The manipulation of visual, time, motion and aural characteristics of electronic imagery is developed and discussed. Cameras, video, computer and electronic synthesizers experienced and viewed on television monitors or print forms; images are stored on videotapes for later analysis.

Mr. Kataoka
283. Costume. (½ to 2 courses) Seminar, two hours; laboratory, two hours. Advanced formulation and development of design ideas for contemporary fashion, dance, drama or ritual. Research on the evolution of style and modes of expression in historical and modern costumes. Ms. McCloskey

284. Ceramics. (½ to 2 courses) Seminar, two hours; laboratory, two hours. Advanced research and application of ceramic theory and methodology. Emphasis on the development of a responsible personal aesthetic. Includes, but is not limited to, investigations of clay and glaze design technology, design for industry, clay as medium, and the historical importance of ceramics as a socially responsible discipline. Mr. Saxe

285. Glass. (½ to 2 courses) Laboratory, two to four hours. Exploration and intensive investigation of processes and attitudes towards glass as a tool of personal expression and creative discipline. Mr. Marquis

287. Design and Structure. (½ to 2 courses) Laboratory, two to four hours. Emphasis on developing methods of critical evaluation. Work will be of a subjective and expressive nature in areas of fiber, ceramics, graphics and visual presentation. Exploration of form with emphasis on experimentation with materials and processes. Mr. Vasa

288. Fiber Structures. (½ to 2 courses) Laboratory, two to four hours. Advanced formative work in traditional and experimental processes of fabric construction using fiber media. Mr. Bassler, Mr. Kester

289. Textiles. (½ to 2 courses) Laboratory, two to four hours. Advanced experimental work with the elements of fabric design, including surface manipulation and methods of fabrication, which may include but are not limited to dye and printing processes. Ms. Breitenbach

290A-290B-290C. Design Seminar: A Collaborative View. Seminar, three hours. The Design Staff

290A. Formalization Processes. Critical examination of theoretical concepts underlying the design process, including the initiation of an idea, its interpretation and execution by the designer.

290B. Design Programming. Critical examination of idea development into model or procedural form for execution and/or production by others.

290C. Visual Communication. Critical examination of imagery in its social context

291. Landscape Design. (½ to 2 courses) Laboratory, two to four hours. Articulation of landscape elements, including conservation and planning. Mr. Roberts

292. Shelter. (½ to 2 courses) Development of individual projects to investigate concepts of Shelter: Exploration of traditional and contemporary forms, methods, and materials. Mr. Shapiro

293. Interior Space Design. (½ to 2 courses) The concept and practice of designing interior spaces. Evaluation of visual and functional needs for interior spaces, (ranging from personal to social spaces) two and three dimensional projects involving color, light, surface, materials, equipment, furniture, etc. Mr. Kester, Mr. Shapiro

294. Industrial Design. (½ to 2 courses) Laboratory, two to four hours. In-depth studies in topics such as design and management, person-object compatibility, visual identity programs, containing systems, transportation, design for developing countries, ergonomics, urban components, area studies, materials and processes. Mr. Shapiro

295. Exhibition Design. (½ to 2 courses) Laboratory, two to four hours. Interpretation and presentation of materials for exhibition. Student may elect to work with instructor and gallery staff on regularly scheduled productions or he may outline his own project and proceed by producing studies, renderings, schematics, or by fabricating models. Mr. Carter

Individual Study and Research

596. Directed Individual Study or Research. (½ to 2 courses) Prerequisite: consent of instructor. To be graded by letter grade. The Staff

597. Preparation for the Comprehensive Examination for the Master's Degree or the Qualifying Examination for the Ph.D. (½ to 2 courses) Prerequisite: consent of instructor. Graded S/U. The Staff

598. Research for and Preparation of the Master's Thesis. (½ to 2 courses) Prerequisite: consent of instructor. Graded S/U. The Staff

599. Research for and Preparation of the Doctoral Dissertation. (½ to 2 courses) Prerequisite: consent of instructor. Graded S/U. The Staff

Related Courses in Another Department

Classics 251A. Seminar in Classical Archaeology: The Aegean Bronze Age.

251B. Seminar in Classical Archaeology: Graeco-Roman Architecture.

251C. Seminar in Classical Archaeology: Graeco-Roman Sculpture.

251D. Seminar in Classical Archaeology: Graeco-Roman Painting.

The Department of Art reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

UCLA Frederick S. Wight Art Gallery

The UCLA Frederick S. Wight Art Gallery, adjacent to Dickson Art Center, presents a program of changing exhibitions of regional, national and international significance, including a range of historical, ethnic and contemporary forms of art. Included in this program are exhibitions by faculty and students of the Art and Design areas, and exhibitions assembled from the extensive collections of the Museum of Cultural History, focusing on non-Western and folk art. The Grunwald Center for the Graphic Arts maintains a print study collection and presents a series of exhibitions related to the Art, Design, and Art History Department's Program of Advanced Studies in the Graphic Arts and Art History.

Asian American Studies

(Interdepartmental)

(Office, 3232 Campbell Hall)

Charles Y. Nakamura, Ph.D., Professor of Psychology.
Darnodar Sa Desai, Ph.D., Professor of History.
David M. Farquhar, Associate Professor of History.
John N. Hawkins, Ph.D., Associate Professor of Education (Chair).
Perry E. Link, Jr., Ph.D., Associate Professor of Oriental Languages.

The Master of Arts Degree

Admission Requirements. In addition to the University's minimum requirements, applicants are expected to present evidence of their previous interest in Asian American Studies. The interest may be demonstrated by previous courses taken at the undergraduate level, research papers written independently or for related classes, or by work experience in an Asian American community. In any case, applicants are required to submit a paper or article, preferably on Asian Americans, directly to the program as a part of their application. Three letters of recommendation are also required.

Further information may be obtained by writing to the Graduate Adviser, Asian American Studies Center, 3232 Campbell Hall, UCLA, Los Angeles, California 90024, or by calling (213) 825-2974.

Advising. One of the criteria for admission is that a UCLA faculty member be willing to supervise the student's work. Thus, the student's academic adviser is assigned at the time the decision to admit is made. If a change in academic adviser should become necessary due to a change in major field or for any other reason, the change will be effected after discussion with the student, the academic adviser and the Chairperson of the M.A. Committee.

Students are expected to meet quarterly with their academic advisers, usually at the beginning, to review their progress and to have their class program approved.

At the beginning of the second year in residence, students are expected to recommend a 3-person guidance committee for review and approval by the Dean of Graduate Division. This committee, which is usually chaired by the student's academic adviser, is responsible for supervising, reviewing, and finally approving the M.A. thesis. The committee also conducts an examination of the student on the topic of the thesis.

Major Fields. The Asian American Studies program is interdepartmental. Thus, its major
fields are determined by the participating faculty from the various departments. Recruitment of new faculty is a continuing effort, but supporting faculty in history, sociology, anthropology, education, oriental languages, and theater arts participate at present.

Foreign Language Requirement. The foreign language requirement is intended to be a prerequisite to admission. However, the requirement may be fulfilled any time previous to the awarding of the degree. The requirement is that the student demonstrate a proficiency in an Asian language at the second-year level. The languages which meet the requirement are Chinese, Japanese, Korean, and Tagalog. Other languages may be substituted by petition.

The requirement may be fulfilled by presenting evidence of satisfactory completion of two year's coursework in the language at the college level, demonstration that the student's native language is one of the languages meeting the requirement, or by the successful completion of an examination administered by the Oriental Languages Department.

Course Requirements. A total of 11 upper division and graduate courses is required for the degree. Of that number, seven must be graduate level courses, including AAS 200AB, Critical Issues in Asian American Studies. These are the program's only required courses. Three of the graduate courses must be selected from the following:

- History 201H — Topics in History
- Sociology 261 — Ethnic Minorities
- Anthropology 253 — Asian Americans: Personality and Identity

Education 204 — Education and Ethnicity: Asian Americans

Thesis Plan. The thesis committee is synonymous with the guidance committee. It is normally constituted at the beginning of the second year of residence at which time the student is expected to submit a plan for approval. After the approval of the thesis, the committee will conduct an oral examination of the student on its subject.

Time to Degree. It is estimated that six quarters in residence are required from time of admission to award of degree. This estimate presumes there are no deficiencies or non-related courses required such as the English 33 series for foreign students.

500 Series Course Limitation. The program allows two courses in the 500 series to be applied toward the 11-course requirement. However, only one of the two may be applied toward the requirement of the seven graduate courses. Since the program is interdepartmental, students enroll in 500 series through departments and must comply with departmental policy as to grading and units.

Disqualification and Appeal of Disqualification. Termination of graduate status may be recommended by the academic adviser for fail-
Astronomy

(Department Office, 8979 Mathematical Science Building)

George O. Abell, Ph.D., Professor of Astronomy. Lawrence H. Aller, Ph.D., Professor of Astronomy. Ferdinand Coroniti, Ph.D., Professor of Physics and Astronomy. Harland W. Epps, Ph.D., Professor of Astronomy. Holland C. Ford, Ph.D., Professor of Astronomy. Miroslav Plavec, Ph.D., Professor of Astronomy. Roger K. Ulrich, Ph.D., Professor of Astronomy (Chairman of the Department). Daniel M. Popper, Ph.D., Emeritus Professor of Astronomy. Michael A. Jura, Ph.D., Associate Professor of Astronomy. Jonathan I. Katz, Ph.D., Associate Professor of Astronomy and IGPP.

Steven A. Grandi, Ph.D., Assistant Professor of Astronomy. Donald E. Osterbrock, Ph.D., Director of Lick Observatory.

Admission Requirements. The basic requirement for admission to the Astronomy program for the M.A., M.A.T., or the Ph.D. degree is a bachelor's degree in physics or astronomy. Students in closely related fields (e.g., mathematics or chemistry) may be admitted at the discretion of the Department. All students who apply should submit at least three letters of recommendation and take the Graduate Record Examination Aptitude Test and Advanced Test in Physics. For further information, prospective students should contact the Graduate Adviser, Dr. M. Jura, Department of Astronomy, UCLA, Los Angeles, CA 90024.

Each entering student and each student who has not been admitted to candidacy for the Ph.D. should consult with the Graduate Adviser at the beginning of the Fall Quarter to determine a program for the year.

Disqualification and Appeal of Disqualification. Every Winter Quarter, the entire faculty of the Department meets to evaluate the progress of the graduate students. Students are advised either informally or in writing on the faculty's evaluation of their progress. Students are subject to dismissal from the program if (1) they do not maintain high enough grades; (2) they fail their comprehensive or thesis exams; or (3) they do not maintain normal progress toward their degrees. Any student who is dismissed may within 30 days appeal the decision in writing to the faculty adviser who will then reconvene the entire faculty to reconsider the student's dismissal.

The Master of Arts Degree

Course Requirements. Nine courses are required for the master's degree of which at least five must be at the graduate level in astronomy. The B segments of the graduate multiple-term courses (Astronomy 204B, 208B, 217B, 219B, 227B, 230B) count as 1.5 courses each for the purpose of receiving degree credit. Courses taken in the 500 series may not apply toward the total course requirement or the graduate course requirement.

Comprehensive Examination Plan. To receive the master's degree, the student must obtain at least a B average in the Written Qualifying Examinations taken in the graduate program. The Written Qualifying Examinations are described in more detail below.

Time to Degree. A full-time student with no deficiencies at admission should normally be able to finish the master's degree in three quarters.

The Master of Arts in Teaching (M.A.T.) Degree

Foreign Language Requirement. There is no foreign language requirement for the M.A.T. degree.

Course Requirements. Nine courses are required for the academic portion of the M.A.T. program. They must include at least five graduate courses in astronomy, and at least three from upper division or graduate courses in astronomy, mathematics, physics or from the 100 or 200 series courses in education required for the teaching credential. The B segments of the graduate multiple-term courses (Astronomy 204B, 208B, 217B, 219B, 227B, 230B) count as 1.5 courses each for the purpose of receiving degree credit. Although it does not count for degree credit, Physics 370 is also required. Courses taken in the 500 series may not apply toward the total course requirement or the graduate course requirement.

In order to obtain a secondary credential with the M.A.T. in Astronomy, additional courses in education should be taken including supervised teaching.

Comprehensive Examination Plan. This plan is the same as for the M.A. degree.

Time to Degree. A full-time student with no deficiencies at admission should normally be able to finish the M.A.T. degree in five quarters.

The Ph.D. Degree

Foreign Language Requirement. There is no foreign language requirement for the Ph.D. degree.

Course Requirements. The required courses for the graduate degree are 200, 204A, 208A, 217A, 219A, 227A, 230A, at least four courses from 204B, 208B, 217B, 219B and 230B, and at least two courses (projects) from 204C, 206C, 217C, 219C, 227C and 230C. Each quarter in residence, students are required to take course 250.

Written Qualifying Examination. During the final week, when final examinations are normally scheduled, the Department holds its portion of the departmental Written Qualifying Examination. This examination is divided into sections with one section for each course in the A or B series that the student takes to apply to the Ph.D. (or M.A.) requirement. In each case, the examination section covers the material that normally should be covered in that course. This departmental examination is scheduled at the time the final examination for the course would normally be scheduled.

The Graduate Adviser will appoint a committee of three faculty members to administer each examination section; one of these three will be the instructor of the course. The instructor is primarily responsible for preparing the examination. However, the entire committee must certify that the examination section meets departmental standards. Moreover, the committee is responsible for certifying the grading of the examination section, and reporting the scores earned to the Graduate Adviser for the departmental records. These grades are reported as letter grades including plus and minus.

Students may repeat courses that they fail for credit, but may not repeat the departmental Comprehensive Examinations for departmental credit. New students should note this fact before commencing regular graduate work, especially if they are weak in undergraduate physics or astronomy.

For the Comprehensive Examinations, the following evaluation procedure will be followed. The A and B courses are worth a total of 20 points each while each project is worth 50 points so that there is a total of 300 possible points. The total number of points that a student receives depends upon his or her grade. The maximum number of points is assigned to an A+, and other grades receive only fractionally as many points, according to the scheme A (0.9), A- (0.8), B+ (0.7), B (0.6), B- (0.5), C+ (0.4), C (0.3), C- (0.2), F (0.0). For example, if a student receives a B+ in Astronomy 204A, he or she would receive 14 points. To be qualified to go on to the Ph.D. degree, each student must acquire at least 210 points total, at least 60 points on the C courses (the projects) and at least 120 points on the A and B courses together. After the Comprehensive Examinations are completed, the student must then fulfill the normal University requirements for a dissertation.

Time to Degree. The normative time-to-degree is 18 quarters. A full-time student with no deficiencies is expected to finish in less than the normative time-to-degree.
Final Oral Examination. Each student must pass a final examination upon completion of his or her dissertation.

Teaching Experience. Before receiving a Ph.D. degree, each student is required to spend at least three quarters as a teaching assistant at UCLA or have equivalent experience elsewhere.

Projects. During the Fall Quarters of the second and third years, students are expected to complete a research project. Students should work closely with one of the staff members during the project subject is chosen and throughout the course of the work. It is the responsibility of the staff member to provide enough guidance to keep the projects moving and to adjust the goals in case unforeseen difficulties arise. The projects may be a continuation of work begun during the preceding Spring Quarter. However, this is not necessary. The goals of the project should be chosen in such a way as to reflect the amount of work completed in the Spring Quarter.

The evaluation of the projects will be based as much on the quality of the written report as on the quality of the research itself. An obvious consequence of this evaluation procedure is that students should spend at least two to three weeks on the preparation of the report. Thus, the active phase of the research should be terminated about three weeks before the end of the quarter regardless of whether or not it is "complete". A completed original research project is expected for the Ph.D. dissertation itself and not for these Fall Quarter projects. The project report should include statements of the project goals, the relationship of the project to broader issues in astronomy, the techniques chosen to attack the project problem and the reasons for this choice. Finally, the report should present whatever results were obtained prior to the final three weeks of the quarter.

Since these results may be incomplete, the student should state what additional aspects of the project would be most important to complete, if time permitted. If the project is original and interesting, but incomplete, the student would be encouraged to complete it later, but the grade assigned will be based on the portion completed by the end of the Fall Quarter.

Graduate Courses
Prerequisite to all graduate courses is consent of the instructor. Graduate courses 204 through 230 are offered in alternate years. With the exception of the introductory graduate course 200, the regular graduate courses consist of three quarters according to the following scheme: level A (Winter Quarter, 4 units); a basic survey course presenting the minimum knowledge in the field expected for all students who wish to obtain the Ph.D. degree, but who do not necessarily plan to specialize in the field covered by the course; Level B (Spring Quarter, 6 units); advanced level for those considering the possibility of taking up a research project in the field. Level C (Fall Quarter, following academic year, 10 units); individual research projects supervised by the instructor in the form of a laboratory. The introductory courses are given in the Winter Quarter so that (1) full use may be made of the favorable fall weather for observational projects, (2) new graduate students may be acquainted with the program and with the department in the introductory course 200, which is offered every year. Course 240 is equivalent to the B courses.

200. Introduction to Graduate Study of Astronomy. Prerequisite: to be taken by all newly entering graduate students. Surveys the various fields of astronomy and astrophysics, gives first acquaintance with working methods, and with the department. Basic astronomical nomenclature is surveyed, and the background in physics and mathematics is outlined as required in graduate courses.

201. Astrophysics of the Solar System. Prerequisite: Graduate Standing or permission of instructor. The sun, solar phenomena, and solar-terrestrial relationships. The interplanetary medium and astronomical phenomena. Comets, meteors, meteorites, satellites and planets, planetary atmospheres. Origin and evolution of the solar system.

218A-218B-218C. Stellar Photophysics. (1 course, 1 1/2 courses, 2 1/2 courses) Prerequisite: consent of instructor. Physics of stellar photophysics and radiative transfer. The continuous and line spectra of stars. Chemical abundances in stars. Stars with extended and unstable atmospheres.

240. Modern Problems in Astronomy and Astrophysics. Special topics offered by distinguished visiting professors. Open to qualified graduate students in astronomy and in related fields (physics, meteorology, planetary, and space physics). May be repeated for credit.

250. Seminar on Current Astronomical Research. (1 1/2 courses) Prerequisite: Graduate students only (required of all). Current astronomical research topics.

266. Cosmological Physics. (Same as Earth and Space Sciences 266.) Cosmological and astrophysical problems of the universe. The origin of the universe; the relationship of the universe to the earth; the evolution of the universe; and the future of the universe.

267. Cosmology. (Same as Earth and Space Sciences 267.) Cosmological and astrophysical problems of the universe. The origin of the universe; the relationship of the universe to the earth; the evolution of the universe; and the future of the universe.

270A-270B-270C. Advanced Research Projects. (1 course, 1 1/2 courses, 2 1/2 courses) Prerequisite: consent of instructor. Advanced research projects in various fields of astronomy and astrophysics. Projects supervised by the instructor in a laboratory. The project will be based as much on the quality of the written report as on the quality of the research itself. An obvious consequence of this evaluation procedure is that students should spend at least two to three weeks on the preparation of the report. Thus, the active phase of the research should be terminated about three weeks before the end of the quarter regardless of whether or not it is "complete". A completed original research project is expected for the Ph.D. dissertation itself and not for these Fall Quarter projects. The project report should include statements of the project goals, the relationship of the project to broader issues in astronomy, the techniques chosen to attack the project problem and the reasons for this choice. Finally, the report should present whatever results were obtained prior to the final three weeks of the quarter. Since these results may be incomplete, the student should state what additional aspects of the project would be most important to complete, if time permitted. If the project is original and interesting, but incomplete, the student would be encouraged to complete it later, but the grade assigned will be based on the portion completed by the end of the Fall Quarter.

285. Observational Astronomy. (1 course, 1 1/2 courses) The sun and its environment. The planets, their satellites, and the rings of Saturn. The origin and evolution of the solar system. The evaluation of the projects will be based as much on the quality of the written report as on the quality of the research itself. An obvious consequence of this evaluation procedure is that students should spend at least two to three weeks on the preparation of the report. Thus, the active phase of the research should be terminated about three weeks before the end of the quarter regardless of whether or not it is "complete". A completed original research project is expected for the Ph.D. dissertation itself and not for these Fall Quarter projects. The project report should include statements of the project goals, the relationship of the project to broader issues in astronomy, the techniques chosen to attack the project problem and the reasons for this choice. Finally, the report should present whatever results were obtained prior to the final three weeks of the quarter. Since these results may be incomplete, the student should state what additional aspects of the project would be most important to complete, if time permitted. If the project is original and interesting, but incomplete, the student would be encouraged to complete it later, but the grade assigned will be based on the portion completed by the end of the Fall Quarter.

290. Directed Individual Studies. (1 to 2 1/2 courses) Prerequisite: consent of instructor. Advanced research projects in various fields of astronomy and astrophysics. Projects supervised by the instructor in a laboratory. The project will be based as much on the quality of the written report as on the quality of the research itself. An obvious consequence of this evaluation procedure is that students should spend at least two to three weeks on the preparation of the report. Thus, the active phase of the research should be terminated about three weeks before the end of the quarter regardless of whether or not it is "complete". A completed original research project is expected for the Ph.D. dissertation itself and not for these Fall Quarter projects. The project report should include statements of the project goals, the relationship of the project to broader issues in astronomy, the techniques chosen to attack the project problem and the reasons for this choice. Finally, the report should present whatever results were obtained prior to the final three weeks of the quarter. Since these results may be incomplete, the student should state what additional aspects of the project would be most important to complete, if time permitted. If the project is original and interesting, but incomplete, the student would be encouraged to complete it later, but the grade assigned will be based on the portion completed by the end of the Fall Quarter.

Individual Study and Research
The following courses, 596A, 596L and 599, may be repeated by a student at the discretion of the Department.

596A. Directed Individual Studies. (1 to 2 1/2 courses) Prerequisite: consent of instructor. Advanced research projects in various fields of astronomy and astrophysics. Projects supervised by the instructor in a laboratory. The project will be based as much on the quality of the written report as on the quality of the research itself. An obvious consequence of this evaluation procedure is that students should spend at least two to three weeks on the preparation of the report. Thus, the active phase of the research should be terminated about three weeks before the end of the quarter regardless of whether or not it is "complete". A completed original research project is expected for the Ph.D. dissertation itself and not for these Fall Quarter projects. The project report should include statements of the project goals, the relationship of the project to broader issues in astronomy, the techniques chosen to attack the project problem and the reasons for this choice. Finally, the report should present whatever results were obtained prior to the final three weeks of the quarter. Since these results may be incomplete, the student should state what additional aspects of the project would be most important to complete, if time permitted. If the project is original and interesting, but incomplete, the student would be encouraged to complete it later, but the grade assigned will be based on the portion completed by the end of the Fall Quarter.

Atmospheric Sciences

(Department Office, 7127 Mathematical Sciences Building)

Akio Arawaka, D.Sc., Professor of Atmospheric Dynamics.
James E. Ewing, Ph.D., Professor of Meteorology
M. F. McInnes, Ph.D., Professor of Atmospheric Physics
Richard M. Thorne, Ph.D., Professor of Atmospheric Physics
Victor Venkatwaram, Ph.D., Professor of Atmospheric Physics
H. W. M. de B. M. S. Hofstetter, Ph.D., Professor of Atmospheric Physics
Walter J. P. Neuburger, Ph.D., Professor of Atmospheric Physics
Richard M. Thorne, Ph.D., Professor of Atmospheric Physics
Victor Venkatwaram, Ph.D., Professor of Atmospheric Physics
H. W. M. de B. M. S. Hofstetter, Ph.D., Professor of Atmospheric Physics
Walter J. P. Neuburger, Ph.D., Professor of Atmospheric Physics
Michio Yanai, D.Sc., Professor of Atmospheric Dynamics
Paul H. Mintz, Ph.D., Emeritus Professor of Meteorology
Kerry A. Emanuel, Ph.D., Assistant Professor of Meteorology
Derek C. Montague, Ph.D., Assistant Professor of Atmospheric Chemistry
Max J. Suarez, Ph.D., Assistant Professor of Atmospheric Dynamics
The Department of Atmospheric Sciences offers the M.S., C. Phil and Ph.D. degree. Below are the requirements for the three degrees.

Admission Requirements. There are no admission requirements in addition to University minimum requirements. Three letters of recommendation are required. For departmental brochures and information write to: Department of Atmospheric Sciences, UCLA, Los Angeles, California 90024. There is no application form in addition to the one used by Graduate Admissions.

Advising. Evaluations of academic progress are made each September when the Graduate Advisers, sitting as a committee, review the progress of each student and assist in formulating future plans. Records are kept of these meetings and additional meetings are held prior to Spring Quarter if students are not advancing as expected.

For the M.S. degree one adviser is assigned to each student after his/her first year of study. Ph.D. students are assigned a 3-person Departmental Guidance Committee after one year's work has been completed, recommended by the Graduate Advisers and appointed by the Chairperson. The Chairperson of this committee then becomes the principal adviser of the student.

Admission to the Doctoral Program. All Ph.D. candidates must take the same comprehensive examinations as the M.S. candidates and pass with an average grade of 3.5 or better, or have completed a thesis for the M.S. in this department. In addition, the student must pass the requisite additional written and/or oral examination in his/her area of research specialization.

Major Fields or Subdisciplines
Dynamic and Synoptic Meteorology
Dynamics and Microphysics of Clouds and Precipitation
Radiation
Upper Atmospheric and Space Physics

Foreign Language Requirement. There are no foreign language requirements for any degree in this department.

Course Requirements. M.S. A total of nine (9) courses must be completed in graduate status, five of which must be in the 200 or 500 series. Students must also attain a grade of B (3.0) or higher in one 150 series or graduate course in each of two fields other than his/her field of specialization. The only formal course requirement beyond the UCLA general requirements is the seminar course, Atmospheric Sciences 260, in which the candidate must present a formal seminar, announced in the UCLA Weekly Calendar, and attended and graded by all faculty.

Ph.D. Students entering the Department with an M.S. degree have no specific course requirements. The Graduate Advisers may, at their discretion, prescribe courses in areas in which they deem the students to have insufficient background to help them in preparing to pass the Comprehensive Examination.

The Comprehensive Examination. The Comprehensive Examination is conducted twice a year based on coursework given during a prior 2-year period. The examination is usually conducted at the end of the Fall and Spring Quarters but special arrangements can be made for the Winter Quarter. An average grade of 3.0 is required for a pass at the M.S. level; an average grade of 3.5 or better allows the student to continue toward entry into the Ph.D. program. Students are permitted two attempts to obtain the requisite grade either for termination at the M.S. level or for continuation toward a Ph.D. Students must, however, attempt the examination by the end of their first two years of study and if necessary, retake the examination at the earliest available time. The time of the examination is the responsibility of the three Graduate Advisers who construct a separate examination in each major field or subdiscipline using material suggested by faculty members who have recently given the appropriate courses. The examination consists of two 3-hour written examinations.

M.S. Thesis Plan. Students with a grade point average of 3.5 or higher may petition the Department to obtain the M.S. by writing an original thesis. The petition must be received by the Graduate Advisers at least one year prior to completion of the degree (at the end of the first year of study). The petition should set forth the subject and plan of work to be performed and must be signed by the supervising professor. Provided the student maintains a high academic standard in coursework, the accepted thesis may be used instead of the Comprehensive Examination for continuation toward entry into the Ph.D. program. No outside member is required on the thesis committee.

Ph.D. Oral Qualifying Examination. After passing the Comprehensive Examination at the requisite level, or completion of the M.S. thesis in this department, students must take a further in-depth written or oral examination in their area of research specialization. Subsequently, a full doctoral committee is appointed with two (or more) outside members which is responsible for conducting the Doctoral Candidacy Oral Examination on the student's chosen thesis topic and related areas, and the final thesis defense which is required for all students. Each of these examinations must be passed in no more than two attempts.

Time to Degree. M.S. From graduate admission to conferral of degree, normal progress is six (6) quarters. The maximum allowable time limit for the degree is nine (9) quarters.

Ph.D. Because of the variability in students' backgrounds, there is a corresponding variability in the period of study necessary for completion of the degree. After completion of the requirements for the M.S. in Atmospheric Sciences a student will normally be expected to pass the oral or written Departmental Qualifying Examination within three (3) quarters, advance to candidacy in six (6) quarters and complete the Ph.D. thesis defense in nine (9) quarters.

Final Ph.D. Oral Examination. This examination is required of all students.

Candidate in Philosophy Degree. All students are eligible to receive the C.Phil. degree upon advancement to candidacy for the Ph.D. degree.

500 Series Course Limitations. Only one (four units) 500 series course may apply to the minimum graduate course requirement for the M.S. degree.

Teaching Experience. There is no formal requirement for teaching experience but it is strongly encouraged and approximately 95 percent of our graduate students serve as teaching assistants for one or more quarters.

Disqualification and Appeal of Disqualification. Students are normally terminated if they fail to maintain a 3.0 average for two consecutive quarters or if they fail to pass the graduate Comprehensive Examination after two attempts. Appeals may be made to the Chairperson but the student will be allowed to continue only in very special circumstances.

Graduate Courses

Dynamic and Synoptic Meteorology
205. Instrumentation Laboratory. Measurement of atmospheric variables in the field and the laboratory. Electronic techniques applied to data acquisition and recording. The material covered may be determined by student's interest. Mr. Edinger
208A. Atmospheric Turbulence. Lecture, three hours. Kinematics of homogeneous and shear flow turbulence. Surface and planetary boundary layers including heat transfer and turbulent convection. Survey of field and laboratory observations and their interpretation by theory. Mr. Wurtele
208B. Atmospheric Diffusion and Air Pollution. Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution control. Mr. Edinger
210A. Atmospheric Wave Motions. Lecture, three hours. Prerequisite: course M149 or equivalent. Oscillations of a compressible, stratified and rotating atmosphere. Geostrophic adjustment. Scale analysis instability. Vertical propagation of wave energy. The Staff

212A. Numerical Methods in Geophysical Fluid Dynamics. Lecture: three hours. Prerequisite: course 149 or consent of instructor. Basic numerical methods for initial-boundary value problems in fluid dynamics, with an emphasis on applications to atmospheric and oceanographic problems. Finite difference methods and truncation error. Linear and nonlinear computational instability. Computational modes and computational boundary conditions. Spectral methods. Mr. Suarez

212B. Numerical Modeling of the Atmosphere. Lecture, three hours. Prerequisites: courses 210A and 212A or consent of instructor. Physical and computational design of numerical weather prediction and climate simulation models. The basic dynamical models. Vertical, horizontal and time differencing. Parameterizations of sub-grid scale processes. Mr. Suarez

214A-214B. Climatology. Lecture, three hours. Prerequisite: course 149 or consent of instructor. Observations of the atmospheric general circulation and the present climatic state. Global budgets of energy and angular momentum. The hydrologic cycle. Observations of past climates and history of climatic change. Feedback mechanisms determining the sensitivity of climate. Possible causes of climatic changes. Numerical experiments in climatic sensitivity. Mr. Suarez

218C. Dynamics of the Atmosphere-Ocean Systems. Lecture, three hours. Mass, momentum and heat transfers between atmosphere and ocean; wind-driven ocean currents; thermohaline convection; dynamics of the Gulf Stream. Mr. Mr. Yanai

219. Special Topics in Dynamic Meteorology. (1/2 to 1 course each) The content of this course varies from year to year. The Staff

221A. Atmospheric Chemistry I. (Formerly numbered 221.) Lecture, three hours. Prerequisite: course 156 or consent of instructor. Clean air chemistry of the troposphere; trace gases of biogenic and anthropogenic origin; tropospheric air pollution chemistry; physical and chemical properties of atmospheric aerosols; wet and dry deposition of pollutant gases and aerosol particles. Mr. Montague

221B. Atmospheric Chemistry II. Lecture, three hours. Prerequisite: course 156 or consent of instructor. Composition of the stratosphere, mesosphere and ionosphere; chemistry of ground and excited state neutrals and of ions in the upper atmosphere; stratospheric pollution; chemistry of the airglow and nightglow; chemistry of other planetary atmospheres. Mr. Montague

222A. Cloud and Precipitation Physics I. Lecture, three hours. Prerequisite: course 152 or consent of instructor. Microstructure of atmospheric clouds; structure of the three phases of water substance including surface effects; thermodynamic theory for equilibrium between the three phases of water substance including surface effects; theory of homogeneous and heterogeneous nucleation of water drops and ice crystals. Mr. Pruppacher

222B. Cloud and Precipitation Physics II. Lecture, three hours. Prerequisite course 222A. Theory of the growth and evaporation of water drops and ice crystals by diffusion of water vapor; hydrometeors of rigid bodies in a viscous medium; hydrometeors of cloud drops, rain drops and atmospheric ice particles; growth of cloud drops and atmospheric ice particles by collision. Mr. Pruppacher

224. Atmospheric Electricity. Lecture, three hours. Prerequisites: course 223B and Physics 110A-110B. Fair weather electricity; atmospheric ions; electric structure of the atmosphere; electric charge generation mechanisms in atmospheric clouds; physics of thunder and lightning; effect of electric fields and charges on cloud and precipitation formation. Mr. Pruppacher

228A. Clouds and Radiation. Lecture, three hours. Radiation budget of cloudy atmospheres including cloud-albedo feedback mechanisms; dependence of cloud radiative properties on microphysical parameters; test-bed modeling techniques of radiative effects of clouds; radiative dynamical interactions in cloudy atmospheres. Mr. Venkateswaran

228B. Radar Meteorology. Lecture, three hours. Radar detection of spherical and non-spherical particles; use of radar in studying size distributions of cloud and precipitation particles; radar weather patterns and characteristics; radar echoes, interaction intensity, number density, range, altitude, velocity; radar observations of convective clouds, thunderstorms, tornadoes, hurricanes, squalllines, and fronts; clear air echoes. Mr. Pruppacher

Radiation

235. Infrared Radiative Transfer. Lecture, three hours. Prerequisite: course 153. Theory of radiative transfer. Approximate solutions to the equation of transfer. Absorption spectroscopy; band models; absorption by atmospheric gases; fluxes and heating rates. Satellite radiation measurements. The Staff

238. Radiative Transfer in the Earth's Atmosphere. Lecture, three hours. Prerequisite: course 153. Critical review of methods available to calculate the transfer of radiation (visible, ultraviolet and infrared) through the atmosphere. Computation of fluxes and heating rates using various methods. The emphasis of the course will be to provide a familiarity with the available techniques in the literature. The Staff

240A. Solar System Magnetohydrodynamics. (1/2 courses) Prerequisite: course 154 or consent of instructor. Derivation of the MHD equations with two fluid aspects, generalized Ohm's law, small amplitude waves, discontinuities, shock waves, and instabilities. The Staff

240B. Solar System Microscopic Plasma Processes. Lecture, three hours. Prerequisite: course M154 or consent of instructor. Adiabatic charged particle dynamics; incoherent radiation processes; collective effects in a plasma; propagation characteristics of electromagnetic and electron waves; interaction between charged particles and plasma waves. Mr. Venkateswaran

240C. Ionospheric Plasmas. Lecture, three hours. Prerequisites: course M154 and 240B. Formation of plasma in atmospheric layers; transport processes; currents and electric fields; ionospheric plasma instabilities; non-linear effects and artificial modification. Mr. Venkateswaran

246. Physics of the Ionosphere. Lecture, three hours. Prerequisite: Physics 110A-110B or consent of instructor. Structure, composition and dynamics of ionospheric layers. Mr. Venkateswaran

247. Radiation Belt Plasma Physics. Prerequisite: course 240B or consent of instructor. Turbulent plasma instabilities, their relation to satellite observations and magnetospheric structure. Processes responsible for the source, loss and transport of energetic radiation belt particles. Mr. Thorne

248. Advanced Topics in Interaction Between Lower and Upper Atmospheres. Lecture, three hours. The content of this course varies from year to year. Mr. Venkateswaran

249A-249B-249C. Special Topics in Solar Planetary Relations. (1/2 to 1 course each) Selected topics of current research interest in the solar wind, magnetospheric, or ionospheric physics. Mr. The Staff

254. Radiative and Photochemical Processes of the Middle Atmosphere. Lecture, three hours. Prerequisites: Courses 153, 246, 255. Ultraviolet absorption processes. Infrared transfer by CO and O3. Radiative and photochemical roles of other trace constituents. Remote sensing of the middle atmosphere. Mr. Venkateswaran

255. Dynamics of the Stratosphere and the Mesosphere. Lecture, three hours. Prerequisite: course 209B or consent of instructor. Photochemistry and radiative transfer in the middle atmosphere: propagation of waves of tropospheric origin; radiative and photochemical damping effects; excitation and propagation of atmospheric tides; wave-zonal wind interactions; internal instabilities; theories of circulation features including annual, semi-annual and quasi-biennial oscillations and the build-up and breakdown of polar vortex. The Staff

256. Remote Sensing. Prerequisite: course 255 or consent of instructor. Remote sensing of stratospheric temperature and composition—theory and practice. Mr. Venkateswaran

258. Theory of Planetary Atmospheres. Lecture, three hours. Prerequisites: Background in fluid dynamics and electromagnetism required. Model planetary atmospheres, including evolution, structure, radiative balance and general circulation; ionospheres and magnetospheres. Comparison with the atmospheres of the terrestrial and outer planets. The Staff

Seminars

260. Seminar in Meteorology. (1/2 course) The Staff

261. Seminar in Atmospheric Dynamics. (1/2 course) The Staff

262. Seminar in Cloud and Precipitation Physics. (1/2 course) The Staff

263. Seminar in Atmospheric Radiation. (1/2 course) The Staff

284. Seminar in Physics of the Upper Atmosphere. (1/2 course) The Staff

Individual Study and Research

596. Directed Studies for Graduate Students. (1/2 to 1 course) The Staff

597. Preparation for the Comprehensive Examinations. (1/2 to 1 course) The Staff
Biochemistry

Graduate Study
Programs of study and research leading to the M.S. and Ph.D. degrees in the general area of biochemistry are offered in the Department of Biological Chemistry, School of Medicine, in the Division of Biochemistry, Department of Chemistry, and in the Department of Biology. More detailed information regarding admission requirements and opportunities for graduate studies in these programs may be obtained by writing to the Graduate Adviser in the department in which you are interested.

Admission Requirements (Master of Science and Ph.D. Degrees)
In addition to the University's minimum requirements, which include a bachelor's degree (preferably in chemistry or a biological science), students should normally have completed the following: general chemistry, quantitative chemistry, organic chemistry (with laboratory), physical chemistry (with laboratory), general physics, mathematics through calculus and general biology (or bacteriology, botany, zoology, biochemistry or molecular biology). More advanced courses in the areas are also recommended where possible.

All students admitted to this department must take a nonrepeatable orientation examination (about one to two weeks before the beginning of the Fall Quarter) in organic chemistry, physical chemistry and biochemistry to help determine any deficiencies in the prerequisite training. With the approval of the Graduate Adviser, limited deficiencies can be made up during the first year of graduate study.

Graduate Courses of Special Interest to Qualified Meteorology Majors
Chemistry 215; 223; 225.
Earth and Space Sciences 202; 203; M211; 214; 217; 220; 225; 261; 265.
Engineering: Mechanics and Structures 250A-250C; 251A-251C; 252A-252B; 259A.
Mathematics 250C; 265A-265B; 266A-266B-266C; 267A-267B; 269A-269B-269C; 271A-271B-271C; M274A-M274B; 276A-276B-276C.
Engineering: Chemical, Nuclear & Thermal Engineering 237C, 240.

Ralph W. McKee, Ph.D., Emeritus Professor of Biological Chemistry.
Joseph F. Nyc, Ph.D., Emeritus Professor of Biological Chemistry.
Emil L. Smith, Ph.D., Emeritus Professor of Biological Chemistry.
John Edmond, Ph.D., Associate Professor of Biological Chemistry.
Bruce D. Howard, M.D., Associate Professor of Biological Chemistry.
John E. Soke, Ph.D., Associate Professor of Biological Chemistry.
William T. Wickner, M.D., Associate Professor of Biological Chemistry.
Patricia I. Zamenhof, Ph.D., Associate Professor of Biological Chemistry.
Kathryn L. Calame, Ph.D., Assistant Professor of Biological Chemistry.
William A. Coy, Ph.D., Assistant Professor of Biological Chemistry.
Kathleen Hercules, Ph.D., Assistant Professor of Biological Chemistry.
Kevin McEntee, Ph.D., Assistant Professor of Biological Chemistry.
James C. Paulson, Ph.D., Assistant Professor of Biological Chemistry.
Leonard H. Rome, Ph.D., Assistant Professor of Biological Chemistry.

Biological Chemistry

Robert J. DeLange, Ph.D., Professor of Biological Chemistry.
Armand J. Fulco, Ph.D., Professor of Biological Chemistry.
John G. Glitz, Ph.D., Professor of Biological Chemistry (Chairman of the Department).
Isaac Harvey, Ph.D., Professor of Biological Chemistry.
Harvey R. Herschman, Ph.D., Professor of Biological Chemistry.
James E. Mead, Ph.D., Professor of Biological Chemistry.
John G. Pierce, Ph.D., Professor of Biological Chemistry (Chairman of the Department).
Sidney Roberts, Ph.D., Professor of Biological Chemistry.
David S. Sigman, Ph.D., Professor of Biological Chemistry.
Irving Zabin, Ph.D., Professor of Biological Chemistry.
Robert M. Fink, Ph.D., Emeritus Professor of Biological Chemistry.

Ralph W. McKee, Ph.D., Emeritus Professor of Biological Chemistry.
Joseph F. Nyc, Ph.D., Emeritus Professor of Biological Chemistry.
Emil L. Smith, Ph.D., Emeritus Professor of Biological Chemistry.
John Edmond, Ph.D., Associate Professor of Biological Chemistry.
Bruce D. Howard, M.D., Associate Professor of Biological Chemistry.
John E. Smale, Ph.D., Associate Professor of Biological Chemistry.
William T. Wickner, M.D., Associate Professor of Biological Chemistry.
Patricia I. Zamenhof, Ph.D., Associate Professor of Biological Chemistry.
Kathryn L. Calame, Ph.D., Assistant Professor of Biological Chemistry.
William A. Coy, Ph.D., Assistant Professor of Biological Chemistry.
Kathleen Hercules, Ph.D., Assistant Professor of Biological Chemistry.
Kevin McEntee, Ph.D., Assistant Professor of Biological Chemistry.
James C. Paulson, Ph.D., Assistant Professor of Biological Chemistry.
Leonard H. Rome, Ph.D., Assistant Professor of Biological Chemistry.

Students are expected to take the Graduate Record Examination (GRE) Aptitude Test, preferably in October or before, but no later than December of the year prior to the year of expected admission. It is strongly recommended that students also take the GRE Advanced Test in either Biology or Chemistry. In exceptional circumstances, the GRE test requirements may be waived by the departmental Graduate Admissions Committee. Students whose native language is other than English are expected to take an appropriate examination, which tests proficiency in English, prior to the time of application to this department (e.g., TOEFL).

There is no separate application form required for admission to the Department but three letters (minimum) of recommendation are required. (Students should have them sent directly to the Graduate Information Office at the address listed below.)

Departmental brochures and information may be obtained by writing to: Graduate Information Office, Department of Biological Chemistry, UCLA School of Medicine, Los Angeles, CA 90024.

Advising (Master of Science and Ph.D. Degrees)
Graduate Adviser: Dr. Robert J. DeLange, Dept. of Biological Chemistry, UCLA School of Medicine, Los Angeles, CA 90024.

The Graduate Adviser, with the assistance of the departmental Graduate Student Guidance Committee (appointed by the Department Chairperson), acts as a representative of the faculty to provide guidance and supervision prior to enrollment at UCLA, during the initial period (usually one year) of graduate study, and as needed during the remainder of the student's studies.

Each graduate student meets with the Graduate Adviser at least once each quarter to evaluate academic progress and to plan the continuing course of studies. Once a doctoral committee (or a thesis committee) has been appointed, the student should consult with the committee (and particularly the chairperson of the committee) prior to meeting with the Graduate Adviser to plan the course of studies.

General Course Requirements (Master of Science and Ph.D. Degrees)
All graduate students must register for Biol. Chem. 260 (Seminar in Biological Chemistry) each quarter during the regular academic year (this excludes summers). In addition, the three "core" courses (Biol. Chem. M253, M255 and M267) are to be taken by each student unless...
Written Qualifying or Comprehensive Examination (Master of Science and Ph.D. Degrees)

After completing the core course requirements (see above), all students in this department must take the departmental Written Examination (usually given in July; may be given in January or at other times if there is sufficient need). This examination is formulated by the departmental Graduate Student Guidance Committee from questions submitted by the various faculty members, who also evaluate the students' answers to these questions. The Graduate Student Guidance Committee evaluates the overall student performance on the examination and makes a recommendation to the departmental faculty of one of the following for each student:

1) Pass at the Ph.D. level of achievement
2) Pass at the Master's level of achievement
3) Fail

The departmental faculty can approve or change the recommended action, and makes the decision whether to give a student who fails the examination an opportunity to take the examination a second time (permission is rarely given to take it a third time). The faculty may also recommend or require additional coursework in specific areas prior to taking the examination a second time, or before taking final action on the results of the Written Examination.

Specific Requirements for the Master of Science Degree

(see General Requirements listed above)

Course Requirements. In addition to the course requirements described above for all students in this department, candidates for the master's degree should complete any two of the following (see Specific Requirements for the Ph.D. degree for more complete descriptions of these requirements):

1) Collateral A
2) Collateral B
3) Collateral C

Thesis or Comprehensive Examination Plans. In general, this department prefers students to enter directly into the Ph.D. program, but if a student enters the master's program, the Comprehensive Examination Plan is preferred. Only in exceptional situations will a student be approved for the Thesis Plan. In either plan the student must pass the departmental Written Examination at the master's level of achievement (see above).

Thesis Plan: A thesis committee consisting of the Thesis Adviser and two other faculty members (one may be from outside the Department), will help the candidate plan the thesis research, determine the acceptability of the thesis, administer a final examination (if deemed appropriate) and recommend appropriate action on the granting of the degree. In the event of an unacceptable thesis or performance on the final examination (if one is given), the thesis committee determines if it is appropriate for additional time to be granted to rewrite the thesis or to be reexamined.

Time to Degree. Students in the Comprehensive Examination Plan can normally expect to receive their master's degrees after three academic quarters plus a summer (when the Written Examination is given). This assumes the maintenance of satisfactory progress and the absence of deficiencies upon admission to graduate status. Students in the Thesis Plan will ordinarily require a minimum of six academic quarters (plus one to two summers) to complete the requirements.

500 Series Course Limitations. This department follows the regulations of the Los Angeles Division of the Academic Senate regarding 500 series courses to meet requirements for the master's degree. These regulations include the stipulations that no more than two courses (8 units) in the 500 series shall apply toward the nine courses (36 units) required for a master's degree, and that only one (4 units) of the two courses may be counted toward the minimum of five graduate courses (20 units) required for the degree.

With the approval of the Graduate Adviser, courses 596, 597 and 598 may be taken by graduate students in the master's program if they are appropriate to the student's programs. In general, a student in the Comprehensive Examination Plan would not register for 596 or 598, but might register for 597 (Preparation for Examinations). A student in the Master's Thesis Plan might register for all three courses at appropriate times during his/her studies. All three courses (596, 597 and 598) are graded S/U only, and may be taken as often as necessary (2-12 units each time).

Teaching Experience. In general, no teaching requirements are expected of students in the master's program, although they might be asked to help grade examinations, etc., from time to time.

Disqualification and Appeal of Disqualification. Termination of a student's graduate status may be recommended by the Graduate Student Guidance Committee (or the thesis committee, if applicable). Reasons for such a recommendation might include (a) failure to maintain a 3.0 grade point average, (b) particularly poor performance in the major departmental courses, (c) failing the Written Examination, (d) failure to complete required collateral requirements within a reasonable time, (e) failure to maintain adequate progress in research (Thesis Plan), (f) other.

A student for whom a recommendation of termination has been made can appeal to the Graduate Student Guidance Committee (or the thesis committee, if applicable) for reconsideration of the recommendation. In the event that the recommendation is not withdrawn, the student can appeal directly to the Department Chairperson who will consult with the departmental faculty as to whether the recommendation should be changed.

Specific Requirements for the Ph.D. Degree

(see General Requirements listed above)

Admission to the Doctoral Program. Students are not required to obtain a master's degree prior to admission into the doctoral program, and do not usually obtain a master's degree as part of the normal progress toward the Ph.D. degree.

Course Requirements. In addition to the above course requirements, students in the Ph.D. program are expected to complete:

(a) Biol. Chem. 220 (Biochemical Preparations) each quarter during the first year. Each student shall arrange for at least two rotations in the laboratories of different faculty members to help the student in the selection of a research adviser.

(b) Collateral A: An approved course involving scientific instrumentation ("language of an instrument") or statistics.

(c) Collaterals B and C: Two courses (minimum), offered by departments other than this one, that would be of particular help to the student in his/her graduate studies.

(d) Biol. Chem 596, 597 and/or 599 during quarters in which research (596, 599) or study for written or oral examinations (597) is part of the student's program. Biol. Chem. 599 is for students who have passed their oral examinations; Biol. Chem. 596 is for those who have not.

Written and Oral Qualifying Examinations. A student in the Ph.D. program who has passed the departmental Written Examination at the Ph.D. level of achievement (see above) should consult with the Department Chairperson who is responsible for nominating faculty members (three in and two out of the Department) to serve on the student's doctoral committee. Suggestions for members of the doctoral committee should be made to the Department Chairperson by the student after consultation with his/her research adviser and other potential members of the doctoral committee. The doctoral committee is then appointed by the Dean of the Graduate Division, usu-
ally at least three to four weeks prior to the time of the Oral Qualifying Examination (see below).

The Oral Qualifying Examination, which must be passed before a student can be advanced to candidacy, consists of the presentation and defense of a research proposal to the student's doctoral committee (see above). This proposal should not be in the area of the student's dissertation research. Written summaries of the proposal should be given to each member of the doctoral committee sufficiently in advance of the examination date to enable the committee members to study it in detail. A brief informal discussion of the student's research project should be presented before or after the Oral Examination. The doctoral committee determines whether the student passes the examination and whether a student who fails the examination will be allowed to repeat it (can be repeated only once). It is expected that students will complete the Oral Qualifying Examination by the beginning of the third year of graduate work.

Time to Degree. Students can normally expect to receive their Ph.D. degrees in 15 quarters (including summers) if satisfactory progress is maintained and there were no deficiencies upon admission to graduate status.

Final Oral Examination. The doctoral committee may elect to waive the Final Oral Examination.

Teaching Experience. All students in the doctoral program are expected to participate in teaching activities by assisting the faculty in a laboratory for medical or dental students (usually one day a week for one quarter during the second year) and by assisting in the grading of examinations (usually one to two times per quarter starting in the second year).

Disqualification and Appeal of Disqualification. Termination of a student's graduate status may be recommended by the Graduate Student Guidance Committee or the student's doctoral committee. Reasons for such a recommendation might include (a) failure to maintain a 3.0 grade point average (b) particularly poor performance in the major departmental courses (c) failing the Written Qualifying Examination (d) failing the Oral Qualifying Examination (e) failure to complete required course requirements within reasonable time (f) failure to maintain adequate progress in research (g) other.

A student for whom a recommendation of termination has been made can appeal to the Graduate Student Guidance Committee or the doctoral committee for reconsideration of the recommendation. In the event that the recommendation is not withdrawn, the student can appeal directly to the Department Chairperson who will consult with the departmental faculty as to whether the recommendation should be changed.

Other Relevant Information. Students can apply for the M.D.-Ph.D. program by making simultaneous applications for graduate status in this department and for admission to the School of Medicine. Acceptance by both of the concerned units is necessary for this program.

Certain changes in the requirements (e.g., fewer required collateral courses) allow some savings in time compared to separate M.D. and Ph.D. degrees.

Most students in the Ph.D. program in this department receive financial support, if needed.

Upper Division Courses

101A-101B-101C. Biological Chemistry. Lecture, three hours. Prerequisite: organic chemistry. Required in the medical curriculum; consent of instructor is required for nonmedical students. The Staff

101E. Biological Chemistry Laboratory. Laboratory, seven hours. Required in the medical curriculum; consent of instructor is required for nonmedical students. The Staff

102A-102B. Biological Chemistry Lecture (Dental Students). Lecture, three hours. Prerequisite: courses for admission to dental school. Required in the dental curriculum; consent of instructor is required for nondental students. The Staff

102C. Biological Chemistry Laboratory and Seminar (Dental Students). (½ course) Laboratory, four hours. Required in the dental curriculum; consent of instructor is required for nondental students. The Staff

221. Functional Neurochemistry. Lecture or recitation, three hours. Prerequisite: courses 101A-101B-101C or equivalent. Chemistry and metabolism of neural tissue with particular relationship to specialized function in the central nervous system. The Staff

222. Biochemistry of the Synapse. (½ course) Lecture or recitation, two hours. Prerequisite: course 221. Detailed analysis of the research literature dealing with biochemistry of the synapse. Metabolism, storage and release of transmitter; transmitter receptors and functions; neuronal plasticity. Mr. Howard

223. Current Topics In Neurochemistry. (½ course) Lecture or recitation, two hours. Prerequisite: course 222. Presentation of current literature by students. The Staff

M226. Chromosome Structure and Regulation. (Same as Biology M226, Chemistry M226, Microbiology M426) Lecture, three hours. Prerequisite: consent of instructor. Lectures and panel discussions on the structural and functional organization of eukaryotic chromosomes. SU/V grades are used for this course. Mr. Martinson, Mr. Tobin, Mr. Walt

M253. Macromolecular Structure. (½ course) (Same as Chemistry M253.) Lecture or recitation, five hours. Prerequisites: Chemistry 110A, 156, 157A-157B or Biological Chemistry 101A-101B or 201A-201B or consent of instructor. Chemical and physical properties of molecules. The Staff

M255. Enzymes, Metabolism and Regulation. (½ courses) (Same as Chemistry M255.) Lecture or recitation, five hours. Prerequisites: Chemistry 110A, 156, 157A-157B or Biological Chemistry 101A-101B or 201A-201B or equivalent. Recommended: Biological Chemistry/M253. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; comparative aspects of metabolism in relation to physiological function; and enzymatic mechanisms and methods for their study. Mr. Giltz and the Staff

M257. Physical Chemistry of Biological Macromolecules. (Same as Chemistry M257.) Lecture, two hours. Prerequisite: Chemistry 110A or 22 or consent of instructor. Theory of hydrodynamic, thermodynamic, optical and x-ray techniques used to study the structure and function of biological macromolecules. The Staff

259. Biochemical Endocrinology. (½ course) Prerequisite: Biological Chemistry 101A-101B or 201A-201B, or Chemistry 153 or equivalent. A lecture course emphasizing aspects of the structure of peptide and steroid hormones which are important for their biological actions, the interaction of these hormones with cell receptors, the molecular mode of action of peptide and steroid hormones and the role of second and third messengers in hormone action. Winter quarter, alternate years. Mr. Coty, Mr. Pierce, Mr. Roberts

260A-260B-260C. Seminar in Biological Chemistry. (½ course each) Lecture or recitation, one hour. Prerequisite: consent of instructor. Oral reports by graduate students on topics selected from current biochemical literature. Graded S/U only. The Staff

M261. Advanced Chemistry and Biochemistry of Lipids. (½ course) (Same as Chemistry M261.) Lecture, two hours. Prerequisite: Biological Chemistry 101A-101B or 201A-201B or Chemistry 157A-157B or equivalent. Knowledge of elementary chemistry and biochemistry of lipids essential. The biochemistry of lipids including chemical and physical characteristics of lipids and their metabolism. Mr. Mead, Mr. Popjak
M264. Molecular Basis of Atherosclerosis. (1/2 course) [Same as Chemistry M264 and Microbiology M264.] Prerequisite: course M216 or equivalent with consent of instructor. The course will cover the biochemistry, morphology, and physiology of atherosclerosis. Emphasis will be placed on the chemistry of lipoproteins and the role of plasma lipoproteins on the regulation of tissue lipid metabolism and the development of atherosclerosis. The Staff

255. Seminar in the Biochemistry of Nucleic Acids. (1/2 course) Lecture or recitation, one hour. Prerequisite: Biological Chemistry or Chemistry M253 or equivalent. Biochemistry and chemistry of nucleic acids and nucleotides. Mr. Glitz

256A-256B-256C. Seminar in the Biochemistry of Differentiation. (1/2 course each) Lecture or recitation, one hour. Prerequisite: consent of instructor. A review of the current literature in the areas of specific expression of function and control of enzyme synthesis; metabolism in developing systems; and the control of gene expression pertaining to the biochemistry of development. Mr. Harary, Mr. Herschman

M267. Macromolecular Metabolism and Subcellular Organization. (1/2 course) [Same as Chemistry M267.] Lecture or recitation, one hour. Prerequisite: Chemistry 157A-157B or Biological Chemistry 101A-101B or 201A-201B or equivalent. Recommended: Biological Chemistry or Chemistry M253. Metabolism of nucleic acids and proteins; biosynthesis of complex lipids and polysaccharides; structure and properties of cellular organelles. The Staff

M268. Developmental Biochemistry. (1/2 course) [Same as Chemistry M268] Lecture, two hours. Prerequisite: Biological Chemistry 267 or consent of instructor. This course will deal with the biochemical aspects of development, specific tissue and cell function, and differential gene expression. The biochemistry of cell division, macromolecular synthesis, chromatin function in gene expression, cell-cell interactions, membrane organization, and growth will be studied as they contribute to such topics as hormone induction, morphogenesis, and viral transformation. Emphasis will be placed on the use of differentiating in vivo systems and cell cultures. Mr. Harary, Mr. Herschman

2569. Seminar in Current Topics in Molecular Biology. (1/2 course) [Same as Biology M296.] Lecture, one hour. Prerequisite: consent of instructor. This course will deal with the biochemical aspects of development, specific tissue and cell function, and differential gene expression. The biochemistry of cell division, macromolecular synthesis, chromatin function in gene expression, cell-cell interactions, membrane organization, and growth will be studied as they contribute to such topics as hormone induction, morphogenesis, and viral transformation. Emphasis will be placed on the use of differentiating in vivo systems and cell cultures. Mr. Harary, Mr. Herschman

Individual Study and Research

596. Directed Individual Study and Research. (1 to 3 courses) Laboratory, by arrangement. Prerequisite: consent of graduate adviser. Graded S/U.

The Staff

597. Preparation for Examinations. (1/2 to 1 course) Prerequisite: consent of graduate adviser. Individual study for qualifying examination for Ph.D. or comprehensive examination for the master's degree. Graded S/U.

The Staff

598. Preparation of the Master's Thesis. Prerequisite: consent of graduate adviser. Preparation of research data and writing of master's thesis. Graded S/U.

The Staff

Both, Ph.D., Assistant Professor of Biology. Elma Gonzalez, Ph.D., Assistant Professor of Cell Biology. Meyer B. Jackson, Ph.D., Assistant Professor of Biology. Judith A. Lengyl, Ph.D., Assistant Professor of Biology. Peter M. Narins, Ph.D., Assistant Professor of Biology. Jane A. Peterson, Ph.D., Assistant Professor of Biology. Allan J. Tobin, Ph.D., Assistant Professor of Biology. Elain M. Tobin, Ph.D., Assistant Professor of Biology. Dan B. Walker, Ph.D., Assistant Professor of Botany.

Graduate Programs

The Department offers M.A. and Ph.D. degrees in Biology with specialization in a wide spectrum of fields. Students who plan to enter graduate school are urged to seek advice of staff members in their field of interest. Prospective applicants to this department are invited to visit the campus for this purpose. The Department is organized for administrative purposes into two divisions based on mutual interest. Applications should be directed to either:

Div. I—Molecular, Cell & Developmental Biology, or Div. II—Organismic Biology and Population

Admission Requirements

All applicants are expected to meet the requirements for admission established by the Graduate Division, including a minimum grade point average of 3.0. The Department encourages applications from students in all areas of science, but expects successful applicants to have or acquire a background comparable to the requirements for the bachelor's degree in Biology at UCLA. A background in chemistry, physics and mathematics is desirable. Differences in these or other subjects must be made up at the earliest opportunity. Under-
graduates who are prospective applicants should remedy their deficiencies by preparatory study at an appropriate institution. The Graduate Division or the Department may initially restrict applicants with less distinguished accomplishments to the M.A. program.

Graduate Record Examination (GRE). All applicants are required to take the Aptitude Test (Verbal, Quantitative and Analytical) of the Graduate Record Examination. The Advanced Test in Biology is not required.

Letters of Recommendation. Three letters of recommendation are required. These should be from professors, supervisors, or others who may provide an evaluation of accomplishments or potential in research, scholarly activities, teaching and related academic functions.

Minority Applicants. The Department has an affirmative action program dedicated to recruiting, financing, and supplying of special guidance for minority groups. Minority applications are reviewed by both the Department and the Departmental Committee on Minorities.

Admission to Non-Degree Programs

No Degree Objective. Students who have a specific purpose for undertaking coursework without reference to a degree may apply for "no-degree objective" admission. Requirements for admission are those set for all other entering graduate students. A student may enroll as a NDO for no more than three quarters.

Teaching Credentials. Teaching credentials and Ph.D.'s in Education with specialization in Biology are obtained through the School of Education with assistance from the Graduate Adviser in Biology. A Cognate in Biology may be obtained by completing the equivalent of the master's degree in Biology.

Correspondence and Information. Applications, departmental brochures and additional information may be obtained from: The Graduate Affairs Office, Department of Biology, 2316 Life Sciences, UCLA, Los Angeles, California 90024.

Major Fields or Subdisciplines

The Department provides specialization in the following areas:

- animal behavior
- animal and plant systematics
- biochemical taxonomy and phylogeny
- biophysical/Plant Ecology
- cell biology: animal and plant
- comparative physiology
- developmental biology
- developmental neurobiology
- ecology and evolutionary biology
- electron microscopy and ultrastructure
- endocrinology, invertebrate, vertebrate;
- molecular genetics
- hepatology
- ichthyology
- immunology
- insect physiology
- invertebrate zoology
- marine biology
- membrane physiology
- molecular biology
- neurobiology
- neurophysiology and sensory physiology
- ornithology
- parasitology and physiology of parasitism
- photosynthesis
- physiology and algal physiology
- psychological ecology
- plant morphology
- plant biochemistry and physiology
- plant hormones
- population and community ecology
- population genetics
- soil-plant relations
- vertebrate morphology and vertebrate paleontology
- vertebrate physiology

Study consists of coursework and research within the Department and within related programs in biochemistry, geology, microbiology, and molecular biology on the campus. Opportunities are also available away from campus for intensive study of marine biology at the Catalina Marine Science Center in the Fall Quarter (CMSC) and of field biology in the Spring Quarter (FBQ). Courses and other opportunities for study are also available in several of the basic science departments of the School of Medicine, located on campus.

Foreign Language Requirement. No foreign language is prerequisite to admission to the M.A. or Ph.D. program and there is no uniform language requirement for obtaining the Ph.D. degree. However, in the pursuit of certain sub-specialties of biology, students may be required to gain proficiency in one or more foreign languages.

Advising

The Graduate Adviser. All academic affairs for graduate students in Biology are directed through the Graduate Adviser. The Graduate Adviser is assisted by the administrative staff of the Graduate Affairs Office.

Guidance Committee. The Graduate Adviser establishes, at the time of admission to graduate study, a Guidance Committee consisting of three faculty members for each student. The chairperson of the Guidance Committee acts as the student's Provisional Adviser. The Divisional affiliation of the Guidance Committee chairperson determines the appropriate examination and review procedures for the student.

Service as a Provisional Adviser is designed to be provisional for both professor and student. It does not commit the professor to supervise the dissertation or thesis, nor does it commit the student to a professor. Changes in Provisional Adviser are made by mutual consent of concerned parties and approval of the Graduate Adviser. Lack of a Provisional Adviser places a student on probation to the end of the quarter when he/she is subject to dismissal if a Provisional Adviser is not obtained. Division I: has elected that guidance committees are formed only for the first year for students in that Division. If the student has not obtained a permanent sponsor (chair of the doctoral committee) by the end of his/her first year, he/she will be advised in their second year by the Graduate Adviser. Any student without a permanent sponsor by the end of his/her second year will be dismissed. Division II: a Provisional Adviser serves until the student finds a Permanent Adviser and the doctoral or master's examination or thesis committee is established.

To assess the incoming student's knowledge, and as an aid in advising students in their studies, each student is required to complete the Departmental Written Qualifying Examination at an early point in his/her graduate career. The exact timing and content of the DWQE varies between the Divisions. The examination is given twice each academic year, in the Fall and Spring Quarters.

Performance on the first attempt is used by the Guidance Committee to assist the student in remedying deficiencies. Any area passed on the first attempt need not be retaken. Areas not passed must be retaken the next time the examination is offered. All areas must be passed by the second attempt or the student will be in violation of normal progress and placed on academic probation subject to dismissal.

Disqualification and Appeal of Disqualification. A student in violation of normal progress is placed on academic probation, ineligible for departmental support, and may be disqualified for the following reasons:

1) Grade point average below 3.0;
2) Unsatisfactory performance as determined by the students' advisory committee;
3) Failure to pass all areas of the Departmental Written Qualifying Examination;
4) Failure to pass the Master's Comprehensive Examination, or failure to pass the Ph.D. Oral Qualifying Examination;
5) Failure to take either examination within the specified time limits;
6) Failure to maintain a Provisional or Permanent Adviser (Ph.D.); and/or
7) Failure to complete the Master's degree within six quarters, or failure to complete the doctoral dissertation within 18 quarters of residence following first registration.

A recommendation for disqualification is open for appeal to the appropriate subgroup or Chairperson of the Department.
The Master of Arts Degree

Admission to the Master's Program. Applications are evaluated by the appropriate Divisional Admissions Committee.

Course Requirements. The program consists of at least nine courses completed in graduate status, of which at least five must be graduate (200 series) courses. The remainder may be 100 or 200 level, or 500 level as noted below. No more than two courses (8 units) of 596, Directed Individual Study, may apply toward the minimum 9-course requirement; and only one course (4 units) of 596 may be counted toward the minimum 5-graduate-course requirement. Courses graded S/U may not be applied toward the minimum requirement, except that a S/U graded course outside the major and applicable to the degree may count, provided that no more than one such course is taken per quarter.

Specific course requirements are established individually for each student by his/her Guidance Committee.

Thesis Plan. A thesis reporting the results of an original investigation, written to conform to the requirements of the Graduate Division, is presented to, and approved by the student's master's thesis committee of three faculty. Before beginning work on the thesis, the student obtains approval of the subject and general plan from the faculty members concerned and from his/her thesis committee.

Comprehensive Examination Plan. The Master's Comprehensive Examination is a 2-hour examination prepared and graded by the student's committee or committee chairperson, and approved by the Graduate Adviser. The examination is graded pass or fail. If a student fails, recommendation for or against a second examination must be made by the Graduate Adviser.

Time to Degree. Students enrolled in the master's program, either by thesis or examination, are expected to complete the degree within six quarters.

Teaching Experience. No teaching experience is required for the master's degree.

The Ph.D. Degree

Admission to the Doctoral Program. Each Division determines admission of students to the Ph.D. program separately.

Division I. Applications for doctoral study in fields associated with Division I are considered by the Division I Admissions Committee. Ph.D. students in Division I are admitted in the Fall Quarter.

Division II. Applications to Division II are reviewed by the division's Admissions Committee, which advises prospective sponsors about the desirability of admission, although admission is dependent on obtaining a provisional sponsor.

Course Requirements. There are no formal course requirements for the Ph.D. Specific course requirements are established individually for each student by his/her Guidance Committee. All students are required to enroll for full time study, as defined by the Graduate Division.

Students are strongly encouraged to rotate laboratory and/or course experience with several faculty members during their first year of study as an aid to choosing a Permanent Adviser.

Permanent Adviser and Doctoral Committee. The importance of finding a Permanent Adviser and dissertation research supervisor to chair the doctoral committee is a sina qua non for the doctoral degree. Failure to find or maintain a Permanent Adviser and dissertation research supervisor places a student in probationary status for one quarter, after which he/she is dismissed if no adviser is obtained. Students are urged to discuss permanent sponsorship and dissertation research with faculty at the earliest opportunity. To pick a Permanent Adviser by the end of their first year, and to advance to candidacy by the end of their second year; in all cases they are required to advance to candidacy by the end of their third year in residence following first registration.

The doctoral committee consists of the Permanent Adviser who serves as the chairperson of the committee, two other faculty members of the Department, and two faculty members from outside the Department and outside the student's major field, in accordance with the provisions of the Graduate Division.

The doctoral committee conducts the Oral Qualifying Examination and guides the student in the preparation and defense of the dissertation.

Oral Qualifying Examination (OQE). The OQE is conducted by the doctoral committee as prescribed by the Graduate Division. The OQE includes the preparation, presentation and defense by the student of an original written research proposal, a copy of which is deposited in the student's file. The examination is graded Pass, Fail, or Repeat. A failure requires dismissal. The second attempt at the exam is graded Pass/Fail. The examination must be completed by the end of the third year following first registration or normal progress will have been violated. A grade of repeat also violates normal progress after the third year.

Following successful completion of the OQE and completion of the administrative details, the student is advanced to candidacy.

Final Oral Examination and Dissertation. The candidate must complete a dissertation by demonstrating an original contribution to knowledge, written to conform to the regulations set by the University. The doctoral committee guides and reviews the research and writing. Final approval in the Department is accomplished when the committee approves the written form and is satisfied with the Final Oral Examination.

Requirements for the Candidate in Philosophy Degree. Requirements for the Candidate in Philosophy degree are identical with those for advancement to candidacy for the Ph.D., except that only four quarters of academic residence are required, including three quarters in continuous residence at UCLA. The C. Phil. is not given as a terminal degree.

Time to Degree. The normative time for the Ph.D. degree in Biology is 16 quarters. Failure to complete the dissertation within 18 quarters places the student on academic probation.

Graduate Courses

The consent of the instructor is required for admission to all graduate courses. Any additional prerequisites are stated in the course descriptions.

202. Principles of Systematics and Taxonomy. Lecture, three hours; discussion, two hours. Prerequisite: course 120. The concepts, principles, and methods involved in the inference of evolutionary relationships and the application of biological nomenclature. Mr. Buth

203. Marine Botany and Physiology. (2 courses) This course is given at the Santa Catalina Marine Biological Laboratory. Lecture and laboratory. Prerequisite: consent of instructor. Structure, reproduction, life histories, systematics and biology of marine algae; techniques in culture and cytological investigation of algal material. The Staff

204A. Advanced Algae. Lecture, four hours. Prerequisite: consent of instructor. A consideration of current research in experimental botany. Topics include a discussion of the appropriate aspects of chemical and physical oceanography and limnology; algal physiology; experimental ecology of benthic and planktonic algae. Mr. Chapman

204B. Advanced Algae. Lecture, three hours; laboratory, six hours. Prerequisite: consent of instructor. A course designed to introduce students to current concepts in algal systematics. The laboratory section is designed to teach students, by practical application to unknowns, how to identify algae by appropriate application of keys. Mr. Chapman

205. Marine Invertebrate Biology. (2 courses) This course is given at the Santa Catalina Marine Biological Laboratory. Functional morphology, life histories, and systematics of marine invertebrates of all major and most minor taxa; emphasis on the living animal and its habitat. The Staff

206. Advanced Ichthyology. Lecture, three hours; laboratory, three hours. Prerequisite: course 111 or 112. Advanced study of various aspects of fish biology. The theme will vary from year to year. May be repeated for credit. Mr. Buth

208. Advanced Vertebrate Morphology. Lecture, two hours; laboratory, eight hours. Prerequisites: course 110 or the equivalent and consent of instructor. Emphasizes a functional approach to the vertebrate locomotor, feeding, and circulatory systems. Laboratory includes comparative and experimental analyses of morphological adaptation. An independent project is required. May be taken twice for credit. Ms. Peterson
210. Advanced Ornithology. Lecture, two hours; laboratory, two hours; fieldwork, two hours. Prerequisites: course 114 or equivalent and consent of instructor. Advanced study of topics in avian biology, including systematic, distribution, behavior, and ecology. Students will carry out individual study associated in laboratory, museum, or field. Mr. Howell

211. Animal Sociology. Lecture, two hours; discussion, two hours. Prerequisite: course 129. The Behavior of Animals, or equivalent. The description, analysis, physiology, ecology and evolution of social systems in animals. Mr. Collas

213. Community Ecology. (½ course) Lecture, three hours. Prerequisites: course 122 or equivalent, one year of calculus. Investigation of the structure and function of animal communities, in theory and in practice; includes the concepts of competition, niche and diversity. Mr. Cody

214. Physiological Sociology. (½ course) Lecture, two hours. Prerequisite: course 111. A detailed consideration of the role of physiology and behavior in the ontology of organisms in natural environments. Mr. Bartholomew, Mr. Nagy

215. Theoretical Ecology. Lecture, three hours. Prerequisites: course 122, one year of calculus and consent of instructor. The use of mathematical models in ecology. Ranges of ecological and synecological models will be treated; relevant mathematical techniques, which include parts of calculus, differential equations, linear algebra and probability, will be reviewed as necessary.

217. Marine Ecology. (2 courses) This course is given at the Santa Catalina Marine Biological Laboratory. Structure, diversity and energetics of marine communities; behavior, population dynamics, and biogeography of component species; associated oceanography and geography. Mr. Vance

218. Oceanography. (2 courses) This course is given at the Santa Catalina Marine Biological Laboratory. Ecology and dynamics of pelagic and benthic associations; physio-chemical properties of seawater and marine substrates and their biological significance; qualitative and quantitative methods of oceanography. The Staff

219. Animal Behavior. Behavior in Laboratory and Field. Discussion, two hours; laboratory, six to eight hours. Prerequisites: course 127 and consent of instructor. Limited enrollment. Laboratory and field studies of selected problems in animal behavior. Mr. Collas

M220. Multigene Families. (Same as Anatomy M213.) Lecture, two hours; discussion, two hours. Prerequisites: courses 114 and 144 (or equivalent) and consent of instructor. Analysis of the molecular structure, developmental regulation, and evolution of multigene families. Topics to be discussed will include the globulins, transferrins, albumins, ribosome, ribosomal RNA, satellite DNAs, and histocompatibility antigens. Grading basis S/U. Mr. Campbell, Mr. Tobin

221. Genetic Analysis. Lecture and discussion, three hours. Prerequisite: course M132 or equivalent. Examples of genetic analysis in eukaryotic organisms by means of mutation and the techniques of gene mapping. Readings in the literature will be provided. Topics to be presented include Drosophila chromosome behavior, techniques of gene localization, the one- gene one chromosome hypothesis, meiotic mutants, mos- sac animals and cell lineage, behavior, and X-chro- mosome inactivation. Mr. Merriam

222A-222F. Topics in Genetics. Lecture. Prerequisite: course M132. Intensive study of selected topics.

223A-223B. Advanced Genetics Laboratories. Laboratory, nine hours. Prerequisites: course M132 or equivalent and consent of instructor. Original research with supervision in eukaryotic genetics; topics include transmission, developmental and behavioral genetics. 223A and 223B may be taken one time each for credit. Mr. Merriam, Mr. Siegel

224. Developmental Biology of Marine Organ- isms. (2 courses) This course is given at the Santa Catalina Marine Biological Laboratory. Descriptive and experimental studies of developmental stages of marine plants and animals; patterns of reproductive biology; larval biology; metamorphosis. The Staff

M225. Chromosome Structure and Regulation. (Same as Biology M226, Chemistry M225, Microbiology and Immunology M226, and Microbiology M225.) Lecture, three hours. Prerequisite: consent of instructor. Lectures will discuss the nature of the chromosome and its relation to the structural and functional organization of eukaryotic chromosomes. S/U grades are used for this course.

The Staff

227. Chromosome Structure and Replication. Lecture, three hours. Prerequisite: course M132, Chemistry 153, or consent of instructor. A survey of biochemical and biophysical investigations of the structure and replication of chromosomal nucleic acids with emphasis on bacterial and viral systems.

228. Prokaryotic and Eukaryotic Gene Systems. (½ course) Lecture, two hours. Prerequisite: consent of instructor. The comprehensive molecular biology of selected atom viruses and prokaryotic species, including cellular processes and physical properties, and integrated biological functions.

229. Structural Macromolecules. Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. The intellectual and experimental approaches in the study of DNA replication, organization, transcription, and translation. Mr. Grunstein, Mr. Ray

230A. Structural Molecular Biology. (½ course) (Same as Chemistry M230A and Microbiology M230A.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor, based on a written research proposal. Fundamentals of electron micros- copy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals.

Mr. Eisering and the Staff

230B. Structural Molecular Biology. (½ course) (Same as Chemistry M230B and Microbiology M230B.) Lecture, two hours. Prerequisites: Physics 6C, Mathematics 3C and consent of instructor. Selected topics from the following: techniques of biological structure; structures of globu- lin, RNA, and DNA; high resolution techniques, nucleic acids, and polysaccharides; harmonic analy- sis and Fourier transforms; principles of electron, neutron and x-ray diffraction; optical and computer filtering; three-dimensional reconstruction. Mr. Nierlich, Mr. Simpson

230C. Structural Molecular Biology Laboratory. (½ course) (Same as Chemistry M230C and Microbiology M230C.) Laboratory, ten hours. Prerequisite: consent of instructor, based on a written research proposal. Laboratory: practical experience with electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high resolution techniques, nucleic acid analy- sis, and studies on viruses and protein crystals. Mr. Eisering and the Staff

232. Prokaryotic and Eukaryotic Gene Systems. (2 courses) Lecture, four hours; laboratory, twelve hours. Prerequisite: course 138, 144, and/or consent of instructor. The Staff

M233. Electron Microscopy of Cells. (2 courses each) Lecture, four hours; laboratory, twenty- two hours; demonstration; three hours. Prerequisite: consent of instructor. Electron microscopic tech- niques applied to structure of cells and to molecular structure of cellular components. Intensive training in electron microscopy techniques and in the use of the electron microscope for high resolution electron mi- niscope. Mr. Sjostrand

234. Advanced Topics in Development. Lecture, three hours; discussion, one hour. Prerequisite: coursework in introductory cell biology, or consent of instructor, which will cover at an advanced level, special topics in areas such as: changes in gene activity during develop- ment, hormone action during development, cell commitment and differentiation, developmental genet- ics, plant development, and developmental neuro- biology. Mr. Lengyel and the Staff

235. Advanced General Physiology. Lecture, three hours. Prerequisite: course 158 or 161. Discussion of specific topics such as excitation, conduction, physiology of blood, muscle contraction, etc. Students will participate in giving reports.

The Staff

236. Experimental Cell Biology. Lecture, two hours; discussion, one hour; laboratory, four hours. Prerequisites: course 158 and consent of instructor. Theoretical and experimental analysis of systems utilized in the study of cellular metabolism and physiology; cell organelles, cell populations and organized tis- sues. Mr. Casacamo, Mr. James

238. Structure, Function and Biogenesis of the Mitochondrion. Lecture, three hours. Prerequisites: course 158, Chemistry 22, and consent of instructor. Origin, maintenance and function of the mitochon- drion as an example of a highly organized subcellular organelle in the eukaryotic cell. Mr. Simpson

239. Laboratory Techniques in Nuclear Acid Re- search. (2 courses) (Same as Genetics M239.) Lecture, two hours; discussion, one hour; laboratory, twelve hours (open lab). Prerequisite: consent of instructor. Procedures in the manipulation of nucleic acids, including: isolation, preparation, and manipulation of nucleic acids in biological and chemical characterization by several means; characterization of circular DNA molecules by elec- tron microscopy; gradient centrifugation and restric- tion enzyme analysis; in vitro transcription and hybrid- ization analysis. Mr. Eyre, Mr. Simpson

240. Physiology of Marine Animals. (2 courses) This course is given at the Santa Catalina Marine Biological Laboratory. Lecture and laboratory studies on cellular, tissue, organ, and animal physiology; reg- ulation biology; metabolic characteristics of cells, en- ergy transformations. The Staff

241. Laboratory in Advanced Electrophysiology. (2 courses) Laboratory, twelve hours. Prerequisites: course 172 or equivalent and consent of instruc- tor. In-depth involvement in research projects under staff guidance. Approximately two pro- jects each quarter. Course may be repeated twice. Mr. Eckert, Mr. O'Lague

241. Advanced Topics in Molecular Biology. Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Each offering of the course will treat a different topic of current interest in molecular biology. The topic will be covered in depth at a level appropriate to advanced graduate students. The course will include lectures, discussion and presenta- tions by students. Mr. Brunk

233A-233B. Electron Microscopy of Cells. (2 courses each) Lecture, four hours; laboratory, twenty- two hours. Prerequisites: course 138, 144, and/or consent of instructor. The Staff

M230A. Structural Molecular Biology. (½ course) (Same as Chemistry M230A and Microbiology M230A.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. The Staff

M230B. Structural Molecular Biology. (½ course) (Same as Chemistry M230B and Microbiology M230B.) Lecture, two hours. Prerequisites: Physics 6C, Mathematics 3C and consent of instructor. Selected topics from the following: techniques of biological structure; structures of globu- lin, RNA, and DNA; high resolution techniques, nucleic acids, and polysaccharides; harmonic analy- sis and Fourier transforms; principles of electron, neutron and x-ray diffraction; optical and computer filtering; three-dimensional reconstruction. Mr. Nierlich, Mr. Simpson

230C. Structural Molecular Biology Laboratory. (½ course) (Same as Chemistry M230C and Microbiology M230C.) Laboratory, ten hours. Prerequisite: consent of instructor, based on a written research proposal. Laboratory: practical experience with electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals. Mr. Eisering and the Staff

230D. Structural Molecular Biology Laboratory. (½ course) (Same as Chemistry M230D and Microbiology M230D.) Laboratory, ten hours. Prerequisite: course M230C concurrent. Methods in structural mo- lecular biology will be discussed, including the fol- lowing procedures: single crystal x-ray diffraction, low angle x-ray diffraction, electron diffraction, optical diffrac- tion, optical filtering, three dimensional reconstruc- tion from electron micrographs, and model buil- ding. The Staff
242. Topics in Neurobiology. Lecture, three hours. Prerequisites: course 171 or the equivalent and consent of instructor. Selected current problems in neurobiology will be discussed in depth with emphasis on analysis of original papers. May be repeated for credit.

Mr. Eckert, Mr. O'Lague

243. Animal Communication. Lecture, three hours; discussion, one hour. Prerequisite: course 247C, Physics 6C and consent of instructor. Qualified undergraduates may also enroll with consent of instructor. Physical properties of animal signals and the physiological mechanisms underlying their generation and reception will be considered. Students will treat signal analysis, signal transmission and receptor design in light of the constraints placed on each of the sensory modalities. Examples of communication systems using visual, auditory, chemical, electrical and magnetic cues will be discussed, with emphasis on biological adaptations for efficiently signaling species-specific information. Mr. Narins

244. Advanced Insect Physiology. Lecture, two hours; laboratory, five hours. Prerequisite: course 168 or consent of instructor. A detailed discussion of current problems in insect physiology. Advanced laboratory.

Mr. Engelmann

246. Plant Molecular Biology. Lecture, four hours. An in-depth study of current issues in molecular biology as they pertain to plants. Subjects will include gene expression and organization, gene engineering, organelle structure and function, nitrogen fixation, plant viruses, and others. Students may repeat this course for multiple credit since the content will vary from year to year. The Staff

247A-247E. Advanced Plant Biology. Lecture and discussion, four hours. Prerequisite: consent of instructor. Some background in plant biology is recommended.

Mr. Cody

247A. Control of growth and development in plants. Ms. Tobin, Mr. Phinney

247B. Plant genetics. Mr. Goldberg

247C. Organellar development and function in plants. Ms. Gonzalez

247D. Photobiology. Mr. Thorsen

247E. Plant metabolic pathways. Mr. Chapman

248. Laboratory Techniques in Plant Biochemistry. (1/2 course) Laboratory, six hours. Prerequisites: courses 102 and 153 or consent of instructor. A laboratory course aimed at introducing graduate students to techniques used in plant biochemistry research. Limited enrollment. Mr. Thompson, Mr. O'Lague

249. Biochemistry of Parasitism. Lecture, three hours; discussion, one hour. Prerequisites: courses 247 (taken concurrently) and Chemistry 153 or equivalent and consent of instructor. A laboratory course aimed at introducing graduate students to techniques used in plant biochemistry research. Limited enrollment. Mr. Thompson, Mr. O'Lague

250. Advanced Immunology. (1/2 course) Lecture, one hour; discussion, two hours.

Mr. Macinnis

250A-M250B. Advanced Immunology. (1/2 course each) (Same as Microbiology M250A-M250B and Microbiology and Immunology M250A-M250B.)

251. Seminar in Plant Systematics. (1/2 course)

Mr. Thompson

252. Seminar in Plant Structure. (1/2 course)

Mr. Phinney, Mr. D. Walker

254. Seminar in Plant Morphogenesis. (1/2 course)

Mr. Phinney, Mr. D. Walker

255. Seminar in Invertebrate Zoology. (1/2 course)

Mr. Serco, Mr. Ziegelboim

258. Seminar in Ichthyology. Discussion, two hours. Prerequisite: course 111 or 112. Student presentations and discussion of specific topics in ichthyology. The theme will vary from year to year. May be repeated for credit.

Mr. Bush

259. Seminar in Herpetology. Discussion, three hours. Prerequisite: course 113 or consent of instructor. Main theme will vary from year to year in areas such as biogeography, ecology, behavior, environmental physiology.

Mr. Gorman

260. Seminar in Biology of Terrestrial Vertebrates. (1/2 course) Mr. Bartholomew, Mr. Honig

261. Seminar in Vertebrate Morphology. (1/2 course) Prerequisite: course 110 or equivalent. Discussion of current problems in vertebrate morphology and evolution. Graded S/U.

Ms. Peterson

262. Seminar in Vertebrate Paleontology. (1/2 course) Mr. Vaughan

264. Evolutionary Concepts. (1/2 course) Lecture: three hours. Exploration in depth of evolutionary concepts, their diversity, biological interpretations and impact on social and humanistic patterns of today and the past.

The Staff

265. Seminar in Biophysical Plant Ecology. (1/2 course) Mr. Nobel

266. Seminar in Plant Ecology. (1/2 course)

Mr. Cody, Mr. Thompson

268. Seminar in Population Biology. (1/2 course) Mr. Cody

269. Seminar in Animal Ecology. (1/2 course) Discussion, three hours. Prerequisite: consent of instructor. Seminar to discuss specific topics in the field of ecology and related fields; designed for advanced graduate students.

The Staff

270. Seminar in Environmental Physiology. (1/2 course) Mr. Bartholomew, Mr. Nagy

271. Seminar in Physiology and Mycology. (1/2 course) Lecture, two hours. Prerequisites: course 100 or equivalent and consent of instructor. Advanced study in biology of algae and fungi. Topics in physiological ecology, physiology and biochemistry of algae and fungi, and their industrial uses. Algae and fungi as experimental organisms. Phylogeny and origin of eucaryote organisms. Evolutionary origin of chloroplasts.

Mr. Chapman

272. Seminar in Marine Biology. (1/2 course) Mr. Gordon, Mr. Muscatine, Mr. Morin

273. Seminar in Animal Behavior. (1/2 course) Mr. Collas

275. Seminar on Behavior Research Problems. Lecture, three hours; laboratory, two hours. Prerequisite: course 130.

Mr. Kavanau

276. Seminar in Molecular Genetics. (1/2 course) Graduate seminar will concentrate on a specific topic each quarter. Mr. Salser

277. Seminar in Genetics. (1/2 course) Mr. Ebersold, Mr. Merinam, Mr. Siegel

278. Seminar in Information Processing in Eukaryotic Cells. (1/2 course) Discussion, three hours. Prerequisites: Chemistry 153, Biology 132, or equivalents; consent of instructor. Structure and organization of eukaryotic DNA; nuclear RNA species; definition and properties of eukaryotic mRNA; translation of mRNA; current related topics.

Mr. Clark

279. Seminar in Developmental Biology. (1/2 course) Prerequisite: consent of instructor. Graded S/U.

Mr. Tobin

280. Seminar on Chromosome Structure and Replication. (1/2 course) Prerequisite: course 227. Current topics in the field of control and mechanism of DNA replication.

Mr. Ray

281. Seminar in Molecular Biology. (1/2 course) Prerequisite: consent of instructor.

Mr. Brunk, Mr. Fessler, Mr. Ray

283. Seminar on Topics in Cell Biology. (1/2 course) A discussion of various topics on the biology of eukaryotic cells. A different topic will be emphasized each year. The topics will include bioenergetics, motility, organelle DNA, membrane structure and function, oncogenic transformation, nuclear organization and function.

Mr. Simpson

284. Seminar in Structural Macromolecules. (1/2 course) Lecture, one hour; discussion, three hours. Prerequisites: courses 138, 144, and consent of instructor. In-depth analysis of current problems in the biology, biochemistry, and molecular biology of structural macromolecules involving critical evaluation of recent findings and publications on the biochemistry, structure, and biodegradation of these molecules.

Mr. Fessler

285. Seminar in Protein Synthesis. (1/2 course) Discussion, three hours. Prerequisite: course 144 and/or consent of instructor. A detailed analysis of our current understanding of the structural and functional events occurring during protein synthesis.

Mr. Lake

286. Seminar in Plant Development. (1/2 course) Lecture, one hour; discussion, two hours. Prerequisites: a course in plant physiology and at least one advanced graduate or undergraduate course in plant development or biochemistry, Chemistry 153 or equivalent. A graduate seminar that will concentrate on a specific topic in plant development each quarter.

287. Seminar in Comparative Cell Physiology. (1/2 course) Mr. Cascarano, Mr. James

288. Seminar on Plant Cell Biology. (1/2 course) Prerequisite: course 162 is particularly recommended.

Mr. Gonzalez

289. Seminar in Plant Physiology. (1/2 course) Mr. Cascarano

290. Seminar in Comparative Physiology. (1/2 course) Mr. Gordon, Mr. Narins

291. Seminar in Physiology and Biochemistry of Arthropods. (1/2 course) Mr. Engelmang

292. Seminar on Topics in Ultrastructure. (1/2 course) The Staff

294. Seminar on Current Aspects of Photosynthesis. (1/2 course) Mr. Chapman, Mr. Tobin, Mr. O'Lague

295. Seminar in Neurophysiology. (1/2 course)

297. Seminar in Molecular Endocrinology. (1/2 course) Ms. Szego

298. Seminar in Current Topics in Molecular Biology. (1/2 course) (Same as Biological Chemistry M298, Chemistry M298, Microbiology M298, Microbiology and Immunology M298 and Molecular Biology M298.) Prerequisite: enrollment must be approved by the instructor and by the graduate adviser of the Interdepartmental Molecular Biology Ph.D. Committee. Each student enrolled conducts or participates in discussions on assigned topics. May be repeated for credit.

299. Seminar in Parasitology. (1/2 course) Mr. Macinnis

495. Preparation for the Teaching of Biology in Higher Education. (1/2 course) Prerequisites: Graduate Standing and consent of instructor. Study of problems and methodologies in teaching biology, which includes workshops, seminars, apprenticeships teaching, and peer observation. Graded S/U.

Mr. D. Walker

501. Cooperative Program. (1/2 to 2 courses) Prerequisites: approval of host campus instructor, Department Chairman and Graduate Dean. The course is used to record the enrollment of UCLA students in graduate courses taken under cooperative arrangements with neighboring institutions. To be graded S/U.

The Staff
Individual Study and Research

The conduct of each of the courses listed below is supervised by a member of the faculty.

596. Directed Individual (or Tutorial) Studies. (½ to 2 courses) The Staff
596F. Directed Individual (or Tutorial) Studies. (½ to 2 courses) Directed individual (or tutorial) studies at the Santa Catalina Island Marine Laboratory. The Staff

597. Preparation for Comprehensive Examination for the Master's Degree or Qualifying Examination for the Ph.D. (½ to 2 courses) Prerequisite: consent of instructor. Course 597 may not be used to fulfill any course requirements for the Master's or Doctor's degrees, and is graded S/U.

598. Master's Thesis Research and Writing. (½ to 2 courses) The Staff
599. Doctoral Dissertation Research and Writing. (½ to 2 courses) The Staff

Biomathematics relates to the biological domain, much as mathematical physics relates to the physical. It also seeks to develop theoretical and computational vehicles for moving basic research findings rapidly and effectively into medicine. The Department of Biomathematics offers course sequences in biomedical computation, modeling, and the relating of models to biomedical data and experimental strategies. The Department participates in the medical curriculum, and offers the M.S. and Ph.D., in Biomathematics. The following is a description of requirements for both degree programs.

Admission Requirements. High academic achievement in one scientific or mathematical field is required. It is not necessary to be proficient in both mathematics and biology, though some prior preparation in both fields is desirable. Both the Aptitude and Advanced Tests of the Graduate Record Examination (GRE) should be taken. At least two letters of recommendation are required from faculty competent to evaluate the applicant's qualifications for pursuing graduate study and a creative research career; additional letters are welcomed and may be requested.

In addition to completing the Graduate Admissions application forms, applicants are required to complete a departmental application form, which should be sent directly to the Department. All communications with the Department, including requests for brochures and for the departmental forms, should be sent to:

Advising. All faculty are accessible to students for individualized instruction and informal counseling. Close student-faculty relationships permit continued guidance and feedback to students on their progress or needs for improvement. Formal counseling arrangements are as follows:

The departmental Advisory Committee confers with incoming students about their goals and prior preparation. It assigns each student a major adviser and possibly additional special advisers to aid in specific aspects of the student's training. The student meets with his or her major adviser at least once a quarter. Assignments of advisers may be revised as the student's primary interests and needs change. As soon as it is formed, a doctoral student's dissertation committee will replace the previous advisers, though it may include some in its membership. Dissertation committee membership must be approved by the Advisory Committee.

Assessments of progress are developed and reported to the Advisory Committee by the student's adviser(s) or dissertation committee on the basis of grades, research, the Written Comprehensive Examination, and personal observations on progress and ability.

Admission to the Program. Students are admitted to either program after they have achieved admission to the Graduate Division and have been approved by the departmental Graduate Admissions Committee by a vote that is unanimous or has only one dissent.

Foreign Language Requirement. There is no foreign language requirement for the M.S. or Ph.D. degrees.

Disqualification and Appeal of Disqualification. Every effort will be made to admit students who have a high likelihood of completing the program and to provide them a supportive environment and the individualized instruction and research opportunities required to correct deficiencies and to aid their development into strong, independent biomathematical investigators. Even so, some students may find it difficult to develop the art of modeling or to be proficient in both biology and mathematics. Such matters will be addressed by the Advisory Committee. In discussion with each student having difficulty, and with his or her adviser(s), the Advisory Committee will recommend a course of action to cope with the problems that have been identified and will henceforth monitor the student's progress on a quarterly basis until it seems that the problem has been resolved. If the Advisory Committee eventually believes that continuation in the program cannot be continued, it will schedule a special meeting with the student and other faculty invited by the student or the committee, to discuss the reasons for suggesting withdrawal or transfer to other programs more appropriate to the student's particular talents. The Advisory Committee's recommendation following that meeting will be communicated promptly to the student and the Department Chairperson by the chairperson of the Advisory Committee.

A decision to appeal the Advisory Committee's recommendation must be announced by the student in writing to the Department Chairperson within two weeks. Otherwise, it will be assumed that the student accepts the committee's recommendation. The Chairperson will then announce a special faculty meeting to discuss the appeal. The student and anybody he or she wishes to bring may participate in that meeting. Thereafter, a mail ballot to faculty in the Adjunct, in Residence, or Regular professional series will decide between the Advisory Committee's recommendation and the student's proposed alternative by a simple majority.

Factors considered in evaluating a student are biomathematical research aptitude, progress toward completing degree requirements, performance on the required examinations, and grades.
The Master of Science Degree

Course Requirements. In fulfilling the University’s minimum requirement of nine courses, master’s candidates must complete at least five graduate level courses in Biomathematics, of which Biomathematics 201, 202A, and 203 are required.

Thesis or Comprehensive Examination Plan

Thesis Plan. Students generally will be required to follow the Comprehensive Examination Plan. Permission to undertake a thesis plan must be given by the Advisory Committee, which must approve the thesis committee proposed by the student, as well as the student’s plans for the thesis.

Comprehensive Examination Plan. A Written Comprehensive Examination administered by a committee consisting of at least two faculty members appointed by the Chairperson with approval of the Advisory Committee will cover material presented in the candidate’s coursework. This will usually be the Written Comprehensive Examination for the doctoral program given during the summer, but in exceptional cases a special committee and written examination will be provided.

Time to Degree. A well-prepared student should be able to complete the degree within four full-time quarters.

500 Series Course Limitations. No more than two Biomathematics 596 courses may apply toward the required nine courses, and none may apply toward the graduate course requirement in Biomathematics.

Teaching Experience. This is not a requirement for the degree.

The Ph.D. Degree

Major Fields or Subdisciplines. Each student will complete the requirements for a field of special emphasis in biology.

Courses. A course of study for each presently approved specialty field has been developed in consultation with the Graduate Adviser or an equivalently authoritative person in that field. It usually comprises course requirements for doctoral students in that field, with possible omission of some courses having primarily a laboratory orientation. Presently approved fields of special emphasis include genetics, immunology, neurosciences, pharmacology, and physiology. Others can be added in response to students’ requests. The requirements for a new field or revisions in requirements for an existing field of special emphasis must be approved by the Department of Biomathematics’ Curriculum Committee.

Examinations. The student must pass the Written or Oral Comprehensive Examination offered in the field of emphasis to its doctoral students prior to the examination that advances them to candidacy.

Exceptions. Students entering with a Ph.D. in a biological field will be exempt from the above requirements. Students with an M.D. will be exempt from the required coursework; exemption from the examination may be granted by joint action of the Curriculum and Advisory Committees in consultation with advisers from the specialty area.

Course Requirements

Required Courses:
Biomathematics: 201, 202A, 203, 204, and 8 units chosen from 205, 206, M207, 208, 209.
Mathematics: Five graduate courses from an approved list, with two substitutions possible if especially appropriate to the student’s research field. (Approval may be given by the Curriculum Committee at the time of a student’s admission to the program, to count previous graduate courses for full or partial completion of this requirement.)

Biology: Courses required for the field of major biological emphasis.

Recommended courses:
Mathematics: By individual study or coursework, the student should have strength in differential equations, probability and statistics, and real and complex analysis. Offerings in the Department of Mathematics are especially recommended.

Statistics: Additional training in biostatistics is highly recommended. Offerings in the School of Public Health are especially recommended.

Computer Methods: Students must be facile programmers and acquainted with numerical methods needed for their area of research. The Numerical Analysis sequence in the Department of Mathematics and computing courses in Biomathematics are suggested.

Biology and Biological Chemistry: A broad background is expected from molecular to organism-system levels. This probably will be provided in requirements for the field of major biological emphasis; supplemental coursework will be advised, if needed.

Other Requirements:
Training in Independent Research: Each student must take at least 4 units of research (Biomathematics 596) with a member of the Biomathematics Department each year prior to taking the Written Comprehensive Examination. As the student progresses, there will be an increasing emphasis on research and encouragement to publish. Failure to advance in capacity for independent, creative research is a primary indication for recommended withdrawal from the program.

Training for Teaching: One teaching preceptorship (Biomathematics 596) is required of each student. The student participates fully in the planning and delivery of one course in Biomathematics, assisting the instructor in counseling students, preparing notes and other teaching aids, and assigning final grades. Under supervision of the instructor, he or she organizes and presents the lectures on at least one of the major course topics. The emphasis is on the course instructor’s obligation to train the student in all aspects of preparing for and offering a course; this is not a service-oriented teaching assistantship.

With permission of the Advisory Committee, a student who does not plan to pursue an academic teaching career may substitute the following: For one quarter, the student participates at the level of one Biomathematics 596 course in the individual-instruction activities of a member of the Biomathematics faculty,—e.g., informal instruction of biomedical scientific collaborators, planning and guiding individual reading programs, developing and administering term projects in research.

Written and Oral Qualifying Examinations

Comprehensive Examination in Biomathematics. In Summer Quarter, the Department will offer a Written Comprehensive Examination to test the student’s competence in biomathematics. Full-time students must take this at least by the end of two academic years of study, and part-time students, by the end of three.

Qualifying Examination in the Field of Major Biological Emphasis. This usually will be the regular comprehensive examination for doctoral students in that field that is taken prior to the examination that advances them to candidacy.

Final Oral Qualifying Examination. This examination, administered by the doctoral committee appointed by the Dean of the Graduate Division, will critically probe the quality, scope and feasibility of the student’s proposed dissertation work. It will also explore the strength of the student’s biomathematical, mathematical, and biological-biomathematical research in his or her intended area of expertise.

Doctoral Committee. The initial membership list of the doctoral committee should be approved by the Advisory Committee prior to submission to the Graduate Division for approval.

Time to Degree. A full-time student with no deficiencies upon admission should be able to complete the program in five years (15 academic quarters plus research and/or individual instruction during the summers).

Final Oral Examination. A final oral examination is required of all candidates and is a defense of the dissertation, administered by the doctoral committee.

Teaching Experience. Teaching experience is a requirement for the Ph.D. degree. See Other Requirements.
Graduate Courses

200. Research Frontiers in Biomathematics. (½ course) Prerequisite: consent of instructor. A series of lectures by the faculty on research in biomathematics.

The Staff

201. Deterministic Models in Biology. Prerequisites: Linear algebra and differential equations. The conditions under which deterministic approaches can be employed are examined, and conditions where they may be expected to fail. Topics receiving special attention include compartmental analysis, linear algebra and differential equations.

Ms. Newton and the Staff

The Staff

203. Stochastic Models in Biology. Prerequisite: Mathematics 150A or equivalent experience in probability. The mathematical tools for modeling situations involving random variables with particular attention directed to areas where the conditions for deterministic models are inadequate. Examples of stochastic models drawn from genetics, physiology, ecology and a variety of other biological and medical disciplines.

Mr. Lange

204. Biomedical Data Analysis. Prerequisite: consent of instructor. The quantity and quality of observations has been greatly affected in the last few years by the availability of powerful computers. Statistical analysis of the results of experiments is a vital part of scientific research. Prerequisites cover the latest methods in statistical data analysis and their use for such studies. Laboratory and clinical research.

Mr. Dixon

205. Electric Potential Problems in Membranes, Cells and Tissues. Lecture, 4 hours. Prerequisites: differentiable manifold and a working working knowledge of linear algebra. The use of linear algebra in the study of the boundary conditions for current flow across membranes; the use of eigenfunction expansions and singular perturbation analysis of intracellular and extracellular potential distribution in spherical and cylindrical coordinate systems. Deterministic, stochastic, and computer simulation models are developed from simple dividing cellular systems in the presence of current flow across membranes; theoretical and experimental approaches, and relationships to laboratory research methods are emphasized. A term project is required for those who enroll in the 4-unit course.

Ms. Newton

207. Modeling of Cellular Systems. (½ to 1 course) Prerequisite: people who can contribute either as biologists or as mathematicians to the course. Expected performance will be based on each individual's background. Study of theoretical characterizations of growing cellular systems, differentiating cells, and cells in tissue culture. Laboratory methods vary according to the background of the individual student. The course will use computer laboratory equipment to develop models and to perform experiments. Computer simulation models are developed from simple dividing cellular systems in the presence of current flow across membranes; theoretical and experimental approaches, and relationships to laboratory research methods are emphasized. A term project is required for those who enroll for the 4-unit course.

Ms. Newton

207. Modeling in Genetic Analysis. (Same as Anthropology M222P) Prerequisite: Graduate Standing, course M245 or Anthropology M222Q (formerly numbered M222B), or consent of instructor. Basic concepts of human genetics with emphasis on methods of computer-oriented genetic analysis. Topics include computer applications of linkage, polynucleic (quantitative) models, and population structure.

Ms. Spence

208. Modeling and Analysis of Neuroelectric Data. For biologists (especially neuroscientists), but open to other science majors. Mathematical approaches for modeling and developing neural theory are applied to basic neurophysiological phenomena and neural models. Appropriate practical approaches are also presented. The Staff

209. Modeling of Biochemical Systems. (½ course) Prerequisites: biochemistry, mathematics through calculus, FORTRAN equivalent. Students will use computer-based methods for describing and analyzing kinetic and steady-state cellular or subcellular physiological processes. Expected performance will be based upon each student's background and interest. Primary emphasis will be upon solutions of fluid and electrical currents across membranes of systems characteristic for their clinic, research or educational value.

Mr. DeLand

210. Introduction to Biomedical Computation. Prerequisite: Graduate Standing. Basic concepts of data acquisition and machine computation, with special reference to biomedical applications. The Staff

213. Biomedical Laboratory Computing (Biomedical Minicomputing). Computer and data management problems encountered in the use of small digital computers for biomedical research are analyzed. Practical experience will be acquired in interacting with a minicomputer in system generation and patching, documentation, interfacing, file management, assembler language, and higher order language programming with computer graphics. Select laboratories will be used for experience in the direct processing of physiological data and in controlling laboratory experiments.

The Staff

215. Advanced Biomedical Computation. Prerequisite: course 210 or equivalent programming experience, or permission of instructor. Programming of elementary FORTRAN programming to acquire skills applicable to biomedical research. Use of random-number generators, stochastic modeling, models with differential equations, package programs, specialized applications, and computer simulation of IMLAC graphics system. Individual term projects.

Ms. Newton and the Staff

M216. Computer and Biomathematical Applications in Radiological Sciences. (Same as Radiological Sciences M218.) Prerequisites: course 210 and elementary calculus are recommended. Computer and Biomathematical methods will be presented that relate to dosimetry, treatment strategies, biological effects of radiation, and laboratory research in radiobiology and radiology.

Ms. Newton

230. Computed Tomography: Theory and Applications. Prerequisites: consent of instructor. Computer tomography is a three dimensional imaging technique being widely used in radiology and is becoming an important tool in other medical fields. The course will cover basic principles of computer tomography (CT), various reconstruction algorithms, special characteristics of CT, physics in CT, and various biomedical applications. The Staff

M231. Special Topics: Statistical Methods for Categorical Data. (Same as Public Health M201E.) Prerequisites: Public Health 100B or 101B, Mathematics 190C or 152B or equivalent and consent of instructor. Statistical techniques for the analysis of categorical data; discussion and illustration of their applications and limitations.

The Staff

M246. Probability Models and Statistical Methods in Genetics. (Same as Anthropology M222Q.) Prerequisite: Graduate Standing, two quarters of statistics, Mathematics 3A, Anthropology 222P (formerly numbered M222A). An introduction to probability models and statistical methods in genetics. Maximum likelihood methods for estimating genetic parameters. Biocomputer computation enabling those interested to pursue individual research topics in genetics and in the biomedical sciences. The Staff

Clifford S. Garner, Ph.D., D.Sc., Emeritus Professor of Chemistry.

Thomas L. Jacobs, Ph.D., Emeritus Professor of Chemistry.

Donald J. Cram, Ph.D., Emeritus Professor of Chemistry.

Eric J. Heller, Ph.D., Associate Professor of Chemistry.

James D. McCullough, Ph.D., Emeritus Professor of Chemistry.

Michael E. Jung, Ph.D., Associate Professor of Chemistry.

The Staff

410. Biomedical Computing: Introduction. Same lectures as Biomathematics 210. A term project is required in lieu of homework and examinations. To be graded S/U only.

The Staff

Individual Study and Research

596. Directed Individual Study or Research in Biomathematics. (½ to 3 courses) This course will serve for individual study on topics not yet covered by the offerings of the department. This course can be taken in conjunction with 210. A letter grade will be used.

The Staff

Chemistry

(Department Office, 3010 W.G. Young Hall)

Frank A. L. Anet, Ph.D., Professor of Chemistry.

Daniel E. Akenson, Ph.D., Professor of Chemistry.

Marko E. Baur, Ph.D., Professor of Chemistry.

Kyle D. Bayes, Ph.D., Professor of Chemistry.

Paul D. Boyer, Ph.D., Professor of Chemistry.

Orville L. Chapman, Ph.D., Professor of Chemistry.

Donald J. Cram, Ph.D., Professor of Chemistry.

Richard E. Dickerson, Ph.D., Professor of Chemistry and Geophysics.

William G. McMillan, Jr., Ph.D., Professor of Chemistry.

Charles A. West, Ph.D., Professor of Chemistry.

Francis E. Blacet, Ph.D., D.Sc., Emeritus Professor of Chemistry.

Clifford S. Garner, Ph.D., D.Sc., Emeritus Professor of Chemistry.

Thomas L. Jacobs, Ph.D., Emeritus Professor of Chemistry.

James D. McCullough, Ph.D., Emeritus Professor of Chemistry.

Eric J. Heller, Ph.D., Associate Professor of Chemistry.

James D. Jordan, Ph.D., Associate Professor of Molecular Biology in Chemistry.

Michael E. Jung, Ph.D., Associate Professor of Chemistry.

CHEMISTRY / 101
Admission to the Doctoral Program. There are no specific requirements for admission to the doctoral program other than the admissions requirements listed above.

Orientation Examinations. Each student admitted to graduate status is given orientation examinations at the beginning of the first quarter. Students write examinations in physical, organic, analytical, and inorganic biochemistry. The main purpose of the orientation requirement is to help the student and his/her adviser plan his/her course program. The examinations cover work roughly equivalent to that in the following courses: Biochemistry-Chem 157A; Inorganic-Chem 173; Organic-Chem 133 A, B, C, 136, 144; Physical-Chem 110A, B, 113A. Students who pass the inorganic or biochemistry examination will be given credit for Chem 173 or 157A. All courses suggested because of deficiencies in undergraduate preparation are normally to be completed by the end of the first year.

Major Fields or Subdisciplines. Organic, inorganic, physical chemistry, biochemistry.

Foreign Language Requirement. Language requirements for the different areas of specialization are as follows: Organic—German; Physical—one of the following German, French (with approval of the Research Director), substitute course program, coordinated course in computer programming; Inorganic—German or coordinated course in computer programming. (A foreign student in the M.S. program may use English as the required foreign language.) Either the ETS Examination (with score of 500) or the Departmental Examination is acceptable. The Departmental Examination requires translation of a journal article with the aid of a dictionary. The substitute course program should consist of 10 units of coordinated upper division or graduate courses forming a minor field of concentration. These courses may be taken on a S/U basis, but may not be used to fulfill the departmental requirements.

Course Requirements (M.S.). At least nine quarter courses (36 units) are required, of which at least five (20 units) must be graduate courses and the remainder upper division courses. The student must take a minimum of two courses in his/her major area and one course in an outside area. Choices may be made from the following:

- Physical: Chemistry 215A,B,C,D, 223A,B,C, 225
- Inorganic: Chemistry 174, 207, 275, 276A,B

Substitutions may be made with approval of the Area Adviser. With the consent of the Graduate Adviser, courses of directed individual study, but not research courses, may replace any of the courses listed above. Research courses may be used to complete the graduate level and total course requirements as follows:

500 Series Courses

<table>
<thead>
<tr>
<th>Course No.</th>
<th>Unit Type</th>
<th>Type of Grading</th>
<th>No. Times May Be Repeated</th>
</tr>
</thead>
<tbody>
<tr>
<td>596</td>
<td>2-16</td>
<td>S/U</td>
<td>No limit</td>
</tr>
<tr>
<td>598</td>
<td>2-16</td>
<td>letter</td>
<td>No limit</td>
</tr>
</tbody>
</table>

Up to 24 units of Chemistry 596 or 598 may be applied toward the total course requirement. Up to 20 units of Chemistry 596 or 598 may be applied toward the minimum graduate course requirement. In exceptional cases where Plan II (Comprehensive Examination) is used, an additional 6 units of 597 and 6 units of Student Seminar (Chem 216, 248, or 278) may apply toward the graduate course requirement and the total course requirement.

Thesis Plan. After completion of course requirements, the student consults with his/her Research Adviser and the Graduate Office to form a thesis committee. This committee consists of three members, with the Research Adviser as Chairperson. A member from outside the Department is permissible, but not required.

Course Requirements (Ph.D.). Candidates in each area of specialization should normally complete as a minimum the coursework indicated below. Note: Some of these requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program. A student whose projected research falls in an area which differs appreciably from that anticipated by the field requirements listed below may be permitted appropriate modifications.

Inorganic Chemistry
a) Required background material: Chem 173
b) 276A,B

c) Two courses selected from 174, 275, or 207.
e) Three courses selected from Chem 207, 271A-Z, 275, 276A
f) Chem 278

Organic Chemistry
a) Required background material: Chem 133A,B,C, 136, 144
b) Chem 243A,B

c) Chem 212B, 276A or 245
d) One additional course selected from the following offerings in physical chemistry (215A, 223A, 221) or inorganic chemistry (173, 174, 275, 276A) or biochemistry (157A,B)
Ph.D. program, unless express permission has been obtained from the Area Adviser. Prior to the examination, the student's Research Adviser is to prepare a thorough written evaluation of the candidate's research abilities, progress, and potential to present to the committee. The committee's decision to advance the student to candidacy, to allow him/her to repeat the oral, or to disqualify him/her will be based on the quality of the written proposal, the adequacy of the oral presentation, his/her overall record at UCLA as reflected in coursework and examinations, and his/her research ability.

Appointment of the Doctoral Committee. A doctoral committee, appointed with the approval of the Graduate Division, will conduct the Oral Qualifying Examination. This committee must consist of not fewer than five members, two of whom must be from departments other than Chemistry. At the end of a successful examination, the chairperson and members of the committee in consultation with the student shall determine which of its members will guide, read, approve and certify the dissertation. At least two members from the Chemistry Department and at least one outside member must act in this capacity. A decision is also made as to whether a Final Oral Examination will be required.

Advancement to Candidacy. When a satisfactory report on the completion of the Written and Oral Qualifying Examinations and the departmental language requirements has been submitted, the student will be mailed an application for advancement to candidacy. The filing of this application and payment of the fee constitutes formal advancement to candidacy for the Ph.D.

Candidate in Philosophy Degree. In conjunction with advancement to candidacy, a student may request award of the Candidate in Philosophy Degree. This is a non-terminal degree for which the academic criterion is advancement to candidacy for the Ph.D. Students who desire to teach in positions which do not require the extensive research experience usually associated with the Ph.D. may find this a reasonable alternative.

In-Candidacy Fee Offset Grant Program. Students who have been advanced to candidacy for the Ph.D. are eligible for this program and the attendant registration fee offset of $120 per quarter. Students in the program must register each quarter until completion of all degree requirements, including filing of the dissertation. The fee offset will be issued until departmental normative time-to-degree (17 quarters) is reached. Students who fail to complete their Ph.D. within this time frame may continue as students, subject to the regulations of the program, but will no longer be eligible for the fee offset. Unless a leave of absence has been approved, failure to register will result in lapse of status as a graduate student and Ph.D. candidate. Additional information and application forms are available in the Graduate Office.

Normal Progress Toward the Degree (M.S.)

Final Oral Examination. The Final Oral Examination is optional with the doctoral committee.

Teaching Experience. One year of teaching experience is required.

Disqualification and Appeal of Disqualification. A student may be disqualified from the M.S. or Ph.D. program by action of the Graduate Study Committee for failure to maintain an adequate level of performance in coursework, in qualifying examinations, or in research progress. Appeal of disqualification may be made to the Department Chairperson.

Manuscript Preparation. Orientation meetings with the University Archivist are scheduled each quarter. A list of these dates is posted on the Graduate Office Bulletin Board. A booklet entitled Standards and Procedures for Theses and Dissertations is available free of charge from the Graduate Division, 1225 Murphy Hall. The student is required to submit two unbound copies of the manuscript to the Archivist and one bound copy to the Research Supervisor.

Final Clearance. Before the Department will give final approval to the Registrar for the formal granting of the degree, all appropriate clearances must be obtained by the student. Check-out cards are available in the Chemistry Graduate Office.

Biochemistry

The Division of Biochemistry of the Department of Chemistry and the Department of Biological Chemistry in the Medical School offer coordinated programs leading to the M.S. and Ph.D. degrees. Although there is close cooperation between the two departments, a student must be formally admitted into the program of one department or the other. The M.S. in Biochemistry may be obtained by the Thesis Plan or Comprehensive Examination Plan. A student who is planning to work toward the Ph.D. degree should not seek to obtain a M.S. degree first, but should apply directly to the Ph.D. program. Application materials may be obtained by writing to Phyllis Jorgenson, Director, Graduate Office, Department of Chemistry, UCLA, Los Angeles, California 90024.
Admission Requirements. Excellent undergraduate record in addition to the University minimum requirements. GRE Aptitude and Advanced Tests are recommended.

Advising. Graduate Office, 4006 Young Hall; Graduate Adviser, V.N. Schumaker, 401 MBI. Initial advising is handled by the Graduate Adviser. The student will continue to consult each quarter with the Adviser until completion of the course requirements. During this period he/she will also choose a Research Director who will supervise the thesis research. The Biochemistry Division and the Graduate Study Committee review each student's progress quarterly. Notification in writing is given to students performing at a very high level and to those who are not making adequate progress.

Admission to the Doctoral Program. There are no specific requirements for admission to the doctoral program other than the admissions requirements listed above.

Orientation Examinations. Each student admitted to graduate status is given orientation examinations at the beginning of the first quarter. Students write examinations in physical, organic, analytical, and biochemistry. The main purpose of the orientation requirement is to help the student and his/her adviser plan a course program. The examinations cover work roughly equivalent to that in the following courses: Biochemistry-Chem 157A, 157B, Organic-Chem 133A, B, C; Physical-Chem 110A, 110B, 156. All courses suggested because of deficiencies in undergraduate preparation are normally to be completed by the end of the first year.

Orientation to Research. During the Fall and Winter Quarter of the first year the student will rotate through at least two research groups in the Biochemistry Division. The selection of the groups will be determined by the Graduate Adviser, taking into consideration the student's individual research interests and abilities. Additionally orientation to the areas of research investigation is provided through a series of seminars presented by faculty members of the Division. The student is expected to select the supervisor of his/her dissertation research by the beginning of the third quarter of residence.

Foreign Language Requirement. The Biochemistry Division requires no foreign language except for foreign students, who must demonstrate their ability to speak and write English. Facility in spoken English will be certified by a committee of three faculty members of the Biochemistry Division, usually on the basis of a seminar. Ability to communicate in written English will be judged on the basis of examinations in the required courses.

Course Requirements (M.S.) Plan I (Thesis). A total of 36 units is required. Of these, 20 must be at the graduate level and include a minimum of 12 units from Chem M253, M255, M267. Registration in Chem 258 (Student Seminar) is required for three quarters, but is not applicable to the 36-unit requirement. Research courses may be used to complete the graduate level and total course requirement as follows:

### 500 Series Course Limitations

<table>
<thead>
<tr>
<th>Course No.</th>
<th>Unit Value</th>
<th>Type of Grading</th>
<th>No. Times May Be Repeated</th>
</tr>
</thead>
<tbody>
<tr>
<td>596</td>
<td>2-16</td>
<td>S/U</td>
<td>No limit</td>
</tr>
<tr>
<td>598</td>
<td>2-16</td>
<td>letter</td>
<td>No limit</td>
</tr>
</tbody>
</table>

Up to 22 units of Chemistry 596 or 598 may be applied toward the total course requirement. Up to 8 units of Chemistry 596 or 598 may be applied toward the graduate course requirement. After completion of course requirements, the student consults with his/her Research Adviser and the Graduate Office to form a thesis committee. This Committee consists of three members, with the Research Adviser as Chairperson. A member from outside the Department is permissible, but not required.

M.S. Plan II (Comprehensive Examination). A total of 36 units is required. Of these 20 must be at the graduate level and include a minimum of 12 units from Chem M253, M255, M257. Students using Plan II may apply 6 units of Chem 258 (Student Seminar) and 6 units of Chem 597 to the graduate level requirement and the total course requirement. With the exception of Chem 258 and 597, all courses must be taken on a graded basis.

### 500 Series Course Limitations

<table>
<thead>
<tr>
<th>Course No.</th>
<th>Unit Value</th>
<th>Type of Grading</th>
<th>No. Times May Be Repeated</th>
</tr>
</thead>
<tbody>
<tr>
<td>597</td>
<td>2</td>
<td>S/U</td>
<td>3</td>
</tr>
</tbody>
</table>

Course Requirements (Ph.D.). Candidates should normally complete as a minimum the coursework indicated below. Note: Some of these requirements can be met on the basis of orientation examinations and courses taken previous to entry into the graduate program.

a) Required background material: Chem 110A, 133A, B, C, 156, 157A, B, some coursework in the life sciences and some biochemistry lab experience. Deficiencies in background may be made up after admission.

b) The core courses M253, M255, M267 (18 units).

c) An additional 12 units of upper division or graduate courses subject to the approval of the Graduate Adviser. It is recommended that 8 of these units be from other than biochemistry offerings. Advanced courses taken elsewhere, or as an undergraduate may be substituted for some of these units in appropriate cases. Seminar courses will normally not be applicable.

d) Chemistry 258 each quarter during the first two years.

Written Qualifying Examinations. In accordance with University requirements, each student in the Ph.D. program must pass a Written Qualifying Examination. Rather than a simple comprehensive examination, the Department gives a series of written tests called Cumulative Examinations. These are designed to encourage and test the continued growth of professional competency by the student through coursework, a study of the literature, attendance at, and participation in departmental seminars, and informal discussions with colleagues.

a) Three examinations are given per quarter at approximately monthly intervals.

b) The student who enters directly into the Ph.D. program and performs satisfactorily on the orientation examination in his/her special area may begin writing the examinations immediately. All students must begin by the start of their second quarter of residence, and must continue until they have passed five. To remain in good standing, a student should pass at least one of the first six examinations attempted and three out of nine. Fifteen attempts will normally be the maximum.

At the end of the first and second years, each student's overall progress will be evaluated by the Biochemistry Division and the Graduate Study Committee, taking into account performance in courses, cumulative examinations, and research. The Committee may recommend that the student: 1) be qualified to proceed to the oral examination, 2) be placed on probationary status for one quarter, during which time he/she will continue to take cumulative examinations, with a final determination made at the end of this period, 3) be disqualified from the Ph.D. program, 4) be terminated.

Oral Qualifying Examination. This examination is based on an original research proposal prepared by the candidate. The proposal should represent independent work on the student's part and should offer the doctoral committee an opportunity to judge his/her ability to think creatively and to formulate significant ideas for research. The oral examination should normally be attempted by the end of the fifth quarter, and no later than the sixth quarter of residence. Failure to comply with this time schedule may result in disqualification from the Ph.D. program, unless express permission has been obtained from the Graduate Adviser. Prior to the examination, the student's Research Adviser is to prepare a thorough written evaluation of the candidate's research abilities, progress, and potential to present to the committee. The committee's decision to advance the student to candidacy, to allow a repeat of the oral, or to disqualify him/her will be based on the quality of the written proposal, the adequacy of the oral presentation, his/her overall record at UCLA as reflected in coursework and examinations, and his/her research ability.
Appointment of the Doctoral Committee. A doctoral committee, appointed with the approval of the Graduate Division, will conduct the Oral Qualifying Examination. This committee must consist of six members, two of whom must be from departments other than Chemistry. At the end of a successful examination, the Chairperson and members of the committee in consultation with the student shall determine which of its members will guide, read, approve and certify the dissertation. At least two members from the Chemistry Department and at least one outside member must act in the capacity. A decision is also made as to whether a Final Oral Examination will be required.

Advancement to Candidacy. When a satisfactory report on the completion of the Written and Oral Qualifying Examinations has been submitted, the student will be mailed an application for advancement to candidacy. The filing of this application and payment of the fee constitutes formal advancement to candidacy for the Ph.D.

Candidate in Philosophy Degree. In conjunction with advancement to candidacy a student may request award of the Candidate in Philosophy Degree. This is a non-terminal degree for which the academic criterion is advancement to candidacy for the Ph.D. Students who desire to teach in positions which do not require the extensive research experience usually associated with the Ph.D. may find this a reasonable alternative.

In-Candidacy Fee Offset Grant Program. Students who have been advanced to candidacy for the Ph.D. are eligible for this program and the attendant registration fee offset of $120 per quarter. Students in the program must register each quarter until completion of all degree requirements, including filing of the dissertation. The fee offset will be issued until the departmental normative time-to-degree (17 quarters) is reached. Students who fail to complete their Ph.D. within this time frame may continue as students, subject to the regulations of the program, but will no longer be eligible for the fee offset. Unless a leave of absence has been approved, failure to register will result in lapse of status as a graduate student and Ph.D. candidate. Additional information and application forms are available in the Graduate Office.

Final Oral Examination. The Final Oral Examination is optional with doctoral committee.

Teaching Experience. One year of teaching experience is required. (Not required for M.S. Plan II)

Disqualification and Appeal of Disqualification. A student may be disqualified from the M.S. or Ph.D. program by action of the Biochemistry Division and the Graduate Study Committee for failure to maintain an adequate level of performance in coursework, qualifying examinations, or in research progress. Appeal of Disqualification may be made to the Department Chairperson.

Manuscript Preparation. Orientation meetings with the University Archivist are scheduled each quarter. A list of these dates is posted on the Graduate Office Bulletin Board. A booklet entitled Standards and Procedures for Theses and Dissertations is available free of charge from the Graduate Division, 1225 Murphy Hall. The student is required to submit two unbound copies of the manuscript to the Archivist and one bound copy to the Research Supervisor.

Final Clearance. Before the Department will give final approval to the Registrar for the formal granting of the degree, all appropriate clearances must be obtained by the student. Check-out cards are available in the Chemistry Graduate Office.

Graduate Courses

207. Organometallic Chemistry. Lecture and discussion, three hours. Prerequisite: course 243A (may be taken concurrently) or consent of instructor. Survey of synthesis, structure and reactivity (emphasizing a mechanistic approach) of compounds containing carbon bonded to elements selected from the main group metals, the metalloids and the transition metals including olefin complexes and metal carbonyls; applications in catalysis and organic synthesis. The Staff

213B. Physical Chemistry: Introduction to Molecular Spectroscopy. Lecture and quiz, five hours. Prerequisite: course 113 or equivalent. Spectroscopic applications of basic quantum chemistry, including light-matter interaction, origin of selection rules, rotation-vibration spectra, anharmonic effects electronic spectra, Franck-Condon principle, and topics from Raman, microwave, ESR, NMR, laser spectroscopy and radiationless transitions. An independent study project is required.

Mr. Kasper, Mr. Bayes

215A-215B. Quantum Chemistry. Methods. Lecture: four hours; discussion: one hour. Prerequisite: course 113A. Mathematics 31A, 31B, 32A, 32B, 33A (or 31C and 32C). Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course 215A or Physics 115B is prerequisite for course 215B. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells: oscillators: angular momentum: hydrogen atom: matrix techniques; approximation methods; time dependent problems; atoms: spectroscopy: magnetic resonance; chemical bonding. Students entering course 215A will normally be expected to take courses 215B the following quarter. These two courses are designed for chemistry students with a serious interest in quantum chemistry. An independent study project is required.

Mr. Heller, Mr. Gelbart

215D. Molecular Spectra, Diffraction and Structure. Lecture and quiz, four hours. Prerequisite: course 215B, Physics 131, or equivalent. Selected topics from electronic spectra of atoms and molecules; vibrational spectra, Raman and infrared spectra; magnetic resonance spectra; x-ray, neutron and electron diffraction; coherence effects. The Staff.

218. Physical Chemistry Student Seminar. (1-2 course) Seminars are presented by staff, outside speakers, postdoctoral fellows and graduate students. S/U grades are used for this course. May be repeated for credit.

The Staff in Physical Chemistry.

221A-221Z. Advanced Topics in Physical Chemistry. (1 to 4 course each) Lecture, two to four hours. Prerequisite: consent of instructor. Each course will encompass a recognized specialty in physical chemistry, and will be taught by a staff member whose research interests embrace that specialty.

The Staff in Physical Chemistry.

223A-223B. Chemical Thermodynamics. Lecture: four hours; discussion: one hour. Prerequisite: course 110B or 156 (113A recommended). Rigorous presentation of the fundamentals of classical thermodynamics. Phase diagrams: thermodynamic probability; assemblies, partition functions, independent molecules and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic polyatomic gases, the solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibrium, reaction rates, the imperfect gas, non-electrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. An independent study project is required.

Mr. Knobler, Mr. Scott

223C. Statistical Mechanics. Lecture and quiz, four hours. Prerequisites: courses 215B, 223B, Physics 131 or equivalent. Fundamentals of statistical mechanics; classical equations of state; critical phenomena; phase transitions; quantum statistical mechanics; quantum corrections to the equation of state; density matrix; second quantization. The Staff.

225. Chemical Kinetics. Lecture and quiz, four hours. Prerequisites: courses 215A, 223A, 223B. Theories of chemical reactions and their applications to experimental systems; general kinetic postulates; theories of elementary reactions; energy transfer processes; experimental studies. Mr. Kasper (Sp)

M226. Chromosome Structure and Regulation. (Same as Biology M226) Principles of statistical thermodynamics: probability functions, independent molecules and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic polyatomic gases, the solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibrium, reaction rates, the imperfect gas, non-electrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. An independent study project is required. Mr. Kasper (Sp)
228. Chemical Physics Seminar. (½ course) Seminars will be presented by staff, outside speakers, postdoctoral fellows and graduate students. S/U grades are used for this course. May be repeated for credit. The Staff in Chemistry

232. Structural Molecular Biology (½ course) (Same as Biology M230A and Microbiology M230A.) Lecture and discussion, three hours. Prerequisite: consent of instructor, based on a written research proposal. Fundamental principles of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals. Mr. Eisenberg, Mr. Eisinger, Mr. Kasamatsu

233C. Structural Molecular Biology Laboratory. (½ course) (Same as Biology M230D and Microbiology M230D.) Laboratory, ten hours. Prerequisite: consent of instructor, based on a written research proposal. Practical experience with electron microscopy of macromolecules and supramolecular structures, emphasis on electron microscopy. No research techniques, nucleic acid analysis, and studies on viruses and protein crystals. Mr. Eisenberg, Mr. Eisinger, Mr. Lake

236. Spectroscopic Methods of Organic Chemistry. Lecture and discussion, three hours. Prerequisites: course 243B (may be taken concurrently) or consent of instructor. Introductions to the use of spectroscopy, primarily in connection with research. The Staff

243B. Mechanism and Structure in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 243A or consent of instructor. Corequisites: courses 250A and 250B or equivalent for detection of reactive intermediates. An independent study project is required. Mr. Chapman, Mr. Stevens

244. Applications of Electronic Theory in Organic Chemistry. Lecture and discussion, three hours. Prerequisite: course 243A (may be taken concurrently) or consent of instructor. A review of molecular orbital theory; introduction to alternative theoretical methods; aromaticity and homoaromaticity; Huckel and MO spectroscopy; Woodward-Hoffmann theory of concerted pericyclic reactions; the estimation of through-bond and through-space interactions; an introduction to electron spectroscopy; related special topics. The Staff

245. Applications of Electronic Theory in Organic Chemistry. Lecture and discussion, three hours. Prerequisite: course 243A (may be taken concurrently) or consent of instructor. A review of molecular orbital theory; introduction to alternative theoretical methods; aromaticity and homoaromaticity; Huckel and MO spectroscopy; Woodward-Hoffmann theory of concerted pericyclic reactions; the estimation of through-bond and through-space interactions; an introduction to electron spectroscopy; related special topics. The Staff

246. Bio-Organic Chemistry. Lecture and discussion, three hours. Prerequisite: course 243A (may be taken concurrently) or consent of instructor. Organic chemical models for biological processes; synthetic models for enzyme complexation, catalysis and inhibition; models for transport; solid support chemistry; mechanisms for differential complexation. The Staff

247. Organic Colloquium. (½ course) Seminars in organic chemistry and related areas will be presented by outside speakers, department faculty, and postdoctoral fellows and graduate students. S/U grades are used for this course. May be repeated for credit. The Staff in Organic Chemistry

248. Organic Chemistry Student Seminar. (½ course) Seminars are presented by staff, outside speakers, postdoctoral fellows and graduate students. S/U grades are used for this course. The Staff in Organic Chemistry

249. Problems in Advanced Organic Chemistry. (½ course) Problems in organic reaction mechanisms, synthesis, structure determination, stereochemistry, spectroscopy, electronic theory, organic chemistry, and organometallic chemistry are discussed, with an emphasis on current literature. Intended primarily for first and second year graduate students as preparation for cumulative exams. S/U grades are used for this course. Mr. Lake

250. Topics in the Biochemistry and Molecular Biology of Animal Cells. Lecture, three hours. Prerequisites: equivalent of Intermediate Organic Chemistry, Chemistry 157A, 157B and courses in Genetics and Molecular Biology. Enrollment by permission of the instructor. The course will consider the structure and organization of animal cells, cell-cell contact, intercellular interaction and communication, reactions of the cytoskeleton, cell-cell interactions, and cell-cell recognition. Mr. Jordan and invited speakers

251A-251Z. Advanced Topics in Biochemistry. (½ course) Lecture, two hours. Prerequisite: consent of instructor. Each course will encompass a recognized speciality in biochemistry, and will be taught by a staff member whose research interests embrace that specialty. The Staff in Biochemistry

261C. Macromolecular Structure. (½ course) (Same as Biological Chemistry M253.) Lecture and quiz, four hours. Prerequisites: course 110A, 157A, 157B or Biological Chemistry 101A-101B or equivalent. Chemical and physical properties of macromolecules are emphasized on theory and methodology; correlation of structure and biological properties; chemical synthesis and properties of polypeptides and polynucleotides. The Staff in Biochemistry and Biological Chemistry (F)

254. Advanced Biochemical Methods. Lecture and quiz, two hours; laboratory, eight hours. Prerequisites: course 156, 157A-157B, 157C (or equivalent). Lecture, two hours. Prerequisite: course 22A and 110A. Theory of dynamic, thermal, optical and x-ray techniques used to study the structure and function of biological macromolecules. The Staff

257L. Hydrodynamic and Optical Characterization of Biopolymers. Lecture, two hours; laboratory, eight hours. Prerequisite: course M257 completed or concurrent. A laboratory course covering a variety of hydrodynamic and optical techniques, and including an individual project dealing with: sedimentation velocity, sedimentation equilibrium, buoyant density gradient centrifugation, capillary and rotating cylinder viscometry, circular dichroism, and intensity fluctuations. The Staff

258. Biochemistry Student Seminar. (½ course) Seminars are presented by graduate students on topics of current biochemical interest. S/U grades are used for this course. May be repeated for credit. The Staff in Biochemistry

259. Mechanisms in Regulation of Transcription. Lecture, three hours. Prerequisite: one of the following courses, M253 or M267, or consent of instructor. Prokaryotic operons; initiation and termination; DNA replication and repair; chromatin structure and related areas will be presented. S/U grades are used for this course. Mr. Mead

261. Advanced Chemistry and Biochemistry of Lipids. (½ course) (Formerly numbered Biological Chemistry 261 and same as Biological Chemistry M261.) Lecture, two hours. Prerequisites: Biological Chemistry 101A-101B or 201A-201B. Chemistry 157A-157B or equivalent. The synthesis and properties of lipids; chemical and physical properties of lipids. The Staff

262. Biological Energy Transductions. Prerequisite: course M253. Molecular basis of energy-transducing processes, including oxidative and photosynthetic phosphorylation, other energy-linked oxidative functions, membrane active transport, muscle contraction, and signal sensory functions. The Staff

264. Molecular Basis of Atherosclerosis. (½ course) (Same as Biological Chemistry M264 and Microbiology M264.) Lecture, two hours. Prerequisite: course M261 or equivalent with consent of instructor. The Staff

265. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

266. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

267. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

268. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

269. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

270. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

271. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

272. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

273. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

274. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

275. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

276. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

277. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

278. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

279. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

280. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

281. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

282. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

283. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

284. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

285. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

286. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

287. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

288. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

289. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

290. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

291. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

292. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

293. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

294. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

295. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

296. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

297. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

298. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

299. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff

300. Advanced Chemical Physics. Lecture, three hours. Prerequisites: Physics 81A-81B. The Staff
260. Seminar in Techniques for the Study of Gene Regulation. (½ course) Prerequisite: course 259 or consent of instructor. A seminar to discuss specific experimental approaches being taken in study of gene regulation. Emphasis will be on the specific biochemical techniques being used to study regulatory protein-DNA interactions in diverse biological model systems. Staff.

M267. Macromolecular Metabolism and Subcellular Organization. (1½ courses) (Same as Biological Chemistry M267) Lecture, two hours. Prerequisites: course 157A-157B or Biological Chemistry 101A-101B or 201A-201B or equivalent; Recommended: Biological Chemistry M253 or Chemistry M253. Metabolism of nucleic acids and proteins; biosynthesis of complex lipids and polysaccharides; structure and properties of cellular organelles. Mr. Zabin.

268. Biochemistry Research Seminar. (½ course) Seminars are presented by staff, outside speakers, postdoctoral fellows and graduate students on topics of current biochemical research interest. S/U grades are used for this course. May be repeated for credit. The Staff in Biochemistry M269. Developmental Biochemistry. (½ course) (Same as Biological Chemistry M269) Prerequisite: course M267 or consent of instructor. This course will deal with the biochemical aspects of development, specific tissue and cell function, and differential gene expression. The biochemistry of cell division, macromolecular synthesis, chromatin function in gene expression, cell-cell interactions, membrane organization, and growth will be studied as they contribute to such topics as hormone induction, morphogenesis and viral transformation. Emphasis will be placed on the use of differentiating in vivo systems and cell culture as models. Staff.

271A-271Z. Advanced Topics in Inorganic Chemistry. (½ to 1 course each) Lecture, two to four hours. Prerequisite: consent of instructor. Each course will encompass a recognized specialty in inorganic chemistry, and will be taught by a staff member whose research interests embrace that specialty. Staff.

275. Inorganic Chemistry: Reaction Mechanisms. Lecture and quiz, three hours. Prerequisites: courses 110A, 110B and 113A, or equivalent. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere anion complexes; substitution, isomerization and racemization reactions; stereochemistry; oxidation-reduction, free-radical, polymerization and photochemical reactions of inorganic species. An independent study project is required. Mr. Hawthorne.

276A. Inorganic Chemistry: Group Theory and Spectroscopy. Lecture, three hours; discussion, one hour. Prerequisites: courses 113A, 173 or equivalent. Group theoretical methods; molecular orbital theory; ligand field theory; electronic spectroscopy; vibrational spectroscopy. An independent study project is required. The Staff.

276B. Physical Methods for the Characterization of Inorganic Compounds. Lecture, three hours. Prerequisite: course 276A or consent of instructor. Applications of spectroscopic techniques including EPR, Raman, visible, UV, NMR, ESRI, and NQR to the elucidation of structure and bonding in inorganic and organometallic compounds. Mr. Stout (W).

278. Inorganic Chemistry Student Seminar. (½ course) Seminars are presented by staff, outside speakers, postdoctoral fellows and graduate students. S/U grades are used for this course. May be repeated for credit. The Staff.

Individual Study and Research

596. Directed Individual Study or Research. (½ to 4 courses) To be arranged with the member of the faculty who will direct the study or research. Graded on a S/U basis. May be repeated for credit. The Staff.

597. Preparation for the Doctoral Qualifying Examination or the Master's Comprehensive Examination. (½ to 1 course) Prerequisite: consent of the Chemistry graduate adviser. Graded on a S/U basis. The Staff.

598. Research for and Preparation of the Master's Thesis. (½ to 4 courses) Each member of the faculty supervises research of master's students and holds research group meetings, seminars, and discussions with the students that take his master's research course. The Staff.

599. Research for and Preparation of the Doctoral Dissertation. (½ to 4 courses) Each member of the faculty supervises research of doctoral students and holds research group meetings, seminars, and discussion with the students that take his doctoral research course. The Staff.

Classics

(2714 Bunche Hall)

Philip Levine, Ph.D., Professor of Classics.
Bengt T.M. Lofstedt, Ph.D., Professor of Mediaeval Latin.
Jaan Puhvel, Ph.D., Professor of Classics and Indo-European Studies.
Milton V. Anastos, Ph.D., Emeritus Professor of Byzantine Greek and History.
Paul A. Clement, Ph.D., Emeritus Professor of Classics and Classical Archaeology.
Herbert B. Hoffmeister, Ph.D., Emeritus Professor of Classics.
Albert H. Travis, Ph.D., Emeritus Professor of Classics.
Bernard Frischer, Ph.D., Associate Professor of Classics.
Steven Lattimore, Ph.D., Associate Professor of Classics and Classical Archaeology (Chairman of the Department).
Andrew Dyck, Ph.D., Assistant Professor of Classics.
Michael W. Haslam, Ph.D., Assistant Professor of Classics.
Katharine King, Ph.D., Assistant Professor of Classics.

Helen F. Caldwell, M.A., Senior Lecturer in Classics, Emeritus.
Barbara E. Killian, M.A., Lecturer in Classics.
Evelyn Venable Mohr, M.A., Lecturer in Classics, Emeritus.

The Master of Arts Degree

Admission Requirements. Requirements for admission to the M.A. programs are: a UCLA B.A. degree, or the equivalent, with a major in Classics (for the Classics M.A.), Greek (for the Greek M.A.), or Latin (for the Latin M.A.) with a grade point average of at least 3.0 in the major; a statement of purpose; three letters of recommendation, normally from previous instructors in the Classics; the Graduate Record Examination (while there is no minimum required score, the GRE is used as a criterion in uncertain cases, as well as to assess applications for teaching assistantships and other financial assistance from the Department). In cases of deficient preparation or doubtful equivalency to a UCLA B.A., the Department may grant provisional admission, requiring additional coursework or a written examination. Applicants for the Classics M.A. program who are deficient in Greek (or Latin) may be admitted to the Latin (or Greek) program, then permitted to transfer into the Classics program when the deficiencies have been removed. The Department of Classics uses the same application as Graduate Admissions, which may be obtained from the Department (7349 Bunche Hall) or Graduate Admissions (1247 Murphy Hall).

Advising. All students in the M.A. programs are supervised by the Graduate Adviser, a member of the regular departmental faculty; for 1951-1982, Ann L.T. Bergren, 7345 Bunche Hall. All students are required to consult the Graduate Adviser (or the Department Chairperson when the Graduate Adviser may be unavailable) at the beginning of each quarter to plan their programs, and as needed to discuss changes in programs, notify of plans for examinations, or consult about difficulties. At the end of each academic year, the Graduate Adviser conducts a review of all graduate students at a full departmental faculty meeting, with a graduate student representative present. The results of the review are recorded in the departmental minutes, and the substance of the evaluation of each individual student is communicated orally to that student by the Graduate Adviser at the beginning of the following quarter.

Major Fields or Subdisciplines. The Department of Classics offers M.A. degrees in Classics (Greek and Latin), Greek, and Latin.

Foreign Language Requirement. In addition to taking courses in Greek and/or Latin, the student must demonstrate proficiency in German, French, or Italian during the first year of study, either by passing German 5, French 5, or Italian 5 at UCLA (an equivalent course) with a minimum grade of C, or by examination. For German and French, the examination is the standard Educational Testing Service (ETS) reading examination, with a minimum score of 500; for Italian, a written translation examination is administered by the Department.

Course Requirements. For the Classics M.A., nine courses are required. These must include Greek 210 and Latin 210 (Advanced Prose Composition), one course apiece from the Greek 200A-B-C and Latin 200A-B-C series (History of Greek/Latin Literature), and one course in the 201-229 series in each language. The three remaining courses are to be chosen in consultation with the Graduate Adviser from the upper division and graduate courses offered by the UCLA Classics Department (or exceptionally by other UC departments or programs). Nine courses are required for the Greek and Latin M.A. degrees. For the Greek
M.A., these must include Greek 210, two courses from the Greek 200A-B-C series, one course from the Greek 201-229 series, three additional upper division or graduate Greek courses, and two additional upper division or graduate courses to be chosen in consultation with the Graduate Adviser. The Latin M.A. course requirements are identical except for the substitution of Latin for Greek courses.

**Thesis or Comprehensive Examination Plan.** The Department of Classics follows the Comprehensive Examination Plan for the M.A. degrees. Before presenting themselves for the examination, students are expected to complete the departmental reading lists in Greek and Latin authors (for the Greek M.A.), or Latin authors (for the Latin M.A.) and, where a choice is permitted, to indicate which works they have read. Copies of the reading lists are issued to new graduate students and available to graduate students and applicants at all times. Substitutions to works on the reading lists may be made with the approval of the Department’s regular faculty. The examinations consist of a 2-hour written examination on sight translations from Greek and Latin (Greek or Latin for the Greek or Latin M.A.); a 2-hour written examination on prepared passages from the Greek and Latin reading lists (Greek or Latin for the Greek or Latin M.A.); a 2-hour written examination on the history of Greek and Latin literature (Greek or Latin for the Greek or Latin M.A.). The three examinations may be taken on three separate days, which need not be during the same quarter. The M.A. examinations are normally given towards the end of each quarter, and students who intend to take examinations during that quarter are requested to notify the Graduate Adviser well in advance. The examination committee, consisting of two members of the Classics faculty, is appointed each quarter by the Graduate Adviser and normally sets and evaluates all graduate examinations during that quarter. The Graduate Adviser may also serve as a member of the committee, especially when the two members are unable to reach an agreement. Possible grades on the examinations are Pass with Distinction, Pass, or Fail. All failed examinations may be repeated once; in exceptional cases and with the approval of the departmental faculty, more than once.

**Time to Degree.** A full-time student (i.e., one taking at least two courses per quarter) is expected to finish the M.A. degree within six quarters. Students normally take only one course when serving as teaching assistants, and progress towards the degree is accordingly apt to be slower in proportion to the amount of teaching undertaken.

### 500 Series Course Limitations

Up to two 4-unit Greek or Latin 596 courses graded S/U may count towards the M.A. course requirements.

**Teaching Experience.** Teaching experience is not required for the M.A. degrees.

---

**Disqualification and Appeal of Disqualification.** Conditions which may lead to termination include failure to maintain a grade point average above 3.0, insufficient progress towards the degree, or failure of M.A. examinations. A student deemed deficient in any of these respects by the departmental faculty is notified by the Graduate Adviser that failure to improve or correct deficiencies during the following quarter will lead to termination. On being notified subsequently of termination, the student may petition to the departmental faculty for reconsideration and may similarly petition to retake an examination after failing it twice.

### The Ph.D. Degree

**Admission Requirements.** In addition to the M.A. degree (see below), the Department of Classics requires a statement of purpose; from students without a UCLA M.A., also three letters of recommendation, normally from previous instructors in the Classics, and the Graduate Record Examination (while there is no minimum required score, the GRE is used as a criterion in uncertain cases, as well as to assess applications for teaching assistantships and other financial assistance from the Department). The Department of Classics uses the same application form as Graduate Admissions, which may be obtained from the Department (7349 Bunche Hall) or Graduate Admissions (1247 Murphy Hall).

**Advising.** The Graduate Adviser is a member of the regular faculty of the Classics Department: for 1981-1982, Ann L.T. Bergren, 7345 Bunche Hall. All new students in the doctoral program are required, at the beginning of each quarter, to consult the Graduate Adviser, who assists in planning the program of study and guides the student towards the choice of an individual adviser as research interests dictate. After the Written Qualifying Examinations have been completed, the individual adviser takes responsibility for the guidance of the student, who must nevertheless continue to submit each quarter’s study list for the Graduate Adviser’s approval. The individual adviser is responsible for the establishment of the doctoral committee.

**Admission to the Doctoral Program.** A UCLA M.A. degree in Classics (Greek and Latin), Greek, or Latin, with distinction, or an equivalent degree is required. In cases of doubtful equivalency to the UCLA MA. degree, the Department may allow provisional admission and require the candidate to pass with distinction, during the first year of residence, a set of examinations identical with the M.A. comprehensive examinations which may normally be repeated once.

**Major Fields or Subdisciplines.** The UCLA Department of Classics offers the Ph.D. degree in Classics with the following areas of specialization: Classical Literature and Philology, Classical Linguistics, Ancient History, Ancient Philosophy, Classical Archaeology, Patristic and Byzantine Studies, Mediaeval Latin Studies.

**Foreign Language Requirement.** New students in the doctoral program will normally have demonstrated proficiency in French, German, or Italian as described in the requirements for the M.A. degree. During the first year of study in the Ph.D. program, the student is required to demonstrate proficiency in either French (Italian may be substituted with the permission of the regular departmental faculty) or German, whichever was not used to satisfy the M.A. requirement. If Italian was used to satisfy the M.A. requirement, German must be taken. For German and French, the examination is the standardized Educational Testing Service (ETS) reading examination, with a minimum score of 500; for Italian, a written translation examination is administered by the Department.

**Course Requirements.** At least one full year of graduate study (normally eight to nine courses) is required as preparation for the qualifying examination. The student may choose any of the areas of specialization listed above and, if entering with a UCLA M.A. in Classics or the equivalent, may take courses entirely within the areas of specialization; students specializing in Classical Literature and Philology may concentrate on Greek or Latin as their research interests dictate. Students entering with a UCLA Greek M.A. or the equivalent must take, in addition, Latin 210 (Advanced Prose Composition), one course from the Latin 200A-B-C series (History of Latin Literature), and one course from the Latin 201-229 series if they have not previously taken these courses; students entering with a UCLA Latin M.A. or the equivalent must satisfy identical course requirements in Greek.

**Written and Oral Qualifying Examinations.** Before presenting themselves for the Qualifying Examinations, students must complete the departmental Ph.D., reading list in either Greek or Latin authors, which is additional to the M.A. reading lists and varies somewhat according to the area of specialization (e.g., the Latin reading list for specialists in Mediaeval Latin substitutes certain Mediaeval Latin for certain Classical Greek authors). In addition, students entering with the Greek M.A. must complete the Latin M.A. reading list, and students entering with the Latin M.A. must complete the Greek M.A. reading list. Students are advanced to candidacy as a result of successfully taking the Qualifying Examinations, which consist of: a 3-hour written translation examination on Greek or Latin passages partly from the reading list and partly at sight; for students with the Greek or Latin M.A. only, a similar additional 3-hour
examination on the Latin or Greek reading list; a 3-hour written examination on the area of specialization, with special emphasis on the student's research interests within that area; an oral examination covering both the area of specialization, with some emphasis on the student's proposed dissertation topic, and the general field of Classical studies. The oral examination is administered by the doctoral committee under the supervision of the student's individual adviser. Each examination may normally be repeated once.

**Doctoral Committee.** The Department of Classics imposes no conditions additional to those of the Graduate Council.

**Time to Degree.** A full-time student with no deficiencies on admission to graduate status might be expected to complete the Ph.D. degree within nine quarters after entry into the doctoral program. Students normally take only one course when serving as teaching assistants, and time to degree is thus longer in proportion to the amount of teaching undertaken.

**Final Oral Examination.** An oral defense of the dissertation, which is written under the supervision of the individual adviser and must contribute significantly to research on the subject, may be required or waived at the discretion of the doctoral committee.

**Candidate in Philosophy Degree.** Students receive the C.Phil degree on advancement to candidacy for the Ph.D. degree.

**Teaching Experience.** Teaching experience is not required for the Ph.D. degree.

**Disqualification and Appeal of Disqualification.** Conditions which may lead to termination include failure to maintain a grade point average above 3.0, insufficient progress towards the degree, or failure of Qualifying Examinations. A student deemed deficient in any of these respects by the departmental faculty is notified by the Graduate Adviser that failure to improve or correct deficiencies during the following quarter will lead to termination. On being notified subsequently of termination, the student may petition to the departmental faculty for reconsideration and may similarly petition to retake an examination after failing it twice.

**Classics**

**Graduate Courses**

**200. History of Classical Scholarship.** Mr. Dyck  
230A-230B. Language In Ancient Asia Minor. Prerequisite: consent of instructor. Survey of the language situation in Anatolia in the second and first millennia B.C. Readings in Hittite, Luwian, Hurro-Urartian, Cuneiform, and Lydian texts. Anatolian-Greek relationships and survivals in Classical and Hellenistic times. Mr. Puhvel  
240. Etrusco-Greek. Prerequisite: consent of instructor. A survey of scholarly research on Etruscan language and culture, with analysis of epigraphical material. Mr. Puhvel  
245. Greek and Latin Meter. Prerequisite: consent of instructor. A comprehensive study of meter as it functions in classical poetry. Mr. Haslam

**251A. Seminar in Classical Archaeology. The Aegean Bronze Age.** The Staff  
251B. Seminar in Classical Archaeology. Greek and Roman architecture. Mr. Lattimore  
251C. Seminar in Classical Archaeology. Graeco-Roman sculpture. Mr. Lattimore  
251D. Seminar in Classical Archaeology. Graeco-Roman painting. Mr. Lattimore  
252. Topography and Monuments of Athens. Detailed studies in the topography and monuments of Athens combining the evidence of literature, inscriptions, and ancient remains. Mr. Lattimore  
253. Topography and Monuments of Rome. Detailed studies in the topography and monuments of ancient Rome combining the evidence of literature, inscriptions, and actual remains. Mr. Frischer, Mr. Lattimore  
260. Seminar in Roman Religion. Prerequisite: consent of instructor. The Staff  
268. Seminar in Comparative Mythology. Prerequisite: course 168 and consent of instructor. Advanced study of selected topics in comparing Greek and Roman traditions with other ancient Near Eastern and European societies. Mr. Puhvel  
271. Computer Techniques in Classical Studies. Survey of computer techniques in the study of the ancient world with emphasis on Greek and Latin literary texts. Students will learn enough computer programming to work on a project of their own during the course. The Staff  
287. Graduate Colloquium in Classical Literature. Reading, research and discussion of selected topics from Greek and Roman literature. May be repeated for credit. The Staff

**Individual Study and Research**

596. Directed Individual Study or Research. (½ to 2 courses) The Staff

597. Study for the M.A. Comprehensive Examination or the Ph.D. Qualifying Examination. (½ to 2 courses) The Staff

599. Research for the Doctoral Dissertation. (½ to 2 courses) The Staff

**Greek**

**Graduate Courses**

The 200-series courses which are designated A and B (e.g., 201A-201B) are double courses. Course A is a preseminar and is normally prerequisite to course B, a seminar.

**200A-200B. History of Greek Language.** Prerequisite: consent of instructor. Lectures on the history of Greek literature, supplemented on the part of the student by the independent reading of Greek texts in the original. Ms. Bergren, Mr. Haslam, Ms. King  
201A-201B. Homer: The Iliad. Ms. Bergren, Mr. Haslam, Ms. King  
202A-202B. Homer: The Odyssey and the Epic Cycle. Ms. Bergren, Mr. Haslam, Ms. King  
203. Hesiod. Ms. Bergren, Mr. Frischer  
204. Homeric Hymns. Ms. Bergren  
205. Seminar in Aeschylus. Ms. Bergren  
206A-206B. Sophocles. Ms. Bergren, Mr. Haslam, Ms. Lattimore  
207A-207B. Euripides. Mr. Frischer, Mr. Haslam, Ms. King  
208A-208B. Aristophanes. Ms. Bergren  
209. Seminar in Hellenistic Poetry. Mr. Frischer  
210. Advanced Greek Prose Composition. Prerequisite: course 110 or the equivalent. Mr. Haslam

**211A-211B. Herodotus.** Ms. Bergren  
212A-212B. Thucydides. Ms. Bergren, Mr. Haslam, Mr. Lattimore  
213. Seminar in Greek Historiography. The Staff  
214. Demosthenes. Mr. Dyck  
216. Menander. Prerequisite: a reading knowledge of Classical Greek is required. Mr. Frischer  
217. Pindar. Prerequisite: consent of instructor. A detailed study of Pindaric texts, with attention to Pindar's place in the development of Greek choral lyric in addition to his characteristics as a thinker and artist. Ms. Bergren, Mr. Haslam  
220. Seminar in the Greek Novel. A study of the Greek romance and its place in Greek literature. Two texts will be studied in some detail: Chariton: Cheares and Callirhoe and Longus: Daphnis and Chloe. The Staff

**221. Seminar in the Presocratic Philosophers.** Mr. Frischer

222A-222B. Plato. Ms. Bergren  
223A-223B. Aristotle. Mr. Dyck, Mr. Frischer  
224. Seminar in Post-Aristotelian Philosophy. Mr. Frischer

230A. New Testament Greek. The Greek New Testament, as a work of Greek literature, with special emphasis on the information it gives about the culture on the whole, and the language in particular, of the society to which it was produced. The Staff  
231A-231B-231C. Seminar in Later Greek and Byzantine Literature. Prerequisite: consent of instructor. Studies in various aspects of Byzantine Greek language and literature; subject treated varies from year to year; course need not be taken in A-B-C sequence and may be repeated for credit with content changed. Mr. Dyck

233. Byzantine Poetry. A study of the main representatives of both religious and secular poetry. Mr. Dyck

240A-240B. History of the Greek Language. Prerequisite: consent of instructor. 240A covers the linguistic history of Classical Greek. In 240B Post-Classical, Mediaeval, and Modern Greek are discussed. Mr. Dyck

241. Greek Epigraphy. A survey of Greek historical inscriptions, chiefly Attic. Mr. Dyck

242. Greek Dialects and Historical Grammar. Prerequisite: consent of instructor. The linguistic situation in early Greece. Readings in Classical Greek dialectal texts. Greek grammar in the context of common Greek and Indo-European linguistics. Mr. Puhvel

243. Mycenaean Greek. Prerequisite: consent of instructor. Script, language, and grammar of the Linear B inscriptions; their relevance to Ancient Greek linguistic and cultural history. Mr. Puhvel

244. Greek Papyrology. Prerequisite: consent of instructor (some reading knowledge of Greek required). An introduction to Greek papyri, considered both as historical documents and as carriers of literature. Mr. Haslam

245. Greek Palaeography. Studies in the development of the book hand in Greek manuscripts earlier than the invention of printing. The Staff

**Individual Study and Research**

596. Directed Individual Study or Research. (½ to 2 courses) The Staff

597. Study for the M.A. Comprehensive Examination or the Ph.D. Qualifying Examination. (½ to 2 courses) The Staff

599. Research for the Doctoral Dissertation. (½ to 2 courses) The Staff

Graduate Courses

The 200-series courses which are designated A and B (e.g., 203A and 203B) are double courses. Course A is a preseminar and is normally prerequisite to course B, a seminar.

200A-200B-200C. History of Latin Literature. Prerequisite: consent of instructor. Lectures on the history of Latin literature, supplemented on the part of the student by the independent reading of Latin texts in the original. Mr. Frischer, Mr. Levine

201. Seminar in the Roman Epic: Ennius to Silius Italicus. The fragments of Ennius and selected readings from the minor epic poets (Lucan, Valerius Flaccus, Statius, Silius Italicus). Ms. Bergren

202. Seminar in Catullus. A detailed consideration of the entire Catullian corpus. Ms. Bergren, Mr. Levine

203A. Eliogiac Poetry. Mr. Frischer, Mr. Levine

203B. Proprietius. Mr. Levine

204A-204B. Vergil's Aeneid. Mr. Haslam, Ms. King

205. Seminar in Vergil's Bucolics. Mr. Frischer

206. Horace. Mr. Frischer

207. Roman Comedy. Prerequisite: consent of instructor. Survey of the history of Roman Comedy. Reading of one comedy by Plautus or Terence with interest centered on language and meter. Ms. Bergren, Mr. Løfstedt

208. Ovid. Prerequisite: a reading knowledge of Classical Latin is required. A detailed study of the poetic works of Ovid: readings in the original with discussion of the secondary literature and scholarship. The course may be repeated for credit as the content varies. Ms. Bergren

209. Seminar in Roman Satire. A detailed study of an individual satirist with attention to his position in the development of the satirical genre in Roman literature. The choice of author may vary from year to year. Close study of the text, of the characteristics of the writer as a social critic and artist, and of the contemporary literary and social environment. Ms. Bergren, Mr. Løfstedt

210. Advanced Latin Prose Composition. Prerequisite: course 110 or the equivalent. Mr. Levine

211A-211B-211C. Seminar in the Roman Historians. A study of considerable portions of the writings of:

211A. Sallust. The Staff

211B. Livy. Mr. Frischer

211C. Tacitus. Mr. Frischer

215. Seminar in the Roman Novel. (Formerly numbered 224.) Works such as Petronius' Satyricon and Apuleius Metamorphoses: a study of the literary problems. The course may be repeated for credit as the content varies. Ms. Bergren

220A. Cicero's Rhetorical Works. Mr. Dyck

220B. Cicero's Orations. Mr. Dyck

221A. Cicero's Philosophical Works. Mr. Dyck, Mr. Levine

221B. Cicero: De Natura Deorum. Mr. Dyck, Mr. Frischer, Mr. Levine

222. Seminar in Roman Stoicism. Prerequisite: a reading knowledge of Greek and Latin. Mr. Dyck, Mr. Frischer

223. Lucretius. Mr. Frischer

225. Lucan. A detailed study of Lucan, Bellum Civille: readings in the original, discussion and reports on important literary and historical aspects. The Staff

231A-231B. Seminar in Medieval Latin. Prerequisite: at least one upper division course in Latin or consent of instructor. Studies in various areas of the language and literature of Medieval Latin. With instructor's permission, may be repeated for credit. Mr. Løfstedt

232. Vulgar Latin. Prerequisite: consent of instructor. History and characteristics of popular Latin; its development into the early forms of the Romance languages. Mr. Løfstedt

240. History of the Latin Language. Prerequisite: consent of instructor. The development of Latin from the earliest monuments until its emergence in the Romance languages. Mr. Løfstedt

242. Italic Dialects and Latin Historical Grammar. Prerequisite: consent of instructor. The linguistic situation in early Italy. Readings in Osco, Umbrian, and early Latin texts. Latin grammar in the context of Italic and Indo-European linguistics. Mr. Puhvel

243. Seminar in Latin Palaeography. Studies in the development of the book hand in Latin manuscripts earlier than the invention of printing. Mr. Levine

Professional Courses in Method

370. The Teaching of Latin. Prerequisite: Graduate Standing or consent of instructor. Techniques for teaching; organization of courses; review of the content of the curriculum offered in junior and senior high schools.

459. College Teaching of Latin. (½ course) Prerequisite: current service as a teaching assistant and consent of instructor. Methodology of instruction, in conjunction with classroom practice. The Staff

Individual Study and Research

456. Directed Individual Study or Research. (1 to 2 courses) The Staff

457. Study for the M.A. Comprehensive Examination or the Ph.D. Qualifying Examination. (1 to 2 courses) The Staff

459. Research for the Doctoral Dissertation. (1 to 2 courses) The Staff

Related Courses in Other Departments

Art 103A. Greek Art.

Comparative Literature (Interdepartmental)

Arnold J. Bard, Ph.D., Professor of Hebrew and Comparative Literature.

Pier-Maria Pasinetti, Ph.D., Professor of Italian and Comparative Literature.

Ross P. Shideker, Ph.D., Professor of Scandinavian Languages and Comparative Literature. (Chairman of the Program)

Katherine C. King, Ph.D., Assistant Professor of Classics and Comparative Literature.

Kathleen L. Komar, Ph.D., Assistant Professor of German and Comparative Literature.

Ehrhard Bahr, Ph.D., Professor of German.

Amin Banani, Ph.D., Professor of Persian and History.

Marc Benaimon, Ph.D., Professor of French.

Marga Cottino-Jones, Ph.D., Professor of Italian.

Eric Gans, Ph.D., Professor of French.

Kenneth Harper, Ph.D., Professor of Slavics.

Claude L. Hulet, Ph.D., Professor of Spanish and Portuguese.

Carroll B. Johnson, Ph.D., Professor of Spanish.

Murray Krieger, Ph.D., University Professor of English.

Richard A. Lanham, Ph.D., Professor of English.

Richard D. Lehan, Ph.D., Professor of English.

Vladimir Markov, Ph.D., Professor of Slavics.

Blake R. Nevius, Ph.D., Professor of English.

Maximillian E. Novak, D. Phil., Ph.D., Professor of English.

Ben Befu, Ph.D., Associate Professor of Oriental Languages.

Albert Braunmuller, Ph.D., Associate Professor of English.

Frederick L. Burwick, Ph.D., Associate Professor of English.

Michael Heim, Ph.D., Associate Professor of Slavics.

Albert D. Hutter, Ph.D., Associate Professor of English.

Gerardo Luzuriaga, Ph.D., Associate Professor of Spanish.

Robert M. Maniquis, Ph.D., Associate Professor of English.

Stephen D. Werner, Associate Professor of French.

Stephen I. Yenser, Ph.D., Professor of English.

Shuhsi Kao, Ph.D., Assistant Professor of English.

Romey T. Keys, Ph.D., Assistant Professor of English.

The Master of Arts Degree

Admission Requirements. For entrance into the program, a B.A. in literature, ancient or modern, is a prerequisite. Students not having a literature major in their B.A. program will be required to demonstrate the equivalent knowledge and comprehension of one literature before being considered a graduate student in good standing. Applicants are expected to have at least a 3.4 grade point average in upper division literature courses. All applicants for admission must take the Graduate Record Examination. Three letters of recommendation are required. Applicants should have literary proficiency in one foreign language and at least an elementary knowledge of a second.
Advising. Graduate advisers are: Professor Arnold J. Band, Professor Katherine C. King, Professor Kathleen L. Komar, and Professor Ross P. Shideler. They can be contacted at the Comparative Literature Program office, 334 Royce Hall.

Students are assigned advisers for their first year, then changes are made to suit the student's program of study. Students' records are reviewed on a regular basis by the core committee of the Comparative Literature Program. Any student falling below a 3.4 grade point average is sent a warning by the Chairperson and may be placed on probation.

Students should meet at least quarterly with their advisers. Records are kept of these meetings.

Areas of Study for the M.A Degree. The student's study plan should combine the work in the major and minor literatures by focusing on a limited area in which these literatures may be fruitfully explored. The area may be a literary period (e.g., Romanticism), a genre (e.g., the novel), or a theoretical problem.

The major literature is the area of the student's primary concentration. He/she specializes in one historically defined period (e.g., Medieval, Renaissance and Baroque, Neo-classicism and 18th century, Romanticism to Modern), but a general knowledge of the major literature is a prerequisite for the specialization.

In the minor literature, the student focuses on a period comparable to the area of specialization in the major literature. However, it is assumed that the student may not have as much historical depth and breadth in the minor literature as in the major.

Foreign Language Requirements. Literary proficiency in the major and minor literatures is an essential prerequisite for courses and degrees in Comparative Literature. Students are expected to be able to take graduate classes conducted in the languages of their specialization. The candidate should also be able to speak the major foreign language adequately and read literary texts in that language with "literary proficiency," i.e., with sensitivity to stylistic nuances.

Before completion of the M.A., the student must demonstrate a knowledge of two foreign languages. Proficiency in one of these languages must be certified by completion of two or more upper division and/or graduate literature courses in the appropriate language department. (Students must prove more than elementary language competency in order to enter upper division and graduate literature courses at UCLA.) The second foreign language requirement may be completed either by completion of two years of language classes, by one upper division literature class, or by passing the Educational Testing Service foreign language examinations administered by the Graduate Division. Translation examinations may be administered by departmental members in languages for which no ETS examination is available.

Course Requirements. Candidates for the M.A. degree specialize in two literatures in which they take a total of eight courses; five are taken in the major literature and three in the minor. Four additional courses are taken from those designated as Comparative Literature courses. The following 12 courses are the minimal course requirements. Some students will take extra courses to make up deficiencies.

1. Four courses in Comparative Literature
   a. Comparative Literature 200—Methodology; theory of literature, bibliography, etc.
   b. One of the following courses: Comparative Literature 201, 202, or 204.
   c. The comparative study of one genre, e.g., the novel, the epic, the lyric, the drama.
   d. The comparative study of one period or movement, e.g., Baroque, Romanticism.

2. Five courses (a minimum of three must be graduate courses; the other two, upper division) in the student's major literature. The departmental course in the history of the language of that particular literature may be included.

3. Three courses, either graduate or upper division, in the student's minor literature. The student should be directed to study periods, genres, or problems in the minor literature which lend themselves to comparison with similar elements in his/her major literature.

Of the above required courses, 12 units at most may be 500 series courses. The M.A. degree normally takes seven quarters to complete.

Examination Plan. The examination for the M.A. is both written and oral, testing both historical knowledge and comprehension of methodology. The results of this examination determine the student's ability to continue toward the Ph.D. degree in Comparative Literature. There are three possible results of the examination: a student may receive a M.A. degree and be allowed to progress toward the Ph.D., may be granted a terminal M.A., or may fail the examination altogether. The Program allows a maximum of two attempts to pass the M.A. examinations.

The written examinations test the student's skill in literary analysis and his/her detailed knowledge of specified works in the major and minor literatures. The examinations are based on reading lists from the works of at least 10 to 15 authors in the major literature and the works of at least five authors in the minor literature. Normally, the student's reading list consists of approximately 24 to 30 works in the major literature and 12 to 15 works in the minor literature.

The reading list for the major literature should contain both prose and poetry, although one of these may be emphasized. In addition, the list must include representative texts outside the period of specialization. For example, students specializing in the 19th and 20th century novel should have novels from the 17th and 18th centuries on their reading lists.

The reading list for the minor literature is focused almost entirely on the student's period of specialization.

All reading lists must be approved by the Chairperson of the student's M.A. committee as well as by the Program Chairperson or Graduate Adviser approximately one quarter before the student intends to be examined. Copies of the final reading lists must be submitted to the administrative assistant in the Comparative Literature office. Sample reading lists are available in the Comparative Literature office.

The examination committee for the M.A. is composed of three or four faculty members from the departments of the major and minor literature and the Comparative Literature Program. Students may suggest to the Chairperson or Graduate Adviser, faculty members whom they wish to be on the M.A. committee, although selection cannot be guaranteed on this basis alone. It is strongly recommended that students take at least one course from each member of their committee.

Time to Degree. It is recommended that the candidate complete the M.A. in seven quarters.

500 Series Course Limitations. 12 units at most may be 500 series courses. 596 and 597 courses given with S/U grades may be offered. Only one of these courses may be counted toward the 5-graduate-course requirement.

Teaching Experience. Teaching experience is not required for the degree.

Disqualification and Appeal of Disqualification. Students may be disqualified on the basis of falling below a 3.4 grade point average two quarters in a row. Failure to progress toward the degree at a rate of five courses per year or failure to pass either the written or the oral examinations may lead to disqualification.

Students may appeal disqualification by filing a written appeal with the Program Chairperson. The Chairperson will appoint a committee which may include the Chairperson, to review the student's disqualification and, if necessary, meet with the student. On the basis of that committee's report, the Chairperson will make a final decision and report it to the Graduate Division.

The Ph.D. Degree

Admission Requirements. For entrance into the Ph.D. program, an M.A. degree in Comparative Literature is normally required. Students with an M.A. degree in one national literature, extensive knowledge of a second, and the ability to read literary texts in a third lan-
guage may be considered for admission. Applicants should submit three letters of recommendation. Students entering with any degree other than an M.A. in Comparative Literature from UCLA are required to pass a Permission to Proceed Examination before being allowed to continue toward the Ph.D. degree. This examination establishes that the applicant is at the same level of graduate work in the major and minor literatures as a holder of the Program's M.A. degree. The examination is conducted along lines similar to the M.A. examination described above. It should be taken within the first year of residence.

Advising. Graduate advisers are: Professor Arnold J. Band, Professor Katherine C. King, Professor Kathleen L. Komar, and Professor Ross P. Shideler. They can be contacted at the Comparative Literature Program office, 334 Royce Hall, UCLA.

Students are assigned advisers for their first year; thereafter, changes may be made to suit the student's program of study. Students' records are reviewed on a regular basis by the core committee of the Comparative Literature Program. Any student falling below a 3.4 grade point average is sent a warning by the Chairperson and may be placed on probation.

Students should meet at least quarterly with their advisers.

Major Fields or Subdisciplines. The student's study plan for the Ph.D. should combine the work in the major and minor literatures by focusing on a limited area in which these literatures may be fruitfully explored. This area may be a literary period (e.g., the late Middle Ages, the 16th century, or the Romantic Age) or a particular aspect common to all three literatures (e.g., a genre like tragedy or the novel, or a phenomenon like neoclassicism or the baroque). It may also be a critical or theoretical problem, involving analyses of styles or modes of interpretation; comparisons of classical and modern genres and themes; questions about the artistic process in different art forms; or problems in literary aesthetics or epistemology.

Foreign Language Requirements. The candidate must have literary proficiency in at least two foreign languages before taking the qualifying examination. A reading knowledge of a third foreign language is strongly recommended. Two of the three languages offered for the Ph.D. must be from different language groups, i.e. Romance and Germanic, English and Slavic, etc. If the student intends to offer three literatures written in foreign languages for his/her Ph.D. degree, he/she is expected to have literary proficiency in the three pertinent foreign languages. A classical language is usually necessary for anyone majoring in a period prior to the 19th century. The language requirements for the Ph.D. degree are to be fulfilled in the same way as those for the M.A. degree.

Course Requirements. Though no specific courses are normally required after the M.A., entering students who have not received the M.A. in the UCLA Comparative Literature Program or its equivalent, shall be required to take courses in those areas in which they are deficient. The areas of deficiency will be identified in consultation with the Graduate Adviser. In general, all students are urged to take a number of courses to gain the depth in the major and two minor literatures necessary for their professional preparation. In the second minor, a combination of three upper division and graduate courses is usually required. Students entering Comparative Literature with an M.A. in a single literature are generally required to take the four Comparative Literature courses required for the M.A.

Doctoral Committee. The examination committee for the Ph.D. is usually composed of five faculty members from the departments of the major and minor literatures and the Comparative Literature Program (three of the five members are normally associated with the Program). Students are strongly advised to begin choosing possible members of their committee and working with these faculty members from their entrance into the Program.

Written and Oral Qualifying Examinations. The examinations are both written and oral and may be taken over a period of two to three quarters. The written examinations are based on reading lists for the major and two minor literatures. The reading list for the major should include texts from the earliest works in the literature through the 20th century. As long as historical depth is demonstrated, the list may emphasize a genre and specific periods. The period of specialization may account for up to half the items on the list. A normal reading list consists of approximately 50 to 60 primary works or items (an item is equivalent to a novel or long play). The reading list for each minor literature focuses on the period of specialization and consists of approximately 25 to 30 primary works. (Works from the M.A. lists may be included but it is assumed that relevant critical texts will be part of the student's knowledge pertaining to those texts). Examples of reading lists are on file in the Program office.

The written examination for the major is divided into two parts, one designed to demonstrate broad historical knowledge, the other to demonstrate a more specific knowledge of the student's special period or problem. Usually two examinations of three to four hours each are taken in the major literature; a three to four hour written examination is taken in each of the minor literatures.

The oral examination covers three areas:

1. Competence as determined by the reading lists and the written examinations in the major and minor literatures.

2. Both a familiarity with major critical texts pertaining to the reading lists and competence in general literary theory.

3. The proposed dissertation topic based on the prospectus. (A 5 to 10 page prospectus must be submitted to members of the committee in preparation for the oral examination).

The Program allows a maximum of two attempts to pass the Ph.D. examinations.

Time to Degree. Ph.D. candidates usually take their qualifying examinations six to nine quarters after the M.A., although it is possible to take the examinations as soon as the candidate's doctoral committee feels that he/she is adequately prepared. The doctoral dissertation usually requires an additional three quarters. Normative time-to-degree from admission to graduate status to award of the degree is 18 quarters (six years).

Final Oral Examination. No final oral examination is required after the filing of the dissertation.

Candidate in Philosophy Degree. Students are eligible to receive the C. Phil degree on advancement to candidacy for the Ph.D.

Teaching Experience. Teaching experience is not required but is highly recommended for the Ph.D.

Disqualification and Appeal of Disqualification. Students may be disqualified on the basis of falling below a 3.4 grade point average two quarters in a row. Failure to progress toward the degree at a rate of five courses per year or failure to pass either the written or the oral examinations may lead to disqualification.

Students may appeal disqualification by filing a written appeal with the Program Chairperson. The Chairperson will appoint a committee, which may include the Chairperson as a member of the committee, to review the student's disqualification and, if necessary, meet with the student. On the basis of the committee's report, the Chairperson will make a final decision and report it to the Graduate Division.

The Dissertation. The doctoral dissertation must demonstrate original critical work in the field. Although a topic comparing literatures is commonly undertaken, Comparative Literature students may write a dissertation on a single subject in a single field provided that their wide range of knowledge is demonstrated by the quality of the work. The dissertation usually runs between 180 to 250 pages. Precise details concerning preparation and filing of the dissertation should be obtained from the Graduate Division, Student and Academic Affairs Section.

Candidates should regularly submit sections of their dissertation to the three reading members of the doctoral committee. All three members must certify approval of the dissertation.
Graduate Courses

200. The Methodology of Comparative Literature. Prerequisite: consent of instructor. A study of both the methodology of comparative literature and the theory of literature. The Staff

201. Contemporary Theories of Criticism. Prerequisite: 200 or its equivalent. An introductory course in the theory of literature focusing upon structuralist, psychoanalytic, and Marxist approaches. The Staff

202. Problems in the Theory of Literature. Prerequisite: 201 or its equivalent. A study of specific topics in the theory of literature for advanced students in criticism and literary theory. May be repeated for credit. The Staff

203. Problems of the Sign in Literature. A seminar that inquires into the theoretical bases and implications of the sign as metaphorical, logical and grammatical categories. Many texts central to Western thinking dwell on the sign as a concept-tool in order to focus on the relationship between words and things, language and reality, the linguistic medium in its meaning-producing functions. Excerpts from Plato, Aristotle, Augustine, Locke, Vico and Hegel lead to a discussion of the "codes" (environmental ecology) and "recode" (metaphors) and propounded by contemporary theorists such as Barthes, Hjelmslev and Greimas. Ms. Kao

204. Psychoanalytic Approaches to Literature. Prerequisite: course 200 or the equivalent criticism course in English. A study of the development of modern psychoanalytic approaches to literature, with particular stress on affective theories of criticism. Readings will include Freud and the early psychoanalytic critics, contemporary psychoanalytic critics of literature, and modern British and American psychoanalytic theorists (Winnicott, Schaffer) whose work is applicable to literary theory. Mr. Hutter

205. The Comic Spirit. Prerequisite: reading knowledge of one appropriate foreign language. May be concurrently scheduled with Humanities C107. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate the varieties of comic interaction, the demonic vision, and the satirical. Excerpts from Plato, Aristotle, Augustine, Locke, Vico and Hegel lead to a discussion of the "codes" (environmental ecology) and "recode" (metaphors) and propounded by contemporary theorists such as Barthes, Hjelmslev and Greimas. The Staff

211. The Classical Tradition: Tragedy. Prerequisite: knowledge of one appropriate foreign language, usually Greek or Latin. Students seeking to be concurrently scheduled with Humanities C111. Analysis of selected Greek dramas and their recreations in Rome, in the Renaissance, and in the modern period. Graduate students will be required to prepare papers based on texts read in the original language and will meet as a group an additional hour each week. Ms. King

221. The Lyric: Classical to Modern. Prerequisite: some knowledge of either Latin or Greek. An examination of the genres and conventions of Greek and Roman lyric poetry and their influence on subsequent European poetry. The Staff

229. Archetypal Heroes in Literature. Prerequisite: reading knowledge of one appropriate foreign language. May be concurrently scheduled with Humanities C129. Survey and analysis of the function and appearance of such archetypal heroes as Christ, Ulysses, Prometheus and Oedipus in literature from antiquity to the modern period. Graduate students will be required to prepare papers based on texts read in the original language and will meet as a group an additional hour per week. The Staff

230. Translation Workshop. Prerequisite: a solid reading knowledge of at least one foreign language and consent of instructor. The theory and practice of literary translation. Analyses of significant theoretical contributions to the field, interrelation of translation in context with the teachings of modern literary theory. The Staff

240. Medieval Epics. Prerequisite: reading knowledge of one appropriate foreign language. May be concurrently scheduled with Humanities C140. The seminar will consider five medieval epics: Beowulf, El Cid, Iliad, Aeneid, and Njalssaga. There will be two objectives: to gain critical understanding of each work, and second, an understanding of the nature of epic literature. Assignments will consist of an extended seminar paper and short oral reports. Graduate students will be required to prepare papers based on texts read in the original language. Mr. Condren

245. Renaissance Drama. Prerequisite: reading knowledge of one appropriate foreign language. May be concurrently scheduled with Humanities C145. The course offers a broad introduction to the subject matter and types of plays in the Renaissance. Historical and literary influences on the plays will be considered. Readings will include works of such dramatists as Tasso, Machiaveli, Lope de Vega, Racine, Johnson, Shakespeare. Graduate students will be required to prepare papers based on texts read in the original language and will meet as a group one additional hour per week. Mr. Hutter

260. Literature and the Other Arts. Prerequisites: upper division standing and literature major. Reading knowledge of French, Spanish, Italian or German for graduate students. (May be concurrently scheduled with Humanities C160.) A comparative study of literature and the visual and verbal arts of the Romantic period: will consider the relationship of literature to the visual arts, music, and dance. Graduate students will be required to prepare papers based on texts read in the original language. These students may meet as a group an additional hour each week. Ms. King

269. The Crisis of Consciousness in Modern Literature. Prerequisite: reading knowledge of one appropriate foreign language. (May be concurrently scheduled with Humanities C109.) Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of the artist and his society, focusing on the works of Kafka, Rilke, Woolf, Sarret, and Stevens. Graduate students will be required to prepare papers based on texts read in the original language. These students will meet as a group an additional hour each week. Ms. Komar

271. Dramatic Theory and Criticism in German and English Romanticism. Prerequisite: a reading knowledge of German. This seminar examines the generic conception of drama in the critical essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quinci, and Hazlitt. It gives particular attention to the role of the actor and the idea of dramatic action as discussed by the critics. Mr. Burwick

*For concurrently scheduled courses C ("prefix") suitable separate activities and/or standards for performance and evaluation will be applied for graduates and undergraduates.

C270. The Search for Organic Forms. Prerequisite: reading knowledge of French or German. A seminar devoted to theories of the "organic" in the eighteenth and nineteenth centuries, with special emphasis on Rousseau and Goethe. A large part of the course will be given to studies of the transition made between theories of nature and theories of state. Mr. Burwick

C275. The Nineteenth Century Novel. Prerequisite: reading knowledge of French or German. (May be concurrently scheduled with Humanities C175.) A comparative study of the 19th century novel in England and on the continent. Novels will be selected so as to allow the seminar to concentrate on a particular tradition or critical problem. Mr. Lehnert

C277. The Symbolist Tradition in Poetry. Prerequisite: reading knowledge of either French or German. (May be concurrently scheduled with Humanities C176.) A study of the symbolist tradition in English, French and German poetry. Graduate students will be required to prepare papers based on texts read in the original languages and may be required to meet as a group an additional hour each week. Mr. Shidler

C280. Poetry and Poetics of the Post-Symbolist Period. Prerequisite: reading knowledge of either French or German. (May be concurrently scheduled with Humanities C180.) A study of some of the dominant poetic trends and figures in American and European poetry in the first half of the 20th century, including such surrealists as G. Apollinaire and A. Breton, imagists, and major individual poets such as E. Pound, T.S. Eliot, Paul Valery, R.M. Rilke, Stefan George, Rilke. Students will be required to prepare papers based on texts read in the original language and may be required to meet as a group one additional hour per week. Mr. Shidler, Ms. Komar

C297. The Mystery Novel. Prerequisite: reading knowledge of French. (May be concurrently scheduled with Humanities C117.) A study of mystery and detective fiction in England, France, and the United States. The origin, form and historical significance of mystery fiction will be analyzed through close readings of selected works. Graduate students will be required to participate in a special discussion section and to prepare papers based on texts read in the original languages. Mr. Hutter
The Master of Arts Degree

Admission Requirements. A baccalaureate degree with an undergraduate major in dance or equivalent experience.

As part of the admissions process to the Department of Dance, each candidate is required to attend interviews and auditions. These take place at UCLA and in New York. Foreign students will be given special consideration and may submit 8 or 16mm films or videotape to substitute for the audition.

Three letters of recommendation are required. Prospective students may write to the Department of Dance, WG 205, University of California, Los Angeles, California 90024, for departmental brochures which give additional information on the graduate program. The Department has one additional application form in addition to those used by Graduate Admissions. (see below).

Advising. Address: Chairperson, Department of Dance, WG 205, University of California, Los Angeles, California 90024. For information regarding admission requirements and approved programs of study, prospective students may consult the Chairperson of the Department of Dance. At the time of admission, students are assigned an academic adviser within their selected specialization. Professor Marion Scott now serves as adviser in Performance/Choreography, Professor Emma Lewis Thomas in Education, Professor Erma Alperson in Dance Therapy, and Professor Allegra Fuller Snyder in Dance Ethnology.

These advisers may be changed if the student's focus of interest alters while within the first year of the program. Either faculty, student or adviser may recommend this change. Continuing students should meet with their academic adviser each quarter to plan their program of study for the subsequent quarter. Records of these meetings are kept in the students' folders. A general orientation meeting is held during the first part of the Fall Quarter for all advanced degree students. The progress of all students is assessed periodically in special faculty meetings. Any problems are reported to the student preferably orally, but sometimes in written form through the Chairperson of the Department.

Admission to Master's Program. New students, except those residing in foreign countries, are expected to attend an audition held in Winter Quarter.

The audition will look at the technical proficiency and creative potential of each applicant, which is expected to be no lower than the level of the UCLA undergraduate junior. Special attention is given to the creative aspects of dance, the sense of form and forming. Because the Department recognizes the importance of diversity and specialization at the graduate level, each applicant will be evaluated according to his/her primary focus, i.e., performance-choreography, education, therapy or ethnology.

The audition is in several parts: Part One will be a practical session in which the applicant will participate in a technique class.

Part Two will give the candidate the opportunity to show a work of his/her own choreography of not more than five minutes with accompaniment. For the ethnology candidate, the composition may be in a movement style of his/her choice and is not limited to modern.

Part Three is an interview with faculty. The purpose of the interview is threefold: To give the interviewee detailed information about the program, to let the faculty know the candidate as a person, and discuss his/her aims and interests, so as to help determine whether this program will fulfill the prospective student's expectations and needs.

For therapy students there will be an additional movement session.

To qualify for the M.A. program, the prospective student's past experience must approximate the Department's required undergraduate program, though this experience may have been gained outside the academic setting through such avenues as studio work.

In order to establish the equivalency, the applicant is asked to fill out the "M.A. Candidate Graduate Evaluation Form" which describes in detail the requirements of our undergraduate program. This form may be obtained by writing to the Department directly.

Although not all graduates who enter the program have filled all deficiencies, the greater the approximation, the more likely a candidate is for consideration for the program.

These requirements apply to all applicants even though their focus at the graduate level may be a specialization in therapy, ethnology, education, or performance and choreography. There is a variation in requirements noted in the "M.A. Candidate Graduate Evaluation Form" for the therapy and ethnology specializations.

Major Fields or Subdisciplines. There are four major areas of specialization recognized by the Department: Choreography/Performance; Dance Therapy; Dance Education, and Dance Ethnology. There is also the possibility of doing thesis work in such areas as Dance History, Philosophy and Criticism, Dance Kinesiology, Dance Production, Dance and Media, Music for Dance, and Dance Notation. Programs in these special areas may be set up on the advice of the Chairperson of an adviser after the student has been in the graduate program for several quarters and has identified a unique interest and competence in one of these areas.
Foreign Language Requirement. There is no foreign language requirement. It is, however, recommended for students specializing in Dance Ethnology who will be engaged in field work that during the course of their graduate study or in preparation for it, they have gained a working knowledge of the language of the area where they will do their research.

Course Requirements. Requirements for graduation: nine courses, 36 units. a. All students are required to take Dance 202. b. Four courses, or 16 units, in the Department at the graduate level. These courses will bear a 200 number. c. Four courses, or 16 units, in or outside the Department at upper division or graduate level. These may not be classes that are being taken to fulfill deficiencies. Technique and ethnic performance classes may also not be used in this category.

Thesis or Comprehensive Examination Plan. Under the Thesis Plan the student will prepare a thesis which is a report of the results of his or her original research or creative work. Before beginning work on the thesis, the student must obtain approval of the subject and general plan from the Graduate Faculty Committee consisting of all tenured faculty in the Department. This presentation is usually made four or five quarters after the commencement of graduate work. If the Thesis Plan is accepted, a thesis committee will be formed. The thesis committee consists of three faculty members, two from the Department of Dance and one from an outside department. If a student fails in his/her first presentation, he or she may be reexamined. Conditions for reexamination are based on the support of several faculty members who indicate to the Chairperson that a reexamination seems warranted.

Under the Comprehensive Examination Plan the course requirements are the same as those for the thesis with the addition of one course. This plan would include an independent study project and a final examination. Because of the nature of the discipline, the Comprehensive Examination Plan is rarely followed.

Time to Degree. Six quarters for a student with no deficiencies.

500 Series Course Limitations

</tbody>
</table>

Eight units of 500 series may apply toward total requirement.

Four units of 500 series may apply toward minimum graduate course requirement.

Teaching Experience. Teaching experience is not a requirement for the degree. It is highly recommended, however, for those graduating with a focus in Dance Education.

Disqualification and Appeal of Disqualification. Reasons for disqualification in the past have been failure to maintain a grade point average of 3.0. Because of the audition for entrance and the close advising process, students and administration have either worked out ways to make student achievement suitable, or they have mutually agreed on separation. The entire faculty reviews each graduate student once a year. In this process, problem areas are defined and recommendations are transmitted to the student by the adviser or the Chairperson.

Other Relevant Information. While field work is not a requirement for those specializing in the area of Dance Ethnology, it is strongly suggested as a part of the student's program. The specialization in Dance Therapy requires field experience or internship to provide an orientation to the hospital setting and experience as a movement therapist. This requires one-half day of internship each week throughout the first year. The second year is designed as an intensive experience: two full days each week, with an opportunity to work with different populations and to assume a broad range of responsibilities in a therapeutic setting.

Upper Division Courses Which May Be Used As Credit Toward the M.A. Degree:

Graduate Courses

200. Dance Notation. (½ course) Prerequisite: course 159. Advanced study of dance notation.

202. Research Methods and Bibliography in Dance. Prerequisite: course 150C. Critical analysis of dance as a creative experience and the role of professional and educational dance in our society. Research and extensive reading in contemporary philosophical literature. Study of present-day concepts and their relationships to other art forms and cultures. Evaluations of graduate students will be based on extended reading list and term papers. This course counts toward the Master's degree.

208. Principles of Dance Theater. Prerequisite: course 152A-152B. Principles which serve the presentation of dance.

210. Aesthetics of Dance. Prerequisite: course 152B. A critical analysis of aesthetic concepts related to dance.

211A. Kinesiology for Dance. Lecture, four hours. Prerequisite: consent of instructor. The scientific basis for movement for dance. A study of the anatomical, kinesiological and physical principles and demands of dance.

221. The History of Ballet. Prerequisite: courses 151A-151B. The development of ballet in its various stages: Renaissance, Baroque, Romantic Period; stylistic differences in Italy, France, Spain, and England; influence of the other arts and problems of ballet as an art form.

222. Renaissance Dance. Prerequisite: course 151A-151B or consent of instructor. The evolution of the dance suite traced from its earliest records (Domenico da Piacenza, 1430) to codification in words of Arbeau, Carose, Negri (1580-1610). Style will be studied through reconstruction of steps, costumes, music and presentational form.

226A-226B-226C-226D. Dance Expression in Selected Cultures. Prerequisite: course 140 or consent of instructor. Dance is viewed as an aspect of culture and human behavior. 226A - survey of literature; 226B - objectives and goals of the discipline in relation to anthropology and behavioral sciences; 226C - methodologies and training in techniques for field work; 226D - ethical and cultural problems; field projects.

227A-227B. Advanced Studies in Dance Education. Prerequisite: consent of instructor. Course 227A must be completed before enrollment in 227B. A) Theory in the areas of movement, creativity and learning applied to the development of a framework for teaching dance as an art form. B) Establishment of dance in higher education with consideration for the body of knowledge, curriculum development and administration.

251A-251B-251C. Dance Movement Therapy: Theory and Practice. Lecture, two hours; laboratory, two hours. Prerequisite: consent of instructor. A one year sequential course which encompasses the interdisciplinary theoretical foundations and methodology of dance movement therapy; special emphasis given to adult clinical populations.

252A-252B-252C. Seminar in Movement Therapy. Prerequisites: courses 251A-251B-251C and course 596R. Lecture, two hours; laboratory, two hours. A one-year sequential course which extends the conceptual and methodological foundations of dance movement therapy to special clinical populations (children, adolescents and families).

258. Philosophical Bases and Trends in Dance. Prerequisite: course 150C. Critical analysis of dance as a creative experience and the role of professional and educational dance in our society. Research and extensive reading in contemporary philosophical literature. Study of present-day concepts and their relationships to other art forms and cultures. Evaluations of graduate students will be based on extended reading list and term papers. This course counts toward the Master's degree.

260. Master's Degree. Prerequisite: course 150C. Critical analysis of dance as a creative experience and the role of professional and educational dance in our society. Research and extensive reading in contemporary philosophical literature. Study of present-day concepts and their relationships to other art forms and cultures. Evaluations of graduate students will be based on extended reading list and term papers. This course counts toward the Master's degree.

275. Aesthetics of Dance. Theoretical and creative aspects of Dance Therapy requires field experience or internship to provide an orientation to the hospital setting and experience as a movement therapist. This requires one-half day of internship each week throughout the first year. The second year is designed as an intensive experience: two full days each week, with an opportunity to work with different populations and to assume a broad range of responsibilities in a therapeutic setting.

DANCE / 115
Professional Courses

495. Preparation for the Teaching of Dance in Higher Education. (½ course) Prerequisites: Graduate Standing and consent of instructor. Study of problems and methodologies in teaching Dance which includes seminars, workshops and apprenticeship teaching. May be repeated once for credit. Graded S/U.

Ms. Williams

496. Directed Field Study in Dance Education. (½ to 2 courses) Prerequisites: Graduate Standing and consent of instructor. Group Seminar, 1 hour and Field Study (min. 2 hours). Directed field study to provide teaching experience in a community school or other approved site. Includes weekly group seminar. Graded S/U. No more than 4 units may be applied to elective requirements for M.A. degree.

Ms. Williams

497A-497F. Clinical Practicum Supervision. (½ to 3 courses) Lecture, one hour; discussion, two hours. This practicum in group supervision focuses on clinical concerns directly related to the graduate student's clinical internship. Issues relevant to therapeutic goals, the psychotherapeutic process and the clinical environment are discussed, particularly as they relate to supervision of group and individual patients. Must be taken concurrently with 251A or 252 and 596R. Graded S/U.

Ms. Lovell

Individual Study and Research

596A. Directed Individual Study or Research. (½ to 2 courses) 
596R. Directed Study or Research in a Hospital or Clinic. (½ to 2 courses) 
597. Preparation for the Comprehensive Examination for the Master's Degree. (No Credit) 
598. Research for and Preparation of the Master's Thesis. (½ to 2 courses)

Dentistry

The School of Dentistry

The UCLA School of Dentistry, which occupies facilities in the Center for the Health Sciences, offers a D.D.S. degree program (Doctor of Dental Surgery), a number of postdoctoral programs, and an Oral Biology M.S. degree program. (See Oral Biology)

D.D.S. Degree Program*

If you are interested in further details about the academic program leading to the D.D.S. degree or if you wish to make application to the program, you are urged to get a copy of the Announcement of the School by writing to: Office of Student Affairs and Admissions, UCLA School of Dentistry, Los Angeles, California 90024.

The D.D.S. program is a 4-year program where students undertake a comprehensive course of study in the biological and technological sciences to foster the highest standards of clinical competence in the practice of dentistry. The School is on the quarter system and admits 106 students each fall.

Admission Guidelines. The School of Dentistry encourages applications from students who demonstrate academic capability in undergraduate studies at an accredited 4-year university or college. Potential for study in dental science is judged on the basis of:

1. Scholastic record.
2. Aptitude for science demonstrated by academic record and by performance on the American Dental Association Aptitude Test (DAT). Information on and application for the DAT can be obtained by writing to: Division of Educational Measurements, Council on Dental Education, American Dental Association, 211 East Chicago Avenue, Chicago Illinois 60611.
3. Academic and manual aptitude indicated by performance on the DAT, which must be taken the year prior to the year for which application is made. In order to avoid delay of application processing, it is advisable that the student take this examination during the April testing period.
4. Manner in which scholastic record was achieved; i.e., course load, standing of school attended, breadth of the course of study, extracurricular activities and work experience.

The applicant must satisfactorily complete a minimum of 135 quarter units (90 semester units) of instruction, including all predental requirements. A maximum of 70 semester or 105 quarter units of junior college work is applied in calculating the total. It is significant to note that the majority of applicants admitted to the School of Dentistry have had more than three years of college experience and most possess a bachelor's degree. Since UCLA is a state-supported institution, California and WICHE certified applicants are given considerable preference.

These are minimal requirements; students are encouraged to gain facility with these and related courses. All of the above requirements must be completed prior to matriculation into the School of Dentistry; however, application for admission may be submitted prior to their completion. The Committee on Admissions, in exceptional circumstances, may consider students who only partially fulfill these prerequisites.

Interviews are not generally used in assessing the suitability of an applicant to the UCLA School of Dentistry; however, the Committee on Admissions, in certain circumstances, may request interviews with individual applicants and additional tests, such as a manual dexterity examination, may be required of applicants as a criteria for admissions. Letters of recommendation are not required by this school, but will be considered if submitted. Applicants wishing to submit additional information not covered in the application form, which may be helpful, may do so in a letter to the Committee on Admissions in no more than two typewritten (double spaced) pages.

Application Procedure. UCLA participates in the American Association of Dental Schools Application Service (AADSAS). Application materials are available April 15—October 15 and may be obtained from: AADSAS, P.O. Box 1003, Iowa City, Iowa 52240. Completed applications for UCLA are accepted by AADSAS no later than October 15 of the year prior to that in which the student wishes to enroll. At the time of application, a check for $20.00 payable to The Regents of the University of California should be forwarded to: Office of Student Affairs and Admissions, UCLA School of Dentistry, Los Angeles, California 90024. Notice of acceptance, rejection or alternate status will be sent to the applicant following completion of the formal evaluation by the Admissions Committee, beginning December 1 of any given year. Notification of rejection does not necessarily imply similar Committee action on subsequent applications.

An applicant receiving a letter of acceptance to the School of Dentistry must submit a deposit of $50.00 (applicable to registration fees) within 30 days, unless otherwise indicated, in order to reserve a place in the class. This deposit is refundable for a period of six weeks following acceptance upon written notice to the Admissions Committee that the student wishes to withdraw his or her application. After this time period, the deposit is refundable only if the candidate's acceptance is rescinded by the School of Dentistry.

Postdoctoral Programs—Specialty Education. The School of Dentistry offers the following opportunities for postdoctoral study: a 1-year General Practice Residency Program; a 1-year Residency in Maxillofacial Prosthodontics; a 3-year Oral & Maxillofacial Surgery Residency Training Program; and 2-year programs in the specialties of Orthodontics, Pediatric Dentistry, Periodontics and Prosthodontics.

Information on these postdoctoral programs can be obtained by writing directly to their respective directors, UCLA School of Dentistry, Los Angeles, California 90024.
**Earth and Space Sciences**

(Department Office: 3806 Geology)

**Programs and Major Fields.** The Department of Earth and Space Sciences offers programs leading to the M.S. and Ph.D. degrees in Geochemistry, in Geology, and in Geophysics and Space Physics. The program in Geochemistry offers study in biogeochemistry, crystal chemistry, experimental petrology, isotopic studies of stable and radioactive elements, marine geochemistry, meteorite research, planetology, and lunar geochemistry. The program in Geology offers study in geochemistry, geological physics, geomorphology, glaciology, micropaleontology, mineral deposits, mineralogy, non-renewable natural resources, organic geochemistry, paleobiology, petrology, sedimentology, stratigraphy, structural geology, tectonophysics, and other fields. The program in Geophysics and Space Physics offers study in earth's interior (seismology, gravity, thermal regime, geomagnetism, tectonics), geophysical fluid dynamics (turbulence, rotating systems, stability, hydromagnetism), planetology (orbital dynamics, planetary interiors, surfaces, and atmospheres, solar-system origin), and space physics (magnetosphere, radiation belts, solar wind, magnetic fields, cosmic rays). Other comparable areas of study are also possible.

**Admission.** Application may be made for admission to the Fall Quarter, which begins in September, the Winter Quarter, which begins in January, or the Spring Quarter, which begins in March, or the Fall Quarter which begins in September, the Winter Quarter, which begins in January, or the Spring Quarter which begins in March. Students who wish to apply for fellowships or teaching assistantships must complete the application by the preceding December. Graduate Record Examination scores are received by the preceding December. Graduate Record Examination scores are required of all applicants. Teaching experience and a foreign language requirement are also required.

The more important criteria considered are: (a) the applicant's academic record, especially in the relevant basic sciences; (b) the candidate's Graduate Record Examination scores in verbal, mathematical, and analytical ability, and in the relevant advanced test; (c) the candidate's statement of purpose, which should deal more with intellectual goals and motivations than with occupational ones; and (d) the three required letters of recommendation, which should be from people familiar with the applicant's intellectual and motivational qualifications for academic pursuits.

**Advising.** Entering students choose or are assigned a faculty adviser or advising committee just prior to the first quarter of enrollment. With the approval of the Graduate Adviser the advising committee may be reconstituted at any time to fit developing interests or other circumstances. At the beginning of every quarter each student's program must be reviewed and approved by his or her faculty adviser before submission for official approval by the Graduate Adviser.

The Graduate Student Affairs Committee, a faculty committee chaired by the Graduate Adviser, annually reviews the progress of each student (generally in late May or early June). These reviews become part of the student's departmental record and are transmitted in writing both to the student and their faculty advisers. Students whose scholarship or progress are insufficient are subject to dismissal.

The normal minimum course load for graduate study is 12 units per quarter.

**Foreign Language Requirement.** Advising committees may require one or more foreign languages in special individual cases. The Department determines how the requirement is to be fulfilled.

**Teaching Experience.** Teaching experience is not a requirement for any of the degrees offered by this department.

**Disqualification and Appeal of Disqualification.** Process of reaching termination decision: periodic, but at least annual review of the progress of all graduate students by the Graduate Affairs Committee. Specific conditions leading to the recommendation of termination:

(a) failure to register or give adequate reasons for leave of absence as judged by the Graduate Committee;
(b) failure of Written or Oral Qualifying Examinations or Final Oral Examination. Recommendation is at the option of the examining faculty committee.

The Graduate Student Affairs Committee, a faculty committee chaired by the Graduate Adviser, annually reviews the progress of each student (generally in late May or early June). These reviews become part of the student's departmental record and are transmitted in writing both to the student and the faculty adviser. Students whose scholarship or progress are insufficient are subject to dismissal. The normal minimum course load is 12 units per quarter.

**Disqualification and Appeal of Disqualification.** Process of reaching termination decision: periodic, but at least annual review of the progress of all graduate students by the Graduate Affairs Committee. Specific conditions leading to the recommendation of termination:

(a) failure to register or give adequate reasons for leave of absence as judged by the Graduate Affairs Committee;
(b) failure of Written or Oral Qualifying Examinations or Final Oral Examination. Recommendation is at the option of the examining committee;
(c) failure to meet requirements agreed upon between the student and the Graduate Affairs Committee or the student's advising committee regarding course scheduling and deadlines for examinations or completion of degree;
(d) failure to maintain minimum progress toward degree goal as specified in "Time to Degree" under each separate program, given below.
Normally, a warning would precede a recommendation of dismissal.

The student may appeal such a recommendation by means of a letter to either the Graduate Adviser or the Department Chairperson.

Program in Geochemistry

Admission. A bachelor's degree in chemistry, geology, physics, or related field is required. Applicants must have outstanding records in the basic sciences, physics, chemistry and mathematics. Recent Graduate Record Examination Aptitude and Advanced Test scores are required; the Advanced Test may be in any appropriate field of science.

Students planning to work toward the Ph.D. are not encouraged to obtain the M.S.

General Graduate Course Requirement. Each course of study is worked out individually by the advising committee in consultation with the student. All students are expected to attain, either through their previous training or through prescribed coursework, a common mastery of the subject matter of courses 51A, B, and C, M130, M131, 234B and Chemistry 110A and B, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology. All students are required to register in 235A, B, or C each quarter.

Master of Science (M.S.) in Geochemistry

Course Requirements. A minimum of nine courses is required for the degree, at least six of which must be graduate level courses. Apart from the general graduate course requirements stated above, there are no specific courses required for the M.S. degree.

Each student must complete a program of courses meeting general University requirements as well as additional courses required by his/her advising committee.

Thesis Plan. The thesis must be approved by the student's research director (who usually will be the chairperson of his/her advising committee) as well as by the other members of his/her advising committee. No examination is required of students who write a thesis.

Comprehensive Examination Plan. The advising committee will prepare and administer the final examination (which will normally be oral). In the preparation for this examination the committee will take proper recognition of the fact that some students will be better qualified in chemistry and others in geology. However, it will be required that a distinct competence in one of these fields will be matched by a least an adequate performance in the other. In most cases, a failed final examination can be repeated one additional time.

Time to Degree. A student making normal progress and whose undergraduate training is not deficient should receive the M.S. degree after about four to seven quarters.

500 Series Course Limitations. These may be taken with the approval of the chairperson of the student's advising committee. The following courses are acceptable:

<table>
<thead>
<tr>
<th>Course No.</th>
<th>Unit Value</th>
<th>Type of Grading</th>
<th>Number of Repeats</th>
</tr>
</thead>
<tbody>
<tr>
<td>596</td>
<td>2-12</td>
<td>S/U or letter</td>
<td>No limit</td>
</tr>
<tr>
<td>597</td>
<td>2-8</td>
<td>S/U</td>
<td>Not more than one</td>
</tr>
<tr>
<td>598</td>
<td>2-12</td>
<td>S/U</td>
<td>No limit</td>
</tr>
</tbody>
</table>

Sixteen units of 500 series courses may be applied toward the total course requirement for the M.S. in Geochemistry. Twelve units may be applied toward the minimum graduate course requirement.

Doctor of Philosophy (Ph.D.) in Geochemistry

Course Requirements. There are no course requirements, apart from general graduate course requirements as stated above. Students are, however, expected to complete at least the minimum number of courses which are required for the M.S. degree.

Written and Oral Qualifying Examinations.

A. Written Qualifying Examination. This examination is normally taken toward the end of the second year of graduate study. It covers the field of geochemistry and related areas in geology and chemistry. It may include an oral part at the discretion of the advising committee. If failed, it can be repeated at the discretion of the advising committee.

B. Oral Qualifying Examination. After passing the Written Qualifying Examination the student must consult the advising committee and the Graduate Adviser regarding nomination of his or her doctoral committee. The student is responsible for arranging the time and place of the examination, which should be as soon after the Written Qualifying Examination as possible. At least a week beforehand he or she must provide each member of the doctoral committee with a written prospectus of his or her proposed dissertation research. The subject matter covered in the examination includes, but is not limited to, the proposed research. Repetition of a failed examination is at the option of the doctoral committee.

Time to Degree.

A. The Written Qualifying Examination will normally be taken in the student's fifth or sixth quarter of residence.

B. The Oral Qualifying Examination should be taken as soon after the Written Qualifying Examination as practical. A nominal time would be the sixth or seventh quarter.

C. The dissertation and Final Oral Examination should be completed by the 12th to 15th quarter.

Final Oral Examination. The Final Oral Examination is normally required.

Candidate in Philosophy Degree. The Candidate in Philosophy (C.Phil.) degree is offered to students upon advancement to candidacy for the Ph.D.

Program in Geology

Admission. A bachelor's degree in geology, biology, chemistry, physics, or other science is required. Applicants must have outstanding records in the relevant basic sciences and mathematics. Recent Graduate Record Examination Aptitude Test scores are required. Advanced Test scores are optional, and may be in any appropriate subject.

Qualified students may proceed directly toward the Ph.D. degree without first obtaining an M.S. degree.

General Graduate Course Requirements. Each course of study is worked out individually by the advising committee in consultation with the student. It may include appropriate courses offered by other departments. All students except those who have already passed course 111C are required to take either course 195G or the sequence 111A-111B-111C in their first year of residence. Depending upon their performance in 195G, students may subsequently be required to take all or part of the 111 sequence.

Master of Science (M.S.) in Geology

Master of Science (M.S.) in Geology with Specialization in Non-Renewable Natural Resources

Course Requirements. Courses applied toward the 36-unit minimum requirement must be from the 100, 200, or 500 series in the physical or life sciences. At least 24 units must be graduate level courses, of which at least 4 units must be a geology seminar (courses 251 through 260, 283). Except for courses 597 and 598, courses graded on an S/U basis are not applicable toward the requirements. The advising committees may require additional courses in light of individual educational objectives and backgrounds.

Specialization in Non-Renewable Natural Resources: The objective of this program is to prepare students for professional careers in the geology of metallic, non-metallic, and fossil energy resources. Because of the diverse backgrounds of students entering the specialization, individual courses of study will be arranged in consultation with the Committee for Graduate Study in Non-Renewable Natural Resources.
Doctor of Philosophy (Ph.D.) in Geology

Course Requirements. There are no course requirements, apart from general graduate course requirements as stated above. Students are, however, expected to complete at least the minimum number of courses which are required for the M.S. degree and must take a geology seminar each year.

Written and Oral Qualifying Examinations.

A. Written Qualifying Examination. This examination must be taken before the end of the first year of the doctoral program if the student has a master’s degree; otherwise, it must be taken before the end of the second year of enrollment. It is administered by the advising committee augmented by a fourth member who is appointed by the Graduate Adviser in consultation with the student and serves as chairperson of the examining committee. It is given in either a question-answer format or a proposal-proposition format, which the student may select.

The question-answer format consists of a 2-part examination. The first part is written, takes 6 hours, and can cover any aspect of geology in which the student has had training, including general background, current emphases, and in-depth focus on the student’s special field. The second part is oral, is taken no later than a week after the first part, and can cover subjects from the written part, the field of the proposed dissertation, and specifics of the proposed research, although it is not limited to these topics. The proposal-proposition format consists of an oral examination based on three written independent research proposals or scientific propositions in any combination, which must be submitted to the examining committee at least 30 days before the examination. One of the proposals must specify the intended dissertation research. The examination is concerned with the originality and soundness of the proposals and propositions, the depth and breadth of thinking they display, their scientific significance, and the quality of their elucidation and defense, although it is not limited to these topics.

B. Oral Qualifying Examination. After passing the Written Qualifying Examination, the student must consult the advising committee and the Graduate Adviser regarding nomination of his or her doctoral committee. The student is responsible for arranging the time and place of the examination, which should be as soon after the Written Qualifying Examination as possible. At least a week beforehand, he or she must provide each member of the doctoral committee with a written prospectus of his or her proposed dissertation research. The subject matter covered in the examination includes, but is not limited to, the proposed research. Repetition of a failed examination is at the option of the doctoral committee.

Time to Degree

A. The Written Qualifying Examination is normally taken during or prior to the sixth quarter of graduate work.
B. The Oral Qualifying Examination should be taken within two years after successful completion of the Written Qualifying Examination (no later than the end of the 11th quarter).
C. The dissertation should be completed and the Final Oral Examination (defense of dissertation) taken by the 12th to 15th quarter.

Final Oral Examination. The Final Oral Examination is normally required, but may be waived upon recommendation of the doctoral committee.

Candidate in Philosophy Degree. The Candidate in Philosophy (C. Phil.) degree is available after successful completion of the Oral Qualifying Examination.

Program in Geophysics and Space Physics

Admission. A bachelor’s degree in a physical science, engineering, mathematics, or other field is required. Undergraduate work must include junior or senior level courses in mathematical methods, dynamics, electromagnetism, and thermodynamics. Recent Graduate Record Examination Aptitude Test scores are required. Advanced Test scores are desirable, preferably in physics, although mathematics or geology are also acceptable.

Qualified students may proceed directly toward the Ph.D. degree, although most obtain the M.S. degree in the process.

Master of Science (M.S.) in Geophysics and Space Physics

Course Requirements. Courses applied toward the 36-unit minimum requirement must include courses 200A, B and C and at least 12 additional units of 200 series (graduate level) courses, of which at least half must fall within a single field of concentration (earth’s interior, geophysical fluid dynamics, planetology, or space physics) selected by the student with the advice and approval of his or her faculty adviser and the remainder must contribute to his or her general competence in geophysics and space physics. Courses from the 500 series and courses graded on an S/U basis do not apply toward the minimum requirement.

Thesis Plan. This plan is an optional alternative to the Comprehensive Examination Plan. At least two members of the thesis committee must be from the Department.

Comprehensive Examination Plan. This plan is the one normally followed. The examination is the comprehensive part of the Written Qualifying Examination taken by doctoral students, but the passing level for the master’s degree is not so rigorous. The examination is on the level of the introductory courses 200A,
B. C. It lasts six hours and is given every June and December. It must be first attempted by the end of the fourth quarter of enrollment. If failed, it must be retaken the next time it is given. Permission to take it a third time may be granted by the Graduate Adviser in extenuating circumstances.

**Time to Degree.** From graduate admission to award of degree: five quarters.

**500 series Course Limitations.** These courses do not apply toward the degree.

**Doctor of Philosophy (Ph.D.) in Geophysics and Space Physics**

**Course Requirements.** There are no specific requirements.

**Written and Oral Qualifying Examinations**

A. **Written Qualifying Examination.** In this program this examination is divided into three stages: (1) the Fundamental Physics Examinations, (2) the Comprehensive Examination, and (3) the Field Examination. Examinations (1) and (2) must be passed before undertaking Examination (3). Students not passing these examinations within three years, two years, and four years, respectively, after entering the program are subject to dismissal.

1) **Fundamental Physics Examinations.** Students must attain an average grade of 3.4 on a 4.0 scale in at least three fundamental physics examinations. These examinations may be the final examinations for any of the following courses: (a) ESS 201 (Classical Mechanics); (b) ESS 202 (Continuum Mechanics); (c) ESS 203 (Electrodynamics); (d) Physics 210A (Electromagnetic Theory I); (e) Physics 210B (Electromagnetic Theory II); (f) Physics 215A (Statistical Physics); (g) Physics 220 (Advanced Classical Mechanics); (h) Physics 231A (Methods of Mathematical Physics). Exceptions are that students may not get credit for both examinations in the following pairs, due to overlap of subject matter: ESS 201 and Phys. 220; ESS 203 and Phys. 210A; ESS 203 and Phys. 210B.

In addition to the above listed courses, a student may petition to count toward this requirement the final examinations in either or both of Phys. 221A (Quantum Mechanics I) and Phys. 221B (Quantum Mechanics II). Approval of a petition depends on relevance of quantum mechanics to more advanced study and research planned by the student.

A student may also petition to substitute the final examination of another graduate course of a physical science or engineering department for any of the above list. Approval of the petition depends on the substituted examination being of similar fundamental character and having greater relevance to the student’s planned research and advanced study.

The fundamental physics examinations must all be passed prior to undertaking the field examination.

2) **Comprehensive Examination.** This is a 6-hour written examination on the level of the introductory courses 200A, B and C and is given every June and December. It must be first attempted by the end of the fourth quarter of enrollment. A grade of S is required to pass. If failed, it must be retaken the next time it is given. Permission to take it a third time may be granted by the Graduate Adviser in extenuating circumstances. It must be passed before the Field Examination may be attempted.

3) **Field Examination.** This examination must be first attempted within a year of passing the comprehensive examination. It consists of a 3-hour written part (which may be waived by mutual agreement of both student and examining committee) followed by an oral part. It tests the student’s general knowledge of his or her field of concentration (earth’s interior, geophysical fluid dynamics, planetscape, or space physics) as defined by the student in a written statement to which he or she must obtain the examining committee’s concurrence before arranging the examination. The examining committee consists of three or more faculty members, appointed by the Graduate Adviser in consultation with the student, of whom at least three must be from the Department and one must be from outside the student’s field of concentration.

B. **Oral Qualifying Examination.** After passing the Field Examination, the student must consult his or her faculty adviser and the Graduate Adviser regarding nomination of the doctoral committee. The student is responsible for arranging the time and place of the examination, which should be as soon after the Field Examination as possible. The examination determines the suitability of the chosen problem for the Ph.D. dissertation and the capability of the student to pursue research on the problem, but it is not limited to these topics. Repetition of a failed examination is at the option of the doctoral committee. Students not passing this examination within five years after entering the program are subject to dismissal.

**Time to Degree**

**From Admission to Completion of:**

A student who has not passed an examination within the maximum time listed above is subject to dismissal, even though he/she may have a satisfactory grade point average.

**Final Oral Examination.** The Final Oral Examination is required.

**Graduate Courses:**

200A. Introduction to Geophysics and Space Physics I: The Solid Earth and Planets. Prerequisite: Physics 105A, 110A, 112A, 131 or consent of instructor. Geochemistry, cosmochemistry, and petrology; geoelectronics; gravity field; seismology; heat transfer, thermal and mechanical evolution of the mantle; the core and geomagnetism; lunar and planetary interiors.

Mr. Newman (F)

200B. Introduction to Geophysics and Space Physics II: Oceans and Atmospheres. Prerequisite: Physics 105A, 110A, 112A, 131 or consent of instructor. Evolution, chemistry, and heat balance of oceans and atmospheres; molecular spectra, radiative transfer, and planetary observations; dynamics of oceans and atmospheres.

Mr. Schubert (W)

200C. Introduction to Geophysics and Space Physics III: Planetary Astronomy and the Interplanetary Medium. Prerequisite: Physics 105A, 110B, 112A, 131 or consent of instructor. Solar surface features, heating and expansion of corona, solar wind, plasma and magnetic fields, interaction of the solar wind with the earth, magnetospheric phenomena.

Mrs. Kivelson (Sp)

Mr. Newman (Sp)

Mr. Kaula (F)

203. Electrodynamics. Prerequisite: upper division electromagnetic theory or consent of instructor. Maxwell’s equations and boundary conditions; momentum, angular momentum and energy of electromagnetic fields; plane electromagnetic and magnetohydrodynamic waves; wave guides, simple radiating systems and diffraction.

Mr. Coleman (W)

230. Inverse Theory and Data Interpretation. Prerequisite: Courses 130 and 135. This course addresses the inverse modelling problem: to determine model parameters consistent with experimental data, considering the effects of random errors and nonuniqueness. Linear and quasi-linear problems will be emphasized, but nonlinear problems will be discussed. Tools to be used include matrix theory, quadratric forms, orthogonal rotations, statistics, the principal axis transformation for rectangular matrices, Backus-Gilbert resolving kernels, and Lagrange multipliers. Examples will be taken from a broad range of physical sciences.

The Staff

230. Advanced Paleontology. Prerequisite: course 115 or advanced standing in biological science. Lectures will emphasize evolutionary, ecological, stratigraphic, and taxonomic aspects of fossil invertebrates. Field work and laboratory will be devoted to a research project and written report. Content will vary from year to year. May be repeated for credit.

The Staff

242. Hydrodynamic Instabilities and Turbulence. (Same as Mathematics M263.) An introduction to the theories of hydrodynamic instability and the non-statistical description of turbulence; stability bounds by the energy method; linear theory of instability; finite amplitude theories of post-instability flows; bounds on properties of turbulent flows by variational techniques.

Mr. Busse
222. Introduction to Seismology. Types of seismic waves; travel-time seismology; epicenter location; amplitude variations; seismograph theory; explosion seismology; seismicity; focal conditions; surface wave analysis; microseisms and tsunamis. 
Mr. Davis (W)

M224A. Elastic Wave Propagation I. (Same as Engineering M257A.) Prerequisite: Engineering 158A or 159A or consent of instructor. Elastic wave equation and elementary solutions; wave motions in elastic half-spaces; reflection and refraction of elastic waves; surfaces waves; vibrations of rods and plates. 
Mr. Knopoff, Mr. Mal (W)

M224B. Elastic Wave Propagation II. (Same as Engineering M257B.) Prerequisite: consent of instructor. Wave propagation in layered media; Green's function for various geometries; diffraction and scattering of elastic waves: attenuation; inversion problems. 
Mr. Knopoff, Mr. Mal (Sp)

225A. Physics and Chemistry of Planetary Interiors I. Chemical compositions of the earth and planets; high pressure and temperature effects, phase transitions, and equations of state; variations of density and temperature with depth; thermal and compositional evolution. 
Mr. Anderson, Mr. Boettcher (W)

225B. Physics and Chemistry of Planetary Interiors II. Lateral inhomogeneities in the earth; elastic properties, petrology, geothermal and gravitational variations; evidence of motion; remanent magnetism, seismic motions; post-glacial rebound; plate tectonics; rheology of mantle; thermal convection. 
Mr. Anderson, Mr. Boettcher (W)

226. Theoretical Geomorphology. Prerequisites: Mathematics 33A and one course in elementary probability theory, or consent of instructor; recommended, Geography M102. Analysis of the intellectual foundations and objectives of modern geomorphology, illuminated by selected past and present theories of river profiles, slope processes, and channel networks. Reading and discussion of original sources. Preparation of term paper. 
(Offered approximately every third year.) 
Mr. Anderson (Sp)

227. Resource Evaluation Field Methods. Prerequisite: course 111B and 128A or 128B or 138 or consent of instructor. Techniques of mapping, sampling, appropriate laboratory studies, economic or socioeconomic evaluation of a variety of non-renewable natural sources; preparation of reports. 
Mr. Carlisle (Sp)

228. Planetary Magnetism. Prerequisite: course 217 or consent of instructor. Description and analysis of the dynamo field; Earth; Mars; Venus, Mercury. Origin and history of the earth's magnetic field: core dynamics, dynamo theory, paleomagnetism. 
Mr. Schubert (W)

229. Planetary Surfaces and Atmospheres. Prerequisite: course 200A-200B. Study of planetary observational methods and historical and current active processes. Surface and atmosphere heat balance; volatile budgets; condensate cycles and cloud formation; erosion mechanisms; durnal, annual, and seasonal variations. Current observations and theories will be critically discussed. 
The Staff

230. X-Ray Crystallography. Course 51C. Point, translation and space group symmetry, diffraction of x-ray, reciprocal lattice theory, single crystal x-ray methods, diffraction symmetry and elementary crystal structure analysis. 
(Alternates yearly with course 231.) 
Mr. Dollase (F)

231. Crystal Chemistry and Structure of Minerals. Prerequisite: course 51C. Bonding, interatomic configurations, polymeric transformations, isomorphous and isomorphous positional disorder; structure of the common minerals, and relation of physical and chemical properties to crystal structure. 
(Alternates yearly with course 230.) 
Mr. Dohm (Sp)

232. Thermodynamics of Crystals. Prerequisite: Physics 121C and Mathematics 110B. Physical Chemistry including thermodynamics and some chemical quantum mechanics and course 233 or consent of instructor. Application of fundamentals of methods for approximating lattice vibrational spectra. Calculation of thermodynamic functions of single crystals. Interpretation of experimental data. Systematic variations in thermodynamic functions with crystal structure. Given alternate years. 
Mr. Schubert (W)

Mr. Anderson (Sp)

234A. Thermodynamic and Geometric Principles of Phase Equilibria. Prerequisites: course 51C, Chemistry 110B, or consent of instructor. Thermodynamic bases of phase transformations and of phase rule. Geometric representation of multicomponent systems using pressure, temperature, chemical potential, mole volume, and the fugacity of oxygen, water, and other volatile components as variable parameters. 
Mr. Boettcher

234B. Petrologic Phase Equilibria. Prerequisites: course 51C, Chemistry 110B or consent of instructor. Principles governing homogeneous and heterogeneous equilibria, with selected applications to mineral stability relations in igneous and metamorphic rocks (fractional crystallization, partial melting, hydrothermal solutions, element partitioning in coexisting phases). 
Mr. Ernst

235A-235B-235C. Current Research in Geochemistry. (4 course each) Prerequisite: Graduate Standing in the Department of Earth and Space Sciences. Seminars presented by staff, outside speakers and graduate students stressing current research in earth and planetary chemistry. Grading on S/U basis. May be repeated for credit. 
The Staff (F, W, Sp)

236A. Igneous Petrology. Prerequisite: course 234A (may be taken concurrently) and a knowledge of differential equations. Solutions of the heat flow equation for specific examples of cooling magmatic bodies; the nature and origin of batholiths and associated rocks. 
(Alternates yearly with course 236B.) 
Mr. Rosenfeld (Sp)

236B. Igneous Petrology. Prerequisite: course 234A or consent of instructor. Occurrence and origin of mafic and ultramafic rocks. 
(Alternates yearly with course 236A.) 
Mr. Rea (W)

238. Metamorphic Petrology. Prerequisite: course 103 or consent of instructor. Interpretation of metamorphic rocks in the light of observation, theory, and experiment. Geological relations, petrographic evidence, metamorphic zoning, thermodynamics of phase equilibria, projections, chemical reactions and processes, use of piezobirefringent haloes, Rayleigh depletion model, isotopic fractionation, environmental factors of metamorphism. Laboratory study of representative metamorphic rocks and suites of rocks selected to illustrate topics discussed in lectures. 
Mr. Rosenfeld (Sp)

239. Structural Petrology of Deformed Rocks. Prerequisites: course 51C, 111; 114 or 248 recommended, or consent of instructor. Use of universal stage. Microscopic study of textures, structures and preferred orientations of minerals in tectonites. Deformation mechanisms in crystals and aggregates. Theories of development of preferred orientation. Application of experimental data to the interpretation of microfabrics. 
(Alternates yearly with course 249.)

Mr. Christie

240. Space Plasma Physics. Prerequisite: course 203 or Physics 210A. The physics of plasmas in space including treatments based on magnetohydrodynamics and kinetic theory. APPLICATION OF SOLAR OR PLANETARY WINDS; STEADY-STATE MAGNETOSPHERES; MAGNETOSHEAR CONVECTION; SUBSTORM PROCESSES; MAGNETIC MERGY; FIELD-ALIGNED CURRENTS AND MAGNETOSPHERE-IONOSPHERE COUPLING; RING CURRENTS; AND VOLUME PARTICLE INSTABILITIES. 
Mr. Kivelson (W)

241. Sedimentary Petrology. Prerequisite: course 51C, recommended course 141. Texture, composition, structure, and modes or origin of the sedimentary rocks. Content varies from year to year. 
Mr. Reed (Sp)

245A-245B. Stress and Deformation. Prerequisites: Physics 8A, 8B, Mathematics 31C, 32A, 32B, or consent of instructor. Scalars, vectors, tensors, subscript notation; rotation and inversion of axes, transformation matrix; stress; finite homogeneous strain, strain rotation; infinitesimal strain, strain rate; Mohr's circle construction and other graphical methods; flow laws. 
(Offered every third year.) 
Mr. Oertel (F, W)
246. Advanced Structural Geology. Prerequisites: courses 111A or similar course, or consent of instructor. Occurrence and classification of faults; accumulation; glacier budget; mechanical properties of ice; glacier flow; crevasses; textural and structural features; thermal relationships; bed-slip; climatic response; catastrophic advances. (Offered every third year.) Mr. Shave (F)

248. Advanced Structural Geology. Prerequisites: courses 111A, 111B, and 111C or 169. Principles governing fracture, folding, and flow of rocks; solution of structural problems at various scales; regional tectonic problems. The Staff

249. Seminar in Mineral Geology. Problems of distribution, composition, and formation of mineral deposits; mineral economics; investigations of opaque minerals by microscopic or other techniques. Mr. Carlson, Mr. Watson (W)

*259. Seminar in Advance Topics in Geology. (½ to 1 course) Topics to vary. May be repeated for credit. The Staff

*260. Seminar in Geophysical Geology. (½ to 1 course). Problems of current interest in geophysical physics, including topics related to impact cratering processes, mechanisms of volcano eruption, high pressure properties of materials, and thermodynamics of crystals. The Staff

*261. Topics in Magnetospheric Plasma Physics. Lectures, discussions and exercises on specific, advanced topics in magnetospheric plasma physics. Previous courses have examined magnetic storms, magnetospheric substorms, ultra-low frequency waves and adiabatic particle motion in the earth's radiation belts. The Staff

*265. Instrumentation, Data Processing, and Data Analysis in Space Physics. Principles, testing and operations of magnetometers and other instruments. Data processing, display, and archiving. Time-series analysis techniques, including filtering. Fourier series, eigen-analysis, and power spectra. Mr. McPherron

*M266. Cosmic Ray Physics. (Same as Astronomy M266.) Cosmic ray composition, origin, acceleration, propagation, interactions with stellar matter, magnetic field and radiation field, role in interstellar heating, non-thermal galactic radio and galactic x- and gamma-radiation, interaction in the earth's atmosphere. Mr. Lingenfelter

*268. Seminar in Resource Analysis. Prerequisite: consent of instructor. Geological, geophysical, economic and technological factors in studies of optimum use of mineral and energy resources. Seminars will emphasize different mineral or energy sources from time to time. The Staff

*270. Energy Production and Environmental Tradeoffs. Upper Colorado Basin coal and other energy resources of the southwestern states; interest groups involved in exploitation of these resources; impacts of exploitation of these resources on power, water, agriculture and environmental quality. A laboratory course concerning societal issues. Mr. Anderson

M282. Seminar in Geophysics. (Same as Geophysics and Planetary Physics M282.) Prerequisite: consent of instructor. Seismology, geophysical prospecting, electromagnetic prospecting. Selected topics. May be repeated for credit. Mr. Bird (Sp)

*M283. Seminar in Environmental Science and Engineering. Problems of current interest concerning the interaction of man, technology, and the environment, such as: regional water and energy allocation; earthquake mechanism; geochemistry of pollution; environmental fluid dynamics; engineering geology; environmental geology. May be repeated for credit. The Staff

*284. Seminar in Mineral Physics and Rock Physics. (½ to 1 course) Prerequisite: courses 233 or 234A. Seminar for students interested in rock physics, mineral physics, and aspects of seismology and petrology. Registered students will present seminars in their research topics. The topics covered will be equations of state, acoustic properties of minerals under pressure, dielectric properties of minerals, properties of the earth's deep mantle and core, compressive analysis of aggregates, fracture dynamics, laboratory dynamics of low symmetry crystals, laboratory analogs of earthquakes. Mr. Anderson

*M285. Origin and Evolution of the Solar System. (Same as Astronomy M285.) Dynamical problems of the solar system; chemical evidences from geochemistry, meteorites, and the solar atmosphere; nucleo-synthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of the planets and satellite systems. Content will vary from year to year. May be repeated for credit. Graded S/U.

286A-286B-286C. Seminar in Planetology. (½ course each) Problems of current interest concerning the moon, planets, and meteorites. To be graded S/U only. May be repeated for credit. The Staff

287A-287B-287C. Seminar in Seismology and the Earth's Interior. (½ course each) Problems of current interest in seismology and the earth's interior. To be graded S/U only. May be repeated for credit. The Staff

288A-288B-288C. Seminar in Space Physics. (½ course each) Problems of current interest concerning particles and fields in space. To be graded S/U only. May be repeated for credit. The Staff

289A-289B-289C. Seminar in Fluid Dynamics. (½ course each) Problems of current interest in fluid dynamics and emphasis on geophysical applications. To be graded S/U only. May be repeated for credit. Mr. Newman (W)

290. Seminar in Time Series Analysis. (½ course) Discussion of recent research in spectral estimation, filtering, and signal detection applied to geophysical problems. To be graded S/U only. Mr. Jackson (Sp)

*295. Earth and Space Sciences Colloquium. (½ course only) Reading and discussion in the forefronts of earth and space sciences. The Staff

297. Advanced Techniques in Geophysical Research. (½ to 1 course) Graded S/U only.

298. Topics in Earth and Space Sciences. (½ to 1 course) Mr. Sabins (Sp)

501. Cooperative Program. (½ to 2 courses) Prerequisites: approval of UCLA Graduate Adviser and Graduate Dean. Approval of host campus Instructor, Department Chairman and Graduate Dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangement with neighboring institutions. To be graded S/U.

596. Directed Individual Study and/or Research. (½ to 3 courses) S/U or Letter Grade. The Staff

597. Preparation for Master's Comprehensive Examination or Doctoral Qualifying Examination. (½ to 2 courses) To be graded S/U only. The Staff

598. Master's Research and Thesis Preparation. (½ to 3 courses) To be graded S/U only. The Staff

599. Doctoral Research and Dissertation Preparation. (½ to 3 courses) To be graded S/U only. The Staff

Daniel Friedman, Ph.D., Assistant Professor of Economics.
Steven Wildman, Ph.D., Assistant Professor of Economics.
Benjamin Yu, Assistant Professor of Economics.
Kenneth Sokoloff, M.A., Acting Assistant Professor.

The Graduate Economics Program. The graduate program in economics is designed primarily for students pursuing the Ph.D. degree. The doctorate is awarded to those students who have achieved a level of study and training required for a professional economist. The doctorate recognizes the student's ability to make scholarly contributions in his/her fields of specialization and to undertake advanced research in those areas. A Master of Arts degree is offered. However, this degree program involves coursework and comprehensive examinations designed for the Ph.D. student. The master's degree is not required for the Ph.D. degree.

Admission Requirements. Applicants for graduate study who satisfy the University minimum requirements are eligible to apply. It is strongly recommended that the student have undergraduate training in economics, mathematics and statistics. Applicants must also submit a full record of prior university experience, three letters of reference and their scores in the Graduate Record Examinations (the General Aptitude and Advanced Economics tests).

The Department admits students only for the Fall quarter of each academic year. The deadline for submitting the admission/fellowship application is December 31st.

Advising. All graduate advising is handled by the Chairperson of the Graduate Committee (Room 2263 Bunche Hall). All students are urged to formulate a year's program before the Fall Quarter and to see a faculty adviser at that time. Subsequent meetings with the adviser are urged during the course of the academic year whenever doubts or questions arise about a student's proposed program or educational goals. All students failing to meet University minimum standards are evaluated by the Graduate Chairperson on a quarterly basis.

Major Fields or Subdisciplines. Economic Theory; Economic Development; Urban and Regional Economics; Public Finance; Mathematical Economics; Statistics and Econometrics; Labor Economics; Money and Banking; Industrial Organization; Economic Institutions; International Economics.

Disqualification and Appeal of Disqualification. An annual review of each student's record is made by the Chairperson of the Graduate Committee. A student who does not appear to be making satisfactory progress toward the degree will be notified to meet with the Graduate Chairperson in order to discuss the student's current status. Based on this meeting (or additional meetings, if required), the Graduate Chairperson will decide whether or not to make a recommendation for termination to the Graduate Committee. After careful review of the student's record, the Graduate Committee will determine further action which may include stipulating conditions a student must meet in order to continue in the graduate program. It is the responsibility of the Graduate Chairperson to communicate to the student about his or her possible termination and the conditions, if any, which he or she must satisfy to remain in the program. Should the student question the reasons for termination, an appeal by petition must be addressed to the Graduate Committee.

Other Relevant Information. All inquiries concerning admission or general information may be addressed to the Graduate Adviser, Department of Economics, UCLA, Los Angeles, CA 90024.

The Master of Arts Degree

Course Requirements. Candidates for the degree of Master of Arts in Economics have completed normally the equivalent of an undergraduate major in economics. In addition to the general University requirements (see University Minimum Standards), the departmental requirements are nine upper division and graduate level courses in economics completed in graduate status at UCLA. These courses must include:

1. Economics 101A-101B (Intermediate Microeconomic Theory) with a grade of at least B.
2. Economics 102 (Intermediate Macroeconomic Theory) with a grade of at least B.
3. Economics 107 (History of Economic Thought) with a grade of at least C.

Graduate level courses in economic theory and history of economic thought may be substituted for these undergraduate courses. At least five of the nine courses must be strictly graduate economics courses.

Students are also required to have completed, if not previously taken, three courses in mathematics and statistics consisting of two courses in calculus and one in statistics. Economics 144 may be used as one of the "calculus" courses and Economics 40 as the statistic course.

With the consent of the graduate chairperson, candidates may offer a maximum of two courses in other social sciences such as history, management, mathematics, psychology, education, or philosophy in partial satisfaction of the degree requirements. This will not, however, relieve the student from taking five graduate economics courses.

Comprehensive Examination Requirement. The Comprehensive Examination requirement for the master's degree may be met in one of the following three ways:

1. A grade of C (conditional) or better (C - is not acceptable) in each of two full doctoral comprehensive examinations;
2. A satisfactory pass (S) and a conditional pass (C) or better in each of two doctoral examinations with one of the examinations being either the Micro or Macro half of the Theory Comprehensive;
3. A grade of S and two grades of C or better in the Quantitative Methods examination and each half of the Theory Comprehensive. A student who achieves a B+ average in Econ. 246B and 246C automatically receives a satisfactory (S) grade in the Quantitative Methods exam.

Time to Degree. From graduate admission to completion of required courses will normally take three to five quarters. From graduate admission to conferment of degree will take three to six quarters. These estimates vary due to the student's previous preparation, the number of courses taken per quarter while registered,
and promptness in fulfilling the comprehensive requirement.

**500 Series Course Limitations.** Students may offer up to 4 units of Economics 596 ("Individual Study") toward the master's degree. Such a 4-unit course counts as one course toward the minimum graduate course requirement.

**The Ph.D. Degree**

**Course Requirements**

I. The specific course requirements which must be fulfilled prior to taking the Oral Qualifying Examination are the following:

A. **Quantitative Methods.** The requirement may be satisfied in any of the following ways:
   1. Achieving a B+ average in Econ. 246B and 246C;
   2. Achieving a B average in at least two quarters of the advanced econometrics sequence (247, 248, 249);
   3. Passing the Quantitative Methods Waiver Examination which is administered at the beginning of the Fall Quarter.

B. **U.S. or European Economic History.** Students must take one upper division undergraduate course in either United States or European economic history with a grade of B or better.
   The course Econ. 181 ("Development of Economic Institutions in Western Europe") or Econ. 183 ("Development of Economic Institutions in the United States") may be taken to satisfy this requirement.

C. **History of Economic Theory.** Students must take one upper division undergraduate course in the history of economic theory with a grade of C or better. Econ 107 ("History of Economic Theory") may be taken to satisfy this requirement.

Students may petition the Graduate Committee to substitute any one of the above requirements with comparable coursework taken at a previous institution.

II. A recommended program of study for doctoral students may be outlined as follows:

A. During the first year it is customary to take the 3-quarter Microeconomic Theory sequence (201A-B-C), the 3-quarter Macroeconomic Theory sequence (202A-B-C), the course in mathematical analysis of economic theory (244), and one of the Econometrics (247, 248, 249) or Quantitative Methods (246B-C) sequences.

B. During the second year, students select and enroll in courses in three areas of study in preparation for the three field comprehensive examinations. Normally, coursework and the comprehensive requirements are completed in the third year, at which time students begin work on their dissertation research. It is usual to enroll also in one of the graduate workshops. The latter provide an opportunity for students to participate in discussions of current research by visiting professors, the faculty, and most importantly, their own classmates. All third year students should choose some forum, either a workshop or class seminar, in which to present their preliminary research progress. Students are then expected to be advanced to candidacy during their third or fourth year. The dissertation can be completed during the fourth or fifth year.

**Written and Oral Qualifying Examinations.**

I. All doctoral students are expected to take the Theory Comprehensive at the end of the Spring Quarter of the first year or in the beginning of the Fall Quarter of the second year.

II. During the second and third years, students shall pass further written examinations in three elective fields.

III. Written examinations are graded "S" (Satisfactory Pass), "C" (Conditional Pass), and "U" (Unsatisfactory). A student is considered to have completed his/her Theory and elective field examinations when he/she has earned at least three S grades and one C grade. A student cannot be advanced to candidacy with more than one conditional grade on his/her record.

IV. Students may sit for no more than six examinations in the following four comprehensives: Theory and three elective fields.

V. A special grading rule applies to the Theory Comprehensive. A grade of C (not C-) will be counted as if it were in the Satisfactory range. If the student has achieved an A—(3.700) average or better in the six theory courses.

VI. The written examinations are offered twice a year, near the beginning of the Fall Quarter and near the end of the Spring Quarter.

VII. A student, upon petition to the Graduate Committee, may substitute a "special field" for one of the three elective fields. That is, with the consent of the instructors and approval of the chairperson of the Graduate Committee, a student may combine three related courses (not necessarily in the Department) into a field (e.g., Econ. 245A, 241A, and 241B). Overall evaluation of the student's performance in the field is determined by the instructors, who will consider the three course grades and a related paper which must be completed no later than one year after completion of the sequence. The paper becomes a part of the student's official record.

VIII. An Oral Qualifying Examination, administered by the student's doctoral committee which is approved by the Dean of the Graduate Division, will be scheduled only after the successful completion of all the written examinations and other course requirements, the foreign language requirement, and on the submission of a written dissertation proposal. The Oral Examination will focus on, but not be limited to, the dissertation proposal.

**Foreign Language Requirement.** Ph.D. candidates must offer one foreign language or a substitute program in mathematics prior to sitting for the Oral Qualifying Examination. If the language option is chosen, the student shall be required to show a proficiency in one language—French, German, Russian, or Spanish—by passing the Educational Testing Service (ETS) examination with a grade of 500 or better. Students whose native language is not English may substitute English for the language requirement by petitioning the Dean of the Graduate Division. If the mathematics substitute is chosen, a student must show proficiency in mathematics above that ordinarily required of Ph.D. candidates. Since elementary calculus is, as noted above, considered basic for all economists, the three required language-substitute courses must be at a level "above" first-year calculus. Courses in advanced probability and mathematical statistics fulfill the spirit of the requirement. Specifically, the courses in UCLA Mathematics Department numbered 32 and 110 or above fulfill the requirement.

**Time to Degree.** The Department has established a 5-Year normative time-to-degree plan which is divided into a 3-year precandidacy period and a 2-year candidacy period. Because of differences in previous preparation, work and other commitments at the University and outside it, and innate capacity, the amount of time necessary to complete the degree has been found to vary widely among the students. The following breakdown by quarters reflects this variance: from graduate admission to Written Qualifying Examinations may take four to six quarters; from graduate admission to dissertation proposal and Oral Qualifying Examination may take six to nine quarters; from admission to award of degree may take 12 to 18 quarters.

**Final Oral Examination.** A Final Oral Examination on the doctoral dissertation is required unless the members of the committee to supervise the dissertation waive it at the time of advancement to doctoral candidacy.

**Candidate in Philosophy Degree.** A student who has been advanced to candidacy is eligible to receive the C.Phil. degree.

**Graduate Courses**

**200. Policy Applications of Economic Analysis.**
Prerequisites: Graduate Standing. Not open to students in the Department of Economics. Survey of the uses of economic theory in public policy applications. Reviews economic analysis in market and non-market systems of economic organization. The Staff

**201A. Theory of Consumption and Exchange.**
Prerequisites: Demand, exchange, pricing and markets in an exchange economy. Emphasis is on derivation and interpretation of theorems and illustrated by applications. The Staff

*For concurrently scheduled courses ("C" prefix) suitably separate activities and/or standards for performance and evaluation will be applied for graduates and undergraduates.

The Staff

20C. Theory of Interest and Capital. Covers the topics of intertemporal choice and equilibrium, interest, and accumulation of capital, decisions under uncertainty, and ways of reducing risk.

Mr. Darby, Mr. Leijonhufvud

Mr. Darby, Mr. Leijonhufvud

Mr. Darby, Mr. Leijonhufvud

203A. Economics of Decision. (Same as Management M203A) Norms and facts of decision-making in household, business, government. Consumer behavior in terms of personal utilities and probabilities. Departures from consistency: Stochastic theories of behavior and resulting econometric models.

The Staff

203B. Economics of Information. (Same as Management M203B) Optimal decision and information rules. Amount, cost and value of information.

The Staff

203C. Economics of Organization. (Same as Management M203C) Rational models of teams. Relation to the theory of games.

The Staff

204A-204B. Applications of Economic Theory.

The Staff

207. History of Economic Theory. Mr. Allen, Mr. Sowell

211. Economic Development. Prerequisites: Gradate standing in economics or consent of instructor. General survey of current literature, emphasis on empirical tests of development theories.

The Staff

212. Applied Topics in Economic Development. Prerequisites: course 211 or consent of instructor. Applications of theories of development to case studies, including project analysis, policy-making at the national level, and economic planning. Occasionally the course focuses on a single applied research area for the entire quarter.

The Staff

213. Selected Problems of Underdeveloped Areas. Pre-seminar for doctoral candidates.

The Staff

221. Urban and Regional Economic Analysis I. Development of theoretical and empirical analysis of the major urban markets including land and housing, transportation, labor, and the local public sector. Interdependencies within and between these markets will be given particular emphasis.

The Staff

222. Urban and Regional Economic Analysis II. Prerequisite: course 221. Development of theoretical and empirical analysis of the major urban markets including land and housing, transportation, labor, and the local public sector. Interdependencies within and between these markets will be given particular emphasis.

The Staff

The Staff

232. Economics of Government Expenditures. Evaluation of various areas of government expenditure on basis of efficiency and other criteria. Selection of appropriate discount rates and other program budgeting techniques to control expenditure. Areas covered include: education, judicial system, prison reform, reclamation, health insurance, child care, energy conservation, regulatory activity, defense.

The Staff

234. Economics of Federalism. Theories of perfect competition and information and the role of government. Local public goods, spillovers, and intergovernmental relations.

The Staff

224. Control and Coordination in Economics. (Same as System Science M224C) (Formerly numbered Engineering M222G). Prerequisite: Graduate Standing in Economics or Engineering, consent of instructor. Appropriate mathematics course recommended. Stochastic models, statistical methods. Emphasis on learning to apply optimization techniques in social science problems.

The Staff

241A-241B-241C. The Economics of Uncertainty and Information. Prerequisite: calculus and Introductory Probability. This sequence of courses begins by examining how individuals adapt to the fact of uncertainty and how they organize themselves on topics such as private versus social risk, adverse selection and moral hazard, and asset pricing under uncertainty. It next explores the ways in which individuals overcome uncertainty by engaging in informational activities. Topics covered include speculation, innovation, market signalling and rational expectations. Third, the emphasis switches from event uncertainty to market uncertainty. Topics will include price searching, queueing, Brownian motion and auction design.

Mr. Hirschieler, Mr. McColl, Mr. Riley

Mr. Intriligator, Mr. Ostroy, Mr. Riley

244. Mathematical Analysis in Economic Theory. Review of vectors, matrices and univariate calculus. Multivariate calculus, constrained optimization. Emphasis on learning to apply optimization techniques in economic analysis. Economic topics discussed include Pareto-optimality, the Coase theorem, net and gross substitutes, peak load pricing, and an introduction to general equilibrium.

Mr. Riley

245A-245B-245C. Advanced Theory and Mathematical Economics. Prerequisite: course 201C or its equivalent elsewhere or consent of instructor. Selected advanced theoretical topics and an introduction to modern mathematical economics (including general equilibrium theory).

Mr. Intriligator, Mr. Ostrogy, Mr. Riley

Mr. Intriligator, Mr. Learner

246C. Applications of Econometrics. Selected econometric studies of consumption, investment, asset demand production functions, goods markets, factor markets, industrial organization, public finance, international trade. Course includes instruction on use of computer. Students are expected to write a research paper.

Mr. Riley

247. Single Equation Econometrics. Linear regression, specification error, autocorrelation, non-normality, non-linear estimation, outliers, qualitative dependent variables, aggregation structural change.

Mr. Learner

Mr. Intriligator, Mr. Learmer, Mr. McCall

249. Special Topics in Econometrics.

Mr. Intriligator, Mr. Learner, Mr. McCall

251. Labor Economics I. Analysis of wage determination in competitive labor markets. Wage determination extends to schooling and occupational choice. Empirical literaturer of lifecycle earnings (incomes, unemployment, etc.) is examined. Special topics include discrimination, minimum wage legislation and unionism.

The Staff

252. Labor Economics II. Prerequisites: Econ 251. Models of lifecycle learning and work behavior together with one-period models of labor supply. Special emphasis is upon the recent literature of family decisions concerning labor supply behavior of women.

The Staff

253. Labor Problems.

Mr. Welch

Mr. Welch

260. Monetary Economics I. Prerequisites: course 202A-202B-202C. The existence of money: financial institutions and markets; supply of money; demand for money; money and wealth; money and fluctuations in real income, employment and inflation; interest rates; international monetary arrangements; monetary policy.

Mr. Welch

261. Monetary Economics II. Prerequisites: course 202A-202-B-C. The existence of money: financial institutions and markets; supply of money; demand for money; money and wealth; money and growth; money and fluctuations in real income, employment and inflation; interest rates; international monetary arrangements; monetary policy.

The Staff

262. Monetary Economics III. Prerequisites: course 202A-202-B-C. The existence of money: financial institutions and markets; supply of money; demand for money; money and wealth; money and growth; money and fluctuations in real income, employment and inflation; interest rates; international monetary arrangements; monetary policy.

The Staff

The Staff

271. Industrial Organization, Price Policies, and Regulation: Theory. Analysis of the institutional resolution of the problem of economic regulation. Major economic aspects of the property right system underlying these institutions are analyzed. The firm and the market are then compared from the perspective of alternative arrangements for allocating resources and economic activity: monopolies, cartels, cooperatives, duopoly, and industrial concentration are discussed. Course concludes with brief analysis of those portions of antitrust policy bearing on industrial structure.

The Staff

277. Industrial Organization, Price Policies, and Regulation: Policy. Prerequisite: course 271. Study of firm organization and pricing under conditions of less than perfect competition; information costs and advertising; economic and legal analysis of marketing practices such as discrimination, tie-in selling, resale price maintenance, exclusive dealing and territorial arrangements.

The Staff

275. Public Utility Regulation. Theory, practice and consequences of regulation in electric power, gas, water, telecommunications, broadcasting and other regulated industries. The role of experience in unregulated and monopoly and public enterprises by way of contrast.

Mr. Hilton
Individual Study and Research

596. Individual Study (½ to 2 courses) Directed individual study or research. S/U grading. The Staff

597. Individual Study: Graduate Examinations. (½ to 2 courses) Directed individual study in preparation for the final comprehensive examination or the Ph.D. qualifying examination. S/U grading. The Staff

599. Individual Research: Ph.D. Dissertation. (½ to 2 courses) Directed individual research in preparation of Ph.D. dissertation. Must have been advanced to candidacy. S/U grading. The Staff

Education

(Department Office, 244 Moore Hall)

Marvin C. Aklin, Ed.D., Professor of Education.

Paul H. Sheats, Ph.D., Litt.D., Emeritus Professor of Education.
Lorraine M. Sherer, Ed.D., Emeritus Professor of Education.
Samuel J. Wanous, Ph.D., Emeritus Professor of Education.
Frederic P. Woelkner, Ph.D., Litt.D., Emeritus Professor of Education.
Leigh A. Burstein, Ph.D., Associate Professor of Education.
Simon Gonzalez, Ed.D., Associate Professor of Education.
John N. Hawkins, Ph.D., Associate Professor of Education and Sociology (Vice Chairman of the Department).
Charles C. Hailey, Ph.D., Associate Professor of Education.
Antonette Krupski, Ph.D., Associate Professor of Education.
David O'Shea, Ph.D., Associate Professor of Education and Sociology.
Val D. Rust, Ph.D., Associate Professor of Education.
James W. Trent, Ph.D., Associate Professor of Education.
Richard C. Williams, Ph.D., Associate Professor of Education.
Frederick S. Ellett, Jr., Ph.D., Assistant Professor of Education.
David P. Ericson, Ph.D., Assistant Professor of Education.
Harold G. Levine, Ph.D., Assistant Professor of Education.
Gerald J. Mahoney, Ph.D., Assistant Professor of Education.
Laura Pope, J.D., Assistant Professor of Education.
Kathleen R. Rockhill, Ph.D., Assistant Professor of Education.
Deborah J. Stipek, Ph.D., Assistant Professor of Education.
Romeria Tidwell, Ph.D., Assistant Professor of Education.
Conception Valadez, Ph.D., Assistant Professor of Education.
Noreen M. Webb, Ph.D., Assistant Professor of Education.
Welford Wils, Ph.D., Assistant Professor of Education.
David P. Wright, Ph.D., Assistant Professor of Education.
Julia M. Wrigley, Ph.D., Assistant Professor of Education and Sociology.

Marjorie S. Day, Ph.D., Lecturer in Education.
Claire B. Kopp, Ph.D., Associate Professor of Education in Residence.
Judith S. Margolis, Ph.D., Adjunct Assistant Professor of Education.
George D. Thayer, Ed.D., Lecturer in Education.
Graduate Degrees
(Master of Education; Master of Arts; Doctor of Education; Doctor of Philosophy)

Admission Requirements

General Requirements.
Qualifications for admission to a program of study in Education leading to an advanced degree, in addition to the currently specified University requirements for admission to the Graduate Division are:

a. A minimum total score of 1000 on the combined quantitative and verbal sections of the Graduate Record Examination. (NOTE: The Miller Analogies and Doppelt Mathematical Reasoning may be substituted for the Graduate Record Examination; minimum scores are 48 and 19 respectively.)

b. Acceptance in a particular specialization is dependent upon the availability of openings in that study field; additionally, preference may be given to applicants with related backgrounds and/or experience.

NOTE: Applicants who do not meet the University minimum grade average (B in upper division and prior graduate study) and/or Graduate Record Examination score requirements may be admitted to the Graduate School of Education on the basis of other indicators of special promise such as relevant work experience, accomplishments, or public service. Full documentation of the foregoing in the form of recommendations and other types of evidence is essential if these indicators are to be given consideration.

Specialized Requirements by Degree.

a. Master of Education Degree (Requirements applicable in accordance with selected specialization).

(1) Administrative and Policy Studies in Education
Possession of a valid teaching credential is preferred. Persons with a demonstrated commitment to improving American schooling will be sought for admission.

(2) Bilingual/Cross-Cultural Education
Completion of an approved program of professional preparation leading to a preliminary teaching credential; i.e., completion of a specific program of study including student teaching. Classroom experience—as a teacher or aide—for at least two years, at any level of schooling. Evidence of the applicant's professional competence and conscientiousness, as well as the necessary second-language proficiency.

(3) Curriculum and the Study of Schooling
Persons with above-average capabilities and interest in curriculum and instruction will be sought. Experience as a practitioner in the specialization field is advantageous.

(4) Teaching of Reading
Completion of an approved program of professional preparation leading to a preliminary teaching credential; i.e., completion of a specific program of study including student teaching. Persons with above-average capabilities and long-term commitment to the profession will be sought. Evidence that the applicant is strong in initiative and self-direction is most desirable. One year of successful teaching must be completed prior to or concurrent with the M.Ed. program.

b. Master of Arts Degree
(No specialized requirements.)

c. Doctor of Education Degree

(1) A Master of Education Degree or the equivalent.

(2) At least two years of successful professional experience in education or the equivalent. (Must be completed prior to advancement to candidacy.)

d. Doctor of Philosophy Degree

(1) A master's degree, or the equivalent, in either education or the cognate field in which the student proposes to work.

Letters of Recommendation.
Letters of recommendation, while not required, may prove useful in documenting an applicant's qualifications and/or professional experiences.

Brochures.
Departmental brochures may be secured from the following address: Office of Student Services, Graduate School of Education, Moore Hall 201, UCLA, 405 Hilgard Avenue, Los Angeles, California 90024.

Application Forms.
The Graduate School of Education has an application form in addition to the one used by Graduate Admissions. Application forms may be obtained from the Education Office of Student Services (address shown above).

Advising

Graduate Adviser.
Joan Wolfgang, Office of Student Services, Moore Hall 202, Graduate School of Education.

For information regarding specialization offerings, the prospective student should consult the Graduate Adviser. All procedural questions should be directed to the Office of Student Services. A general orientation meeting for all advanced degree students is held each quarter during the registration period.

Personal Adviser.
At the time of admission to the Graduate School of Education, students are assigned an Academic Adviser within their selected specialization. This assigned Academic Adviser is retained throughout the degree program unless the student changes the field of specialization.

Academic Progress.
An ongoing evaluation of the each degree student's academic progress is maintained through the recording of course performance in the student's file in the Office of Student Services. The course grade is the basic performance indicator; supplementary written evaluations may form part of the student's record at the instructor's discretion.

Overall assessment is made by the student's academic adviser as deemed appropriate. Typically, progress reports are made orally by the academic adviser. Continuing students should meet with their academic adviser each quarter to plan their program of study for the subsequent quarter.

Academic advisers are asked to maintain a record of all interviews.

For Doctoral Degrees:
In the Winter Quarter of each year, the Committee on Graduate Degrees, Admissions, and Standards is responsible for reviewing the progress each doctoral student is making toward the degree. The goals of the annual review are to determine whether: (1) the quality of the student's UCLA work is satisfactory (e.g., GPA = 3.0 or higher) and (2) the rate of progress toward the completion of the degree is acceptable.

Further, at the time of the annual review, the Committee on Graduate Degrees, Admissions, and Standards will obtain faculty evaluations of the doctoral students who have not met minimum criteria. These evaluations will be from representative instructors and should include the student's adviser and instructors from areas where students are having special problems. The student may also submit any data deemed pertinent. The Committee uses the above-mentioned data to determine whether the student needs changes in the required program, remedial assistance, probation, or dismissal.

Admission to Degree Program

Admission to an advanced degree program is synonymous with admission to graduate status and to the Graduate School of Education. Admissions requirements are indicated above. No screening examinations (other than described under Admissions Requirements) and no specific coursework are required for admission to a degree program.

In addition, for admission to a doctoral program, the following must have been completed—though not necessarily at UCLA:

Doctor of Education Degree: A Master of Education degree program or the equivalent.
Doctor of Philosophy Degree: A Master's degree program or the equivalent.
Major Fields or Subdisciplines
Fields of specialization which may be selected in completion of the specific degree programs are indicated below. The applicant is directed to the Education Office of Student Services for information regarding the appropriate faculty member(s) to be consulted with respect to enrollment and research opportunities, and/or course sequencing in each field of specialization.

Master of Education Degree:
(a) Administrative and Policy Studies in Education
(b) Bilingual/Cross-Cultural Education
(c) Curriculum and the Study of Schooling
(d) Teaching of Reading

Master of Arts Degree:
AREA I—SOCIAL AND PHILOSOPHICAL STUDIES IN EDUCATION
(a) Philosophy of Education
(b) Sociology and Anthropology of Education

AREA II—EDUCATIONAL PSYCHOLOGY
(a) Counseling
(b) Early Childhood Development
(c) Learning and Instruction
(d) Research Methods and Evaluation
(e) Special Education

AREA III—ORGANIZATIONAL AND ADMINISTRATIVE STUDIES IN EDUCATION
(a) Education and Work
(b) Higher Education

Doctor of Education Degree:
AREA I—SOCIAL AND PHILOSOPHICAL STUDIES IN EDUCATION
(a) Comparative and International Education
(b) Philosophy and History of Education
(c) Sociology and Anthropology of Education

AREA II—EDUCATIONAL PSYCHOLOGY
(a) Counseling
(b) Early Childhood Development
(c) Learning and Instruction
(d) Research Methods and Evaluation
(e) Special Education

AREA III—ORGANIZATIONAL AND ADMINISTRATIVE STUDIES IN EDUCATION
(a) Administrative and Policy Studies in Education
(b) Curriculum and the Study of Schooling
(c) Education and Work
(d) Higher Education

Foreign Language Requirement
There is no foreign language requirement in the Master of Education, the Master of Arts, or the Doctor of Education degree programs.

For the Doctor of Philosophy Degree, there is a foreign language requirement in the specialization fields indicated below:

Comparative and International Education
One foreign language of the student's preference; must be satisfied by passing the ETS foreign language examination with a minimum score of 500. (Test is administered by University Extension.)

Counseling
One foreign language of the student's preference; may be satisfied by:
(a) Passing the ETS foreign language examination with a minimum score of 500. (Test is administered by University Extension); or
(b) One year of residency in a country in which English is not the predominant spoken language; or
(c) Successful completion of two upper-division foreign language courses.

Curriculum and the Study of Schooling
One foreign language of the student's preference; may be satisfied by:
(a) Passing the ETS foreign language examination with a minimum score of 500. (Test is administered by University Extension); or
(b) Successful completion of two upper-division foreign language courses; or
(c) Successful translation of one assigned professional article from a foreign language into English; administered under supervised conditions.

Course Requirements
Master's Degrees:
Total number of courses required: A minimum of nine upper division and graduate courses (36 units). Required upper division courses: None.

Master of Education Degree:
Number of graduate courses required for the degree: At least five (20 units) in professional Education (400 series) courses.

Required graduate courses:

Curriculum and the Study of Schooling Specialization: Education 420A, 422, 490, and 498.

NOTE: Remaining courses for completion of the M.Ed. unit requirement are to be selected from the appropriate approved list of electives for each specialization; all elective courses must be approved by the student's adviser.

Master of Arts Degree:
Number of graduate courses required for the degree: six courses (24 units) in the 200/500 series; no more than two courses (8 units) may be in the 500 series.

Required graduate courses: Two courses must be selected from:
200A Historical Research and Writing
200B Survey Research Methods in Education
210A Basic Concepts in Educational Research
210B Experimental Design in Educational Research

Additional courses to complete the 36-unit requirement may be selected from offerings of Education and other departments upon approval of the student's adviser.

Doctoral Degrees:
(a) A minimum of three courses beyond the baccalaureate degree in research methods or formal processes of inquiry. Such courses may be taken within or outside of the Department of Education; at least two courses must be completed in this University.

(b) A minimum of one approved breadth course, including a final examination, in each of four specified breadth categories.

(c) Additional coursework as specified by the student's adviser.

Doctor of Education:
A field experience minimally approximating a 1-course requirement.
Doctor of Philosophy:
(a) A coherent program of a minimum of five graduate courses, or their equivalent, in an approved UCLA cognate department. The five courses constituting a particular cognate sequence shall be determined by the academic adviser in consultation with the student, and approved by the Committee on Graduate Degrees, Admissions, and Standards.

NOTE: The necessity for cognate courses in addition to the stated minimum shall be determined by the student's academic adviser in consideration of the individual's academic preparation.

(b) A research internship minimally approximating a 1-course requirement.

Before the written qualifying examination for a doctoral degree may be taken, the student must have completed all required coursework, or have in progress during the quarter in which the examination will be taken, no more than one required course and one practicum (for Ed.D., Education 499—Advanced Directed Field Experience; for Ph.D., Education 299—Research Practicum in Education). The student's academic record must be clear of Incomplete grades or Incomplete grades turned to F.

Master's Degree Thesis or Comprehensive Examination Plan

Comprehensive examinations for master's degrees are offered twice yearly, once in the Fall Quarter and once in the Spring Quarter at a place designated by the Committee on Graduate Degrees, Admissions, and Standards. For each field of specialization, a comprehensive examination committee comprised of a minimum of three specialization faculty members is appointed by the Specialization Head to prepare and read the examinations for all students in that specialization. The specialization examination committees, as required, are appointed following established deadlines for student admission to the comprehensive examinations.

Master of Education Degree:
No thesis plan is offered in the M.Ed. degree program.

Required examinations:
(a) A comprehensive written examination designed to assess:

1. Comprehension of the professional knowledge basic to the selected field of specialization including key concepts and principles, major theoretical positions, and fundamental issues.

2. Understanding of the broad educational context in which the selected professional field resides.

(b) A performance examination designed to assess the student's competency in the solution of problems in the selected professional field; a test not of what the student knows, but whether knowledge can be applied in a real or simulated professional setting.

Examination foci for specialization fields are indicated below:
Administrative and Policy Studies in Education Specialization

The comprehensive written examination is designed to assess:
(a) Comprehension of the professional knowledge in the field of Urban School Administration, focusing on such topics as bureaucracy, leadership, role conflict, change, the school and the community, and urban problems.
(b) Comprehension of the state and national influences on urban administrators.
(c) Competency in the solution of a practical field problem, drawing upon coursework, readings, and the internship experiences.
(d) Ability in reviewing and critiquing research study reports to include an analysis of the appropriateness of research methodology.

For a Master of Education or Master of Arts degree, the comprehensive examination may be taken a maximum of two times. After a second failure of this examination, a student will be allowed to continue in the Graduate School of Education only in highly unusual circumstances. A third attempt to pass an examination will require the consent of the field of specialization and approval of the Committee on Graduate Degrees, Admissions, and Standards. No fourth attempt is possible under any circumstances.

After three failures in the examination, the student must be dropped from the Graduate School of Education at the end of the quarter in which the third failure occurs.

Each examination application requires the written approval of the student's adviser.

Written and Oral Qualifying Examinations for Doctoral Degrees

For the Doctor of Education degree, the student must complete the following written and oral qualifying examinations:

(a) A written examination in the specialization concerned with key concepts and issues in the profession; will draw from specialized content as well as from content of related specialization and the major Area of study.
(b) A professional competency performance examination; includes demonstration of technical and artistic skills; e.g., may utilize simulated school setting or actual field setting to assess skills in decision-making, interaction, information-gathering, problem-solving.

(c) An oral examination conducted by the student's doctoral committee employing topics from education which are related to the student's research proposal.

For the Doctor of Philosophy degree, the student must complete the following Written and Oral Qualifying Examinations:

(a) A written examination in the major Area of study. Half of the examination will be concerned with central topics in the selected Area as a whole; half will focus on the specialized field of study selected within the Area.

(b) An oral examination conducted by the student's doctoral committee employing topics from both education and the cognate discipline which are related to the student's research proposal.

**NOTE:** For a doctoral degree, research methodology, breadth, and Ph.D. cognate field examinations will be those given in connection with individual courses.

Faculty members in a student's selected specialization and major Area form the doctoral examination committee; typically, the committee membership averages five. Each member of the committee submits questions to the Head of the specialization and participates in determination of the final content of the major examination. Examinations are read and scored by at least two faculty members from the specialization. An additional member is designated to serve as arbiter in the event of disagreement regarding examination results. The written examination is administered through the Committee on Graduate Degrees, Admissions, and Standards; the performance examination for the Doctor of Education degree is administered by the professional examination committee.

The written major examination is offered twice yearly, once in the Fall Quarter and once in the Spring Quarter, at a place designated by the Committee on Graduate Degrees, Admissions, and Standards. This examination is not administered at any other time or place. The examination may be taken only by eligible students who have been recommended by their advisers and who have been admitted to the examination by the Committee on Graduate Degrees, Admissions, and Standards.

Any written qualifying examination may be taken a maximum of two times. After a second failure of an examination, the student will be allowed to continue in the Graduate School of Education only in highly unusual circumstances. A third attempt to pass an examination will require the consent of the field of specialization and approval of the Committee on Graduate Degrees, Admissions, and Standards. No fourth attempt is possible under any circumstances.

After three failures in any specific examination, the student must be dropped from the Graduate School of Education at the end of the quarter in which the third failure occurs.

Each examination application requires the written approval of the student's adviser.

The doctoral committee is formed subsequent to the student's successful completion of written—and if applicable, performance—qualifying examinations. For the Doctor of Education degree, the Committee consists of three members from the Department of Education and one member from each of two other departments; for the Doctor of Philosophy degree, three members from the Department of Education and two members from departments other than Education—at least one of whom must be from the student's cognate department. This committee, nominated by the Department of Education and appointed by the Dean of the Graduate Division, conducts the Oral Qualifying Examination.

In the quarter preceding the one in which the student plans to take the Oral Qualifying Examination, a request must be filed with the Committee on Graduate Degrees, Admissions, and Standards for admission to the oral examination. At that time, all courses and professional experiences in progress or completed as a part of the program of study will be listed. The Oral Qualifying Examination may be taken a maximum of two times. If a student fails the initial oral examination, the chairperson of the doctoral committee will report the reasons for the failure and recommend to the Committee on Graduate Degrees, Admissions, and Standards either that the student be dropped from the School or be permitted to take the Oral Qualifying Examination a second time together with whatever further requirements are delineated. At least one full quarter must elapse before a second examination will be given. After a second failure of an Oral Qualifying Examination, a student is dropped from the Graduate School of Education.

At the option of the certifying members of the doctoral committee, a Final Oral Examination may be required.

**Time to Degree**

**Master's Degree programs:**

Graduate admission and admission to a master's program are synonymous. From graduate admission to completion of required courses, normal progress is from one to two years (3-6 quarters).

From graduate admission to award of the degree, normal progress is from one to two years (3-6 quarters).

The comprehensive examination may be taken during the last quarter of coursework or during a quarter subsequent to completion of coursework.

For the Master of Arts degree, the thesis (if elected in lieu of the Comprehensive Examination Plan) would be written subsequent to completion of coursework.

**Doctoral Degree Programs:**

From graduate admission to the Written and Oral Qualifying Examinations: three to four years (9-12 quarters).

From graduate admission to the approval of the dissertation prospectus: three to four years (9-12 quarters).

From approval of dissertation prospectus to the Oral Qualifying Examination: same quarter.

From advancement to candidacy to the Final Oral Examination: one year (3 quarters).

From graduation to the awarding of the degree: five years (15 quarters).

**500 Series Course Limitations for Master's Degrees**

**Master of Education Degree:**

No 500 series courses may be applied toward the Master of Education degree. Education course 597 is available to the M.Ed. student, to be taken on an optional basis. (Maximum credit, 12 units. To be graded S/U.)

**Master of Arts Degree:**

<table>
<thead>
<tr>
<th>Course No.</th>
<th>Unit Value</th>
<th>Type of Grading</th>
<th>Maximum Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>596</td>
<td>2-8</td>
<td>Letter grade</td>
<td>12 units</td>
</tr>
<tr>

</tr>
</tbody>
</table>

Number of 500 series courses that may be applied toward the divisional course minimum: 2 courses (8 quarter units)

Number of 500 series courses that may be applied toward the graduate course minimum: 2 courses (8 quarter units) (The minimum graduate course requirement in the Graduate School of Education is six courses.)

**Teaching Experience Requirements**

**Master of Education Degree:**

For some M.Ed. specialization, teaching experience is required:

Administrative and Policy Studies in Education Specialization

Students with a valid teaching credential are preferred.

Bilingual/Cross-Cultural Education Specialization

Completion of an approved program of professional preparation leading to a preliminary teaching credential and classroom experience—as a teacher or aide—for at least two years, at any level of schooling, are required.

Curriculum and the Study of Schooling Specialization

Experience as a practitioner in the specialization field is advantageous.
Teaching of Reading Specialization
Completion of an approved program of professional preparation leading to a preliminary teaching credential and one year of successful teaching prior to or concurrent with the M.Ed. Reading Program are required.

Master of Arts Degree:
No teaching experience is required.

Doctor of Education Degree:
The admissions criteria for the Ed.D degree program include the requirement of at least two years of successful professional experience in education or the equivalent. If an exception is made at the time of admission, this requirement must be completed prior to advancement to candidacy.

Doctor of Philosophy Degree:
No teaching experience is required.

Disqualification and Appeal of Disqualification
Recommendations for termination of graduate status originate with the faculty of the student's specialization field; subsequently, all cases are reviewed and decisions rendered by the Committee on Graduate Degrees, Admissions, and Standards.

Specific conditions which may lead to termination include:
Failure to maintain specified required progress toward the degree;
Failure to maintain a grade point average of 3.0 or higher;
For a master's degree, failure of the comprehensive or performance examination, or failure to complete a satisfactory thesis, as applicable;
For a doctoral degree, failure of a qualifying or a required final oral examination.

Instances of suspected infraction of the Academic Senate regulations regarding classroom honesty would be forwarded, following review by the Committee on Graduate Degrees, Admission, and Standards, to the appropriate administrative officer of the University for consideration of disciplinary proceedings against the student.

Grievances pertaining to policy and procedures of the School may be formally presented to the Committee on Graduate Degrees, Admissions, and Standards for decision; final appeal of any decision would be to the Dean of the School. Beyond the School setting, instances of continued complaint would be referred to the Dean of the Graduate Division.

Other Relevant Information
Master of Education Degree:
The Master of Education degree is a professional master's degree designed to meet the needs of the individual preparing for a mid-level professional position in schooling or for advanced graduate study; it is the appropriate degree to provide professional foundation study in preparation for the Ed.D. program.

Education 498, Directed Field Experience, is a requirement for all M.Ed. specializations.

Final course grades are utilized in determining mastery of content from related courses which are elected on an individual basis. A minimum grade point average of 3.0 is required for all elected related courses serving in fulfillment of M.Ed. requirements.

Master of Arts Degree:
The Master of Arts degree in Education is a master's degree designed to meet the needs of the individual preparing for a career in basic research or for advanced graduate study; it is the appropriate prerequisite education degree for the Ph.D. degree program.

There is no general requirement of field experience or research internship for the Master of Arts degree in Education; such requirements may be included at the discretion of particular specialization fields.

Doctor of Education Degree:
The Doctor of Education degree is a professional degree designed to meet the needs of individuals preparing for careers of leadership and applied research in the schools and community educational programs. Emphases include practice, applied studies, and knowledge related to professional skills. A field experience minimally approximating one course is required.

Doctor of Philosophy Degree:
The Doctor of Philosophy degree in Education is an academic degree designed to meet the needs of the individual preparing for a career in basic research or college level instruction. Emphases include theory, research methodology, basic studies, and indepth knowledge in education and a cognate field. A research internship minimally approximating one course is required.

Graduate Courses

Area I:
Social and Philosophical Studies in Education

Fields of Specialization:
Comparative and International Education
Philosophy and History of Education
Sociology and Anthropology of Education

Comparative and International Education
204A. Topics and Issues in International and Comparative Education. Analysis of basic topics and issues in comparative and international education. Emphasis is placed on those topics and issues that cut across national boundaries and are at the forefront of educational policy and practice in both developed and developing nations.

Mr. Hawkins, Mr. LaBelle and Staff
204B. Introduction to Comparative Education. An examination of conceptual and methodological questions underlying comparative education. Particular attention is given to the development of the field and to styles of social analysis which may be applied to comparative and cross-national studies in education.

Mr. Hawkins, Mr. LaBelle, Mr. Rust
204C. Education and National Development. Application of social science perspectives and methodologies to education in the international context. Emphasis on relevant research literature and development processes and strategies for international development education with concentration on so-called less developed countries.

Mr. Hawkins, Mr. LaBelle, Mr. Rust
204D. Minority Education in Cross-Cultural Perspective. Historical and contemporary analyses of educational policies with regard to ethnic, religious, and linguistic minorities through selected national and international case studies. Introduction to cross-cultural education in representative countries in relation to social, political, and economic systems. The Staff
204E. International Efforts in Education. Analysis of problems and concepts related to diffusion, borrowing, and adaptation across cultural and national boundaries. Activities of bilateral and multilateral agencies in promoting international education are examined, as well as conceptual and practical curricular efforts which intend to increase international understanding. The Staff
204F. Nonformal Education in Comparative Perspective. A comparative and international study of organized and systematic educational activity for children, youth, and adults carried on outside of schools. The types of programs studied include, among others, consciousness raising, community action, skills training, literacy, and extension programs.

Mr. Hawkins, Mr. LaBelle, Mr. Rust
204G. Planning Educational Language Policy Internationally. Analysis of problems and issues involved in formulating a language education policy. Particular attention is given to planning for the use of vernacular languages in education as well as analyzing models and research for multilingual/bilingual education in various countries. The Staff
235A. Seminar: Current Problems in Comparative Education.
235B. Seminar: African Education. The Staff
235C. Seminar: Asian Education. Mr. Hawkins
235D. Seminar: Latin American Education. Mr. LaBelle
235E. Seminar: European Education. Mr. Rust
235F. Seminar: Education in Revolutionary Societies. A multidisciplinary and comparative study of socialist educational theory is examined through the writings of Marx, Lenin, Mao, and others. The implementation of this theory in specific case studies along with comparative assessments of nonsocialist nations will be explored.

Mr. Hawkins, Mr. LaBelle, Mr. Rust
235G. Seminar: The Asian American and Education. Basic issues and topics related to Asian Americans in the field of education. Examples of these issues and topics are Asian Americans and the community, socioeconomic status, the education-to-work transition, the language and culture question.

Mr. Hawkins

253H. Seminar: The Chicano/Hispanic and Education. Basic issues and topics related to the Chicano and other Hispanic groups in education. Reviews literature on specific educational levels and Chicano/Hispanic student progress; e.g., early childhood, elementary, high school, specific topics, assessment, access, tracking, segregation; implications for schooling. The Staff

Philosophy and History of Education

200A. Historical Research and Writing. Techniques of historical research and writing. For students who are or who will be engaged in research and report or paper or thesis writing, regardless of their field of interest. Mr. S. Cohen

201A. History of Western Education. The rise of the Western Educational tradition; major ideas, institutions, personalities. From the world of the Greeks to that of the Twentieth Century. Mr. S. Cohen

201B. History of American Education to 1860. Development of American education from the 17th Century to the Civil War. The emergence of the public school system in the context of social, intellectual and political change. Mr. S. Cohen

M201C. History of American Education. (Same course as History M264.) The aim is to depict the social forces impinging on American education from the 1860's to the present, and to analyze the relation between these social forces and the philosophy, curriculum, structural organization, and functions of education at all levels. Mr. S. Cohen

206A. Philosophy of Education Introduction. Systematic introduction to the field, indicating ways in which philosophy serves to elucidate educational aims, content, methods, and values. Mr. Ellett, Mr. Weinberg

206B. Philosophy of Education: Existentialism and Humanism. Examination of existentialist ideas and their application in contemporary humanistic movements in school and society. Mr. Ellett, Mr. Weinberg

206C. Philosophy of Education: Logic and Language. Conceptual analysis of recurrent and contemporary themes in the field. Emphasis is on the development of logical and linguistic skills used in the analysis of educational problems and issues. Mr. Ellett, Mr. Weinberg

206D. Philosophy of Education: Ethics and Values. A study of ethics and value theory in teaching and learning, educational organization and policy, and curriculum design and validation. Mr. Ellett

206E. Philosophy of Education: Introduction to Humanism in Education. Examines the philosophical foundations of humanism and their relationships to educational theory and practice. Mr. Weinberg

250A. Seminar: History of Education. Selected topics in History of Education: discussion, research, and writing. Mr. S. Cohen

250B. Seminar: History of Education. To be given alternate years. Advanced seminar in bibliography and historiography in history of education. Mr. S. Cohen

251B. Seminar: Philosophy of Education, Behavioral Science Problems in Education—Humanistic Perspectives. Prerequisite: course 206E or consent of instructor. Mr. Weinberg

251C. Seminar: Philosophy of Education, Behavioral Science Problems—Methodological Perspectives. Prerequisite: course 206C or consent of instructor. Mr. Ellett, Mr. Weinberg

251D. Seminar: Philosophy of Education, Problems in Ethics and Values. Prerequisite: course 206D or consent of instructor. Mr. Ellett

251E. Seminar: Philosophy of Education, Selected Issues. The Staff

Sociology and Anthropology of Education

M108. Sociology of Education. (Same as Sociology M143.) Prerequisite: Sociology 1A or 101. Study of social processes and interaction patterns in educational organizations; the relationship of such organizations to aspects of society, social class and power; social relations within the school, college and university; formal and informal groups, subcultures in educational systems; roles of teachers, students and administrators. Mr. O'Shea, Ms. Wrigley

200B. Survey Research Methods in Education. Prerequisite: course 210A or equivalent. Problems of conceptualization, organization and gathering non-experimental and quasi-experimental quantitative and qualitative data. Mr. O'Shea

200C. Analysis of Survey Data in Education. Three class hours, two hours of laboratory. Prerequisite: course 208B. Introduction to techniques of processing and analyzing non-experimental and quasi-experimental quantitative data. Mr. O'Shea

203. Educational Anthropology. Prerequisite: Anthropology 22 recommended. Study of education through the research and method of the cultural anthropologist. Interdependence of culture and education with emphasis placed on cross-cultural studies of enculturation, schooling, values, cognition, language, and cultural change. Mr. LaBelle

207. Politics and Education. Course explores the political dimensions of both formal and nonformal educational enterprises in a national and international perspective. Political theory will be explored in the context of such educational issues as policy formation, pressure groups, and public and private elites. Mr. Hawkins and Staff

208A. Perspectivas on the Sociology of Education. Designed to introduce students to sociological perspectives on current issues in educational policy and practice. Issues addressed include desegregation; decentralization, equality of educational opportunity, structure of educational organization, teacher-student relationships, reform in education at the elementary, secondary, postsecondary levels. Mr. Gordon, Mr. O'Shea, Ms. Wrigley

208B. Issues in Education: Sociological Perspectives. Prerequisite: course 208A or equivalent. Exploration of educational issues, and the structure and processes of formal schooling, from sociological perspectives such as functionalism, conflict theory, symbolic interactionism, ethnomethodology, and critical sociology. Mr. O'Shea

252A. Seminar: Educational Organization. Prerequisite: course 208A or consent of instructor. Mr. Gordon, Mr. O'Shea, Ms. Wrigley

252B. Seminar: Education and Social Change. Prerequisite: course 208A or consent of instructor. Mr. LaBelle, Mr. O'Shea

275. Seminar: School Desegregation. Prerequisite: consent of instructor. Analysis of the social-political response to desegregation programs in Northern and Southern school districts; review of court decisions and development of legal policy on school desegregation. Consideration of effects of integration on school achievement and inter-racial attitudes. Ms. Wrigley

Area II: Educational Psychology

Fields of Specialization:

Counseling

Early Childhood Development

Learning and Instruction

Research Methods and Evaluation

Special Education

Counseling

213A. Fundamental of Student Personnel Work. Prerequisite: graduate student or consent of the instructor. Analysis and in-class application of student and pupil personnel service methods, with emphasis on task groups and evaluation. Mr. Healy, Mr. Sorenson

213B. Legal and Ethical Bases of Student Personnel Work. Prerequisite: course 213A. Ethical and legal codes relevant to pupil personnel services; relation of value systems and personality; case studies in the implications of personal values in counseling situations. Mr. Berry, Mr. Sorenson

213C. Group Process in Education. Group productivity, leadership, social perception and attitude formation, decision-making, determination of group interaction variables and the effect of behavior changes in individuals and groups. Mr. Berry, Mr. Sorenson

214A. Counseling Theory and Practice. Application of concepts drawn from cognitive psychology to the non-academic problems which people encounter in everyday life, such as finding suitable employment, achieving satisfying interpersonal relationships, and making productive use of leisure time. Mr. Sorenson

214B. Advanced Counseling Theory and Practice. Prerequisite: limited to candidates for advanced degrees whose major interest is counseling, and to selected high school and college counselors. Counseling procedures, educational planning, and methods for helping students handle personal problems that interfere with school progress; critical evaluation of procedures. Mr. Sorenson

214D. Vocational Guidance. Depth study of current interests and needs in vocational guidance; principles, problems, and practices of vocational guidance. Mr. Berry, Mr. Healy

216. Counseling in the Urban School and Community. Prerequisite: course 213A or 214A and consent of the instructor. Research related to the psychological, educational, and sociological characteristics of urban students and the implications for counseling models. Development and evaluation of counseling procedures through practice-containing experiences dealing with school and community groups. Mr. Berry

257. Seminar: Pupil Personnel Services. Mr. Berry, Mr. Healy, Ms. Tidwell
41A. Internship in School Psychology. Prerequisite: consent of the instructor; courses 41A-413B must be completed in three consecutive quarters; limited to students enrolled in the Counseling specialization. Two class hours, sixteen hours of field experience. Working in public schools or comparable setting performing duties of a school psychologist—psychodiagnosis, integrating case material, selecting cases, developing case reports, writing reports, working with teachers and parents, and establishing evaluative criteria. Ms. Healy, Ms. Tidwell

415A. The Appraisal of Intelligence. Prerequisites: courses 210A and 211A. Concepts and theories leading to development of individual cognitive assessment instruments; issues and implications relating to the application and current practices of utilizing such tests in a multi-cultural setting. Laboratory experience includes administration and interpretation of standardized instruments; case studies. Ms. Healy, Ms. Tidwell

415B. Human Appraisal in School Counseling and School Psychology. Prerequisites: course 415A and consent of the instructor. Survey and demonstration of techniques of cognitive, affective, and achievement appraisal and their applicability to problems found in the school setting. Research and theoretical issues concerned with appraisal will also be discussed. Ms. Tidwell

Early Childhood Development

217A. Child Development and the Educational Process. Biological and familial, school, and other influences on the child; development in the context of current research and theoretical models; consideration of theoretical and methodological research on family and school; application of developmental theory and research to educational practice. Ms. Stipek

217B. Intellectual Development and School Performance. Prerequisite: course 217A or equivalent. Developmental, behavioral, environmental, genetic, structural, cross-cultural, and methodological approaches to the study of intellectual functioning and educational performance in preschool and school children. Ms. Stipek

217C. Personality Development and Motivation in Education. (Same as Psychology M245.) Personality development and environmental conditions which form motivational patterns; self-concept, moral behavior, aggression; creativity; sex differences, empathy, research and personality theory bearing on motivational problems in school settings; individual and group counseling development. Ms. Feshbach

217D. Language Development and Education. Research and theory on how children develop their first language. Sociolinguistic and psycholinguistic issues in preschool and primary years. Bilingual and sociocultural issues. The Staff

217E. Developmental Problems in Early Childhood. Prerequisite: Two core courses in development and learning. Problems of atypical development during early childhood viewed from an interactional position which has significance for later learning and education. Topics include early identification; implications for school learning; impact of disability on parent-child interactions; and early intervention programs. Ms. Koegh

217F. Human Development and the Educational Process. Learning and cognitive-developmental theories of human development and learning; cultural, family, and schooling influences on human development; application of developmental and research to educational practice. Ms. Stipek

255B. Seminar: Special Topics in Development. Prerequisite: consent of instructor. Ms. Feshbach, Ms. Stipek

256A. Seminar: Early Childhood Education. Prerequisite: courses 421A-431B. Ms. Feshbach

217A. Programs, Models and Research in Early Childhood Education. Prerequisite: one course in the development series and one quarter field placement. Introduction to programs and research in early childhood education. Observation of preschool programs (cooperative nurseries, Headstart, private nurseries, Montessori preschools, day care centers). The organization and evaluation of educational research and its relation to goals of early childhood education. The Staff

217C. Research and Evaluation of Early Childhood Programs. Prerequisite: course 217A or equivalent. Critical review and evaluation of the various preschool and remedial programs for the young child. Analysis of findings in existing literature and methodological issues; cross-cultural research on early childhood education programs. The Staff

217D. Parents and Community Agents in Child Development. Prerequisite: two courses from the development sequence and one course from early childhood education, or equivalent. Parents and community agents as resources for childhood education. Training parents of preschoolers and elementary school students in community. Development of culturally significant school programs derived from examination of experiences of young children. Ms. Feshbach

217F. Current Perspectives in Early Childhood Development for the Professional. Prerequisite: recommendation for professional status in Early Childhood Education. Critical issues and recent developments in the field and practice of Early Childhood; organization, curriculum, and program evaluation; policy and legislative issues; community; the role of parents and participation in programs; cognitive, emotional and exceptional development: early intervention and mental health. Ms. Feshbach and Staff

Learning and Instruction

113. Instructional Psychology: Major psychological approaches to the processes of learning and motivation in the instructional setting. The psychology of teaching methods. Issues in the design and evaluation of instruction. Mr. Keislar

205. Computers in the Educational Process. Introduction to the use of computers in education, with emphasis on computer-assisted instruction (CAI), computer-managed instruction (CMI), and the use of computers by educational administrators for scheduling, monitoring, and student performance assessment. The Staff

212A. Learning and Education. Models of learning, modeling, reinforcement, motivation, encoding, memory, transfer, individual differences, and instruction. Mr. Popham

212B. Motivation and Affect in the Educational Process. Prerequisites: courses 210A and 212A. A review of the theoretical and empirical literature on motivational factors in school settings and the conditions for the acquisition of affective outcomes. Mr. Keislar

212C. Cognition and Creativity in Education. Prerequisite: course 212B. A review of the theoretical and empirical literature on cognitive processes in school learning, including concept learning, problem solving, learning to learn, and creativity. Mr. Wittrock

215. Experimental Research in Personality. (Same as Psychology M239.) The course will focus upon the theoretical and empirical aspects of personality research in the instructional setting. The evening review of research and methodology. Mr. Wittrock

236. Educational Testing. Prerequisite: course 210B or equivalent. The nature, design, and development of tests and the use of tests in educational research and practice. Review of research and theory of models of ability and test development. Ms. Webb

Research Methods and Evaluation

210B. Experimental Design in Educational Research. Prerequisite: Knowledge of descriptive statistics. Inference. Randomization test or t-test. Normal curve test. Analysis of variance: one way and factorial designs. Internal and external threats to validity of research conclusions. Mr. Burstein, Mr. Shavelson, Mr. Skager

210C. Experimental Design: Advanced Topics. Prerequisite: course 210B or equivalent work. Completely randomized designs, randomized block designs, nested designs, and their combinations into advanced factorial designs using fixed, random, and mixed models. Analysis of covariance, introduction to multiple regression and quasi-experimental designs. Mr. Shavelson, Ms. Webb and Staff
210D. Experimental Design: Multivariate Analysis. Prerequisite: course 210C or equivalent work. Review of multiple regression analysis, analysis of covariance, introduction to matrix algebra, introduction to multivariate normal distribution, multivariate analysis of variance, stepwise discriminant function analysis, analysis of repeated measurements, canonical correlation. Principal components. Ms. Webb

211A. The Measurement of Educational Achievement and Aptitude. Prerequisite: course 210A. A critical study of tests of achievement and aptitude with an emphasis on group tests; the relation of achievement to aptitude, social implications of the measurement of intelligence; elements of validity and reliability. Mr. Alkin, Mr. Popham, Mr. Skager

211B. Measurement in Education: Underlying Theory. Prerequisite: course 211A. Measurement theory as applied to testing, focusing primarily on classical test theory; implications of theories for test construction and selection; current status of validity and reliability theory. Mr. Burstein, Mr. Shavelson

211C. Problems in Measurement. Prerequisite: course 210B. Regression-based techniques for analyzing quantitative data; multiple regression methods, multiple correlation, partial correlation; introduction to the general linear model, with direct application to educational inquiry. Mr. Burstein, Ms. Webb

218A. Quasi-Experimental Models in Educational Research. Prerequisites: course 218A or the equivalent and consent of instructor. Study of the assumptions and limitations inherent in quasi-experimental research designs. The time-series intervention design will be stressed. The students will be able to design an appropriate quasi-experiment to assess the impact of a particular educational intervention. The Staff

218C. Causal Models in Non-Experimental Research. Prerequisites: courses 218A or the equivalent and consent of instructor. Study of the inferential bases for the construction and validation of causal models in settings where true experiments are not appropriate. Statistical models from sociology, biology, and econometrics will be discussed. Assumptions and limitations of these models will be stressed. Mr. Burstein and Staff

219. Laboratory: Advanced Topics in Research Methodology. (1/2 course) Provides assistance in the design of research and interpretation of data to advanced students from other specializations. Coverage of special topics not included in other courses on research methods.

221. Critical Analysis of Empirical Research in Education. Prerequisites: courses 210A and 210B or equivalent background, and consent of instructor. A course examining contemporary empirical research in education and its relevance to educational practice. Designed to develop critical skills in reviewing substantive and methodological aspects of research. Mr. Shavelson

M222A. A Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Anthropology M236Q and Psychology M235.) Prerequisite: consent of instructor. The skill of observing and recording behavior in natural settings will be taught emphasizing field training and practice in observing behavior. Some of the uses of observations and their implications for research in the social sciences will also be discussed. Students will be expected to integrate observational work into their current research interests. Mr. Levine

222B. Design Issues in Naturalistic Research. Prerequisite: course M222A or consent of instructor. Issues in the conceptualization and design of naturalistic research studies particularly within educational settings. Specific topics include problem definition and focus, units of observation, sampling, controlled comparisons and meaningful variation, and reliability/validity concerns in observational research. Mr. Levine

222C. Qualitative Data Reduction and Analysis. Prerequisite: course M222A or 222B or consent of instructor. Theory of and practice in qualitative data reduction and analysis. Discussion of data storage and retrieval systems, data manipulation techniques such as typologies and process-product statements, and specific analytic perspectives. Interfacing qualitative and quantitative data also emphasized. Mr. Levine

225A. Issues in the Education of Exceptional Individuals. Prerequisite: limited to students in graduate degree programs. Analysis of major research regarding contemporary trends, issues, and programs for the exceptional; consideration of commonalities and differences among exceptional individuals. The Staff

225B. Advanced Issues in the Education of Exceptional Individuals. Prerequisite: consent of instructor. Provides a synthesis of developmental and educational theory relevant to the study of exceptional individuals. The course also includes consideration of the historical context of current research and applied issues in special education. Ms. Keogh, Ms. Kopp

226. Research in the Education of Learning Handicapped Individuals. Prerequisite: course 225A or consent of instructor. Research on the education of individuals with learning handicaps, with emphasis on assessment and instructional modifications. The Staff

227A. Research on the Learning Characteristics of Exceptional Individuals. Prerequisite: course 225B. An overview of research and theory regarding learning characteristics of exceptional individuals, and discussion of the application of this work to educational practice. Ms. Krupski

227B. Research on the Cognitive and Language Characteristics of Exceptional Individuals. Prerequisite: course 227A. Review of the empirical and theoretical literature regarding the language and cognitive development of exceptional individuals; focus on intervention programs developing language and cognition. Mr. Mahoney

227C. Research on the Behavioral and Social Characteristics of Exceptional Individuals. Prerequisite: course 227B. Analysis of social and emotional development of exceptional individuals, and the development of social competence in special education programs. Mr. Hewett

280A. Seminar: Selected Topics in Special Education. (1/2 course) Prerequisite: consent of instructor. The Staff

280B. Seminar: Exceptional Individuals. Prerequisite: admission to a doctoral program. The Staff

325A. Laboratory in the Education of Exceptional Individuals. Prerequisite: course 125A or consent of instructor. Six to eight hours per week field work in the UCLA Neuropsychiatric Institute School, other campus facilities, or public school special education programs. The Staff

325B. Advanced Laboratory in the Education of Exceptional Individuals. Prerequisite: course 325A. Six to eight hours per week field work in the UCLA Neuropsychiatric Institute School, other campus facilities, or public school special education programs. The Staff

425. Appraisal of Exceptional Individuals. Prerequisite: courses 225A and 415A or the equivalent. Individual appraisal of exceptional individuals; analysis of tests and diagnostic procedures, case studies. The Staff

501. Cooperative Program in Special Education. (1/2 to 2 courses) Prerequisite: approval of UCLA Graduate Adviser and Graduate Dean. Approval of host campus Instructor, Department Chairman, and Graduate Dean. Limited to UCLA doctoral students in Special Education. This course is used to record the enrollment of UCLA doctoral students in practicum courses taken under cooperative arrangements with California State University, Los Angeles. To be graded S/U. The Staff
Area III:
Organizational and Administrative Studies in Education

Fields of Specialization:
Administrative and Policy Studies in Education
Curriculum and the Study of Schooling
Education and Work

Higher Education

Administrative and Policy Studies in Education
147. Social Science Methods and the Law. Prerequisite: upper division undergraduate, two years of college level mathematics, or consent of instructor. A quantitative orientation for understanding and critically analyzing the emerging impact of social science methods and the law. Fundamental skills in statistical and economic analysis of data will be provided along with illustrations of their use in landmark legal cases.

240A. School Administrative Practices Since 1900. An examination of school administration since 1900 as it has responded to social, political, and economic pressures exerted on schools. Development of sensitivity to current pressures and alternatives for administrative response.

241. Research Methodology in School Administration. Prerequisite: consent of instructor. Examination of research problems and strategies in school administration.

242. Economic Analysis for Educational Policy and Planning. (Formerly numbered 242E.) Prerequisite: Graduate standing. The applications of econometrics-based methodologies for analysis of issues in educational policy and planning. Techniques addressing educational problems of organization of activities, classification, prediction, optimization, goal setting, and measuring inequalities are discussed.

244. Economics of Education. An introductory course in micro- and macro-economic techniques applied to education. Methodologies as marginal analysis, linear programming, Leontief I-O models, Lorenz curve analysis are discussed with application to school finance, underdeveloped countries, equality of educational opportunity and credentialing.

246A. Seminar: Mathematical Modeling in Educational Policy Analysis. Prerequisite: course 242, two years of college level mathematics, knowledge of computer programming, or consent of instructor. Mathematical modeling of educational processes and problems. Deterministic modeling techniques, in addition to stochastic modeling techniques, are discussed. A mathematics review and instruction in the use of the MPS 360 (Mathematical Programming Code) are provided.

246B. Seminar: Operations Research—Systems Analysis in Education. Prerequisite: courses 242 and 246A, two years of college level mathematics, computer programming, or consent of instructor. Advanced topics in the application of quantitative analysis to educational policy and planning. Methodologies such as Igt models, Bayesian analysis, game theory, differential equation growth models and advanced topics in production and human capital theories will be discussed.

246C. Strategic Planning in Education. Problems of goal formulation; interorganizational competition; and control of environmental forces affecting resource utilization, with particular attention to the utility of open-planning models in providing alternative resource-allocation patterns.

400B. Problems in Educational Government and Finance. (Formerly numbered 240B.) Intensive study of problems and issues affecting the governance and finance of schools.

440C. Administration of the Instructional Program. (Formerly numbered 240C.) Examination of current educational problems in the society and the strategies of their solution through curriculum policy and practice; instructional design and operation; and in-service training of teaching staffs.

442A. Administration of Large Systems and Individual Schools. (Formerly numbered 242A.) Prerequisite: consent of instructor. Theoretical and functional problems in the administration of large systems and decentralized individual schools.

442B. Legal Aspects of Educational Management and Practice. Examination of the structures and kinds of law governing educational systems in the United States; constitutional dimensions of church/state relations; employees' civil rights and legal aspects of hiring, firing, and negotiating procedures; student attendance, control, and civil rights.

442D. Educational Finance. (Formerly numbered 242D.) Historical and theoretical background of educational finance: considers principles related to federal and state participation in educational finance; considers other economic factors related to the provision and utilization of financial resources in schools.

442E. Administration of In-Service Education. (Formerly numbered 242E.) Emphasis on the development of knowledge, skills, and attitudes essential to exercising leadership in the facilitation of the professional growth of teachers, school administrators, and other educational personnel, especially as such growth contributes to instructional improvement and relevant curriculum development.

443. Introduction to Policy Analysis in Education. Prerequisite: consent of instructor. An overview of the political, economic, and legal context of educational policy formation. Included in this examination will be issues that impact on minorities; e.g., bilingual education, desegregation, affirmative action, testing, tracking, bilingual/bicultural education, special education, correctional education, and malpractice suits.

444A. Equality of Educational Opportunity through Desegregation and Finance Case Law. Prerequisite: course 444B or consent of instructor. A concentrated review of the definition of educational opportunity as it is being developed by the courts in cases concerning desegregation and educational finance.

444B. Seminar: Educational Policy and Planning, Special Studies. (Formerly numbered 247.) Prerequisite: consent of instructor.

448A. Urban School Leadership. Prerequisite: consent of instructor. Analysis of the problems of urban school leadership. Emphasis is placed on the changing nature of the urban principalship; however, considerable attention is given to the role of other school and community agencies that interact with the urban school leader.

448B. Urban Leadership Laboratory. Prerequisite: consent of instructor. Analysis of opportunity to practice human and technical skills required for success as an urban school leader. Topics include negotiations, conflict resolution, applied computer technology, and effective communication. Activities include gaming, simulation, computer programming and group dynamics.

470A. Seminar: Large Systems and Individual Schools. (Formerly numbered 270A.) Prerequisite: consent of instructor.

470B. Seminar: Educational Government. (Formerly numbered 270B.) Prerequisite: consent of instructor.

Curriculum and the Study of Schooling

220A. Inquiry into Schooling: Organization and Change. Critical analysis of issues in the reconstructions of schooling; concepts of function and structure of schooling; organization theory; systems approaches in the analysis of organization development and change.

Miss Crabtree, Mr. Goodlad, Mr. Tyler

Miss Crabtree, Mr. Goodlad, Mrs. Tyler

224. Problems and Issues in Bilingual and Multicultural Education. Introduction to the development and implementation of bilingual and multicultural programs in the U.S. Analysis of program goals, models, typologies and effectiveness.

Mrs. Pope

260. Seminar: Principles of Curriculum and Instruction. Mr. Goodlad, Mr. McNeil, Mrs. Tyler

261B. Seminar: Elementary Education. Miss Crabtree, Mr. Goodlad, Mr. Wright

261C. Seminar: Secondary Education. Mr. McNeil, Mr. Silberman

262A. Seminar: The Social Studies. Miss Crabtree

262B. Seminar: Reading. Mr. McNeil

262D. Seminar: Language Arts and English. Miss Valadez

262F. Seminar: Research Topics in Bilingual/Multicultural Education. Prerequisite: consent of instructor.

Mrs. Valadez

262J. Seminar: Economic Education. Ms. Kourilsky

268. Seminar: Instructional Analysis. Prerequisite: course 420A. Critical examination of theories of instruction; problems in conceptualizing and researching related instructional, learner, and social-system variables in classroom learning; issues in instructional decision-making and change.

Mr. Silberman, Mrs. Tyler, Mr. Wright

420A. Principles of Curriculum. Critical examination of the basic concepts underlying the determination of objectives, the selection and organization of learning experiences, and the evaluation process.

Miss Crabtree, Mr. McNeil, Mrs. Tyler

420D. Curriculum: Principles and Practice. An examination and application of various curricular perspectives to questions of purpose, learning opportunities and evaluation. Mr. McNeil, Mrs. Tyler

422. Inquiry into Schooling: Basic Issues. Critical examination of basic issues and problems in the organization and reconstructions of precollegiate schooling. Consideration of historical development and changing functions of schooling in American society, school organization, schooling alternatives; problems in the management of educational change.

Mr. Goodlad, Mr. McNeil, Mrs. Tyler
262. Seminar: Contemporary Issues in Education and Work. Mr. Wilms

337A. The Curriculum in Business Education. The curriculum in business education in secondary schools, including instructional techniques, course career development, achievement, strategies, analysis, transfer of training, remedial techniques, and evaluation. Mr. Erickson

337B. The Teaching of Secretarial Subjects. A survey and evaluation of procedures and materials used in teaching typewriting, secretarial subjects, office procedures, business writing. Mr. Erickson

337C. The Teaching of Bookkeeping, General Business, and Economics. A survey and evaluation of the procedures and materials used in teaching bookkeeping, general business, and economics in secondary schools. Mr. Erickson

343A. Principles and Problems of Business Education. Historical development and principles, practices, and problems in business education in secondary schools and colleges. Mr. Erickson

343B. Business Education in Secondary and Higher Education: Advanced. Advanced study in business education with a critical analysis of significant research applicable to curriculum and teaching practices. Mr. Erickson

343C-430D. Education in Family Finance. Prerequisite: credit toward advanced degrees by petition of the principles, concepts and research relating to sound personal and family financial management. Mr. Erickson

343E. Evaluation and Field Research in Family Finance Education. (1/4 to 1 course) Concepts and principles relating to family finance education and their application to teaching situations. Mr. Erickson

347B. Corporate Educational Programs. History and scope of corporate training programs; current educational problems in training programs within industry, the effect of automation on the labor market. The Staff

Higher Education

M148. Women in Higher Education. (Same course as Women's Studies Program M148) Prerequisite: upper division standing. The course examines the education and career development of women in higher education. Specifically, it focuses on the changing role of women in higher education, the historical context of women's education, and the challenges faced by contemporary women in higher education. The Staff

214C. Principles of Career Planning. Examination of the nature of careers across ages and ethnic and sexual groups in order to determine implications for career planning in post-industrial society. Mr. Healy

231. The Structure of Occupations. Will explore shifts in the occupational structure of the United States, changing skill requirements for jobs, the effects of automation on work environments, and the role of formal and informal education in preparing people for occupations. Mr. O'Shea, Ms. Wrigley

232. Industrialism, Work and Education. Study of the relationship between education and the making of a working class in the new urban industrial America: 1860 to the present. Mr. S. Cohen

233. American Values in the Development of Vocational Education. Course traces social values that supported early vocational education, reviews relevant research, and analyzes potential future directions for vocational education. Mr. Wilms

235. Education and Work. A review of the theoretical and empirical literature on issues concerning the interface of education and work. A review of alternative in the school-to-work transition of youth and an appraisal of present vocational training and manpower development programs. Mr. Silberman

246. Perspectives on Lifelong Learning. From an interdisciplinary perspective, lifelong learning is studied the perspectives and an area of educational research, policy and practice. Conceptual distinctions are drawn among the major proponents of lifelong learning and implications for schooling are considered. Ms. Rockhill and Staff

261E. Seminar: Education and Work. Mr. Erickson

262G. Seminar: Business Education. Mr. Erickson

209D. The System of Higher Education. An analysis of the structure and function of American postsecondary education from a systems perspective. Emphasis is given to the structure of the system and to comparative characteristics (faculties, student bodies, finances, outputs) of different types of institutions. Mr. Astin

239. The Organization and Governance of Educational Systems. Academic organization, precollege and postsecondary, are most appropriately studied as complex, professionalized organizations. This course provides a basic understanding of the characteristics of educational institutions and systems as organizations: environmental relations, governance structures and processes, and patterns of decision making. The Staff

249A. Seminar: National Evaluations of Post-Secondary Education. Critical review of national evaluation studies of higher education including programs of general education, and professional and graduate school programs; emphasis on the design, methodology, and interpretation of large-scale evaluation studies. Mr. Astin

249B. Seminar: Institutional Research and Program Evaluation. Critical review of institutional evaluation studies with consideration of the scope of information needed for various purposes and the problems of interpreting this information to appraise overall institutional functioning and effectiveness. Mr. Trent

259A. Seminar: Research on Characteristics of Students. Mr. Trent

259B. Seminar: Research on Characteristics of Educational Environments. Mr. Pace

261D. Seminar: The Community College. Mr. A. Cohen, Mr. Kintzer

261F. Seminar: Higher Education. Mr. Astin, Mr. Solimon

334. Supervised Teaching: Higher Education. Mr. A. Cohen

431A. Administration in Higher Education. An overview of college and university administration. Case studies of administrative problems, policies, and practices. Management information systems, source allocations, and issues related to responsibility, authority, and participation in administrative decisions. The Staff

431B. Curriculum and Instruction in Higher Education. Principles of curriculum and instruction in post-secondary programs; course design, implementation, and evaluation. Mr. Trent

431C. Innovative Forms and Practices in Higher and Continuing Education. New institutional forms, e.g., external degree programs and other nontraditional approaches to higher education, neighborhood learning centers, and peoples' colleges. Methodological innovations such as computer-assisted instruction, credit by examination, and independent study. Mr. Astin, Ms. Rockhill

432. Seminar: Professional Topics in Higher Education. Mr. Astin, Mr. Solimon

461A. Seminar: Adult Education. Mr. Rockhill

461B. Seminar: Adult Education in Other Countries. Mr. Kintzer

Teacher Education

100A. Cultural Foundations of Education. (1/4 course) Theories: critical review of significant problems and issues in contemporary American education using historical, philosophical, sociological and organizational perspectives. Examines the politics of schooling, the organizational structure of school systems, and philosophical concepts of the aims and functions of schooling and education. The Staff
100. Cross-Cultural Foundations of Education. (1/2 course) Prerequisite: consent of instructor. Analyzes the social, political, cultural, and current affairs of particular ethnic minority groups in the United States. Patterns of intergroup and school-community relations, and methods for teaching in minority student communities. Mr. Keislar

102. The Mexican-American and the Schools. Prerequisite: consent of instructor. Review of research and teaching strategies. Analysis of school policies and practices, and their effect on the development of Mexican-American and Chicano youth and communities. The Staff

112. Psychological Foundations of Education. Prerequisite: consent of instructor. Analysis of learning processes in school situations. Examines processes of human motivation, the affective, cognitive, social, and personal development of children and adolescents, the evaluation of learning, individual differences, and the implications of relevant theory and research for instructional practices. The Staff

264. Seminar: Teacher Education. Prerequisite: consent of instructor. Examines research, issues, and practices in preservice and inservice teacher preparation, evaluation and certification. Social, philosophical and methodological issues, and current trends in America and abroad are studied. Opportunities to observe, participate in, and discuss teacher education programs are provided. Mr. Keislar

312. Basic Principles of Curriculum and Instruction. Prerequisite: consent of instructor. Analysis and practice of basic principles and concepts for planning, conducting and evaluating units of curriculum and instruction. Emphasis on the study and utilization of a variety of instructional strategies, and their application in elementary and secondary schools. The Staff

315A-315B. Principles and Methods for Teaching Reading for Multiple Subject Instruction. (1/2 course each) (Same as 315C.) Prerequisite: consent of instructor. 315A is prerequisite to 315B. Reading instruction in the Elementary School. Analysis of reading problems and programs; study of relationships between language, culture, cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. Mr. Keislar

315C. Principles and Methods for Teaching Reading for Multiple Subject Instruction. (Same as 315A-315B.) Prerequisite: consent of instructor. Required of Team "L" students ONLY. Reading instruction in the Elementary School. Analysis of reading problems and programs; study of relationships between language, culture, cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. Mr. Keislar

320A-320B. Principles and Methods for Single Subject Instruction. (1/2 course each) Prerequisite: consent of instructor. 320A is prerequisite to 320B. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Focus on subjects commonly taught in elementary schools. Observation and participation in schools. Mr. Keislar

324A. Observation and Participation: Multiple Subject Instruction. (1/2 course) Prerequisite: consent of instructor. Six hours per week of observation and participation in classrooms in which multiple subjects are taught, normally in elementary school. Mr. Keislar

324B. Supervised Teaching: Multiple Subject Instruction. (1/2 course) Prerequisites: course 324A and consent of instructor. Practice teaching under the daily supervision of a teacher in a classroom in which multiple subjects are taught, normally in an elementary school. Mr. Keislar

324C. Supervised Teaching: Multiple Subject Instruction. (1/2 course) Prerequisites: course 324C and consent of instructor. Advanced practice teaching under the daily supervision of a teacher in a classroom in which multiple subjects are taught, normally in a secondary school. Mr. Keislar

330A. Observation and Participation: Single Subject Instruction. (1/2 course) Prerequisite: consent of instructor. Six hours per week of observation and participation in classrooms in which single subjects are taught, normally in secondary schools. Preparation for supervised teaching. Mr. Keislar

330B. Supervised Teaching: Single Subject Instruction. (1/2 course) Prerequisites: course 330A and consent of instructor. Practice teaching under the daily supervision of a teacher in a classroom in which a single subject is taught, normally in a secondary school. Mr. Keislar

330C. Supervised Teaching: Single Subject Instruction. (1/2 course) Prerequisites: course 330B and consent of instructor. Advanced practice teaching under the daily supervision of a teacher in a classroom in which a single subject is taught, normally in a secondary school. Mr. Keislar

482. Society and the Organization of School and Education. Prerequisite: consent of instructor. Examines the social, political, cultural, and current affairs of particular ethnic minority groups in the United States. Patterns of intergroup and school-community relations, and methods for teaching in minority student communities. Mr. Gordon, Mr. O'Shea

483. Cognitive Processes in Reading. Critical analysis of scholarly studies, theoretical and applied, and relationships between and among the various theories. Considers implications for teaching of reading. Opportunities for student interaction with foremost scholars in the field, whose studies represent the "growing edge" of the field. Mr. Keislar

484. The Enhancement of Motivation in the School. Comparative study of motivation in school including behavioralist, cognitive, developmental, humanistic approaches. Critical review, with special reference to teaching of reading, of (1) motivational methods to heighten school performance, (2) procedures to foster enduring patterns of constructive motivation in the school. Mr. Keislar

490A. Instructional Decision-Making. (1/2 course) Prerequisite: consent of instructor. Analysis of instructional methods relevant to public school education. Assumptions, procedures, and constraints of each instructional method are studied. A variety of variables. Laboratory experiences in classroom settings permit students systematically to apply and evaluate alternative instructional strategies. Mrs. Kouriisky

491A. Curricular Decision-Making. (1/2 course) Prerequisite: consent of instructor. Examination of alternative solutions for the practical problems that classroom teachers face in making curricular decisions. Analysis of the influence of psychological, societal, and institutional factors on curricular decisions. Miss Crabtree, Mr. Wright

492. Evaluation of Teaching and Learning. Prerequisite: consent of instructor. Examines relationship between appraisal instruments and information required for making decisions about teachers, pupils and materials. Introduces recent developments in the evaluation of teaching and learning, and demonstrates the use of modern appraisal techniques in classroom setting. Mr. McNeil, Mr. Popham, Mr. Skager

Independent Study, Research, and Internship

199. Special Studies. (1/2 to 2 courses) Prerequisite: senior standing and consent of instructor. Independent study of individual problems. The Staff

299A-299B-299C. Research Practicum in Education. May be repeated once for credit. The Staff

498A-498B-498C. Directed Field Experience. May be repeated once for credit. The Staff

498D-498E-498F. Advanced Directed Field Experience. May be repeated once for credit. The Staff

596. Directed Independent Study. (1/2 courses) Individual study or research for graduate students. Maximum credit, 12 units. The Staff

597. Preparation for the Master's Comprehensive Examination or the Doctoral Qualifying Examination. (1 to 3 courses) Individual study for master's degree comprehensive examinations or for qualifying examinations on the Ph.D., or Ed.D. Maximum credit, 12 units. To be graded S/U. The Staff

598. Thesis Research. (1 to 3 courses) Research for and preparation of the master's thesis. Maximum credit, 12 units. To be graded S/U. The Staff

599. Dissertation Research. (1 to 3 courses) Research for and preparation of the doctoral dissertation. Maximum credit, no limit. To be graded S/U. The Staff
Engineering and Applied Science

(Office of the Dean, 7400 Boelter Hall)

Russell R. O’Neill, Ph.D., Dean.
Russell A. Westman, Ph.D., Associate Dean.
Alfred C. Ingersoll, Ph.D., Associate Dean.
Richard Stern, Ph.D., Assistant Dean.
Alan A. Ardell, Ph.D., Assistant Dean.
Alan N. Wilson, Ph.D., Assistant Dean.

Chemical, Nuclear, and Thermal Engineering Department

(Department Office, 5405 Boelter Hall)

Douglas N. Bennion, Ph.D., Professor of Engineering and Applied Science.
Harry Buchberg, M.S., Professor of Engineering and Applied Science.
Ivan Caton, Ph.D., Professor of Engineering and Applied Science.
Robert W. Conn, Ph.D., Professor of Engineering and Applied Science.
Donald K. Edwards, Ph.D., Professor of Engineering and Applied Science.
Traugott H. Frederking, Ph.D., Professor of Engineering and Applied Science.
Sheldon K. Friedlander, Ph.D., Professor of Engineering and Applied Science.
Eldon L. Knuth, Ph.D., Professor of Engineering and Applied Science.
Joseph W. McCutchan, M.S., Professor of Engineering and Applied Science.
Anthony F. Mills, Ph.D., Professor of Engineering and Applied Science.
Ken Nobe, Ph.D., Professor of Engineering and Applied Science (Chairman of the Department).
David Okrent, Ph.D., Professor of Engineering and Applied Science.
Richard L. Perrine, Ph.D., Professor of Engineering and Applied Science.
Gerard C. Pomeraning, Ph.D., Professor of Engineering and Applied Science.
Lawrence B. Robinson, Ph.D., Professor of Engineering and Applied Science.
William D. Van Vorst, Ph.D., Professor of Engineering and Applied Science.
Ahmed R. Wazzan, Ph.D., Professor of Engineering and Applied Science.
F. Eugene Yates, M.D., Professor of Medicine and Applied Science.
George E. Apostolakis, Ph.D., Associate Professor of Engineering and Applied Science.
Vijay K. Dhr, Ph.D., Associate Professor of Engineering and Applied Science.
Steven M. Dinh, Sc.D., Assistant Professor of Engineering and Applied Science.
Nasir M. Ghaoniem, Ph.D., Assistant Professor of Engineering and Applied Science.
Owen L. Smith, Ph.D., Assistant Professor of Engineering and Applied Science.
Vincent L. Vilk, Ph.D., Assistant Professor of Engineering and Applied Science.

Computer Science

(Department Office, 3731 Boelter Hall)

Aligdias A. Avizienis, Ph.D., Professor of Engineering and Applied Science.
Bertram Russell, Ph.D., Professor of Engineering and Applied Science.
David G. Cantor, Ph.D., Professor of Mathematics and Applied Science.
Gerald Estrin, Ph.D., Professor of Engineering and Applied Science.
Wesley W. Chu, Ph.D., Professor of Engineering and Applied Science.
David P. Martin, Ph.D., Professor of Engineering and Applied Science.
Lawrence F. McNamee, Ph.D., Professor of Engineering and Applied Science.
Michel A. Melkanoff, Ph.D., Associate Professor of Engineering and Applied Science.

Electrical Engineering

(Department Office, 7732 Boelter Hall)

Frederick G. Allen, Ph.D., Professor of Engineering and Applied Science.
Lee W. Casperson, Ph.D., Professor of Engineering and Applied Science.
Francis C. Ching, Ph.D., Professor of Engineering and Applied Science.
Robert S. Elliott, Ph.D., Professor of Engineering and Applied Science.
A. Theodore Forrester, Ph.D., Professor of Engineering and Applied Science.
F. W. Schott, Ph.D., Professor of Engineering and Applied Science.
Oscar W. Stalsudd, Jr., Ph.D., Professor of Engineering and Applied Science.
Gabor C. Temes, Ph.D., Professor of Engineering and Applied Science.

Cavour W. Yeh, Ph.D., Professor of Engineering and Applied Science.
Louis L. Grandi, M.S., Emeritus Professor of Engineering and Applied Science.
W. D. Hersberger, Ph.D., Emeritus Professor of Engineering and Applied Science.
Ellis F. King, M.S., Emeritus Professor of Engineering and Applied Science.
Nicolaos G. Alexopoulos, Ph.D., Associate Professor of Engineering and Applied Science.
Neville C. Luhmann, Jr., Ph.D., Associate Professor of Engineering and Applied Science.
Kang-Lung Wang, Ph.D., Associate Professor of Engineering and Applied Science.
Jack Willis, B.Sc., Associate Professor of Engineering and Applied Science.
Kenneth W. Martin, Ph.D., Assistant Professor of Engineering and Applied Science.
Dee-Son Pan, Ph.D., Assistant Professor of Engineering and Applied Science.
Materials Science and Engineering

(Department Office, 6531 Boelter Hall)

Alan J. Ardelean, Ph.D., Professor of Engineering and Applied Science.

Rochan T. Bunshah, Ph.D., Emeritus Professor of Engineering and Applied Science.

David L. Douglass, Ph.D., Professor of Engineering and Applied Science.

William J. Kopp, M.D., Emeritus Professor of Engineering and Applied Science.

John H. Lyman, Ph.D., Professor of Engineering and Applied Science.

Kanji Ohno, Ph.D., Professor of Engineering and Applied Science.

Aly H. Shabaka, Ph.D., Director of Engineering and Applied Science.

Christian N. J. Wagner, Dr. rer. nat., Professor of Engineering and Applied Science.

Alfred S. Yue, Ph.D., Professor of Engineering and Applied Science.

Daniel Rosenthal, Ph.D., Emeritus Professor of Engineering and Applied Science.

William Klement, Jr., Ph.D., Associate Professor of Engineering and Applied Science.

Samuel B. Batdorf, Ph.D., Adjunct Professor of Engineering and Applied Science.

Bruce B. Dunn, Ph.D., Visiting Associate Professor of Engineering and Applied Science.

Ryoichi Kikuchi, Ph.D., Emeritus Professor of Engineering and Applied Science.

Martin H. Leipold, Ph.D., Adjunct Professor of Engineering and Applied Science.

Morris A. Steinberg, Ph.D., Associate Professor of Engineering and Applied Science.

Mechanics and Structures

(Department Office 5732 Boelter Hall)

Andrew F. Charnow, Ph.D., Professor of Engineering and Applied Science.

Julian D. Cole, Ph.D., Professor of Engineering and Applied Science.

Stanley B. Dong, Ph.D., Professor of Engineering and Applied Science.

Kurt Forster, Ph.D., Professor of Engineering and Applied Science.

Michael E. Fourney, Ph.D., Professor of Engineering and Applied Science (Chairman of the Department).

Norman C. Dalkey, Ph.D., Adjunct Professor of Engineering and Applied Science.

Alfred C. Ingerson, Ph.D., Professor of Engineering and Applied Science in Residence.

Robert E. Englekirk, Ph.D., Adjunct Associate Professor of Engineering and Applied Science.

Richard R. Gold, Ph.D., Professor of Engineering and Applied Science.

Harold T. Yura, Ph.D., Adjunct Professor of Engineering and Applied Science.

Moche Ziv, Ph.D., Adjunct Associate Professor of Engineering and Applied Science.
System Science

(Department Office, 4532 Boelter Hall)

A. V. Balakrishnan, Ph.D., Professor of Engineering and Applied Science and Mathematics.
Hector O. Fattorini, Ph.D., Professor of Mathematics and Engineering and Applied Science.
Stephen E. Jacobsen, Ph.D., Professor of Engineering and Applied Science.

James L. Massey, Ph.D., Professor of Engineering and Applied Science.
Jimmy K. Omura, Ph.D., Professor of Engineering and Applied Science.
Paul K. C. Wang, Ph.D., Professor of Engineering and Applied Science.
Donald M. Wilberg, Ph.D., Professor of Engineering and Applied Science and Anesthesiology.

Kung Yao, Ph.D., Professor of Engineering and Applied Science.
Nhan Levan, Ph.D., Professor of Engineering and Applied Science.
Bruce L. Miller, Ph.D., Professor of Engineering and Applied Science.
Richard E. Mortensen, Ph.D., Associate Professor of Engineering and Applied Science.
Izhak Rubin, Ph.D., Associate Professor of Engineering and Applied Science.

George J. Ruzicka, Ph.D., Adjunct Associate Professor of Engineering and Applied Science.
Eduardo J. Subelman, Ph.D., Assistant Professor of Engineering and Applied Science.

Denham S. Ward, Ph.D., Assistant Professor of Anesthesiology and Engineering and Applied Science.

The M.S. and Ph.D. Programs

Requirements for Admission

In addition to meeting the requirements of the Graduate Admissions Section of the Graduate Division, applicants for the graduate Engineering programs are required to take the Aptitude Test and Advanced Test of the Graduate Record Examination in engineering, mathematics, or a related area. Applicants for the graduate Computer Science programs are required to take the Graduate Record Examination Aptitude Test and Advanced Test in mathematics or computer science.

A student entering the Engineer/Ph.D. program normally will be expected to have completed the requirements for the master's degree with a scholarship record equivalent at least to a 3.25 grade point average (based on a 4.0 maximum) and to have demonstrated creative ability. Exceptional students with research experience and strong evidence of creativity may petition to proceed to candidacy for the Ph.D. degree without the M.S. degree.

Application for Admission forms, including a departmental supplement to the application, may be obtained by writing to the Assistant Dean for Graduate Studies, School of Engineering and Applied Science, UCLA, Los Angeles, CA 90024.

Graduate Students Admitted Provisionally. Graduate students admitted provisionally because of inadequate preparation, are advised that their academic records will be reviewed at the end of each quarter, for a specified period of time. Provisional admission normally requires enrollment in 8 units per quarter of 100/200 series courses in the School of Engineering and Applied Science with no grade lower than a B in any course. If at the end of three quarters of work, or earlier, they fail to show promise as graduate students, or fail to maintain the required minimum grade point average, they will be dismissed from the School.

A candidate whose academic background is judged to be deficient may be required to undertake certain remedial coursework, as indicated in the admission letter, which would not be applicable toward the degree. Upon arrival at UCLA, the student's adviser will help the student plan a program which will remedy any such deficiencies.

Advising

Name and address of Graduate Adviser for Engineering majors:

Assistant Dean for Graduate Studies, Room 6730 Boelter Hall, School of Engineering and Applied Science.

Departmental guidance for Computer Science majors may be obtained by addressing inquiries directly to the Computer Science Department: Departmental Administrative Assistant, Computer Science Department, Room 3731 Boelter Hall, Telephone: (213) 825-6396, School of Engineering and Applied Science.

Each graduate student is assigned a faculty adviser upon admission to the School. Advisers may be changed upon the student's written request. All SEAS faculty serve as advisers.

New students should arrange an appointment as early as possible with their faculty advisers to plan the proposed program of study towards the M.S. or Ph.D. degree. Continuing students are required to confer with their advisers at least once a quarter, during enrollment time, when advisers can assess the students' progress and approve the Study List Card. Normally, students are expected to meet with their advisers on a regular basis throughout the quarter.

Based on the quarterly transcripts, students' records are reviewed at the end of each quarter by the Assistant Dean for Graduate Studies in Engineering and Applied Science. Special attention is given to students who were admitted provisionally, or to students on probation. If their progress is unsatisfactory, the students are informed of this in writing, or by appointment with the Assistant Dean.

Students are strongly urged to refer to the SEAS Announcement on procedures and paperwork, and should consult with the Graduate Studies Office administrative staff on the implementation of the policies. In particular, advice should be sought on advancement to candidacy for the M.S. degree, on the procedures for taking Ph.D./Engineer written and oral examinations, and on the use of the Filing Fee.

Computer Science students are also encouraged to consult the Computer Science Department Quarterly.

Computer Science Breadth Requirement

Candidates for the M.S. or Ph.D. degrees in Computer Science must satisfy the Computer Science Breadth Requirement by the end of the fourth quarter in graduate residence at UCLA. This requirement is satisfied by mastering the contents of six undergraduate courses in Computer Science or Computer Science related subjects chosen from the following two groups:

Group 1 (four required courses): CS 141, CSM181 or E128D, CS151A, CS151B

Group 2 (two required courses): CSM124A or E129A, CS171, CS131 or CS132, CS172, CS111

Competition in any or all courses may be demonstrated in one of three ways. These are:

1. Satisfactory completion of the course at UCLA with a grade of "B" or better.
2. Satisfactory completion of an equivalent course at another university with a grade of "B" or better.
3. Satisfactory completion of a final examination in the course at UCLA.

In addition, students must complete a 2.0 unit Computer Science Seminar, CS201, for credit. (Grade "S" for each degree.)

Students in the Computer Science Department who wish to receive a degree in Engineering rather than in Computer Science, should check with the Department for details of the breadth requirement for Engineering majors.

Teaching Experience

Teaching experience is not required.
Disqualification and Appeal of Disqualification

Termination of studies is recommended under the following circumstances:

**Master of Science Degree (M.S.)**
1. Failure to maintain a grade point average of 3.0 both overall and in the 200 level courses.
2. Failure to maintain a grade point average of 3.0 in any two consecutive quarters.
3. Failure of the Comprehensive Examination twice.
4. Failure of the thesis committee to approve the thesis.
5. Failure to satisfy the Computer Science Breadth Requirement.
6. Unsatisfactory progress toward the degree within the 3-year time limitation for completing all degree requirements.

**Doctor of Philosophy (Ph.D.) Degree**
1. Failure to maintain a grade point average of 3.25 both overall and in any two consecutive quarters.
2. Failure of the Major Field Written Examination.
3. Failure of the Oral Preliminary Examination.
4. Failure of a Written Minor Field Examination after failing to attain a grade point average of 3.33 in the minor field coursework.
5. Failure of the Oral Qualifying Examination.
6. Failure of the Final Oral Examination.
7. Upon recommendation by an examining committee that an examination should not be repeated.
8. Failure to satisfy the Computer Science Breadth Requirement.
9. Unsatisfactory progress toward the degree within the described time limits.

**Master of Engineer (M. Engr.) Degree**
1. Failure to maintain a grade point average of 3.0 overall.
2. Failure of the Comprehensive Examination.
3. Unsatisfactory progress toward the degree within the desired time limits.

Upon receipt of a written notice of termination, usually preceded by an interview with the Assistant Dean for Graduate Studies, the student may appeal to the Graduate Policy Committee of the School of Engineering and Applied Science. The student will submit a written statement to the chairperson of the Graduate Policy Committee, who will then present the case to the entire committee in one of its regular weekly meetings during the academic year. The Graduate Policy Committee's decision will be considered final by the School of Engineering and Applied Science. Further appeal may be made to the Dean of the Graduate Division (see procedures on Disqualification and Appeal of Disqualification at the beginning of this catalog).

Prerequisite and Other Undergraduate Courses

**Not Applicable Toward Graduate Degrees**

**Engineering**
10C. Introduction to Computing
Introduction to Programming/FORTRAN
10S. Introduction to Programming for Life and Social Sciences
11. Patterns of Problem Solving
12. Applied Patterns of Problem Solving
15. Introduction to Manufacturing Engineering
100. Electrical and Electronic Circuits
100B. Engineering Electromagnetics
100L. Circuit Analysis Laboratory
102. Mechanics of Particles and Rigid Bodies
103A. Elementary Fluid Mechanics
104. Introduction to Experimental Techniques
104C-D. Undergraduate Research Laboratory
105A. Introduction to Engineering Thermodynamics.
105D. Transport Phenomena

**The Master of Science Degree**

**Course Requirement.** A total of nine courses is required for the M.S. degree, including a minimum of five graduate courses. No specific courses are required, but the majority of the total formal course requirement and a majority of the graduate course requirement must consist of courses in the School of Engineering in either the Engineering or the Computer Science major. In the Thesis Plan, seven of the nine courses must be formal courses, including at least four 200 series graduate courses. The remaining two courses may be Individual Study (Engr. 598) involving work on the thesis. In the Comprehensive Examination Plan, at least five of the nine courses must be 200 series graduate courses; the remaining four courses may be either 200 series graduate or upper division undergraduate courses. No units of 500 series may apply toward the Comprehensive Examination Plan requirements.

**Thesis Plan.** The thesis must either describe some original piece of research that the student has done, usually, but not necessarily under the supervision of the thesis committee, or else provide a critical exposition of some topic lying in the student's major field of study. The thesis committee is established when the student, in consultation with the faculty adviser, has formulated a thesis research program. All members of the thesis committee are faculty members of the School of Engineering and Applied Science (no outside member is required). The student normally starts to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination for a student doing a thesis.

**Comprehensive Examination Plan.** The comprehensive examination committee is comprised of the student's adviser, and two other School of Engineering and Applied Science faculty members chosen by the student and the adviser. Final appointment is made by the Assistant Dean for Graduate Studies. The Comprehensive Examination, which is offered every quarter, is required in written form only. It is recommended that the comprehensive examining committee conduct an oral query of the candidate after review of the written examination. The M.S. program is centered around one major field. Candidates who fail the Comprehensive Examination may be reexamined once, with the approval of the Assistant Dean for Graduate Studies.

**Time to Degree.** The average length of time for students in the M.S. program is five quarters.

The maximum time allowed for completing the M.S. degree is three years from the time of admission to the M.S. program in the School of Engineering and Applied Science.

**Major Fields or Subdisciplines.**

- Chemical Nuclear and Thermal Engineering
  - Chemical Engineering
  - Mechanical & Aerospace Engineering
  - Thermal Science
  - Nuclear Science and Engineering

- Computer Science Department
  - Computer Theory
  - Computer Methodology
  - Computer System Architecture
  - Computer Programming: Languages and Systems
  - Computer Systems Modeling and Analysis

*A student is free to propose to the School any other field of study with the support of his/her adviser.*
The body of knowledge needed for preparation in the student's area of specialization. Each minor field coursework by examinations. Normally, a student may, theoretically, substitute the course requirement for the Ph.D. degree, and a minimum of 3.33 in all courses included in the minor field equivalents to three courses, at least two of which are graduate courses. If a student fails to satisfy the minor field requirements through coursework, a minor field examination may be taken. Under these circumstances, the minor field examination may be taken once only.

Written and Oral Qualifying Examinations. When the student has mastered the body of knowledge defined in the three fields, the student will take a Written Preliminary Examination in the major field. When this examination is successfully passed, and all coursework completed, the student will proceed to take an Oral Preliminary Examination which encompasses the major and minor fields. The Preliminary Examinations (Written and Oral) should be completed within the first two years of full time enrollment in the Ph.D. program. A candidate may not take an examination (written or oral) more than twice.

After the student has demonstrated competence in the three fields, the School will notify the Graduate Division of the student's readiness for the Oral Qualifying Examination. The details of the Oral Qualifying Examination are at the discretion of the doctoral committee but ordinarily will include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the Oral Qualifying Examination. All members of the committee shall be present and the candidate is considered to have failed if more than one member votes "not passed".

Time to Degree

a. From admission to the Ph.D. program to the completion of the Preliminary Examinations: six quarters.
b. From the completion of the Preliminary Examinations to the award of the Ph.D. degree: six quarters.
c. From admission to graduate status (includes M.S. degree) to award of the Ph.D. degree: 15 quarters (normative time-to-degree).

Final Oral Examination. A Final Oral Examination is required of all candidates.

Major Fields or Subdisciplines*

Computer Science Department†

Computability and Algorithms
Computer Theory
Computer Methodology: Biological Systems
Computer Methodology: Cognitive and Knowledge-Based
Computer Methodology: Physical Systems
Computer System Architecture
Computer Programming: Languages and Systems
Computer Systems Modeling & Analysis

* A student is free to propose to the School any other field of study with the support of his/her adviser. Instructions on the definition of acceptable ad hoc fields and procedures for their approval are available in the Engineering Graduate Studies Office.

† Computer Science majors may pursue additional relevant minor fields of study offered by the School of Engineering and Applied Science.

The Engineer (Engr.) Degree

The School of Engineering and Applied Science offers an Engineer degree at a level equivalent to completion of preliminaries in the Ph.D. program. The Engineer (Engr.) degree program has been established to offer a degree which represents a considerable advanced training and competence in the Engineering field, but which does not require the research effort and orientation involved in a Ph.D. dissertation.

Requirements for the Engineer degree are identical to those of the Ph.D. degree up to and including the Oral Preliminary Examination, except for two differences:

(1) The Engineer degree is based on coursework. The minimum requirement is 15 (at least nine graduate) courses beyond the bachelor's degree, distributed in the same pattern as in the Ph.D. program: At least six courses in the major field (minimum four graduate courses), and at least three in each minor field (minimum two graduate courses in each).

** Established Minor Field only.
The Master of Engineering Degree

Admission Requirements. In addition to the University minimum requirements, the following is required: (a) Five years of responsible full-time professional experience in Engineering; (b) Some formal study in statistics; (c) The Aptitude and Advanced Test of the Graduate Record Examination in mathematics or a related field. A screening interview with the Coordinator of the Engineering Executive Program is required.

The School of Engineering and Applied Science has a supplement to the Application for Admission which may be obtained at this address: Engineering Executive Program, Room 6288 Boelter Hall, School of Engineering and Applied Science.

Advising. Name and address of Graduate Advisor: Assistant Dean for Graduate Studies, Room 6730 Boelter Hall, School of Engineering and Applied Science; or, Coordinator of the Engineering Executive Program, Room 6288 Boelter Hall, School of Engineering and Applied Science.

The Coordinator of the Engineering Executive Program guides the student in completing the prescribed program. The Coordinator holds meetings with the students at least once a year.

Foreign Language Requirement. There is no foreign language requirement for the M.Engr. degree.

Course Requirements. A total of 12 graduate level courses are required for the Master of Engineering degree. They are as follows: Engineering 470A, 470B, 470C, 471A, 472A, 471B, 472B, 471C, 472C, 472D, 473A, 473B.

Comprehensive Examination. The comprehensive examining committee is appointed by the Coordinator of the Engineering Executive Program and consists of three faculty members. The Comprehensive Examination, which is offered once a year and is general in scope, is given in written and oral form. A student who fails this examination may be reexamined once.

Time to Degree. From graduate admission to the conferral of the degree, normal progress is six quarters.

Requirements for the Graduate Certificate of Specialization in Engineering and Applied Science

A certificate of specialization in any academic area offered by the School of Engineering and Applied Science is available. Requirements for admission are the same as for the M.S. degree.

Each graduate certificate program consists of five 100 or 200 series courses, at least two of which must be at the graduate level, 200 series. No work completed for any previously awarded degree or credential can be applied to the certificate. Successful completion of a certificate program requires an overall minimum B average in all courses applicable to the graduate Certificate of Specialization in Engineering and Applied Science. In addition, graduate certificate candidates are required to maintain a minimum B average in 200 series courses used in the certificate program. A minimum of three quarters of academic residence is required. The time limitation for completing the requirements of a certificate program is two calendar years. Details regarding the certificate programs may be obtained from the Engineering Graduate Studies Office, 6730 Boelter Hall.

Courses completed for a Certificate of Specialization in Engineering and Applied Science may subsequently apply toward master's and/or doctoral degrees.

Other Relevant Information. For additional information on the School's teaching and research activities, as well as on the procedures for implementing the above requirements and policies, please refer to the Announcement of the School of Engineering and Applied Science, available in the Engineering Graduate Studies Office, 6730 Boelter Hall.

Graduate Courses

Chemical, Nuclear, and Thermal Engineering

- 230B. Nonequilibrium Thermodynamics. (Formerly numbered Engineering 230B.) Prerequisite: Chemical, Nuclear and Thermal Engineering 230A. Interpretation of non-equilibrium phenomena in terms of the Fourth Law of Thermodynamics, namely (a) linear interdependence of fluxes and driving forces and (b) Onsager reciprocal relations. Boltzmann transport equation; diffusion; electrical and heat currents; numerical calculation of parameters.
  - Mr. Robinson

- 230C. Cryogenics. (Formerly numbered Engineering 230C.) Prerequisite: Engineering 137A. The study of basic phenomena in low temperature systems including the third law, various cooling methods and superfluid systems; Meissner state, type I and type II systems; applied superconductivity cryogenics.
  - Mr. Frederking (Sp)

  - Mr. Robinson

  - Mr. Edwards (W)

  - Mr. Edwards (Sp)

- 231C. Boiling and Condensation. (Formerly numbered Engineering 231C.) Not the same as 231C prior to Winter Quarter 1978.) Prerequisites: Engineering 131A, 150A or equivalent. Phenomenological theories of boiling. Hydrodynamic instability of liquid-vapor interfaces and their application to predict maximum and minimum heat fluxes. Forced flow boiling of liquid metals. Film and dropwise condensation.
  - Mr. Dhir

- 231D. Application of Numerical Methods to Transport Problems. (Formerly numbered Engineering 231D.) Prerequisite: Engineering 131B, 132A or consent of the instructor. Numerical techniques for solving selected problems in heat and mass transfer. Applications include free convection, boundary layer flow, two-phase flow, separated flow, flow in porous media. Effects of concentration and temperature gradients, chemical reactions, radiation, electric and magnetic fields. The Staff, Chemical, Nuclear and Thermal Engineering Department (F)

  - Mr. Dhir

- 231F. Advanced Heat Transfer. (Formerly numbered Engineering 231F.) Not open to students who have taken 231C prior to Fall Quarter 1977.) Prerequisites: Chemical, Nuclear and Thermal Engineering 231A. Advanced topics in heat transfer from the current literature. Linear and non-linear theories of thermal and hydrodynamic instability; variational methods in transport phenomena; phenomenological theories of turbulent heat and mass transport.
  - Mr. Catton (Sp)
Computer Science

201. Computer Science Seminar. (1/2 course) (Formerly numbered Engineering 2225S.) Prerequisite: consent of instructor. Lectures discussing current research in areas of computer science interest to the students in which the instructor has developed special proficiency as a consequence of research interests. May be repeated for credit. Mr. Berry

202. Advanced Computer Science Seminar. (Formerly numbered Engineering 2225X.) Prerequisite: consent of instructor. Lectures discussing current research in areas of computer science interest to the students in which the instructor has developed special proficiency as a consequence of research interests. May be repeated for credit. Mr. Berry

212A. Queueing Systems Theory. (Formerly numbered Engineering 2232A.) Prerequisites: Computer Science 112, Engineering 120A or consent of instructor. Resource sharing issues and the theory of queueing (waiting-line) systems. Review of Markov chains and baby queueing theory. Method of stages. Me/M/m. Er/M/M/c. Bulk arrival and bulk service systems. Series-parallel stages. Fundamentals of open and closed queueing networks. Basic tools for analyzing as announced in advising by the Chemical, Nuclear, and Thermal Engineering Department. Lectures, discussions, student presentations and projects in areas of current interest. All sections are graded either S/U or by letter grades, and may be repeated for credit. The Chemical Engineering Staff

239EA-239EZ. Seminars in Chemical Engineering. (1/2 to 3 courses) Prerequisites: consent of instructor. Lectures, discussions, student presentations and projects in areas of current interest in nuclear engineering. All sections are graded either S/U or by letter grades, and may be repeated for credit. The Nuclear Engineering Staff (W,Sp)

239FA-239FZ. Special Topics in Transport Phenomena. (1/2 to 1 course) Prerequisites: consent of instructor. Discussion and analysis of ad-hoc areas for offering as announced in advance by the CNTE Department. Advanced and current study of one or more aspects of heat and mass transfer such as turbulence, stability and transition, buoyancy effects, variable properties, porous media, etc. Some topics to be selected by individual students. May be repeated for credit when no duplication exists. The Staff, Chemical, Nuclear, and Thermal Engineering Department

239. Current Topics in Energy Utilization. (1/2 course) Prerequisites: consent of instructor. Review of current literature in an area of energy utilization in which the instructor has developed special proficiency as a consequence of research interests. Student reports on selected topics. May be repeated for credit more than once with consent of the instructor. The Staff, Chemical, Nuclear and Thermal Engineering Department

239DA-DZ. Seminar: Current Topics in Nuclear Engineering. (1/2 course) Prerequisites: consent of instructor. Lectures, discussions, student presentations and projects in areas of current interest in nuclear engineering. All sections are graded either S/U or by letter grades, and may be repeated for credit. The Nuclear Engineering Staff (W,Sp)

212B. Queueing Applications: Scheduling Algorithms and Queueing Networks. (Formerly numbered Engineering 2232B.) Prerequisite: Computer Science 212A. (Not open for full credit to students who have taken Computer Science 211A prior to Winter Quarter 1981.) Prioriy Queueing. Applications to time-sharing scheduling algorithms: FB, Round Robin, Conservation Law, Bounds. Queueing Networks: Definitions; job flow balance; product form solutions — one or more channels. Robust computer design. Techniques for performance measurements; asymmetric behavior and bounds; approximation techniques — diffusion — iterative techniques; applications. Mr. Kleinrock, Mr. Muntz

215. Computer Communications and Networks. (Formerly numbered Computer Science 212C and Computer Science 255A.) Prerequisite: Computer Science 112. (Not open for full credit to students who have taken Computer Science 212C or 255A prior to Winter Quarter 1981.) Routing in computer traffic characterizations; multiplexing; network structure; packet switching and other switching techniques; the ARPANET and other computer network examples. Optimization; design and optimization; network protocols; routing and flow control; satellite and ground radio packet switching; local networks; commercial network services and architectures. Optional topics will include: extended error control techniques; modern; SDLC, HDLC, X.25, etc.; protocol verification; network simulation and measurement; integrated networks; communication processors. Mr. Chu, Mr. Kleinrock (W, Sp)

216. Distributed Multiaccess Control in Networks. Lecture, four hours. Prerequisites: Computer Science 212A, 215. Topics drawn from the field of distributed control and access in computer networks will be discussed. These include terrestrial distributed computer networks: radio, satellite, and packet switching; local network architecture and control. Mr. Kleinrock (Sp)

218A. Network Protocol and Processor Design. Lecture, four hours. Prerequisite: Computer Science 112, (Computer Science 215 recommended). Computer network architecture and protocols; Protocols models; subnet, network access, transport, application; Protocol specification and verification. Network processor architectures (single processor; multiprocessor). Task partitioning. Performance models (throughput, delay, reliability). Mr. Gerla (F)

219. Current Topics in Computer System Modeling Analysis. (1/2 to 3 courses) Prerequisite: consent of instructor. Review of current literature in an area of computer system modeling analysis in which the instructor has developed special proficiency as a consequence of research interests. May be repeated for credit, provided no duplication exists. The Staff, Computer Science Department

221. Economics of Computers. Prerequisite: consent of instructor. Basic economic factors in data processing. Buyers and sellers; products; applications; major cost factors. Selection and operation of a data processing system. Mr. Estrin, Mr. Melkanoff

231A. Advanced Topics in Programming Languages. (Formerly numbered Engineering 225P.) Prerequisite: Computer Science 131. Presentation, analysis and discussion of modern programming languages, new higher level languages and new and/or advanced features of programming languages. Mr. Melkanoff (Sp)

231B. Advanced Topics in Computer Language Design. Prerequisites: Computer Science 132, 141, 181, 232A, 232B. Treatment of current topics in computer language including design of modern goal languages, levels of abstraction, methodologies for standardization and proposals for new problem oriented and general purpose languages. Intent is to allow each student to develop his or her individual application of language design principles. Mr. Uzgiris (Sp)

232A. Operational Semantics of Programming Languages. (Formerly numbered Engineering 225L.) Prerequisites: Computer Science 131 and Computer Science 132, (may be taken concurrently). Interpreters of Programming Language Semantics: information structure models, Vienna definition language, lambda calculus, LISP definition, interpreter equivalence and correctness. Mr. Berry (F)

232B. Semantics of Programming Languages. (Formerly numbered Engineering 225M.) Prerequisite: Computer Science 181, or equivalent, or consent of instructor. Syntax-directed semantics of context-free languages. Knuth semantic systems (K-systems) and their mathematical formulation. K-system formulation of programming language semantics; translational and denotational semantics. Properties of K-systems; equivalence of K-systems. Applications of current research interest. Mr. D. Martin (F)

234A. Correctness Proofs. Prerequisite: consent of instructor. Theoretical and practical aspects of correctness proofs. Partial correctness, total correctness, and termination. Axiomatic semantics and proof systems. Abstraction and correctness proofs for elementary programming language systems. Formulation, execution, and testing of correctness proofs. Topics of current research interest. Mr. D. Martin (W)

234B. Advanced Topics in Software Engineering. Prerequisites: Computer Science 131 and Computer Science 232A or 232B. A course to explore current topics in software engineering and closely related topics, i.e., structured program, program proofs—analysis and synthesis of programs, abstract data types, modularity, debugging, programming languages. Mr. Berry (Sp)

234C. High Level Language Computer Architecture. Prerequisites: Computer Science 131 and Computer Science 232A or 232B. A study of machine architectures to facilitate direct or nearly direct execution of high level languages: Algol-like machines including Burroughs B6700, microprogrammed and microprogrammable machines, microprocessors. Mr. Melkanoff

239. Current Topics in Computer Science-Programming Languages and Systems. (1/2 to 4 courses) (Formerly numbered Engineering 226Z.) Prerequisite: consent of instructor. Review of current literature in an area of computer science programming languages and systems in which the instructor has developed special proficiency as a consequence of research interests. May be repeated for credit, provided no duplication exists. The Staff, Computer Science Department
241A. Data Management Systems. (Formerly numbered Engineering 226D.) Prerequisites: Computer Science courses M124A and 171 or equivalent; Computer Science 141 or equivalent. Information and file handling in higher level languages, storage devices and operating systems. Secondary index organizations. Models and architecture of data management systems. Logical and physical structures. Query languages. Commercially available generalized file management and data base management systems. Management information systems.

Mr. Cardenas (W), Mr. Murthy (Sp)

Mr. Cardenas (W)

242A. Privacy and Security in Computer Information Systems. Prerequisite: Computer Science 111 or consent of instructor. The legal and technical difficulties of producing secure computer information systems that provide guaranteed controlled sharing, with emphasis on software models and design. Examination and critique of current systems and practices. Possible controllability of such systems. Relevant social issues.

Mr. Popel (W)

243A. Relational Data Bases. Prerequisites: Computer Science 131, 141. The Relational Model of Data: definition and operations; relational languages. Relational Data Bases: experimental and commercial, design methodology.

Mr. Melkanoff, Mr. Parker (W)

243B. Abstract Data Types and Program Specification. Prerequisites: Computer Science 141, Computer Science M123B. The notions of abstract data type and abstract program specification permit one to understand how programs manipulate data, independently of their implementations. These notions also give powerful techniques for program structuring and verification. The class will include programming exercises.

The Staff, Computer Science Department

249. Current Topics in Data Structures. (1/2 to 4 courses) Prerequisite: consent of instructor. Review of current literature in an area in which the instructor has developed special proficiency as a consequence of research interests. Student reports on selected topics. May be taken for credit more than once with consent of instructor.

The Staff, Computer Science Department

251A. Advanced Computer Architecture. Prerequisites: Computer Science 151A, 151B, and 111, or consent of instructor. Functional and structural models of computer systems. Architecture and organization at microprogramming, machine language and operating system level. Processor organization and system control. Arithmetic processors: algorithms and implementation. Storage system organization: hierarchy and management. Communication organization and control. Mr. Murthy, Mr. Ercegovac

252A. Computer Science Design: Arithmetic Processes. (Formerly numbered Engineering 225A.) Prerequisite: Computer Science 251A or consent of instructor. Concepts of number systems, digital numbers, algorithms; logic and organization of digital arithmetic processors; conventional arithmetic; algorithm acceleration; floating-point and significance arithmetic; redundant, signed-digit, residue number systems; error detecting codes for digital arithmetic; algorithm evaluation by analysis and simulation.

Mr. Avizienis, Mr. Ercegovac (W)

Mr. Avizienis, Mr. Rennels (W)

253B. Advanced Topics in Fault-Tolerant Computing. Prerequisite: Computer Science 253A. Analysis and discussion of the modeling, design, and evaluation of fault-tolerant computer systems. Emphasis on current research results and new systems in the stages of design and development. May be repeated for credit, provided no duplication exists.

Mr. Avizienis, Mr. Rennells (Sp)

254A. Computer Memories and Memory Systems. (Formerly numbered Engineering 225D.) Prerequisite: Computer Science 251A or consent of instructor. Generic types of memory systems; control, access modes, hierarchies, and allocation algorithms. Characteristics, system organization and device considerations of ferrite memories, thin film memories and semiconductor memories.

Mr. Chu, Mr. Rennells (F,Sp)

255A. Distributed Processing and Distributed Data Base System. Prerequisite: Computer Science 251A or consent of instructor. Emphasis on current research results and new systems in the stages of design and development. May be repeated for credit, provided no duplication exists.

Mr. Chu (Sp)

256A. Interactive Computer Graphics. (Formerly numbered Computer Science 274A.) Prerequisite: Computer Science 174 or equivalent. Current topics in interactive computer graphics system design, development, and applications.

Mr. Bussel (Sp)

257A. Computer System Design: Comparative Architecture and Synthesis Methods. (Formerly numbered Engineering 225B.) Prerequisite: Computer Science 252A. Advanced topics in computer system architecture, elucidate important properties of computer systems and study methods for modeling, evaluating, and synthesizing them.

Mr. Estrin (W)

M258A-M258B-M258C. LSI In Computer System Design. (Same as Electrical Engineering M258A-M258B-M258C.) Prerequisite: Graduate Standing in Computer Science or Electrical Engineering and consent of instructor. An in-depth study of a quarter interdepartmental graduate course with four units of credit each quarter on LSI/VLSI design principles and application in computer systems.

Mr. Estrin, Mr. Viswanathan

259A. Current Topics in Computer Science-System Design (Architecture). (1 to 4 courses) (Formerly numbered Engineering 225Z.) Prerequisite: consent of instructor. Review of current literature in an area of Computer System Design, in which the instructor has developed special proficiency as a consequence of research interests. Student reports on selected topics. May be repeated for credit, provided no duplication exists.

The Staff, Computer Science Department

271B. Computer Methodology: Distributed Parameter Systems. (Formerly numbered Engineering 224B.) Prerequisite: Computer Science M124A. A survey of the mathematical formulation and computer solution of engineering field problems governed by partial differential equations. Emphasis on digital simulation methods, including finite difference approximations, Monte Carlo methods and the use of problem-oriented languages.

Mr. Karplus, Mr. Vidal (F)

271C. Seminar In Advanced Simulation Methods. (1/4 course) Prerequisite: Computer Science 271A or equivalent. Discussion of advanced topics in the simulation of systems characterized by ordinary and partial differential equations. Topics include among others: simulation languages, dataflow machines, array processors, and advanced mathematical modeling techniques. Subject to change from quarter to quarter. May be repeated for credit. To be graded on S/U basis.

Mr. Karplus

Mr. Pearlman (W)

Mr. Pearl

M274B. Knowledge-Based Systems. (Same as Engineering Systems M274B.) Prerequisite: Engineering Systems M274A or Computer Science M274A. Machine representation of judgmental knowledge and uncertain relationships. Inference on inexact knowledge bases. Rule-based systems—principles, advantages, and limitations. Signal understanding. Automated planning systems. Knowledge acquisition and explanation producing techniques. Mr. Pearl

M274C. Computer Methods of Data-Analysis and Model-Formation. (Same as Engineering Systems M274C.) Prerequisite: Engineering 193A or 120A or equivalent, or consent of instructor. Techniques of using computers to interpret, summarize, and form models of empirical data. Emphasis on computer based mathematical analyses of tradesoffs between the computational complexity, storage requirements, and precision of computerized models.

Mr. Pearl

274Z. Current Topics in Cognitive Systems. (Same as Engineering Systems M274Z.) Prerequisite: consent of instructor and additional prerequisites for each such offering as announced in advance by the department. Theory and implementation of systems which emulate or support human reasoning. Current literature and individual studies in: artificial intelligence, knowledge-base systems, decision support systems, computational psychology, and heuristics planning theory. May be repeated for credit.

Mr. Pearl

276A. Statistical Pattern Recognition. (Formerly numbered Engineering 225M.) Lecture, four hours. Prerequisite: Graduate Standing, some background in probability such as Engineering 120A, Mathematics 135A is useful. Computer methodology in the processing of large data sets, multidimensional measurements. Adaptation and learning the mean of a normal distribution. Bayesian statistics and loss functions. Learning algorithms and clustering processes. Student projects and presentations.

Mr. Klinger (F)
278B. Structural Pattern Recognition. Prerequisite: some background in Computer Science such as CS 141, 181 or consent of instructor. Descriptive methods in computer processing of patterned data. Picture description languages, primitives, and formal methods, including pattern recognition. Introductory material on scene analysis and image processing. Applications to alphanumeric characters, chromosome data, and line drawings.

M. Klinger (W)

276C. Machine Pattern Analysis. (Spring) Prerequisite: Computer Science 276A or equivalent. Advanced research topics in machine processing of patterned data. Topics in pattern recognition, image processing, artificial intelligence, e.g., scene analysis and data storage, and applications. May be repeated once for credit. Provided no duplication exists.

M. Klinger (W)

277A. Heuristic Programming and Artificial Intelligence. (Formerly numbered Computer Science 226A.) Prerequisite: Computer Science course 181 or 131 or consent of instructor. Principles underlying the use of computers to perform tasks generally agreed to require some intelligence. The objective is to develop an understanding of current research regarding the possibilities and limitations of existing experiments in automating intelligent behavior.

M. Klinger, Mr. Pearl

279. Current Topics in Computer Science-Meth- odology. (1/2 to 4 courses) (Formerly numbered Engineering 224Z.) Prerequisite: consent of instructor. Review of current courses in Computer Science Methodology in which the instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit, provided no duplication exists.

The Staff, Computer Science Department

280A-280Z. Topics in Algorithms and Computational Complexity. (Formerly numbered System Science 228CA-228ZC.) Lecture, four hours. Prerequisites: consent of instructor, and additional prerequisites for each offering announced in advance, by the Department of Computer Science. Topics selected from the design, analysis, and implementation of algorithms for numerical and combinatorial problems, digital computer practice, systematic applications, theories of computational complexity, and evaluations or bounds for complexities of problems, functions, systems, and processes. May be repeated for credit when no duplication exists.

M. Carlyle, Mr. Parker (F W)

281A. Computability and Complexity. (Formerly numbered System Science 222B.) Lecture, four hours. Prerequisite: Computer Science 123B or 181, or comparable background. Concepts fundamental to the theory of computation, including models of computing, with emphasis on: regular sets of strings, Turing-enumerable (recursively enumerable) sets, closure properties, machine characterization, nondeterminism, decidability, uncomputable problems, "easy" and "hard" problems, PTIME/NTIME.

Mr. Greibach, Mr. Parker (Sp)

281D. Discrete State Systems. (Formerly numbered System Science 229B.) Prerequisite: consent of instructor; Engineering 128D recommended. Finite-state machines, transducers and their generalizations; regular expressions, transduction expressions, realizability; decomposition, synthesis, and design considerations; topics in state and system identification and fault diagnosis, linear machines, probabilistic machines, applications in coding, communication, computing, system modeling and simulation.

M. Carlyle (Sp)

284A. Context-Free Languages. (Formerly numbered Computer Science M284A.) Prerequisite: Computer Science 123B or 181. Detailed study of context-free languages and their restrictions and generalizations. Including grammars, derivation trees, ambiguity, normal forms, operations, closure properties, pushdown automata, topics from formal languages, determining machines and automata, LR (k) grammars, macro grammars. Ms. Friedman, Ms. Greibach (F)

284A-284Z. Topics in Automata and Languages. (Formerly numbered System Science 284A-284Z.) Prerequisites: consent of instructor, and additional prerequisites for each offering as announced in advance by the Department of Computer Science. Comprehensive treatment of one or more topics from areas such as: families of formal languages and operators; realtime computation; resource-bounded computation; theories of machines, grammars, data structures, programs, semantics; picture grammars and pattern recognition; biological models and developmental systems. May be repeated for credit when no duplication exists.

Ms. Friedman, Ms. Greibach (W)

Ms. Friedman, Ms. Greibach (W)

287A. Theory of Program Structure. (Formerly numbered Computer Science M287A.) Prerequisite: Computer Science 123B or 181. Models of computer programs and their syntax and semantics; emphasis on programs and recursion schemes; equivalence, optimality, correctness and tractability of programs; expressive power of constructs and data structures; selected current topics.

Ms. Friedman, Ms. Greibach (W)

288A. Algebraic Foundations of Computer Science. Prerequisite: Mathematics 112B or equivalent, or consent of instructor. A systematic algebraic approach to certain computer science topics and applications. The following topics will be covered: fundamentals of category theory, models of computation, automata theory, linear systems, and models of computation including finite automata and Turing machines. The relationship between these topics and other areas of computer science, including: verification of program and hardware correctness; data structures; compiler correctness; structured programming; tree manipulation, automata, program synthesis, and recursivity; and various approaches to semantics.

The Staff, Computer Science Department

289. Current Topics in Computer Theory. (1/4 to 3 courses) (Formerly numbered Engineering 223Z.) Prerequisite: consent of instructor. Review of current literature in an area of Computer Theory in which the instructor has developed special proficiency as a consequence of research interests. Students report on selected topics.

The Staff, Computer Science Department

497D-497E. Field Projects in Computer Science. Prerequisite: consent of instructor. Students will be divided into teams led by the instructor; each team will be assigned an external company or organization with some problem to be solved by computerization. They will submit a team report of their findings and recommendations. This course is offered on an In Progress basis which requires students to complete the full two-quarter sequence, at the end of which a grade is given for all quarter work.

Mr. Melkanoff (497D, F; 497E, W)

596. Directed Individual or Tutorial Studies. (1/4 to 2 courses) Prerequisite: Graduate Standing in Engineering; consent of instructor. Petition forms to request enrollment may be obtained from the Assistant Dean, Graduate Studies. Supervised investigation of advanced technical problems. To be graded on a S/U basis.

The Staff, Computer Science Department

597A. Preparation for M.S. Comprehensive Ex- amination. (1/2 to 3 courses) Prerequisite: Graduate Standing in Engineering; consent of instructor. Petition forms to request enrollment may be obtained from the Assistant Dean, Graduate Studies. Reading and preparation for M.S. comprehensive examination. To be graded on a S/U basis.

The Staff, Computer Science Department

597B. Preparation for Ph.D. Preliminary Examina- tions. (1/2 to 4 courses) Prerequisite: Graduate Standing in Engineering; consent of instructor. Petition forms to request enrollment may be obtained from the Assistant Dean, Graduate Studies. To be graded on a S/U basis.

The Staff, Computer Science Department

597C. Preparation for Ph.D. Oral Qualifying Ex- amination. (1/4 to 4 courses) Prerequisite: Graduate Standing in Engineering; consent of instructor. Petition forms to request enrollment may be obtained from the Assistant Dean, Graduate Studies. Supervised independent research for M.S. candidates, including the preparation of a written thesis. Graduation research leading to a thesis. To be graded on a S/U basis.

The Staff, Computer Science Department

598. Research for and Preparation of the Master's Thesis. (1/4 to 3 courses) Prerequisite: Graduate Standing in Engineering; consent of instructor. Petition forms to request enrollment may be obtained from the Assistant Dean, Graduate Studies. Supervised independent research leading to a thesis. To be graded on a S/U basis.

The Staff, Computer Science Department

599. Research for and Preparation of the Doctoral Dissertation. (1/4 to 4 courses) Prerequisite: Graduate Standing in Engineering; consent of instructor. Petition forms to request enrollment may be obtained from the Assistant Dean, Graduate Studies. To be graded on a S/U basis.

The Staff, Computer Science Department

Electrical Engineering

210A. Advanced Circuit Theory I. (Formerly numbered Engineering 210A.) Prerequisite: Engineering 110B; concepts of linear algebra and complex functions. Characterization of n-ports and multi-terminal elements. Introduction to, and applications of, the scattering matrix, and related topics.

Mr. Orchard (F W)

Mr. Wilson (W)

Mr. Orchard, Mr. Temes (W)

210D. Active, Passive, and Digital Filters. (Formerly numbered Engineering 210D.) Prerequisite: Electrical Engineering 210C or consent of instructor. Approximation theory. Realization of passive filters. Electro-mechanical filters. Active filters with lumped and/or distributed elements. Switched and digital filters.

Mr. Temes, Mr. Farhat (Sp)

Mr. Temes, Mr. Wilson (F)

Mr. Wilson (W)

213A. Quantum Electronics I. Prerequisite: Electrical 115A or consent of instructor. (Not the same as ESE 213A.) Spectra, radiation and matter. Standing in Engineering 115A or consent of instructor. Petition forms to request enrollment may be obtained from the Assistant Dean, Graduate Studies. Supervised independent research leading to a thesis. To be graded on a S/U basis.

Mr. Casperson, Mr. Stalsudd (F)
213B. Quantum Electronics II. Prerequisite: Electrical Engineering 213A or consent of instructor. Not open for credit to students who have taken Electrical Sciences and Engineering 213A prior to Fall Quarter 1979. Optimal beams and resonators, interaction of light with atoms including amplification and satura-
tion, properties of laser light, coherence, diffraction, and mode effects. Mr. Casperson, Mr. Stafsudd
213C. Quantum Electronics III. (Formerly numbered Engineering 213C.) Prerequisite: Electrical Engineering 213B or consent of instructor. Properties of laser oscillators, quantum coherence, quantum mechanical effects, and behavior of high gain laser media. Mr. Casperson, Mr. Stafsudd
213D. Quantum Electronics IV. Prerequisite: Electrical Engineering 213B or consent of instructor. (Not open for credit to students who have taken Electrical Sciences and Engineering 213B prior to Winter Quar-
Mr. Casperson
213S. Quantum Electronics Seminar. (½ course) (Formerly numbered Engineering 213S.) Prerequi-
ti sque: Electrical Engineering 213A or consent of in-
structor. A series of lectures and student presenta-
tions covering current topics in quantum electronics, modern optics, and laser physics. May be re-
peated for credit. To be graded on an S/U basis.
Mr. Casperson, Mr. Stafsudd
214A. Plasma Waves and Instabilities. (Formerly numbered Engineering 214A.) Prerequi-
ti sque: Engineering 100B and M118 or Physics M122. W. W. Mullins. Waves and plasma phenomena in plasmas described by the macroscopic fluid equations. Emphasis on homogeneous plasmas in uniform magnetic fields. Microwave propagation, plasma oscillations, ion acoustic waves, cyclotron waves, hydromagnetic waves, whistlers and helicon waves, and their classification. Illustrative experiments. Mr. Chen, Mr. Luhmann (W)
214B. Advanced Plasma Waves and Instabilities. (Formerly numbered Engineering 214B.) Prerequi-
Mr. Chen, Mr. Luhmann (Sp)
M214C. Principles of Magnetic Confinement Fu-
son. (Same as Chemical, Nuclear & Thermal Engineering M250.) Prerequisites: Engineering M118, Electrical Engineering 214A, 214B or Physics 222A, 222B, or consent of instructor. Plasma requirements for controlled fusion. Methods of magnetic fields. Theory of MHD equilibrium and stability. Shear and minimum-B stabilization. Resistive and micro-instabili-
ties. Neoclassical diffusion. Emphasis on equilibri-
um and stability. Partially coherent waves, statistical media. Mr. Alexopoulos, Mr. Willis, Mr. Yeh
215A. Solid State Electronics I. Prerequisite: Engineer-
ing 111C; Electrical Engineering M118 or consent of instructor. Energy band theory, electronic band structure of various elementary, compound, and alloy semiconductors, defects in semiconductors. Re-
combination mechanisms, transport properties.
Mr. Pan, Mr. Wang
215B. Solid State Electronics II. Prerequisite: Electrical Engineering 215A. Techniques to solve Boltz-
tmann Transport Equation, various scattering mecha-
nisms in semiconductors, high field transport proper-
ties of semiconductors, Monte Carlo method in transport. Optical properties Mr. Pan, Mr. Wang
215C. Microwave Semiconductor Devices. (For-
merly numbered Engineering 215C.) Prerequisite: Engineer-
ing 115D. Physical principles and design considerations of microwave solid-state devices: Schottky barrier mixer diodes, IMPATT diodes, trans-
ferred electron devices, tunnel diodes, microwave transistors.
Mr. Allen, Mr. Pan (Sp)
215D. Electrical Sciences and Engineering: Phys-
ics of Semiconductor Devices I. (Formerly numbered Engineering 215D.) Prerequisite: Engineer-
ing 115D. Physical principles and design considerations of junction devices. Mr. Allen, Mr. Viswanathan (F)
215E. Electrical Sciences and Engineering: Phys-
ics of Semiconductor Devices II. Prerequisite: Engineer-
ing 215D. Design and operating characteristics of field effect devices, and charge-coupled devices.
Mr. Viswanathan, Mr. K. Wang (W)
216A. Analog Integrated Circuits. (Not the same as Electrical Sciences and Engineering 216A prior to Fall Quarter 1981.) High speed and linear amplifiers: circuit design for optimum high frequency response. Oper-
aional amplifiers, improved input impedance and slew rate, zero-pole compensation, circuit design techniques for optimum SNR. Voltage multipliers. Di-
odes and A/D converters. Mr. K. Martin, Mr. Willis
216B. Digital Integrated Circuits. (Not the same as Electrical Sciences and Engineering 216B prior to Winter 1981.) Prerequisites: Engineering 116C; Computer Science 141A. Modern logic families (de-
scription, analysis and comparison), MSI digital cir-
cuits (flipflops, registers, counters, PLA's, etc.), VLSI memories (ROM's, RAM's, CCD's, bubble memories, EPROM's, EEPROM's) and VLSI systems (micro-
computers, PIA's, ACA's, etc.).
Mr. K. Martin
216C. Advanced Integrated Circuit Design. Pre-
requisite: Electrical Engineering 216A, 216B; Engineer-
ing 116E. Integrated circuit and system consider-
atons: optimization and high-frequency effects, yield, reliability. Competing integrated circuit technologies; tradeoffs in materials and circuit design, special func-
tions, hardware/software trade-off. Integrated circuit design project.
Mr. Martin
216D. Microwave amplifiers. (Formerly numbered Electrical Sciences and Engineering 216A.) Prerequi-
mum design approach, graphical approximations, synthesis of 1-D and 2-D converters. Mr. Willis
216E. Modern Electronic and Parametric Devices. (Formerly numbered Electrical Sciences and Engi-
neering 216B.) Prerequisite: Engineering 116B. (Not open to students who have taken ESE 216B prior to Winter 1981.) Modern electronic devices, with emphasis upon basic operating princi-
ples and behavior and performance in system usage. Specific devices to be analyzed may be grouped as follows: semiconductor microwave, parametric, and quantum electronic devices.
Mr. Willis
217A-217B. Advanced Engineering Electrodynami-
sics. (Formerly numbered Engineering 217A-B.) Prerequisite: Engineering 117A, 117B or equivalent. Advanced treatment of concepts in electrodynamics and their applications to modern engineering prob-
lems. Waves in anisotropic, inhomogeneous and dis-
pering media, radiation and diffraction, bounded regions. Radiation and diffraction, including optical phenomena. Partially coherent waves, statisti-
cal media.
Mr. Alexopoulos, Mr. Willis, Mr. Yeh
217C. Microwave Circuits. (Formerly numbered En-
Mr. Elliott, Mr. Schott (Sp)
217E. Antenna Theory and Design. Prerequisite: Engineering 117B. Antenna patterns. Sum and differ-
Mr. Elliott (Sp)
*219A. Seminars on Advanced Topics in Electrom-
agnetics. (Formerly numbered Engineering 219A.) Prerequisite: Electrical Engineering 215A or consent of instructor. Current topics in electromagnetics, such as wave in-
traction with ferrites, moving media, data processing antennas, waves in statistically varying media, nu-
merical methods applied to electromagnetics, such as problems, holograms and partially coherent waves. May be repeated for credit.
The Staff, Electrical Engineering Department
*219B. Seminars on Advanced Topics in Solid State Electronics. (Formerly numbered Engineering 219B.) Prerequisite: Electrical Engineering 215A, 215B. Current research areas, such as radiation ef-
facts in semiconductor devices, diffusion in semicon-
ductors, optical and microwave semiconductor de-
vice, nonlinear optics, and electron emission.
The Staff, Electrical Engineering Department
*219C. Seminar: Special Topics in Applied Elec-
tronics. (Formerly numbered Engineering 219C.) Prerequisite: Electrical Engineering 216C or consent of instructor. Current topics in applied electronics and electron systems, such as : Fourier optics, optical data processing, communication systems and tech-
niques, parametric electronics and devices. May be repeated for credit.
The Staff, Electrical Engineering Department
*219D. Special Topics in Electrical Circuit Theory.
(Formerly numbered Engineering 219D.) Prerequi-
ti sque: Electrical Engineering 210B or 210C or 210D. Advanced treatment of topics chosen from research areas in electrical circuit theory.
The Staff, Electrical Engineering Department
*219E. Special Topics in Quantum Electronics. (Formerly numbered Engineering 219E.) Prerequi-
ti sque: Electrical Engineering 213A or consent of in-
structor. Advanced treatment of topics chosen from research areas in quantum electronics such as guided wave optics, unconventional laser systems, optical detection, and coherent optical imagery. May be re-
pealed for credit.
Mr. Casperson, Mr. Stafsudd
219X. Advanced Electrical and Parametric De-
vices. (Formerly numbered Engineering 219X.) Prerequi-
ti sque: Electrical Engineering 213A or consent of in-
structor. Modern electronics (Section 1) and in electronic circuit theory (Section 2). Each student will report on a tutorial topic and on a research topic in his disserta-
tion area. May be repeated for credit. To be graded on an S/U basis.
Mr. Viswanathan

Mr. DiStefano, Mr. Leondes (F)

Mr. DiStefano, Mr. Leondes (W)

271C. Dynamic Systems Identification, Stability and Adaptive Control. (Formerly numbered Engineering 271C.) Prerequisite: Engineering Systems 271A. 271B is recommended, or consent of instructor. New topics: advanced systems modeling, identification and parameter estimation techniques. Combined identification and control and self-adaptive control.

Mr. Leondes (W)

271D. Seminar and Special Topics In Dynamic Systems. (Formerly numbered Engineering 271D.) Prerequisite: consent of instructor. Seminar on current research topics in dynamic systems modeling, control and applications. Topics selected from process control, differential games, nonlinear estimation, adaptive filtering, industrial and aerospace applications, etc.

Mr. Leondes (Sp)

272D. Advanced Topics in Operations Research and Large Scale Systems. (Formerly numbered Engineering 272D.) Prerequisites: Systems Science 272A, 272B. Advanced topics of current interest in operations research chosen from among identification and optimization problems for static and dynamic systems, sensitivity theory analysis, Numerical computation methods for solving dynamic models, Rule-based systems, etc. Resource allocation, modeling techniques and other topics.

Mr. Leondes

272A. Problem Solving and Decision Making. (Formerly numbered Engineering 272A.) A challenge in modern society is the existence of complex problems which are difficult to solve. The problem-solving process is a systematic approach to problem-solving. The process involves several steps: identify the problem, define the problem, generate possible solutions, evaluate the solutions, and select the best solution. The process is iterative and requires critical thinking skills.

Mr. Pearl

274C. Computer Methods of Data-Analysis and Model Formation. (Formerly numbered Engineering Systems 274C.) Prerequisite: Engineering Systems M274A. Pre-requisite: Engineering 274A or Computer Science M274A. Preparation for solving boundary value problems of optimal control. The economics of human factors and machine environments. Mr. Pearl

274J. Multicriteria Decision Making with Conflicting Objectives. Prerequisite: Engineering 174A or Engineering Systems 274A or equivalent. The theory and practice of multicriteria decision problems. The theory of quantifying preferences over multiple objectives. Multicriteria utility theory. The structuring of models for conditional strategies under conflict situations. The theory of metagames and metanegotiation. Mr. Pearl, Mr. Rubinstein (W)

274K. Perspectives on System Representation. (Formerly numbered Engineering 274K.) Prerequisite: Engineering Systems 274J or consent of instructor. Mathematical and conceptual models used in analysis and synthesis of engineering, Socio-Technical Systems. Mr. Pearl, Mr. Leondes (W)

274L. Advanced Topics in Cognitive Systems. (Formerly numbered Engineering Systems 274L.) (Same as Computer Science M274J.) Prerequisites: consent of instructor and additional prerequisites for each such offering as announced in advance by the department. Theory and implementation of systems which emulate or support human reasoning. Current literature and individual studies in: artificial intelligence, knowledge-based systems, decision support systems, cybernetics, psychology, and heuristics. May be repeated for credit when duplication exists.

Mr. Pearl

275A. Computer-Aligned Design. (Formerly numbered Engineering 275A.) Prerequisites: Engineering 271B or equivalent and 129L. Seminar in computer-aided design of engineering systems focusing on design processes. Organization of the design process, its decision points and back-up information, for automatic machine processing of the specifications to provide full design data for a family of products. Mr. Rosenblum

277B. Advanced Engineering Economics II. Seminar. (Formerly numbered Engineering 277B.) Prerequisite: Engineering Systems 277A or equivalent or consent of instructor. The economics of engineering education, research, and development. Topics in monopoly and duopoly markets. Mr. Pearl

280A. Advanced Biotechnology. (Formerly numbered Engineering 280A.) Prerequisite: Engineering 180A or 180B or consent of instructor. Review and analysis of contemporary biobiochemistry research which bears on problems of engineering component and system design. Emphasis is on methodological and scientific factors underlying human-environment interactions. Mr. Lyman, Mr. O'Brien (W)

280B. Advanced Biotechnology. (Formerly numbered Engineering 280B.) Prerequisite: Engineering 180A or 180B or consent of instructor. Specialized coverage of a "human factor," e.g., "human engineering" with orientation toward obtaining, design optimization of the functions of humans in relation to engineering parameters of environment, communication and control.

Mr. Lyman (Sp)

284A. Surface Water Hydrology. (Formerly numbered Engineering 284A.) Prerequisite: Engineering 184A or consent of instructor. In-depth study of the surface water components of the hydrologic cycle. Instantaneous units hydrograph, dynamic wave equations, rainfall-runoff equations, and other topics. Mr. Dracup, Mr. W. Yeh (W)

Mr. Dracup, Mr. W. Yeh (Sp)

284C. Water Resources Systems Engineering. (Formerly numbered Engineering 284C.) Prerequisites: Engineering 129L, 148B. Application of mathematical programming techniques to water resources systems. Topics include reservoir regulation, optimal timing, sequencing and sizing of water resources projects and real-time conjunctive operations of ground water and surface water resources systems. Emphasis is on the management of water quantity.

Mr. Stenstrom (W)

Mr. Dracup, Mr. W. Yeh (Sp)

284E. Saline Water Conversion. (Formerly numbered Engineering 284E.) Prerequisites: Engineering 137A and Chemistry 110A-110B or equivalent. Current research and development in saline water conversion, in the fields of distillation, electrolysis, freezing, reverse osmosis and chemical extraction. A study of process optimization and economics of combined water power systems.

Mr. McCutchan (W)

284F. Selected Topics in Water Resources (5 units) course. (Formerly numbered Engineering 284F.) Prerequisites: Graduate Standing; consent of instructor. Review of recent research and development in the management of resources. Water and hydroelectric supply systems. Water quality management. Water law and institutions. Economic planning and optimization of water resources development. May be repeated once for credit.

Mr. Dracup (F,Sp)
Materials Science and Engineering

245B. Principles of Materials Science B (Structure of Materials). Prerequisite: Engineering 145A or equivalent. Atomic, electronic, and crystalline structure of materials; particles and waves, free electron model, binding in solids; crystal defects, morphology, and real and quasichemical approach. Free energy of binary systems, and the construction of phase diagrams. Constitution of melts. Thermodynamics of interfaces and defects. Mr. Knapp (F, even years)

246A. Structure and Properties of Glass. (Formerly numbered Engineering 246A.) Prerequisite: Engineering 146A. Structure of amorphous solids and glasses. Conditions of glass formation and theories of glass structure. Mechanical, electrical and optical properties of glass, and relationship to structure. Mr. Mackenzie (Sp, even years)

246B. Electronic and Optical Properties of Ceramics. (Formerly numbered Engineering 246B.) Prerequisite: Engineering 146A. Governing electronic properties of ceramic single crystals and glasses and effects of processing and microstructure of these properties. Electronic conduction, ferroelectricity, and photochromism. Magnetic ceramics. Ferrimagnetic, ferric, ferril and ultraviolet transmission. Usual application of ceramics. Mr. Mackenzie (Sp, odd years)

247C. Advanced Solidification. (Formerly numbered Engineering 247C.) Prerequisite: Materials Science and Engineering 247A or equivalent. Liquid state concept of constitutional supercooling; nucleation from the liquid phase; solute redistribution during liquid-solid transformation; fluid motion; interfaces; morphology; eutectic growth; determination of phase diagrams; student reports on current topics in solidification. Mr. Yue (F, even years)

248A. Experimental Methods in Materials Synthesis. (Formerly numbered Engineering 248A.) Prerequisite: Engineering 146A or equivalent. Techniques used in materials synthesis temperature measurement, vacuum techniques, methods of heating and quenching, consolidation and refining of metals, crystal growth, thin film deposition and thick film deposition. Laboratory experiments and demonstrations carried out. Mr. Bunshah (F, odd years)
Mechanics and Structures

250A. Foundations of Fluid Dynamics. (Formerly numbered Engineering 251A.) Prerequisites: Engineering 150A or consent of instructor. The course develops and applies the fundamental theorems of fluid dynamics. Ideal fluids, potential flow, vortex motion, and viscous flow are treated. The history of fluid dynamics is presented. Lectures are supplemented with problems leading to the study of fluid resistance. States of fluid motion are discussed in order of advancing Reynolds number; waves, boundary layers, instability, transition, and turbulent shear flows. Mr. Cole (F)

250B. Viscous and Turbulent Flows. (Formerly numbered Engineering 250B.) Prerequisite: Engineering 150A or consent of instructor. The course covers the fundamental principles of fluid dynamics to the study of fluid resistance. States of fluid motion are discussed in order of advancing Reynolds numbers; waves, boundary layers, instability, transition, and turbulent shear flows. Mr. Cole (W)

250C. Compressible Flows. (Formerly numbered Engineering 250C.) Prerequisite: Engineering 150A or 150B or consent of instructor. Effects of compressibility in viscous and inviscid flows. Steady and unsteady viscous subsonic and supersonic flows; method of characteristics; small disturbance theories; linearized and hypersonic; shock dynamics. Mr. Cole (Sp)

251A. Stratified and Rotating Fluids. (Formerly numbered Engineering 251A.) Prerequisite: Engineering 150A or equivalent or consent of instructor. Fundamentals of fluid flows with density variations or rotation, illustrated by examples with environmental, geophysical or technical importance. Linear and finite amplitude wave motion. Flow past bodies in two- and three-dimensional phenomena. Viscous effects. Instabilities. Turbulent shear flows, wakes, plumes, and gravity currents. Mr. Kelly (F)

251B. Marine Hydrodynamics. (Formerly numbered Engineering 251B.) Prerequisite: Engineering 150A or equivalent or consent of instructor. Basic hydrodynamics; small amplitude and shallow water theories; waves on beaches; ship waves; mathematical hydraulics; breaking of a dam. Mr. Cole (W)

251C. Fluid Dynamics of Pollution. (Formerly numbered Engineering 251C.) Prerequisite: Engineering 150A or consent of instructor. The course is designed to introduce to engineers and/or scientists of various disciplines the fluid mechanical aspect of pollution problems. The lectures will discuss in depth the fluid dynamics of physical-chemical, oil spills and pollution in waterways. Boundary and surface forces on structures. Mechanics of jets and wakes. Mr. Liu (Sp)

252A. Stability of Fluid Motion. (Formerly numbered Engineering 252A.) Prerequisite: Engineering 150A or equivalent or consent of instructor. The course covers the fundamental principles of stability and to turbulence of secondary motions. Linear stability theory; thermal, centrifugal, and shear instabilities; boundary layer instability. Nonlinear aspects: sufficient criteria for stability, subcritical instabilities, supercritical states, transition to turbulence. Mr. Cole (W)

252B. Statistical Theory of Turbulence. (Formerly numbered Engineering 252B.) Prerequisite: Engineering 150A or consent of instructor. The course develops statistical methods of wide utility in engineering, then applies them to turbulent flows. Topics covered are stochastic processes, kinematics of turbulence, energy decay. Kolmogorov similarity, analytical theories, and origins of Reynolds stress. Mr. Meacham (Sp)

252D. Engineering Magnetohydrodynamics. (Formerly numbered Engineering 252D.) Prerequisites: Engineering 117A and Mechanics and Structures 250A or consent of instructor. Continuum theory of the motion of a conducting fluid in a magnetic field; practical solutions of noncompressible flow; elements of the theory of conductivity in a plasma; propulsion and power generation applications. Mr. Meacham (Sp)

253A. Advanced Engineering Acoustics. (Formerly numbered Engineering 253A.) Advanced studies in Engineering Acoustics. Linear and nonlinear wave propagation; propagation in bounded media; Ray acoustics; attenuation mechanisms in fluids. Mr. Stern (F)

253B. Fundamental of Aerodynamics. (Formerly numbered Engineering 253B.) Prerequisite: Engineering 150A or consent of instructor. Theoretical analysis of the interaction of sound and structures; acoustic transmission through fluid layers and walls; structural wave propagation; multidimensional random processes using wave number and frequency space; response and radiation of infinite and finite structures; statistical energy analysis. Mr. Meecham (W)

253C. Sound and Vibration. (Formerly numbered Engineering 153C.) Prerequisite: Engineering 153A or 155A, or consent of instructor. Theoretical analysis of the interaction of sound and structures; acoustic transmission through fluid layers and walls; structural wave propagation; multidimensional random processes using wave number and frequency space; response and radiation of infinite and finite structures; statistical energy analysis. Mr. Meecham (Sp)

254A. Special Topics in Aerodynamics. (Formerly numbered Engineering 254A.) Prerequisites: Engineering 150A-150B or Mechanics and Structures 250A-250B. Course will study the design and operating ranges of wind tunnels, water tunnels and unsteady flow facilities. This will include laboratory demonstrations and field trips. Modern instrumentation techniques and typical fluids experiments will be studied and criticized. Mr. Charnat (Sp)

254B. Experimental Techniques in Fluid Mechanics. (Formerly numbered Engineering 254B.) Prerequisites: one of Engineering 150A-150B or Mechanics and Structures 250A-250B. Course will study the design and operating ranges of wind tunnels, water tunnels and unsteady flow facilities. This will include laboratory demonstrations and field trips. Modern instrumentation techniques and typical fluids experiments will be studied and criticized. Mr. Charnat (Sp)

255A. Advanced Dynamics. (Formerly numbered Engineering 255A.) Prerequisite: Engineering 155 or 169A, or consent of instructor. Theoretical principles and Lagrange's equations. Kinematics and dynamics of rigid bodies; process, formation and analysis of spinning bodies. Mr. Mingori (F)

255B. Mathematical Methods in Dynamics. (Formerly numbered Engineering 255B.) Prerequisite: Mechanics and Structures 255A. Concepts of stability; state space interpretation; stability determination by means of linearization and Liapunov's Direct Method; the Hamiltonian and Liapunov function; non autonomous systems; averaging and perturbation methods of nonlinear analysis; parametric excitation and nonlinear resonance. Application to mechanical systems; wave propagation in elastic half-spaces; reflection and refraction of elastic waves; surface waves; vibrations of rods and plates. Mr. Mal (W)

256A. Mechanics of Deformable Solids. (Formerly numbered Engineering 256A.) Prerequisite: Engineering 158A or consent of instructor. Stress and strain tensors, indicial notation, compatibility conditions, equations of motion. Work and energy. Uniqueness of solutions and extremum principles. Constitutive laws of isotropic elastic solids, thermoelasticity, linear viscoelasticity and incremental plasticity. Mr. Mal (F)

256B. Elasticity. (Formerly numbered Engineering 256B.) Prerequisite: Mechanics and Structures 256A, or consent of instructor. Formulation of elastostatic problems; general, plane strain, plane stress. Reciprocal theorems and variational theorems. Airy's stress function and Papkovitch-Neuber solution; fundamental singular solutions, stress concentration, thermal stresses, elastic contact, load transfer, St. Venant's principle and applications. Mr. Muki (W)

256C. Plasticity, Creep and Thermal Stresses. (Formerly numbered Engineering 256C.) Prerequisite: Engineering 156A or 158A or consent of instructor. Incremental plastic stress-strain relations. Stress-strain-time relations commonly used in structural analysis. Unified treatment of plastic strain, creep strain and thermal strain, elastic, elastoplastic and creep analyses of beams, columns, shafts, frames and plates. Mr. Lin (Sp)

256F. Analytical Fracture Mechanics. (Formerly numbered Engineering 256F.) Prerequisites: Materials Science and Engineering 243A; Engineering 156A, 158A or 166. Review of modern fracture mechanics, elementary stress analyses; analytical and numerical methods for calculation of crack tip stress intensity factors; engineering applications in stiffened structures, pressure vessels, plates and shells. Mr. Westman (Sp)

257A. Elastic Wave Propagation I. (Formerly numbered Engineering 257A.) (Same as Earth and Space Sciences 224A.) Prerequisite: Engineering 158A or 158B. Elastodynamics; elementary solutions; wave motions in elastic half-spaces; reflection and refraction of elastic waves; surface waves; vibrations of rods and plates. Mr. Mal (W)

257B. Elastic Wave Propagation II. (Formerly numbered Engineering 257B.) (Same as Earth and Space Sciences 224B.) Prerequisite: consent of instructor. Wave propagation in layered media; Green's functions for various geometries; diffraction and scattering of elastic waves; attenuation and radiation problems. Mr. Mal (W)

259A. Seminar on Advanced Topics in Fluid Mechanics. (Formerly numbered Engineering 259A.) Prerequisite: consent of instructor. Advanced study in various fields of solid mechanics on topics which may vary from term to term. Topics cover dynamics, elasticity, plasticity and stability of structures. Mr. Muki, Mr. Nelson

259B. Seminar on Advanced Topics in Solid Mechanics. (Formerly numbered Engineering 259B.) Prerequisite: consent of instructor. Advanced study in various fields of solid mechanics on topics which may vary from term to term. Topics cover dynamics, elasticity, plasticity and stability of structures. Mr. Muki, Mr. Nelson

262A. Advanced Mechanical and Mechanical Systems. (Formerly numbered Engineering 262A.) Prerequisite: Engineering 162A. The kinematic analysis, synthesis and dynamics of mechanisms and mechanical systems which make up industrial objects. Kinematical and analytical methods are considered. The use of computer techniques is discussed. A broad group of example systems are studied. Mr. Dubowsky (Sp)

262B. Dynamics and Control of Machines and Electromechanical Systems. (Formerly numbered Engineering 262B.) Prerequisite: Engineering 156A, 158A or 166. Review of modern fracture mechanics, elementary stress analyses; analytical and numerical methods for calculation of crack tip stress intensity factors; engineering applications in stiffened structures, pressure vessels, plates and shells. Mr. Dubowsky (Sp)

263A. Dynamics and Control of Machines and Electromechanical Systems. (Formerly numbered Engineering 263A.) Prerequisite: Engineering 163 or consent of instructor. The analysis of complex machines and electromechanical systems. Emphasis on the performance and dynamic response of systems containing gears, elastic compliances, active feedback elements, and other complex components and subsystems. Both classical methods and modern computer-based techniques are applied. Mr. Dubowsky (Sp)

263B. Vehicle Dynamics and Control. (Formerly numbered Engineering 263B.) Prerequisite: Engineering 163; Mechanics and Structures 255B. (Same as Earth and Space Sciences 224B.) Prerequisite: consent of instructor. Application to a variety of vehicles of advanced methods of dynamics and motion stability analysis, incorporating both classical and modern control theory. Particular emphasis is given to space vehicles and ground transportation vehicles, with special attention to current topics in these fields. Mr. Allen (Sp)
264A. Theory of Plates and Shells. (Formerly numbered Engineering 264A.) Prerequisite: Engineering 165A, 166, or consent of instructor. Small and large deformation theories of thin plates; energy methods; deformation theories of thin shells; applications to shells of revolution; free vibrations; membrane theory of shells; axisymmetric deformations of cylindrical and spherical shells including bending. Mr. Roberts (W)

265A. Advanced Structural Analysis. (Formerly numbered Engineering 265A.) Prerequisite: Engineering 165B, 166; consent of instructor. Mechanical and structural systems for deformable systems; solution methods for linear equations; analysis of structural systems with one dimensional elements; introduction to variational calculus; discrete element displacement force, and mixed methods for membrane, plate, shell structures; instability effects. Mr. Nelson (F)

265B. Finite Element Analysis of Structures. (Formerly numbered Engineering 265B.) Prerequisites: Engineering 166; Mechanics and Structures 265A or consent of instructor. Direct energy methods for one dimensional elements; finite element formulation for deformable systems; solution methods for linear equations; analysis of structural systems with one dimensional elements; introduction to variational calculus; discrete element displacement force, and mixed methods for membrane, plate, shell structures; instability effects. Mr. Nelson (Sp, odd years)

265C. Nonlinear Structural Analysis. (Formerly numbered Engineering 265C.) Prerequisite: Mechanics and Structures 265B or consent of instructor. Classification of nonlinear effects; material nonlinearities: conservative, nonconservative material behavior; geometric nonlinearities; Lagrangian, Eulerian description of motion; finite element methods in geometrically nonlinear systems; nonlinear behavior of structures; solution of nonlinear equations; incremental, iterative, programming methods. Mr. Nelson (Sp, even years)

266A. Stability of Structures I. (Formerly numbered Engineering 266A.) Prerequisite: Engineering 165B, 166 or equivalent. Elastic buckling of bars. Different approaches to stability problems. Inelastic buckling of columns and beam columns. Columns and beam columns with linear, nonlinear creep. Combined torsional and flexural buckling of columns. Stability problems of plates. Mr. Dong (Sp)

266B. Stability of Structures II. (Formerly numbered Engineering 266B.) Prerequisite: Mechanics and Structures 265A. Continuation of the structural stability by means of 266A. Applied to rings, plate, and shells. Dynamic stability of elements subject to transient and periodic forces. Mr. Dong (W, odd years)

267A. Optimum Structural Design. (Formerly numbered Engineering 267A.) Prerequisite: Mechanics and Structures 265A. Synthesis of structural systems; analysis and design as optimization problems; techniques for synthesis and optimization; application to aerospace and civil structures. Mr. Schmit (W)

267B. Advanced Topics in Optimum Structural Design. (Formerly numbered Engineering 267B.) Prerequisite: Mechanics and Structures 267A. Recent advances in structural synthesis. Hybrid methods and approximation concepts; optimum pre stressing; optimum design of curved columns; computer-aided topological considerations; aerodynamic and dynamic response constraints; applications, and current research. Mr. Schmit (Sp, odd years)

267E. Structural Loads and Safety for Civil Structures. (Formerly numbered Engineering 267E.) Prerequisites: Engineering 167A or 167B or 167C, and 169A which may be taken concurrently. Concept of structural safety. Factors of safety and quantification of loads in building codes. Probability of failure and quantification of loads in probabilistic approaches to structural safety. Relationships between factor of safety and probability of failure. Mr. Hart (F, odd years)

268A. Experimental Structural Analysis. (Formerly numbered Engineering 268A.) Prerequisite: consent of instructor. Study of modern techniques in experimental mechanics, including dimensional analysis, measurement theory and measurement techniques. Emphasis will be placed on techniques of modern optics, e.g., holography. More analysis, photoelasticity and speckle interferometry. Mr. Fourney (Sp, odd years)

268B. Failure of Structural Systems. (Formerly numbered Engineering 268B.) Prerequisite: Engineering 165B. Philosophy of structural safety. Principles of design for prevention of failure (other than buckling). Fatigue, brittle failure, delayed cracking, creep, design of efficient joints, environmental effects. Emphasis on current problems in actual structures. Mr. Sines (F, even years)

269A. Dynamics of Structures. (Formerly numbered Engineering 269A.) Prerequisite: Engineering 169A. Principles of dynamics. Determination of normal modes and frequencies by differential and integral equation solutions. Transient and steady state response. Emphasis on derivation and solution of governing equations using matrix formulation. Mr. Friedmann (F)

269B. Advanced Dynamics of Structures. (Formerly numbered Engineering 269B.) Prerequisites: Mechanics and Structures 265A, 269A. Analysis of linearly and nonlinearly vibrating structures subject to dynam ic loads. Stresses and deflections in structures. Structural damping and self-induced vibrations. Mr. Friedmann (W)

269C. Introduction to Probabilistic Dynamics. (Formerly numbered Engineering 269C.) Prerequisite: Engineering 169A. Response of structural and mechanical systems to random vibrations. Stationary and nonstationary excitations. Response of systems with random parameters. Discrete and continuous linear systems. Applications to earthquakes, wind sway of buildings, gust response, vibrations due to gearing inaccuracies, train vibrations. Mr. Hart (Sp)

269D. Aeroelastic Effects in Structures. (Formerly numbered Engineering 269D.) Prerequisite: Mechanics and Structures 269A. Presentation of field of aeroelasticity from unified viewpoint applicable to flight structures, suspension bridges, buildings and other structures. Derivation of aeroelastic operators and instability arising from governing variational principles. Flow induced instability and response of structural systems. Mr. Friedmann (Sp, odd years)

269A. Shear Strength of Soil and Stability of Slopes. (Formerly numbered Engineering 269A.) Prerequisite: Engineering 165A. Determination of fundamental concepts of shear strength of soils, strength determining factors, methods of strength measurement. Slope stability and stability analysis techniques using circular and noncircular failure surfaces. Analysis of side forces, total and effective stress, and earthquake loads. Mr. Lade (F)

269B. Foundation Engineering. (Formerly numbered Engineering 269B.) Prerequisites: Engineering 165A; Mechanics and Structures 265A. Principles of foundation design including theory of consolidation, impeded drainage, stress distribution, settlement analysis, allowable bearing capacity for shallow foundations, piles and piers; laterally loaded piles. Mr. Lade (W)

269C. Soil Dynamics. (Formerly numbered Engineering 269C.) Prerequisites: Engineering 165A; Mechanics and Structures 265A. Design of foundation for vibrating equipment. Strength and stress-stain relations for soil under cyclic loading conditions. Fundamentals of earthquakes as applied to seismic response of earth structures and foundations. Design of embankments, retaining walls, and foundations for earthquake loading. Mr. Lade (Sp)

269D. Earth Pressures and Earth Retaining Structures. (Formerly numbered Engineering 269D.) Prerequisites: Engineering 165A; Graduate Standing. The basic concepts of the theory of earth pressures behind retaining structures is presented with special application to shallow structures. The design of retaining walls, bulkheads and excavation bracing; the effects of flexibility of bulkhead walls, creep in soils and construction techniques are also discussed in detail. Mr. Lade (F, odd years)

285E. Seminar on Advanced Topics In Soil Mechanics. (Formerly numbered Engineering 285E.) Prerequisites: Graduate Standing in Engineering and consent of instructor. Topics may vary from term to term to cover subjects as earth dam design, seepage, through soils, consolidation, constitutive laws, finite difference and finite element methods with special application in soil mechanics, theories of elasticity and plasticity, and case histories. Mr. Lade, Mr. Westmann

285L. Advanced Soil Mechanics Laboratory. (Formerly numbered Engineering 285L.) Lecture, one hour; laboratory, six hours. Prerequisites: Engineering 185A, 185B; Mechanics and Structures 285A, 285B. Lectures and laboratory studies of advanced aspects of soil properties and their application to design. Permeability, consolidation, strength testing, pore water pressure measurements, advanced instrumentation and measurement techniques. Preparation of engineering reports. Mr. Lade (Sp)

286A. Earthquake Engineering. (Formerly numbered Engineering 286A.) Prerequisite: Mechanics and Structures 265A or 265B or 265A or Engineering 195A. Engineering seismology: strong earthquake motion, microtremors, wave velocity and damping, induced vibrations, spectral analysis. Risk of earthquakes and fault breaks. Site evaluation. Structure-earth system response. Introduction to earthquake resistant design of buildings, bridges and dams. Theory and field engineering experiments. Mr. Lade (W)

286B. Structural Response to Ground Motions. (Formerly numbered Engineering 286B.) Prerequisite: Mechanics and Structures 269A or consent of instructor. Spectral analysis of ground motions; special application to the design of retaining walls, bulkheads and structures to ground motions due to earthquakes and nuclear explosions. Computational methods to evaluate structural response. Response analysis including evaluation of contemporary design standards. Limitations due to idealizations. Mr. Rea (Sp)
221. Linear Optimal Control. (Formerly numbered Engineering 221.) Prerequisites: Engineering 128A; Engineering 128B or equivalent (may be taken concurrently). A course in matrix theory and introduction to optimal control, with emphasis on detailed study of LQR, or linear regulators with quadratic cost criteria. Relationships to classical control system design.

Mr. Levan, Mr. Mortensen (W,Sp)

222A. Nonlinear Control Systems. (Formerly numbered Engineering 222A.) Prerequisite: System Science 221. Techniques for studying nonlinear control systems, with emphasis on their stability; Liapunov's direct method; input-output stability; Popov's method; linearization.

Mr. Wang, Mr. Wiberg (F)

222B. Stochastic Control. (Formerly numbered Engineering 222B.) Prerequisites: Engineering 120B and System Science 221. Estimation and control of linear discrete-time and continuous-time stochastic systems; separation theorem and applications; Kalman filtering.

Mr. Balakrishnan (F,Sp)

222C. Optimal Control. (Formerly numbered Engineering 222C.) Prerequisite: System Science 221. Applications of variational calculus. Pontryagin's maximum principle, dynamic programming and nonlinear programming to problems of optimal control theory and practical systems.

Mr. Balakrishnan, Mr. Mortensen, Mr. Wang (W,Sp)

222EA-222EZ. Topics in Control. (Formerly numbered Engineering 222E.) Prerequisite: consent of instructor. Various topics for each offering as announced in advance by the Department of System Science. Thorough treatment of one or more aspects of control theory and applications, such as: computational methods for optimal control; stability of distributed systems; identification; adaptive control; nonlinear filtering; differential games; applications to flight control, nuclear reactors, process control, biomedical problems. May be repeated for credit when no duplication exists.

Mr. Balakrishnan, Mr. Wang (F, W, Sp)

M222F. Biological Control Systems. (Formerly numbered Engineering M222F.) (Same as Mathematics M274B.) Prerequisites: Engineering 192A or equivalent; Mathematics 132 or equivalent. The fundamental mathematics of asymptotic analysis, limit process expansions, regular and singular perturbation problems, matching of asymptotic expansions, multiple scale methods, application to partial differential equations, near and far fields.

Mr. Muki (W)

227C. Estimation and Filtering. (Formerly numbered Engineering 227C.) Prerequisites: Engineering 120B, System Science 227A recommended. Methods and theorems for estimation and filtering applied to problems in stochastic processes, communication systems, analog modulation and demodulation.

Mr. Balakrishnan, Mr. Mortensen, Mr. Yao (Sp)

227EA-227EZ. Topics in Communication. (Formerly numbered Engineering 227E.) Prerequisites: consent of instructor, and additional prerequisites for each offering as announced in advance by the Department of System Science.

Mr. Balakrishnan, Mr. Yao (W, Sp)

227F. Algebraic Coding Theory. (Formerly numbered Engineering 227F.) Prerequisite: System Science 227B or consent of instructor. Fundamentals of linear or parity-check codes and decoding algorithms based on the algebraic theory of finite groups and fields; cyclic codes; Hamming, Reed-Muller, Bose-Chaudhuri-Hocquenghem, and Reed-Solomon codes, and corresponding decoding algorithms.

Mr. Omura, Mr. Yao (F)

227G. Rate Distortion Theory and Data Compression. (Formerly numbered Engineering 227G.) Prerequisite: System Science 227B or consent of instructor. Sources and distortion measures, rate distortion function and its evaluation for discrete and continuous sources; discrete and continuous time source coding; block and tree source encoding techniques, and application to data compression. Student presentations of current research.

Mr. Omura, Mr. Yao (W)

228A. Foundations of Continuous-State System Theory. (Formerly numbered Engineering 228A.) Prerequisites: Engineering 128A and 291A. Fundamental characterization of "state" for systems described in input-output sets, and consequences; relation to system identification problems.

Mr. Levan (W)

229A. Numerical Techniques in Systems Optimization. (Formerly numbered Engineering 229A.) Prerequisites: Engineering 291A; Engineering 129A or System Science 272A or similar background recommended. Computational methods for constrained extremum problems of functionals. Mr. Balakrishnan, Mr. Kaplun (Sp)

Mr. Balakrishnan, Mr. Levan (W)

229C. Stochastic Differential Systems. (Formerly numbered Engineering 229C.) Prerequisites: Engineering 222B, System Science 222D, Engineering 291A or equivalent, and consent of instructor. Integration with respect to continuous-parameter marginals; Radon-Nikodym derivatives in metric spaces; applications to filtering and control.

Mr. Balakrishnan, Mr. Mortensen (Sp)

229EA-229EZ. Topics in Optimization. (Formerly numbered Engineering 229E.) Prerequisite: consent of instructor, and additional prerequisites for each offering as announced in advance by the Department of System Science. Comprehensive treatment of one or more selected topics in such areas as system optimization theory and numerical techniques, system identification, stochastic systems, finite graphs, network flows, queueing systems, etc. May be repeated for credit when no duplication exists.

Mr. Balakrishnan, Mr. Jacobsen (W)

229J-229K. Public Systems Analysis. (Formerly numbered Engineering 229J-229K.) Prerequisite: graduate standing or consent of instructor. Exploration of the relevance of system science methodologies to research activities directed toward improvements in the system that provide education, health care, transportation, communication, housing, environmental quality, and public safety services in urban areas.

Mr. Jacobsen, Mr. Rubin
272A. Linear Programming. (Not the same as System Science 272A prior to Fall Quarter 1980.) Prerequisite: Mathematics 115 or equivalent knowledge of linear algebra. Basic graduate course in linear programming. The simplex method and its variants. Convergence proofs. Duality theorem. Geometry of linear programs. Parametric programming. Special structure and unboundedness. Convexity and extreme points. Complementary pivot theory. Quadratic programming. Mr. Jacobsen, Mr. Subelman

272B. Nonlinear Programming. (Formerly numbered System Science 272A.) Prerequisite: System Science 272A or equivalent. Basic graduate course in nonlinear programming. Economic convex sets and functions and their basic properties. Kuhn-Tucker saddle-point, and nonlinear or conjugate duality theory. Development of algorithms and convergence theory. Mr. Jacobsen, Mr. Miller

272BA-272BZ. Topics in Operations Research. Prerequisites: consent of instructor, and additional prerequisites for each offering as announced in advance by the Department of System Science. Treatment of one or more selected topics from areas such as: integer programming; combinatorial optimization; network synthesis; scheduling, routing, location and design problems; implementation considerations for mathematical programming algorithms; stochastic programming; applications in engineering control and science, economics. May be repeated for credit when no duplication exists.

Mr. Jacobsen, Mr. Miller, Mr. Subelman (W,Sp)

272C. Optimization Methods for Large-Scale Systems. Prerequisite: System Science 272B. Theory and computational procedures for decomposing large-scale mathematical programming problems. Generalized linear programming, decomposition algorithms, columns such as decomposition and upper bounded variables to stochastic programming and optimal control. Topics in nonconvex programming; minimizing concave functions on convex poly-hedra, reverse convex programming. Mr. Jacobsen

273A. Dynamic Programming. (Formerly numbered Engineering 273A.) Prerequisites: Engineering 120A and 120L or equivalent. Introduction to the mathematical analysis of sequential decision processes. The finite horizon model in both the deterministic and stochastic cases. The finite state infinite horizon model. Methods of solution. Detailed examples from inventory theory, finance, and transportation systems.

Mr. Miller, Mr. Subelman (F)

273B. Probability Theory for Applications. (Formerly numbered System Science 273B.) Prerequisites: Engineering 120B, or 120C, and consent of instructor. This course is designed to prepare students for graduate courses in Communication, Control, and Operations Research. Measure and integration; conditioning; convergence; stochastic processes and measures on function spaces. The Wiener process, Poisson process, Markov processes, Markov times, and Martingales. Applications.

Mr. Balakrishnan

273CA-273CZ. Topics in Stochastic Processes. (Formerly numbered Engineering 273C.) Prerequisites: consent of instructor, and additional prerequisites for each offering as announced in advance by the Department of System Science. Selected topics in such areas as: renewal processes, Markov decision processes; optimization in stochastic processes; applications in operations research, system analysis, inventory and replacement problems; random fields; point processes theory with application to signal detection, queueing and communication networks. May be repeated for credit when no duplication exists.

Mr. Balakrishnan

Mr. Miller, Mr. Subelman (Sp)

Mr. Levany (F, W)

Mr. Levany (W, Sp)

Interdisciplinary Courses

Mr. Levany

472A-472B-472C-472D. The Engineer in the Business Environment. (1/2 to 3 courses) Prerequisite: acceptance in the Engineering Executive Program. The language of business for the engineer. Engineering executive. Accounting, finance, business economics, business law, and marketing. Laboratory in organization and management problem-solving. Analysis of human, technical, and social systems in the firm, the community, and the nation, provided through cooperation and participation with California business corporations and government agencies. 472A-472B-472C-472D are offered on an In-Progress basis, which requires two full two-quarter sequences; at the end of each sequence a grade will be given.

Mr. Ruskin

473A-473B. Analysis and Synthesis of a Large-Scale System. (1 course each) Prerequisite: acceptance in the Engineering Executive Program. Credit to be given upon completion of 473B. A problem area of modern industry or government is selected as a class project and its solution is synthesized using quantitative tools and methods. The project also serves as a laboratory in organization for a goal oriented technical group. IP grading.

Mr. Campbell

495. Teaching Assistant Training Seminar. Prerequisite: Graduate Standing in engineering and appointment as a Teaching Assistant. Seminar on communication of Engineering principles, concepts and methods, preparation, organization of material, presentation, use of visual aids, grading, advising and rapport with the students. To be graded on S/U basis.

Mr. Rubinstein (F)

501. Cooperative Program. (1/2 to 2 courses) Prerequisites: approval of UCLA Graduate Adviser and Graduate Dean. Approval of host campus Instructor, Department Chair and Graduate Dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangement with neighboring institutions. To be graded S/U.

Mr. Westman

596. Directed Individual or Tutorial Studies. (1/2 to 2 courses) Prerequisites: Graduate Standing in engineering; consent of instructor. Petition for credit must be approved by the Assistant Dean, Graduate Studies. Supervised investigation of advanced technical problems. To be graded on a S/U basis.

Mr. Levany

597A. Preparation for M.S. Comprehensive Examination. (1/2 to 3 courses) Prerequisites: Graduate Standing in engineering; consent of instructor. Reading and preparation for the M.S. comprehensive examination. To be graded on a S/U basis.

Mr. Westman

597B. Preparation for Ph.D. Preliminary Examinations. (1/2 to 4 courses) Prerequisites: Graduate Standing in engineering; consent of instructor. To be graded on a S/U basis.

Mr. Westman

597C. Preparation for Ph.D. Oral Qualifying Examination. (1/2 to 4 courses) Prerequisites: Graduate Standing in engineering; consent of instructor. Preparation for Oral Qualifying Examination, including preliminary research on dissertation. To be graded on a S/U basis.

Mr. Levany

598. Research for and Preparation of the Master's Thesis. (1/2 to 3 courses) Prerequisite: Graduate Standing in engineering; consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. To be graded on a S/U basis.

Mr. Levany

599. Research for and Preparation of the Doctoral Dissertation. (1/2 to 4 courses) Prerequisites: Graduate Standing in engineering; consent of instructor. Usually taken after student has been advanced to candidacy. To be graded on a S/U basis. The Staff
English as a Second Language

(Section Office, 3303 Rolfe Hall)

J. Donald Bowen, Ph.D., Professor of English.
Russell Norman Campbell, Ph.D., Professor of English.
John Frederick Poveny, Ph.D., Professor of English.
Clifford Holmes Prator, Ph.D., Emeritus Professor of English.
Lois McIntosh, Ph.D., Emeritus Professor of English.
Marianne Celce-Murcia, Ph.D., Associate Professor of English.
Evelyn R. Hatch, Ph.D., Associate Professor of English (Vice-Chairman of the Department).
Earl James Rand, Ph.D., Associate Professor of English.
Frances B. Hinofotis, Ph.D., Assistant Professor of English.
John H. Schumann, Ph.D., Associate Professor of English.
Roger W. Andersen, Ph.D., Assistant Professor of English.
Jose L. Galvan, Ph.D., Lecturer of English.

Peter Ladefoged, Ph.D., Professor of Phonetics.

The Master of Arts Degree

Admission Requirements. Admission to the master's program is based on a thorough review of the applicant's academic record. Ordinarily, students holding the B.A. are expected to meet these minimum requirements: an undergraduate major or program that prepares one for advanced study of literature; a grade point average in the junior and senior years of at least 3.2; and a score on the Graduate Record Examination of at least 600 on both the Verbal section and the Aptitude Test and the Advanced Literature in English Test. All applicants must submit a minimum of three letters of recommendation attesting to their ability to succeed in graduate study. For a descriptive brochure, prospective students may write the Graduate Secretary, Department of English, 2225 Rolfe Hall.

The master's program is not preliminary to the doctoral program and students seeking the Ph.D. should apply directly for that program. In a few cases, students who have done exceptionally well in the M.A. program have successfully petitioned the Graduate Committee for permission to enter the doctoral program.

Advising. The general adviser for all graduate students is the Vice Chairperson for Graduate Studies (Department of English, 2225 Rolfe Hall). The Vice Chairperson meets with all students upon entrance into the program and counsels them subsequently as need arises. In addition, he or she periodically evaluates their academic progress, considering among other things course grades, written evaluations of performance in readings courses and seminars, and progress toward the satisfaction of course and language requirements. Upon entrance, each student is also assigned a personal advisor, a faculty member who can offer informal advice when and if it is needed. Personal advisers may be changed at the request of either the students or the advisers themselves.

Major Fields or Subdisciplines. The course requirements for the M.A. are highly flexible, in order to permit the student to plan a course of study that reflects his or her primary interests. Recommended electives for certain special fields of interest are suggested below. (Students planning to enter community college teaching should consider taking 270A and 270B, which provide supervised teaching experience in the community colleges.)

Recommended Electives:

b. Creative Writing: English 133-135.

c. English for Minority Groups: English 109K, 114, 122, 123, 130, 190; Education 102; Linguistics 100, 170; Sociology 124, 155.

Foreign Language Requirement. Students may fulfill the language requirement by demonstrating a reading knowledge of any foreign language. This requirement should be satisfied
at the beginning of the first quarter of residence, but in any event no later than the midpoint of the quarter in which all degree requirements are to be completed. A score of 500 or above on one of the Educational Testing Service (ETS) examinations is considered proof of a reading knowledge. Reading tests in languages not covered by an ETS examination are arranged by the English Department or by other language departments on campus.

**Course Requirements.** Nine (letter-graded) courses are required for the degree, five of which must be on the graduate level (200 or above). These nine courses must include one course in literary criticism (English 140 or 201) and three graduate courses in literary history (English 220-228; M243A-255; and, depending on specific content, 256-259), two of which must deal with periods before 1900, and two of which must be historically contiguous (for example, 224 and 225).

**Comprehensive Examination Plan.** Upon completion of all requirements, the student is given a Comprehensive Oral Examination of no more than 1½ hours, to test his or her comprehension of the major literary documents examined during graduate study and his or her ability to analyze a work of literature. For each student, an examining committee of three faculty members is appointed by the Vice Chairperson for Graduate Studies. The student writes a paper (8 to 10 pages in length) on a subject set in consultation with the committee chairperson, and distributes it to the committee at least one week in advance of the examination. During the first half of the examination, the committee discusses the paper with the student. The remainder of the examination is devoted to the fields represented by the nine courses presented by the student for the degree. Comprehensive Examinations are offered during the Fall, Winter, and Spring Quarters of each academic year. (A student who fails the examination may be permitted to repeat the examination, but no student may repeat it more than once.)

**Time to Degree.** Students must normally conform to the following schedule in proceeding to the M.A. degree: (a) A maximum of 10 quarters from the time of entrance to taking the Comprehensive Examination, and (b) A maximum of 12 courses before taking the Comprehensive Examination. Students carrying an average load (two courses per quarter) can expect to complete the degree in five quarters (or four quarters and a summer session).

**500 Series Course Limitations.** Students in the master's program are permitted to take one independent study course (English 595: 4 units, letter grading) for credit toward the 9-course requirement. This course requires the completion of a substantial project, creative or scholarly.

**Teaching Experience.** Teaching experience is not required for the degree, but students planning to enter community college teaching are advised to enroll in English 270A and 270B, which provide supervised teaching experience at cooperating community colleges. Since enrollment in these courses is by the instructor's consent, students are advised to consult the instructor early in the Fall Quarter of the year in which they plan to take the courses.

**Disqualification and Appeal of Disqualification.** Termination of graduate status may be recommended in cases of continued unsatisfactory scholarship, insufficient progress toward the degree, or failure of the Comprehensive Examination. Such a recommendation is made by the Graduate Vice Chairperson, after consultation with the Graduate Committee, or (in the case of the Examination) by the Comprehensive Examining Committee. Appeals of such actions may be made by formal petition to the Graduate Committee.

**The Ph.D. Degree**

**Admission Requirements.** Admission to the doctoral program is based on a thorough review of the applicant's academic record. Ordinarily, applicants holding the B.A. and seeking direct admission to the Ph.D. program are expected to meet these minimum requirements: an undergraduate major or program that prepares one for advanced study of literature; a grade point average in the junior and senior years of at least 3.4; and a score on the Graduate Record Examination of above 600 on both the Verbal section of the Aptitude Test and the Advanced Literature in English Test. Applicants holding the M.A. will be expected to have a grade point average of at least 3.5 in their graduate studies, and correspondingly higher scores on the Advanced Test. All applicants must submit a minimum of three letters of recommendation attesting to their ability to succeed in graduate study. For a descriptive brochure, prospective students may write the Graduate Secretary, Department of English, 2225 Rolfe Hall.

Students limited on admission to the M.A. program may on completion of that course of study petition the Graduate Committee to enter the doctoral program, provided they have maintained a grade point average of at least 3.5 in their graduate studies, and are recommended by their examining committee. Such petitions are not automatically approved, and should be accompanied by appropriate supporting materials.

**Advising.** The general adviser for all graduate students is the Vice Chairperson for Graduate Studies (Department of English, 2225 Rolfe Hall). The Vice Chairperson meets with all students upon entrance into the program and counsels them subsequently as need arises. In addition, he or she periodically evaluates their academic progress, considering among other things course grades, written evaluations of performance in readings courses and seminars, and progress toward the satisfaction of First-Stage and Second-Stage requirements (e.g., English 200, 210, etc.). Upon entrance, each student is also assigned a personal adviser, a faculty member who can offer informal advice when and if it is needed. Personal advisers may be changed at the request of either the students or the advisers themselves.

After passing the First Qualifying Examination, each student chooses a faculty adviser in the area of his or her specialization, and remains with this adviser until the dissertation is completed.

**Foreign Language Requirement.** Students are normally expected to have a reading knowledge of two foreign languages, or to demonstrate a superior proficiency in a single language. The departmentally-approved languages are French, German, Italian, Spanish, Latin, and Greek, but other languages may be substituted by petition to the Departmental Graduate Committee. Such a request must be justified convincingly on the basis of a special research interest.

A reading knowledge of a language may be demonstrated in one of two ways: (1) by scoring 500 or higher on an Educational Testing Service (ETS) examination; (2) by passing a special reading examination offered by certain UCLA foreign language departments. The first language requirement must be satisfied before the student is admitted to the First Qualifying Examination, and the second before he or she is admitted to the Second Qualifying Examination.

A student who chooses the single language option must also demonstrate a reading knowledge of that language before taking the First Qualifying Examination. He or she may then proceed to demonstrate superior proficiency, before taking the Second Qualifying Examination, in either of two ways: (1) by successful completion (grade B or higher) of three upper division or graduate courses in the literature (not in translation) of the foreign language (such courses must be approved by the Vice Chairperson for Graduate Studies, must be in areas related to the student's specialization, and must not have been completed more than two years prior to the student's entrance into the Ph.D. program) or (2) by passing an examination administered by the Department of English. A student electing the latter option will be expected to demonstrate a knowledge of the foreign language (and literature) comparable to that which might be obtained by taking the three upper division or graduate courses.

**Written and Oral Qualifying Examinations, Required Courses, and the Final Oral Examination.** The doctoral program is divided into three stages, the first two of which culminate in the First and Second Qualifying Examinations.
A. The First Stage.
In the first stage, which leads to the master's degree, the student must take a minimum of nine (letter-graded) English courses from the 200 series. Two courses, 200 and 210, are required. (Students entering with an M.A. in English are presumed to have fulfilled the 9-course requirement, but must take 200 and 210 or their equivalents.)

First Qualifying Examination. Upon successful completion of these required courses (and satisfaction of at least one of the foreign language requirements), the student takes the First Qualifying Examination. This consists of four written examinations of four hours each. One of these may be taken in a genre (novel, drama, literary criticism, folklore/mythology, Afro-American literature, history of the language, rhetoric) or an alternate field (proposed by the student and approved by the Department's Graduate Committee). At least three of the examinations must be taken in any of the following chronological periods: the Middle Ages; the Renaissance; the Earlier 17th Century; the Restoration-18th Century; the Romantic Period; the Victorian Period; American literature to 1828; American literature 1828-1900; and either 20th Century American Literature or 20th Century British Literature. No student may write on more than two American fields, and those who elect a genre or alternate field may choose only one American field.

The four parts of the First Qualifying Examination are graded as High Pass, Pass, Low Pass, and Fail, and in order to pass the examination as a whole, a student must have maintained a passing grade on each of the parts. A decision on whether or not a student who fails is allowed to repeat must be made by the Graduate Faculty, which will consider, not only the results of the examining committees' evaluations but also the student's overall graduate record. (A grade of High Pass is considered final and need not be repeated. A grade of Low Pass on four examinations is considered a failure of the examination as a whole.) A student allowed to repeat must do so the next time the examination is offered. (A student who is allowed to repeat has the option of substituting a different field for one of his or her failures.)

Breadth Requirement. With the exception of courses 200 and 210, no specific courses are required in this first stage of the program, but students must take at least one course (216A-217B; 220-229; 244-255; and, depending on specific content, 256-259) in each of two periods not chosen for the qualifying examination. These courses may be taken either before or after the First Qualifying Examination, but in no case later than the second quarter in residence following that examination. In lieu of taking these two courses, a student may request an oral examination in any two periods not chosen for the qualifying examinations; this oral must be passed within six months of passing the First Qualifying Examination.

Philology Requirement. In addition to English 210, the student is required to take two other courses from those numbered 211-215 and 240-242. This requirement may be met at any time during the first or second stage of the program, but it must be fulfilled before the Second Qualifying Examination. Students with an interest in the fields of Anglo-Saxon or Medieval literature should take the introductory courses in this area (211-215) as early as possible.

B. The Second Stage.
In this stage of the program, the student must take five courses from the 200 series in English, including a minimum of three seminars. The student is encouraged to take as many seminars as possible (any graduate seminar may be repeated for credit), as well as suitable courses in other departments. At some time before the Second Qualifying Examination, the student is required to take one seminar in a field outside that of his or her specialization. When deemed sufficiently well-prepared, through coursework and independent study, and after satisfying the second language requirement, the student takes the Second Qualifying Examination.

Second Qualifying Examination. The Second Qualifying Examination consists of an oral examination of no fewer than two hours (and probably more) in length, administered by a committee of five, including a chairperson and two other members from the English Department, and two members from outside the English Department. (The student should seek out a chairperson for his or her committee as soon as possible after passing the First Qualifying Examination, so that preparation for the Second Qualifying Examination will not be prolonged unnecessarily.) The examination will explore both the student's special field and his or her proposed dissertation topic. The student submits a substantially researched dissertation prospectus, which has been approved by the committee chairperson, to each of the members of the committee at least one week before the scheduled examination. The student also offers, with the chairperson's approval, a list of at least 10 significant scholarly or critical works that bear on the field of specialization and are directly relevant to the method or subject matter of the dissertation. The chairperson of the committee is responsible for defining, in conjunction with the candidate, the degree of comprehensiveness for which the student is answerable during the examination.

C. The Third Stage.
A student who has passed the Second Qualifying Examination may advance to candidacy, and upon his or her application, the Candidate in Philosophy (C.Phil.) degree is conferred. The student now proceeds with the writing of the dissertation. A final oral defense of the dissertation is optional with the doctoral committee, but is usually not required. Final approval of the dissertation is normally delegated to three certifying members of the doctoral committee (two from the English Department, and one from another department).

Time to Degree. A student will normally be able to complete his or her doctoral studies within 18 academic quarters, according each of the three stages of the program roughly equal amounts of time:

First Stage—from admission to the First Qualifying Examination, the time normally allowed is six quarters. (Students entering with the M.A. normally write the examination after three quarters in residence.)

Second Stage—from the First Qualifying Examination to the Second Qualifying Examination, the time normally allowed is six quarters.

Dissertation Stage—from the Second Qualifying Examination to the completion of the dissertation (and the degree), the time normally allowed is six quarters.

Teaching Experience. Although teaching experience is not required, most students in the doctoral program have the opportunity to serve as teaching assistants after passing the First Qualifying Examination. Teaching assistantships are not automatically offered to doctoral students, but are awarded on the basis of merit.

Disqualification and Appeal of Disqualification. Termination of graduate status may be recommended in cases of continued unsatisfactory scholarship, insufficient progress toward the degree, or failure of the First or Second Qualifying Examinations. Such a recommendation is made by the Graduate Vice Chairperson, after consultation with the Graduate Committee, or (in the case of the examinations) by the Graduate Staff. Appeals of such actions may be made by formal petition to the Graduate Committee.

Graduate Courses
200. Approaches to Literary Research. The bibliographical tools of English and American literary scholarship; an introduction to descriptive bibliography, and basic methods of research.
Mr. Batten, Mr. Gullans, Mr. Kipling

201. Approaches to Literary Criticism. The study of the various applications, approaches, and pre-suppositions of literary criticism as it relates to the interpretation and evaluation of texts.
Mr. Krieger, Mr. Maniquis

202. Enumerative and Descriptive Bibliography. Problems in bibliography, texts, and editions, with practical application in compiling bibliographies, editing texts, and approaching literature through textual criticism.
Mr. Dearing

203. Computer and Literary Research. Practice in writing and using computer programs for the analysis of literary style, content, and authorship. No previous knowledge in this area is necessary.
Mr. Dearing
Graduate Seminars
Seminars are open to all graduate students with adequate preparation, and may be repeated for credit. Enrollment is by consent of instructor, and continuing students must sign up for seminars before the end of the preceding quarter. A prospectus announcing topics for all seminars will be available in the department office by June 1 for the ensuing academic year.

230. Workshop in Creative Writing. Prerequisite: consent of instructor, following submission of writing samples in the specified genre (poetry, fiction, or drama). Not repeatable for credit toward the doctoral degree. The Staff

240. Studies in the Structure of the English Language. Individual seminars will deal with: any single historical period from the Old English period to the present; or the development of a particular linguistic characteristic, phonology, syntax, semantics, dialectology, through various periods. Ms. Armentrout, Mr. Calder

241. Studies in the English Structure of the English Language. Prerequisite: consent of instructor. Topics in various aspects of the structure of Modern English, especially syntax and semantics. The Staff

242. Language and the Literature. The application of linguistics to literary analysis. Individual seminars will deal with: a historical period, Medieval and Renaissance, Neo-classical, or nineteenth century and modern; specific authors; or the contributions of specific groups of linguists to literary analysis.

Ms. Brienza, Mr. Grose, Mr. Lanham

243A. The Ballad. (Same as Folklore M243A.) Prerequisite: consent of instructor. A study of the English and Scottish popular ballads and their American derivatives, with some attention to European analogues. Mr. Wilgus

243B. Problems in Ballad Scholarship. (Same as Folklore M243B.) Prerequisite: course M243A or consent of instructor. Intensive research and study of a problem in the popular ballad. Mr. Wilgus

244. Old and Medieval English Literature. Studies in the poetry and prose of Old and Medieval English Literature; limits of investigation to be set by the individual instructor. Mr. Calder, Mr. Kelly, Ms. Ridley

245. Chaucer. Mr. Condren, Mr. Kelly, Ms. Ridley

246. Renaissance Literature. Studies in the poetry and prose of Renaissance English Literature, exclusive of Shakespeare; limits of investigation to be set by the individual instructor. Mr. Allen, Mr. Dent, Mr. Kinsman

247. Shakespeare. Mr. Dent, Mr. Jorgensen, Mr. Allen

248. Earlier Seventeenth-Century Literature. Studies in the poetry and prose of seventeenth-century English Literature up to the Restoration; limits of investigation to be set by the individual instructor. Mr. Guffey, Mr. Gullans, Mr. Sellin

249. Milton. Studies in the poetry and prose of John Milton; particular emphases to be set by the individual instructor. Mr. Gorse, Mr. Sellin, Mr. Post

250. Restoration and Eighteenth-Century Literature. Studies in English poetry and prose, 1660-1800; limits of investigation to be set by the individual instructor. Mr. Novak, Mr. Roper, Mr. Rousseau

251. The Romantic Writers. Mr. Burwick, Mr. Sheats, Mr. Thorslev

252. Victorian Literature. Studies in English poetry and prose of the Victorian period; limits of investigation to be set by the individual instructor. Mr. Freeman, Mr. Tennyson, Mr. Kolb

253. Contemporary British Literature. Mr. Bedient, Mr. Kessler, Mr. Yenser

254. American Literature to 1900. Studies in colonial and nineteenth-century American Literature; limits of investigation to be set by the individual instructor. Mr. Nevis, Mr. Wormald

255. Contemporary American Literature. Studies in contemporary American poetry and prose; limits to be set by the individual instructor. Mr. Lehan, Mr. Riddel, Mr. Yenser
English as a Second Language

Certificate Program and the Master of Arts Degree in Teaching English as a Second Language

Admission Requirements. To be admitted to the Certificate or the M.A. program, U.S. citizens and students from other countries must have the equivalent of an American bachelor's degree or an educational background sufficient to qualify them as teachers in their country. The Certificate program includes nine courses, which can be normally completed within the 9-month period of an academic year. Since several of the courses are given only once a year and must be taken in fixed order, students are only admitted at the beginning of the Fall Quarter.

In order to complete the Certificate or M.A. program, candidates so admitted must maintain a grade point average of at least B. Prior teaching experience is not required for admission. The Admissions Committee in the TESL section screens all applications using the following criteria: grade point average, letters of recommendation, applicant's statement of purpose and relevant professional experience. Since admission is limited to the number of students admitted each year, it is important that the student submit a complete application containing all of this material.

Applications for admission are obtained from and returned to the Graduate Admissions Office. The TESL program does not have a separate departmental application. The TESL program requires three letters of recommendation in support of the application for admission. Three letters of recommendation forms are included in the admission packet. The applicant is requested to submit the letters of recommendation and the statement of purpose directly to the Graduate Adviser, English as a Second Language, Department of English. The statement of purpose should contain the following information: (1) reasons candidate wishes to study TESL at UCLA; (2) special qualifications and experience as a teacher and (3) knowledge of languages other than English.

The Graduate Record Examination (GRE) is not required as part of the admission requirements. Personal interviews are not required, but welcomed.

Advising. Edie Olson, Graduate Adviser; Teaching English as a Second Language Program; 3306 Rolfe Hall, 405 Hilgard Ave., Los Angeles, California 90024.

New students entering the program meet with the Graduate Adviser and the staff at a special orientation meeting held at the beginning of the Fall Quarter. There is a clearly stated set of course requirements students must fulfill in order to earn the TESL Certificate. Each individual student's program is specified in a meeting with the Graduate Adviser. During the year, students are made aware of their progress in individual courses as the result of midterm and final examinations. At the beginning of each quarter, the Graduate Adviser reviews each student's record and advises him or her of progress in the program and the remaining requirements that must be met.

Foreign Language Requirement. Students whose native language is English generally use their Fall and Winter Quarter electives to fulfill a special requirement intended to help them acquire or perfect a knowledge of the native language or dialect of the pupils to whom they expect to teach English. This can be done by taking any one of four combinations of two courses: (1) two foreign language courses; (2) one foreign language course plus corresponding course in the Linguistics 220 (Linguistic Areas) or 225 (Linguistic Structures) series; (3) one foreign language course plus English 274 (Teaching English to Minority Groups) (4) English 111K (Background Language for Teachers of English as a Second Language) plus an unrestricted elective.

Those particularly interested in working with Mexican-American, Oriental-American or American-Indian pupils will normally choose the third of these alternatives. When there is doubt as to which language will be most appropriate, a non-European language should be selected because of the greater broadening of linguistic horizons that such a selection offers. Foreign language courses that deal with the linguistic structure of that language should be selected whenever possible.

The electives to be taken during the Fall and Winter Quarters vary, depending on whether or not the student speaks English as his or her native language. Non-native speakers of English, depending on the results of the University's Entrance Examination in English as a Second Language, may be required to take a course designed to improve their practical command of English.

Students are urged to fulfill the language requirement by courses taken after admission to the Certificate program. Exemption from the courses may be granted, however, to those who can demonstrate a strong need to take other electives and who have an unusually extensive background of previous foreign language study. Information regarding the circumstances under which a petition for exemption may be approved can be obtained from the TESL Graduate Adviser.

Course Requirements. The typical course of study for both the Certificate program and the first year of the M.A. program is as follows:

Fall Quarter: Linguistics 100, English 370K, Foreign Language Requirement or Elective. (Course depends on language requirement plan.)

Winter Quarter: English 122K, English 250K, Foreign Language Requirement or Elective. (Course depends on language requirement plan.)

Spring Quarter: Linguistics 103 or English 103K, English 380K, English 106K, or English 107K, or English 109K.

Exceptions to the above requirements will be made only after consultation with the Graduate Adviser.

Of the nine courses required for the Certificate, at least seven of the courses must be in TESL, English, Linguistics, or structure of language courses in language departments.

Work completed in regular undergraduate status cannot be counted as fulfillment of the Certificate or M.A. program requirements.

Time to Completion of Certificate. Normally, students finish the Certificate requirements within the 9-month academic year, however, some students due to financial and/or outside commitments are allowed to complete the program on a part-time basis.
Teaching Experience. All students, are required to teach ESL at one of four levels under the supervision of a master teacher: in one of the UCLA ESL service courses; in an adult school; in a secondary school; or in an elementary school. In addition to supervision and observation by the master teacher of the host schools, a UCLA TESL faculty member observes each TESL student several times during each course.

The Certificate in Teaching English as a Second Language leads to a credential to teach on the Adult School level only.

Disqualification and Appeal of Disqualification. Students are required to maintain a 3.0 (B Average) throughout their academic career. Should the student fail below the minimum grade point average, he/she is notified by the Associate Dean of the Graduate Division and the Graduate Adviser. After consultation with the student, Graduate Adviser, and the Vice Chairperson, a memo is normally sent to the Graduate Dean requesting that the student be allowed to continue on probation allowing the student to remove any deficiencies during the next quarter in residence.

Disqualification of a student will be requested of the Dean of the Graduate Division by the Vice Chairperson on the recommendation of a departmental committee set up to review the particular circumstances of a given case. The committee will include at least one student. Either the Graduate Adviser or a member of the faculty may initiate the process by informing the Vice Chairperson of the need to consider a given student for disqualification.

In general, TESL policy follows that of the overall University policy in that a student can be disqualified for: (a) failing to complete degree requirements during the period permitted by departmental regulations; (b) failing to maintain the required GPA; (c) lapses in expected academic morality, e.g., plagiarism, cheating. If a student thus disqualified has grounds for appealing the decision, the student will present them in writing to the Vice Chairperson, who will then reconvene the ad hoc committee to reconsider the matter.

Should a student complete the Certificate program minus the required 3.0 grade point average, a meeting must be arranged with the Vice Chairperson and the Graduate Adviser to determine what extra courses the student should take to remove the deficiency.

Other Relevant Information and Rationale of Program. There are two technical courses in Linguistics. Linguistics 100 is an introduction to the methods and concepts of linguistics analysis; the nature of language, the interlocking systems that make up a language, how a language is analyzed. Examples are drawn from a large number of the world's languages. English 122K applies these same methods and concepts to the study of the phonological and grammatical structures of modern English.

There are three professional courses which deal primarily with pedagogical matters. English 370K develops a methodology based on what is known of the nature of language and the nature of the learner, and deals with general guidelines applicable to learners of any background or at any level of instruction. English 250K, which is conducted as a series of seminar projects, provides an opportunity to contrast first languages and cultures with English and to apply this knowledge to the construction of materials suited to the particular needs of ESL students. These courses include the observation of filmed classes at various levels and visits to language classrooms and laboratories, in preparation for English 380K, in which the student-trainee engage in classroom teaching under the supervision of a master teacher at the university, elementary, secondary, or adult level.

Each student is required to take two practical courses. One is chosen from three courses that consider the written language in ESL instruction (either composition (English 106K), reading (English 107K), or literature (English 109K)) and the other with spoken language (phonetics, either English 103K or Linguistics 103). English 106K, English 107K, and English 109K provide opportunities to upgrade composition skills and study an important related area, the teaching of composition, reading or literature in the ESL context. English 103K is designed to help non-native speakers improve their own pronunciation and to give native speakers the experience of helping to improve the pronunciation of others. Linguistics 103 emphasizes practical training in analyzing and describing speech.

The elective courses can serve a variety of purposes. They permit students especially concerned with the language problems of underprivileged children in the American schools to include in their program a 2 or 3-course sequence in teaching English to a particular minority group. They make it possible for native speakers of English to become acquainted with a new language, judge the validity of pedagogical theory in the light of a fresh language-learning experience, and gain better insights into the linguistic and cultural backgrounds of those whom they are eventually to instruct. In some cases a non-native speaker of English can take a course in the structure of his/her native language—something about which he/she may have very little analytical knowledge. Some students use their electives to broaden their acquaintance with American or English literature. Others use them to fulfill the prerequisites for admission to a related M.A. program in another department.

As explained above, the course of study includes a substantial practical element: the observation of classes, the preparation of lesson plans, and actual classroom teaching. Prospective students should be forewarned, however, that there is an equal or greater emphasis on theory in the program, especially at the beginning of the Certificate year. Students are expected to become familiar with current theories regarding the nature of language as well as the ways in which people acquire and use their competence in a language. They are also expected to be able to relate theoretical guidelines to practical procedures. This program is therefore probably not appropriate for the student who is interested exclusively in receiving vocational training.

The Master of Arts Degree in Teaching English as a Second Language

Major Fields or Subdisciplines. The M.A. in TESL is designed to provide students with an opportunity to investigate, in depth, some particular aspect of teaching and learning English as a second language or dialect. Whereas the major emphasis of the Certificate program is on improving the teacher's performance in the classroom, the M.A. program is particularly relevant to the out-of-class responsibilities that a specialist in TESL is often asked to assume, such as research, planning, curriculum development, the formulation of policy, and the preparation of instructional materials.

Foreign Language Requirement. There are no foreign language requirements for the M.A. in TESL other than those included among the Certificate requirements.

Course Requirements. For any master's degree, the University requires satisfactory completion of at least nine graduate (in the 200 or 500 series) and upper division (in the 100 series) courses, including at least four graduate courses taken during the Certificate year that are credited toward the fulfillment of this requirement: usually Linguistics 100, Linguistics 103 or English 103K, English 122K, and English 250K. This leaves five courses, four of which must be at the graduate level, to be completed during the M.A. year. The combination of the Certificate plus the M.A. thus requires 14 courses.

The electives to be taken should be selected as a sequence of three courses related among themselves and relevant to the thesis topic chosen. These courses should be selected in consultation with the M.A. Adviser at the beginning of the student's work toward the M.A., and any subsequent changes of program must have the M.A. Adviser's approval.

English 400K is a seminar in which TESL M.A. candidates present and defend the results of their thesis research. Enrollment is required of all candidates in the Spring Quarter but does not count for credit toward the degree.
Upper Division Courses

103J. Phonetics for Foreign Students. Prerequisite: course 33C or equivalent. A detailed survey of the phonetic and phonological structure of the English language and the manner in which they are uttered in connected speech, with emphasis on the pronunciation of foreign languages and the phonetics of English as a second language. The Staff

106K. Writing in the ESL Context. Limited to TESL Certificate or M.A. Candidates. Provides opportunities for practice and improvement in writing skills and thus fulfills the composition requirement for the TESL Certificate. Surveys important theoretical and methodological issues related to the teaching of writing. Emphasis is placed on the importance of classroom materials and the role of the teacher in the writing process. The Staff

107K. Reading in the ESL Context. Limited to TESL Certificate or M.A. Candidates. Provides opportunities for practice and improvement in reading skills and thus fulfills the composition requirement for the TESL Certificate. Surveys important theoretical and methodological issues related to the teaching of reading. Emphasis is placed on the importance of classroom materials and the role of the teacher in the reading process. The Staff

109K. Literature in the ESL Context. Limited to TESL Certificate or M.A. Candidates. Provides opportunities for practice and improvement in writing and reading skills and thus fulfills the composition requirement for the TESL Certificate. Surveys important theoretical and methodological issues related to the teaching of literature. Emphasis is placed on the importance of classroom materials and the role of the teacher in the literature process. The Staff

110K. Advanced Composition for Foreign Students. Prerequisite: course 33C or equivalent. Emphasizes writing, reading comprehension, vocabulary development, and listening and speaking. The Staff

111K. Background Language for Teachers of English as a Second Language. Prerequisite: courses 215 and 250K. The relationship of the background language to the teaching of English as a second language. Emphasis is placed on the importance of classroom materials and the role of the teacher in the background language process. The Staff

122K. Introduction to the Structure of Present-Day English (for Teachers of English as a Second Language). Prerequisite: Linguistics 100 or consent of instructor. Introductory study of the grammatical structures of English. Emphasis is placed on the importance of classroom materials and the role of the teacher in the structure of present-day English process. The Staff

Linguistics 103. Introduction to General Phonetics. Prerequisite: course 100 or equivalent (may be taken concurrently with 103). The phonetics of a variety of languages and the phonetic phenomena that occur in languages of the world. Extensive practice in the perception and production of such phenomena. A special section emphasizes those languages likely to be of interest to teachers of English as a Second Language.

Graduate Courses

210K. Role of English as a Second Language in Bilingual Education. Prerequisites: Linguistics 100, course 370K, or consent of instructor. Research and study of major problems and issues in designing and evaluating bilingual, bi-cultural programs in the United States and abroad. Mr. Galvan

250K. Contrastive Analysis and Error Analysis in the ESL Context. Prerequisites: Linguistics 100, course 370K. Analysis of English and other languages at the phonological, grammatical, lexical, and cultural levels. Preparation of lesson plans for helping specific groups of students overcome common errors identified through the analyses. Observation of ESL classes. Mr. Anderson, Mr. Campbell, Mr. Galvan

251K. Bilingual Comparative Studies. Seminar. Prerequisites: courses 215 and 250K. The relationship of two languages in an inipient bilingual speaker. Further study of the techniques of contrastive analysis as a means of predicting interference between linguistic systems with application to original research projects. Mr. Bowen

256K. Psycholinguistics and Language Teaching. Seminar. Prerequisites: courses 370K and 103K and Linguistics 100, or consent of instructor. An exploration of those areas of psycholinguistics covering foreign language acquisition; types and theories of bilingualism; learning theories underlying the current methods of teaching foreign languages; basic experimental designs to test existing assumptions about learning and teaching foreign languages. Ms. Hatch, Mr. Schumann

262K. Second-Language Acquisition. Prerequisites: consent of instructor. The literature on child and adult second-language acquisition forms the basis for this research class. Language variables (phonological, morphological, sentential, and discourse levels) are analyzed. Examines psychological variables such as age, initial proficiency, and need for English in countries such as Nigeria and the Philippines; factors affecting language policy in their school systems; applicability of research techniques of socio- and psycholinguistics to problems of language policy. Mr. Prator

272K. Current Issues in Applied Linguistics. Prerequisites: or Co-requisites: Linguistics 100, English 370K. Each time it is given the course will focus on one of a variety of topics of special interest to graduate students in TESL and Applied Linguistics and to students in other departments if relevant to the student's thesis preparation.

The Staff
Professional Courses

370K. The Teaching of English as a Second Language. Meets six hours weekly. Prerequisite: consent of instructor. Bibliography, survey, and evaluation of methods and materials. The nature of language learning. Analysis of the differences between two languages as a basis of instruction.

Ms. Hatch, Ms. Celice-Murcia, Mr. Schumann

380K. Supervised Teaching: English as a Second Language or Dialect. Prerequisite: course 370K. Team teaching at the elementary, secondary, or adult level under the supervision of a senior staff member. Graded on a S/U basis for graduate students, and a Passed/Not Passed basis for undergraduate students.

Ms. Schumann

400K. TESL Colloquium. Prerequisite: consent of TESL M.A. advisor. Candidates for the M.A. in Teaching English as a Second Language present and defend the results of their thesis research. Enrollment in course in spring quarter required of all candidates but does not count toward degree. Candidates for the Ph.D. in Applied Linguistics may also choose to use this channel to report on their dissertation. Graded S/U.

The Staff

495KA-495KB. Training and Supervision of Teaching Assistants. Prerequisite: concurrent appointment as a teaching assistant or Extension-Division instructor. Orientation, preparation, and supervision of graduate students who have the responsibility for teaching ESL courses at UCLA. Syllabus revision and materials preparation. Two or more hours per week for fall and winter quarters. Credit for a total of four units for the two quarters is given but does not count toward M.A. or Certificate in TESL or Ph.D. in Applied Linguistics. Graded S/U.

The Staff

Individual Study and Research

596K. Directed Individual Study. Prerequisite: Graduate Standing. Credit (one course) allowed only once. Independent study in an area related to English as a Second Language.

The Staff

598K. Research and Thesis Preparation for Candidates for M.A. in Teaching English as a Second Language. (1 to 2 courses) Prerequisite: admission to M.A. program. Survey of research needs and thesis preparation. In fall includes optional section on experimental design and statistical methods. Credit (four units) toward degree allowed only once, but all M.A. candidates must enroll in the course each quarter they are registered and engaged in thesis preparation. Graded S/U.

Mr. Rand

Environmental Science and Engineering (Interdepartmental)

(Office: 3677 Geology Building)

Orson L. Anderson, Ph.D., Professor of Geophysics.
John Dracup, Ph.D., Professor of Engineering and Applied Science.
James G. Edinger, Ph.D., Professor of Meteorology.
Malcolm S. Gordon, Ph.D., Professor of Biology.
Chung-Yen Liu, Ph.D., Professor of Engineering and Applied Science.
Robert A. Mah, Ph.D., Professor of Public Health.
Clemens A. Nelson, Ph.D., Professor of Geology.
Richard L. Perrine, Ph.D., Professor of Engineering and Applied Science.
Morton G. Wurtele, Ph.D., Professor of Atmospheric Dynamics.
Jane Valentine, Ph.D., Assistant Professor of Public Health.
Climis A. Davos, Ph.D., Assistant Professor of Public Health and Environmental Science and Engineering in Residence.
William Dritschilo, Ph.D., Adjunct Assistant Professor of Environmental Science and Engineering.
Leona M. Libby, Ph.D., Adjunct Professor of Environmental Science and Engineering.
Robert G. Lindberg, Ph.D., Lecturer in Environmental Science and Engineering.
Paul M. Martfield, Ph.D., Lecturer in Engineering and Environmental Geology.
Bar B. Sokolow, D. Env., Assistant Professor of Environmental Science and Engineering.

The Doctor Of Environmental Science and Engineering (D.Env.)

Admission Requirements. In addition to meeting University minimum standards, candidates must have an excellent scholastic record and must be acceptable to the Environmental Science and Engineering Interdepartmental Committee. They must hold a bachelor's and master's degree in engineering, public health, or one of the natural sciences to be formally admitted to the program. Students with a bachelor's degree may be informally affiliated with the program while earning a master's degree in one of the participating departments. As such, they are entitled to faculty guidance in course scheduling preparatory to the program and are encouraged to participate in the colloquia.

Address where prospective students may write for departmental brochures: Environmental Science and Engineering, UCLA, 3677 Geology, Los Angeles, Calif. 90024.

Three letters of recommendation are required.

The Environmental Science and Engineering program offers fellowships to first year students, if eligible. Applications are obtained from the Environmental Science and Engineering office.

Adviseing. Graduate Adviser—Environmental Science and Engineering 3677 Geology Building.

Graduate students are advised in general terms by the program Graduate Adviser, but their specific program is planned in consultation with a program committee of three faculty members. This program committee is formed during the student's first quarter in the program. The student meets with this committee at least once a year, and frequently more often, to plan his/her program. This committee consists of at least two members of the Interdepartmental Committee, and at least one member from the student's major discipline. The program committee later serves as the nucleus for the student's doctoral committee.

Ongoing evaluations of academic progress are made by a careful review at the end of each quarter of progress in courses completed toward degree requirements, grades in all coursework, performance in the cumulative exams, and performance in Problems Coursework. The primary assessment is by course faculty and the Graduate Adviser, with review and assistance as needed by the student's guidance committee.

Admission to the Doctoral Program. Students are admitted to the doctoral program after completion of a master's degree in one of the natural sciences, engineering, or public health with a superior record. There is no master's program in Environmental Science and Engineering.

Major Fields or Subdisciplines. Students may pursue one of several specialties within the Environmental Science and Engineering program; these include, but one is not limited to, air quality, water resources, geological and solid earth problems including resource conservations, problems associated with energy production, and the biological impact of man's activities. Also, it is possible for the student to slant his/her work either in the direction of greater emphasis on the science and engineering side, or on the science policy side of an area of emphasis.

Foreign Language Requirement. No foreign language is required for the degree.

Course Program.

Course Requirements. A minimum of nine courses after admission to the program will be required to broaden the student's education in environmental problem areas, to deepen his/her knowledge in his/her specialty, to bridge gaps between other courses selected, and to provide a sufficient background in related social science subjects. More than nine courses are usually required, unless students are outstandingly well-prepared. Students will be guided in the selection of this course.
by their program committee. Courses taken outside the student's own disciplinary area will often be upper division undergraduate courses. Lower division courses may also be required but cannot be counted toward the minimum 9-course requirement. Individual reading or study courses may be taken under the guidance of a qualified faculty member.

**Breadth Requirements.** Students must pass a program of required breadth courses, in four of the five areas described below, excluding their special area. Courses taken during undergraduate or master's work may count toward this requirement with approval of the Interdepartmental Committee. This approval may be delegated to the Graduate Adviser. Upper division or graduate courses taken in this program will count toward the nine required courses. All breadth courses must be taken for a letter grade.

Courses may be substituted with the approval of both the student's committee and the Interdepartmental Committee. This approval may be delegated to the Graduate Adviser. In general, courses to be substituted must fall within the same general area.

Departmental curricula and course numbers are so frequently altered that a specific designation of required breadth courses can be misleading, but the following general description of requirements may be useful.

**Biology:** Five courses, including environmental biology, microbiology, and public health.

**Chemistry:** Five courses, including environmental chemistry.

**Earth Sciences:** Four courses, including both geology and meteorology.

**Engineering and Mathematics:** Seven courses, including calculus (one full year) energy and environmental engineering, and statistics.

**Social Sciences:** Five approved courses from Architecture and Urban Planning, Economics, Law, Management, and Political Science.

**Environmental Science and Engineering Seminar:** ESE 411 is required of all students each quarter, taken S/U.

During the breadth program, full-time students will normally enroll in 18 units, including the Seminar ESE 411.

**The Problems Course.** When the breadth requirements are near completion, students will enroll for three successive quarters in the Environmental Courses (ESE 400 ABC), at 8 units per quarter.

**Environmental Workshops.** Students may also take several Environmental Workshops concurrent with the environmental problems course as their committee and the faculty member in charge of the problems course may require.

**Written and Oral Qualifying Examinations.**

**Cumulative Examinations.** Students must pass four out of eight 2-hour cumulative examinations, which are offered four times a year. These examinations are designed to test awareness of the current literature of Environmental Science and Engineering. Students must begin them in their first quarter in the program. They must attempt each examination offered after they begin, or it is counted as a fail. Thus, they have a maximum of two years to complete the requirement.

**Qualifying Oral Examination.** When the student has completed all other course requirements and is in the final quarter of the Problems Course, a doctoral committee will be established. The Interdepartmental Committee will nominate a minimum of three faculty members from a list of "inside" members supplied to the Graduate Division (normally those who already constitute the student's guidance committee) and a minimum of two "outside" members whose names do not appear on the list. The doctoral committee will be appointed by the Dean of the Graduate Division acting for the Graduate Council.

The doctoral committee conducts an Oral Qualifying Examination of the student. The committee uses the student's contribution to the report of the Problems Course as a starting point from which to assess the student's competence to engage in applied research. The doctoral committee takes note of the particular areas of interest to the student as evidenced by his/her privileged discipline and coursework, and conducts the examination in such a way as to explore both the depth, breadth, and extent of the student's preparation with appropriate emphasis on practical problems and situations. Upon successful completion of the oral examination and completion of their Problems Course requirements, students are advanced to candidacy.

If the student should fail this examination, he/she will be permitted to take it on one subsequent occasion after completion of such additional coursework or individual study as the doctoral committee may recommend.

**Doctoral Committee.** There are no additional conditions to those stated by the Graduate Council.

**Time to Degree.** Full-time students are expected to take 14 or 18 units per quarter. The average time for completion of all coursework following admission is six to eight quarters. The minimum period for the internship is 18 months, followed by a final quarter by UCLA. The normal period from admission to award of the degree is therefore, 13 to 15 quarters.

**Final Report and Oral Examination.** A dissertation is not required. However, upon his/her return to UCLA following the internship, the student participates for a final quarter in the Problems Course and prepares a complete written report on his/her internship program. This report must be a detailed and complete statement of the problem on which he/she worked, must indicate clearly what his/her contribution was, and must contain an evaluation of the present status of the problem. Written reports done at the institution may be accepted as part of all of this requirement if they have been prepared by the student and are of the quality required by the doctoral committee and if the student's contribution is clearly identified.

The written report must demonstrate to committee members that the candidates have effectively applied to the study, program, or project of their internship the knowledge, concepts, and principles acquired during their academic preparation. If the report is satisfactory as judged by his/her committee, the student gives one or more seminars in an Environmental Colloquium. If the seminar and all other elements of the student's performance are judged satisfactory by his/her committee, the student is awarded the degree of Doctor of Environmental Science and Engineering (D.Env.).

The final written report submitted by the student in partial satisfaction of these requirements will be filed in the University Library as a permanent record. A copy is also to be filed with the Environmental Science and Engineering Program Office and with the chairperson of the doctoral committee.

Currently, the Final Oral Examination is routinely required in this program. The examination may be held before the candidate has prepared the final report, but passing the examination does not imply approval of the final report. If a final oral examination is required, all members of the committee must attend and vote. Students may pass with one negative vote. Notification is sent to the Graduate Division on the “Result of the Final Oral Examination” form. In case of failure, the doctoral committee will determine whether or not the candidates may be reexamined.

**Disqualification and Appeal of Disqualification.** The process by which a student may be recommended for termination will depend on the status of a graduate student. For a student who has not yet taken the oral examination for advancement to the internship, the basic decision that termination of graduate status is appropriate will be made by a majority of five faculty: the 3-member committee responsible for the student's program up to internship, and the Program Graduate Adviser and Chairperson. After the oral examination has been administered and passed, responsibility shifts to the 5-member doctoral committee. Should an appeal be made, it is to the Program's Interde-
arrangements for the internship are the

period of the field training experience will be by
responsibility of the student, and must be ap-

(Interdepartmental) (Department Office, 1041 Graduate School of Management)

Shirley L. Arora, Ph.D., Professor of Spanish.
Margherita Cottino-Jones, Ph.D., Professor of Italian.
Patrick K. Ford, Ph.D., Associate Professor of English and Celtic Studies. (Director, Center for the Study of Comparative Folklore and Mythology.)
Robert A. Georges, Ph.D., Professor of English and Folklore.
Marija Gimbutas, Ph.D., Professor of European Archeology.
Naaz A. Jairazbhoy, Professor of Music.
Vladimir Markov, Ph.D., Professor of Slavic Languages.
Jaan Puhvel, Ph.D., Professor of Classics and Indo-European Studies.
Stanley L. Robe, Ph.D., Professor of Spanish.
Robert M. Stevenson, Ph.D., Professor of Music.
Donald J. Ward, Ph.D., Professor of German and Folklore.
D. K. Wlguus, Ph.D., Professor of English and Anglo-American Folksong (Chairman, Folklore and Mythology Committee).
Johannes Willibert, Ph.D., Professor of Anthropology.
Wayland D. Hand, Ph.D., Emeritus Professor of German and Folklore.
Charles Speroni, Ph.D., Emeritus Professor of Italian.
Michael Owen Jones, Ph.D., Associate Professor of History and Folklore.
James Porter, M.A., Associate Professor of Music and Folklore.
David E. Draper, Ph.D., Assistant Professor of Music.
Joseph Nagy, Assistant Professor of English and Folklore.

Mariana D. Birnbaum, Ph.D., Adjunct Associate Professor in Hungarian.

Alexander Badawy, Ph.D., Professor of Art.
Henrik Birnbaum, Ph.D., Professor of Slavic Languages.
will consist of two parts: (1) translation into English of a portion of traditional prose or poetic text, with the student choosing which of two to translate, and (2) translation into English of a passage from an historical or theoretical work in folklore and mythology studies. The examination will be one hour in length, with the student allowed the use of a dictionary during the final 15 minutes. The examination will be devised, administered, and evaluated by a competent committee appointed by the Chairperson of the Folklore and Mythology Interdepartmental Committee.

No student may enroll in Folklore 597A, Preparation for M.A. Comprehensive Examination, unless the foreign language requirement is satisfied.

Course Requirements. All degree candidates, whether electing the Thesis or the Comprehensive Examination Plan (see below) must complete the following courses: Folklore 200, Folklore Bibliography, Theory and Research Methods; Folklore 214-216, Folklore Collecting and Field Research; Folklore 216 (The Folk Tale); and at least one course each from the following groups:

Group 1. One course in the folk music of a specific culture or culture area.

Group 2. One course in the folklore and mythology of a specific culture or culture area.

Group 3. One course in the methodology of a specific culture or in the principles of methodology.

Group 4. One graduate seminar in an area of folklore and mythology.

Thesis Plan. The candidate must complete a minimum of 10 courses (six in the 200 series—which may include only one 596 course) and submit an acceptable thesis, prepared under the direction of a member of the Folklore and Mythology Program. Submission of the thesis will be followed by an oral examination covering the fields of folklore and mythology studies. The thesis committee, composed of three or more faculty members chosen with the approval of the Chairperson of the Interdepartmental Committee on Folklore and Mythology, is appointed no later than the quarter before the student expects to complete the requirements. No "outside" members are required.

Comprehensive Examination Plan. The candidate must complete a minimum of 10 courses (six in the 200 series—which may include only one 596 course). After completion of the coursework, the candidate will be expected to demonstrate competence in a written examination requiring a grasp of:

— theoretical bases, major documents, and research methods and techniques of folklore and mythology studies.
— two forms of folklore and mythology.
— the folklore and mythology of a specific country, continent, or geographical area.

A final Oral Comprehensive Examination will cover the fields of folklore and mythology studies.

The Comprehensive Examinations are given no later than the seventh week of each quarter. The written examinations are set by (1) a 3-person faculty committee appointed by the Chairperson of the Interdepartmental Committee on Folklore and Mythology, and (2) by the members of each candidate's M.A. committee, three or more faculty members chosen with the approval of the Chairperson of the Interdepartmental Committee on Folklore and Mythology. No "outside" members are required.

Time to Degree. For a full-time student with no deficiencies upon admission to the program, the normal progress toward the degree is as follows:

a. From graduate admission to completion of required courses: five to six quarters.

b. From graduate admission to award of degree: seven quarters.

Only four units of 596 and no other 500 series courses may be applied to the minimum course requirements.

Teaching Experience. No teaching experience is required for the degree.

Disqualification and Appeal of Disqualification. The specific conditions which may lead to termination are: (1) failure to pass the foreign language examination in or before the fifth quarter in residence (2) scholarship recommendation (recommendation from the Interdepartmental Committee on Folklore and Mythology); (3) failure to make normal progress toward the degree (recommendation from the Interdepartmental Committee on Folklore and Mythology); (4) failure to pass the Comprehensive Examination (recommendation from the student's master's committee).

The student is notified of termination by the Chairperson of the Folklore and Mythology Interdepartmental Committee.

The foreign language examinations must be completed before the student attempts the Qualifying Examination.

Course Requirements. Before attempting the Qualifying Examination, a student will complete a minimum of nine courses or seminars in the 200-series (or substitutes recommended by his/her guidance committee) in (1) a major field of folklore and mythology and (2) an area of concentration within a related discipline.

Qualifying Examination. After the required preparation, the student will complete a written examination covering (1) his/her specialization in folklore and mythology and (2) his/her related area of concentration. The examinations will be administered by a committee appointed with the approval of the Folklore and Mythology Interdepartmental Committee and will include one or more members from the student's related discipline.

The Ph.D. Degree

Admission Requirements. Requirements for admission to the doctoral program include the completion of the requirements for the M.A. degree in Folklore and Mythology (or their equivalents) including the Comprehensive Examination. A student will be admitted to the doctoral program upon the recommendation of the Folklore and Mythology Interdepartmental Committee. (A student may secure provisional admission in order to complete the admission requirements.)

Major Fields. A student is required to develop a competency in (1) a major field of folklore and mythology (2) an area of concentration within a related discipline. These areas will be selected with the approval of the student's guidance committee.

Foreign Language Requirement. A reading knowledge of German and another language approved by the candidate's guidance committee is required. Students will have the option of demonstrating proficiency either by:

(a) successfully completing the Educational Testing Service GSFLT examination with a score of 500 or better, or

(b) passing a reading examination administered and evaluated by members of the Folklore and Mythology Program faculty (or by "outside" faculty in the case of languages not familiar to the Folklore and Mythology faculty). The "in-house" foreign language examination will consist of two parts: (1) translation into English of a portion of a traditional prose or poetic text, with the student choosing which of two to translate, and (2) translation into English of a passage from an historical or theoretical work in folklore and mythology studies. The examination will be one hour in length, with the student allowed the use of a dictionary during the final 15 minutes. The examination will be devised, administered, and evaluated by a 2-member committee appointed by the Chairperson of the Folklore and Mythology Interdepartmental Committee.

The foreign language examinations must be completed before the student attempts the Qualifying Examination.

Course Requirements. Before attempting the Qualifying Examination, a student will complete a minimum of nine courses or seminars in the 200-series (or substitutes recommended by his/her guidance committee) in (1) a major field of folklore and mythology and (2) an area of concentration within a related discipline.
**Graduate Courses**

### Folklore Bibliography, Theory and Research Methods

A basic course in theory and bibliography for folklore students, including the techniques of research necessary for serious folklore study.  
Prerequisite: course 200.  
Mr. Georges, Mr. Ward

### Folklore Collecting and Field Research

Prerequisite: course 200. Discussion-demonstration concerning the theoretical concepts, methods, and techniques of data gathering and field research in folklore.  
Mr. Jones, Mr. Wilgus

### Folklore Collecting and Field Research

Prerequisite: course 200. The supervised completion of a fieldwork project developed in Folklore 201A.  
Mr. Jones, Mr. Wilgus

### Folklore Archiving

(½ course each)  
Prerequisite: course 200. One quarter of lecture-demonstration in the principles and techniques of the classification and preservation of folklore collections, followed by one quarter of directed experience in archiving.  
Mr. Georges

### Perspectives in American Folklore Research

(Same as English M205.)  
Prerequisites: Folklore 101 and one other upper-division folklore course. An examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis upon the principal conceptual schemes and research orientations employed in the study of folklore in American society.  
Mr. Jones

### Folk Belief and Custom

Prerequisites: course 101 and any one of the following courses: 118, M121, M122, M123A-M123B, M124, M125, M126, M128, M149, M150; Anthropology 102, 140; German 134, 240. A study of beliefs and customs in the folk community: the life cycle, calendrical and agricultural customs, moral and legal antiquities.  
Mr. Jones, Mr. Ward

### The Popular Legend

Prerequisite: course 200 or consent of instructor. A study of the categories of legendry and their relation to myth, custom, ritual, popular beliefs, and ballads.  
Mr. Ward

### The Folktale

Prerequisite: course 200 or consent of instructor.  
Mr. Georges, Mr. Ward

### Folk Speech

Prerequisites: course 101, M106, or M111; also recommended: Anthropology M146, English 121i, or Linguistics 100. A study of the ethnography of communication and its relevance to the study of regional dialects, social class, education, and personal identity.  
Mr. Georges

### Seminar in the Puppet Theater

(Formerly numbered M219.) Involves the study and criticism of puppetry as presented in different cultures.  
Mr. Georges

### Introduction to Jewish Folk-Literature

(Same as Near Eastern Languages-Jewish Studies M240.) Prerequisite: Graduate Standing or upper division with consent of instructor. An examination of both the historic and generic methods used in the study of Jewish Folk-Literature.  
Mr. Wilgus

### Folklore and Mythology of the Near East

(Same as Near Eastern Languages M241.)  
Mr. Wilgus

### The Ballad

(Same as English M243A.) Prerequisite: consent of instructor. A study of the English and Scottish popular ballads and their American derivatives, with some attention to European analogues.  
Mr. Wilgus

### Problems in Ballad Scholarship

(Same as English M243B.) Prerequisite: course M243A or consent of instructor. Intensive investigation of a problem or problems in the study of the popular ballad.  
Mr. Wilgus

### Theory and Method in Latin American Folklore Studies

A historical survey of folklore scholars in Latin America, with emphasis on the theoretical bases and methods and techniques employed in the study of and analysis of traditional tales, songs, music, linguistic expression.  
Mr. Georges

### Hispanic Folk Literature

(Same as Spanish M249.) Prerequisite: Graduate Standing.  
Mr. Georges

### Seminar in Hispanic Folk Literature-The Romance of the Popul Vences

(Same as Italian M230B.)  
Mr. Wilgus

### Cultural Studies

(Same as Spanish M250.) Prerequisite: Anthropology 105A or consent of instructor. An examination of oral traditions and related ethnological data from various South American Indian societies.  
Mr. Wilgus

### Seminar in Finno-Ugric Folklore and Mythology

Advanced studies in the folklore traditions and mythologies of the Finno-Ugric speaking nations.  
Mr. Wilgus

### South American Folklore and Mythology Studies

(Same as Anthropology M252.) Prerequisite: Anthropology 105A or consent of instructor. An examination of oral traditions and related ethnological data from various South American Indian societies.  
Mr. Wilgus

### Seminar in Folk Music

(Same as Music M258.) Prerequisite: consent of instructor.  
Mr. Porter, Mr. Wilgus

### Seminar in Folklife

Prerequisite: course 200 and consent of instructor.  
The Staff

### Directed Studies in Folklore and Mythology

Students and Independent Projects in Folklore. Offered on an In-Progress basis. Credit only on satisfactory completion of work.  
The Staff

### Dissertation Research

(1 to 2 courses) Prerequisite: advancement to doctoral candidacy.  
The Staff

### Related Courses in Other Departments

#### Graduate Courses

**Anthropology**

230P. Ethnology.  
232Q. Myth and Ritual.

**Aesthetic Anthropology**

237B-M237C. Ethnographic Field Direction.  
247A. Seminar in Ethnographic Film.

**Cultural Studies**

Ethnography of the Mexican-Chicano People in North America.  
271. African Cultures.

272. Indians of South America.

273. Cultures of the Middle East.

274. Cultures of the Pacific Islands.

220. The Arts of Africa, Oceania and Pre-Columbian America.

**Classics**

266. Seminar in Comparative Mythology.  
229. Archetypal Heroes in Literature.

**Dance**

Dance 226A-228E. Dance Expressions in Selected Cultures.  
English 220. Readings in Medievalism.

245A, 245B. Germanic and Scandinavian Mythology.

**Italian**

214E. The Decameron.

217B. Commedia dell’arte and the Theatre.

218C. The Theater, Especially Metastasio, Goldoni, C. Gozzi.
Music 253. Seminar in Notation and Transcription in Ethnomusicology.
254A-254B. Seminar in Field and Laboratory Methods in Ethnomusicology.
255. Seminar in Musical Instruments of the Non-Western World.
260. Seminar in Ethnomusicology.
282. Music of Iran and other Non-Arabic Speaking Communities.
283. Music of Thailand.
285. Music of Tibet.
Russian 251A-251B. Old Russian Literature.
291A. Seminar in Old Russian Literature.
Spanish 262B. Epic Poetry.

French

(Department Office, 160 Haines Hall)
Marc Bensimon, Ph.D., Professor of French.
Eric Gans, Ph.D., Professor of French.
Hassan el Nouty, Docteur ès Lettres, Professor of French.
Oreste F. Pucciani, Ph.D., Professor of French.
Francis J. Crowley, Ph.D., Emeritus Professor of French.
Stephen D. Werner, Ph.D., Associate Professor of French (Chairman of the Department).
Mary-Ann Burke, Ph.D., Assistant Professor of French.
Patrick Coleman, Ph.D., Assistant Professor of French.
Sara Melzer, Ph.D., Assistant Professor of French.
Shuhsi Kao, Ph.D., Assistant Professor of French.
James Reid, Ph.D., Assistant Professor of French.

- Colette Brichant, Docteur de I’Universite de Paris, Lecturer in French.
Jacqueline Hamel-Baccash, Licenciée-ès-Lettres, Lecturer in French.
Madeleine Korol-Ward, Ph.D., Lecturer in French.
Padoue de Martini, B.A., Lecturer in French.

The Master of Arts Degree

Admission Requirements. The Graduate Record Examination Advanced Test in French is required. Three letters of recommendation are also required. Brochures are available from the French Department Graduate Secretary, 160 Haines Hall. Application forms are the same as those used by Graduate Admissions.

Advising. The French Department Graduate Advisers are: Professor S.D. Werner, Chairperson, Professor Marc Bensimon, Professor Mary-Ann Burke, Professor Patrick Coleman, Professor Hassan el Nouty, Professor Eric Gans, Professor Shuhsi Kao and Sara Melzer.

New graduate students normally meet with the Department Chairperson during their first quarter to determine courses and ways of meeting requirements. An Interview Sheet summarizing contents of the meeting is kept in the student’s file. All graduate students who are pre-M.A or pre-Qualifying Part I are advised by a committee of three faculty members, one of whom sees newly entering graduate students. Each of the remaining two advisers takes half of the group (alphabetically), thus all students see the same adviser throughout the year.

Advisers allow at least three 1-hour periods per week for consultation. The departmental secretaries make appointments for them. During the appointment, the student and his/her adviser agree upon a study list for the quarter and discuss progress toward the degree. Petitions to alter this study list (Drop/Add) after it has been formulated must be approved by the adviser and the Chairperson of the Department, before they are submitted to the Graduate Division.

All graduates, regardless of degree objective, are required to see an adviser at the beginning of each quarter through the completion of the degree. (Overall assessment of progress made by the Chairperson at the end of each academic year.)

Admission to Master’s Program. No screening examination is required.

Transcripts are evaluated on the basis of promise in French studies. A major in French is desirable but not mandatory.

Foreign Language Requirement. For all candidates for the M.A. in French, the foreign language requirement will be fulfilled by passing a course of at least level 3 in either German, Latin, Spanish, or Italian, or by passing the University reading examination in one of these languages. In special cases, substitution of another foreign language will be accepted if approved by the Chairperson of the Department. Passing the ETS language examination with a score of 500 or more is considered as fulfilling this requirement. Students are required to complete the foreign language requirement before taking the M.A. examination (Plan A or B). All candidates for the M.A. must satisfy the Department as to their proficiency in spoken French.

Course Requirements. Requirements vary according to the M.A. plan chosen.

Plan A: Course requirements: At least 12 courses in French including normally 201D, and 310A/310B or 370/495 (or any combination of one theory and one observation course). Among these 12 courses, the student will take at least seven courses in literature including at least three courses in each of two periods (one of which must be the modern period). To meet general University requirements, at least six courses must be at the graduate level.

Comprehensive Examination: Written examinations of three hours in length in each of the two periods prepared, a 2-hour examination in translation and literary composition, a 2-hour exposition de texte, and an oral examination in French. At the discretion of the Department, a candidate may be permitted to take this examination a second (but not a third) time.

Plans B or C: Course requirements: At least 12 courses in French, including normally 201D, at least three courses in each of two periods, and at least one course from 222-207. At least eight of these courses must be at the graduate level. Students in Plan C may include 4 units of 598 credit for work on the thesis.

Plan B: Comprehensive Examination: Written examination of four hours in length in each of the two periods prepared, a 2-hour exposition de texte, and an oral examination in French. At the discretion of the Department, a candidate may be permitted to take this examination a second (but not a third) time.

Plan C: Admission Requirements and Oral Qualifying Examination. Students may apply to the Chairperson of the Department for admission into Plan C after completion of at least six courses of graduate level (200-series), at least four of which must be literature courses in the French Department. The minimal admission requirements are: (1) 3.5 graduate G.P.A. in French (2) letters from two graduate professors in the Department specifically recommending admission into this plan.

Thesis or Comprehensive Examination Plan. A thesis committee is normally established after the first two quarters of study. The thesis plan is approved by the chairperson upon constitution of the formal committee. No outside member is required.

Comprehensive Plan: This plan consists of written and oral exams. Both parts cover the major areas chosen by the candidate (in accordance with the different plan options). Examinations are given twice a year: early October (Fall Quarter) and early May (Spring Quarter).

A departmental comprehensive examination committee is appointed by the chairperson. The committee normally consists of four members. Its composition is announced during the first week of classes. The committee reads all examinations for a given quarter.

Time to Degree. A reasonable time period for the M.A. is 1 1/2 to 2 years.
All new students meet with the Chairperson for orientation and guidance upon admission. They then choose an adviser from a list of designated staff members. Ongoing evaluation comes about through appraisal of annual grade point statistics, applications for teaching assistantships, and results of Qualifying Part I Examinations. Overall assessment of progress is the responsibility of the Chairperson.

Students normally meet with advisers at the beginning of each quarter to plan program and review progress. Record of interview sheets are provided.

Guidance committees are established after successful completion of the M.A. examination. Minimum composition of committee: Chairperson (normally in student's area of interest), a specialist in the period not covered at the M.A. level.

Admission to the Doctoral Program. Completion of a master's program is required. It is not necessary for it to have been taken at UCLA. Candidates holding the M.A. or Licence ès-Lettres from another institution must take a qualifying examen de passage (screening exam) in order to be formally admitted to the doctoral program examination which may be taken any time during the first year of residence. It is an oral test and covers two periods of literary history (to be chosen by the candidate) and may be repeated a second time.

Major Fields or Subdisciplines. Three chronological periods: I Medieval-Renaissance; II Classical (17th and 18th centuries); III Modern (since 1800, with Franco-African literature as an option).

Foreign Language Requirement
A) Two languages up to level 5 and 6 respectively, to be chosen upon approval of the Guidance Committee among the four following: Latin, German, Russian and Spanish. Substitution of another language when warranted by the nature of the student's specialization must be recommended by the student's Guidance Committee, and approved by the Chairperson of the Department.
B) When the nature of the student's specialization requires the knowledge of a third language (in addition to the two normally required) the Guidance Committee is expected to take into account the extra work implied in making its other recommendations.
C) Language requirements may also be satisfied by taking the Educational Testing Service (ETS) examination with level II corresponding to a score of 500, level V 550 and level VI 600.
D) Both languages are to be completed before permission is granted to take Qualifying Part II Examination.

Course Requirements. 1) At least three courses from the 202-207 series, including one from 203 series; 2) At least four seminars, two of which should be in the candidate's proposed area of specialization; 3) at least two graduate courses in other departments related to one's area of specialization. In addition, the candidate is expected to follow the Guidance Committee's suggestions in taking courses in preparation for the Doctoral Qualifying Examination.

Written and Oral Qualifying Examination. A Guidance Committee is constituted after the student has successfully passed the Qualifying Part I Examination. The Committee is made up of a Chairperson (chosen by the student) and those members of the Department required to administer the four written parts of the examination. After the student has completed the program of study outlined by the Guidance Committee* a date is set for the Qualifying Part II Examinations by the candidate (in consultation with the chairperson of the committee). Guidance Examinations are then graded by the appropriate Guidance Committee members. An oral examination is then set up, on which two outside members sit. After the examination, a decision is made as to the constitution of the formal doctoral committee that will be entrusted with the supervision of the dissertation.

Time to Degree. Estimated time: 15 to 18 quarters.

Final Oral Examination. (Defense of dissertation.) This examination is no longer required. This does not prevent individual doctoral committees from imposing this examination on a candidate.

Candidate in Philosophy Degree. Students are eligible to receive the C. Phil degree in advancement to candidacy for the Ph.D.

Teaching Experience. Teaching experience is not a requirement for the Ph.D. degree. A good many Ph.D. candidates are granted teaching assistantships in the course of their graduate career.

Disqualification and Appeal of Disqualification. A student may be disqualified if his/her grade point average falls below 3.00 in graduate courses, or if he/she fails to make "normal progress" toward the degree. After failure for the second time on the Written Qualifying Examinations, the members of the student's doctoral committee will convene a special meeting in order to determine disqualification and inform the student of it. Provision is made for later appeal to the Department Chairperson.

Other Relevant Information. Candidates holding the M.A. or Licence ès-Lettres from another institution must take a qualifying examen de passage at the master's level in order to be formally admitted to the doctoral program.

*Including fulfillment of Foreign Language requirement
Graduate Courses

201A. Theme. Course meets three times weekly. Advanced translation into French.
201B. Version. Course meets three times weekly. Advanced translation into English.
201C. La Dissertation Française. Course meets three times weekly. Advanced composition.
201D. Problems of French Literary Composition. Course meets three times weekly. Practical work of an advanced nature in the expression and presentation of literary research.
202. Explication de Textes. Mr. Bensimon
203A-203B-203C. French Literary Criticism.
203A. Topics in Literary Criticism from Aristotle to Sainte-Beuve.
203B. Modern Theories of Criticism.
203C. The Techniques of Literary Criticism.

204A. Phonology and Morphology from Vulgar Latin to French Classicalism. The evolution of the French language. Required of candidates for the Ph.D. in Romance Languages and Literatures who utilize phonology. The Staff
204B. Syntax and Semantics from Vulgar Latin to French Classicalism. The evolution of the French language. Required of candidates for the Ph.D. in Romance Languages and Literatures who utilize semiotics. The Staff
205A-205B-205C. The Intellectual Background of French Literature.
205A. Scholasticism (with ancient sources); Humanism.
205B. Rationalism, Empiricism, Positivism.
205C. Idealism, Phenomenology, Existentialism.

206. French Linguistics. Prerequisite: Linguistics 100 or French 105, or equivalent. Discussion of modern linguistic theory in the area of French grammar, syntax and semantics. The Staff
207. Introduction to Stylistics. Discussion of the basic stylistic devices of the French language. The Staff

215A. Old and Middle French. This course is prerequisite to courses 215B-215E. Phonology and morphology of the language. Introduction to Old French texts.
215B. The Chanson de geste.
215C. The Romance.
215D. Medieval Theater.
215E. Provencal Poetry.

216A-216H. The Renaissance. Mr. Bensimon
216A. Topics in early sixteenth century French literature.
216B. Topics in the Pleiade.
216C. Topics in late sixteenth century French literature.
216D. Ronsard.
216E. Rabelais and Prose Writers.
216F. Baroque Poetry.
216G. Montaigne.
216H. Theater.

217A. Topics in Classical Theater.
217B. Topics in Non-Dramatic Literary Genres.
217C. Topics in Classical Prose and Thought.
217D. Moliere.
217E. Corneille.
217F. Racine.
217G. The Novel.
217H. Moralists.
217I. Religious Thought.

218A-218D. The Eighteenth Century. Mr. Coleman, Mr. Werner
218A. Topics in the Early Enlightenment. (1680-1747).
218B. Topics in the Enlightenment. (1748-1765).
218C. Topics in the Late Enlightenment. (1766-1791).
218D. The Theater.

219A-219K. The Nineteenth Century. Mr. el Nouty, Mr. Gans
219A. Topics in Romanticism.
219B. Topics in Realism and Naturalism.
219C. Topics in Symbolism.
219D. Poetry.
219E. The Novel.
219F. The Theater.
219G. Historians and Critics.
219H. Victor Hugo.
219I. Balzac.
219J. Independent Novelist.

220A-220P. The Twentieth Century. Ms. Kao, Mr. Reid
220A. From Symbolism to Surrealism. Selected topics.
220B. From Surrealism to Existentialism. Selected topics.
220C. From Existentialism to the Present. Selected topics.
220D. Paul Valery.
220E. Marcel Proust.
220F. Andre Gide.
220G. Andre Malraux.
220H. The Theater.
220I. The Anti-Theater.
220J. The Novel.
220K. The Anti-Novel.
220L. Surrealism.
220M. Existentialism.
220N. Poetry.
220P. Cinema and Literature.

221A-221D. French-African Literature. Mr. el Nouty
221B. French-African Literature of Madagascar and Bantu Africa.
221C. French-African Literature of Berbero-Sudanese and Arabo-Islamic Africa.
221D. Franco-Caribbean Literature.

Seminars

The following courses, 250A through 260B, may be repeated for credit.

250A-250B. Studies in Medieval Literature. Ms. Burke
251A-251B. Studies in the Renaissance. Mr. Bensimon and the Staff
252A-252B. Studies in the Baroque. Mr. Bensimon and the Staff
254A-254B. Studies in the Eighteenth Century. Mr. Werner, Mr. Coleman
255A-255B. Studies in the Nineteenth Century. Mr. el Nouty, Mr. Gans
256A-256B. Studies in Contemporary Literature. The Staff

257A-257B. Studies in the French African Literature. Mr. el Nouty and the Staff
258A-258B. Studies in Literary Criticism. Mr. Gans and the Staff
259A-259B. Studies in Philosophy and Literature. The Staff

260A-260B. Studies in the History of Ideas. A particular problem of French literature and ideas. The Staff

Professional Courses

310A-310B. The Teaching of French in the Elementary School and at the Junior High Level.
310A. Prerequisite: consent of instructor. Theory of French teaching in the elementary school and at the junior high level. Classes meet three times weekly. Required for the Standard Elementary Credential.
310B. Observation of language teaching in the elementary school and at the junior high level. Classes will meet as announced. Required for the Standard Elementary Credential.

370. The Teaching of French in the Secondary School and at the College Level. Observation. Prerequisite: course 103. Observation of language teaching in the secondary school and at the college level. Ms. Hamel-Baccash

372. The Language Laboratory (1/2 course) Prerequisite: consent of instructor. New electronic techniques for language instruction. Pedagogical and practical problems of making tapes, installing and organizing a laboratory; control procedures. Mr. de Martini

485. The Teaching of French in the Secondary Schools and at the College Level. Prerequisite: course 370. Theory of language teaching. Letter grade. The Staff

Individual Study and Research

356. Directed Individual Study or Research. (1/2 to 1 course) The Staff
357. Preparation for the Comprehensive Examination for the Master's Degree or the Qualifying Examination for the Ph.D. (1/2 to 2 courses) The Staff
358. Research for and Preparation of the Master's Thesis. (1/2 to 2 courses) Prerequisite: consent of instructor. A maximum of 4 units may be applied toward the M.A. degree requirements. Graded S/U. The Staff
359. Research for and Preparation of the Doctoral Dissertation. (1/2 to 2 courses) The Staff
Requirements for students entering the graduate program from beyond departments of geography: Non-geography majors entering the geography program from another field will be required to show proficiency in six upper division geography courses (additional to those required for the M.A.) including three courses from Group I (The Environment) and three courses from Group II (Human Geography), embracing at least one course each from Groups Ia, Ib, Iia, and Iib.

Graduate brochures are available by writing the Graduate Adviser, Department of Geography, UCLA, Los Angeles 90024.

Advising. For 1981-1982, Dr. Charles F. Bennett will be the Graduate Adviser. His office is Room 1251 Bunche Hall. Early in the first quarter of residence, each candidate is required to seek an informal guidance committee headed by an interim adviser from among the faculty, in consultation with the Graduate Adviser. The interim adviser may be changed as the candidate's plan and objectives change, subject to the normal courtesies of informing the Graduate Adviser and others involved. At a time agreed upon by the student and his/her adviser, an official 3-person Graduate Division committee, including a Chairperson, will be appointed. This committee is responsible for the candidate's course of study henceforth, and supervises the preparation of the master's thesis or the Comprehensive Examination.

The Department holds a review of all graduate students every Spring Quarter. To this end, each graduate student should have designated a committee chairperson or interim adviser, and have completed a simple form detailing program and accomplishments prior to Spring Quarter. All faculty members are at the review meeting. The results of this review (Favorable, Favorable with Reservations, or Unfavorable) will determine whether or not the student shall be permitted to proceed toward the M.A. degree.

Major Fields or Subdisciplines. By its very nature, geography embraces many fields of endeavor within the physical, biological, and social sciences. In essence, geography is both a vital discipline that explores the interface between environment and society, and a method of study, a correlative science that seeks to establish relationships both within and between the many complex expressions of our surroundings. While acknowledging this, graduate students commonly focus their attentions on one or more of the following subdisciplines: geomorphology, climatology, biogeography, cultural, historical, urban, economic, political, cartography, environmental studies.

Research Tool Requirement. At least one research tool is required for graduate study. This is a minimum requirement and is subject to approval by the graduate student's committee at both the M.A. and Ph.D. levels, prior to advancement to candidacy. A research tool might be a foreign language, or a series of mathematical or statistics courses. If a foreign language is approved, the requirement may be fulfilled by a series of courses (with a B average), taking of the Educational Testing Service (ETS) examination with a score of 500 or taking of a special departmental written examination.

Course Requirements. The work in residence must include at least nine courses plus Geography 200, including a minimum of seven courses at the graduate level, of which Geography 201, and at least one seminar in geography are required. The student's program must have the approval of the graduate student's committee. Geography 200 must be taken at the earliest opportunity.

Thesis or Comprehensive Examination Plan. Thesis Plan. For committee, see requirements under Advising. Under the Thesis Plan, each student must present a thesis, based in whole or in part on original investigation. Selection of a thesis topic, creation of a scientific design, and conduct of the investigation, proceed initially under the supervision of the informal guidance committee, and later, under the official Graduate Division committee. The candidate should submit a written statement to all members of the thesis committee, describing in some detail the thesis proposal. This proposal should include the exact nature of the problem to be studied, an outline of the subject matter, the proposed methods of research, the degree of originality involved, and the anticipated time of completion of the study.

Comprehensive Examination. For committee, see requirements under Advising. All formal coursework, including the completion of the research tool requirement, must be completed before the examination is attempted. The Comprehensive Examination is normally given in the final 2-week period of the quarter in which the candidate completes his/her work for the degree. It will normally consist of three half-day written examinations embracing a general paper and two further papers drawn from the broad divisions of geography. The examination is designed to test for broad grasp of subject, as well as the more specialized abilities of the candidate. A student who fails any part of the Comprehensive Examination may be reexamined once. Such reexaminations must take place within one calendar year of the failure. A student who completes the M.A. degree by the Comprehensive Examination Plan may not continue for a Ph.D. degree in this department.

Advancement to Candidacy. For both plans: A student must file an application for advancement to candidacy no later than the second week of the quarter in which the degree will be awarded.
**Advising.** For 1981-1982, Dr. Charles F. Bennett will be the Graduate Adviser. His office is Room 1261 Bunche Hall, Department of Geography, UCLA, Los Angeles, CA 90024.

**Research Tool Requirement.** At least one research tool (foreign language, statistics, taxonomy, surveying, laboratory methods, etc.) is required for graduate study. This is a minimum requirement and is subject to approval by the graduate student’s committee at both the M.A. and Ph.D. levels, prior to advancement to candidacy. The research tool may be fulfilled by a series of courses in the approved tool, or if a foreign language, by the taking of the Educational Testing Service (ETS) examination with a score of 500 or taking of a special departmental written examination. If a series of courses are taken, a B average must be received.

**Course Requirements.** All Ph.D. students must satisfactorily complete Geography 200 and 201 and, if these have not already been taken at the M.A. level. Students are also required to take at least three graduate geography courses additional to their M.A. coursework (excluding 200, 201, and the 500 series) and three upper division or graduate courses in one or two allied fields to their main field, subject to approval of their committee. The allied field requirement may be met at any time during graduate status. Geography 200 must be taken at the earliest opportunity.

**Written and Oral Qualifying Examinations.** Written Qualifying Examinations. The Written Qualifying Examinations are administered by a student’s informal guidance committee and consist of five written papers arranged as follows: three substantive fields of geography, one general paper covering the entire range of geography, and one small field research problem. The field problem will require one full day in the field, followed by one full day in which field results are prepared for presentation. All other papers will be of four hours duration. The examination may be spread over a period of not more than two weeks. This examination should be taken no later than the end of the sixth quarter of the Ph.D. program. If the examination, or any portion thereof, is failed, the student may make one further attempt. This attempt may not be sooner than three months nor longer than one year from the first examination.

Oral Qualifying Examination. The Oral Qualifying Examination is conducted by the candidate’s official Ph.D. dissertation committee. This examination focuses on the dissertation research proposal prepared by the candidate and distributed to all committee members at least one month prior to the oral. This proposal should specify the objectives, methodology, establish relationships both within and between the many complex expressions of our surroundings. While acknowledging this, graduate students commonly focus their attention on one or more of the following subspecializations: geomorphology, climatology, biogeography, cultural, historical, urban, economic, political, cartography, environmental studies.
and scientific background of the research envisaged. Successful completion of the Oral Qualifying Examination implies acceptance by the committee of the student's qualifications for doctoral research and approval in principle of the dissertation proposal, subject to such minor modifications in design and methodology as the committee may recommend. A student who has successfully completed the Oral Qualifying Examination is eligible for advancement to candidacy. In instances of failure, the oral examination may be taken once more only. At the end of the candidate's successful Oral Qualifying Examination, the chairperson and members of the committee, in consultation with the student, shall determine which of its members will guide, read, approve and certify the dissertation. At least two members from the student's department and at least one outside member must be certifying members of the doctoral committee. At least three members of the committee must hold an appointment as associate professor or professor.

The Dissertation. The dissertation is the ultimate focus of each student's Ph.D. program and demonstrates an ability for independent investigation in a selected field of study. The dissertation should be designed and executed in such a way as to make a significant original contribution to geographic research, a contribution that is worthy of publication, in part or as a whole, in a reputable scientific medium.

Doctoral Committee. The Geography Department has no special requirements other than those of the Graduate Council.

Time to Degree. From admission to the Ph.D. program to the Qualifying Examination—six quarters. From Oral Qualifying Examination to award of degree—five quarters. From graduate admission to the award of the Ph.D. degree—one quarter.

Final Oral Examination. Optional with doctoral committee. A final oral defense of the dissertation may be required by the dissertation committee. This examination may be held at any time mutually agreed upon by the candidate and his/her committee, provided that the dissertation is essentially complete. In instances of failure, only one reexamination is permitted.

Candidate in Philosophy Degree. All students who have been advanced to candidacy for the Ph.D. degree are eligible to receive this degree.

Teaching Experience. Teaching experience is not required for the Ph.D. degree in Geography.

Disqualification and Appeal of Disqualification. A graduate student could be terminated for failure to maintain a grade point average of at least 3.0, failure on Written or Oral Qualifying Examinations (after second attempt), or for failure to proceed to the qualifying examinations after being given extensions of time. The decision to terminate would be made by a vote of the entire faculty in residence at the time and not by one or a few individuals. Student appeals would be directed to the faculty.

Other Relevant Information. A Ph.D. degree must be completed within seven calendar years from the initiation of work on the degree (for candidates from beyond UCLA), or within seven calendar years from admission to graduate status at UCLA (for candidates who obtain M.A. degrees from UCLA).

Graduate Courses

Courses Required of all Entering Graduate Students

200. Trends in Contemporary Geography. (½ course) Lecture, three hours. Prerequisite: Graduate Standing. An analysis and interpretation of contemporary geography with emphasis on research trends in major subfields of the discipline, each subfield being examined by a faculty expert. Graded S/U. The Staff

201. History of Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: consent of instructor. A survey of geography from classical times onward, with emphasis on the professionalization of geography in Europe and North America from 1870 to present. Mr. Dunbar

Group I: The Environment

202. Advanced Geomorphology. (Formerly numbered 212.) Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course M102 or equivalent, or consent of instructor. An extended study of selected geomorphic processes and landforms. Mr. Orme

203. Seminar: Geomorphology. (Formerly numbered 215.) Discussion, three hours; reading period, one hour. Prerequisites: course 202 or equivalent and consent of instructor. Selected geomorphic topics with emphasis on current research frontiers and techniques. May be repeated for credit. Mr. Orme

204A-204B-204C. Advanced Climatology. Lecture, three hours; laboratory, one hour. Prerequisites: course 104, first year of calculus, acquaintance with FORTAN IV, or consent of instructor. Course must be taken sequentially. An introduction to the tools and concepts of environmental physics of relevance to natural and man-made landscapes. Such basic intellectual, mathematical, and computer programming tools are of special concern to physical geographers, ecologists, and architects. Mr. Terjung

205. Seminar: Climatology. (Formerly numbered 215.) Discussion, three hours; reading period, one hour. Prerequisites: course 204 or equivalent and consent of instructor. Selected topics. May be repeated for credit. Mr. Terjung

206. Advanced Biogeography: Plants. (Formerly numbered 262.) Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 108, 110 or 116, or equivalent, or consent of instructor. An intensive review and analysis of physical and cultural factors influencing plant distributions. Mr. Sauer

212. Advanced Biogeography: Animals. (Formerly numbered 260.) Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 112, 117, or equivalent, or consent of instructor. An intensive review and analysis of biophysical and cultural factors influencing animal distributions. Mr. Bennett, Mr. Walter

213. Seminar: Biogeography. (Formerly numbered 265.) Discussion, three hours; reading period, two hours. Prerequisites: courses 208, 212 or equivalent and consent of instructor. Research projects related to or growing out of course 208 or 212. May be repeated for credit. The Staff

215. Seminar: Quaternary Studies. (Formerly numbered 216.) Discussion, three hours; reading period, two hours. Prerequisite: courses 202 or 204 or 208 or 212; or appropriate graduate course in anthropo- logical, lotic, earth and space sciences, or geology; or consent of instructor. An analysis of the changing environment of the Quaternary Period. May be repeated for credit.

218. Advanced Medical Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 118 or consent of instructor. An in-depth study of selected topics in medical geography and an intense review of recent research.

223. Seminar: Humid Tropics. (Formerly numbered 292.) Discussion, three hours; reading period, two hours. Prerequisite: consent of instructor. Selected topics. Biophysical and cultural complex of the humid tropics with emphasis on problems related to human settlement and livelihood. May be repeated for credit.

227. Water Quality Management. Discussion, three hours; reading period, one hour. Prerequisites: Graduate Standing and consent of instructor. Discussion of the basic technical, regional planning and public policy issues in water quality management. Mr. Westman

229. Seminar: Man and Environment. (Formerly numbered 266.) Discussion, three hours; reading period, two hours. Prerequisite: course 128 or equivalent. An analysis of man's perception of the environment throughout history and in different parts of the world and its impact on present, past and future ecosystems. Mr. Walter

Group II: Human Geography

232. Advanced Cultural Geography. (Formerly numbered 220.) Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 132, or 153 or equivalent, or consent of instructor. Lectures and discussions around specific aspects of the development of cultural landscape in different geographic environments. Mr. Hale, Mr. Salter

233. Seminar: Cultural Geography. (Formerly numbered 225.) Discussion, three hours; reading period, two hours. Prerequisites: course 232, 236, or equivalent and consent of instructor. Discussions centered around particular topics in cultural geography; topics may vary from year to year. May be repeated for credit.

236. Advanced Historical Geography of the United States. (Formerly numbered 222.) Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: course 136 and consent of instructor. Some major themes in American historical geography. Mr. Dunbar

237. Seminar: Historical Geography. (Formerly numbered 223.) Discussion, three hours; reading period, two hours. Prerequisites: course 236 and consent of instructor. Theory and practice of historical geography in North America and Europe. May be repeated for credit.

240. Advanced Political Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 140 or equivalent or consent of instructor. Intensive study of the theories and principles of political geography and German geopolitics. Selected regions will be used as specific examples of differing techniques of study in geopolitics. Mr. Kostanick
241. Seminar: Political Geography. (Formerly numbered 245.) Discussion, three hours; reading period, two hours. Prerequisites: 240 or equivalent, and consent of instructor. Related research projects growing out of course 240. May be repeated for credit.

Mr. Kostanick

242. Advanced Population Geography. Lecture, three hours; reading period, one hour. Prerequisites: course 242 or equivalent, and consent of instructor. A study of population dynamics and migration, spatial variation in population composition, and population resource problems, diffusion and epidemiology.

The Staff

248. Location and Space Economy. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: course 145 or consent of instructor. Methods of locational analysis as applied to problems of regional growth and development.

Mr. Kostanick

249. Seminar: Economic Geography. (Formerly numbered 235.) Discussion, three hours; reading period, two hours. Prerequisite: course 248 or equivalent, and consent of instructor. Related research projects growing out of course 245. May be repeated for credit.

The Staff

250. Urban Systems. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: course 245 or consent of instructor. A general study of the hierarchy of urban places including diffusion within the urban hierarchy, and theories to account for the location and size distribution of cities.

Mr. Clark

251. Seminar: Urban Geography. (Formerly numbered 255.) Discussion, three hours; reading period, two hours. Prerequisites: course 250 or equivalent, and consent of instructor. Related research projects growing out of course 250. May be repeated for credit.

The Staff

252. Location and Social Structure Within the City. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: course 145 and 146 or consent of instructor. A study of the links between urban social and urban spatial structure emphasizing urban residential land use, social areas of the city, and accessibility and urban form.

Mr. Enright

254. Migration and Residential Mobility. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: consent of instructor. The description and modeling of national, regional and international migration.

Mr. Clark

Group III: Procedures

260. Advanced Field Analysis: Physical Elements. (2 courses) Class meets once a week from 8-5. Prerequisites: one or more courses from 202, 203, 204, 205, 215. Field methods and analysis applied to the physical environment, especially in southern California and with particular reference to various aspects of geomorphology, hydrology, climatology, and associated human activities.

Mr. Trimble

261. Advanced Field Analysis: Cultural Geography. (2 courses) Class meets once weekly from 8-5, mainly in the field. Prerequisites: one or more courses from 232, 233, 250, 251. Field methods and analysis applied to the cultural landscape, especially in southern California and particular reference to settlement, agriculture, and environmental modification.

Mr. Saltar

262. Advanced Field Analysis: Biogeography. (2 courses) Field, ten hours per week. Prerequisite: consent of instructor. Observation, measurement, and analysis of biogeographic phenomena including identification and evaluation of biotic populations and communities and their modifications resulting from the impact of human activity.

The Staff

265. Geographical Bibliography. (Formerly numbered 201.) Lecture, one hour; discussion, two hours; reading, one hour. Prerequisite: consent of instructor. A survey of the literature of geography with special reference to periodicals. Intended for beginning graduate students.

Mr. Dunbar

267. Advanced Cartography. (Formerly numbered 272.) Laboratory, three hours; independent work, two hours. Prerequisite: course 167 or equivalent, or consent of instructor. Advanced work in the theory and practical application of modern cartographic principles. Special emphasis is placed on terrain representation, quantitative and computer mapping, cartography, color separation, and reproduction of maps.

Mr. Thower

269. Remote Sensing of Environment. (Formerly numbered 274.) Laboratory, three hours; independent work, two hours. Prerequisite: course 167 or equivalent or consent of instructor. The study of aerial photographs and other remote sensing images as tools for geographical research. Particular attention is placed on the analysis of landscapes and the interpretation of interrelationships of individual features in their physical and cultural context.

Mr. Thower

M270. Advanced Quantitative Analysis. (Formerly numbered M276; same as Architecture and Urban Planning M215A.) Lecture, two hours; laboratory, two hours. Prerequisite: course 171 or equivalent or consent of instructor. Advanced topics in the utilization of mathematical and statistical techniques for geographic research. Emphasis on linear models, factor analysis and grouping procedures as applied to geographic data bases.

Mr. Clark

M272. Spatial Statistics. (Formerly numbered M277; same as Architecture and Urban Planning M215B.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: Mathematics 50B or course 171 and consent of instructor. Specific techniques useful in the analysis of spatial distributions, including both point and areal patterns; and emphasizing spatial descriptive statistics, probability models of spatial distributions, and statistical surfaces.

The Staff

273. Seminar: Model Building for Spatial Analysis. (Formerly numbered 279.) Discussion, three hours. Prerequisite: course M270 or consent of instructor. Discussions of the philosophy and methodology of model building. The focus will be on the problems unique to models of spatial structure. Individual research topics will be emphasized. May be repeated for credit.

Mr. Clark

Mr. Berger

M274. Dating Techniques in Environmental Sciences and Archaeology. (Formerly numbered M271: same as Anthropology M216.) Lecture, three hours. Prerequisite: consent of instructor. A colloquium devoted to topics in dating techniques in environmental sciences, archaeology, and physical anthropology as well as laboratory instruction and experimental work. May be repeated for credit.

Mr. Berger

Group IV: Seminars in Regional Geography

280-291. Selected topics for each seminar. Each may be repeated for credit. Lecture, two hours; discussion, two hours.

280. North America. (Formerly numbered 290A.) Prerequisite: course 180 or consent of instructor.

Mr. McKnight, Mr. Nelson

281. Middle America. (Formerly numbered 290B.) Prerequisites: course 181 and consent of instructor.

Mr. Bennett, Mr. Bruman

282. South America. (Formerly numbered 290C.) Prerequisites: course 182 and consent of instructor.

Mr. Bennett, Mr. Bruman

283. Europe. (Formerly numbered 290D.) Prerequisites: course 183 and consent of instructor.

Mr. Kostanick, Mr. Thower

284. Soviet Union. (Formerly numbered 290E.) Prerequisites: course 184 and consent of instructor.

Mr. Kostanick

285. South and South East Asia. (Formerly numbered 290F.) Prerequisites: course 185 and consent of instructor.

The Staff

286. Eastern Asia. (Formerly numbered 290G.) Prerequisites: course 186 and consent of instructor.

Mr. Saltar

287. Middle East. (Formerly numbered 290H.) Prerequisites: course 187 and consent of instructor.

Mr. Hale

288. Northern Africa. (Formerly numbered 290I.) Prerequisites: course 188 and consent of instructor.

Mr. Hale, Mr. Thomas

289. Middle and Southern Africa. (Formerly numbered 290J.) Prerequisites: course 189 and consent of instructor.

Mr. Hale

290. Australasia. (Formerly numbered 290K.) Prerequisites: course 190 and consent of instructor.

Mr. McKnight

291. The Arid Lands. Prerequisites: courses 102, 104, 105, 116, 120, 148, or equivalent and consent of instructor. An investigation of the physical and cultural complexes of the world's arid regions. Salient factors emphasized include climate, landforms, water, soils, natural vegetation and the various aspects of human occupancy, including future possibilities for human utilization.

The Staff

292. Advanced Regional Geography: Selected Regions. Lecture, three hours; discussion, one hour. Prerequisite: appropriate upper division regional course. A lecture series devoted to a specific region at the discretion of the instructor. May be repeated for credit.

The Staff

293. Seminar: Geographic Thought. Discussion, three hours; reading period, two hours. Prerequisites: Graduate Standing, consent of instructor. Discussion and study of topics significant to the growth of modern philosophy of geography.

Mr. Enright

495. Teaching of College Geography. (½ course) Discussion, one hour; laboratory, three hours. Prerequisite: consent of instructor. Classroom practice of teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit.

Mr. McKnight

Individual Study and Research

596. Directed Individual Study or Research. (½ to 2 courses) Prerequisite: consent of instructor.

The Staff

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examination. (½ to 2 courses) Special individual study. Prerequisite: consent of instructor.

The Staff

598. Research for and Preparation of the Master's Thesis. (½ to 2 courses) Indepedent study. Prerequisite: consent of instructor.

The Staff

599. Research for and Preparation of the Doctoral Dissertation. (½ to 2 courses) Independent study. Prerequisite: consent of instructor.

The Staff
The Institute of Geophysics and Planetary Physics

Institute Office, 3871 Slichter Hall
Orson L. Anderson, Ph.D., Professor of Geophysics.
C. Rainer Berger, Ph.D., Professor of Geophysics, Geography and Anthropology.
Arthur L. Boettcher, Ph.D., Professor of Geology and Geophysics.
Friedrich H. Busse, Ph.D., Professor of Planetary Physics.
Paul J. Coleman, Jr., Ph.D., Professor of Planetary Physics.
W. Gary Ernst, Ph.D., Professor of Geology and Geophysics.
Isaac R. Kaplan, Ph.D., Professor of Geology and Geochemistry.
William M. Kaula, D.Sc., Professor of Geophysics.
Charles F. Kennel, Ph.D., Professor of Physics and Geophysics.
Leon Knopoff, Ph.D., Professor of Geophysics and Physics and Associate Director of the Institute of Geophysics and Planetary Physics.
R.L. McPherron, Ph.D., Professor of Planetary Physics and Geophysics.
John P. McTague, Ph.D., Professor of Geology and Geophysics.
Ronald L. Shreve, Ph.D., Professor of Geology and Geophysics.
John T. Wasson, Ph.D., Professor of Geochemistry and Chemistry.
Robert E. Holzer, Ph.D., Emeritus Professor of Geophysics.
Jonathan I. Katz, Ph.D., Associate Professor of Astronomy.

The Institute of Geophysics and Planetary Physics was established to encourage fundamental research and graduate instruction in Geophysics, Geochemistry and Space Physics. Faculty members of associated departments are prepared to supervise graduate work in a variety of fields: atmospheric physics, physics of the radiation belts, interplanetary physics and solar physics, geophysical fluid dynamics, high pressure physics, tectonophysics, geochemistry, nuclear geophysics, age determination, gravitation, physical oceanography and marine geophysics, seismology, physics of the deep interior, and exploration geophysics. For further information, contact the Institute of Geophysics and Planetary Physics.

Undergraduate students with an interest in graduate study in Geophysics are advised to complete a major in physics, mathematics or chemistry. Attention is also drawn to opportunities to complete an undergraduate course of studies in Geophysics and Space Physics and in Applied Geophysics. For information concerning these programs, consult the catalog listings for the Department of Earth and Space Sciences.

Germanic Languages

(Department Office, 310 Royce Hall)
Ehrhard Bahr, Ph.D., Professor of German.
Franz H. Bäuml, Ph.D., Professor of German.
Wolfgang Nehring, Ph.D., Professor of German.
Eli Sobel, Ph.D., Professor of German.
Hans Wagener, Ph.D., Professor of German (Chairman of the Department).
Donald J. Ward, Ph.D., Professor of German and Folklore.
Terence H. Wilbur, Ph.D., Professor of Germanic Linguistics and Philology.
Gustave Otto Atti, Ph.D., LL.D., Emeritus Professor of German.
Carl William Hagge, Ph.D., Emeritus Professor of German.
Wayland D. Hand, Ph.D., Emeritus Professor of German and Folklore.
William J. Muller, Ph.D., Emeritus Professor of German.
Victor A. Oswald, Jr., Ph.D., Emeritus Professor of German.
Vern W. Robinson, Ph.D., Emeritus Associate Professor of German.
Erik Wahlgren, Ph.D., Emeritus Professor of Scandinavian and Germanic Languages.
Janet R. Hadda, Ph.D., Assistant Professor of Yiddish.
Robert S. Kirsner, Ph.D., Assistant Professor of Dutch and Afrikaner.
Alexander Stephan, Ph.D., Associate Professor of German.
Vern W. Robinson, Ph.D., Emeritus Associate Professor of German.
Thomas C. Christy, Ph.D., Assistant Professor of Germanic Linguistics and Philology.
Kathleen Komar, Ph.D., Assistant Professor of German and Comparative Literature.

Marianna D. Birnbaum, Ph.D., Adjunct Associate Professor of Hungarian.

The Master of Arts Degree

Admission Requirements.
(a) A bachelor's degree in German with a minimum grade point average of 3.0 from an accredited U.S. institution or the equivalent. Candidates deficient in their undergraduate preparation, will be required to take remedial courses, as recommended by the departmental Graduate Adviser. A placement examination in the German language or literature may be required of entering graduate students.
(b) Three letters of recommendation are required.
(c) There is no departmental application form in addition to the one issued by the Office of Graduate Admissions.
(d) To obtain brochures and other information: Department of Germanic Languages, 310 Royce Hall, UCLA, Los Angeles, CA 90024 (213) 825-3955.

Advising. There are two departmental Graduate Advisers. At present these are: Professor Wolfgang Nehring, (advisees A-L) Office: 326 Royce Hall; Professor Alexander Stephan, (advisees M-Z), Office: 310C Royce Hall, Department Telephone Number: (213) 825-3955.
The Graduate Advisers evaluate student preparation for the M.A. program and assess progress toward the degree. They advise students on planning their studies, course selection and preparation for the M.A. examinations. They meet with each student at least once every quarter and maintain records of these interviews. Those students who choose the M.A. Thesis Plan (see Thesis and Comprehensive Plan, below) will, in addition, be guided by a thesis adviser and a guidance committee.

Major Fields and Subdisciplines. There are two M.A. plans that differ with respect to the course requirements (see Course Requirements, below) and the comprehensive examinations (see Thesis and Comprehensive Plan, below). Plan A: for students who plan to terminate their studies with the M.A. and a teaching credential. Plan B: for students whose main interests are literary and linguistic rather than pedagogical, and for students who plan to proceed toward the Ph.D.

Foreign Language Requirement. Before advancement to candidacy for the M.A., the student must pass the GSFLT (Graduate School Foreign Language Test) reading examination in French. The test is administered through University Extension at the beginning of each quarter, including the summer. The required score for passing the examination is 500.

Course Requirements. Plan A: A minimum of nine upper division and graduate courses, of which at least five courses must be graduate level, i.e., 200 or 500 series (see 500 Series Course Limitations, below). In addition to the above, courses 128, 129 (or the equivalent), and 370 are required. Undergraduate credit for
these courses (or their equivalent) is applicable in satisfaction of these requirements.

Plan B: A minimum of nine upper division and graduate courses, of which at least six courses must be graduate level, i.e., 200 or 500 series (see 500 Series Course Limitations, below). One seminar must be included.

**Thesis and Comprehensive Plan.** Candidates for the M.A. degree in German have the choice of the Thesis Plan or the Comprehensive Plan.

**Thesis Plan.** A thesis committee will be established no later than the end of the fourth quarter of graduate study. At that time the thesis committee evaluates the proposal for the thesis. The M.A. thesis committee consists of four members, one of whom is designated director of the thesis. The director of the M.A. thesis is to be chosen by the candidate; the other members are appointed by the Department Chairperson. No committee member from outside the Department is required. After acceptance of the thesis, the candidate must pass a 2-hour oral examination which will be an examination in the field of the thesis as well as in the fields listed below under the Comprehensive Plan.

**Comprehensive Plan.** Examinations are offered each quarter, beginning with the written part during the third week of each quarter (i.e., Fall, Winter, and Spring). Under exceptional circumstances the Chairperson of the Department will receive student petitions for M.A. examinations during the Summer recess. For details of petition procedure, consult the Departmental Policies. The comprehensive examination committee is appointed by the Chairperson of the Department. The committee consists of at least four faculty members, including one linguist.

Membership of M.A. committee is announced at the beginning of the Spring Quarter for the following academic year.

One committee is appointed for each quarter. The members of the committee administer the written and oral examinations. The M.A. examination consists of two written examinations of three hours each, to be followed by a 1-hour oral examination.

Part I of the written examinations covers various fields. In the case of Plan A, the origin and development of the standard German language and contemporary standards of the German language are included. In the case of Plan B, bibliography, Middle High German and the history of the German language are included. Part II of the written examinations covers major works and authors of German literature from earliest times to the present and concepts of literary criticism. After the candidates have taken the written examination, the M.A. committee decides whether they may proceed to the oral examination. If a candidate fails the oral examination, the M.A. committee decides whether the candidate must repeat the entire examination or only the oral portion. Each M.A. candidate is entitled to one repeat of the examinations without petition.

Students who apply for an M.A. under Plan B (to proceed toward the Ph.D.) and are awarded a terminal M.A. may repeat the examinations if they choose not to have the M.A. degree officially awarded before the reexamination.

**Time to Degree.** Estimated time to the M.A. degree for a full-time student with no deficiencies upon admission to graduate status and taking a full course load, is three to five quarters; estimated time to the degree for teaching assistants is six quarters.

**500 Series Course Limitations.** Individual study courses 596, 597, and 598 are graded Satisfactory (S) or Unsatisfactory (U). Course 596 may be taken twice during a graduate student's studies, including progress toward the Ph.D. degree; course 597 may be taken once before the M.A. degree; course 598 may be taken three times. However, only one course in the 500 series may count toward the M.A. course requirements.

**Teaching Experience:** No teaching experience is required for the degree. However, graduate students may apply for a teaching assistantship in the Department.

**Disqualification and Appeal of Disqualification.** A student who fails to maintain an overall grade point average of 3.00, is immediately placed on academic probation. If in the first quarter of probationary status, the student maintains a grade point average of 3.00, the Department will normally recommend extension of probationary status for another quarter. If at the end of the first quarter of probationary status, a student has not maintained a grade point average of 3.00 for that quarter, the Department will normally recommend dismissal. Every recommendation to terminate a student for reasons other than failure to maintain a grade point average of at least 3.00 will be discussed and decided upon by the Department faculty. The student may appeal to the Department, in writing, any recommendation for termination.

**The Ph.D. Degree in Germanic Languages**

**Admission Requirements.** (a) An M.A. degree in German from an accredited U.S. institution or equivalent (e.g. Staatsexamen in German). The Graduate Advisers will review the records of students entering from another institution. If significant deficiencies in previous training are noted, they will notify the students in writing and make appropriate study or course recommendations. All deficiencies must be removed prior to the student’s application for admission to candidacy for the qualifying examinations leading to the Ph.D. degree. A student who has gained admission to the doctoral program without an M.A. in German (e.g., with an M.A. in Comparative Literature or in Linguistics), will be required to pass the written part of that M.A. Comprehensive Examination before beginning doctoral work in the Department.

(b) Three letters of recommendation are required.

(c) There is no departmental application form in addition to the one issued by the Office of Graduate Admissions.

(d) To obtain brochures and other information: Department of Germanic Languages, 310 Royce Hall, UCLA, Los Angeles, CA 90024 (213) 825-3955.

**Advising of Students in the Doctoral Program.** There are two departmental Graduate Advisers. At present, these advisers are: Professor Wolfgang Nehring, (advisees A-L) Office: 326 Royce Hall; Professor Alexander Stephan, (advisees M-Z), Office: 310C Royce Hall, Department Telephone Number: (213) 825-3955.

Graduate Advisers meet with each student at least once every quarter. They advise students on planning their studies, course selection and preparation for the advanced degree.

As soon as is possible after admission to the doctoral program, the student, after consultation with the Graduate Adviser, will secure the consent of those faculty members he/she wishes to serve on his/her Doctoral Guidance Committee. This Committee is appointed by the Department Chairperson. The Committee is comprised of at least two professors representing the student’s major field and at least one professor representing the student’s minor field. It guides the student’s preparation for the Ph.D. Qualifying Examinations. Changes in the composition of this Committee may be made at the written request of the student and with the consent of the Committee members concerned and of the Department Chairperson. The student is to arrange periodic meetings with the Committee members. The Guidance Committee, in consultation with the student, decides when the student may be permitted to take the Ph.D. Qualifying Examinations. (See Written and Oral Qualifying Examinations, below).

**Major and Minor Fields of Study.** At the beginning of their work toward the doctorate or as soon as possible thereafter, the students shall declare their major and minor fields. The field in which the student intends to present a dissertation will be designated as the major field and will be selected from the four fields in which the degree is offered: (a) German Literature, (b) Germanic Philology and Linguistics, (c) Scandinavian Literature and Philology, or (d) Germanic Folklore.

Candidates who choose German Literature as their major field will be required to choose one of the following: (a) German Literature Before 1700 or (b) German Literature From 1700 to the Present.
The minor field may be chosen from the following options: (1) German Literature Before 1600; (2) German Literature From 1600 through Romanticism; (3) German Philology and Linguistics; (5) Scandinavian Literature and Philology; (6) Germanic Folklore; (7) Yiddish; (8) Dutch-Flemish-Afrikaans. Students with a major field in German Literature may not choose options (1)-(3). Students, except those majoring in Scandinavian, may substitute the following course minor for the formal minor: They take four graduate courses (excluding German 217 and all literature courses taken prior to the award of the M.A. degree) in one of the other fields in which the degree is offered or four appropriate courses in Yiddish or Dutch-Flemish-Afrikaans. Students may also choose a minor field from outside the Department provided that it relates to the prospective dissertation topic. In such cases, the student will meet with the chairperson of the Guidance Committee to discuss the needs, value, and feasibility of an extradepartmental minor. The student will enlist the support of an extradepartmental faculty member who will sponsor the student’s minor field. The student will then draft a proposal for the extradepartmental minor that will include a delineation of the areas for which the student will be responsible on the minor field Written Qualifying Examination. The extradepartmental sponsor must write a letter of support to the Chairperson of Germanic Languages. The student proposal and the faculty supporting letter will then be presented at a departmental meeting for faculty approval. The proposal must be approved by majority vote of the Department members present at that meeting. Scandinavian majors must obtain the approval of the Scandinavian Section.

Course Requirements for the Ph.D. There are no course requirements per se for the doctorate in Germanic Languages. However, the following rules apply: (a) Students must have successfully completed at least three seminars in residence before becoming eligible to take the Qualifying Examinations for the Ph.D. (b) Specific course requirements may be assigned to new students in the doctoral program by the Graduate Adviser (see Admission Requirements, above). (c) Students may choose to fulfill their minor field requirements by taking specific courses rather than being tested in the minor field on the Ph.D. Qualifying Examinations. These provisions are outlined in detail in the sections on Major and Minor Fields of Study and Written and Oral Qualifying Examinations.

Written and Oral Qualifying Examinations. The Guidance Committee consults with the student not later than three months (i.e., one quarter) before the student intends to take the major field qualifying examinations so that the Committee can determine the student’s progress and provide additional counseling. Prior to the major field examinations, the members of the Committee decide if the student is prepared and should be admitted to the examinations. In case of a negative decision, the student must be informed about noted deficiencies. For the minor field examinations, the Guidance Committee may delegate these decisions to a subcommittee. When the Guidance Committee has determined that the student is prepared to take the Qualifying Examinations, the chairperson of the Committee will schedule the examinations. The written examinations consist of three parts unless the student opts for the course minor, in which case it will consist of two parts:

1. First half of major field: (3 hours)
2. Second half of major field: (3 hours)
3. Minor field: (3 hours)

The student may elect to take the written examinations in the major or minor field any time after admission to the doctoral program and fulfillment of all prerequisite requirements. The major field examinations are given within a period of seven school days and completed no later than four weeks before instruction ends in a given quarter.

A student who has opted for the formal minor and fails the written examination is not permitted to switch to the course minor.

Advancement to Candidacy. Advancement to candidacy will take place when the student has (a) passed the graduate reading examination in French; (b) passed a departmental reading examination either in a modern Scandinavian language or in Dutch-Flemish-Afrikaans or in Latin or in Yiddish (substitution of another language may be approved by petition to the Department); (c) successfully completed three seminars; (d) passed the Qualifying Examinations for the doctorate. After completion of the written examinations, the Committee, and all interested members of the Department will meet and decide whether the student has passed or failed. The student will be informed of the results, in writing by the Department Chairperson within two weeks after the administration of the examinations. In case of failure, the Guidance Committee and other interested members of the Department will decide when the candidate will be permitted to repeat the examinations. A repetition of the major examination includes both parts of the major field. The student must be informed in writing of major deficiencies. At least one quarter, normally, should elapse before the second attempt by the student. If the student should fail the examination twice, the faculty of the Department must decide whether the student may be permitted another repeat. When the student has completed the examinations successfully, the Chairperson of the Guidance Committee will schedule an oral examination to be given as soon as possible after completion of the written examinations. The doctoral committee to administer this oral examination is nominated by the Department Chairperson upon the advice of the Guidance Committee and is appointed by the Dean of the Graduate Division. The doctoral committee is made up of at least three members of the Guidance Committee and not fewer than two members from other departments. The student who passes the oral examination proceeds to the writing of the dissertation. Upon completion of the dissertation and after its acceptance by the certifying members of the doctoral committee, the student may be required to defend the dissertation in a Final Oral Examination for the Ph.D.

The Candidate in Philosophy Degree. A student who has successfully completed both the Written and the Oral Qualifying Examinations, and fulfilled all other requirements for the Ph.D. other than the dissertation may submit a formal request to be officially awarded the degree, Candidate in Philosophy. Application for this degree may be made on the Advancement to Candidacy form. The award of this degree is not a requirement for the Ph.D. degree.

Teaching Experience. The Department does not require students in the doctoral program to acquire teaching experience during their graduate studies. However, graduate students in the program may apply for a teaching assistantship in the Department.

Disqualification and Appeal of Disqualification

1. A student who fails to maintain an overall grade point average of 3.00, is immediately placed on academic probation. If, in the first quarter of probationary status, the student maintains a grade point average of 3.00, the Department will normally recommend extension of probationary status for another quarter. If, at the end of the first quarter of probationary status, a student has not maintained a grade point average of 3.00 for that quarter, the Department will normally recommend dismissal.
2. A student who fails any part of the Written or Oral Qualifying Examinations three times will be disqualified.
3. A student who does not complete the dissertation (including its oral defense, if required) within seven years after passing the Qualifying Examinations for the Ph.D., is subject to dismissal. If a completed first draft of the dissertation is not submitted to the chairperson of the doctoral committee within five years after the qualifying examinations, the student is subject to dismissal. Every recommendation to terminate a student for reasons other then failure to maintain a grade point average of at least 3.00 will be discussed and decided upon by the De-
department faculty. The student may appeal to the Department, in writing, any recommendation for termination.

**Lower Division Courses**

1G. Elementary German for Graduate Students. (No credit) Lecture, four hours per week. To provide preparation for Graduate Division foreign language reading requirement

**Upper Division Courses**

Courses open to Graduate Students in German.

121H. Special Problems in Literature.

121I. The German Film in Cultural Context.

122. Studies in German Literature Before 1750.

123. Goethe.

124. Romanticism.

125. Advanced Study in Modern Literature.

127. Advanced Study in Contemporary Literature.

128. Advanced Composition, Grammar and Conversation.

129. German Phonetics.

130. Methodology of Literary Criticism.

132. Goethe's Faust.

134. German Folklore.

155. Senior Thesis Course.

199A-199Z2. Special Studies. (1/2 to 1 course)

**Graduate Courses**

201A. Bibliography of German Literary History. Study of the various kinds of bibliographies, reference works, handbooks, lexica, series publications, journals, literary histories and related materials necessary for advanced studies and research in literary and philological problems. Practical exercises in the analysis and compilation of bibliographical data.

Mr. Sobel

201C. Theories of Literary Criticism. Analysis and discussion of the foundations of literary criticism and current theories such as hermeneutics, positivism, psychology, sociology, intellectual history (Geistesgeschichte), New Criticism, Marxist Criticism, Russian and Czech Formalism, structuralism and semiotics.

Mr. Bahm, Mr. Bauml

202A. Middle High German. Introduction to the grammar, syntax, and vocabulary of the Middle High German Language. Exercises in reading Middle High German literature combined with a study of the socio-cultural contexts in which the works of the medieval period were produced and performed.

Mr. Bauml

202B. Readings in Middle High German Literature. This course is essentially a continuation of German 202A and will provide the student with the opportunity to do extensive reading of the literary monuments of the medieval period in Germany. The course will also introduce the student to the cultural and literary history of the Middle Ages.

Mr. Bauml, Mr. Ward

203A. The Courtly Epic. An analysis of the major epics of the medieval period in Germany such as Hartmann's Erec and Iwein, Wolfram's Parzival, and Gottfried's Tristan. A study of courtly society as well as an introduction to methods of interpretation and analysis.

Mr. Bauml, Mr. Ward

203B. The Courtly Lyric. The medieval songs of courtly performers, beginning with Der von Kuremburg and ending with Johannes von Hadlaub, will be analyzed. Study of the socio-cultural contexts in which the songs were produced and performed and an introduction to methods of interpretation and analysis.

Mr. Bauml, Mr. Ward

203C. The Heroic Epic. A survey of German heroic literature beginning with the Hildebrandslied and including such works as the Nibelungenlied, Kriemhild, and Rittergeschichte, New Criticism, Marxist Criticism, 201C. Analysis and compilation of bibliographical data.

Mr. Bauml, Mr. Ward

204. Renaissance and Reformaton Literature. The literature of the 15th and 16th centuries, including an introduction to and the study of the Early New High German language. Selected readings from the works of such authors as Sebastian Brant, Martin Luther, Hans Sachs and Johann Fischmart.

Mr. Sobel

205. Baroque Literature. Definition of the term baroque in literature and works of literature influenced by foreign models: analysis of sample rhetorical writings (prosodies) and of representative poems, dramas, novels, and prose satires of the 17th century.

Mr. Sobel, Mr. Wagener

206A. Enlightenment and Sentimentality. Study of representative authors of the earlier part of the 18th century from Gottsched through Lessing, including such authors as Leibniz, Thomasius, Wolf, Bodmer and Breitinger, Johann Elias Schlegel, Haller, Brockes, Anacreontic poets, Gebner, Kopp, Mendelssohn and Wieland.

Mr. Bahm

206B. Sturm und Drang. Study of representative authors of the Sturm und Drang period, such as Herder, Forster, Gerstenberg, Leisewitz, Klinger, Wagner, R.M. Lenz, Moritz, Heine, Schubart and Courvois de Goethe and Schiller.

Mr. Bahm

207A. Classicism: Goethe. Selected topics from the works of Goethe in the period 1786-1832, such as Iphigenie auf Tauris, Torquato Tasso, Wilhelm Meisters Lehrjahre, Die natürliche Tochter, Pandora, and poetry selections.

207B. Classicism: Schiller. Selected topics from the critical and dramatic works of Schiller in the period of 1793-1805, such as Uber Anmut und Würde, Uber das Erhabene, Walterstein, Maria Stuart, Jungfrau von Orleans and Wilhelm Tell.

Mr. Bahm

208. Romanticism. Analysis of selected works of the Romantic period. Authors such as Wackenroder, Tieck, the brothers Schlegel, Novalis, Hölderlin, Brentano, Amim, the brothers Grimm, Bonaventura, E.T.A. Hoffmann, Eichendorff and others. Course may be genre or topic oriented.

Ms. Komar, Mr. Nehring

209A. 19th Century Lyric. The development of German lyric poetry from the Classic-Romantic period to Symbolism. Discussion of forms, attitudes, tendencies, and theoretical writings concerning Romantic poetry by Romantic authors as well as Heine, Platen, the political poets of Vormärz, Droste-Hülshoff, Keller, Storm, C.F. Meyer, Nietzsche, George and others.

Ms. Komar, Mr. Nehring

209B. 19th Century Drama. Reading and analysis of selected dramas by Kleist, Büchner, Hebbel, Grillparzer, and others. Discussion and analyses may include topics such as Schicksalstragödie, bourgeois trivial drama, socio-political drama, historical drama, Viennese Volksdrama.

Ms. Komar, Mr. Nehring

209C. 19th Century Narrative Prose. Analysis of German prose works from Romanticism to Naturalism. Discussion of the problem of reality and literary realism with respect to narrative techniques. Authors may include: Heine, Büchner, Droste-Hülshoff, Stifter, Gotthelf, Keller, C.F. Meyer, Fontane and the early Naturalists.

Ms. Komar, Mr. Nehring

210A. Naturalism and Symbolism. Sociological background and theoretical writings concerning Naturalism and Symbolism, a poet-society and drama, and shorter narratives by authors such as Holz, G. Hauptmann, George, Hofmannsthal, Rilke.

Mr. Wagener

210B. Expressionism and Neorealism. Historical and critical works are of the period 1910-1933. Literary magazines, theoretical writings, poetry of Expressionism and Dadaism, Expressionist drama and shorter narratives. Definition and representative works of Neorealism.

Mr. Stephan, Mr. Wagener

210C. 20th Century Novel to 1945. Analysis of selected twentieth-century novels written prior to 1945. Authors of different literary and historical eras such as Büchner, Heine, Kafka, Heinrich Mann, Thomas Mann and Rilke. Ms. Komar, Mr. Wagener

211A. Contemporary Novel. Study of selected novels of the period from 1945 to the present. Works by authors from West and East Germany, Austria, and Switzerland such as Böll, Grass, Handke, Frisch and Christa Wolf will be selected and placed in the context of literary, cultural and political trends.

Mr. Stephan

211B. Contemporary Lyric and Drama. A study of selected dramas and poems of the period from 1945 to the present. Works by authors from West and East Germany, Austria and Switzerland such as Dürrenmatt, Frisch, Handke, Celan and Bracht will be analyzed and placed in the context of literary, cultural and political trends.

Mr. Stephan

217. History of the German Language. A historical survey of the development of the Standard Literary German language from the time of Indo-European unity through proto-Germanic, West Germanic, the medieval period, the Reformation, the baroque period, and the Enlightenment until its final codification at the end of the 19th century.

Mr. Wilbur

230. Survey of Germanic Philology. A systematic survey of the major problems in the field of Germanic linguistics: The origin and historical diffusion of the Germanic dialects and their classification; problems in the evolution of the nominal and verbal morphology of the various dialects; problems in the phonological evolution of the various dialects.

Mr. Wilbur

Mr. Wilbur

232. Old High German. An introduction to the earliest phases of German literary with extensive readings in the major documents of that period (750-1050). Emphasis on the grammatical interpretation of these documents and the identification of the dialects used in their composition.

Mr. Wilbur

Mr. Wilbur

240A. Theories, Methods, and History of Germanic Folklore. The history of Germanic folklore studied in the context of European cultural history. The evolution of the theories and methods of the discipline as developed by Herder, the Grimm, Boile, Meier, Naumann, Bausinger and others.

Mr. Ward

240B. Folk Song and Ballad. Analysis of the poetic and musical aspects of German folksongs and ballads. Study of thematic and formal evolution of text and music, combined with an introduction to the theories and methods of analysis of folk music, and the function of folksong in its social context.

Mr. Ward

240C. Oral Prose Genres. Study of the thematic and formal characteristics of legends, folktales, jests, proverbs and riddles. The role of popular narrative in its socio-cultural context in German history and a survey of methods of analysis of narratives, texts, and contexts.

M245A. Germanic and Scandinavian Mythology. Prerequisite: knowledge of German or a Scandinavian language, or consent of instructor. A study of northern myth and religion through a close reading of the most important sources. Study of the presentation of the refugee gods in the poems of the pantheons, and of the sources. Ms. Wilbur

245B. Germanic Antiquities. Survey of the prehistory and early history of Germanic civilization from the Bronze Age to the end of the migrations on the basis of archeological, historic and philological evidence. Medieval comparative ethnography, religion, and myth will be used to interpret the evidence.

Mr. Ward
251. Seminar in Syntax and Phonology of German. Topics chosen from the field of contemporary German syntax and phonology. Choice of the seminar topic will depend upon the needs and preparation of the students enrolled, e.g., Dialektgeographie, generative phonology, generative syntax, Valenztheorie, Texttheorie.

Mr. Wilbur

252. Seminar in Historical and Comparative Germanic Linguistics. Topics are chosen from the field of Historical Germanic phonology and syntax according to the needs and preparation of the students enrolled; topics such as the West Germanic problem and the classification of the Germanic languages, the development of the Mannavian and nominal morphology proto-Germanic syntax.

Mr. Wilbur

253. Seminar in Medieval Literature. Selected topics in medieval literature with stress on problems in literary analysis and the applicability of various types of analysis to medieval texts.

Mr. Bauml, Mr. Ward

254. Seminar in Renaissance and Reformation. Seminar on selected problems, literary or philological, such as a particular genre, author or theme. Studies on textual analysis or pertinent research to apply the methods of literary history to the literature of the 16th and 17th centuries.

Mr. Sobel

255. Seminar in Baroque Literature. Seminar on selected problems of German Baroque literature, such as a particular genre, author or theme. Textual analysis supplemented by critical review of research and the application of methods of literary analysis pertinent to the literature of this age.

Mr. Sobel, Mr. Wagener

256. Seminar in Enlightenment and Sturm und Drang. Selected topics in 18th century literature, such as utopian literature, love and money as motifs, family structure and family life, image of women and women's literature, Jacobin literature, seduction and betrayal as motifs, nobility and middle class in 18th century literature. Textual analysis and review of current research.

Mr. Bahr

257. Seminar in the Age of Goethe. Selected topics in German literature between 1775 and 1832, such as Schiller's theoretical writings, Goethe's Faust II, Goethe's Wanderjahre and Westöstlicher Divan, Goethe's Faust II and Hegel's Phänomenologie des Geistes, the French Revolution and German Classicism. Textual analysis and review of current research.

Mr. Bahr

258. Seminar in Romanticism. Discussion of a specific author or topic from the Romantic period, possibly in close connection with course 206. Critical review of secondary works included.

Ms. Komar, Mr. Nehring

Ms. Komar, Mr. Nehring

260. Seminar in the Modern Period. Seminar on a selected genre, author or theme of 20th-century German literature prior to 1945.

Mr. Bahr, Mr. Nehring, Mr. Wagener

261. Seminar in Contemporary Literature. Study of selected works, a specific author, genre, period or topic from 1945 to the present. Texts will be analyzed and placed in the context of literary, cultural and political trends.

Mr. Stephan

262. Seminar in Germanic Folklore. Detailed research on individual aspects of Germanic folklore. The topic selected will generally be drawn from the course in the German 240-series that preceded the seminar. Emphasis on problems of theory and method.

Mr. Ward

263. Seminar in Theories of Literature. Specialization on literary theories such as Rezeptionsästhetik, Neo-Marxist criticism, New Criticism, psychology or sociological literature, structuralism, semiotics and hermeneutics.

Mr. Bahr, Mr. Bauml

Professional Courses in Teaching Methods

370. The Teaching of German in Secondary Schools. Lecture, three hours per week and discussion periods. Prerequisite: Graduate Standing or consent of instructor. Required of all candidates for the general secondary credential in German.

495A-495B. Preparation for College Teaching of German. (1 course each) Two-quarter sequence. Study of problems and methods in teaching German on the college level. Theory and classroom practice, observation and critical evaluation. Credit only on completion of 495B. May not be used to fulfill any of the course requirements for the Master's Degree. This course is offered on an In-Progress basis, which requires students to complete the full 2-quarter sequence at the end of which time a grade is given for all quarters of work. S/U grading.

Mr. Jedan

Individual Study and Research

596. Directed Individual Study or Research. To be arranged with the member of the faculty who will direct the study or research. The member of the faculty directing the study will be identified by a two-letter code using the initials of the sponsoring instructor (see department for code). To be graded on S/U basis. May be taken twice. Only one course in the 500 series may count toward the M.A. requirement.

The Staff

597. Preparation for Comprehensive Examination for the Master's Degree or the Qualifying Examination for the Ph.D. To be arranged with the member of the faculty who will direct the study. The member of the faculty directing the study will be identified by a two-letter code using the initials of the sponsoring instructor (see department for code). To be graded on S/U basis. May be taken only once before and only once after the M.A. degree. Only one course in the 500 series may count toward the M.A. graduate course requirement. The Staff

598. Research for Preparation of Master's Thesis. To be arranged with the member of the faculty who will direct the study. The member of the faculty directing the study will be identified by a two-letter code using the initials of the sponsoring instructor (see department for code). To be graded on S/U basis. May be taken unlimited number of times. To be arranged with the member of the faculty who will direct the study. Each faculty member has his own doctoral research course identified by a two-letter code using his initials.

The Staff

599. Research for Preparation of the Doctoral Dissertation. (1 to 2 courses) To be graded on S/U basis. May be taken unlimited number of times. To be arranged with the member of the faculty who will direct the study. Each faculty member has his own doctoral research course identified by a two-letter code using his initials.

The Staff

Dutch-Flemish and Afrikaans

120. Introduction to Dutch Studies.

131. Introduction to Modern Dutch Literature.

135. Introduction to Afrikaans Literature.

199. Special Studies in Dutch-Flemish and Afrikaans. (1 to 1 course)

234. The Structure of Modern Standard Dutch. A detailed examination, from contrasting theoretical viewpoints, of central problems in Dutch phonology, grammar, and semantics with attention to related phenomena in German, English, and Afrikaans. This course is equivalent to Linguistics 225.

Mr. Kirnser

Hindi

120A-120B. Readings in Hindi.

120C. Readings in Hindi Literature.

121A-121B. Survey of Hindi Literature in Translation.

130. Hindi Civilization and Culture.

M135. Hindi Folklore and Mythology.

M136. Folklore and Mythology of the Ugric Peoples.

199. Special Studies in Hindi. (1 to 1 course)

Yiddish

131. Modern Yiddish Poetry.

131B. Modern Yiddish Prose and Drama.

199. Special Studies in Yiddish. (1 to 1 course)

596. Directed Individual Study or Research in Yiddish. To be arranged with the member of the faculty who will direct the study or research. The member of the faculty directing the study will be identified by a two-letter code using the initials of the sponsoring instructor (see department for code). To be graded on S/U basis. May be taken twice.

Ms. Hadda

Scandinavian Section

(Department of Germanic Languages)

Kenneth G. Chapman, Ph.D., Professor of Scandinavian Languages.

Ross P. Shidefer, Ph.D., Professor of Scandinavian Languages and Comparative Literature.

Erik Wahlgren, Ph.D., Emeritus Professor of Scandinavian and Germanic Languages.

James R. Massenga, Ph.D., Associate Professor of Scandinavian Languages.

Mary Kay Nosseong, Ph.D., Associate Professor of Scandinavian Languages. (Vice Chair of the Department)

Jesse L. Byock, Ph.D., Assistant Professor of Scandinavian Languages.

The Master of Arts Degree in Scandinavian Languages

Admission Requirements. In addition to the University minimum requirements, prospective students in the M.A. program in Scandinavian Languages must have an undergraduate major in Scandinavian, or the equivalent. If the candidate is deficient in the undergraduate major, he or she must complete it by taking the appropriate courses as recommended by the Graduate Adviser. A placement examination in the Scandinavian languages, as well as in German, may be required of entering graduate students.

Three letters of recommendation are required by the Graduate Division.

Write to the Scandinavian Section, Department of Germanic Languages, UCLA, Los Angeles, California 90024 for a brochure describing the program and requirements. No special application form is required, other than that issued by the Graduate Division.
Advising. Graduate Adviser: A member of the Scandinavian Section, Royce Hall 332. Telephone: (213) 825-2432.

Students in the M.A. program in Scandinavian should meet with the Graduate Adviser each quarter. Through these meetings, the Graduate Adviser keeps both the student and the other members of the Department informed of their progress. The adviser keeps records of these interviews, whenever deemed necessary, in the student’s file. There are no Section guidance committees for M.A. candidates.

Admission to Master’s Program. This is synonymous with graduate admission. Specific courses are required only in cases where entering graduate students have deficiencies in their undergraduate preparation.

Major Fields or Subdisciplines. There are no clear major fields or subdisciplines in the M.A. program in Scandinavian, but students may emphasize either literary or linguistic studies in consultation with the Graduate Adviser.

Foreign Language Requirement. A reading knowledge of French or German is required (in addition, of course, to a knowledge of the Scandinavian languages). Students must pass the GSFLT (Graduate School Foreign Language Test) reading examination in French or German with a score of 500 or better, or must pass at least one upper division course in French or German.

Course Requirements. A total of 12 courses is required for the M.A. degree. These include a minimum of nine upper division and graduate courses in Scandinavian at least five of which must be graduate courses. In addition, three courses on the upper division or graduate level must be taken in a related field of linguistic or literary study to be determined in consultation with the Graduate Adviser in Scandinavian. At least one of these three courses in a related field must be on the graduate level. Comparative Literature 200 or an equivalent course in literary or linguistic methodology is required as one of these three outside courses. A knowledge of Old Icelandic equivalent to courses 151 and 152 will be required of all candidates for the M.A. in Scandinavian.

Thesis Plan. There is no thesis plan in the M.A. program in Scandinavian.

Comprehensive Examination Plan. A Comprehensive Examination, based on the required coursework and a reading list, will be required of all candidates for the M.A. degree in Scandinavian. The examination is given whenever the candidate has completed the course requirements and feels prepared to be examined on both the coursework and the reading list.

The Scandinavian Section as a whole serves as the comprehensive examination committee. All members of the Section in residence participate in the conducting of the examination, which is both written and oral. Students who fail the Comprehensive Examination may be reexamined once without petitioning.

Time to Degree. For a full-time student with no deficiencies upon admission to graduate status, completion of coursework and examinations for the M.A. in Scandinavian usually requires six quarters of standard course load.

500 Series Course Limitations

Teaching Experience. No teaching experience is required for the M.A. degree.

Disqualification and Appeal of Disqualification. Specific conditions which may lead to termination of graduate status are: failure to maintain a B average; C work in Scandinavian courses; or failing the M.A. written or oral examination. A final decision about dismissal is made by the Scandinavian faculty in residence. Students may appeal such a decision by submitting to the Vice Chair a petition outlining any extraordinary circumstances.

For the Ph.D. degree in Germanic Languages with Scandinavian Literature and Philology as a Major or Minor Field, See the Doctoral Program in Germanic Languages.

**Graduate Courses**

210. History and Description of the Scandinavian Languages. Prerequisites: Graduate Status, course 152 or equivalent and a thorough knowledge of one or more Scandinavian languages. Description of the Scandinavian languages and their development from the oldest period to the present. Emphasis will be placed on the relationship of the several Scandinavian languages to each other and to the other Germanic languages.

Mr. Chapman

221. Advanced Old Icelandic Prose. Prerequisite: course 152 or equivalent. Readings in advanced literary texts in Old Icelandic.

Mr. Byock, Mr. Chapman

222. Advanced Old Icelandic Poetry. Prerequisite: course 152 or equivalent. Readings in advanced poetic texts, Eddic and Skaldic.

Mr. Byock, Mr. Chapman

M245. Germanic and Scandinavian Mythology. (Same as German M245A.) Prerequisite: knowledge of German or a Scandinavian language, or consent of instructor. A study of northern myths and religion through a close reading of the Eddic texts and secondary sources.

Mr. Byock

251. Henrik Ibsen. Prerequisite: an advanced knowledge of Norwegian and consent of instructor. Intensive study of the works of Ibsen.

Ms. Norseng

Mr. Massengale

396 courses (12 units) may apply toward the total course requirement, but only one (4 units) may apply toward the minimum graduate course requirement.

C253. Soren Kierkegaard. Prerequisites: an advanced knowledge of Danish and consent of instructor. Intensive study of the works of Kierkegaard. May be concurrently scheduled with C146. Mr. Massengale

C254. Knut Hamsun. Prerequisites: an advanced knowledge of Norwegian and consent of instructor. Intensive study of the works of Hamsun. May be concurrently scheduled with C147.

C263. Seminar in Scandinavian Studies. Prerequisite: Graduate Standing or permission of instructor. Knowledge of a Scandinavian language is required. Intensive study of selected aspects of Scandinavian society based on readings in the literature as well as other documentary material. Course may be taken more than once if the graduate adviser determines that the course content is significantly different. May be concurrently scheduled with C180.

Individual Study and Research

596. Directed Individual Study or Research. To be arranged with the member of the faculty who will direct the study or research. To be graded on S/U basis. May be taken three times. Three 596 courses (twelve units) may apply toward the total course requirement, but only one (four units) may apply toward the minimum graduate course requirement.

597. Preparation for the Qualifying Examination for the Ph.D. (1 to 2 courses) To be arranged with the member of the faculty who will direct the study or research. To be graded on S/U basis. May be taken three times.

599. Research for Preparation of the Doctoral Dissertation. To be arranged with the member of the faculty who will direct the study. To be graded on S/U basis. May be taken unlimited number of times.

History

(Office of the Registrar, 6265 Bunche Hall)

Robert L. Benson, Ph.D., Professor of History.
Kees W. Behle, Ph.D., Professor of History.
John G. Burke, Ph.D., Professor of History.
E. Bradford Burns, Ph.D., Professor of History.
Robert I. Burns, S.J., Ph.D., Professor of History.
Robert N. Burt, Ph.D., Professor of History.
Moritmer H. Chambers, Jr., Ph.D., Professor of History.
Claus-Peter Claussen, Ph.D., Professor of History.
Stanley Cohen, Ph.D., Professor of History.
Robert Dalek, Ph.D., Professor of History.
Christopher Ehret, Ph.D., Professor of History.
Amos Funkenstein, Ph.D., Professor of History.
John S. Galbraith, Ph.D., Professor of History.
Frank O. Gatiell, Ph.D., Professor of History.

Richard Hovannisian, Ph.D., Professor of History.
Daniel W. Howe, Ph.D., Professor of History (Vice-Chair of the Department).
Norris C. Hushley, Ph.D., Professor of History.
Nikki Keddie, Ph.D., Professor of History.
Barclark Krekic, Ph.D., Professor of History.
John H.M. Laslett, D.Phil., Professor of History.
James Lockhart, Ph.D., Professor of History.
The Master of Arts Degree

Admission Requirements. For admission to graduate status in the Department of History, a student should normally have completed the undergraduate major or its equivalent; have received a Bachelor of Arts degree or its equivalent from an accredited college or university; and have maintained at least a B plus average for upper division work. The applicant must have three letters of recommendation and the scores of the Aptitude Test of the Graduate Record Examination submitted to the Department (Note: the United States field requires GRE scores on both the Aptitude and Advanced Tests). Students not meeting the grade average requirements may be admitted in exceptional cases if their letters of recommendation, their Graduate Record Examination scores, or other factors indicate unusual promise. Students may be admitted with subject deficiencies, but such deficiencies must be removed by completing courses in addition to the requirements for an advanced degree program. Applicants with a year or more of graduate study at other institutions should have attained a grade point average of 3.50 or better (on a 4.0 scale) if they wish to work toward the M.A. degree. Admission to the Department depends upon the number of openings in the field in which the applicant expects to specialize. Applications should be submitted before December 30; notification will be made on or before May 1. Except for extraordinary cases, students are expected to begin their graduate work in the Fall Quarter. The Department has no separate application form, but uses the general University form distributed by the Graduate Admissions Office. Departmental information may be obtained by writing to Mrs. Barbara Kelley, Graduate Adviser.

Advising. Address: Mrs. Barbara Kelley, Graduate Office—Department of History, 6273 Bunche Hall.

A Guide to Graduate Study in History which explains the requirements and procedures of the History graduate program is mailed to all new graduate students who have filed an “Intent to Register” (prior to registration). The Guide lists all faculty, their major publications and descriptions of courses offered during the year. During registration week, an orientation program is held for entering graduate students. The requirements for degrees and criteria, standards and procedures regarding progress toward the degrees are discussed.
sian or Spanish is required. For other languages, certification is required by the department teaching the language according to that department's standards. Students of United States History may fulfill the foreign language requirement by passing a departmentally-administered translation examination in French, Spanish or German.

**Course Requirements.** The Department requires a minimum (and preferably a maximum) of nine upper division and graduate courses in history, at least six of which must be graduate courses. No course in the 300 series may be counted toward this requirement and only one in the 500 series. For students in United States History, a minimum of seven of the nine courses must be at the 200 level, including at least one 2-quarter seminar and History 245. Students in European History must include History 225, and Africanists must take History 275.

**Thesis or Comprehensive Examination Plan.** The Department follows the Comprehensive Examination Plan (see "Thesis or Comprehensive Examination" in DEGREES AND REQUIREMENTS section of the Catalog). Individual fields specify fulfillment of the examination requirement by one of the following: (1) a 3-hour written examination designed to assess the candidate's ability to synthesize a broad field of knowledge, or (2) the submission of three essays written for at least two different professors as part of the candidate's program of study. At least two of these papers must have been submitted for graduate courses in the 200 series. Students in the United States field must submit the paper from the 2-quarter research seminar in United States History.

In the Spring Quarter of each academic year, each field meets to determine which of the Comprehensive Examination options it wishes to adopt for the following academic year. In consultation with the faculty in each field, the Chairperson of the Department then appoints a field M.A. committee, which consists of at least three faculty members, to administer the Comprehensive Examination for that year.

Field examiners administer the M.A. Comprehensive Examinations in November, March and May of each academic year, considering the candidate's examination in relation to course evaluations filed by professors for all graduate courses taken by the candidate. To complete the examination file, an evaluation of the candidate's potential must be forwarded to the Field Examining Committee by the professor whom the candidate would like to become chairperson of the doctoral committee. The committee will recommend the following examination results: Pass to Continue; Pass Subject to Reevaluation; Terminal Pass; Fail. In cases where the M.A. is awarded with "Pass Subject to Reevaluation", the field M.A. committee will conduct a special reevaluation of the candidate's progress after not more than an additional three quarters of study.

Only in exceptional cases are oral examinations required for the M.A. degree.

**Time to Degree.** Completion of the master's degree at UCLA is designed to meet requirements for admission to the Department's doctoral program. Students are advised to pace their master's degree over a 2-year period, completing requirements within six quarters of full-time study. The Department will recommend to the Dean of the Graduate Division that students who do not complete the master's degree in six quarters be dropped from departmental rolls automatically unless upon petition the Graduate Guidance Committee grants an extension of time.

**500 Series Course Limitations.**

<table>

</tbody>
</table>

Only one 500 series course may be included toward both the 9-course total course requirement and towards the minimum 6-graduate (200 series) course requirement. This could be either 4 units of 596 or 4 units of 597.

**Teaching Experience.** Teaching experience is not a requirement for the master's degree.

**Disqualification and Appeal of Disqualification.** A student may be dismissed at the end of the first year of graduate work if the Graduate Guidance Committee determines (after consultation with faculty in the student's field of study) that the student does not have the academic qualifications for successfully completing an advanced degree. If a student falls below a 3.0 average because of incomplete grades which lapse to F, the student is given an opportunity to remove the F(s) within a specified period before any action for dismissal is taken. A student may appeal any action taken by the Graduate Guidance Committee by presenting his/her case to the Department's Advisory Committee. If evidence is presented which results in a favorable decision for the student's continuation to the Ph.D., the student may then complete the requirements for the M.A. degree and continuation to the Ph.D., contingent upon the results of the M.A. Comprehensive Examination. Graduate students are rarely dismissed prior to taking the M.A. Comprehensive Examination, but a small percentage of students do receive a "terminal M.A." This decision, which is made by the M.A. field committee, may be appealed to the Graduate Guidance Committee. If the student who receives a "terminal M.A." wants to continue to the Ph.D. and can find a faculty member willing to sponsor him/her in a doctoral program, the student may be given a year of probationary status to demonstrate his/her ability to proceed to the Ph.D. degree.

Students who fail to proceed according to "normal progress" stipulations are subject to dismissal, but every opportunity is given a student to petition for extensions of time limitations if extenuating circumstances prevent his/her meeting specified deadlines.

**Other Relevant Information.** No field work or internship is required for the M.A. A departmental brochure describing the graduate History program in some detail is available in the Graduate Adviser's Office (6273 Bunche Hall) to any interested student.

A concurrent master's program with the Graduate School of Library and Information Science has been approved. Students who wish to receive the M.A. in History and the M.L.S. in three years may apply for this program. Applications for admission will be reviewed by committees in the Department of History and the Graduate School of Library and Information Science, and a course of study for the program will be published in the near future. Further information may be obtained by writing to the Department of History or the Graduate School of Library and Information Science.

**The Ph.D. Degree**

**Admission Requirements.** Admission requirements for the Ph.D. program are the same as those for the M.A., but applicants for the doctorate are urged to seek an interview or to correspond with a member of the History faculty in the field in which they intend to work. Students may be admitted with subject deficiencies, but such deficiencies must be removed by completing courses in addition to the requirements for an advanced degree.

**Advising.** Address: Mrs. Barbara Kelley, Graduate Adviser, Department of History, 6273 Bunche Hall.

A Guide to Graduate Study in History which explains the requirements and procedures of the History graduate program is mailed to all new graduate students who have filed an "Intent to Register" (prior to registration). The Guide lists all faculty with their major publications and descriptions of courses offered during the year.

During registration week, an orientation program is held for entering graduate students. The requirements for degrees, criteria, and standards and procedures regarding progress toward the degrees are discussed.

For academic counseling, a student chooses a faculty sponsor who chairs the doctoral committee and guides the student in his/her Ph.D. program.
There is a Graduate Guidance Committee consisting of five faculty members and one graduate student appointed by the Chairperson of the Department, which reviews and makes recommendations regarding all doctoral programs and any petitions requesting variations from the program as described in the catalog. The Graduate Adviser is an ex officio member of this committee and channels all petitions and programs for review to the Graduate Guidance Committee. The student’s chairperson is normally consulted about petitions and variances.

At the end of each quarter, course evaluations are written by professors for each graduate student. Students are asked to read these evaluations in the Graduate Office where they may discuss the evaluations if there are questions.

An annual review of all graduate students is made each Spring Quarter by the Graduate Guidance Committee. Letters are written to those students with program or grade point deficiencies.

Students are encouraged to consult the Graduate Adviser, a full-time staff member, about requirements and procedures for progress towards the Ph.D. degree. The Graduate Adviser approves study lists at the beginning of each quarter.

**Admission to the Doctoral Program.** While no examination is required for admission to a Ph.D. program, the following evaluation procedures determine a student’s continuance to the Ph.D. degree.

For the student who enters the graduate program with only a B.A. degree, an evaluation comparable to the M.A. Comprehensive Examination must occur within the period of six quarters.

For the student who enters with a master’s degree from another department, evaluation must be completed by the end of three quarters of study in the History Department in order to determine whether or not he/she will be permitted to continue toward the Ph.D. This evaluation will be conducted in the same manner as described under the M.A. program, except that for some candidates the written examination may be waived at the discretion of the field examination committee.

All candidates must present to the Graduate Guidance Committee a field approval form signed by the faculty member who has agreed to sponsor his/her work for the Ph.D. according to the following schedule; by the end of the seventh quarter or earlier for students entering with only a B.A.; and by the end of the third quarter or earlier for student entering with an M.A. from another department. For a description of fields for the Ph.D. degree, see **Written and Oral Qualifying Examinations** below. Students who do not meet time limits for proceeding to the Ph.D. will be dropped from the departmental rolls automatically, unless the Graduate Guidance Committee extends their time limits by petition.

**Major Fields or Subdisciplines.** Ancient Greece; Ancient Rome; Medieval Constitutional and Legal; Medieval Social and Economic; Medieval Ecclesiastical and Religious; Medieval Intellectual and Cultural; Byzantine; Russian Since 862; Southeast Europe (Balkans); England, 1485-1763; England since 1763; the British Empire; The Near East, 500-1500; The Near East Since 1500; Ancient Near East; Armenian; Survey of African History; Topics in African History (preferably on a regional basis); History of Science to 1600; History of Science Since 1600; Europe, Renaissance-Reformation; Europe, Renaissance to the French Revolution; Europe Since 1740; European Socio-Economic History; European Intellectual and Cultural History; Psychohistory; China 900-1800; China Since 1800; Modern Japan; South Asia; Southeast Asia; Latin America, 1492-1830; Latin America Since 1759; History of Religions; Jewish History; Comparative History; United States: (1) Mastery of the general field of United States History sufficient to teach a college level survey course and (2) A specialized field chosen from the following: Afro-American, American Diplomatic, American West, American Indian, Canadian, Ante-Belgium and History of the South, Civil War and Reconstruction, Colonial, Cultural, Economic, Immigration, Intellectual, Jeffersonian and Jacksonian American (1800-1850), Labor, Mexican-American, Social, The New Nation (1765-1800), 20th Century, Urban, Women’s History. Both the general and a specialized field must be offered by specialists in United States History and only two fields in United States History are permitted. Either (1) or (2) or both may be chosen as minor fields for the Ph.D.

In addition to the European fields listed above, a program in European Intellectual and Cultural History may be offered. Candidates working toward a doctorate in this program must offer fields in: (1) the socio-political history of Modern Europe, (2) intellectual history, (3) one other area of study (such as medieval, ancient, or a given national history, etc.), and normally, (4) one field in some discipline outside the Department such as philosophy, literary criticism, psychology, linguistics, sociology of knowledge or art history. Students working in the earlier period (16th-18th centuries) must demonstrate minimal competency in Latin as well as in two modern European languages.

Candidates offering a field in Comparative History as a fourth field for the Ph.D. degree should choose a topic for comparison which would usually, but not necessarily, coincide with time-area spans of the other three fields defined for Ph.D. Qualifying Examinations. Each candidate offering a field in Comparative History will be required to submit a special written statement defining his or her particular field of study which must be approved by the candidate’s proposed doctoral committee before petitioning the Graduate Guidance Committee for approval of the doctoral committee and four fields of examination.

Candidates in the history of science program must select three of the above fields and either the history of medicine or an allied field referred to below. The candidates must also demonstrate a detailed knowledge of the substance and historical development of a particular science, or of a type of engineering or technology, as a subfield common to the historical fields.

**Foreign Language Requirement.** A reading knowledge of the languages prescribed below for the major fields is required. If only two languages are prescribed, the student will display his/her competence in them by passing examinations administered by the Educational Testing Service (a score of 500 on the GSFLT for French, German, Russian and Spanish) or the appropriate language department. For a third or fourth languages, evidence of competence satisfactory to the chairperson of the doctoral committee will be considered acceptable.

Every student is urged, when possible and practical, to take a Graduate School Foreign Language Test before entering the Department’s graduate program as an effort toward fulfilling the foreign language requirements as quickly as possible. No Oral Qualifying Examination for the Ph.D. may be scheduled until the student has passed an examination, in at least two foreign languages, except for students in United States History, where only one foreign language is required. Students of United States History may fulfill the foreign language requirement by passing a departmentally administered translation examination in French, Spanish or German.

1. African History. French and at least one other European or African language needed for the student’s research and approved by the chairperson of the Ph.D. committee.
2. Ancient History. French, German, Latin and Greek.
3. Ancient Near East, French, German and two ancient languages, one of which should be either Akkadian, Egyptian or Hebrew. The other ancient language may be Sumerian, Hittite, Ugaritic, Phoenician, Aramaic, Greek or Latin, depending on individual programs. It is expected that the ancient languages, with all attendant problems of philological and textual criticism, will normally constitute the fourth field of the doctoral examination.
4. Armenian History. Armenian, French, and an additional language or languages deemed necessary for the research to be undertaken. Students specializing in the Ancient and Medieval periods will be encouraged to prepare in Greek and/or Latin, while students specializing in the Modern period will be encouraged to prepare in Turkish and/or Russian.
5. Asian History. (a) India: three languages chosen from the following: French and/or German, Dutch or Portuguese, plus Hindi and/or...
one classical or modern regional language of India; (b) East Asia: 1) for the M.A. degree: two years of Chinese or Japanese, or one European language certified by a GSFLT score of 500 or better; 2) for the Ph.D. degree in Chinese history: French or German or Russian plus Chinese and Japanese; for the Ph.D. degree in Japanese history: French and either German or Dutch plus Japanese. Admission to candidacy for the Ph.D. in the Chinese and Japanese fields requires the completion of a research seminar in the major field. Students are advised that successful completion of this seminar usually requires the equivalent of at least four years of superior college level language work in Chinese or Japanese.

6. British History. French and German, with the possibility of substitution.

7. European History (Modern) and History of Science. Either French or German and a language needed by the student in his/her research and approved by the Graduate Guidance Committee.

8. Jewish History. Hebrew plus another European language or Arabic.

9. Latin American History. Two of the following: Spanish, Portuguese or special methodological studies.

10. Medieval History. French and German for all candidates; in addition, Greek for those specializing in Byzantine history and Latin for those specializing in Western medieval history. Students are expected to have French or German at the beginning of their graduate studies.

11. Near Eastern History. Two Western and one Near Eastern languages, to be selected on the basis of the candidate's specialization. The two Western languages will generally be French and German, but Russian may be substituted for one of those in certain cases. Competence in all three foreign languages must be proven by passing examinations administered by the relevant department or GSFLT.

12. History of Religions. French and German plus (in most cases) a classical or ancient language in the religious tradition of the specialization.

13. Russian History. Russian and German as well as French or another language deemed necessary by the instructor for the candidate's research.

14. Southeast Asia. Two languages; one chosen from the following: French, Dutch or Spanish and one of the languages of the area.

15. United States History. One modern foreign language to be fulfilled through a departmentally-administered reading exam or a score of 500 on the GSFLT.

Except in the fields of African, Asian, British and United States History, reading knowledge of an appropriate language is usually required for admission to all graduate seminars.

Course Requirements. A candidate for the degree of Doctor of Philosophy in history must meet (a) the Special Requirements for Admission to the Doctoral Program listed above; and (b) the general requirements set forth under the Graduate Division. Attention is directed to the requirement that a program, extending over the full time of study, must be approved by the Department. A command of good English, spoken and written, the ability to read at least two foreign languages (except for the field of United States History where only one foreign language is required), and an acquaintance with general history are expected of all candidates. The candidate is required to complete at least one continuing 2 or 3-quarter seminar or, alternatively in certain fields, a sequence of directed study courses as approved by the Graduate Guidance Committee. Students of United States History should complete History 245 and in addition to the seminar should write a dissertation prospectus (which could be written for credit as a History 596 or 597) expected to contain: a) a full statement of the dissertation topic; b) an historiographical discussion of the literature bearing on the topic; c) a statement of the methodology to be employed; and d) a survey of the sources sufficient to demonstrate the viability of the topic. The prospectus must be submitted in writing and approved by the dissertation adviser prior to the oral part of the Qualifying Examinations. After approval, copies will be given to each member of the examining committee. Students of European History must complete History 225 and students of African History must complete 275 unless exempted by special petition. Faculty serving on doctoral committees may require such courses as they deem necessary for preparation for Qualifying Examinations. Courses taken to fulfill M.A. degree requirements may also be used to satisfy Ph.D. requirements.

Written and Oral Qualifying Examinations. Before admission to candidacy, students must pass oral and written examinations. In these examinations, students are expected to show not only a mastery of their special subject but also an adequate grasp of the wider field of historical knowledge and an ability to correlate historical data and to explain their significance. These examinations are designed to test not merely factual knowledge but also powers of historical analysis and synthesis, critical ability, and capacity for reflective thinking. A knowledge of the history of any area includes a reasonable knowledge of its historiography and bibliography; of its geography; and of its political, cultural, economic, and other historical aspects.

In the oral examination the candidate is to be examined in four fields, one of which may be an approved field in anthropology, economics, geography, language and literature, philosophy, political science, or other allied subjects. This allied field must be comparable in size and scope to the history fields listed above. The candidate should select the fields in consultation with his/her faculty sponsor and must receive the Department's approval of all four fields not less than six months before the Written Qualifying Examination is taken. To obtain this approval, the student should supply the Graduate Guidance Committee with the name of the faculty member who has agreed to serve as the sponsor of the doctoral work and with the details of the proposed program. A full-time graduate student must begin the Written Qualifying Examinations not later than the end of the ninth quarter of graduate work. (See Time to Degree listed below.)

The Written Qualifying Examination includes the major field only. The oral examination will cover all four fields and will normally be held shortly after the written examination, but at the discretion of the doctoral committee it may be held as late as six months after the written examination. Both the written and oral examinations are to be considered by the committee as a whole in arriving at a judgment of the student's performance. The Written Qualifying Examination is normally prepared and administered by the chairperson of the student's doctoral committee and read by the entire committee before the Oral Qualifying Examination.

The Written Qualifying Examination must be passed before the Oral Qualifying Examination can be taken. The members of the doctoral committee determine whether or not an examination may be repeated (normally only once), based on their prognosis of the candidate's potential for successfully completing both the written and oral examinations within a specified period of time to be designated by the doctoral committee, but not to exceed one calendar year.

For students in United States History, the written Ph.D. examination will be administered twice a year, in May and November, and will be composed of questions solicited from faculty in the whole field of United States History. A committee of three faculty members in United States History will make up and read the examinations for all students taking the examination during the academic year. The examination is intended to test a comprehensive, broad understanding of American history both before and after the independence of the United States. All facets of history (political, social, diplomatic, etc.) are included. An ability to synthesize factual information, sometimes across long chronological periods, is consequently essential. Knowledge of the scholarly literature and of the principal historiographical controversies arising out of it are tested along with the examinee's own interpretive capabilities. Passing of the examination implies that the ex-
aminee is qualified, in the judgment of the United States Field, to teach courses in United States History at the college level. Questions relating to the planning of such courses may appear on the examination. The written examination, if failed, must be retaken at the next administration of the examination; if a student fails the oral examination he/she must retake it at a time specified by the doctoral committee but not to exceed six months. Any variance from these time limits must be approved by the American Field before going to the Graduate Guidance Committee for final approval.

**Doctoral Committee.** Constitution of doctoral committees conforms to the Graduate Council specifications.

**Time to Degree.** Normal progress toward the Ph.D. has been established as follows:

1. From admission to graduate status to evaluation for continuance to Ph.D.:
   - For students entering with only the B.A. degree, six quarters maximum (including award of the M.A.).
   - For students entering with M.A. from another department, three quarters maximum.
2. From graduate admission to the Written and Oral Qualifying Examinations, maximum nine quarters.
3. From Qualifying Examinations (and approval of dissertation prospectus) to submission of dissertation and award of degree, 11 quarters.

**Final Oral Examination.** If required by the qualifying examination committee, a Final Oral Examination will be conducted upon completion of the dissertation to cover the field within which the dissertation falls. The candidates will be expected to show a mastery of their special fields, and such an acquaintance with the literature, general and special, bearing on them as would qualify them to give instruction to literate students. After approving a dissertation, the chairperson of the doctoral committee may, with the unanimous consent of the entire committee, recommend a waiver of the Final Oral Examination.

**Candidate in Philosophy Degree.** Students are eligible for the Candidate in Philosophy degree on advancement to candidacy for the Ph.D.

**Teaching Experience.** The Department cannot provide teaching experience for all Ph.D. candidates and cannot therefore require it for the degree. Candidates should, however, be able to demonstrate ability to give instruction in their fields.

**Disqualification and Appeal of Disqualification.** The disqualification and appeal procedure for the Ph.D. up to the Qualifying Examinations is the same as for the M.A. degree.

A Ph.D. candidate is expected to complete a dissertation within 18 quarters of the date of entry into the graduate program for United States, Modern Europe, England, British Empire, Science, and Psychohistory and within 21 quarters of the date of entry into the graduate program for all other fields. Candidates may be granted a 1-year extension of time upon petitioning the Graduate Guidance Committee and showing evidence that the dissertation can be completed within one additional year. Further extensions are considered on an individual basis, taking into consideration the extent and type of research required, availability of source material, and other sometimes personal factors which may cause delays. It is the student's responsibility to keep both his/her chairperson and the graduate office advised of progress (or lack thereof) and estimated completion dates. Students may be dropped from the program after 21 quarters if there has been no communication with the Department after the Oral Qualifying Examinations.

Students who fail to proceed according to "Normal Progress" stipulations (as defined above) are subject to dismissal, but every opportunity is given a student to petition for extensions of time limitations if extenuating circumstances prevent his/her meeting specified deadlines.

**Other Relevant Information**

**Dissertation** — Candidates are required to present a dissertation on a subject of their choice of such character as to show a thorough mastery of the sources of information, the ability to carry on independent research, and to communicate its results in good literary form. In lieu of the customary type of dissertation, a student may in certain cases edit, or translate and edit, some historical source. Such a project involves careful textual criticism, explanatory annotations, and an historical introduction clearly showing the contribution of the source to historical knowledge. The nature and topic of a dissertation may require field research. This is the case especially in fields such as Armenian/Near Eastern, African, Latin American, East Asian, and frequently European History.

A departmental brochure describing the graduate History program in some detail is available in the Graduate Adviser's Office (6273 Bunche Hall) to any interested student.

**Graduate Courses**

Admission to all graduate courses is subject to the instructor's approval and to appropriate language qualifications. For multi-term courses, credit and grades will be given only on completion of the full seminar sequence, with IP grading until the last term unless otherwise noted. Topics courses and seminars may be repeated.

**Contents**

200-203 General History
204-214 Near and Middle East
215-224 Ancient and Medieval
225-244 Europe
245-264 United States
265-274 Latin America
275-281 Africa
282-290 Asia
291-292 Jewish
293 Religion
295-297 Science
495-599 Individual Study and Research

**200A-200U. Advanced Historiography.** (Formerly numbered 230A-230T). A. Ancient Greece; B. Ancient Rome; C. Medieval; D. Early Modern Europe; E. Modern Europe; F. Russia; Eastern Europe; G. Britain; H. United States; I. Latin America; J. Near East; K. India; L. China; M. Japan; N. Africa; O. Science/Technology; P. History of Religion; Q. Theory of History; R. Jewish History; S. Armenia and the Caucasus; T. Southeast Asia; U. Psychohistory. May be repeated for credit.

**201A-201U. Topics in History.** (Formerly numbered 240A-240T). A through U as for 200. A graduate course involving reading, lecturing, and discussion of selected topics. This course does not fulfill the seminar requirements for the Ph.D. degree. May be repeated for credit. When offered jointly with 197, undergraduates need instructor's consent to enroll.

203. Topics in Comparative History. (Formerly numbered 2402). Prerequisite: consent of instructor. Course will be in the general format of the 201 (Topics) series. Possible topics that it might cover would be study of European expansion and its impact on non-European societies; the American Revolution in an international perspective, etc. The Staff

204A-204B. Seminar in Near and Middle Eastern History. (Formerly numbered 267A-267B). Methodology, socio-economic and political change in the Arab world. The Staff

205A-205B. Seminar in Medieval Middle Eastern History. (Formerly numbered 291A-291B). Mr. Morony

206A-206B. Seminar in the Social History of the Middle East. (Formerly numbered 284A-284B). The interrelationship of city, tribe, and village in the Middle East; the role of such definable social groups as women, religious classes, middle classes, landlords, tribesmen, and peasants; social change. Ms. Keddie

207. Seminar in Ancient Mesopotamia. (Same as Ancient Near East Languages and Cultures M207). Prerequisites: consent of instructor. Selected topics on the political, social and intellectual history of ancient Mesopotamia, may be repeated for credit. Mr. Duccielli

*For concurrently scheduled courses (*C* prefix) suitably separate activities and/or standards for performance and evaluation will be applied for graduates and undergraduates.

---

Ms. Keddie

M207. Seminar in Ancient Mesopotamia. (Same as Ancient Near East Languages and Cultures M207.) Prerequisites: consent of instructor. Selected topics on the political, social and intellectual history of ancient Mesopotamia, may be repeated for credit. Mr. Duccielli
209A-209B. Seminar in Ottoman and Modern Turkish History. (Formerly numbered 253A-253B).

211A-211B. Seminar in Armenian History. (Formerly numbered 251A-251B). Mr. Hovanissian

C212. Methods in Armenian Oral History. (Formerly numbered 228B). Prerequisite: proficiency in the Armenian Language. Lectures and laboratory in the methods and techniques of oral history and utilization of oral materials and other oral sources for Armenian history. The course will include a project assignment in the field. May be concurrently scheduled with course C112D. 

Mr. Hovanissian

215A-215B. Seminar in Ancient History. (Formerly numbered 250A-250B). Mr. Chambers, Mr. Mellor

216A-216B. Seminar in Byzantine History. (Formerly numbered 252A-252B-252C). Mr. Vryonis

217. Sources and Handbooks of Medieval History. Prerequisite: reading knowledge of German or French. An introduction to types of medieval source materials and the handbooks needed to use them. Mr. Rouse

218. Medieval Latin Literary History. (Formerly numbered 222A-222B). Prerequisites: reading knowledge of Latin and German or French recommended. An examination of aspects of Medieval history through the study of paleography, medieval libraries and the transmission of ancient medieval authors. Mr. Rouse

219A. Paleography I. Prerequisites: reading knowledge of Latin and French or German. A survey of the manuscript book from antiquity through the Carolingian renaissance with emphasis on dating and localization as well as on proficiency in reading. Offered in alternate years. Mr. Rouse

219B. Paleography II. Prerequisites: reading knowledge of Latin and German or French. A history of the manuscript book from the Carolingian renaissance through the invention of printing with emphasis on dating and localization as well as on proficiency in reading. Offered in alternate years. Mr. Rouse

220A-220B. Seminar in Church and Monarchy in the Middle Ages. (Formerly numbered 251A-251B). Textual studies and interpretative problems in the constitutional, legal and intellectual history of the Latin Church and of the Western European monarchies, with special attention to the German monarchy, from the 11th century to the 14th. Mr. Benson

221A-221B. Seminar in Medieval History. (Formerly numbered 253A-253B). Mr. R.I. Burns

222A-222B. Seminar in Medieval Intellectual History and History of Science. (Formerly numbered 278A-278B). Selected problems of medieval and early modern philosophy, science, political theory, theology. Mr. Funkenstein

225. Colloquium for Entering Graduate Students in Modern European History. (Formerly numbered 216). Prerequisite: admission to graduate study in Modern European history. An introduction to the topics, methods, and historiography of Modern European history. Required of all graduate students in Modern European History. The Staff

226A-226B. Seminar in the Italian Renaissance. (Formerly numbered 254A-254B). Mr. Martinez

227A-227B. Seminar in the Reformation. (Formerly numbered 255A-255B). Mr. Clasen

229A-229B. Seminar in Early Modern European History. (Formerly numbered 257A-257B).

Mr. Loewenberg and Staff

231A-231B. Seminar in Modern European Intellectual and Cultural History. (Formerly numbered 229A-229B). Mr. Weber, Mr. Woh

233A-233B. Seminar in Russian History. (Formerly numbered 263A-263B). Mr. Rogger

234A-234B. Seminar in the Modern History of Spain, Portugal, and Italy. (Formerly numbered 262A-262B). Ms. Kaplan, Mr. Wohl

239A-239B. Seminar in English History: Middle Ages. (Formerly numbered 258A-258B).

240A-240B. Seminar in English History: Modern History. (Formerly numbered 259A-259B). Mr. Moore

244A-244B. Seminar in British Empire History. (Formerly numbered 264A-264B). Mr. Galbraith

245. Colloquium in U.S. History. (Formerly numbered 200H). A critical introduction to the historical method, with emphasis on new methodological and conceptual approaches, the use of source materials, and the current state of U.S. historiography. Normally limited to and required of all entering graduate students in U.S. History.

The Staff

246A-246B-246C. Introduction to United States History. A graduate survey of the significant literature dealing with United States history from the colonial period to the present. Each quarter-course may be taken independently and a letter grade will be assigned.

246A. Colonial Period.

246B. 1790-1900.

246C. Twentieth Century.

Mr. Galte, Mr. Howe, Mr. Saxton

246E. Twentieth Century.

Mr. Cohen, Mr. Dallek, Mr. Weiss

247A-247B. Seminar in Early American History. (Formerly numbered 269A-269B). Mr. Nash

249A-249B. Seminar in Jacksonian America. (Formerly numbered 275A-275B). Mr. Galte

250A-250B. Seminar in United States History of the Middle Nineteenth Century. (Formerly numbered 272A-272B).

Mr. Galte, Mr. Howe, Mr. Robinson

252A-252B. Seminar in Recent United States History to 1930. (Formerly numbered 270A-270B).

Mr. Cohen, Mr. Hines

253A-253B. Seminar in Recent United States History since 1930. (Formerly numbered 271A-271B). Mr. Hines, Mr. Weiss

254A-254B. Seminar in United States Social and/or Intellectual History. (Formerly numbered 273A-273B).

Mr. Howe, Mr. Saxton

256A-256B. Seminar in American Diplomatic History. (Formerly numbered 276A-276B). Mr. Dallek

257A-257B. Seminar in United States Urban History. (Formerly numbered 265A-265B).

Mr. Hines, Mr. Monksone

258A-258B. Seminar in Working Class History. (Formerly numbered 288A-288B).

Mr. Laslett, Mr. Dallek

260A-260B. Seminar in Native American History. (Formerly numbered 292A-292B). Mr. Morrison

261A-261B. Seminar in Afro-American History. (Formerly numbered 277A-277B). Social and political history of the African-American including an emphasis on the development and structure of race relations in America, and racial concepts and dilemmas, black and white.

Mr. Hill

262A-262B. Seminar in Chicano History. (Formerly numbered 269A-269B). Mr. Gómez Quiñones

263A-263B. Seminar in the History of the American West. (Formerly numbered 274A-274B). Mr. Hundley

M264. History of American Education. (Formerly numbered 221C). Mr. Westman

This course will include a project assignment in the field. The course will involve analysis, description, illustration and interpretation of an actual educational and/or ethnographic setting. Mr. Westman

M265. Latin American Research Resources. (Formerly numbered M231). (Same as Latin American Studies M200.) The course will acquaint students with general and specialized materials in fields concerned with Latin American Studies. Library research techniques will provide the experience and competency required for future bibliographic and research sophistication as the basis for enhanced research result.

Mr. Lachnath

266A-266B. Seminar in Colonial Latin American History. (Formerly numbered 266G-266H). Mr. Lockhart

267A-267B. Seminar in Latin American History: 19th and 20th Centuries. ( Formerly numbered 266A-266B).

268A-268B. Seminar in Recent Latin American History. (Formerly numbered 266E-266F). Prerequisite: course 167A or 167B or 171 or, or concurrent enrollment in same, or equivalent. Mr. Wilkie

275. Introduction to the Professional Study of African History. (Formerly numbered 212). Required of all entering graduate students in African History. Source identification, research methodologies, historiographical traditions, historical interpretation, and approaches to teaching are examined. Strongly recommended for history concentrators in M.A. African Studies Program.

The Staff

276. African Archaeology-Field Techniques. (½ to 2 courses). (Formerly numbered 221A). Prerequisite: any introductory course in archaeology and preferably an African history course. A field course on an African excavation to provide the basic skills-reconnaissance, surveying, excavation techniques, conservation and scientific sampling required by an archaeologist in Africa together with an introduction to ethnographic survey and oral data collection.

Mr. Posnansky

277. African Archaeology-Data Analysis. (½ to 2 courses). (Formerly numbered 221B). Course 276 (African Archaeology-Field Techniques) must be taken before or in conjunction. A field course to equip a student to handle finds from excavations. The course will involve analysis, description, illustration and interpretation of an actual archaeological and/or ethnographic setting. Mr. Posnansky

278A-278B. Seminar in African History. (Formerly numbered 265A-265B).

Mr. Farquhar, Mr. Huang

285A-285B. Seminar in Modern Japanese History. (Formerly numbered 281A-281B). Mr. Notelher

289A-289B. Seminar in Southeast Asia. (Formerly numbered 280A-280B). Mr. Wolpert

291A-291B. Seminar in Jewish History. (Formerly numbered 268A-268B). Studies in the intellectual and social history of the Jewish people from ancient times to the modern period.

Mr. Funkenstein

293A-293B. Seminar in the History of Religions. (Formerly numbered 282A-282B). Mr. Bole

295. Theories of Scientific Change. (Formerly numbered 227). Prerequisite: consent of instructor. Historical and philosophical perspectives on science focusing upon the rationality of scientific change and the logic and psychology of scientific discovery. Readings and seminar-style discussions of such authors as: Popper, Kuhn, Toilim, Lakatos, Holton, Buchdahl, Feyrebad and others. Mr. Westman

297A-297B. Seminar in the History of Science. (Formerly numbered 256A-256B). Mr. Burke, Mr. Westman, Mr. Wise
Indo-European Studies

(Interdepartmental)

Raimo A. Anttila, Ph.D., Professor of Indo-European and General Linguistics.
Henrik Birnbaum, Ph.D., Professor of Slavic Languages.
Patrick K. Ford, Ph.D., Associate Professor of Celtic Studies (Chairman of the IES Committee).
Manja Gimbutas, Ph.D., Professor of European Archaeology (Department of Slavic Languages).
Bengt T. M. Löfstedt, Ph.D., Professor of Classics.
Jaan Puhvel, Ph.D., Professor of Classics and Indo-European Studies.
Hartmut Scharfe, Ph.D., Professor of Indic Studies (Department of Oriental Languages).
Hannes-Peter Schmidt, Ph.D., Professor of Indo-Iranian Studies (Department of Near Eastern Languages).
Donald J. Ward, Ph.D., Professor of Folklore and German.
Terence H. Wilbur, Ph.D., Professor of Germanic Linguistics and Philology.
Joseph F. Nagy, Ph.D., Assistant Professor of English.

The Ph.D. Degree

Admission Requirements. Students admitted to graduate status must have an A.B. degree with a major in an Indo-European language field (e.g., German, Slavic, Celtic, Romance Languages, Latin, Greek). Linguistics (with concentration on historical and comparative linguistics), Anthropology, or Archaeology. Letters of recommendation (at least two, preferably three or four) are required; GSAT not required. Potential applicants may request a brochure by writing to: Indo-European Studies Program, c/o Folklore and Mythology Center, 1037 GSM—Library Wing, University of California, 405 Hilgard Avenue, Los Angeles, CA 90024.

Advising. The general Graduate Adviser is the Chairperson of the Interdepartmental Degree Committee; he/she may be contacted at the above address. When the student has determined clearly the area of specialization in which he or she will work (usually by the end of the first year), a personal adviser will be assigned. Should the student change the area of specialization, a different adviser may be assigned. Students are expected to be in close touch with their advisers regarding their progress in the program. When the student approaches the time for the doctoral examinations, a committee selected by the student in close consultation with the personal adviser will be nominated and formally appointed by the Dean of the Graduate Division.

Admission to the Doctoral Program. Admission to the Program itself constitutes admission to the doctoral program; there is no master's degree offered. Should deficiencies exist in prerequisites to specific work at the graduate level, an applicant may be granted provisional admission and directed to remove those deficiencies in the initial period of enrollment.

Major Fields or Subdisciplines. The doctorate in Indo-European Studies is offered with three alternative major emphases: 1) Indo-European linguistics; 2) Indo-Iranian or other specialized language area studies; 3) European and related archaeology.

Foreign Language Requirement. During the first year of graduate study, the student is expected to absorb the standard reading examinations set by the Graduate Division (ETS) in any two of German, French, and Russian. The remaining language is to be passed the second year, unless the student has demonstrated in some other way the ability to use the language as a research tool.

Course Requirements. The course requirements vary among the three major fields of specialization. General requirements for all students regardless of specialization include knowledge of Vedic Sanskrit, Homeric Greek, one upper division course in Latin, basic competence in Indo-European linguistics (including the introductory IES 150 and 210), mythology (e.g., Classics 168) and Archaeology (including IES 131, 132). Additional requirements by field as follows:

1) Linguistics—An advanced seminar in comparative grammar, a minimum of five ancient Indo-European languages from different subbranches, and additional units in courses offered by linguistics (e.g., phonetics, structural linguistics) and related departments. These additional units should be chosen in consultation with the student's personal adviser.

2) Indo-Iranian or other specialized language area—an advanced seminar in comparative grammar, a minimum of two ancient Indo-European languages from different subbranches, and additional units in the area of specialization, to be chosen in consultation with the student's personal adviser.

3) European and related archaeology—a minimum of one ancient Indo-European language, an advanced seminar in European archaeology, a course in analytical methods in science, and additional units in archaeology, anthropology, and related fields, to be chosen in consultation with the student's adviser.

Written and Oral Qualifying Examinations. When the student has completed the required coursework and prior to advancement to candidacy, a series of written examinations covering the major and minor fields will be administered. These will consist of translation and analysis of set texts from the ancient Indo-European languages, and diagnostic examinations in the other fields. Following successful completion of the written examinations, an oral examination, based on the written examinations and the candidate's dissertation prospectus will be administered. The latter examination, administered by the doctoral committee, is intended to probe the candidate's grasp of the entire field. Should the student fail either the written or oral examinations, the Interdepartmental Degree Committee may vote to allow reexamination.

Doctoral Committee. The doctoral committee is established with the same requirements as those of the Graduate Council.

Time to Degree. Provided that no deficiencies exist, a full-time student should complete his or her coursework and be prepared for the doctoral examinations within 14 academic quarters. Following this, the dissertation may be completed in seven additional quarters. Thus, the total time to degree from admission to the program is approximately 21 academic quarters. Because the program is unique and the qualifications of incoming students considerably varied, time to degree will vary also.

Final Oral Examination. The Final Oral Examination is designed to allow the committee to evaluate the dissertation within the discipline and within the student's own specialization. Although it is stated as a requirement of all students, individual circumstances have on occasion dictated waiver of the Final Oral Examination.

Candidate in Philosophy Degree. Upon successful completion of the written and oral examinations, the student will be advanced to candidacy and awarded the C.Phil degree.

Teaching Experience. Teaching experience is highly desired, but not available within the IES Program; therefore, it is not required. The Program works closely with its constituent departments in an attempt to provide some teaching experience.
Disqualification and Appeal of Disqualification

Failure to maintain a minimum average of 3.0 (B) constitutes the usual grounds for a recommendation of termination. In this, and in other cases, the Interdepartmental Degree Committee is the recommending body and the body to which appeal of such recommendation must be made.

Other Relevant Information. Because Indo-European Studies is an interdepartmental program, many of the courses that constitute the major are listed as "Related Courses in Other Departments." However, certain basic courses are specifically and solely IES courses. Those are listed below.

Upper Division Courses

131. European Archaeology: From the Neolithic to the Bronze Age.
132. European Archaeology: The Bronze Age. M150. Introduction to Indo-European Linguistics. (Same as Linguistics M150.)
199. Special Studies. (½ to courses)

Graduate Courses

Mr. Antilla M250A-M250B. European Archaeology. (Same as Anthropology M206A-M206B.) Prerequisite: consent of instructor. Credit is given only upon completion of both quarters. The full sequence may be repeated for credit. Studies in ancient European archaeological materials, and their relationship to the Near East, Western Siberia, and Central Asia. Mrs. Gimbutas.

Mr. Antilla 596. Directed Individual Studies. (½ to 2 courses)

597. Preparation for Doctoral Qualifying Examination. (½ to 2 courses)

599. Research for the Dissertation. (½ to 2 courses)

Related Courses in Other Departments

161A-161B-161C. Archaeology of Mesopotamia.
260. Seminar in Ancient Near Eastern Archaeology.
261. Practical Field Archaeology.

Anthropology 110. World Archaeology.
112. Old Stone Age Archaeology.
115Q. Archaeological Research Techniques.
115R. Strategy of Archaeology.
116P. Laboratory Analysis in Archaeology.

M179. Baltic and Slavic Folklore and Mythology.
201. Introduction to Old Church Slavic.
202. Introduction to Comparative Slavic Linguistics.
241A-241B. Advanced Old Church Slavic.

251. Introduction to Baltic Linguistics.

Interdisciplinary Colloquia

Organized colloquia involving several disciplines are offered from time to time in conformity with faculty and student interest. They are open to all faculty members and to graduate students assigned to the colloquia by their advisors. Graduate credit is not awarded directly, but may be given through appropriate departmental courses.

For information about the committees in charge of these colloquia, call the secretary to the Dean of the College of Letters and Sciences, (213) 825-4453.

African Studies

The African Studies Center annually sponsors at least one interdisciplinary colloquium on Africa. These colloquia focus on topics in the social sciences or humanities which cross disciplinary boundaries. Previous colloquia have dealt with such subjects as cultural pluralism, constraints on development and the adaptation of legal systems. It is the policy of the African Studies Center to organize its colloquia so that they can be taken for course credit at the graduate or undergraduate level or attended as open lectures. The interdisciplinary colloquium for the academic year 1981-1982 will be on the topic of Pan-African Biography and will be held during the Spring Quarter. For further information about this and other African Studies Center interdisciplinary colloquia, please contact the Assistant to the Graduate Adviser, Joy Williams, at (213) 825-2944.

The Jacob Marschak Interdisciplinary Colloquium on Mathematics in the Behavioral Sciences

Meetings are announced in the University Calendar.

A colloquium on mathematics in the behavioral sciences will meet biweekly throughout the year. Papers presented and discussed in this colloquium use mathematical language to improve communication between behavioral sciences, and also between these sciences and other branches of knowledge.
Islamic Studies
(Interdepartmental)

The interdepartmental program for the Master of Arts and Ph.D. degrees in Islamic Studies is designed primarily for the student desiring to prepare for an academic career. It may, however, be found useful also for the student seeking a general education and desiring a special emphasis in this particular area or for a student who plans to live and work in this area, whose career will be aided by a knowledge of the people, languages, and institutions. (Such a career might be centered on teaching, research, business, engineering, journalism, librarianship or government service.) Subject to the limitations indicated below, the special course of studies is formulated for each candidate according to his/her experience and requirements.

The Master of Arts Degree

Admission Requirements. In addition to the general University requirements, a Bachelor of Arts degree in Near Eastern Studies or its equivalent is required. The Interdepartmental Degree Committee will pass on the application for admission to the program. A student entering the program is normally expected to have completed the equivalent of advanced intermediate Arabic (Arabic 102A-102B-102C); and advanced Persian (Persian 102A-102B-102C), or advanced Turkish (Turkish 103A-103B). In addition, the student is expected to have completed the equivalent of two years of Near Eastern history (classical and modern); some coursework in Islamic culture and institutions may be included toward the history requirement. Deficiencies in any of these prerequisites will have to be removed by taking the appropriate courses without credit toward the advanced degree. No special application form is required.

The Graduate Record Examination is required of graduates of American universities and recommended for overseas applicants.

A departmental brochure can be obtained by writing to the G.E. von Grunebaum Center for Near Eastern Studies, 10286 Bunche Hall, UCLA.

Advising. Graduate Adviser: Students are to consult with the Chairperson of the Islamic Studies Committee, Professor Speros Vryonis, Jr., G.E. von Grunebaum Center for Near Eastern Studies.

Appointments for consultation with the Graduate Adviser should be made through the Center. Should consultation with other members of the Interdepartmental Degree Committee be in order, appointments will be scheduled through the Center. Students are apprized orally at the beginning of each quarter of their progress and/or deficiencies and a written record of the interview is kept in their files. Consultation data sheets are kept on file. All students will be reviewed at the end of their first year to determine whether their progress is sufficient to warrant continuation in the program.

Admission to Master's Program. No screening examination is required. Provided the student meets the admission requirements stated above, no specific coursework is required.

Major Fields or Subdisciplines. Arabic, Persian, Turkish, History of the Near East, Political Science, Anthropology, Sociology.

Foreign Language Requirement. A candidate for the degree of Master of Arts in Islamic Studies will be required to show proficiency in either French or German. The student is expected to pass the graduate foreign language reading examination (Educational Testing Service) in French or German by the end of the third quarter of residence.

Course Requirements. A minimum of nine courses; no fewer than four courses on the appropriate level in the two Near Eastern languages of the candidate's choice and no fewer than five courses chosen from the relevant upper division and graduate courses in history, political science or any of the other fields represented in the program depending on the student's preparation and specific needs, with the provision that the selection must be limited to two of these disciplines. The omission of history may be approved only in exceptional cases. Of the nine courses for the M.A. degree, five must be on the graduate level.

Thesis or Comprehensive Examination Plan. Only the Comprehensive Examination Plan is acceptable. The candidate must pass written examinations in two Near Eastern languages and literatures, the history of the Near East and one other social science. The examinations are constructed by the instructor responsible for each discipline. Reexamination in exceptional cases will be determined by the Interdepartmental Degree Committee. The examiner or examiners will be appointed by the Chairperson of the Interdepartmental Degree Committee.

Time to Degree

<td>4*</td>
</tr>
<tr>
<td>Years</td>
<td>1½*</td>
</tr>
</tbody>
</table>

From graduate admission to completion of required courses, approval of the Comprehensive Examination and award of the degree.

Upper time limit for completion of all requirements.

*Students who enter the program with deficiencies may require six quarters (two calendar years)

Disqualification and Appeal of Disqualification. The decision to recommend termination of graduate status will be reached by the Chairperson of the Interdepartmental Degree Committee, upon consultation with the Graduate Adviser and appropriate faculty members. Such decision may be based upon the student's failure to maintain the required progress toward the degree, failure to maintain a grade point average of 3.0, or failure in passing the requisite examinations. The student may appeal the decision to recommend termination to the Interdepartmental Degree Committee.

The Ph.D. Degree

Admission Requirements. Students intending to work for the Ph.D. in Islamic Studies are normally expected first to fulfill all requirements for the M.A. degree. Those who enter the program with an M.A. from another university should have attained a level of preparation in languages, history, and social sciences equivalent to that required for the M.A. at UCLA. Those who have not done so should make up any deficiencies by taking the appropriate courses without credit toward the degree. No special application form is required, but applications must be accompanied by three letters of recommendation.

The Graduate Record Examination is required of graduates of American universities and recommended for overseas applications.

A departmental brochure can be obtained by writing to the G.E. von Grunebaum Center for Near Eastern Studies, 10286 Bunche Hall, UCLA.

Advising. Graduate Adviser: Students are to consult with the Chairperson of the Islamic Studies Committee, Professor Speros Vryonis, Jr., G.E. von Grunebaum Center for Near Eastern Studies.
Appointments for consultation with the Graduate Adviser should be made through the Center upon admission to the program and throughout the year as needed. After the first year (three quarters) an advisory committee for each candidate will be appointed. This committee, consisting of four faculty members, will supervise the four fields in which the candidate is to be examined. Consultation with these faculty members will be as frequent as needed. Students are apprised orally by the Graduate Adviser at the beginning of each quarter of their progress and/or deficiencies and a written record of the interview is kept in their files.

**Major Fields or Subdisciplines.** Arabic, Persian, Turkish, History, Anthropology, Sociology, Political Science.

**Foreign Language Requirement.** At the beginning of his/her first quarter in residence, the candidate will present himself/herself for the dissertation prospectus. Reexamination in any field is at the discretion of the doctoral committee in consultation with the Chairperson of the program. Research proposals, dossiers, research papers, propositions, etc., are not permitted as alternatives to the Written Qualifying Examinations.

**Course Requirements.** Course requirements for the student entering directly into the Ph.D. program are as in the M.A. program. Beyond this, the student will continue advanced courses in his/her two Near Eastern languages, in Near Eastern history and in one of the social sciences, upon specific advisement of the Interdepartmental Degree Committee.

**Written and Oral Qualifying Examinations.** Written Qualifying Examinations in four fields are required: two Near Eastern languages and literatures as approved by the advisory committee, the whole range of Near Eastern history and one other social science field (anthropology, political science, sociology). Upon successful completion of the written examinations, the student must present himself/herself for the oral examination before the entire doctoral committee. Reexamination in any field is at the discretion of the doctoral committee in consultation with the Chairperson of the program. Research proposals, dossiers, research papers, propositions, etc., are not permitted as alternatives to the Written Qualifying Examinations.

**Doctoral Committee.** The committee is to be appointed by consultation between the student and the Chairperson of the Interdepartmental Degree Committee.

**Time to Degree**

1. From graduate admission to Written and Oral Qualifying Examinations: nine quarters.
2. From graduate admission to the approval of the dissertation prospectus: nine quarters.
3. From advancement to candidacy to the Final Oral Examination: three to six quarters.
4. From graduate admission to the award of the degree: 15 quarters.

(Students with an M.A. degree in the program may be able to complete all requirements and the dissertation in as few as 10 quarters.)

**Final Oral Examination.** With the approval of the doctoral committee at the time of the Oral Qualifying Examination, the Final Oral Examination may be waived.

**Candidate in Philosophy Degree.** Students are eligible to receive the C.Phil. degree on advancement to candidacy.

**Teaching Experience.** Teaching experience is not a requirement for the Ph.D. degree.

**Disqualification and Appeal of Disqualification.** The decision to recommend termination of graduate status will be reached by the Chairperson of the Interdepartmental Degree Committee, upon consultation with the Graduate Adviser and the student's doctoral committee. Such decision may be based upon the student's failure to maintain the required progress toward the degree, failure to maintain a grade point average of 3.0, or failure in passing the requisite examinations. The student may appeal the decision to recommend termination to the Interdepartmental Degree Committee.

**Course Requirements**

**Lower Division Courses**

**Arabic**

1A-1B-1C. Elementary Arabic.
10A. Ancient Egyptian.
121A-121B-121C. Intermediate Ancient Egyptian.
123A-123B. Coptic.
130. Ancient Egyptian Religion.
140A-140B. Elementary Sumerian.
145. Sumerian Literary Texts.
150A-150B-150C. Survey of Near Eastern Literatures in English.
161A-161B-161C. Archaeology of Mesoopotamia.
162. Archaeology of Palestine.
170. Introduction to Biblical Studies.
199. Special Studies in the Ancient Near East.

**Anthropology**

110 World Archaeology.
135P. Social and Psychological Aspects of Myth and Ritual.
150. Comparative Society.
156. Comparative Religion.
163. Women in Culture and Society.
176. Cultures of the Middle East.

**Arabic**

103A-103B-103C. Advanced Arabic.
111A-111B-111C. Spoken Arabic.
113A-113B-113C. Spoken Iraqi Arabic.
114A-114B-114C. Spoken Moroccan Arabic.
130A-130B-130C. Classical Arabic Texts.
134A-134B-134C. Modern Arabic Texts.
141. Modern Arabic Literature.
150A-150B. Survey of Arabic Literature in English.
199. Special Studies in Arabic.

**Armenian**

103A-103B. Advanced Modern Armenian.
130A-130B. Classical Armenian.
150A-150B. Survey of Armenian Literature in English.
160A-160B. Armenian Literature of the 19th and 20th Centuries.
199. Special Studies in Armenian Language and Literature.

**Art**

102. Art of the Ancient Near East.
103A. Greek Art.
103B. Hellenistic Art.
104B-104C-104D. Architecture and the Minor Arts of Islam in the Middle Ages.
105A. Early Christian Art.
105B. Early Medieval Art.
105E. Byzantine Art.
114A. The Early Art of India.
115A. Advanced Indian Art.
199. Special Studies in Art.

**Berber**

102A-102B-102C. Advanced Berber.
120A-120B-120C. Introduction to Berber Literature.
130. The Berbers.
199. Special Studies in Berber Languages.

**Classics**

170A-170B. Byzantine Civilization. (Same as History 1122A-1122B.)

**Classics Greek**

**French**

121A. Franco-African Literature.
Geography 187. The Middle East.
188. Northern Africa.

Hebrew.*

History 4. Introduction to the History of Religions.
104. History of Ancient Egypt.
107A-107B. Islamic Civilization.
121A-121B. Medieval Europe.
123A-123B. Byzantine History.
197. Undergraduate Seminars.
199. Special Studies in History.

103A-103B-103C. Advanced Persian.
140. Contemporary Persian Belle Lettres.
141. Contemporary Persian Analytical Prose.
150A-150B. Survey of Persian Literature in English.
164. Governments and Politics in the Middle East.
170. Religion in Ancient Iran.
199. Special Studies in Iranian.

Islamic 110. Introduction to Islam.

Jewish Studies 110. Social, Cultural and Religious Institutions of Judaism.
151A-151B. Modern Jewish Literature in English.
190. Undergraduate Seminar in Jewish Studies.
199. Special Studies.

Philosophy 104. Topics in Islamic Philosophy.

Political Science 132A-132B. International Relations of the Middle East.
164. Governments and Politics in the Middle East.

102A-102B-102C. Advanced Amharic (Modern Ethiopic).
110. Neo-Aramaic.
140A-140B. Elementary Akkadian.
141. Advanced Akkadian.
142. Akkadian Literary Texts.

Sociology 132. Population and Society in the Middle East.
133. Comparative Sociology of the Middle East.
151. Culture and Personality.

Turkic Languages 101A-101B. Elementary Turkish.
102A-102B. Intermediate Turkish.
103A-103B. Advanced Turkish.
112A-112B-112C. Uzbeek.
114A-114B-114C. Bashkir.
180A-180B-180C. Introduction to Turkic Studies.
199. Special Studies in Turkic Languages.

Graduate Courses

African Languages.*

*See Department of Near Eastern Languages and Cultures for complete listing and detailed description.

---

**See Linguistics Department for complete listing and detailed description.
Major Fields. No major fields or areas of specialization are allowed. Our master's degree aims at providing our students with a broad and sound knowledge of all main areas of Italian Literature.

Foreign Language Requirements. A reading knowledge is required of one other foreign language approved by the Graduate Adviser or evidence of successful completion of courses through at least level 3. This requirement must be met at least one quarter before the date of the Comprehensive Examination.

Course Requirements
Master of Arts in Italian Literature
1. Thesis Plan: nine courses, of which a minimum of six must be in the Italian 200 series; Italian 200 ABC and Italian 205B are required.
2. Comprehensive Examination Plan: 12 courses, four of which are required, Italian 200 ABC and Italian 205B. The other eight must be distributed in three main literary periods—Middle Ages, Renaissance, Modern times, (at least two courses in each period). Three of these courses may be upper division, if approved by the Graduate Adviser. (Related courses in other departments, such as History 205A and 205B and Art 230, are strongly recommended.)

Master of Arts in Italian Language
1. Thesis Plan: 12 courses, of which a minimum of six must be in the 200 series, and the following are required: Italian 200ABC, 259 A and B, Latin 232, Linguistics 100 or 140 or both.
2. Comprehensive Examination Plan: 12 courses of which the following are required: Italian 130, 200 ABC, 259 A and B, Latin 232, or Italian 210A or both. The others should be taken respectively in the Medieval period (seminar on Dante strongly recommended), in the Renaissance, and in the Modern period.

Thesis or Comprehensive Examination Plan.
Thesis Plan: In order to favor research-oriented students of exceptional merit, the Department has established the following Thesis Plan. Any student who has completed a first year of graduate work with at least a 3.70 grade point average rating, may be nominated by one of the faculty members of the Department for application to the M.A. in Italian, Thesis Plan. At this point in their graduate preparation, the student, will have to include three more graduate courses in preparation for the thesis.

The thesis must be at least 50 pages long and follow the rules and style of the UCLA Ph.D. dissertation regulations. It must be submitted in the Spring Quarter of the student's second year of graduate work; it must be directed by a faculty member of the Guidance Committee and it must be approved by the Guidance Committee. After completion of the thesis, the candidate must pass an oral examination testing his/her knowledge in the field of the thesis and his/her general competence in Italian Literature.

Comprehensive Examination Plan: In general, the Department favors the Comprehensive Examination Plan. The Comprehensive Examination Committee is appointed by the Chairperson of the Department in consultation with students and their faculty advisers and consists of a minimum of a 4-hour written examination to be given the next to the last week preceding the final examination period of the Fall and Spring Quarters. It is a broad testing of the candidate's general competency and does not have major and minor fields of emphasis. After the written examination, the candidate is required to take an oral examination. A candidate who has failed the Comprehensive Examination may be reexamined once, subject to approval by the Examination Committee and the Chairperson of the Department.

Time to Degree. The time to the master's degree is two years or, six academic quarters.

No 500 Series courses can apply to the M.A. course requirements.

Teaching Experience. Teaching experience is not required, but it is highly recommended.

Disqualification and Appeal of Disqualification. Conditions which may lead to termination include failure to maintain a grade point average above 3.0, insufficient progress towards the degree, or failure of M.A. examinations. A student who fails to maintain an overall grade point average of 3.00 is placed on academic probation. If, in the first quarter of probationary status, the student succeeds to achieve a 3.0 overall grade point average, he/she will no longer be on probation; if the student maintains a grade point average of 3.0 for that quarter, the Department will normally recommend extension of probationary status for another quarter; if the student has not maintained a grade point average of 3.0 for that quarter, the Department will normally recommend dismissal.

Every recommendation for probation and dismissal are discussed and decided upon by the Department faculty. The student may appeal to the Department, in writing, any recommendation for dismissal.
Admission Requirements. Three letters of recommendation are required. The address is Department of Italian/Att./Graduate Counsellor, UCLA, Los Angeles, California 90024.

Advising. Graduate Adviser: Dr. Edward Tuttle, Department of Italian, Royce Hall 340B, UCLA, Los Angeles, California 90024.

All students continuing toward the Ph.D. in Italian with an M.A. from UCLA have an assigned faculty advisor who may become the chairperson of their Doctoral Guidance Committee. New students who are entering the Ph.D. program in Italian are introduced to the faculty in a general meeting and according to their academic interests each of them will be assigned a faculty advisor. All students must have selected their doctoral committee chairperson during the first quarter they are enrolled in the Ph.D. program. By the end of the second quarter they must have selected the departmental members of their Doctoral Guidance Committee. The chairperson of the doctoral committee in consultation with the student and eventually with the other members of the student’s doctoral committee plans the student’s program.

The Doctoral Guidance Committee prepares and administers Part II of the Written Qualifying Examination after the student has completed the 10-course requirement and other preparatory work—usually within six quarters after completion of Part I.

Admission to the Doctoral Program. In addition to the University minimum requirements, at least two, and preferably three, letters of recommendation from professionals in the field of Italian studies are required.

Prerequisite for entering the Department’s doctoral program is an M.A. from UCLA or from a university in the United States or the equivalent.

Graduate students entering the doctoral program in Italian with a master’s degree from another institution, or the equivalent, will be required to take Part I of the Ph.D. Qualifying Examination by the end of their third quarter of residence. Students who fail Part I of the Qualifying Examination are not admitted to the Ph.D. program.

A student admitted to the Ph.D. program without the M.A. degree may expect to take the Qualifying Examination, Part II at the end of the 12th quarter in residence, carrying a normal course load.

Students holding the M.A. from UCLA will normally take Part II of the Qualifying Examination at the end of their sixth quarter in residence. Those holding their M.A. degree from another institution will take Part II of the Qualifying Examination after approximately eight quarters.

Major Fields or Subdisciplines

Major fields: two centuries of Italian Literature either in the Medieval, Renaissance and Baroque, or Modern areas.

Minor fields: two centuries of Italian Literature from any of the areas mentioned above.

Candidates may choose a major in a literary genre or a minor outside the Department, provided that it relates to their major fields of specialization. This field must have the approval of the candidate’s entire Department.

Foreign Language Requirements. A student will normally pass this requirement by giving evidence of successful completion of courses through level 3 in at least two of the following languages: Latin, French, German, Spanish (subject to Departmental approval). A foreign language used to satisfy the requirement for the master’s degree in Italian may be credited toward fulfillment of this requirement. The language requirement must be satisfied prior to taking Part II of the Qualifying Examinations, either by Educational Testing Service or departmental examination or by petition for course credit to the Graduate Division.

Course Requirements. Required courses: in addition to those required for the master’s degree, at least 10 other quarter courses, of which no more than two 596 courses may apply. In addition, the student will take such courses as his/her guidance committee will prescribe for the Qualifying Examinations: such as 596 or 597.

Qualifying Examination. Part I. The Comprehensive Examination for the M.A. in Italian at UCLA corresponds to Part I of the Ph.D. program Qualifying Examinations. Graduate students entering the Ph.D. program in Italian with an M.A. from another university or the equivalent, will be required to take Part I by the end of their first three quarters at UCLA.

Qualifying Examination: Part II. The Department requires both a Written and an Oral Qualifying Examination, which must be taken during the same academic year, although not necessarily during the same quarter. Normally taken six quarters after the M.A. degree, the written examination consists of two parts: one 8-hour examination in the candidate’s major field, consisting of an essay in the history of the literature and a critical analysis of a literary text selected from material covering two centuries of Italian literature; one 6-hour examination in the candidate’s minor field, consisting of an essay in the history of the literature and five brief discussion topics selected from two centuries of Italian literature other than those comprising the major. In the case of the major field, both centuries must be within the same area: Medieval, Renaissance and Baroque, or Modern; for the minor field, the two centuries may belong to different areas. Additionally, a 2-hour oral examination is required which shall include a discussion of the written examinations, an analysis of a text from the area of the major, a general discussion of Italian literature, and the presentation of a brief written statement of the dissertation prospectus. A summary of requirements entitled “Regulations for the Ph.D. Examination” is available in the Department. A student who fails Part II of the Qualifying Examination may be reexamined upon unanimous approval of the Guidance Committee, and only after at least one academic quarter of additional residence.

Doctoral Committee. The student’s doctoral committee will consist of a minimum of three faculty members actually participating in the Department of Italian and a minimum of two “outside” members, at least one of which is from the student’s related discipline. The doctoral committee will consider and approve the student’s dissertation topic. A successful oral defense of the dissertation will constitute the final examination for the degree.

Time to Degree. Six years from beginning of graduate status.

Final Oral Examination. After acceptance of the dissertation in its final form, the candidate may be required to take an oral examination which will cover principally the field within which the dissertation falls.

Candidate in Philosophy Degree. The Department of Italian grants the C. Phil degree after advancement to candidacy for the Ph.D., and upon application to administrative authorities.

Teaching Experience. Teaching experience is not a requirement, but it is highly recommended.

Disqualification and Appeal of Disqualification. Conditions which may lead to termination include failure to maintain a grade point average above 3.0, insufficient progress towards the degree, or failure of M.A. examinations. A student who fails to maintain an overall grade point average of 3.00 is placed on academic probation. If, in the first quarter of probationary status, the student achieves a 3.0 overall grade point average, he/she will no longer be on probation; if the student maintains a grade point average of 3.0 for that quarter, the Department will normally recommend extension of probationary status for another quarter; if the student has not maintained a grade point average of 3.0 for that quarter, the Department will normally recommend dismissal.

Every recommendation for probation and dismissal are discussed and decided upon by the Department faculty. The student may appeal to the Department; in writing, any recommendation for dismissal.

Other Relevant Information. All courses from Italian 201 on can be taken towards a Ph.D.
Graduate Courses

200A. Readings in Italian Literature. Class meets three hours weekly. Prerequisites: Graduate Standing. Italian 200A will cover the literature of the generation dominated by the Franciscan movement and proceed through the culture of Frederick II's court to the three centuries following. Classes meet three hours weekly. Prerequisite: Graduate Standing.

200B. Readings in Italian Literature. Class meets three hours weekly. Prerequisites: Graduate Standing. Italian 200B will cover the literature of the High Renaissance of Central Italy in its three most popular genres, lyric poetry, chivalric poem, and theater, and proceed through the counter-reformistic culture, especially of Northern and Southern Italy. Finally, it will encompass the main Enlightenment figures, and the cultural evolution stemming from them.

257A-257B. Seminar on Romanticism. Course meets three hours weekly. Mr. Pasinetti

258A-258B. Seminar on Contemporary Italian Literature. Course meets three hours weekly.

259A-259B-259C. Studies in the History of Italian Language. Course meets three hours weekly. Mr. Cecchetti

259A. History of the Italian Language. Prerequisite: Graduate Standing. A historical survey of the development of the language from Medieval times to the unification of the country (1861). Questions della lingua: general acceptance of Florentine speech, and its evolution into the national language. Mr. Tuttle

259B. The structure of Modern Italian. Prerequisite: Graduate Standing. Various tendencies in modern and contemporary Italian. Foreign influences in today’s Italian language. Relationship between the national language and the various dialects. Mr. Tuttle

259C. Italian Dialectology. The historical differentiation of the Italian dialects will be considered in its areal dimension. Specific geolinguistic problems and solutions will illustrate the growth of the discipline up to its present merging with sociolinguistics as Italian dialects become more vertically defined. Mr. Tuttle

298. Variable Topics in Italian Studies. Lecture, three hours; discussion: one hour. Prerequisite: Graduate Standing or consent of instructor. Seminar course focusing on Themes and Issues outside of the uniquely Italian Literature topics covered in regular Departmental Graduate course. The Staff

370. Problems and Methods in the Teaching of Italian. Course meets two hours weekly. Mrs. Cheeseman

Individual Study and Research

495A-495D. The Teaching of Italian at the College Level. (1/2 to 1 course each) Prerequisite: consent of instructor.

495A. Techniques in Teaching Italian Literature.

495D. Techniques in Teaching Italian Film.

501. Cooperative Program. (1/2 to 2 courses). Prerequisites: approval of UCLA Graduate Adviser and Graduate Dean. Approval of host campus Instructor, Department Chairman and Graduate Dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. To be graded SU.

598. Directed Individual Studies. (1 to 2 courses) The Staff

597. Preparation for Comprehensive Examinations. (1 to 2 courses) The Staff

599. Doctoral Research and Writing. (1 to 2 courses) The Staff

Kinesiology

(Department Office and Student Affairs Office, 206 Men’s Gymnasium)

R. James Barnard, Ph.D., Professor of Kinesiology.
Camille Brown, Ed.D., Professor of Kinesiology.

Wayne W. Massey, Ph.D., Emeritus Professor of Kinesiology.

Richard A. Schmidt, Ph.D., Emeritus Professor of Kinesiology.

Glen H. Egstrom, Ph.D., Professor of Kinesiology.
Gerald W. Gardner, Ph.D., Professor of Kinesiology (Vice-Chair of the Department).

President J. L. Robson, Ph.D., Professor of Dentistry, Anatomy, and Kinesiology.

Jack F. Keogh, Ed.D., Professor of Kinesiology.

Laurence E. Morehouse, Ph.D., Professor of Kinesiology.

Donald H. Hand, Ed.D., Emeritus Professor of Kinesiology.

Valerie A. Hunt, Ed.D., Emeritus Professor of Kinesiology.

Wayne W. Massey, Ph.D., Emeritus Professor of Kinesiology.

Ben W. Miller, Ph.D., Emeritus Professor of Kinesiology.
A list of faculty names and research interests is available from the Department. Applicants are encouraged to communicate directly with the faculty and personal interviews are encouraged. Further information may be obtained by contacting the Graduate Adviser in Men's Gym 206, or by writing the Department of Kinesiology, UCLA, Los Angeles, California 90024.

Aptitude tests, including the Graduate Record Examination or Miller's Analogies, are not required, but may be submitted for consideration. Applications are accepted for Fall and Spring Quarters only.

Faculty Graduate Adviser. The student is responsible for becoming acquainted with the faculty of the Department and for specifying a potential adviser whose area of specialization is common to the student's study/research interest. The graduate student works closely with the chosen adviser, and the program of study and research is basically a contract between the student and the faculty adviser or Guidance Committee.

A master's student may change advisers at any time prior to completion of one-half of the coursework toward the degree with the approval of the faculty members involved by notifying the Student Affairs Office (Men's Gym 206). Doctoral students may change advisers prior to the First-Year Review. After these times, however, advisers may be changed only by petition to the Graduate Affairs Committee.

Master's students must complete, in consultation with an adviser, an individual academic plan including projected coursework for completion of the degree. Doctoral students must complete a similar plan of proposed courses in consultation with their Guidance Committee (see below). These plans serve as a contract between the student and the Department.

Student study lists and all University petitions, leaves of absence, and drop/add petitions must be approved and initialed by the faculty adviser and filed with the Student Affairs Office for approval by the Chairperson of the Graduate Affairs Committee.

The Master of Science Degree

Undergraduate Preparation. Applicants without an undergraduate degree in kinesiology will receive serious consideration, particularly if undergraduate or other experiences provide a strong relationship to kinesiology. However, applicants are expected to complete a minimum undergraduate preparation prior to their graduate work. Completion of course deficiencies may take as much as an additional year of coursework, which will not be credited toward the master's degree. The following undergraduate preparation is required:

Basic preparation in the life and physical, and social sciences. One course each: inorganic chemistry, organic chemistry, cellular biology, physics (mechanics), statistics, introductory psychology, and one additional introductory course in anthropology, psychology, or sociology.

Basic preparation in kinesiology. A lack of equivalent coursework in the following areas will necessitate acquiring undergraduate preparation by taking departmental core courses which will not be credited toward the master's degree. These core courses include (Kinesiology Department course numbers are given in parentheses): Introduction to Human Physiology (12), Human Neuromuscular Anatomy (14), Behavioral Bases of Movement (120, 120L), Biomechanical Bases of Movement (122, 122L), Cardiorespiratory Bases and Environmental Factors Affecting Movement (124, 124L), Neuromuscular and Metabolic Bases of Movement (126, 126L), plus one elective from the proposed area of graduate study. Additionally, applicants in the field of exercise physiology should have completed one year of inorganic chemistry, one year of organic/biochemistry, and two quarters of calculus.

Foreign Language Requirement. The Department of Kinesiology does not have a foreign language requirement for the Master of Science degree.

Course Requirements. The Master of Science in Kinesiology requires nine courses: five graduate level Kinesiology courses, two courses from a related field, one second-level statistics or research design course, and one other course from either Kinesiology or a related field.

A minimum of six of these nine courses must be graduate-level (200) courses, toward which one Individual Studies (Kinesiology 596) course may apply. Lists of approved related field and statistics or research design courses may be obtained from the Department.

Thesis or Comprehensive Examination Plans

Thesis Plan. Students who elect the Thesis Plan for the master's degree must report the results of an original research investigation. Before beginning work on the thesis, the student obtains approval of the problem area or outline of study from his or her departmental thesis committee. The student is responsible for recruiting a faculty member from the Department of Kinesiology who will serve as the chairperson of the thesis committee, and with the advice and consent of the chairperson, for finding two additional faculty members to serve on the committee, one of whom may be from outside the Department of Kinesiology. Selection of the thesis committee must be made by the time the student has advanced to candidacy.
Under the guidance of the thesis committee, the student conducts original research in a specific area. The thesis committee assists in defining the procedures, supervises the research experience, and decides with the student how the research will be reported. With committee approval, the student may either submit a thesis manuscript or a manuscript suitable for publication.

Comprehensive Examination Plan. Students who elect the Comprehensive Examination Plan must achieve a passing mark on a Comprehensive Examination. The general purpose of the Comprehensive Plan is that students acquire a thorough understanding of a reasonably broad problem area, which must be specified in consultation with an adviser. The selection of courses in the Department and the related field must be pertinent to the problem area, and justification is required with the petition for advancement to candidacy. The student's integration of knowledge and depth of understanding in the problem area will be evaluated by a Comprehensive Examination.

The comprehensive examination committee is composed of three faculty members, one of whom may be outside the Department. The student is responsible for finding a faculty member to serve as chairperson and for recruiting, with the advice and consent of the chairperson, two additional faculty members for the committee. The committee, problem area and program of courses should be identified as early in the program as possible and must be specified at the time of advancement to candidacy. The committee is responsible for preparing and evaluating the written examination and reporting the results to the Graduate Affairs Committee. Each member of the comprehensive examination committee must mark the written examination as "Pass with Honors," "Pass," or "Fail." An overall mark of "Pass" requires that only two committee members mark the examination as "Pass." However, there must be a unanimous vote to award an overall mark of "Pass with Honors."

While a written examination is required, the committee may choose to use additional means to evaluate the competency of the candidate. These supplementary procedures must be evaluated with a mark of "Pass" by at least two of the committee members.

A student who fails to successfully pass the Comprehensive Examination may not repeat the examination until the following quarter. A student may not take the examination a third time and may not change committee members without the permission of the Graduate Affairs Committee.

Time to Degree. Normal progress from graduate admission to completion of the required coursework is three to four quarters plus an additional one to three quarters for completion of a thesis or comprehensive examination. If preparation coursework is necessary, as much as three additional quarters may be required. Students are normally expected to complete all requirements for the master's degree in Kinesiology within seven quarters.

500 Series Course Limitations. A total of 8 units of 596 (Individual Studies) may be taken for credit; only one course (4 units) will count toward the minimum course requirement for the master's degree in Kinesiology. Courses 597 (Preparation for Master's Comprehensive Examination) and 598 (Research for the Preparation of the Master's Thesis) may not be used to fulfill any of the course requirements for the degree. There is no limit on the number of times a master's student may enroll in 597 or 598.

The Ph.D. Degree

Undergraduate Preparation. In addition to the preparation coursework required for master's students, all doctoral students are expected to have the following undergraduate preparation: two quarters of calculus and a second quarter of physics. Students must show a solid educational background in one of three general fields of kinesiology, and undergraduate and previous graduate work will be evaluated in terms of the student's declared field of interest. Course deficiencies will be identified after consultation with the adviser and must be made up before the First-Year Review (see below). Students admitted for one area may not specialize in another area unless all prerequisites are satisfied.

Guidance Committee. At the time of graduate admission, a faculty adviser is identified for doctoral students. During the first year of study, the student is responsible, with the advice and consent of the faculty adviser, for organizing the Guidance Committee. Faculty members constituting the Guidance Committee include the student's adviser and two others (one of whom must be in the Department) from the student's major and minor areas. Members of the Guidance Committee are responsible for approving the student's course of doctoral study, conducting a review of the student's progress at the end of the first year of study, and preparing and evaluating the Written Qualifying Examination. The Guidance Committee, with two additional faculty members, will subsequently constitute the student's doctoral committee.

Areas of Concentration. From the three general content fields of the Department's instructional and research programs, eight areas of concentration have been identified:

1. Cardiorespiratory adaptations to exercise
2. Environmental factors influencing work capacity
3. Metabolic aspects of exercise
4. Neuromuscular adaptations to exercise
5. Biomechanics
6. Movement development
7. Movement performance and acquisition
8. Neural control of movement

Each student will select one of the eight areas of concentration as a major and two areas as minors. These areas are expected to relate to the student's proposed dissertation problem.

Course Requirements. While there is no minimal unit requirement (other than the University residency requirement), the Department does specify 14 courses for the doctoral degree. These course requirements may be satisfied by previous graduate work completed by the student. Selection of all courses must be approved by the student's guidance committee and will be determined in part by the student's selection of major and minor areas of concentration.

Extraderpartmental courses. A minimum of four courses or 16 units in a related field outside the Department is required. An approved list of courses in anatomy, biological chemistry, biology, biomathematics, education, engineering, neuroscience, pharmacology, physiology, psychology, public health, and radiological sciences is maintained by the Department.

Statistics courses. Two advanced statistics courses are required of all doctoral candidates. A list of approved courses is maintained by the Department.

Research competencies. Each student must complete one foreign language competency test (scoring 500 or better on an Educational Testing Service Graduate Foreign Language Test), or demonstrate alternate competencies by completing courses in electronics, computer programming, or advanced statistics and research design.

First-Year Doctoral Review. After completion of three quarters of coursework, the student will compile a portfolio containing UCLA transcripts and other supportive materials, including at least two written papers which demonstrate knowledge in the major and minor areas of concentration and competency in scientific writing. After evaluation of the portfolio and an interview with the student, the Graduate Affairs Committee, in consultation with faculty, will recommend that the student: (1) continue in the doctoral program; (2) enter the master's program, or (3) discontinue graduate study in the Department. The review must be completed by the end of the fourth quarter of graduate work as a doctoral student.
Written Qualifying Examinations. Each doctoral student must take three written qualifying examinations: one in a major area and one in each of two minor areas. Written qualifying examinations are scheduled by the Department on a regular basis and may be taken when the student and Guidance Committee consider appropriate. Generally, minor area examinations would be taken after completion of the area of concentration courses, but before completion of all advanced elective coursework. Major area examinations typically are taken after completion of the majority of coursework. These examinations are prepared and evaluated by faculty members from the Department in each area of concentration and will be scored: (1) passed at the Ph.D. level of achievement, (2) passed at the master's level of achievement, or (3) failed. To continue the doctoral program, a student must pass each examination at the Ph.D. level of achievement. The student who fails to do so may elect to: (1) complete the master's degree, (2) discontinue graduate work in the Department, or (3) reschedule the area examinations at the discretion of the Guidance Committee. Permission to reschedule any area examination a third time will not be granted.

Oral Qualifying Examination. After successfully passing the Written Qualifying Examinations, an Oral Qualifying Examination will be conducted by the doctoral committee. Normally, the examination will be held the quarter following the completion of written examinations and after the student has completed two quarters of research work with the major professor. The oral examination will deal primarily with the student's dissertation prospectus and the student's ability to communicate scientific ideas orally. The examination will be scored "Pass" or "Fail." If the student does not pass, the Oral Qualifying Examination may be rescheduled at the discretion of the doctoral committee.

Dissertation. The candidate must submit a report of an original research study which meets the approval of the doctoral committee. The committee will be comprised minimally of the student's guidance committee and two additional professors, in accord with Graduate Division regulations.

Final Oral Examination. A Final Oral Examination is generally required. The members of the doctoral committee who are to approve the dissertation have the option to waive this final examination, but it is expected that a Final Oral Examination will be required in all but exceptional cases. The major emphasis in this examination will be a defense of the dissertation. The oral defense will be rated "Pass" or "Fail." If the student does not pass, the Final Oral Examination may be rescheduled at the discretion of the doctoral committee.

Time to Degree. Students entering the doctoral program with no deficiencies may be expected to complete the doctoral program within four years. Normative time-to-degree is formally specified as five years.

Teaching Requirement. Each candidate will serve in an instructional capacity for a minimum of two quarters. Teaching effectiveness will be assessed quarterly by the instructor in charge of the course and the students in the class. All teaching evaluations will become a permanent part of the student's departmental record.

Disqualification and Appeal of Disqualification. Graduate students are expected to maintain a grade point average of 3.0. Students who fail to do so will be subject to review by the Graduate Affairs Committee which may make a recommendation to dismiss, to continue on contract, or to continue with warning. Students may be terminated if they appear to be making insufficient progress toward a degree, have failed the Master's Comprehensive Examination twice (or have not been recommended for reexamination after a failure), have failed doctoral examinations, or are unable to maintain the required scholastic average. Appeal may be made to the Graduate Affairs Committee only with the support of a faculty advisor.

Graduate Courses

210A. Cardiovascular and Respiratory Factors. Prerequisite: course 118. Topics include the role of exercise in the prevention, detection and management of coronary heart disease. Topics in respiration include regulation of ventilatory mechanics, gas diffusion and transport in exercise and training.

210B. Neuromuscular and Metabolic Factors. Prerequisite: course 118. Fundamental aspects of skeletal muscle contraction and metabolic demands under various exercise and training conditions, including neural and endocrine mechanisms potentially involved in inducing specific training effects on skeletal muscle, liver, kidney, gastrointestinal tract and brain.

210C. Environmental Factors. Prerequisites: courses 122, 122L, 124, 124L, and 126, 126L, or consent of instructor. Environmental pressures of high altitude and underwater diving as well as temperature factors as they affect work performance; adaptation to unusual environments.

211. Advanced Exercise Cardiovascular Physiology. Lecture, two hours; laboratory, three hours. Prerequisites: course 210A and Physiology 101. Attention is focused on cardiovascular adaptations to acute exercise as well as adaptations associated with regular exercise training.

212. Advanced Cardiovascular Research Techniques. Lecture, one hour; laboratory, four hours. Prerequisites: course 211 and consent of instructor. One hour of lecture and four hours of laboratory per week to provide experience in working with experimental animals, conducting surgery, and an understanding of the use of flow meters, radioactive microspheres, pressure transducers and other techniques commonly used in cardiovascular research.

221. Underwater Kinesiology. Prerequisites: courses 122, 122L, 124, 124L, or consent of instructor. Biomechanical, physiological, methodological and behavioral limitations to underwater activities.

230A. Muscle Dynamics. Prerequisites: courses 122, 122L, 134A recommended. Integrated study of electrical and dynamic parameters of muscle-action and to include topics in length-tension and force-velocity interrelationships; critical analysis of electromyographic and digital computer techniques.

230B. Musculoskeletal Mechanics. Prerequisites: courses 122, 122L, Mathematics 3A, 3B. Mechanical parameters of the moving human musculoskeletal system including the use of cinematographic, force platform and digital computer techniques; topics include biomechanics, biodynamics, and empirical data modeling.

237. Advanced Kinesiology. Prerequisite: course 137 or consent of instructor. Selected studies in therapeutic exercises.

240. Neuromuscular Systems for Motor Control. Prerequisites: courses 140 and Psychology 115 (or equivalent). Proprioception, the skeleto-motor and fusi-motor systems and their control by spinal reflexes and supraspinal centers including the cerebellum, basal ganglia and cerebral cortices.

241. Theories of Voluntary Motor Control. Prerequisites: courses 240 and 250. Exploration and discussion of neural control system for voluntary movement, including alpha-gamma linkage and closed versus open loops. Some attention will be given to neural models for motor learning and memory.

M243A, Brainstem Control of Rhythmic Movements. (Same as Anatomy M226A and Oral Biology M207A.) Lecture, two hours. Discussion of the central nervous system mechanisms which coordinate and control the contraction patterns of the muscles which are involved in movement such as suckling, chewing, swallowing, speech, respiration and locomotion. Emphasis on the interaction among brain stem reflexes, pattern generators and "voluntary" control centers. To be offered in the Fall Quarter.

M243B. Brainstem Control of Rhythmic Movements. (Same as Anatomy M226B and Oral Biology M207B.) Lecture, two hours. Prerequisite: course M243A or Anatomy M226A or Oral Biology M207A. For description, see course M243A.

M250. Behavioral Approach to Motor Control. Prerequisite: course 120L or consent of instructor. An information processing approach to skill acquisition and performance. Particular emphasis on current theories of motor control from the behavioral literature.

M255. Social Processes and Motor Behavior. Prerequisite: course 178 or consent of instructor. Influence of social psychological processes on motor behavior with particular attention to the influences of situational variables in the social environment, interpersonal interactions, and the interaction between these external and internal factors on motor behavior.

M258. Dimensions of Movement Behavior. Prerequisites: courses 120, 120L, 160, and Education 210A, 210B; or consent of instructor. An exploration of movement behaviors, factors influencing these behaviors, and formulation of hypotheses. Sub-behaviors to be considered are expressive movement, movement preferences and communicative movement.

M261. Kinesiology.
262. Movement Disorders. Prerequisite: course 160 or 165 or consent of instructor. Current research in developmental and behavioral aspects of movement disorders. Topics include early identification and intervention, perceptual and cognitive relationships, and evaluation of movement training programs.

Mr. Cratty, Mr. Keogh

*276. Play Theory. A critical analysis of theoretical propositions explaining the phenomenon of play.

The Staff

291A-291B-291C. Seminars in Biology of Exercise. Lecture, four hours. Prerequisites: courses 210A, 210B. Selected topics on current issues of the biological aspects of exercise. Students will be required to present a two-hour seminar. The Staff

222A-222B-222C. Seminars in Biomechanics. Prerequisites: courses 230A, 230B, and consent of instructors. Selected topics in biomechanics of movement. Students will be required to present two one-hour seminars. The Staff

294A-294B-294C. Seminars in Neuromuscular Control. Prerequisites: courses 140 and 118, and either 210B or 240. Selected topics on the muscular and neural determinants of movement behavior. The Staff

295A-295B-295C. Seminars in Movement Development, Learning and Performance. Lecture, four hours. Prerequisites: courses 240, 250, 260. Selected topics on current issues in either development, acquisition and control of human movement. Students will be required to present a two-hour seminar. The Staff

Professional Courses

430. Sports Medicine. Prerequisites: course 130; 132 recommended. A survey of advances in athletic training, etiology and diagnostic techniques relative to rehabilitation and protection from injury in sport; professional and legal aspects of sports medicine. The Staff

495. Inservice Practicum for Teaching Assistants in Kinesiology. (1/2 course) Prerequisite: consent of instructor. Supervised practicum in teaching laboratory courses in Kinesiology; material preparation and use of teaching aids. Course required for all teaching assistants. Units do not apply toward degree objectives. Grading S/U basis only. The Staff

Individual Study and Research

501. Cooperative Program. (1/2 to 2 courses) Prerequisites: approval of UCLA Graduate adviser and Graduate Dean. Approval of host campus instructor, Department Chairman and Graduate Dean. The course is used to record the enrollment of courses taken under cooperative arrangements with neighboring institutions. To be graded S/U. The Staff

596. Individual Studies for Graduate Students. (1/2 to 2 courses) Prerequisites: course petition signed by the faculty sponsor, graduate adviser and Graduate Affairs Committee Chair. The course is used to record the enrollment of courses taken under cooperative arrangements with neighboring institutions. To be graded S/U. The Staff

598. Research for the Preparation of the Master’s Thesis. (1/2 to 4 courses) To be arranged with the faculty member serving as the student’s thesis committee chair. The course section will be identified by a two-letter code using the initials of the faculty member’s initials (see department for code). Course 598 may not be used to fulfill any course requirement for the Master’s degree but may be repeated as necessary. Graded on a S/U basis. The Staff

Latin American Studies (Interdepartmental)

(Office, 10347 Bunche Hall)

Rolando Armojo, M.D., M.P.H., Professor of Epidemiology.

Shirley L. Arora, Ph.D., Professor of Spanish.

Bertram Bussell, Ph.D., Professor of History.

A. Michael Cardenas, Ph.D., Associate Professor of Anthropology.

Frank G. Mittelbach, M.A., Associate Professor of Management.

John Hawkins, Ph.D., Professor of History.

Carlos P. Otero, Ph.D., Professor of Spanish and Portuguese.

Timothy Earle, Ph.D., Professor of Anthropology.

Ralph Freirichs, Ph.D., Assistant Professor of Epidemiology.

Susan Hecht, Ph.D., Assistant Professor of Geography.

Robert Hill, M.Sc., Assistant Professor of Botany.

Susan Princk, Ph.D., Assistant Professor of Spanish.

Antonio Quiñones, Ph.D., Assistant Professor of Spanish and Portuguese.

Jorge Preloran, Ph.D., Assistant Professor of Theater Arts.

Antonio Quiñones, Ph.D., Assistant Professor of Spanish and Portuguese.

John Skirius, Ph.D., Assistant Professor of Spanish.

Carlos Velez, Ph.D., Assistant Professor of Anthropology.

Maurice Zeitlin, Ph.D., Professor of Sociology.

 Rape L. Beals, Ph.D., Emeritus Professor of Anthropology.

John A. Crow, Ph.D., Emeritus Professor of Spanish.

Joyce S. Emerson, Ph.D., Emeritus Professor of Nutrition.

John E. Englekirk, Ph.D., Emeritus Professor of Spanish.

J. A. C. Grant, Ph.D., L.L.B., Emeritus Professor of Political Science.

Bertram Bussell, Ph.D., Emeritus Professor of Education.

Mildred E. Mathias, Ph.D., Emeritus Professor of Botany.

Anibal Sanchez-Reulet, Ph.D., Emeritus Professor of Spanish.

Ichak Adizes, Ph.D., Associate Professor of Management.

Theodore Andersen, Ph.D., Associate Professor of Business, Economics and Finance.

Alfonso F. Cardenas, Ph.D., Associate Professor of Engineering.

Christopher Donnan, Ph.D., Associate Professor of Anthropology.

Lectra Princk, Ph.D., Associate Professor of Planning.

Pierre-Michel Fontaine, Ph.D., Associate Professor of Political Science.

Juan Gomez-Quiliones, Ph.D., Associate Professor of History.

John Hawkins, Ph.D., Associate Professor of Education.

Allan Johnson, Ph.D., Associate Professor of Anthropology.

Cecelia Klein, Ph.D., Associate Professor of Art.

David Kunzel, Ph.D., Associate Professor of Art.

David E. Lopez, Ph.D., Associate Professor of Sociology.

Gerard Luzzuriaga, Ph.D., Associate Professor of Spanish.

Pamela Munro, Ph.D., Associate Professor of Linguistics.

Raymond Neutra, Ph.D., Associate Professor of Epidemiology.

Alfred E. Osborne, Ph.D., Associate Professor of Management.

David O’Shea, Ph.D., Associate Professor of Education and Sociology.

Susan Kaufman Purcell, Ph.D., Associate Professor of Political Science.

Dwight W. Reid, Ph.D., Associate Professor of Anthropology.

Richard M. Reeve, Ph.D., Associate Professor of Spanish.

Hans Schollhammer, M.B.A., D.B.A., Associate Professor of Management.

Susan Schonewald, Ph.D., Associate Professor of Public Health.

Allegre Snyder, M.A., Associate Professor of Dance.

Daniel Berry, Ph.D., Assistant Professor of Engineering.

Timothy Earle, Ph.D., Assistant Professor of Anthropology.

Susan Schonewald, Ph.D., Associate Professor of Geographical and Planning.

Jose Oviedo, Ph.D., Professor of Spanish.

Jonathan Maxwell, Ph.D., Associate Professor of Anthropology.

John A. Crow, Ph.D., Emeritus Professor of Anthropology.

Stanley L. Robe, Ph.D., Emeritus Professor of Planning.

Johannes Wilbert, Ph.D., Emeritus Professor of Anthropology.

James W. Wilkie, Ph.D., Professor of History.
The Master of Arts Degree

Admission Requirements. In addition to University minimum requirements, the B.A. degree in Latin American Studies constitutes the normal basis for admission. Applicants with a degree in another field can be admitted, but must complete certain undergraduate prerequisites subsequent to admission. Applicants with Latin American field experience or special methodological studies will be given special consideration. All applicants should meet minimum requirements in at least one language of Latin America. The following items are required:

1. Three academic letters of recommendation, unless the applicant has been away from school for some time in which case one of the letters may be from an employer.
2. A minimum of 3.00 or "B" average in the junior-senior years of college.
3. A statement of purpose discussing the applicant's background in Latin American Studies, proposed program of study, and future career plans.
4. A minimum score of 1000 on the Combined Verbal and Quantitative Aptitude sections of the Graduate Record Examination (GRE).
5. A resume or curriculum vitae describing both academic and Latin American experience.

Students are admitted each quarter. Application deadlines are:

- Winter Quarter — November 1
- Spring Quarter — February 1
- Fall Quarter — July 1

Fellowship applications for the academic year are due on January 31 prior to the Fall Quarter for which application is made. Prospective students may write for departmental brochures to the Academic Programs Office, Latin American Center, 10347 Bunche Hall, UCLA, Los Angeles, CA 90024.

Advising. Academic Programs Office, Latin American Studies, 10347 Bunche Hall, UCLA, Los Angeles, CA 90024. Tel (213) 824-6571. Academic advising is supervised by the Coordinator of Academic Planning and Student Programs who serves under the direction of the Interdepartmental Program in Latin American Studies (M.A.). In addition to the Coordinator, who is a teaching member of the Latin American Center, the Office of Academic Programs is staffed by a full-time student affairs coordinator who assists in program counseling, preparation of student petitions, and processing of student records.

Major Fields or Subdisciplines. Students are expected to develop and integrate three fields in Latin American Studies, to be selected from the following: Anthropology, Art, Economics, Engineering, Education, Folklore, Geography, History, Law, Library Science, Linguistics, Management, Music, Political Science, Portuguese, Public Health, Sociology, Spanish, Theater Arts, and Urban Planning. At least one of the chosen fields must be a social science.

Foreign Language Requirements. Proficiency equivalent to 24 quarter units of university level Spanish and 12 quarter units of university level Portuguese or 16 quarter units of university level Portuguese and 20 units of university level Spanish. Since these courses do not count toward the M.A. degree, students are encouraged to pass these proficiency levels by examination. A major Indian language of Latin America may be substituted for either Spanish or Portuguese. Students must fulfill all the foreign language requirements by examination or petition for a waiver of the examination if they have gained competency in another manner (i.e., native speaker, upper division coursework Peace Corps Service).

Course Requirements. Two plans are available. For the Comprehensive Examination Plan, a minimum of nine courses are required, to be distributed among three fields or disciplines either on a 2-2-2, or 4-3-2 basis. Of the nine courses, five must be at the graduate level, with at least one falling in each of the three fields.

For the Thesis Plan (which requires prior approval), a minimum of 10 courses are required, to be distributed 4-3-3 among three fields. Three graduate level courses are required in the first field, with one each in the two minor fields.

All courses must be selected from the department-approved list of Latin American Studies Courses. Other courses must be petitioned in advance.

Language courses, in contrast with linguistics and literature courses, cannot be applied to the M.A. degree.

Graduate courses may be repeated unless they are of the lecture type.

Comprehensive Examination Plan and Thesis Plan.

Comprehensive Examination Plan. In addition to course requirements, students completing the M.A. degree under the Comprehensive Examination Plan must prepare a research paper on an approved topic that integrates two of the three fields in which coursework has been undertaken.

At the beginning of their final quarter of coursework, students will choose a 3-member faculty committee responsible for supervising preparation of the research paper. The committee will consist of one professor from each of the student's two preferred disciplines, one of whom will chair the committee, and a third professor from the student's third discipline who will serve as a field observer, or outside reader. Committee members must prove the student's topic in advance and must receive a draft of the research paper at least five weeks prior to the end of the quarter in which the student plans to graduate. After reviewing the draft with the student, committee members will make recommendations for revision and indicate whether the student should proceed to prepare a final draft. The committee members will evaluate the final draft and, if the candidate's work meets the University standards of scholarship, will recommend the award of the M.A. degree. A copy of the research paper is filed in the Academic Programs Office of the Latin American Center.

Thesis Plan. Although students are generally expected to follow the M.A. Comprehensive Examination Plan, in special cases they may be allowed to follow the M.A. Thesis Plan. The Thesis Plan is especially justified when it involves fieldwork or when it is developed in relation to the Latin American Studies Seminar 250 AB.

Students wishing to follow the Thesis Plan must develop a carefully-prepared proposal to be approved by the Academic Coordinator in consultation with the student's faculty committee chairperson. To be approved, the proposal must provide sound justification for the Thesis Plan, including provisions for funding any planned field research.

Once the Thesis Plan option has been approved, the student will choose a 3-member faculty thesis committee consisting of one professor from each of the student's three disciplines, one of whom has already agreed to serve as chairperson. The thesis committee will work closely with the student in the development, writing, and revision of the thesis and will be responsible for reading, evaluating, and approving the drafts and final version of the
student's thesis, ensuring thereby that it meets the University standards of scholarship. Once the final version is approved, the thesis committee recommends the award of the M.A. degree. The thesis is filed with the Graduate Division for deposit in the University Research Library.

Advancement to Candidacy and Award of Degree. By the end of the quarter prior to that of graduation, the student must file for advancement to candidacy with the Graduate Division. Two positive votes among the 3-member faculty examination committee constitutes a pass on the results. The committee will evaluate the paper in the following terms: Honor Pass (a unanimous vote), Pass, and Fail (majority vote). No reexaminations are permitted.

Time to Degree. A full-time student with no deficiencies upon admission can expect to complete all requirements for the M.A. degree within four academic quarters. Students who undertake field research in conjunction with the thesis plan may take up to seven academic quarters.

500 Series Courses. No more than 8 quarter units of 500 series courses may apply toward the total course requirements for the M.A. degree. No more than 4 quarter units of 500 series courses may be applied toward the minimum graduate level courses for the M.A. degree.

Other Relevant Information

Articulated and Concurrent Degree Programs. Several options are available to combine the M.A. in Latin American Studies with a professional degree. Upon acceptance by both the Latin American Studies program and the respective professional school, students may pursue both degrees simultaneously. These dual degree programs permit students to complete their work in less time than would be required if the degrees were pursued separately. Professionalization options are currently available with the Schools of Education, Engineering, Library and Information Science, Management, and Public Health.

Individual Doctoral Programs. Students may design an individual doctoral program in Latin American Studies. An explicit proposal must be submitted to the student's M.A. committee for analysis and endorsement, and then be submitted to the Graduate Council for approval.

Certificate of Resident Study for Foreign Students. This certificate may be issued to foreign students who do not seek the M.A. degree but (a) complete at least nine courses in full-time resident study with a grade point average of at least 3.00; (b) conduct satisfactorily a program of organized studies; (c) have a student visa requiring return to home country upon completion of studies in the United States.

Disqualification and Appeal of Disqualification. The specific conditions which may lead to termination are: 1) scholarship (failure to maintain a 3.0 average beyond a time determined to be satisfactory by the M.A. committee), or 2) failure to make normal progress toward the degree (e.g., completion of language requirements, courses within the selected fields of concentration, and research for the M.A. project). Recommendations for termination are made by the M.A. committee, acting in consultation with the Academic Coordinator and, when appropriate, the student's M.A. committee. If deemed necessary, the student will then be informed that he/she is to be dropped from the program. Such a student may appeal termination by submitting a letter to the chairperson of the M.A. committee stating the reasons why he/she should remain in the program, which the chairperson will submit to the entire M.A. committee for final consideration.

295. Field Work in Archaeology.

250C. Interdisciplinary Topics in Latin American Studies. (Prerequisite: consent of instructor. A seminar devoted to selected topics of an interdisciplinary nature. Normally, a reading knowledge of the Spanish or Portuguese language is essential.)

Individual Study and Research

501. Cooperative Program. (1 to 2 courses) Requires approval of Graduate Advisor and Graduate Dean. Approval of host campus Instructor, Department Chairman, and Graduate Dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. To be graded S/U.

596. Directed Individual Study or Research. The course section will be identified by a two-letter code using the initials of the faculty sponsor (see department for code). A total of 8 units may be taken for credit; only one course (4 units) will apply toward the minimum graduate course requirement for graduate degrees in Kinesiology. Offered on a letter-grading basis only.

597. Preparation for the Comprehensive Examination for the Master's Degree. This course is ordinarily taken only during the quarter in which the student is being examined. A grade of Satisfactory (S) or Unsatisfactory (U) will be assigned by the Committee on the basis of the student's performance.

598. Research for and Preparation of the Master's Thesis. A grade of Satisfactory (S) or Unsatisfactory (U) will be assigned by the professor supervising the master's thesis. Only one course may apply toward the minimum course requirement for the degree.

501. Cooperative Program. Approval of Graduate Advisor and Graduate Dean. Approval of host campus Instructor, Department Chairman, and Graduate Dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. To be graded S/U.

597. Preparation for the Comprehensive Examination for the Master's Degree. A grade of Satisfactory (S) or Unsatisfactory (U) will be assigned by the Committee on the basis of the student's performance.

598. Research for and Preparation of the Master's Thesis. A grade of Satisfactory (S) or Unsatisfactory (U) will be assigned by the professor supervising the master's thesis. Only one course may apply toward the minimum course requirement for the degree.

scores, and, in appropriate cases, such additional factors as racial/ethnic background; ability in languages other than English; work experience or career achievement; previous positions of leadership or other special achievements; prior community or public service; unusual life experiences; physical handicap or other disadvantage overcome; career goals; economic disadvantages; and any other characteristic which may indicate that the applicant will contribute to the educational and other benefits of a diversified student body.

Applicants interested in further information about the academic programs offered by the School of Law may obtain the Announcement of the School of Law by contacting the Admissions Office, School of Law (213) 825-2080.

### General Description

The School of Law offers a 3-year curriculum leading to the J.D. degree. The School is accredited by the California Committee of Bar Examiners, a member of the Association of American Law Schools and is on the approved list of the American Bar Association. Graduates of the School are qualified to become applicants for admission to practice in any state of the United States.

The School is designed to produce lawyers who are well-prepared for the various private and public roles which are assigned to members of the legal profession. Students do not undertake a specific major but have the opportunity to enrol in a wide variety of courses dealing with various legal fields. In addition to the courses in the regular Law School curriculum, students may take two courses for credit in other disciplines in the University. Concurrent degree programs are available for qualified law students with the Graduate Schools of Management and of Architecture and Urban Planning.

The Law School program also permits students to participate in clinical training. These activities consist of fieldwork in a variety of Federal and State agencies accompanied by seminars in the Law School which seek to analyze and expand upon the agency experience. The School also offers an extern program which gives the students the opportunity to work in legal agencies away from the School for as long as six months (including the summer), for which they receive academic credit. Extern programs have been offered in Washington, D.C.; Alaska, Hawaii and on Indian reservations.

### Admission

Students beginning their professional work are admitted only in the Fall. Applicants must have received the baccalaureate degree from a university or college of approved standing prior to the time at which they begin their work in the Law School. Applicants are also required to take the Law School Admission Test. The Admissions committee considers grades and test
mendation. For the School's brochure and application form, applicants may write to the Graduate School of Library and Information Science, 120 Powell Library Building, UCLA, 405 Hilgard Avenue, Los Angeles, California 90024.

Advising. The GSLIS Graduate Adviser's office is located in 300H Powell Library Building, UCLA, Los Angeles, California 90024.

Upon being accepted into the School, each student is assigned a faculty member for initial counseling and direction. Normally, the student retains this faculty member as an interim counselor for a year or less, until such time as a regular faculty adviser is selected, based on the student's interest and specialization. Once chosen, the faculty adviser is in charge of the student's specialization paper, and gives specific academic advice in matters pertaining to the student's specialization, independent study, and related matters.

Admission to Master's Program. Graduate Record Examination. Applicants must have passed the General Aptitude Test of the Graduate Record Examination with a minimum combined (Verbal and Quantitative) score of 900. The examination must have been completed within five years prior to application for admission. The GRE is required as evidence of verbal and quantitative skill rather than aptitude for graduate study, so it is required whether or not applicants have proved success in graduate study. Applicants whose upper division or postbaccalaureate grade point average is slightly below 3.0 and who achieve a combination of Verbal and Quantitative score of at least 3.0 is required in all courses undertaken while in the School.

Basic Professional Competence. A course of study is required to provide evidence of basic professional competencies and of knowledge in a field of specialized competence. As a result, the School normally requires each student to enroll in three courses per quarter in order to complete the program in six quarters. A grade point average of at least 3.0 is required in all courses undertaken while in the School.

Specialized Competence. Completion of a course of study is required as evidence of knowledge of a field of specialization in librarianship, bibliography, and information science. The field of specialization and the specialized course program must be approved by a faculty adviser. The requirement is ordinarily met by the completion of nine additional courses in the School and/or in other departments. The amount of coursework required will depend upon the relevant experience and graduate study completed by the student prior to admission to the School. Reducing the number of courses to less than nine, however, requires that the student, jointly with the faculty adviser, identify exactly what courses from prior academic work are applicable to the chosen area of specialization. A petition must then be submitted to the faculty for approval.

Cooperative Degree Programs. Several specializations represent cooperative programs between the School and other schools and departments of the University through which the student may be able to obtain two degrees in a shorter period of time than would be possible otherwise.

Latin American Studies. This specialization is an articulated degree program of the School and the Interdepartmental Degree Committee for Latin American Studies. The student can obtain two degrees—the M.L.S. and the M.A. in Latin American Studies—in three years. Participation in the program requires that the student be accepted for admission to both degree programs and complete coursework that satisfies the combined set of requirements. Normally, this involves one year in the GSLIS in which the basic competencies in Library and Information Science are acquired, one year in coursework in Latin American Studies, and a final year in which coursework is combined with internships and the development of a specialization paper that completes the requirements.

Management. This specialization is a concurrent degree program of the School and the Graduate School of Management. The student can obtain two degrees—the M.L.S. and the M.B.A.—in three years. Participation in the program requires that the student be accepted for admission to both degree programs and complete coursework that satisfies the combined set of requirements. Normally, this involves one year of coursework in each of the two schools, in which the basic professional competencies in Management and in Library and Information Science are successively obtained. The program then is completed by a third year of coursework, internship and fieldwork study, and a specialization paper that satisfies the requirements of both programs.

History. This specialization is a concurrent degree program of the School and the Department of History. The student can obtain two degrees—the M.L.S. and the M.A. in History—in three years. The best sequence of coursework for the individual student should be discussed with the advisers from both the School and the Department of History.

Thesis or Comprehensive Examination Plan. Specialization Paper. In addition to taking coursework in the area of specialization, each student must complete a paper on a topic within the field. A specialization paper is an in-depth examination of a problem in an area of the student's competence. It should reflect the student's competence by showing an understanding of the place and significance of a specific problem in relationship to the entire field of specialization. It should represent new work and/or analysis in the problem area, but it does not have to represent an original approach. It ought to be well enough written and on a topic of enough interest to be considered for publica-
tion or distribution. The specialization paper is required even if a student has an advanced academic degree in which a thesis or dissertation was a requirement.

Comprehensive Examination. The student must pass a Comprehensive Examination designed to demonstrate the student's understanding of library and information services as a totality. It does not cover the basic professional competencies individually; rather it deals with the field in an unified form. All of the basic competencies must be drawn upon in order to successfully pass the examination. The student is expected to demonstrate an understanding of the interrelated nature of all of the competencies when confronted with a major issue of concern in the field.

Time to Degree. The program leading to the M.L.S. degree is designed to meet the goals and objectives outlined below. It is a 2-year program, consisting normally of three 4-unit courses each quarter during six consecutive academic quarters, for a total of 18 courses. In this respect, the M.L.S. program at this School differs from those of other library schools in the United States, which are generally of one year's duration.

500 Series Course Limitations. The School specifies that no more than 8 quarter units of 500 series courses may be applied to the requirements of the Graduate Division. This is a 2-year program, consisting normally of three 4-unit courses each quarter during six consecutive academic quarters, for a total of 18 courses. In this respect, the M.L.S. program at this School differs from those of other library schools in the United States, which are generally of one year's duration.

In order to enroll in any S/U graded course, including 500 series courses, the student must be in good standing (i.e., have at least a 3.0 average for work undertaken while in the School).

Disqualification and Appeal of Disqualification. Termination of graduate status may be recommended if student fails to maintain substantial progress toward completion of the degree; or grade point average falls below 3.0 for two consecutive quarters; or failure on the Comprehensive Examination on two successive tests. Such a recommendation is made by the Executive Committee of the Faculty based on the advice of the student's faculty adviser and the Dean. The Dean will notify the student in writing of the decision together with the reasons for it. Appeals of such actions may be made by formal petition to the faculty by the student.

Course Options. In addition to the formal coursework in the School or in other schools and departments as specified above, the student has a number of options.

The Internship Program. During the second year, the student may apply for an internship, of one to three quarters, either on-campus (an academic or special library) or off-campus at a nearby academic, public, special, or school library. The internship is a regularly scheduled course, and may be counted as part of the 18 required courses. Some internships carry a small stipend, but most do not. The internships consist of actual practice at a variety of professional tasks in a library, under professional supervision, on a daily or frequent basis, for a specified number of hours per day. In addition, there is a weekly evaluation meeting with the director of the internship program at the School. All internship sites must receive the prior approval of the director, and there are frequent on-site inspections made by the director. The internship is not obligatory, but many graduates from the School have referred to it as the most valuable experience in their academic programs.

Validation Examinations. A student may feel already competent in the material covered in a required course. In such cases, the student may petition to take a validation examination in lieu of the course. The petition must be submitted prior to beginning any independent study set by the instructor as a preparation for taking the examination. Petitions for such validation examinations are not normally approved for courses, such as cataloging, that require extensive laboratory work for development and evaluation of competency.

Credit for Prior Coursework, Degrees, or Competencies. A student may petition to have prior coursework counted as applicable to higher specialization. Such courses might include historical studies, musicology, courses in the sciences or in literature, or similar work applicable to specialization in such areas. To do so, the student must have chosen an area of specialization, and the petition must clearly show the relationship of the prior coursework to the chosen specialization.

Thus, although students with master's degrees in subject fields may find that their mastery of a specific subject will be a help in the field of librarianship, they should not anticipate that their curriculum in librarianship will be automatically shortened or any part of it omitted. Only in unusual cases, may credit be allowed for librarianship coursework taken elsewhere. Persons with considerable library coursework taken elsewhere are advised to consider other means for completion of their degree objectives.

Courses in other Departments. Coursework in other departments is encouraged in several ways in the program. First, students in every specialization are urged to take courses, such as managerial accounting, from other departments when these courses are regarded as of general value. Second, particular specializations require knowledge of techniques provided by coursework in other departments. Third, specializations related to service in particular subject areas frequently require coursework in the department involved.

The Graduate Cross-Enrollment Program. The library schools of the University of California Los Angeles (UCLA) and the University of Southern California (USC) have arranged for a cooperative exchange of credits and a sharing of resources to the mutual advantage of both schools. The objectives of the cooperative curricular exchange are: (1) to provide an opportunity for students in each school to have access to specialized courses in the other school; (2) to exchange ideas, concepts, and philosophies between the students and faculties of the two schools. A free daily bus service operates between the two campuses to facilitate these objectives.

The Certificate of Specialization Program

The Certificate of Specialization Program meets the need for specialized training in various areas of librarianship, information science, and bibliography, as well as research competence, especially in specialized fields.

Admission requirements vary slightly for each field of specialization, but the basic requirements are: a bachelor's (or higher) degree in letters and science, a 1-year professional degree (MLS), and unconditional admission to graduate status by the UCLA Graduate Division.

A student's course program may begin in any quarter of the academic year. If a student is admitted for a preliminary quarter to complete prerequisite courses, the preliminary quarter will not be counted in the minimum residence requirements.

Meeting the specified requirements for a field of specialization does not automatically assure admission to the program. Candidates are selected from qualified applicants based on relevance of education and/or experience and the suitability of the available course of instruction to the objectives of the applicant.

Part-time enrollment is encouraged; individual advising will provide flexibility in scheduling. Opportunities for relevant coursework outside the Department, and internships, both on and off campus, will be made available.

Three general areas of specialization have been authorized: librarianship, bibliography, and information science. Further specialization within these fields is possible. A minimum of nine courses (100-, 200-, 400-, and 500-series) must be completed in the Graduate School of Library and Information Science and other departments of the University. A research paper, bibliographical study, or literature survey appropriate for publication (in a professional or scholarly journal or as a separate paper) must be completed in the final quarter of study, in connection with enrollment in LS 596, "Directed Individual Study or Research." To remain in graduate status, students must maintain a grade point average of 3.0 (i.e., B).
Flexibility is provided for the working librarian, with part-time enrollment encouraged and the availability of concurrent enrollment through University Extension. No time limits are set for the completion of the requirements for the Certificate.

### The Ph.D. Degree

**Admission Requirements.** The following are the established formal requirements, first, for admission to the School with the intention of pursuing the Ph.D. program and, second, for admission to the Ph.D. program itself:

**Graduate Division Requirements.** Admission to the School requires admission to graduate status in compliance with application forms, procedures, and deadlines announced by the Graduate Division. In addition, the School has its own supplementary form and requirements for admission. Specifically, the School requires a master’s degree or equivalent in an academic or professional field of study from an institution of recognized standing, representing academic preparation equivalent to that required for a comparable degree from the University of California. A minimum average of B, or its equivalent, is required for all postbaccalaureate study.

**GSLIS Procedures.** Applicants must have passed the General Aptitude Test of the Graduate Record Examination with a minimum total score of 1200, with at least 500 on each of the two parts (Verbal and Quantitative). The examination must have been completed within five years prior to application for admission. The School requires three letters of recommendation from persons qualified to evaluate the applicant’s ability to succeed in advanced graduate study. A “statement of interest” is required that identifies the applicant’s proposed area of specialization and it should be supplemented by appropriate evidence of the applicant’s qualifications for pursuing a doctoral program in it. These are all used to evaluate the potential the applicant has for becoming an outstanding scholar, teacher, or practitioner. The statement of interest is also used to determine whether the specializations provided by the School’s doctoral program are appropriate to the applicant’s needs; it should therefore be as specific as possible.

**Specific Competencies.** The School regards competency with foreign languages, statistics, and computer programming as important for success in the doctoral program as for success in the M.L.S. program. The same level of competence in each is therefore a minimal requirement. Additional competence in each, beyond that specified for the M.L.S. degree, may be required by the applicant’s chosen area of specialization.

**Basic Professional Competence.** Evidence of basic professional competence is required. This would be satisfied by an M.L.S. degree from a program accredited by the American Library Association. Alternatively, it could be satisfied by completion of nine specified courses (400, 402, 404, 410, 411, 420, 421, 430, 441) taken in the School.

**Work Experience in Libraries.** While work experience in a library is not a requirement for admission, consideration will be given to such experience in evaluation of candidates. For the School’s brochure and application form, write to the Graduate School of Library and Information Science, 120 Powell Library Building, UCLA, 405 Hilgard Avenue, Los Angeles, CA 90024.

**Advising.** Upon admission to the School, a temporary faculty adviser will be assigned based on the evidence in the student’s statement of interest at the time of application and on the general commitments of the faculty. The student is expected to choose a regular adviser no later than the end of the first year in the School.

The adviser has the responsibility to assist the student in planning a program of study that meets the requirements of the Ph.D. program and to guide the student in the dissertation research.

Until the student is advanced to candidacy, there will be yearly formal evaluations of progress that involve the student, the Dean, the faculty adviser, and other faculty. After advancement to candidacy, the evaluation of progress is the responsibility of the formal doctoral committee. The GSLIS Graduate Adviser is located in 300H, Powell Library Building, UCLA, 405 Hilgard Avenue, Los Angeles, CA 90024.

**Admission to the Doctoral Program.** In addition to the University minimum requirements (i.e., an acceptable bachelor’s degree, a “B” average in upper division and prior graduate work, and the GRE Aptitude test), the School requires the following for admission to the doctoral program:

1. Total score of 1200 or more on the GRE Aptitude test, with at least 500 in each of the two parts (Verbal and Quantitative).
2. A master’s degree, in either a professional field (for example, librarianship) or an academic field, from an accredited university or college.
3. A college level course in statistics.
4. Special foreign language competence, beyond that specified for the M.L.S. degree, will be individually determined on the basis of the student’s proposed area of specialization.

A reading knowledge of one or two foreign languages, preferably French, German, Russian, and Spanish.

a) In the case of two foreign languages, minimum evidence of competency is defined as completion of three quarters or two semesters (or completion of quarter Course 3) of study of each language with minimum grades of C. An examination is required if the foreign language study was completed earlier than 10 years prior to application.

b) In the case of one foreign language, evidence of competency is completion of five quarters or four semesters (or completion of quarter Course 5) of study of the language with minimum grades of C, or passing the ETS examination with a score of at least 500.

5. Ability to make applications of a standard programming language, especially to bibliographic problems.

6. Interviews with two faculty members of the School, usually jointly as a panel (or with two people designated as representatives for the School if it is not possible for the applicant to visit the School).

7. Three letters of recommendation from persons qualified to evaluate the candidate’s ability to succeed in advanced graduate study.

8. A “statement of interest” identifying the applicant’s proposed area of specialization accompanied by appropriate evidence of qualifications for pursuing a doctoral program in it.

9. Completion of the following courses, or their equivalent (normally as evidenced by an M.L.S. from an ALA accredited program): 400, 402, 404, 410, 411, 420, 421, 430, 441.

**Major Fields and Subdisciplines.** General Fields of Emphasis. Each candidate will be expected to specialize in a subfield in one of three major fields:

1. Selection, acquisitions, identification, preservation, and collection development of information materials.
2. Storage, retrieval, interpretation, dissemination, and utilization of information content of those materials.
3. Administration and management of libraries and information centers.

The School strictly limits the specific subfields which, at any given point in time, will be acceptable for doctoral work. Initially, these specific subfields will be as listed below in this section, because they are the ones in which the present faculty has sufficient strength and depth to assure adequate coverage. It must be recognized that, as time goes on, the character of the faculty will change and new areas of strength will be developed. Even then, however, the specific fields will continue to be carefully delineated and limited in number.

For example, there are three specific subfields on which initial emphasis will be placed, one in each of the three major general fields:

1. **Historical and Analytical Bibliography**
2. **Systems Analysis and Design for Libraries and Information Services**
3. **Management of Academic Libraries**
Course Requirements. There are no required courses in the program, but courses or their equivalents are required for admission (see item (9) above).

Written and Oral Qualifying Examinations
There will be four Written Qualifying Examinations, in each of the following areas of study: Librarianship, covering the aspects of the library as an institution—international comparison, administration and management, governing legislation, the social context of libraries and information services, interinstitutional cooperation, special aspects of various types of libraries (public, academic, school, special), the needs of constituencies, the profession, the economics of library operation and service.

Bibliography, covering the aspects of the library as a collection of books and other forms of recorded information, including evaluation, selection and acquisitions of such materials, description and bibliographical control of them, storage and physical control of them.

Information Science, covering the aspects of the library, as a collection of information—reference, formal (computer) techniques for retrieval, information systems analysis and design, the economics of information distribution.

History, covering the growth of library and information science—the history of printing, reference, formal (computer) techniques for retrieval, information systems analysis and design, the economics of information distribution.

Library and Information Science—the history of printing, reference, formal (computer) techniques for retrieval, information systems analysis and design, the economics of library operation and service.

The proposal must be reviewed and formally accepted within two years after passing the Written Qualifying Examination. During the Oral Qualifying Examination, the committee must decide whether the dissertation with modifications is accepted or is not accepted. There may be one negative vote if all members of the committee are certifying; none if only three are certifying. The doctoral examination committee must decide with no more than one negative vote, whether the candidate has passed the Final Oral Examination.

Normal Progress Toward the Degree

Final Oral Examination: A Final Oral Examination will be required of all candidates.

Disqualification and Appeal of Disqualification. Termination of graduate status may be recommended if student fails to maintain substantial progress toward completion of the degree; or grade point average falls below 3.0 for two consecutive quarters; or failure on the Written or Oral Qualifying Examinations, after two successive tests. Such a recommendation is made by the Executive Committee of the Faculty based on the advice of the student’s faculty adviser and the Dean. The Dean will notify the student in writing of the decision together with the reasons for it. Appeals of such actions may be made by formal petition to the faculty by the student.

Upper Division Courses
110. Information Resources and Libraries. Prerequisite: Sophomore Standing or consent of instructor. Provides an introduction to bibliographic and information resources and relevant research methodology. Covers both general and specialized materials. Designed to facilitate knowledgeable use of libraries and efficient retrieval of information. Some sections will focus on specific subject areas (such as Science and Technology). Letter grade.

111A–111D. Ethnic Groups and Their Bibliographies. Introduction to bibliographical and research tools and methods for students with interests in ethnic groups. Specific sections focus on particular groups. 111A is concerned with American Indian history and culture, 111B with Afro-American history and culture; 111C with Latin history and culture; and 111D with Asian-American history and culture, sections on other ethnic groups may be added. Offered in collaboration with the several centers for ethnic studies. Students may take this course only once for credit.
208. Legal Bibliography. Prerequisite: consent of instructor. An introduction to the source materials of the law, with emphasis on primary authority, but covering as well secondary authority and the indexes and finding aids which the lawyer and professional law library use to access to legal information.

240. Information Systems Analysis and Design. (Formerly numbered 243.) Theories and principles of special systems development, including determination of requirements, technical design and evaluation, and internal organization.

249. Seminar on Special Topics in Information Science. Prerequisite: course 404 or consent of instructor. Topics will vary from quarter to quarter. To allow emphasis on specialized topics on information science such as vocabulary development, file organization, searching procedures, indexing and classification, bibliographic and linguistic text processing, and measures or relevance and system effectiveness. May be repeated for credit with consent of instructor.

251. Reading and Reading Interests. Recommended preparation is English 112 (Children's Literature) or equivalent. Reading interests and correlative types of literature surveyed with reference to the growth and development of the child. Emphasis on the role of the librarian in responding to the needs and abilities of children through individualized reading guidance.

260. Historical Bibliography. (Formerly numbered 211.) Early records and the manuscript period; history of the printed book and of periodical publications and newspapers, including methods and methods of production. Parallel history of scholarship, the book trade, and book collecting in ancient, medieval and modern Western civilization.

261. Analytical Bibliography. Recommended, but not prerequisite, is course 260 (Historical Bibliography) or its equivalent in background or experience. History and methods of analytical bibliography with emphasis on recent scholarship. The book as a physical object and its relationship to the transmission of the text. Emphasis on press books. Theories of Bradshaw, Proctor, Greg, McKerrow, Pollard, Esdaile, Bowers, Stevenson, Hinman, McKenzie, and others.

262. Seminar on Historical Bibliography. Prerequisite: course 260 or consent of instructor. Special studies in the history of books and publishing. Topics will vary from quarter to quarter to allow emphasis on a particular historical period, geographical area, or other aspects of printed or material production such as paper or type. May be repeated for credit with consent of instructor.

271. Seminar on Intellectual Freedom. Prerequisite: consent of instructor. Investigation of the idea of intellectual freedom: historical and constitutional bases; civil liberties and civil rights; censorship and other restraints on freedom of speech, the press, the arts, and the libel.

272. Research Seminar in Library and Information Science. Prerequisite: enrollment in Ph.D. program or consent of instructor. Emphasis on recent contributions to theory, research and methodology. May be repeated for credit with permission of instructor.

290. Research Methodology. Prerequisite: consent of instructor. Role of research in bibliography, librarianship, and information science. Identification and design of research problems. Historical, statistical, analytical and descriptive techniques.

Professional Courses

402. Fundamentals of Bibliography. The development and fundamentals of the several branches of bibliography: historical, physical (analytical or critical, descriptive, subject, name, place) and organization, control, and elements of bibliographic apparatus. New techniques and tools, theory, methods, and trends in bibliographic research in relationship to librarianship.

404. Fundamentals of Information Science. Provides an introduction to the variety of subjects that constitute the information sciences and their relationship to libraries and other information centers. Discusses the techniques of systems analysis and the application of data processing equipment to selected library operations.

405. Automation of Library Processes. Prerequisite: basic knowledge of a programming language, preferably PL/I or IBM System/360 assembly language. Principles of application of data processing techniques to library procedures. Problems in the design, implementation, and testing of mechanized systems for libraries. Study of programming languages for library applications with emphasis upon PL/I.

408. Professional Communication. Methods of professional communication: written, oral, and visual, including word processing and other computer generated texts. Students will learn skills they can use as librarians: how to present proposals, reports, and research results, and how to write effective letters and minutes. Students will practice the prose style they will become more conscious of language in general—its resources and its effects on people. Graded S/U.

412. Cataloging and Classification of Nonbook Materials. (Formerly numbered 224.) Cataloging and classification of nonbook materials (e.g., films, maps, pictorial works, sound recordings) as separate collections and integrated collections.
414. Principles of Indexing and Abstracting. Basic professional techniques, concepts, and methods of indexing monographs, serials, and specialized materials; of preparing informative and indicative abstracts; and of analyzing secondary abstracting and indexing science books.

420. Information Resources and Services I. History, methods and materials of information services. Analysis and evaluation of devices for bibliographic control of information. Systems of national and trade bibliography (U.S. and foreign), indexing, abstracting, etc. Fact books, handbooks, directories, almanacs, encyclopedias, yearbooks.

423. Library Information Service. Prerequisites: Completion of course 420 (Basic Sources of Information) and course 421 (Comprehensive Bibliography), or evidence of competencies represented by these courses. Identification of problems in library reference service. Consultation and reference interview techniques, search strategies, and methodologies of teaching use of libraries and information resources. Evaluation of competence through supervised performance. Graded S/U.

424. Computer-Based Information Resources. Overview of the major components of computer-based bibliographic information retrieval systems, planning on-line search strategies, and conducting on-line search services using a variety of data bases.

429. Printing for Bibliographers. Prerequisite: course 260 (Historical Bibliography) or 261 (Analytical Bibliography) and consent of instructor. Printing processes as related to bibliography and librarian- ship. Discussions, demonstrations, and experiments in designing and producing presswork with special emphasis on the 19th century handpress. To be graded S/U.

431. Special Problems in the Selection of Materials and Evaluation of Collections. (Formerly numbered 205.) Prerequisite: course 430. Subject and area collecting; special collections and rare books; building new collections. Evaluating and weeding collections. Cooperative collecting—national, regional, and international. Storage centers; subject specialization. Special format materials: films, maps, sound recordings, etc. Copying methods; facsimile reprinting; changing character of research collections. Copying methods; facsimile reprinting; changing character of research collections.

441. Management of Libraries. Prerequisite: consent of instructor. Principles of management, emphasizing management techniques applicable to libraries of various sizes and types. Special attention to aspects of technical services.

442. Library Personnel Administration. Covers the basic principles of personnel management. Provides a survey of current personnel practices in libraries. Discusses how the basic principles apply or need to be modified to fit the special working conditions of libraries.

444. Information Network. (Formerly numbered 244.) Problems in the formulation, funding and operation of information networks are examined. A survey of some of the major networks, including institutional and computer systems.

446. Library Services for Youth. Provides an overview of programs and services which are of interest to young adults (12-18 year olds). Discusses special problems in working with young people and the psychology of the teenager as it influences library programs.

447. Library Space Planning. Introduction to space planning and programming techniques and how they apply to libraries. Emphasis is on use of existing space, but planning new buildings is included. Reading blue prints, use of scales, contracts, use of consultants.

461. College, University and Research Libraries. (Formerly numbered 401.) Organization, administration, collections, facilities, finances, and problems of college and university libraries and their relationships within the institutions of which they are a part. Functions of research libraries and work of their staffs in serving scholars.

483. Public Libraries. (Formerly numbered 402.) The government, organization, and administration of municipal, county, and regional public libraries; development in the changing patterns of public library service.

484. School Libraries. (Formerly numbered 403.) Elementary and secondary school libraries as multi-media instructional materials centers. Relationships of school libraries to school programs and curricula. Emphasis on administration, planning, materials, service, and equipment.

485. Library Services and Programs for Children. Philosophy and objectives of children's services in public and school libraries. Emphasis on services to groups and techniques of program planning which incorporate storytelling, puppetry, nonprint media, etc.

487 A-C. Legal Bibliography. (Formerly numbered 228.) Emphasis on legislative history sources and research techniques. Advanced legal research techniques and tools will be evaluated.

487 D. Seminar on Current Issues in Librarianship. (Formerly numbered 227.) Prerequisite: consent of instructor. Identification, analysis, and discussion of critical issues currently facing the profession. May be repeated twice.

489. Library Service to Special Population Groups. Prerequisite: consent of instructor. Special problems encountered by school, public, academic, and special libraries in meeting the needs of minority groups. Library and the institutionalized population.

Professional Internship Courses

490. University Library Internship. Prerequisite: consent of instructor. Supervised professional training in one or more departments or units of the UCLA College Library or University Library System. Field trip, which is appropriate, to off-campus libraries. Minimum of 120 hours per quarter, including weekly critiques of bibliographical, administrative, and service problems. May be repeated twice. To be graded S/U.

495. Training and Supervision of Teaching Assistants. Prerequisite: consent of instructor. Library service to special population groups who are involved in the teaching of undergraduates or an Extension course. Syllabus revision and materials preparations. Classroom observation. Twenty hours per quarter, times to be arranged. Two units of credit. Graded S/U.

499. Off-Campus Internship. Prerequisite: consent of instructor. Supervised professional training in a library system, library, department of a library, or other information service agency (e.g., archives) approved by the faculty of the School. Minimum of 120 hours per quarter, including weekly critiques of bibliographical, administrative, and service problems. May be repeated twice. To be graded S/U.

Individual Study Courses

501. Cooperative Program. (1 to 2 courses) Prerequisites: approval of UCLA Graduate Adviser and Graduate Dean. Approval of host campus instructor, Department Chairman and Graduate Dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. To be graded S/U.
Linguistics

(Office, 2113 Campbell Hall)

Stephen R. Anderson, Ph.D., Professor of Linguistics.
Ramo A. Anttila, Ph.D., Professor of Indo-European and General Linguistics.
William Bright, Ph.D., Professor of Linguistics and Anthropology.
Paul M. Schachter, Ph.D., Professor
Talmy GivOn, Ph.D., Professor of Linguistics.
Thomas J. Hinnebusch, Ph.D., Associate Professor of Linguistics.
Sandra A. Thompson, Ph.D., Professor of Linguistics.
Raimo A. Anttila, Ph.D., Professor of Linguistics and African Languages.
George D. Bedell, Ph.D., Associate Professor of Linguistics.
Thomas J. Hinnenbusch, Ph.D., Associate Professor of Linguistics and African Languages.
Mazisi R. Kunene, M.A., Associate Professor of African Languages and Literature.
Pamela L. Munro, Ph.D., Associate Professor of Linguistics.
Russell G. Schuh, Ph.D., Associate Professor of Linguistics and African Languages.
Patricia A. Keating, Ph.D., Assistant Professor of Linguistics.

Claudia Mitchell-Kernan, Ph.D., Associate Professor of Anthropology.
Michael Moerman, Ph.D., Professor of Anthropology.
C.P. Otero, Ph.D., Professor of Spanish and Romance Linguistics.
Thomas G. Penchoen, Ph.D., Associate Professor of Linguistics.
Jaan Puhvel, Ph.D., Professor of Indo-European Studies.
A. Carlos Quicoli, Ph.D., Assistant Professor Portuguese.
Earl Rand, Ph.D., Associate Professor of English.
Emanuel A. Schegloff, Ph.D., Professor of Sociology.
John A. Schumann, Ph.D., Associate Professor of English.
Michael Shapiro, Ph.D., Professor of Russian Linguistics and Poetics.
Alan T. Timberlake, Ph.D., Associate Professor of Slavic Languages.
Terence H. Wilbur, Ph.D., Professor of German.
Dean S. Worth, Ph.D., Professor of Slavic Languages.
Eran Zadok, Ph.D., Associate Professor of Psychology.

The Graduate Linguistics Program

The programs leading to the M.A. and Ph.D. degrees in linguistics are open to qualified graduate students who are interested in descriptive, theoretical, and historical linguistics. Preparation for graduate study in linguistics should be equivalent in as many respects as possible to the undergraduate curriculum in linguistics.

The Master of Arts Degree

Admission Requirements. Students are normally admitted to begin residence in the Fall Quarter only (exceptions may be made by the Chairperson). The deadline for submission of applications for the Fall Quarter is December 31 of the previous year.

Late applications for admission without possibility of consideration for support will be received through March 31. Applicants are asked to submit a statement of purpose, which should include their background for graduate study in linguistics, and their immediate and long-range goals in the field. They should also have at least two scholars under whom they have studied submit letters to the Department about their qualifications. Scores on the Graduate Record Examination (verbal, quantitative, and analytical) must be submitted with the application. There is no minimum score requirement. If possible, applicants should submit a copy of some research paper or other piece of writing in linguistics or a closely related field.

Prospective students may request an information brochure from the Administrative Assistant, Department of Linguistics.

Advising. The Chairperson appoints a Graduate Adviser for each student. All members of the faculty serve as graduate advisers. If students wish to change advisers, they should consult the Chairperson.

Students are expected to meet with their advisers each quarter to plan their study lists. Advisers will record their recommendations in the student’s permanent file. Only their advisers may sign students’ study lists each quarter.

At least one quarter before completing the M.A. thesis, the student selects a thesis committee, which is subject to the approval of the Chairperson and to the agreement of the committee members. The Chairperson of this thesis committee becomes the student’s official adviser. If a student opts for a terminal M.A. by taking a comprehensive examination (usually oral), an examination committee is appointed by the Chairperson.

Admission to Master’s Program. Admission to the master’s program is synonymous with graduate admission.

While not required for admission, courses 100, 103, 110, 120A, 120B, 165A, 165B are to be taken prior to graduate courses in their respective areas. At the time of admission, students will be notified which, if any, of the above courses are required as deficiencies. However, if there is any question of whether courses taken elsewhere are equivalent to the above courses, students must discuss this with their advisers.

Specialization. At the M.A. level, core courses in phonetics, phonology, syntax, semantics, and historical linguistics are required. The remaining three (of the nine required) may be taken in any area of linguistics, generally aiming toward a doctoral specialization. Except for these electives, no specialization is possible at the M.A. level.

Foreign Language Requirements. All students are required to demonstrate knowledge of one research language before receiving an M.A., and a second research language before advancement to candidacy. Knowledge can be demonstrated by one of four methods: (1) a reading exam administered by the department; (2) a research paper based on extensive sources in the language; (3) a conversation exam showing knowledge in depth; (4) an ETNS graduate language exam. One of the languages must be a language which has substantial literature on linguistics, the other may be a language which can serve as a contact language for field research. The latter option must be approved by the departmental language committee. Native speakers of languages other than English are permitted to use English to meet one of the foreign language requirements unless English was the language of instruction in their elementary and secondary education.

The departmentally-administered (#1 above) reading examination consists of a passage of approximately 500 words taken from a scholar-
ly work in linguistics, of medium difficulty. Students are given one hour to translate the passage, with the aid of a dictionary. To pass the examination, a student must: 1) translate the entire passage; 2) make no more than one "major" error (such as missing the basic sense of some sentence); 3) make no more than three "minor" errors (such as mistranslating the aspect of some verb).

**Course Requirements.** The M.A. degree requires the completion, with a B average or better, of nine graduate courses in linguistics. The following eight courses are required: 165A, 200A, 165B/200B, 201A, 202, 203, 206A, 206B, 207. One elective is required, and must be a graduate linguistics course. Students who enter without deficiencies will already have had 165AB, so they must take three electives in all. The core courses in the relevant areas are normally considered prerequisite to the proseminars (250-259), which are specialized courses taken, for the most part, in the second year, or as electives in the first year if the student has sufficient background. Proseminars are repeatable for credit if the topic is different, as it nearly always is. No more than 4 units of 596A or 596B and no more than 8 units of 501 may be applied toward the required nine courses. The 260 courses (260—phonetics, 261—phonology, 262—syntax, semantics, 263—language variation, 264—special topics) may be used to fulfill the M.A. requirements if taken for 4 units.

The following undergraduate courses or equivalents are prerequisite to graduate courses in the corresponding areas: 100, 103, 110, 120A, 120B, 165A, 165B. Linguistics 103 must have been passed with a grade of "B" or better or as prerequisite to 210A-210B. If 103 is waived on the basis of training elsewhere, the student must pass an examination in practical phonetics administered by the Department. This requirement must be completed before admission into the doctoral program.

No more than two courses (with grades of B or better) may be transferred toward the M.A. from institutions outside the University of California, though equivalent training elsewhere provides the basis for determining what courses the student should take.

**Thesis or Comprehensive Examination Plan.**

*Thesis Plan: After completing the required courses and the foreign language examination, the student will submit a thesis based on original research to a thesis committee for approval. All students intending to proceed to the Ph.D. must adopt this plan.*

The M.A. thesis has the following size limits: If on a single topic, the thesis cannot exceed 50 pages double-spaced typewritten on 8½" x 11" paper, either elite or pica typeface, with standard margins 1 ¼" by 1"; including all appendices and bibliography, except that footnotes, appendices, and bibliography may be single-spaced. If on two topics, the topics must be in different fields, each topic limited to 35 pages, other specifications as above. If on two topics, only one of the two papers can be carried over as the basis of a subsequent Ph.D. qualifying "publishable" paper.

The thesis committee consists of three faculty members. Students should consult with the chairperson about the makeup of their committee. At least one quarter before the quarter in which the thesis is submitted, the committee must be officially nominated by completing a "Nomination of Master's Thesis Committee" form to be approved by the Department Chairperson, and by the Graduate Division.

If a student wishes to be considered for advancement into the doctoral program, a copy of the thesis, complete and clearly legible, but not necessarily in final typed form, must be available in the Department office by 4 p.m. on the date listed in the UCLA Calendar as "last day to submit final drafts of thesis to master's committees for degrees to be conferred in current quarter."

Requirements for receiving an M.A. include the filing of a "Petition for Advancement to Candidacy" form early in the quarter during which the student expects to take the degree. (The deadline is published in the UCLA Calendar.) The thesis must be typed according to regulations set by the University. Information on these regulations and procedures is available from the Graduate Division. The deadline for submitting the completed thesis is in the UCLA Calendar.

A copy of the thesis will be kept on file in the Department.

*Comprehensive Plan: After completing the required courses and the foreign language examination, the student must pass a Comprehensive Examination administered by a committee of the Linguistics faculty. The committee, consisting of four members, is appointed by the Chairperson. This is normally an oral examination, general in scope, and will result in a terminal M.A. degree. A separate examination committee is appointed by the Chairperson for each student.*

**Time to Degree.** A student who enters the program without prior training in linguistics beyond the basic courses (listed in Admission to Master's Program above) should expect to spend four to six quarters in the M.A. program. A student with one to three deficiency courses will normally spend five to seven quarters in the program, and one with more than three deficiencies, six to nine quarters. All students must complete the M.A. within 3½-quarter years; they should aim for a maximum of two years.

**500 Series Course Limitations.** No more than 4 units of 596A or 596B and no more than 8 units of 501 may be applied toward the required nine courses for the M.A.

**Teaching Experience.** Teaching experience is not a requirement for the M.A. degree.

**Disqualification and Appeal of Disqualification.** An average of 3.00 must be maintained in all coursework. Students with grade records fractionally below 3.00 in a given term are considered to be on probation for the following term, during which term their grade record must be brought up to 3.00. Students whose grade records do not meet these minimal standards are subject to dismissal. A student failing to complete the M.A. within 3½-quarter years is also subject to dismissal.

Students who complete the M.A. but are denied admission into the Ph.D. program will not be permitted to re-enroll as a graduate student beyond the end of that academic year.

**The Ph.D. Degree.**

**Admission Requirements.** General admission requirements are the same as those listed for the M.A. For information about admission to the doctoral program, see below.

**Advising.** For general advising information, see the Advising section above.

A student must arrange with the Departmental Chairperson for the appointment of a guidance committee no later than the end of the first quarter of residence following admission into the Ph.D. program. This is an informal committee, consisting of three "inside" members (Linguistics faculty). Outside members may be included, if desired. There is a departmental form for this purpose. The Chairperson of the guidance committee becomes the student's adviser and is the only person who can sign the student's study list. (The guidance committee usually becomes the nucleus of the doctoral committee.)

**Admission to the Doctoral Program.** Students who have done their earlier graduate work at UCLA will be considered for admission into the Ph.D. program on the basis of the following: 1) completion of all requirements for the M.A.; 2) the faculty's evaluation of the quality of the M.A. thesis and of the student's overall work and promise.

A student entering the graduate program who has already received an M.A. in Linguistics from another department or institution must fulfill all the requirements expected of an M.A. candidate, including the coursework, unless work elsewhere is equivalent and satisfies the course requirements. Then, there are two possible procedures: 1) The student may submit a master's thesis written at another institution or department. In this case, the Chairperson, in consultation with the student, appoints a committee to read and evaluate the thesis and to recommend revisions if necessary before submission to the entire faculty for final evaluation.
2) The student with an M.A. in Linguistics from another institution who has not written a thesis elsewhere is not required to formally submit a thesis, but is required to submit to the evaluation committee a paper equal in depth and scope to a thesis. A committee is appointed as in 1) above. In either case, once the committee has approved the thesis or paper, it is submitted to the entire faculty who evaluate its quality and the student’s accomplishments and promises. This evaluation will normally take place at a full meeting of the faculty at the end of the quarter in which that student submits a thesis.

**Major Fields and Subdisciplines.** It is possible to specialize in syntax, semantics, phonology, phonetics, language change, typology, sociolinguistics, neurolinguistics, and many language areas, notably African languages and American Indian languages. Other specializations may be possible, depending on the availability of faculty expertise.

**Foreign Language Requirement.** A doctoral committee cannot be officially appointed until the foreign language requirement has been met. Details are given above under the Foreign Language Requirements for the M.A. degree.

**Course Requirements.** Candidates for the Ph.D. are required to take 32 units of graduate coursework beyond the M.A. requirements. These units must include 210A-210B unless they have been used to fulfill the M.A. requirement, and 8 units in an area distinct from that of the student’s major area of concentration. The 32 units may not include courses 597, 599, or 275. Of the 32 units, no more than 12 units may be in 596A. A maximum of four 2-unit seminars may be included in the 32 units. At some time, students are expected to present some of the results of their research at a meeting of the Linguistics Department Colloquium (Linguistics 275). This is a requirement for the degree.

**Written and Oral Qualifying Examination.** In order to be advanced to candidacy, a student is required to prepare two substantive research papers of publishable quality in different areas or fields of linguistics. These papers are to be submitted to and approved by the student’s guidance committee. A written prospectus of the dissertation must be submitted to the guidance committee with a copy for the Department file, one month prior to the oral examination. At this time, provided the language requirement has been met, an official doctoral committee must be established in consultation with the Department Chairperson, and approved by the Graduate Division.

The Oral Qualifying Examination is administered by the doctoral committee, based primarily on the topic of the dissertation research. The examination is not narrowly defined, but rather will include all the background necessary for the student to pursue research on the specific topic. Reexamination is possible upon recommendation by the committee. Students are expected to take the examination and be advanced to candidacy not later than six quarters after being admitted to the doctoral program.

**Doctoral Committee.** A doctoral committee, normally consisting of the Departmental Guidance Committee plus two outside members, must be appointed at least one month prior to the time the student expects to take the Oral Qualifying Examination, in accordance with the regulations of the Graduate Division.

**Time to Degree.** A student must complete the Ph.D. within seven quarters after being advanced to candidacy, extended to an outside limit of nine quarters more if the student has not exhausted earlier limits. The absolute limit for the Ph.D., from entrance to the Department as a pre-M.A. student, including leaves or interruptions of any kind, is seven calendar years. However, the approved normative time-to-degree for the Ph.D. is 15 quarters (five years) and this time limit must be observed in regard to the In-Candidacy Fee Offset Grant Program. The normative time-to-degree cannot be changed, but accrued time may be adjusted to allow time for students to make up deficiencies.

**Final Oral Examination.** A final defense of the dissertation is required, scheduled at a time, and with advance notice, that will enable a substantial number of students and faculty to attend. The defense is not restricted to the student’s doctoral committee.

**Candidacy in Philosophy Degree.** Students are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Teaching Experience.** Teaching experience is not required for the Ph.D. degree.

**Disqualification and Appeal of Disqualification.** Any student failing to maintain a 3.00 average, or failing to be advanced to candidacy within the required time, is subject to disqualification at the discretion of the faculty of the Department.

**Other Relevant Information.** The Department requires that a student, after filing the dissertation, distribute to the faculty, with a copy for the Department, a Thesis Completion Statement, which should include date, committee membership, title, and abstract of the dissertation. Additional copies should be made available to students and other interested persons.

The Department issues an annually revised Information Brochure describing the program for applicants for admission and a more detailed Graduate Student Handbook for students in residence. It is the responsibility of all students to obtain this handbook and to be sure they comply with all the regulations therein.

---

**Graduate Courses**

**C200A. Linguistic Theory: Phonology.** Prerequisite: course 120A, Concurrently scheduled with Linguistics C165A. The theory of generative phonology; the form of phonological rules; formal and substantive phonological universals. Recommended for students who plan to do graduate work in linguistics. While the topics of coverage are the same for undergraduate and graduate students, the depth of reading required of graduate students is greater, with more primary sources included. Also, the graduate students are expected to produce a substantially deeper and more thorough research paper. The Staff

**C200B. Linguistic Theory: Grammar.** Prerequisite: course 120B or 127. Concurrently scheduled with Linguistics C165B. The form of grammars; word formation and sentence formation; formal and substantive universals in syntax; relation between syntax and semantics. Recommended for students who plan to do graduate work in linguistics. While the topics of coverage are the same for the undergraduate and graduate students, the depth of reading required of graduate students is greater, with more primary sources included. Also, the graduate students are expected to produce a substantially deeper and more thorough research paper. The Staff

**201A. Phonological Theory: Current Issues.** Prerequisite: course C165A. Survey of current issues in phonological theory. Mr. Anderson

**201B. Phonological Theory in the Twentieth Century.** Prerequisite: course C165A. Survey of the development of phonological theory in the twentieth century. Mr. Anderson, Mr. Bedell

**202. Theory of Language Change.** Prerequisite: course 110. Survey of current issues in language change. Mr. Anttila, Mr. Stockwell, Mr. Schuh

**203. Theory of Phonetics.** Prerequisite: course 120A. The preliminaries to speech analysis. Functional anatomy of the vocal organs; fundamental principles of acoustics and of the acoustic theory of speech production; issues in the perception of speech; the nature and design of feature systems for phonetic and phonological analysis. Mr. Anderson, Mr. Ladefoged

**204. Experimental Bases of Linguistics.** Prerequisite: course C165A. Theory and practice in experimental research in phonetics and linguistics. Ms. Fromkin, Mr. Ladefoged

**205A. Syntactic Theory: Current Issues in Formal Syntax.** Prerequisite: course C165B. Survey of current issues in formal syntactic theory. Mr. Emonds, Ms. Thompson, Mr. Schachtzer

**206B. Syntactic Theory: Current Issues in Functional and Typological Approaches to Syntax.** Prerequisite: course C165B. Survey of current issues in functional and typological approaches to syntax. Ms. Thompson, Mr. Givón

**207. Semantic Theory.** Prerequisite: course 180 or its equivalent may be required. Approaches to the study of meaning. Different offerings of this course will approach semantics from different theoretical perspectives (e.g. formal semantics, functional semantics, interpretative semantics). May be repeated for credit if a different theoretical approach. The Staff

**210A. Field Methods I.** Prerequisites: courses C165A, C165B. A language unknown to members of the class to be analyzed from data elicited from a native speaker of the language. The term papers will be relatively full descriptive sketches of the language. May be repeated for credit when a different language is under investigation.

---

*For concurrently scheduled courses ("C" prefix) suitably separate activities and/or standards for performance and evaluation will be applied for graduates and undergraduates.*
254. Topics in Linguistic 1. Proseminar. Prerequisites: courses C165A/C200A, C165B/C200B; 201A-201B, 202, 203 206A-206B, or 207 may be required; consent of instructor. Individual seminars will deal with such topics as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, psycholinguistics, etc. May be repeated for credit. Concurrent meeting with Linguistics 259A-259B. The Staff

255. Topics in Linguistics 2. Proseminar. Prerequisites: courses C165A/C200A, C165B/C200B; 201A-201B, 202, 203, 206A-206B, or 207 may be required; consent of instructor. Individual seminars will deal with such topics as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, psycholinguistics, etc. May be repeated for credit. Concurrent meeting with Linguistics 259A-259B. The Staff

256A. Topics in Phonetics and Phonology 2. Proseminar. Prerequisites: course C166A/C200A; 201A and/or 203 may be required. Specialized topics in phonetics or phonology. Graded In-Progress, with letter grade assigned on completion of 256B. May be repeated for credit. Concurrent meeting with Linguistics 251.

256B. Topics in Phonetics & Phonology 2. Proseminar. (1/4 or 1 course) Prerequisite: course 256A. Specialized topics in phonetics or phonology. Graded In-Progress in 256A, with letter grade assigned on completion of 256B. May be repeated for credit. Concurrent meeting with Linguistics 251.

257A. Topics in Syntax and Semantics 2. Proseminar. Prerequisites: course C165B/C200B; 296A, 206B and/or 207 may be required. Specialized topics in syntax and semantics. Graded In-Progress, with letter grade assigned on completion of 256B. May be repeated for credit. Concurrent meeting with Linguistics 251.

257B. Topics in Syntax and Semantics 2. Proseminar. (1/4 or 1 course) Prerequisite: course 257A. Specialized topics in syntax and semantics. Graded In-Progress in 257A, with letter grade assigned on completion of 257B. May be repeated for credit. Concurrent meeting with Linguistics 252.

258A. Topics in Language Variation 2. Proseminar. Prerequisites: courses C166A/C200A, C166B/C200B; 201A-201B, 202, 203, 206A-206B, or 207 may be required; consent of instructor. Individual seminars will deal with such topics as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, etc. Graded In-Progress, with letter grade assigned on completion of 258B. May be repeated for credit. Concurrent meeting with Linguistics 253.

258B. Topics in Language Variation 2. Proseminar. (1/4 or 1 course) Prerequisite: course 258A. Specialized topics in language variation. Graded In-Progress in 258A, with letter grade assigned on completion of 258B. May be repeated for credit. Concurrent meeting with Linguistics 253.

259A. Topics Linguistics 2. Proseminar. Prerequisites: courses C165A/C200A, C165B/C200B; 201A-201B, 202, 203, 206A-206B, or 207 may be required; consent of instructor. Individual seminars will deal with such topics as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, etc. Graded In-Progress, with letter grade assigned on completion of 259B. May be repeated for credit. Concurrent meeting with Linguistics 254.

259B. Topics in Linguistics 2. Proseminar. (1/4 or 1 course) Prerequisite: course 259A. Individual seminars will deal with such topics as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, etc. Graded In-Progress in 259A, with letter grade assigned on completion of 259B. May be repeated for credit. Concurrent meeting with Linguistics 254.

260A-260B. Seminar in Syntax and Semantics. (1/4 or 1 course) Prerequisite consent of instructor. A, B, and/or C may be taken independently of each other. Only Post-M.A. students may enroll for two units; all others must enroll for four. Graded S/U. May be repeated for credit. The Staff

261A-261B. Seminar in Phonology. (1/4 or 1 course) Prerequisite: consent of instructor. A, B, and/or C may be taken independently of each other. Only Post-M.A. students may enroll for two units; all others must enroll for four. Graded S/U. May be repeated for credit. The Staff

262A-262B-262C. Seminar in Syntax and Semantics. (1/4 or 1 course) Prerequisite consent of instructor. A, B, and C may be taken independently of each other. Only Post-M.A. students may enroll for two units; all others must enroll for four. Graded S/U. May be repeated for credit. The Staff

263A-263B-263C. Seminar in Language Variation. (1/4 or 1 course) Prerequisite: consent of instructor. A, B, and C may be taken independently of each other. Only Post-M.A. students may enroll for two units; all others must enroll for four. Graded S/U. May be repeated for credit. The Staff

264A-264B-264C. Seminar in Special Topics in Linguistic Theory. (1/4 or 1 course) Prerequisite: consent of instructor. Course 264A, 264B, and 264C may be taken independently of each other. Special topics may include child language, neurolinguistics, psycholinguistics, sociolinguistics, etc. Only Post-M.A. students may enroll for two units; all others must enroll for four. Graded S/U. May be repeated for credit. The Staff

275. Linguistics Colloquium. Prerequisite: fulfillment of the M.A. requirements. Varied linguistic topics, generally presentations of new research by students, faculty, and visiting scholars. Graded S/U. The Staff

276. Linguistic Colloquium. (non-credit course) Prerequisite: Graduate Standing. Same as course 275, taken without credit by students not presenting a colloquium. Graded S/U. The Staff

495. College Teaching of Linguistics. (1/2 course) Prerequisite: Graduate Standing; required of all new teaching assistants. Seminars, workshops, and appren- tice teaching. Selected topics including curriculum development, various teaching strategies and their effects, teaching evaluation, and other topics on college teaching. Students receive credit toward full time equivalence, but not towards any degree program. Graded only on S/U basis. The Staff

501. Cooperative Program. (1/2 to 2 courses) Prerequisites: approval of UCLA graduate adviser and graduate dean. Approval of host campus instructor, department chairman, and graduate dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. Graded S/U.

Individual Study and Research

596A. Directed Studies. (1/4 to 2 courses) Prerequisite: completion of all undergraduate deficiency courses. May be applied toward full time equivalence, but not towards any degree program. Only Post-M.A. require-ments. Directed individual study or research. May be repeated for credit. Graded S/U. The Staff

596B. Directed Linguistic Analysis. (1/4 to 2 courses) Prerequisites: fulfillment of the M.A. requirements. Intensive work with native speakers by students individually. May be repeated for credit. Graded S/U. The Staff

597. Preparation for Master's Comprehensive and Doctoral Qualifying Examinations. (1/4 to 2 courses) Prerequisite: at least six graduate courses in linguistics. Can be taken only in the quarters in which the student expects to stand for his comprehen- sive or qualifying examinations. May not be applied toward fulfillment of M.A. degree requirements. May be repeated for credit. Graded S/U. The Staff

598. Research for Master's Thesis. (1/4 to 2 courses) Prerequisite: consent of chairman of guidance committee. Research and preparation of the M.A. thesis. May be applied toward fulfillment of M.A. degree requirements. May be repeated for credit. Graded S/U. The Staff

599. Research for Dissertation. (1/4 to 4 courses) Prerequisite: advancement to candidacy for the Ph.D. degree. May not be applied toward fulfillment of Ph.D. degree requirements. May be repeated for credit. Graded S/U. The Staff
African Languages

Graduate Courses

**201A-201B. Comparative Nigéro-Congo. Prerequisites: Linguistics 165A, 165B, 220A; recommended preparation: three quarter courses in one Nigéro-Congo language selected from courses 101-132, 199. Investigation of relationships within the Nigéro-Congo family as a whole, or within selected branches of the family.** Mr. Welmers

**202A-202B-202C. Comparative Bantu: Prerequisites: Linguistics 165A, 165B, 220A; recommended preparation: three quarter courses in one Bantu language selected from African Languages 101-110, 199. Investigation of relationships among the Bantu languages: the extent and external relationships of Bantu.** Mr. Givbn

270. Seminar in African Literature. Mr. Kunón

Individual Study and Research

596. Directed Studies. (1/4 to 2 courses) Directed individual study or research. Up to one full course may be applied toward fulfillment of M.A. course requirements. May be repeated for credit. Graded S/U.

The Staff

Upper Division Courses

100. Introduction to Linguistics.

103. Introduction to General Phonetics.

104. Experimental Phonetics.

110. Introduction to Historical Linguistics.

114A. American Indian Linguistics.

114B. American Indian Language Structures.

120A. Linguistic Analysis: Phonology.

120B. Linguistic Analysis: Grammar.

125. Semantics.

127. Syntactic Typology and Universals.

130. Child Language Acquisition: Introduction.

131. Child Language Acquisition (for non-majors).

140. Linguistics in Relation to Language Teaching.

M146. Language in Culture (same as Anthropology M140).

M150. Introduction to Indo-European Linguistics (same as IES M150).

160. History of Linguistics through the 19th Century.

164. Modern Theories of Language.

C165A. Linguistic Theory: Phonology (concurrently scheduled with Ling. C200A).

C165B. Linguistic Theory: Grammar (concurrently scheduled with Ling. C200B).

170. Language and Society: Introduction to Sociolinguistics.

175. Linguistic Change in English.

English 121. The History of the English Language.

122. Introduction to the Structure of Present-day English.

210. History of the English Language.

215. The Structure of Present-Day English.

216. Celtic Linguistics.

240. Studies in the History of the English Language.

241. Studies in the Structure of the English Language.

251K. Bilingual Comparative Studies. Seminar.

260K. Psycholinguistics and Language Teaching. Seminar.

270K. Language Policy in Developing Countries. Seminar.

Folklore 217. Folk Speech.

French 204A. Phonology and Morphology from Vulgar Latin to French Classicism.

204B. Syntax and Semantics from Vulgar Latin to French Classicism.

Germanic Languages 117. Language and Linguistics.

217. History of the German Language.

251. Seminar in Syntax and Phonology of German.

252. Seminar in Historical and Comparative German Linguistics.

Hebrew Department of Near Eastern Languages 190A-190B. Survey of Hebrew Grammar.

Iranian (Department of Near Eastern Languages) 210A-210B. The History of the Persian Language.

211A-211B. Modern Iranian Dialects.

Italian 258A. History of the Italian Language.

258B. The Structure of Modern Italian.

259C. Italian Dialectology.

Latin (Department of Classics) 240. History of the Latin Language.

Oriental Languages 175. The Structure of the Japanese Language.

223. History of the Japanese Language.

Philosophy 127A-27B. Philosophy of Language.

172. Philosophy of Language.

287. Seminar: Philosophy of Language.

Portuguese (Department of Spanish and Portuguese) 100. Phonology and Pronunciation.

103. Syntax.

M118. History of the Portuguese and Spanish Languages.

M203A-M203B. The Development of the Portuguese and Spanish Languages.

204A-204B. Transformational Grammar.

206. Linguistics.

209. Dialectology.

M251. Studies in Galician-Portuguese and Old Spanish.

256A-256B. Studies in Linguistics and Dialectology.

Turkish Languages (Department of Near Eastern Languages) 230A-230B-230C. A Historical and Comparative Survey of the Turkish Languages.

Russian (Department of Slavic Languages) 121. Russian Phonology.

122. Russian Morphology.

123. Historical Commentary to Modern Russian.

204. Introduction to the History of the Russian Literary Language.

241. Russian Phonology.

243A-243B. Historical Phonology and Morphology of Russian.

253. Russian Dialectology.

264. The History of the Russian Literary Language.

265. Russian Syntax.

266. Russian Lexicology.

Scandinavian Languages (Department of Germanic Languages) 210. History and Description of the Scandinavian Languages.

Semitics (Department of Near Eastern Languages) 209A-209B-209C. Comparative Study of the Ethnolinguistic Languages.

290A-290B-290C. Comparative Morphology of the Semitic Languages.

Slavic Languages 202. Introduction to Comparative Slavic Linguistics.

251. Introduction to Baltic Linguistics.

262A-262B. West Slavic Linguistics.

263A-263B. South Slavic Linguistics.

282. Seminar in Structural Analysis.

Slovak (Department of Slavic Languages) 222. The Structure of Slovak.

Sociology 144A. Conversational Structures I.

266. Selected Problems in the Analysis of Conversation.

267. Selected Problems in Communication.

Spanish (Department of Spanish and Portuguese) 100. Phonology and Pronunciation.

103. Syntax.

M118. History of the Portuguese and Spanish Languages.

M203A-M203B. The Development of the Portuguese and Spanish Languages.

204A-204B. Transformational Grammar.

206. Linguistics.

209. Dialectology.

M251. Studies in Galician-Portuguese and Old Spanish.

256A-256B. Studies in Linguistics and Dialectology.

Turkish Languages (Department of Near Eastern Languages) 230A-230B-230C. A Historical and Comparative Survey of the Turkish Languages.

Related Courses in Other Departments

(Other than Language Courses)

Anthropology 143A. Field Methods in Linguistic Anthropology: Practical Phonetics.

143B. Field Methods in Linguistic Anthropology: Syntax, Semantics, Textual Cohesion.

Arabic (Department of Near Eastern Languages) 280. Structure of Classical Arabic.

Dutch (Department of Germanic Languages) 234. The Structure of Modern Standard Dutch.
Management

(Department Office, 3250 Graduate School of Management)

Robert B. Andrews, Ph.D., Professor of Management.
James R. Bettman, Ph.D., Professor of Marketing.
John W. Buckley, Ph.D., Arthur Young Professor of Accounting.
Elwood S. Buffa, Ph.D., Professor of Operations Management and Management Science.
Joseph D. Carabino, Ph.D., P.E., Professor of Management.
Fred E. Case, D.B.A., Professor of Urban Land Economics.
Samuel A. Culbert, Ph.D., Professor of Behavioral and Organizational Science.
Louis E. Davis, M.S., Professor of Organizational Sciences and Research Socio-Technical Scientist.
David K. Eiteman, Ph.D., Professor of Finance.
Donald Erlenkotter, Ph.D., Professor of Planning and Decision Sciences and Chairperson of the Department.
*Hyman R. Faine, J.D., Adjunct Professor of Arts Management.
Eric G. Flamholtz, Ph.D., Professor of Accounting and Information Systems.
Walter A. Fogel, Ph.D., Professor of Industrial Relations, and Research Economist, Institute of Industrial Relations.
Arthur M. Geoffrion, Ph.D., Professor of Management Science.
Glenn W. Graves, Ph.D., Professor of Quantitative Methods.
James D. Hodgson, A.B., Adjunct Professor of Management.
Alfred E. Hofflander, Ph.D., Professor of Finance and Insurance.
John E. Hutchison, Ph.D., Professor of Industrial Relations.
James R. Jackson, Ph.D., Professor of Management.
Harold H. Kassarjian, Ph.D., Professor of Management.
Paul Kircher, Ph.D., C.P.A., Professor of Accounting-Information Systems.
Archie Kleingartner, Ph.D., Professor of Industrial Relations.
*Harold Koontz, Ph.D., Emeritus Mead Johnson Professor of Management.
J. Clayburn LaForce Jr., Ph.D., Professor of Economics and Dean of the School.
Bennett P. Lientz, Ph.D., Professor of Computers and Information Systems.
Steven A. Lipman, Ph.D., Professor of Quantitative Methods.
James B. MacQueen, Ph.D., Professor of Management.
Robert Hal Mason, Ph.D., Professor of International Business and Business Policy.
Fred Massarik, Ph.D., Professor of Behavioral Science and Industrial Relations, and Research Behavioral Scientist, Institute of Industrial Relations.
Daniel J.B. Mitchell, Ph.D., Professor of Industrial Relations, and Director, Institute of Industrial Relations.
Frank G. Mittelbach, M.A., Professor of Management and Planning Research Economist.
Rosser T. Nelson, Ph.D., Professor of Management Science and Production and Operations Management.
Alfred Nicols, Ph.D., Professor of Managerial Economics.
William A. Niskanen, Jr., Professor of Public/Not-for-Profit Management.
William G. Ouchi, Professor of Management.
Anthony P. Raia, Ph.D., Professor of Management.
Richard W. Roll, Ph.D., Professor of Finance.

John P. Shelton, Ph.D., Professor of Finance.
R. Clay Sproule, Ph.D., Professor of Computers and Information Systems.
*George A. Steiner, Ph.D., Litt.D., Emeritus Harry and Elsa Kunin Professor of Business and Society.
Robert Tannenbaum, Ph.D., Professor of the Development of Human Systems.
J. Fred Weston, Ph.D., Professor of Managerial Economics and Finance.
Harold M. Williams, J.D., Professor of Management.
Robert M. Williams, Ph.D., Professor of Business Economics and Statistics.
Ralph M. Barnes, Ph.D., Emeritus Professor of Engineering and Production Management.
William F. Brown, Ph.D., Emeritus Professor of Marketing.
John C. Clendenin, Ph.D., Emeritus Professor of Finance.
Leo Grebler, Ph.D., Emeritus Professor of Urban Land Economics.
Raymond J. Jessen, Ph.D., Emeritus Professor of Business Statistics and Emeritus Professor of Public Health.
Erwin M. Keithley, Ed.D., Emeritus Professor of Management.
Wayne L. McNaughton, Ph.D., Emeritus Professor of Management.
Frederic Meyers, Ph.D., Emeritus Professor of Industrial Relations.
George W. Robbins, M.B.A., Emeritus Professor of Marketing.
Harry Simons, M.A., C.P.A., Emeritus Professor of Accounting.
Ichak Adizes, Ph.D., Associate Professor of Managerial Studies.
Theodore A. Andersen, Ph.D., Associate Professor of Business Economics and Finance.
Lee G. Cooper, Ph.D., Associate Professor of Behavioral and Organizational Science.
Thomas E. Copeland, Ph.D., Associate Professor of Finance.
Bradford Cornell, Ph.D., Associate Professor of Finance.
Richard A. Goodman, D.B.A., Associate Professor of Management.
Michael E. Granfield, Ph.D., Associate Professor of Business Economics.
J. Morgan-Jones, Ph.D., Associate Professor of Management Science.
Larry J. Kimbell, Ph.D., Associate Professor of Management.
Robert M. Bose, Ph.D., Assistant Professor of Management.
Richard J. Lutz, Ph.D., Associate Professor of Marketing.
Marvin May, Ph.D., Adjunct Associate Professor of Management.
David Mayers, Ph.D., Associate Professor of Finance.
John J. McDonough, D.B.A., Associate Professor of Accounting-Information Systems.
Bill McLelvey, Ph.D., Associate Professor of Management and Organizational Behavior.
Ephraim R. McLean, Ph.D., Associate Professor of Information Systems.
Frank E. Norton, Ph.D., Associate Professor of Business Economics.
Alfred E. Osborne, Jr., Ph.D., Associate Professor of Business Economics.
Hans Schollhammer, D.B.A., Associate Professor of Management Theory and International Business.
Carol Ann Scott, Ph.D., Associate Professor of Marketing.
E. Burton Swanson, Ph.D., Associate Professor of Computers and Information Systems.

Peter Pin-Shan Chen, Ph.D., Acting Associate Professor of Computers and Information Systems.
David M. Manegold, Ph.D., Assistant Professor of Behavioral and Organizational Science.
Imran S. Currin, Ph.D., Assistant Professor of Marketing.
Robert Gieseke, Ph.D., Assistant Professor of Finance.
Dominique M. Hanssens, Ph.D., Assistant Professor of Marketing.
Lauren Kelly, Ph.D., Assistant Professor of Accounting-Information Systems.
James G. Manegold, Ph.D., Assistant Professor of Accounting-Information Systems.
Ronald W. Masulis, Ph.D., Assistant Professor of Managerial Economics and Finance.
Deborah L. Roedder, Ph.D., Assistant Professor of Marketing.
Richard P. Rumelt, D.B.A., Assistant Professor of Business Policy and Management.
Rakeh S. Sarni, Ph.D., Assistant Professor of Production and Operations Management.
Barton A. Welz, Ph.D., Assistant Professor of Marketing.
William M. Zmerta, Ph.D., Assistant Professor of Public Sector Management.
Jane Held, Ph.D., Emeritus Assistant Professor of Management.
Sanford M. Jacoby, Ph.D., (In Progress), Acting Assistant Professor of Management.
Paul M. Fombrun, Ph.D., (In Progress), Acting Assistant Professor of Industrial Relations.
Seymour D. Timan, Ph.D., (In Progress), Acting Assistant Professor of Finance.

William H. Broesamle, M.B.A., Lecturer in Management and Associate Dean of the School.
Robert L. Carmichael, Ph.D., Lecturer in Computers and Information Systems.
Jason L. Frand, Ph.D., Lecturer in Management.
Patricia O. Katsky, Ph.D., Lecturer in Management.
Joan K. Lasko, Ph.D., Lecturer in Behavioral Science.
Paul Prasow, Ph.D., Senior Lecturer in Industrial Relations, and Research Economist, Institute of Industrial Relations.
Warren H. Schmidt, Ph.D., Emeritus Senior Lecturer in Behavioral Science.
Edward V. Sedgwick, Ph.D., Lecturer in Management.

Master of Business Administration (M.B.A.)

The 2-year, full-time program leading to the Master of Business Administration (M.B.A.) degree is designed to prepare managers for business enterprises and for public/not-for-profit organizations. A part-time version of the program is available for a limited number of fully-employed persons, who must be able to attend classes at least two days a week scheduled between the hours of 3:30 and 10:00 p.m. The program aims to develop general management perspectives and knowledge while imparting expertise in a student-selected field of specialization. Along with mastery of subject matter, the M.B.A. program stresses integrating the lessons of various academic disciplines and functional fields, translating theory into practice, questioning the past and planning for the future, and self-guided learning as a continuing basis for effective managerial work.
Admission Requirements. Although no specific undergraduate major is required for entrance, students must complete elementary algebra and differential calculus prior to entering the M.B.A. program. These may be taken as noncredit, programmed instruction or as regular courses. All applicants are required to take the Graduate Management Admission Test (GMAT). Any questions about the GMAT should be addressed to the Educational Testing Service, Box 966-R, Princeton, NJ 08541, phone (609) 883-8519; the local phone number in Los Angeles is (213) 254-5236.

Foreign applicants who do not hold degrees from universities or colleges where English is the primary language are required to take the Test of English as a Foreign Language (TOEFL).

Applications and information about the M.B.A. program are available in the M.B.A. Program Office, Room 3371, Graduate School of Management, UCLA, Los Angeles, CA 90024, phone (213) 825-8874. Applicants must complete the M.B.A. Application, which includes the Application for Admission to Graduate Status. Admission is for the Fall Quarter only; completed applications, with full documentation, must be filed with GSM by March 15. Applicants for the Arts Management program must specify their wish to be considered for admission in that field.

Consideration is given to the applicant's academic record; score on the GMAT and, for applicants whose native language is not English, score on the TOEFL; potential for management as evidenced by work experience and community, extracurricular, or other experience; and letters of recommendation. Selection of applicants is based on each candidate's total application; and therefore, minimum required undergraduate academic averages and GMAT scores have not been established. Preference is given to applicants who have had full-time work experience related to the field of management since completing their bachelor's degrees. Students admitted directly from baccalaureate programs who choose to work before entering graduate school will have their admission honored for three years.

Advising. Members of the M.B.A. Admissions Office professional staff may be contacted for general advising. Their address is Room 3371, Graduate School of Management, UCLA, Los Angeles, CA 90024. Students may select their areas of concentration by the end of their first year. There are concentration advisers for each of the established concentrations. These advisers assist students in planning appropriate programs, and students meet with their concentration advisers as often as necessary.

Time to Degree. The full-time M.B.A. must be completed within two calendar years of admission. Acceleration may be possible by attending Summer Sessions.

 Normally, students complete the M.B.A. program in six quarters; a summer session may count as one quarter. The minimum time required to complete the M.B.A. program is five quarters. Students in the M.B.A. Program for the Fully-Employed proceed at approximately half-time and complete the program in a maximum of 12 quarters, or four years.

At least 96 units of work towards the degree must be completed in residence in the M.B.A. program at UCLA. In special cases, up to 12 units of graduate work taken elsewhere and not used toward another degree may be counted toward the 96-unit total.

Course Requirements. The four required elements of the M.B.A. program are the nucleus, the management core, the concentration, and electives. The nucleus develops professional problem-solving and decision-making skills through experiences ranging from laboratory simulations to consulting projects in ongoing organizations. Management core subjects require students to learn the fundamentals of disciplines which underlie the practice of management. The concentration, selected by each student from a wide variety of established alternatives, provides specialized knowledge and skills for a particular field of management work. Electives permit students to pursue subjects of personal interest.

Nucleus. The nucleus as a series of three required courses focuses on developing those interpersonal and decision-making skills essential to the practice of management. The first-year nucleus course (Mgt. 440) utilizes experiential teaching methods to guide students in defining problem-solving skills from a personal perspective.

The second-year portion of the nucleus consists of a 2-quarter Management Field Study project, in which teams of four or five students serve as management consultants to business firms or other organizations. The members of each team represent a variety of concentrations. Proceeding under faculty guidance, each team conducts a policy-level study leading to specific action recommendations. Conclusions are summarized in a report which serves in lieu of a thesis or Comprehensive Final Examination for the members of the team. The field study is judged by standards applicable to professional management consulting.

Management Core. The management core consists of 10 courses on subjects basic to the practice of management. It is divided into three parts: a 5-course management analysis requirement, a 3-course functional fields requirement, and a 2-course management processes requirement.

Management analysis requirements (five courses): Mgt. 402, Data Analysis, Statistics, and Decision-Making; Mgt. 403, Managerial Accounting; and three courses from the following four: Mgt. 404, Managerial Computing; Mgt. 405, Managerial Economics: The Organization; Mgt. 406, Managerial Economics: Forecasting; Mgt. 407, Managerial Model Building. Functional fields requirements (three of the following four) Mgt. 408, Managerial Finance; Mgt. 409, Personnel Management and Labor Relations; Mgt. 410, Production and Operations Management; Mgt. 411, Elements of Marketing.

Management processes requirements (two courses): Mgt. 412, Management of Organizations; and Mgt. 420, Management Policy.

Concentration. The concentration focuses on a field of specialization within the broad realm of management. In addition to established concentrations, in special circumstances a student may design an individualized concentration in collaboration with interested faculty members. Individualized concentrations may include courses offered elsewhere on campus. The concentration consists of a minimum of seven to eight courses, within which some choice may be permitted.

Electives. Each student must select at least three electives, subject only to general University regulations. These electives normally must be taken while enrolled in the program. They may support or complement the remainder of the student's program of studies.

A maximum of two 4-unit 596 courses may be taken for credit toward the 96-unit requirement.

Disqualification and Appeal of Disqualification. M.B.A. students who at the end of their first year in the program have less than a 3.0 grade point average or have completed fewer than 48 units are subject to disqualification.
Their records are reviewed by the Assistant Dean-Director of the M.B.A. program, and if disqualification seems warranted, such action is recommended to a subcommittee of the M.B.A. Policy Committee. If this committee agrees, disqualification is recommended to the Dean of the Graduate Division. Appeals are made through the Dean of the Graduate School of Management.

Involvement with the Professional Management Community. One of the outstanding features of the UCLA Graduate School of Management is the deep involvement of its students with the professional management community. There are a variety of student organizations which promote both professional competence in many areas and the development of contacts among students, alumni, faculty, and business executives. Many opportunities are presented for students to become involved in planning events with executives in both the public and private sectors, to participate in day-long programs at various organizations, and to meet with company representatives and alumni. Extracurricular activities are an integral part of life at GSM, and all students are encouraged to participate.

Concurrent Degree Programs

J.D./M.B.A. Program
The School of Law and the Graduate School of Management jointly offer a program which makes it possible to earn the J.D. and the M.B.A. degrees in four academic years. This program is designed to provide opportunities for students to prepare for careers where law and management overlap and where understanding of both fields is necessary. For example, a graduate's career might be in corporate law, specialized areas of management consulting, public service, international trade or industrial relations.

Admission Requirements. Applicants who wish to apply to the J.D./M.B.A. program should apply to both the School of Law and the Graduate School of Management concurrently, following the application procedures specified by each school. Admission decisions for the J.D./M.B.A. program are made by a committee composed of representatives from the School of Law and the Graduate School of Management, and applicants must be fully qualified for admission to both schools to be admitted to the combined program.

Questions concerning the J.D./M.B.A. program should be addressed to the Director of M.B.A. Student Affairs and Admissions at the Graduate School of Management or to the Assistant Dean for Student Affairs in the School of Law.

Program Requirements. In the first year of the program, all first-year J.D. program courses are taken. In the second year, the first-year M.B.A. nucleus and management core requirements are taken. During the third and fourth years, students complete the management field study requirement, five M.B.A. concentration courses in the Graduate School of Management and 41 elective units in the School of Law.

The total requirements for the J.D./M.B.A. program include 76 quarter units in the Graduate School of Management and 71 semester units in the School of Law. Normally 96 quarter units are required for the M.B.A. and 85 semester units for the J.D. The J.D./M.B.A. requirements are as follows:
1. The first year law curriculum (30 semester units)
2. Forty-one elective units in the School of Law
3. The M.B.A. nucleus and management core (56 quarter units)
4. Twenty concentration units in the Graduate School of Management.

After completing all the requirements for the J.D./M.B.A. program, both degrees are awarded simultaneously. If, while in the J.D./M.B.A. program, a student decides not to complete either the J.D. or the M.B.A., all of the regular requirements for the program the student wishes to complete must still be met.

M.B.A./M.L.S. Program
The M.B.A./M.L.S. program is a 3-year concurrent degree program jointly sponsored by the Graduate School of Management and the School of Library and Information Science. The program is designed to provide an integrated set of courses for students who seek careers which draw on general and specialized skills in the two professional fields.

Admission Requirements. In order to apply to this program, applicants should request all M.B.A./M.L.S. application materials from the M.B.A. Admissions Office, Graduate School of Management, UCLA. All application materials should be completed and returned to the M.B.A. Admissions Office. Admission decisions for the concurrent program are made by a committee composed of representatives from the Graduate School of Law and the Graduate School of Library and Information Science. A student decides not to complete either the J.D. or the M.B.A., all of the regular requirements for the program the student wishes to complete must still be met.

Admission Requirements. In order to apply to this program, applicants should request all M.B.A./M.P.H. application materials from the M.B.A. Admissions Office, Graduate School of Management, UCLA. All application materials should be completed and returned to the M.B.A. Admissions Office. Admission decisions for the concurrent program are made by a committee composed of representatives from the School of Public Health and the Graduate School of Management, and applicants must be fully qualified for admission to both schools to be admitted to the combined program. Questions concerning the M.B.A./M.P.H. program should be addressed to the Director of M.B.A. Student Affairs and Admissions in the Graduate School of Management or the Head of the Division of Health Services and Hospital Administration in the School of Public Health.

Program Requirements. In the first year of the program consists of the first-year M.B.A. curriculum. In the second year, the core of the M.P.H. program is taken as well as a combination of Management and Public Health courses that deal with chosen areas of specialization. The third year is a continuation of the second.

The total requirements for the M.B.A./M.P.H. program include 84 units in the Graduate School of Management and 48 units in the School of Library and Information Science. In addition, 12 M.B.A. elective units may be fulfilled by required courses taken in Library Science.

After completing the requirements for the M.B.A./M.L.S. program, both degrees are awarded simultaneously. If, while in the program, a student decides not to complete either the M.B.A. or M.L.S., all of the regular requirements for the program the student wishes to complete must still be met.

M.B.A./M.P.H. Program
The M.B.A./M.P.H. program is a 3-year concurrent degree program jointly sponsored by the Graduate School of Management and the School of Public Health. The program is designed for individuals who desire a management career in health care and related fields and who wish in-depth professional preparation for such a career. Its establishment reflects the combined interest of employers, faculty, and students who have recognized the increasing challenges facing managers in the health care industry and the need for individuals who are skilled in dealing with these challenges.

Admission Requirements. In order to apply to the M.B.A./M.P.H. program, applicants should request all M.B.A./M.P.H. application materials from the M.B.A. Admissions Office, Graduate School of Management, UCLA. All application materials should be completed and returned to the M.B.A. Admissions Office. Admission decisions for the concurrent program are made by a committee composed of representatives from the School of Public Health and the Graduate School of Management, and applicants must be fully qualified for admission to both schools to be admitted to the combined program. Questions concerning the M.B.A./M.P.H. program should be addressed to the Director of M.B.A. Student Affairs and Admissions in the Graduate School of Management or the Head of the Division of Health Services and Hospital Administration in the School of Public Health.

Program Requirements. In the first year of the program consists of the first-year M.B.A. curriculum. In the second year, the core of the M.P.H. program is taken as well as a combination of Management and Public Health courses that deal with chosen areas of specialization. The third year is a continuation of the second.

The total requirements for the M.B.A./M.P.H. program include 84 units in the Graduate School of Management and 48 units in the School of Public Health. An additional 12 units may be fulfilled by required courses taken in Library Science.
M.B.A./M.A. Latin American Studies Program

The M.B.A./M.A. (LAS) program is a 2½ to 3-year concurrent degree program jointly sponsored by the Graduate School of Management and the Latin American Studies Interdepartmental Degree Committee. Students successfully completing the program will be awarded the Master of Business Administration (M.B.A.) degree and the Master of Arts (M.A.) degree in Latin American Studies. The program is designed for individuals preparing for careers in international management with a special focus on the Latin American region. Establishment of the program was predicated on the belief that individuals employed in the area of international business and management are better equipped to meet the challenges of their employment with complementary preparation in language and regional studies.

Admission Requirements. Students should request application materials from the GSM M.B.A. Admissions Office and the Latin American Studies Program. Applicants must take the Graduate Management Admission Test but do not need to take the Graduate Record Examination. Admission decisions for the M.B.A./M.A. (LAS) program are made by a joint admissions committee, and applicants must be fully qualified for admission to both departments to be admitted to the combined program.

Questions concerning the M.B.A./M.A. (LAS) program should be addressed to the Director of M.B.A. Student Affairs and Admissions in the Graduate School of Management or to the Director of Academic programs in the Latin American Studies Program.

Program Requirements. Students typically devote all of their first year to the curriculum required of all first-year M.B.A. students. During the second year, students complete the concentration in international management, focusing on Latin America in their courses, and satisfy all remaining requirements for the M.B.A. In addition, they begin to develop their second and third fields in Latin American Studies through elective courses outside GSM. Possible fields include Latin American economics, political science, history, sociology, anthropology, geography, fine arts, or literature.

After the second year, students must complete any remaining requirements for the two degrees. Typically, these consist of two or three additional courses in Latin American Studies and a comprehensive interdisciplinary research paper of approximately 50 pages, prepared in consultation with a committee of three faculty members representing the student’s three fields in Latin American Studies. Students can make use of Summer Sessions to complete requirements or they can continue another quarter or two during the regular academic year. Students who lack sufficient background in Latin American Studies may be required to complete certain prerequisite coursework in addition to the regular program requirements.

For the M.A. in Latin American Studies, there is also a requirement of proficiency in both Spanish and Portuguese (or an indigenous language of Latin America), through the equivalent of Spanish 25 and Portuguese 3, or Portuguese 25 and Spanish 5. The language requirement can be fulfilled through coursework, examination, or certification by an appropriate authority.

M.B.A./M.A. Urban Planning Program

The M.B.A./M.A. Urban Planning program is a 3-year concurrent degree program jointly sponsored by the Graduate School of Management and the Graduate School of Architecture and Urban Planning. The program is designed for individuals who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service.

Admission Requirements. In order to apply to the M.B.A./M.A. (UP) program, applicants should request all M.B.A./M.A. (UP) application materials from the M.B.A. Admissions Office, Graduate School of Management, UCLA. All application materials should be completed and returned to GSM. Admission decisions for the concurrent program are made by a committee composed of representatives from the Urban Planning program and the M.B.A. program, and applicants must be fully-qualified for admission to both schools to be admitted to the combined program. Questions concerning the M.B.A./M.A. (UP) program should be addressed to the Director of M.B.A. Student Affairs and Admissions at the Graduate School of Management or to the Graduate Counselor, Urban Planning program.

Program Requirements. The first year of the program consists of the first-year M.B.A. curriculum. The second and third years are divided between both programs.

The total requirements for the M.B.A./M.A. (UP) program include from 72 to 92 units in the Graduate School of Management and from 48 to 68 units in the School of Architecture and Urban Planning. All core and concentration requirements for each program must be met, but where the two programs’ core courses are substantially the same, students may choose from either program’s offerings. A maximum of 24 units may be counted toward requirements for both degrees.

After completing all the requirements for the M.B.A./M.A. (UP) program, both degrees are awarded simultaneously. If, while in the M.B.A./M.A. (UP) program, a student decides not to complete either the M.B.A. or the M.A. (UP), all of the regular requirements for the program the student wishes to complete must still be met.

M.S./Ph.D. Programs

Admission Requirements. All applicants are required to take the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). Foreign applicants who do not hold a degree from an English-speaking university are required to take the Test of English as a Foreign Language (TOEFL). Three letters of recommendation are included in the application and must be submitted with the completed application. All application materials, including transcripts, should be sent directly to the Doctoral Office, Graduate School of Management, UCLA.

Program information and application materials may be obtained from: Doctoral Office, Graduate School of Management, UCLA, Los Angeles, California 90024.

The School’s Application for Admission to the M.S./Ph.D. program and the Graduate Admissions’ Application of the Graduate Division are combined in one form, which is available at the above address. Applications are accepted for Fall Quarter admission only; the deadline for submission of applications and complete documentation is January 31.

All applicants to the M.S. or Ph.D. program are strongly urged to arrange an interview with at least one faculty member of her/his proposed area of concentration or major field area. The interview should take place before February 1.

The Master of Science Degree

The academic master’s program is a full-time program which leads to the Master of Science (M.S.) degree in Management. It is currently offered in only two specializations: Business Economics and Management Science. The primary objective of the M.S. program is to offer students intense study in either of these two specializations and to prepare them to conduct substantive research.
The M.S. program in some cases can constitute the first stage of doctoral work in management. Some students will enter the program with the goal of eventual acceptance into the doctoral program; for others, the M.S. will be a terminal degree. In either case, the program’s emphasis is on advanced specialized training and the development of research capability.

Advising. New master’s students are initially advised by the M.S. adviser in their field of concentration. Students are urged to establish a working relationship with one or two faculty members early in their studies. They are free to change advisers whenever they wish to do so during the course of their progress through the master’s program. The overall adviser of the program is the Assistant Dean, M.S./Ph.D. Programs.

Students are required to submit Proposal of Study forms by the end of their second quarter. These forms list the courses a student expects to take to fulfill the requirements of the program. A quarterly review is made by the Doctoral Office of all students’ progress, based upon their study forms and transcripts. Students having scholastic difficulty, or making insufficient progress, are asked to discuss their progress with the Assistant Dean. All conversations with the Assistant Dean relating to progress are documented; copies are sent to the student’s adviser, and records are kept in the student’s file in the Doctoral Office.

Major Fields or Concentrations. Business Economics, Management Science Course Requirements

Business Economics. A maximum of 17 courses may be required. It is possible to waive the eight prerequisite courses on the basis of prior coursework. Nine graduate level courses (the required and elective major field courses plus 4 units of 598) are required and cannot be waived.

A. Prerequisites (eight courses): Mgt. 405, Managerial Economics: The Organization; Mgt. 400, Mathematics for Management; Mgt. 434, Managerial Accounting and Finance; Mgt. 406, Managerial Economics: Forecasting; Mgt. 408, Business Finance; Mgt. 213A, Probability and Statistics; Mgt. 200A, Mathematical Economics; Mgt. 200B, Econometrics.

B. Major Field (eight courses — deviations may be approved by the chairperson of the Business Economics Academic Unit)

Electives — illustrative courses and course sequences (three courses):

Industrial Organization: Mgt. 202A,D; Mgt. 203A,B,C; Mgt. 231A,B,C; Econ. 271, 272; Econ. 204.

Techniques for Analysis: Econ. 247, 248; Econ. 245A,B,C; Mgt. 240A,B.

Economic Forecasting: Mgt. 201B,C,D; Mgt. 205B,C; Mgt. 230A,B,C.

C. Master’s Thesis (one course) — 4 units of Mgt. 598

Management Science. A maximum of 16 courses may be required. The four prerequisite courses and three managerial core course requirements may be waived on the basis of prior coursework. Nine graduate level courses (methodological core, depth field, and 4 units of 598) are required and cannot be waived.

B. Managerial Core (three courses): Mgt. 403, Managerial Accounting; Mgt. 405, Managerial Economics: The Organization; Mgt. 408, Managerial Finance.

D. Depth Field: three courses which support the student’s thesis research are required.

E. Master’s Thesis (one course): 4 units of Mgt. 598.

Thesis or Comprehensive Examination Plan. A thesis is required for the Master of Science degree in Management. Students generally establish a thesis committee during their fifth quarter. Plans for the thesis should be presented to the committee for approval at the beginning of the student’s sixth quarter. No outside member is required.

Time to Degree. From graduate admission to award of the degree: Six quarters.

500 Series Course Limitations

</tr>
</tbody>
</table>

Four units of 596 and 4 units of 598 may be used toward the minimum graduate course requirement of nine courses.

Disqualification and Appeal of Disqualification. Termination of a student may be recommended when a 3.0 average is not maintained or when a student is making insufficient progress. The decision to recommend termination of a student is made by the Progress Committee of the Doctoral Board in conjunction with the student’s concentration area faculty.

A student can appeal the Progress Committee’s decision by requesting that the Dean of the School appoint a faculty committee to reassess the Progress Committee’s decision; the Dean decides whether such action is warranted or not.

The Ph.D. Degree

The doctoral program in management is a research-oriented degree program which leads to the Doctor of Philosophy (Ph.D.) in Management. The program includes intensive training in research methods applicable to problems of organizations in the public and private sectors. It prepares students for careers in university teaching and research or as staff specialists in business firms and other organizations. The program offers each student substantial opportunities to discover his or her own, unique scholarly focus and competence.

Advising. All new doctoral students are initially advised by the Doctoral Adviser for their particular academic unit. Students are urged to establish a working relationship with one or two faculty members early in their studies. They are expected to have a close working relationship with at least one faculty member by the end of their first year in the program. Students are free to change advisers whenever they wish to do so during the course of their progress through the program. The overall adviser of GSM’s doctoral program is the Assistant Dean, M.S./Ph.D. Programs.

All first-year students are reviewed by their respective academic units during the Spring Quarter of their first year in the program. First-year grades, papers, self evaluations, and faculty evaluations are generally used in the review process. The evaluation is discussed with a student before a final, written evaluation is forwarded to the Doctoral Office. A copy of the final evaluation is kept in the student’s file in the Doctoral Office.

By the end of their first year in the program, all students are required to submit Proposed Field of Study forms, which must be approved by the Assistant Dean. These forms outline all of the coursework that will be taken to satisfy the program requirements plus the dates when the coursework, research paper, and major field examination are expected to be completed. A quarterly review is made by the Doctoral Office of each student’s progress based upon program deadlines, the Field of Study forms, and transcripts. If a student is having scholastic difficulty, appears to be making insufficient progress, or is approaching a program deadline, his/her case is brought to the attention of the Progress Committee. The Progress Committee determines what action should be taken. A copy of all correspondence between the Committee and the student or his/her adviser is maintained in the student’s file.

The Progress Committee is composed of three members: the Assistant Dean, one faculty member selected from those appointed to serve on the Doctoral Board for the year, and
one student elected by the doctoral students. The committee is formed at the beginning of each academic year and meets at least three times during the year.

**Major Fields or Concentrations.**

Accounting-Information Systems
Behavioral & Organizational Science
Business Economics
Computers & Information Systems
Finance
Industrial Relations
International & Comparative Management
Management Science
Management Strategy & Policy
Marketing
Production & Operations Management
Urban Land Economics

**Course Requirements.** The research preparation requirement consists of two parts: (1) a course requirement and (2) a research paper. A student is required to take five (5) research courses selected from a list provided by the major field area. These courses must be completed before a student can take an Oral Qualifying Examination and may not be waived by prior graduate work. The research paper must be submitted to and accepted by the Research Paper Committee (three faculty members designated by the Assistant Dean) no later than the Spring Quarter of a student’s third year of study.

The breadth requirement consists of eight courses which are clearly outside of a student’s major field area. It is intended that students should use these courses to become more knowledgeable about the basic elements of several other management disciplines and functional areas or to define a minor field or research and teaching proficiency. Three of these courses can be waived by prior coursework. They must be completed before a student can take the Oral Qualifying Examination.

There is no formal major field course requirement. Each student, in consultation with a major field adviser, designs a course of study which will prepare him/her to pass the major field examination.

**Written and Oral Qualifying Examination.**

Proficiency in the major field area is determined by a written examination, supplemented in some areas by an oral examination, designed by that academic unit’s faculty. The major field examination must be taken and passed by the end of the Spring Quarter of a student’s third year of study.

Students are required to present the substance of their dissertation plans in a formal seminar to which all Ph.D. students and faculty are invited. Following the formal seminar, the student prepares a dissertation proposal and participates in the nomination of a 5-member dissertation committee. When all the preliminary requirements have been fulfilled (coursework, research paper, major field examination, seminar), the student’s Oral Qualifying Examination can be held; and, if passed, he/she is advanced to candidacy. The Oral Qualifying Examination must be successfully passed within 4½ years of the date of entrance into the program.

**Time to Degree.** The program is designed to take four years (12 quarters) from graduate admission to awarding of the degree; completion of the degree cannot exceed 7½ years (23 quarters). Normative time-to-degree is 4½ years (14 quarters).

**Final Oral Examination.** The School requires that students take a Final Oral Examination; this requirement may be waived only under exceptional circumstances.

**Candidate In Philosophy Degree.** The Candidate in Philosophy degree is available to GSM doctoral students upon their advancement to candidacy.

**Disqualification and Appeal of Disqualification.** Students are terminated from the doctoral program whenever it becomes evident that they are not making satisfactory progress or that they are unlikely to be able to complete the program successfully. The most frequent occasions for termination occur when less than a 3.0 average is maintained for two consecutive quarters; when the student’s major field area faculty recommends termination at the time of the first-year review, or when a student fails to meet the time requirements for the research paper, the major field examination, advancement to candidacy, or the dissertation.

The minimum standard of performance at GSM exceeds the University’s minimum grade point average of 3.0. In particular, if two or more courses in which grades below “B” are received, or if incompletes are not removed within one quarter, such instances are viewed as indications of serious scholastic deficiencies which require review by the appropriate academic unit and may be the basis for dismissal from the program.

Students are given written notification of approaching deadlines; all deadlines are determined by the date of entry into the program. Termination decisions are made by the Assistant Dean for the Doctoral Program, based upon recommendations by academic unit faculty or by a Progress Committee established by the Assistant Dean.

A student may appeal a termination decision by requesting that the Dean of the School name a Faculty Committee to review the termination. The Dean may exercise his/her discretion as to the appropriateness of establishing such a committee.

**Lower Division Courses (numbered 1-99)**

**1A-1B. Elementary Accounting.** Prerequisite: Sophomore Standing. Course 1A is prerequisite to course 1B. An introduction to accounting theory and practice. The first quarter presents the recording, analyzing, and summarizing procedures used in preparing balance sheets and income statements. The second quarter includes payroll and tax accounting, partnership and corporation accounts, manufacturing and cost accounting, and supplementary statements.

**13. Computers and Programming.** An introduction to computers and data processing for students with no previous experience with computing. Computer hardware and software concepts are discussed. Batch (PLC) and interactive (APL) programming languages are covered and programming problems are assigned.

**Upper Division Courses (numbered 100-199)**

**108. Legal Analysis for Business Managers.** Significance and growth of the law; the law in its relationship to business, with special emphasis on current problems; coverage of the law of contracts, agencies and employment, negotiable instruments, business organizations including the functions of inside and outside counsel and trade regulations.

**111. Introduction to Operations Research.** Prerequisite: Mathematics 2, 4A-4B, course 115, or equivalent. Survey of operations research from an applied rather than theoretical viewpoint. Emphasis on the formulation of mathematical models and the most basic techniques for obtaining useful results. Problem types discussed: allocation, competition, inventories, networks, project management, waiting lines, replacement, sequencing, transportation.

**112. Management Information Systems.** Flowcharting and programming concepts. Programming problems may be assigned.

**113A. Computer Data Processing.** Computing and data processing concepts. Flowcharting and programming concepts. Programming problems may be assigned.

**113B. Computer Programming Methods.** Prerequisite: Engineering 10 or course 113A or 404 or equivalent experience with some general purpose programming language. Use of PUC and PL1 for programming management applications. Sequential and nonsequential file processing. Data considerations. Report generation. Computational algorithms. Considerations of program structure. Extensive programming assignments. Mr. Carmichael, Mr. Sprowls

**113C. Interactive Computing for Management.** Prerequisite: Engineering 10 or course 113A or 404 or equivalent experience with some general purpose programming language. Conversational, interactive computing for management applications. Problem logic, array processing, file handling, formatting and report generation, graphics, and user dialogues are covered. Examples are drawn from various aspects of management. Extensive programming assignments (using APL) are required.

**116A. Statistical Methods; Decision.** Prerequisite: course 115 or Graduate Standing. Statistical decision under uncertainty; statistical decision rules and their evaluation; Bayesian inference; applications to business problems.

116A. Statistical Methods: Analysis. Prerequisite: course 15A or equivalent. Analysis of various techniques and methods of utilizing and analyzing statistically collected data; measures of location and dispersion; simple linear regression; analysis of enumerative data; nonparametric methods. The Staff

120. Intermediate Accounting, Prerequisite: course 1A or consent of instructor. The preparation, use, and administration of financial records; preparation, use, and administration of financial statements; control of business activities; invention; validity and interpretation of accounting methods; preparation and use of cost accounts and accounts receivable; current and long-term debt, paid-in capital and retained earnings. Statement analysis. Statement of fund activities. The Staff

120M. Management Accounting. Prerequisite: course 120 or consent of instructor. Not open to students who have credit for course 403. Management Accounting Theory and methods; formulation and analysis of management reports; inventory; pricing and budgeting; cost-volume; profit analysis; elements of cost accounting; price-level accounting; learning curves and capital budgeting. The Staff

122. Cost Accounting. Prerequisite: course 120 or consent of instructor. The nature, objectives, and procedures of cost accounting and control; job costing and process costing; cost accounting for manufacturing; overhead; cost budgeting; cost reports; product costs; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis. The Staff

124. Advanced Accounting. Prerequisite: courses 120, 122, or consent of instructor. Partnerships and joint ventures; installment sales and consignment sales; home office and branch relationships; corporate combinations; the preparation of consolidated statements; foreign branches and subsidiaries; receivables; estates and trusts, governmental units; actuarial science. The Staff

130. Business Finance. A study of the forms and sources of financing business firms, large and small, corporate and noncorporate. The emphasis is on financial planning and development, and utilization of financial resources. Financial problems are also considered in their social, legal, and economic aspects. The Staff

133. Investment Principles and Policies. Principles underlying investment analysis and policy; salient characteristics of governmental and corporate securities; policies of investment companies and investing institutions; relation of investment policy to money markets and business fluctuations; security underwriting; making of investment decisions; construction of personal investment programs. Mr. Elterman, Mr. Shelton

135. Principles of Insurance. Basic principles of risk and insurance and their applications to business management and personal affairs. Analysis of concepts and methods of handling risks; insurance carriers, contractors, and underwriters; loss prevention and settlement; government insurance programs; economic functions of insurance. Mr. Hofflander

140. Elements of Production and Operations Research. Prerequisite: course 111 or equivalent. Basic principles and methods of effectively utilizing human resources in organizations. The relationship between social, economic, and other environmental factors and current problems in industrial relations. Mr. Fogel, Mr. Hutchinson, Mr. Mitchell

160. Elements of Marketing. A survey of the major marketing methods and institutions, and practices. The subjects of retailers, wholesalers, manufacturers, current obligations, long-term debt, paid-in capital and retained earnings. Mr. Kassarian

163. Advertising Principles and Policies. Prerequisite: course 160. The preparation, use, and administration of advertising, emphasizing the use of research to direct and measure the effectiveness of each stage in the operation. The economic and social implications of advertising also are evaluated. Mr. Kassarian, Ms. Scott

175. Elements of Real Estate and Urban Land Economics. An examination of the basic principles and methods of handling risks; insurance carriers, and of value of real estate market functions and land uses. Emphasis is placed on decision making as it relates to appraising, building, financing, marketing, and using urban property. Mr. Case, Mr. Clapp, Mr. Mittelbach

182. Leadership Principles and Practice. Knowledge and skills leading to effectiveness in interpersonal relations. Understanding oneself as a leader, and others as individuals and as members of working groups. Understanding of group process, including group leadership, lectures, and "sensitivity training" laboratory. Mr. Culbert, Ms. Lasko, Mr. Massarik

190. Management Theory and Policy. Prerequisite: consent of instructor. A study of the basic concepts and theory of management. Emphasis is on an operational analysis of the manager's role in all types of organizations. The course deals with management issues in the areas of planning, organizing, staffing, directing, and controlling. Mr. Carrabino and the Staff

197. Special Topics in Management. Topics of special interest to undergraduate students. Specific subjects to be covered may change each quarter depending on particular interest of instructor or students. Mr. May

199. Special Studies in Management. (1/2 to 2 courses) Prerequisite: Senior Standing and consent of instructor and the dean by special petition available in the MBA Program Office. The Staff

Graduate Courses (numbered 200-299)

Graduate courses are ordinarily open to students admitted in graduate standing. As a condition for enrollment, the student must submit to the instructor in charge of the course evidence of satisfactory preparation for the work proposed.

200A. Techniques of Business Economics Analysis: Modeler Models. Prerequisite: course 405 and Economics 145 or consent of instructor. Contempo- rary business economics of the analysis of fixed factors, allocation of resources, and the price system are developed. Classical optimization and comparative statics techniques are set forth and applied to the models of consumer choice and firm and general production-exchange equilibrium models. Mr. Granfield, Mr. Osborne

200B. Techniques of Business Economic Analysis: Stochastic Models. Prerequisite: consent of instructor. Stochastic models of economic behavior that are developed. The assumptions underlying the classical normal linear regression model, special problems in application, and interpretation of results are stressed. Practical applications are extensively developed in student projects. Mr. Kimbell, Mr. Meyers

201A. Business Forecasting. Prerequisite: courses 100, 101, or 405, 406 and 115 or 402. The role of business forecasting in managerial planning. Principles and methods of forecasting. Evaluation of the reliability of existing forecasting techniques. Covers both short-term and long-term forecasting of industry, regional, and national business trends. Mr. Granfield, Mr. R. Williams

201B. Industry Forecasting. Prerequisite: course 401. Evaluation of various methodologies found useful in preparing industry forecasts; differences between short- and long-range forecasting techniques, etc. Mr. Andersen, Mr. Kimbell

201C. Regional Economic Forecasting. Prerequisite: course 201A. Forecasting of economic activity in a region; emphasizing special problems such as population and urban migration; the effects of external forces on the regional economy. Mr. Granfield, Mr. Kimbell, Mr. Williams

201D. Economic Policy and Business Environment. Prerequisite: consent of instructor. Analysis of economic policies shaping the business policy: stabilizing policy instruments; structural policies for efficiency and productivity; the future course of the business environment. Treats policy formation and administration as well as design. Mr. Granfield, Mr. Nicols

202A. Economic Theories of Business Behavior: Marginal, Managerial, and Behavioral. Prerequisite: course 200A. The economic behavior of the firm and firm groups is considered. Theories extending from those which retain marginal analysis to treat alternative corporate objectives to those viewing the firm as an adaptive mechanism with limited cognitive and information processing capacities. Mr. Nicols, Mr. Weston

202B. Principles of Industrial Organization. Prerequisite: course 200A. The course develops analysis principles necessary for understanding the economic structure and behavior of industries. Topics range from substitutability criteria for industry definition and a comparison of alternate classification schemes to the relationships among industry structure, conduct, and performance. Mr. Granfield, Mr. Weston

202C. Empirical Studies in Industrial Organization. Prerequisite: course 202B. Analysis of factors influencing the size of industries, their size distribution, and the conditions of entry and exit are investigated. Implications of such industry characteristics are derived for decisions having to do with firm output, prices, advertising, and research and development. Mr. Nicols, Mr. Weston

202D. The Organization of Industry and Business Policy. Prerequisite: consent of instructor. Analysis of economic and social policy with respect to horizontal expansion, vertical integration, and diversification, especially the review of statutory and legal decisions affecting internal and external expansion policies. Mr. Granfield, Mr. Nicols, Mr. Weston

202A. Economics of Decision. (Same as Economics M202A.) Prerequisite: rudiments of economic theory, calculus, and probabilities of statistics (e.g., course 116A). Norms and facts of decision making in business and economic behavior in terms of personal utilities and probabilities. Derivations from consistency: stochastic theories of behavior and resulting econometric models. Mr. Erlenkotter

202B. Economics of Information. (Same as Economics M202B.) Prerequisite: rudiments of economic theory of the firm, and of calculus and probabilities or statistics (e.g., course 116A); course M202A, or consent of instructor. Optimal decision and information rules. Amount, cost, and value of information. The Staff

The Staff
MANAGEMENT / 221

211A. Nonlinear Mathematical Programming. Prerequisite: Mathematics 32A. Theory, methods, and application of the optimization of nonlinear systems. Review of classical optimization methods; optimality and duality theory for convex programs; main computational approaches to convex programming; survey of current computer codes and their implementation experience. Mr. Geoffrion, Mr. Graves

211B. Large-Scale Mathematical Programming. Prerequisite: two quarters of previous work in linear and nonlinear programming; Theory and computational methods for optimizing large-scale linear and nonlinear programs. Exploitation of special structures with combinatorial, dynamic, multidivisional, and stochastic aspects to obtain practical solution procedures in spite of large number of variables and/or constraints. Mr. Geoffrion, Mr. Graves

212A. Management Science Models I. Prerequisite: Mathematics 31C or equivalent. The use of linear models, and their extensions, for managerial decision making. Formulation and application of linear, network, and integer models in finance, production, distribution, marketing, and public systems. Fundamentals of solution methods and their use in analysis. Mr. Erlenkotter, Mr. Geoffrion

212B. Management Science Models II. Prerequisite: Mathematics 31C or equivalent. The use of nonlinear and time-staged dynamic models for managerial decision making. Applications in finance, marketing, production, facilities design, and energy systems. Survey of nonlinear and dynamic programming solution methods. Mr. Erlenkotter, Mr. Geoffrion

212C. Management Science Models III. Prerequisites: courses 213A, 212A, and 212B. Use of probabilistic models for managerial decision making under uncertainty. Stochastic programming, probabilistic dynamic programming, Markovian and waiting line models. Applications in finance, production, marketing, and facilities design. Mr. Erlenkotter, Mr. Jones

213A. Intermediate Probability and Statistics. Prerequisite: previous course work in statistics and mathematics. An introduction to probability theory and hypothesis testing as applied to management. Mr. Jones, Mr. Lippman, Mr. Roll

213B. Statistical Methods in Management. Prerequisite: course 213A or consent of instructor. An introduction to parameter and interval estimation, simple and multiple linear regression and correlation, fixed, random, and mixed effects analysis of variance models and non-parametric statistics, all as they apply to management science problems. Mr. Cooper, Mr. Jones, Mr. Lippman

213C. Introduction to Multivariate Analysis. Prerequisite: course 213B or consent of instructor. Introduction to multivariate technology used in research in socio-technical systems, marketing, psychology, education, and sociology. This course will provide a basic understanding of multiple regression, analysis of covariance, multivariate analysis of variance, discriminant analysis, canonical correlation, and factor analysis. Mr. Cooper, Mr. Jones, Mr. Lippman

214B. Behavioral Science Models. Prerequisite: consent of instructor. Formulation, analysis, and interpretation of mathematical models in the behavioral sciences. Emphasis is on stochastic process models for aspects of individual and group behavior such as learning, problem solving, classification, communication, bargaining, and social exchange systems. Mr. MacQueen

215D. Time Series Analysis. Prerequisite: course 116B or consent of instructor. The application of autoregressive models and advanced time series analysis in measuring trends and fluctuations in business series, electronic computers in the analysis of business series; input-output analysis; the learning curve. Mr. Geoffrion and the Staff

215E. Statistical Design of Surveys. Prerequisite: course 116B or equivalent. Mathematical theory and practices of statistical survey design and analysis. Mr. Jessen

216A. Simulation of Operations Systems. Prerequisite: courses 113B, 402, or equivalent background in batch computing (APL is not suitable) and statistics. Computer simulation methodology including design, validation, operating procedures, and analysis of results. Applications of simulation to problem solving. Mr. Nelson

216B. Advanced Computer Simulation. Prerequisite: course 216A. Advanced use of computer simulation techniques. Major term projects will be undertaken, either singly or in groups, with the object of developing skills in the ability to accompany the problems or the design and execution of computer simulation. Mr. Nelson

217A. Statistical Decision Theory. Prerequisite: course 116A or equivalent; Mathematics 152A recommended. Nature of models for rational behavior in the presence of conflicts of interest, games and uncertainty, and many-person games, state of the art, philosophical and computational limitations, relations with individual and group decision making. Mr. Jackson, Mr. MacQueen

218A. Selected Topics In Operations Research. (1/4 to 1 course) Prerequisite: consent of instructor. New developments in OP research. Topics have included reliability and optimal maintenance, large-scale distribution/inventory systems, and Markov decision processes under uncertainty. May be repeated for credit. The Staff

218C. Selected Topics In Business Statistics. (1/4 to 1 course) Prerequisite: consent of instructor. Special topics in statistical methods. Current developments in statistical theory and practice. Analysis of recent literature. Topics and instructors will be announced when they become known. May be repeated for credit.

218D. Current Problems in Operations Research. (1/4 to 1 course) Current research on a variety of topics in the general area of operations research, presented by invited university and outside speakers. May be repeated for credit.

218XY. Current Issues in Operations Research. (1/4 to 1 course) Current issues and research on a variety of topics in the general area of operations research. May be repeated for credit. The Staff

220A. Technical Foundations In Accounting. Prerequisite: course 403 or consent of instructor. The role of accounting in the internal management of enterprises is emphasized. Topics include accounting formation in production, marketing, and human resource management; investment analysis, cost accounting systems; role of accounting in tax planning, forecasting, budgeting; financial and operational auditing. Mr. Buckley, Mr. Manegold

220B. Financial Accounting I. Prerequisite: consent of instructor. The course deals with concepts and principles of financial accounting with emphasis upon the pronouncements of the AICPA. Current practice in the recording, valuation, and presentation of financial statements is reviewed. Application of these principles to contemporary problems is stressed. Mr. Manegold

220C. Financial Accounting II. Prerequisite: consent of instructor. In addition to providing a continuation of 220B, this course gives special attention to a range of topics which include accounting for partnerships, mergers, combinations, and parent-subsidiary relationships. Litigation procedures are reviewed including reorganizations, receiverships, and bankruptcies. Mr. Bailey, Mr. Manegold

221A. Mathematics for Business Economics. Prerequisite: courses 201A or consent of instructor. The application of mathematical and statistical concepts to problems in business activity, population, industrial structure, productivity, Gross National Product and its components for selected countries. Mr. Osborne, Mr. R. Williams

225D. The Management of Economic Development in Latin America. Discussion, 3 hours. Prerequisite: Economics 120A, 120B, or consent of instructor. An introduction to economic development in Latin America. Consider the problem of population, human resource development, agriculture, and land reform. Examination of appropriate roles for foreign trade, foreign investment, and economic integration in the area's development. Analyzes role of inflation and financial interdependence in capital development. The Staff

227A. Resource Administration of Nonprofit Market Activities. Prerequisite: courses 405 and 406 or consent of instructor. Examination of the economic role of nonprofit markets, and of the allocation of societal resources between the public and private sectors via market and nonmarket mechanisms. Definition and application of economic efficiency to resource allocations. Mr. Granfield, Mr. Nicolas

228B. Public Services and Private Functions. Prerequisite: courses 405 and 406 or consent of instructor. Sources and uses of federal, state, and local revenues and their impacts on public and private resource allocations. Examination of the proper roles of government and the private sector in the financing and provision of public goods and services. Mr. Granfield, Mr. Osborne

240. Selected Topics in Business Economics. Prerequisite: consent of instructor. Special topics in business economics. Current development in theory or practice in business economics. May be repeated for credit. The Staff

251A. Mathematical Programming. Prerequisite: Mathematics 31C. A comprehensive development of the theory and computational methods of linear programming, with applications to business and related disciplinary areas. Mr. Geoffrion, Mr. Graves

251B. Applied Stochastic Processes. Prerequisite: Mathematics 152A recommended. Sequential stochastic (usually Markovian) decision processes in discrete and continuous time, emphasis is on problem formulation and the characterization and computation of optimal policies, often via dynamic programming; application to inventory, queuing, maintenance, reliability, and replacement problems. Mr. Lippman

251C. Network Flows and Combinatorial Programming. Prerequisite: course 210A. Theory and techniques of discrete models in Operations Research. Integer programming, combinatorial programming, and network flows. Applications to various allocation, coordination, scheduling, and sequencing problems. Mr. Geoffrion, Mr. Graves

252. Comparative Market Structure and Competition. Prerequisite: course 205A or consent of instructor. A comparative study of public policies toward competition, market structures, and competitive practices in key industries in selected countries. Mr. Nicolas, Mr. Osborne, Mr. R. Williams

255C. Economics of Organization. (Same as Economics 220C.) Prerequisites: course 203A-203B. Rational models of teams. Relation to the theory of games. The Staff
221. Current Issues in Accounting Information Systems. Prerequisite: consent of instructor. A course emphasizing the discussion of contemporary issues in accounting and information systems. Drawing on prominent speakers in the field, the course requires the student to formulate a position paper on each topic presented.

The Staff

222. Cost Accounting. Prerequisite: course 220A or consent of instructor. The nature, objectives, and procedure of cost accounting and control; job costing and process costing; joint product costing; standard costs; theories of cost allocation and absorption; evaluation of cost accounting data for management decision making.

Ms. Keely, Mr. McDonough

223. Verification of Financial Statements. Problems of examination, verification, and presentation of financial statements; independent public accounting practice; legal and professional responsibilities of public accountants; professional ethics. Operational and management auditing.

Mr. Kircher

224A. Computer Systems. Prerequisite: course 225A and either 113B or 113C or consent of instructor. The specification and configuration of computer-based systems for management applications. Methods for costing system hardware and software and for assessing economic performance. The detailed design and analysis of comparative computer configurations. Case materials and/or actual examples are used.

Mr. Lientz

224B. Management of Computer-Based Information Systems. Prerequisite: course 224A or consent of instructor. A course designed for those interested in managing computer-based information systems. Focuses on the definition, evaluation, installation, and continuing management of EDP systems. Issues of planning and control, as well as the organizational impact of computer systems, are stressed.

Mr. McLean

224C. Systems Analysis for Computer-Based Information Systems. Prerequisites: courses 224A and 225A or consent of instructor. The detailed design and specification of computer-based management information systems. Includes studies of existing systems, economic and organizational analyses of alternatives, and tools for determining user requirements. Case materials and/or actual examples are used.

Mr. Chen, Mr. Lientz, Mr. Spowls

224D. Generalized Data Base Management Systems. Prerequisite: course 113B or 113C or consent of instructor. Examines the features and capabilities of generalized data base management systems. Includes studies of computer-aided database design, the choice of database features, and evaluation of specific systems. Emphasis is upon management uses of such systems. A field study project may be required.

Mr. Chen, Mr. Spowls

224E. Computer Simulation for Management. Prerequisite: Engineering 20 or course 113B or 113C or consent of instructor. Introduction to computer simulation and to general purpose simulation languages (e.g., GPSS, SIMSCRIPT, DYNAMO). Emphasis upon the managerial use of simulation and upon the development of computer-based models for problem solving and policy analysis. Programming assignments are included.

Mr. Chen

224F. Telecommunications and Computer Networks. Prerequisite: course 224A or consent of instructor. Distributed processing. Networked minicomputer systems. Data communication technology. Data security in computer networks. Cost/benefit analysis for the design, configuration, and implementation of computer communication applications, including computer utilities; command and control systems; and commercial, medical, and governmental networks.

Mr. Lientz

224G. Special Topics in Computing. Prerequisite: consent of instructor. An examination in depth of issues or problems concerned with the theory and practice of computing and the management use of EDP systems. Course may have a single theme or may deal with a number of topics. May be repeated for credit.

The Staff

225A. Introduction to Information Systems. Prerequisite: course 404 or consent of instructor. Basic concepts and uses of information systems, systems analysis, fundamental design considerations. The role of data processing. Examples of information systems in profit and not-for-profit organizations.

Mr. McLean, Mr. Spowls, Mr. Swanson

225B. Information Planning and Control. Prerequisite: course 403 or consent of instructor. Design of systems to produce information for planning and control. Survey of approaches and techniques employed at the strategic, managerial, and operational levels. Special consideration of accounting and budgeting methods. Impact of planning and control information on human behavior.

Mr. Flamholz, Mr. McDonough

225C. Measurement in Information Systems. Prerequisites: familiarity with basic statistics, probability theory, set theory, and accounting, or consent of instructor. A study of the role of measurement in accounting and information systems, from the standpoint of mathematical, economic, behavioral, and organizational considerations.

Mr. R.O. Mason, Mr. Swanson

225D. Special Topics in Information Systems. Prerequisite: open primarily to Ph.D. candidates or with consent of instructor. An examination in depth of problems or issues of current concern in information systems. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced doctoral candidates, the academic staff, or distinguished visiting faculty. May be repeated for credit.

Mr. Eiteman

225X-225Z. Current Research in Information Systems. (1/4 course, 1/4 course, 1/4 course) Discussion, two hours. Prerequisite: Doctoral Standing. The course is designed to develop an ability to critically evaluate research in fields relevant to the study of information. Papers are presented in a colloquium format by leading scholars in accounting. Active participation and intellectual interchange are encouraged through discussion of the papers in seminars prior to the workshop, as well as during the colloquium. May be repeated for credit. Graded S/U only.

The Staff

226. Theory of Finance. (Formerly numbered 231B) Prerequisite: course 408. Concerned with decision making under uncertainty, the theory of asset prices, and the efficiency of capital markets. Develops the most recent theoretical constructs and applies them to fundamental issues in corporate financial management such as capital budgeting, capital structure, and dividend policy.

Mr. Copeland, Mr. Geske, Mr. Movers

227A. Profit Sector Financial Policy. Prerequisite: course 230. Identifying and solving financial problems through the use of cases. Stresses the application of financial theory to practical problems in business and industry. Emphasis on problems, using written reports and classroom discussion.

Mr. May, Mr. Movers, Mr. Weston

227B. Nonprofit Sector Financial Policy. Prerequisite: course 408. Identifying and solving financial problems of not-for-profit organizations. Application of financial theory to problems identified through use of cases. Stresses possible application of financial theory to nonprofit-oriented firms. Particular attention to unique problems of resource allocation when market valuation cannot be used as a criterion.

Mr. Eiteman

Mr. Eiteman

Mr. Movers

227E. Security Analysis. Prerequisite: course 230. Primarily a course in stock market investing, but approach is applicable to all investment assets. Includes techniques of security analysis and security valuation based on financial statements of the organization.

Mr. Eiteman, Mr. Rolf, Mr. Shelton

227F. Portfolio Management. Prerequisite: course 230. Focus on entire portfolios rather than individual assets. Review portfolio theory as applied to portfolios of individual assets. Review portfolio theory as applied to portfolio decision making and the evaluation of achieved portfolio performance. Case studies of portfolio construction.

Mr. Masulis

228A. Money and Capital Markets. (Formerly numbered 230A) Prerequisite: course 230. Application of interest theory and flow funds analysis to the price determination process in the markets for bonds, mortgages, stocks, and other financial instruments. Study of the capital structure and the capital markets. Analysis of costs of capital in individual industries.

Mr. Andersen, Mr. Rolf

228B. Financial Institutions. (Formerly numbered 230B) Prerequisites: courses 230 and 238A. Study of the financial policies and practices of commercial banks, savings and loan associations, pension funds, insurance companies, and other major financial institutions. Review of current major problems facing senior managers of these financial institutions.

Mr. Andersen, Mr. Rolf, Mr. Shelton
233C. Speculative Markets. Prerequisite: course 230. Study of the theory and evidence of capital market efficiency including the stock market, the bond market, commodity future markets, the options market, money markets, and foreign exchange markets.

234A. Multinational Business Finance. (Formerly numbered 233A.) Prerequisites: courses 205A and 408; in addition, course 230 is recommended for Finance majors. Financial problems in the management of multinational businesses. Includes problems in the International financial environment, problems surrounding the decision to commit long-term capital to an international venture, and financial techniques for the daily operation of a multinational firm.

Mr. Eiteman, Mr. Weston

234B. Advanced Studies in International Finance. Prerequisites: courses 230 and 234A. Study of current and important issues of international financial management. Major focus on the interrelation of advanced theoretical concepts and their implications for the business firm in its international financial management decisions.

Mr. Eiteman, Mr. Weston

235A. Problems in Insurance Management. Prerequisite: course 135 or consent of instructor. Advanced consideration of the problems of insurance management. Treats the actuarial, underwriting, investment, marketing, and regulatory problems relating to insurance activities.

Mr. Hofflander

235B. Risk and Risk Bearing. Prerequisite: course 135 or consent of instructor. Advanced consideration of the theoretical basis of risk bearing. The study of alternative ways of meeting risk and uncertainty, the scope and limits of insurance, and the economics of insurance.

Mr. Hofflander

238. Special Topics in Finance. Prerequisites: course 230 and consent of instructor. Course intended for master's students. Selected topics in finance theory, empirical studies, and financial policy. May be repeated for credit under different Finance faculty members.

The Staff

239A. Theory of Exchanges under Uncertainty. Prerequisites: course 230 and consent of instructor. Foundations of the theory of exchange are developed as an introduction to theoretical literature on the pricing of capital assets. Course is primarily intended for doctoral students, but well-prepared master's students may find the course useful in their career preparation.

Mr. Geske, Mr. Roll

239B. Theory of Investment under Uncertainty. Prerequisites: courses 230 and 239A or consent of instructor. Conditions of theory of firm capitalization and investment decisions developed with special attention to questions of exchange and allocative efficiency. Course primarily intended for doctoral students, but well-prepared master's students may find the course useful in their career preparation.

Mr. Copeland, Mr. Masulis, Mr. Meyers

239C. Empirical Research in Finance. Prerequisites: course 230, training in econometrics, and consent of instructor. In-depth study of empirical research in finance in master's and doctoral programs. Survey of the research literature in operations management, capital asset pricing, and option pricing. Course is primarily intended for doctoral students, but well-prepared master's students may find the course useful in their career preparation.

Mr. Roll

239D. Doctoral Seminar in Finance. Prerequisites: course 230 and coursework in the 239 series. Course intended for doctoral students. Advanced topics in finance theory and empirical research. May be repeated for credit under different Finance faculty members.

The Staff

239X-239Y.239Z. Finance Workshop. (¼ course, ½ course, ½ course) Discussion one and one-half hours. Prerequisite: Doctoral Standing. The course is designed to develop an ability to critically evaluate finance research. Papers are presented in a colloquium format that by leading scholars in the field. Active participation and intellectual interchange are encouraged through discussion of the papers in sessions prior to the workshop, as well as during the colloquium. May be repeated for credit. Graded S/U only.

240A. Aggregate Planning and Work Force Scheduling. Prerequisite: course 410. Managerial methods for short-term capacity planning and scheduling in aggregate terms. Theoretical models and management practices in manufacturing and service operations. Model formulation that allocates use of productive capacity in an appropriate and efficient manner; backordering shortages, and outside capacity.

Mr. Buffa, Mr. Nelson

240B. Scheduling and Control of Operations. Prerequisite: course 407 and 410 or consent of instructor. Detailed short-term scheduling and control of productive (production or service) operations. Identification of objectives and performance criteria for evaluating scheduling and control procedures. Classification of production and service systems. Scheduling problems and solution approaches for different types of systems.

Mr. Nelson

240C. Design of Operational Systems. Prerequisite: course 410. Issues in selection of the capabilities, characteristics, and configuration of service and manufacturing systems as part of overall strategy for attaining organizational goals; planning of capacity, location, processes/technologies, facilities, organizational structures, and jobs.

Mr. Nelson

241. Technological Bases of Jobs and Organizations. Prerequisite: consent of instructor. Technological determinants of operating systems and jobs; productive system design models; behavioral models underlying operating system design, technology, and organization; design operating system variables, control, and measurement.

Mr. Davis

242A. Planning for Facilities Systems. Prerequisite: course 212A or equivalent. Planning of location, expansion, and replacement for interdependent systems. Examination of spatial and dynamic economic considerations. Applications in selected industries and public systems.

Mr. Erlenkotter

242A. Project Management. Prerequisite: course 407 or equivalent. Management of development projects. Decision-making environment, economic analysis, network analysis, scheduling, and control of development projects. Sequential and aggregate development decisions.

The Staff

242B. Inventory Theory. Prerequisite: course 210B or consent of instructor. General discussion of inventory models with emphasis upon characterizing the form of optimal policies and efficient computational methods. Both deterministic and stochastic and discrete and continuous time models are considered.

Mr. Lippman

242C. Scheduling Models for Intermittent Systems. Prerequisite: course 407. Scheduling models and results for single machine, flow shop, job shop, and resource-constrained project networks. Approaches studied include classical models, recent heuristic approaches, current research in coordinated interaction of computer models, and man-machine interaction.

Mr. Nelson

244. Policy Issues in the Management of Operations. Prerequisite: second-year status. Case analysis of problems in the real world of enterprizes. Cases selected are at the policy level and are drawn from service, nonmanufacturing, and manufacturing industries.

Mr. Buffa

245A. Special Topics in Operations Management. Studies of advanced subjects of current interest in operational management. Emphasis is on recent developments and the application of specialized knowledge to operational problems. Topics change each offering and, in the absence of significant duplication, the course may be repeated.

Mr. Nelson

245B-245C. Survey of Operations Management. Prerequisite: Enrollment in the master's or the doctoral programs. Survey of the research literature in operations management. Seminar reports dealing with special topics.

The Staff

246A. Policy Analysis in the Public/Not-for-Profit Sector. Prerequisite: completion of the management analysis requirement for the MBA Program. Application of several analytic techniques for policy analysis. Specific topics include forecasting/scenario writing, multiple objective decision making, cost analysis, risk analysis, policy specification, and social experimentation. Limitations of methodologies will be examined and concepts illustrated through current applications and case studies.

Mr. Andrews, Mr. Zumeta

246B. Budgeting and Resource Allocations in the Public/Not-for-Profit Sector. Prerequisites: courses 403, 408, and 246A, or consent of instructor. Examines resource allocation objectives/techniques used in federal, state, and local government. Budget analysis as planning device, vehicle for allocational decision making, financial control mechanism, crucible for political choice. Provides some insight into staff functions performed by those responsible for resource allocation.

Mr. Zumeta

246C. Policy Implementation in the Public/Not-for-Profit Sector. Prerequisite: consent of instructor. Studies of advanced subjects of current interest in public/not-for-profit management. Emphasis is on recent developments and the application of specialized knowledge to public/not-for-profit problems. Topics change each offering and, in the absence of significant duplication, the course may be repeated.

The Staff

250A. Human Resource Management. Prerequisite: consent of instructor. First part of a two-course sequence focusing upon the processes and problems of managing human resources. Topics include people as resources; nature of human resource management; human resource planning; designing and organizing tasks and roles; and acquiring and allocating people.

Mr. Fogel, Mr. Massarik

250B. Human Resource Management. Prerequisite: course 250A. Topics include development and training, human resources accounting, human resource strategies, techniques for implementing policies within the organization, and 10-day/for-profit sector.

Mr. Kleingartner, Mr. Massarik

250C. Systems of Employee-Management Participation. Prerequisite: consent of instructor. Course designed to provide understanding of systems of employee-management participation around the world (apart from traditional collective bargaining systems). Specific concepts such as worker participation in decision making, industrial democracy, joint consultation, workers' councils, profit sharing will be covered.

Mr. Adizes
251. The Management of Labor Relations. Consideration, at an advanced level, of the collective bargaining process, the labor-management relationship, the administrative and managerial aspects of the subject, and the impact of public policy on the management of industrial relations. Case studies, field trips, and visiting lecturers will be part of the seminar curriculum. 

The Staff

252. Law and Governmental Policy in Industrial Relations. Prerequisite: course 409. Governmental policies on employer-employee relations; historical background; constitutional and common law principles; application of Taft-Hartley, Labor Reform, Antitrust, Anti-Injunction, Fair Labor Standards, Workmen's Compensation, and other acts; trends and proposed legislation on labor-management affairs. Mr. Fogel, Mr. Mitchell

253A. Negotiation and Conflict in Organizations. Prerequisite: Graduate Standing. The occurrence and management of differences throughout the organization. Furnishes multidisciplinary understanding of conflict phenomena in general, plus an appreciation of critical parameters shaping conflict in specific organizational arenas. Also reviews the arsenal of conflict-management techniques. The Staff

253B. Conflict Resolution in Labor-Management Relations. Prerequisite: Graduate Standing. Analysis of conflict in the employment relationship. Theoretical and empirical findings are examined. Principles and philosophies that underlie resolution of labor-management impasses are considered with emphasis on grievance procedures, arbitration, mediation, and factfinding.

The Staff

254. Analysis of Labor Markets. Prerequisite: consent of instructor. Problems of verifying hypotheses concerning labor market behavior and the application of data to managerial problems. Problems of operation concerning labor market concepts, business goals of management, governments, and communities. Examination of techniques applying these data to managerial problems. Mr. Fogel, Mr. Mitchell

255. Comparative Industrial Relations. Prerequisite: course 409 or an elementary knowledge of labor economics. At national and international level, historical and contemporary analytical comparison of industrial relations systems within their political, social, and economic environments. Included are: the institutions, philosophies, and ideologies of labor, management, and government, and the interaction of their power relationships; the substance and manner of determination of "web of rules" governing the rights and obligations of the parties; and the resolution of conflict. Mr. Hutchinson

257. Labor-Management Relations in Public and Nonprofit Sectors. Prerequisite: Graduate Standing. Analysis of labor-management relations in government, including public education, and in nonprofit institutions (i.e., artistic, cultural, recreational, and health care). Emphasis is on negotiations and group relationships rather than on public personnel administration. Mr. Prasow, and the Staff

258. Selected Topics in Industrial Relations. (1/4 to 1/2 course) Prerequisite: consent of instructor. Topics to be changed each quarter depending on the particular interests of the instructor and students. Individual projects and reports. May be repeated for credit.

The Staff

259A. Manpower Planning and Evaluation. Prerequisite: course 254 recommended. The developments of techniques and practices to meet manpower goals of individual labor force participants, business firms, and communities. Examination of techniques for the evaluation of such programs. Mr. Fogel, Mr. Mitchell

259B. Utilization of Minority Manpower. Prerequisite: course 254 recommended. Examination of the effects of minority group status—race, color, sex, age, women, teenagers—in labor markets and employing institutions (business firms, governments, unions). Consideration of equal employment opportunity programs in firms and of societal antidiscrimination programs. Guest speakers as appropriate. Mr. Fogel

260A. Advanced Marketing Management. Prerequisite: course 411 or consent of instructor. A decision oriented course concerned with the solution of product, price, promotion, and distribution channel problems. Extensive use will be made of case studies. Ms. Scott, Mr. Weitz

260B. Marketing Strategy and Planning. Prerequisite: course 260A or consent of instructor. A framework for strategy, marketing planning, policy development. The cornerstones are the analysis of a few, yet powerful, conceptual frameworks which have broad application. Within the framework of the strategic marketing plan, key elements in the annual marketing planning process will be developed. Concepts are applicable. Mr. Hutchinson

261A. Management in the Distribution Channel. Prerequisite: course 260A or consent of instructor. An examination of decisions in the distribution channel. Issues of power in the distribution channel and the tradeoffs between alternative channel systems are analyzed. Ms. Scott

261B. International Marketing Management. Prerequisite: course 260A or consent of instructor. Opportunities, distinctive characteristics, and emerging trends in foreign markets are analyzed. Includes exploration of alternative methods and strategies;organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods to foreign market conditions. Mr. Hutchinson

262. Price Policies. Prerequisite: course 260A or consent of instructor. Consideration of such concepts as product classification, demand, competition, and costs, as they apply to price making. The theory of price leadership, geographical pricing, price discrimination, price warfare, and leader pricing are also studied in relation to the price-making process. In addition, some attention is given to the price policies of individual firms in which the course is applicable. Mr. Nicols and the Staff

263A. Consumer Behavior. Prerequisite: course 411 or consent of instructor. A study of the nature and determinants of consumer behavior. Attention will be focused on the influence of socio-psychological factors, conflict, personality, and environment. Analysis of market variables, social class, and culture on the formation of consumers' attitudes, consumption and purchasing behavior. Mr. Bettman, Mr. Kassarjian, Mr. Lutz

263B. Theory of Marketing Stimulation. Prerequisite: course 263A. Analysis of factors influencing consumer demand. Techniques for stimulating demand are evaluated in relation to specific marketing objectives. Material is drawn from economics, psychology, sociology, anthropology, and marketing research. Mr. Kassarjian, Mr. Lutz

264A. Marketing Research: Design and Evaluation. Prerequisite: course 411 or consent of instructor. Methods of measuring and predicting the forces affecting marketing, including quantitative aspects of demand, consumer reaction to product characteristics, effectiveness of advertising and other promotional devices, influence of rewards and recognition systems on sales efficiency, and effectiveness of competitors' strategies. Mr. Kassarjian, Mr. Lutz

264B. Mathematical Models in Marketing. Prerequisite: course 260A, or equivalent, or consent of instructor. A study of the utilization of models for the solution of marketing problems. Discussion will be focused on models concerned with such problems as brand switching, media selection, pricing, competitive strategy, scheduling, allocation problems, and waiting time. Mr. Bettman, Mr. Currim, Mr. Hanssens

264C. Seminar in Multidimensional Scaling. Prerequisite: consent of instructor. A detailed study of recent developments in metric and nonmetric multidimensional scaling. Mr. Cooper

265A. Marketing and the Law. Prerequisite: course 260A or consent of instructor. A detailed study of the legislative enactments (federal, state, or local) which influence the operation of institutions engaged in marketing activities, together with an analysis of the judicial decisions which have interpreted these laws. Mr. Kassarjian

265B. Social Issues in Marketing. Prerequisite: course 260A or consent of instructor. Environmental impact of marketing in society; study of theories, methods, and relationships for evaluating transaction behavior in a scientific and humanistic context; macroanalytic perspectives in marketing.

The Staff

266A. Product Management. Prerequisite: course 260A. This course develops a framework for identifying and appraising alternative growth strategies of the firm. Product addition, modification, and deletion decisions are examined; and the processes by which these decisions can be made in an optimal manner are discussed.

The Staff

266B. Advertising Policy. Prerequisites: courses 260A, 263A, or consent of instructor. A study of the formulation of advertising policy, including the analysis of cases dealing with: the role of advertising in marketing, the definition of advertising objectives, appropriation policy, media selection, evaluating advertising results, and the organization of the advertising function. Mr. Lutz

268C. Sales Force Management. Prerequisite: course 411 or consent of instructor. This course develops a logical framework for the solution of problems in sales force management. It covers the role of selling in the marketing mix, the selling interaction, and key problems in planning, organizing, evaluating, and controlling the sales force. Mr. Weitz

267. Macromethodological Issues in Research on People. Prerequisite: consent of instructor. This course provides a systematic approach to the special issues concerning research on people: criteria for evaluating macromethodologies; development of scientific concepts, models, theories, and laws; the problem of private report, and the question of data language.

268. Selected Topics in Marketing. (1/4 to 1/2 courses) Prerequisite: course 260A or consent of instructor. A study of selected areas of marketing knowledge and thought. Specific subjects discussed to be announced. Prerequisite: graduate standing for credit. Mr. Kassarjian

268A. Theory in Marketing. Prerequisite: consent of instructor. This course serves a two-fold purpose: one level it serves as a mechanism to introduce the student to the development of marketing thought. In addition, issues pertaining to the general topic of theory development and testing are addressed. The general goal of the course is to prepare the student for conducting theoretically-grounded research in marketing. Mr. Lutz, Ms. Scott, Mr. Weitz

268B. Research in Marketing Management. Prerequisite: consent of instructor. Intended for doctoral students. Study of research issues associated with marketing management decisions. Recent research in the areas of strategic marketing, marketing segmentation, new product development and introduction, pricing strategies, channel policy, promotion decisions, and sales force management by conducting research. Both quantitative and behavioral approaches to studying these issues are reviewed. Mr. Weitz
279C. Quantitative Research in Marketing. Prerequisite: consent of instructor. The seminar is designed for doctoral students in management and related fields. Students are assumed to have a good background in marketing principles and to be familiar with various analytical techniques and quantitative methods. The purpose of the course is to review a range of quantitative models as applied in marketing research.

279D. Behavioral Research in Marketing. Prerequisite: consent of instructor. Empirical research in consumer behavior is surveyed and critically evaluated from theoretical as well as practical perspectives. The course is intended for doctoral students who will be conducting research in consumer behavior or related areas. Mr. Bettman, Mr. Lutz, Ms. Scott

279E. Special Research Topics in Marketing. Prerequisite: course intended for doctoral students. Advanced, selected topics in marketing with emphasis on thorough examination of one or two topics in current research and theory. May be repeated for credit.

The Staff

259X-269X-269Z. Workshop in Marketing. (½ course, ¼ course, ½ course) Prerequisite: enrollment in Ph.D. program; offered in a year-long workshop series required of all students during the first two years of their doctoral work. The series consists of a number of leading scholars, in marketing and related disciplines, who make presentations to marketing faculty and doctoral students. Active participation and intellectual interchange are the goals of this workshop, which helps the student to gain a richer perspective on the field of marketing.

The Staff

270. Environment of the Art World. Prerequisite: consent of instructor. Consideration and analysis of the political, social, economic, and environmental forces in American society as they affect the existence and development of arts institutions in the U.S. The aim is to explore present policies and trends and potential future developments.

The Staff

271. Law and the Arts. Prerequisite: consent of instructor. Exploration of the way in which law and the arts relate, the role of the lawyer vis-a-vis artist and arts manager, policy underpinnings of the law and effect on the arts, and unsolved problems and issues in areas of interaction.

The Staff

272. The Role of Management in Artistic Decision Making. Prerequisite: consent of instructor. A descriptive study of the criteria for decision making in artistic institutions including the role of the institution in society, the economic environment of the arts, and the artistic value systems of arts organizations.

Mr. Adizes

274. Current Issues in Arts Management. Prerequisite: consent of instructor. The seminar of the final quarter is viewed as the major vehicle integrating the academic program and current issues in the management of artistic institutions. Relevant combinations of lectures, discussions, case studies, and team research projects are employed.

The Staff

275A. Urban Issues and Problems. Prerequisite: course 175 or consent of instructor. Study of urban problems and issues including demand for and supply of private and public goods, environmental pollution, transportation, recreational facilities, poverty, housing, the poor, city size and efficiency, urban sprawl, taxation, new towns, real estate and building industries.

Mr. Clapp and the Staff

275B. Urban Land Economics. Prerequisite: course 175, 405, or consent of instructor. Introduction to development principles in identifying and analyzing the determinants of urban land use and land values, public policies affecting the urban land market, and the private sector's role in shaping the urban environment.

Mr. Clapp, Mr. Mittelbach

275C. Alternative Urban Futures. Prerequisite: consent of instructor. The use of economic tools and business techniques for planning and forecasting alternative urban futures. Urban and World Dynamics models are used to analyze future urban life under various assumptions and for making decisions about the shape and arrangement of future cities.

Mr. Case, Mr. Mittelbach

276A. Theory of Urban Property Valuation. Prerequisite: course 408 or equivalent. Systematic analysis of the elements of real property values and of the allocation of land uses over urban space. Students may use APL programs to investigate and critically evaluate methods of valuation and allocation.

Mr. Case, Mr. Clapp, Mr. Mittelbach

276B. Comparative and International Urban Land Studies. Prerequisite: consent of instructor. Systematic analysis of factors influencing shaping urban development and redevelopment in selected countries. Emphasis on the economic, social, and institutional factors which determine urban growth, structure, and patterns on the land in developed and underdeveloped countries.

Mr. Case, Mr. Mittelbach

276C. Urban Dynamics: Degeneration and Regeneration. Prerequisite: consent of instructor. Seminar which identifies, analyzes and evaluates problems and solutions concerning urban blight, rehabilitation, redevelopment, new towns, inner-city revitalization, and inter-governmental relations in the American city, with particular emphasis on the role of private enterprise in dealing with these problems.

Mr. Mittelbach

277A. Housing Economics. Prerequisite: consent of instructor. Consideration of determinants of private and public demand for housing. Housing programs and relationships between construction and economic trends are examined.

Mr. Case, Mr. Granfield, Mr. Mittelbach

277B. Housing Policy. Prerequisite: consent of instructor. U.S. and foreign housing programs. Housing low-income groups, new town legislation, improving environment, urban renewal and development and related topics. Critical evaluation of public policy, policy implementation, and stages of national economic development, the role of private enterprise.

Mr. Case, Mr. Mittelbach

278A. Urban Real Estate Financing and Investing. Prerequisite: consent of instructor. Theoretical and pragmatic analyses are used to determine the differences between real property and other investments. Real estate investment opportunities are evaluated for their effectiveness in balancing personal and business investment activities and public use goals.

Mr. Case, Mr. Clapp, Mr. Mittelbach

278B. Sources, Uses, and Flows of Real Estate Capital. Identiﬁcation and analysis of sources and uses of real estate credit and equity funds. Policies and strategies are offered to relate real estate construction and market trends, and governmental economic and housing policies and programs.

Mr. Case, Mr. Clapp, Mr. Mittelbach

279A. Special Studies in Urban Land Economics. Open to master’s or doctoral candidates working on thesis or dissertation related research. May be repeated for credit.

The Staff

279B. Selected Topics in Urban Land Economics. Open to all graduate students who wish to pursue a particular topic in housing, real estate, or urban land economics. Open to all graduate students. May be repeated for credit.

The Staff

279X-279Y-279Z. Urban Research and Development. (½ to 1 course) Prerequisite: consent of instructor, graduate status. Exploration of urbania and its problems: proposals for prescriptions for the delivery of a quality life. The exploration will be both macroscopic and microscopic as related to problems of a selected urban area.

The Staff

280A. Important Studies in Human Systems. Prerequisite: enrollment in Ph.D. program or consent of instructor. Survey of seminal studies of human systems. Summarizes and critiques literature focal to the evolution and current status of the field. Reviews such topics as personality, motivation, group and interpersonal systems theory, and organizational design and development.

Mr. McKelvey

280B. Survey of Research Philosophies and Methods. Prerequisite: enrollment in Ph.D. program or consent of instructor. Offers a broad introduction to the philosophical and social context of research in human services and related disciplines. Emphasis on the development of critical thinking skills in analyzing descriptive and interpretive methods; interview, participatory observation, questionnaire and unobtrusive methods of data collection.

Mr. Cooper, Mr. Massarik

280C. Personal and Professional Development. Prerequisite: enrollment in Ph.D. program or consent of instructor. Provides a setting where students may explore their own professional values in the process of testing and learning the values and standards important in the Human Systems Ph.D. program and held by the broader community of system researchers and practitioners.

Mr. Culbert, Ms. Lasko

280D. Research Design for Human Systems Studies. Prerequisite: course 280A, 280C, or consent of instructor. Acquaints students with temporal and logical sequences in the process of designing studies of human systems, including optimizing the fit of research topic, observation and data collection methods, and data analysis techniques. Actively involves students in the preparation of research proposals, analyses, and critical review of their own doctoral research papers.

Mr. McKelvey

280F. Human Systems Research Seminar. Prerequisite: course 280D or consent of instructor. Exploration of various research problems and methods encountered in applying them. Students are actively involved in seminar reports and in class critique of course members’ dissertation research designs. May be repeated for credit.

Ms. Lasko

281A. Socio-Technical Systems. Prerequisite: graduate status. Introduces systems concepts and views work organizations as interacting social and technical systems open to forces from the surrounding environment. Focus is on developing the socio-technical systems analytic approach and understanding the advantages of this approach for designing and managing organizations.

Mr. McKelvey

281B. People in Organizations. Prerequisite: Graduating Standing. Introduces different philosophical perspectives for understanding human behavior. Theories and concepts concerning the management of human behavior in organizations are presented as well as managerial implications of individual, group, and social behavior. Special attention given to knowledge about satisfaction motivation and productivity in organizations.

Mr. McKelvey

281C. Situational Factors in Management. Prerequisite: Graduate Standing. Applies a situational, contingency, or “it all depends” perspective to important managerial issues such as personality, motivation, leadership, conflict management, and design of jobs and organizations. Develops a diagnostic way of thinking that is fundamental to managerial effectiveness in diverse organizational situations.

Mr. McKelvey

282. Task Group Processes. Prerequisite: courses 281A, 281B, or consent of instructor. Focuses on the structures, processes, and interrelations of work groups in socio-technical systems. Emphasizes an understanding of how group activities interrelate with the physical and social environment. Imparts a practical knowledge of task group functioning through classroom exercises and field observations.

Mr. Culbert
254. Analysis of Labor Markets. Prerequisite: consent of instructor. Problems of verifying hypotheses concerning labor market behavior and the application of data to managerial problems. Problems of operationalizing labor market concepts and testing for the validity of available labor market data. Case studies applying these data to managerial problems.

Mr. Fogel, Mr. Mitchell

255. Comparative Industrial Relations. Prerequisite: course 409 or an elementary knowledge of labor economics. At national and international level, historical and contemporary analytical comparison of industrial relations systems within their political, social, and economic environments. Included are the institutions, philosophies, and ideologies of labor, management, and government, and the interaction of their power relationships; the substance and manner of determination of "web of rules" governing the rights and obligations of the parties; and the resolution of conflicts.

Mr. Hutchinson

257. Labor-Management Relations in Public and Nonprofit Sectors. Prerequisite: Graduate Standing. Analysis of labor-management relations in government, including public education, and in nonprofit institutions (i.e., artistic, cultural, recreational, and health care). Emphasis is on negotiations and group relationships rather than on personnel administration.

Mr. Prasow, and the Staff

258. Selected Topics in Industrial Relations. (1 to 1 courses) Prerequisite: open primarily to PhD candidates but also to others with consent of instructor. An examination in depth of problems or issues of current concern in industrial relations. Emphasis on recent contributions to the understanding of these issues, and of special interest to advanced doctoral candidates, the academic staff, or distinguished visiting faculty. May be repeated for credit.

The Staff

259A. Manpower Planning and Evaluation. Prerequisite: course 254 recommended. The developments of models that allow the measurement and improvement of labor productivity, planning methods for forecasting, measuring, and controlling the quantity and quality of individual labor force participants, business firms, and communities. Examination of techniques for the evaluation of such programs.

Mr. Fogel, Mr. Mitchell

259B. Utilization of Minority Manpower. Prerequisite: course 254 recommended. Examination of the employment experience of blacks, women, women, teenagers in labor markets and employing institutions (business firms, governments, unions). Consideration of equal employment opportunity programs and of societal antidiscrimination programs. Guest speakers as appropriate.

Mr. Fogel

260A. Advanced Marketing Management. Prerequisite: course 411 or consent of instructor. A decision oriented course concerned with the solution of product, price, promotion, and distribution channel problems. Extensive use will be made of case studies.

Ms. Scott, Mr. Weitz

260B. Marketing Strategy and Planning. Prerequisite: course 260A or consent of instructor. A framework for strategic marketing planning is developed. The cornerstone is of the analysis of a few, yet powerful, conceptual frameworks which have broad applications. Within the framework of the strategic marketing plan, key elements in the annual marketing planning process will be developed.

Mr. Weitz

261A. Management in the Distribution Channel. Prerequisite: course 260A or consent of instructor. An examination of decisions in the distribution channel. Issues of power in the distribution channel and the balance between alternative channel system will also be discussed.

Ms. Scott

261B. International Marketing Management. Prerequisite: course 260A or consent of instructor. Opportunities, distinctive characteristics, and emerging trends in foreign markets are discussed. The exchange and exploration of alternative methods and strategies, organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods.

Mr. Hanssens, Mr. Weitz

262. Price Policies. Prerequisite: course 260A or consent of instructor. Consideration of such concepts as product classification, demand, competition, and costs, as they apply to price making. The theory of price leadership, geographical pricing, price discrimination, price warefare, and leader pricing are also studied in relation to the price-making process. In addition, some attention is given to the price policies of individual firms in which these concepts are applicable.

Mr. Nicolas and the Staff

263A. Consumer Behavior. Prerequisite: course 411 or consent of instructor. A study of the nature and determinants of consumer behavior. Attention will be focused on the factors such as personality, small groups, demographic variables, social class, and culture on the formation of consumers attitudes, consumption and purchasing behavior.

Mr. Bettman, Mr. Kassaranj, Mr. Lutz

263B. Theory of Marketing Stimulation. Prerequisite: course 263A. Analysis of factors influencing consumer demand. Techniques for stimulating demand are evaluated in relation to specific marketing objectives. Material is drawn from economics, psychology, sociology, anthropology, and marketing research.

Mr. Kassaranj, Mr. Lutz

264A. Marketing Research: Design and Evaluation. Prerequisite: course 411 or consent of instructor. Methods of measuring and predicting the forces affecting marketing, including quantitative aspects of demand, consumer reaction to product characteristics, effectiveness of advertising and other promotion devices, influence of rewards and organizational systems on sales efficiency, and effectiveness of competitors strategies.

Mr. Curtin, Mr. Kassaranj, Mr. Lutz

265B. Theory of Organizational Management. Prerequisite: course 260A, 263A, or consent of instructor. A study of the organizational management functions in the resolution of cases dealing with: the role of advertising in marketing, the definition of advertising objectives, strategy, appropriation policy, media selection, evaluating advertising results, and the organization of the advertising function.

Mr. Weitz

266A. Sales Force Management. Prerequisite: course 411 or consent of instructor. This course develops a logical framework for the solution of problems in sales force management. It covers the role of selling in the marketing mix, the selling interaction, and key problems in planning, organizing, evaluating, and controlling the sales force.

Mr. Weitz

266B. Advertising Policy. Prerequisites: courses 260A, 263A, or consent of instructor. A study of the formulation of policy concerning advertising. The legal and ethical aspects of advertising and the resolution of critical parameters shaping conflict in specific institutional arenas. Also reviews the arsenal of marketing approaches to studying these issues are reviewed.

Mr. Cooper

266C. Sales Force Management. Prerequisite: course 411 or consent of instructor. This course develops a framework for identifying and appraising alternative growth strategies of the firm. Product addition, modification, and deletion decisions are examined; and the processes by which these decisions can be made in an optimal manner are discussed.

Mr. Cooper

267. Macromethodological Issues in Research on People. Prerequisite: consent of instructor. This course provides a systematic approach to the special issues concerning research on people: criteria for evaluating methodologies; development of scientific concepts, models, theories, and law; the problem of private report, and the question of data language.

Mr. Scott

268. Selected Topics in Marketing. (1 to 1/2 courses) Prerequisite: course 260A or consent of instructor. A study of selected areas of marketing knowledge and thought. Specific subjects discussed to include, topics such as each of several areas of particular interest of the instructor and students. Individual projects and reports. May be repeated for credit.

The Staff

269A. Theory in Marketing. Prerequisite: consent of instructor. This course serves a two-fold purpose. At one level it serves as a mechanism to introduce the student to the development of marketing thought. In addition, issues pertaining to the general topic of theory development and testing are addressed. The general goal of the course is to prepare the student for conducting theoretically-grounded research in marketing.

Mr. Lutz, Ms. Scott, Mr. Weitz

269B. Research in Marketing Management. Prerequisite: consent of instructor. Intended for doctoral students. Study of research issues associated with marketing management decisions. Recent research in the areas of strategic marketing, marketing segmentation, new product development and introduction, pricing strategies, channel policy, promotion decisions, and sales force management is reviewed critically. Both qualitative and behavioral approaches to studying these issues are reviewed.

Mr. Weitz
269C. Quantitative Research in Marketing. Prerequisite: consent of instructor. The seminar is designed for doctoral students in management and related fields. Students are assumed to have a good background in marketing principles and to be familiar with probability, statistics, mathematical programming, and econometrics. The purpose of the course is to review a range of quantitative models as applied in marketing research.

Mr. Clapp, Mr. Hanssen, Mr. Jones

269D. Behavioral Research in Marketing. Prerequisite: consent of instructor. Empirical research in consumer behavior is surveyed and critically evaluated from both theoretical and as practical perspectives. Course is intended for doctoral students who will be conducting research in consumer behavior or related areas. Mr. Bettman, Mr. Lutz, Ms. Scott

269E. Special Research Topics in Marketing. Prerequisite: course intended for doctoral students. Advanced selected topics in marketing with emphasis on thorough examination of one or two topics in current research and theory. May be repeated for credit.

The Staff

269X-269Y. Workshop in Marketing. (1/4 to 1/2 course) Prerequisite: enrollment in Ph.D. program. This course is a year-long workshop series designed for students during the first two years of their doctoral work. The series consists of a number of leading scholars, in marketing and related disciplines, who make presentations to small groups of students as a way of helping them to develop a perspective on the field of marketing.

The Staff

270. Environment of the Art World. Prerequisite: consent of instructor. Introduction to the world of the artist and the role of institutions of art. The Staff

271. Law and the Arts. Prerequisite: consent of instructor. Exploration of the way in which law and the arts relate, the role of the lawyer vis-a-vis artist and arts manager, policy underpinnings of the law and effect on the arts, and unsolved problems and issues in areas of interaction.

The Staff

272. The Role of Management in Artistic Decision-Making. Prerequisite: consent of instructor. A descriptive study of the criteria for decision making in artistic institutions including the role of the institution in the political, social, economic, and environmental forces in American society as they affect the existence and development of arts institutions in the U.S. The aim is to explore present policies and trends and potential future developments.

The Staff

275A. Urban Issues and Problems. Prerequisite: course 175 or consent of instructor. Survey of urban problems and issues including demand for and supply of private and public goods, environmental pollution, transportation, recreational facilities, poverty, housing, the poor, city size and efficiency, urban sprawl, taxation, new towns, real estate and building industries.

Mr. Clapp and the Staff

275B. Urban Land Economics. Prerequisite: course 175, 405, or consent of instructor. An introduction to the development and use of economics and management principles in identifying and analyzing the determinants of urban land use and land values, public policies affecting the urban land market, and the private sector's role in shaping the urban environment.

Mr. Clapp, Mr. Mittelbach

275C. Alternative Urban Futures. Prerequisite: consent of instructor. The use of economic tools and business techniques for planning and forecasting alternative urban futures. Urban and World Dynamics models are used to analyze future urban life under various assumptions about the shape, structure, and function of future cities.

Mr. Case, Mr. Mittelbach

276A. Theory of Urban Property Valuation. Prerequisite: course 408 or equivalent. Systematic analysis of the elements of real property values and of the allocation of land uses over urban space. Students may use APL programs to investigate and critically evaluate methods of valuation and allocation.

Mr. Case, Mr. Clapp, Mr. Mittelbach

276B. Comparative and International Urban Land Studies. Prerequisite: public decision making shaping urban development and redevelopment in selected countries. Emphasis on the economic, social, and institutional factors which determine urban growth, structure, and patterns on the land in developed and underdeveloped countries.

Mr. Case, Mr. Mittelbach

276C. Urban Dynamics: Degeneration and Regeneration. Prerequisite: consent of instructor. Seminar which identifies, analyzes and evaluates problems and solutions concerning urban blight, rehabilitation, redevelopment, new towns, inner-city revitalization, and inter-governmental relations in the American city, with particular emphasis on the role of private enterprise in dealing with these problems.

Mr. Mittelbach

277A. Housing Economics. Prerequisite: consent of instructor. Consideration of determinants of private and public demand for housing. Housing programs and relationships between construction and economic trends are examined.

Mr. Case, Mr. Granfield, Mr. Mittelbach

277B. Housing Policy. Prerequisite: consent of instructor. U.S. and foreign housing programs. Housing low-income groups, new town legislation, improving environment, urban renewal and development and rehabilitation programs. Consideration of determinants of private policy implementation, policy and stages of national economic development, the role of private enterprise.

Mr. Case, Mr. Mittelbach

278A. Urban Real Estate Financing and Investing. Prerequisite: consent of instructor. Theoretical and pragmatic analyses are used to determine the differences between real property and other investments. Real estate investment opportunities are evaluated for their effectiveness in balancing personal and business interests. Prerequisites: course 175, 405, or consent of instructor. May be repeated for credit.

Mr. Case, Mr. Clapp, Mr. Mittelbach

278B. Sources, Uses, and Flows of Real Estate Capital. Identification and analysis of sources and uses of real estate credit and equity funds. Policies and institutional constraints. Mr. McKelvey

279A. Special Studies in Urban Land Economics. Open to master's or doctoral candidates working on thesis or dissertation related research. May be repeated for credit.

The Staff

279B. Selected Topics in Urban Land Economics. Open to all graduate students who wish to pursue a particular topic in housing, real estate, or urban land economics. The Staff

280A. Important Studies in Human Systems. Prerequisite: enrollment in Ph.D. program or consent of instructor. Opportunities for doctoral students in management and related areas. Mr. Cooper, Mr. Massarak

280B. Survey of Research Philosophies and Methods. Prerequisite: enrollment in Ph.D. program or consent of instructor. Offers a broad introduction to objectivist and subjectivist philosophies of science, and the psychology and sociology of science. Critical laboratory and field experiments, historical, analytical and descriptive methods; interview, participatory observation, questionnaire and unobtrusive methods of data collection.

Mr. Cooper, Mr. Lutz

280C. Personal and Professional Development. Prerequisite: enrollment in Ph.D. program or consent of instructor. Provides a setting where students may explore their own professional values in the process of testing and learning the values and standards important in the Human Systems Ph.D. program and held by the broader community of system researchers and interveners.

Mr. Culbert, Ms. Lasko

280D. Research Design for Human Systems Studies. Prerequisite: course 280A, 280C, or consent of instructor. acquaints students with temporal and logical sequences in the process of designing studies of human systems, including optimizing the fit of research topic, observation and data collection methods, and data analysis techniques. Actively involves students in the preparation of research proposals.

Mr. Cooper

280E. Tutorial in Human Systems Research. Prerequisite: course 280D or consent of instructor. Provides an opportunity for students to offer and receive constructive comment on the design, execution, analysis, and writing of their doctoral research paper.

Mr. McKelvey

280F. Human Systems Research Seminar. Prerequisite: course 280D or consent of instructor. Explores the advantages of this approach for designing and managing organizations.

Mr. McKelvey

281A. Socio-Technical Systems. Prerequisite: Graduate status. Introduces systems concepts and views work organizations as interacting social and technical systems open to forces from the surrounding environment. Focus is on developing the socio-technical systems analytic approach and understanding the advantages of this approach for designing and managing organizations.

Mr. McKelvey

281B. People in Organizations. Prerequisite: Graduate Standing. Introduces different philosophical perspectives for understanding human behavior. Theorizes about the different standards and criteria by which behavior in organizations are presented as well as the managerial implications of individual, group, and social behavior. Special attention given to knowledge about satisfaction, motivation and productivity in organizations.

Mr. McKelvey

281C. Situational Factors in Management. Prerequisite: Graduate Standing. Applies a situational, contingency, or "it all depends" perspective to important managerial issues such as personality, motivation, leadership, conflict management, and design of jobs and organizations. Develops a diagnostic way of thinking that is fundamental to managerial effectiveness in diverse organizational situations.

Mr. McKelvey

282. Task Group Processes. Prerequisite: courses 281A, 281B, or consent of instructor. Focuses on types of groups and the processes, structures, and interrelations of work groups in socio-technical systems. Emphasizes an understanding of how group activities interact with the physical and environmental environment. Imparts a practical knowledge of task group functioning through classroom exercises and field observations.

Mr. Culbert
283A. Environmental Settings of Socio-Technical Systems. Prerequisite: course 283. Focuses on the complexity and uncertainty of organizational environments. Analyzes environments along socio-cultural, political, and economic dimensions, their interrelationships, and their relation to changes in organizational behavior and employee responses to various environments. Mr. Davis

284A. Organization Design. Prerequisite: course 281A or consent of instructor. Survey of organizational design theories and methods, including bureaucratic, participative, and cognitive models. Develops specific methods suitable for the micro-design of jobs to the macro-design of organizational units. Special emphasis on socio-technical and differentiation/integration models. Mr. Davis

284B. Organization Development. Prerequisite: course 281B or consent of instructor. Analyzes effects of managerial practices on individual, self-fulfillment, and organizational effectiveness. Presents theories of organization change and the action-oriented methods of organization development practitioners. Merges theory with practice through seminar discussions. Mr. Massarik, Mr. Raia

285A. Leadership, Motivation, and Power. Prerequisite: course 281B or consent of instructor. Studies theoretical and practical approaches to influencing and motivating people. Explores the relative effectiveness of various leadership styles, different motivation theories, and power tactics from a managerial point of view. Uses experience-based learning methods to aid in diagnosis and understanding of one's own influence styles. Mr. Culbert, Mr. Massarik

285B. Managerial Interpersonal Communication. Prerequisite: course 281B or consent of instructor. Focuses on organizational, interpersonal, and personality factors affecting managerial communications. Analyzes styles and modes of communication in one-to-one, group, and indirect communication settings. Offers opportunities to deepen understanding of one's own communication styles and interpersonal skills. Ms. Lasko

287. Sensitivity Training Groups and Their Facilitation. Prerequisite: consent of instructor through prior application in Department. Develops cognitive and experiential understanding of the dynamics of sensitivity training groups and their facilitation. Analyzes relevant theory, research findings, and case studies; stresses translating these inputs into practice. Ms. Lasko, Mr. Massarik

288A. Special Studies in Managing Organization Behavior. Prerequisite: course 281B or consent of instructor. Focuses on organizational, interpersonal, and personality factors affecting managerial communications. Analyzes styles and modes of communication in one-to-one, group, and indirect communication settings. Offers opportunities to deepen understanding of one's own communication styles and interpersonal skills. Ms. Lasko, Mr. Massarik

288B. Selected Topics in Behavioral Science. Prerequisite: enrollment in Ph.D. program or consent of instructor. Course focuses on current research in applied areas of psychoanalytic and social psychology. Emphasis on recent research findings. May be repeated for credit. The Staff

288C. Current Issues in Human Systems Change and Development. This course may be repeated for credit. Prerequisite: enrollment in Ph.D. program or consent of instructor. Current topics in philosophy, art, and technology of improving organizations and increasing managerial effectiveness through consulting intervention. Case work, role playing, and written assignments. Mr. Davis

288E. Selected Topics in Organization Theory. Prerequisite: enrollment in Ph.D. program or consent of instructor. In-depth treatment of organizations as a unit of analysis. Emphasizes current theoretical and empirical development, methodological issues in organization theory, and relationships of organization structure, process, and effectiveness. May be repeated for credit. The Staff

288F. Selected Topics in Organizational Behavior. Prerequisite: enrollment in Ph.D. program or consent of instructor. Explores psychological and social psychological aspects of human behavior and performance in organizations. Covers theoretical models, empirical findings, and applications of such theories as attitudes and values, cognitive and perceptual processes, and behavioral decision-making. May be repeated for credit. The Staff

288G. Current Issues in Human Systems Studies. Prerequisite: enrollment in Ph.D. program or consent of instructor. In-depth study of theory and research pertaining to behavioral and organizational sciences as cross-cultural, organizational change, action, and multivariate research, depending on student and faculty interest. May be repeated for credit. The Staff

288H. 288H. Behavioral and Organizational Sciences Workshop. (1/4 course) Two hours discussion. Prerequisite: Doctoral Standing. This course is designed to expose Ph.D. students to the research within the field while at the same time requiring that each Ph.D. student develop a critical framework for evaluating and integrating recent research. May be repeated for credit. Graduated S/U only.

290. Organization Theory. Prerequisite: course 423 or consent of instructor. Analysis of the theory and practice of the organizational function of organizing through study of the literature, case analyses, and seminar discussion. Individual projects and reports. Mr. Koontz, Mr. McKevey, Mr. Sedgwick

291. Planning and Control. Prerequisite: course 281B or consent of instructor. Analysis of the theory and practice of planning and control. The implementation of objectives through policy formulation, decision making, and control. Individual projects and reports. Mr. Schott, Mr. Steiner

292A. Research and Development Policy. Examination of research and development as a process and as an element of a goal oriented organization. Factors affecting invention, innovation, and development of new technologies; organizational behavior and organizational change; organizational change and organizational models; assessing forecasting technological futures. Mr. Mason, Mr. Schott

292B. Models of Organization Behavior. Prerequisite: consent of instructor. Theoretical frameworks for developing explanatory and predictive models of complex organizations. Exercises in constructing formal models, usually in mathematical or stochastic form and, where appropriate, using materials from field studies to develop empirical tests. These models are then applied to the systems changes recommended in the socio-technical field study. The Staff

292C. Comprehensive Planning in the Public Sector. Prerequisite: consent of instructor. Evolving models of mission and management with particular emphasis on the public sector. Development of policy through standard setting, bargaining, and regulating governing relationships, reality and value judgments; social and technological alternatives; and social and technological forecasting. Mr. Andrews

292D. Management in the Not-For-Profit Sector. Prerequisite: consent of instructor. A study of the not-for-profit sector, the institutions within it, and its relationship to the governmental and business sectors. Special emphasis on management problems peculiar to the not-for-profit sector. Mr. Case

293. Business and Society. Prerequisite: consent of instructor. An in-depth study of the business enterprise as a social institution, with emphasis on the changing purposes of social action. Adjustments of the firm to changes in the social environment. Ethical problems in management. Social responsibilities of the business manager. Mr. Steiner

294A. Strategy Formulation and Implementation. Prerequisite: consent of instructor. Case course dealing with strategy decisions and their implementation, executive action, and administrative behavior involved in managing total enterprises. The student is confronted with complex company situations to develop ideas essential to overall managerial direction. Mr. Steiner

294B. Environmental Impacts on Management. Prerequisite: consent of instructor. Examination of ways in which business, government, labor, and consumer organizational managers might respond to external environmental problems. Methods are studied for developing and evaluating alternative managerial solutions which permit organizations to test and improve their current and future environmental quality. Mr. Case, Mr. Rumelt, Mr. Steiner

295A. Entrepreneurship and Venture Initiation. Prerequisite: consent of instructor. An exploration in entrepreneurship and entrepreneurship in the public sector. examines the formation and operation of new business ventures. Significant and crucial aspects of exploring new business opportunities and starting a business. Mr. Schotthammer and the Staff

295B. Small Business Management. Prerequisite: consent of instructor. Exploration of crucial aspects in managing small business enterprises. Emphasis is placed on the identification and analysis of characteristic operating problems of small firms and the application of appropriate methods or techniques for their solution. Mr. Schotthammer and the Staff

296A. International Business Management. Prerequisite: course 205A or consent of instructor. Identification, analysis, and resolution of managerial issues of policy and action within the context of an international corporation, with emphasis on problems of adaptation to different sociological, cultural, legal, political, and economic environmental characteristics. Mr. Mason, Mr. Schotthammer

296B. International and Comparative Management Research. Prerequisite: enrollment in the Ph.D. program or consent of instructor. In-depth study of theory and research pertaining to international business and comparative management. Emphasizes recent research developments and methodological issues. Impacts knowledge on the design and the conduct of international/comparative management research. Mr. Goodman

297A. Comparative and International Management. Prerequisite: course 412 or consent of instructor. Examination of the practice of management in selected foreign countries, as affected by their social environments and the development of management theory. Mr. Schotthammer

297B. International Business Policy. Prerequisite: course 206A or consent of instructor. Analysis of key managerial problems encountered in a multinational corporation. Concepts and theories acquired in other courses in International Business and Comparative Management are illustrated by a series of complex cases and simulations of international business operations. Mr. Schotthammer and the Staff
Professional Courses (numbered 400-499)

The following courses in the professional series are acceptable toward the MBA, MS, and Ph.D. degrees within the limitations and conditions prescribed by the curricula of the Graduate School of Management.

400. Mathematics for Management. Prerequisite: Graduate standing. Fundamental mathematics for business, including topics from matrix algebra, probability, and calculus, with applications to model building and decision making in business firms. S/U only. The Staff

1401. Managerial Economics. Prerequisite: Graduate Standing. Introduction to the measurement and determination of economic activity in the aggregate and to the role of prices in the decision making of the organization. National Income Accounting, Basic Economic Policy, Markets and Prices, Competition and Monopoly, Applications.

402. Data Analysis, Statistics, and Decision Making. Prerequisite: Graduate Standing. An introduction to statistics for graduate students who have had no previous course in which emphasis is upon application to business problems. The Staff

403. Managerial Accounting. Prerequisite: Graduate Standing. An introduction to fundamental systems and procedures in financial and managerial accounting, with an emphasis on income measurement, marginal analysis, standards and cost behavior. The Staff

404. Managerial Computing. Prerequisite: Graduate Standing. An introduction to the use of computers for management applications. Computer hardware, software, and programming concepts are discussed. Programming problems are assigned, using both batch-type (P/L/C) and interactive (APL) languages. The Staff

405. Managerial Economics: The Organization. Analysis of decision making in the firm, competitive policies and market structure, revenue and cost behavior. The Staff

406. Managerial Economics: Forecasting. Prerequisite: Graduate Standing. Sales, costs, and profit forecasting. General business forecasting and cyclical mechanisms. The Staff

407. Managerial Model Building. Prerequisite: courses 400, 402, or equivalent. A survey of the uses of formal modeling approaches in managerial decision making. Empirical methods, model building, and multivariate analyses, and use of solutions obtained from computer routines. Application areas examined include finance, marketing, production, and public systems. The Staff

408. Managerial Finance. Prerequisite course 403. Analysis of main decision areas of managerial financial management. Aimed at principles generally applicable to all types of organizations. Emphasis on financial planning and control, sources of funds, developing objectives and standards which lead to effective allocation and use of the organization’s resources. The Staff

409. Personnel Management and Labor Relations. Prerequisite: Graduate Standing. Human resources evaluation, Compensation practices. Collective bargaining, Governmental policy impacts on public/private sectors regarding labor-management relations, affirmative action, occupational safety, pension reform. Concepts of labor markets and manpower planning. Current trends and practices such as employee participation, motivation, and flexibility. The Staff

410. Production and Operations Management. Prerequisite: course 111 or 407 of equivalent. Principles and decision analyses related to the effective utilization of production capacity in manufacturing and nonmanufacturing activities for both intermit- tent and continuous systems. Production planning of production organizations, analytical models and methods, facilities design, and the design of control systems for production operations. The Staff

411. Elements of Marketing. A study of institutions and functions as they relate to the distribution of goods and services, emphasizing the viewpoint of management in the planning, execution, and measurement of marketing activities and strategies, and the viewpoint of society in the analysis of cost, impact, and value. The Staff

412. Management of Organizations. Prerequisite: completion of two quarters of work toward the MBA degree. Integrative approach to theory and practice of management in complex organizations, emphasizing managerial roles in designing organizational structures, creating and maintaining planning, control, information, incentive systems, different patterns of human interaction such as structures and systems tend to produce. The Staff

420. Management Policy. Prerequisite: course 412. Evaluation and formulation of organization’s overall policies and strategies. Economic, heuristic, and socio-economic approaches to policy formulation, environmental analysis, and organizational appraisal. Senior management’s role in managing the policy process. The Staff

423. Advanced Management Theory. Advanced study of management theory in formally organized enterprise through significant readings; discussing advanced approaches to applications from applying theory; using theory to integrate methods and findings of quantitative and behavioral sciences; lectures on sophisticated application of management theory in practice. Mr. McKeelvey, Mr. Raia

431A. Introduction to Model Building. (1/2 course) Prerequisite: Graduate Standing. An introduction to formal model building. Use of mathematical models as system descriptors. Characteristics of the major “classes” of models. Formulation of problems in terms of mathematical models. Interpretation of solutions provided by the computer. The Staff

433. Computing Laboratory. (1/2 course) Prerequisite: Graduate Standing. Use of the computer as an aid in solving management-related problems; interactive, time-shared processing utilizing remote terminals; batch processing. The Staff

434. Managerial Accounting and Finance. Prerequisite: Graduate Standing. An introduction to the fundamentals of accounting and finance with emphasis on the preparation of basic financial statements and the use thereof in decision making. The Staff

435. Organizational Behavior and Management Processes. Prerequisite: Graduate Standing. A systems approach to the theory and practice of management in complex organizations. Provides an integrated view of human behavior and managerial processes in a dynamic organizational setting. The Staff

436. Policy and Organizational Environment. Prerequisite: course 441. Environmental settings of organizations; interrelationships among and roles of various sectors of society; social emphasis on business; issues facing managers and management-related specialists; and formulation of organizational strategies and policies. The Staff

440. Managerial Problem Solving: Individual. Prerequisite: Graduate Standing. Study and practice of individual decision making and problem solving including the impacts of personality, motivation, interpersonal communication, and various decision-making techniques. The relationships among the individual, managerial roles, and complex organizations as they influence the managerial process are studied. The Staff
450. Field Work in Behavioral Science Manage-
tment Development. (1/2 to 2 courses) Prerequisite:
course is offered on an In-Progress basis, which re-
requires students to complete the full two-quarter se-
quency, at the end of which time a grade is given for
both quarters of work. The Staff

451. Field Work in Organizational Development. (1 or 2 courses) Prerequisite: course 287 and consent of instructor. Supervised practical field work
in organizational and interorganizational problem solving includ-
ing identification, formulation, data collection, fore-
casting, assumption testing, solution methods, implementation, evaluation, control, and dealing with conflicts. Ambitious and long-term organization of projects in which problem solving is experienced at various lev-
els of complexity. The Staff

444A-444B. Management Field Study. Must be tak-
en in two consecutive quarters in second year. Super-
vised study of an organization including establish-
ment of client organization/student consultant rela-
tionship, identification of problem, design of study, collection and analysis of data, development and re-
porting of implementable recommendations. This
course is offered on an In-Progress basis, which re-
quires students to complete the full two-quarter se-
quency, at the end of which time a grade is given for
both quarters of work. The Staff

452. Field Work in Technical Assistance for Mi-
nority Business Enterprise. (1 to 1 course) Pre-
requisite: completion of first year of master's program or consent of instructor. Supervised field experience in
business consulting and other forms of technical assistance for businesses and management in ethnic communities; seminars and other shared learning experiences in transmitting business admin-
istration technology to the urban ghetto. The Staff

453. Field Work in Arts Management. (1 to 3 courses) Prerequisite: consent of instructor. Supervised field experience and practical work in all phases of an arts organization (pictorial, performing, or com-
munity), concentrating on its managerial problems and its relationship to the community and society in
general. The Staff

495. Preparation for Teaching Business and Man-
age ment. Prerequisite: Graduate Standing and con-
sent of instructor. Study of problems and methods in the
management of teaching. Includes seminars, workshops, and practice teaching. Cannot be used to fulfill M.B.A., M.S., or Ph.D. requirements. Graded S/U.
Mr. Frand, Mr. Lasko

Mathematics

(Department Office, 6356 Mathematical Sciences Building)

Richard F. Arens, Ph.D., Professor of Mathematics.
Donald G. Babbitt, Ph.D., Professor of Mathematics.
*Kirby A. Baker, Ph.D., Professor of Mathematics.
A.V. Balakrishnan, Ph.D., Professor of Mathematics and Engineering and Applied Science.
Robert J. Blattner, Ph.D., Professor of Mathematics (Chairman of the Department).
Robert F. Brown, Ph.D., Professor of Mathematics.
David G. Cantor, Ph.D., Professor of Mathematics and Engineering and Applied Science.
C.C. Chang, Ph.D., Professor of Mathematics.
Alonzo Church, Ph.D., Professor of Mathematics and Philosophy in Residence.
Earl A. Coddington, Ph.D., Professor of Mathematics.
Julian D. Cole, Ph.D., Professor of Mathematics and Engineering and Applied Science.
Philip C. Curtis, Jr., Ph.D., Professor of Mathematics.
Henry A. Dye, Ph.D., Professor of Mathematics.
Robert Edwards, Ph.D., Professor of Mathematics.
Edward Effros, Ph.D., Professor of Mathematics.
Bjorn Engquist, Ph.D., Professor of Mathematics.
Hector Fattorini, Ph.D., Professor of Mathematics and Engineering and Applied Science.
Thomas S. Ferguson, Ph.D., Professor of Mathematics.
Theodore Gamelin, Ph.D., Professor of Mathematics.
Donald R. Graham, Ph.D., Professor of Mathematics.
David Gieseker, Ph.D., Professor of Mathematics.
Thomas M. Liggett, Ph.D., Professor of Mathematics.
D. Anthony Martin, Professor of Mathematics.
Ronald Miech, Ph.D., Professor of Mathematics.
Yiannis N. Moschovakis, Ph.D., Professor of Mathematics.
Barrett O'Neill, Ph.D., Professor of Mathematics.
Stanley J. Osher, Ph.D., Professor of Mathematics.
Lowell J. Paige, Ph.D., Professor of Mathematics.
Sidney Port, Ph.D., Professor of Mathematics.
James V. Raison, Jr., Ph.D., Professor of Mathematics (Vice Chairman, Graduate).
Raymond M. Redheffer, Ph.D., Professor of Mathematics.

Individual Study and Research Courses

(numbered 500-599)

Individual study or research courses may be used, within limitations and conditions pre-
scribed by the School, to satisfy minimum high-
der degree requirements.

501. Cooperative Program. (1/2 to 2 courses) Pre-
requisite: approval of UCLA School of Management Graduate Adviser and Assistant Dean. Approval of
host campus Instructor, Department Chairman and
Graduate Dean. The course is used to record the
enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institu-
tions. To be graded S/U.

596A-596N. Research in Management. (1/2 to 2
courses) Prerequisite: consent of Director of Mas-
ter's Program or Director of Doctoral Program by spe-
cial petition. Directed individual study or research.

597. Preparation for Qualifying Examinations. (1
or 2 courses) Prerequisite: consent of Director of Mas-
ter's Program or Director of Doctoral Program by spe-
cial petition. Preparation for comprehensive ex-
amination for the master's degree or the qualifying examination for the Ph.D. degree. The Staff

598. Thesis Research in Management. (1 or 2
courses) Prerequisite: consent of Director of Mas-
ter's Program by special petition. Research for and
preparation of the master's thesis. The Staff

599. Dissertation Research in Management. (1 or
2 courses) Prerequisite: consent of Director of Doc-
toral Program by special petition. Research for and
preparation of a doctoral dissertation. The Staff

Admission Requirements. Prospective gradu-
ate students in mathematics need not have an undergraduate mathematics major, but they
must have completed at least 10 quarter courses (or eight semester courses) in sub-
stantial upper division mathematics—particu-
larly advanced calculus, algebra, differential equations, and differential or projective geom-
etry. For admission to a master's degree pro-
gram, students must have earned in these up-
per division mathematics courses a cumulative grade point average of at least 3.2; for direct
admission to the doctoral program, this grade point average must be at least 3.5.

Students who have already obtained a mas-
ter's degree, must have maintained an aver-
age of better than 3.6 in their graduate study.

Bruce L. Rothschild, Ph.D., Professor of Mathematics (Vice Chairman, Undergraduate).
Leo Sario, Ph.D., Professor of Mathematics.
Murray Schacher, Ph.D., Professor of Mathematics.
Robert Steinberg, Ph.D., Professor of Mathematics.
Charles J. Stone, Ph.D., Professor of Mathematics and Computer Science.
*Ernst G. Straus, Ph.D., Professor of Mathematics.
Masamichi Takesaki, Ph.D., Professor of Math-
ematics.
V. S. Varadarajan, Ph.D., Professor of Mathematics.
James White, Ph.D., Professor of Mathematics.
E. F. Beckerbach, Ph.D., Emeritus Professor of Mathematics.
M. R. Hestenes, Ph.D., Emeritus Professor of Mathematics.
Paul G. Hoel, Ph.D., Emeritus Professor of Mathematics.
William T. Puckett, Ph.D., Emeritus Professor of Mathematics.
Robert H. Sorgenfrey, Ph.D., Emeritus Professor of Mathematics.
Angus E. Taylor, Ph.D., Emeritus Professor of Mathematics.
Frederick A. Valentine, Ph.D., Emeritus Professor of Mathematics.
S. Y. Al-Abdul-Chaib, Ph.D., Associate Professor of Mathematics.
S. Y. Cheng, Ph.D., Associate Professor of Mathematics.
Pamela Cook-Ioannidis, Ph.D., Associate Professor of Mathematics.
Rodolfo DeSapio, Ph.D., Associate Professor of Mathematics.
Richard S. Elman, Ph.D., Associate Professor of Mathematics.
David Gillman, Ph.D., Associate Professor of Mathematics.
Mark Green, Ph.D., Associate Professor of Mathematics.
Allen E. Hatch, Ph.D., Associate Professor of Mathematics.
Charles G. Lange, Ph.D., Associate Professor of Mathematics.
John J. Millson, Ph.D., Associate Professor of Mathematics.
Kenneth P. Bube, Ph.D., Assistant Professor of Mathematics.
Richard T. Durrett, Ph.D., Assistant Professor of Mathematics.
John R. Steel, Ph.D., Assistant Professor of Mathematics.
H. David Yingst, Ph.D., Assistant Professor of Mathematics.

David Cohen, M.A., Lecturer in Mathematics.
Herbert Enderton, Ph.D., Lecturer in Mathematics.
John McGhee, M.A., Lecturer in Mathematics.
All applicants must take the Graduate Record Examination (GRE) Aptitude Test and they must submit at least two letters of recommendation from mathematicians who know their recent work.

A booklet Graduate Studies in Mathematics At UCLA with detailed information about the Department of Mathematics may be obtained by writing to the Graduate Adviser, Department of Mathematics, UCLA, Los Angeles, CA 90024.

Administration of Graduate Programs. Responsibility for all graduate mathematics programs rests with the departmental Vice Chairperson for Graduate Studies and a Graduate Studies Committee which makes policy, administers the Qualifying Examinations and hears appeals from students. On a day-to-day basis, the various programs are managed by the Vice Chairperson and the graduate administrative assistant from the Mathematics Graduate Office located in MS 6375.

Advising. The Vice Chairperson for Graduate Studies is the chief Graduate Adviser and heads a committee of faculty advisers whose fields of expertise span most of the major areas of mathematics.

All entering graduate students are required to meet with a graduate adviser who will help them plan a reasonable course of study.

The Graduate Vice Chairperson is responsible for monitoring the students’ progress toward their degree objectives and approves all study lists, each quarter. Normally, a continuing student will be asked to meet with the Vice Chairperson (or some other adviser) at least once each year and a record of this interview will be placed in the student’s file.

There are ample opportunities for students to meet with an adviser of their choice, throughout the academic year.

The Master of Arts Degree

Students may earn the M.A. degree under the Comprehensive Examination Plan, either in the basic (pure mathematics) program or under an interdisciplinary program in applied mathematics.

Foreign Language Requirement. There is no foreign language requirement for master’s students.

Course Requirements. Eleven quarter courses are required for the M.A. degree, of which at least eight must be graduate courses, while the remaining three may be approved upper division courses. With approval of the Graduate Vice Chairperson, students in the applied mathematics program may take up to five of the required 11 courses in other departments, provided that these courses are in professional or scientific fields closely related to research in applied mathematics.

The Comprehensive Examination. For the basic (pure mathematics) M.A., the Comprehensive Examination consists of two written 4-hour tests, one in algebra and one in analysis. For students in the applied mathematics program, the Comprehensive Examination consists of a 4-hour written test in analysis and a similar test chosen from numerical analysis, methods of applied mathematics or probability/statistics. These tests are all prepared by a comprehensive examination committee appointed by the Graduate Vice Chairperson and they are offered twice each year, early in the Fall Quarter and towards the end of the Spring Quarter. Students may take one or both of their examinations at one sitting and they may re-take their tests any number of times until they pass them.

Time to Degree. A well-prepared student should be able to complete the requirements for the M.A. degree in no more than six or seven quarters of full-time study.

500 Series Course Limitations. Students may enroll in Mathematics 596 (Directed Individual Study or Research) any number of times and they may count up to two courses in 596 towards their 11-course requirement for the M.A., provided they receive a B or better in these courses (not the grade S).

Teaching Experience. Graduate students pursuing their M.A. may be awarded teaching assistantships, but teaching experience is not a formal requirement for the M.A. degree.

Disqualification and Appeal of Disqualification. Master’s students who do not complete all the requirements for the M.A. degree within seven quarters of full-time study are liable to dismissal from the program. The Graduate Vice Chairperson decides in each particular case whether dismissal is warranted, but the student may appeal to the Graduate Studies Committee which has the ultimate say in these matters.

The Master of Arts in Teaching Degree

The M.A.T. program serves the needs of present and prospective mathematics teachers in high school and junior college.

Foreign Language Requirement. There is no foreign language requirement for M.A.T. students.

Course Requirements. Eleven quarter courses are required, as follows.

The core courses. All candidates must take Mathematics 201ABC (Topics in Algebra and Analysis) and 202AB (Mathematical Models and Applications). Normally, all students also take one quarter of Mathematics 596 (Directed Study) while fulfilling the essay requirement described below.

Credential requirements. Candidates who plan to teach in secondary schools and who do not already have valid credentials for such teaching should enroll in the Single-Subject Credential program in the School of Education. Of the courses required by this program, students may receive M.A.T. degree credit only for the following courses: Education 100 (Cultural Foundations of Education), 112 (Psychological Foundations of Education), 312 (Basic Principles of Curriculum and Instruction) and 330AB (Supervised Teaching). Actual receipt of the credential is not a degree requirement. Each student affected should check with the Graduate School of Education for a full and up-to-date description of credential requirements, and should submit a School of Education application for admission to the credential program.

At present, no Education courses or practice teaching are required for the Community College Credential. To qualify for this credential, it will be sufficient for the candidate to have the M.A.T. degree, as described below (additional courses).

In exceptional cases, an M.A.T. program may be individually designed for students who are candidates for a credential other than the two already mentioned.

Additional courses. Besides the six core courses described above, all candidates must take a seventh upper division or graduate course in Mathematics. Particularly recommended are Mathematics 106, 110C, 111AB, 130A, 131B, and 152B. Candidates on the junior college track normally take five 100 or 200 level courses in Mathematics in addition to the six core courses. However, with prior approval of the Graduate Vice Chairperson, such students may present for degree credit one course of a predominantly mathematical nature taken in another department.

Candidates may not receive degree credit for Mathematics 370 or for any Mathematics course numbered 100-109 except 106 (History of Mathematics). In addition, by Departmental and University rules, candidates may not receive degree credit for more than two quarters of Mathematics 596 or for more than two quarters of any 300 series courses.

Essay requirement. Each candidate must prepare a master’s essay. This is an expository account of some subject in mathematics of interest to the student and related to his or her prospective teaching. In practice, the student ordinarily writes this under the direction of a faculty member while enrolled in Mathematics 596.

The Comprehensive Examination. In the M.A.T. program, students take one examination in mathematical subject matter and one in content and philosophy of secondary school mathematics. Ordinarily, these are administered in conjunction with courses 201ABC and 202AB. Reexamination after failure is allowed.
Time to Degree. A well-prepared student should be able to complete the requirements for the M.A.T. degree in no more than six or seven quarters of full-time study.

Teaching Experience. Teaching experience is not a formal requirement for the M.A.T. degree, although a student working for a secondary credential must take the supervised teaching course. M.A.T. students are eligible for teaching assistantships.

Disqualification and Appeal of Disqualification. There are no conditions that lead to dismissal from the program, other than failure to satisfy the University requirement of a 3.0 or better grade point average.

The Ph.D. Degree

Students may earn the Ph.D. degree in mathematics at UCLA either in the classical, pure mathematics program or under an interdisciplinary program in applied mathematics. There are many possible choices of fields within both of these programs and students are urged to read the booklet Graduate Studies in Mathematics At UCLA where the specialties of the faculty and the active research areas in the Department are described in some detail.

Foreign Language Requirement. Students are required to pass two written departmental language examinations in French, German or Russian, except that with the approval of the Graduate Vice Chairperson, students in the applied program may substitute a computer language project for one of the languages. Foreign students whose principal language of instruction in their elementary and secondary education was not English, may substitute English for one of the foreign languages, but then their other language must be one of French, German or Russian (even if they are in the applied program).

These examinations are offered twice each year, in the Fall and Spring, and they require the student to translate material in some basic field of mathematics without the use of a dictionary. They may be retaken any number of times until passed. At least one of the language examinations must be passed before the student can take the first Oral Qualifying Examination and the complete language requirement must be satisfied before the student takes the Final Oral Examination.

Course Requirements. In the pure mathematics program, students must pass satisfactorily (with a grade of A or B) at least 12 mathematics courses numbered from 205 to 285 but excluding the basic courses 210AB, 245AB and 246AB. At most, three of these courses may be numbered 285.

In the applied mathematics program, students must pass satisfactorily (with a grade of A or B) at least 18 approved graduate courses including at least 12 mathematics courses numbered from 205 to 285. At most, three of these may be numbered 285.

Students in the pure program are also required to satisfy a seminar participation requirement by lecturing at least twice in each of two seminars directed by a faculty member, within one year after passing the Written Qualifying Examinations.

Written and Oral Qualifying Examinations. In the pure mathematics program, a student is required to take four written Qualifying Examinations in the following fields: algebra, real analysis, complex analysis, and one field selected from geometry - topology, statistics-probability, logic, or numerical analysis. The examinations are given twice each year, in the Fall and Spring Quarters. A student must pass two examinations within a period of six registered quarters and all four examinations within a period of nine registered quarters after being admitted for graduate study. A Ph.D. candidate in the pure program can obtain a master's degree by fulfilling the 11-course requirement, and by passing the Ph.D. algebra Qualifying Examination and one of the other Ph.D. Qualifying Examinations.

In the applied mathematics program, a student must pass four Qualifying Examinations. The first three Qualifying Examinations are written examination in applied real and complex analysis, and two written examinations chosen from the three areas, applied differential equations, numerical analysis, and probability statistics. Two of these examinations are to be completed by the end of six registered quarters after being admitted to graduate study. The third examination is to be completed by the end of nine registered quarters. These examinations are given twice a year, in the Fall and Spring Quarters. The fourth Qualifying Examination, either written or oral, is in the student's specialized "outside" field, testing the student's competence at a research level. The student must present for the approval of the Applied Mathematics Committee, a program describing his or her intended preparation in the specialized outside field. Candidates for the Ph.D. in the applied mathematics program may substitute for the first two Qualifying Examinations the two Qualifying Examinations in real analysis and in complex analysis given regularly in the pure mathematics Ph.D. program. An applied Ph.D. student can obtain a master's degree by fulfilling the 11-course requirement, and by passing the Ph.D. real and complex analysis Qualifying Examination and one other applied examination.

After passing the four Qualifying Examinations, the student is eligible to set up the doctoral committee which administers the Oral Qualifying Examination for advancement to candidacy. The main purpose of this examination is to test the candidate's depth of knowledge in his or her chosen specialty, although a discussion of the candidate's plans for the dissertation is not ruled out. Reexamination after failure on the first Oral Qualifying Examination is determined on an individual basis. A more detailed description of the written examinations for both programs can be found in the booklet Graduate Studies in Mathematics at UCLA.

Final Oral Examination. The Final Oral Examination may be waived by the candidate's doctoral committee, with the approval of the Graduate Vice Chairperson.

Time to Degree. A well-prepared student should be able to complete the course requirements and pass the Written Qualifying Examinations for the Ph.D. degree within seven to nine quarters of full-time work. Completion of all degree requirements (including the dissertation) normally takes 15 quarters.

Candidate in Philosophy Degree. A student is eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D. degree.

Teaching Experience. Most Ph.D. students are teaching assistants at some time during their graduate study, but there is no formal requirement of teaching experience for the degree.

Disqualification and Appeal of Disqualification. Failure to pass all the Written Qualifying Examinations within nine quarters of attendance or failure to pass two such examinations within six quarters makes a student liable to dismissal from the Ph.D. program. If either of these occurs, the student is informed by the Graduate Vice Chairperson and is asked to submit a written appeal and to solicit letters of support from members of the faculty. This appeal is considered by the Graduate Studies Committee which decides by vote whether the student will be allowed to remain in the program. The decision of the Graduate Studies Committee is final.

Graduate Courses

Teacher Preparation

201A-201B-201C, Topics in Algebra and Analysis. Prerequisite: B.A. degree with mathematics major or equivalent. A course for students in the mathematics-education program. Students may not receive credit toward the M.A. degree in Mathematics for this course. Important ideas of algebra, geometry and calculus leading effectively from elementary to modern mathematics. Approaches to the number system, point sets, geometric interpretations of algebra and analysis, integration, differentiation, series and analytic functions.

202A-202B-202C, Mathematical Models and Applications. Prerequisite: B.A. degree with mathematics major or equivalent. A course designed for students in the mathematics-education program. Students may not receive credit toward the M.A. degree in Mathematics for this course. A development of mathematical theories describing various empirical situations. Basic characterizing postulates are discussed and a logical structure of theorems developed. Modern topics such as operations research, linear programming, game theory, learning models, models in social and life sciences.
Number Theory
205A-205B-205C. Number Theory. Prerequisites: courses 246A and 210A or consent of instructor. Topics from analytic algebraic and geometric number theory, including distribution of primes and factorization in algebraic number fields. Also selected topics from additive number theory, Diophantine approximation, partitions, classical group theory, lattice point problems, valuation theory, etc.

Algebra
210A-210B-210C. Algebra. Prerequisites: courses 110A-110B-110C or consent of instructor. Students may not receive credit toward the Master's degree for both 210B and 110B and/or 210C and 110C. Group theory including the theories of Sylow and Jordan-Holder; ring theory; and ideals. Factorization theory in integral domains, modules over principle ideal rings, Galois theory of fields, multilinear algebra, structure of algebras.

211. Structure of Rings. Prerequisite: course 210A or consent of instructor. The radical, irreducible modules and primitive rings, rings and algebras with minimum condition.

212. Homological Algebra. Prerequisite: course 210A or consent of instructor. Modules over a ring, homomorphisms and tensor products of modules, function modules and derived functors, homological dimension of rings and modules.

213A-213B. Theory of Groups. Prerequisite: course 210A or consent of instructor. Topics from representation theory, transfer theory, infinite Abelian groups, free products and presentations of groups, solvable and nilpotent groups, classical groups, algebraic groups.

214A-214B. Algebraic Geometry. Prerequisite: course 210A or consent of instructor. Preliminaries from the theory of commutative rings and ideals. Theory of algebraic varieties. Topics chosen from plane curves, resolution of singularities, invariant theory, intersection theory, divisors and linear systems.

215A-215B. Commutative Algebra. Prerequisite: course 210A or consent of instructor. Topics from commutative ring theory, including techniques of localization, prime ideal structure in commutative Noetherian rings, the principal ideal theorem, Dedekind rings, modules, projective modules, the Serre conjecture, regular local rings.

Logic and Foundations
220A-220B-220C. Mathematical Logic and Set Theory. Prerequisites: courses 112A-112B-112C or equivalent. Model theory: compactness theorem; Lowenheim-Skolem theorems; definability; ultraproducts; preservation theorems; interpolation theorems. Recursion function theory: Church's thesis; recursive enumerates sets; hierarchies; degrees. Formal proofs: completeness and incompleteness theorems; decidable and undecidable theories; quantifier elimination. Set theory: Zermelo-Fraenkel and von Neumann-Gödel-axioms; cardinal and ordinal numbers; continuum hypothesis; constructible sets; independence results and forcing.

222A-222B. Lattice Theory. Prerequisites: course 210A and some knowledge of topology, or consent of instructor. Partially ordered sets, lattices, distributivity, Birkhoff's representation theorem. Interaction with algebra, combinatorics, topology, and logic.

223A. Model Theory. Prerequisites: courses 220A-220B-220C. Topics will be chosen from ultraproducts, preservation theorems, interpolation theorems, saturated models, omitting types, categoricity, two cardinal theorems, enriched languages, soft model theory, and applied model theory.

223B. Set Theory. Prerequisites: courses 220A-220B-220C. Topics will be chosen from constructibility theory, Cohen extensions, large cardinals, and combinatorial set theory.

223C. Recursion Theory. Prerequisites: courses 220A-220B-220C. Topics will be chosen from degrees of unsolvability, recursively enumerable sets, undecidable theories, inductive definitions, admissible sets and ordinals, and recursion in higher types.

Geometry
226A-226B-226C. Differential Geometry. Prerequisite: course 231A or consent of instructor. Manifold theory; connections, curvature, torsion, and parallel transport functions; local convexity; convex functions; Helic-like theory; duality.

Topology
230. General Topology. Prerequisite: courses 131A-131B or consent of instructor. Students may not receive credit toward the Master's degree for both 230 and 121. Topological spaces and maps, products, quotient spaces, compactness, separation properties, local properties, completeness. Homotopy and the fundamental group.

231A. Manifold Theory. Prerequisites: courses 131A-131B and 121 or consent of instructor. Manifolds, tangent and cotangent spaces, vector fields and integral curves, manifolds with boundary, manifolds with compact boundary, vector bundles, integration on manifolds.

231B. Introduction to Homology Theory. Prerequisite: course 231A, or consent of instructor. Elementary constructions of homotopy theory. Singular chains and the boundary operator, definition of homology, Mayer-Vietoris sequence, calculation of homology of standard spaces.

231C. Further Topics in Geometry and Algebraic Topology. Prerequisites: courses 231A-231B, or consent of instructor. Topics may include: cohomology and duality theories, de Rham's theory, cup products, and transversality intersection theory of submanifolds. Additional topics as time permits.

232A-232B-232C. Algebraic Topology. Prerequisites: courses 231A-231B, or consent of instructor. Fundamental group; homology theory, singular theory, cellular theory, computation of homology groups; cohomology theory, cup and cap products, duality; homotopy theory, fiber spaces, Hurewicz theorem, obstruction theory.

233. Advanced Topics In Geometric Topology. Prerequisite: courses 231A, 231B or consent of instructor. Handlebody theory, transversality; PL topology; surgery; topics vary from year to year.

237. Advanced Topics In Algebraic Topology. Prerequisites: courses 229A-229B-229C or consent of instructor. K-theory: fixed point theory; extraordinary cohomology theories; topics vary from year to year.

Analysis and Differential Equations
240. Methods of Set Theory. Prerequisites: courses 131A-131B, 110A-110B, or courses 220A-220B-220C or consent of instructor. Naive, axiomatic set theory, the axiom of choice and its equivalents, wellorders, transfinite induction, ordinal and cardinal numbers. Applications to algebra; Hamel bases, the Stone representation theorem. Applications to analysis and topology; the Cantor-Bendixson theorem, counterexamples in measure theory, Borel and analytic sets, Choquet's theorem.

247A-247B. Complex Functional Analysis. Prerequisites: courses 245 and one quarter of course 246. Distribution on \( R^n \) and \( T^n \). Principal values; other examples. Distributions with submanifolds as supports. Kernel theorem. Convolution; examples of singular integrals. Tempered distributions and Fourier transform theory on \( R^n \). Distributions with compact or one-sided supports and their complex Fourier transforms.

249A-249B-249C. Calculus of Variations and Optimal Control Theory. Prerequisites: courses 131A-131B and one quarter of course 246A or consent of instructor. Conditions for minima or maxima of functionals. The problems of Lagrange, Bolza, and Mayer; with or without inequality constraints. Mathematical aspects of optimal control theory. Multiple integral problems. The theory of quadratic forms in Hilbert space with applications to elliptic partial differential equations. Existence theorems.

250A. Ordinary Differential Equations. Prerequisite: course 246A or consent of instructor. Basic theory: existence and uniqueness of solutions. Continuity with respect to initial conditions and parameters. Linear systems and n-th order equations. Analytic systems with isolated singularities. Self-adjoint boundary value problems on finite intervals.

250C. Advanced Topics In Ordinary Differential Equations. Prerequisites: course 250A-250B. Selected topics, such as spectral theory or ordinary differential equations, with emphasis on boundary value problems, celestial mechanics, approximation of solutions, and Volterra equations.
264. Applied Complex Analysis. Prerequisite: course 246A or consent of instructor. Topics chosen from contour integration, conformal mapping, differential equations in the complex plane, asymptotic series, Fourier and Laplace transforms, singular integral equations.

265A-265B. Real Analysis for Applications. (Formerly numbered 265A-265B-265C.) Prerequisite: courses 131A-131B or consent of instructor. This course is not open for credit to students with credit in 245A-245B-245C. Lebesgue measure and integration on the real line, absolutely continuous functions, functions of bounded variation, $L^p$ and $L^q$ spaces, Fourier series. General measure and integrations, Fubini and Radon-Nikodym theorems, representation of functionals, Fourier integrals.

267A-267B. Applied Algebra. Prerequisite: course 110A or equivalent. Students may not receive credit toward the master's degree for 267A and 210A. Linear algebra, eigenvalues and quadratic forms; linear inequalities, finite fields and combinatorial analysis. Group theory, with emphasis on representations. Application to physical problems.

268B-268C. Topics in Applied Functional Analysis. Prerequisite: course 255A. Topics include spectral theory with applications to ordinary differential operators, eigenvalue problems for differential equations, generalized functions and partial differential equations.

271A. Tensor Analysis. Prerequisite: course 131A or consent of instructor. Algebra and calculus of tensors on n-dimensional manifolds. Curvilinear coordinates, and coordinate-free methods. Covariant differentiation. Green-Stokes theorem for differential forms. Applications to topics such as continuum and particle mechanics.

271C. Introduction to Relativity. Prerequisites: course 271A and some knowledge of mechanics. Special theory of relativity: Extensive to general theory. The relativistic theory of gravitation.

272. Advanced Topics in Continuum Mechanics. Prerequisites: courses 142 and 251A or equivalent. Mathematical aspects of solid and/or fluid mechanics. Instability, wave propagation, nonlinear and stochastic phenomena.

M274A. Asymptotic and Perturbation Methods I. (Same as Mechanics and Structures M292A.) Prerequisites: courses 192A or equivalent; Mathematics 132 or infinite particle. The fundamental mathematics of asymptotic analysis, expansions of Fourier integrals, method of stationary phase. Watson's lemma, method of steepest descent, uniform asymptotic expansions, elementary perturbation problems. M274B. Asymptotic and Perturbation Methods II. (Same as Mechanics and Structures M292B.) Prerequisites: Engineering 192A or equivalent; Mathematics 132 or equivalent. The fundamental mathematics of asymptotic analysis, limit process expansion; asymptotic propagation of wave problems, matching of asymptotic expansions, multiple scale methods, application to partial differential equations, near and far fields.

Probability and Statistics

275A-275B. Probability Theory. Prerequisite: course 245A or 251A. Connection between probability theory and real analysis. Weak and strong laws of large numbers, central limit theorem, conditioning, ergodic theory, martingale theory.

275C. Stochastic Processes. Prerequisites: courses 275A-275B. Selected topics such as Brownian motion and potential theory. Markov processes, infinite particle systems, Gaussian processes. Content varies from year to year and the course may be repeated for credit.

276A-276B. Mathematical Statistics. (Formerly numbered 276C.) Prerequisites: courses 150A-150B-150C or 152A-152B and courses 131A-131B. 276A; Bayes, admissible and minimax decision rules; sufficiency and completeness; uniformly most powerful tests. 276B: Fisher information; Rao-Rao information; asymptotic properties of estimators; maximum likelihood estimators; likelihood ratio and chi-square tests of hypotheses.

276C. Statistical Decision Theory. (Formerly numbered 276A-276B.) Prerequisite: course 276A. Invariant estimators and tests; best unbiased and locally best linear, multiparameter estimators; Bayes estimators; maximum likelihood estimators; likelihood ratio and chi-square tests of hypotheses.

277. Sequential Analysis. Prerequisite: course 276A. Bayes sequential decision rules, stopping rule problems, optimality of the sequential probability ratio test, Wald's fundamental identity.

278. Nonparametric and Robust Statistics. Prerequisite: course 276C. Nonparametric and robust procedures are developed for hypothesis testing, estimation in one and two sample problems, linear and non-linear regression, multiple classification, density estimation.

M279A-M279B-M279C. Linear Statistical Models. (Same as Public Health M205A-M205B-M205C.) Prerequisites: Mathematics 150C or 152B and Public Health 100C, or equivalent. Topics include linear algebra, applied to linear statistical models, distribution of quadratic forms, the Gauss-Markov theorem, fixed and random component models, balanced and unbalanced designs.

M280. Computational Statistics. (Same as Bioinformatics M280A and Public Health M207.) Prerequisite: Mathematics 115 and 150C or equivalent. Introduction to theory and design of statistical programs: pivoting and other technologies used in stepwise regression, nonlinear regression algorithms, algorithms for balancing and unbalanced analysis of variance including the mixed model, iterative rescaling and other methods for log-linear models.
285. Seminars. Prerequisite: consent of instructor. No more than two 285 courses can be applied toward the Master's degree course requirement, except by prior permission of the Vice-Chairman for Graduate Studies. Topics in various branches of mathematics and their applications by means of lectures and informal conferences with members of the staff.

285A. Seminar in the History and Development of Mathematics.
285B. Seminar in Number Theory.
285C. Seminar in Algebra.
285D. Seminar in Logic.
285E. Seminar in Geometry.
285G. Seminar in Analysis.
285H. Seminar in Differential Equations.
285I. Seminar in Functional Analysis.
285J. Seminar in Applied Mathematics.

285A-285M. Participating Seminars. Prerequisite: consent of instructor. Seminars and discussion by staff and students. No course credit will be given, but these may be used to satisfy the participating seminar requirement for the Ph.D.

286A. Participating Seminar in the History and Development of Mathematics.
286B. Participating Seminar in Number Theory.
286C. Participating Seminar in Algebra.
286D. Participating Seminar in Logic.
286E. Participating Seminar in Geometry.
286F. Participating Seminar in Topology.
286G. Participating Seminar in Analysis.
286H. Participating Seminar in Differential Equations.
286I. Participating Seminar in Functional Analysis.
286J. Participating Seminar in Applied Mathematics.
286K. Participating Seminar in Probability.
286L. Participating Seminar in Statistics.
286M. Participating Seminar in Mathematics.

289. Seminar in Current Literature. A seminar for Ph.D. candidates. Readings and presentations of papers in mathematical literature under the supervision of a staff member.

Professional Course in Method

370. The Teaching of Mathematics. Prerequisites: course 31B, 38, or 4B and Senior Standing. A critical inquiry into present-day tendencies in the teaching of mathematics.

Individual Study and Research

596. Directed Individual Study or Research. (½ to 1 course) Supervised individual reading and study on a project approved by a faculty member, which may be preparation for the master's essay. May be repeated for credit, but only two such courses may be applied toward the master's degree unless departmental approval is obtained.

599. Research in Mathematics. (½ to 2 courses) Study and research for the Ph.D. dissertation. May be repeated for credit.

Medical History

See Department of Anatomy.

The School of Medicine

The accelerated emergence of Los Angeles as one of the nation's major metropolitan centers led The Regents of the University of California on October 19, 1945, to authorize the University's second medical school, the first in Southern California, at UCLA.

The School of Medicine operates on a quarter system with a 4-year curriculum. The freshman year consists of three quarters of courses in basic medical sciences, social medicine and behavioral sciences, followed by a summer quarter of vacation. The sophomore year, also three quarters, includes further study in basic medical sciences, clinical fundamentals, and pathophysiology of disease. The junior and senior years are a continuum of education of 94 weeks total; 50 weeks of required clinical clerkships, 28 weeks of electives which stress the scientific basis of disease of specific organ systems, and 16 weeks of vacation; advanced clinical clerkships in primary medicine. Schedules are arranged for only a limited number of students.

Special programs of study for individual students may be arranged within the framework of the medical school curriculum. Normally, these programs are available only after the student has completed the first year and with approval of the Dean's Office and the chairperson of the department responsible for the additional coursework. Every effort is made to maintain flexibility within the medical school curriculum, although extensive changes in the course of study can be arranged for only a limited number of students.

Admission Requirements

The School of Medicine on the Los Angeles campus admits 144 freshman students each fall. Applications, cards and medical school catalogs for the class entering September 1981 are available from the Office of Student Affairs, UCLA School of Medicine, Los Angeles, California 90024 from June 1 to October 15, 1980. Applications are available from the American Medical College Application Service (AMCAS). The $30 fee charged by AMCAS for application to any five participating medical schools covers UCLA's initial screening of applications. If an applicant is granted an interview, a non-refundable fee of $20 is required.

Ordinarily a baccalaureate degree is required for admission. However, in certain instances, outstanding students who have completed three full academic years at an accredited college or university are accepted. College years should be devoted to obtaining as broad an education as possible. The major objectives should be the following: (1) competence in English, written and spoken; (2) capacity for quantitative thinking represented by mastery of mathematics; (3) such training in physical and biological science as will facilitate comprehension of medical science and the scientific method; and (4) insight into human behavior, thought and aspiration from study in the social sciences and humanities.

These objectives will ordinarily require completion of the following studies:

Required Courses

English. One year of college English to include the study of English composition.

Physics. One year of college physics (with lab).

Chemistry. Two years of college chemistry to include the study of inorganic chemistry, quantitative analysis and organic chemistry.

Biology. Two years of college biology to include the study of cellular, molecular, developmental and genetic biology. This will include at least one year of upper division courses.

Mathematics. One year of college mathematics to include the study of college algebra. In addition, the study of introductory calculus is also highly recommended.

Courses (e.g., human anatomy) which overlap in subject matter with those in the School of Medicine are not advised. However, advanced or specialized courses in biological science (e.g., cellular physiology) are desirable.

The premedical requirements must be completed before beginning the first year of medical studies, although these requirements need not be completed at the time the application for admission is filed. Accepted candidates must pass a physical examination before registering. Candidates will be selected on the basis of the following considerations:

1. Undergraduate and, where applicable, graduate academic achievement.
2. Score on the Medical College Admission Test, which is administered for the Association of American Medical Colleges by the Psychological Corporation.
3. Interview by a member or members of the Admissions Committee.
4. Evaluation of the applicant's accomplishments and character in letters of recommendation.

The Committee on Admissions selects candidates who present the best evidence of broad training and strong achievements in college, a capacity for mature interpersonal relations, and the traits of personality and character conducive to success in medicine. Preference is not given to students who major in natural sciences, since study in the social sciences and humanities is considered equally valuable.

Advanced Training. Transfer students are accepted into the junior year only. Transfer applications may be submitted November 1 — February 1 to the Office of Student Affairs, Room 13-144 of the Center for Health Sciences.

Graduate Work
Graduate work leading to the M.S. and/or Ph.D. degree is offered, either separately or in conjunction with the M.D. program in the following fields: Anatomy, Biological Chemistry, Biomathematics, Medical Physics (Department of Radiological Sciences), Microbiology and Immunology, Neuroscience, Pathology, Pharmacology, and Physiology. Students enrolled in the Graduate Division who have completed courses in the School of Medicine must apply to the first year class in the School of Medicine must apply to the first year class in order to be considered by the Admissions Committee. The requirements for academic degrees offered through the Graduate Division by departments in the School of Medicine are described under the departmental heading listed in this section. For details concerning the medical curriculum, please consult the UCLA Announcement of the School of Medicine.

Microbiology

(5304 Life Sciences Building)
R. John Collier, Ph.D., Professor of Microbiology.
Frederick A. Eiserling, Ph.D., Professor of Microbiology (Chairman of the Department).
C. Fred Fox, Ph.D., Professor of Molecular Microbiology.
June Lascelles, Ph.D., Professor of Microbiology.
Rafael J. Martinez, Ph.D., Professor of Microbiology.
Donald P. Nierlich, Ph.D., Professor of Microbiology.
M.J. Pickett, Ph.D., Professor of Microbiology.
Sydney C. Rittenberg, Ph.D., Professor of Microbiology.
William R. Romig, Ph.D., Professor of Bacteriology.
Eli E. Sercarz, Ph.D., Professor of Microbiology.
John H. Stilliker, Ph.D., Adjunct Professor of Microbiology.
J.G. Stevens, Ph.D., Professor of Microbiology.
Meridian Ruth Ball, Sc.D., Emeritus Professor of Bacteriology.

Gregory J. Jann, Ph.D., Emeritus Professor of Bacteriology.
David R. Krieg, Ph.D., Emeritus Professor of Bacteriology.
Anthony J. Salle, Ph.D., Emeritus Professor of Bacteriology.
Gary L. Wilcox, Ph.D., Associate Professor of Microbiology.
Bernadine Wisnieski, Ph.D., Associate Professor of Microbiology.
Arnold J. Berk, M.D., Assistant Professor of Microbiology.
Robert P. Gunsalus, Ph.D., Assistant Professor of Microbiology.
Owen N. Witte, M.D., Assistant Professor of Microbiology.

Laurel G. Hefferman, Ph.D., Adjunct Assistant Professor.
Donald A. Kaplan, Ph.D., Associate Research in Microbiology.
Catherine N. Kwan, Ph.D., Associate Research in Microbiology.
Aldons J. Luise, Ph.D., Assistant Professor of Medicine in Residence.
Mary Ann K. Markwell, Ph.D., Assistant Research in Microbiology.
Alexander Miller, Ph.D., Research Microbiologist.
David A. Sadowasser, Ph.D., Adjunct Assistant Professor.
Evelyn S. Tacoma, Ph.D., Lecturer.
Robert E. Williams, M.A., Assistant Research in Microbiology.

M.A. and Ph.D. Programs General Information
Advising. Frederick A. Eiserling, Graduate Adviser, Department of Microbiology, 5304 Life Science, 825-3578, or 241 Molecular Biology Institute, 825-1974.

The goal of the advanced degree program is to prepare students for creative research careers in microbiology, including bacteriology, virology, immunology, and cell biology. Each student is initially placed under the tutelage of a committee of three faculty members appointed by the Graduate Adviser, who are responsible for evaluating progress during the first year and for advising in the selection of courses, etc., each quarter. The Graduate Student Association of the Department also appoints a member to the guidance committee. Informal records are kept of these committee meetings. The committee serves in this advisory capacity until the student has chosen a major professor as research adviser. The Graduate Adviser is an ex officio member of the advisory committee. Changes in the membership of the committee may be made with the mutual agreement of the student, Graduate Adviser and committee members.

Preparedness for proceeding beyond the first year is determined by a year-end evaluation of the student's overall performance in 1) coursework, 2) teaching assistantships, 3) individual research projects, 4) seminars, 5) written examination. The written examination shall consist of a short proposal (five pages) on a current topic drawn from a seminar presentation given by the student or drawn from one of the faculty seminars and approved by the Graduate Adviser. The faculty will yearly, at the opening of the Fall Quarter, review students' progress in the above requirements. Progress into the second year requires faculty approval.

Major Fields or Subdisciplines. Areas of faculty expertise:
A.J. Berk — Gene Expression in Eucaryotic Cells; Processing of mRNA, Animal Viruses
R.J. Collier — Biochemistry of Bacterial Toxins
F.A. Eiserling — Microbial Ultrastructure; Bacteriophage Morphogenesis
C.F. Fox — Structure and Function of Biological Membranes
R. P. Gunsalus — Molecular Biology of Microbial Growth
J. Lascelles — Microbial Biochemistry and Physiology
R.J. Martinez — Biochemistry of Host-Parasite Relations
D.P. Nierlich — Nucleic Acid Synthesis and Regulation of Growth
M.J. Pickett — Medical Microbiology
S.C. Rittenberg — Microbial Physiology; Bdellovibrio; Chemolithotrophy
W.R. Romig — Microbial Genetics; Bacteriophage
E.E. Sercarz — Molecular and Cellular Immunology
J.G. Stevens — Animal Virology; Experimental Pathology
G.L. Wilcox — Genetic Regulatory Mechanisms
B.J. Wisnieski — Membrane Biology
O.N. Witte — Oncorna Viruses/Immunology

Disqualification and Appeal of Disqualification. The only clear case for a recommendation for termination of graduate study is repeated academic failure during the first four quarters in course requirements, examinations and maintenance of required progress toward the degree. The decision to terminate advanced students is rare, and appeal to the Department Chairperson is available.

Foreign Language Requirement. There is no foreign language requirement for either the master's or doctoral degrees.
The Master of Arts Degree

Admission Requirements. Requirements for admission are the same as for the Ph.D. degree. Information is available from the Graduate Adviser's office.

Course Requirements. Total number of courses: nine. Number of graduate courses: five. Required graduate courses: those specified on an individual basis by the initial advisory committee and later by the thesis adviser and the thesis committee.

Thesis or Comprehensive Examination Plan. Thesis Plan. The thesis committee established shortly after the student's choice of thesis adviser, which normally occurs before the end of the student's first year in residence. Approval of the Thesis Plan follows shortly after appointment of the committee. Committee members outside the Department are not required. If a student is judged to have failed, i.e., the thesis is unacceptable, reexamination consists of satisfying the committee that the defects in the research program have been remedied.

Comprehensive Examination Plan. The Comprehensive Examination Plan is not available.

Time to Degree. Normal progress from graduation to conferral of degree is two academic years (six quarters).

500 Series Course Limitations

Course No. 596 598
Unit 2-12 2-12
Value S/U S/U
Type of Grading
Number of Times May Be Repeated No limit No limit

Two courses (8 units) of 500 series apply towards the 9-course (36 units) M.A. program, and one course (4 units) of 500 series apply towards the 5-course (20 units) graduate course requirement.

Teaching Experience. Teaching experience is a requirement for the master's degree.

Other Relevant Information. The Department accepts relatively few students whose objective is a master's degree per se, and applicants should contact a potential faculty sponsor at the time of application.

The Ph.D. Degree

Admission Requirements. For admission to graduate studies in Microbiology, the student must have completed an undergraduate major in science, with superior scholastic achievement. Applicants should have preparation in calculus, physics, biology, genetics, organic and biological chemistry and microbiology.

Physical chemistry is strongly recommended. A student may be admitted with background deficiencies to be remedied prior to or concurrent with graduate studies. Applicants should submit directly to the Department, scores of the GRE Aptitude and biology or chemistry advanced examinations. Evidence (via letters of recommendation, interviews or direct knowledge) of the applicant's research potential and motivation is also required.

Admission to the Doctoral Program. There are no requirements beyond those of admission. Completion of a master's degree is not normally required or recommended. A written examination is required for advancement to candidacy, as described below under Written and Oral Qualifying Examinations.

Course Requirements

1. Formal lecture/lab courses
   a. Biochemistry: Two are required: the 6-unit lecture course, Chemistry/Biological Chemistry M253, "Proteins and Nucleic Acids." This course is taught only in the Fall Quarter, and it is advisable to complete it during the first year.

   The second course is Microbiology 225 or Microbiology 239, 8 units each, combination laboratory and lecture course, taught in the Winter and Spring Quarters, respectively. The course is designed to acquaint students with some fundamental techniques they are likely to encounter in research. This course should also be taken during a student's first year.

   b. Genetics and Regulation: One 200 level, 4-unit course is required. Courses which may be used to satisfy this requirement are Microbiology 203—Advanced Microbial Genetics, or Biology 221—Genetic Analysis.

   c, d, e. A total of 8 units of 200 level coursework to be selected from these three subject areas is required. At least two areas are required. Acceptable courses in each area are as follows:

f. General Microbiology and Cell Biology

   Microbiology 230A—Structural Molecular Biology
   Microbiology M226—Chromosome Structure and Regulation
   Biology 227—Chromosome Structure and Replication
   Biology 229—Structural Macromolecules
   Biology 236—Structure, Functions, and Biogenesis of Mitochondrion
   Microbiology M239—Nucleic Acid Research (alternate years)
   Microbiology M293—Survey of Oncology

h. Immunology

   Microbiology M185—Immunology
   Microbiology M258A, B, C—Advanced Immunology
   Microbiology & Immunology M212—Laboratory Procedures in Immunological Research
   Microbiology & Immunology 261—Tumor Immunology
   Microbiology & Immunology 264—Molecular Immunology

Other courses may be accepted with written permission of the departmental Graduate Adviser and the student's advisory committee.

In addition to subject area requirements, students are expected to complete two courses in physical chemistry, namely Chemistry 110A (Thermodynamics) and 156 (Physical Biochemistry). This requirement can be waived on the basis of work done before entering UCLA. If a student must take both courses as a graduate student, it is permissible to apply one of them (4 units) towards satisfaction of the unit requirement under 2. below.

2. Student participation seminar courses: Each quarter there are several literature review groups or other seminar courses in which students read and report on current scientific research literature. These are 2-unit courses which meet weekly for an hour or longer. Students are expected to enroll in five such courses (including two offerings in the 204 series) during their first two years of residence (10 units).

3. Laboratories (introduction to research): During the first 15 months of residence, a student is expected to rotate for one quarter each through three laboratories within the Department (outside laboratories are permissible with the consent of the advisory committee). The goals of these rotations are to acquaint the student with research ongoing within the Department and to permit the student to perform research projects in the various laboratories. The student will normally enroll in Microbiology 596 for four units of credit for each laboratory. A short written report of work completed during each project must be filed in the departmental office before a grade will be submitted to the Registrar.

Written and Oral Qualifying Examination. This examination must be taken within 21 months of entry into graduate school and must be passed, if reexamination is required, no later than 24 months from the date of entry. (These periods may be extended to 26 and 29 months respectively with the written approval of the departmental Graduate Adviser and the student's mentor.)
The examination is administered by the doctoral committee which will normally serve as the thesis committee as well. The examination tests for depth of knowledge as would be expected from the graduate studies undertaken. As a major part of the examination, the student prepares and defends a written research proposition. The student is expected to read in detail in the area of the proposition and then suggest a defined experimental approach and an interpretation of results that may be obtained. The student is expected to prepare a well-written account of the proposal not to exceed 15 to 20 pages with bibliography. This must be given to the committee at least two weeks before the examination. Before presentation to the doctoral committee, the student is encouraged to present the proposition before a student seminar group. Members of the doctoral committee should ordinarily not be present at this seminar.

The oral examination will cover both the student’s proposition and general scientific background. It is not restricted to the topics of the proposition. The committee may, at its discretion, arrange for various alternate ways to assess the candidate’s preparation and qualifications.

**Time to Degree.** Laboratory rotations, approval of progress by the student’s advisory committee, and choice of faculty adviser should be completed by the end of the fourth quarter. Coursework required to achieve competency in basic areas should be completed by the end of the sixth quarter. The written proposition and oral examination should be completed by the end of the sixth quarter.

The dissertation and the Final Oral Examination should be completed during the fourth and no later than the fifth year of study (15 quarters).

**Final Oral Examination.** A dissertation on a subject chosen by the student in consultation with the major professor is required of every candidate for the degree. This provides the major evidence on which the judgment of progress to independent scholarship is based. The research must make an independent, worthwhile contribution to scientific knowledge. A useful criterion is that the more important results are acceptable for publication in a major scientific journal.

This required examination is a defense of the completed dissertation, presented as a professional seminar and open in part to the public. It is administered by the doctoral committee. In this presentation the student should attempt to relate the findings to the field as a whole, and adequately summarize and project future experimental possibilities. The presentation will be followed by a closed discussion with the doctoral committee.

**Teaching Requirement.** The Department considers teaching experience to be an integral part of the graduate program. All Ph.D candidates are required to serve as teaching assistants or in some other formal teaching capacity for three quarters. Prior experience at another institution is acceptable when approved by the departmental Graduate Adviser.

**Graduate Courses**

**203. Advanced Microbial Genetics.** (½ course) Lecture and discussion, three hours. Prerequisites: course 101, M132; Chemistry 152 or equivalent; under-graduate seniors may enroll with consent of instructor. Discussion of genetic and biochemical principles and techniques used in the construction of bacterial strains. Topics discussed will include transduction, conjugation, transformation, restriction endonucleases, and DNA cloning. Mr. Wilcox (Sp)

**C204A. Molecular Biology of Bacterial Growth.** (½ course) Lecture, three hours; discussion, one hour. Prerequisites: Biology 8, Chemistry 24, Microbiology 101 or equivalent; or consent of instructor. Intended primarily for graduate students, this course includes an additional discussion of the research literature and methodology. May be concurrently scheduled with course C104A. First five weeks in Spring, Quarter 1977. Grade or S/U. Mr. Nierlich

**C204B. Biochemical Genetics of Eucaryotic Cells.** Lecture, three hours; discussion, one hour. Prerequisites: Some background in microbiology, biochemistry and genetics and consent of instructor. Intended primarily for graduate students, this course includes an additional discussion of the research literature and methodology. May be concurrently scheduled with course C104B. Five weeks in Fall Quarter. Grade or S/U. Mr. Nierlich

**C204C. Microbiology and Pathophysiology of Cultured Mammalian Cells.** Lecture, three hours; discussion one hour. Prerequisites: Chem 152 and consent of instructor. Intended primarily for graduate students, this course includes an additional discussion of the research literature and methodology. May be concurrently scheduled with course C104C. Five weeks in Fall Quarter. Grade or S/U. Mr. Fox

**C204D. Protein Metabolism.** (½ course) Lecture, three hours, discussion, one hour. Prerequisites: Chemistry 152 and consent of instructor. Intended primarily for graduate students, this course includes further discussion of the literature and experimental methods. May be concurrently scheduled with course C104D. Five weeks in Spring Quarter. Grade S/U. Mr. Collier

**C204E. RNA Tumor Viruses.** (½ course) (Same as Micro 104E) Lecture, three hours; discussion one hour. Prerequisites: Chemistry 152 and consent of instructor. Intended primarily for graduate students, this course includes an additional discussion of the research literature and methodology. May be concurrently scheduled with course C104E. Five weeks in Spring Quarter. Grade or S/U. Mr. Witte

**M212. Laboratory Procedures in Immunological Research.** (½ course) (Same as Immunology M212.) Prerequisites: course M185 or equivalent and consent of instructor. A series of 12 intensive laboratory workshops designed to acquaint the student with the advanced methodologies utilized for immunological research. Workshops will be offered at regular intervals and will have a duration of 2-3 days. Successful completion of four workshops constitutes the requirements for one course. Enrollment will be limited to 15. May be repeated for credit if different projects are undertaken. Grade S/U. Students must enroll through Microbiology and Immunology. Mr. Ashman, Mr. Bonavida, Mr. Stevens

**214. Methods in Membrane Biology.** Lecture and discussion, three hours; laboratory, nine hours. Prerequisites: consent of instructor. Emphasis on the basic techniques for isolating and characterizing biological membranes and component molecules. Basic and advanced techniques of membrane biochemistry and biophysics. Offered alternate years, beginning Winter Quarter 1978. Ms. Wisnieski (W)

**221U-221Z. Seminars and Symposia on Molecular Biology.** (½ to 1 course each) Lecture, two hours; discussion, three hours. Prerequisite: consent of instructor. Seminar courses which integrate topical symposia organized and sponsored by the Molecular Biology Institute. These international symposia feature leading researchers in selected areas of molecular biology. Students registering for one of these seminars will receive an abstract booklet for the symposium and will use the abstracts as the starting point for weekly presentations on the topics to be treated at the symposium. The student will in this way prepare for participation in the symposium. Topics are announced each year on September 1 by the Department of Microbiology and the Molecular Biology Institute. Mr. Fox and the Staff (W)

**225. Biochemical Methods in Microbial and Cell Biology.** (2 courses) Lecture and discussion, three hours; laboratory, twelve hours. Prerequisite consent of instructor. Emphasis will be on techniques for purification and characterization of proteins, including cell disruption, column chromatography, gel electrophoresis, ultracentrifugation, various optical methods, and use of radiotopes. Mr. Collier, Mr. Wilcox (W)

**M226. Chromosome Structure and Regulation.** (Same as Biological Chemistry M226, Biology M226, Chemistry M226, and Microbiology and Immunology M226.) Lecture, three hours. Prerequisite: consent of instructor. Lectures and panel discussions on the structural and functional organization of eukaryotic chromosomes. S/U grades are used for this course. Mr. Martinson, Mr. Tobin, Mr. Wall

**M230A. Structural Molecular Biology.** (½ course) (Same as Biology M230A and Chemistry M230A.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor, based on a written research proposal. Fundamentals of electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals. Mr. Eiserling (F)

**M230B. Structural Molecular Biology.** (½ course) (Same as Biology M230B and Chemistry M230B.) Lecture, two hours; discussion, one hour. Prerequisites: Physics 6C, Mathematics 3C and consent of instructor. Selected topics from the following: principles of biological structure; structures of globular proteins and enzymes, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and x-ray diffraction; optical and computer filtering; three-dimensional reconstruction. Mr. Eiserling (W)

**M230C. Structural Molecular Biology Laboratory.** (½ course) (Same as Biology M230C and Chemistry M230C.) Laboratory, ten hours. Prerequisite: consent of instructor, based on a written research proposal. Laboratory: practical experience with electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals. Mr. Eiserling (F)
M230D. Structural Molecular Biology Laboratory. (½ course) (Same as Biology M230D). Laboratory, ten hours. Prerequisite: course M230B concurrent. Methods in structural molecular biology, including experiments utilizing the following procedures: single crystal x-ray diffraction, low angle x-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building. Mr. Eisinger (W)

M236. Laboratory Techniques in Nucleic Acid Research. (2 courses) (Same as Biology M232.) Lecture, two hours; discussion, one hour; laboratory, twelve hours (open lab). Prerequisite: consent of instructor. Procedures in the manipulation of nucleic acids, including: isolation of DNA and RNA and physical and chemical characterization by several means; characterization of circular DNA molecules by electron microscopy, gradient centrifugation and restriction enzyme analysis; in vitro transcription and hybridization analysis. Mr. Nierlich, Mr. Simpson (Sp)

250. Seminar in Microbial Metabolism. (½ course) Ms. Lascelles, Mr. Rittenberg

251. Seminar in Regulation and Differentiation. (½ course) Graded S/U only. Mr. Nierlich, Mr. Wilcox

252. Seminar in Medical Microbiology. (½ course) Mr. Pickett

253. Seminar in Biochemistry of Host Defense Mechanisms. (½ course) Lecture and discussion one hour. Prerequisite: consent of instructor. Discussion of the literature dealing with host defense mechanisms. The biochemical mechanisms of action of host defense will be stressed. May be taken for letter grade or S/U. Mr. Collier, Mr. Martinez

255. Seminar in Bacterial Viruses. (½ course) The Staff

256. Seminar in Microbial Genetics. (½ course) Mr. Eisinger, Mr. Romig

M257. Seminar in Host-Parasite Relationships. (½ course) (Same as Microbiology and Immunology M257.) Prerequisite: consent of instructor. In this course recent advances in our knowledge of host-parasite interactions and means of controlling the parasites are discussed. Mr. Miller, Mr. Pickett

M258A. Advanced Immunology. (½ course) (Same as Biology M250A and Microbiology and Immunology M258A; formerly numbered M258.) Lecture, three hours; discussion, one hour. Prerequisite: the equivalent of Microbiology M185 or Microbiology and Immunology 202 or consent of instructor. This two-semester lecture course of immunology and the original research literature. The major aspects of the immune system will be intensively examined with emphasis on fundamental principles and on advances of the past five years. The first term will consist of lectures dealing with the development of B and T lymphocytes and the interaction of these two lymphocyte subpopulations in the production of immunoglobulin. In addition to the lectures there will be five discussion sessions for those enrolled in the course. To be offered in the Fall Quarter of each academic year. Grade of S/U. Mr. Fahey, Mr. Stevens (F)

M258B. Advanced Immunology. (½ course) (Same as Biology 252B and Immunology M258B.) Prerequisites: the equivalent of Microbiology M185 or Microbiology and Immunology 202 and M258A or consent of instructor. A continuation of M258A which will consider the details of antibody structure, T lymphocyte function and selected topics of broad immunological significance. To be offered in the Winter Quarter of each academic year. Mr. Clark (W)

M259. Immunology Forum. (½ course) (Same as Microbiology and Immunology M260.) Lecture, two hours. Prerequisite: Microbiology M185. A broad range of current topics in immunology will be presented and discussed at an advanced frontier level. This is a continuing UCLA-wide, general graduate-level seminar involving faculty, postdoctoral immunologists and graduate students from diverse departments. The Staff

M263. Cellular Immunology Seminar. (½ course) (Same as Microbiology and Immunology M263.) Prerequisite: consent of instructor. Critical discussions of the current literature in T and B cell immunology with emphasis on molecular mechanisms. Mr. Sercaz

M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics. (½ course) (Same as Biological Chemistry M264A-M264B and Chemistry M264A-M264B-M264C.) Lecture, two hours. Prerequisites: course M261 or equivalent with consent of instructor. These courses will cover a variety of topics concerning the biochemistry, morphology and physiology of atherosclerosis. Emphasis will be placed on the chemistry of lipoproteins and the role of plasma lipoproteins on the regulation of tissue lipid metabolism and the development of atherosclerosis. The courses are not consecutive and may be taken in any order. The Staff

M293. Major Concepts in Oncology. (Same as Dentistry M293, Microbiology and Immunology M293 and Pathology M293.) Lecture, three hours. Prerequisite: Graduate Standing or consent of instructor. Course designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control, physical, chemical and viral oncogenesis, epidemiology of cancer, tumor immunology; principles of cancer surgery, radiation therapy and chemotherapy. Mr. Baluda and the Staff

M296. Seminar in Current Topics in Molecular Biology. (½ course) (Same as Biological Chemistry M296 and Biology M296, Chemistry M296, Microbiology and Immunology M298 and Molecular Biology M298.) Prerequisites: enrollment must be approved by the instructor and by the Graduate Adviser of the Departmental Molecular Biology Ph.D. Committee. Each student enrolled conducts or participates in discussions on assigned topics. The Staff

Individual Study and Research

596. Directed Individual Research. (½ to 3 courses) The Staff

598. Research for Master's Thesis. (½ to 3 courses) The Staff

599. Research for Doctoral Dissertation. (½ to 3 courses) The Staff

Microbiology and Immunology

(Department Office, 43-239 Center for Health Sciences; Graduate Student Affairs Office, 43-312 Center for Health Sciences)

John L. Fahey, M.D., Professor of Microbiology and Immunology and Infectious Disease, and Professor of Medicine (Chairman of the Department), William H. Hildemann, Ph.D., Professor of Microbiology and Immunology and Immunogenetics.

Dexter H. Howard, Ph.D., Professor of Microbiology and Immunology/Mycology, (Vice Chairman of the Department).

David T. Imagawa, Ph.D., Professor of Pediatrics and Microbiology and Immunology/Virology.

William J. Martin, Ph.D., Professor of Microbiology and Immunology in Residence/Bacteriology.

James N. Miller, Ph.D., Professor of Microbiology and Immunology and Bacteriology.

Debi P. Nayak, D.V.Sc., Ph.D., Professor of Microbiology and Immunology/Virology and Oncology.

A.F. Rasmussen, Jr., M.D., Ph.D., Professor of Microbiology and Immunology/Virology.

Jack G. Stevens, D.V.M., Ph.D., Professor of Microbiology and Immunology/Virology, Professor of Microbiology, and Professor of Neurology.

Jerrold A. Turner, M.D., Professor of Microbiology and Immunology in Residence, Professor of Medicine, and Associate Professor of Pathology.

Marietta Voge, Ph.D., Professor of Microbiology and Immunology/Parasitology.

Randolph Wall, Ph.D., Professor of Microbiology and Immunology/Molecular Biology.

Felix O. Wattenstein, Ph.D., Professor of Microbiology and Immunology/Molecular Biology.

Telford H. Work, M.D., M.P.H., D.T.M.&H., Professor of Microbiology and Immunology, Professor of Infectious and Tropical Diseases, and Professor of Preventive Social Medicine.

Ruth A. Boak, M.D., Ph.D., Emeritus Professor of Microbiology and Immunology/Bacteriology, Emeritus Professor of Public Health, and Emeritus Professor of Pediatrics.

John F. Kessel, Ph.D., Emeritus Professor of Microbiology and Immunology/Infectious Diseases.

David McVicker, M.D., Ph.D., Emeritus Professor of Microbiology and Immunology.

Margaret I. Sellers, Ph.D., Emeritus Professor of Microbiology and Immunology/Virology.

Henry E. Weimer, Ph.D., Emeritus Professor of Microbiology and Immunology/Immunology and Immunogenetics.

Stephen Zamenhof, Ph.D., Emeritus Professor of Microbiology and Immunology/Microbial Genetics.

Benjamin Bonavida, Ph.D., Associate Professor of Microbiology and Immunology/Immunology.

George Fareed, M.D., Associate Professor of Microbiology and Immunology/Virology.

Sidney H. Golub, Ph.D., Associate Professor of Microbiology and Immunology in Residence, and Associate Professor of Surgery/Onco-
The Ph.D. Degree

Admission Requirements. Requirements in addition to the University minimum requirements:

1. Bachelor's degree with a major in either the biological or physical sciences.
2. At least B+ in each of the following subjects: chemistry, physics and mathematics; at least B average in biology (in upper division and prior graduate study).
3. Three favorable letters of recommendation.
4. Graduate Record Examination is required (Verbal, Quantitative and Advanced Tests).
5. Acceptable Statement of Purpose.
6. An interview with members of the Department Graduate Student Committee when indicated.

For departmental brochures and/or application forms please write to: Graduate Student Affairs Office, Department of Microbiology and Immunology, UCLA School of Medicine, Los Angeles, CA 90024.

Advising. Graduate Adviser: Dexter H. Howard, Ph.D., Professor of Microbiology and Immunology (Mycology), Department of Microbiology and Immunology, UCLA School of Medicine, Los Angeles, CA 90024.

The Graduate Student Committee and the Graduate Adviser are responsible for advising students until they have selected a preceptor. Thereafter, the thesis preceptor serves as adviser.

The Graduate Adviser meets with each student at least before every registration date; however, the students may also seek his or the Graduate Student Committee's advice at any time they need it.

The Graduate Committee evaluates students at the end of the first year by a Departmental Written Qualifying Examination and by a review of their coursework. Students are informed in writing of their progress at this time. During the second year, the student selects a preceptor and responsibility for their evaluation shifts to the preceptor. The Graduate Admissions Committee is available to help students with University requirements and to counsel with the student's preceptor. The student in consultation with his/her preceptor usually selects a doctoral committee during the second or third years of study.

Admission to the Doctoral Program. This step is essentially synonymous with Graduate Admissions. However, students with deficiencies are accepted on probation only and this probational status is removed after the student has fulfilled the corresponding requirement.

The completion of a master's program is not required.

Major Fields or Subdisciplines. Students are expected to be competent in both Microbiology and Immunology (see sections on Course Requirements, Written and Oral Qualifying Examinations). However, the students do their thesis work in one or another of the following subdisciplines.

A. Cell Biology (several areas of specialization available)
B. Immunology (several areas of specialization available)
C. Medical Bacteriology
D. Mycology
E. Parasitology
F. Virology (Animal Virology, Viral Oncology)

Foreign Language Requirement. There is no foreign language requirement for the Ph.D. degree.

Course Requirements

A. Microbiology and Immunology 202 survey course or equivalent (to be completed during the first year of study). Prior to the beginning of the Fall Quarter, a series of examinations will be given in the major subdivision of the M&I 202 course, viz. Bacteriology, Immunology, Virology, and Mycology/Parasitology. Students passing the examinations (80% or above) may elect not to take those subject areas. Those portions of the course which they do not pass or elect not to be examined in may then be taken as separate courses.

B. Directed Individual Study or Research 596—participation in the laboratory rotation program (to be completed during the first year of study).

C. Three courses (12 units) in Biochemistry (prerequisites: Mathematics through Calculus and General Physical Chemistry). These courses will ordinarily be chosen from the following list but other substitutes may be selected with the approval of the Graduate Adviser.

Microbiology 204A—Molecular Biology of Bacterial Growth (½ course)
Microbiology 204B—Biochemical Genetics of Eukaryotic Cells (½ course)
Microbiology 204C—Microbiology and Pathophysiology of Cultured Mammalian Cells (½ course)
Microbiology 204D—Protein Metabolism (½ course)
Microbiology 204E—Biological Membranes (½ course)

Written and Oral Qualifying Examinations

A. Written Qualifying Examinations. The departmental Written Qualifying Examination is to be taken at the end of the first year of graduate study. The examination consists of two parts: 1) Molecular and Cell Biology (mandatory), and 2) four of the following six areas of Microbiology: Bacteriology, Genetics (and Immunogenetics), Immunology, Mycology, Parasitology and Virology. Up to two of the required areas in part two may be fulfilled by coursework, as defined by a list available from the Graduate Adviser. The coursework may be completed any time up to the end of the second year. A score of 75% is required to pass each part of the written examination. Parts failed may be retaken once.

B. Oral Qualifying Examination. The Oral Qualifying Examination is to be taken within three years of enrolling in the Department and is administered by the student's doctoral committee. The oral examination includes:

1. Preparation and defense of research proposal.
2. Explanation of research plans and results to date.
3. A demonstration of general knowledge of microbiology and immunology.

Advancement to candidacy is awarded upon satisfactory completion of the Oral Qualifying Examination.

Doctoral Committee. Conditions are those of Graduate Council.
Time to Degree
From graduate admission to the Written Qualifying Examination—three to four quarters. From graduate admission to the Oral Qualifying Examination—nine quarters. From graduate admission to the award of the degree—15 quarters (maximum).

Final Oral Examination. The Final Oral Examination is optional with the doctoral committee. A special seminar based on the completed degree-15 quarters (maximum).

Teaching Experience. Teaching assignment in one laboratory section for Microbiology and Immunology 201 (medical course), Microbiology and Immunology 203 (dental course), Microbiology and Immunology M212 (Immunology Workshop), or another laboratory course presented by the Department.

Disqualification and Appeal of Disqualification. The need to terminate a student may arise for three cardinal reasons:
A. Continued inability to maintain a grade point average of 3.0.
B. Failure of a section of the departmental Written Qualifying Examination more than once.
C. Failure of the Oral Qualifying Examination for a second time.

The decision to terminate a student for any of these reasons is made by the departmental Graduate Committee. Since A and C are essentially University requirements, no specific departmental machinery is available for appeal of the decision. Students are counseled about B and recognize the consequences involved.

Other Relevant Information. The Department only accepts candidates for the Ph.D. program. An M.S. degree is occasionally awarded to students whose pursuit of the Ph.D. degree is interrupted by changes in career plans or for personal reasons.

Graduate Courses

Immunology

M206. Secretary and Gastrointestinal Immunity. (Same as Oral Biology M206) Lecture, two hours. The anatomy and physiology of the oral cavity, the intestines, and the related lymphatic and blood vascular systems will be reviewed in reference to the immune system. The secretory and systemic immune systems will be discussed in detail with particular emphasis on the unique properties of SIgA. The ability to process enteric antigens, to respond, and to regulate enteric immunity will be discussed in terms of recent experimental findings. The role that enteric immunity may play in diseases of the GI tract, such as dental caries and inflammatory bowel disease, will be presented. The class will meet for 2 hours one day per week. Students will participate in discussions following each lecture and will present seminars based on a review of the relevant scientific literature. 20 hours. To be offered Spring Quarter.

Mr. Riviere

M212. Laboratory Procedures in Immunological Research. (½ course) (Same as Microbiology M212.) Prerequisite: course M185 or equivalent and consent of instructor. A series of 12 intensive laboratory workshops designed to acquaint the student with the advanced methodologies utilized for immunological research. Workshops will be offered at regular intervals and will have a duration of 2-3 days. Successful completion of four workshops constitutes the requirements for one course. Enrollment will be limited to 25. May be repeated for credit if different projects are undertaken. Graded S/U. Students must enroll through Microbiology and Immunology.

Mr. Ashman, Mr. Bonavida, Mr. Stevens

254. Immunogenetics. (½ course) Review of current literature in the field of immunogenetics, with emphasis on fundamental studies involving genetic and immunologic principles and techniques. Selected topics will be discussed and results interpreted; conclusions and experimental methods will be evaluated. Mr. Hildemann (Sp)

M257. Seminar in Host Parasite Relationships. (Same as Microbiology M257.) Lecture, two hours. Prerequisite: consent of instructor. (Same as Microbiology) In the course recent advances in our knowledge of host-parasite interactions and means of controlling the parasites are discussed.

Mr. Miller, Mr. Pickett

M258A. Advanced Immunology. (½ course) (Same as Biology M250A and Microbiology M258A.) Prerequisite: the equivalent of course M185 or 202 or consent of instructor. This two term lecture/discussion course is designed to provide continuity between the basic immunology courses and the original research literature. The major aspects of the immune system will be intensively examined with emphasis on fundamental principles and on advances of the past five years. The first term will consist of lectures dealing with the development of B and T lymphocytes and the interaction of these two lymphocyte subpopulations in the production of immunoglobulin. In addition to the lectures there will be discussion sessions for those enrolled in the course. To be offered in the Fall Quarter of each academic year. Grade or S/U. Mr. Zighelboim (W)

M258B. Advanced Immunology. (½ course) (Same as Biology M250B and Microbiology M258B.) Prerequisite: the equivalent of course M185 or 202 and M258A or consent of instructor. A continuation of M258A which will consider the details of antibody structure, T lymphocyte function and selected topics of broad immunological significance. To be offered in the Winter Quarter of each academic year. Grade or S/U. Mr. Zighelboim (W)

M258C. Immunohemometry. (½ course) (Same as Microbiology M258C.) Prerequisites: the equivalent of course M185 or 202 and M258A or consent of instructor. The structure of the immunoglobulin molecule and of antigenic determinants and of the components of the complement system will be considered in detail. The format will include lectures and also readings in the primary literature with student seminars. To be offered in the Winter Quarter of each academic year. Grade or S/U. Mr. Stevens (W)

259. Experimental Human Immunology. (½ course) Prerequisites: consent of instructor. The aim of this course is to examine recent findings in experimental human immunology and to integrate them into a comprehensive view of human immunity. The course is designed for graduate students and post-doctoral fellows and will emphasize both the basic and clinical aspects of the subjects. Special clinical and research sessions relating to the lecture material will be held after each lecture. Topics include: B cells—structural and functional subpopulations; T cells—structural and functional subpopulations; monocytcs and other leukocyte populations; cytotoxicity, natural and acquired; lymphoproliferative disorders of regulatory and effector lymphocytes; immunodeficiency; autoimmunity; immunopharmacologic agents; allergic diseases. Mr. Saxon, Mr. Stevens

M260. Immunology Forum. (½ course) (Same as Microbiology M260.) Prerequisite: course M185. A broad range of current topics in immunology will be presented and discussed at an advanced frontier level. This is a continuing UCLA-wide, general graduate level seminar involving faculty, postdoctoral immunologists, and graduate students from diverse departments.

Mr. Cooper

261. Tumor Immunology. (½ course) Prerequisite: course M258B or equivalent. Experimental basis for investigation of immune response to tumors; review of cell-mediated immunity and related humoral immunity; evidence for tumor-associated antigens in man; evaluation of attempts at immunotherapy of tumors. Lab Club (Sp)

262. Seminar in Immunobiology of Cancer. (½ course) Prerequisite: consent of instructor. Review of recent literature in the fields of immunology, biology and biochemistry of cancer with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens and new techniques. Reports on scientific meetings will be discussed and evaluated. Graded S/U. Mr. Bonavida

M263. Cellular Immunology Seminar. (½ course) (Same as Microbiology M263.) Prerequisite: consent of instructor. Critical discussions of the current literature in T and B cell immunology with emphasis on molecular mechanisms. Mr. Sercarz

254. Molecular Immunology. (½ course) Prerequisite: consent of instructor. Ongoing seminar reviewing control processes at a molecular level during proliferation and differentiation of cells in the immune responses and relationship to similar processes in other differentiation cell systems. Graded S/U.

Mr. Weissstein

276. Viral Immunology. (½ course) Prerequisites: course 202 (or equivalent) and consent of instructor. This course will focus on selected areas of immunovirology: principles of non-specific and specific immunity to viruses, immunological effector mechanisms in the maintenance of viral latency, influence of virus infections on different immune functions and the immune response to virally induced tumors.

The Staff (F)
Microbiology

201. Microbiology and Immunology (1/2 courses)
Lectures and laboratory. Study of infectious agents of human disease with emphasis on host-parasite relationships and immunologic phenomena in immunity and disease, including identification of bacteria, fungi, animal parasites and viruses, and principles of prevention, treatment, and laboratory diagnosis. For medical students only.

The Staff

202A. Fundamental of Immunology. (1/2 course) (Formerly numbered 202.) Prerequisite: consent of instructor. Introduction to experimental immunobiology and immunocytochemistry; cellular and molecular aspects of humoral and cell-mediated immune functions. For graduate students only. To be offered every Fall Quarter (class begins in the first week of September).

The Staff

202B. Medical Bacteriology. (1/2 course) (Formerly numbered 202.) Prerequisite: consent of instructor. Characteristics of bacteria rickettsiae, and chlamydias associated with diseases of humans; host-parasite interactions and immunity; identification and laboratory diagnosis; principles of prevention and treatment; introduction to microbial genetics as it pertains to pathogenicity. For graduate students only.

The Staff

202C. Medical Virology. (1/2 course) (Formerly numbered 202.) Prerequisite: consent of instructor. Study of viruses; methodology of virus isolation; methods of interactions; detection with host cells and multicellular hosts, introduction to tumor viruses. For graduate students only.

The Staff

202D. Medical Mycology and Parasitology. (1/2 course) (Formerly numbered 202.) Prerequisite: consent of instructor. Characteristics of fungi which cause human and animal diseases. Study of the morphology, biology, host-parasite relationship, public health problems and control of protozoa, helminths and arthropods parasitic in man and on animals. For graduate students only.

The Staff

201. Medical Mycology. (1/2 course) Prerequisites: Microbiology 101, 103 and 185; recommended Microbiology 110. Consent of instructor may be obtained in special cases. A study of the morphology, physiology, and pathogenicity of fungi causing human and animal diseases.

Mr. Howard (Sp)

210L. Medical Mycology. (1/2 course) Prerequisites: Microbiology 101, 103 and 185; recommended Microbiology 110. Consent of instructor may be obtained in special cases. Laboratory application of principles discussed in 210. Laboratory must be taken under graduate study.

Mr. Howard (Sp)

210D. Animal Pathogenesis. (1/2 course) Prerequisite course 202B or consent of instructor. A study of the genetic and biochemical properties of bacteria and factors of the host which are relevant to the pathogenesis of bacterial disease.

The Staff

M215. Interdepartmental Courses in Tropical Medicine. (1/2 courses) (Same as Medicine M215, Pathology M215 and Pediatrics M215.) Prerequisites: basic courses in microbiology and parasitology or infectious diseases in the Schools of Medicine or Public Health. The course draws upon expertise in the Departments of Medicine, Pediatrics, Pathology and Microbiology and Immunology to present current knowledge about diseases prevalent in tropical areas of the world. Lectures, demonstrations and audiovisual materials will be used to describe diseases which are prevalent in or localized to certain geographic areas. Although major emphasis will be in infectious diseases, problems in nutrition and exotc non-infectious diseases will be covered. A system will supplement the topics covered in the classroom. Graded S/U.

The Staff

251. Seminar in Microbiology and Immunology. (1/2 course) Consideration of the history of infectious diseases, their host-parasite relationships, pathology, genet-
The Ph.D. Degree

The Ph.D. degree program in Molecular Biology is offered under the supervision of an interdepartmental committee. The Molecular Biology Institute serves this committee and the various departments concerned in support of faculty research and teaching associated with the Ph.D. program. Staff members are drawn from participating departments and from the Molecular Biology Institute. Areas for study include structure and function of macromolecules, molecular genetics and virology; bioenergetics, catalysis and control; molecular basis of cellular architecture, development and evolution; neurobiology and the molecular basis of cancer and its control.

Admission Requirements. In general, recommended undergraduate training for the Ph.D. degree program includes a major in a biological or physical science. Coursework should include mathematics through calculus, one year each of general and of organic chemistry, one year each of physics and physical chemistry based on the use of calculus, and one year of biology. Undergraduate requirements may be modified for qualified candidates with interests in certain areas. Candidates who enter the program with course deficiencies will be expected to fulfill these early in the graduate program.

Only superior students are admitted, and in addition to the application, transcripts and statement of purpose, three letters of recommendation are required along with Graduate Record Examination (GRE) scores. There are no special application forms, but copies of materials sent to Graduate Admissions Office should also be sent directly to MBI.

Address for information: Graduate Office, Molecular Biology Institute, UCLA, Los Angeles, CA 90024.

Advising. Graduate Adviser: Dr. John H. Fessler.

Upon entering, a provisional advisory committee of three faculty members is appointed. After completing three one-quarter rotations, the student may choose a permanent Ph.D. adviser. In the initial year, there is a quarterly review by the Advisory Committee. The Ph.D. committee makes an overall assessment on the basis of annual reports from the adviser.

Admission to the Doctoral Program. In addition to University requirements, six quarters of the M298 laboratory work are required.

Foreign Language Requirement. There is no foreign language requirement for the Ph.D. degree.

Course Requirements. The usual program is two regular courses per quarter or the equivalent of 8 quarter units of upper division or graduate work. Six quarters of M298, Seminar in Current Topics in Molecular Biology, are required.

Written and Oral Qualifying Examinations. Examinations will be given in the M298 course, and four must be passed. An Oral Qualifying Examination on original research proposed by the candidate independently of the Ph.D. adviser, and on a topic distinct and separate from the student's thesis research, will be held usually during the student's second year in the program. A "Midstream Seminar" is normally presented during the third year and must be presented at least six months prior to the Final Oral Examination.

Doctoral Committee. This committee consists of a minimum of five faculty members from the University, and must conform to the regulations governing the nomination of doctoral committees. It must include three faculty who are "MBI core faculty" (i.e., have served as research advisers for an MBI student for at least two years, but who may or may not be Members, Associates or Affiliates of the MBI).

Time to Degree. An oral examination for advancement to candidacy should be taken, before the end of the sixth quarter. The average total time to complete the degree is 15 quarters.

Final Oral Examination. The Final Oral Examination is required of all students for the degree.

Teaching Experience. Teaching experience is encouraged although it is not a requirement for the degree.

Disqualification and Appeal of Disqualification. Termination of graduate status may be recommended by the Chairperson of the Interdepartmental Ph.D. Committee, after consultation with the student and his/her adviser (or his/her Student Guidance Committee). Disqualification may be recommended if a student fails to maintain an overall grade point average of 3.0, does not participate in required elements of the Ph.D. program (including laboratory rotations and seminars), or fails to maintain normal progress toward the degree as outlined under Time to Degree and Final Oral Examination. A recommendation for dismissal may be appealed to the entire Interdepartmental Ph.D. Committee; opinions of other interested faculty members will be considered, if requested by the student.

Graduate Courses

M298. Molecular Biology. Seminar in Current Topics in Molecular Biology. (Same as Microbiology M298, Biological Chemistry M298, Biochemistry M298, and Microbiology and Immunology (Cell Biology and Virology Section) M298.)

S01. Cooperative Program. (1/2 to 2 courses) Prerequisites: approval of UCLA Graduate Adviser and Graduate Dean. Approval of host campus Instructor, Department Chairman and Graduate Dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. To be graded S/U.

The Staff
Courses Related to Molecular Biology

The following courses offered by the departments listed are particularly appropriate to the research areas mentioned above. With the approval of the Guidance Committee or Research Supervisor, other related courses may be included in a student's program.

For specific information regarding the Ph.D. Degree Program in Molecular Biology, please refer to the Graduate Adviser in that program. For details and descriptions of the graduate courses offered in departments related to Molecular Biology, please refer to the list below.

**Biological Chemistry** 252, 255, 257, 259, M261, 266, M267, M269, M298

**Biology** 255, 227, 229, M230, M233A-M233B, M234, 238, 280, 294, M298

**Chemistry** M230, M253, M255, 257, 259, M261, 266, M267, M269, M298.

**Microbiology and Immunology** Cell Biology and Virology Section 208, 250, 256, M258, M298.

**Immunology Section** 254, M258A-M258B, 261, 262, 264.

**Physiology** 202, 225.

General Information Applicable to all Degrees

The Music Department offers the degrees of Master of Arts and Doctor of Philosophy in the fields of historical musicology, ethnomusicology, systematic musicology, composition and music education; and Master of Fine Arts in Performance Practices in all classical solo instruments, voice, opera, and conducting. New students will be admitted to graduate study in the Department of Music only once a year in Fall Quarters.

Teaching Credentials: Students may earn credentials for teaching music and other subjects in California elementary and secondary schools in conjunction with the School of Education; completion of the Teacher Credential Program in the Teacher Education Laboratory is required. Interested applicants should consult the Graduate School of Education (201 Moore Hall) and the faculty adviser in Music Education for information.

Further information on programs of study, entrance requirements—including examinations and auditions etc.—may be obtained from the Counselor’s Office, Department of Music, 2438 Schoenberg Hall.

Admission Timetable

Application for admission/fellowship due ............... December 30

Supplementary application materials due ............... January 30

Examinations will be administered .................. about February 1

Notice of acceptance or denial .................... by March 15

Late applications will be accepted until ............. February 15

Supplementary application materials due ............. April 1

Examinations will be administered .................. early April

Notice of acceptance or denial ....................... by May 30

Advising: Each student must plan a program under the guidance of the Graduate Adviser in the field of concentration. Students are required to contact their advisers at the beginning of each quarter and obtain the necessary signature on the Study List Card.

The Graduate Adviser for each area of specialization is assigned by the Chairperson on a yearly basis. Students may contact the Counselors' Office at the beginning of Fall Quarter for the name of their adviser.

An ongoing evaluation of the student's progress toward the degree is made by the Graduate Adviser each quarter in consultation with the student. Any problems are reviewed by the Area Council of the student's specialization. Students file their signed study List Cards with the Counselors’ Office for enrollment in...
classes. In order to receive a tentative study list from the Registrar's Office the cards must be filed by the third day of classes. Students are responsible for their Official Study Lists (mailed by the Registrar's Office at the end of the second week of classes) and should check them for accuracy.

Deadline dates for leaves of absence, adding/dropping of courses, submission of Advance- ment to Candidacy forms, submission of the- sis/dissertation drafts to committees, and filing of theses/dissertations with the Graduate Divi- sion are listed in the Schedule of Classes each quarter.

Language Examination Administration: Language requirements specific to each de- gree are listed in the respective sections below. French, German, Russian, and Spanish examinations are administered through the Educational Testing Service and require a score of 500 to pass. Students may sign up and register for the test at the University Extension Cashier’s Office, 10995 LeConte at the corner of Gayley (University Extension Building). The schedule of test dates is posted on the Graduate Bulletin Board in the music building (first floor, across from SH 1420) and outside the Counselors’ Office. Arrangements for language tests, other than the above, are made through the Language Examiner of the Gradu- ate Division (1225 Murphy Hall).

Committee Appointments: All student commit- tees are appointed by the Graduate Com- mittee of the Music Department. In all cases, except the Guidance Committee for the Ph.D., the student may select the chairperson, who will guide the thesis or dissertation, and sug- gest the other members of the committee, ac- cording to the guidelines given in each degree section, subject to the approval of the Gradu- ate Committee.

Limitations on the number of units applicable to the master’s degree are listed under “Course Requirements” in the M.A. and M.F.A. sections below. There is no limitation for the Ph.D.

Disqualification and Appeal of Disqualifica- tion: The specific conditions which may lead to termination are: (1) terminal master’s degree (recommendation from the student’s master’s committee); (2) scholarship (critical recom- mendation from the Graduate Committee); and (3) failure to make normal progress toward the degree (recommendation from the Area Coun- cil in the student’s specialization and from the Graduate Committee).

In all cases, the student’s personal and aca- demic progress are discussed in depth by the Council or Committee concerned with making the recommendation. A recommendation for termination is forwarded to the Department Chairperson for final review and decision. If termination is upheld, the Chairperson notifies the student in writing. Should the student wish to appeal such a decision, he/she should submit a letter to the Chairperson stating the reasons and the Chairperson will transmit it to the Area Council for consideration.

Master of Arts Degree

Major Fields: The Music Department offers programs in the fields of Historical Musicology, Ethnomusicology, Systematic Musicology, Composition, and Music Education.

Admission Requirements

The applicant must have completed a Bachelor of Arts degree with a major in music (or the equivalent degree) as described in the Under- graduate Catalog. Transcripts must show at least 52 quarter units of work outside music including one college year (or its high school equivalent) of French, German, or Italian; and an average grade of at least B in the basic areas that normally constitute the under- graduate core curriculum in music (harmony, counterpoint, the history of music, analysis, and mu- sicianship). In addition, all applicants are re- quired to (a) take the entrance examination (see below); (b) submit a letter describing their background of study and stating their reasons for wishing to pursue graduate studies in music; (c) request three former instructors to write letters of recommendation on their behalf (form letters are included in the application for admis- sion); and (d) submit written examples of their work. For all branches of Musicology and Mu- sic Education, a paper on an appropriate sub- ject in the applicant’s area: for Composition, musical scores. No application can be consid- ered until the examination has been taken and all of the above materials have been received.

Teaching Experience. Teaching experience is not required for admission.

Entrance Examination: The entrance exami- nation will be administered at Schoenberg Hall on the UCLA campus only twice a year (see above timetable). Applicants outside the Southern California area who find it impossible to take the examination on campus can make arrangements with the Department of Music to take the examination in absentia on or close to one of the dates listed above. Further informa- tion will automatically be sent after the applica- tion has been received. The entrance exami- nation is approximately three hours in length and consists of five parts: (1) written exercises in harmony and counterpoint; (2) harmonic and formal analysis; (3) identification of musical terms; (4) an essay on each of two historical subjects one before and one after 1750; (5) two-part dictation, chord recognition, sight- singing, piano sight-reading, and solo perform- ance in the applicant’s principal performance medium. In addition to the above, a Compre- hensive Examination will be required of stu- dents in Music Education. The applicant’s en- trance examination and file are evaluated by the appropriate Area Council and the Graduate Committee of the Music Department to deter- mine fitness for graduate study.

Foreign Language Requirement. A reading knowledge of German or French is required in Ethnomusicology, Systematic Musicology, and Composition; of German, French, Italian, or Spanish in Music Education; and of German and a choice of French, Italian, or Latin in His- torical Musicology. Students lacking these re- quirements upon entrance must begin lan- guage study during the first year of residence.

Course Requirements. General Require- ments: Students are required to complete a minimum of nine courses, five of which must be at the 200 level. Only 4 units of 596A, 596B, or 596C; and 4 units of 597 may apply toward the total course requirement. No more than 4 units of all types of 500 series courses may be ap- plied toward the minimum graduate course re- quirement. Upper division courses that may be counted toward the minimum of nine courses include: 103A-103B, 104A-104B, 106A*- 106B*, 107B*-107C*, 108, 109A-109B-109C, 110A-110B*, 111A-111B, 112A-112B, 119A- 119B-119C, 127A-127B-127C-127D-127E- 127F, 140A**-140B**-140C**, 141, 142A- 142B, 143A-143B, 145, 146A-146B-146C, 147A-147B, 148, 149, 151A-151B, 152, 153A- 153B-153C, 156A-156B, 157, 175, M180, M181, 184, 185, 187. A maximum of one course in chamber ensembles (175) may be counted toward the degree. Course 598 serves to guide the preparation of the thesis and should normally be taken during the last quar- ter of residence.

Course of Study: Course requirements for each field of study are as follows:

Historical Musicology: 200A, 201ABC, either 210 or 211 (students planning to enter the Ph.D. program are strongly advised to take both 210 and 211 in the first year of residence), 250A or 250B, two terms of 260A-260F, and one course elective upon the recommendation of the Graduate Adviser.

Systematic Musicology: 200A-200B, three terms of 272, one from 255, 269, 273, or 275; and three courses elective upon the recom- mendation of the Graduate Adviser.

Ethnomusicology: 190A-190B, 200A-200B; and five courses elective upon the recommenda- tion of the Graduate Adviser.

*Will not count for students whose emphasis is Composition.
**Will not count for students whose emphasis is Music Ethno- musicology.
†Will not count for students whose emphasis is Music Educa- tion.
Composition: 200A, one from 251A-251D, three terms of 252 (one of which may be completed under 596A), 266A or 266B, and three courses elective upon the recommendation of the Graduate Adviser.

Music Education: 185, 200A-200B, two terms of 270A-270F, and four courses elective upon the recommendation of the Graduate Adviser. Students may elect either the Thesis Plan or the Comprehensive Examination Plan (see below).

Comprehensive Examination Plan. (Music Education only—optional.) The Comprehensive Examination Plan is acceptable only for those not going on to the Ph.D. The examination the student is expected to pass is in lieu of a thesis, and consists of a 3-hour examination in one selected area (general, choral, or instrumental); a 3-hour examination in the broad field of Music Education; and a 2-hour examination in either Theory, Composition, Historical Musicology, Systematic Musicology, or Ethnomusicology.

If a student fails one or more parts of the Comprehensive Examination, he/she may be reexamined subject to the recommendation of the committee. The language requirement and a majority of the coursework must be completed before requesting that an examination committee be appointed. Forms are obtained from the Counselors' Office and returned to same for processing.

The committee, appointed by the Graduate Committee of the Department, includes three members of the Department, all in the professional ranks; two in Music Education and one in the area of the third examination.

Thesis Plan. In Historical Musicology, Ethnomusicology, Systematic Musicology, and Music Education the thesis will be an extended essay. For students in Composition, the thesis will be a work for chamber ensemble or orchestra. Students in Music Education may elect either the Thesis Plan or the Comprehensive Examination Plan (see above).

The language requirement and a majority of the coursework must be completed before the student submits the proposed thesis topic and the request for a master's committee. Forms are secured from the Counselors' Office and returned to same for processing. The thesis topic is first approved by the Area Council; the topic and the composition of the master's committee are then taken up by the Graduate Committee.

Orientation meetings on the format of the thesis are held quarterly by the Manuscript Adviser (134 Powell Library). Notices of these meetings are posted on the Graduate Bulletin Board (first floor, across from 1420 Schoenberg Hall).

Master's Committee: The master's committee is made up of three members from the Music Department, all in the professional ranks; two in the student's area of specialization, one member outside the student's area. Occasionally, faculty outside the Music Department may serve in lieu of one of the departmental members.

Advancement to Candidacy: Forms are obtained from the Counselors' Office and returned to that office for processing. The forms should be submitted no later than one week before the deadline date posted in the Schedule of Classes in the quarter in which the degree is to be granted.

Final Examination: The Final Examination is oral and includes discussion of both the thesis and related matters. This examination does not apply to Music Education students electing the Comprehensive Examination Plan.

When the student is ready for the Final Oral Examination, the Apprentice Assistant should be notified; he/she will contact the committee members and arrange a meeting.

Time to Degree. For a full-time student with no deficiencies upon admission to graduate status, the normal progress toward the degree is as follows:

(a) From graduate admission to completion of required courses: five to six quarters.
(b) From graduate admission to award of degree: seven quarters.

Master of Fine Arts Degree

Major Fields: The areas of specialization include all classical solo instruments, voice, opera, and conducting.

Admission Requirements. The applicant must have completed a Bachelor of Arts degree with a major in music (or the equivalent degree) as described in the Undergraduate Catalog. Transcripts must show at least 52 quarter units of work outside music including one college year (or its high school equivalent) of French, German, or Italian; and an average grade of at least B in the basic areas that normally constitute the undergraduate core curriculum in music (harmony, counterpoint, the history of music, analysis, musicianship, and performance). In addition, all applicants are required to (a) take the entrance examination (see below); (b) submit a letter describing their background of study and stating their reasons for wishing to pursue graduate studies in music; (c) request three former instructors to write letters of recommendation on their behalf (form letters are included in the application for admission); (d) submit a repertoire list and sample programs of recitals or concerts; and (e) demonstrate by audition their general musical proficiency in their area of specialization. No application can be considered until the examinations have been taken and all of the above materials have been received.

Entrance Examination: The entrance examination will be administered at Schoenberg Hall on the UCLA campus only twice a year (see above timetable). Applicants outside the Southern California area who find it impossible to take the examination on campus can make arrangements with the Department of Music to take the examination in absentia on or close to one of the dates listed above. Further information will automatically be sent after the application has been received. The entrance examination is approximately three hours in length and consists of six parts: (1) written exercises in harmony and counterpoint; (2) harmonic and formal analysis; (3) identification of musical terms; (4) an essay on two historical subjects, one before and one after 1750; (5) 2-part dictation, chord recognition, sight-singing, and piano sight-reading; and (6) an audition. The applicant's entrance examination and file are evaluated by the Performance Council and the Graduate Committee of the Music Department to determine fitness for graduate study.

Foreign Language Requirement. A reading knowledge of French, German, or Italian is required. Candidates in the opera specialty must also be fluent in speaking one of these languages. The language requirement should be satisfied by the end of the first year of residence.

Terminology Examination: All M.F.A. students will be required to pass a departmental examination covering standard musical performance terminology (expression, dynamics, interpretation, performance practices, instrumentation, style, tempo) in French, German, and Italian. The terminology requirement should be satisfied by the end of the second year of residence. The final project and M.F.A. committee cannot be approved until the language and terminology examinations have been passed.

Course Requirements. General Requirements: Students are required to complete a minimum of 18 courses, including a minimum of six at the 200 level and six or more in the 400 series. Only four units of 596A, 596B, or 596C, and 8 units of 598 may apply toward the total course requirement. No more than 4 units of all types of 500 series courses may be applied toward the minimum graduate course requirement. The minimum residence requirement for the M.F.A. is two years. The degree is normally completed in three years.

Course of Study: Course requirements are as follows: 200A, three terms of 261A-261F, six terms of 400 level courses, two terms of 598, and six electives. Recommended electives are: 108, 127A-127F, 140ABC, 175, 187, 596, and additional courses from the 200 and 400 level series. A maximum of 4 units in chamber
ensembles (175) may be counted toward the minimum 18 courses. Course 598 serves to guide the preparation of the final project and should normally be taken during the last two quarters of residence.

**Performance Requirements:** With the exception of the first quarter in residence, the student must participate in a public performance of a soloistic nature each quarter for the first two years. One of the required performances each year must be a complete solo recital on campus (preferably a noon concert) with a faculty committee in attendance to evaluate the performance. Program notes for the annual performance project, written by the candidate, must be submitted with the program to the Graduate Adviser in Performance Practices at least one month before the concert date.

The other performances (either on or off campus) must simply feature the student in a soloistic capacity (joint recital, soloing with a performance organization, accompanying, etc.) and may be only a portion of the program.

**Final Project.** This is to be completed during the last year of residence. A solo recital and appropriate scholarly paper will be required in all areas. In addition, a major operatic performance is required in the area of opera. The study paper should be equivalent to a graduate seminar paper (15-25 pages in length) and will be concerned with performance problems which can be elucidated through research and analysis. The topic for the final project will be decided by the student in consultation with the committee chairman, who will be responsible for supervising the work. Pieces drawn from or relating to the study will be included in the final recital. Both the paper and the recital will be evaluated by the student’s committee.

Concise, well-written program notes, including a brief biography of the student must be written by the candidate and submitted to the Graduate Adviser in Performance Practices for approval at least one month prior to the final recital. Publicity information for the final recital must be submitted to the Graduate Adviser at the beginning of the previous quarter.

The scholarly paper, with the accompanying program, must be submitted in the format of a thesis. (Students should contact the Manuscript Adviser—134 Powell Library—for information.) The final paper, signed by all M.F.A. committee members is to be submitted to the Counselors’ Office by the last day of classes in the quarter in which the student is to graduate.

The terminology examination, language requirement, and a majority of the coursework must be completed before the student submits the final project proposal and request for an M.F.A. committee. The proposal which is to include the complete recital program and an abstract of the scholarly paper should be submitted in the Fall Quarter of the last year of residence. It is first approved by the Graduate Committee, and after the topic and composition of the M.F.A. committee are then taken up by the Graduate Committee.

**M.F.A. Committee:** The M.F.A. committee is made up of four members from the Music Department: two from the area of performance, one of whom is the student’s applied instructor, and two from other academic disciplines within the Department. The student may propose the chairperson and the two other members subject to the approval of the Graduate Committee. In most cases, the committee chairperson will be a faculty member in Historical Musicology. Occasionally, faculty outside the Music Department may serve in lieu of one of the departmental members. M.F.A. candidates should have committees appointed at the beginning of their last year in residence.

**Admission to Candidacy:** See Master of Arts section.

**Time to Degree.** For a full-time student with no deficiencies upon admission to graduate status the normal progress toward the degree is as follows:

(a) From graduate admission to completion of required courses: nine quarters.

(b) From graduation admission to award of degree: nine quarters (10 quarter maximum).

**The Ph.D. Degree**

**Major Fields:** The Music Department offers programs in the fields of Historical Musicology, Ethnomusicology, Systematic Musicology, Composition, and Music Education.

**Admission Requirements**

The applicant must have completed a Master of Arts degree in music (or the equivalent degree) as described in this catalog. The degree normally will have been taken in the same field of concentration as the proposed doctorate. If a student wishes to obtain a doctorate in a field other than that of the M.A., additional coursework, as prescribed by the Department must be completed. Applicants in Music Education will be required to have completed two years of teaching experience at the elementary or secondary levels. All applicants who have received an M.A. from a university other than UCLA are required to (a) take the entrance examination (see below); (b) submit a letter describing their reasons for wishing to pursue graduate studies in music; (c) request three former instructors to write letters of recommendation on their behalf (form letters are included in the application for admission); and (d) submit written examples of their work (M.A. thesis or composition, if possible). No application can be considered until the examinations have been taken and the above materials have been received.

**Teaching Experience:** Applicants in Music Education will be required to have two years teaching experience at the elementary or secondary levels to be considered for admission.

**Entrance Examination:** See Master of Arts section.

**Foreign Language Requirement.** A reading knowledge of French and German is required in Systematic Musicology, Ethnomusicology, and Music Education; of French, German, and a choice of Italian, Latin or another language approved by the Council in Historical Musicology. In the field of Composition, two languages are required; one of which must be German or French; the other may be chosen from German, French, Latin, Italian, or Russian.

**Course Requirements**

Course requirements for each field of study are as follows:

- **Historical Musicology:** 200A, 201ABC, 210, 211, 250A or 25B, and five terms of 260A-260F. Students who have received the M.A. in Historical Musicology from UCLA will normally take a minimum of three terms of 260A-260F in the Ph.D. program. Students may complete their residence requirement by electing courses, upon the recommendation of the Graduate Adviser, from 200 level courses or 100 level courses listed under the general requirements for the M.A.

- **Systematic Musicology:** 200A-200B, five terms of 272; and one term of 255, 260, 273, or 275. Students who have received the M.A. in Systematic Musicology from UCLA will normally take a minimum of two terms of 272 in the Ph.D. program. Students may complete their residence requirement by electing courses, upon the recommendation of the Graduate Adviser, from 200 level courses or 100 level courses listed under the general requirements for the M.A.

- **Ethnomusicology:** 190A-190B, 200A-200B, and six seminars, at least three of which shall be 280; the others are to be chosen from 248, 253, 254A-254B, or 255. Students are also expected to complete two area studies courses. Parts of these requirements may be completed at the M.A. level. Students may complete their residence requirement by electing courses, upon the recommendation of the Graduate Adviser, from 200 level courses or 100 level courses listed under the general requirements for the M.A.

**Composition:** 200A, one from 251A-251D, six terms of 252 (two of which may be completed under 596A), and 266A or 266B. Students who have received the M.A. in Composition from UCLA will normally take a minimum of three terms of 252 in the Ph.D. program. Students may complete their residence requirement by electing courses, upon the recommendation of the Graduate Adviser, from 200 level courses or 100 level courses listed under the general requirements for the M.A.
Music Education: 185, 200A-200B, and five terms of 270A-270F. Students who have received the M.A. in Music Education from UCLA will normally take a minimum of three terms of 270A-270F in the Ph.D. program. Under advisement, two of the three terms of 270A-270F may be completed under special studies (S95C). Students who wish to pursue the Ph.D. in Music Education with a minor in Ethnomusicology will be required to take 185, 190A-190B, 200A-200B, three terms of 270A-270F, and two courses from 141-143, 145-149, 152, 153A-155B-153C, or 281-288. Electives are to be selected from 140ABC, M180, M181, 187, 254AB, 255, and 280. Students may complete their residence requirement by electing courses, upon the recommendation of the Graduate Adviser, from 200 level courses or 100 level courses listed under the general requirements for the M.A.

Form I: The status of students in all fields of concentration is provisional subject to the departmental approval of the Form I Application (Notice of Intention to Proceed to Candidacy for the Ph.D. Degree). This form is normally filed at the end of the first year of residency, provided that all but one of the languages have been passed. The application may be secured from the Counselors' Office and returned to same for processing. The application is reviewed by the Graduate Committee, the student's Area Council and by the full faculty, normally takes two to three months to be approved. Upon approval of the application and completion of the entire language requirement, the student may request that a guidance committee be appointed.

Guidance Committee: The guidance committee, appointed by the Graduate Committee of the Music Department, will assist the student in the preparation of the written and oral qualifying examinations. Students may suggest the membership, subject to the approval of the Graduate Committee. Forms requesting the appointment of a committee may be secured from the Counselors' Office and returned to that office for processing. The committee is made up of five members in the Department, all in the professional ranks. The committee must include at least two members in the student's area of concentration, one of whom will guide the dissertation and be the chairperson of the doctoral committee. Other members are elected according to the examinations to be taken. The Graduate Committee will appoint one member to act as chairperson.

Written and Oral Qualifying Examinations. When the student and his/her committee feel he/she is ready to take the Qualifying Examinations, the student should submit a schedule to the Apprentice Assistant and the committee members listing the order in which the examinations are to be taken. The Apprentice Assistant acts as proctor for the tests. Normally the six written examinations (delineated below) are spread over a 2-week period but should be completed within three weeks. Should the student not pass one or more of the tests, repeats will be scheduled after consultation with the guidance committee and after a stipulated period of time. Upon successful completion of the written examinations, an Oral Qualifying Examination will be scheduled by the Apprentice Assistant.

In the fields of Historical Musicology, Ethnomusicology, and Music Education, the written examinations consist of the following: (a) history of musical styles in Western civilization (three hours); (b) analysis of form and style (three hours); (c) an examination to demonstrate a basic knowledge of music in non-Western cultures (two hours); and (d) a choice of one or more from: acoustics of music, aesthetics of music, psychology of music, and organology (two hours). Further written examinations totaling six hours are required in two areas: (1) Historical Musicology: one area to be selected from Ancient, Medieval, Renaissance, or Baroque; (2) another area from Classic, Romantic, or 20th Century; (2) Ethnomusicology: two areas to be selected from contrasting musical cultures; and (3) Music Education: two areas, one to encompass historical, philosophical, and psychological bases, the other to be selected from Music Education emphasizing elementary, secondary, or college-university levels. For the student in Music Education with a minor in Ethnomusicology, the second examination will relate the fields of Ethnomusicology and Music Education.

In the field of Systematic Musicology, the written examinations consist of the following: (a) history of musical styles in Western civilization (three hours); (b) analysis of form and style (three hours); (c) an examination to demonstrate a basic knowledge of music in non-Western cultures (two hours); (d) a general examination in Systematic Musicology (two hours); (e) two areas to be selected from acoustics, aesthetics, psychology of music, sociology of music, and organology (six hours).

In the field of Composition, the written examinations consist of: (a) composition of a short homophonic and short polyphonic piece within a 24-hour period optionally either on or off campus; (b) general history of music (three hours); (c) analysis of form and style (three hours); (d) one or more of the following: acoustics, aesthetics, psychology of music or ethnomusicology (two hours); (e) 20th Century music (two hours); and (f) music theory from the medieval period to the present, with an optional emphasis on theoretical writings before or after 1700 (three hours).

Upon completion of the Written and Oral Qualifying Examinations, the student may submit the dissertation topic and request for a doctoral committee for approval. Forms are secured from the Counselors' Office and returned to that office for processing. The dissertation topic is first approved by the student's Area Council; the topic and the composition of the doctoral committee are then taken up by the Graduate Committee.

Doctoral Committee. The doctoral committee is appointed by the Graduate Committee of the Music Department. The committee is made up of five members, three from the Music Department and two from other departments on campus, all in the professional ranks. The three members from the Music Department include two in the student's area of concentration and one outside the area. Note: Only two members from the guidance committee can be continued on the doctoral committee.

The first meeting of the doctoral committee is concerned with the presentation and discussion of the dissertation topic.

Dissertation. In all fields but Composition, the dissertation will be an extended monograph. In the field of Composition, the dissertation will consist of (1) an extended composition accompanied by a short description of the style and techniques of the work, and (2) an analytical monograph dealing with some aspect of 20th Century music.

Candidate in Philosophy. Students are eligible to receive the optional Candidate in Philosophy degree upon advancement to candidacy for the Ph.D.

Advancement to candidacy is processed by the Graduate Division upon completion of the qualifying examinations and presentation of the dissertation topic to the doctoral committee.

In-Candidacy Fee Offset Grant Program: Students who begin graduate study at UCLA after September 1, 1979 will be mandatorily included in this program. Those students with graduate standing prior to September 1, 1979, have a choice of whether or not to join the program. Specific information may be obtained from the Counselors' Office.

Final Oral Examination. A Final Oral Examination is required by the Department of Music. When the student is ready for the Final Oral Examination, he/she should notify the Apprentice Assistant who will contact the committee members and arrange the meeting.

Time to Degree. For a full-time student with no deficiencies upon admission to graduate status, the normal progress toward the degree is as follows:

(a) From graduate admission to admission to the doctoral program: four quarters.
(b) From graduate admission to Written and Oral Qualifying Examinations: six quarters.
(c) From graduate admission to approval of dissertation prospectus: eight quarters.
(d) From advancement to candidacy to Final Oral Examination: seven quarters.
(e) From graduate admission to award of degree: 15 quarters.
Graduate Courses
200A. Research Methods and Bibliography. Three hours weekly. A survey of general bibliographic material in music. Mr. Draper, Mrs. Murray

200B. Research Methods and Bibliography. Three hours weekly. Prerequisite: course 200A. Guided writing, utilizing specific bibliography in historical musicology, systematic musicology, ethnomusicology, and music education. Mr. Draper, Mrs. Murray

201A-201B-201C. Introductory Seminar in Historical Musicology. Lecture, three hours. Prerequisite: 201A is prerequisite to 201B; 201B is prerequisite to 201C. An introduction at the graduate level to the studies and to employ his developing skills in research and bibliography. The Staff

210. Medieval Notation. Three hours weekly. Prerequisite: consent of instructor. Vocal and instrumental notation; paleography of the period. Mr. Reaney

211. Renaissance Notation. Three hours weekly. Prerequisite: consent of instructor. Vocal and instrumental notation; paleography of the period. Mr. Reaney

247. Seminar in Comparative Music Theory. Prerequisite: consent of instructor. The comparative study of the codified music theories of select cultures—Western and non-Western—considered in themselves and as expressions of their societies. Theory considered as a science of music, its place between cultural values and artistic practice in different civilizations. Mr. Crossley-Holland

250A-250B. Seminar in the History of Western Music. (Formerly numbered 250.) Prerequisite: course 200A. 250A is not prerequisite to 250B. 250A: Music Theory from Antiquity through Zarino; 250B: Music Theory from Rameau to the present. Mrs. Gollner, Mr. Reaney

251A-251D. Seminar in Special Topics in Composition and Theory. Three hours weekly. May be repeated for credit. An intensive exploration of specialized aspects of composition. 251A: Orchestration; 251B: Specific media; 251C: Specific styles; 251D: Compositional Analysis. Mr. Des Marais, Mrs. Berkin

252A-252B-252C. Seminar in Composition. Three hours weekly. Prerequisites: courses 106B and 107C. 252A is prerequisite to 252B, 252B is prerequisite to 252C. May be repeated for credit. Course may be taken out of sequence only by consent of instructor. Mr. Ashforth

253. Seminar in Notation and Transcription in Ethnomusicology. Three hours weekly. Prerequisites: courses 140A-140B-140C, 190A-190B, or consent of instructor. Mr. Nketia

254A-254B. Seminar in Field and Laboratory Methods in Ethnomusicology. Prerequisites: courses 190A-190B or consent of instructor. Training includes experience in handling of technical apparatus, films, recording, processing and editing; field projects. Mr. Jairazbhoy

255. Seminar in Musical Instruments of the Non-Western World. Three hours weekly. Prerequisite: courses 140A-140B-140C, 190A-190B, or consent of instructor. Mr. Crossley-Holland

256. Seminar in Musical Form. Three hours weekly. Prerequisites: courses 126A-126B-126C. The analysis of structural organizations in music. Mr. Hudson

257. Seminar in Music of the United States and Canada. Three hours weekly. Prerequisite: course 130.

258. Seminar in Folk Music. (Same as folklore M258.) Three hours weekly. Prerequisite: consent of instructor. Mr. Porter

260A-260F. Seminar in Historical Musicology. Three hours weekly. Prerequisites: courses 200A, 200B, 210 or 211. Students may enroll in 200B, 210 or 211 concurrently. May be repeated for credit. 260A. Medieval Music; 260B. Renaissance; 260C. Baroque; 260D. Classical; 260E. Romantic; 260F. General Topics. The Staff

261A-261F. Problems in Performance Practices. Three hours weekly. May be repeated for credit. Prerequisites: courses 151A-151B or consent of instructor. An investigation of primary source readings in performance practices as related to the period; analytical reports and practical applications in class demonstrations. 261A. Medieval; 261B. Renaissance; 261C. Baroque; 261D. Classical; 261E. Romantic; 261F. Contemporary. Mr. Hammond, Mr. Harman, Mr. Winter

266A-266B. Seminar in Music of the Twentieth Century. Three hours weekly. Prerequisites: courses 126A-126B-126C; Students who have received credit for 266 may take either 266A or 266B. 266A. Discussion and analysis of the major works of the 20th Century before World War II. Emphasis will be placed on the study of groups of works written at the same time in history. 266B. Discussion and analysis of composers and their works from 1945 to the present. Mr. Reale

269. Seminar in the History of European Instruments. Three hours weekly. May be repeated for credit. Mr. Murray

270A-270F. Seminar in Music Education. Three hours weekly. Prerequisite: consent of instructor. The history, theory and practice of North and South American classical music. The first quarter will be concerned primarily with music history and traditional theory, while the second quarter will involve analysis of present-day forms, styles, techniques, and musical instruments. Concurrent participation in the Indian performance group is required. Mr. Jairazbhoy

271. Seminar in Systematic Musicology. Three hours weekly. Prerequisite: course 108 and consent of instructor. May be repeated for credit.

273. Seminar in the Psychology of Music. Prerequisite: course 108 or consent of instructor. May be repeated for credit. Mr. Hudson

275. Seminar in Aesthetics of Music. Three hours weekly. Prerequisite: course 108, or consent of instructor. May be repeated once for credit. Mr. Hutchinson

286. Seminar in the Psychology of Music. Three hours weekly. Prerequisite: consent of instructor. An intensive study of the psychology of music to include: recent findings in brain research, musical perception, learning, cognition, memory, therapy, affect, meaning, and measurement. Mr. Murray

287. Seminar in African Music. Three hours weekly. Prerequisite: consent of instructor. A study of the history, theory and practice of African music, with particular reference to pre-nineteenth century African sources on music theory and aesthetics, and contemporaneous musical practice considered in respect of social contexts, music genres, relationships between theory and practice, and interrelationships with other arts. Topics include traditional instruments and ensembles and studies in formal and stylistic analysis. Mr. Crossley-Holland

288. Seminar in the History of European Instruments. Three hours weekly. Prerequisite: consent of instructor. A study of the history, theory and practice of North and South American classical music. The first quarter will be concerned primarily with music history and traditional theory, while the second quarter will involve analysis of present-day forms, styles, techniques, and musical instruments. Concurrent participation in the Indian performance group is required. Mr. Jairazbhoy

Professional Courses
370. Music in General Education. (½ course) Two hours weekly. Prerequisite: acceptance into the teacher training program through the School of Education. All music students shall take Music 370 concurrently with Education courses 100, 112, 312, 315, and supervised teaching. May be repeated for credit up to six units. Critical discussions related to supervised teaching in progress. Miss Hooper, Mr. James
Near Eastern Languages and Cultures

(Department Office, 376 Kinsey Hall)
Amin Banani, Ph.D., Professor of Persian and History
Arnold Band, Ph.D., Professor of Hebrew.
Andras Bodrogi, Ph.D., Professor of Turkic and Iranian (Chair of the Department).
Seeeger A. Bonebakker, Ph.D., Professor of Arabic.
Gorgio Buccellati, Ph.D., Professor of Ancient Near East and History.
Herbert A. Davidson, Ph.D., Professor of Hebrew.
Avedis K. Sanjian, Ph.D., Professor of Armenian.
Hannes-Peter Schmidt, Ph.D., Professor of Indo-Iranian.
Stanislav Segert, Ph.D., Professor of Biblical Studies and Northwest Semitics.
Moshe Perlman, Ph.D., Emeritus Professor of Arabic.
Ismael Poonauala, Ph.D., Professor of Arabic.
Claude-France Audert, Ph.D., Associate Professor of Arabic.
Elizabeth Carter, Ph.D., Associate Professor of Near Eastern Archaeology.
John Callender, Ph.D., Associate Professor of Egyptology.
Thomas Penchoen, Ph.D., Associate Professor of Hebrew.
Yona Sabar, Ph.D., Associate Professor of Hebrew.
Lev Hakak, Ph.D., Assistant Professor of Hebrew.
Deborah Lipstadt, Ph.D., Assistant Professor of Jewish Studies.
Steven West, Ph.D., Assistant Professor of Turkish.

Shimeon Brisman, Lecturer in Hebrew.
Stanford Shaw, Ph.D., Professor of History.

The Master of Arts Degree

Admission Requirements. In addition to the regular University requirements, a bachelor's degree or its equivalent in the language area chosen for the degree, the Graduate Record Examination Aptitude Test (minimum score requirement 1100), and three letters of recommendation are required. Prospective students may write to: Department of Near Eastern Languages and Cultures, 376 Kinsey Hall, UCLA.

Advising. Graduate Adviser: Andras Bodrogi, Chairperson, Department of Near Eastern Languages and Cultures, 376 Kinsey Hall, UCLA.

All graduate students are assigned a guidance committee of three faculty members whose interests are in the student's area of specialization. The Chairperson of the Department selects the committee and appoints one member to serve as chairperson of the committee and adviser.

An advising appointment is made for each new student at the beginning of his/her first quarter. During this appointment, the student and his/her adviser agree upon a study list and his/her future program. In each subsequent quarter it is the student's responsibility to discuss his/her plan for that quarter with his/her adviser and obtain approval of his/her study list. Petitions to alter this study list after it has been formulated must be approved by the Department Chairperson, who is the official Graduate Adviser for the Department. Departmental policy requires the signature of the Chairperson of the Department for approval of all other petitions as well.

The candidate may concentrate on either language or literature in his/her chosen field but will be required to do work in both. In the case of the Ancient Near Eastern field, the candidate may concentrate on a combination of both language and literature with Near Eastern archaeology.

Foreign Language Requirement. The candidate will be required to pass an examination in one major modern European language other than English by the end of the third quarter of residence. The choice of the language will be determined in consultation with his/her adviser. The student has the option of satisfying this requirement by one of the following methods: (1) Educational Testing Service (ETS) examination, (2) departmentally administered examination, (3) two years college level or equivalent in the language selected. It is strongly recommended that the student who intends to continue toward a Ph.D. degree acquire a knowledge of a second major European language other than English while still a candidate for the M.A. degree.

Course Requirements

Departmental General Requirements. A minimum of nine upper division and graduate level courses, of which at least six courses must be on the graduate level. All candidates will be required to take one quarter of Near Eastern Languages 200 (Bibliography and Method).

Specific Requirements. The specific requirements for the M.A. degree in the several areas of specialization are as follows: The candidates in Ancient Near Eastern Civilizations will be required to study two ancient languages of the Ancient Near East (Ancient Egyptian, Akkadian, or Hebrew), and the history and archaeology of the related area. The major area of concentration may be either the linguistic, literary, or archaeological aspect of the discipline. The candidate in Hebrew will be required to study
The Ph.D. Degree

Admission Requirements. In addition to the regular University requirements, a M.A. or its equivalent in the applicant’s field, the Graduate Record Examination (GRE) Aptitude Test (minimum scores requirement: 1100), and three letters of recommendation are required. Prospective students may write to: Department of Near Eastern Languages and Cultures, 376 Kinsey Hall, UCLA.

The Department does not have an application form in addition to the one used by Graduate Admissions.

Advising. Graduate Adviser: Andras Bodrogligeti, Chairperson, Department of Near Eastern Languages and Cultures, 376 Kinsey Hall, UCLA.

All graduate students are assigned a guidance committee of three faculty members whose interests are in the student’s area of specialization. The Chairperson of the Department selects the committee and appoints one member to serve as chairperson of the committee and adviser.

An advising appointment is made for each new student at the beginning of his/her first quarter. During this appointment, the student and his/her adviser agree upon a study list and his/her future program. Each subsequent quarter, it is the student’s responsibility to discuss his/her plan for that quarter with his/her adviser and obtain approval for his/her study list. Petitions to alter this study list after it has been formulated must be approved by the Department Chairperson who is the official Graduate Adviser for the Department. Departmental policy requires the signature of the Chairperson of the Department for approval of all other petitions as well. The guidance committee usually serves as the departmental members of the doctoral committee.

Admission to the Doctoral Program. Completion of the master’s degree in his/her field is required. The GRE is required. The M.A. program must not be completed at UCLA.

Major Fields or Subdisciplines. Ancient Near Eastern Civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic. The candidate may concentrate on either language or literature in his/her chosen field but will be required to do work in both. In all areas of specialization, the student’s program of study will be devised in consultation with his/her adviser.

Foreign Language Examinations. Two modern major European languages other than English. The choice of languages must be approved by the adviser, who may also require additional language skills in modern and/or ancient languages if such skills are needed for scholarly work in the area of the student’s interests.

The requirement is fulfilled by one of the following three options: (1) Passing the Educational Testing Service (ETS) examination, (2) Passing an examination administered by the Department with a minimum grade of “B”, (3) Two years’ college work in the language or the equivalent.

The student is expected to pass one of the two required European languages at the beginning of his/her first quarter in residence, and the second language not later than at the beginning of the fourth quarter.

Course Requirements. A candidate specializing in the languages of the Near East is expected to take the equivalent of one year of general linguistics and one year of grammar in his/her field of concentration (e.g., Semitics or Turkic). He/she is also required to achieve competence in three related languages within his/her field of concentration with particular emphasis on two major languages. It is mainly the structural mastery of the languages and familiarity with their development and their position within the appropriate family of languages that are required. The student is also advised to acquaint himself/herself with the historical, literary, religious, and social background of the various language areas of his/her interest.

A candidate specializing in the literatures of the Near East is required to achieve competence in two languages; his/her second language must be a literary language from the cultural area related to his/her first language (e.g., a Hebraist can choose Akkadian, Arabic, Armenian, or Yiddish; an Arabist can choose Persian or Turkish, and so on). The candidate will also be required to be familiar with the history of literary criticism and methods of literary research. This requirement may be fulfilled by taking courses offered by various departments at UCLA, particularly the course in literary criticism offered by the English Department or the course in the Methodology of Comparative Literature.

A candidate specializing in Ancient Near Eastern Civilization will be required to achieve competence in two ancient languages. His/her major area of concentration may be in either the linguistic, literary, or archaeological aspect of the discipline.

Written and Oral Qualifying Examinations. Before the Chairperson of the Department recommends the formation of a doctoral committee, all students must pass Written Qualifying Examinations.

The candidate in languages will be examined in three near Eastern languages and the literary and historical background of at least two of them. The candidate in literature will be examined in the literatures written in two languages within the cultural area of his/her concentration and the historical and cultural background of these languages with emphasis on one of them. The candidate in Ancient Near Eastern Civilizations will be examined in two ancient languages and the history and archaeology of the major areas of the Ancient Near East.

Upon the successful completion of the Written and Oral Qualifying Examinations, the student is eligible to advance to candidacy and receive the Candidate in Philosophy degree.
Doctoral Committee. The regulations are synonymous with those of the Graduate Council.

Time to Degree
1) From graduate admission to admission to the doctoral program, it is not synonymous: 6 quarters.
2) From appointment of an adviser or Departmental Guidance Committee to completion of master's degree, if a requirement: 6 quarters.
3) From graduate admission to the Written and Oral Qualifying Examinations: 12 quarters.
4) From graduate admission to the approval of the dissertation prospectus: 10 quarters.
5) From approval of dissertation prospectus to the Oral Qualifying Examination: 2 quarters.
6) From graduate admission to the award of the degree: 18 quarters.

Final Oral Examination. The Department does not require an oral defense of the dissertation except in circumstances deemed necessary by the candidate's doctoral committee.

Candidate In Philosophy Degree. The Department of Near Eastern Languages and Cultures has been approved to grant this degree upon advancement to candidacy.

Disqualification and Appeal of Disqualification. The specific conditions which may lead to termination are: (1) Scholarship (critical recommendation from the Graduate Committee), (2) Failure to make normal progress toward the degree (recommendation from the Department section). In all cases, the student's personal and academic progress are discussed in depth by the Department Section concerned with making the recommendation. A recommendation for termination is forwarded to the Department Chairperson for final review and decision. If termination is upheld, the Chairperson notifies the student in writing. Should the student wish to appeal such a decision, he/she should submit a letter to the Chairperson stating his/her reasons and the Chairperson will transmit it to the Department Section for consideration.

Ancient Near East

Graduate Courses
210. Late Egyptian. (Formerly numbered 122A-122B) Lecture, three hours. Prerequisites: courses 121A-121B-121C and consent of instructor. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. The quarters in which this course is offered vary from year to year. Check with department. May be repeated for credit. Mr. Callender

250A-250B-250C. Seminar in Sumerian Language and Literature. Lecture, two hours. Prerequisites: consent of instructor. Readings of texts from various Sumerian periods and literary genres; selected problems in linguistic or stylistic analysis and literary history. The Staff

250. Seminar in Ancient Mesopotamia. Prerequisite: consent of instructor. Selected topics on the political, social and intellectual history of ancient Mesopotamia. May be repeated for credit. Mr. Buccellati

250X. Seminar in Ancient Mesopotamia. (¼ course) Prerequisite: consent of instructor. Selected topics on the political, social and intellectual history of ancient Mesopotamia. May be repeated for credit. Ancient Near East 250X is a one unit course for students who participate regularly in class meetings without the homework required of students in the regular course, Ancient Near East 250. The Staff

260. Seminar in Ancient Near Eastern Archaeology. Lecture, two hours. Prerequisite: consent of instructor. May be repeated for credit. The Staff

261. Practical Field Archaeology. (½ to 2 courses) Two hours. Prerequisite: consent of instructor. Participating in archaeological excavations or other archaeological research in the Near East under supervision of the staff. May be repeated. Mr. Buccellati, Miss Carter

262. Seminar in Object Archaeology. Discussion, two hours; laboratory, one hour. Prerequisite: consent of instructor. Selected topics in the analysis and interpretation of Near Eastern archaeological finds in museum collections. Students will work with objects in the Heeramaneck Collection of the Los Angeles County Museum of Art. Miss Carter

272. Semitic Background of the New Testament. (Formerly numbered 172.) Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C, Semitics 130C, Greek 1-2, or consent of instructor. Study of the Semitic elements in the Greek New Testament; traditions transmitted in Aramaic, relations to the Old Testament and to the Post-Biblical Literature, and Palestinian Judaism. Mr. Segert

Individual Study and Research
596. Directed Individual Study. (½ to 2 courses) The Staff

597. Examination Preparation. (½ to 2 courses) The Staff

599. Dissertation Research and Preparation. (½ to 2 courses) The Staff

Arabic

Graduate Courses
220A-220B-220C. Islamic Texts. Lecture, two hours. Prerequisites: courses 121A-121B-121C and consent of instructor. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. The quarters in which this course is offered vary from year to year. Check with department. May be repeated for credit. Mr. Callender

221A-221B. Texts of the Greco-Roman Period. Prerequisite: course 121C. Introduction to the grammar and orthography of hieroglyphic texts from Greco-Roman temples. Text readings and translation of various textual types. Mr. Callender

220. Seminar in Ancient Egypt. Three hours. Prerequisite: consent of instructor. May be repeated for credit. Mr. Callender

221A-221B. Demotic. Prerequisite: course 121C. Introduction to Demotic grammar and orthography. Reading of texts from various genres. Mr. Callender

240A-240B-240C. Seminar in Sumerian Language and Literature. Lecture, two hours. Prerequisites: consent of instructor. Readings of texts from various Sumerian periods and literary genres; selected problems in linguistic or stylistic analysis and literary history. The Staff

250. Seminar in Ancient Mesopotamia. Prerequisite: consent of instructor. Selected topics on the political, social and intellectual history of ancient Mesopotamia. May be repeated for credit. Mr. Poonawala

250A-250B-250C. Seminar in Arabic Literature. Two hours weekly. May be repeated for credit with consent of instructor. Mr. Bonebakker

250A-250B-250C. Introduction to Modern Arabic Dialects. Lecture, three hours. Prerequisites: Arabic 103A-103B-103C or consent of instructor. Survey of partition and geographic distribution of Modern Arabic dialects; common structural features and contrasts with Classical Arabic; socio-linguistic evaluation of the Arabic diglossia; analysis of representative texts. The Staff

250. Structure of Classical Arabic. Lecture, three hours. Prerequisites: Arabic 103A-103B-103C or consent of instructor. The patterning of Classical Arabic at the morpho-phonemic, morpho-logical, and morpho-syntactic structural levels; application of traditional, statistical, and generative methods to the synchronic investigation of structural features. The Staff

Individual Study and Research
596. Directed Individual Study. (½ to 2 courses) The Staff

596. Directed Individual Study. (½ to 2 courses)

597. Examination Preparation. (½ to 2 courses)

599. Dissertation Research and Preparation. (½ to 2 courses)

Iranian

Graduate Courses

**210A-210B. The History of the Persian Language. Lecture, three hours. Prerequisite: consent of instructor. Survey of the development of the new Persian language against the background of Middle and Old Persian.

Mr. Bodrogligeti

**211A-211B. Modern Iranian Dialects. Lecture, four hours. Prerequisites: Linguistics 100 or equivalent and consent of instructor. A survey of the North-western and Southwestern Iranian languages, and their interaction with the non-Iranian languages of Iran. Discussion includes historical development, linguistic affinities and modern distribution. Material gathered in the field will supplement lectures. May be repeated for credit with the consent of instructor.

The Staff

**220A-220B. Classical Persian Texts. Lecture, three hours. Prerequisites: courses 103A-103B-103C or consent of instructor. Study of selected classical Persian texts. May be taken independently for credit.

Mr. Banani

**221. Rumi the Mystic Poet of Islam. Lecture, three hours. Prerequisites: course 220A or 220B or equivalent and consent of instructor. A study of the life and works of Rumi in the context of interaction of Sufism and poetic creativity.

Mr. Banani

**M222A-M222B. Vedic. (Formerly numbered Indo-European Studies 222A-222B) Lecture, four hours. Prerequisites: a knowledge of Sanskrit equivalent to Oriental Languages 162, and consent of instructor. Comparative considerations. 222B only may be repeated for credit.

Mr. Schmidt

**230A-230B. Old Iranian. (Formerly numbered Indo-European Studies 230A-230B) Lecture, four hours. Prerequisite: consent of instructor. Studies in the grammars and texts of Old Persian and Avestan. Comparative considerations. 230B only may be repeated for credit.

Mr. Schmidt

**231A-231B. Middle Iranian. (Formerly numbered Indo-European Studies 231A-231B) Lecture, four hours. Prerequisite: consent of instructor. Studies in the grammars and texts of Middle Iranian languages as best serve the students' needs (e.g., Pahlavi, Sogdian, Sakian). 231B only may be repeated for credit.

Mr. Schmidt

**250. Seminar in Classical Persian Literature. Three hours weekly. Prerequisites: courses 103A-103B-103C and Iranian 199 or consent of instructor. May be repeated two times for credit.

Mr. Band

**251. Seminar in Contemporary Persian Literature. Three hours weekly. Prerequisites: course 140 or equivalent and consent of instructor. Studies in specific problems and trends in Persian poetry and prose in the twentieth century.

Mr. Band

**210. Ancient Aramaic. Lecture, two hours. Prerequisite: course 130 or consent of instructor. Reading of the surviving inscriptions and papyri. May be repeated for credit.**
- Mr. Segert

**215A-215B. Syriac. Lecture, two hours. Morphology and syntax of the Syriac language; readings in the Syriac translation of the Bible and Syriac literature. 215B only may be repeated for credit.**
- Mr. Segert

**220A-220B. Ugaritic. Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Study of the Ugaritic language and inscriptions. 220B only may be repeated for credit.**
- Mr. Segert

**252. Phoenician. Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Study of the Phoenician language and inscriptions. May be repeated for credit.**
- Mr. Segert

**230. Seminar in Northwest Semitic Languages and Literatures. Lecture, two hours. Prerequisite: consent of instructor. May be repeated for credit.**
- Mr. Segert

240. Seminar in Akkadian Language. Two hours weekly. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in the linguistic analysis of Akkadian dialects. May be repeated for credit.
- Mr. Buccellati

240X. Seminar in Akkadian Language. (¼ course) Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in the linguistic analysis of Akkadian dialects. May be repeated for credit.
- Mr. Buccellati

241. Seminar in Akkadian Literature. Two hours weekly. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit.
- Mr. Buccellati

241X. Seminar in Akkadian Literature. (¼ course) Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit.
- Mr. Buccellati

Turkic Languages

Graduate Courses

- Mr. West

**211. Ottoman Diplomatics. Lecture, three hours. Prerequisites: courses 210A-210B-210C or equivalent. Organization and contents of the Ottoman archives; reading and discussion of documents and registers. Introduction to the use of Ottoman archive materials as a source for historical research.**
- Mr. Shaw

- Mr. Buccellati

**225A-225B-225C. Old Turkic: Turk and Uyghur. Lecture, three hours. Prerequisites: Turkic 180A-180B-180C and consent of instructor. Textual and linguistic analysis of Turk and Uyghur documents: inscriptions, manichean and buddhist literary works. Given in alternate years; to be given 1978-1979.**
- Mr. Bodrogligeti

**230A-230B-230C. A Historical and Comparative Survey of the Turkic Languages. Lecture, three hours. Prerequisites: Turkic 180A-180B-180C. Extinct and living Turkic languages. The history of Turkic developments in the phonemic, grammatical and lexical systems from the 8th to the 20th centuries. Structural analysis of the Turkic languages on a comparative basis.**
- Mr. Bodrogligeti

**235A-235B. Middle Turkic: Karakhanid, Khazarian, Mamlukkipchak and Old Anatolian. Lecture, three hours. Prerequisites: Turkic 180A-180B-180C and consent of instructor. A survey of Middle-Turkic texts from various literary genres. Given in alternate years; to be given 1978-1979.**
- Mr. Bodrogligeti

240A-240B-240C. Islamic Texts in Ottoman. Lecture, three hours. Prerequisites: Turkic 210A-210B-210C or consent of instructor. A philological and linguistic survey of the basic Islamic source material written in the Ottoman literary language. Reading and discussion of Ottoman texts on Islamic topics.
- Mr. Bodrogligeti

250A-250B-250C. Islamic Texts in Chagatay. Lecture, three hours. Prerequisites: Turkic 220A-220B-220C or consent of instructor. A philological and linguistic survey of the basic Islamic source material written in the Chagatay literary language. Reading and discussion of Chagatay texts on Islamic topics.
- Mr. Bodrogligeti

**280A-280B. Seminar in Modern Turkish Literature. Seminar, two hours. Prerequisites: Turkish 102B or equivalent and consent of instructor. Specific issues and trends in the development of Turkish literature from the middle of the 19th century to the present.**
- Mr. West

The interdisciplinary program of graduate training leading to the Ph.D. in Neuroscience utilizes facilities, resources, and activities of the Brain Research Institute and is administered by an interdepartmental degree Committee.

**The Ph.D. Degree**

Admission Requirements. All applicants must satisfy the University minimum requirements. In addition, Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) scores are required. Recommended preparation includes mathematics through calculus, and at least one year each of general chemistry, organic chemistry, physics and basic biology. Three letters of recommendation are required.

Information regarding the program may be obtained by writing to: Neuroscience Office, 73-346 CHS, UCLA, Los Angeles, California 90024, Phone: (213) 825-8153.

Advising. The Graduate Adviser for the Neuroscience Program is: Professor Samuel Eidu-
son, Neuroscience Office, 73-346 CHS, Cam-
pus.

Upon admission to the Neuroscience Program, each new student is assigned an administra-
tive adviser. These advisers are selected by the Neuroscience Committee and are not fu-
ture dissertation advisers, although they could, of course, serve in this capacity. Generally, later in the student's career, he/she will change advisers once the dissertation sponsor has been selected.

Neuroscience

(Interdepartmental)
Quarterly evaluations are made of each student's academic progress. The overall assessment is made by the student's adviser and is reviewed by the Chairperson who reports to the Neuroscience Committee.

Each adviser meets with the student at least once every quarter. Advisers are required to approve all course enrollments every quarter, and to discuss the student's progress and any difficulties he/she might be having.

**Major Fields or Subdisciplines.** Biobehavioral Sciences; Neuroanatomy; Neuroscience; Neurocybergenetics and Communication; Neuroendocrinology; Neuroimmunology; Neuropathology; Neuropharmacology; Neurophysiology.

**Foreign Language Requirement.** The Neuroscience Program does not have a language requirement but does have a breadth requirement which can be satisfied by successfully completing one of the following:

a. By passing the Graduate School Foreign Language Test in one of the approved languages (French, German, or Russian). Any exceptions to the above must be approved by the Neuroscience Committee. Normally, a score of 500 is considered passing.

b. By completing one of the recommended series of Biomathematics computer courses.

c. By completing an in-depth "minor" in an area related to the student's field. A minor is defined as at least 8 units of study beyond the introductory level.

No student will be advanced to candidacy who has not met the above-mentioned breadth requirement.

**Course Requirements.** Basic course requirements of the Neuroscience Program include: Anatomy 206A-D; Biological Chemistry 200A-D; Biology 166; Biology 171; Neuroscience 233; Neuroscience 254; Electives and lab rotations (as determined by the student and his/her adviser).

Substitutions to the basic requirements may be made depending upon the background of the individual and with the consent of the Graduate Adviser. It is recommended that, when possible, required core courses be completed within the first two years of study.

**Written and Oral Qualifying Examinations.** A Written Qualifying Examination is required following completion of the core requirements. The objective of this examination is to test the student's basic knowledge, ability to relate knowledge in different Neuroscience areas, to locate and interpret literature and to evaluate the student's aptitude for applying research problems.

Following the successful completion of the Written Qualifying Examination, the student and his/her adviser choose the doctoral committee (see Doctoral Committee).

An Oral Qualifying Examination, administered by the doctoral committee, is normally taken after the Written Qualifying Examination and the breadth requirements have been completed.

**Doctoral Committee.** The student and his/her adviser choose a doctoral committee consisting of three "inside" members and two "outside" members. In addition, the members of the committee must represent at least three different disciplines of academic study. Approval of the doctoral committee by the Neuroscience Committee is required.

**Time to Degree.** In general, overall progress toward the degree will be accomplished by completing a prequalifying program of 12 to 16 units in each of the six full quarters and by passing the Oral Qualifying Examination two years after enrollment. The student is expected to pass the Written Qualifying Examination within three attempts. The approved normative time-to-degree is 18 quarters.

**Final Oral Examination.** The Final Oral Examination is optional with the student's doctoral committee. If the doctoral committee unanimously agrees and the Neuroscience Committee concurs, the Final Oral Examination may be waived.

**Teaching Experience.** Teaching experience is not required for the degree. However, such experience is obtained by virtually all students in required courses, Neuroscience 233.

**Disqualification and Appeal of Disqualification.** The specific conditions which may lead to termination prior to degree are:

a. Failure to obtain at least a "B" in all core courses.

b. Failure to pass the Written or Oral Qualifying Examinations.

c. Failure to maintain progress toward the degree.

Because of a student's failure in any of the above categories, and following discussions with both student and adviser, the entire Interdepartmental Neuroscience Committee may vote to terminate the student. The student may appeal in writing, to the entire Committee and at a meeting of the entire Committee, present additional or mitigating information. This presentation may be made in person or in writing at the discretion of the student.

**Other Relevant Information**

**West Coast Regional Consortium in the Neurosciences.** The students in our Neuroscience Ph.D. program are eligible to participate in the West Coast Regional Consortium in Neuroscience. The consortium is a cooperative association of neuroscience programs at 11 universities enabling predoctoral and postdoctoral students to undertake short-term laboratory work and research using facilities or techniques not available at their home institutions. It also assists faculty and advanced graduate students to travel to member universities to demonstrate specific techniques or methods which otherwise would not be available on those campuses. Students and faculty at the Brain Research Institute and other neuroscience programs at participating universities may thus have access to the best educational opportunities available in the western region.

Following the completion of the required courses of the Program, the student and his/her adviser choose from a rich variety of courses available in the associated departments and selected with regard to the student's interest and direction of research.

**Graduate Courses**

**200A-2008-200C. Clinical Concepts in the Neurosciences.** (1 course each) Presents information concerning neurological and psychiatric disorders for students from basic science backgrounds.

Mr. Walter M201A-M201B-M201C. The Functional Organization of Behavior. (1 1/2 course each) (Same as Psychi- ary, M201A-M201B-M201C.) Prerequisite: consent of instructor; admission to M201B requires completion of M201A; admission to M201C requires completion of M201A-M201B. The course is divided into three quarters. The Fall Quarter is introductory and focuses on the development of behaviors within different species and the functional uses of behaviors. An evolutionary biological perspective is used as the framework for the Fall Quarter. The Winter Quarter focuses on research studies designed to take into account the functional behavior of animals. The Spring Quarter focuses on special questions of interest to students.

Mr. McGuire M204. Structure and Function of the Limbic System. (1 course) (Same as Anatomy M304.) Lec- ture, two hours. Prerequisite: consent of instructor. Current knowledge of the mammalian limbic system will be presented by surveying studies of its development, anatomy, intrinsic synaptic organization, synaptic chemistry, afferent and efferent circuits and dys- functions in memory and cognition association with limbic system function. The pathophysiology of limbic epilepsy will be related to normal limbic system structure and function.

Mr. Babij *205. Brain-Behavioral Strategies for the Neurosciences. (1 course) Prerequisite: consent of instructor. Emphasis will be placed on behavioral designs, methods and instruments employed to test specific neurological afferent- efferent and integrative systems of the central nervous system. The programing of signals and incentives in arousal, habituation, classical conditioning and operant conditioning paradigms will be discussed in terms of the neural challenges for the coping animal. Behavioral methods will be emphasized along with concurrent recording of neurophysiological data. This course is designed primarily to present practical behavioral techniques for the neuroscience student.

Mr. McGuire M206A-M206B. Neurosciences: The Introductory Course for Graduate Students. (11/4 courses, 13/4 courses) (Same as Anatomy M206A-M206B.) Two hours of lecture and two hours of lab per week in the Winter Quarter; five hours of lecture and two hours of lab per week in the Spring Quarter. Prerequisite: admission to the course (or equivalent) in basic and/or general physiology such as Biology 171 or Physiology 101 or consent of instructor. This course is offered on an In-Progress basis which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for all quarters of work. Introductory course in the basic principles of the nervous system for graduate students as a prerequisite to more advanced courses. Fundamental approaches to neuroanatomy (Winter Quarter), neurophysiology and the brain mechanisms for behavior (Spring Quarter) will be stressed.

Mr. Scheibel and the Staff
233. Seminar in Neurosience. (1/2 course) Topics of current importance will be presented for discussion. Subject matter will be announced. The Staff

254. Interdisciplinary Research Seminar. (1/2 course) Lectures and discussions concern many different disciplinary approaches to knowledge of brain function. The subject matter serves to broaden the experience of students studying in different fields other than that of the lecturer and offers new information in depth from students in fields closely related to the subject discussed. The Staff

*255A-256B-256C. Survey of the Basic Neurological Sciences. (1/2 course each) Summary information concerning methodologies utilized in different research approaches to brain study, (e.g., neurophysiology, neuroendocrinology, brain ultrastructure, neuropharmacology, and others) and brief review of present state of knowledge available from each. For students with interest in interdisciplinary aspects of brain research. The Staff

259A-259B-259C. Neurophysiology of Behavior: The Fetus, Newborn, and Infant. (1/2 course each) An integrated review of neuroanatomic, neurophysiologic, and behavioral development of human and animal fetuses and infants. Behavior will be correlated with the development of the brain during this period of rapid change in both. Mr. Parmelee

M260. Fundamental Concepts of Neuroendocrinology. (Same as Anatomy M260.) Two hours of lecture and two of discussion per week in the Winter Quarter of odd-numbered calendar years. Prerequisites: Biochemistry 101C, Anatomy 206A-206B, or consent of instructor. Basic concepts of neuroendocrine integration including analysis of the current literature and research techniques.

M261. Neuronal Circuit Analysis. (1/2 course) (Same as Anatomy M261.) Three hours of lecture or discussion per week offered during the Winter Quarter. Prerequisite: Anatomy 206A or 206B or equivalent. The course will be run in a seminar form with strong emphasis on specific reading assignments. It will present an integrated view of neuronal circuit analysis at an advanced level and examine the layout and performance of a variety of basic neuronal circuits serving different control functions. Mr. Schlag

**Individual Study and Research**

595. Directed Individual Study or Research. (1 to 3 courses) Prerequisite: consent of instructor. Mr. Eduson

597. Preparation for the Doctoral Qualifying Examination. (1 to 3 courses) Prerequisite: consent of instructor. Mr. Eduson

599. Dissertation Research for Ph.D. Candidates. (1 to 3 courses) For students requiring special instruction or time to work on dissertation. Mr. Eduson

**Admission Requirements**

1. Graduation from a recognized college or university having an NLN accredited baccalaureate nursing program satisfactory to the School of Nursing, University of California, Los Angeles and satisfactory to the Graduate Division, Los Angeles. Students who have completed other curricula (e.g., students who have graduated from a foreign institution) may be
required to enroll in certain undergraduate nursing courses which generally will not be accepted in fulfillment of the requirements for advanced degrees.

2. Status as a licensed registered nurse. Prior to entry into any clinical practicum, evidence of current licensure as a registered nurse in any state or country is mandatory.

3. An upper division statistics course, or a lower division statistics course with content equivalent to Public Health 100A must be completed prior to entrance into the School of Nursing.

4. An upper division research course equivalent to N193 must be completed prior to entrance into the School of Nursing.

5. Professional and/or academic competence in nursing attested through three letters of recommendation.

6. A scholarship record satisfactory to the Graduate Division, Los Angeles and to the School of Nursing, University of California.

Foreign applicants should contact the UCLA School of Nursing, Student Affairs Office, for special admission requirements.

Foreign Students. Foreign students are cautioned that written and verbal communication skills are basic to the practice of nursing. It is therefore essential that students read, write and speak English well.

Application Procedure. Prospective students interested in the Master of Nursing program, must file two applications: (1) Application for Admission to Graduate Status, and (2) Application for Admission to Graduate Study in the School of Nursing. The Application for Admission to Graduate Study in the School of Nursing can be obtained through the Student Affairs Office, School of Nursing, Louis Factor Building, Los Angeles, Ca. 90024. Application deadlines are as follows:

<table>
<thead>
<tr>
<th>Quarter</th>
<th>Deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>December 30</td>
</tr>
<tr>
<td>Winter</td>
<td>October 1</td>
</tr>
<tr>
<td>Spring</td>
<td>December 30</td>
</tr>
</tbody>
</table>

The application to the School of Nursing is free and must be returned to the School of Nursing directly. Please refer to the ADMISSIONS section of this catalog for information on the Admission to Graduate Status forms.

Advising. The School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. Applicants may call the Student Affairs Office, (213) 825-7181, for dates and places of these sessions.

Upon admission to the School, each student is assigned a faculty adviser who has the responsibility to aid the student in planning a total program. Students are encouraged to meet with their adviser at least once each quarter in order to evaluate the student's progress. Student and adviser together identify academic and personal needs and match them with School and University resources available in order to maximize the student's ability to reach educational and professional goals.

Transcripts and grade reports are reviewed quarterly. Evaluations of performance in clinical coursework are written at the end of the quarter and placed in the student's folder. The student is requested to read and sign the evaluation. Individual instructors are encouraged to contact the adviser of the student if they feel the student needs guidance in any academic endeavor. Signed records of all interviews are kept on counseling forms in the student's file.

If a student has academic difficulties, his/her record is reviewed by the adviser and the Assistant Dean of Student Affairs who meets with the student to determine guidance and recommendations. This meeting is also recorded in the counseling notes of the student's folder.

Major Fields. The School of Nursing offers graduate studies in the following areas:

- Community Mental Health
- Psychiatric Nursing
- Community Mental Health
- Liaison Nurse
- Mental Health Ethnic Specialist
- Gerontology
- Clinical Specialist
- Nurse Practitioner
- Material Child Health
- Maternity
- Pediatrics
- Medical-Surgical Nursing
- General
- Cardiovascular
- Oncology
- Respiratory
- Primary Ambulatory Care
- Adult
- Family
- Occupational Health
- Pediatrics
- Women's Health

Students may choose to add preparation in education or administration to their clinical requirement.

Degree and Course Requirements

Degree Requirements

1. A minimum of 10 courses (40 units) in the 100, 200, 400 and 500 series; eight of these courses (32 units) must be taken in the School of Nursing with five (20 units) in the 200 and 400 series. Additional coursework is required to fulfill the requirements for certain areas of specialization.

2. A minimum grade point average of 3.0 is required. A grade of "B" is required in graduate clinical nursing courses in order to advance to the next clinical course in a series.

3. A minimum of three quarters in full time (8 units/quarter) is required for academic residence.

4. A Comprehensive Examination or a thesis is required.

Required Courses. The candidate for the M.N. degree must successfully complete a minimum of one course from each of the following areas:

1. Research in Nursing (N204).
2. Nursing Theory (N203, 210, 211, 212, 221, 222, 223, 224, 225, M217).
3. Cultural Diversity course (N158, 196, 250, 251 or PH M238G).

Additional course requirements vary according to specialty area listed below:

Community Mental Health Specialty. The primary intent of this specialization is the preparation of clinicians who can function in leadership roles in mental health settings. Students may elect additional preparation as consultants or Liaison Nurses (mental health consultants in general health care settings). This specialty requires a total of 10 to 11 courses:

- Psychiatric: N204, one Theory course, one Cultural Diversity course, 405, 424A, B, C; one elective course.
- Community Mental Health: N204, one Theory course, one Cultural Diversity course, 405, 424A, B, 440A, B, 441A, B.
- Liaison Nursing: N204, one Theory course, one Cultural Diversity course, 403, 405, 424A, B, 440A, B, 442.
- Mental Health Ethnic Specialist: N204, one theory course, 403, 405, 424A, B, 440A, B, 441A, B, five cognate courses, a seminar in Cultural Concepts.

Gerontological Nursing Specialty. The Gerontological Nursing option is designed to develop basic knowledge and skills providing multifaceted care that is required for the maintenance of health in the elderly. Goals of care include the retardation of decline and the promotion of remaining assets in health and illness. Clinical nursing in this option is organized around the concept of stress and the alleviation of its effects in the lives of the elderly in both health and illness. Since the processes of normal aging can be best understood as progressive decreases in abilities to deal with the stresses of living, nursing interventions are logically conceptualized as either stress-reducing or ability-enhancing in either health or illness. This specialty requires a total of 15 courses: N204, 221, one Cultural Diversity course, 425A, B, C, 403, six elective courses chosen with faculty adviser.

Maternity Clinical Nursing Specialty. The primary goal of this specialty is to augment, expand, and refine knowledge and basic preparation in clinical expertise in giving care to the childbearing family in all phases of the repro-
productive cycle. The program focuses on the nursing process, patient and colleague teaching, and the development of leadership and research skills in the area of clinical practice. This specialty is one option in the Master of Nursing degree program and may be taken in conjunction with another clinical specialty of the student's choice. This specialty requires a total of 10 courses: N204, 203, one Cultural Diversity course, 212, 223, 422A, B, N422C or two functional elective courses are also required.

**Medical-Surgical Nursing Specialty.** The primary goal of this specialty is to develop highly skilled clinical nurse specialists in selected areas of Medical-Surgical Nursing in one or more of the following subspecialties:

- **Cardiovascular Subspecialty.** The primary goal of this subspecialty within Medical-Surgical Nursing is to prepare cardiovascular clinical nurse specialists to meet an increasing demand for improved health services for patients with cardiovascular diseases. Several years of experience in acute coronary care settings (medical and/or surgical) and/or cardiac rehabilitation is highly recommended before entrance into this subspecialty. Following completion of the program, graduates would be expected to function as cardiovascular nurse clinicians, teachers, consultants, or research associates, and to assume leadership positions in a variety of health care settings. This subspecialty requires a total of 10 courses: N204, 211, one Cultural Diversity course, 423A, B, C, 403, 415.

- **General Medical-Surgical Subspecialty.** The primary goal of this subspecialty is to prepare nurses to become clinical specialists in general medical-surgical nursing. At least two years of prior experience in medical-surgical nursing is highly recommended. Upon completion of the program, graduates would be expected to function as general medical-surgical clinicians, educators, consultants and researchers. They would be prepared to become leaders in a variety of health care settings. This subspecialty requires a total of 10 courses: N204, one Theory course, one Cultural Diversity course, 423A, B, C, one elective course, and one course from the following—203, 401 or 403.

- **Onecology Subspecialty.** The comprehensive care of the cancer patient requires that nurses be prepared in theory and skills to minister to the patient's total needs—physical, psychological, emotional, social and spiritual.

  This option is designed to prepare clinical nurse specialists for the interdisciplinary team responsibility for cancer prevention, treatment, and rehabilitation. In addition to clinical competence in preventive, detection, and rehabilitative phases of cancer care, emphasis is directed to the preparation of the clinician in research, teaching, administration and consultation. This subspecialty requires a total of 11 courses: N204, one Theory course, one Cultural Diversity course, 423A, B, C, 401, 416, 417.

- **Respiratory Subspecialty.** The primary goal of this medical-surgical subspecialty is to prepare respiratory clinical nurse specialists to meet the increasing demand for improved health services to patients with pulmonary diseases. Several years of prior experience in respiratory nursing, critical care, or rehabilitation are highly recommended. During the program, the student will have learning experiences as a clinician, teacher, consultant, researcher, and leader in respiratory nursing in a variety of health care settings. This subspecialty requires a total of 10% courses: N204, 210, one Cultural Diversity course, 423A, B, C, 403, 414, 415.

- **Pediatric Clinical Nursing Specialty.** The primary goal of this specialty is the expansion of knowledge and clinical expertise needed by the professional nurse specialist in pediatric nursing. The nursing process and a theoretical framework are utilized as guides to clinical practice. The program also focuses on the development of leadership and research skills in the area of clinical practice. This specialty is one option in the Master of Nursing degree program and may be taken in conjunction with another clinical specialty of the student's choice. This specialty requires a total of 10 courses: N204, 203, one Cultural Diversity course, 212, 223, 421A, B, N421C or two functional elective courses are also required.

- **Primary Ambulatory Care/Nurse Practitioner Specialty.** The Primary Ambulatory Care specialty courses focus on the knowledge and skills needed to develop competent nurse practitioners who will function in family, adult, women's and/or pediatric primary ambulatory health care settings. Within the framework of the population areas, the focus is upon the individual within the family context. A master's degree nurse practitioner is defined as a registered nurse who has acquired additional knowledge and skills in order to provide direct primary care in ambulatory populations. The nurse practitioner uses a systematic problem-solving process to evaluate health status and identify illness, and works collaboratively with physicians and other health professionals to assure comprehensive quality health care and health maintenance.

  This specialty requires a total of 12 courses: N204, one Theory course, one Cultural Diversity course, 402A, B, 264, 429A, B, C.

- **Occupational Health Option for Adult Nurse Practitioners.** Students in Primary Ambulatory Care may elect the Occupational Health option, integrating principles of occupational health assessment and care with primary ambulatory care of the adult. This practitioner evaluates the individual as seen within his/her work setting as well as within the family group. Primary focus and emphasis is placed on health status assessment, health promotion, illness/accident prevention and rehabilitation. This is an interdisciplinary program.

  Students will meet requirements for preparation in occupational health nursing by combining occupational health core courses with School of Nursing courses required for the master's degree in Primary Ambulatory Care. The majority of these core courses are taken with students from other disciplines who are also preparing for careers in occupational health. This specialty requires a total of 17 courses: N204, 225, one Cultural Diversity course, 402A, B, 254, 429A, B, C, and five occupational health courses chosen with faculty adviser.

- **Foreign Language Requirement.** There is no foreign language requirement for the M.N. degree.

- **Thesis Plan.** Students who choose a thesis plan normally select a thesis committee by the beginning of the third quarter or following completion of N204 and N205A or B. The thesis committee is composed of three members. One member is normally selected from outside the School of Nursing.

- **Comprehensive Examination Plan.** The Comprehensive Examination Committee is a subcommittee of the Curriculum Committee. There are five faculty members including the Chairperson; all members are appointed by the Dean.

  The Comprehensive Examination is given in written form. The examination is scheduled each quarter. Students are eligible to take the examination during the quarter in which they are advanced to candidacy. Students will be allowed to repeat the Comprehensive Examination, in its entirety or in part, twice. Students must complete all requirements for the degree within one calendar year after advancement to candidacy.

- **Time to Degree.** Normal progress from graduate admission to conferral of degree is five to six quarters.

- **500 Series Course Limitations.** A total of 8 units of 500 series courses may be applied toward the total course requirements for the degree. The School of Nursing uses Satisfactory/Unsatisfactory grading on all 500 series courses. The 500 series courses, 596, 597, and 598 all have unit value of 4 to 8 units, 597 may be repeated only once, while 596 and 598 have no limit on the number of times they may be repeated.

- **Disqualification and Appeal of Disqualification.**

  **Specific conditions leading to termination:**
  A. Failure to maintain a grade point average of 3.0
  B. Grades of B— or lower in clinical courses regardless of overall grade point average
  C. Unprofessional or unethical conduct as a registered nurse.
Process of decision to recommend termination:

A. Written report of conduct to Assistant Dean of Student Affairs by faculty member, graduate adviser, clinical supervisor or other concerned person.

B. Consultation by Assistant Dean with student.

C. Consultation by Assistant Dean with Dean as appropriate.

D. Final decisions are made by the Assistant Dean except for matters other than failure to maintain academic standing. Such cases are sent for review by Associate Dean for Student Affairs, Graduate Division, in consultation with the Assistant Dean for Student Affairs, School of Nursing, with the final decision being made at the Graduate Division level.

Physical Examination and Health Insurance. Due to the strenuous demands of nursing study and practice, and because of extra risk of exposure to illness, a physical examination and renewal of immunizations are required upon entry to the School of all students. The School of Nursing will provide the necessary forms after students have confirmed their intention to enroll.

The School also requires that all students carry adequate hospital/medical insurance. This requirement may be met either by purchase of UCLA Student Supplemental Health Insurance Plan or by demonstration of alternative insurance acceptable to the School.

Graduate Courses

I. Research in Nursing, Nursing Theory, and Cultural Diversity

203. Theoretical Framework for Nursing Practice. Lecture, four hours. Comparative study of selected conceptual models of nursing and the recipient of nursing, with particular emphasis on the regulatory model, the adaptation model, the supplementary model, and the complementary model. Ms. Derdiarian

204. Research in Nursing: An Advanced Course. Lecture, four hours. Prerequisite: course 193 or equivalent upper division basic research methodology course. This course focuses on complex research designs and analysis of multiple variables. Emphasis will be placed on techniques for control of variables, data analysis, and interpretation of results. The inter-relationship of theoretical frameworks, design, sample selection, data collection instruments, and data analysis techniques will be analyzed in depth. Content will be discussed in terms of clinical nursing research problems. Ms. Thomas, Ms. Vredevoe

205A. Qualitative Research Methods in Nursing. Lecture, four hours. Prerequisite: course 204. Emphasis is placed upon nursing research designs utilizing the field method approach, ethnmethodology, and inductive methods. Ms. Brink

205B. Quantitative Research Methods in Nursing. Lecture, four hours. Prerequisite: course 204. Emphasis is placed on nursing research designs requiring statistical analysis of data. Ms. Vredevoe

210. Respiratory Physiology As It Relates to Nursing. Lecture, three hours; discussion, one hour; seminars. Prerequisite: upper division course in human physiology. An advanced treatment of the topic presented in lectures and seminars with emphasis on current research. Application of knowledge to nursing problems will be stressed. Ms. Seraydarian

211. Cardiovascular Physiology As It Relates to Nursing. Lecture, three hours; discussion, one hour; seminars. Prerequisite: upper division course in human physiology. An advanced treatment of the topic presented in lectures and seminars with emphasis on current research. Application of knowledge to nursing problems will be stressed. Ms. Seraydarian

212. Discontinuities in Family Health During the Reproductive Years. Lecture, two hours; discussion, one hour. An overview of selected problems with health connotations that are potentially disruptive to the family during their childbearing years. Selected problems are examined in depth. Pertinent variables affecting the family’s definition of the situation, their resources, strategies for coping, and utilization of professional services are explored and their relevance for nursing practice is examined. Ms. Reeder

M217. Medical Anthropology. (Same as Anthropology M263.) Lecture, three hours. Prerequisite: course M158 or consent of instructor. Any of the topics covered in upper division course, M158, will be selected each quarter, for intensive literature review and independent projects. The course may be repeated for credit.

221. Theoretical Frameworks for Developmental Problems, Middle and Later Years. Lecture, four hours. Aspects of life span development relevant to understanding health needs in middle and later years will be studied. Changes in biological, cognitive, and psychosocial processes will be explored and implications for prevention and rehabilitative care considered. Ms. Putnam

222. The Concept of Grief and Loss. Lecture, three hours; laboratory, two to four hours. Prerequisite: enrollment in a clinical nursing course or concurrent. This course will deal with the concepts and theories of grief and loss, with a particular emphasis on the loss of a significant other. There will also be discussions about death and the dying person with the intent of assisting the care giver to deal more effectively with a person and/or family involved in a life-threatening experience. Ms. Wallace

223. Management of Development Problems, Early Years. Lecture, four hours. Study of selected human developmental theories, hypotheses, and concepts. Problems relevant to nursing are examined through the critique of pertinent literature. Ms. Holaday

224. Problems in Patient Motivation. Lecture, four hours. The major purpose of this course will be an exploration of the phenomena which may occur when a person assumes the role of a sick patient. Ms. Thomas

234. Issues in Health Care. Prerequisite: consent of instructor. A comprehensive course dealing with pre-sense of health care and the roles of health team members as viewed by society and influenced by societal values. Selected health care issues will be debated by students using an in-depth literature review on the issue. Ms. Ver Steeg

250. Seminar: Nursing in Other Cultures. Lecture, four hours. Prerequisite: consent of instructor. Discussion of anthropological principles which affect nursing care in a particular cultural environment. Individual research projects based upon the medical problems found in such an environment and the projected nursing interventions relative to these findings. Ms. Brink

251. Nursing Care to Ethnic People of Color in the United States. Lecture, four hours. Prerequisites: Graduate Standing, course 196, or consent of instructor. Examines and evaluates selected theories from nursing, other sciences, and their application to the delivery of intra and trans-cultural nursing care. Emphasis is placed on value orientations, sociocultural perceptions and cognitions of health and illness, and ethnomedical health practices as predictive factors in analyzing health care delivery to ethnic people of color. The Staff

II. Clinical Practice

401. Nursing Assessment and Intervention. Lecture, two hours; laboratory, four to eight hours. Prerequisite: course 203 or concurrent. Discussion and experience in the systematic assessment of patients for the identification of nursing problems. Discussion and evaluation of major modes of interventive practice. Ms. Derdiarian

402A-402B. Primary Diagnosis for Nurse Practitioners. Laboratory, four hours; discussion, demonstration and practice, six hours. Prerequisites: satisfactory completion of anatomy and physiology prerequisites, consent of instructor. Laboratory, and other diagnostic methodology. Pathology and physiologic basis for musculoskeletal system, approach. Ms. Downen

403. Physical Assessment for the Clinical Specialist. (1 to 1 1/2 courses) Lecture, four hours; optional seminars, two hours. Prerequisite: consent of instructor. An introductory study of the basic techniques of history-taking and physical examination which are used by clinical specialists as part of the total nursing assessment process. Includes theory, demonstration, and practice of physical assessment methodology. Optional seminars provide content pertinent to selected specialty areas. Ms. Troupe

404. Comprehensive Group Theory. Lecture, two hours; laboratory, two hours. This course will offer an in-depth study of group dynamics and group therapy, applicable to any health service area. It will focus on the study and application of group theory and practice relevant to nursing. The student will gain in-depth knowledge of group dynamics and group theory, how to apply the above theory to any area of nursing, develop a beginning ability to function as both leader and participant in the area of group dynamics and/or group therapy, and develop the ability to evaluate the effectiveness of group therapy. The Staff
258 / NURSING

405. Assessment in Psychiatric Nursing. Lecture, two hours; laboratory, six to eight hours. A preparatory course for advanced clinical practice. The specific aim is a critical examination of the concepts and strategies which effect assessment of psychological behavior.

Ms. Kerr

M410A-410B-410C. Nursing Care of the Developmentally Disabled. (4 credit hours; 472A-472B-472C) Lecture, one and one-half hours; discussion, one hour; laboratory, eight hours. Prerequisite: enrollment in the Master's Program of the School of Nursing. Study of the handicapping conditions of childhood and their effects upon the child and his/her family. This course combines didactic material and supervised clinical experience. Focus is on prevention, systematic assessment, planning, implementation and evaluation of nursing care. During the final quarter, the student participates in the assessment, planning and delivery of health care to the developmentally disabled in the community.

Ms. Savino

414. Current Perspectives in Respiratory and Cardiovascular Nursing. (1½ course) Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Exploration of selected problems, trends and issues in respiratory and cardiovascular health care, with emphasis on their significance for the clinical nurse specialist role. Ms. Skilling

415. Assessment in Respiratory and Cardiovascular Nursing. (½ to 1½ courses) Lecture, one to four hours; laboratory, four to eight hours. Prerequisites: course 210 or 211, 414. Introduction to the basic methods of assessing respiratory and cardiovascular function and health with emphasis on their application in clinical nursing practice. Ms. Skilling

416. Oncology and Treatment of Cancer. Lecture, two hours; discussion, one hour; laboratory, eight to ten hours. Prerequisite: consent of instructor. Basic knowledge of biological, behavioral and medical sciences for understanding the development, diagnosis, treatment, and prognosis of cancer. Nursing care management related to diagnosis and treatment modalities is stressed. Ms. D'Antonio

417. Systematic Approach to Oncologic Nursing. Lecture, two hours; discussion, two hours; laboratory, eight to ten hours. Prerequisites: consent of instructor, course 416. Nursing management of persons with various types of malignancies. The focus is on the assessment of special physical and psychosocial problems of patients with diagnoses of cancer in a specific site. The focus is also providing the student with theoretical and technical skills necessary for the intervention and management of patients with theoretical and technical skills necessary for the interventions of these problems. Ms. McAdams

421A. Clinical Nursing Care of Children. Discussion, two hours; discussion, two hours; laboratory, ten hours. Prerequisites: one course in nursing theory or prior or concurrent enrollment in 203. This course focuses on the application of a theoretical model and the nursing process to a specific, identifiable patient population in a pediatric setting with special emphasis on assessment and diagnosis. Content covers each aspect of the nursing process.

Ms. Holiday

421B. Advanced Clinical Nursing Care of Children. (2 courses) Discussion, two hours; laboratory, twenty hours. Prerequisite: course 421A. This course focuses on the role of the clinical specialist in pediatric nursing with emphasis on the practitioner core of the role. The student identifies a selected patient population for whom she plans and implements the nursing process from assessment through evaluation. Content includes theoretical and practical issues related to the clinical specialist role.

Ms. D'Antonio

421C. Clinical Specialization in Nursing Care of Children. (2 courses) Discussion, two hours; laboratory, twenty hours. Prerequisite: course 421B. The practitioner role is continued in this course to foster consolidation of knowledge and skills. Emphasis is placed on the consultation and staff development dimensions of the clinical nurse specialist role. This course is required for Pediatric Nursing Specialization.

Ms. D'Antonio

422A. Clinical Maternity Nursing. Discussion, two hours; laboratory, ten hours. Prerequisites: consent of instructor. Preparation for independent nursing practice in the assessment, intervention, and evaluation phases of the nursing process. The assessment phase as it relates to the child-bearing family is stressed. A family-centered orientation is stressed and theoretical models for the study of the family and the development of nursing practice are examined and utilized in caring. Pertinent variables affecting the delivery of care and utilization of health services for the nursing segments of society are examined.

Ms. Reeder

422B. Advanced Clinical Maternity Nursing. (2 courses) Discussion, two hours; laboratory, twenty hours. Prerequisite: course 422A. Knowledge and clinical expertise are refined and extended with content emphasis on high risk conditions and complications in the reproductive process. The utilization of the nursing process is continued with emphasis on the prescriptive, intervention, and evaluative phases of the process. Teaching, counseling skills, and collegial relationships with co-workers are stressed. The health beliefs, orientations, and health behavior of clients from various cultural backgrounds are further examined and evaluated. The delineation and evaluation of researchable clinical questions are emphasized.

Ms. Reeder

422C. Clinical Specialization in Maternity Nursing. (2 courses) Discussion, two hours; laboratory, twenty hours. Prerequisite: course 422B. Clinical expertise is continued to be refined and extended in one or more areas of the high risk conditions and/or normal phenomena encountered during the reproductive process as they relate to the assessment, intervention, and evaluation within a conceptual framework for nursing practice. Coordination of care, patient and family education counseling, and consultative skills are particularly stressed. The delineation and development of researchable clinical questions are further refined.

Ms. Reeder

423A. Medical-Mineral-Surgical Nursing. (.½ to 1 course) Lecture, one hour; discussion, two hours; laboratory, up to ten hours. Prerequisites: course 204 (or concurrent) and one theory course; consent of instructor. Students select a specific patient population for concentration in the course: 1) Oncology, 2) Cardiovascular, 3) Respiratory, 4) General Medical-Surgical. Non-Medical-Surgical Specialization students may enroll for 2 units with consent of instructor.

Ms. Canfield

423B. Advanced Medical-Mineral-Surgical Nursing. (½ to 2 courses) Lecture, one hour; discussion, ten hours; laboratory, up to thirty hours. Prerequisites: course 423A and consent of instructor for Non-Medical-Surgical Specialization students. Continued refinement of the nursing process and extension of professional knowledge and skills with a selected patient population. Emphasis is placed on selection of utilization, and evaluation of interventions for nursing problems of medical-surgical patients. Students select a specific patient population for concentration in the course: 1) Oncology, 2) Cardiovascular, 3) Respiratory, 4) General Medical-Surgical. Non Medical-Surgical Specialization students may enroll for 2 units with consent of instructor.

Ms. Chang

423C. Clinical Specialization in Medical-Surgical Nursing. (½ to 2 courses) Lecture, one hour; discussion, two hours; laboratory, twenty hours. Prerequisite: course 423A and consent of instructor. Preparation for independent nursing practice in the assessment, intervention, and evaluation phases of the nursing process. The assessment phase as it relates to the child-bearing family is stressed. A family-centered orientation is stressed and theoretical models for the study of the family and the development of nursing practice are examined and utilized in caring. Pertinent variables affecting the delivery of care and utilization of health services for the nursing segments of society are examined.

Ms. Reeder

424A. Clinical Psychiatric Nursing. Discussion, three hours; laboratory, one hour. Prerequisite: course 424A, consent of instructor. Preparation for independent nursing practice in the assessment, intervention, and evaluation phases of the nursing process. The utilization of the nursing process is continued with emphasis on the prescriptive, intervention, and evaluative phases of the process. Teaching, counseling skills, and collegial relationships with co-workers are stressed. The health beliefs, orientations, and health behavior of clients from various cultural backgrounds are further examined and evaluated. The delineation and evaluation of researchable clinical questions are further refined.

Ms. Kable

424B. Advanced Clinical Psychiatric Nursing. (2 courses) Discussion, three hours; laboratory, twenty hours. Prerequisites: course 424A, consent of instructor. Consent of instructor: supervision and competencies: the process of psychotherapy with emphasis on prevalent psychiatry health issues.

Ms. Van Servellen

424C. Clinical Specialization in Psychiatric Nursing. (2 courses) Laboratory, twenty-four hours; seminar, two hours. Prerequisites: course 424B, consent of instructor. Supervised Internship. choice of setting and population to be the student's option. Required for Psychiatry Nursing Specialization.

Ms. Kerr

425A. Gerontological Nursing. (1 to 2 courses) Discussion, three hours; laboratory, fifteen to thirty hours. Prerequisite: one course in nursing theory. Principles and practice of assessment of psychosocial variables in health problems of the elderly. Emphasis placed on integrated understanding of multiple variable influences in total health.

Ms. Davis

425B. Advanced Clinical Gerontological Nursing. (1 to 2 courses) Discussion, three hours; laboratory, fifteen to thirty hours. Prerequisite: course 425A. Application of knowledge and skills of psychosocial nursing intervention in rehabilitation of the chronically ill aged.

Ms. Davis

425C. Clinical Specialization in Gerontological Nursing. (2 courses) Discussion, three hours; laboratory, fifteen to thirty hours. Prerequisite: course 425B. Extension and demonstration of competencies in gerontological nursing programs and settings in health problems of the elderly. Ms. Davis

429A-429B. Preceptorship in Primary Ambulatory Care Nursing. (2 courses each) Lecture, three hours; discussion, three hours; laboratory, minimum of sixteen hours. Prerequisites: courses 429A-429B; consent of instructor. Theory and clinical practice in nursing management and evaluation of health problems in a selected ambulatory population. Health maintenance is emphasized. Attention is given to the developmental and cognitive needs of clients in relation to family, social, and cultural structures.

Ms. Meier

429C. Advanced Preceptorship in Primary Ambulatory Care Nursing. (2 courses) Discussion, three hours; laboratory, twenty-four hours. Prerequisites: courses 429A, 429B, consent of instructor. Advanced specialization in primary ambulatory care. Emphasis is placed upon the refinement and extension of assessment, arrangement, and evaluation skills, family health care and health care of other community. Clinical options include family practice or specialization in adult, pediatric, or women's health care.

Ms. Meier
440A-440B. Clinical Specialization in Community Mental Health Consultation. Lecture, three hours; clinical, ten hours. Prerequisites: consent of instructor, course 424B, concurrent with 441A and 441B.

The study and application of mental health consultation theory and practice relevant to community mental health nursing. The focus is on group consultation skills. The development of the nurse-consultant role in the interdisciplinary health team approach to mental health services. The course is a two-quarter, In-Progress sequence. The Staff

441A-441B. Clinical Specialization in Community Mental Health Consultation. Discussion, three hours; clinical, ten hours. Prerequisites: consent of instructor, course 424B, concurrent with 440A and 440B. Course focuses on the process of community mental health assessment and program evaluation and planning for health services. Emphasis is placed on health advocacy, prevention of mental illness, and planned change concepts. The course is a two-quarter, In-Progress sequence. The Staff

442. Liaison Nursing. Lecture, three hours; laboratory, ten hours. Prerequisites: courses 403, 440A. Behavior of groups of individuals is studied from an inter-system framework. The student focuses on the interactions of the health care providers and clients in general hospitals, clinics, and community health agencies. Attention is paid to the variables influencing the health care provider's assessment and interventions concerning the clients' behavioral problems. This framework is utilized to evaluate the stability and direction of the organization as these are causally related to the system's effectiveness in the delivery of quality health care. The inter-relatedness of such variables as human services, sociopolitical and cultural life-style factors of the system are examined.
academic problems he/she is contacted by the Graduate Adviser for counseling. To contact the Graduate Adviser write the Oral Biology Office, 63-090 CHS, School of Dentistry, UCLA, Los Angeles, California (213) 825-1955.

Major Fields or Subdisciplines. Areas of specialization or subdisciplines which may be followed by compliment or complete the degree requirements include: Anatomy, Biological Chemistry, Cell Biology and Virology, Immunology, Microbiology, Pharmacology and Physiology.

Foreign Language Requirement. There is no foreign language requirement for the master’s degree.

Course Requirements. The Oral Biology program requires a total number of nine courses, five of which must be at the graduate level. Flora of the Human Mouth, Oral Physiology, Secretary and Gastrointestinal Immunity, The Biochemistry of Saliva and Dental Caries, Brainstem Control of Rhythmic Movements, Biology of Bone, and Principles and Methods of Research are the program’s seven required graduate core courses. These courses should be taken during the first year of graduate study. There is one upper division course, Selected Biomathematical Topics for Researchers in Medicine and Biology, which is required for completion of the degree. The program also offers a course in Communicating Scientific Information to better prepare the student in the preparation of scientific writing and communication. This course is also required.

Thesis Plan. The master’s thesis is intended to demonstrate the candidate’s ability to design and carry out a research project, and analyze and present the resulting data. Publishable scientific results are thus not required although the thesis must be prepared according to high standards of experimental design and data analysis. The subject of the thesis must be approved by the Graduate Adviser and by the faculty member who shall direct the work of the thesis. A committee shall consist of at least four faculty members (including at least one member from the faculty of the Section of Oral Biology), recommended by the Graduate Adviser and the student’s faculty sponsor, and appointed by the Dean of the Graduate Division. This committee shall pass upon the merits of the master’s thesis.

Thesis Proposal. Approximately on completion of course requirements, the candidate will prepare and send to his/her graduate committee a brief description of the proposed research project. This may also be done before completion of course requirements, if the student is ready. The proposal will be two or three pages in length, setting forth the general background for the project, and outlining the experiments to be performed and the expected method of analyzing the results. The committee will then discuss the proposal with the candidate and make suggestions.

Thesis. The thesis will be prepared in accordance with the requirements of the Graduate Division and the University Archivist. Some guidelines for the Oral Biology master’s thesis in particular are: The length will be typically thirty to fifty pages, doublespaced. An Abstract describes the work carried out in terms of specific experiments and general conclusions. The Introduction and Background states the problem in the context of previous work in the field, and reviews the related literature, with perhaps fifty or less references. The Materials and Methods section describes techniques and procedures used, in sufficient detail to permit another researcher to repeat the experiments. Results contains data collected in the course of experiments, presented in a logical sequence. This should include text, graphs, tables, or photographs, but a minimum of literature review of “splitting of fine hairs.” Discussion relates the work to other studies in the field, explains inconsistent results or unexpected findings, and perhaps suggests future experiments.

The thesis should be prepared mainly in consultation with the sponsor, although other committee members will be available for assistance. At least two weeks should be allowed between completion of thesis and termination from the program, to allow committee members to read and comment on the manuscript. Caution is advised about unexpected delays which often occur with preparation of illustrations, typing and proofreading, and making final revisions and corrections.

Time to Degree. The master’s degree in Oral Biology is a two-year program. The student can finish his/her required course in three quarters and begin on the research in the Summer Quarter. The student should be finished by the following summer. If a student comes into the program with a research project and knows exactly who he/she wants to collaborate with, it may be possible to complete the program in five quarters.

500 Series Course Limitations. Direct Individual Study or Research OB596 and Thesis Research and Preparation OB598 are required 500 series courses. The student is eligible to take two to eight units at a time on a Satisfactory(S)/Unsatisfactory(U) grading basis as many times as is needed. Only eight units of the 500 series may be applied toward the total course requirement of which four of those units may be applied toward the minimum graduate course requirement.

Teaching Experience. Teaching experience is not required for the master’s degree.

Disqualification and Appeal of Disqualification. Recommendations for termination of students on probation, or students admitted provisionally, or others who are not making sufficient progress toward the degree may be made in the following way: the Program Chairperson may recommend termination of a student by submitting a written statement to the Department Chairperson (who is also Dean, School of Dentistry) setting forth the reasons for the recommendation. The student will be asked to withdraw from the program for cause.

Such students may petition, stating in writing his/her basis for the appeal of disqualification, to have their situation reviewed by a faculty Review Committee. In all cases the Review Committee will consist of three members. One member will be the student’s principal adviser, one will be appointed by the Department Chairperson, and one by the student. If the student does not have a principal adviser, the Department Chairperson will appoint two members.

The Committee will review the formal record of the student, and in every case, conduct a personal interview with the student. Its recommendations will be communicated in writing to the Department Chairperson with a copy to the student and the Program Chairperson. These recommendations should be specific, including (but not limited to) recommendation for leave of absence for a specified period of time for the purpose of removing incomplete grades, or reviewing academic goals, etc.; continuance as a registered student in the program for a specified period of time with expectations of the committee clearly stated; or termination. Leaves of absence will be granted to students on academic probation only by special petition to the Dean of the Graduate Division.

Other Relevant Information. The master’s degree in Oral Biology has been structured so that students pursuing a dental degree or certificate in the UCLA School of Dentistry have an opportunity to participate in the program. These students must submit a separate application to Graduate Admissions.

Graduate Courses

202. Principles and Methods of Research. One hour lecture and three hours of lab per week. This course is designed to familiarize the student with the experimental method and its application to basic and applied research. It will include experimental method and design and interpretation of data. The student will be exposed to research instrumentation and the advantages and limitations of various investigative tools.

Mr. Jungle and the Staff

M203. Oral Embryology. (Same as Anatomy M203.) Four hours per week in the Spring Quarter. A course of lectures and laboratory instruction in the development and histological structure of the facial region and the oral and perivascular organs and tissues.

Mr. Bernard and the Staff
204. Flora of the Human Mouth. (½ course) Two hours lecture and discussion per week. Required for Oral Biology majors students. An examination of the major bacterial, fungal and viral residents of the oral cavity with emphasis on determinants of habitat and other ecologically relevant topics. Host–mediated parameters which regulate various aspects of the oral ecosystem are also emphasized, e.g. salivary constituents and mechanisms leading to specific surface interactions. Offered Spring Quarter. Mr. C. K. Franker

M205. Oral Physiology. (Same as Physiology M203.) Lecture, one hour; discussion, one hour. The organ-level and cellular physiology of the following systems will be discussed, in a somewhat flexible framework: (1) Salivary glands, including the mechanisms of secretion, abnormalities such as Mikulicz-Sjögren syndrome, and effects on the dentition, (2) Dental pulp: development, normal physiology, and repair, (3) Mechanisms of secretion, receptors, pathways, and central projections, (4) Dental pain mechanisms, hydrodynamic theory and electrical recordings from dentin, (5) Taste mechanisms: Mechanisms of perception of four basic tastes, alterations of taste caused by drugs, diseases and aging, (6) Oral touch and temperature receptors: comparison with similar systems in the skin, assessment of sensory dysfunction, (7) Speech: phonation, resonance and articulation in speech production, normal time-course of development of various sounds in children. Classes to be supplemented with audio-visual materials and many references from the literature. To be offered Fall Quarter. Mr. Junge

M206. Secretory and Gastrointestinal Immunology. (Same as Microbiology and Immunology M206.) Lecture, two hours. The anatomy and physiology of the oral cavity, the intestines, and the related lymphatic systems will be discussed, in a somewhat flexible framework: (1) Salivary glands, including the mechanisms of secretion, abnormalities such as Mikulicz-Sjögren syndrome, and effects on the dentition, (2) Dental pulp: development, normal physiology, and repair, (3) Mechanisms of secretion, receptors, pathways, and central projections, (4) Dental pain mechanisms, hydrodynamic theory and electrical recordings from dentin, (5) Taste mechanisms: Mechanisms of perception of four basic tastes, alterations of taste caused by drugs, diseases and aging, (6) Oral touch and temperature receptors: comparison with similar systems in the skin, assessment of sensory dysfunction, (7) Speech: phonation, resonance and articulation in speech production, normal time-course of development of various sounds in children. Classes to be supplemented with audio-visual materials and many references from the literature. To be offered Fall Quarter. Mr. Junge

M207A. Brainstem Control of Rhythmic Movements. (Same as Anatomy M226A and Kinesiology M243A.) Lecture, two hours. Discussion of the central nervous system mechanisms which coordinate and control the contraction patterns of the muscles which are involved in movement such as sucking, chewing, swallowing, speech, respiration and locomotion. Emphasis on the interaction among brain stem reflexes, pattern generators and “voluntary” control centers. To be offered in the Fall Quarter. Mr. Riviere

M207B. Brainstem Control of Rhythmic Movements. (Same as Anatomy M226B and Kinesiology M243B.) Lecture, two hours. Prerequisite: course M207A or Anatomy M226A or Kinesiology M243A. For description, see Oral Biology M207A. Mr. Goldberg, Mr. Chandler

M210. The Biochemistry of Saliva and Dental Caries (½ course) Lecture, two hours. This course will be developed into a seminar in which current research in the field of saliva biochemistry and its relationship to the development of dental caries will be discussed. Each student will be expected to present a current article for discussion. To be offered in the Winter Quarter. Mr. Wolinsky

212. Current Views on the Neuronal Control of Jaw Movement. (¼ course) This seminar involves discussion and evaluation of recent papers concerning motor control of the jaw. Mr. Goldberg

M214. Biology of Bone. (½ course) (Same as Anatomy M225.) Two hours of lecture and one hour of discussion per week in the Winter Quarter. Prerequisite: consent of instructor. Embryology of bone tissue; bone as an organ; growth and development of specific bones; biochemistry and physiology of bone; remodeling of bone; crystallography of hydroxyapatite; pathological calcifications; pathology of bone; mechanisms and lineage of a calcification; clinical correlations. Mr. Bernard

215. Genetics in Dentistry. (½ course) Two hours of lecture per week. This course includes molecular and cytologic basis of inheritance, human cytogenetics, mendelian genetics and polygenic modes of inheritance, inborn errors of metabolism, genetic diseases affecting the oral facial area, and recent advances, i.e., amniccentesis, linkage, and cell hybridization. Mr. Stewart

216. Biological Electron Microscopy in Dental Research. (¼ course) Prerequisite: consent of instructor. A review of the application of electron microscopy to hard and soft tissues of the oral-facial region. Emphasis given to oral health problems. Course content adapted to special interests of the participants. Mr. Dixon

218A. Oral Pathology. (¼ course) Two hours of lecture per week. This course encompasses the embryology, cell biology, histopathology, histophysiology, and symptoms of oral pathologic condition of local and systemic origin. The course consists of lectures, demonstrations (laboratory tests), and microscopy dealing with the developmental, inflammatory, neoplastic, metabolic, degenerative diseases and physical injuries and healing of wounds. The Staff

223. Oral Immunopathology. (¼ course) Prerequisite: consent of instructor. This seminar will evaluate the involvement of immunological phenomena in the pathogenesis of oral diseases such as dental caries, periodontal disease, oral ulceration, and hypersensitivity reactions. Alterations of the immune system which affect the oral cavity will also be discussed. Mr. Riviere

M224A-M224B. Structure and Chemistry of Connective Tissue. (½ course each) (Same as Anatomy M224A-M224B.) Two hours of discussion per week in the Fall and Winter Quarters. Prerequisites: histology, biochemistry. A seminar course designed for graduate students in dentistry, medicine, or basic science. Fundamental information on the line structure and chemical composition of bone, dentin, cartilage, cartilage and cells of connective tissue in general, as well as enamel with emphasis on the biochemical synthesis of collagen, noncollagenous proteins and glycoproteins, and glycosaminoglycans (mucopolysaccharides). The possible roles of the cellular and non-cellular elements in the process of biological mineralization and correlation of biological processes to periodontal pathology. In-Progress grading. Mr. Weinstock

225. Gross Postnatal Craniofacial Growth and Development. (½ course) This seminar is designed primarily to develop a critical sense in the evaluation of the research literature and an appreciation of the dynamic complexity of postnatal craniofacial growth. At each session students will present reviews of critiques of original articles. This will be followed by group discussion. Specific aspects of the following topics on growth of bone and bones will be considered in detail: Historical review; modes of growth; general and craniofacial (mandible, midsagittal, cranium) growth; methods of assessing; factors affecting; and conflicting hypotheses. The student will be encouraged to pursue his particular interest.

226. Physiology of Nerve Cells. (¼ course) Covers basic mechanisms determining resting and action potentials in neurons, and mechanism of action of local anesthetics. Concepts of ionic channels common to a variety of membranes including secretory and osteogenic, will be illustrated with some numerical problems. Test. Mr. Junge: 1976. Nerve and Muscle Excitation. Mr. Junge

227. Dental Embryology and Histology. (¼ course) The student will be able to describe and interpret important stages in the development of the orofacial apparatus and histological features of its component tissues. The student will be able to critique scientific literature relevant to the course content and will analyze the current state of our knowledge about selected features of the orofacial apparatus which are of significance to the clinical dental specialist. Mr. Dixon

228. Dental Therapeutics. (¼ course) Lecture, two hours. A course of lecture/seminar sessions consisting of detailed descriptions of specific therapeutic agents used by dentists. The compounds and preparation available within each class of agents will be described, their basic pharmacology reviewed, dosages and schedules of administration analyzed, and indications and contraindications for their use discussed. For each agent, possible adverse reactions and interactions with other drugs will be emphasized. Mr. Hume

M229. Major Concepts in Oncology. (Same as Microbiology M229, Microbiology and Immunology M239 and Pathology M293.) Lecture, three hours. Prerequisite: Graduate Standing or consent of instructor. Course designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis, cell cycle control, cell cycle, growth control; physical, chemical and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy and chemotherapy. Mr. Baluda and the Staff

495. Communicating Scientific Information. (½ course) Two hours of lecture and laboratory per week. This course is designed to enhance the preparation of the student for university teaching and to provide an opportunity to study the problems and methodologies associated with instruction in professional schools. S/U grading only. Mr. Bjork

Individual Study and Research

596. Directed Individual Study or Research. (½ to 1 course) Graded S/U. The Staff

598. Thesis Research and Preparation. (½ to 1 course) Graded S/U. The Staff
Oriental Languages

(Department Office, 222 Royce Hall)
Hartmut E. F. Scharfe, Ph.D., Professor of Indic Studies (Chair of the Department).
Ensho Ashikaga, M.Litt., Giko, Emeritus Professor of Oriental Languages.
Kenneth K. S. Chen, Ph.D., Emeritus Professor of Oriental Languages.
Kan Lao, B.A., Academician, Emeritus Professor of Oriental Languages.
Richard C. Rudolph, Ph.D., Emeritus Professor of Oriental Languages.
Ben Befu, Ph.D., Associate Professor of Oriental Languages.
Hung-hsiang Chou, Ph.D., Associate Professor of Oriental Languages.
Robert C. Epp, Ph.D., Associate Professor of Oriental Languages.
E. Perry Link, Jr., Ph.D., Associate Professor of Oriental Languages.
Herbert E. Plaintchow, Ph.D., Associate Professor of Oriental Languages.
Shirleen S. Wong, Ph.D., Associate Professor of Oriental Languages.
William R. LaFleur, Ph.D., Assistant Professor of Oriental Languages.
Richard E. Strassberg, Ph.D., Assistant Professor of Oriental Languages.

Y. C. Chu, M.A., Lecturer in Chinese.
Kuo-yi Pao (Unensei.co), M.A., M.S., Lecturer in Oriental Languages.
Hanna-Peter Schmidt, Ph.D., Professor of Indo-Iranian Studies.
George Takahashi, M.A., Lecturer in Japanese.

The Master of Arts Degree

Admission Requirements. Students seeking admission to graduate status in Oriental Languages are expected to meet, in addition to general University requirements, not only the minimum requirements for the undergraduate major, but in addition, a minimum of three courses in classical Chinese or Japanese at the upper division level. Students whose undergraduate preparation was not in the field of Oriental Languages will be admitted only if they can meet the departmental standards in linguistic competence and complete the minimum departmental requirements for the equivalent of a B.A. degree within the period of one year. Selection will be based on 1) prior scholastic performance (at the junior, senior and/or graduate levels), 2) recommendations by professors and others, 3) score on the Graduate Record Examination (Aptitude Test), and 4) degree of commitment to the field of study. Foreign students, furthermore, are required to attain a satisfactory score on the Test of English as a Foreign Language administered by the Educational Testing Service, and may be required to take English 106J (Advanced Composition for Foreign Students) and 106J (Introduction to Literature) beyond the minimum University requirements in English.

A brochure describing the Department can be obtained at the departmental office, 222 Royce Hall. No additional application forms are required by the Department besides those used by Graduate Admissions.

Advising. The Graduate Advisers are Prof. Perry Link (Chinese studies) and Prof. Ben Befu (Japanese studies).

Besides this formal advising, students are encouraged to consult with faculty members.

Academic progress will be monitored closely if a student's grade point average falls below 3.00; the progress of all graduate students will be evaluated at the end of the academic year at the meeting of the entire faculty of the Department.

Students are required to meet with their Graduate Adviser at least once every quarter to establish their study program and check their progress in it. Advisers keep short informal notes of these meetings. Departmental committees to administer the M.A. examination in Chinese and Japanese are established each year by the Chairperson of the Department.

Major Fields. The Department recognizes two fields of specialization at the M.A. level: Chinese language and literature and Japanese language and literature.

Foreign Language Requirements. Students majoring in Chinese will be required to present evidence of completion of one year of Japanese with a grade of B or better, and those majoring in Japanese will be required to present evidence of completion of one year of Chinese with a grade of B or better. This requirement need not be fulfilled before admission to the M.A. program.

Course Requirements. Total number of courses required for the degree: 11. Number of graduate courses required for the degree: 5. Required graduate course: For the Chinese major—O.L. 295 (Chinese Bibliography); For the Japanese major—O.L. 296 (Japanese Bibliography).

With the approval of the Department, up to two courses taken outside the Department will count toward the 11 courses but not toward the five graduate courses.

Thesis or Comprehensive Examination Plan. All students will take Comprehensive Examinations in the areas of Chinese or Japanese 1) language 2) literature and 3) civilization. These exams are given at the end of each quarter.

In addition, a brief research paper embodying the results of independent investigation will be required. The results of the examinations and the quality of the paper will determine whether the student will be permitted to enter the Ph.D. program.

Time to Degree. A full-time student with no deficiencies upon admission to graduate status and with a standard course load should be able to obtain his/her degree after seven quarters.

500 Series Course Limitations. 500 series courses do not count toward the number of required courses.

The Ph.D. Degree

Admission Requirements. The M.A. degree in the Department or its equivalent is required for admission to the doctoral program. A student admitted with an M.A. degree in Oriental Languages from another institution may be required to take supplementary courses before proceeding to the doctoral program. A student admitted with an M.A. degree in a field other than Oriental Languages must fulfill the course requirements for the M.A. degree. In either case, the student may be required to submit a brief research paper demonstrating his/her ability to conduct original research and his/her aptitude in communicating his/her findings.

A brochure describing the Department can be obtained at the departmental office, 222 Royce Hall.

Three letters of recommendations by professors and others are required.

No additional application forms are required by the Department besides those used by Graduate Admissions.

Advising. The Graduate Advisers are Prof. Perry Link Wong (Chinese studies) and Prof. Ben Befu (Japanese studies).

Personal advisers are assigned to new students at the time of admission; changes can be made for good reason.

The student's progress will be evaluated at the end of the academic year at a meeting of the entire faculty of the Department.

Students are required to meet with their advisers at least once every quarter to review their progress and plan their program; the Graduate Advisers keep short informal notes of these meetings.

A guidance committee consisting of three members, two of whom will be from the student's major language area and one from the minor language area, will be appointed for all entering doctoral level students. The student will select his/her fields of examination with the approval of this committee.

Major Fields or Subdisciplines. The Department recognizes three major fields at the Ph.D. level:

a. Chinese language and literature with the subdisciplines: poetry, drama, fiction and archaeological inscriptions.

b. Japanese language and literature with the subdisciplines: ancient, medieval, early modern and modern Japanese literature.

c. Buddhism with the subdisciplines: Chinese Buddhism and Japanese Buddhism.
Foreign Language Requirement. The student will demonstrate a reading knowledge of French and German by passing the Graduate School Foreign Language Test administered by the Educational Testing Service (minimum passing score: 500), or by successful completion of a level 5 course (with a grade of B or better). (With the approval of the Department, one of these languages may be substituted by another language or an additional year of Japanese for the Chinese major or Chinese for the Japanese major.)

Course Requirements. A minimum of five courses beyond the M.A. degree is required. In addition, students whose major field of interest is Chinese language and literature will present evidence of successful completion of three courses in modern Japanese at the intermediate level (19A-19B-19C) or higher; those whose major field of interest is Japanese language and literature will present evidence of successful completion of three courses in classical Chinese (13A-13B-13C) or higher. Those whose major field of interest is Buddhism must take five quarters of Sanskrit and, in addition, one quarter of Pali. A grade of B or better is required for all language courses.

Written and Oral Qualifying Examinations

The Language Examination: The student will take a language examination in his/her major language area well in advance of the Written Qualifying Examinations. The examination will consist of translations into English to test the student’s ability to render the language into English accurately and in an acceptable style.

Written Qualifying Examinations: The student will take three written examinations, as follows:

1. For the major in Chinese language and literature:
   a. A general examination in Chinese language and literature.
   b. An examination in poetry, drama, fiction or archaeological inscriptions.
   c. An examination in one of the following fields: Japanese language and literature, Buddhism (Chinese), Chinese archaeology (not open to those who offer archaeological inscriptions as a subfield) or a cognate field offered in another departmental or interdepartmental program in the Graduate Division and approved by the Department.

2. For the major in Japanese language and literature:
   b. An examination in ancient, medieval, early modern or modern Japanese literature.
   c. An examination in one of the following fields: Chinese language and literature, Buddhism (Japanese) or a cognate field offered in another department or interdepartmental program in the Graduate Division and approved by the Department.

3. For the major in Buddhism:
   a. A general examination in Buddhism.
   b. An examination in a specified subfield in Buddhism.
   c. A general examination in Chinese or Japanese language and literature or a cognate field.

All three examinations must be taken within four weeks. The student will take these Written Qualifying Examinations after satisfying all language and course requirements. With the approval of the Department, a student may repeat the examinations once only.

After successful completion of these examinations, the Chairperson of Department recommends the formation of a doctoral committee.

The Oral Qualifying Examination: The student must pass an Oral Qualifying Examination on the proposed dissertation topic and in appropriate related areas of study.

The Dissertation: The student will present a dissertation embodying the results of independent investigation. If the student changes his/her dissertation topic after being advanced to candidacy, he/she will be required to take written examinations in fields relevant to the new topic. Students who fail to meet the maximum time limit for the completion of the dissertation will be required to take the Written Qualifying Examinations again.

Time to Degree. From graduate admission to completion of the dissertation, the normative time-to-degree is 18 quarters (six years).

Final Oral Examination. A final oral defense of the dissertation will be optional at the discretion of the doctoral committee.

Candidate in Philosophy Degree. The Candidate in Philosophy Degree is available on advancement to candidacy.

Teaching Experience. Teaching experience is not a requirement for the master’s or doctoral degree.

Disqualification and Appeal of Disqualification. A student may be disqualified if his/her grade point average falls below 3.00 in upper division and graduate courses in the Department and such other courses deemed relevant. Failure for a student to make “normal progress” may also result in disqualification. With the approval of the Department, a student may repeat the Comprehensive/Qualifying Examinations once only. Failure in these exams on the second try will result in automatic disqualification. In all cases of disqualification, the decision will be made by the entire faculty.

Upper Division Courses

121A-121B-121C. Advanced Modern Chinese.
122A-122B. Readings in Modern Chinese Literature.
129. Introduction to Classical Japanese.
134A. Introduction to Kawabata Yasunari.
134B. Introduction to Mushakoji Saneatsu.
135. Buddhist Themes in Asian Literature.
137. Introduction to Kamakura and Other Literary Styles.
139. Introduction to Buddhist Texts.
140A-140B-140C. Chinese Literature in Translation.
142A. Readings in the Japanese Family System.
142B. Human Problems in the Modernization of Japan.
145. Readings in Modern Expository Japanese.
151A-151B. Readings in Traditional Chinese Fiction.
152A-152B. Readings in Classical Chinese Poetry.
153A. Kawabata’s Contemporaries.
153B. Introduction to Shiga Naoya.
154A-154B. Mongolian.
160. Elementary Sanskrit.
162. Advanced Sanskrit.
165. Readings in Sanskrit.
167. Introduction to Indic Philosophy.
170A-170B. Archaeology in Early and Modern China.
172. Introduction to Buddhism.
173. Chinese Buddhism.
175. The Structure of the Japanese Language.
179A. Readings in Medieval Japanese Literature.
179B. Readings in Edo Literature.
183. Introduction to Chinese Thought.
184. Introduction to Japanese Thought.
186. Chinese Etymology and Calligraphy.
189. Chinese Brush Painting.
199. Special Studies in Oriental Languages.

Graduate Courses

203A-203B. Chinese Philosophical Texts. May be repeated for credit with consent of instructor.
213. Chinese Buddhist Texts. May be repeated for credit with consent of instructor.
214. Chinese Buddhist Texts. May be repeated for credit with consent of instructor.
219. Modern Chinese Literature.
221A-221B. Introduction to Panini’s Grammar. Prerequisite: course 162 or equivalent. Reading of selected passages of the text with an introduction to Panini’s technique. Mr. Scharte
221A-221B. Introduction to Panini’s Grammar. Prerequisite: course 162 or equivalent. Reading of selected passages of the text with an introduction to Panini’s technique. Mr. Scharte
222A-M222B. Vedic. (Same as Near Eastern Languages (Iranian Section) M222A-M222B.) Prerequisites: a knowledge of Sanskrit equivalent to course 162, and consent of instructor. Characteristics of the Vedic dialect and readings in the Rig-Vedic hymns. M222B only may be repeated for credit. Mr. Schmidt
229A-229B. Japanese Buddhist Texts. May be repeated for credit with consent of instructor.

Mr. LaFleur

240. Advanced Chinese Classics. Reading and discussion of selected works in classical Chinese, including various types of historical narrations, with attention to stylistic features and historical development. May be repeated for credit with consent of instructor.

Ms. Wong

242A. Prose and poetry up to 1600. 242B. Prose and poetry from 1600 to 1668. May be repeated for credit with consent of instructor.

Mr. Befu

244. Seminar in Traditional Chinese Fiction and Drama. Prerequisites: reading knowledge of colloquial and literary Chinese. Seminar topics will alternate yearly between traditional fiction and drama with emphasis on generic, hermeneutical and historical approaches. Topics in fiction are chosen from narrative genres from the Chou through the Ching periods. Topics in drama will be chosen from tae-cho and ch'uan-ch'yi. May be repeated for credit with consent of instructor.

Mr. Strassberg

245. Seminar in Modern Japanese Literature. May be repeated for credit with consent of instructor.

The Staff

247. Selected Readings in Sanskrit Texts. May be repeated for credit with consent of instructor.

Mr. Scharfe

250. Seminar in Medieval Japanese Literature. Prerequisite: one-year course in classical Japanese. Selected readings in travel poetry, travel diaries and other genres of Japanese travel literature of the Heian, Kamakura, Nambokucho and Muromachi periods. May be repeated for credit with consent of instructor.

Mr. Plutschow

251. Seminar: Selected Topics in Modern Chinese Literature. Prerequisite: course 122A or 122B or consent of instructor. Selected readings in twentieth-century Chinese literature, emphasizing discussion of individual research projects. May be repeated for credit.

Mr. Link

252. Seminar: Selected Topics in Japanese Literature. May be repeated for credit.

Mr. Befu

253. Seminar: Selected Topics in Japanese Buddhism. May be repeated for credit.

Mr. LaFleur

255. Seminar in Medieval Japanese Literature. May be repeated for credit with consent of instructor.

The Staff

261A-261B. Seminar in Classical Chinese Poetry. Prerequisite: course 152A or 152B, or consent of instructor. 261A. Chinese poetry from the Shih-ching phase to the sixth century, with emphasis on the evolution of the lyric form during the Southern Dynasties (ca. 400-600). 261B. The development of shih and ch'i from the T'ang period (ca. 600-900) and onward; traditional and modern critical approaches to classical Chinese poetry. May be repeated for credit.

Ms. Wong

270. Seminar: Selected Topics in Chinese Archaeology. Prerequisite: course 170A or 170B, or consent of instructor. Discussion and research on major problems about Chinese archaeology and the different interpretations to the most important archaeologically linds, with emphasis on the studies of the Xia and Shang cultures and the Xia and Shang dynasties. May be repeated for credit.

Mr. Chou

271. Seminar: Selected Topics in Chinese Cultural History. Prerequisite: consent of instructor. Discussion and research on the major problems related to Chinese culture such as beginnings of the Chinese civilization and the Chinese dynastic history. Also other selected topics concerning the cultural developments of ancient and medieval China. May be repeated for credit.

Mr. Chou

285. Selected Topics in Buddhist Culture. May be repeated for credit with consent of instructor.

Mr. LaFleur

295. Bibliography and Methods of Research in Japanese. Required of all graduate students in Japanese. Lectures and discussion on the research methodology dealing with traditional Chinese materials, with emphasis on bibliography training (including the most up-to-date indexes in Chinese studies), punctuation practice, knowledge of textual criticism and rare book editions.

Mr. Chou

Mr. Befu

Professional Courses

301. Teaching an Oriental Language as a Foreign Language.

The Staff

Individual Study and Research

All of these courses will be graded S/U. A student may repeat these courses with consent of instructor. Some of these courses may apply toward the minimum course requirement for the M.A.

501. Cooperative Program. (½ to 2 courses) Prerequisites: approval of the Graduate Adviser and Graduate Dean. Approval of host campus Instructor, Department Chairman and Graduate Dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. To be graded S/U.

598. Directed Individual Studies. (1 to 3 courses)

The Staff

599. Preparation for the Comprehensive Examination for the M.A. or the Qualifying Examination for the Ph.D.

The Staff

599. Research and Preparation of the Doctoral Dissertation. (1 to 3 courses)

The Staff

Related Courses in Other Departments

Anthropology 166. Comparative Minority Relations.

English 100A. Introduction to Poetry.

140. Criticism

201. Approaches to Literary Criticism.

Pathology

(Staff Office, 13-267 Center for the Health Sciences)

Marcel A. Batuda, Ph.D., Professor of Pathology.

Luisio S. Barajas, M.D., Professor of Pathology in Residence.

W. Jann Brown, M.D., Professor of Pathology and Psychiatry.

Alistai J. Cochran, M.D., Professor of Pathology.

Walter F. Coulsuge, M.D., Professor of Pathology (Vice-Chairman of the Department).

Robert Y. Foos, M.D., Professor of Pathology.

Hideo O. Ubaashi, M.D., Professor of Pathology and Neurology in Residence.

Harrison Latta, M.D., Professor of Pathology.

Michael Lubran, M.D., Ph.D., Professor of Pathology in Residence.

William J. Martin, Ph.D., Professor of Pathology in Residence.

Byron A. Myrie, M.D., Ph.D., Professor of Pathology in Residence.

Donald E. Paglia, M.D., Professor of Pathology.

David D. Porter, M.D., Professor of Pathology.

Denis O. Roddinger, Ph.D., Professor of Pathology in Residence.

George S. Smith, M.D., Professor of Pathology.

Julian L. Van Lancker, M.D., Professor of Pathology (Chairman of the Department).

M. Anthony Verty, M.D., Professor of Pathology.

Jerry Waisman, M.D., Professor of Pathology.

Roy L. Walford, M.D., Professor of Pathology.
Admission to the Doctoral Program. Students intending to take advanced degrees in the Department of Pathology must have a bachelor’s degree in physical or biological sciences or in the premedical curriculum. M.D. s are also encouraged to apply. Minimum course requirements for admission normally include one year of calculus, one year of physics, one year of general chemistry, one year of organic chemistry, and one year of biological sciences. Physical chemistry, a course in molecular biology, and a course in histology are also strongly recommended. In some cases, deficiencies in the prerequisite may be fulfilled in the first year of study.

Foreign Language Requirement. There is no language requirement for admission to or completion of the Pathology program.

Course Requirements. The following courses are required: Pathology 231A, 242A, 242B, 242C, 244, 250, 251, and Biomechanics 170A. In addition, students beginning the program with a bachelor’s degree select 40 units from remaining Pathology courses and related biomedical areas of interest at the upper division or graduate level. Students entering the program with a master’s degree or M.D. may have fewer elective units to complete toward the Ph.D.

Written and Oral Qualifying Examinations. After the core course requirements are completed, usually at the end of the second year, a comprehensive Written Qualifying Examination covering general knowledge is administered by the departmental staff. It is given as a 6-hour written examination; if evaluators feel that some questions should be elaborated on orally, students will do this within three months of the written examination. If failed, the examination may be repeated once. Six months to one year after the written examination, an Oral Qualifying Examination is administered by the student’s doctoral committee. This examination normally includes defense of the subject matter of the proposed dissertation topic. Each student will be expected to have done preliminary work before the examination. Candidates must demonstrate a wide and comprehensive knowledge of their special subject. Upon passing, the student will advance to candidacy.

Doctoral Committee. The doctoral committee is formed according to the conditions set by the Graduate Council.

Time to Degree. From admission to Written Qualifying Examination: six quarters. From Written Qualifying Examination to approval of prospectus and Oral Qualifying Examinations: two quarters. From advancement to candidacy to Final Oral Examination: three to six quarters. From graduate admission to awarding of degree: 12 to 15 quarters.

Final Oral Examination. All candidates are required to defend their dissertation at an oral open to the public. The purpose of the dissertation is to demonstrate ability for independent investigation and proficiency in the field.

Teaching Experience. Students must act as teaching assistants for one quarter in medical or dental student pathology courses.

Disqualification and Appeal. Students not obtaining at least a 3.0 average in more than one quarter will be terminated. Failing the Written or Oral Qualifying Examination twice also leads to disqualification. The student may appeal by letter to the graduate committee.

Additional Information. Students are generally accepted into the program for the purpose of obtaining a Ph.D. in Experimental Pathology. However, the Department has also been approved to award a master’s degree in Experimental Pathology. This has been reserved for cases in which a student was unable to finish the Ph.D. program but whose completed work was adequate to the standards and minimum requirements set for a master’s degree.

The general requirements for the M.S. degree are the same as those for the Ph.D., with the following exceptions:

1. Only 30 units of the listed electives are required in addition to the core courses.
2. The student will also be expected to enroll in a minimum of 8 units of 599 each quarter starting in the third year. These do not count toward the minimum course requirements for the degree.
3. The Written and Oral Qualifying Examinations taken on the same schedule as for the Ph.D. The student must pass the Written Qualifying Examination at the master’s level. The Oral Qualifying Examination acts as the Comprehensive Examination. A thesis is also required which encompasses individual research done by the student.

Graduate Courses

200A. Dental Pathology. (4 course) Prerequisite: consent of instructor. Course of Pathology for Dental Students emphasizing the fundamental causes of disease processes, using as examples selected lesions or diseases of major organ systems.

Mr. Fos and the Staff

M215. Interdepartment Course in Tropical Medicine. (4 course) Same as Microbiology and Immunology M215. Medicine. M215 and Pediatrics M215.) Prerequisites: basic course in microbiology and parasitology or infectious diseases in the schools of medicine or public health. The course draws upon expertise in the Departments of Medicine, Pediatrics, Pathology and Microbiology and Immunology to present current knowledge about diseases prevalent in tropical areas of the world. Lectures demonstrations and audiovisual materials will be used to describe diseases which are prevalent in or localized to certain geographic areas. Although major emphasis will be in infectious diseases, problems in nutrition and exotic non-infectious diseases will be covered. A syllabus will supplement the topics covered in the classroom. Graded S/U.

The Staff
231A. Pathological Anatomy and Physiology. (1½ courses) Lecture, two hours; discussion, six hours; laboratory, four hours; other, six hours. Prerequisites: Graduate Standing and completion of curriculum satisfying basic requirements for study of human pathology. Lectures, demonstrations and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodalchrome photomicrographs and projection of microslides will be presented. Concentration will be in the area of General Pathology. Mr. Verity and the Staff 231B-231C. Pathophysiology of Disease. Prerequisites: course 200A, Graduate Standing and completion of curriculum satisfying basic requirements for study of human pathology. Lectures, demonstrations and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodalchrome photomicrographs and projection of microslides will be presented. The major disease states are presented using an interdepartmental approach as manifestations of pathophysiologic processes rather than as isolated entities. This course is offered on an in-Progress basis which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for all quarters of work. Mr. Lewin and the Staff 232. Topics in Vertebrate Neurobiology. (½ course) An introduction to the cell biology of the vertebral central nervous system with special reference to its development, structure, and potential disease processes. The Staff 235A-235B. Regulation of Gene Expression in Mammalian Cells. (½ course each) Prerequisite: consent of instructor. Description of intracellular information flow in mammalian cells by stimuli of different natures as well as induced changes such as induction, repression, differentiation and neoplastic transformation will be analyzed. Use of culture models and their biopathologic implications will be stressed. To be offered alternate years. 235A, Fall Quarter, and 235B, Winter Quarter. The Staff 235A. M240. Immunopathology. (½ course) (Same as Medicine M240.) Lecture, two hours per week. Prerequisites: Immunology course and consent of instructor. Study of the role of immunologic phenomena in the production of lesions and disease. Topics will include immune complex disease, antitussis antibody, immunologic mediators, cell-mediated immunity, and infectious diseases. Mr. Glassock and Mr. Porter 242A. Molecular Mechanisms in Disease. (½ course) Prerequisites: course 231A, consent of instructor. The course concerns itself with a description of molecular events resulting from administration of injurious chemical and physical agents (u.v., x-rays, carcinogens, toxins, etc.) and from reactions to injuries (e.g., necrosis, degeneration, hyperplasia, neoplasia, inflammation, etc.); and also with an interpretation of structural and functional disturbances in terms of the molecular alterations. Mr. Van Lancker and the Staff 242B. Molecular Mechanisms in Disease. (½ course) Prerequisites: course 242 or 242A; consent of instructor. This course is a continuation of Pathology 242A, both of which concern themselves with descriptions of molecular events resulting from administration of injurious chemical and physical agents (u.v., x-rays, carcinogens, toxins, etc.) and from reactions to injuries (e.g., necrosis, degeneration, hyperplasia, neoplasia, inflammation, etc.); and also with an interpretation of structural and functional disturbances in terms of molecular alterations. Mr. Van Lancker and the Staff 242C. Molecular Mechanisms of Disease. Prerequisite: consent of instructor. This course is part of Molecular Mechanisms of Disease (A, B, D) and will cover aspects of neoplasia in relation to alterations in the control of cell growth, chemical carcinogenesis and the biology of cancer. Mr. Moyer and the Staff 244. Electron Microscopy in Experimental Pathology. (¾ course) Prerequisite: consent of instructor. Ultrastructural aspects of pathology including introduction to use of modern methods of electron microscopy in pathological studies, essentials of normal ultrastructure and ultrastructural phenomena in general pathology. Mr. Berliner and Mr. Zamboni 245. Environmental Pathology. Prerequisites: Graduate Standing and consent of instructor. This course is designed to explore the interrelationships of man with his total environment. A series of special topics will be presented to discuss the effect on man of changes in the compositions of air, water, soil and other materials. Graded S/U. Mr. O'Donnell and the Staff 250A-250B-250C. Pathology Graduate Student Seminar. Prerequisite: open only to students in experimental pathology. Required for all pathology graduate students. Review and discussion of current literature and research in special topics of experimental pathology. The Staff 251. Pathology Graduate Student Laboratory Seminar. Prerequisite: consent of instructor. The course consists of ten, two-hour seminars which may include demonstrations of apparatus and methods dealing with new and advanced experimental techniques of value in experimental pathology. The seminars will be conducted by pathology department staff and guest lecturers. Subjects covered will include the biochemistry, biological and morphological techniques in tissue fractionation, tissue culture and autoradiography (electron microscopy, etc.) that are frequently in the study of disease mechanisms. Mr. Lubran and Mr. Rodgerson 253. Free Radical Pathology. (½ course) Lecture, four and one half hours per week. Prerequisites: basic Biochemistry, Physical Chemistry. Free radicals, mechanisms of formation, properties and reactions. Their reactions with significant biomolecules. Modes of production in vivo. Reactions in vivo. Protection against and sensitization towards these damaging effects. Mr. Glassock 256. Seminar in Viral Oncology. (½ course) (Same as Microbiology and Immunology M256.) An advanced research seminar designed to consider the current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation. The Staff 257. Introduction to Toxicology. Lecture, four hours. Prerequisite: Pharmacology 241 or consent of instructor. Biochemical and systemic toxicology, basic mechanisms of toxicology and the interaction of toxic agents with specific organ systems. Mr. Taylor 258. Pathologic Changes in Toxicology. (Same as Pharmacology M258.) This course is designed to give students experience in learning the normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues. Liver, bladder, lung, kidney, nervous system and vascular system will be covered. Ms. Berliner 260. Quantitative Approaches to Microscopic Anatomy. (½ course) Lecture, two hours per week. Prerequisite: consent of instructor. Practical and theoretical approaches in the application of measurement to anatomical structures. General principles of estimation of volume, surface area and number will be covered by stereology and other techniques. Ms. Berliner 293. Major Concepts in Oncology. (Same as Microbiology M293, Dentistry/Oral Biology M293, and Microbiology and Immunology M293.) Prerequisite: Graduate Standing or consent of instructor. Course designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology; genetics; membranes, macromolecular synthesis and control, cell cycle, growth control; physical, chemical and viral oncogenesis; epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy and chemotherapy. Mr. Baluda 595. Directed Individual Study or Research. (1 to 3 courses) Individual research with members of our staff or of other departments, the latter for the purpose of supplementing programs available in our department. Graded S/U. 597. Preparation for Qualifying Exams. (½ to 2 courses) Prerequisite: one year of course work in pathology. Individual study for qualifying exam. Graded S/U. The Staff 599. Preparation of Doctoral Dissertation. (½ to 2 courses) Prerequisites: completion of qualifying exam and most of doctoral research. Completion and writing of thesis. Graded S/U. The Staff Pharmacology (Department Office, 23-278 Center for the Health Sciences) 16Donald J. Bevan, B.S., M.B., B.S., Professor of Pharmacology. 16Arthur K. Cho, Ph.D., Professor of Pharmacology. (Vice Chairman of the Department). 16Robert George, Ph.D., Professor of Pharmacology. 16Donald J. Jenden, B.S.C., M.B., B.S., Professor of Pharmacology and Biomathematics (Chairman of the Department). 16Peter Lomax, M.D., D.Sc., Professor of Pharmacology. 16Dermot B. Taylor, M.A., M.D., Professor of Pharmacology. 16Jerome H. Thompson, M.D., F.R.C.P.I., Professor of Pharmacology. 16Rosemary D. Bevan, M.D., Adjunct Associate Professor of Pharmacology. 16Jorge R. Barrio, Ph.D., Associate Professor of Pharmacology and Radiological Sciences. 16Don H. Catlin, M.D., Associate Professor of Pharmacology and Radiological Sciences. 16Matthew E. Connolly, M.D., Associate Professor of Pharmacology and Medicine. 16M. David Fairchild, Ph.D., Adjunct Associate Professor of Pharmacology. 16Sherrel G. Batcher, Ph.D., Assistant Professor of Pharmacology and Psychiatry. 16R. Craig Kammerer, Ph.D., Assistant Professor of Pharmacology. 16Larry A. Wheeler, Ph.D., Adjunct Assistant Professor of Pharmacology. 16Il Jin Bak, Ph.D., D.D.S., Adjunct Associate Professor of Neurology and Pharmacology. 16Robert O. Bauer, M.D., Professor of Anesthesiology, Obstetrics and Gynecology and Pharmacology. 16Joseph H. Beckerman, Pharm.D., Lecturer in Pharmacology. 16Yi-Han Chang, Ph.D., Adjunct Associate Professor of Medicine and Pharmacology. 16Werner E. Flacke, M.D., Professor of Anesthesiology and Pharmacology.
The Ph.D. Degree

Admission Requirements. In addition to meeting the requirements of the Graduate Division, the student must have received the bachelor's degree in a biological or physical science or in the premedical curriculum.

In suitable cases, students who have course deficiencies may be admitted to graduate status, but any deficiencies will have to be removed within a specified time. Graduate Record Examination scores are required of all applicants to the Department as well as three (3) letters of recommendation. Applications are accepted for the Fall Quarter only. The Departmental Graduate Training Committee (three faculty members) is solely responsible for the selection of new students. Interviews may be requested by the Graduate Training Committee.

Prospective students may write for a departmental brochure to the following address: Graduate Student Office, Department of Pharmacology, UCLA School of Medicine, Los Angeles, California 90024, (213) 825-6567.

Advising. Address: Dr. Arthur K. Cho, Graduate Adviser, Department of Pharmacology, UCLA School of Medicine, Los Angeles, California 90024, (213) 825-6567.

Dr. Cho is the Graduate Adviser for all entering graduate students and for students in their first and second year of study. Each student must select his/her major professor by the end of the second year (sixth quarter).

Evaluation of the student's progress is determined by a series of tests (see section on Written and Oral Qualifying Examinations). In the Pharmacology 200 course (Laboratory Rotation), a written report must be submitted by the student to his/her supervisor and to the Graduate Training Committee. Transcripts from each quarter are circulated to the Graduate Training Committee and any student that appears not to be doing satisfactorily is notified.

Each new student meets with the Graduate Adviser at least once every quarter and as often as necessary during the quarter. A guidance committee is selected by the student pending approval by the Graduate Training Committee and the Department Chairperson.

Admission to the Doctoral Program. There are no specific requirements for admission to the doctoral program. Completion of the master's degree is not required.

Major Fields or Subdisciplines. Cardiovascular Pharmacology; Chemical Pharmacology; Clinical Pharmacology; Immunopharmacology; Neuroendocrine Pharmacology; Neuropharmacology; Psychopharmacology.

Foreign Language Requirement. There is no foreign language requirement for the Ph.D. degree.

Course Requirements

Courses Required: Biological Chemistry 101-A,B,C; or Biological Chemistry 201-A,B; Biological Chemistry 101C; Pharmacology 200 (Introduction to Laboratory Research)—three quarters; Pharmacology 201 (Principles of Pharmacology and Toxicology); Pharmacology 202-A,B (Clinical Pharmacology); Pharmacology 212-A,B (Graduate Commentary—Clinical Pharmacology); Pharmacology 234-A,B,C (Experimental Methods in Pharmacology); Pharmacology 237-A,B,C (Neurotransmission); Pharmacology 241 (Introduction to Chemical Pharmacology); Pharmacology 251 (Seminar in Pharmacology)—must be taken every quarter; Pharmacology 291 (Selected Topics in Pharmacology)—three quarters (or alternative courses); Physiology 101; Physiology 102; Physiology 103; One course in Biostatistics.

All coursework should be completed by the end of the sixth quarter prior to taking the Departmental Comprehensive Examinations.

Student Rotation. The Pharmacology Department has provided a system of laboratory rotations (Pharmacology 200) in order to familiarize the student with a variety of pharmacological research areas and techniques. During the first six quarters the student is in the Department, he/she will participate in projects of his/her choosing. If possible, two of these will be during the regular academic year and the third will be during the summer. He/she will also become familiar with the literature relevant to the various research projects, and thus establish a basis for the selection of his/her own research area. Those students who have already chosen a research area at the time they enter the Department may benefit by choosing to work in the related laboratory during the summer prior to entry into the Department. This would provide an uninterrupted period of over two months to work on a research project. The student must submit to the Graduate Training Committee a report of his/her activities in the various research groups by the end of the quarter. The report should include:

1. The nature of the project.
2. How the student participated.
3. The results obtained.
4. Critical evaluation of the project.

Written and Oral Qualifying Examinations

Examinations in Pharmacology 'Core' Courses. Examinations are given in all courses except seminars and research. These are in the form of written examinations, oral examinations, term papers and/or laboratory practicals. The course instructor reserves the right to dictate the form and content of the examinations.

Departmental Comprehensive Examination. Upon the completion of the first two years of study, each student will be required to take a Departmental Comprehensive Examination consisting of a written part and an oral part. The student will then be recommended:

a) For continuation of his/her studies towards the Ph.D. degree.

b) For further remedial study.

Oral Qualifying Examination. After passing the Departmental Comprehensive Examination, the student must take the Oral Qualifying Examination within 18 months. This oral examination is administered by the doctoral guidance committee which the student helps to select.

The student may be asked any question of pharmacological relevance; however, most questions will concentrate on the background literature, experimental methods, and implications of his/her field of interest and dissertation project. When the student passes this examination, he/she is eligible to petition the Graduate Division for advancement to doctoral candidacy.

Final Oral Examination. The Guidance Committee may administer (and usually does) a Final Oral Examination after the student has submitted his/her dissertation (Defense of Dissertation).

Credit by Examination. Graduate students may arrange to take courses for credit by examination. Up to three (3) courses of credit may be earned in this manner. Approvals must be obtained from the course instructor, the Department, and the Dean of the Graduate Division.

Students not passing any of the above required examinations may be reexamined at a later date determined by the Guidance Committee.
Graduate Courses

200. Introduction to Laboratory Research. (½ to 1 course) Prerequisite: consent of instructor. Individual projects in laboratory research for beginning graduate students. The end of each quarter the student will submit to his/her supervisor a report covering the research performed. Pharmacology graduate students must take this course three times during their first two years in residence. The Staff

201. Principles of Pharmacology. Prerequisites: Mammalian Physiology and Biochemistry. A systematic consideration of the principles governing the interaction between drugs and biological systems, and of the principal groups of drugs used in therapeutics. Particular attention is focused on the modes of action, pharmacokinetics and disposition to provide a scientific basis for their rational use in medicine.

Mr. Bevan in charge

202A-202B. Clinical Pharmacology. (2 courses) A series of lectures and case presentations designed to illustrate the principles of pharmacology in a clinical context, and the solution of problems of practical therapeutics by reference to pharmacokinetics, mechanisms of action and disposition of drugs.

Mr. Conolly in charge

212A-212B. Graduate Commentary: Clinical Pharmacology. (½ course each) Prerequisites: Mammalian Physiology and Biochemistry. A supplementation of topics covered in Pharmacology 202A and 202B. Primarily for graduate students.

Mr. Conolly

234A-234B-234C. Experimental Methods in Pharmacology. (½ course each) Prerequisite: consent of instructor. A survey of experimental methods and instrumentation used in the analysis, identification, and study of mechanisms of action of pharmacologically active compounds. Mr. Chang, Mr. Cho, Mr. George

236. Neuropharmacology. Prerequisite: neurophysiology. Advanced neuropharmacology, including actions and modes of action of drugs acting on the central nervous system, interactions between drugs and nervous tissue, movements of drugs through the blood brain barrier, and distribution to the central nervous system, problems of central transmission.

Mr. George

237A-237B-237C. Neurotransmission. Prerequisites: courses 241, 234A-234B-234C. Consent of instructor. A detailed examination of neurochemical transmission, dealing in particular with the cholinergic and adrenergic transmission mechanisms and pharmacological agents that affect them. The evidence for mechanisms involving other possible transmitters will also be critically examined.

Mr. Bevan, Mr. George, Mr. Jenden

239. Behavioral Toxicology. Prerequisite: consent of instructor. Lectures and discussions designed to examine effects of exposures to a wide variety of chemical and physical agents on behavior of the total organism as it adjusts to changes in its physical and social environments. Such effects may be reflected as subtle disturbances of behavior before classic symptoms of toxic states become apparent. Consideration will be given to methodologies by which such disturbances may be measured, to the state of present knowledge, and to application of the knowledge in regulating risks of both pre- and post-natal exposure. Particular emphasis will be placed on the relevance of this knowledge to human behavior. Mr. Russell

250. Psychopharmacology. (Same as Psychiatry M239.) Prerequisite: consent of instructor. A presentation of the effects of drugs upon behavior with special attention to drugs used in psychiatry and drug seeking behavior. Physiological and biochemical mechanisms underlying such actions will be analyzed. Reports on relevant current research will be made.

Mr. George, Mr. Jarvik

241. Introduction to Chemical Pharmacology. Prerequisite: Organic and Biological Chemistry. Introduction to general principles of pharmacology. The role of chemical properties of drugs in their distribution, metabolism and excretion.

Mr. Cho

251. Seminar in Pharmacology. (½ course each) Seminars presented by students, faculty, and guest lecturers on a variety of topics.

Mr. Baker

253. Seminar in Environmental Toxicology (½ course) Prerequisite: consent of instructor. Oral reports and discussions of current research on chemical pollutants in the environment, their effects on biological systems and the mechanism of these effects.

Mr. Jenden

M225. Introduction to Toxicology. Prerequisite: Pharmacology 241 or consent of instructor. Biochemical and systemic toxicity, basic mechanisms of toxicity, and interaction of toxic agents with specific organ systems.

Mr. Taylor

M226. Pathologic Changes in Toxicology. (Same as Pathology M226) This course is designed to give students experience in learning the normal histology of tissues which are major targets of toxin and the range of pathologic changes occurring in these tissues. Liver, bladder, lung, kidney, nervous system and vascular system will be covered.

M261. Introduction to Clinical Pharmacology. (½ course) Prerequisite: consent of instructor. Lectures, case presentations and discussions designed to acquaint graduate students with the special problems and effects encountered in clinical use of drugs, including absorption, metabolism and excretion, drug interactions and interference with clinical laboratory analysis.

The Staff

269. Special Topics in Pharmacology. (½ to 1 course) Prerequisite: consent of instructor. Examination in depth of topics of current importance in pharmacology. Emphasis on recent contributions of special interest to advanced doctoral candidates, academic staff or visiting faculty. May be taken for credit three times.

The Staff

Individual Study and Research

596. Directed Individual Research in Pharmacology. (1 to 3 courses) The Staff

598. Research for and Preparation of the Doctoral Dissertation. (1 to 3 courses) The Staff
The Master of Arts Degree

Admission Requirements. It is the policy of the Department of Philosophy to admit only those who plan to earn the Ph.D. degree. For a discussion of admission requirements, consult description under "The Ph.D. Degree."

Advising. Consult description under "The Ph.D. Degree."

Foreign Language Requirement. The student must demonstrate a reading knowledge of French, German, Latin or Greek. (When relevant to the student's research, another language may be substituted, with the approval of the Department.) This requirement can be satisfied by passing the Department language examination. (Consequently, the student may satisfy the requirement in any approved language. Alternatively, it can be satisfied in a semester (four semesters or six quarters) of college courses in an approved language. Alternatively, the student may satisfy the requirement by having completed, with a grade of C or better, the final course in a 2-year sequence (four semesters or six quarters) of college courses in an approved language. Alternatively, the student may satisfy the requirement by passing the Department language examination. For this examination, the student selects a philosophical book in the foreign language. The book must be of moderate linguistic difficulty and it must be at least 100 pages long. (If the book is longer than 100 pages, portions amounting to 100 pages may be selected for study.) The book must be approved by the department committee responsible for graduate foreign language examinations. If the student completes the book, the student must translate 25 lines of the approved book without a dictionary and 25 lines with the aid of a dictionary in a 90-minute period. A student planning to take an examination must give the committee two weeks notice so that it will have time to select the passages on which he/she will be examined. Completion of the foreign language requirement is not required for admission to the doctoral program but is required for advancement to candidacy.

Course Requirements. A Ph.D. candidate must have completed, with a grade of B or better, the three first-year seminars plus nine additional upper division and graduate courses in philosophy (not including individual studies courses), distributed as follows:

Logic: Two upper division or graduate courses in logic or in either the Philosophy or Mathematics Department, approved by the student's adviser.

History of Philosophy: Two graduate level courses.

Ethics and Value Theory: One graduate level course.

Metaphysics and Epistemology: One graduate level course.

Electives: Three upper division or graduate level courses of the student's choice.

Group classification of a course is generally given by its catalog listing, but final classification of a course is determined by the instructor.
on the basis of its content and the departmental guidelines. Normally, no substitutions for these courses are allowed, but a student who has done graduate coursework elsewhere may petition the Department (through his or her advisor) to have previous graduate coursework substituted for some of the 12 required courses, and in exceptional cases such a petition may be granted.

Written and Oral Qualifying Examinations

Master's Comprehensive Examination (First Year Exam). The master's Comprehensive Examination, or First-Year Exam, consists of four different examinations. One is in logic, on the materials covered in Philosophy 31 and 32. Currently, this examination takes the form of the final examination for Philosophy 32, which is offered most quarters. Consult "Manual for Graduate Students in Philosophy" for further information about this examination.

There are also examinations on each of the three first-year seminars. These examinations last two hours and each occurs soon after the completion of the seminar to which it applies. All four examinations are graded by a special committee appointed by the Chairperson. The master's Comprehensive Examination is passed or failed as a whole, which does not necessarily require passing of all four parts. Performance on all four parts is weighed by the Department in determining whether the examination is passed or failed.

Propositions. In the second and third years, students must write two papers, prepared in accordance with a specific format, called "propositions." One must be on a topic in metaphysics or epistemology, and the other on a topic in ethics or value theory. A proposition must include: a) a formulation of an important philosophical problem; b) a formulation of two or three front-running solutions to or treatments of the problem; c) a criticism of these solutions, and d) the author's suggestions as to how discussion of the problem should continue. Propositions should be between 25 and 35 pages in length. Consult the Philosophy Department "Manual for Graduate Students in Philosophy" for further details on format, style and content. Propositions are researched and written in a series of individual studies courses (Philosophy 596) which usually begin in the first quarter of the student's second year.

The first proposition should be submitted before the end of the second year; the second, before the end of the third year. Both propositions must be accepted by the Department before the student can take his/her Oral Qualifying Examination. Consult the "Manual for Graduate Students in Philosophy" for further details.

Oral Qualifying Examination. In the third year, the student begins a new series of individual studies courses (Philosophy 596) with his or her dissertation supervisor. In these, the student develops a well-defined dissertation project. When the dissertation supervisor judges the project to be sufficiently well-developed, a doctoral committee is chosen and an Oral Qualifying Examination is scheduled. The primary purpose of this examination is to determine whether the student will be able to complete the dissertation successfully. Before the examination is held, the relevant written work the student has completed under the direction of his or her dissertation supervisor is made available to all members of his or her doctoral committee for their inspection. The scope of the examination varies according to the definiteness of the dissertation topic and the extent of the student's preliminary investigations. It need not be narrowly restricted to the announced dissertation topic, but may extend into relevant neighboring philosophical fields, and also into those non-philosophical fields with which the student should be familiar in order to pursue his or her investigations. Although the primary purpose of the examination is to determine the adequacy of the student's preparation and abilities, its secondary purpose is to suggest remedies for any weaknesses that it may reveal. In case of failure, the student's doctoral committee makes a recommendation for or against allowing a second oral examination. If the committee recommends for a second oral, the student may request its scheduling when, in the judgment of his or her committee chairperson, he or she is sufficiently prepared.

Time to Degree. A full-time student with no deficiencies upon admission to graduate status in the Philosophy Department should be able to complete the requirements of the Ph.D. in 15 academic quarters.

Final Oral Examination. The Final Oral Examination may be waived by the doctoral committee. This determination is usually made at the time of the Oral Qualifying Examination.

Candidate in Philosophy Degree. Students are eligible to receive the C.Phil. degree upon advancement to candidacy for the Ph.D.

Teaching Experience. Teaching experience is not a requirement for the Ph.D. in Philosophy.

Disqualification and Appeal of Disqualification. Students not yet admitted to the doctoral program are reviewed at the end of their first year. At this time, the Department will either admit the student to the doctoral program, not admit the student to the doctoral program, or defer the decision until a specific future time. Decisions not to admit or to defer may be appealed by petitioning the Department through the Chairperson. The record of students admitted to the doctoral program who have fallen seriously behind in normal progress toward the Ph.D. will be reviewed at the end of each academic year. The chief purpose of this meeting will be to provide informal counsel to help the student re-establish normal progress. In rare cases, however, the Department may recommend termination from the program. A terminated student may petition the Department through the Chairperson to reconsider his/her case and may submit relevant supporting statements or information for the Department to consider.

*Graduate Courses

No Group

2004-2008-200C. Seminar for First Year Graduate Students. Prerequisite: open only to first-year graduate students in philosophy. Selected topics in metaphysics and epistemology, history of philosophy, and ethics. Required for all first-year graduate students.

The Staff

Group I

201. Plato. Prerequisite: consent of instructor. A study of the later dialogues. Mr. Furth

202. Aristotle. Prerequisite: consent of instructor. Analysis of major problems in Aristotle's philosophy based on the reading, exposition and critical discussion of relevant texts in English translation. Mr. Furth

203. Seminar: History of Ancient Philosophy. (Formerly numbered 251A.) Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor. Mr. Furth

205. Topics in Medieval Philosophy. Lecture/discussion, four hours. Prerequisite: consent of instructor. The study of the philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham; or the study of a single area such as logic or theory of knowledge in several medieval philosophers. Consult the department for topic to be treated in a given quarter. May be repeated for credit with consent of instructor.

Group II

207. Seminar: History of Medieval and Renaissance Philosophy. (Formerly numbered 251B.) Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor. Mrs. Adams

208. Hobbes. (Formerly numbered 203.) Prerequisite: consent of instructor. Hobbes' political philosophy, especially the Leviathan, with attention to its relevance to contemporary political philosophy. Mr. Hampton

C209. Descartes. Prerequisite: consent of instructor. A study of the works of Descartes with emphasis on the Meditations. Such issues as the problem of scepticism, the foundations of knowledge, the existence of God, the relation between mind and body will be discussed. May be concurrently scheduled with course C109.

C210. Spinoza. Prerequisite: consent of instructor. Selected topics in the philosophy of Spinoza. May be concurrently scheduled with course C210, in which case there will be two hour biweekly discussion meeting for graduates only, and additional readings and a longer term paper will be required of graduates. Mr. Adams

C211. Leibniz. Prerequisite: consent of instructor. Selected topics in the philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there will be a two hour biweekly discussion meeting for graduates only, and additional readings and a longer term paper will be required of graduates. Mr. Adams

*For concurrently scheduled courses ("C" prefix) suitably separate activities and/or standards for performance and evaluation will be applied for graduates and undergraduates.
221A. Topics in Set Theory. Prerequisite: Mathematics 112A or consent of instructor. Sets, relations, functions, partial and total orderings; well-orderings. Ordinal and cardinal arithmetic, finiteness and infinity, the continuum hypothesis, inaccessible numbers. Formalization of set theory; Zermelo-Fraenkel; von Neumann-Gödel Theory. May be repeated for credit with consent of instructor. Mr. Kalish

221B. Non-Neumannian Set Theory. Prerequisite: course 221A or Gödel's incompleteness theorem and Tarski's definition of truth. The Staff

222A. Gödel Theory. Prerequisite: several courses in logic, preferably including course 135. First in a series of three courses leading to Gödel's incompleteness theorem and Tarski's definition of truth. The Staff

222B. Gödel numbering and Gödel theory. Final course in the Gödel Theory series. Mr. Church

224. Philosophy of Physics. Prerequisite: consent of instructor. Selected philosophical topics related to physical theory, depending on interests and background of the participants. Might include: space and time, observation in quantum mechanics; foundations of statistical mechanics. May be repeated for credit with consent of instructor. Mr. Healey

225. Probability and Inductive Logic. Prerequisite: course 134 or Mathematics 112A-112B or consent of instructor. The Staff

226. Topics in Mathematical Logic. Prerequisite: consent of instructor. Content will vary from quarter to quarter. Consult the department for topic to be treated in a given quarter. May be repeated for credit with consent of instructor. Mr. Kalish, Mr. Kaplan

227. Philosophy of Social Science. Prerequisite: consent of instructor. An examination of philosophical problems concerning social sciences. Topics covered may include: the relation between social processes and individual psychology, the logic of explanation in the social sciences, determinism and spontaneity in history, the interpretation of cultures radically different from one's own. Students with a primary interest and advanced preparation, in a social science are encouraged to enroll. May be repeated for credit with consent of instructor. The Staff

230. Seminar: Logic. (Formerly numbered 261.) Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Church, Mr. Kaplan

231. Seminar: Intensional Logic. (Formerly numbered 260.) Prerequisite: consent of instructor. Topics may include the logic of sense and denotation, modal logic, the logic of demonstratives, epistemic logic, the intensional logic of Principia Mathematica, possible worlds semantics. May be repeated for credit with consent of instructor. Mr. Church, Mr. Kaplan

233. Seminar: Philosophy of Physics. (Formerly numbered 263.) Prerequisite: consent of instructor. Selected topics in the philosophy of science. May be repeated for credit with consent of instructor. Mr. Healey

241. Topics in Political Philosophy. (Formerly numbered 236.) Prerequisites: courses 150, 156, or 157; or any two courses in philosophy or consent of instructor. An examination of one or more topics in political philosophy: e.g., justice, democracy, human rights, political obligation, revolution. May be repeated for credit with consent of instructor. Ms. Hampton

246. Seminar: Ethical Theory. (Formerly numbered 271.) Prerequisite: consent of instructor. Selected topics. Content will vary from quarter to quarter. May be repeated for credit with consent of instructor. Mr. Hill, Mr. Quinn

247. Seminar: Political Theory. (Formerly numbered 272.) Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Ms. Hampton

298. Problems in Moral Philosophy. (Formerly numbered 273.) Prerequisite: consent of instructor. An intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor. Mrs. Foot

255. Seminar: Aesthetic Theory. (Formerly numbered 277.) Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor. Mr. Quinn

256. Topics in Legal Philosophy. (Same as Law 217.) Prerequisite: consent of instructor. An examination of topics such as the concept of law, the nature of justice, problems of punishments, legal reasoning, and the obligation to obey the law. For the specific topic to be examined in any particular offering of the course consult the instructor. The course may be repeated for credit with consent of instructor. Mr. Morris, Mr. Wasserman

257. Seminar: Philosophy of Law. (Same as Law M524.) Prerequisite: consent of instructor. Selected topics in the philosophy of law. May be repeated for credit with consent of instructor. Mr. Morris, Mr. Wasserman

275. Human Action. (Formerly numbered 241.) Prerequisites: two upper division philosophy courses or consent of instructor. An examination of theories, concepts and problems concerning human actions. Topics might include: analyses of intentional actions; freedom and determinism; the nature of explanations of intentional actions. May be repeated for credit with consent of instructor. Mr. Albritton, Mr. Donnellan

280. 20th Century Continental Philosophy. Prerequisite: consent of instructor. Selected topics in 20th century continental European philosophy. May be repeated for credit with consent of instructor. The Staff

281. Seminar: Philosophy of Mind. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. The Staff

282. Seminar: Metaphysics. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. The Staff

283. Seminar: Theory of Knowledge. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. The Staff

285. Seminar: Philosophy of Psychoanalysis. Prerequisite: consent of instructor. An examination of topics such as the nature and validity of psychoanalytic explanations and interpretative techniques. May be repeated for credit with consent of instructor. Mr. Morris

286. Seminar: Philosophy of Psychology. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism and alternatives; physiology and psychology of the mind. Mr. Burge

287. Seminar: Philosophy of Language. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Burge, Mr. Donnellan, Mr. Furth

288. Seminar: Wittgenstein. Prerequisite: consent of instructor. Mr. Albritton

289. Seminar: Philosophy of Religion. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Adams, Mrs. Adams, Mr. Albritton

Professional Course

495. Teaching of College Philosophy. (1 to 2 courses) Prerequisite: consent of instructor. Seminars, workshops, and apprentice teaching. Selected topics including evaluation scales, various teaching strategies and their effects, and other topics in college teaching. May be repeated for credit. Graded only on a S/U basis. The Staff

Individual Study and Research

The courses in the 500 series do not apply toward the course requirement for the master's degree.

596A-596B. Directed Individual Studies. (1 to 2 courses) Any properly qualified graduate student who wishes to pursue a problem through reading or advanced study may do so if his proposed project is acceptable to a member of the staff. May be repeated for credit. Course 596A offered only on a graded basis; 596B only on a S/U basis. The Staff

599. Research for Doctoral Dissertation. (1 to 2 courses) Prerequisite: advancement to candidacy for the doctoral degree. May be repeated for credit. Offered on a S/U basis only. The Staff
Physics

(Department Office, 3174 Knudsen Hall)

Emet S. Abens, Ph.D., Professor of Physics.
Ruben Braunstein, Ph.D., Professor of Physics.
Nina Byers, Ph.D., Professor of Physics.
Marvin Charles, Ph.D., Professor of Physics.
W. Gilbert Clark, Ph.D., Professor of Physics.
John M. Cornwell, Ph.D., Professor of Physics.
John Dawson, Ph.D., Professor of Physics.
Robert J. Finkelstein, Ph.D., Professor of Physics.
A. Theodore Forrester, Ph.D., Professor of Physics and Engineering.
Burton Fried, Ph.D., Professor of Physics.
Christian Fronsdal, Ph.D., Professor of Physics.
Roy P. Haddock, Ph.D., Professor of Physics.
Theodore Holstein, Ph.D., Professor of Physics.
George J. Igo, Ph.D., Professor of Physics.
Charles A. Whitten, Jr., Ph.D., Associate Professor of Physics.
Seth J. Putterman, Ph.D., Associate Professor of Physics.
Norman A. Watson, Ph.D., Associate Professor of Physics.
Ferdinand V. Coroniti, Ph.D., Associate Professor of Planetary Physics.
Steven A. Moskowski, Ph.D., Professor of Physics.
Bernard M. K. Nelkans, Ph.D., Professor of Physics.
Richard E. Norton, Ph.D., Professor of Physics.
Raymond L. Orbach, Ph.D., Professor of Physics.
Philip A. Pincus, Ph.D., Professor of Physics.
J. Reginald Richardson, Ph.D., Professor of Physics.
Isadore Rudnick, Ph.D., Professor of Physics.
J. J. Sakurai, Ph.D., Professor of Physics.
Robert A. Satter, Ph.D., Professor of Physics.
David S. Saxon, Ph.D., Professor of Physics.
Peter Schlein, Ph.D., Professor of Physics.
Julian Schwinger, Ph.D., Professor of Physics.
William E. Slater, Ph.D., Professor of Physics.
Donald H. Stork, Ph.D., Professor of Physics.
Hans E. Bommel, Master of Arts in Teaching Program, Professor of Physics.
Eugene Wong, Ph.D., Professor of Physics.
Byron T. Wright, Ph.D., Professor of Physics.
Alfredo Baños, J., Dr. Eng., Ph.D., Emeritus Professor of Physics.
Hans E. Bommel, Ph.D., Emeritus Professor of Physics.
Joseph Kaplan, Ph.D., Sc.D., L.H.D., Emeritus Professor of Physics.
Kenneth R. MacKenzie, Ph.D., Emeritus Professor of Physics.
Norman A. Watson, Ph.D., Emeritus Professor of Physics.
Charles D. Buchanan, Ph.D., Associate Professor of Physics.
Paul M. Chakini, Ph.D., Associate Professor of Physics.
Ferdinand V. Corinoti, Ph.D., Associate Professor of Physics and Astronomy.
Seth J. Putnam, Ph.D., Associate Professor of Physics.
Reiner Stenzel, Ph.D., Associate Professor of Physics.
Charles A. Whitten, Jr., Ph.D., Associate Professor of Physics.
Claude Bernand, Ph.D., Assistant Professor of Physics.
Gary A. Williams, Ph.D., Assistant Professor of Physics.

The Department of Physics offers opportunities for graduate study leading to the M.S., M.A.T., (Master of Arts in Teaching), and Ph.D. degrees. Special emphasis is given to the preparation of students in the following fields of Physics: Acoustics/Low Temperature, Elementary Particles, Intermediate Energy/Nuclear, Plasma & Astrophysics, Solid State & Condensed Matter, Spectroscopy.

Admission Requirements. The applicant must have an excellent undergraduate record in addition to meeting the University minimum requirements. All applicants are required to take the Advanced Test of the Graduate Record Examination in Physics and to submit three letters of recommendation. Foreign applicants who are applying for financial support (fellowships, teaching assistantships & research assistantships) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English. Application materials may be obtained by writing to: Graduate Office, Department of Physics, Knudsen Hall 3-145G, UCLA, Los Angeles, California 90024.

The Master of Science Degree

Major Fields or Subdisciplines. It is not required to designate an area of specialization for a terminal master's or M.A.T. degree.

Foreign Language Requirement. There is no foreign language requirement for the M.S., M.A.T. or Ph.D. Degree.

Course Requirements. The University requires a total of nine courses for the M.S. degree. The Physics Department requires that a minimum of six of the nine be graduate courses in Physics of which the student must pass the five fundamental (core) courses: 221A, 221B, 210A, 210B and 215A. To complete the minimum six graduate courses the student is required to take one of the following courses: 221C, 220, 231A, and pass one of the three with "B" or better. The remaining three courses (to complete the nine courses for the M.S. degree) may be satisfied by upper division or graduate courses, not necessarily in physics, which are acceptable to the Physics Department. No more than two of the three courses may be chosen from Physics 596 or seminar courses. Physics 597 and Physics 598 are not acceptable courses for the M.S. degree.

Comprehensive Examination Plan. A passing grade on a Written Comprehensive Examination is required. It is required that it be taken during the first year by UCLA graduates in physics and not later than the fourth quarter of residence by other students. This examination is given twice a year in the Fall and Spring Quarters.

Although this Department operates under the Comprehensive Examination Plan rather than the Thesis Plan, arrangements generally can be made for a student to write a master's thesis, provided he/she has a particularly interesting research problem, and provided some professor is willing to undertake the guidance of his/her work. In this case, the student must petition the Departmental Committee of Graduate Advisers for permission to pursue the Thesis Plan. The Comprehensive Examination requirement is waived if the petition is approved.

Time to Degree. For a full-time student with no deficiencies upon admission to graduate status, taking a course load which is standard for the program: approximately five quarters.

500 Series Course Limitations. (Apply toward the Degree)

Only 8 units of 500 series quarter units may apply toward the total course requirements for the M.S. degree.

Teaching Experience. Teaching experience is not a requirement for the M.S. or Ph.D. degree.

The Master of Arts in Teaching (M.A.T.) Program

Advising. The M.A.T. adviser oversees all stages of progress toward the M.A.T.

All candidates for the M.A.T. degree are required to see the adviser at the beginning of each quarter through the completion of the degree. For further information about the M.A.T. program, direct inquiries to: Director—Merton Burkhard, Master of Arts in Teaching Program, Knudsen Hall 6-130D, UCLA, Los Angeles 90024.

Major Fields or Subdisciplines. It is not required to designate an area of specialization for a M.A.T. degree.

Course Requirements. This degree leads to qualification for teaching credentials at the secondary school or junior college level. Total number of courses—12½; graduate courses required—five; and professional level courses required (300 series)—five.

A) Required graduate/upper division/professional level courses in physics for the M.A.T. degree:

1) Five graduate physics courses, four of which are chosen from: Physics 210A, 210B, 215A, 221A, 221B
2) Physics 370
B) Also required as part of the M.A.T. in Physics degree are the courses necessary for completion of the State of California Single Subject Instructional Credential, K-12:

1. Education 100, 122, 312, 315
2. Education 330A, 330B
3. Public Health 187 (1/2 course)

Comprehensive Examination Plan. A passing grade on a written Comprehensive Examination is required. M.A.T. candidates who fail to qualify at the master's level of achievement may repeat the examination a second time. Permission to repeat the written Comprehensive Examination a third time may be granted by the Committee of Graduate Advisers only under exceptional circumstances.

Time to Degree. The average period of time to degree is two years (six quarters) from graduation to conferral of degree.

500 Series Course Limitations. Not applicable for M.A.T. degree.

Teaching Experience. Teaching experience is required insofar as the required education courses are concerned (supervised teaching at the secondary or junior college level).

The Ph.D. Degree

Admission to the Doctoral Program. This is synonymous with graduate admission.

Course Requirements. Before the Chairperson of the Department recommends the formation of a doctoral committee, a student in the Ph.D. program must satisfy the following core course requirements by taking: Physics 210A, 210B, 221A, 221B, 215A. These examinations are graded both on a letter and an S/U basis. All students seeking candidacy for the Ph.D. degree must pass with a mark of “S” the final examination in four of the five courses. A student who fails to obtain a mark of “S” on a given examination may petition to the Committee of Graduate Advisers to repeat the examination in question. These five examinations should be completed by all students in the program by the fifth quarter in residence. In addition to these five required courses, a Ph.D. candidate must fulfill a breadth requirement by taking one of the following courses: Physics 221C, 220, 231. The student is required to take only one of these courses and pass it with a “B”. Physics 131B (Complex Variables) is the mathematics prerequisite to graduate classes. If a student has not taken this course or its equivalent in undergraduate status, he/she must plan to do so at the beginning of his/her graduate career.

Written and Oral Qualifying Examinations

All departmental graduate students (master’s and Ph.D.) take the same examination, which is graded as follows:

1. Pass at the Ph.D. level of achievement.
2. Pass at the master’s level of achievement.
3. Fail.

All students in the Ph.D. program must pass this examination at the Ph.D. level of achievement. If a student fails to do so, he/she may take the examination a second time. Permission to take it a third time may be granted by the Committee of Graduate Advisers, only under exceptional circumstances.

Comprehensive Oral Examination. ("Departmental Field Oral"): The student may arrange for the examination only after completing the core course requirements as well as passing the Comprehensive Written Examination at the Ph.D. level. The examining committee consists of four faculty members in Physics, one designated as Chairperson, selected by the student. The departmental oral will be searching and comprehensive, though with special emphasis on the field of specialization chosen by the student.

The examination, if failed, may be repeated by the student upon the recommendation of his/her 4-man committee to the Graduate Affairs Officer. All students are expected to complete this examination by the eighth quarter in residence.

After the student has notified the Department that he/she has passed all the preceding examinations, a doctoral committee will be appointed by the Dean of the Graduate Division, acting for the Graduate Council, upon nomination by the Department Chairperson. This committee must consist of not fewer than five members, two of whom must be from departments other than Physics. The student, after consultation with his/her research adviser submits a list of proposed committee members to the Chairperson of the Department. If approved, these nominations are officially submitted to the Graduate Division by the Graduate Student Office.

Oral Qualifying Examination. The committee for the Oral Qualifying conducts an examination which may include a) material in the student’s field of specialization, b) related material that members of the committee from other departments may wish to ask, and c) discussion of the proposed dissertation problem. The committee will indicate its decision on the "Report on the Qualifying Examination" form. At the end of a successful examination, the Chairperson and members of the committee in consultation with the student shall determine which of its members will guide, read, approve and certify the dissertation. At least two members from the Physics Department and at least one outside member must act in this capacity. A decision is also made at this time as to whether a Final Oral Examination will be required.

Final Oral Examination. (If required.) This examination is administered by the doctoral committee. It ordinarily will be a discussion of the student’s original work, including his/her dissertation, and other related matters to be determined by the committee. It may be, if the committee so desires, a survey or comprehensive examination.

Advancement to Candidacy. When a satisfactory report on the completion of the Written and Oral Qualifying Examinations has been submitted, the student will be mailed an Application for Advancement to Candidacy. The filing of this application and payment of the fee constitutes formal advancement to candidacy for the Ph.D.

In-Candidacy Fee Offset Grant Program. Students who have been advanced to candidacy for the Ph.D. are eligible for this program and the attendant registration fee offset of $120 per quarter. Students in the program must register each quarter until completion of all degree requirements, including filing of the dissertation. The fee offset will be issued until the designated departmental time-to-degree (18 quarters) is reached. Students who fail to complete their Ph.D. within this time frame may continue as students, subject to the regulations of the program, but will no longer be eligible for the fee offset. Unless a leave of absence has been approved, failure to register will result in loss of status as a graduate student and Ph.D. candidate. Additional information and application forms are available in the Graduate Office (Knuudsen 3-145G).

Time to Degree. From graduate admission to Ph.D. conferral is on the average 18 quarters (six years).

Normal Progress Toward the Ph.D Degree. Has been established as follows:

A. Written Comprehensive Examination should be taken by the fourth quarter in residence (or during the first year by students whose undergraduate major was Physics at UCLA).

B. Final written examinations in the five fundamental courses and fulfillment of the breadth requirement should be completed no later than the end of the fifth quarter.

C. A specialized course of study should begin during the second year.

D. The Comprehensive Oral Examination ("field oral") should be completed no later than the eighth quarter in residence.

E. The Oral Qualifying Examination (advance- ment to candidacy) should be completed no later than the end of the 11th quarter.

F. The dissertation and Final Oral Examination (if required) should be finished during the fifth and sixth years.
Final Oral Examination. The Final Oral Examination is optional with doctoral committee.

Teaching Experience. Teaching experience is not a requirement for the Ph.D. degree.

Disqualification and Appeal of Disqualification. All graduate student record cards are reviewed at the end of each quarter. At this time examination of each student's progress in graduate study is carefully reviewed. Specific conditions which may lead to termination of graduate study are as follows: (1) Failure to maintain the required grade point average of 3.0 in Physics and in all courses taken in graduate status. (2) Failure to receive the required "satisfactory" grades in the core course classes. (3) Failure to make satisfactory progress on thesis research. (This may include locating a research sponsor or making normal progress toward thesis completion once a sponsor has been located.) (4) Failure to pass the Written Comprehensive Examination by a second attempt. (A third attempt may be granted under special circumstances.) (5) Failure to pass the field oral examination. In practice, every attempt is made to help those students who may fail in any of the above categories. Before terminating a student, the Department will meet with the student to discuss the problems at hand. In many instances, an extension of time is given to the student to rectify the problem. These cases are interpreted on an individual basis and no fixed formula applies. However, if after the designated extension of time the student has not shown the Department that satisfactory progress is being made, the student will be terminated.

Graduate Courses

211B. Advanced Atomic Structure. The $n\ell$ symbol; continuous groups; fractional parentage coefficients; $\ell$ electron systems.

215A. Statistical Physics. Thermodynamics and statistical mechanics with applications.

215C. Quantum Statistical Mechanics and the Many Body Problem. Classical Methods for interacting systems; quantum field theory techniques in statistical mechanics; Green's-function approach; the Coulomb gas; the imperfect Bose gas; electron-phonon interaction; superconductivity; phase transitions; theory of Fermi liquid.

221A. Quantum Mechanics with Applications. Prerequisite: course 220 or consent of instructor. Quantum Mechanics with applications. Rotations and other symmetry operations, perturbation theory, scattering theory.

221B. Quantum Mechanics with Applications. Prerequisite: course 221A. Formal theory of collision processes. Introduction to relativistic quantum mechanics.

221C. Quantum Mechanics. Continuation of nonrelativistic quantum mechanics.

223. Advanced Classical Mechanics. (Formerly numbered 223B.) Prerequisite: course 220. Topics such as nonlinear mechanics, ergodic theory, mechanics of continuous media.

224. Introduction to the Strong Interaction. Evidence concerning the strong interaction, particularly as exemplified in nucleon-nucleon and pion-nucleon systems. Isospin, the scattering matrix, the density matrix and polarization, the properties of pions, the one pion exchange potential, phase shift analysis.

231A. Methods of Mathematical Physics. Students may not receive credit for both Physics 231A and Mathematics 266A. Linear operators, review of functions of a complex variable, integral transforms, partial differential equations.

231C. Methods of Mathematical Physics. Students may not receive credit for both Physics 231C and Mathematics 266C. Perturbation theory. Singular integrals, integral equations.

232A-232B. Relativity. The special and general theories with applications to elementary particles and astrophysics.

232C. Special Topics in General Relativity.

235. Group Theory and Quantum Mechanics. Prerequisite: course 221A. Group representation theory and applications to the quantum mechanics of atoms, molecules, and solids.

241B. Solid State Physics. Prerequisite: course 241A. Transport theory with applications, electron-electron interactions.

241C. Solid State Physics. Prerequisite: course 241B. Semiconductors, magnetism, phase transitions, superconductivity.

261. Seminar in Special Problems in Theoretical Physics.

265. Seminar in Propagation of Waves in Fluids.

268. Seminar in Spectroscopy.

269A. Seminar in Nuclear Physics.

269B. Seminar in Elementary Particle Physics.

284. Advanced Laboratory in Acoustics and Cryogenics. Selected advanced experiments in acoustics and cryogenics designed to train the student in the techniques and instrumentation used in acoustic research and low temperature physics.

290. Research Tutorial in Plasma Physics. (1/2 or 1 course) Seminars and discussion by staff and students, directed toward problems of current research interest. May be repeated for credit.

290A. Research Tutorial in Elementary Particle Physics. (1/2 or 1 course) Prerequisites: courses 226A, 230A, and 230B. Seminars and discussion by staff, postdoctoral fellows, and graduate students enrolled in this course. Each graduate student doing research in elementary particle theory is required to take this course, ordinarily in his second or third year of study. May be repeated for credit.

290B. Research Tutorial in Elementary Particle Physics. (1/2 or 1 course) May be repeated for credit.

291. Research Tutorial in Plasma Physics. (1/2 or 1 course) May be repeated for credit.
Physiology

(Period Office, 53-247 Center for the Health Sciences)

Francisco J. Bezanilla, Ph.D., Professor of Neuroscience in Physiology
Allan J. Brady, Ph.D., Professor of Physiology and Director of Graduate Studies
Jennifer S. Buchwald, Ph.D., Professor of Physiology
Michael H. Chase, Ph.D., Professor of Physiology in Residence
Sergio Ciani, Ph.D., Professor of Physiology
Jared M. Diamond, Ph.D., Professor of Physiology
George Eisenman, M.D., Professor of Physiology
Alan D. Grinnell, Ph.D., Professor of Physiology, Director of Jerry Lewis Neuromuscular Research Center
Morton I. Grossman, M.D., Ph.D., Professor of Physiology and Medicine
Susumu Hagiwara, M.D., Ph.D., Professor of Physiology and Dr. Eleanor I. Leslie Professor of Neuroscience
Glen A. Langer, M.D., Castor Professor of Cardiology in Physiology and Medicine, Vice Chairman of the Department
Wilfried F. H. M. Mommaerts, Ph.D., Professor of Physiology and Medicine and Director of the Los Angeles County Heart Association Cardiovascular Research Laboratory (Chairman of the Department)
Arthur Peskoff, Ph.D., Adjunct Professor of Physiology and Biomathematics
Gordon Ross, M.D., Professor of Physiology and Medicine
Ralph P. Sonnenschein, M.D., Ph.D., Professor of Physiology
John Mc D. Torrey, M.D., Professor of Physiology
Bernice M. Wenzel, Ph.D., Professor of Physiology and Psychiatry and Assistant Dean of Educational Research
Brian Whipp, Ph.D., Professor of Physiology and Medicine
Emest M. Wright, D.S.C., Professor of Physiology
Earl Homsher, Ph.D., Associate Professor of Physiology
Sally Krasne, Ph.D., Assistant Professor of Physiology
Michael S. Letinsky, Ph.D., Assistant Professor of Physiology
Oscar U. Sarem, M.D., Adjunct Associate Professor of Physiology
Julio Vergara, Ph.D., Assistant Professor of Physiology
Joy Frank, Ph.D., Adjunct Assistant Professor of Physiology
Kenneth D. Philipson, Ph.D., Adjunct Assistant Professor of Physiology
Douglas Junge, Ph.D., Professor of Oral Biology and Physiology

Hirohara Noda, M.D., Ph.D., Adjunct Professor of Anatomy and Physiology
Eduardo H. Rubinstein, M.D., Ph.D., Professor of Anesthesiology and Physiology
Maria V. Servath, Ph.D., Professor of Nursing

Mary A.B. Brazier, Ph.D., D.Sc., Emeritus Professor of Anatomy and Physiology
John Field, Ph.D., Emeritus Professor of Physiology and Anatomy

Victor E. Hall, M.D., Emeritus Professor of Physiology
Donald B. Lindley, Ph.D., Emeritus Professor of Psychology and Physiology
Jesse O. Washington, D.V.M., Lecturer in Physiology

The Ph.D. Degree

Admission Requirements. Candidates for admission to graduate status in the Department of Physiology are expected to pursue the Ph.D. degree. They must conform to the general admission requirements set by the Graduate Division, and have received a bachelor’s degree in a biological or physical science or in the premedical curriculum. In general, at the time of admission, students must have completed courses in: mathematics through calculus (equivalent to UCLA Math 31A, B, C); physics (12 quarter units); chemistry (16 quarter units, including quantitative analysis, physical and organic chemistry); biology or zoology (16 quarter units, including comparative vertebrate anatomy).

In certain cases, at the discretion of the Department, students lacking some of the preparation but with a strong background in areas pertinent to physiology may be admitted to graduate status, provided that essential deficiencies are removed by appropriate courses within a specified time after admission. Students may also be admitted upon the recommendation and sponsorship of staff members subject to admission committee approval.

The Graduate Record Examination (GRE) Aptitude test is required as well as the Advanced Test in Biology or the student’s major field. MCAT scores will be accepted in lieu of the GRE.

Three letters of recommendation are required and should be addressed to the Director of Graduate Studies.

Students should request an application packet and/or departmental brochure from: Graduate Student Office, Department of Physiology, UCLA School of Medicine, Los Angeles, CA 90024.

Advising. The Director of Graduate Studies is: Dr. Allan J. Brady, UCLA, Department of Physiology, A3-381 BRI, Los Angeles, CA 90024.

The adviser for first year graduate students is: Dr. Sally Krasne, UCLA, Department of Physiology, 53-247 CHS, Los Angeles, CA 90024.
In the first year, academic progress is evaluated by the Graduate Committee during the year, at the completion of the required coursework, and following the departmental Qualifying Examination. The Graduate Committee is responsible for the overall assessment of progress of the first-year students. At the end of the first year, students are given a written assessment of their progress and areas of weakness.

Upon completion of required courses, it is the student's responsibility to select a sponsor in the area of study he/she wishes to pursue. It is this sponsor who is primarily responsible for evaluating the student's progress after this point. If the student's interests change during the course of his/her studies and it becomes evident that a different sponsor would better suit his/her needs, the student may, with the approval of the Graduate Committee and the Department Chairperson, change his/her sponsor with no formal procedure.

Admission to the Doctoral Program. Applications of prospective students are reviewed by the Graduate Admissions Committee. Completion of a master's program is not required.

Major Fields or Subdisciplines. Cellular Electrophysiology; Membrane Transport; Excitation, Contraction, Energetics and Protein Chemistry of Muscle; Fundamental Neurophysiology; Cardiovascular, Respiratory and Gastrointestinal Physiology.

Foreign Language Requirement. The Department has no foreign language requirement.

Course Requirements. Physiology 205—Physical Chemistry of Membrane and Cellular Systems; Physiology 208—Biophysics of Membrane Transport; Physiology 213—Methods in Cell Physiology; Physiology 214—Cell Physiology: Transport & Electrochemical Properties; Physiology 215—Cellular Interactions; Physiology 230A, B, C—Selected Topics in Organ Physiology. Course requirements are based on the student's background. Prior to the beginning of formal coursework, students meet with the Graduate Committee for counseling regarding the first-year curriculum. All required coursework is completed during the first year. The Department requires that students entering with advanced degrees from other universities pass the departmental Written Qualifying Examination in order to continue in graduate studies in the Department. It is recommended that these students either take the departmental courses or carefully audit them in order to successfully complete the Written Qualifying Examination.

Written and Oral Qualifying Examinations. The sequence of examinations is as follows: A departmental Written Qualifying Examination is taken at the end of the first year of study, although this requirement may be waived provided other methods of performance evaluation indicate satisfactory progress. Questions are solicited from the teaching staff and selected to give a comprehensive coverage of coursework offered to first-year students. Strong emphasis is placed on synthesis in the solicitation and grading of questions. The examination requires two days. Recommendations following the examination are based on the total and specific areas of competence revealed by the examination performance in coursework during the year and recommendations of staff with whom the students have had close association. Marginal performance in all areas with excellence in none is not considered acceptable.

Following successful completion of the departmental Written Examination, each student selects a sponsor who will act as chairperson of his/her doctoral committee and direct his/her thesis research project. By the completion of the second year of study, the student and his/her sponsor must have selected an additional four members for the committee, which would then total three from within the Department and two outside the Department. These five committee members conduct the Oral Examination. The purpose of the Oral Examination is to establish, to the satisfaction of the committee, that the student is capable of conducting a productive research project. At this point in his/her training, the student normally will have completed all formal coursework, will have passed the departmental Written Examination, and will have devoted approximately a year to a Research Project (either his/her own or in collaboration with his/her sponsor). It is the obligation of the committee to evaluate the ability of the student to formulate a testable question, based on a clear understanding of the current literature in his/her field and to propose a critical method of approach and analysis to the resolution of that question. At the successful completion of the Oral Examination, the student advances to candidacy and his/her committee elects whether the student will defend his/her thesis in a Final Oral Examination.

Time to Degree. From admission to Written Qualifying Examination—three quarters; From admission to Oral Examination—six quarters; From admission to the approval of the dissertation prospectus (advancement to candidacy)—six quarters; From advancement to candidacy to the Final Oral Examination—six quarters; From admission to the award of the degree—usually 12 to 15 quarters (four to five years); Normative time-to-degree—12 quarters.

Final Oral Examination. The Final Oral Examination is optional with the doctoral committee.

Disqualification and Appeal of Disqualification. If, at the time of the Oral Examination, there are apparent weaknesses in the student's abilities, the doctoral committee should make recommendations for remedial study or training which would correct these deficiencies. If the student is judged to be insufficiently capable of performing productive research with a reasonable amount of further training, then in fairness to the student, the University, and the scientific community, it is the obligation of the committee to recommend termination of graduate study for the student. A student may also be recommended for disqualification if he/she exceeds the normative time-to-degree and fails to show sufficient progress toward the degree. Appeals on matters of disqualification can be made to the Department Graduate Committee.

Teaching Experience. Teaching experience is not a requirement for the Ph.D. degree.

Other Relevant Information. The Department also offers postdoctoral training in research and welcomes students interested in concurrent M.D./Ph.D. programs.

Upper Division Courses

100. Elements of Human Physiology. (1½ courses) Prerequisite: enrollment in School of Dentistry or consent of instructor. Required course for first-year dental students. Lectures, laboratories, and demonstration-discussions concerning functional activities of the living body in terms of both cellular and systemic functions. Examples will be presented, where possible, on the basis of information relevant to oral function. Mr. Homsher and the Staff.

101. Neuromuscular and Cardiovascular Physiology. (1½ courses) Prerequisites: basic courses in chemistry, physics, and biology, at least one year each; organic chemistry, histology, gross anatomy, human or comparative. Primarily for first-year medical students, but open to others with consent of instructor. Lectures laboratory and conferences. An analysis of the electrical properties of muscle and nerve, the contractility of muscle and the heart, and the cardiovascular system and its regulation. Mr. Sonnenchein and the Staff.

102. Renal, Respiratory and Gastrointestinal Physiology. (1½ courses) Prerequisites: same as for course 101. Primarily for first-year medical students but open to other students with consent of instructor. Lectures, laboratories and conferences. A continuation of course 101, dealing with respiration, and the distribution of water, electrolytes and metabolites by the renal and gastrointestinal systems, and the special physiology of certain organs. Mr. Sonnenchein and the Staff.

M103A-103B. Basic Neurology. (Same as Anatomy M103A-103B.) Two four-hour sessions and one three-hour session per week of the last three weeks of the winter quarter; two two-hour sessions and two three-hour sessions per week in the spring quarter. Prerequisite: Medical school status or consent of instructor. Lectures, conferences, demonstrations and laboratory procedures necessary to an understanding of the function of the human nervous system. In Progress grading. The Staff.

105N. Human Physiology. Prerequisite: enrollment in the School of Nursing or consent of instructor. Required course for third-year nursing students. Lecture and discussion emphasizing a correlative approach to anatomy and physiology of the human body. Ms. Seraydarian.
Graduate Courses

200. Transport Across Biological Membranes. Prerequisite: consent of instructor. An introduction to the transport ions, non-electrolytes and water across plasma membranes of single cells and epithelia. Lectures will include discussions of new experimental techniques and the passive permeability of membranes to ions and non-electrolytes, active transport of sugars and amino acids, active ion transport, and the mechanisms of water transport. Experimental work will involve the transport of ions across single cell membranes and epithelia using radioactive tracer and electro physiological techniques. Mr. Wright

202. Permeability of Biological Membranes to Ions. (1½ courses) Prerequisites: Chemistry 113B and 113C or the equivalent, or consent of instructor. Topics include: ion permeation mechanisms, ion distribution, and physical basis of ion discrimination across membranes. Mr. Diamond

M203. Oral Physiology. (Same as Oral Biology M205.) Lecture, one hour; discussion, one hour. The organ-level and cellular physiology of the following systems will be discussed, in a somewhat flexible framework: (1) Salivary gland systems, including the mechanisms of secretion, abnormalities such as Mikulicz-Sjogren syndrome, and effects on the dentition, (2) Dental pulp: development, normal physiology, and reparative mechanisms, (3) Organization of sensory systems, receptors, pathways, and central projections, (4) Dental pain mechanisms, hydrodynamic theory and electrical recordings from dentin, (5) Taste receptors: Mechanisms of perception of four basic tastes, alternations of taste caused by drugs, poisons and aging, (6) Olfactory and olfactory receptors: comparison with similar systems in the skin, assessment of sensory dysfunction, (7) Speech: phonation, resonance and articulation in speech production, normal timbre, development of various sounds in children. Classes to be supplemented with audio-visual materials and many references from the literature. To be offered Fall quarter. Mr. Junge

205. Physical Chemistry of Membrane and Cellular Systems. Prerequisite: consent of instructor. Survey of the principles of equilibrium and non-equilibrium thermodynamics, electrostatics and fluid mechanics, and their application to problems of electrochemistry, ionic process in solutions, electrode kinetics and transport in membranes. Mr. Ciani

207. Neurophysiology. Prerequisite: consent of instructor. Seminar and laboratory course designed to acquaint the student with behavioral techniques and concepts relevant to research problems encountered in modern neurophysiology, and to consider means of integrating them with neurophysiological methods. The Staff

208. Biophysics of Membrane Transport. (1½ courses) (Formerly numbered 200.) Prerequisites: Physical Chemistry (equivalent of Physiology 205 or Chemistry 110A-110B), Differential equations (may be taken concurrently, equivalent of Physiology 201 or Mathematics 32C) or consent of instructor. Studies of transport mechanisms in simple model membrane systems are used as a basis for understanding mechanisms of ion and non-electrolyte permeation, excitability and gating phenomena in biological membranes. The significance of such physical variables as membrane surface charges, surface dipoles, dielectric constant and viscosity for transport phenomena are discussed in detail. Mr. Ciani, Ms. Krasne

1. General Studies, (0 to 10 courses) Prerequisite: consent of instructor. Special studies in physiology, including deviations from normal processes of all kinds. May be taken concurrently, but not both, designed for appropriate training of each student who registers in this course. The Staff

212A-212B-212C. Critical Topics in Physiology. (1½ courses) Prerequisite: consent of instructor. Advanced treatment of critical topics in physiology by staff and guest lecturers for graduate and postdoctoral students in the biomedical sciences. The Staff

213. Methods in Cell Physiology. (1½ courses) Prerequisite: consent of instructor. The lectures and laboratory will deal with the integrated circuits and other solid-state devices employed in modern instruments, so that the students will learn to design and build many of the simpler circuits often required in their research. The emphasis will be on the particular circuits used in electrophysiology, RC analysis, and an introduction to cable theory. The Staff

214. Cell Physiology: Transport and Electromechanical Properties. (½ to 1½ courses) Prerequisite: course 213 or consent of instructor. Introductory concepts of transport across cell membranes, models of permeation mechanisms, linear cable properties of cells and non linear conductance changes in excitation and impulse conduction. Mr. Bezania

221. Graduate Commentary: Excitation and Conduction. (½ course) Prerequisite: same as for course 101. For graduate students. An advanced supplement of the topics being presented in course 101. Mr. Brady and The Staff

222. Graduate Commentary: Renal, Respiratory and Gastrointestinal Physiology. (½ course) Prerequisite: course 101. For graduate students. An advanced supplement of the topics being presented in course 102. The Staff

223. Graduate Commentary: Physiology of the Nervous System. (½ course) Prerequisites: same as for course 101; consent of instructor. For graduate students. An advanced supplement of the topics being presented in basic neurology. Ms. Buchwald

225. Molecular Aspects of Ion Permeation through Peptide Channels. Prerequisites: consent of instructor; Physiology 208 (Biophysics of Membrane Transport) unless waived. Advanced course for students well-grounded in fundamentals of membrane permeation. Covers the most recent theoretical and experimental state of the art for the molecular details of ion permeation in the well-characterized peptide channel of gramicidin as well as relevant observations in biological channels. Ten hours of reading are expected for every two hours of lecture. Mr. Eisenman

226. Bilayer Membranes. Prerequisite: consent of instructor. Advanced lectures and laboratory demonstrating physical and chemical principles that underlie the behavior of lipid bilayer membranes, both artificial and natural. The Staff

227. Theoretical Problems in Membrane Permeation. (½ course) Tutorial directed to specific theoretical problems of interest to the student. Mr. Ciani

228. Epithelia: Structure and Function, (½ course) Prerequisite: consent of instructor. Lectures and seminars on the physiology of epithelia cells with particular emphasis on membrane transport. Graded S/U only. Mr. Wright

229. Research Topics in Neurobiology. (½ course) Prerequisite: consent of instructor. Discussion of current literature covering research problems in neurobiology. Graded S/U. Mr. Letinsky

230A-230B-230C. Selected Topics in Organ Physiology. (1 to 2 courses) Prerequisites: consent of instructor. Macroscopic, microscopic and ultrastructural correlates of tissue and organ function. Advanced consideration of special topics in the physiology of the cardiovascular and gastrointestinal systems, as well as the respiratory, renal and central nervous systems. In-Progress Grading. The Staff

251A-251B-251C. Seminar in Physiology. (½ course each) Prerequisite: consent of instructor. Review and discussion of current physiological literature, research in progress, and special topics. The Staff

301. The Use of Laboratory Animals in Research. (½ course) Prerequisite: consent of instructor. An introductory course of graduate students in the medical and biological sciences, covering principles and practical problems in the handling and use of common laboratory animal species. Mr. Washington

Individual Study and Research

501. Cooperative Program. (½ to 2 courses) Prerequisites: approval of UCLA Graduate Advisor and Graduate Dean. Approval of host campus instructor, Department Chairman and Graduate Dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. To be graded S/U. The Staff

596. Directed Individual Study or Research. (½ to 3 courses) Prerequisite: consent of instructor. The Staff

597. Preparation for the Doctoral Qualifying Examination or the Master's Comprehensive Examination. (½ to 3 courses) Prerequisite: consent of instructor.

598. Thesis Research for Master's Candidates. (½ to 3 courses) Prerequisite: consent of instructor. The Staff

599. Dissertation Research for Ph.D. Candidates. (½ to 3 courses) Prerequisite: consent of instructor. The Staff

Political Science

(Department Office 4289 Bunche Hall)

Richard E. Ashcraft, Ph.D., Professor of Political Science.

Hans H. Baerwald, Ph.D., Professor of Political Science.

Richard D. Baum, Ph.D., Professor of Political Science.

Irving Bernstein, Ph.D., Professor of Political Science.

John C. Boissevain, Ph.D., Professor of Political Science.

David T. Cattell, Ph.D., Professor of Political Science.

James S. Coleman, Ph.D., Professor of Political Science.

*Irving Dogan, Docteurs Lettres, Professor of Political Science.

Ernest A. Engelbert, M.P.A., Ph.D., Professor of Political Science.

Leonard Freedman, Ph.D., Professor of Political Science.

Robert C. Fried, Ph.D., Professor of Political Science.

Robert S. Gerstein, L.L.B., Ph.D., Professor of Political Science.

Edward Gonzalez, Ph.D., Professor of Political Science.

Malcolm H. Kerr, Ph.D., Professor of Political Science.
The Graduate Program

Admission Requirements. In addition to University minimum requirements, three letters of recommendation and the scores from the Aptitude Test of the Graduate Record Examination are required. Prospective students may write for departmental brochures to the Graduate Studies Office, Department of Political Science, UCLA, L.A., California 90024. Political Science does not have an application form in addition to the one used by Graduate Admissions.

The Department deadline for receipt of all application materials is December 31 prior to the Fall Quarter in which the student plans to register. Applicants will receive notification from the Department in the early Spring concerning their admission into the graduate program.

Financial Assistance. The fellowship-assistantship application is combined with the admissions application, and may be obtained either from the UCLA Fellowship Office or from Graduate Admissions. In order to be eligible for a fellowship or teaching assistantship, students must make sure their file is complete and be admitted to the Department of Political Science. They, therefore, should make sure that all necessary materials have reached the Political Science Graduate Office by the December 31 deadline.

Although every effort is made to provide some financial assistance to all Political Science students, there are only a limited number of fellowships available to first-year graduate students.

Teaching assistantships are ordinarily awarded only to students who have been graduate students in the Department for at least one year. They are not automatically renewable and must be reapplied for each year. The Department does not ordinarily offer teaching assistantships to students who have (1) held fellowships and/or teaching assistantships for three years in the Department or (2) held University-administered fellowships and/or teaching assistantships for four years.

Advising. The Political Science Graduate Adviser advises all departmental graduate students on any matters pertaining to the graduate program, and is responsible for approving their study lists. As soon as possible after arriving at UCLA, new students should contact the Graduate Adviser who will assist in planning their studies during the first year in residence. Faculty submit written evaluations of students' coursework at the end of each academic quarter, and these evaluations are available to the students. Students are encouraged to request an oral evaluation of their academic work in the Department prior to taking the M.A. evaluation sequence, from the Graduate Adviser or the chairperson of their field examination committee.

Major Fields:
Six fields of study are offered to graduate students in the Political Science Department:

1) Political Theory
2) International Relations
3) Politics
4) Comparative Government
5) Public Law
6) Public Administration and Local Government

Graduate Committee. The chairpersons of the Ph.D. written examination committees in the six fields, plus the Graduate Adviser (chairperson), constitute the Graduate committee, which acts for the Department in supervising the administration of the graduate program. Three graduate students, appointed by the Department Chairperson, also serve as members of this committee.

The Master of Arts Degree.

Foreign Language Requirement. There is no foreign language requirement for the M.A. degree.

Course Requirements. A student must take a minimum of five graduate courses in Political Science at UCLA, distributed among three fields of study, and four other courses (normally in Political Science or in related subjects) to fulfill the M.A. course requirement. With the approval of the Graduate Committee, two of these nine courses may be P.S. 596, but only one P.S. 596 may be applied toward the requirement of five graduate courses in Political Science. Neither the course P.S. 597 nor any lower division course may be used to satisfy any of the course requirements for the M.A. and Ph.D. degrees.

Students who have completed work in graduate standing at another institution may petition to have those courses counted as partial fulfillment of the M.A. course requirements. With the approval of the Graduate Committee and the Dean of the Graduate Division, a maximum of four courses taken at another campus of the University of California may be used to satisfy the nine courses needed for the M.A. degree, and two of these courses may be counted as part of the Department's 5-graduate course requirement. If the work was completed at an institution other than the University of California, only two courses can be applied towards the M.A. degree, and these may not be counted among the five graduate courses in Political Science. The University of California discourages duplication of advanced degrees, and persons entering the Department with an M.A. degree should therefore be aware that none of the courses taken for an M.A. degree awarded at another institution can be used to satisfy any degree requirements at UCLA.
Except for teaching assistants, all graduate students will normally take three courses per quarter prior to their completion of the Ph.D. requirements. In some circumstances, and with the approval of the Graduate Adviser, the minimum 2-course load (8 units) may be taken. Students may offer 4 units of P.S. 597 in the quarter of their M.A. or Ph.D. examinations, as part of this 8-unit requirement, and they may also take 8 units of P.S. 597 only once their courses requirements have been met.

**Thesis Plan:** The Department normally requires Written and Oral Comprehensive Examinations for the M.A. degree. In exceptional cases, and with the approval of the Graduate Committee, an M.A. thesis may substitute for the examination sequence.

Students are not encouraged to adopt the Thesis Plan, since it normally leads to a terminal M.A. degree. Those students wishing to do so, however, should select, in consultation with the Graduate Adviser, a faculty committee to supervise their thesis. This committee must consist of three faculty members, two from Political Science and one from another UCLA department, and must be approved by the Graduate Committee. The thesis should be submitted to the thesis committee at the beginning of the student’s fourth quarter in residence, and must the committee’s approval prior to the end of that quarter. If the committee does not receive or does not approve the thesis, the student will be considered to have failed the requirement and will not be allowed to resubmit the thesis. Students adopting the thesis plan will not be allowed to continue in the Ph.D. program unless they successfully pass the M.A. Comprehensive Examination requirements described below.

**M.A. Comprehensive Examination Plan.**

The M.A. Comprehensive Examinations consist of a written examination in one of the six fields of Political Science, and an oral examination covering the student’s knowledge of Political Science in three fields. The M.A. Comprehensive Examinations are administered in the Fall and Spring Quarters only, and must be taken by the end of the student’s fourth quarter in residence. Individuals who enter the graduate program at UCLA with an M.A. degree in Political Science from another institution must take the M.A. examination by the end of their third quarter in residence. Students are allowed to take the M.A. Comprehensive Examinations one time only.

Prior to taking the M.A. examinations, students should have completed at least one graduate course in three of the six fields of Political Science. The M.A. written examination will be taken in the student’s major field, and is graded by the Ph.D. examination committee, consisting of three faculty members in that field, appointed by the Department Chairperson. The M.A. examination, however, is distinct from the Ph.D. preliminary examination, and is evaluated at a different level.

The M.A. oral examination will be held as soon as possible following the M.A. written examination. The M.A. oral examination committee consists of three faculty members; the chairperson, who is also a member of the student’s M.A. examination committee, and two other faculty members from the two fields in Political Science in which the student has taken a graduate course. (Additionally, and for the purpose of meeting this M.A. oral examination requirement, any two courses from the P.S. 203 A-B-C series may be counted as one field.) Names of the faculty members on both the written and oral M.A. committees will be available to the students.

The M.A. oral examining committee will evaluate the student’s entire record, including performance on the M.A. written and oral M.A. examinations and evaluations of coursework taken, and recommend one of the following:

a) that the student receive the M.A. degree and be encouraged to proceed toward the Ph.D.

b) that the student receive the M.A. degree (when all departmental and University requirements are met) and that his/her status as a graduate student in the Department be terminated.

c) that the student not be awarded the M.A. degree and that his/her status as a graduate student in the Department be terminated.

A student who does not receive a recommendation to proceed to the Ph.D. program (b or c above) may appeal that decision by presenting a written request for an appeal to the chairperson of the M.A. oral examination committee prior to the end of the quarter in which the M.A. Comprehensive Examinations were taken. The M.A. oral committee will then review its decision, and if this appeal is not successful, the student may then appeal to the Graduate Committee, which will make a final determination in the case.

Graduate students holding teaching assistantships who receive terminal M.A. degrees as a result of the examination sequence will lose the teaching assistantship effective the end of the quarter in which they complete the M.A. degree requirements. In all cases, these requirements must be fulfilled no later than the quarter following notification of termination.

**Time to Degree.** The normal period from graduate admission to completion of required courses and award of the M.A. degree is four quarters.

**500 Series Courses.** The Political Science Department offers the following courses in the 500 series:

<table>
<thead>
<tr>
<th>Course No.</th>
<th>Value</th>
<th>Type of Grading</th>
<th>Number of Times May Be Repeated</th>
</tr>
</thead>
<tbody>
<tr>
<td>596</td>
<td>4</td>
<td>letter</td>
<td>no limit</td>
</tr>
<tr>
<td>597</td>
<td>4</td>
<td>S/U</td>
<td>no limit</td>
</tr>
<tr>
<td>598</td>
<td>4</td>
<td>S/U</td>
<td>no limit</td>
</tr>
<tr>
<td>599</td>
<td>4</td>
<td>S/U</td>
<td>no limit</td>
</tr>
</tbody>
</table>

One 596 course may be counted toward the 5-course requirement, with approval of the Graduate Student Committee, and two 596 courses may be counted toward the 9-course requirement for the M.A. degree, also with the committee’s approval. The courses P.S. 597, 598 and 599 cannot be used for credit for any of the course requirements for either the M.A. or the Ph.D.

**Disqualification and Appeal of Disqualification.** A student may be terminated at the M.A. level if the M.A. written and oral examining committees make the decision that he or she failed the examination sequence and therefore is not allowed to continue in the Political Science program at UCLA. Students may appeal termination by presenting a written appeal first to the examining committee which made the decision for termination. If this is not successful, they may then appeal to the Graduate Studies Committee of the Department.

**The Ph.D. Degree**

**Admission.** Successful completion of the M.A. Comprehensive Examinations in Political Science at UCLA is a prerequisite for admission to the Ph.D. program in Political Science at UCLA.

**Advising.** The Graduate Adviser advises all graduate students as to their general progress in meeting the requirements for the Ph.D. degree in Political Science. In addition, soon after a graduate student has passed the M.A. Comprehensive Examinations, a faculty adviser in the individual’s major field will be appointed by the Department Chairperson to assist the student in preparing for the Ph.D. Preliminary Examinations.

**Foreign Language or Research Methodology Requirement.** For the Ph.D., students must fulfill one of the following requirements:

1) **Demonstration of proficiency in one foreign language.** Ordinarily proficiency is demonstrated by passing the Educational Testing Service examination with a minimum score of 500. In other languages where no ETS examination is given, arrangements are made through the Department’s Graduate Adviser and a faculty member in the appropriate language department to administer an examination which will test the student’s proficiency at a level comparable to an ETS examination score of 500.

2) **Demonstration of proficiency in a research methodology.** Students are expected to complete three courses with a grade of "B" or better. Two of the courses are to be a sequence in elementary statistics, plus P.S. 203C. Acceptable statistics classes include Math 50 A/B and Soc 210 A/B. More advanced classes in mathematics or statistics may be substituted for these statistics classes.
Students are expected to have completed this requirement prior to taking the Ph.D. Preliminary Examinations, and must complete it before they can take the University Oral Examination and be advanced to candidacy for the Ph.D.

Course Requirements. Prior to taking the Ph.D. Preliminary Examinations in three of the six fields of Political Science, a student must have completed the basic graduate courses in those fields. Each field in Political Science will specify the courses—a minimum of two—the student must take as basic preparation for the Ph.D. Preliminary Examination in that field. In addition to the minimum basic course requirements, a student must satisfy a 2-quarter research requirement in two fields of Political Science. Each field redefines its basic course or research requirements from time to time, and students should therefore consult with the Graduate Adviser regarding the specific course requirements established by the student’s three Ph.D. examination fields. Also, a student must take a minimum of two graduate courses in a fourth or writeoff field. A student will be examined in a writeoff field during the University Oral Examination. (P.S. 203A-B-C may be counted as a writeoff field in order to meet this requirement for the Ph.D.).

Outside Fields. One of the student’s four fields (three written examination fields and one writeoff field) may be outside the Department of Political Science. In consultation with the student’s major adviser, the instructor with whom he/she wishes to do the work outside the Department, and the Graduate Adviser, a student may submit a written proposal to have work done in a field outside the Department counted as partial fulfillment of the Department’s Ph.D. requirements. The proposal must state the substantive materials to be covered, the course program, and why the outside field is being proposed. The proposal must be signed by the student’s adviser and the outside instructor, approved by the Graduate Adviser, and submitted to the Department graduate office six months in advance of the time the student expects to take the Preliminary Examinations. A minimum of three courses, including two graduate courses, must be taken in the outside field. The outside field may consist of three courses concentrated in one discipline or distributed among several disciplines other than Political Science.

The outside field may be counted as one of the three Ph.D. written examination fields or as the writeoff field. In either case, the outside instructor shall be nominated to serve on the University oral committee.

Ph.D. Preliminary Examinations. Within two years after passing the M.A. examinations, the student will take the Ph.D. Comprehensive Examinations. These will consist of a written examination in three fields, or in the field in which the M.A. written examination has been taken, a research paper may be substituted for the Ph.D. written examination in that field. Students choosing to write a research paper must submit a precis of the research paper to the appropriate field committee at least one quarter prior to their taking the Ph.D. Preliminary Examinations. The Ph.D. examinations are given twice a year, in November and in May. Students must complete all three examinations (or two examinations and a research paper) during a single examination period. No student will be allowed to proceed to the University Oral Examination until he/she has successfully passed the examinations in three fields.

Each Ph.D. candidate must fill out a form at least six months prior to taking the Ph.D. examination sequence which outlines those fields in which the student will be examined, type of examination, and courses taken to fulfill field requirements. This form must be approved by the student’s chairperson and the Graduate Adviser, and will then be put in the student’s file for future reference. Copies of this form are available in the Department Graduate Office.

A student failing one or more of the written examinations does not have the automatic right to retake the examination sequence. In no case will a student who has failed all three examinations be permitted to retake the examinations. In other instances, whether the student will be required to retake examinations, and how many examinations the student will be required to retake, will be determined by the Graduate Studies Committee. In no case will a student be allowed to take an examination a third time.

A student may appeal the evaluation of a failure on any Ph.D. written examination by presenting a written request for an appeal to the chairperson of the Ph.D. examination committee prior to the end of the quarter in which the Ph.D. examinations were taken. The Ph.D. field examination committee will reconsider its decision and submit its written report to the Graduate Committee. If the student’s appeal is not successful, he or she may appeal the case to the Graduate Committee, which will make a final determination of the matter.

Ph.D. Oral Examination. Within two quarters of passing the Department’s Ph.D. Preliminary Written Examinations, students must take the University Oral Examination. In the University Oral Examination the student shall be examined in each of his/her four fields, including the writeoff field, by an appropriate representative from each field, nominated by the Department Chairperson. If the student successfully passes the Oral Examination (and has fulfilled the foreign language requirement), he/she will then be advanced to candidacy for the Ph.D. and will be eligible to receive the C.Phil. degree.

Approval of a written dissertation by the student’s doctoral committee constitutes the final requirement for the Ph.D. degree in Political Science.

Time to Degree. Students are expected to complete the Ph.D. program in Political Science, including acceptance of the dissertation, within 5 1/2 years (16 quarters) from the time of their admission to graduate status at UCLA.

Final Oral Examination. The Doctoral Committee for each candidate decides whether or not a Final Oral Examination should be required.

Candidate in Philosophy Degree. Students are eligible to receive the C. Phil. degree on advancement to candidacy for the Ph.D.

Teaching Experience. All graduate students in the Department of Political Science before being granted the Ph.D. are required to have formal teaching experience in an institution of higher learning. Waiver of this requirement is possible in exceptional circumstances upon petition to the Graduate Studies Committee.

Disqualification and Appeal of Disqualification. A student may be terminated at the Ph.D. level if the Ph.D. examination committees, in combination with the Graduate Studies Committee of the Department, make the decision that he or she failed the examination sequence and is not allowed to continue for the Ph.D. in Political Science at UCLA. Students may appeal termination by presenting a written appeal to the Graduate Studies Committee of the Department.

*Graduate Courses

General

203A-203B-C203C. Introduction to Political Inquiries

203A. Problems of Scientific Inquiry and Normative Discourse

203B. Major Conceptual Frameworks and Approaches to Political Science. Course 203A or its equivalent will be taken prior to 203B.

C203C. Quantitative Research Methods in Political Science. May be concurrently scheduled with Political Science C197C. An introduction to the analysis of political data. The relationships among theory, concepts, measurements, and inference will be stressed. The nature of measurement will be discussed and there will be an introduction to scaling, index construction, and the measurement of political variables. The student will become familiar with such ideas as: variables, relationships, association and correlation, controls and causal ordering. Students will be introduced to basic techniques of data collection and analysis. They will also engage in computer-aided interpretation of political data.

The Staff

C204. Quantitative Applications. A survey of quantitative research techniques and their application to the study of political phenomena. May be concurrently scheduled with Political Science C102.

Mr. Marvick, Mr. Petrock
211. Political Theory. An analysis of the central problems of political inquiry and their relation to political philosophy. May be concurrently scheduled with Political Science C197C. The Staff

212. International Relations. An examination of contemporary theories and methodologies in international relations, with applications to contemporary international politics. The Staff

213. American Foreign Policy. An examination of the political philosophy. The Staff

214A. Political Parties and the Electoral Process. Students taking M.A. or Ph.D. examinations in the Political Science field will ordinarily have completed these courses before the examination sequence.

214B. American Political Institutions. Mr. Brown, Mr. Marvick, Mr. Petrocik

214A-215B. Comparative Government. Prerequisites: course 215A or consent of instructor is prerequisite for 215B. Approaches to the study of comparative politics and problems of comparative political analysis. The Staff

215A. Political Parties and the Electoral Process. An analysis of executive organization and leadership with emphasis on the American Presidency. Special attention to theories of organization and personality and the relationship between the executive and other institutions and groups. May be concurrently scheduled with Political Science C197C. Mr. Marvick, Mr. Snowiss

215B. American Foreign Policy. An analysis of selected classical and contemporary sociological theories to politics. May be concurrently scheduled with Political Science C197C. The Staff

214A. Legislative Behavior. The analysis of the major approaches to the study of representative institutions, with special emphasis upon the assumptions, concepts, methods, and theoretical implications associated with each approach. May be concurrently scheduled with Political Science C197C.

215C. International Relations. Issues and approaches to contemporary problems. The Staff

215A-215B. Comparative Government. Prerequisites: course 215A or consent of instructor is prerequisite for 215B.

216. Public Law. A systematic analysis of the scope and nature of public law, with particular attention given to its materials and methods as illustrated in concepts and doctrines drawn from various of its subject fields. May be concurrently scheduled with Political Science C197E.

217A. Public Administration and Democratic Government. An analysis of the nature and scope of public administration and its role in modern political systems. May be concurrently scheduled with Political Science C197E.

217B. Approaches to Organizational Analysis. Analysis of several of the major conceptual alternatives for the study of organizations, with emphasis given to public administrative organizations. Among the topics covered are structural-functional and systems approaches to organization, rational-choice models, and social psychological analyses. Each alternative is critically evaluated for its strengths and weaknesses as a guide to understanding organizational analysis. May be concurrently scheduled with Political Science C197F. The Staff

218C. The Administrative System. A behavioral analysis of the processes of public administrative structures in the American political system. Emphasis on the possibilities for and limits on rational decision-making and program innovation and on the problems of maintaining public responsibility. May be concurrently scheduled with Political Science C197E.

The Staff

Substantive Courses

C221. Selected Texts in Political Theory. A critical examination of major texts in political theory with particular attention to their philosophic system, their relations to the contemporary political and intellectual currents, and the importance of the system for present-day political analysis. May be concurrently scheduled with Political Science C197A.

C222. Selected Topics in Political Theory. A critical examination of a major problem in political theory. May be concurrently scheduled with Political Science C197A.

C224A. Politics and Economy. An analysis of the theoretical and practical relationships between economic organization and governmental institutions. Study will include the development and political implications of the market system, banking and finance, corporate enterprise, and the labor market. Mr. Orren

C224B. Political Recruitment. A critical evaluation of the literature concerned with the backgrounds of public men, and with the screening and sponsoring mechanisms affecting their careers and political perspectives. May be concurrently scheduled with Political Science C197C.

C224C. Politics and Society. The application of selected classical and contemporary sociological theories to politics. May be concurrently scheduled with Political Science C197C. Mr. Marvick, Mr. Snowiss

C224D. Group Theories of Politics. Critical appraisal of "group theory" approaches to the study of political decision-making, with special attention to empirical research problems and findings. Mr. Orren, C224E. Legislative Behavior. The analysis of the major approaches to the study of representative institutions, with special emphasis upon the assumptions, concepts, methods, and theoretical implications associated with each approach. May be concurrently scheduled with Political Science C197C.

Mr. Marvick, Mr. Snowiss

C224F. Executive Politics and the Presidency. An analysis of executive organization and leadership with emphasis on the American Presidency. Special attention to theories of organization and personality and the relationship between the executive and other institutions and groups. May be concurrently scheduled with Political Science C197C. Mr. Snowiss

C224G. Political Psychology. (Same as Psychology M228.) Prerequisites: course 140 or 141, or 214A, or 224H, or Psychology 220A, or consent of instructor. A survey of psychological approaches to political analysis; topics include personality, small group analysis, experimental social-psychology, and cognitive psychology. Mr. Snowiss

C224H. Mass Attitudes and Behavior. Prerequisite: course 141 or 214A or consent of instructor. An analysis of the development and change of political attitudes in mass publics, and their relationship to voting, protest and violence. May be concurrently scheduled with Political Science C197B.

Mr. Brown, Mr. Petrocik

C224I. Political Parties and the Electoral Process. A critical examination of the literature on party systems and organization. Special attention will be given to political functions, electoral campaigns, and party cadres. May be concurrently scheduled with Political Science C197C.

Mr. Marvick, Mr. Petrocik

C226A. Personnel and Human Relations. An analysis of the policies, processes, organizations, and interrelations involved in public service. The Staff

C228B. Public Planning, Programming, and Budgeting. Public budgeting processes within a political and organizational framework. Special emphasis on the Federal program-budgeting system and the interchange between contemporary bureaucratic and decision theory of rational allocation of resources. May be concurrently scheduled with Political Science C197F.

Mr. Lippoff, Mr. Ries

C228C. Political and Administrative Aspects of Planning. A study of the political constraints on and support for effective planning. To be explored are the relationships between planning performance on the one hand, and forms of government, distribution of power, political culture, law and social structure on the other. Mr. Engelbert, Mr. Fried

C228D. The National Administrative System. An examination of the formulation and implementation of policy at the federal level. The consequences of administrative performance for American political and social life will be explored. May be concurrently scheduled with Political Science C197F.

Mr. Engelbert, Mr. Fried

C228E. State Administrative Systems. An analysis of state administrative systems, their local sub-systems, and their outputs. May be concurrently scheduled with Political Science C197F. Mr. Engelbert, Mr. Fried

C229. Urban Government. (Same as Architecture and Urban Planning M225C.) An analysis of the policies and procedures involved in the development and administration of governments in heavily populated areas. May be concurrently scheduled with Political Science C197F. Mr. Bolens

C230. Comparative Development Administration. An analysis of the development of government programs and the development of administrative institutions, with special attention to ecology. Comparisons are made both between countries and within countries. Mr. Fried, Mr. Sisson

C231A-C231D. Studies in International Relations.

C231A. Contemporary Problems in United States Foreign Policy. An intensive analysis of the policy formulation process and the substance of selected contemporary problems in foreign policy. Political and institutional factors affecting foreign policies will be stressed along with the analysis of policy options. May be concurrently scheduled with Political Science C197B. The Staff

C231B. National and International Defense Problems. This course analyzes various national security problems in both their military-technical and political dimensions. It seeks to develop in some depth issues likely to be raised in Political Science 136A, which, however, is not a prerequisite. May be concurrently scheduled with Political Science C197B. The Staff

C232. Seminar on International Political Economy. An intensive examination of various theoretical approaches to issues related to the politics of the world economy, and their application to historical and contemporary issues. Mr. Krasner

C235. Selected Topics in Comparative Politics. (Formerly numbered 225.) A critical examination of a major problem in comparative politics. The Staff

C236A. An introduction to the literature on the development of elective institutions and their performance. The course takes an interdisciplinary approach, emphasizing historical as well as contemporary cases and modes of analysis.

C236B. Prerequisite, either 236A or consent of instructors. A research seminar devoted to the analysis of particular problems and countries. Mr. Sisson, Mr. Snowiss

C238A-C238D. Studies in Public Law.

C238A. Evolution of Anglo-American Law Books. Surviving early records. Case reporting, from the year one hand, and forms of government, distribution of power, political culture, law and social structure on the other. Mr. Engelbert, Mr. Fried

The Staff

POLITICAL SCIENCE / 281
Graduate Seminars
Prerequisite for all graduate seminars: advance consent of instructors.

C250A-C250L. Seminars in Regional and Area Political Studies.
C250A. Latin-American Studies. May be concurrently scheduled with Political Science C197D. Mr. Mr. Gonzalez, Mr. Purcell
C250B. Russian and Slavic Studies. May be concurrently scheduled with Political Science C197C. Mr. Cattell, Mr. Kolkowicz, Mr. Korbonski
C250C. Chinese and East Asian Studies. May be concurrently scheduled with Political Science C197D. Mr. Baum
C250D. Japanese and Western Pacific Studies. May be concurrently scheduled with Political Science C197D. Mr. Baerwald
C250E. Seminar in African Studies. May be concurrently scheduled with Political Science C197D. Mr. Sklar
C250F. Middle Eastern Studies. May be concurrently scheduled with Political Science C197D. Mr. Jabber, Mr. Kerr
C250G. Commonwealth Studies. The Staff
C250H. Seminar in Western European Studies. May be concurrently scheduled with Political Science C197D. Mr. Suleiman
C250J. Southeast Asian Studies. May be concurrently scheduled with Political Science C197D. Mr. Luftine, Mr.

Individual Study and Research
596. Directed Individual Study or Research. (1/2 to 2 courses) A letter grade (A, B, C, D, or F) will be assigned by the professor supervising the study or research.

597. Preparation for the Comprehensive Examinations for the Master's Degree. (1/2 to 2 courses) This course is ordinarily taken only during the quarter in which the student is being examined. A grade of S/U will be assigned by the Department on the basis of the student's performance in the examination(s).

598. Research and Preparation of the Master's Thesis. (1/2 to 2 courses) A grade of S/U will be assigned by the professor supervising the master's thesis.

599. Research for and Preparation of the Doctoral Dissertation. (1/2 to 2 courses) A grade of S/U will be assigned by the professor supervising the dissertation. There is no restriction on the number of times an individual UCG student may enroll in any of the 590 series courses.

Psychiatry and Biobehavioral Sciences
(Department Educational Activities Office, B7-349 NPI)
T. George Bidder, M.D., Professor of Psychiatry in Residence.
Norman Q. Brill, M.D., Emeritus Professor of Psychiatry.
W. Jann Brown, M.D., Professor of Pathology and Psychiatry.
Nathaniel A. Buchwald, Ph.D., Professor of Biobehavioral Sciences and Anatomy in Residence.
Dennis P. Cantwell, M.D., Professor of Psychiatry.
Ching-Piao Chen, M.D., Professor of Psychiatry in Residence.
Kenneth M. Colby, M.D., Professor of Psychiatry.
Alexander Comfort, M.B., D.Sc., Adjunct Professor of Psychiatry.
Robert H. Coombs, Ph.D., Adjunct Professor of Biobehavioral Sciences (Sociology).
Norman Cousins, B.A., Adjunct Professor of Medical Humanities.
Joseph W. Cullen, Ph.D., Adjunct Professor of Biobehavioral Sciences (Public Health).
Jean S. deVellis, Ph.D., Professor of Anatomy and Biobehavioral Sciences.
Waldz J. Dixon, Ph.D., Professor of Biomathematics and Biobehavioral Sciences.
Robert B. Edgerton, Ph.D., Professor of Biobehavioral Sciences and Anthropology in Residence.
Bernice T. Eduson, Ph.D., Professor of Biobehavioral Sciences (Medical Psychology) in Residence.
Samuel Eduson, Ph.D., Professor of Biobehavioral Sciences and Biological Chemistry in Residence.
Richard K. Eyman, Ph.D., Professor of Biobehavioral Sciences (Psychology) in Residence.
Barbara Fish, M.D., Professor of Psychiatry.
Annen L. Fluharty, Ph.D., Professor of Biobehavioral Sciences (Biological Chemistry) in Residence.
Steven R. Forness, Ed.D., Professor of Biobehavioral Sciences (Special Education) in Residence.
Joaquin M. Foster, M.D., Professor of Psychiatry in Residence.
Rosslyn Gaines, Ph.D., Professor of Biobehavioral Sciences (Medical Psychology) in Residence.
Gary C. Galbraith, Ph.D., Professor of Biobehavioral Sciences (Medical Psychology) in Residence.
Ronald G. Gallimore, Ph.D., Professor of Biobehavioral Sciences (Psychology) in Residence.
John Garcia, Ph.D., Professor of Psychology and Biobehavioral Sciences.
Harold Garfinkel, Ph.D., Professor of Sociology and Biobehavioral Sciences.
Walter R. Goldschmidt, Ph.D., Professor of Anthropology and Biobehavioral Sciences.
Rodderic Gorney, M.D., Adjunct Professor of Psychiatry.
Milton Greenblatt, M.D., Professor of Psychiatry, Executive Vice-Chairman of the Department, Director of the Neuropsychiatric Institute Hospital and Clinics.
Herbert J. Grossman, M.D., Professor of Psychiatry in Residence.
Donald Guthrie, Ph.D., Adjunct Professor of Biostatistics and Biobehavioral Sciences.
John Hanley, M.L., Professor of Psychiatry in Residence.
Frank Hayes, M.D., Professor of Psychiatry in Residence.
Christoph M. Heinicke, Ph.D., Adjunct Professor of Biobehavioral Sciences (Medical Psychology).
Frank M. Hewitt, Ph.D., Professor of Education and Biobehavioral Sciences.
Yvonne B. Ferguson, M.D., Assistant Professor of Psychiatry in Residence.
Billy W. Floyd, M.D., Adjunct Assistant Professor of Psychiatry.
Robert H. Garner, M.D., Assistant Professor of Psychiatry in Residence.
David A. Gorelick, M.D., Assistant Professor of Psychiatry in Residence.
Robert H. Garner, M.D., Assistant Professor of Psychiatry in Residence.
Richard L. Heinrich, M.D., Adjunct Assistant Professor of Psychiatry.
Estelle T. Hughes, M.D., Assistant Professor of Psychiatry in Residence.
Kay Jamison, Ph.D., Assistant Professor of Biobehavioral Sciences (Psychology) in Residence.
Louis E. Jenkins, Ph.D., Assistant Professor of Biobehavioral Sciences (Medical Psychology) in Residence.
Jenny A. Kasdorf, Ph.D., Adjunct Assistant Professor of Biobehavioral Sciences (Medical Psychology).
Lewis M. King, Ph.D., Assistant Professor of Biobehavioral Sciences (Psychology) in Residence.
Ramzi Z. Kirakos, M.D., Assistant Professor of Psychiatry in Residence.
Asenath LaRue, Ph.D., Assistant Professor of Biobehavioral Sciences (Psychology) in Residence.
Ira M. Lesser, M.D., Assistant Professor of Psychiatry in Residence.
Keh-Ming Lin, M.D., Assistant Professor of Psychiatry in Residence.
Fred Loy, Ph.D., Assistant Professor of Biobehavioral Sciences (Medical Psychology) in Residence.
Stephen R. Marder, M.D., Assistant Professor of Psychiatry in Residence.
Barringer D. Marshall, M.D., Adjunct Assistant Professor of Psychiatry.
Keith Nuechtermiein, Ph.D., Assistant Professor of Biobehavioral Sciences (Medical Psychology) in Residence.
Leonora K. Petty, M.D., Assistant Professor of Psychiatry in Residence.
David E. Powles, M.D., Adjunct Assistant Professor of Psychiatry.
Robert S. Pyneos, M.D., Assistant Professor of Psychiatry in Residence.
Andrew T. Russell, M.D., Assistant Professor of Psychiatry in Residence.
Steven L. Schultz, M.D., Assistant Professor of Psychiatry in Residence.
Jerome M. Siegel, Ph.D., Assistant Professor of Biobehavioral Sciences (Psychology) in Residence.
Marian Sigman, Ph.D., Assistant Professor of Biobehavioral Sciences (Medical Psychology) in Residence.
Ethel S. Simmons, M.D., Adjunct Assistant Professor of Psychiatry.
Esther S. Sinetar, Ph.D., Assistant Professor of Biobehavioral Sciences (Psychology) in Residence.
James Spar, M.D., Assistant Professor of Psychiatry in Residence.
Gordon D. Strauss, M.D., Assistant Professor of Psychiatry in Residence.
Michael A. Strober, Ph.D., Assistant Professor of Biobehavioral Sciences (Medical Psychology) in Residence.
Jim H. Turner, Ph.D., Assistant Professor of Biobehavioral Sciences (Anthropology) in Residence.
Raymond A. Ulmer, Ph.D., Assistant Professor of Biobehavioral Sciences (Medical Psychology) in Residence.
Lewis Van Osdel, M.D., Adjunct Assistant Professor of Psychiatry.
David K. Welles, Ph.D., Assistant Professor of Biobehavioral Sciences (Medical Psychology) in Residence.
Kenneth B. Wells, M.D., Assistant Professor of Psychiatry in Residence.
Jeffrey N. Wilkins, M.D., Assistant Professor of Psychiatry in Residence.
Joel Whiten, Ph.D., Assistant Professor of Biobehavioral Sciences (Neurosciences) in Residence.
Vincent P. Williams, Ph.D., Adjunct Assistant Professor of Biobehavioral Sciences (Biological Chemistry).
Dean L. Wolcott, M.D., Assistant Professor of Psychiatry in Residence.
Gail E. Wyatt, Ph.D., Assistant Professor of Biobehavioral Sciences (Medical Psychology) in Residence.
Linda Andron, M.S.W., Adjunct Lecturer in Social Work.
Balbir Baiwa, M.A., Visiting Lecturer.
Barbara A. Bass, M.S.W., Adjunct Lecturer in Social Work.
Diane J. Bass, M.S.W., Adjunct Lecturer in Social Work.
M. Christine Benson, M.D., Visiting Lecturer in Psychiatry.
Jane C. Burroughs, M.S.W., Adjunct Lecturer in Social Work.
J. Alfred Cannon, M.D., Visiting Lecturer in Psychiatry.
Beatrice M. Cooper, M.S., Adjunct Lecturer in Social Services.
Ronald D. Cooper, J.D., Visiting Lecturer in Legal Psychiatry.
L. Jeanette Davis, D.S.W., Adjunct Lecturer in Social Work.
Carole L. Deets, M.S., Visiting Lecturer in Medical Health Planning.
William F. Donnelly, M.S.W., Adjunct Lecturer.
Angela Farrell, M.S.W., Adjunct Lecturer.
Juana L. Ferro, M.A., Demonstration Teacher.
Rebecca S. Fialkoff, M.A., Demonstration Teacher.
Florence Frisch, M.S.W., Adjunct Lecturer in Social Work.
Marie C. Fuller, Adjunct Lecturer in Psychiatry.
Phyllis Gainsborough, M.S., Demonstration Teacher.
Charlette B. Gell, M.S.W., Adjunct Lecturer in Social Work.
Jean S. Gitelson, B.S., Associate in Psychology.
Mary Lou Gottlieb, M.S.W., Adjunct Lecturer in Social Work.
Scott Harris, M.A., Visiting Lecturer in Psychology.
Carrie Jacobs, Ph.D., Visiting Lecturer.
Joan E. Johnson, M.S.W., Adjunct Lecturer in Social Work.
Martha B. Jura, Ph.D., Adjunct Lecturer in Psychology.
Charles V. Keenan, M.S.W., Adjunct Lecturer in Mental Hospital Administration.
Tom L. Kennon, M.S.W., Adjunct Lecturer in Social Work.
Marylin F. Kritzer, M.S.W., Associate in Social Work.
Tzu-En-Jen Lei, Ph.D., Specialist.
Barbara E. Linden, M.A., Demonstration Teacher.
Donald F. Lomas, M.S.W., Associate in Social Work.
Arthur Main, M.A., Visiting Lecturer in Psychiatry.
Myrtle Mandiberg, M.A., Adjunct Lecturer in Psychology.
Donald L. Mayhew, Ph.D., Demonstration Teacher.
Miriam A. Meyer, M.S.W., Adjunct Lecturer in Social Work.
Curtis R. Miller, M.A., Specialist.
Helga M. Miller, M.A., Specialist.
Hindy Nobler, M.S.W., Visiting Lecturer in Social Work.
Anita M. O'Connor, B.A., Demonstration Teacher.
Stephanie L. Pearse, M.S., Visiting Lecturer in Social Work.
Anderson W. Pollard, M.S.W., Adjunct Lecturer in Social Work.
Pearl Rapp, M.S.W., Adjunct Lecturer in Social Work.
V. Ellen Richey, M.A., Demonstration Teacher.
Judith W. Ross, M.A., Adjunct Lecturer.
Judith B. Rothman, M.S.W., Visiting Lecturer.
Catherine Sammons, M.S.W., Adjunct Lecturer in Social Work.
Olga B. Samuel, M.S.W., Adjunct Lecturer in Social Work.
Marjorie C. Schurman, Ph.D., Visiting Lecturer.
Catherine Z. Seigman, M.S.W., Adjunct Lecturer in Social Welfare.
Elizabeth Shima, M.S.W., Adjunct Lecturer in Social Work.
Maryellen Sparkes, M.A., Specialist.
Jane L. Stecher, M.S.W., Adjunct Lecturer in Social Work.
Judith M. Stock, M.S.W., Adjunct Lecturer in Social Work.
Bonnie Sturmon-Romain, B.A., Associate in Education.
Cynthia Telles, M.A., Associate in Medical Psychology.
Sherry Terzian, M.S., Associate Specialist.
Frank J. Trankina, Ph.D., Adjunct Lecturer in Biobehavioral Sciences (Medical Psychology).
Bertha B. Ungar, M.A., Adjunct Lecturer in Nursing.
Paul Von Blum, J.D., Adjunct Lecturer.
Ruth A. Waldron, M.S.S., Adjunct Lecturer in Social Work.
Lillian W. Weitzner, M.S.W., Visiting Lecturer in Social Work.
Nancy L. Weston, M.A., Associate in Counseling.
Joyce Will, M.S.W., Visiting Lecturer in Social Work.
Phonda Zosman, M.S., Visiting Lecturer in Rehabilitation Medicine.

The Master of Social Psychiatry (M.S.P.)

The Master of Social Psychiatry program is not admitting new students at this time. Graduate courses are offered by the Department which students in other degree programs can take on an elective basis.

*Graduate Courses

200. Colloquium on Biobehavioral Sciences. (1/4 course) Prerequisite: consent of instructor. The colloquium establishes a vehicle for continuing education on recent advances in various scientific fields relevant to behavior in its biobehavioral and biosocial contexts. It provides a forum for pertinent interdisciplinary discussion. Speakers present information from their area of competence and express their ideas on the relevance of this material to the broader issues of behavior.

Mr. West, Mr. Yager M201A-M201B-M201C. The Functional Organization of Behavior. (Same as Neuroscience M201A- M201B-M201C.) Prerequisites: consent of instructor; admission to M201B requires completion of M201A; admission to M201C requires completion of M201A-M201B. The course is divided into three quarters. The fall quarter is introductory and focuses on the development of behaviors within different species and the functional uses of behaviors. An evolutionary biological perspective is used as the framework for the fall quarter. The winter quarter focuses on research studies designed to take into account the functional behavior of animals. The spring quarter focuses on special questions of interest to students.

Mr. Eidsmon, Mr. McGuire

*For concurrently scheduled courses ("C" prefixed) suitably separate activities and/or standards for performance and evaluation will be applied for graduates and undergraduates.
204A-204B-204C. Psychiatric Theory and Practice. (¼ course each) Prerequisite: consent of instructor. The theory of psychoanalytic psychotherapy is discussed. Comparison of the classical analytic, Kleinian, and Eriksonian theories are demonstrated in segment A. Segments B and C concentrate on historical Freudian theory compared to current daily clinical practice and theory.

208A-208B-208C. Clinical Neuropsychology: Assessment of Brain Damage. (1 course each) Prerequisites: Graduate or Post-Graduate Standing and consent of instructor. The aim of the course is to introduce and review neuropsychological concepts, including functional neuroanatomical systems of the brain, analytic and synthetic activities of the brain, the effects of generalization of focal brain impairment on behavior, and the use of neuropsychological tests and instruments. The Fall quarter focuses on fundamentals of neuropsychology and the assessment of brain damage in adults. The second quarter reviews the effects of brain damage in children and child neuropsychological assessment. The third quarter is devoted to the neuropsychological assessment of particular patient groups; e.g., the elderly, the epilepsies and dyscontrol syndromes. Mr. Marsh, Ms. Marsh

209A-209B-209C. Behavior Therapy Practicum. (1 course each) Prerequisite: consent of instructor. The behavior therapy practicum provides instruction and supervision in the behavioral treatment of a variety of problems presented by adult outpatients. These include anxiety, affective, conversion, obsessive-compulsive, sexual, homicidal, and suicidial disorders. By means of a lecture-workshop approach, trainees learn behavioral analysis and assessment, personal effectiveness training, systematic and intensive desensitization, contingency contracting and management, and cognitive-behavioral modification. Mr. Mumford

222. Transcultural Psychiatry. (Same as Anthropology M234-P.) Prerequisite: consent of instructor. Consideration of psychiatric topics in cross-cultural perspective. Social, economic, political, religious, cultural, historical, biological and other variables. Mr. Tymchuk, Mr. Cantwell

223. MMPI Seminar. (¼ course) Prerequisite: consent of instructor. Topics covered included: 1) MMPI scale problems, 2) a theory of the Minnesota Multiphasic Personality Inventory (MMPI) and psychopathology in general based on two-factor conditioning and physiological substrata, and 3) code types and their transference and treatment indications. Mr. Carroll

224. Seminar on Aging and Psychopathology, (½ course) Prerequisite: consent of instructor. The format will be a combination of patient interviews and case discussions. Students will review and discuss pertinent literature in gerontology and geriatrics, including psychology, sociology, clinical medicine, pharmacology, neurology, and psychiatry. The course will include a survey of psychopathology as seen among the aged, including a discussion of OBS, affective disorders and schizophrenia in the aged. Ms. Janvick, Mr. Straker

225. Diagnostic Evaluation of Psychopathology. (¼ course) Prerequisite: consent of instructor. The course focuses on recent empirical and methodological advances in clinical psychopathology. Lecture presentations and discussion will center on the major syndromes of psychopathology in adolescence and adulthood, their distinguishing symptomatology, course and etiologic correlates, and methods for obtaining reliable judgments of a patient's current psychiatric status. Mr. Strober

226A-226B. Childhood Schizophrenia Research Seminar. (½ course) Prerequisite: consent of instructor. Current research in the causes and behavioral and biological mechanisms underlying childhood schizophrenia will be included.

227. Electroencephalography (EEG) in Psychiatry. (½ course) Prerequisite: consent of instructor. A survey of EEG and evoked potential (EP) methods and research into human mental function, with particular attention to EEG and EP correlates of various neuropsychological disorders of adults and children.

228. Behavioral Medicine. (½ course) Prerequisite: consent of instructor. Review of behavioral science knowledge and techniques relevant to the understanding of physical health and illness and discussion of the application of this knowledge and these techniques to prevention, diagnosis, treatment and rehabilitation. Integration of behavioral and biomedical approaches is stressed.

229A-229B-229C. Family Therapy Seminar (A-West). (1/4 course each) Prerequisites: assignment to West A-West and consent of instructor. Course includes an overview of the types of families seen in family therapy, a discussion of various techniques and treatment approaches, and case presentations to integrate the theoretical material with actual family situations. Mr. Brown

230. Confl uxs and Asian Americans. Prerequisite: consent of instructor. The seminar will focus on the cultural aspects relevant to the treatment of Asian Americans. The philosophical teachings of Confucius will be discussed. Similarities and differences among Asian Americans and relevant clinical issues will be presented. Graded S/U. Mr. Yamamoto, Mr. Chen

231. Mexican Americans and Mental Health. (¼ course) Prerequisite: consent of instructor. Course will highlight mental health issues and needs of Mexican Americans through seminars and videotapes dealing with: historical comparison of psychiatry in Mexico and the United States, an analysis of the various theoretical perspectives regarding bio-psycho-social behavior; distinguishing psychodynamic from cultural factors in the treatment of the Spanish-speaking patients; treatment of Hispanic families, couples, undocumented persons and criminal system clientele.

232A-232B-232C. Human Sexual Dysfunction. (½ course each) Prerequisite: consent of instructor. One year training and research course in the direct behavioral treatment of human sexual dysfunction. A combination of didactic material and supervised experience. Mr. Morales

233. Alcoholism and Drug Abuse Among Women. Prerequisite: consent of instructor. Discussion of the psychosocial aspects of abuse of alcohol and other drugs among women. Topics will include etiology, prevention, treatment, hormonal influences, and the role of the family. Emphasis will be placed upon current theoretical perspectives and research findings.

234A-234B-234C. Affective Disorders. (¼ course each) Prerequisites: Graduate Standing and consent of instructor. Seminar will cover general topics related to the primary affective disorders (depression, manic depressive illness) including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Ms. Jamison

M235. A Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Anthropology M260 and Education M222.) Prerequisite: consent of instructor. Current topics in psychological anthropology. The group selects topics for discussion pertaining to psychological, diagnostic evaluation and modalities of treatment. Ms. Holroyd

CM237. Theoretical Issues in Disorders of Language Development. Introduction to the field of language clinicians in the evaluation and treatment of articulation and phonetic problems presented by adult outpatients. These include anxiety, affective, conversion, obsessive-compulsive, sexual, homicidal, and suicidial disorders. By means of a lecture-workshop approach, trainees learn behavioral analysis and assessment, personal effectiveness training, systematic and intensive desensitization, contingency contracting and management, and cognitive-behavioral modification. Mr. Krey

240A-240B-240C. Assessment and Treatment of African-American Families. (1/2 course each) Prerequisite: Graduate Standing and consent of instructor. The course aids mental health professionals and trainees in understanding the African American family in terms of their cultural milieu, historical background and economic status. Didactic presentations by instructors and invited guests form the basis for a supervised evaluation and case management in an African American family setting. Ms. Bass, Ms. Powell, Ms. Wyatt

241A-241B-241C. Observation of Group Psychotherapy. (1/2 course each) Prerequisite: consent of instructor. Principles of adult psychotherapy will be explored through observation of an analytic group. Lectures and discussion. Major theoretical emphasis will be on humanistic-group dynamic approaches.

Mr. Rosen

242A-242B-242C. Child Psychotherapy Seminar. (1 course each) Prerequisite: consent of instructor. During the Fall and Winter quarters, videotaped diagnostic and treatment sessions of children and their families will be provided for discussing such topics as: diagnostic criteria, the beginning of treatment, the overdetermined nature of the symptom, transference phenomenon related to parental conflict, initial recovery of psychological reactions to past events, factors enhancing future working relationships with child and family, and various theoretical and practical issues including the handling of terminations. During the Spring quarter, the theory and principles of psychoanalytic work with parents will be offered. Focus in order to amplify clinical and theoretical issues.

Mr. Heinicke

243A-243B-243C. Mental Retardation Interdisciplinary Core Curriculum. (1/4 course each) Prerequisite: consent of instructor. A survey series on major topical areas of mental retardation covering epidemiology, nosology, assessment, health care delivery systems, basic genetics, nutrition, direct care, and special needs. Presented in an interdisciplinary framework as generic information independent of discipline. Mr. Tymchuk, Mr. Cantwell
244. Computers in Mental Retardation Research. Prerequisite: consent of instructor. An introduction to the basic nature of digital computer systems, with emphasis on their impact on society. The course is directed toward providing the student with a broad general understanding of applications and limitations of computers. Specific examples are drawn from clinical, research, and administrative applications within the Mental Retardation and Developmental Disabilities Program. Mr. Guthrie, Mr. Hull

245A-245B. Psychological Assessment of the Preschool Child. Prerequisite: consent of instructor. Lecture, 1 1/2 hours; testing, two hours. This course will focus on the psychological assessment of the preschool child. Specific emphasis will be placed on the assessment of children with developmental disabilities and children who are generally thought to be "untestable." The course will have a practical orientation. The course will involve two hours per week of supervised testing. Psychiatry 245A is a prerequisite of Psychiatry 245B. S/U grading. Ms. Freeman

246. Psychological Aspects of Mental Retardation. (Same as Psychology M246.) Prerequisite: consent of instructor. Discussion of the psychological aspects of mental retardation to include classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare, social work). Mr. Schuch

247A-247B-247C. Neuropsychological and Neuro-psychological Bases of Mental Retardation and Human Development. (1/4 course each) Prerequisites: Graduate Standing and consent of instructor. Involvement in research and training in neuropsychology and neuropsychology with particular reference to modern developmental studies. Faculty members or advanced students present results of their research work in the context of available literature, intense discussion occurs during and after presentations. Mr. Levine, Mr. Buchwald

248. Research Rounds in Mental Retardation and Developmental Disabilities. (1/4 course) Prerequisite: consent of instructor. Monthly session will consist of presentations of a patient and discussion of research approaches relevant to that patient. Staff members from various disciplines and invited speakers will participate. Mr. de Vellis

249A-249B. Language Disorders of Childhood. (1/4 course each) Prerequisite: consent of instructor. Course reviews language disorders in childhood and their relationship to normal developmental patterns and to other aspects of behavior, the critical period hypothesis, universals of language development, environment and language development, linguistic theories, neuromotor functions underlying speech and language, diagnostic methods, and approaches to remedial language training. Ms. Baltaxe

250. Introduction to the Principles and Techniques of Mammalian Cell Culture. Prerequisites: Graduate or Medical Student Status and consent of instructor. This course provides a background in the physiology and biochemistry of mammalian cells in culture through lecture and selected readings in the classical field. Designed to be taken concurrently with 251. Mr. Haggerty

251. Laboratory Exercises in the Techniques of Mammalian-Cell Culture. Prerequisites: Graduate or Medical Student Status and consent of instructor. This course provides a working knowledge of the physiology and biochemistry of mammalian cells in culture through laboratory exercises involving the propagation and manipulation of differentiated and undifferentiated mammalian cell lines. Designed to be taken concurrently with Psychiatry 250. Mr. Haggerty

252. Clinical Child Psychiatry. (1/4 course) Prerequisite: consent of instructor. Weekly seminars covering the basic clinical aspects of child psychiatry. Assigned readings and student presentations used as a basis for discussion of a particular topic. Topicscovered include interviewing of parents and children, diagnosis in child psychiatry, and the clinical child psychiatric syndrome. Mr. Cantwell

253. Seminar: Child Development, (1/4 course) Prerequisite: consent of instructor. The seminar is divided into three sections: theories of development, systems of child development, and chronological aspects of child development. Class meetings are structured so that the students play a major role in each of the seminar sessions. Mr. Cantwell

254. Counseling Families of Handicapped Children. (1/4 course) (Same as Social Work M242.) Prerequisite: consent of instructor. This course will survey legal and ethical issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional reactions, community resources, and issues of genetic counseling, placement, and developmental crises. Ms. Gottlieb, Ms. Shima

256. Basic Clinical Child Psychopathology. (1/4 course) Prerequisite: consent of instructor. Weekly seminars covering the basic clinical aspects of child psychopathology. Readings will be provided for a basis of discussion on topics including interviewing of parents and children, diagnosis, and related syndromes. Mr. Cantwell

257A-257B-257C. Diagnostics and Therapeutics of Child Neurological Disorders. (1/4 course each) Prerequisite: consent of instructor. This course is directed toward the language specialist seeking training in the developmental disabilities of language. The course includes training in diagnostic techniques and therapy approaches. Linguistic disabilities are placed within the framework of total behavior. The clinical practicum includes individual case supervision, a review of the pertinent literature, and a discussion of research topics. Students are required to complete neuropsychological and psychological assessments. Mr. Levine, Mr. Buchwald

259. Legal and Ethical Issues in Developmental Disabilities. (1/4 course) Prerequisite: consent of instructor. Discussion of current laws in mental retardation and related disabilities, ethics, biomedical ethics, ethical codes, issues, how to resolve them, videotape, discussion of cases. Mr. Tymchuk

261. Seminar on Law, Medicine and Human Values. (1/4 course) (Same as Law M535; formerly numbered M261A-261B.) Prerequisite: consent of instructor. The seminar will deal with legal, philosophical and psychological issues arising in the context of the doctor-patient relationship. Emphasis will be placed upon an appreciation of the values, facts underlying and reflected in medical practices and legal policies. Course material will be taken from legal, medical, and philosophical literature, legislation, case law, and medical case histories. Mr. Winslade

262. Law and Psychiatry. (1/4 course) (Same as Law M325.) Prerequisite: consent of instructor. Introduction to the ethical and legal implications of the orientation, premised, functioning, and potential contributions of psychiatry. Review of the practical and theoretical aspects of collaboration between law and psychiatry. Mr. Winslade

264. Biofeedback. Theory, Research, and Clinical Application. (1/4 course) Prerequisites: consent of instructor. Introduction to concepts and techniques of biofeedback. Discussion of research and applications to various clinical problems (hypertension, headache, pain and anxiety, sexual dysfunction, cardiac arrhythmias, neuromuscular disorders, etc.) Training in the use of portable biofeedback devices. Consideration of research and clinical issues. Mr. Shapiro

265. Mind and Brain in Evolution. (1/4 course) Prerequisite: consent of instructor. This course reviews the fossil evidence on the organic evolution of the brain and its application to understanding human behavior and the evolution of mind and intelligence. Quantitative approaches are emphasized. Although some implications for cognitive psychology and individual differences are considered, the evolutionary analysis is above the species level. Mr. Jerison

266. Psychophysiological Research. Prerequisite: consent of instructor. Advanced seminar and discussion of ongoing laboratory research. Issues include concepts, experimental design, measurement, and data analysis. Current topics are biofeedback, conditioning, and behavioral control of automatic functions, regulation of physiological and subjective reactions to stress and pain, and the evaluation of clinical biofeedback. Mr. Serafinides

271. Ethology of Motivation and Conditioning. (1/4 course) Prerequisites: Graduate Standing and consent of instructor. Basic facts and concepts of motivation and learning in animals will be presented in the framework of ethological and neurophysiological approaches. Classical and instrumental conditioning processes as they are related to culture. Particular topics will change from quarter to quarter and the course can be repeated for credit. Mr. Kennedy, Mr. Langness

273. Growth Control, Transformation, and Malignancy in Mammalian Cells in Culture. Prerequisites: Graduate Standing and written permission from the instructor. Evaluation of currently available cultured mammalian cell types as experimental models to study growth control in normal, nonmalignant cells in vitro and to analyze the cytoskeletal, biochemical and cytophysiological differences between normal and transformed and/or malignant cells in culture. Mr. Haggerty

274. Neuropsychology and Behavior. (1/4 course) Prerequisites: Graduate Standing and consent of instructor. The course will provide an analysis of strategies and approaches used to study behavior of mammalian organisms. Special emphasis will be placed on recent developments in electrophysiological recording techniques and applications to various clinical problems (hyperthermia, head pain, anxiety, sexual dysfunction, cardiac arrhythmias, neuromuscular disorders, etc.) Training in the use of portable biofeedback devices. Consideration of research and clinical issues. Mr. McCauley

276. Consultation to Sex Education Programs in the Elementary School. (1/4 course) Prerequisites: Graduate Standing and consent of instructor. This seminar will focus on issues of consultation program development and evaluation of sex education for elementary school children and parents. It will offer participants the opportunity to observe behavior of and interact with normal children within the school setting. Ms. Meyer, Ms. Wyatt

277. From Research to Practice: Biobehavioral Contributions. (1/4 course) Prerequisite: consent of instructor. An overview of biobehavioral research as it is currently translated into therapeutic and preventive practice across disciplines. S/U grading. Mr. Serafinides

278. Clinical Psychopharmacology Research. Prerequisite: consent of instructor. Directed research experience at the graduate level. Research skills will be taught in the practical setting of ongoing psychopharmacology research projects and development of ongoing psychopharmacology research projects and development of proposed new projects focusing on practical problems, design, methodology, procedures and instrumentation. Mr. May
208. Alcohol and Drug Abuse. (¼ course) Prerequisite: consent of instructor. Alternative models of alcohol and other drug addictions will be examined and implications assessed for public policy regarding their control. Prevention efforts and findings from California and national surveys will be considered, with primary emphasis upon alcohol use and abuse.

Mr. Fomass

281. Behavioral Therapy in an Educational Setting. (¼ course) Prerequisite: consent of instructor. The course will provide supervised experience in a classroom working with exceptional children. Theoretical background will be furnished through a one-hour weekly lecture. Mr. Fomass

282. Schizophrenia: A developmental Perspective. (½ course) Prerequisite: consent of instructor. The course will review research on the transmission of schizophrenia. Emphasis will be placed on a critical appraisal of the research strategies used to tease apart the relative contributions of environmental and genetic factors in the transmission of schizophrenia. An emphasis will be placed on studies of children at risk for schizophrenia. Ms. Asarnow

283. Theories of Childhood Psychosis. (¼ course) Prerequisite: consent of instructor. The aim of the course is to present the biological and neurophysiological theories of the etiology of childhood psychoses.

Mr. Tanguay

285A-285B-285C. Advanced Family Therapy. (½ course each) Prerequisite: consent of instructor. Seminar on the role of operant techniques in the assessment, treatment, and understanding of problems of autism and mental retardation. Mr. Frankel, Ms. Freeman

288. The Psychologist as an Expert Witness. (¼ course) Formerly numbered 486. Prerequisite: consent of instructor. Seminar on the role of the opemaker in the assessment, treatment, and understanding of problems of autism and mental retardation.

Mr. McCready

289. Current Topics in the Biobehavioral Sciences. (½ to 1 course) Prerequisites: consent of instructor. Current issues in the biobehavioral sciences will be offered on a selective basis depending upon instructor interest and topical relevance of problems. See Schedules of Classes for topics and instructors. May be repeated for credit. The Staff

403. Individual Case Supervision. (½ to 1 course) Prerequisites: consent of instructor and Department Chairman. One-to-one supervision of individual therapy cases. Includes analyses of patient data, supervision of ongoing treatment, informal didactic sessions on personality theory, and applications to patient management. Consent is based on a written proposal to be structured by instructor and student prior to enrollment. Additional information and proposal forms are available in the Educational Activities Office, B7-349 NPI. The Staff

413. Community Meeting (2-West). (¼ course) Prerequisites: assignment to Ward 2-West and consent of instructor. One hour per week is devoted to individual experience in leading a large group of patients and staff. Leadership is by rotation. A half-hour process didactic session follows. Mr. Pyeong

414. Emergency Treatment Attending Rounds. (¼ course) Prerequisites: assignment to Emergency Treatment Unit and consent of instructor. Cases seen in the emergency room during the preceding night are reviewed by a consultant and the Emergency Treatment Staff. Assessment techniques, methods of interim and alternate modes of treatment are explored. Mr. Swanson

415. Treatment Planning Meetings. (¼ course) Prerequisite: consent of instructor. The course focuses on treatment and management problems posed by inpatient psychiatry. Clinical psychopathology, treatment plans and interdisciplinary evaluation and decision making. The emphasis is on formulating accurate diagnostic assessments and planning effective treatment programs utilizing the therapeutic methods of the milieu (somatic therapies, behavioral techniques, family therapy, group process, individual and dyadic treatment, etc.).

Section 1: 2-West Mr. Pyeong
Section 2: 2-South Mr. Gerner
Section 3: A-South Mr. Strober
Section 4: A-West Ms. Carlson

424. Ward Milieu Meeting. (¼ course) Prerequisite: consent of instructor. Milieu course meetings are designed to explore experientially and didactically the multiplicity of groups process on a psychiatric inpatient ward.

Section 1: A-South Mr. Strober
Section 2: A-West Ms. Carlson
Section 3: 2-West Mr. Pyeong

425. Child Pre-Admission, Admission and Dispo- sition Conference. (¼ course) Prerequisite: consent of instructor. Pre-admission is the case study conference for prospective inpatients. This course deals with 1) interview techniques, 2) suitability for admission, and 3) goals for hospitalization. Admission and disposition include presentation of problem cases, usually with combined physical and intellectual defects, for interdisciplinary problem solving.

Section 1: A-South Mr. Strober
Section 2: A-West Ms. Carlson
Section 3: 2-West Mr. Pyeong

426. Psychology Interns' Psychosomatic Liaison Case Conference. Prerequisite: consent of instructor. The conference is designed to explore the psychosomatic aspects of physical illness. Cases will be discussed with regard to management issues, psychosomatic therapy issues, methods of psychodiagnosis, counter transference and relevant literature. In addition, participants will receive individual supervision on a weekly basis.

Mr. Weilisch

429. Child Outpatient Team. (¼ course) Prerequisite: consent of instructor. Weekly team meetings to coordinate the clinical activities of the trainees in the Child Outpatient Department. Discussion of the literature and theories related to selected cases. Graded S/U.

Section 1: First Year Child Fellows. Mr. Cantwell Section 2: Second Year Child Fellows. Mr. Simmons, Mr. Tanguay, Mr. Tarjan

Section 3: Second Year Residents. Mr. Yager Section 4: Second Year Residents. Mr. Yager Section 5: Second Year Residents. Mr. Ritvo Section 6: UAF Trainees. Mr. Tychuk

445. Family Therapy Seminar for Clinicians. (¼ course) Prerequisites: prior clinical responsibility and treatment experience with individuals or families and consent of instructor. Case material of family development and treatment is presented in the seminars. The emphasis is on structural family therapy. Alternative models may be reviewed during the year. Videotape is used extensively. Case supervision is available. Participants may be treating one or more families. Mr. Gottlieb

446. Structural Family Therapy. (¼ course) Prerequisite: prior clinical experience in family therapy and consent of instructor. Intensive focus is on structural family therapy. Case material of family development and treatment cases is presented in the seminar. Mr. Gottlieb

462A-462B-462C. Advanced Mental Health Consultation. Prerequisite: consent of instructor. This course provides knowledge of children in schools through: 1) field experience; 2) a didactic program; 3) on-the-job training. Focus is on the role of the mental health consultant in the school setting. Mr. Cantwell

471. Child Psychiatry Grand Rounds. Prerequisite: consent of instructor. Each month one subspeciality of the Mental Retardation and Child Psychiatry Program presents a major clinical problem. Senior faculty discussants participate. The presenting trainees are expected to cover the pertinent literature and to assemble the critical elements of information on the case or problem at hand.

Mr. Funderburk and the Staff

472A-472B-472C. Nursing Care of the Devel- opermentally Disabled. (Same as Nursing M410A-M410B-M410C.) Prerequisite: enrollment in the Master's Program in School of Nursing. Study of the handicapping conditions of childhood and their effects upon the child and his/her family. This course combines didactic material and supervised clinical experience. Focus is on prevention, systematic assessment, planning, implementation and evaluation of nursing care. During the final quarter the student participates in ward rounds, planning and delivery of health care to the developmentally disabled in the community.

Ms. Savino

Mr. Funderburk and the Staff

477A-477B. Advanced Family Therapy Seminar for Clinicians. (½ course) Prerequisite: consent of instructor. Alternative and derivative models to structural family therapy are critically reviewed by the seminar group; e.g., family sculpting, network therapy, various communication models, issues of coherence, etc. Problem cases may be presented by the enrollees, including ethical dilemmas in family therapy. This course is required for first-year fellows and is elective for experienced clinicians.

Mr. Gottlieb

478. Clinical Genetics. Prerequisites: medical graduate and consent of instructor. Weekly clinical rounds on patients seen on the wards during the preceding week. House staff and others involved in clinical work may attend. Usually an in-depth discussion of the medical and genetic aspects of one or more disorders is presented. Ms. Crandall
Psychology

Charles Y. Nakamura, Ph.D., Professor of Psychology.
Donald Novin, Ph.D., Professor of Psychology.
Amado Padilla, Ph.D., Professor of Psychology.
Allan Parucci, Ph.D., Professor of Psychology.
Bertram H. Raven, Ph.D., Professor of Psychology.
David O. Sears, Ph.D., Professor of Psychology and Political Science.
Joseph G. Sheehan, Ph.D., Professor of Psychology.
Gerald H. Shure, Ph.D., Professor of Psychology and Sociology.
James P. Thomas, Ph.D., Professor of Psychology.
Bernard Weiner, Ph.D., Professor of Psychology.
Richard Centers, Ph.D., Emeritus Professor of Psychology.
S. Carolyn Fisher, Ph.D., Emeritus Professor of Psychology.
Joseph A. Gengerelli, Ph.D., Emeritus Professor of Psychology.
Milton E. Hahn, Ph.D., Emeritus Professor of Psychology.
F. Newell Jones, Ph.D., Emeritus Professor of Psychology.
George F. J. Lehner, Ph.D., Emeritus Professor of Psychology.
Donald B. Lindsay, Ph.D., Sc.D., Emeritus Professor of Psychology and Physiology.
Jessie L. Rhulman, Ed.D., Emeritus Professor of Psychology.
Eliot H. Rodnick, Ph.D., Emeritus Professor of Psychology.
John P. Seward, Ph.D., Emeritus Professor of Psychology.
Marion A. Wenger, Ph.D., Emeritus Professor of Psychology.
Howard S. Adelman, Ph.D., Associate Professor of Psychology and Lecturer in Education.
Arthur P. Arnold, Ph.D., Associate Professor of Psychology.
Richard P. Barthol, Ph.D., Associate Professor of Psychology.
Jackson Beatty, Ph.D., Associate Professor of Psychology.
Elizabeth L. Bjork, Ph.D., Associate Professor of Psychology.
Jacqueline D. Goodchilds, Ph.D., Adjunct Associate Professor of Psychology and Associate Research Psychologist.
Gerald M. Goodman, Ph.D., Associate Professor of Psychology.
Constance L. Hammen, Ph.D., Associate Professor of Psychology.
Maria Jacobsi, Ph.D., Adjunct Associate Professor of Psychology.
Donald G. MacKay, Ph.D., Associate Professor of Psychology.
Dennis J. McIntrye, Ph.D., Adjunct Associate Professor of Psychology and Associate Research Anatomist.
George E. Mount, Ph.D., Associate Professor of Psychology.
L. Anne Peplau, Ph.D., Associate Professor of Psychology.
Shelley E. Taylor, Ph.D., Associate Professor of Psychology.
Thomas D. Wickens, Ph.D., Associate Professor of Psychology.
J. Arthur Woodward, Ph.D., Associate Professor of Psychology.
Eran Zaidel, Ph.D., Associate Professor of Psychology.
Paul R. Abramson, Ph.D., Assistant Professor of Psychology.
Andrew Christensen, Ph.D., Assistant Professor of Psychology.
Halford T. Fairchild, Ph.D., Assistant Professor of Psychology.
Patrice L. French, Ph.D., Assistant Professor of Psychology.
Barbara A. Gutek, Ph.D., Assistant Professor of Psychology.
Barbara Hayes-Roth, Ph.D., Adjunct Assistant Professor of Psychology.
Vickie M. Mays, Ph.D., Assistant Professor of Psychology.
Signrid R. McPherson, Ph.D., Adjunct Assistant Professor of Psychology and Medical Psychology.
Hector F. Myers, Ph.D., Assistant Professor of Psychology.
Nancy L. Rader, Ph.D., Assistant Professor of Psychology.
Perry W. Thordyke, Ph.D., Adjunct Assistant Professor of Psychology.

Andrea A. Ackerman, Ph.D., Assistant Research Psychologist.
Armand A. Akite, Ph.D., Associate Clinical Professor of Psychology.
Dorothy V. Anderson, Ph.D., Associate Clinical Professor of Psychology.
Joseph A. Angelo, Ph.D., Associate Clinical Professor of Psychology.
Charles M. Bowdlear, Ph.D., Associate Clinical Professor of Psychology.
Marcelline M. Burns, Ph.D., Assistant Research Psychologist in Psychology and Engineering.
Matthew W. Buttiglieri, Ph.D., Clinical Professor of Psychology.
William E. Davis, Ph.D., Associate Clinical Professor of Psychology.
Darrell C. Doremus, M.A., Lecturer in Psychology.
Jeri A. Doane, Assistant Research Psychologist.
Mary-Lynn Doscher, Ph.D., Assistant Research Psychologist.
Gary Falco, Ph.D., Associate Clinical Professor of Psychology.
Norma D. Feushbach, Ph.D., Professor of Education and Psychology.
John T. Friar, Ph.D., Assistant Clinical Professor of Psychology.
Louis F. Friedman, Ph.D., Lecturer in Psychology.
Pamela C. Freundl, Ph.D., Lecturer in Psychology.
Rosslyn Gaines, Ph.D., Professor of Medical Psychology and Psychology in Residence.
Ralph E. Geiselman, Ph.D., Lecturer in Psychology.
Beverly Golden, Ph.D., Associate Clinical Professor of Psychology.
Thomas C. Greening, Ph.D., Lecturer in Psychology.

Ms. Crandall and the Genetics Staff

479. Genetics Clinic Presentation. Prerequisite: consent of instructor. A weekly clinical teaching session on the patients seen in the preceding Genetics Clinic. An in-depth discussion on the genetics of each disorder follows.

480. Analysis of Human Chromosome Studies. (1/2 course) Prerequisite: consent of instructor. Chromosome karyotypes prepared in the cytogenetics laboratory during the preceding week are presented and discussed with reference to clinical findings. Teaching includes the interpretation of abnormal karyotypes and the technical aspects of routine and special chromosome stains.

481. Chromatography Review. Prerequisites: premedical course or biochemistry and consent of instructor. A weekly session in which amino acid chromatography carried out during the preceding week is presented. Teaching concerns the interpretation of abnormal chromatograms together with the technical aspects of the tests used.

Mr. Cederbaum

482A-482B-482C. Psychology Intern's Group Process. (1/2 course each) Prerequisite: consent of instructor. The purpose of this course is to teach the students about group processes and dynamics. The course will involve an active learning experience whereby the students study their own group interactions in order to examine group process variables such as: styles of interaction and nonverbal methods of communication, the development of trust, self-disclosure, and the effects on group process of stereotypes about ethnic and masculine-feminine characteristics of people.

Ms. Holroyd

485. Medical Genetics Seminars. Prerequisites: introductory course and consent of instructor. A weekly lecture series intended for those interested in genetics or in the specific topic to be presented. Speakers are invited for their expertise or research in some special area related to genetics and may be from UCLA or elsewhere. Discussion and questions from the audience are encouraged.

Genetics Staff

595P. Individual Studies in Psychiatry. (1/2 to 2 courses) Prerequisites: consent of instructor and Department Chairman. Consent is based on a written proposal outlining the course of study. The proposal is to be structured by instructor and student at time of initial enrollment. Directed individual research and study in psychiatry at the graduate level. Additional information and course proposal forms are available in the Educational Activities Office, B7-349 NPI.

The Staff
Graduate Program

The Department offers the Ph.D. degree, and the student may obtain the M.A. degree en route to the Ph.D. The Department does not admit candidates for the M.A. degree only. (See Requirements for the M.A. and Ph.D. Degrees below.) For the Ph.D. degree, all students are required to obtain thorough grounding in research methodology and psychological theory. Major specialized training is available in the areas of psychology listed below under Major Fields or Subdisciplines.

Admission Requirements

Admission to the Ph.D. program normally requires an undergraduate degree in psychology. However, students from other areas (particularly from the mathematical, physical, biological, and social sciences) may be admitted if their interests and abilities are compatible with the Department’s graduate program. In any case, the student must have broad knowledge of psychology (for specific requirements, see below). Students are admitted to the program, during Fall Quarter only and on a full-time basis only. Applicants must mail the following documents directly to the Psychology Department by December 30 to be considered for admission the following Fall:

a. The departmental Application for Admission to the Doctoral Program. This can be obtained from the Graduate Admissions Assistant, 1283 Franz Hall.

b. Three letters of recommendation.

c. One official transcript from each college attended.

d. Scores from the Graduate Record Examination (GRE) Aptitude Test and the Advanced Test in Psychology. The Advanced Test scores should be no older than three years. There is no penalty incurred by students retaking the GRE.

e. An official score report of the Miller Analogies Test. Foreign students or U.S. students currently overseas are exempt from this requirement.

Students who are being considered as finalists to the Clinical program may be required to meet with the Clinical faculty for an interview. Exemptions from this requirement are made by the Clinical Admissions Director on a case-by-case basis.

A departmental brochure describing the graduate program in Psychology may be obtained from the Graduate Admissions Assistant, 1283 Franz Hall. Incoming students are expected to have had (1) a course in statistics (UCLA equivalent: Psychology 41); (2) two courses from among learning (Psychology 110), physiological (Psychology 115), and perception (Psychology 120); and (3) two courses from among the following alternatives: (a) personality (Psychology 125) or abnormal (Psychology 127); (b) developmental (Psychology 130); and (c) social (Psychology 135). Students who have not had training in these areas will be asked to remedy deficiencies by taking appropriate coursework or examinations. In addition, it is recommended that students have adequate preparation in mathematics, physics, chemistry, and the biological and social sciences, at least to the extent of a quarter’s work at the college level in each. Continuation in the Ph.D. program is contingent upon satisfactorily clearing undergraduate deficiencies by the end of the fourth quarter in residence.

Advising

Each student applies, and is accepted into, one of the departmental areas (described below). Students are assigned individual faculty advisers with whom they are required to meet each quarter, to receive study list approval. The adviser reviews the student’s transcripts and makes recommendations for cleaning deficiencies.

Students are evaluated quarterly while satisfying Core Program requirements, a period of time which spans four to six quarters. The evaluations are conducted by the Graduate Evaluation Committee.

Major Fields or Subdisciplines

Students may major in Clinical, Cognitive, Developmental, Learning and Behavior, Measurement and Psychometrics, Personality, Physiological, or Social Psychology. With the exception of Clinical, students can minor in any of the areas listed above, as well as in Industrial. Students may petition for individualized minors or a minor in Experimental Psychopathology. Training is also available in Community Psychology.

Foreign Language Requirement

Competence in one of the following foreign languages is required of students in the area of Measurement and Psychometrics: French, German, Italian, Spanish, or Russian. Individual faculty members in other areas also have the right to require one or more foreign languages. Students may petition to substitute a series of three or more quarter courses in another department for one of the languages, provided that these courses impart a relevant research skill.
Course Requirements

General Course Requirements. All students, regardless of area, must fulfill the following requirements:

Students must complete the Core Program within the first four quarters in residence. The Core Program includes Psychology 250AB and 251AB (and C, if an additional quarter is needed to complete the course). In addition, the student currently must take four of the following courses, two of which must be outside the student’s major area: 200A, 200B, 205A, 205B, 210, 220A, 220B, 235, 240, 261, 262, 263, 270A, 270B, 283, 286 and 290. (The number of areas which must be represented by the choice of core courses is subject to change for 1981-1982.)

Requirements for the M.A. degree are nine graduate courses (36 units), including 250AB, 251AB (Research project must be complete), and three of the four required core courses listed above. Two 596 courses (8 units total) may be applied. Psychology 495 may not be applied. All undergraduate deficiencies must be cleared.

By the end of the second year, students must complete at least one individual research course (596) and at least three second-year graduate courses, including one quantitative course chosen from the following: 238, 247A, 249, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 268ABCD, 269. If a student wishes to specialize in a minor, see section below. Students outside the cognitive area: (A) two courses chosen from 259, 268 (when topic is suitably quantitative), Cognitive Psychology 247A, 247B, 254, 256, 259, 268 (when topic is suitably quantitative), or other quantitative methods course that is petitioned and approved. (B) Lower-Order Processes—261, 269A, 268E, 269 (when topic is suitably lower order), Engineering Systems 280A, 280B, or any other quantitative methods course that is petitioned and approved. (C) Higher-Order Processes—262, 263, 264, 265, 266B, 268C, 268D, 269 (when topic is higher order), or any quantitative course that is petitioned or approved. Cognitive minor for students outside the cognitive area: Three of the following, two of which must be among those courses numbered 259-265: 259, 261, 262, 263, 264, 265, 268ABCD, 269. If a student completes two minors within the Cognitive area, the minors are subject to the same categorization and rules outlined above for Cognitive area students. Developmental: 240, plus two of the following: 241, 242A-F, 243AB, 244, or 246. Industrial: 218A or 218A and 219, plus 220A or 224. Learning and Behavior: (A) Comparative—Psychology 210 or Biology 129, plus two of the following: Biology 120, 119, 219, 274, Psychology 208, or Psychology 204D. (B) Learning—200AB plus one of the following: 204C, 204D, 281, or Psychiatry 271. Measurement and Psychometrics: 253, 255, plus one of the following: 249, 254, 252, or 257. Personality: 235, plus two of the following: 232, 233, 239, or 278. Physiological: 205A plus two of the following: 206, 207A, 207B, 207C, or 206. (208 is not applicable if the student is majoring in one of the following: Clinical, Developmental, or Personality.) Experimental Psychopathology: Four approved courses in psychopathology and clinical area. Social: 220AB plus one of the following: 221, 222, 223, 224, 225, or 227.

b) Standardized departmental coursework/examination minors:

Students may choose to complete a standardized minor by taking two courses and an examination. The courses which apply are those listed under coursework minors, though the choices are slightly more restrictive.

Qualifying Examinations. The Qualifying Examination consists of three separate portions. The first is a standardized examination which is administered by the major area and which examines in breadth the student’s knowledge of the major field. The second part is an individualized examination which examines in depth the student’s knowledge of his or her area of specialization within the major field. The third part is the Oral Qualifying Examination. All Ph.D. requirements listed above must be completed before this portion can be taken.

The specific requirements of the various areas are as follows:

Clinical: The standardized examination takes the form of written and oral examinations administered at the end of the first and second years, respectively.

Cognitive and Learning and Behavior: The requirements are as follows. Each area requires certain courses of students majoring in that area. These requirements are as follows: Clinical: 270ABC, 271ABC, at least three courses in the 272 series, one of which is in the assessment area, and two of which should be taken in the second year; at least two other advanced clinical courses outside the 272 series. Cognitive: 260AB, plus two courses chosen from 261, 262, 263, and 264. Developmental: 240; one course chosen from 220A, 235, and 286; one course chosen from 200B, 261, 262, 263, 264 or three modules of 205; three courses chosen from 241, 242A, 242B, 242C, 242D, 242E, 242F, 243AB, or 244. In addition to the quantitative courses listed under second year requirements above, Developmental majors must take an additional quantitative course selected from the same list. Learning and Behavior: 200AB, plus two courses from 204C, 204D, 208, 210, 281, 293, and Psychiatry 271. Measurement and Psychometrics: 249, 252, 253, 254, 255, and other measurement courses which are regularly offered. In addition, Measurement students must satisfy the foreign language requirement. Personality: 232, 235, 239, 276, and one course chosen from 233 or 234. Personality majors may not be taken in combination with a psychopathology or counseling minor. Physiological: 205 (all modules), three quarters of 212, two approved physiological seminars, and Anatomoty 206AB. Social: 220AB, 221, 222A or 222B, 224, and one course chosen from 225, 228, or a 298 course offered by the Social area.

Minor Area Course Requirements. The student must select two minor areas. These minors are normally satisfied by coursework. If two minors are completed by coursework, at least one must be within a standard, departmental area, as outlined below. If desired, the second coursework minor can be constructed from courses across areas within the Department, from courses outside the Department, or from a combination of the above. Such minors must be approved by the student’s advisor, the student’s major area, and the Graduate Affairs Committee. At least three courses totaling 12 units must be included in the proposed package, and petitions must be submitted before the student begins taking the courses.

a) Standardized departmental coursework minors:

Cognitive minors for students majoring in Cognitive: To complete a minor, students can take three courses in one of the following sets, as long as the set is not in the same domain as the student’s major (A) Quantitative Methods in Cognitive Psychology 247A, 247B, 254, 256, 259, 268 (when topic is suitably quantitative), 269 (when topic is suitably quantitative), or any other quantitative methods course that is petitioned and approved. (B) Lower-Order Processes—261, 269A, 268E, 269 (when topic is suitably lower order), Engineering Systems 280A, 280B, or any other quantitative methods course that is petitioned and approved. (C) Higher-Order Processes—262, 263, 264, 265, 266B, 268C, 268D, 269 (when topic is higher order), or any quantitative course that is petitioned or approved. Cognitive minors for students outside the cognitive area: Three of the following, two of which must be among those courses numbered 259-265: 259, 261, 262, 263, 264, 265, 268ABCD, 269. If a student completes two minors within the Cognitive area, the minors are subject to the same categorization and rules outlined above for Cognitive area students. Developmental: 240, plus two of the following: 241, 242A-F, 243AB, 244, or 246. Industrial: 218A or 218A and 219, plus 220A or 224. Learning and Behavior: (A) Comparative—Psychology 210 or Biology 129, plus two of the following: Biology 120, 119, 219, 274, Psychology 208, or Psychology 204D. (B) Learning—200AB plus one of the following: 204C, 204D, 281, or Psychiatry 271. Measurement and Psychometrics: 253, 255, plus one of the following: 249, 254, 252, or 257. Personality: 235, plus two of the following: 232, 233, 239, or 278. Physiological: 205A plus two of the following: 206, 207A, 207B, 207C, or 206. (208 is not applicable if the student is majoring or minoring in Comparative.) Experimental Psychopathology: Four approved courses in psychopathology and clinical area. Social: 220AB plus one of the following: 221, 222, 223, 224, 225, or 227.
provided; (2) by essays on three well-separated topics in the area; or (3) by an approved program of study; evaluation is either by a 3-hour written examination or by essays (usually three).

Social: The standardized requirement may be met either by a 3-hour written examination, based on reading and question lists provided by the area, or by three essays. The questions addressed by the essays must either be taken from the question list provided by the area or be approved by the student's adviser.

Practicum and Internship Requirements for Clinical Students
(a) At least six quarters of supervised preinternship practicum (Psychology 401—12 to 15 hours/week). A concentrated summer practicum can be used to meet a portion of this requirement. (During the second and third years, the practicum experiences would thus generally total a minimum of 432-576 hours per year, in addition to research experiences with clinical populations.)

(b) The equivalent of one calendar year of supervised internship (Psychology 451) in an acceptable setting approved by the faculty, taken either full-time in one year or half-time in two years in one or two settings. This can be taken in the fourth or fifth year, or after most of the research for the Ph.D. is completed. In exceptional circumstances, the well-prepared student may begin the internship in the third year. The prerequisites for the internship assignment are the satisfactory completion of Psychology 401, the departmental Comprehensive Qualifying Examinations, and the minor requirements. The second half-time, as well as the full-time internship assignment, should normally be taken after the doctoral dissertation prospectus has been approved.

Doctoral Committees. In addition to the requirements imposed by the Graduate Council, the three members of the doctoral committee who are from the Psychology Department must represent at least two different areas.

Time to Degree. Full-time students in Clinical Psychology are expected to complete the Ph.D. program in 18 quarters. All other students are expected to complete the degree within 15 quarters. Students who have not completed all Ph.D. requirements by the end of seven calendar years after admission to the program are subject to termination. The dissertation must be filed within three years following the completion of the Oral Qualifying Examination. Students who do not meet this requirement must take the Qualifying Examination over again.

Final Oral Examination. The Final Oral Examination is required of all candidates for the Ph.D. degree.

Candidate in Philosophy Degree. Students are eligible to receive the C.Phil. degree upon advancement to candidacy for the Ph.D.

Disqualification and Appeal of Disqualification. Any student who receives two grades of B— or one grade of C+, C, or F is subject to termination. Area committees may also recommend termination because of performance which is unsatisfactory for doctoral students in coursework or on qualifying examinations. In the case of Clinical students, termination may be recommended because of unsatisfactory professional skills or aptitudes.

Students who have not completed all requirements for the Ph.D. degree by the end of seven calendar years after admission to the program are subject to dismissal. This rule is enforced by the Graduate Affairs Committee.

Fellowships, Scholarships, Assistantships and Stipends. A number of teaching and research assistantships, departmental traineeships, and University fellowships are available. Financial aid and work-study awards are also available.

Psychology Clinic
The Psychology Clinic was established in 1949 in Franz Hall by the Department of Psychology as a training and research center in clinical psychology. It has specialized facilities for the investigation, assessment and treatment of a variety of psychological disabilities and adjustment problems of children, adolescents and adults of the greater Los Angeles community.

The Clinic provides a broad range of psychological services to clients including individual, group and family therapy, behavior modification procedures and consultation to agencies in the community. The concern of the clinic with systematic investigation leading to new knowledge and the improvement of clinical psychological procedures is in keeping with a primary function of a University-based clinic. The number and types of clients served are consonant with this goal. Apart from these investigations related directly to professional services to clients there are a number of research programs in the clinic which reflect the current interests of the staff, such as 1) communication patterns in the family constellation relevant to both the development and the amelioration of behavioral disturbance, 2) the development of innovative techniques of therapy and behavior modification which are effective in treating various psychological problems and, 3) exploration of new modes of delivering psychological services to currently unserved segments of the population.

Such service and research functions are basic to the professional education and training of clinical psychologists as an integral part of their graduate study in the Department of Psychology.

Fernald School
Fernald (formerly the Psychology Clinic School), a facility of the Department of Psychology, was established in 1921 as a research and training center focusing on learning problems.

The uniqueness of the facility lies in its lively experimental atmosphere, in its varied population, in the scope of its training, demonstration and research programs and in its interdisciplinary approaches in which the talents of teachers, clinical psychologists, and school counselors are integrated and brought to bear upon the student's learning difficulties. The facility's current focus is on those children with average or better intelligence who are functioning significantly below grade level in basic school skills and school achievement.

Fernald offers observation, classroom participation and intervention, research and other training opportunities to graduates in many fields, notably psychology and education. Various clinical and developmental seminars utilize Fernald as a practicum placement. Fellowships are available.

Fernald's population includes children, adolescents and adults. The research activities, based on these populations, are directed toward an analysis of the processes mediating learning difficulties and toward an evaluation of the effectiveness of various psychological and educational programs.

Spanish Speaking Mental Health Research Center
The Spanish Speaking Mental Health Research Center (SSMHRC) was established in 1973 to conduct basic and applied research on the mental health needs of the Spanish-speaking population. Supported by the National Institute of Mental Health, the SSMHRC is one of only two centers in the United States to provide an interdisciplinary research environment for Hispanic mental health scholars, students, and professionals at the national level. The Center collects and disseminates scientific information through its Clearinghouse Division which publishes monographs, occasional papers, and bimonthly research bulletins. It also maintains a computer-based bibliographic storage and retrieval system to facilitate access to the literature in this field. The Center sponsors students in a wide variety of mental health disciplines, maintains close ties with community organizations, and promotes the increased representation of Hispanic professionals in mental health and social services. Research projects currently under way include studies on acculturation and ethnicity, psychological assessment, health, bilingualism, community mental health, social psychology, socialization practices, and the role of the family.
*Graduate Courses

200A. Animal Learning and Behavior. This course will focus on basic principles and characteristics of learning and behavior, including Pavlovian conditioning, instrumental learning and species specific behavior.

The Learning and Behavior Staff

200B. Human Learning and Behavior. Topics to be covered include human learning and conditioning and the application of learning principles in the modification and treatment of a variety of socially significant problems. Special emphasis will be placed on systematic desensitization of anxiety states, behavior modification programs for schizophrenic children and adults, behavioral pharmacology, control of autonomic behavior, among others.

The Learning and Behavior Staff

204A-204B. Seminar in Critical Problems in Learning. (Formerly numbered 204C-204D.) May be taken independently and in any order. Critical problems will be drawn from such as the following:

204A. Psychophysiology of Attention and Learning. The study of research and theories concerned with the psychophysiology of attention and learning primarily in humans. Concepts and areas covered include the orienting reflex, dominant focus, classical conditioning and their implications for the psychophysiology of psychopathology and psychotherapy.

Mr. M. Hoffman

204B. Theories of Learning. Prerequisite. Psychology 200A or equivalent. Critical discussion of the major theories in learning and their current status.

*205A-205B. Physiological Correlates of Behavior. Prerequisites: course 115 or equivalent and consent of instructor. The physiological substrate of behavior and the neural and endocrine mechanisms which underlie psychological phenomena and behavior. New concepts of structural and functional organization in the nervous system and the ways these relate to behavioral and neurological dysfunction.

The Physiological Staff

*206. Psychophysiology of Brain Function. Modern concepts of the functional organization of the brain with particular reference to psychological phenomena and behavior. Recent advances in neurophysiology and electroencephalography bearing on perception, attention, drive, sleep-wakefulness, levels of consciousness etc. Some emphasis on pathologic behavior resulting from brain injury.

Mr. Beatty

207A-207B-207C. Seminar in Physiological Psychology. Prerequisite: course 115 or equivalent. May be repeated for credit.

Mr. Butter, Mr. Ellison, Mr. Krasne

*210. Seminar in Comparative Psychology. Prerequisites: course 200 or consent of instructor. A survey of the determinants of species-specific behavior including genetic influences and learning.

Mr. Arnold

212. Evaluation of Research Literature In Physiological Psychology. (4 course) Prerequisite: course 200 or consent of instructor. Paper on current interest will be presented by members of the seminar and their significance and methodology discussed and criticized in depth. Course may be repeated for credit.

Mr. Arnold

218A-218B-*218C. Advanced Industrial Psychology. Selection and training of employees, factors influencing efficiency of work.

Mr. Barthol

219. Special Problems in Industrial Psychology. Mr. Barthol

220. Social Psychology. Prerequisite: course 135 or equivalent. Consideration of the concepts, theories, and major problems in social psychology.

The Social Staff

221. Seminar in Attitude Formation and Change. Prerequisite: courses 220, 227, or consent of instructor. Social psychological research and theories on opinions and attitudes. Effects of mass communication and social factors in assimilation of information and influence.

Mr. Gerard

222A-222B. Seminar in Group Behavior. Prerequisites: courses 220, 227, or consent of instructor. Special topics in intergroup relations and group dynamics. Leadership, group control, structure and organization in group functioning.

Mr. Kelley, Mr. Raven

223. Survey Research in Psychology. A critical review of the theory and practice of large-scale sampling, measurement, and analysis of beliefs, attitudes, and social psychological variables. Concurrently scheduled with Psychology C136B.

Ms. Gutke

224. Experimental Methods in Social Psychology. Prerequisite: courses 220A, 205B, or consent of instructor. A critical review of laboratory techniques and problems of experimental control and measurement encountered in research on social psychological phenomena.

Mr. Collins

225. Seminar: Critical Problems in Social Psychology. Prerequisite: courses 220A, 205B, or consent of instructor. May be repeated for credit with consent of instructor.

The Social Staff

*228. Seminar in Political Psychology. (Same as Political Science M228.) Prerequisite: course 220A or consent of instructor. Examination of political behavior, political socialization, personality and politics, racial conflict, and the analysis of public opinion on these issues.

Mr. Sears

*229A. Issues in the Social Development of the Minority Child. Prerequisites: consent of instructor and Graduate Standing. A critical evaluation and integration of existing research on the social psychological development of the minority child. The seminar will focus on the socialization of cognitive and personality style, with the goal of empirically clarifying the issues raised in this area of developmental study.

Mr. Myers

232. Experimental Research on Human Sexual Behavior. Prerequisite: Graduate Standing. This course has been designed to teach students how to carry out research on human sexual behavior. The contents will include theory construction, scale development, physiological and endocrinological implications, radio-immunoassay (measuring hormones in blood sample), ethical issues, methodological and statistical considerations, the measurement of sexual arousal. Theory, any controlling function therapy. The seminar will focus on the socialization of cognitive and personality style, with the goal of empirically clarifying the issues raised in this area of developmental study.

Mr. Abramson

*233. Seminar in Environmental Psychology. Prerequisite: courses 115 or equivalent. Critical review of evidence on the environmental relationships of air, water, sunlight and atmosphere. Special emphasis will be placed on operationalizing predictions concerning human sexual functioning.

Mr. Abramson

234. Critical Problems in Developmental Psychology. Prerequisites: courses 240 or equivalent, and consent of instructor. The course will be concerned with current problems and will vary from time to time depending upon the interest of the class and instructor.

The Developmental Staff

*244. Critical Problems in Developmental Psychology. Prerequisites: course 240 or equivalent, and consent of instructor. The course will be concerned with current problems and will vary from time to time depending upon the interest of the class and instructor.

The Developmental Staff

*245. Personality Development and Motivation in Education. (Same as Education M245.) Personality development and environmental conditions which form motivational patterns; self-concept, moral behavior, aggression; creativity, sex differences, empathy, research and personality theory bearing on motivational problems in school settings and curricula development.

Ms. Fleshbach

*246. Psychological Aspects of Sexual Retardation. (Same as Psychiatry M246.) Prerequisite: consent of instructor. Discussion of the psychological aspects of mental retardation to include: classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

The Staff

*247A-*247B. Theory and Methods of Computing in the Behavioral Sciences. Topics and computational analysis and data, on-line analysis of behavior and control of experiments in the diverse content areas of psychology, e.g., perception, social, clinical, personality, and physiological.

Mr. Carterette

247B. Prerequisite: course 247A or consent of instructor. Topics in human problem solving, information processing, automata, language cognition, and problems arising in computer simulation of behavior. Each student will undertake a substantial project of his own.

Mr. Carterette

248. Evaluation Research. Prerequisites: courses 250A-250B. Introduction to evaluation research in psychology, with emphasis on clinical, community, and social psychology applications. Survey includes policy and strategy issues, design of evaluative studies, data analysis, and utilization of findings.

Mr. Woodward

250A. Advanced Statistical Psychology. Review of fundamental concepts. Basic statistical techniques as applied to the design and interpretation of experimental and observational research.

Mr. Woodward, Mr. Wikens

260. Developmental Psychology. A consideration of the special problems of the control and measurement of the behavior of children as well as the young of other organisms with emphasis on providing basic research concerned with the area of growth and development in children.

Ms. Greenfield, Mr. Jeffrey

242A-242E. Seminar in Development Psychology. Prerequisites: course 240 or equivalent and consent of instructor. These seminars may be taken in any order, but they may be repeated for credit.

242A. Perceptual Development. Ms. Rader

242B. Cognitive Development. Ms. Greenfield, Mr. Jeffrey

242C. Socialization. Mr. Madsen

242E. Cognitive Factors in Learning Disorders. Mr. Adelman

*243A-*243B. Seminar in Practical and Societal Issues in Developmental Psychology. Prerequisites: courses 240 or equivalent and consent of instructor. Concerns socialization processes in human development and implication for social-political, educational, research issues, values and societal change. Credit and grade to be given only upon completion of 243B.

Mr. Nakamura

244. Critical Problems in Developmental Psychology. Prerequisites: course 240 or equivalent, and consent of instructor. The course will be concerned with current problems and will vary from time to time depending upon the interest of the class and instructor.

The Developmental Staff

*245. Personality Development and Motivation in Education. (Same as Education M245.) Personality development and environmental conditions which form motivational patterns; self-concept, moral behavior, aggression; creativity, sex differences, empathy, research and personality theory bearing on motivational problems in school settings and curricula development.

Ms. Fleshbach

*246. Psychological Aspects of Sexual Retardation. (Same as Psychiatry M246.) Prerequisite: consent of instructor. Discussion of the psychological aspects of mental retardation to include: classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

The Staff

*247A-*247B. Theory and Methods of Computing in the Behavioral Sciences. Topics and computational analysis and data, on-line analysis of behavior and control of experiments in the diverse content areas of psychology, e.g., perception, social, clinical, personality, and physiological.

Mr. Carterette

247B. Prerequisite: course 247A or consent of instructor. Topics in human problem solving, information processing, automata, language cognition, and problems arising in computer simulation of behavior. Each student will undertake a substantial project of his own.

Mr. Carterette

248. Evaluation Research. Prerequisites: courses 250A-250B. Introduction to evaluation research in psychology, with emphasis on clinical, community, and social psychology applications. Survey includes policy and strategy issues, design of evaluative studies, data analysis, and utilization of findings.

Mr. Woodward

250A. Advanced Statistical Psychology. Review of fundamental concepts. Basic statistical techniques as applied to the design and interpretation of experimental and observational research.

Mr. Woodward, Mr. Wikens
250B. Advanced Psychological Statistics. Advanced experimental design and planning of investigations. Theory and applications. Mr. Woodward

251A-251B-251C. Research Methods. Discussion. Students will design and conduct original research under the supervision of the instructor in charge. It is anticipated that many students will complete their project in two quarters. Normal load three quarters. The Staff

252. Multivariate Analysis. Prerequisites: courses 250A-250B. Introduction to the analysis of data having multiple dependent measures. Topics include multivariate distributions, principal components analysis, partial correlation, canonical correlation, discriminant analysis, and the multivariate analysis of variance. Example applications are drawn from a variety of psychological areas including clinical, cognitive, physiological, and sociological. Computer implementation includes APL and standard statistical packages. Mr. Woodward

254. Seminar in Psychological Scaling. Theory of measurement, law of comparative judgment, methods of unidimensional scaling, multidimensional scaling and related topics of current interest. Mr. Holman

256. Seminar in Critical Problems in Psychological Measurement. Critical examination of issues in the major approaches to psychological measurement, relation in psychological methods and data to a general theory of measurement. Mr. Mount

257. Multivariate Analysis with Latent Variables. Prerequisite: consent of instructor. Introduction to models and methods for the analysis of data hypothesized to be generated by unmeasured latent variables, including latent-variable analogues of traditional methods in multivariate analysis. Causal modeling: theory-testing via the analysis of moment structures. Measurement models such as confirmatory, higher-order and structured-means factor analytic models. Structural equation models including path and simultaneous equation models. Parameter estimation, hypothesis-testing and other statistical issues. Computer implementation. Applications to clinical research. Mr. Holman

258. Special Problems in Psychological Statistics. Prerequisites: course 250A and 250B or consent of instructor. Special problems in psychological statistics and data analysis will be examined. Mr. Wikens

*259. Quantitative Methods in Cognitive Psychology. Prerequisites: course 250A and 250B or consent of instructor. This course will consider a number of nonstatistical mathematical methods and techniques commonly used in cognitive psychology. Topics include linear regression, canonical correlation, and discriminant analysis. Mr. Holman

260A-260B. Proseminar in Cognitive Psychology. A survey of current theories and research in cognitive psychology. Topics include sensory processes, perception, human learning and memory, psycholinguistics, judgment, decision processes, thinking, and problem solving. Mr. Wikens

261. Perception. Prerequisite: course 260A or 260B, or consent of instructor. Concepts, theories, and research in the study of perception. Controversies: Why do things look, sound, smell, taste, or feel as they do? What is the nature of perceptual systems? How do these systems process information? Mr. Thomas, Ms. Rader

262. Human Learning and Memory. Prerequisite: course 260A or 260B, or consent of instructor. Contemporary theory and research in human verbal learning and memory, verbal and nonverbal learning and memory processes, the structure and organization of short- and long-term memory. Mr. Bjork

263. Psycholinguistics. Prerequisite: course 260A or 260B, or consent of instructor. Contemporary theory and research in psycholinguistics, coding and decoding, psycholinguistic parameters of language learning, speech recognition and perception. Ms. French

*264. Judgment and Decision Processes. Prerequisite: course 260A or 260B, or consent of instructor. Contemporary theory and research in judgment and decision processes: psychophysical scaling, contextual effects on rating scales, models for the analysis of value decisions. Mr. Parducci

*265. Language and Thought. Prerequisite: course 260A. Controversies: How do language and thought processes influence each other? Mr. Holman, Mr. Carterette

*266. Seminar in Cognitive Psychology. Prerequisites: course 260A and 260B or consent of instructor. A discussion of problems in Cognitive Psychology that encompass more than a single subfield of the area. May be repeated for credit. Mr. Thomas

266A. Perception. Mr. Thomas

266B. Human Learning and Memory. Mr. Bjork

*268C. Language and Thought. Mr. MacKay

268E. Human Performance. Mr. Beatty, Mr. Carterette

269. Seminar in Cognitive Psychology. Prerequisites: course 260A and 250B or consent of instructor. Major conceptual issues will be analyzed and presented in the form of workshops, seminars, projects, and projects that encompass more than a single subfield of the area. May be repeated for credit. Mr. Holman

270A-270B-270C. Foundations of Clinical Psychology. Prerequisites: concurrent enrollment in Psychology 271A-271B-271C. Open only to graduate students in clinical Psychology and approved minors in clinical psychopathology.

270A. Analysis of phenomenological, theoretical and research issues regarding the etiology and mediating mechanisms in neurotic, affective, schizophrenic spectrum, and other personality disturbances.

270B. Principles and methods of psychological assessment and evaluation. Mr. Goodman

270C. Principles and methods of psychological intervention in individuals, families and community settings. Mr. Goodman

*271A-271B-271C. Clinical Psychological Methods. Prerequisites: course 270A and 250B or consent of instructor. This course will focus on current cognitive behavior modification principles and techniques. Major conceptual issues will be analyzed, and specific techniques will be demonstrated and practiced by students to cover a range of adult problems such as depression, stress and anxiety, anger management, assertion problems, and addictions. Ms. Hammer, Ms. Mays

272. Seminar in Human Information Processing. Prerequisites: course 260A and 260B or consent of instructor. Topics will vary with the interests of the instructor. May be taken in any order and may be repeated for credit.

272A. Perception. Mr. Thomas

272B. Human Learning and Memory. Mr. Bjork

*272C. Language and Thought. Mr. MacKay

272E. Human Performance. Mr. Beatty, Mr. Carterette

272F. Psychotherapy. Mr. Goodman

*272G. Group Therapy Dynamics. Mr. Sheehan

272H. Psychotherapy and Related Behavior Problems. (Formerly numbered 276A-276B.) Lecture, three hours; discussion, one hour. Prerequisite: 225 or 226A or 227A and admission to a doctoral program. The focus is on theoretical and research issues and problems related to purposes and practices involved in assessment and correction approaches for children with learning and behavior problems. Practicum experiences are offered to illustrate course content and provide opportunities to improve research and clinical competence. Mr. Adelman

277. Advanced Clinical Assessment. The course will cover projective techniques, clinical interpretation, case studies, the psychological test battery, psychopathology, and application of assessment to problems in psychotherapy. Mr. Sheehan

*278. Seminar in Motivation, Conflict and Neurosis. Mr. Feshbach

279. Seminar in Research in Psychopathology. Mr. Rodnick

*281. Seminar in Behavior Therapy. Mr. Lovass

282. Interpersonal Forms Analysis of Human Interaction Structures. Conceptual and experimental study of six response modalities common to psychotherapy and everyday interaction; questions, silences, advice, interpretation, self-disclosure, and reflection. Lab work will be performed in conjunction with lecture and seminar sessions. Mr. Goodman

283. Psychopathology. A survey of the dominant psychological attributes of particular forms of psychopathology, including an analysis of the status of various theories concerned with the etiology and mediating mechanisms of personality, neurotic, schizophrenic spectrum, and affective disturbances. Mr. Rodnick
286. Issues and Concepts of Clinical Psychology. Survey of major issues and alternatives in current practice. Emphasis on assessment and intervention, with consideration of historical, theoretical, and research bases for current trends. Open to graduate students not majoring in clinical psychology. Mr. Broen

287. Critical Problems in Clinical Research Methodology. Prerequisites: courses 250A, 250B. Special problems of measurement and design in clinical research will be examined. Mr. Christensen

*288. Seminar in Research in Personality. (1/4 course) Prerequisite: Graduate Standing in Personality. This course is meant to cover current research, theory and professional issues within the area of personality. A brown bag format will be utilized to foster intellectual exchange and discussion. All personality graduate students will be required to attend, they will make at least one presentation per quarter, and will participate in discussions with faculty and guest lecturers. The Personality Staff

290. History of Psychology. Philosophical and historical context of contemporary psychology. Major trends from the 18th century to contemporary issues will be considered. Mr. Maltzman

291. Principles of Behavioral Pharmacology. Prerequisite: consent of instructor. Intensive analysis of drug, brain, and behavior relationships. Discussion of the nature and source of drugs, general aspects of pharmacology, neurotransmitters and basic neuropharmacology, principles of behavioral pharmacology, categories of psychopharmacological agents, and pharmacological approaches to the study of drug addiction, schizophrenia, and other behavioral processes, both normal and pathological. Mr. Butcher

293. Behavioral and Psychophysiological Problems of Alcoholism. Prerequisite: consent of instructor. Behavioral and psychophysiological characteristics of alcoholism will be reviewed along with theories concerning its etiology and treatment. Experimental approaches will be emphasized. Mr. Maltzman

296. Special Problems in Psychology. The content will depend upon the interests of the particular instructor. May be repeated for credit. The Staff

Professional Courses

300. Practicum in the Teaching of Psychology. Prerequisites: upper division Psychology major and consent of instructor. Training and supervised practicum for advanced undergraduates in the teaching of Psychology. Students will serve as junior teaching assistants, assist in the preparation of materials and the development of innovative programs. This course may be repeated once for credit, and is offered on a pass/no pass basis.

350. Field Work in Psychology. Prerequisites: Sophomore Pre-Psychology or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology. Students must spend two hours in a weekly seminar and six hours per week working in approved community settings. The Undergraduate Curriculum Development Office, 1531B Franz Hall, should be consulted for application forms and further information. P/NP grading only. May be repeated once for credit.

351. Research in Psychology. Prerequisites: Sophomore Pre-Psychology or Psychology Major Standing and consent of instructor. Practical applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. Prerequisite: Sophomore Pre-Psychology, or Psychology Major Standing and consent of instructor. Fieldwork in applications of psychology through research. Students attend a one hour weekly seminar and intern in an approved research setting. School of Public Health Divisions.

The divisions, rooms and telephone numbers in the School of Public Health are: Behavioral Sciences and Health Education, Room 26-205, (213) 825-5379; Biostatistics, Room 51-254, (213) 825-5312; Environmental and Nutritional Sciences, Room 56-070, (213) 825-9334; Epidemiology, Room 71-254, (213) 825-8579; Health Services, Room 31-269, (213) 825-2594; Population, Family and International Health, Room 36-071, (213) 825-4053.

Information for Applicants at the Master’s Level

Applicants must be:
1. Holders of a professional doctoral degree in medicine, dentistry, optometry, pharmacy, or veterinary medicine (with or without a prior bachelor’s degree) from an accredited school.
2. Physicians at UCLA in the General Preventive Medicine Residency.
3. Qualified students in the Latin American or African Studies articulated degree programs or in the schools of Dentistry, Law, Management or Medicine.
4. Holders of a bachelor’s degree from an accredited institution. Preparation in the sciences basic to Public Health must be adequate. Such sciences include various combinations of: (a) life sciences; (b) physical sciences and mathematics; (c) social sciences; (d) behavioral sciences. Applicants are not expected to be prepared in all four of these fields, but a background in a suitable combination of these sciences is required.

PLEASE NOTE:
1. Students whose field of concentration is to be in the area of Environmental Health Science or Nutritional Science should have a bachelor’s degree in biological or chemical sciences or an appropriate field with coursework including: three quarters of general chemistry including quantitative analysis and three quarters of organic and/or biochemistry; mathematics through calculus; three quarters of life sciences (for nutrition only; this must include one quarter of bacteriology or microbiology); two quarters of physics.
2. Applicants interested in the Health Services Management Program in the Division of Health Services must be interviewed by a member of the faculty of the program. Preliminary selection of applicants is made by program faculty who then advise the Division of the final selection.
3. Applicants interested in the Population, Family and International Health Program must have some prior experiences in the health field (paid or volunteer).

4. For admission to the Master of Science in Biostatistics Program, the student must have completed the bachelor's degree with a major in mathematics or computer science or a field of application of biostatistics. Undergraduate preparation for the program should include Mathematics 31A-B, 32A-B, 33A-B (second year calculus) or the equivalent.

Information for Applicants at the Doctoral Level

Admission Requirements for the Dr.P.H. and the Ph.D. in Public Health. In addition to the University minimum requirements, the Department requires (1) at least a 3.0 junior-senior undergraduate grade point average, at least a 3.5 graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory CORE courses of the School; (2) a positive recommendation by a Division of the School (Department of Public Health); (3) approval by the Doctoral Admissions Subcommittee; (4) approval by the Departmental Chairperson; and (5) for the Dr.P.H., completion of the M.P.H. degree in Public Health or an appropriately related field. (If the master's degree is in a field other than Public Health, the applicant must have taken the equivalent of the mandatory M.P.H. courses or include them in his/her course of study after admission.) (6) for the Ph.D., in Public Health, completion of the M.S. in Public Health or an appropriately related field (students with an M.P.H. will need to satisfy the requirements of the School's M.S. in Public Health before admission).

Admission Requirements for the Ph.D. in Biostatistics. Qualifications for admission to the Ph.D. program in Biostatistics are those currently specified by the Graduate Division. Normally, students receive an M.S. in Biostatistics at UCLA before admission to the Ph.D. program. Students who enter the Ph.D. program from other master's programs are required to pass a written Comprehensive Examination within one year of their admission. This examination is comparable to the M.S. Comprehensive Examination.

Major Fields or Subdisciplines

Master's Level

Master of Public Health
The School of Public Health offers the Master of Public Health degree in the following areas of concentration:

- Behavioral Sciences and Health Education
- Biostatistics

Environmental Health Science—(with emphasis in water quality; environmental management; air quality; environmental epidemiology; environmental sciences and engineering; occupational health and safety (industrial hygiene); or environmental toxicology)

Epidemiology—(with emphasis in chronic diseases or infectious and tropical diseases)

Health Services Organization—(available, in general, only to students with a prior doctoral degree. Exceptions may be granted by the Division Head with the approval of the Assistant Dean of Academic Affairs.)

Health Services Management—(with emphasis in medical care organization and health services; health facility management; health facility finance and accounting; quantitative methods; allied skills; or health information systems)

Nutritional Science—(with emphasis in public health community nutrition and nutritional biochemistry)

Population, Family and International Health—(with emphasis in population, family health and family planning; reproductive and women's health; family, health, including maternal and child health, genetic counseling; international health, including nutrition).

Master of Science in Public Health
The areas of specialization offering the M.S.P.H. degree program are:

- Behavioral Sciences and Health Education
- Environmental Health Science—(with emphasis in water quality; management; air quality; environmental epidemiology; environmental sciences and engineering; occupational health and safety (industrial hygiene); or environmental toxicology)
- Epidemiology—(with emphasis in chronic diseases or infectious and tropical diseases)
- Health Services—(with emphasis in health planning, health policy analysis, health services research, or health management)
- Nutritional Science

Master of Science in Biostatistics
Two major fields are specified: biostatistics and statistical health data management.

Doctoral Level

Doctor of Public Health
The School of Public Health offers the Doctor of Public Health degree in these areas of concentration:

- Behavioral Science and Health Education
- Biostatistics
- Environmental Health Science
- Epidemiology
- Health Services
- Nutritional Sciences
- Population, Family and International Health

Ph.D. in Public Health
The School of Public Health offers the Doctor of Philosophy in Public Health degree in these areas of concentration:

- Behavioral Sciences and Health Education
- Environmental Health Science
- Epidemiology
- Health Services
- Nutritional Science

Ph.D. in Biostatistics
The School of Public Health offers a Ph.D. in Biostatistics.

Advising

Masters' Candidates
An adviser is appointed for each beginning master's student by the (Division) Head of the respective Division.

The student and the adviser together agree upon a study list for each academic quarter and any subsequent alterations must be approved by both the adviser and the Assistant Dean of Academic Affairs before submission to the Graduate Division. The student is expected to meet with his/her adviser each quarter.

A departmental Guidance Committee is established when the student has completed approximately half of the program for the master's degree. Members of the departmental Guidance Committee are nominated by the Division Head after consultation with the adviser and the student and are approved by the Department Chairperson.

An adviser is responsible for the academic progress of his/her advisees. Progress is evaluated on an ongoing basis. At the end of each quarter, the Assistant Dean of Academic Affairs reviews academic listings of students and notifies them and the advisers when the cumulative grade point average is below 3.0. Advisers review each case with their advisees and make recommendations to the Assistant Dean of Academic Affairs for continuance or dismissal. If a student wishes to change advisers, he/she must file a petition which must be approved by the "new" adviser, the Division Head, and the Assistant Dean for Academic Affairs.
Doctoral Candidates

Doctor of Public Health. An academic adviser is assigned to each new student by the Head of the Division. The student and the adviser together agree upon a study list for each academic quarter; any subsequent alterations must be approved both by the student’s adviser and the Assistant Dean of Academic Affairs before it is submitted to the Graduate Division. Advisers may be changed after the first quarter by mutual consent of both the student and new adviser via blue petition countersigned by the Division Head and the Assistant Dean of Academic Affairs.

Within the first three quarters of study, the student files Doctoral Form 1, “Petition for Establishment of Three Member Guidance Committee and Study in Major and Minor Fields for the Dr.P.H.” The Guidance Committee comprises three members including the student’s adviser in the major field and the adviser in the minor field. On this form, the student lists courses to be taken for the minor which must be approved by the student’s adviser, the Division Head, and the Department Chairperson.

Ph.D. In Public Health. An academic adviser is assigned to each new student by the Head of the Division. The student and the adviser together agree upon a study list for each academic quarter; any subsequent alterations must be approved both by the adviser and the Assistant Dean of Academic Affairs before it is submitted to the Graduate Division.

Within the first three quarters of study, the student files Doctoral Form 1, “Petition for Establishment of Three Member Guidance Committee and Study in Major and Cognate Field for the Ph.D.” The Guidance Committee consists of three members including the student’s adviser in the major field and the adviser in the minor field. Courses to be taken for the cognate field are listed on this form, which must be approved by the student’s adviser, the Head of the Division, and the Chairperson of the Department.

Ph.D. In Biostatistics. A faculty adviser is appointed for each beginning doctoral student by the Division Head. The adviser meets with the student each quarter to discuss the student’s academic progress. When the student advances to candidacy, the Chairperson of the dissertation committee becomes the adviser.

Degree Requirements

General Master’s Level Degree Information

The M.P.H. is a professional degree in the field of public health. The student is expected to focus on public health practice and to acquire a broad knowledge related to professional skills.

Foreign Language Requirement. Foreign language is not a requirement for the master’s degrees.

Teaching Experience. Teaching experience is not required for master’s degrees.

Screening Examinations. No screening examinations are required except in the Behavioral Sciences and Health Education Division. In this area, a student who does not have an M.P.H. or an M.S.P.H. must pass a screening examination held no earlier than after three quarters in residence and after satisfying course requirements. The purpose of the examination is to evaluate evidence of a student’s potential for successful work at the doctoral level. Only one reexamination after failure is allowed.

Time to Degree. From graduate admission to award of the degree (depending upon the area of specialization), normal progress is from three to seven quarters. Upper limit for completion of all requirements is seven quarters of enrollment, including quarters enrolled in previous graduate study at a University of California campus prior to admission to the School of Public Health. Maximum time allowable from enrollment to graduation, including leaves of absence is five years.

Disqualification and Appeal of Disqualification. Students must maintain a 3.0 grade point average or they will be subject to dismissal. If a student’s grade point average falls below this, it must be raised to 3.0 by the end of the following quarter. Also, a student will be terminated if he/she fails to complete the required coursework in seven quarters of enrollment.

Appeals can be made by the student utilizing the standard blue petition form. The petition must be approved by the adviser, the Division Head, the Assistant Dean of Academic Affairs, the Chairperson of the Department, and the Dean of the Graduate Division.

Master of Public Health Degree

Course Requirements

Award of the M.P.H. degree requires a minimum number of acceptable courses as specified by each program. The minimum number of courses required is 11 in an approved program, but frequently a student is required to take more than this minimum depending upon his/her background and field of study. This minimum may be reduced to 10 for students with suitable previous graduate students in health fields (such as physicians) if appropriate for the field of study. At least five of these courses toward the M.P.H. must be graduate level (200, 400, and 500 series).

Unless previously taken, mandatory School CORE courses for the M.P.H. degree are currently 3½ courses, 14 units of credit and must be taken during the first year of study.

1. Introduction to Biostatistics (Public Health 100A or 101A or 103, depending upon area of specialization and/or degree program). (NOTE: Public Health 103 is designed as a terminal course for those who do not intend to take any other biostatistics courses.)

2. Principles of Epidemiology (Public Health 112). Epidemiology majors substitute Epidemiology (PH 114). (Prerequisite: PH 110, Introduction to Medical Science or PH 111, Human Disease and Public Health or equivalent.)

3. Health Services Organization (Public Health 130).

4. Introduction to Environmental Health (Public Health 155) or PH 150 for students with suitable scientific background or students specializing in environmental health.

The individual CORE course (not units) can be waived if the student has taken a similar course elsewhere and can pass the waiver examination for that course.

The remaining courses (at least 7½ courses, 30 units of credit) are determined by the student’s choice of an area of specialization as described below, and include the requirements of one course in the 400 series. Field training in an approved public health program of up to 10 weeks is required of candidates who have not had prior relevant field experience.

Thesis or Comprehensive Examination Plan

Comprehensive Examination Plan. Both a comprehensive examination over material encompassed by the CORE courses and an examination in the student’s major field (Division) are required. A student who fails either section may be reexamined no more than once. The School CORE course Comprehensive Examination is administered twice each academic
year, usually the first Saturdays in May and November. The examination in the major field is administered by the student's Division. Students in the Environmental Health area undertake cumulative examinations on current Environmental Health topics in addition to the above examinations. An examination will be offered once every quarter. Out of a total of six attempts, the student must pass three cumulative examinations.

**Thesis Plan.** The thesis option is only available in the Division of Behavioral Sciences and Health Education. In this Division, students wishing to prepare a thesis rather than take an examination in the major field may do so if they have successfully completed PH 181 and PH 281, and if permission has been obtained by petition. Upon approval, a thesis committee is established after a student has been in residence three quarters. The thesis committee, comprising a minimum of three faculty members (two of whom must be from within the student's department), is recommended by the Department Chairperson after consultation with the student and the student's adviser and is appointed by the Dean of the Graduate Division. The committee approves plans for the thesis prior to the student's petition for advancement to candidacy. The completed thesis must be acceptable to the committee and a copy must be submitted to the Graduate Division.

**Areas of Specialization**

Areas of specialization offered in the M.P.H. degree program and typical course plans, in addition to mandatory courses, are listed below.

**Behavioral Sciences and Health Education**

**Usually Required Courses.** Public Health 182 and 183 (two quarter sequence), 482 (8 units of Field Work Practicum) and five courses (20 units) in consultation with the faculty adviser of which at least three (12 units) must be chosen from among: PH 280, 181 and 281 (two quarter sequence), 287, 288, 480, 481, 483 and 484. Individual and experimental courses will count among the required course units. Additional courses in consultation with the faculty adviser may be elected from among those offered by divisions within the Department or by other Schools/Colleges at UCLA.

**Recommended Courses.** Public Health 404, 211A, 211B, Management 113A, 113B.

**Electives.** Courses in Public Health, Biomathematics, or Mathematics.

**Environmental Health Sciences**

**Usually Required Courses.** Public Health 150, 152, 153, 154, 250, 253A, 255, 256, 400, 450, and one course in Occupational Health. Please note: Public Health 255 and 256 may be repeated for credit.

**Recommended Courses.** Public Health 251 or 252, 253B, 254, 261A, 454.

Units from the courses listed above sum to approximately 52. At least five of these courses must be graduate courses (200, 400, and 500 series). Thus, approximately 20 units are to be completed by specialty courses and electives for a 2-year program assuming a minimum of 12 units per quarter. It should be noted that the divisional core also satisfies the requirement for taking the registered sanitarian's examination.

After or simultaneous with fulfillment of the core divisional and schoolwide requirements, students may take courses with emphasis in the following: water quality; management; air quality; environmental epidemiology; environmental sciences and engineering; occupational health and safety (industrial hygiene); or environmental toxicology.

Students specializing in the environmental epidemiology track should substitute PH 114 and 211A (prerequisites for advanced epidemiology courses) for PH 112 (see M.P.H. course requirements). PH 110 or PH 111 must be taken concurrently with PH 114 unless a student passes the waiver examination.

In addition to the School- and program-required Comprehensive Examinations, Master of Public Health students in Environmental Health are required to take cumulative examinations on current Environmental Health topics. An examination will be offered once every quarter. Out of a total of six attempts, the student must pass three cumulative examinations.

**Epidemiology**

**Chronic Diseases. Usually Required Courses.** Public Health 100B, 210, 211A, 211B, 400 (for predoctoral students), 596 (for postdoctoral students), one half or one course in Behavioral Sciences and two additional courses from the following: PH 212E, 212G, 213, 215A-B, 217, 221, 223, 225, 410A-B. (Physicians and other postdoctoral students in an appropriate biomedical science may petition for waiver of Public Health 400.)

Report. Candidates must submit a report demonstrating competence in epidemiologic methodology. The report may not be submitted prior to the completion of PH 400, Field Studies in Epidemiology, for predoctoral students or PH 596. Directed Individual Study, for postdoctoral students who qualify for waiver of PH 400, PH 400 must be taken after completion of PH 211B. PH 596, for postdoctoral students, may be taken concurrently with PH 211B; minimum enrollment in 2 units of PH 596 is required for report grade.

**Infectious and Tropical Diseases. Usually Required Courses.** Public Health 100B, 211A, 400 (for predoctoral students), 596 (for postdoctoral students) 212H, 216A, 216B, 218A, 218B, 220A, 220B, 222 (must be taken each quarter). Doctoral students holding a doctorate in an appropriate biomedical science may petition for waiver of Public Health 400.

Report. Candidates must submit a report on a project related to Infectious and Tropical Diseases. The report may not be submitted prior to the completion of PH 400, Field Studies in Epidemiology, for predoctoral students or PH 596. Directed Individual Study, for postdoctoral students who qualify for waiver of PH 400, PH 400 must be taken after completion of PH 211B, PH 596, for postdoctoral students, may be taken concurrently with PH 211B; minimum enrollment in 2 units of PH 596 is required for report grade.

**Health Services**

**Health Services Management. Usually Required Courses.** Public Health 131, 133, 139, 141, 400, 430, 431, 432, 433, 434, 436, 443D, 596.

**Recommended Courses.** Public Health 134, 231.

**Electives.** Elective courses are selected by the student in consultation with the faculty adviser.

**Residency.** Following the first three quarters of study, students are placed in health service management residencies throughout the Los Angeles area for a period of 9 1/2 months.

**Health Services Organization.** An MPH in Health Planning, Policy Analysis, and Research is available as a 1-year program for students with prior doctoral level degrees. Recommended courses are individually worked out with adviser. No summer internship is required.
Nutritional Sciences

Usually Required Courses. Public Health 163 (if waiver examination is passed, course requirement may be fulfilled through elective courses approved by the adviser), 165 or 261A, 260E, 260F, 260G, 260H, 261A or 165, 262 or 263 (may be repeated for credit). 400, 460, 461, 463.

Recommended Courses. Public Health 162, 264E, 264F, 462.

Of the courses listed above, at least five graduate level courses (200, 400, 500) and at least one seminar course (262, 263) are required. A minimum of 56 units is required by the Division for the M.P.H. degree. It is expected that after the first quarter, students will take a seminar each quarter.

Population, Family and International Health

Usually Required Courses. Students are required to complete at least four courses (16 units) offered by the Division, plus Public Health 181, 400, 596.

Electives. Elective courses are selected by the student in consultation with the faculty adviser. Students without a professional health degree are required to complete at least 60 units for the M.P.H. degree; students with a professional degree may graduate with a minimum of 44 units.

Programs in Conjunction with Other Schools and Departments at UCLA which Lead to the M.P.H.

Following are descriptions of combined programs of study leading to the M.P.H. degree:

Articulated Degree Program: Public Health (M.P.H.) and Latin American Studies (M.A.).

The School of Public Health and the Latin American Studies Interdepartmental Degree Program have arranged an articulated degree program, organized to permit specializations within the M.A. and the M.P.H. degrees, with the award of both degrees after approximately three years of graduate study. Qualified students are required to consult with the Graduate Adviser of the Latin American Studies M.A. Program or the Division of Health Services, in cooperation with the Graduate Student Affairs, School of Public Health, UCLA, Los Angeles, CA 90024, or to the Office of Student Affairs, School of Public Health, UCLA, Los Angeles, CA 90024.

Upon admission to either the Latin American Studies Program, the Public Health Program, or both, students must consult the Graduate Adviser in both programs. Typically, students take courses in both programs from the beginning. A given course may not be used for credit toward more than one degree, but the content of courses can help students meet breadth or specialty requirements, thus reducing the time needed to complete both degrees. A comprehensive research project in a topic relevant to both degrees is required to meet the requirements for both degrees.

Potential applicants should contact the Graduate Adviser, Latin American Studies, Latin American Center, UCLA, and the Public Health/Latin American Studies Articulated Degree Program Adviser in the School of Public Health.

Concurrent Degree Program: Management (M.B.A.) and Public Health (M.P.H.)

The School of Public Health, Division of Health Services, in cooperation with the Graduate School of Management, offers a course of study concentration leading to the award of the M.P.H. and M.B.A. degrees concurrently. Students interested in this course of study must apply and be admitted to both the Division of Health Services in the School of Public Health and the Graduate School of Management. All inquiries about application to the M.P.H./M.B.A. program should be addressed to UCLA Graduate School of Management, M.B.A. Admissions, Los Angeles, CA 90024.

Preventive Medicine Residency Program

A residency in General Preventive Medicine is available to physicians. The first year of the residency is comprised of formal studies for the Master of Public Health in either Epidemiology or Health Services, and application must be made simultaneously for both the residency and admission to the School of Public Health for the M.P.H. Admission to the residency should be made to: Dean, School of Public Health, UCLA, Los Angeles, California 90024.

Physician applicants are generally admitted to the second and third year of the residency only after completion of M.P.H. studies at an accredited school of public health. The second and third year are individually organized for each resident's particular interests, under the specific direction of a faculty member assigned to the resident for the purpose of supervising the resident's work or practical and applied field experiences at UCLA or in the surrounding community. The residents of the Los Angeles County Department of Health Services are generally available to the residents and provide ample opportunity for either short- or long-term assignments.
The Preventive Medicine Residency at UCLA is organized to provide an opportunity for each prospective resident to develop an individualized course of training to suit his/her particular interests or needs, whether those interests lie in research, teaching, or practice—or a combination of all three.

**Master of Science in Public Health**

The Master of Science program provides research orientation within the general field of public health. It is intended to prepare students in depth in a specialty area in public health and includes the preparation of a thesis or major written report.

**Course Requirements**

Award of the M.S. degree requires a minimum number of acceptable courses as specified by each program. The minimum number of courses required is nine (9), at least five of which must be graduate level courses in the 200 or 500 series.

Unless previously taken, mandatory courses for the M.S. degree are three courses, 12 units of credit.

1. Introduction to Biostatistics (Public Health 100A).
2. Introduction to Biostatistics (Public Health 100B).
3. Principles of Epidemiology (Public Health 112). Epidemiology majors substitute Epidemiology (Public Health 114). (Prerequisite: PH 110, Introduction to Medical Science or PH 111, Human Disease and Public Health or equivalent.)

Any individual CORE course (not units) can be waived if the student has taken a similar course elsewhere and can pass the waiver examination.

The remaining courses (at least six courses, 24 units of credit) are determined by the student's choice of an area of specialization (described below), and include the requirement of two research methodology courses.

**Thesis or Comprehensive Examination Plan**

Either the Thesis Plan or the Comprehensive Examination Plan may be selected by students in the Division of Behavioral Sciences and Health Education and the Division of Health Services. For students in the Divisions of Environmental and Nutritional Sciences and Epidemiology, a thesis is required.

**Thesis Plan.** A thesis committee is established after a student has been in residence for three quarters. The thesis committee, composed of a minimum of three faculty members, is recommended by the Department Chairperson after consultation with the student and the student's adviser and is appointed by the Dean of the Graduate Division. The committee approves plans for the thesis prior to the student's filing for advancement to candidacy. At least two of the faculty members must be from within the Department. No member outside the Department is required.

The thesis must be acceptable to the thesis committee and a copy must be submitted to the Graduate Division.

**Comprehensive Examination Plan.** If the Comprehensive Examination option is approved for the student, a comprehensive examination committee composed of a minimum of three faculty members, is appointed by the Chairperson of the Department on the recommendation of the Division Head. There must be a written Comprehensive Examination on the student's major area of study. A student who fails may be reexamined no more than once. The preparation of a major written research report is required. This must be approved by a 2-member committee which may overlap the comprehensive examination committee.

**Areas of Specialization**

Areas of specialization offered in the M.S. degree program, and typical course plans, in addition to mandatory courses, are listed below.

**Behavioral Sciences and Health Education**

*Usually Required Courses.* Public Health 181, 182, 183, 280, 281.

**Electives.** 16 units (four courses) of electives, chosen in consultation with an adviser, at least one of which must be chosen from the 283 series and at least two of which must be chosen from among the following: Public Health M283E, M283F, M283G, PH 284, 285, 483.

**Environmental Health Science**

*Usually Required Courses.* Public Health 150, 153, 154 250, 253A, 255 and 256 (may be repeated for credit), 261A, 450, 598 (a maximum of one course will count toward minimum total course requirement), Biological Chemistry 101A or equivalent, 101B or equivalent.

Units from the courses listed above sum to approximately 13 courses ($\frac{52}{2}$ quarter units). At least five of these courses must be graduate level (200 and 500) and at least one course of seminars (255 and 256) must be taken. In addition, students must complete a laboratory project plus thesis.

After or simultaneous with fulfillment of the core divisional and schoolwide requirements, students may take courses in one of the following areas after counseling and with continued guidance of the faculty adviser: water quality; waste management; air quality; environmental epidemiology; environmental sciences and engineering; occupational health and safety (industrial hygiene); or environmental toxicology. Students specializing in the epidemiology tract should substitute PH 114 and 211A (pre-requisites for advanced epidemiology courses) for PH 112 (see M.S. Course Requirements). PH 110 or 111 will need to be taken concurrently with PH 114 unless a student passes the waiver examination.

In addition to the completion of the master's thesis, M.S. students in environmental health are required to take cumulative examinations on current environmental health topics. An examination will be offered once every quarter. Out of a total of six attempts, the student must pass three cumulative examinations.

**Epidemiology**

**Chronic Diseases. Usually Required Courses.** Public Health 210, 211A, 211B, 221 plus 16 units as follows: one full course in demography, one full course in Biostatistics, one full course in data management, and one full course in Topic Specific Epidemiology (PH 212E, 219D, 213, 215A, 215B, or 225).

**Recommended Courses.** Public Health 130 for students planning to enter the Dr.P.H. program or with the intention of practicing epidemiology in a health department; Public Health 410A, 410B.

**Electives.** Relevant courses in public health and biomedical sciences.

**Recommended Courses.** Public Health 130 for students planning to enter the Dr.P.H. program or with the intention of practicing epidemiology in a health department.

**Electives.** Public Health 214, 219, and relevant courses in public health and biomedical sciences.
Health Services

Areas of Specialization

Biostatistics

Unless previously taken, the following courses must be included in the degree program: Public Health 101A, 101B, 100C, 200A, 200B, 200C; any two courses from M201E, 201F, 201G, 201H, 201J, 204E, 402A, 402B; Mathematics 150A, 150B, 150C or Mathematics 152A, 152B.

Other courses in biostatistics or mathematical statistics, or in related areas such as biology, physiology, public health, management, or mathematics are selected with the adviser's consent.

A comprehensive examination is required.

Statistical Health Data Management

Unless previously taken, the following courses must be included in the degree program: Engineering 10C, 101A, 101B, 100C; 200A, 200B, 200C, 403 and a 3-course sequence in Statistical Health Data Management. (Numbers and course titles to be assigned later); either Public Health 404 or Public Health 502; Mathematics 152A, 152B or Mathematics 150A, 150B, 150C; Two public health courses in a division other than Biostatistics are to be selected with the adviser's consent.

A comprehensive examination is required.

Teaching Experience

Teaching experience is recommended but not required for doctoral degrees.

Time to Degree

Dr. P.H. and Ph.D. in Public Health

Normally, students will not be admitted to the doctoral program until they have completed a master's degree. If the student has not completed all requirements for the master's degree by the time of admission to the doctoral program, the master's degree must be completed prior to taking the Written Qualifying Examination, no later than the sixth quarter in residence. If the student has completed a master's degree program, the written and oral examinations should be completed by the sixth quarter in residence.

Maximum time allowable from enrollment in the graduate program in the School of Public Health and completion of the degree, including leaves of absence, is 20 quarters or 8 years. This limitation includes quarters enrolled in previous graduate study at a University of California campus prior to admission to a doctoral degree program.

Ph.D. in Biostatistics

From admission to the doctoral program to the Written and Oral Qualifying Examinations and advancement to candidacy usually takes nine quarters or less. From advancement to candidacy to the Final Oral Examination usually requires three quarters. Usually 12 quarters are required from graduate admission to award of the degree.

Maximum allowable time for the attainment of the degree is 20 quarters of enrollment or eight years. This limitation includes quarters enrolled in previous graduate study at a University of California campus prior to admission to
Doctor of Public Health

Degree Information

The Doctor of Public Health is the highest professional degree for the public health generalist. The student is expected to focus on public health practice and to acquire broad knowledge related to professional skills. The minor field can be used to provide some of this breadth. The dissertation is of an applied, practical, problem-solving nature and must demonstrate the candidate's ability for independent investigation.

Course Requirements

The course requirements covered by the Written Examinations depend upon the Division and the field which the student enters, and the study list is chosen in consultation with the Guidance Committee and the adviser in the minor field.

The minor field may be in one of the Divisions of the Department of Public Health, but may be in another department. A minimum of four graduate courses (16 units) in the minor field is required.

A listing of required courses is given below under Areas of Specialization.

Written and Oral Qualifying Examinations

Before advancement to candidacy, the student must pass written examinations in the major and minor fields and the Oral Qualifying Examination. The Written Qualifying Examination in the major field is prepared and administered by the Guidance Committee or by the faculty of the Division. The conduct of the Written Qualifying Examination in the minor field is the responsibility of the representative from the minor field or the Guidance Committee. One re-examination after failure is allowable; more than one would be granted only in unusual circumstances.

When a student is ready to take the Oral Qualifying Examination following successful completion of the written examination, a doctoral committee is nominated by the Chairperson of the Department after consultation with the student, the adviser, and the Division Head, and is appointed by the Dean of the Graduate Division. This normally takes place after the student has made a tentative decision on a dissertation topic. The student should prepare a prospectus of the proposed dissertation research; this should include an appropriate bibliography and preliminary data, if available. This should be submitted to the doctoral committee members at least one month prior to the examination.

The Oral Qualifying Examination may include, but is not necessarily restricted to, questions on the proposed dissertation work. The Oral Qualifying Examination is open only to the members of the doctoral committee and the student. Upon majority vote of the doctoral committee, the Oral Qualifying Examination may be repeated only once.

Doctoral Committee

The doctoral committee consists of at least five (5) faculty members who hold professional appointments. Three (3) of the five (5) must hold appointments in Public Health, two (2) must be "outside" members who hold no appointment in Public Health; one (1) of these latter must be from the minor field.

The doctoral committee administers the Oral Qualifying Examination after the student has successfully completed the written examination.

Final Oral Examination

A Final Oral Examination is required of all candidates. All members of the doctoral committee must be present for the examination and must read, approve and certify the dissertation. A student will not be considered to have passed the Final Oral Examination with more than one "not passed" vote by the committee. Reexamination after failure is determined on an individual basis.

Areas of Specialization

Areas of specialization offered in the Dr.P.H. degree program and typical course plans, in addition to courses required for the master's degree, are listed below.

Behavioral Sciences and Health Education

Recommended Courses for the Major. Public Health 100B, plus at least two advanced statistics courses and at least four advanced courses from among a list of courses designed and offered by the Division. Students may be required to take 8 units of seminar in Behavioral Sciences and Health Education (PH 286).

Typical Minor Field. A minimum of four graduate courses (16 units) from one of the following: Biostatistics; Environmental Health Science; Epidemiology; Health Services; Population, Family and International Health; or four upper division and graduate courses from one of the following: Anthropology; Economics; Education; Psychology; Sociology. Electives. Electives are chosen in consultation with adviser.

Biostatistics

Recommended Courses for the Major. Public Health 200B, 200C, 204E, 204F, M205A, M205B, M205C, 206A, 206B; two courses from among the following: M201E, 201F, 201G, 201H, 201J; two advanced topic courses in Biostatistics; Mathematics 152A, 152B or 150A, 150B, 150C. All enrolled doctoral students must participate in PH 402 once per year.

Typical Minor Field. Behavioral Sciences, Epidemiology, Health Services, or other with approval of adviser. Electives. Electives to be selected in consultation with adviser from the following: Mathematics, Biomathematics, survey research methods, operations research, computer data processing, and other appropriate areas.

Environmental Health Science

Recommended Courses for the Major. Courses determined in consultation with adviser.

Minor Field. One minorfield relating to environmental health sciences, with approval of adviser. This may be a recognized field within the School of Public Health, such as epidemiology or health services, or within other departments or schools, such as engineering and applied science, management or architecture and urban planning.
Epidemiology

Recommended Courses for the Major. Additional courses in biostatistics, demography and epidemiology beyond those required for the M.P.H.; courses or directed group study in specialized areas of infectious and chronic disease epidemiology or application of epidemiology to health planning, management and/or policy; laboratory or clinical studies in medical, health or biological sciences.

Typical Minor Fields. Appropriate public health areas from divisions within the School of Public Health or other department with related interests, e.g., Biostatistics, Biology, Microbiology and Immunology, Neurosciences, and other related fields.

Health Services

Recommended Courses for the Major. From 48 to 72 quarter units beyond the master's degree are required. About one-third are to be in the substantive area of structure and function and one-third in skills and tools required for health services management and policy analysis, and one-third in elective courses to meet individual needs and interests. In addition, the student spends three to nine months in a supervised residency or practicum experience in one or more health-related organizations. The practicum is usually begun after satisfactory completion of the Written Qualifying Examination.

Typical Minor Fields. Appropriate public health areas, economics, political science, sociology, management, and other related fields.

Nutritional Science

Recommended Courses for the Major. Public Health 260E, 260F, 260G, 260H, 251A, 262 and 263 (may be repeated for credit), 400, 460, 461, 463, 596.

Additional Requirements. Additional courses in public health fields, biological sciences, and biostatistics. In the dissertation, emphasis will be community health-oriented.

Population, Family and International Health

Recommended Courses for the Major. Course content for the major field includes courses needed for the Divisional M.P.H., the Divisional Doctoral Seminar, and two advanced courses in research methodology. Beyond the master's degree requirements, a minimum of 48 units (four quarters with an average of 12 units each) is required. Of these, at least 20 units shall be in the Population, Family and International Health Division, including the Divisional Doc-
toral Seminar. Of the balance, at least 12 units must be in other Divisions of the School of Public Health. The remaining 16 units must be from other departments at UCLA.

Typical Minor Field. One minor field related to population studies, family health or international health, aggregating to 18 units. This may be a recognized field within the School of Public Health, or within other departments or schools.

Ph.D. in Public Health

Degree Information

The Ph.D. is the highest research degree in public health for the student who desires indepth knowledge in the area of Public Health. Depth of knowledge and research skills are stressed. The minor field must be cognate to the major field. The dissertation must demonstrate the candidate's ability in independent scholarly investigation.

Course Requirements

The course requirements depend upon the Division and field which the student enters, and the study list is chosen in consultation with the Guidance Committee and the adviser in the minor field.

The minor field must be in a field cognate to the major field in Public Health. A strong minor is required, with a minimum of four full graduate courses (16 units) or equivalent from a department that grants a Ph.D. (The Division of Health Services and Behavioral Sciences and Health Education require five full graduate courses (20 units). Biostatistics may be considered cognate to a major in Public Health.

Written and Oral Qualifying Examinations

Before advancement to candidacy, the student must pass Written Qualifying Examinations in the major and the minor fields, a foreign language examination, and the Oral Qualifying Examination. The written examination in the major field is prepared and administered by the Guidance Committee or by the faculty of the Division. The conduct of the written examination in the minor field is the responsibility of the representative from the minor field or the Guidance Committee. One reexamination after failure is allowable; more than one would be granted only in unusual circumstances.

When the student has successfully completed the written examination and is ready to take the Oral Qualifying Examination, a doctoral committee is nominated by the Chairperson of the Department, and appointed by the Dean of the Graduate Division after consultation with the student, the adviser, and the Division Head.

This normally takes place after the student has made a tentative decision on a dissertation topic. The student should prepare a prospectus of the proposed dissertation research which includes appropriate bibliography and preliminary data, if available. This should be submitted to the doctoral committee members at least one month prior to the oral examination.

The Oral Qualifying Examination may include, but is not necessarily restricted to, questions on the proposed dissertation work. The Oral Qualifying Examination is open only to the members of the doctoral committee and the student. Upon majority vote of the doctoral committee, the Oral Qualifying Examination may be repeated once.

Doctoral Committee

The doctoral committee consists of at least five faculty members who hold professional appointments. Three of the five must hold appointments in Public Health, two must be "outside" members who hold no appointment in Public Health, one of these latter must be from the minor field. At least two members of the doctoral committee (one from the Department and one from another department) must hold the Ph.D.

The doctoral committee administers the Oral Qualifying Examination after the student has successfully completed the written examination, advises the student on his/her course of study and reviews the dissertation.

Final Oral Examination

The Final Oral Examination is required of all candidates. All members of the doctoral committee must be present for the examination and read, approve, and certify the dissertation. A student will not be considered to have passed the Final Oral Examination with more than one "not passed" vote by the committee. Reexamination after failure is determined on an individual basis.

Ph.D. in Biostatistics

Degree Information

Course Requirements

There are no specific course requirements. However, the student's program of study must be approved by the Division of Biostatistics and must include, at the graduate level, three areas of knowledge: biostatistics, mathematical statistics, and a third field such as biology, epidemiology, infectious diseases, medicine, microbiology, pharmacology, physiology, psychology, zoology, or public health. Recommendation for the degree is based on the attainments of the candidate rather than on the completion of specified courses.
Written and Oral Qualifying Examinations

Written examinations in Biostatistics, in Mathematical Statistics, and in the student's selected third field, are taken before advancement to candidacy. The Biostatistics examination is prepared by the faculty in Biostatistics, the mathematical statistics examination by the faculty of the Mathematics Department, and the third field examination by a qualified person in that field at UCLA.

The Oral Qualifying Examination is taken before advancement to candidacy. Any examination which is failed may be repeated once. The time of reexamination is specified by the Division in the case of the written examinations or by the student's committee in the case of the oral examination. A student who does not take the examination at the normal time forfeits his right to a reexamination.

Doctoral Committee

The doctoral committee consists of at least five faculty members who hold professional appointments. Three of the five must hold appointments in the major field, Biostatistics, two must be "outside" members who hold no appointment in the major department, Public Health.

The doctoral committee administers the Oral Qualifying Examination after the student has successfully completed the Written Qualifying Examinations. The oral examination is usually a defense of the dissertation proposal.

Final Oral Examination

A Final Oral Examination is required of all candidates. All members of the doctoral committee examine the candidate during the required Final Oral Examination and read, approve, and certify the dissertation. A student will not be considered to have passed the Final Oral Examination with more than one "not passed" vote by the committee. Reexamination after failure is determined on an individual basis.

A copy of the dissertation must be submitted to the Graduate Division and to the Division of Biostatistics.

Graduate Courses

200A-2008-200C. Biostatistics. (Formerly numbered 240A-240B-240C.) Lecture, three hours; discussion, one hour (200A only). Prerequisites: course 100C, Mathematics 32C, 152B or equivalent. With consent of instructor certain prerequisites may be taken concurrently or waived. Quantitative methods in public health, medicine and biological sciences; statistical theory and application to problems in design and analysis of medical experiments and surveys.

The Staff

201F. Special Topics: Distribution Free Methods. (Formerly numbered 268B.) Lecture, three hours; discussion, one hour. Prerequisites: course 100D or 150C or equivalent. Theory and application of distribution free methods in biostatistics.

The Staff

201G. Special Topics: Statistical Simulation Techniques. (Formerly numbered 268C.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 150C or 152B, a course in computer programming, course 100C, and consent of instructor. Techniques for simulating important statistical distributions with applications in biostatistics.

The Staff

201H. Special Topics: Finite Population Sampling. (Formerly numbered 268D.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 150C or 152B or course 100D. Theory and methods for sampling finite populations and estimating population characteristics.

The Staff

201J. Special Topics: Supplemental Topics. (Formerly numbered 268E.) Lecture, three hours; discussion, one hour. Prerequisites: course 100C and consent of instructor. Topics in Biostatistics not covered in other courses.

The Staff

201K. Survival Distributions. (½ course) (Formerly numbered 226.) Lecture, two hours. Prerequisites: Mathematics 32B or equivalent, Mathematics 152B or 150C or equivalent. Analysis of survival distributions with non-censored and censored data.

Ms. Clark

201L. Advanced Demography. (Formerly numbered 227.) Lecture, three hours. Prerequisites: course 102 or equivalent. Calculation of estimates of stable population parameters. Application of stable population concepts to the estimation of fertility rates in absence of vital registration data. Consequences of changes in vital rates. Implications for policy.

Ms. Mickey

201M. Introduction to Statistical Methods for Biological Assays. (Formerly numbered 244A.) Lecture, four hours. Prerequisites: course 100C and consent of instructor. Theory and methodology of statistical methods developed for research assays for biological substances.

The Staff

204E. Seminar in Biostatistics. (½ course) (Formerly numbered 269.) Discussion, two hours. Prerequisites: course 200B. Two courses from 201E-201J satisfy this requirement.

Mr. Chang

204F. Advanced Seminar in Biostatistics. (½ course) (Formerly numbered 279.) Discussion, two hours. Prerequisites: course 200C and consent of instructor. Students present and discuss current developments of methodology and problems in applications of Biostatistics.

The Staff

M205A-M205B-M205C. Linear Statistical Models. (Same as Mathematics M279A-M279B-M279C.) (Formerly numbered M244A-M244B-M244C.) Lecture, three hours. Prerequisites: Mathematics 150C or 152B or equivalent. Topics include linear algebra, applied to linear statistical models. Determination of quadratic forms, the Gauss-Markov theorem, and fixed and random component models, balanced and unbalanced designs.

Mr. Afifi, Mr. Chang

M206A-M206B-M206C. Multivariate Biostatistics. (Formerly numbered 242A-242B-242C.) Lecture, three hours. Prerequisites: course M205A or equivalent. Multivariate analysis as used in biological and medical situations. Topics from component analysis, factor analysis, discriminant analysis, analysis of dispersion, canonical analysis.

The Staff

207E. Advanced Topics—Stochastic Processes. (Formerly numbered 243A.) Lecture, three hours. Prerequisites: courses in upper division mathematics including statistics and probability. Stochastic processes applicable to medical and biological research.

Ms. Dunn, Mr. Massey

207F. Advanced Topics—Mathematical Epidemiology. (Formerly numbered 243B.) Lecture, three hours. Prerequisites: course 207E or equivalent. Courses in upper division mathematics including statistics and probability. Mathematical theory of epidemiology with deterministic and stochastic models, and problems involved in applying the theory.

Mr. Massey

207G. Advanced Topics—Statistical Genetics. (Formerly numbered 243C.) Lecture, three hours. Prerequisites: courses in upper division mathematics including statistics and probability. Introduction to statistical genetics.

Ms. Dunn

207H. Statistical Methods for Research Biological Assays. (Formerly numbered 244B.) Lecture, four hours. Prerequisites: course 201M. Topics include statistical methods developed for research essays for which the standard procedures do not apply.

Mr. Chang

M207J. Computational Statistics. (Same as Biostatistics M280 and Mathematics M280.) (Formerly numbered M224A.) Lecture, three hours. Prerequisites: Mathematics 115 and 150C or equivalent. Introduction to theory and design of statistical programs; pivoting and other technologies used in stepwise regression, non-linear regression algorithms, algorithms for balanced and unbalanced analysis of variance including the mixed model, iterative rescaling and other methods for log-linear models.

Mr. Jennrich

210. Principles of Infectious Disease Epidemiology. (Formerly numbered 204.) Lecture, three hours. Prerequisites: one year sequence of biology and chemistry, course 100A or equivalent, 112, and consent of instructor. Ascertainment of infection, transmission and epidemiological parameters rather than clinical and pathologic aspects. Specific diseases discussed in depth to illustrate epidemiologic principles.

Mr. Barr

211A. Epidemiology II, Lecture, two hours; laboratory, four hours. Prerequisites: course 100B (may be taken concurrently), 114, and consent of instructor. Discussion of study designs, research methodology, problems of measurement and analytic techniques used in epidemiologic research.

Mr. Detels and the Staff

211B. Advanced Epidemiology. (Formerly numbered 246B.) Lecture, two hours; laboratory, four hours. Prerequisites: course 101 or consent of instructor. Continuation of course 211A; concentration on selection of appropriate research designs, problems of measurement, and analytic techniques commonly used in epidemiologic studies.

Mr. Vischer and the Staff

212E. Epidemiology of Cardiovascular Disease. (½ course) Lecture, one hour; discussion, one hour. Prerequisites: course 211A and consent of instructor. Theoretical, practical and controversial aspects of cardiovascular epidemiology in developed and underdeveloped countries.

Mr. Uqraza

212G. Epidemiology of Neurologic Disease. (½ course) (Formerly numbered 215.) Lecture and discussion, two hours. Prerequisites: course 211B or equivalent and consent of instructor. Epidemiologic characteristics of selected chronic neurologic diseases with particular emphasis on etiology and possible control.

Ms. M. Visscher
212H. Epidemiology of Arthropod-borne Disease. (Formerly numbered 267.) Lecture, four hours. Prerequisites: Biology 181 or equivalent. Epidemiologic aspects of disease carried by arthropods, emphasizing life cycle and ecology of vectors as related to epidemiology of viral, rickettsial, bacterial, protozoal and helminthic diseases. Mr. Barr

213. Environmental Disease. Lecture and discussion, four hours. Prerequisites: Chemistry 21, Physics 3C or equivalent, courses 100B, 112, Graduate Standing and consent of instructor. Methodologic problems and approaches of epidemiology for assessing the health impact of major types of environmental exposure. Mr. Spivey

214. Infectious and Tropical Disease Epidemiology. Lecture, three hours; discussion, three hours. Prerequisites: courses 100A, 112, 113 or equivalent, and consent of instructor. Epidemiology of major infectious and tropical diseases in developing countries, including those with direct or contact mode of spread and those vector borne. Mr. Schacher, Mr. Work

215A. Epidemiology of Cancer. (Formerly numbered 202A.) Lecture and discussion, four hours. Prerequisites: courses 100A, 112, and consent of instructor. Etiologic concepts and mechanisms. Pathogenesis, diagnosis and classification of neoplastic diseases. Epidemiologic principles and methods as applied to cases of cancer. Models of causation. Mr. Armito

216A. Ecology of Exotic Diseases. Lecture, two hours; discussion, six hours. Prerequisites: course 112, Microbiology 101 and 103 or equivalent, and consent of instructor. Geographic pathology and behavioral causes of exotic diseases. Immunological and biological determinants of the distribution, exposure to and occurrence of exotic diseases. Mr. Work

216B. Viral Diseases of Man. Lecture, two hours; laboratory, six hours. Prerequisites: course 216A or equivalent and consent of instructor. Viral infectious diseases of man. Natural history, epidemiology, diagnosis, control, and prevention of these diseases especially in tropical situations. Mr. Work

217. Prevalence Studies in Epidemiology. Lecture, two hours; discussion, two hours; laboratory, two hours, ten to twelve hours of outside assignments per week. Prerequisites: courses 211A or 181 and 100B or equivalent, and consent of instructor. Design, testing, field use, analysis and interpretation of data collection, and prevalence estimates in epidemiologic studies of populations and samples. Includes design and administration of questionnaires, interviewing procedures and the application of non-invasive objective measurements. Ms. Bourque, Ms. Coulson

218A. Protozoal Diseases of Man. Lecture, four hours. Prerequisites: Microbiology 101 or equivalent, or Biology 105 or equivalent, and consent of instructor. Comprehensive overview of systematics, morphology, biology, host-parasite relationships, public health problems and control of protozoa parasitic in man and animals. May be taken concurrently with 218B. Mr. Ash

218B. Protozoal Diseases of Man. (½ course) Laboratory, four hours. Prerequisites: course 218A (may be taken concurrently). Laboratory methods of diagnosis and microscopic recognition of protozoa parasitic in man and animals. Includes intestinal protozoa and organisms occurring in the blood and tissues of their hosts and pathology associated with these infections. Mr. Ash

219. Arthropods of Medical Importance. Lecture, two hours; laboratory, six hours. Prerequisites: Biology 105 or equivalent, and consent of instructor. Major arthropods of medical and Veterinary importance; Microbiology 101 or equivalent. Biology and identification of insects and mites of public health importance involved in transmission and causation of human disease. Mr. Fielding

220A. Helminthic Diseases of Man. Lecture, four hours. Prerequisites: Microbiology 101 or equivalent or Biology 105 or equivalent, and consent of instructor. Comprehensive overview of systematics, morphology, biology, host-parasite relationships, public health problems and control of the nematodes, trematodes and cestodes parasitic in man and animals. May be taken concurrently with 220B.

220B. Helminthic Diseases of Man. (½ course) Laboratory, four hours. Prerequisite: course 220A (may be taken concurrently.) Diagnosis and practical microscopic recognition of the nematodes, trematodes and cestodes parasitic in man and animals. Mr. Ash

221. Seminar in Epidemiology: Methodology. (½ course) Formerly numbered 265.) Discussion, two hours. Prerequisites: course 211A or equivalent and consent of instructor. Review of current epidemiologic research conducted in recent medical literature. May be repeated for credit. Offered on a S/U grade basis.

222. Seminar in Epidemiology: Infectious and Tropical Disease. (½ course) Formerly numbered 266.) Discussion, two hours. Prerequisites: course 211A or equivalent and consent of instructor. Review of research on specific diseases of public health importance. May be repeated for credit. Offered on a S/ U grade basis.

223. Topics in Theoretical Epidemiology. (½ course) Lecture and discussion, two hours. Prerequisites: courses 100A-100B-100C-100D, 211A-211B or Mathematics 152A and consent of instructor. Selected topics from current research areas in epidemiologic theory and quantitative methods. Topics selected from biologic and epidemiologic models, epidemiologic models, problems in interference, model specification problems, design issues, analysis issues, and confounding. May be repeated for credit with instructor’s consent. Offered on a S/U grading basis. Mr. Green

225. Research Methods in Cancer Epidemiology. (½ course) Lecture and discussion, two hours. Prerequisites: courses 100A, 112, 211A. Biologic, quantitative, and epidemiologic methods and applications in epidemiology research, analysis and statistical considerations of various epidemiologic models. Mr. Mack

229. Advanced Seminar in Epidemiology. (½ course) Discussion, two hours. Prerequisites: course 211B and consent of instructor. Students and faculty present and discuss current research in Epidemiology. May be repeated for credit. Offered on a S/U grade basis. The Staff

231. Regulation of Health Care in the United States. Lecture, three hours; discussion, one hour. Prerequisites: course 130 plus one course in health care management, health planning, public health science, economics or health law or equivalent, and consent of instructor. Description and analysis of health care regulation by Federal and State governments. Course or equivalency course and arguments for more competition. Specific topics include facility certification, quality assurance, certificate of need, rate setting, and regulation of physicians and technology. Mr. Fielding

232. Governmental Health Services and Trends. (Formerly numbered 202.) Lecture, four hours. Prerequisites: course 130, 138, 182, or equivalent and consent of instructor. Systematic analysis of the interface between organized programs of personal health services and governmental agencies at all jurisdictional levels. Changing relationships between traditional public health and newer medical and quality-control functions. Mr. Shonick

233. Health Policy Analysis. Lecture, two hours; discussion, two hours. Prerequisites: three courses in social sciences, course 130 or equivalent and consent of instructor. Conceptual and procedural tools for the analysis of health policy, emphasizing the role of analysis during the various phases of the life-cycle of public policy. Mr. Cameron

234. Clinical Epidemiology. (½ course each) Prerequisites: prior or concurrent enrollment in courses 100A, 112, 136A and consent of instructor. Introduction to special issues in clinical Health Services Research. Focus on research design and analysis of data. Offered on In-Progress grading basis. Mr. Greenfield

235. Law, Social Change and Health Service Policy. (Formerly numbered 208.) Lecture, four hours. Prerequisites: course 130, two upper-division courses in political science or sociology or equivalent, and consent of instructor. Selecting policy and formulating policy for health services and governmental agencies at all jurisdictional levels. Specific topics include facility certification, quality assurance, and consent of instructor. Fundamental issues in quality assurance, public perception, health status. Mr. Brook

237A-237B. Special Topics in Health Services Research Methodology. Lecture, one hour; discussion, three hours. Prerequisites: courses 100A, 100B, 100C, 130, or equivalent and consent of instructor. In-depth consideration of problems in the application of statistical and other quantitative methods in health services research. Students and faculty critique adequacy of study designs, appropriateness of analyses, and degree to which conclusions are supported by data. Offered on a S/U grade basis. Ms. Cretin, Mr. Shonick

238. Microeconomic Theory of the Health Sector. (Formerly numbered 203.) Lecture, four hours. Prerequisites: Economics 110 or 130 or equivalent; 232; and consent of instructor. Microeconomic aspects of the health care system including health manpower substitution, choice of efficient modes of treatment, market efficiency and competition. Mr. Schweitzer

239. Aging and Long-Term Care. Lecture, four hours. Prerequisites: courses 130, 138, 182, or equivalent and consent of instructor. Long-term care of the chronically elderly is examined from perspectives of political and sociodemographic trends; this includes populations at risk, policy options, and alternative forms of care such as nursing homes, home care, and care by informal support systems. Mr. Kane

240. Health Care Issues in International Perspective. Lecture, four hours. Prerequisites: two courses in health administration, two upper division courses in social sciences, or equivalent, and consent of instructor. Analysis of crucial issues in health care: manpower; economic system of health facilities, patterns of health service delivery, regulation, planning and other aspects of health care systems are probed in the settings of European welfare states, developing nations, and socialist countries. Mr. Roemer

244. Issues in Health Planning. (Formerly numbered 281.) Discussion, three hours; other, three hours. Prerequisites: course 181 or equivalent research course and 444B. In-depth presentation and analysis of current issues of importance to advanced students in health planning. The Staff
247. Research Topics in Health Economics. (Formerly numbered 207.) Seminar, four hours. Prerequisites: courses 130, 238, 446 or equivalent, and consent of instructor. Economic analyses of current health services issues. Critical examination of studies pertaining to health manpower, health care costs and controls, the diffusion of technology, and cost-benefit analysis of health programs. Mr. Schweitzer

248. Small Area Planning for Resources for Personal Health Service. (Formerly numbered 443A-443B.) Lecture, three hours; laboratory, two hours. Prerequisites: courses 130, 134, or equivalent and consent of instructor. General planning theory and health planning theory, methods, and experience with planning for personal health care resources for small geographic areas. Emphasis on estimation of required utilization levels and health care resources. Survey of elements of different disciplines used in area-wide health planning. Laboratory projects and exercises designed to implement studies of health planning theory and methods. Mr. Shenonick

250. Advanced Environmental Health. (Formerly numbered 210.) Lecture, three hours. Prerequisites: course 150 or equivalent and consent of instructor. Theoretical considerations and supporting data involved in scientific establishment and justification of health manpower, health care costs and controls, the diffusion of technology, and cost-benefit analysis of health programs. Mr. Schweitzer

260E. Advanced Nutrition: Vitamins. (Formerly numbered 211A.) Lecture, three hours; discussion, one hour. Prerequisites: Biological Chemistry 101A-101B or equivalent, and consent of instructor. Comprehensive treatment of vitamin nutrition and metabolic-nutrient interactions. Ms. Swendsen

260F. Advanced Nutrition: Proteins. (Formerly numbered 211B.) Lecture, three hours; discussion, one hour. Prerequisites: Biological Chemistry 101A-101B or equivalent, and consent of instructor. Comprehensive treatment of lipid nutrition and metabolic-nutrient interactions. Ms. Swendsen

260G. Advanced Nutrition: Lipids. (Formerly numbered 211C.) Lecture, three hours; discussion, one hour. Prerequisites: Biological Chemistry 101A-101B or equivalent, and consent of instructor. Comprehensive treatment of lipid nutrition and metabolic-nutrient interactions. Ms. Swendsen

261A. Laboratory Techniques in Environmental and Nutritional Science. (Formerly numbered 221A.) Lecture, two hours; laboratory, two hours. Prerequisites: Chemistry 25 or Biological Chemistry 101A (may be taken concurrently), course 165, and consent of instructor. Biochemical techniques and instrumentation used in Environmental and Nutritional Sciences. Mr. Eckhart

261B. Advanced Laboratory Techniques in Nutritional Science. (Formerly numbered 212B.) Lecture, one hour; laboratory, six hours. Prerequisites: course 261A and consent of instructor. Current biochemical methods emphasizing instrumentation. Mr. Eckhart

262. Seminar in Clinical Nutrition Problems. (½ course) (Formerly numbered 284.) Lecture, two hours. Prerequisites: courses 162, 167, and one course in 260 series. Review of current literature in nutritional science. Emphasis on methodology and data evaluation. May be repeated for credit. The Staff

263. Seminar in Public Health Nutrition. (½ course) (Formerly numbered 285.) Lecture, two hours. Prerequisites: courses 162, 167, and one nutrition course in 200 or 400 series. Review of literature in selected areas of public health nutrition. May be repeated for credit. The Staff

264E. Clinical Nutrition Problems. (½ course) Lecture, two hours. Prerequisites: Biological Chemistry 101 or 201; or one or more 200 level Nutrition courses. Nutrition and nutrient-metabolic interactions in various disease states such as gastrointestinal disorders, renal disease and liver disease. Ms. Swendsen, Ms. Alfín-Slater, Mr. Kopple

264F. Clinical Nutrition Problems. (½ course) Lecture, two hours. Prerequisites: Biological Chemistry 101 or 201; or one or more 200 level Nutrition courses. Nutrition and nutrient-metabolic interactions in various disease states such as cardiovascular disease, diabetes and obesity. Ms. Swendsen, Ms. Alfín-Slater, Mr. Kopple

270. Seminar in Maternal and Child Nutrition. (Formerly numbered 273.) Lecture, two hours; discussion, two hours. Prerequisites: courses 110, 161, 170 or equivalent, and consent of instructor. Nutrition of mothers, infants and children in families at various economic levels. Emphasis on prevention and treatment of protein-calorie malnutrition; relationship between nutrition and mental development; impact of ecological, socio-economic and cultural factors on nutrition, nutrition education and service. Mr. Jeffliffe, Ms. Neumann

271. Medical Anthropology. (Formerly numbered 225.) Lecture, four hours. Prerequisites: courses 110, 112. one upper division course in psychology, sociology, or anthropology or equivalent, and consent of instructor. Cross-cultural aspects of human behavior and their role in perceiption, treatment, management of environmental decision systems. Experiments designed to implement studies of health programs. Mr. Schweitzer

272. Seminar on Current Issues in Maternal and Child Health. (½ course) (Formerly numbered 270.) Discussion, two hours; laboratory, one hour. Prerequisites: courses 100A, 110, 130 or equivalent, and consent of instructor. Intensive seminar-course in qualitative research methodology. Emphasis placed on using qualitative methods and techniques in research and evaluation related to health care. Ms. Scrimshaw

274A-M274B. Population Policy and Fertility. (1 course each) (Same as Sociology M287A-M287B.) Lecture, three hours; discussion, one hour. Prerequisites: courses 102, 112, 173 or equivalent, Graduate Standing, and consent of instructor. Analysis of current literature in population policy and fertility in conjunction with student research reports. May not be repeated for credit. Ms. Blake

275. Human Lactation: Biological and Public Health Significance. (½ course) Lecture, two hours. Prerequisites: courses 112, 270 or equivalent, and consent of instructor. Biological and economic aspects of human lactation in industrialized and developing countries. Mr. Jeffliffe

280. Change Determinants In Health Related Behavior. (Formerly numbered 233.) Lecture, four hours. Prerequisites: course 182, three courses from Psychology 135, 170A, Sociology 152, 154, or equivalent, and consent of instructor. Unified behavioral science approach to natural determinants of change, as foundation for planned change in health-related behavior at community, group and individual levels. The Staff

281. Advanced Social Research Methods in Health. (Formerly numbered 245B.) Lecture, four hours; laboratory, two hours. Prerequisites: courses 100B, 181, or equivalent, and consent of instructor. Problems of health survey design and data collection; measurement issues in data analysis and interpretation; use of computer for analysis of large-scale survey data using various statistical techniques. The Staff

282. Communications in Health Promotion and Education. Lecture, two hours; discussion, two hours. Prerequisites: courses 182, 183, or equivalent, and consent of instructor. The course focuses on design, implementation, and evaluation of interpersonal communication strategies for health promotion programs. Equal emphasis is on communication theory, models, and empirical research literature and on specific applications in health programs and case studies. Mr. Kar
M238E. Sociocultural Aspects of Health and Illness: Social Epidemiology. (Same as Sociology M249A.) (Formerly numbered M249A.) Lecture, two hours. Prerequisites: course 182, three courses in psychology, sociology, or anthropology, or equivalent, and consent of instructor. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on life styles and other sociocultural/environmental factors associated with disease and mortality. The Staff

M238F. Sociocultural Aspects of Health and Illness: Health, Disease, and Mortality. (Same as Sociology M249B.) (Formerly numbered M249B.) Lecture, three hours. Prerequisites: courses 182, three courses in psychology, sociology, or anthropology, or equivalent, and consent of instructor. Sociocultural examination of the concepts "health" and "illness" and role of various health professionals especially physicians. Attention given to meaning of professionalization and professional-client relationships within a range of organizational settings. Mr. Goldstein

M238G. Sociocultural Aspects of Health and Illness: Health Behavior. (Same as Sociology M249C.) (Formerly numbered M249C.) Seminar, two hours. Prerequisites: course 182, three courses in psychology, sociology, or anthropology, or equivalent, and consent of instructor. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick role behavior. Mr. BerkanoVin

284. Ecology of Mental Health. (Formerly numbered 228.) Lecture and discussion, two hours; reading and preparation of a serious research paper, four hours. Prerequisites: courses 100A, 112 or equivalent, 182 or equivalent, and consent of instructor. Analysis of occurrence and distribution of mental disorders in the community and the relationships to social structure. Problems of classification, definition, measurement in socio-psychiatric epidemiology, socio-cultural and social-psychological factors in mental disorders. The Staff

285. Community Problems in Mental Disorders. (Formerly numbered 252.) Lecture, three hours. Prerequisites: course 182, three upper division or graduate courses in psychology or sociology or equivalent, and consent of instructor. Intensive examination of the meaning of mental health, mental illness, and psychotherapy, both curative and preventive within a public health context. Implications for social policy and planning. Mr. Goldstein

286. Seminar in Behavioral Sciences and Health. (1/2 to 1 course) (Formerly numbered 286C.) Lecture, two hours. Prerequisites: courses M238E, M238F, M238G or equivalent, and consent of instructor. Recent significant contributions of behavioral sciences to understanding health and illness within the context of varying topics each quarter. May be repeated for credit. Mr. Winer and the Staff

287. Community Organization in the Health Field. Lecture, two hours; Field Work, eight hours. Prerequisites: courses 182, 183, at least two courses in psychology or sociology or anthropology, or equivalents, and consent of instructor. Theory and practice of community organization applied to health problems, including analysis of relevant factors in physical, social, and economic environments and development of community-based intervention strategies to improve health and health services. Mr. Brown

288. Current Problems in Health Education. (Formerly numbered 250.) Lecture, one hour; discussion, three hours; other, term paper. Prerequisites: courses 183, 280, and consent of instructor. Current problems and findings in health education content areas, such as, nutrition, mental health, family health, consumer health, safety, communicable and chronic diseases. Mr. Washington

289. Issues in Program Evaluation. Discussion, three hours; Reading. Prerequisites: course 281, a course in social sciences, or equivalent and consent of instructor. Advanced seminar which will explore the problems of planning and implementing evaluation research in the context of local demonstration projects. Mr. Washington

290. Seminar in Community Health Education. (1/2 course) (Formerly numbered 261.) Discussion, two hours. Prerequisites: courses 288 and 481. In-depth analysis of health education concepts as they relate to the professional practitioner. Mr. Washington

291. Advanced Topics in Health Survey Research Methods. Lecture, two hours; discussion, two hours; other, one hour. Prerequisites: course 281, or equivalent, and consent of instructor. Special topics in health survey research methods. Design and preparation of a serious research paper. The Staff

400. Field Studies in Public Health. (1/2 or 1 course) Prerequisite: consent of instructor. Field observation and studies in health promotion or medical care. Emphatic on field placement and program training documentation on form obtainable from Student Affairs Office. Not applicable to minimum course requirements for the M.S. degree. Only four units applicable to minimum total of 44 units required for the M.P.H. degree. The Staff

401. Statistical Methods in Medical Studies. (1/2 course) (Formerly numbered 409.) Lecture, two hours. Prerequisites: courses 190 or 101B, Linear Algebra or Mathematics 152B or equivalent and Graduate Standing in Public Health or related field. Design and analysis of biomedical studies. Ms. Clark

402. Biostatistical Consulting. Discussion, two hours; Laboratory, two hours. Prerequisites: course 100C and consent of instructor. Principles and practices of biostatistical consulting. The Staff

402A. Principles of Biostatistical Consulting. (1/2 course) Lecture, one hour; discussion, one hour. Prerequisites: courses 100B or 101B and Math 150B or 152B. Presentation of structural format for statistical consulting. Role of statistician and client. Reviews of actual statistician-client interactions and case studies. Mr. Guthrie and Ms. Clark

402B. Biostatistical Consulting. Discussion, two hours; Laboratory, two hours. Prerequisites: courses 100C or 100A. Principles and practice of biostatistical consulting. May be repeated for credit. The Staff

403. Computer Management of Health Data. Lecture, three hours; laboratory, two hours. Prerequisites: courses 100A, 112 and 130, Mathematics 1A, and Engineering 10, or equivalent, and consent of instructor. Concepts of health data management, design and maintenance of large data base on tapes or disks; computing tools and techniques facilitating data retrieval for statistical analysis, tabulation and report generation useful to Biostatisticians, Health Planners, and other health professionals. Mr. Chern

404. Principles of Sampling. Lecture, three hours; discussion, one hour. Prerequisites: courses 100B, 112, or equivalent and consent of instructor. Statistical aspects of the design and implementation of a sample survey. Techniques for the selection of the sample, the design of the data collection forms and errors. Avoiding improper use of survey data. Mr. Cumberland

405. Demographic Materials and Methods. Prerequisites: courses 100A or 101A, 112 or 114, 180, or equivalent and consent of instructor. Sources of demographic information; description of human populations; calculation and interpretation of statistics used to measure and describe population growth, structure, geographic distribution, mortality, natality and migration. Mr. Crouse

410A. Management of Epidemiologic Data. (1/2 course) (Formerly numbered 412A.) Lecture, four hours. Prerequisites: courses 100A, 112 (one may be taken concurrently with consent of instructor). Concepts, collection and management of data with particular emphasis on large scale data bases. Introduction to computer and appropriate selection and use of packaged programs. Ms. Coulsen

410B. Management of Epidemiologic Data. (1/2 course) (Formerly numbered 412B.) Lecture, two hours. Prerequisites: course 410A or equivalent and consent of instructor. Development of special purpose programming and compiler languages for epidemiologic problems. Data management in large-scale studies in infectious and chronic diseases emphasized. Ms. Cretin

411. Research Resources in Epidemiology. (1/2 course) Lecture, one hour; discussion, one hour. Prerequisites: courses 100B, 211B, and consent of instructor. Instruction and practical experience in the use of varied bibliographic aids and sources of information, building of reference files, and presentation of research findings for publication. Ms. Crouse, Mr. Spivey

412. Preventive Medical Services in the Community. (1/2 course) (Formerly numbered 414.) Lecture, two hours. Prerequisites: other, field work. Emphasis on life styles and other socio-ecological factors affecting differential patterns of health behavior, illness behavior, and sick role behavior. Mr. BerkanoVin

413. Epidemiologic Aspects of Preventive Medicine. (1/2 course) (Formerly numbered 458.) Lecture and discussion, two hours. Prerequisites: Graduate Standing, courses 100A, 110, 112, or M310 degrees, and consent of instructor. Current technical, epidemiologic and programmatic aspects in preventive medicine. Mr. Breitlow, Mr. Fielding

414. Applied Epidemiology in Latin America. (1/2 course) Prerequisites: courses 100B, 112, 174E or equivalent and consent of instructor. Application of epidemiologic methods to health problems in Latin America. Mr. Amajo

430. Management of Medical Care Organizations and Programs. (Formerly numbered 414.) Lecture, four hours. Prerequisites: course 131 and consent of instructor. Application of organizational, economic and behavioral science concepts to understanding structure and functions of health care facilities and planning. Mr. Pointer

431. Managerial Processes in Health Service Organizations. (Formerly numbered 416.) Lecture, one hour; laboratory, three hours. Prerequisites: course 430 and consent of instructor. Managerial skills and behavioral approaches applied at several levels: individual, interpersonal, group, intergroup, system, and inter-organization. Unique features of health service organizations are stressed as applications are presented. Mr. Pointer, Mr. Ross

432. Integrative Seminar in Health Administration. (1/2 course) Discussion, four hours. Prerequisite: course 431. Resident and preceptors are responsible for presenting cases of actual administrative problems for solution by teams of students and faculty. Mr. Pointer, Mr. Ross, Ms. Cretin

433. Contemporary Issues in Health Services Management. (Formerly numbered 418.) Lecture, two hours; discussion, two hours. Prerequisite: course 431. Advanced study of contemporary infrastructural issues which affect management of health care facilities. Ms. Cretin, Mr. Pointer, Mr. Ross
434. Quantitative Methods in Health Services Management. (Formerly numbered 443.) Lecture, four hours. Prerequisite: course 139. Quantitative methods for managerial decision-making. Deterministic and stochastic analyses of problems in: resource allocation, inventory control, task sequencing, patient and financial planning, demand forecasting, and cost-benefit analysis. Mr. Crestin

435. Manpower Management in Health Services Organizations. (½ course) (Formerly numbered 436.) Lecture, two hours. Prerequisites: course 131 or equivalent, and consent of instructor. Introduction to personnel administration and labor relations and their application to health care facilities. Mr. Pointer

436. Financial Management of Health Service Organizations. Lecture, four hours. Prerequisites: courses 131, 141, 430, or equivalent, and consent of instructor. Application of financial management and accounting principles to health care facilities including unique financial characteristics of health care facilities, third party reimbursement, cost finding and rate setting, operational and capital budgeting, and risk management. The Staff

437. The Legal Environment of Health Services Management. (½ course) Lecture, two hours. Prerequisites: course 131 or equivalent, and consent of instructor. General survey of legal aspects of health services management including constitutional, statutory, common law, administrative, civil and criminal law, informed consent, medical malpractice, contracts, negligence, and case law relating to health facility operations. Mr. Girard

438. Issues and Problems of Local Health Administration. (½ course) (Formerly numbered 438.) Lecture, two hours. Prerequisites: courses 110, 130, other health services course, and consent of instructor. Analysis of organizational issues currently faced by local health departments in increasing scope and quality of services; exploration of administrative problems and inter-agency relationships. The Staff

439. Dental Care Administration. (½ course) Lecture, two hours. Prerequisites: courses 100A and 112 or equivalent (may be taken concurrently) and consent of instructor. In-depth examination of several specific dental care policy issues: Manpower, relationship of treatment to disease, national health program strategies, and evaluation mechanisms. Mr. Schoen

440A. Health Information Systems: Organization and Management. (Formerly numbered 402A.) Lecture, two hours; laboratory, three hours. Prerequisites: courses 140A-140B or equivalent, and consent of instructor. Principles of and systems relating to organization and management of a health facility's health information system. The Staff

440B. Health Information Systems: Organization and Management. (Formerly numbered 402B.) Lecture, two hours; laboratory, three hours. Prerequisites: course 440A or equivalent, and consent of instructor. Health and administrative research using clinical records. Principles of planning for routine and special studies. Individual investigation in methods of obtaining and processing data to meet needs of programs in institution and agency. Introduction to problems of medical auditing; analysis of medical and health services. The Staff

441A-441B. Health Record Systems. (½ course each) (Formerly numbered 444A-444B.) Lecture, two hours. Prerequisites: courses 100A, 112, 130, or equivalent, and consent of instructor. A is required for B. Advanced study of principles and criteria involved in planning, installing, and administering systems to record, process and retrieve data for records and reports in health and medical institutions and agencies. The Staff

442. Principles and Practices of Medical Care Auditing. (½ course) (Formerly numbered 468.) Lecture, two hours. Prerequisites: courses 100A, 112, 130, or equivalent, and consent of instructor. Analysis of systems used in evaluating health care professional providers' performances in hospital and ambulatory settings. Health information systems and data available used for medical audits. Mr. Goodman, Ms. Johnson

443D. Advanced Hospital Financial Management Simulation. Lecture, one hour; discussion, one hour; laboratory, one hour. Prerequisites: courses 100A, 110, 130, 141, 436 and consent of instructor. Practical aspects of hospital management decisions in a changing environment examined through computer simulation, with particular emphasis on economic projections, demand patterns, investment programs, and health care regulations. Mr. Coyne

443E. Advanced Hospital Financial Management Seminar. Seminar, four hours. Prerequisites: courses 130, 131, 141, 436, or equivalent and consent of instructor. Hospital financial management, including reimbursement management, capital financing, and capital investment analysis, is discussed and analyzed with respect to students' individual residency sites. Mr. Coyne

444A. Information Processing for Health Planners. (Formerly numbered 407.) Lecture, four hours. Prerequisites: courses 100A or 101A, 134, and consent of instructor. Information theory presented as framework for understanding data analysis. Computer used to implement data analysis results with previously presented information systems concepts. The Staff

444B. Applied Methodology in Health Planning. (Formerly numbered 406.) Lecture, three hours; field work, four hours. Prerequisites: course 100A, 101A, 130, or equivalent, 24B, 444A, and consent of instructor. Demonstrating methodology of health planning by involving students in formulation of actual health plan for existing agency in Los Angeles. Mr. Torrens

444A-444B. Practicum in Health Planning Policy. (Formerly numbered 445A-445B.) Field placement. Prerequisites: courses 100A, 100B, 130 (may be taken concurrently), 223, 224, or equivalent, and consent of instructor. Required of all MSPH students in Health Planning and Policy study. Preparation for and subsequent analysis of 10-week work experience undertaken during summer between first and second year. Offered on In-Progress, S/U grade basis. Mr. Camaron

448. Financing Health Care. (Formerly numbered 411.) Lecture, four hours. Prerequisites: Economics 1, 2 or equivalent, course 130, and consent of instructor. Patterns of health care financing by consumers, providers, third-party intermediaries; trends in health service use; expenditures, national health insurance and international comparisons of health financing. Mr. Schweitzer

448D. Management of Health Maintenance Organizations. Lecture, three hours. Prerequisites: courses 100A, 101A, 130, or equivalent, and consent of instructor. Alternative approaches to fee-for-service for providing, paying, or arranging for delivery of health care services, and relating these approaches to the national health policy. Mr. Wasserman

447E. Health Insurance Principles and Programs. (Formerly numbered 447.) Lecture, four hours. Prerequisites: courses 130, 232, and additional course in health services, or equivalent and consent of instructor. Examination of social, actuarial, and commercial aspects of health insurance, principles of insurance, and the role of the insurance company in the provision of health services. Comparison with government-sponsored health insurance. Analysis of diversity of voluntary medical care insurance plans under different sponsorships and with various types of coverage and benefits and their implications for public and private medical care developments. Mr. Shonick

448. Evaluation of Health Services and Programs. (Formerly numbered 419.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 100A, 130, 139 or equivalent, and consent of instructor. Analysis of methods and findings of current research and evaluation of personal health services and programs in variety of social contexts. Principles of decision analysis. Emphasis on measurement of outcomes of health service systems. The Staff

450. Environmental Measurements. (Formerly numbered 450.) Lecture, two hours; laboratory, four hours. Prerequisites: courses 250, 251, or equivalent. Instrumental methods for laboratory and field applications to assess quantity of environmental pollutants in air, food, and water, and to assess degree of exposure to such factors as noise and radiation. Ms. Valentine

454. Environmental Policy Decision-Making. (Formerly numbered 423.) Lecture, four hours; discussion, one hour. Prerequisite: course 254. Foundations, principles, and modeling of environmental policy-making. Critical analysis of normative and behavioral models of action choices for protection and enhancement of environmental health, and development of an alternative model. Mr. Davos

460. Principles of Public Health Nutrition. (Formerly numbered 445A.) Lecture, three hours; class projects, four hours. Prerequisites: courses 100A, 130 (may be taken concurrently), 162 or equivalent and consent of instructor. Survey of methods, problems, and practices used by health agencies in dealing with community nutrition of population groups. Ms. Hunt

461. Computer Use in Dietary Assessment. Lecture, two hours; laboratory, six hours. Prerequisites: courses 100A, 112 (may be taken concurrently), 162, 165, 167, and consent of instructor. Computer use in dietary assessment and computer calculation of nutrient intake data for the purpose of nutritional assessment of population groups. Ms. Murphy, Ms. Hunt

462. Nutritional Assessment: Laboratory Assays. (½ course) (Formerly numbered 405.) Lecture, one hour; laboratory, three hours. Prerequisites: courses 162, 165, 167 or equivalent, and one course in 260 series. Biochemical methods for evaluating nutritional status of individuals or population groups. Techniques for measuring vitamins, minerals, lipids and proteins. Ms. Swendseid

470A. International Health Agencies and Programs. (Formerly numbered 456A.) Lecture, four hours. Prerequisites: three upper division or graduate courses in health science, public health science, and consent of instructor. Historical development and functions of international health organizations. Key problems and trends in international health. Global programs, medical-religious missions, and donor foundations, and other disseminating information, money and services. Mr. Neumann

470B. Advanced Issues in International Health. (Formerly numbered 456B.) Lecture, two hours; discussion, two hours. Prerequisites: course 175, 270, 470A or 472 or 475. In-depth focus on major health care issues confronting recipient less-developed countries and donors of technical and financial assistance. Mr. Neumann

471A. Reproductive Health Services and Programs. (Formerly numbered 474A.) Lecture, two hours; discussion, two hours. Prerequisite: course 172 or equivalent. Examination of U.S. delivery system of pregnancy care, family planning, male-specific and female-specific health care including mental health, family planning facilities, personnel and funding. Mr. Cuscher

471B. Current Issues in Reproductive Health. (Formerly numbered 474B.) Lecture, two hours; discussion, two hours. Prerequisite: course 471A. Critical review of currently numbered 422.) Lecture, two hours; discussion, two hours. Prerequisite: course 172 or equivalent. Examination of U.S. delivery system of pregnancy care, family planning, male-specific and female-specific health care including mental health facilities, personnel and funding. Mr. Cuscher

PUBLIC HEALTH / 309
472A. Maternal and Child Health in Developing Areas. (Formerly numbered 472.) Lecture, four hours; discussion, two hours; field visits—one time (three hours). Prerequisites: courses 170, 171, 270, 472A or equivalent and consent of instructor. Major health problems of mothers and children in developing areas stressing causation, management and prevention. Particular reference to adapting programs to limited resources in cross-cultural settings.

Ms. Neumann, Mr. Nicholas

472B. Recent Advances in Maternal and Child Health in Developing Countries. (½ course) Seminar, two hours. Prerequisites: courses 170, 171, 270, 472A or equivalent and consent of instructor. Analysis in-depth consideration of recent advances in the field of international maternal and child health, with special reference to developing countries.

Mr. Jelliffe and the Staff

472D. Overseas Refugee Health Programs. (½ course) Lecture, one hour; discussion, one hour. Prerequisites: courses 110 or 111, 112, 270 or 472A, or equivalent and consent of instructor. Comprehensive overview of the health problems of overseas refugee situations and of programs designed to deal with these special circumstances.

Mr. Jelliffe

473A. Handicapped Children: The Public Health Concern. (½ course) (Formerly numbered 473.) Lecture, two hours. Prerequisites: courses 110 or 111, 112, 130, 170 or equivalent and consent of instructor. Examination of the health problems affecting children, infants and adolescents in the USA and exploration of alternatives of priorities, approaches, services, and policies aimed at ameliorating these problems.

Ms. Neumann, Mr. Chang

473D. Child Health in the United States of America. Lecture, three hours; discussion, one hour; field visits—one time (three hours). Prerequisites: courses 110, 111, 112, 130, 170 or equivalent and consent of instructor. Focus on the health problems affecting children in the USA and the exploration of priorities, approaches, services and policies aimed at ameliorating these problems.

Mr. Jelliffe

473F. Research Seminar in Community Child Health. Lecture, laboratory, one hour; field visits, two hours. Prerequisites: courses 100A or 103A, 130 or 172 or equivalent and consent of instructor. Examination and development of evaluation strategies for existing community child health services at the local level and development of evaluation strategies for selected topics in programmatic areas. Emphasis on collaborative research and consultation with practitioners.

Mr. Chang

474. Self-Care and Self-Help in Community Health. Lecture, two hours; discussion, two hours. Prerequisites: courses 112, 130 and field work internship or equivalent, and consent of instructor. Review of background, principles, concepts, programs and research concerning the emerging field of self-help in health.

Mr. Katz

475. Planning and Development of Family Health Programs. (Formerly numbered 460.) Lecture, two hours; discussion, two hours. Prerequisites: courses 100A, 103A, 172 or 470A or equivalent. Theory, guidelines, and team exercise for planning community health/family planning projects in the U.S.A. and in developing countries. Phases include: community needs identification; goal setting; budget and work plan development; funding; staff training; evaluation design; data and cost analysis; and project presentation.

Mr. Neumann

475. Human Reproduction in Cross-Cultural Perspective. (Formerly numbered 470.) Lecture, discussion, two hours; discussion, two hours. Prerequisites: courses 112, 130, 170 and consent of instructor. Exploration of human behavior related to reproduction. Cross-cultural exploration of biological and behavioral factors with particular reference to human adaptation.

Mr. Neumann

476. Assessment of Family Nutrition. (Formerly numbered 471.) Lecture with discussion, four hours. Prerequisite: course 270. Assessment of nutritional status of families in developing countries with special reference to limited resources, terrain and cross-cultural considerations, stressing anthropometric methods and techniques.

Mr. Jelliffe, Ms. Neumann

477. Anthropometric Nutritional Assessment. (½ course) Lecture, two hours. Prerequisites: courses 270 or 477 or equivalent and consent of instructor. Practice in anthropometry illustrating how it is used in nutritional assessment. Data presentation and interpretation will be covered. There will be didactic sessions, readings, demonstrations and practical experience in clinical anthropometric techniques.

Ms. Neumann

477D. Nutrition Programs and Policies for Families in the Third World. Lecture, two hours; discussion, two hours. Prerequisite: course 472 or equivalent and consent of instructor. Programs and policies to improve the nutrition of families in Third World countries are considered with special reference to mothers and young children.

Ms. Jelliffe

479D. Nutrition Education and Training: Third World Considerations. (½ course) Lecture, one hour; discussion, one hour. Prerequisite: course 270 or equivalent or consent of instructor. Problems and priorities in nutrition education and training for families and health workers in Third World countries are reviewed, including new concepts in primary health care services, mass media, communications and Governmental International interventions.

Mr. Jelliffe

480. Health Education in Clinical Settings. (Formerly numbered 434.) Lecture, two hours; discussion, two hours. Prerequisites: courses 130, 183, 280, 282, and consent of instructor. Analysis of the role, methods, and techniques of health education pertaining to hospitals, clinics and patient education. Observation and discussion of clinical activities in the medical center in relation to the process of health education.

Mr. Richards

481. Administrative Relationships in Health Education. (Formerly numbered 461.) Lecture, two hours; discussion, two hours. Prerequisites: courses 130, 183, 280, and consent of instructor. Study of administrative concepts; relationships and applicability to health education settings. Responsibility and authority for health education in organizations and other groups.

Mr. Richards

482. Practicum in Health Education. (1 or 2 courses) (Formerly numbered 430.) Discussion, two hours; field, six or eighteen hours. Prerequisites: courses 182, 280 and consent of instructor. Study of community and group-felt needs as reflected in behavior. Analysis of data for understanding, planning, implementing, and evaluating need-directed health education and medical care programs.

Mr. Richards

483. Social Interventions for Health Promotion and Evaluation. Lecture, two hours; discussion, one hour; seminar, one hour. Prerequisites: courses 182, 183, 280, or equivalent, and consent of instructor. Selected social intervention strategies for health promotion and health education programs. Emphasis on theories, working assumptions, methodologies, and impact of selected strategies within the context of planned change in health related behaviors.

Mr. Kar

484. Introduction to Program Evaluation. (Formerly numbered 236.) Lecture, two hours; discussion, two hours. Prerequisites: courses 100A, 112, Economics 102 or equivalent, and consent of instructor. Cost-benefit and cost-effectiveness program evaluation principles and techniques employed to evaluate public health programs and projects.

Mr. Rada

485. Death, Suicide and Homicide: A Public Health Perspective. Lecture, three hours; one hour (field trips, outside readings). Prerequisites: courses 100A or 112, 183, and consent of instructor. Application of community organization methods to health problems and health education programs; addressing community-based needs assessment, planning, implementation, communication-based projects, and evaluation; emphasis on organizational and process skills; class fieldwork project.

Mr. E. Brown

495. Teacher Preparation in Public Health. (½ to 1 course) Prerequisites: consent of instructor. Two courses in area of specialization, and consent of Department Chairman. No applicable on minimum course requirements for a master's degree. Offered on S/U grade basis only. May be repeated for credit.

The Staff

501. Cooperative Program. (½ to 2 courses) Prerequisites: Approval of UCLA Graduate Advisor and Graduate Dean. Approved of host campus instructor, Department Chairman and Graduate Dean. To record enrollment in courses taken under cooperative arrangements with neighboring institutions. No more than 8 units may be applied to the minimum total course requirements for a master's degree. No credit allowed toward the minimum five graduate course requirement for a master's degree. Offered on a S/U grade basis only.

The Staff

Individual Study and Research

596. Directed Individual Study or Research. (½ to 2 courses) Prerequisites: Graduate Standing, consent of instructor. Individual guided studies under direct faculty supervision. May be repeated for credit; only one course (4 units) will count toward the minimum course requirements for the M.P.H. and M.S. in Public Health degrees. Offered on a letter graded basis only.

The Staff

597. Preparation for Master's Comprehensive or Doctoral Examination. (½ to 2 courses) Prerequisites: Graduate Standing, consent of instructor. May be repeated for credit. May not be used to fulfill any course requirements for the master’s or doctor’s degree. Offered on a S/U grade basis.

The Staff

598. Master's Thesis Research. (½ to 2 courses) Prerequisite: consent of instructor. May be repeated for credit. Only one course (4 units) will count toward the minimum total course requirement for the M.P.H. and M.S.P.H. degrees. No credit allowed toward the minimum five graduate course requirement. Offered on a S/U grade basis.

The Staff

599. Doctoral Dissertation Research. (½ to 2 courses) Prerequisites: consent of instructor. May be repeated for credit. May not be used to fulfill any course requirements for a degree. Offered on a S/U grade basis.

The Staff
Ruthann Pick, M.D., Adjunct Associate Professor of Radiological Sciences.

Isaac Reese, Ph.D., Adjunct Associate Professor of Radiological Sciences.

Richard F. Riley, Ph.D., Associate Professor of Radiological Sciences.

Gerald Robinson, Jr., Ph.D., Adjunct Associate Professor of Radiological Sciences.

William F. Sample, M.D., Associate Professor of Radiological Sciences.

John F. Bray, M.D., Assistant Professor of Radiological Sciences in Residence.

Sharon E. Byrd, M.D., Adjunct Assistant Professor of Radiological Sciences.

Verity S. Grinnell, M.D., Assistant Professor of Radiological Sciences.

Marvin Weiner, M.D., Associate Professor of Radiological Sciences.

Sachiko Cochrane, M.D., Adjunct Assistant Professor of Radiological Sciences.

Donald R. Eisen, M.D., Adjunct Professor of Radiological Sciences.

William Sample, M.D., Assistant Professor of Radiological Sciences.

J. Michael Uszler, M.D., Assistant Professor of Radiological Sciences.

Harold D. Snow, D.V.M., Adjunct Associate Professor of Radiological Sciences.

Ismael Mena, M.D., Professor of Radiological Sciences.

Moses A. Greenfield, Ph.D., Professor of Radiological Sciences.

J. Michael Criley, M.D., Professor of Radiological Sciences.

Joseph Jorgens, M.D., Professor of Radiological Sciences.

Hanafee, Professor of Radiological Sciences.

Richard H. Gold, M.D., Professor of Radiological Sciences.

Michael Andre, Ph.D., Professor of Radiological Sciences.

Georges. Also, it is expected that all applicants will have had (a) one year college physics (calculus based), (b) two years college mathematics including calculus, (c) one year college chemistry, (d) one year college biology, and (e) at least one course in computer programming.

Three letters of recommendation are required. If the student already has a master's degree, one of the letters should be from the student's thesis adviser.

A brochure describing the program in Medical Physics may be obtained from the Division office: Radiological Sciences, Medical Physics Division, AR-269 CHS, UCLA, Los Angeles, CA 90024.

Advising. The Graduate Adviser is Prof. Moses Greenfield, Ph.D., who may be contacted at the address above. The Divisional administrative assistant also functions as an adviser regarding departmental, Graduate Division, and University regulations and procedures.

All entering students are assigned a faculty adviser. Students are expected and encouraged to meet with their advisers as needed regarding their academic programs, particularly at the beginning of each quarter to prepare and approve the study list. The student usually retains this adviser until he/she begins research work for the master's degree, at which time the chairperson of the thesis committee becomes the adviser.

Evaluations of academic progress are made collectively by the faculty of the Division. Special problems regarding graduate students are discussed during monthly faculty meetings. These problems are brought to the attention of the Division either by the individual student, the student representative, the instructor, or the adviser. If academic progress is satisfactory, oral evaluations are made; if the progress is unsatisfactory, the student is informed in writing by the Chief of the Division as to facts.
suggestions regarding remedial action, and the consequences of unsatisfactory progress. Progress during the first year of graduate study is based primarily upon grade point averages. The policy, as set by the Division, regarding grade point average is: When the grade point average falls below the minimum 3.0, the student is put on probation for the following (second) quarter. A substantial improvement must be made at the end of that quarter; otherwise, the student is subject to dismissal. If, at the end of the third quarter, the grade point average is still below 3.0, the student is dismissed from graduate status.

Foreign Language Requirement. There is no foreign language requirement for the master's degree.

Course Requirements. Total number of courses: nine minimum (36 units); Number of graduate courses: eight.

For those students wishing to become practicing professional medical physicists, 12 graduate courses are normally required for the M.S. degree. These are the three clinical rotations (RadSci 202A, C, D), their prerequisites (RadSci 200A and B, 203, 204, 205, 207, 208) and RadSci 210 and Biomath 210. Students are also required to present a seminar on their research before graduation (RadSci 260A or B).

For some students with a Medical Physics background or a career objective other than a practicing medical physicist, a more sharply focused curriculum may be advised.

Thesis Plan. All students are required to write a thesis based on a research project. After the student has completed the course requirements, he/she approaches a faculty member to guide this research. If the faculty member agrees to guide the research, he/she becomes chairperson of the thesis committee. The student, in consultation with the thesis chairperson, selects two additional committee members. All three members may be selected from within the Department. When a student indicates interest in specific areas of research but is uncertain of the faculty member to approach, the Graduate Adviser guides him/her in the selection of possible committee members.

Time to Degree. From graduate admission to conferral of the M.S. degree, normal progress is six to eight quarters of full-time enrollment.

500 Series Course Limitations. 500 series courses which may apply toward the degree are RadSci 596, 4 units, letter or S/U grading, and RadSci 598, 4 units, S/U grading only.

Eight units of 500 series quarter units may apply toward the total course requirements. Four units may apply toward the minimum graduate course requirements.

Teaching Experience. Teaching experience is not required for the degree. However, each student is required to present a seminar on his/her research.

Disqualification and Appeal of Disqualification. Conditions which may lead to termination of graduate status include failure to maintain reasonable progress toward the degree, failure to maintain a 3.0 grade point average in three quarters, and failure to complete an acceptable thesis. Tentative decisions to recommend termination are made in a meeting of the teaching faculty. The student is informed and given an opportunity to make an appeal before a final decision is reached.

The Ph.D. Degree in Medical Physics

Admission Requirements. In addition to the University's minimum requirements, prospective candidates for admission are required to have a bachelor's degree with a major in science. Also, it is expected that all applicants will have had (a) one year college physics (calculus based), (b) two years college mathematics including calculus, (c) one year college chemistry, (d) one year college biology, and (e) at least one course in computer programming.

Three letters of recommendation are required. If the student already has a master's degree, one of the letters should be from the student's thesis adviser.

A brochure describing the program in Medical Physics may be obtained from the Division office: Radiological Sciences, Medical Physics Division, AR-259 CHS, UCLA, Los Angeles, CA 90024.

Advising. The Graduate Adviser is Prof. Moses Greenfield, Ph.D., who may be contacted at the address above. The Divisional administrative assistant also functions as an adviser regarding departmental, Graduate Division, and University regulations and procedures.

All entering students are assigned a faculty adviser. Students are expected and encouraged to meet with their advisers as needed regarding their academic programs, particularly at the beginning of each quarter to prepare and approve the study list. The student usually retains this adviser until he/she begins research work for the doctoral degree, at which time the chairperson of the dissertation committee becomes the adviser.

Evaluations of academic progress are made collectively by the faculty of the Division. Special problems regarding graduate students are discussed during monthly faculty meetings. These problems are brought to the attention of the Division either by the individual student, the student representative, the instructor or the adviser. If academic progress is satisfactory, oral evaluations are made; if the progress is unsatisfactory, the student is informed in writing by the Chief of the Division as to facts, suggestions regarding remedial action, and the consequences of unsatisfactory progress. Progress during the first year of graduate study is based primarily upon grade point averages. The policy, as set by the Division, regarding grade point average is: when the grade point average falls below the minimum 3.0, the student is put on probation for the following (second) quarter. A substantial improvement must be made at the end of that quarter; otherwise, the student is subject to dismissal. If, at the end of the third quarter, the grade point average is still below 3.0, the student is dismissed from graduate status.

Admission to the Doctoral Program. Admission to the doctoral program requires passing the departmental screening examination, given at the end of the Fall and Spring Quarters each year. This examination covers the content of all Medical Physics courses and includes current research in Medical Physics. Permission to take the examination a second time may be granted by the faculty, but each student's case is reviewed individually. Completion of a master's program is not required. No courses are required for the degree.

Foreign Language Requirement. There is no foreign language requirement for the Ph.D. degree.

Written and Oral Qualifying Examinations. The screening examination for admission to the Ph.D. program should be taken by the end of the sixth quarter in residence. Once the screening examination is passed and the candidate has chosen a research area for the dissertation, he/she should, within a reasonable time frame agreed upon with the dissertation adviser, form a doctoral committee and schedule the first Oral Qualifying Examination. This examination also covers the student's mastery of the Medical Physics curriculum, particularly the areas of the proposed dissertation topic.

Students who do not complete the dissertation within four years of taking the written screening examination may be required to take it again.

Final Oral Examination. The Final Oral Examination, or dissertation defense, is required.

Time to Degree. It is estimated that a full-time student entering the program with no undergraduate deficiencies can complete the Ph.D. degree in 4.7 years (equivalent to approximately 14 quarters).

Teaching Experience. Teaching experience is not required for the degree. However, students are required to present a seminar on their research.

Disqualification and Appeal of Disqualification. Conditions which may lead to termination of graduate status include failure to maintain reasonable progress toward the degree, failure to maintain a 3.0 grade point average in three
quarters, and failure to complete an acceptable dissertation. Tentative decisions to recom-
mend termination are made in a meeting of the teaching faculty. The student is informed and
given an opportunity to make an appeal before a final decision is reached.

Upper Division Courses

199. Directed Individual Study or Research in Medical Physics for Undergraduate Students. (½ to 1 course) Prerequisite: consent of the Graduate Adviser of Medical Physics. Directed individual study in Medical Physics for undergraduate students. Stu-
dent must submit written proposal outlining study or research to be undertaken. This should be worked out in consultation with the faculty member involved prior to the beginning of the quarter. The Staff

Graduate Courses

200A. Physics and Chemistry of Nuclear Medi-
cine. Prerequisite: consent of instructor. Nuclear structure, statistics of radioactive decay, nuclear radia-
tions and their interaction with matter, nuclear decay processes, nuclear reactions, dosimetry, and com-
partment models. The physical and chemical proper-
ties of radioactive preparations used in nuclear medi-
cine. The Staff

200B. Instrumentation in Nuclear Medicine. Pre-
requisite: course 200A. Introduction to nuclear medi-
cine instrumentation including exterior probe sys-
tems, well scintillation detectors, liquid scintillation
counters, scanners and cameras; dosimetry of inter-
ally administered radioisotopes. Mr. Graham

201. Environmental Radiations. The sources, phys-
ical properties, and biological hazards of ionizing rad-
atrons, ultraviolet and laser light, and microwave and
acoustic radiations in the environment. Social benefit
vs. technological risk will be evaluated. Mr. Norman

202A-202D. Applications of Medical Physics to
Clinical Problems. Prerequisite: course 200C or
consent of instructor. Selected studies in the clinical
use of radiotopes. The Staff

202A-202B. Nuclear Medicine. The Staff
202C. Diagnostic Radiology. The Staff
202D. Radiation Therapy. The Staff

202E-202F. Application of Medical Physics to
Clinical Problems: Radiation Therapy. Prerequi-
tes: consent of instructors only. Lecture/ seminar discussion of dosimetric calculations and
measurements involving cases under treatment.
Written reports on representative problems selected
from current literature and/or clinical experi-
ence. The Staff

203. Physics of Radiation Therapy. Radiation quan-
tities and units. Radiation dosimetry, clinical applica-
tions in treatment planning. Methods of measuring
radiation quantities. The calibration of radiation ther-
apy equipment. The Staff

204. Introductory Radiation Biology. Lecture. Ef-
flect of ionizing radiation on chemical and biological
systems. Mr. Riley

205. Physics of Diagnostic Radiology. Production of
x-rays, basic interactions between x-rays and mat-
er, x-ray system components, physical principles of
medical radiography, radiographic image quality,
fluoroscopy, image intensifiers, special procedures,
x-ray protection. Laboratory experiments will illustrate
the basic theory. Mr. Greenfield

207. Radiation Protection and Health Physics. Concep-
tion in radiation protection, the recommenda-
tion of the national council on radiation protection and
measurements, the maximum permissible dose lev-
els. Shielding calculations. The layout and design of
radiographic installation. The Staff

208A-208B. Medical Physics Laboratory. Prerequi-
tes: courses 206A and 206B; or consent of instruc-
tor. Techniques for measuring ionizing and non-ioniz-
ning radiation, applications to problems in radiological
sciences. Mr. Herman

210. The Physics of Medical Imaging. Prerequi-
tes: courses 200A and 200B, 203, 205. Review of
Fourier analysis measurement of the LSF and MTE.
Radiographic mottle and the Wiener Spectrum. Phys-
ics, mathematics, and engineering of imaging devices
in conventional radiography, computerized tomogra-
phy, ultrasound, and nuclear medicine. Detection of
faint shadows, the ROC curve. The Staff

216. Computer and Biomedical Applications in
Radio logical Sciences. (Same as Biomath-
ematics M216.) Prerequisites: Biomathematics 210
and elementary calculus are recommended. Computer
and biomedical methods will be presented that relate
to dosimetry, treatment strategies, biologi-
cal effects of radiation, and laboratory research in
radiotherapy and radiobiology.

Mr. Frey, Ms. Newton

260A-260B. Seminar in Medical Physics. (½
course each) Seminar. Joint critical study by stu-
dents and instructors of the fields of knowledge per-
taining to medical physics. Periodic contributions are
made by visiting scientists. Research in progress is
discussed. Mr. Norman, Mr. Riley

(½ course each) Seminar. Topics of current interest
in nuclear medicine. Seminar intended for physicians,
radiation physicists, and graduate students. The Staff

266. Seminar in Radiopharmaceuticals. (½
course) Current concepts in radioactive pharmaceu-
tical agents in clinical use, including promising investi-
gational agents. Utilization of short-lived, cyclotron
produced isotopes in radiopharmaceuticals. The ra-
tional design of new radiodiagnostic agents.
Mr. J. Barrio

481. Angiographic Techniques. (¼ course) Pre-
requisite: consent of the instructor. Laboratory. Be-
ginning Radiology residents will be taught basic tech-
niques of angiographic procedures, utilizing ani-
mals. Mr. Snow

495. Special Studies in Medical Physics. Teaching
assistance in graduate laboratory courses under the
supervision of a member of the faculty. May be taken
on a S/U basis only. The Staff

596. Research in Medical Physics. (1 to 3 courses)
Directed individual study of research. May be taken
any number of times for letter grades; only one course
may be used for M.S. credit. The Staff

597. Preparation for the Qualifying Examination
for the Ph.D. May be taken for one quarter only, on
a S/U basis, and is not creditable for the M.S. degree.
The Staff

598. Research for the Preparation of the Master's
Thesis. May be taken any number of times on a S/U
basis. A maximum of two courses, or 598 and 596
combined, may be used for M.S. credit. The Staff

599. Research for Dissertation. (1 to 3 courses)
Prerequisite: satisfactory performance on screening
examinations. Research for and preparation of the
doctoral dissertation. May be taken any number of
times on a S/U basis. The Staff

Romance

Linguistics

and Literature

(Interdepartmental)

Margherita Cottino-Jones, Ph.D., Professor of Italian.
Carroll B. Johnson, Ph.D., Associate Professor of Sp-
A. Carlos Quicoli, Ph.D., Assistant Professor of Port-
lis, Graduate Advisor.

C. P. Otero, Ph.D., Associate Professor of Span-

Stephen D. Werner, Ph.D., Associate Professor of French.

A. Carlos Quicoli, Ph.D., Assistant Professor of Portu-

The integration of linguistic and literary knowl-
edge is taken to be one of the highest aims of
this interdepartmental program.

The Master of Arts

Degree

Admission Requirements. The B.A. in French, Italian, Portuguese, or Spanish, or their equivalent, with a grade point average in upper division courses of 3.00 or better is re-
quired. Three letters of recommendation and the Aptitude Test of the Graduate Record Ex-
amination are also required. Students admitted from elsewhere whose preparation is consid-
dered deficient in view of their intended special-
ization are required to make up their deficien-
cies by taking specified upper division courses.
Such courses may be taken concurrently with
graduate courses, but they do not count toward
the course requirements for the M.A. degree.
During his/her first graduate year, the student
who knows only the language of his/her major
should prepare himself/herself in at least one
other Romance language so he/she can take
courses in his/her minor no later than the sec-
ond year of graduate study.

Advising. Each new graduate student must
make an appointment with the Chairperson during
the week preceding the start of classes to
discuss general requirements and to decide
on a program of courses for the quarter. Fol-
lowing this initial interview, the student is re-
quired to see his/her adviser at least once a
quarter for review of his/her progress towards
the degree. Students who have not been au-
Rolle Hall.

Advising. Each new graduate student must

make an appointment with the Chairperson during
the week preceding the start of classes to
discuss general requirements and to decide
on a program of courses for the quarter. Fol-
lowing this initial interview, the student is re-
quired to see his/her adviser at least once a
quarter for review of his/her progress towards
the degree. Students who have not been au-
Rolle Hall.
He/she must have his/her study list approved by his/her adviser each quarter before it is signed by the Chairperson of the Program. Progress reports will be placed in the student's file.

A guidance committee will be constituted for each student upon declaration of his/her specialization and in no case later than the end of the first quarter in the program. The guidance committee is chosen by the student in consultation with the Program Chairperson and is composed of three faculty members of the sponsoring departments representing the student's major and minor fields of specialization.

**Foreign Language Requirement.** In addition to the Romance language of major interest and the Romance language of minor interest, candidates are required to have either UCLA Latin 3 or the equivalent, or UCLA Italian 3 or the equivalent (provided Italian is not their major), whether they specialize in Linguistics or in Literature. The language requirement must be completed no later than the quarter before the quarter in which the student expects to receive his/her degree.

**Course Requirements.** The M.A. program permits specialization in either Linguistics or Literature and will include a major and a minor. Twelve courses are the minimum requirement of which six courses (at least five of them graduate) must be in the student's major language, with specialization either in Linguistics or in Literature. One course in the history or development of the major language is highly recommended. At least three courses would be in the minor language, also with specialization in either Linguistics or Literature. The remaining three courses should be selected in consultation with the guidance committee so as to be logically supportive of the student's major field of study. Each individual program will be worked out in close consultation with the guidance committee. Course 596 may be included twice. Linguistics 100 is required as a prerequisite of all students majoring in the linguistics field. Note: During the first graduate year, the student who knows only the language of his/her major should prepare himself/herself in at least one other Romance language so he/she can take courses in his/her minor no later than in the second year of graduate study.

**Thesis Plan.** The program favors the Comprehensive Examination Plan, but will approve M.A. theses for exceptionally well-qualified students under special circumstances. A student may petition for authorization to write an M.A. thesis only after completion of six courses which count toward the degree. It is the responsibility of the student to choose an appropriate topic and find a professor willing to direct the thesis. He/she then petitions the program for authorization to proceed. The Program Chairperson first examines the petition and then presents it to the Interdepartmental Committee for approval or denial by a majority vote. If the petition is approved, a thesis committee (normally the student's guidance committee) is appointed which consists of a chairperson in the field of the thesis and two other members of the sponsoring departments who represent the minor fields. After completion of the thesis, the candidate must pass a 2-hour oral examination testing his/her knowledge of the field of this thesis and his/her general competence. Only those students who attain a 3.5 grade point rating in the examination will be encouraged to proceed to candidacy for the Ph.D. degree.

**Comprehensive Examination.** The Comprehensive Examination is administered by three members of the student's guidance committee, appointed by the Chairperson. Two of the three committee members will represent the languages and field of the student's major and minor. The written Comprehensive Examination, consisting of one 4-hour examination in the major field, one 2-hour examination in the minor field, and one oral examination not to exceed one hour, will be given each quarter in the second week prior to final examinations. The examination is graded by the comprehensive examination committee, whose decision is final. If a student fails the examination or any part thereof, he/she may retake the failed portions once when the examination is next regularly offered. Only those students who attain a 3.5 grade point rating in the examination will be encouraged to proceed to candidacy for the Ph.D. degree.

**Time to Degree.** A full-time student with no deficiencies at entrance who takes three courses per quarter should complete the coursework and the Comprehensive Examination in four quarters from graduation admission. Students with a deficiency at entrance and teaching assistants will require more time.

**500 Series Course Limitations**

**Teaching Experience.** Teaching experience is not required, but is considered desirable. Consult the Chairperson for information regarding the availability of teaching assistantships.

**Disqualification and Appeal of Disqualification.** The Chairperson of the Program reviews the progress of each student at the end of each academic year. If he/she finds that a student is not making satisfactory progress, he/she proposes a probationary period during which certain conditions must be met. The Chairperson then advises the student in writing of this decision. If the student is unwilling to comply with the expectations of the chairperson, he/she is subject to dismissal. This decision may be appealed to the Interdepartmental Committee.

### The Ph.D. Degree

**Admission Requirements.** The UCLA M.A. in Romance Linguistics and Literature or the UCLA M.A. in French, Italian, Luso-Brazilian Language and Literatures (Portuguese) or Spanish, or the equivalent is required. Three letters of recommendation and the Graduate Record Examination Aptitude Test are also required.

**Advising.** Each new graduate student must make an appointment with the Chairperson during the week preceding the start of classes to discuss general requirements and to decide on a program of courses for the quarter. Following this initial interview, the student is required to see his/her adviser at least once a quarter for review of his/her progress towards the degree. Students who have not been authorized to form their guidance committee are advised by their major language adviser: French: Prof. Hassan El Nouty, 160 Haines Hall; Italian: Prof. Edward F. Tuttle, 354 Royce Hall; Portuguese: A. Carlos Quilcoi, 5312 Rolfe Hall; Spanish: Prof. Carlos P. Olero, 5317 Rolfe Hall.

He/she must have his/her study list approved by his/her adviser each quarter before it is signed by the Chairperson of the Program. Progress reports will be placed in the student's file.

Students who have formed their guidance committee are advised by the chairperson of that committee, who, moreover, must approve their study list each quarter before it is signed by the Chairperson of the Program.

The guidance committee is composed of a chairperson, who represents the student's major field of study and under whom the student proposes to write his/her dissertation, and two members representing the minor fields, all members belonging to the sponsoring departments. The chairperson of the committee will normally be a tenured professor. It is the student's responsibility to constitute the committee and to secure the individual member's consent, which will be transmitted to the Chairperson in writing. As soon as possible after official admission into the doctoral program (see below), the student meets with his/her guidance committee for the purpose of working out his/her program of courses and setting a tentative date for the Qualifying Examinations. The guidance committee has final authority to prescribe the course of study in each individual case.
Admission to the Doctoral Program. The UCLA M.A. in Romance Linguistics and Literature, or the UCLA M.A. in French, Italian, Luso-Brazilian Language and Literatures (Portuguese), or Spanish, or the equivalent as determined by the Chairperson. Entering students whom the Chairperson determines to have obtained the M.A. with distinction are automatically eligible for admission to the Ph.D. program and may file Form 1 ("Notice of Intention to Proceed with the Doctoral Degree") and form their guidance committee; those whose M.A. program registers deficiencies in scope or quality will be required to make up those deficiencies and complete three graduate courses from the offerings of the sponsoring departments, after which they are eligible to file Form 1. Admission to the Ph.D. program will be determined by the Interdepartmental Committee.

Following the determination of the student's eligibility and his/her approval of Form 1, his/her guidance committee will be formed. The latter is composed of a chairperson, who represents the student's major field of study and under whom the student proposes to write his/her dissertation, and two members representing the minor fields, all members of the sponsoring departments. It is the student's responsibility to constitute the committee and to secure the individual member's consent, which will be transmitted to the Chairperson in writing. The student meets as soon as possible with his/her guidance committee for the purpose of working out his/her program of courses and setting a tentative date for the Qualifying Examinations. The student prepares a "Study Report" listing the graduate courses he/she has taken at UCLA and elsewhere to be analyzed and discussed at the meeting. That meeting is the most important administrative act in the student's progress toward the Ph.D. The guidance committee has final authority to prescribe the course of study in each individual case. A student who has not met with this committee and placed himself/herself under its direction is not officially in the Ph.D. program.

Major Fields or Subdisciplines. The program recognizes two fields of specialization: Linguistics or Literature. Literature. The student specializing in Literature may take as his/her major field one of the following fields in the literatures of at least two Romance languages: (1) Early Romance Literature and Philology; (2) Renaissance and Baroque; (3) Modern Literature, preferably with emphasis in one century. The first minor may be one of the preceding fields not chosen for the major. The second minor may be the same field or a new field in another Romance language; or some other related field in the major language or in Romance Linguistics.

Foreign Language Requirement. In addition to the minimum of two Romance languages required in the student's program, Latin 3 or Italian 3, or the equivalent, is required of all students in the interdepartmental program. Students choosing options 2 or 3 in Linguistics or option 1 in Literature also require German, whereas those choosing option 1 in Linguistics or option 2 or 3 in Literature will require another foreign language to be determined by the guidance committee in accordance with the individual's program. A minimum level of acceptable accomplishment in non-Romance languages is passing the Educational Testing Service (ETS) test, where such a test exists. In languages where there is no such test, passing an examination administered by the corresponding language department fulfills the requirements. This foreign language requirement may also be met by evidence of completion of two years of college level courses in the language with grade B or better, or by evidence of fulfillment of the foreign language requirement in connection with an M.A. obtained elsewhere. The foreign language requirement must be satisfied no later than the quarter before the quarter in which the Qualifying Examinations are taken.

Course Requirements. In each of the two specializations (Linguistics or Literature) the Ph.D. program will consist of a major and two minors. These courses (a minimum program) will be distributed as follows: Major—5 courses, First Minor—3 courses, Second Minor—2 courses. At least one seminar is required in each of the three fields. In addition to those required for the master's degree, or equivalent, at least 10 other graduate courses, of which no more than two 596 courses may apply, as well as such courses as his/her guidance committee may prescribe, are required. Linguistics 100 is required as a prerequisite of all students majoring in the linguistics field.

Written and Oral Qualifying Examination. At least two months prior to the date of the Qualifying Examinations, the student proceeds to file the form "Nomination of Doctoral Committee" with the Graduate Division through the Program Chairperson. This form lists the names of the three members of the guidance committee and two additional members from outside the staffs of the participating departments who will also pass on the student's written and oral examinations. It is the student's responsibility to approach the two "outside" members, to secure their consent, which is transmitted to the Chairperson in writing. The 5-member body thus constituted is the student's official doctoral committee and is so recorded by the Graduate Division.

The Qualifying Examinations are given during the Fall, Winter and Spring Quarters and consist of (a) a 3-hour written examination in the major field; (b) a 2-hour examination in the first minor; and (c) a 1-hour examination in the second minor; and (d) a 2-hour oral examination in the three fields at which the student's prospectus for the dissertation is also discussed and approved. The candidate is notified of success or failure by the chairperson of his/her committee immediately following the oral. Failed portions of the examination may be taken once after such remedial preparation as the committee may specify.

Candidate in Philosophy. Students are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

The Dissertation. The dissertation may be on any subject within the general area of Romance Linguistics and Literature. If more than five calendar years elapse between advancement to candidacy and the presentation of the dissertation, the program may require the student to revalidate his/her Qualifying Examination.

Teaching Experience. Teaching experience is not required, but is considered desirable. Consult the Chairperson for information regarding the availability of teaching assistantships.

Time to Degree. For full-time students with no deficiencies taking three courses per quarter, the following figures are instructive: (a) from graduate admission to the awarding of the M.A.: four quarters; (b) from the award of the M.A. to authorization to form the guidance committee: one quarter; (c) from the formation of the guidance committee to the Qualifying Examinations: 3 to 5 quarters; (d) from the passage of the Qualifying Examinations (advancement to candidacy) to presentation of the dissertation: 6 to 15 quarters. Note: If more than five calendar years elapse between advancement to candidacy and the presentation of the dissertation, the program may require the student to revalidate his/her Qualifying Examination; (e) from graduate admission to the awarding of the degree: 14 to 25 quarters. Normative time-to-degree is seven years.
Disqualification and Appeal of Disqualification. The Chairperson of the program reviews the progress of each student at the end of each academic year. If he/she finds that a student is not making satisfactory progress, he/she proposes a probationary period during which certain conditions must be met. The Chairperson then advises the student in writing of this decision. If the student is unwilling to comply with the expectations of the Chairperson he/she is subject to dismissal. This decision may be appealed to the Interdepartmental Committee.

In consultation with the appropriate advisor(s), courses should be selected with an eye to the organic relationship between them, preferably among those listed below and/or their prerequisites:

Introduction to Romance Studies
(Spanish M200)
(Italian 201)

Courses in Linguistics
Grammatical Theory:
(Linguistics 201A-201B, 206A-206B)

Historical Linguistics:
(Linguistics 202A-202B, 203)

Synchoronic Linguistics
Advanced Grammar:
(French 201A-201D, 206)
(Spanish 204A-204B, 206)
(Italian 259B)
(Portuguese 204A-204B)

Studies in Linguistics and Dialectology:
(French 261, 262)
(Spanish 256A-256B)

Historical Linguistics
The Development of the Romance Languages:
Northern Gallo-Romance:
(French 204A-204B)

Southern Gallo-Romance:
(French 215E)

Hispano-Romance:
(Spanish M203A-M203B)

Italo-Romance:
(Italian 259A)

Romance Dialectology:
(Italian 259C)
(Spanish 209)

Indo-European Linguistics:
(Indo-European Studies 210, 280A-280B)

Romance Linguistics:
(Linguistics 225G)

Medieval Latin:
(Latin 231A-231B)

Vulgar Latin:
(Latin 232)

History of the Latin Language:
(Latin 240)

Italic Dialects and Latin Historical Grammar:
(Latin 242A-242B)

Later Medieval Latin Palaeography and Manuscripts, 1100-1500:
(History 224)

Studies in the History of the Romance Languages:
Gallo-Romance:
(French 215A)

Hispano-Romance:
(Spanish M251)

Italo-Romance:
(Italian 259A-259B-259C, 210A)

Courses in Literature
The Intellectual Background of Romance Literature:
(French 205A-205C)

Studies in Medieval Latin Literary History:
(History 222A-222B)

Literary Criticism:
(French 203A-203B-203C)
(Spanish M201)
(Italian 205A-205B)

Studies in the History of Ideas:
(French 260A-260B)

Studies in Literary Criticism:
(French 258A-258B)

Studies in Philosophy and Literature:
(French 259A-259B)

Early Romance Literature
Early Romance Literature:
(French 215B-215E)
(Spanish 222-223, Portuguese 242A)

Petrarca:
(Italian 214D, 251)

Studies in Early Romance Literature:
(French 250A-250B)
(Spanish 262A-262B-262C)
(Italian 250A-250D, 252)

Renaissance and Baroque Literature
Renaissance and Baroque Literature:
(French 216A-216H, 217A-217I)
(Spanish 224-226, 237, Portuguese 242A and 243A)
(Italian 216A-E, 217A-217C)

Cervantes:
(Spanish 227)

Studies in Renaissance and Baroque Literature:
(French 251A-251B, 252A-252B, 253A-253B)
(Spanish 254A-254D)
(Italian 253A-253C, 255A-255B)

Modern Romance Literature
The XVIIIth Century:
(French 218A-218D)
(Spanish 230 and 239)
(Italian 218A-218E)
( Portuguese 242B, 243A)

Rousseau:
(French 218B-218C)

The XIXth Century:
(French 219A-219K)
(Spanish 231 and Portuguese 242B and 243B)
(Italian 219A-219F)

The XXth Century:
(French 220A-220P, 221A-221D)
(Spanish 232-235 and 240-245, and Portuguese 242C and 243C)
(Italian 220A-220C)

Studies in the XVIIIth Century:
(French 254A-254B)
(Spanish 277)
(Italian 256A-256B)

Studies in the XIXth Century:
(French 255A-255B)
(Spanish 270A-270B, 278)
(Italian 257A-257B)

Studies in the XXth Century:
(French 256A-256B, 257A-257B)
(Spanish 272A-272D, 280A-280D)
(Italian 258A-258B)

Genre Studies:
Novel: Portuguese 252A, 253A
Poetry: Portuguese 252B, 253B
Theater: Portuguese 252C, 253C
Essay and Short Story: Portuguese 252D, 253D
Slavic Languages and Literatures

(Chairman of the Department)

Marija Gimbutas, Ph.D., Professor of Slavic Languages and Literatures.
Michael Heim, Ph.D., Professor of Russian Literature.
Thomas Eekman, Ph.D., Professor of Slavic Languages and Literatures.
Michael S. Flier, Ph.D., Professor of Russian Literature.
Harold Birnbaum, Ph.D., Professor of European Archaeology.
Alan H. Timberlake, Ph.D., Associate Professor of Slavic Languages and Literatures.
Peter Hodgson, Ph.D., Associate Professor of Russian Literature.
Jeanne Worth, Department of Slavic Languages.

The Department of Slavic Languages and Literatures is committed to the Graduate Division. The Department does not utilize its own institutionalized review procedure of its graduate students. Admission to the graduate program is made at the discretion of the Graduate Adviser. To ensure uniformity and continuity in students' programs, there is one graduate adviser for all students. Students are obliged to meet with the Graduate Adviser at the beginning of each quarter for consultation about their programs and progress toward the degree. The preferred Program Card is signed after the student and the Graduate Adviser agree upon a program of study for the quarter. Students wishing to enroll in Slavic 596 or 597 must obtain prior permission from the instructor with whom they plan to work before the Graduate Adviser can include the course on the study list. Petitions to alter the study list (Drop/Add) after it has been formulated must be approved by the Graduate Adviser before they are submitted to the Graduate Division.

The Department does not have an institutionalized review procedure of its graduate students.

Admission to Master's Program. Admission to the master's program is synonymous with graduate admission. No screening examination is required.

Major Fields or Subdisciplines. Candidates for the M.A. degree must choose a specialization in either Literature or Linguistics. The Comprehensive Examination differs according to major field (see Comprehensive Examination Plan), but all students are required to take a set of core courses in both major fields (see Course Requirements).

Foreign Language Requirement. There are two foreign language requirements which must be completed at least one quarter before the quarter in which the student takes the M.A. Comprehensive Examination. (1) Students must pass a departmental Russian language proficiency examination testing the ability to translate from Russian to English and vice versa. This examination may be retaken each quarter until the grade "Pass" is achieved. (2) Students must demonstrate an ability to read scholarly literature in either French or German by one of three options: (a) passing the appropriate Educational Testing Service (ETS) reading examination with a score of 500 or better; (b) passing the departmental reading examination; or (c) completing the fifth quarter of study at UCLA in one of the languages with a grade of "B" or better (equivalent university-level coursework in French or German taken no more than two years prior to the candidate's admittance into the Department may be used to satisfy this requirement at the discretion of the Graduate Adviser).

To enter the History of the Russian Literary Language.

Required of Literature students: Russian 211—18th Century Russian Literature; Russian 212—19th Century Russian Literature; Russian 213—20th Century Russian Literature; one other literature course in the Department.

Required of Linguistics students: Slavic 202—Introduction to Comparative Slavic Linguistics; Two courses chosen from Russian 211, 212, 213; One elective.

Thesis or Comprehensive Examination Plan. The Department uses only the Comprehensive Examination Plan. Application for advancement to candidacy must be made no later than the second week of the quarter in which the M.A. examinations are to be taken, but will be accepted only if the candidate has satisfied the foreign language requirement in French or German and has passed the Russian Language Proficiency Examination. Examinations are offered at the end of each quarter. After a student has declared his/her intention to take the examination in a given quarter, a committee consisting of three members is appointed by the Chairperson and the Graduate Adviser. The Comprehensive Examination has two parts, written (three hours) and oral (two hours), and is based on coursework and the departmental reading list. The examination covers either (a) Linguistics, including a knowledge of Russian phonology and grammar and an acquaintance with comparative Slavic linguistics, Old Church Slavic, and the history of the Russian literary language; or (b) Literature, including an acquaintance with the history of Russian literature and its origins to the present and a knowledge of the major developments and figures of the 19th and early 20th centuries. The written examination is graded "Pass" or "Fail". A student receiving "Pass" on the written examination will be admitted to a 2-hour oral examination, which is designed to test the fields of his/her major interest and general background. It will be conducted partly in Russian. Although all faculty members in the major field may read the written examination, it is the student's committee which conducts the oral examination and evaluates the student's performance. The combined performance of the student in the written and oral examinations is graded "High Pass", "Pass", or "Fail". A grade of "Pass" or "High Pass" is necessary to receive the M.A. degree; the grade of "High Pass" is necessary to enter the Ph.D. program. Students may retake the examination once, not later than one calendar year after the first attempt.
Time to Degree. From graduate admission to conferral of the degree, normal progress is six quarters. (Coursework is normally completed in five quarters.) It is common for students without a UCLA bachelor’s degree in Slavic Languages and Literatures to take three to six additional courses to make up deficiencies. These courses are not applicable toward the degree. For teaching assistants and research assistants the program may take slightly longer (usually up to a year).

The M.A. examination must be taken within two calendar years from the time of admission to the Graduate Division (time spent in removing deficiencies, to a maximum of one year, does not count toward this 2-year period).

500 Series Course Limitations. Courses in the 500 series may not be counted as meeting course requirements in the master’s program.

Teaching Experience. Teaching experience is not a degree requirement.

Disqualification and Appeal of Disqualification. Normally, a student is disqualified from continuing study if he/she fails to pass the M.A. Comprehensive Examinations with a “High Pass”, or fails to maintain a 3.00 grade point average. Disqualification for any other reason must be recommended by the Admissions and Support Committee of the Department. In such instance, the student may appeal to the Department Chairperson.

The Ph.D. Degree

Admission Requirements. In addition to the University minimum requirements, the Department requires a UCLA M.A. in Slavic Languages and Literatures or its equivalent. Students who do not hold a UCLA M.A. in Slavic Languages and Literatures are required to take the M.A. Comprehensive Examination as a screening examination within one calendar year after admittance and to make up any deficiencies in their background compared with that of a UCLA master’s degree recipient.

For all applicants, three letters of recommendation are required from persons capable of judging the student’s academic potential. No admission tests are required, but the Graduate Record Examination is strongly recommended for students applying for financial assistance.

A departmental brochure describing the curriculum in Slavic Languages and Literatures in some detail (graduate and undergraduate) is available by writing to the Graduate Adviser (address given below).

The Department does not utilize its own specialized application form.

Advising. Graduate Adviser: Professor Dean S. Worth, Department of Slavic Languages and Literatures, 115 Kinsey, University of California, Los Angeles, California 90024.

The Graduate Adviser continues to function as the nominal adviser for all students (see M.A., Advising).

Admission to the Doctoral Program. A student is formally admitted to the Ph.D. program on completing the following requirements: (1) passing the UCLA M.A. Comprehensive Examination with a grade of “High Pass”; (2) passing the reading examination in both French and German (see Foreign Language Requirement); (3) taking one year (or the equivalent) of a second Slavic language.

For students entering UCLA with an M.A. from another institution, the Comprehensive Examination serves as a screening examination for admission to the doctoral program. All students are allowed to retake the examination once in order to achieve the necessary “High Pass” for admission to the Ph.D. program.

Major Fields or Subdisciplines. Major fields on the Ph.D. level are Linguistics and Literature, with Russian as the principal language and literature respectively. By special arrangement, students can specialize in a language or literature other than Russian.

Foreign Language Requirement. Students must demonstrate an ability to read scholarly literature in both French and German by (a) passing the Educational Testing Service (ETS) reading examination with a score of 500 or better; (b) passing the departmental reading examination; or (c) completing the fifth quarter of study at UCLA in the language with a grade of “B” or better. (Equivalent university-level coursework in French and/or German taken no more than two years prior to the candidate’s admittance into the Department may be used to satisfy this requirement at the discretion of the Graduate Adviser.) With departmental approval, a student specializing in Linguistics may substitute a reading knowledge in another language important to the study of Slavic linguistics (Finnish, Hungarian, Lithuanian, Latvian, Romanian, or a Turkic language relevant to East or South Slavic historical linguistics) and a score of 450 points on the ETS examination for the second of his/her French and German examinations (i.e., in the examination in either French or German). The Department Chairperson prescribes the manner in which the student should be tested in the substituted language. A reading knowledge of two such languages may, by the same procedure, be substituted for the entire French or (more rarely) German examination.

Course Requirements. Before the Chairperson of the Department recommends the formation of a doctoral committee, students must have been officially admitted to the doctoral program and have taken the following required courses:

Linguistics students: Slavic 222—Introduction to Slavic and Slavonic Languages; Slavic 223—Introduction to South Slavic Languages; Slavic 242—Comparative Slavic Linguistics; Russian 241—Russian Phonology; Russian 242—Russian Morphology; Russian 243A—Historical Phonology and Morphology of Russian; Russian 265—Russian Syntax; One seminar.

Recommended preparation for Linguists: Linguistics 100, 103, 110, 120A-B, M150.

Literature students: Two courses chosen from Slavic 230A-B-C—Comparative Slavic Literature; Russian 251A—Old Russian Literature; and three additional seminars.

Candidates specializing in literature are advised to acquire a sound general knowledge of modern Western European literature.

Written and Oral Qualifying Examinations. The Department Chairperson arranges a brief meeting of the candidate and the Graduate Adviser in order to form a 3-member examination committee, including a chairperson. In consultation with the candidate, the committee chairperson obtains the agreement of two non-departmental members to serve on the committee. The committee will conduct the Ph.D. Qualifying Examinations.

Comprehensive Written Examinations. There are two written 3-hour Qualifying Examinations, given one week apart at the end of each quarter. The nature and scope of these examinations is prescribed for each candidate. All candidates are expected to have a sound general knowledge of both Slavic philology and Russian literary history equivalent to that required for the M.A. at UCLA. In addition, candidates specializing in Linguistics and Literature, respectively, are expected to demonstrate a detailed mastery of either: (a) Linguistics, including Old Church Slavic, comparative Slavic linguistics, and the structure and history of one major and two minor Slavic languages (one from each of the Eastern, Western and Southern groups), which presupposes knowledge equivalent to one year’s study of a second and third Slavic language; or (b) Literature, including Russian literature from its origins to the present, and a basic knowledge of comparative Slavic literary history, which presupposes a knowledge of the major figures and developments in the literature of at least one Slavic country other than Russia. These written examinations are graded either “Pass” or “Fail”.

Comprehensive Oral Examination. A student receiving “Pass” on both written examinations is admitted to a 2-hour oral examination, which is designed to test the fields of his/her major interest and general background. The oral examination typically includes discussion of the candidate’s dissertation topic.

After considering the candidate’s overall performance in both the oral and written examinations, the committee assigns a cumulative grade of “Pass” (this entitles the student to write a dissertation in order to receive the Ph.D.)
degree" or "Fail". At the committee's discretion, the candidate may be required to retake any or all portions of the Ph.D. examinations, no later than one calendar year after the first attempt.

Upon successful completion of the Qualifying Examinations, the candidate consults with the committee (and especially its chairperson) concerning a dissertation topic. Within two quarters (or one quarter and a summer) after passing the exams, the candidate must prepare a prospectus of the dissertation, setting forth broad outlines of his/her proposed treatment. A copy of the prospectus must be made available to each faculty member in the Department; the committee chairperson may call a meeting, if necessary, to consider comments of faculty members. The dissertation committee is typically, but not necessarily, the same as the examination committee.

**Slavic Colloquium Requirement.** The candidate is required to deliver a formal lecture in the Slavic Colloquium no later than two calendar years after advancement to candidacy.

**Doctoral Committee.** The Department does not set any conditions besides those of the Graduate Council on the formation of doctoral committees.

**Time to Degree.** Students normally take from three to four quarters to gain formal admittance into the doctoral program and four to six additional quarters to complete required coursework. It is common for students without a UCLA M.A. in Slavic Languages and Literatures to take three to six additional courses to make up deficiencies.

For teaching and research assistants the program may take slightly longer. The Qualifying Examinations must be taken within two years of the date of admission to the doctoral program. The dissertation must be completed within three calendar years of the date when the Qualifying Examinations are passed.

The normative time-to-degree from graduate admission to award of the degree is 18 quarters (six years).

**Final Oral Examination.** A Final Oral Examination is required except in case of geographically imposed hardship on the part of the candidate.

**Candidate in Philosophy Degree.** The Candidate in Philosophy degree is available upon advancement to candidacy for the Ph.D. degree.

**Teaching Experience.** Teaching experience is not a degree requirement.

**Disqualification and Appeal of Disqualification.** Normally, a student is disqualified from continuing study if he/she fails to pass the Qualifying Examinations, or fails to maintain a 3.00 grade point average. Disqualification for any other reason must be recommended by the Admissions and Support Committee of the Department. In such instance, the student may appeal to the Department Chairperson.

---

**Graduate Linguistic Courses**

**Upper Division Courses**

M178. Southeast European Folklore and Ethnography. 3 hours. Prerequisite: Slavic 202. Introduction to the structure and history of the East Slavic languages. Required for the Ph.D. (Linguistics).

**M199. Special Studies.** (½ to 2 courses).

**Graduate Literature Courses**

**290. Seminar in Comparative Slavic Literature.** Three hours weekly. Prerequisites: Slavic 230A-230B-230C. Reading knowledge of one Slavic language in addition to Russian is recommended. Selected topics involving more than one Slavic literature or Slavic and Western literatures. May be repeated for credit with consent of instructor and the Graduate Adviser.

**295. Seminar in Literary Analysis.** Three hours weekly. Prerequisite: Reading knowledge of one Slavic language in addition to Russian is recommended. Selected topics from various Slavic or from Slavic and Western literatures with an emphasis on analytic methods. May be repeated for credit with consent of instructor and Graduate Adviser.

**Individual Study and Research**

596. Directed Individual Study or Research. (½ to 2 courses) Prerequisites: consent of instructor and the Graduate Adviser.

597. Preparation for the Comprehensive Examination for the Master's Degree or the Qualifying Examination for the Ph.D. (½ to 2 courses) Prerequisites: consent of instructor and the Graduate Adviser.

599. Research for Dissertation. (½ to 2 courses)

---

**Bulgarian**

103A-103B-103C. Elementary Bulgarian.
154. Survey of Bulgarian Literature.

**Czech**

102A-102B-102C. Elementary Czech.
102D-102E-102F. Advanced Czech.
155A-155B. Czech literature.

**Polish**

102A-102B-102C. Elementary Polish.
102D-102E-102F. Advanced Polish.
152A-152B. Survey of Polish Literature.
280. Seminar in Polish Literature. Three hours weekly. Selected topics in Polish prose, poetry and drama. May be repeated for credit with consent of instructor and Graduate Adviser.

**Russian**

**Language Courses (Upper Division)**

101A-101B-101C. Advanced Russian (¼ course each).
102A-102B-102C. Advanced Grammar and Reading (¼ course each). Required for the M.A. (Linguistics, Literature).
111A-111B-111C. Conversation and Composition. (¼ course each).
Graduate Linguistics Courses

203. Higher Course in Russian. (3 course) Two hours weekly. Prerequisite: course 102C. Reading advanced texts; advanced composition, conversation; stylistics. Required two quarters/year of all enrolled post-M.A. students. May be repeated for credit. The Staff

244. Introduction to the History of the Russian Literary Language. Three hours weekly. Prerequisites: course 123, Slavic 99, Survey of Literary Russian in its cultural and historical setting. Required for the M.A. (Linguistics, Literature). The Staff

210. Readings in Russian Historical Texts. Three hours weekly. Prerequisite: Slavic 201 or consent of instructor. Readings in early Russian chronicles and other documents of historical interest. The Staff

243A-243B. Historical Phonology and Morphology of Russian. Three hours weekly. Prerequisite: course 123. 243A. Survey of Russian historical phonology and grammar. 243B. Selected topics. 243A required for the Ph.D. (Linguistics). The Staff

263. Russian Dialectology. Three hours weekly. Prerequisite: course 243A-243B. Phonology and grammar of modern Great Russian dialects. The Staff

264. The History of the Russian Literary Language. Three hours weekly. Prerequisites: course 204, Slavic 201. The evolution of literary Russian from the eleventh to twentieth centuries. Lectures and analysis of texts. The Staff

266. Russian Lexicology. Three hours weekly. Examination of the formal and semantic structure of the Russian lexicon. The Staff

Graduate Literature Courses

211. Eighteenth Century Russian Literature. Three hours weekly. Lectures and readings in major and secondary writers. Analysis of selected literary works. Required for the M.A. (Linguistics, Literature; see M.A. requirements). The Staff

212. Nineteenth Century Russian Literature. Three hours weekly. Lectures and readings in major and secondary writers. Required for the M.A. (Linguistics, Literature; see M.A. requirements). The Staff

213. Twentieth Century Russian Literature. Three hours weekly. Lectures and readings in major and secondary writers. Required for the M.A. (Linguistics, Literature; see M.A. requirements). The Staff

251A-251B. Old Russian Literature. Three hours weekly. 251A. Survey of Old Russian Literature from the beginning through the Kievan period and the Moscovite period up to the end of the seventeenth century. 251B. Required for the Ph.D. (Literature). The Staff

270. Russian Poetics. Three hours weekly. Prerequisite: course 130A-130B-130C. Recommended as preparation for course 290. Introduction to the technical study of Russian poetics and versification with attention to metrics, stanza forms, rhyme, and the development of various verse types from the eighteenth through twentieth centuries. The Staff

290. Seminar in Russian Poetry. Three hours weekly. Prerequisite: course 130A-130B-130C. Recommended preparation: course 270. Detailed study of single author, period, or work. May be repeated for credit with consent of instructor and Graduate Adviser. The Staff

291A Seminar in Old Russian Literature. Three hours weekly. Prerequisite: course 251A. Selected topics from the eleventh through seventeenth centuries. May be repeated for credit with consent of instructor and Graduate Adviser. The Staff

291B. Seminar in Eighteenth Century Russian Literature. Three hours weekly. Prerequisite: course 211. Selected authors and works from eighteenth century poetry, prose and drama. May be repeated for credit with consent of instructor and Graduate Adviser. The Staff

292. Seminar in Nineteenth Century Russian Literature. Three hours weekly. Prerequisite: course 212. Selected authors and works from nineteenth century poetry, prose and drama. May be repeated for credit with consent of instructor and Graduate Adviser. The Staff

293. Seminar in Twentieth Century Russian Literature. Three hours weekly. Prerequisite: course 213. Selected authors and works from twentieth century poetry, prose and drama. May be repeated for credit with consent of instructor and Graduate Adviser. The Staff

294. Seminar in Russian Literary Criticism. Three hours weekly. Prerequisites: courses 211, 212, 213. Detailed study of a specific school of literary criticism, a single literary history as reflected in literary criticism. Simultaneous or similar phenomena in literary criticism in the west will be included. May be repeated for credit with consent of instructor and Graduate Adviser. The Staff

Serbo-Croatian

103A-103B-103C. Elementy Serbo-Croatian. 103D-103E-103F. Advanced Serbo-Croatian. 113A-113B-113C. Advanced Reading and Composition. 154A-154B. Yugoslav Literature.

Slovak

222. The Structure of Slovak. Three hours weekly. Prerequisite: Slavic 202, Slavic 222 recommended. Introduction to the phonological and morphological structure of the Slovak language, especially as contrasted with Czech. The Staff

Ukrainian

Non-Slavic Languages of Eastern Europe

Lithuanian

Romanian

Social Welfare

(Department Office, 200 Dodd Hall)

Jerome Cohen, Ph.D., Professor of Social Welfare.
Maurice F. Comer, D.S.W., Professor of Social Welfare (Chairman).
Jeanne M. Giovannoni, Ph.D., Professor of Social Welfare (Chairperson, Doctoral Program Committee).
Alfred H. Katz, D.S.W., Professor of Public Health and Professor of Social Welfare.
Harry H. L. Kitano, Ph.D. Professor of Social Welfare and Professor of Sociology.
Nathan E. Cohen, Ph.D., Emeritus Professor of Social Welfare.

Maxine Jackson, M.S.W., J.D., R.N., Visiting Lecturer in Social Welfare.
James Karls, Ph.D., Visiting Lecturer in Social Welfare.
Stan Katz, Ph.D., Visiting Lecturer in Social Welfare.
Katherine M. Kolodziejcki, D.C.S.W., Field Work Consultant.
Jane E. Kurohara, M.S.W., Field Work Consultant.
Joanne Mantell, Visiting Lecturer in Social Welfare.
Rose Monteiro, M.S.W., Visiting Lecturer in Social Welfare.

Joanne Mantell, Visiting Lecturer in Social Welfare.
Rose Monteiro, M.S.W., Visiting Lecturer in Social Welfare.
Master of Social Welfare Degree

Admission Requirements. In addition to University minimum graduate admission requirements, the master's program of the School of Social Welfare requires a minimum of five courses in the social science and social welfare subjects as prerequisite undergraduate preparation for graduate study in the field of social work. Completion of courses in psychology, sociology and statistics is ordinarily expected.

A grade point average of 3.0 or better is required in all courses taken during the junior and senior years. However, applicants who have a grade point average of between 2.95 and 3.0 may be considered on an individual basis when there is clear evidence of capacity for academic achievement and professional development. In addition to an acceptable academic record and completion of the above preparatory courses, the School applies the following criteria in the selection of candidates: personal suitability for professional education and a potential for successful social work practice, a satisfactory state of health, and an adequate financial and personal plan to permit completion of requirements for the degrees.

An official copy of the score from the Aptitude Test of the Graduate Record Examination is required, as are official transcripts of record from every school attended since high school. Results from the Graduate Record Examination must be submitted prior to any evaluation of the application for admission. GRE scores must be less than five (5) years old, and may be repeated to achieve a higher score, if desired. The GRE is given several times a year in various locations in the United States and foreign countries. Applications and information may be secured either from the Graduate Admissions Office of UCLA or a geographically convenient school, or from the Educational Testing Service. The Southern California Regional Office of the Educational Testing Service is located at: 2200 Merion Avenue, Los Angeles, California 90041. In addition, foreign students whose native language is other than English and whose higher education was not obtained in an English-speaking country are required to take the Test of English as a Foreign Language (TOEFL). The School may request a student to take specified examinations to assist in the assessment of candidacy for admission.

Three letters of recommendation are required. In addition, an autobiographical statement and a professional concepts and goals statement must accompany the application.

Write for the departmental brochure and applications for admission to UCLA School of Social Welfare Admissions, 200 Dodd Hall, UCLA, 405 Hilgard Avenue, Los Angeles, California 90024.

Admission to the School of Social Welfare requires simultaneous application to (1) the School of Social Welfare for admission to the graduate program, and (2) the Graduate Division of the University of California for admission to graduate status in this University. Both applications and the School brochure are obtainable upon written request to the above address, or by calling (213) 825-7737.

Advising
Graduate Adviser: Mr. Jaime Soliz, Director of Admissions and Student Affairs, UCLA School of Social Welfare, 200 Dodd Hall, UCLA, 405 Hilgard Avenue, Los Angeles, California 90024.

On entering the School, each student is assigned an adviser whose responsibility it is to counsel the student concerning his/her program of study and progress toward the fulfillment of the degree requirements. The student may request a change in advisers at any time during the course of study, submitting this request to the Dean either through the current adviser or directly.

Each quarter, a written summary of the student's School of Social Welfare grades is provided through the Office of Admissions and Student Affairs, 200 Dodd Hall. Since no official grade is entered for the practicum course until the Spring Quarter each year, an unofficial in-Progress grade of satisfactory or unsatisfactory is maintained within the School to effect action to help achieve graduate standards. The overall assessment of progress is monitored by the Graduate Adviser.

Ordinarily, students are expected to meet with advisers twice each quarter and more frequently if students are experiencing difficulties in their coursework or if situations in their personal life are affecting their studies. When indicated, a statement of any relevant data or action taken or contemplated of concern to other faculty working with the student, is entered into the student's record. If a student falls below the established graduate standard (a grade point average of 3.0), a faculty committee consisting of the student's adviser and at least two other faculty members is convened to recommend appropriate action to the Dean.

Foreign Language Requirement. None. The foreign language requirement has been waived for the School of Social Welfare.

Course Requirements. A total of 72 units in courses of the School of Social Welfare curriculum are required for the M.S.W. degree. The required courses include three courses in social welfare policy and services; five courses in the human behavior and social environment sequences; five courses in methods of social work practice; three courses in social welfare research; plus six quarters of field instruction. Appropriate substitutions or waivers may be made by the Dean. To the extent that scheduling allows, and with permission from the Dean, students may take courses in other graduate schools of the University in fulfillment of the degree requirements.

Thesis or Comprehensive Examination Plan. Thesis Plan. While no University-approved specific thesis is required for the M.S.W. degree, the curriculum requires theoretical courses in research methodology. As a component of the second-year research course, the satisfactory completion of an individual research project, or participation in a group research project concerned with a social welfare problem, is required.

Comprehensive Examination Plan. Successful passing of an oral Comprehensive Examination is required of all candidates for the M.S.W. degree in the Spring Quarter of the student's second year of study. The comprehensive examination committees are appointed by the Dean, each consisting of at least two faculty members. Committees are appointed in the Spring Quarter, and are responsible for examining a selected group of students. The examination covers the entire range of the candidate's program of study.

The School of Social Welfare is a graduate professional school whose primary objective is to prepare students not only for successful careers but also for imaginative leadership in the social welfare field. The educational program is based on the premise that all students need to acquire a common body of knowledge and basic skills, and a common understanding of the philosophy and values of the profession, as a sound foundation for the development of more specialized knowledge and skills along the lines of each student's interests, and the needs of the field.

In addition to the M.S.W. program in Social Welfare, the School offers a doctoral program of study leading to the D.S.W. It is designed to prepare candidates who wish to train for careers in teaching, research, administration and high level practice positions. Courses are scheduled in the Graduate School of Social Welfare and in schools and departments of related disciplines and professions.
Time to Degree. Students in the M.S.W. degree program are expected to be in full-time attendance and to work without interruption toward the degree. The requirements for the M.S.W. degree should be met ordinarily within two consecutive years (six quarters), Course scheduling is predicated on this understanding. In rare exceptions, students may be admitted for study on a part-time basis which permits completion of the first-year academic courses and field instruction over a period of two academic years. The second-year program of study requires concurrent course and field instruction and necessitates enrollment on a full-time basis.

500 Series Course Limitations. With the approval of the instructor and the Dean, students may substitute tutorial studies of comparable material in the 500 series for either required or elective courses. Only 596A (Special Study and Research for the Master's Degree) and 597A (Preparation for the Comprehensive Examination—Master's Degree) may be taken. Each course has variable unit values, from 2 to 8 units possible. For 596A, letter grading is used, and for 597A, S/U grading is used. A maximum of 9 units of 500 series courses may apply toward the entire graduate-course requirement for the Master of Social Welfare degree.

Teaching Experience. Teaching experience is not required for the M.S.W. degree.

Disqualification and Appeal of Disqualification. All students are expected to maintain a level of performance in both the academic and practicum components of the curriculum consistent with the standards and procedures of the Graduate Division of the University. In addition, as a professional school, the School of Social Welfare reserves the right to terminate at any point in their program, students who fail to demonstrate in classwork, field instruction and professional relations, those standards essential to the responsible practice of social work. Such action shall be taken by the Dean only on recommendation of a committee composed of at least three members of the faculty. The student involved in such review shall be permitted to appear before this committee. The School's recommendation to terminate a particular student may be appealed by the student to the Dean, and is also subject to appeal to the Dean of the Graduate Division.

Other Relevant Information. Practicum requirements: First year: concurrent placement for 25 weeks at 2 to 2½ days per week. Second year: concurrent placement for 25 weeks at 3 days per week.

Doctor of Social Welfare Degree

Admission Requirements. In addition to the University minimum requirements, the School of Social Welfare takes into consideration the quality of performance in previous undergraduate and graduate study, success in professional employment and other pertinent experience, results of the Graduate Record Examination, and personal qualifications indicating suitability for advanced study and research. An official copy of the score from the Aptitude Test of the Graduate Record Examination is required, as are official transcripts of record from every school attended since high school. The Graduate Record Examination is given several times a year in various locations in the United States and foreign countries.

Applications and information may be secured either from the Graduate Admissions Office of UCLA or a geographically convenient school, or from the Educational Testing Service. The Southern California Regional Office of the Educational Testing Service is located at: 2200 Merton Avenue, Los Angeles, California 90041. In addition, foreign students whose native language is other than English and whose higher education was not obtained in an English-speaking country are required to take the Test of English as a Foreign Language (TOEFL). The School may request a student to take specified examinations to assist in assessment of candidacy for admission.

Write for the departmental brochure and application for admission to: UCLA School of Social Welfare Doctoral Program, 200 Dodd Hall, UCLA, 405 Hilgard Avenue, Los Angeles, California 90024.

Five letters of recommendation are required. Prospective students must apply separately to the School of Social Welfare and to the Graduate Division of the University of California at Los Angeles. Both applications and the School brochure are available upon written request to the address listed above, or by calling (213) 825-1951.

Advising. Graduate Adviser: Professor Jeanne Giovannoni, Chairperson of the Doctoral Program Committee, School of Social Welfare, 200 Dodd Hall, UCLA, 405 Hilgard Avenue, Los Angeles, California 90024.

Following admission, each student is assigned an individual adviser. Appropriate assignment of adviser, as far as possible in accord with the interests and background of the student, is made by the Chairperson in consultation with the Doctoral Program Committee. Students are sent written notification of their adviser during the summer preceding entry into the program. The student will ordinarily continue with the initial adviser until successful completion of the Written Qualifying Examinations. The student may request a change in adviser at any time during the course of study, submitting this request to the Doctoral Program Committee chairperson either through the current adviser or directly. However, once the Graduate Division has officially appointed the dissertation chairperson, consent and approval of the Graduate Division is necessary for any change in committee structure.

For each quarter, a written statement of School of Social Welfare grades is provided to the student. In addition, a written report to the student and/or to the student record may be made by the adviser or instructors as necessary. Overall student progress is reviewed regularly by the Doctoral Program Committee.

The adviser and student establish a schedule of meetings; this includes a conference at the beginning of each quarter regarding the student's program of courses. The adviser's written approval is requisite to enrollment in all courses. Advisers and students are expected to meet regularly to review student progress and plan an individualized program in relation to the student's needs. The student's dissertation committee is formed after successful passage of the Written Qualifying Examinations. Once formed, this committee assumes the role of guidance committee for the student's continued progress, and the chairperson of this committee acts as the student's adviser.

Admission to the Doctoral Program. In addition to University graduate admission requirements and the Aptitude Test of the Graduate Record Examination, the applicants' capacity for doctoral level scholarship and ability to express themselves clearly in writing must be evidenced. Any of the following may be submitted as such evidence: published articles, master's thesis, unpublished papers, or term papers written in graduate courses. Also required is a typewritten statement of professional and educational objectives. Foreign students are required to take the Test of English as a Foreign Language (TOEFL) unless their native language is English or their higher education was obtained in an English-speaking country. In exceptional instances, the School may request a student to take specified examinations to assist in the assessment of his/her candidacy for admission. Each applicant will be evaluated by the School's Doctoral Program Committee; admissions decisions are reached by the Doctoral Program Committee as a whole.

Although a personal interview is not normally required as part of the application procedure, whenever necessary a conference is arranged between the applicant and a member of the doctoral faculty. This conference is intended for the mutual benefit of the applicant and the School, enabling the applicant to become more familiar with the program, and the School with the applicant.
The completion of an M.S.W. degree program from an accredited school of social work with a superior record is the usual educational prerequisite for admission to the Doctoral Program. In some instances, candidates possessing a graduate degree in another field may also be admitted. Such candidates, however, may also be required to fulfill specified requirements in the M.S.W. program of the School as determined by the Doctoral Program Committee in accord with the student's background and needs. These requirements are in addition to the normal doctoral requirements.

**Major Fields or Subdisciplines.** The core curriculum is the same for all students. Programs of specialized study relevant to the substantive area of the dissertation, which include courses in other schools and departments of the University as well as seminars and tutorials within the School, are developed in consultation with the adviser.

**Foreign Language Requirement.** None. The foreign language requirement has been waived for the School of Social Welfare.

**Course Requirements.** Courses required for the degree normally cover a 2-year span of study. All first-year course requirements must be completed before taking the Qualifying Examinations.

Required courses for the first year are: three consecutive quarters of research methods seminar (286ABC); a quarter devoted to a review of the psychological and social theories on which further work in practice theory is based, and two quarters of practice theory seminar (245ABC); two quarters in welfare systems and social welfare policy (225AB). In addition, one quarter may be required in an area to be chosen by the Doctoral Program Committee, depending on the educational needs and interests of the first-year class.

Required courses for the second year are: two quarters of integrative seminars (210AB). A third quarter course is also required which may be a seminar or individual or small group tutorials, as determined by the Doctoral Program Committee.

In addition to these requirements, the student must take a minimum of three quarters in a graduate school or department outside the School of Social Welfare in an area related to the student's professional objectives. These courses are to be approved by the student's adviser. In exceptional instances, a student may obtain either a waiver of or substitution for a required course. A student who feels that such action is justified should make a request to the Doctoral Program Committee through his/her adviser. The Doctoral Program Committee will make the final decision, based upon the recommendations of the professor giving the required course. Ordinarily, students in full-time study will be expected to enroll in at least 12 units of study each quarter during the first two years and at least 8 units per quarter thereafter.

**Written and Oral Qualifying Examinations.** Before the formation of a doctoral committee, each student in the doctoral program must pass Written Qualifying Examinations—an examination in each of the three core areas, as follows: (1) Social Welfare Policy, History, and Philosophy; (2) Social Work Practice Theory; and (3) Research and Scientific Inquiry (philosophy and values, research methodology, research design, and behavioral concepts utilized in social welfare). The emphasis in these examinations is on the student's ability to integrate the knowledge he/she has gained from the several substantive areas for dealing with problems and issues of the field of social welfare at various levels— theoretical, operational, and evaluative. Full-time students are expected to take the Written Qualifying Examinations before commencing the second year of doctoral program study.

The Written Qualifying Examinations are graded on a pass/fail basis, with the following scale: pass; fail with permission to retake the examination(s); fail without permission to retake the examination(s). Each examination will be read by several readers who will reach agreement on the grade given. In cases where it is recommended that the student not be permitted to repeat the examination(s), the Doctoral Program Committee will make the final judgment. In case of failure with permission to retake one or two of the three examinations, the student is required to retake only the examination(s) which was failed. Students will ordinarily be required to take the Written Qualifying Examinations in June of the first year of study; any retaking of examinations will ordinarily take place in September.

The Oral Qualifying Examination for advancement to candidacy covers the student's dissertation proposal and related areas. This examination is administered by the students' doctoral dissertation committee, which must have been formally approved by the Graduate Division prior to the examination date. The Written Qualifying Examinations must be successfully completed prior to the oral examination.

**Doctoral Committee.** Following the successful completion of the Written Qualifying Examinations, when the student has obtained a faculty adviser to chair the dissertation committee, notification will be given to the chairperson of the Doctoral Program Committee. The dissertation adviser will chair the student's doctoral committee overseeing the progress of the dissertation. The dissertation committee is composed of a minimum of five faculty members, of whom three must be from the School of Social Welfare and two from other schools or departments of the University, in accordance with Graduate Division regulations.

**Time to Degree.** A full-time doctoral student will usually complete all required coursework by the end of the sixth quarter (second year) after admission into the doctoral program. (In general, students admitted to the doctoral program will have completed a 2-year graduate program in an accredited school of social work conferring an M.S.W. degree.) At the end of the first year of doctoral study, having completed all first-year required courses, the Written Qualifying Examinations are given. The Oral Qualifying Examination is administered at a time appropriate to the student's progress in relation to his/her dissertation proposal, ordinarily no later than the seventh quarter of study, but varying according to the student's individual situation. It is generally expected that three quarters beyond completion of all required courses will be required for completion of the dissertation. This includes passage of a Final Oral Examination, if such is required by the student's doctoral committee. The period from doctoral admission to award of the degree is generally expected to be nine quarters (three years), although it may range up to five years in occasional instances.

Extension of time beyond the 5-year maximum is possible only by special permission of the Doctoral Program Committee. Students are generally expected to attend the program on a full-time basis. Only in exceptional instances may a student be admitted for a part-time program. This program is developed on an individual basis between the student and adviser, but would generally require at least one year of study in addition to the normal 3-year program for award of the D.S.W. degree.

**Final Oral Examination.** A Final Oral Examination is not required of all candidates, but may be required at the option of the student's doctoral committee.

**Teaching Experience.** Teaching experience is not required for the D.S.W. degree.

**Disqualification and Appeal of Disqualification.** All students are expected to maintain a level of performance consistent with the standards and procedures of the Graduate Division of the University. In addition, as a professional school, the School of Social Welfare reserves the right to terminate students at any point in their program who fail to demonstrate those attitudes and behaviors consistent with the personal and ethical standards essential to the responsible practice of social work (even though the academic work performed by such students may be satisfactory). Such action shall only be taken by the Dean on recommendation of a committee composed of at least three members of the faculty. The student involved in such review shall be permitted to appear before this committee. The School's recommendation to terminate a particular student may be appealed by the student to the Dean, and is also subject to appeal to the Dean of the Graduate Division.
205. Group Conflict and Change. (½ course) Study of the phenomena of group conflict and change as they appear in the social welfare matrix of groups, communities, and societies. Emphasis will be placed on the relationship between conflict and social and cultural change; major research contributions in understanding of these phenomena.

210A-210B-210C. Social Ecology. Prerequisite: Doctoral status and/or consent of instructor. Examination of data and theories from the biological and policy sciences regarding ecological relationships. Review of current biophysical, sociocultural, demographic, technological, economic, and political changes as they affect human society. Its institutions and, more particularly, social welfare needs.

220. History and Philosophy of Social Welfare. (½ course) The history of social work as a field: body of knowledge, method and process, and point of view analysis. A sociocultural analysis and reflection on the role of the social worker.

221A. Social Welfare Policy and Services I. (½ course) Nature, roles and history of welfare institutions in different societies, applicable social system theory with special reference to values as seen by different components of the welfare system; theory and research about needs met and not met, about various welfare policies and organizational forms, and about the role of the social worker in the social work profession.

221B. Social Welfare Policy and Services II. (½ course) Prerequisite: consent of instructor. Study of income-maintenance policy and services. Introduces theory and research about selected levels of living, regulatory and source of income, and economic and social, philosophical and scientific climate of the period.

222A-222B-222C. Social Welfare Administration I, II, III. (½ course each) Prerequisite: Graduate Standing and consent of instructor. Study of methods by which welfare policies are formulated and translated into action; the nature of organization and research process involved in welfare administration; role of welfare agency personnel in policy formulation, implementation and evaluation.

223. Seminar on the Social Work Profession. (½ course) The nature and role of social work in contemporary society; relationships with other professions; professional socialization, social work ethics, professional organizations, certification licensing; professional responsibility for continued self-criticism and improvement of the profession.

224A-224B-224C. History and Philosophy of Social Welfare. Prerequisite: Doctoral status and/or consent of instructor. Analysis of trend in social welfare policies and programs in relation to political, economic, and other relevant factors. Philosophical foundations underlying social welfare theories, programs, and methods will be explored and values, assumptions, and attitudes historically affecting social welfare examined.

225A-225B-225C. Social Welfare Systems. Prerequisite: Doctoral status and/or consent of instructor. Analysis of the profession and behavior of those working in social welfare systems (including supranational systems transcending national boundaries), their directions, goals, values, and relationships to social work. Application of organizational theory to planning, organizing, and administering welfare agencies will be stressed.

227A-227B-227C. Comparative Social Welfare Theories and Programs. Prerequisite: Doctoral status and/or consent of instructor. Examination of interrelations between welfare services and the social, economic, religious, and broader cultural milieu within which they develop. Special attention to social theories, value systems, and other elements of culture which particularly affect welfare programs.

230A-230B-230C. Theory of Social Work Method I, II, III (½ course each) Concurrent social work practice is required. An introduction to the theory of social work with individuals and small groups and to the principles of practice which are derivative of this and related theory.

231A-231B. Advanced Theory of Social Work Method IV, V. (½ course each) Required: Concurrent social work practice. Advanced-level, critical analysis of research needs and techniques underlying social casework practice. Specific attention to deviation and stress as conditions affecting functioning of individuals and groups; and to diagnostic knowledge and competence required in rehabilitation and practice.

240A-240B-240C. Theory of Social Work Method (Community Organization) I, II, III. (½ course each) Concurrent practice in social work required. Covers historical and theoretical developments in community organization; understanding the community as a social system; role of the practitioner in identification, analysis and evaluation of needs, existing programs, policies, structures and strategies of intervention.

241A-241B. Advanced Theory of Social Work Method (Community Organization) IV, V. (½ course each) Concurrent practice in social work required. Emphasis on various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within the context of community planning; emerging patterns of physical, economic and social planning within the framework of social change theory.

M242. Counseling Families. Handicapped Children. (Same as Psychology M281C) Prerequisite: consent of instructor. Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional reactions, community resources, and issues of genetic counseling, placement, and developmental crises.

245A-245B-245C. Development of Social Work Practice Theory. Prerequisite: Doctoral status and/or consent of instructor. Critical analysis of social work practice theories in historical, social and scientific contexts, with attention to how theory becomes modified through application to practice.

258. Critical Problems in Social Welfare. Prerequisite: Doctoral status and/or consent of instructor. Concerned with current problems in the field of social welfare. Specific topics to be discussed will vary depending upon the research and educational interests and needs of the class. May be repeated for credit.

M275. Family Process: Psychological and Social Perspectives on the Family. (Same as Psychology M275) This course reviews various theoretical perspectives applicable to the analysis of family structure and dynamics. Critical issues in the application of family constructs to clinical problems will receive particular emphasis. Mr. Goldstein.

281A-281B-281C. Advanced Social Welfare Research. (½ course each) Credit to be given only at the completion of the sequence. Group research projects requiring intensive examination and analysis of a social problem area directed toward the development of research knowledge and techniques for social work practice. This course is offered on an In Progress basis, which requires students to complete the full three-quarters sequence, at the end of which time a grade is given for all quarters of work.

285A-285B-285C. Research in Social Welfare. Prerequisite: Doctoral status and/or consent of instructor. Review of areas of research of concern to social workers with special attention to design, instrument construction, data collection, data processing, data reduction and presentation. Designs students will include survey, panel, experimental observation, and theory development research.

Kenneth D. Bailey, Ph.D., Associate Professor of Sociology.
Robert M. Emerson, Ph.D., Associate Professor of Sociology.
Lucie C. Hirata, Ph.D., Associate Professor of Sociology.
John E. Horton, Ph.D., Associate Professor of Sociology.
David E. Lopez, Ph.D., Associate Professor of Sociology.
David D. McFarland, Ph.D., Associate Professor of Sociology.
Melvin Poliner, Ph.D., Associate Professor of Sociology.
Jerome Rabow, Ph.D., Associate Professor of Sociology.
Samuel Surace, Ph.D., Associate Professor of Sociology.
Jeffrey Alexander, Ph.D., Assistant Professor of Sociology.
Roderick J. Harrison, Ph.D., Assistant Professor of Sociology.
Jack Katz, Ph.D., Assistant Professor of Sociology.
Clarence Lo, Ph.D., Assistant Professor of Sociology.
Linda B. Nilson, Ph.D., Assistant Professor of Sociology.
Melvin Oliver, Ph.D., Assistant Professor of Sociology.
Jeffrey Prager, Assistant Professor of Sociology.
William S. Roy, Assistant Professor of Sociology.
Lynne G. Zucker, Ph.D., Assistant Professor of Sociology.

Harry H. Kitano, Ph.D., Professor of Social Welfare and Sociology.
Edwin S. Shneidman, Ph.D., Professor of Thanatology, Medical Psychology, Psychology, and Sociology.
Gerald H. Shure, Ph.D., Professor of Psychology and Sociology.
Julia C. Wrigley, Assistant Professor of Education and Sociology.

M.A. and Ph.D. Degrees

The graduate program of the Department of Sociology takes as its primary aim the training of scholars who will conduct original research contributing to the advancement of sociological knowledge. For this reason, the Department will ordinarily accept only students who are seeking the Ph.D. degree (a master's degree may be earned as part of the process of completing the requirements for the Ph.D.).

The Ph.D. in sociology usually leads to a career in research and/or teaching. Although most sociologists are employed by universities, there are increasing career opportunities in government and other non-university research centers.

Admission Requirements
In addition to the minimum University requirements (an acceptable bachelor's degree, and a "B" average in all upper division and graduate level work), the Sociology Department requires (1) three letters of recommendation, preferably from professors of sociology who are familiar with the applicant's written work and research experiences; (2) transcripts from all colleges where the applicant had studied (the Department's evaluation considers not only the record in sociology, but all undergraduate work, including coursework in English composition, logic, linguistics, and mathematics); (3) a statement of purpose, not to exceed three typewritten double-spaced pages outlining reasons for pursuing graduate work, interests within sociology, career objectives, and any personal experiences bearing on these; (4) copies of one or two term papers or research reports written by the applicant; (5) an official statement of scores on the Graduate Record Examination; and (6) for applicants whose native tongue is not English, the Test of English as a Second Language (TOEFL) is required.

Although background preparation in sociology is highly desirable, it is not mandatory for admission to the Department. Applicants need not be uniformly high on all indicators of potential. The Admissions Committee, which generally consists of five faculty members and two advisory graduate student members, uses a number of indicators of particular skills rather than relying heavily on just one or two. For example, in assessing the level of verbal skills, the Committee considers several items, includ-
ing samples of written work and grades in courses that ordinarily require extensive verbal skills, as well as verbal Graduate Record Examination scores.

In addition to relatively formal criteria (such as analytic proficiency and articulateness), the Department pays particular attention to applicants who seem likely to contribute considerable intellectual, social, or cultural diversity to its student body. Women and minorities are therefore encouraged to apply. The deadline for receipt of applications is December 31. Application forms and more detailed information are available upon request from: The Graduate Affairs Assistant, Department of Sociology, UCLA, Los Angeles, California 90024.

Advising. Address: Chairperson, Graduate Curriculum and Advisement Committee, Department of Sociology, 264 Haines Hall.

Entering graduate students are assigned a faculty member as an entrance adviser. Entrance advisers will be assigned by the Graduate Curriculum and Advisement Committee. At any time, the student may change from this adviser to any other consenting faculty member.

During the first year of graduate study, the student is expected to form a 2-person Dossier Committee to supervise written work in the Department. (Please note that the entrance adviser does not automatically become a member of the Dossier Committee.) The Dossier Committee must be formed by the first quarter of the student's second year of study, and when constituted, will assume all advising responsibilities for that student.

Faculty advisers, whether Entrance Adviser or Dossier Committee member, will meet with the student at the beginning of each quarter in order to plan the student's coursework for that quarter, sign study list cards, and discuss questions about professional training. In addition, the student will meet with the members of his/her Dossier Committee no later than the fifth quarter of graduate work to discuss current progress on the dossier papers, and to plan the student's future program of courses.

Major Fields or Subdisciplines. The Department of Sociology is large and diverse, and its faculty conducts research and teaching in a large number of the fields into which sociological work is commonly categorized. Like most social sciences, as Sociology has developed, it has become increasingly differentiated with regard to subfields. Specialties are often not clearly bounded social groups, and as a result it becomes more and more difficult to group scholars within a small number of interest areas. Granting this limitation, it would appear that 11 fields are now prominent or are becoming particularly prominent in the Department at this time: Comparative and Historical (including the study of social change); Demography; Ethnomethodology (including the organization of language, thought and experience); Mathematical-Quantitative Sociology; Minorities; Organizations; Political (including Marxist) Sociology; Social Policy and Applied Sociology (including evaluation research); Social Psychology; Stratification; and Theory. The Department has developed strong concentrations in each of these areas, involving both instruction and research opportunities.

Clearly, the domains of concentration listed above are broad in their scope, and they do not detail the variety of specializations and subfields that are actively pursued within the Department. Thus, for example, within the general area of theory and methods, the student will find opportunities for training in experimental methods, survey research, theory construction, quantitative historical methods, and ethnographic research, among others. With respect to comparative analysis, the Department has specialists in a variety of area studies including Latin America, Europe, Asia, Africa and the Middle East, and for all of these areas there are interdisciplinary centers devoting special attention to problems relating to these areas. In the same way, research and training on American minorities (including women) are well-represented in both the institutions and the faculty on the campus. The student can also make ready use of resources that are formally affiliated with other departments and schools at UCLA—e.g., resources relating to demographic studies and medical sociology in the School of Public Health, and to the sociology of education. Thus, graduate students are not compelled to select one of the 11 fields listed above for specialization. They may wish to combine fields or to develop their own interests in one of the myriad of subfields in Sociology not specifically listed here.

Foreign Language Requirement

Master's Degree. There is no foreign language requirement for the master's degree.

Ph.D. Degree. Students who plan to study toward the Ph.D. degree should complete the foreign language requirement as early as possible, so as to make use of foreign language sociological publications throughout their graduate study. In any case, the foreign language requirement must be fulfilled before the doctoral committee is nominated and the oral examination is taken. A reading knowledge, as demonstrated either by acceptable performance on a standardized test or by completing Course 5 of a language, or the equivalent, with at least a grade of C, is required for the Ph.D. in sociology. The student may choose from French, German, Italian, Russian and Spanish. He/she may also petition the Department for approval of some other language that will be more useful in relation to his/her special interests in sociology.

With the approval of the Department, a foreign student may offer English as a foreign language if the native language is other than English. Proficiency in English will be evaluated by the level of performance on the UCLA entrance examination in English for foreign students, together with achievement in graduate work.

A second alternative is that students might find it equally profitable for their research to study sources in an allied field such as history, political science, linguistics, psychology, economics, philosophy, or mathematics. The student would be permitted to substitute for the language requirement a set of three upper division or graduate courses offered at UCLA and passed with a grade of at least B. In order to do this, the student must submit the proposed list of courses to the Executive Committee with a justification for the set of courses—presumably based on the potential contribution of these courses to the Ph.D. research. Only courses taken while the student is a graduate student will count toward fulfilling this requirement and once approved, any substitution of courses for those originally approved require full committee approval.

It should be stressed that the Department, via its Executive Committee, has adopted strict guidelines for such language substitution in the Ph.D. program as follows:

(1) Petitions for substitutions must include clear evidence that foreign language proficiency would not be useful to the student's research area or dissertation topic. If such evidence is not presented, it will be presumed that a suitable foreign language will be learned.

(2) Petitions for substitutions must indicate the relevance of the proposed coursework to the major research area or dissertation topic.

(3) Petitions must include detailed statements of the content of the courses, either in the form of a course outline or in a note written by the course instructor.

(4) Petitions for substitutions must outline coursework developing a proficiency qualitatively similar to a foreign language—courses which enhance the student's skills in an area not covered in departmental course offerings.

(5) While methods courses can be undergraduate offerings (e.g., matrix algebra; historiography), substantive courses should generally be graduate offerings. Exceptions will be granted only when sufficiently explained by a statement attached to the petition.

Course Requirements

Before the Dossier Review. Total number of required courses: nine (36 units).

(1) Sociology 210-B (a 2-quarter graduate level statistics course).

Ordinarily the statistics requirement will be met by taking Sociology 210A-B and receiving a grade of C or better. But occasionally, a student will have mastered the material in 210A-B elsewhere. If the student has such equivalent
training, a petition for exemption from the coursework requirement should be filed with the Executive Committee (along with pertinent evidence and an adviser’s recommendation) to be referred to the relevant faculty. The instructors of 210A-B may give such a student the opportunity to satisfy the requirement by examination, without enrolling in the courses. No course credit will be given for requirements met by examination.

(2) Sociology 21XA-B (a 2-semester graduate level methodology sequence of which there are several alternatives—e.g., the survey methods course; the demographic methods course; etc.). The methodology series is presently numbered 211-218.

If the student has equivalent methodological training elsewhere, he/she should file a petition with the Executive Committee for exemption from the methodology requirement (along with pertinent evidence and an adviser’s recommendation).

(3) Three other 200-level courses in Sociology in the series 219 and up (but including, as well, the options of Sociology 201A-B, a preseminar in theoretical sociology, and 210C, an advanced mathematical statistics course which is available after the 210AB sequence). Neither Sociology 292A-B-C nor Sociology 495 is eligible for inclusion in this group of three courses required as part of the dossier.

(4) Two other graduate (below 500—i.e., not including independent studies) or upper division undergraduate courses in Sociology or in a cognate department.

After the Dossier Review. Total number of required courses: two (8 units).

An additional methodology sequence (from the series 211-218) must be completed before the awarding of the Ph.D. degree.

Ordinarily, students also enroll in additional courses in preparation for the Field Examinations.

Dossier Review. Rather than a Comprehensive Examination, graduate students must submit an acceptable dossier of two written papers for approval by the general faculty. The papers must demonstrate the student’s general competence in sociological theory, methodology, and selected substantive areas.

The student will select two faculty members for the Dossier Committee, subject to their consent. He/she should attempt to select a committee whose members represent a broad range of professional interests. This may be done as early in the graduate career as is desired by the student. It may not be postponed beyond the beginning of the second year of residence in graduate work.

In consultation with and on the advice of this committee, the student shall assemble two papers demonstrating that the student (1) has an accurate grasp of the intellectual traditions of sociology, (2) can bring evidence to bear on theoretical problems, (3) can describe how some aspect of the social order works, and (4) can treat research and methodological issues. These papers may seek to meet the above aims separately or in any combination. There need not be a “theory paper” or a “methodology paper”, but the papers should demonstrate theoretical and methodological competence. Papers may have been previously submitted to meet course requirements in this or any other department.

When the Dossier Committee feels these requirements have been met, they will nominate the student for Faculty Review by submitting the papers to the Graduate Curriculum and Admissions Committee (GCAC). That committee appoints a 2-person evaluation panel which reports its assessment to the GCAC as a whole. The GCAC considers the panels’ reports as well as that of the Dossier Guidance Committee and presents an evaluation and recommendation to the full faculty. The GCAC may recommend any of the following options:

(1) The dossier is passed. The candidate is granted the M.A. and permitted to proceed to the Ph.D.

(2) The dossier is passed conditionally. The candidate is granted the M.A. and permitted to proceed to the Ph.D. upon completion of specified revisions of the dossier.

(3) The candidate is granted a terminal M.A.

(4) The dossier is not acceptable (the candidate may submit at a later time or be asked to withdraw).

The GCAC’s recommendation and the analysis upon which it is based is to be made available to the student, the Dossier Committee and the faculty no later than one week prior to the Faculty Review. The faculty at its review may ratify the recommendation of the GCAC or alter it, including the option of making recommendation to the Dean of the Graduate Division to terminate graduate status.

A student is allowed two years from entrance into the Department to qualify under the Dossier System. This means that a student must be nominated for Faculty Review no later than the seventh quarter of residence. The nomination must be made regardless of the state of the dossier, except upon approved petition to postpone the submission of the dossier. A student may not be reviewed by the faculty before all of the requirements of the M.A. degree have been completed.

Field Examinations and Oral Qualifying Examinations

Following successful completion of the dossier, the student should request the Department to appoint a Ph.D. guidance chairperson, who will normally be the principal adviser throughout the completion of all work. The guidance chairperson should be a faculty member who is qualified in the student’s field of major interest, and qualified to supervise the student’s projected dissertation. In consultation with the student, the guidance chairperson will recommend to the Department two other faculty members to serve with him/her as the student’s guidance committee. The guidance committee will then assume the advisory function for the student, administer and evaluate Field Examinations and Qualifying and Final Oral Examinations, and constitute the departmental members of the doctoral committee when it is formed. In the event of a change in interests or the absence of a faculty member from the University or other cause, the student may request changes in the guidance committee.

After approval of the dossier, the student becomes eligible to take the Ph.D. Field Examinations. These Examinations are administered by the student’s guidance committee and cover two fields of special interest. After one of the major recognized areas in sociology in which the student can justify the satisfaction of the guidance committee. Under special circumstances, one of the fields may be in a related discipline other than sociology. The emphasis here is on mastery of a specialty and depth of understanding.

If the performance on the Field Examination is satisfactory, and the foreign language requirement has been fulfilled, the student may take the Oral Qualifying Examination. This examination may range over general sociology, the student’s specific fields, and the student’s dissertation plans. It is given by the doctoral committee not later than six months after the completion of the written examination. The student must prepare a 2-page abstract of the dissertation proposal for distribution to the entire faculty of the Sociology Department no later than one week before the oral examination.

In addition to the 2-page abstract, a full-length dissertation proposal shall be required at the time of the preliminary oral examination. A dissertation proposal approved by the committee must be filed with the Department reasonably soon after the preliminary orals. In the event of a major revision in the topic of methodology of the dissertation, a revised prospectus approved by the committee is required, and will be filed in the same manner as the original prospectus. Minor changes in the methodology and hypotheses which normally takes place as a student carries out the dissertation research do not call for a revised prospectus.

Students who successfully complete both Written and Oral Qualifying Examinations will be sent an Application for Candidacy from the Registrar’s Office. This must be signed by the chairperson of their committee. The student must pay a candidacy fee to the Cashier. The form must then be returned to Graduate Division.
Final Oral Examination (For the Ph.D. Degree). The optional Final Oral Examination for the Ph.D. degree is given by the doctoral committee not later than six months after the completion of the dissertation. The Final Oral Examination will not be scheduled until sufficient time has been allowed for all committee members to read the dissertation critically, and until both committee members and the student agree that the dissertation is in final and defensible form. The judgment at this time does not preclude a subsequent decision that the dissertation requires revision or is unacceptable on the basis of the findings of the oral examination. The examination centers around the dissertation, the field in which it is written, and the relation of this field to the discipline of sociology as a whole.

A decision to waive the final examination is optional on the part of the student's Ph.D. committee and must be consistent with the policies of the Graduate Council.

Time to Degree.

(a) From graduate admission to completion of the Dossier Review (i.e., the master's degree stage): six quarters.

(b) From completion of dossier to Field Examinations: four quarters.

(c) From Field Examination to first Oral Examination: two quarters.

(d) The dissertation and Final Oral Examination (if required) should be completed during the fifth and sixth years of graduate study.

(e) Normative time-to-degree for the Ph.D.: 18 quarters.

Candidate in Philosophy Degree. Candidates for this degree must conform to the general requirements set by the Graduate Division for the C.Phil. degree. It should be emphasized that the granting of the C.Phil. degree does not depend alone upon the satisfactory completion of a specified number of courses. The candidate must demonstrate competence as a research scholar and ability to give instruction in his/her field.

In addition to the general requirements set by the Graduate Division, every prospective candidate for the C.Phil. degree must have completed all of the above listed departmental requirements for the Ph.D. degree other than the filing of the dissertation and the final (optional) oral examination.

Two steps will insure that the C.Phil. is not a terminal degree:

(A) Not less than one week prior to the oral examination, all students are required to distribute a 2-page abstract of the dissertation to the entire faculty of the Department for their information and comment.

(B) Reasonably soon after the oral examination, and before the Department certifies approval of the C.Phil. degree, the student must file a final version of the dissertation prospectus, which is acceptable to the doctoral committee.

The departmental time limit between advancement to candidacy and award of the Ph.D. degree is seven years, during which time students who hold the C.Phil. will automatically be readmitted to graduate standing if they withdraw during the interval.

Teaching Experience (For Both the M.A. and the Ph.D.). Teaching experience is not a requirement for the degree, but it is strongly recommended.

Disqualification and Appeal of Disqualification. If a student is to be disqualified (terminated) from the graduate program for reasons other than failure to maintain a grade point average greater than 3.0, the decision regarding such a termination is generally made, at the departmental level, by the full faculty at its quarterly dossier review meeting. A recommendation for termination may be forwarded to that meeting by the Graduate Curriculum and Admissions Committee, which serves as the review body making recommendations to the full faculty concerning disposition of candidates for completion of dossiers and awarding of M.A. degrees. The elected Executive Committee of the Department is the established mechanism by which a student may appeal for a review of the disposition of his/her case; and the Executive Committee may make a recommendation for reconsideration to the Department where it deems such reconsideration warranted. The Departmental By-Laws provide for an alternative method of appeal to full faculty review of Executive Committee action, by way of the regulation (By-Laws, Item #10) that two voting faculty members are empowered jointly to request a faculty meeting on any action within the Department.

Specific conditions that may lead to termination include (1) submission of graduate work which is, in the judgment of the Graduate Curriculum and Admissions Committee and/or the full faculty dossier review unsatisfactory for either the granting of the M.A. degree or further pursuit of the doctorate; (2) making unsatisfactory progress toward the completion of the student's dossier and/or doctoral work (e.g., required extensions of time for completion of program requirements; receiving numerous "Incomplete" grades, and/or failure to remove such "Incompletes"); (3) repeated failure to pass any of the several required steps in doctoral studies (e.g., specialty field examinations, language requirements or their substitutes, oral examination); or (4) failure to complete doctoral work within the required time limit (within seven years after advancement to candidacy).

Other Relevant Information. The Department of Sociology is situated on the second floor of Haines Hall and is located close to the other social sciences and the Institute for American Cultures. Other facilities of interest to Sociology graduate students are the Graduate Research Library, the Survey Research Center, which is a division of the Institute for Social Science Research (ISSR), the small group laboratories of the Graduate School of Management, and the Center for Computer-Based Behavioral Studies. The Department has its own on-line data processing equipment and an APL terminal as well as access to the data processing facilities of the Campus Computing Network of the University. The Department also has the resource of its own audiovisual laboratory and statistics facilities.

Graduate Courses

210A-210B. Proseminar in Sociology. Prerequisite: Graduate Standing. A comprehensive survey of basic concepts and theories in the major fields of sociological study. Designed primarily for graduate students in the first year of residence. Mr. Alexander, Mr. Lopez

210A-210B. Intermediate Quantitative Methods I-II. Prerequisite: course 18 or equivalent. An intermediate level treatment of fundamentals of statistical theory and procedures: probability theory, basic distributions (normal, binomial, t, chi-square, F, etc.), their interrelations, and statistical procedures based on them; analysis of contingency tables; multiple and partial correlation and regression; analysis of variance and experimental designs; the general linear model; systems of equations. Additional special topics that can include: use of computers; loglinear models; factor analysis, discriminant function analysis; scaling and measurement; sampling design; nonparametric techniques and measures; matrix algebra if used in coverage of listed topics. The course is offered on an In-Progress basis, which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for each quarter.

Mr. Bonacich, Mr. McFarland, Mr. TenHouten

210C. Intermediate Quantitative Methods. Prerequisite: course 210B. Not required for the M.A. or Ph.D. degrees in sociology. This course will cover additional material and advanced multivariate techniques of particular value to sociologists.

Mr. Bonacich

211A-211B. Comparative and Historical Methods. The course is offered on an In-Progress grading basis, which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for each quarter.

211A. Strategies of Research and Conceptualization. Prerequisite: consent of instructor. Topics include research design, the logic of comparative and historical analysis, and substantive paradigms of comparative and historical analysis. Reading involves methodological examination of basic works in representative problem areas.

211B. Research Techniques. Prerequisite: course 211A. Topics include the problem of evidence, qualitative and descriptive data, techniques of data analysis including the use of manuscript, content analysis, collective biography, and secondary analysis will be discussed.

Mr. Lo, Mr. Prager, Mr. Roy

500 Series Course Limitations. Courses in the 500 series (596, 597, 598) are normally taken in preparation for the Dossier Review, the Field Examinations, and for dissertation research. While these courses may be taken to maintain enrollment, they do not count toward the course requirements.
212A-212B. Marxist Methodology. Prerequisite: course 112 or consent of instructor. Practice in the dialectical method of attaining an understanding about society as a process and mode of production. A critical examination of methodological issues and techniques, and practical field researches.

Mr. Horton

213A-213B. Techniques of Demographic and Ecological Analysis. Prerequisite: course 210A or equivalent. Procedures and techniques for the collection, evaluation, and analysis of demographic and ecological data, and models of population and ecological structure and change; applications to the study of social structure and social change. Mr. Sabagh

214A-214B. The Measurement of Sociological Variables. Prerequisites: courses 210A-210B and consent of instructor. Theory and technique of measurement in sociology and social psychology; construction, application, and evaluation of measurement techniques, especially the forms of scaling. This course is offered on an In-Progress basis, which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for all quarters of work. Mr. TenHouten

215A-215B. Experimental Sociology. Prerequisites: course 210A or equivalent and consent of instructor. A course designed to provide students with the basic fundamentals of the experimental method, particularly as it is used in sociological research. This course is offered on an In-Progress basis, which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for all quarters of work. Mr. Grusky, Mr. Rabow, Mr. Shure

216A-216B. Survey Research Methods. Course in methodology and techniques: formulation of research problem; study design; hypotheses; sampling; measurement; questionnaire and schedule construction; interviewing and data collection; processing and tabulation; analysis and interpretation; presentation of findings; cross-national, replicative, panel and other complex survey designs. Students participate in survey research projects directed by the instructor. This course is offered on an In-Progress basis, which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for all quarters of work. Mr. Levine, Mr. Treiman

217A-217B. Ethnographic Field Work. Prerequisite: consent of instructor. Theories and techniques of ethnographic field work. This course will consider the kinds of problems amenable to ethnographic approaches, methods and techniques for doing fieldwork, and supervised independent research. This course is offered on an In-Progress basis, which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for all quarters of work. Mr. Emerson, Mr. Polnner

218A-218B. Ethnomethodological Methods. Prerequisite: consent of instructor. Examination of techniques used in ethnomethodological research, practice in the critical evaluation of research, and directed experience in the conduct of an ethnomethodological investigation employing ethnomethodological procedures. This course is offered on an In-Progress basis, which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for all quarters of work. Mr. Garfinkel

219. Theory of Sociological Inquiry. Prerequisites: course 210A and consent of instructor. A general review of procedures followed by social scientists in attempts to achieve valid theoretical knowledge. Focuses on inductive inference and the theory of control and randomization, experimental and nonexperimental research designs, association and causality, models, measurement theory, sampling theory. 

Mr. TenHouten

220. Role Theory. Prerequisites: Graduate Standing and consent of instructor. A review of theories and research dealing with social roles, with special emphasis on roles in social interaction and in formation of the social self. Mr. Turner

221. Social Ecology. Prerequisites: Graduate Standing and course 18 or equivalent, course 126 or equivalent, or consent of instructor. An examination of the various approaches to both macro and micro ecology, including classical and neoclassical ecology, social area analysis, sociocultural ecology, city-size distribution effects, population density on animals and human populations in the physical environment. Mr. Bailey

222A-222B. Social Ecology. Prerequisites: courses 210A and consent of instructor. An examination of the interrelationship of family and economic systems in societies at different levels of economic development, focusing particularly on the U.S. experience. Central to the course is: (1) an analysis of how demographic factors affect economic and family systems; (2) how these systems, and changes in them, affect demographic variables; and (3) how this interrelationship affects the relationships of family and economic systems over time. The first quarter will be primarily devoted to lectures and readings. The second quarter carries students into individual research projects involving a term paper and classroom reports of results. Ms. Oppenheimer

225A-225B. Demographic Perspectives on the Relationship of Family and Economic Systems. Prerequisite: course 210A-210B or consent of instructor. Examination of the interrelationship of family and economic systems in societies at different levels of economic development, focusing particularly on the U.S. experience. Central to the course is: (1) an analysis of how demographic factors affect economic and family systems; (2) how these systems, and changes in them, affect demographic variables; and (3) how this interrelationship affects the relationships of family and economic systems over time. The first quarter will be primarily devoted to lectures and readings. The second quarter carries students into individual research projects involving a term paper and classroom reports of results. Mr. TenHouten

226. Leadership and Comparative Social Structure. A comparative analysis of leadership in different social structures with particular attention to the development, maintenance, and disintegration of leadership corps and cadres. Mr. Surace

227. The Sociology of Knowledge. Prerequisite: Graduate Standing and consent of instructor. A survey of theories and research concerning social determinants of systems of knowledge and the role of intellec- tual and artistic elites in Western societies. Mr. Horton

230. Theories of Deviance. An examination of various sociological approaches to the study of deviant behavior with emphasis on anomie theory as the major orientation today. Special attention given to the problems of defining deviance and the articulation of sociological and psychological levels of explanation. Mr. Emerson, Mr. Rabow, Mr. Surace

233. Foundations of Political Sociology. Lecture: theoretical and methodological tools for the study of political sociology. Attention will be given to recent and classical research and literature in the field of political sociology. Mr. Roy, Mr. Lo, Mr. Prager

234. Sociology of Community Organization. Prerequisites: Graduate Standing and consent of instructor. A survey of theoretical and methodological tools for the study of political sociology. Attention will be given to recent and classical research and literature in the field of political sociology. Mr. Roy, Mr. Lo, Mr. Prager

235. Social Structure and Social Movements. Prerequisite: Graduate Standing or consent of instructor. An analysis of the sources, extent, and types of social change in the Middle East with an emphasis on the origin and consequences of industrialization and urbanization. Mr. Sabagh

237. Social Stratification in the Middle East. Modes of social differentiation in traditional Middle Eastern societies, and the influence of force and the growth of the modern Middle East. Mr. Sabagh

238A-238B. Field Work in Minority Communities. Prerequisites: Graduate Standing and consent of instructor. This two-quarter sequence is designed to supply graduate students with their theoretical and methodological equipment necessary for studying disadvantaged minority communities. Special emphasis is given to the Black ghetto and the barrio. Nonstandard language forms (mainly Black English, and Chicano) are especially focused upon instrumentally. In the field students will gather empirical data that sheds light on the ways in which data of greater validity and practical utility might be collected among these groups. This course is offered on an In-Progress basis, which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for all quarters of work. Mr. Levine

240. Mathematics of Population. Prerequisites: introduction to matrices, calculus, and probability theory. Discrete and continuous deterministic and probabilistic models of the growth and composition of a one-sexed population classified by age, plus selected topics on more complicated population models. Mr. McFarland

247. Neurosociology. Prerequisites: Graduate Standing and consent of instructor. Analysis of mental processes in structured and organized by positions and practices in the social world, and by changing and developing in society. Mr. TenHouten

249A. Sociocultural Aspects of Health and Illness: Social Epidemiology. (Same as Public Health 238E.) Prerequisites: Public Health 182, three courses in psychology, sociology, or anthropology, or equivalent, and consent of instructor. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on life styles and other sociocultural factors associated with disease and mortality. Mr. Goldstein

249B. Sociocultural Aspects of Health and Illness: Health Professions. (Same as Public Health 238F.) Prerequisites: Public Health 182, three courses in psychology, sociology, or anthropology, or equivalent, and consent of instructor. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on life styles and other sociocultural factors associated with disease and mortality. Mr. Goldstein

249C. Sociocultural Aspects of Health and Illness: Health Behavior. (Same as Public Health 238G.) Prerequisites: Public Health 182, three courses in psychology, sociology, or anthropology, or equivalent, and consent of instructor. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on life styles and other sociocultural factors associated with disease and mortality. Mr. Goldstein

252. Criminology. Prerequisites: Graduate Standing and consent of instructor. Examination of the problem of social order. Special emphasis on methodological equipment necessary for studying disadvantaged minority communities. Special emphasis given to the Black ghetto and the barrio. Nonstandard language forms (mainly Black English, and Chicano) are especially focused upon instrumentally. In the field students will gather empirical data that sheds light on the ways in which data of greater validity and practical utility might be collected among these groups. This course is offered on an In-Progress basis, which requires students to complete the full two-quarter sequence, at the end of which time a grade is given for all quarters of work. Mr. Levine

254. Sociology of Community Organization. Prerequisites: Graduate Standing and consent of instructor. An analysis of the sources, extent, and types of social change in the Middle East with an emphasis on the origin and consequences of industrialization and urbanization. Mr. Sabagh

258. Sociology of Community Organization. Prerequisites: Graduate Standing and consent of instructor. A survey of the sources, extent, and types of social change in the Middle East with an emphasis on the origin and consequences of industrialization and urbanization. Mr. Sabagh
253. Quantitative Methods in Sociology. Mr. Bailey, Mr. Bonacich, Mr. Freeman
M254A. Sociology of Law. (Same as Law M354.) Prerequisite: consent of instructor. Social control functions of law and legal institutions with particular attention to the contrast between law-ways of stateless and tribal societies and contemporary American legal processes and institutions, primarily those of criminal law. Mr. Emerson, Mr. Prager
254B. Sociology of Law. Social control functions of law and legal institutions with particular attention to the contrast between law-ways of stateless and tribal societies and contemporary American legal processes and institutions, primarily those of criminal law. Mr. Emerson, Mr. Prager
255A-255B. Systematic Sociological Theory. Course 255A is prerequisite to 255B.
Mr. Alexander
256. Demography. Mr. Bailey, Mr. Sabagh
257. Sociology of the Arts. Mr. Horton
258. Sociology of Religion. The Staff
259. Social Structure and Economic Change: Historical and Comparative Perspectives. Ms. Hirata, Mr. Surace, Mr. Zeltin
260. Industry and Society. Mr. Light, Mr. Surace
261. Ethnic Minorities. Mr. Levine, Mr. Seeman
M262. Selected Problems in Urban Sociology. (Same as Afro-American Studies M202C.) Prerequisite: consent of instructor.
Mr. Harrison, Mr. Oliver
263. Social Stratification. Mr. Treiman
264. Professions in the American Society. Ms. Nilson, Ms. Oppenheimer
265. Problems in Organization Theory. Mr. Grusky, Ms. Zucker
266. Selected Problems in the Analysis of Conversation. Prerequisite: course 144A or consent of instructor.
Mr. Schegloff
267. Selected Problems in Communication. Mr. Poliner, Mr. Schegloff
268. Historical and Interpretive Sociology. Mr. Surace
269. Collective Behavior. Mr. Turner
270. Selected Problems in Socialization. Mr. Turner
271. Ethnomethodology. Mr. Garfinkel
272. Topics in Political Sociology. Mr. Roy, Mr. Surace, Mr. Zeltin
273. Attitudes and Social Structure. Mr. Seeman
274. Selected Problems in the Sociology of Africa. Prerequisites: Graduate Standing and consent of instructor. Selection of problems in the sociology of Africa from among the following fields: urbanization, racial and ethnic relations, national integration, and political change. The Staff
275. Seminar in Comparative Social Structure: Developed Societies. The comparison of social structures among developed societies, including the comparative analysis of the main institutional features, social class arrangements, social mobility characteristics, and the like. Comparisons will involve the U.S. and developed countries in Western Europe, Asia and Oceania.
Mr. Treiman
276. Selected Topics in the Sociology of East Asia. Prerequisites: Graduate Standing and consent of instructor. The seminar will analyze selected problems in China, or in China and Japan comparatively. Possible topics include: 1. China's Great Proletarian Cultural Revolution and internal contradictions in Chinese society: male-female relations, the city and the countryside, minority nationalities, class struggle under socialism, etc.; 3. China and Japan: two models of development. Ms. Hirata
277. Sociology of Science. Mr. Teshoulen
278. Sociology of the Theatre. Seminar on different movements in the theatre, or expressions of the Theatre (e.g., Theatre of the Absurd, Contemporary Experimental Theatre), with emphasis on the theatrical performance as it relates to the surrounding society, responds to, or reacts against, theatrical conventions, socializes the players to the performance, and creates its own social world. Mr. Horton
280. Seminar in Evaluation Research. Prerequisite: Graduate Standing. The seminar will analyze selected technical and political aspects of implementing evaluation research studies. The role of evaluation research in social policy development is considered as well as procedures for undertaking process and impact evaluations. Graded S/U and letter grade.
Mr. Freeman
281. Selected Problems in Mathematical Sociology. Prerequisite: Mathematics 48B or consent of instructor. An exploration of some mathematical models of sociological processes. Possible topics include models of small groups, social mobility, kinship relations, organizations, social interaction.
Mr. Bonachich, Mr. McFarland
282. Organizations and the Professions.
284. Topics in Mental Health and Illness. Prerequisites: course 157 or equivalent and Graduate Standing.
Mr. Emerson, Mr. Grusky, Mr. Poliner M287A-M287B. Population Policy and Fertility. (Same as Public Health M274A-274B.) Prerequisites: Public Health 102, 112, 173 or equivalent, Graduate Standing, and consent of instructor. Public Health 274A is prerequisite for M274B. Sociology M287A is prerequisite for M287B. Analysis of research concerning major issues in population policy with special emphasis on human fertility. Ms. Blake
M287C. Seminar in Population Policy and Fertility. (Same as Public Health M274C.) Prerequisites: Public Health 274A-M274B or equivalent, Graduate Standing, and consent of instructor. Review of current literature in population policy and fertility in conjunction with student research reports. May not be repeat-
ed for credit.
Ms. Blake
291. Moral Solidarity in Communities. Comparative analysis of social solidarity and the collapse of social solidarity in voluntary and traditional communities. Contrasts more and less solidary types with special reference to utopian communities and developmental processes. Mr. Light
485A-485B. Supervised Teaching of Sociology. (1/2 course each) Prerequisite: teaching assistant status in the Department of Sociology, or equivalent. A special course for teaching assistants. It is designed to deal with the problems and techniques of teaching introductory sociology. To be graded S/U.

José M. Cruz-Salvadores, M.A., Lecturer in Spanish.
E. Mayone Dias, Ph.D., Lecturer in Spanish and Portuguese.
G. L. Voyt, J.D., Lecturer in Spanish.
Master of Arts in Spanish
Admission Requirements. The UCLA B.A. in Spanish or its equivalent is required. Students admitted from elsewhere whose preparation is considered deficient are required to make up their deficiencies by taking a specified number of relevant upper division courses in the Department. These courses may be taken concurrently with graduate courses, but they do not count toward the M.A. Three letters of recommendation are also required. These should be preferably from professors with whom the applicant has studied in the major field, who can comment on his/her potential as a graduate student. In addition, the Graduate Record
Examination Aptitude Tests are required. A combined score of 1000 is preferred, although more weight is given to the Verbal than to the Quantitative aspects. The Graduate Advisers meet as a committee and make a final decision in each case.

Advising. All students working toward the M.A. are advised by graduate advisers who represent the three fields of specialization open to M.A. candidates viz: Spanish Literature, Spanish-American Literature, Linguistics. Each new graduate student must make an appointment through the Department Graduate Counselor with the adviser who represents his/her major field of interest. Appointments are scheduled during the week preceding the start of classes in the Fall, Winter and Spring Quarters. During the interview, the student and his/her adviser discuss general requirements and decide on a program of courses for the quarter. After this initial interview, the student is required to see his/her adviser at the beginning of each quarter for a review of his/her progress toward the degree.

The adviser also approves the student's study list at this time, if the student is making satisfactory progress. At present, the Graduate Advisers are Professor C.L. Hulet (Luso-Brazilian language and literatures), C.B. Johnson (Spanish literature), G. Luzuriaga (Spanish American Literature), C.P. Otero (Linguistics), José Miguel Oviedo (Spanish-American literature), S.L. Robe (Linguistics), P.C. Smith (Spanish literature). Inquiries should be addressed to: Ms. Joanne March, Graduate Counselor, Department of Spanish and Portuguese, 5325 Rolfe Hall, Tel: 825-7091.

Foreign Language Requirement. One language besides Spanish is required. Any language which has a written literature is acceptable. For languages in which an Educational Testing Service (ETS) test exists, passing the appropriate test fulfills the requirement. In languages for which there is no such test, passing an examination administered by the relevant language department fulfills the requirement. It may also be fulfilled by evidence of completion of five quarters of college level courses in the language with grade B or above. If the student offers Portuguese, one year of study (Portuguese 3) at UCLA is sufficient. The language requirement must be met not later than the same quarter in which the final course requirement is completed.

Course Requirements. Attention is directed to the statement concerning deficiencies in the section on Admission Requirements. In addition to any deficiencies, noted, course requirements for the M.A. (Comprehensive Examination Plan) are as follows: 10 courses with a minimum of seven in the 200 series, of which one must be a seminar (250-299) which may be taken only after the relevant graduate pre-seminar (200-249). For example, course 224 "Poetry of the Golden Age" is prerequisite to course 264A "Studies in the Golden Age: Poetry." Three upper division courses in the Department may be included in the total of 10 courses. With the approval of the Graduate Adviser, a maximum of two courses may be taken at the graduate level in closely related fields outside the Department. Course 596 may be included once. Courses 597 and 598 do not count toward the degree.

Comprehensive Examination Plan. The Department favors this plan and will approve the Thesis Plan only in exceptional circumstances. See Thesis Plan below. Ten courses, distributed as stated above, are required for this plan. The examination is administered by a standing committee of six members of the Department, appointed by the Chairperson. Each of the three fields of study is represented by two professors. The student elects one of the three fields as his/her major, and the other two become the minors. A reading list for candidates in each specialty, with required readings in the minor fields as well, is available and constitutes the basis of the examination. Given in the Fall, Winter and Spring Quarters, the examination is entirely written and is of six hours duration. Three hours are devoted to the major (e.g., Spanish literature) and 1½ hours to each of the minors (e.g., Spanish-American literature, Linguistics). It is graded by the M.A. examination committee, whose decision is final. The examination is graded "High Pass", "Mid Pass", "Low Pass", "Not Passed". A grade of "Low Pass" results in a terminal M.A. If a student does not pass the examination or any part thereof, he/she may retake the failed portions once, when the examination is next regularly offered. Passing the M.A. examination after repeating one or more failed portions results in a terminal M.A. The M.A. examination must be taken no later than two quarters after course requirements are completed.

Thesis Plan. The Department strongly favors the Comprehensive Examination Plan and will approve M.A. theses only for exceptionally well-qualified students in exceptional circumstances. It is the responsibility of the student to choose an appropriate topic and find a professor willing to direct the thesis. He/she then petitions the Department for authorization to proceed. His/her petition is examined first by the Committee of Graduate Advisers, who make a recommendation. The entire Department then either approves or denies the petition by majority vote. If the petition is approved, a thesis committee is appointed, consisting of a chairperson in the field of the thesis and the two other members of the Department who represent the other two fields. A student may petition for authorization to write an M.A. thesis only after completion of seven courses which count toward the degree. A total of nine courses with a minimum of six courses in the 200 series, of which one must be a seminar and three may be in the 100 series, is required for this degree.

Course 598 ("Research for M.A. Thesis") may not be included among the nine. After completion of the thesis, the candidate must pass a 3-hour oral examination testing his/her knowledge of the field of his/her thesis and his/her general competence in the areas of the Comprehensive Examination based on the core readings of the M.A. reading list.

Time to Degree. A full-time student, with no deficiencies at entrance, taking three courses per quarter, should complete the coursework and the Comprehensive Examination four quarters from admission. Teaching assistants and students with deficiencies at entrance will require longer. Non-TA's are expected to complete seven courses each 3-quarter period; TA's, five. See "Disqualification" below.

Teaching Experience. Teaching experience is not required, but is considered desirable. Consult the Graduate Counselor for information regarding the availability of teaching assistantships in the Department.

Disqualification and Appeal of Disqualification. The Committee of Graduate Advisers in the Department reviews the progress of each student at the end of each academic year. If the advisers find that a student is not making satisfactory progress, they propose a probationary period during which certain conditions must be met. The Chairperson of the Department then advises the student in writing of the decision of the graduate advisers in his/her case. If the student is unwilling to comply with the expectations of the Chairperson and the Committee of Graduate Advisers, he/she is subject to dismissal.

Not making satisfactory progress is defined as follows: (1) failure to maintain 3.0 grade point average; (2) failure to remove lapsed incomplete grades during period specified; (3) failure to complete at least five courses in each full academic year for TA's; for non TA's, seven courses per year. Reduced programs may be approved in extraordinary cases upon petition to the Chairperson who refers it to the Committee of Graduate Advisers; (4) failure to complete the language requirement during or before the last quarter of coursework; (5) failing M.A. examination in two attempts — no degree awarded; (6) passing M.A. examination "Low Pass" — terminal M.A. awarded; (7) passing M.A. examination on second attempt — terminal M.A. awarded.

An appeal may be presented in writing to the Chairperson of the Department, who in turn, presents the student's case first to the Commit-
Master of Arts in Luso-Brazilian Language and Literatures

Admission Requirements. The UCLA B.A. in Portuguese or its equivalent is required. Students admitted from elsewhere whose preparation is considered deficient are required to make up their deficiencies by taking a specified number of relevant undergraduate courses in the Department. These courses may be taken concurrently with graduate courses, but they do not count toward the M.A. degree. Three letters of recommendation are also required. These should be preferably from professors with whom the applicant has studied in the major field, who can comment on his/her potential as a graduate student. In addition, the Graduate Record Examination Aptitude Tests are required. A combined score of 1000 is preferred, although more weight is given to the Verbal than to the Quantitative aspects. The graduate advisers meet as a committee and make a final decision in each case.

Advising. All students working toward the M.A. are advised by the Graduate Adviser for Luso-Brazilian, Prof. C.L. Hulet. Each new graduate student must make an appointment with him through the Department Graduate Counselor. Appointments are scheduled during the week preceding the start of classes in the Fall, Winter and Spring Quarters. During the interview, the student and Prof. Hulet discuss general requirements and decide on a program of courses for the quarter. After this initial interview, the student is required to consult him at the beginning of each quarter for a review of his/her progress toward the degree. Prof. Hulet also approves the student's study plan. If the student has deficiencies at entrance, taking three courses per quarter, should complete the coursework and the Comprehensive Examination four quarters from admission. Teaching assistants and students with deficiencies at entrance will require longer. Non-TAs are expected to complete seven courses each 3-quarter period; TA's five. See "Disqualification" below.
The Ph.D. in Hispanic Languages and Literatures

Admission Requirements. The UCLA M.A. in Spanish or Luso-Brazilian Language and Literatures, or the equivalent is required. Three letters of recommendation are also required from professors familiar with the applicant's work as a graduate student, to be addressed to his/her capacity for research-oriented doctoral studies and possible entry into the profession. The Graduate Record Examination Aptitude Test is also required. A combined score of 1000 is preferred, and the Verbal score is considered more important than the Quantitative. The Graduate Advisers meet as a committee and reach a collective decision in each case.

Advising. All students working toward the Ph.D. who have not yet been authorized to form their guidance committee are advised by graduate advisers who represent the broad fields of interest within the Department: Spanish literature (Profs. C.B. Johnson, P.C. Smith), Spanish-American literature (Profs. G. Luzuriaga, J.M. Oviedo), Luso-Brazilian language and literatures (Prof. C.L. Hulet), linguistics and philology (Profs. S.L. Robe, C.P. Otero). Each new graduate student must make an appointment through the Department Graduate Counselor with the adviser who represents his/her major field of interest. Appointments are scheduled during the week preceding the start of classes in the Fall, Winter and Spring Quarters. During the interview, the student and his/her adviser discuss general requirements and plan a program of courses for the quarter. After this initial interview, the student is required to consult his/her adviser at the beginning of each quarter for a review of his/her progress toward the degree. The adviser also approves the student's Study List at this time, if the student is making satisfactory progress.

Students who have formed their guidance committee are advised principally by the chairperson of that committee, but their Study List continues to be signed each quarter by the department graduate adviser. Address all inquiries to Ms. Joanne March, Graduate Counselor, Department of Spanish and Portuguese, 5325 Rolfe Hall, Tel: 825-7091.

Final Admission to the Doctoral Program. Students who hold the M.A. in Spanish or Luso-Brazilian Language and Literatures from UCLA fall into one of three categories and are so notified upon receipt of the degree. The categories are: (a) Low Pass (Terminal M.A.)—Students who pass with terminal M.A.'s are not eligible for admission into the Ph.D. program. (b) Mid-Pass—Students in this category may continue toward the Ph.D. on the following probationary basis:

1. Take a minimum of three additional graduate courses with three different members of the Department, with acceptable grades.

(2) Find a tenured professor who is willing to direct the dissertation.
(3) File Form I which is considered by the Graduate Advisers Committee in consultation with the professors with whom the student has studied. The entire Department then votes to accept or reject the student. If accepted, the student will be advised to form his/her guidance committee.

(c) High Pass—Students who pass the M.A. in this category ("with distinction") are automatically eligible to proceed to step (2) under (b) above.

Students who hold the M.A. from other institutions will not be assigned to a guidance committee until their second quarter of studies in the Department, after complying with the provisions set forth in the "Mid Pass" category. In some cases, they may be required to pass the UCLA M.A. examination, normally in the second or third quarter of residence.

The guidance committee directs the student's program of study from this point on. It is composed of a chairperson, who represents the student's major field (e.g., 20th Century Spanish literature) and under whom the student proposes to write his/her dissertation, and four other members of the Department, who represent the four minor fields. It is the student's responsibility to approach the professor he/she wants on his/her committee and secure their consent. As soon as possible after Form I has been approved, the student meets with his/her guidance committee for the purpose of working out his/her program of courses and setting a tentative date for the Qualifying Examinations. The student prepares a "Study Report" (forms available from Department Graduate Counselor) listing the graduate courses he/she has taken at UCLA and elsewhere, to be analyzed and discussed at the meeting. This meeting is the most important administrative act in the student's progress toward the Ph.D. It should be emphasized that the course requirements listed below are the minimum acceptable to the Department. The guidance committee is the final authority in each individual case. A student who has not met with his/her committee and placed himself/herself under its direction is not officially in the Ph.D. program.

Major Fields. The Department recognizes the following fields of specialization, from which the student selects one major and four minors:

a) Spanish linguistics and philology; b) Medieval and Renaissance Spanish literature; c) Golden Age Spanish literature; d) 18th and 19th Century Spanish literature; e) 20th Century Spanish literature; f) Colonial and 19th Century Spanish American literature; g) 20th Century Spanish American literature; h) Portuguese linguistics and philology; i) Portuguese literature; j) Brazilian literature; k) Spanish and Luso-Brazilian Folklore.

Foreign Language Requirements. A reading knowledge of two foreign languages in addition to Spanish and Portuguese is required. The languages are chosen by the student in consultation with his/her guidance committee with a view to their usefulness in his/her proposed research (e.g., Latin and Arabic or Hebrew for Medieval studies). For languages in which an Educational Testing Service (ETS) test exists, passing the appropriate test fulfills the requirement. In languages where there is no such test, passing an examination administered by the relevant language department fulfills the requirement. It may also be met by evidence of completion of at least five quarters of college level courses in the language with grade B or better. Finally, the Department will accept evidence of fulfillment of a language requirement in connection with an M.A. obtained elsewhere. The language requirement must be satisfied no later than the quarter before the quarter in which the Qualifying Examinations are taken.

Course Requirements. After the B.A., 18 graduate courses in the Department distributed as follows: (a) General requirements: Courses M200 (Bibliography), M201 (Literary Criticism), M203A, (Development of the Spanish and Portuguese Languages); (b) courses in the major: The number to be determined by the guidance committee; (c) courses in the four minor fields: The minor language requirement for a minor is one graduate preseminar (200-249) followed by the appropriate seminar (250-299). The requirements in any minor field may be increased at the discretion of the guidance committee in consideration of the student's preparation; (d) one additional graduate course in a field not covered in (a), (b), and (c); (e) three upper division courses in Portuguese and/or Brazilian literatures are also required.

Doctoral Committee. At least two months before the date of the Qualifying Examinations, the student files the form "Nomination of Doctoral Committee" with the Graduate Division through the Department Graduate Counselor. This form lists the names of the five members of the guidance committee and two additional members from outside the Department who will also pass on the student's written and oral examinations. It is the student's responsibility to approach the two "outside" members and secure their consent. The 7-member body, thus constituted, is the student's official doctoral committee and is so recorded by the Graduate Division.

Written and Qualifying Examination. The Qualifying Examinations are given during the Fall, Winter and Spring Quarters and consist of: (a) a 3-hour written examination in the major field; (b) four 1-hour written examinations, one in each minor field; (c) a 2-hour oral examination on the five fields and at which the student's prospectus for his/her dissertation is also discussed and approved. Five weeks is normally the maximum time allowed for completion of the series of examinations. The candidate is
notified of success or failure by the chairperson of his/her committee immediately following the oral. Failed portions of the examination may be retaken once after such remedial preparation as the committee may specify. Upon passage of the entire series of examinations, the student is eligible to apply for formal advancement to candidacy for the Ph.D. and may proceed to write his/her dissertation.

Candidate in Philosophy Degree. The C.Phil. degree is available upon formal advancement to candidacy.

The Dissertation. The dissertation may be written on any subject within the general area of Hispanic Languages and Literatures. The subject and general approach are proposed by the student, discussed at the Oral Qualifying Examination, and approved by the doctoral committee. The chairperson of the committee is the director and first reader of the dissertation. It is also read by one other committee member who is also a member of the Department and by one "outside" committee member. It may also be read by other members, or by the entire committee, at the committee's discretion. Note: If more than five years have elapsed between advancement to candidacy and presentation of the dissertation, the Department may require the student to revalidate his/her Qualifying Examination.

Final Oral Examination. The Final Oral Examination is optional at the committee's discretion.

Time to Degree. For full-time students taking three courses per quarter, the following figures are optimal: (a) From graduate admission to award of M.A.: four quarters; (b) from award of M.A. to authorization to form guidance committee: one quarter; (c) from formation of guidance committee to Qualifying Examination: three to five quarters; (d) from passage of Qualifying Examination (advancement to candidacy) to presentation of the dissertation: 3 to 15 quarters; (e) from graduate admission to award of the degree (or normative time-to-degree): five years (15 quarters).

Teaching Experience. Teaching experience is not required for the degree, but is considered highly desirable. The vast majority of doctoral students can expect to serve as teaching assistants. Information may be obtained from the Graduate Counselor, Ms. March.

Disqualification and Appeal of Disqualification. The Committee of Graduate Advisers in the Department reviews the progress of each student at the end of each academic year. If the Advisers find that a student is not making satisfactory progress, they propose a probationary period during which certain conditions must be met. The Chairperson of the Department then advises the student in writing of the decision of the Graduate Advisers in his/her case. If the student is unwilling to comply with expectations of the Chairperson and the Committee of Graduate Advisers, he/she is subject to dismissal.

Not making satisfactory progress is defined as follows: (1) failure to maintain 3.0 grade point average; (2) failure to remove lapsed incomplete grades during period specified; (3) failure to complete at least five courses in each full academic year for TA's; for non-TA's, seven courses per year. Reduced programs may be approved in extraordinary cases upon petition to the Chairperson who refers it to the Committee of Graduate Advisers; (4) failure to complete the language requirement during or before the last quarter of coursework.

An appeal may be presented in writing to the Chairperson of the Department, who in turn, presents the student's case first to the Committee of Graduate Advisers and, if needed, then to the faculty of the Department whose decision is final.

Spanish

Graduate Courses

M200. Bibliography. (Same as Portuguese M200.) Meets three hours weekly. Readings and lectures on the methodology and rationale of bibliographical sources for work by doctoral candidates in their fields of specialization.

M201. Literary Criticism. (Same as Portuguese M201.) Meets three hours weekly. Definition and discussion of methods of literary criticism.

M203A-M203B. The Development of the Portuguese and Spanish Languages. (Same as Portuguese M203A-M203B.) Prerequisites: course M118, 100, or consent of instructor. Intensive study of the historical development of the Portuguese and Spanish languages from their origin in spoken Latin.

M204A-204B. Transformational Grammar. Meets three hours weekly. Prerequisite: course 204A is prerequisite to 204B, or consent of instructor. A transformational approach to the Spanish language, with some consideration of the bearing of syntax, semantics, and phonology on style, metaphor and meter.

M206. Linguistics. Meets three hours weekly. Prerequisite: course 115 or equivalent. A study of theophorical synchronic linguistics as applied to Spanish.

M209. Dialectology. Meets three hours weekly. Prerequisite: course 115 or equivalent. A study of theophorical synchronic linguistics as applied to Spanish.

M211. Medieval and Renaissance Poetry. Meets three hours weekly. Readings and lectures on Spanish poetry from the beginnings to 1550.

M222. Medieval and Renaissance Poetry. Meets three hours weekly. Readings and lectures on Spanish poetry from the beginnings to 1550.

M223. Medieval and Renaissance Prose. Meets three hours weekly. Readings and lectures on Spanish prose from the beginnings to 1550.

M225. The Drama of the Golden Age. Meets three hours weekly. Readings and lectures on the "comedia." Mr. Rodriguez-Cepeda

M226. Prose of the Golden Age. Meets three hours weekly. Readings and lectures on the "historia y romances." Mr. Johnson

M228. Baroque Prose. Meets three hours weekly. Readings and lectures on the "barroco." Mr. Johnson

M229. Baroque Poetry. Meets three hours weekly. Readings and lectures on the "barroco." Mr. Johnson

M230. Neoclassicism and Romanticism. Meets three hours weekly. Readings and lectures on the "neoclassicismo" and "romantismo." Mr. Johnson

M232. The Generation of 1898. Meets three hours weekly. Readings and lectures on the "generacion de 1898." Mr. Johnson

M233. Contemporary Spanish Drama. Meets three hours weekly. Readings and lectures on the "drama moderno." Mr. Johnson

M234. Contemporary Spanish Poetry. Meets three hours weekly. Readings and lectures on the "poesia moderna." Mr. Johnson

M235. Contemporary Spanish Prose. Meets three hours weekly. Readings and lectures on the "prosa moderna." Mr. Johnson

M236. The Modernist Movement. Meets three hours weekly. An intensive study of the important writers of this movement during the period 1880-1916.

M237. The Modernist Movement. Meets three hours weekly. An intensive study of the important writers of this movement during the period 1880-1916.

M238. Contemporary Spanish American Poetry. Meets three hours weekly. An intensive study of the authors of the "poesia americana." Mr. Luzuriaga

M239. Contemporary Spanish American Prose. Meets three hours weekly. An intensive study of the "prosa americana." Mr. Luzuriaga

M240. Contemporary Spanish American Prose. Meets three hours weekly. An intensive study of the "prosa americana." Mr. Luzuriaga

M241. Contemporary Spanish American Essay. Meets three hours weekly. An intensive study of the "ensayo americano." Mr. Luzuriaga

M242. Contemporary Spanish American Essay. Meets three hours weekly. An intensive study of the "ensayo americano." Mr. Luzuriaga

M243. Contemporary Spanish American Essay. Meets three hours weekly. An intensive study of the "ensayo americano." Mr. Luzuriaga

M244. Contemporary Spanish American Essay. Meets three hours weekly. An intensive study of the "ensayo americano." Mr. Luzuriaga

M245. Contemporary Spanish American Essay. Meets three hours weekly. An intensive study of the "ensayo americano." Mr. Luzuriaga

M246. Contemporary Spanish American Essay. Meets three hours weekly. An intensive study of the "ensayo americano." Mr. Luzuriaga

M247. Contemporary Spanish American Essay. Meets three hours weekly. An intensive study of the "ensayo americano." Mr. Luzuriaga

M248. Contemporary Spanish American Essay. Meets three hours weekly. An intensive study of the "ensayo americano." Mr. Luzuriaga

M249. Contemporary Spanish American Essay. Meets three hours weekly. An intensive study of the "ensayo americano." Mr. Luzuriaga

M250. Contemporary Spanish American Essay. Meets three hours weekly. An intensive study of the "ensayo americano." Mr. Luzuriaga

M251. Studies in Galician-Portuguese and Old Spanish. (Formerly numbered 253.) (Same as Portuguese M251.) Prerequisites: course M203A-M203B. Problems related to the historical development of Galician-Portuguese and Old Spanish. Meets two hours weekly.

262A-262B. Studies in Medieval and Renaissance Literature.

262A. Lyric Poetry. Meets two hours weekly. Prerequisite: course 222. Mr. Gimeno
262B. Epic Poetry. Meets two hours weekly. Prerequisite: course 222. Mr. Gimeno
262C. Prose Writers. Meets two hours weekly. Prerequisite: course 223. Mr. Gimeno
264A. Poetry. Meets two hours weekly. Prerequisite: course 224. Mr. Johnson, Mr. Rodriguez-Cepeda
264B. The "Comedia." Meets two hours weekly. Prerequisite: course 225. Mr. Johnson, Mr. Rodriguez-Cepeda
264C. Studies in Prose of the Golden Age. Meets two hours weekly. Prerequisite: course 226. Mr. Johnson, Mr. Rodriguez-Cepeda
264D. Don Quijote. Meets two hours weekly. Prerequisite: course 227.

Individual Study and Research

596. Directed Individual Study or Research. (1 to 2 courses) Prerequisites: approval of graduate adviser and of Chairman of the department. Study or research in areas or on subjects not offered as regular courses. Work evaluated on letter grade basis. No more than one full course may count toward the M.A. course requirement. Limited to a maximum of two full courses in any graduate program.

The Staff
597. Preparation for Graduate Examinations. (1 to 2 courses) Prerequisites: official acceptance of candidate by the department, and approval of graduate adviser. Individual preparation for the comprehensive examination for the M.A. degree or the qualifying examinations for the Ph.D. degree. Graded S/U. May be taken only once for each degree examination and only in the quarter that comprehensive or qualifying examinations are to be taken.

The Staff

The Staff
599. Research for Ph.D. Dissertation. (1 to 2 courses) Prerequisite: restricted to those who have passed the qualifying examinations for the doctor’s degree. Research for and preparation of the Ph.D. dissertation. Graded S/U.

The Staff

Portuguese

Upper Division Courses

100. Phonology and Pronunciation.
101A. Advanced Reading and Conversation.
101B. Advanced Composition and Style.
103. Syntax.
M118. History of the Portuguese and Spanish Languages (Same as Spanish M118.).
120A. Survey of Portuguese Literature.
120B. Survey of Portuguese Literature.
121A. Survey of Brazilian Literature.
121B. Survey of Brazilian Literature.
124. Medieval Portuguese Literature.
126. Renaissance and Baroque Portuguese Literature.
127. Colonial Brazilian Literature.
128. 18th and 19th Century Portuguese Literature.
129. Romanticism in Brazil.
135. Naturalism, Realism and Parnassianism in Brazil.
136. Contemporary Portuguese Literature.
137. Contemporary Brazilian Literature.
140A-B. Luso-Brazilian Literature in Translation.
140B. Brazilian Literature.

*Graduate Courses

M200. Bibliography. (Same as Spanish M200.) Meets three hours weekly. Identification and analysis of bibliographical sources for work by doctoral candidates in their fields of specialization.

Mr. Benitez, Mr. Rodriguez-Cepeda
M201. Literary Criticism. (Same as Spanish M201.) Meets three hours weekly. Definition and discussion of methods of literary criticism.

Mr. Benitez, Mr. Otero
M203A-M203B. The Development of the Portuguese and Spanish Languages. (Same as Spanish M203A-M203B.) Prerequisites: courses M118, 100, or consent of instructor. Intensive study of the historical development of the Portuguese and Spanish languages from their origin in spoken Latin.

Mr. Otero, Mr. Smith

204A-204B. Transformational Grammar. Prerequisite: consent of instructor; course 204A or consent of instructor is prerequisite. A study of the theoretical and synchronic linguistics of Portuguese.

Mr. Quicoli
C242A-C242D. Special Topics in Portuguese Literature.

C242A. Medieval Portuguese Literature. Meets two hours weekly. May be offered concurrently with Portuguese C124. Prerequisite: consent of instructor.

Mr. Dias
C242B. Renaissance and Baroque Century Literature. Meets two hours weekly. May be offered concurrently with Portuguese C126. Prerequisite: consent of instructor.

Mr. Dias
C242C. 18th and 19th Century Literature. Meets two hours weekly. May be offered concurrently with Portuguese C128. Prerequisite: consent of instructor.

Mr. Dias
C242D. Contemporary Portuguese Literature. Meets two hours weekly. May be offered concurrently with Portuguese C136. Prerequisite: consent of instructor.

C243A-C243D. Special Topics in Brazilian Literature.

C243A. Colonial Literature. Meets two hours weekly. May be offered concurrently with Portuguese C127. Prerequisite: consent of instructor.

Mr. Hulet
C243B. Romanticism in Brazil. Meets two hours weekly. May be offered concurrently with Portuguese C129. Prerequisite: consent of instructor. Mr. Hulet
C243C. Naturalism, Realism and Parnassianism. Meets two hours weekly. May be offered concurrently with Portuguese C135. Prerequisite: consent of instructor. Mr. Hulet
C243D. Contemporary Brazilian Literature. Meets two hours weekly. May be offered concurrently with Portuguese C137. Prerequisite: consent of instructor.

M249. Hispanic Folk Literature. (Same as Folklore M249 and Spanish M249.) Meets three hours weekly. An intensive study of folk literature as represented in a) ballad and poetry; b) narrative and drama; c) speech.

Mrs. Arora, Mr. Robe
M251. Studies in Galician-Portuguese and Old Spanish. (Same as Spanish M251.) Prerequisite: course M234A-M234B. Problems related to the historical development of Galician-Portuguese and Old Spanish. Meets two hours weekly.

Mr. Otero, Mr. Smith

*For concurrently scheduled courses ("C" prefix) suitably separate activities and/or standards for performance and evaluation will be applied for graduates and undergraduates.
Theater Arts

(The Department Office, 2310 Macgowan Hall)

William B. Adams, M.A., Professor of Theater Arts. Shirley M. Clarke, A.A., Professor of Theater Arts. Robert F. Corrian, M.A., Professor of Theater Arts. Donald B. Crabs, M.A., Professor of Theater Arts. Arthur B. Friedman, Ph.D., Professor of Theater Arts. Henry Goodman, Ph.D., Professor of Theater Arts. Richard C. Hawkins, M.A., Professor of Theater Arts. Melvin B. Helfstien, Ph.D., Professor of Theater Arts. Frank D. LaTourette, M.Litt., Professor of Theater Arts. Carl R. Mueller, Ph.D., Professor of Theater Arts. Louis C. Soumen, B.A., Professor of Theater Arts. Abe V. Wollock, Ph.D., Professor of Theater Arts. John W. Young, M.A., Professor of Theater Arts. Robert E. Lee, D. Litt., Adjunct Professor of Theater Arts. Walden P. Boyle, Ph.D., Emeritus Professor of Theater Arts. Michael Gordon, M.F.A., Emeritus Professor of Theater Arts. Edward Hearn, M.A., Emeritus Professor of Theater Arts. John H. Jones, M.A., Emeritus Professor of Theater Arts. William W. Meintz, Ph.D., Emeritus Professor of Theater Arts. Darrel E. Ross, M.F.A., Emeritus Professor of Theater Arts. Nicholas K. Browne, Ed.D., Associate Professor of Theater Arts. William Froug, B.J., Associate Professor of Theater Arts. Gary A. Gardner, Ph.D., Associate Professor of Theater Arts. Robert H. Hethmon, Ph.D., Associate Professor of Theater Arts. Dan F. McLaughlin, M.A., Associate Professor of Theater Arts. Stephen D. Mamber, Ph.D., Associate Professor of Theater Arts. William H. Menger, M.A., Associate Professor of Theater Arts. Sylvia E. Moss, B.A., Associate Professor of Theater Arts. Delia N. Salvi, Ph.D., Associate Professor of Theater Arts. Ruth E. Schwartz, Ph.D., Associate Professor of Theater Arts. Howard Suber, Ph.D., Associate Professor of Theater Arts. William D. Ward, M.F.A., Associate Professor of Theater Arts. William T. Wheatley, Ph.D., Associate Professor of Theater Arts.

Margaret L. Wilbur, M.F.A., Associate Professor of Theater Arts. Theodore Apstein, Ph.D., Adjunct Associate Professor of Theater Arts. Alan M. Armstrong, M.F.A., Assistant Professor of Theater Arts. Michael J. Hackett, B.A., Assistant Professor of Theater Arts. Patricia M. Harter, M.A., Assistant Professor of Theater Arts. Michael S. McLain, M.F.A., Assistant Professor of Theater Arts. Joanne T. McMaster, M.F.A., Assistant Professor of Theater Arts. Robert A. Nakamura, Assistant Professor of Theater Arts. Thomas J. Orth, M.F.A., Assistant Professor of Theater Arts. Jorge R. Prezleran, B.A., Assistant Professor of Theater Arts. Richard S. Rose, M.F.A., Assistant Professor of Theater Arts. Carol J. Songenfre, Ph.D., Assistant Professor of Theater Arts. Richard Walter, M.A., Assistant Professor of Theater Arts.

The Department of Theater Arts offers the Master of Arts (M.A.), Master of Fine Arts (M.F.A.), and Doctor of Philosophy (Ph.D.) in the following specialization: (1) Motion Picture/Television and (2) Theater.

ALL APPLICANTS PLEASE NOTE: The Motion Picture/Television Division's M.F.A. program is currently being revised and students admitted for the 1981-82 academic year and following are advised to check with the Department for description of such change.

Admission Requirements

Students are generally admitted in the Fall Quarter only. Applicants for another quarter should consult the Department. Admission is competitive, and only a limited number of students are accepted each year in each program. The Department does not have an application in addition to the one used by Graduate Admissions, and no screening examination prior to admission is required.

Admission requires:

1. Fulfilling the minimum requirements of the Graduate Division for admission to graduate study at UCLA.

2. Submitting a complete application that includes official transcripts, letters of recommendation, a statement of purpose, and a writing sample relevant to the field of study.

3. Having a minimum GPA of 3.0 on a 4.0 scale in the last 60 units of coursework.

4. Demonstrating a strong academic performance and potential for success in graduate study.

5. Completing a waiver examination for students with a non-U.S. degree.

6. Meeting additional requirements specific to the program of interest.

For more information, please visit the Department of Theater Arts website or contact the Graduate Admissions Office.
(2) Completion of an undergraduate major in theater or motion picture/television comparable to that offered by the UCLA Department of Theater Arts. Students whose theater arts preparation is deficient, as determined by the appropriate admissions committee, will be required to take work additional to the degree program to make up such deficiencies.

(3) Providing the Department with at least three letters of reference and a statement of purpose.

In addition to (1), (2) and (3) above, further requirements for specific programs are as follows:

For the M.A. Program in Theater

A sample of scholarly or critical writing, statement of purpose and such other information (resume, portfolio, script interview, etc.) as may be required to establish the quality of work in the specialization.

For the M.A. Program in Motion Picture/Television

Students without a comparable undergraduate major to that of the Department must submit for consideration, film and television work done at other institutions (confirmed by the instructors originally involved as the student's personal work), as well as evidence of their history background production and scriptwriting competency. Or, alternatively, students may be required to take such courses at UCLA as will fulfill these requirements, though these courses will not count towards the minimum of nine courses required for the M.A. program.

For the M.F.A. Program in Theater

Evidence of creative ability and professional intent. At the time of the application to the Graduate Division, the student must clearly state the degree objective (M.F.A.) and the area of specialization within the M.F.A. (Theater) program: Acting, Design (Scenic, Costume, or combined Scenic and Costume Design), Directing, Playwriting, Puppet Theater, Theater Management or Theater Technology.

In Acting: Submit strong letters of recommendation from directors familiar with their work, a complete resume of their experience, photographs, and audition for the M.F.A. faculty committee or its representative.

In Design: (Scenic, Costume, or the two combined): submit examples of creative work such as a portfolio of designs, sketches, working drawings, and photographs.

In Directing: submit evidence of motivation and talent through production and prompt books, reviews and critical commentaries, strong letters of recommendation, and arrange for an interview, when feasible.

In Playwriting: submit examples of creative writing such as full-length plays, one-act plays, and screenplays.

In Puppet Theater: submit actual puppets, photographs, and audition for the M.F.A. Committee or its representative.

In Theater Management: submit a complete resume and a statement outlining the areas of specific interest and intent.

In Theater Technology: submit evidence of ability demonstrated through production books, working drawings, lighting plots, photographs, and strong letters of recommendation.

For the M.F.A. Program in Motion Picture/Television

Applicants with diverse backgrounds and undergraduate majors other than Theater Arts are encouraged. The applicant must state clearly his/her degree objective (M.F.A.) and the area of specialization desired within the program—animation, filmmaking, scriptwriting, or television production.

For those intending to concentrate in production, a description of a film or television project designed to be undertaken during graduate residence at UCLA is required. This should be in proposal, script, or treatment form.

For those intending to concentrate in writing, a finished full-length feature script in dramatic form including dialogue must be submitted.

For the Ph.D. Program in Both Motion Picture/Television and Theater

Completion of a master's level degree, M.A. or M.F.A., equivalent to those offered by the UCLA Department of Theater Arts. In exceptional cases students with a M.A. outside the field will be considered for direct admission to the program. Evidence of potential as a practicing scholar is indicated by:

(a) breadth and depth of advanced coursework in history, theory and criticism;

(b) imagination and quality of scholarly writing;

(c) academic achievements and potential as indicated by grade point average, Graduate Record Examination scores, awards, scholarships, teaching assistantships, etc.;

In addition, for the Theater applicant evidence of artistic competence in some facet of theater production.

The dossier submitted for application for admission must contain a letter describing the applicant's reasons for wishing to earn the Ph.D. in Theater Arts; and the master's thesis or samples of writing that demonstrate a high level of ability to write criticism or historical narrative.

Simultaneous application can be made for both the M.A. and Ph.D. programs in Theater.

Further information may be obtained from: Student Affairs Office, 1327 MacGowan Hall, Department of Theater Arts, University of California, Los Angeles, CA 90024.

Advising

In most instances, the chairperson of the appropriate graduate committee acts as principal adviser to students in the program, though some assignments may be made by the chairperson to other members of the faculty.

Theoretical knowledge of the nature and purpose of the study is required to prepare the student for graduate work. The student will be advised by the chairperson of the appropriate graduate committee. The student is required to maintain a minimum of a B average in the study course. The student is required to take a final examination in the semester during which the degree is to be awarded.

The student will be advised by the chairperson of the appropriate graduate committee. The student is required to maintain a minimum of a B average in the study course. The student is required to take a final examination in the semester during which the degree is to be awarded.

For the Ph.D. Program without a M.A.

Advising

In most instances, the chairperson of the appropriate graduate committee acts as principal adviser to students in the program, though some assignments may be made by the chairperson to other members of the faculty.

For the Ph.D. Program without a M.A.

Theoretical knowledge of the nature and purpose of the study is required to prepare the student for graduate work. The student will be advised by the chairperson of the appropriate graduate committee. The student is required to maintain a minimum of a B average in the study course. The student is required to take a final examination in the semester during which the degree is to be awarded.

The student will be advised by the chairperson of the appropriate graduate committee. The student is required to maintain a minimum of a B average in the study course. The student is required to take a final examination in the semester during which the degree is to be awarded.
Major Fields or Subdisciplines

The M.A. program in Theater is a general graduate degree, though there are opportunities for the students, through their electives and thesis or research paper topics, to stress a particular interest, such as acting, children's theater, design, directing, playwriting, puppet theater, theater history and criticism, theater management and theater technology.

The M.A. program in Motion Picture/Television requires that the student be conversant with both film and television and that he/she will be tested on each in the Comprehensive Examination.

The areas of specialization for the M.F.A. program in Theater include: Acting, Design (Scenic, Costume or combined Scenic and Costume Design), Directing, Playwriting, Puppet Theater, Theater Management, and Theater Technology.

The M.F.A. program in Motion Picture/Television includes specializations in animation, filmmaking (fictional, documentary, education), screenwriting, and television production. Subdisciplines include: ethnographic film and broadcast journalism.

The Ph.D. student in Theater is expected to be knowledgeable regarding theater history and theory, critical methods, theatrical production and dramatic literature.

The Ph.D. student in Motion Picture/Television is expected to understand film and television within their social contexts as significant forms of art and communication, and to achieve by disciplined study, a mastery of their history, theory and criticism.

Foreign Language Requirement

The M.A. program in Theater does not require a foreign language, but students are urged to develop a proficiency in either French, German, Spanish or Italian.

In the M.A. program in Motion Picture/Television, a student may be required to demonstrate competence in a foreign language if necessary to support the research in the student's area of specialization.

There is no foreign language requirement for either M.F.A. degrees.

For the Ph.D. programs in both specializations, mastery of one foreign language is required. Mastery must be demonstrated in one of the following ways: 1) Passing of the Educational Testing Service examination (in French, Spanish, German, or Russian) with a score of 500 or better; 2) Completion of Course 8, or the equivalent, with a minimum grade of C, in any foreign language; 3) Passing of a UCLA language examination given in any foreign language department and administered by an approved examiner. This examination must confirm competence at the level of Course 5. When mastery of more than one foreign language is necessary for the candidate's dissertation study, the candidate will be required to take courses or to pass examinations in the additional language(s). Normally, the student must pass the required foreign language examination(s) by the end of the first year of residence.

In certain cases with committee approval, Motion Picture/Television Ph.D. students may substitute a research tool such as statistics, computer science, etc., for the foreign language.

Course Requirements

Following are the course requirements for each program:

For the M.A. Program in Theater: Students are required to complete a minimum of 9½ courses (38 units), five of which must be at the graduate level, in at least one year (three quarters) of intensive study, laboratory exercises and research leading to the successful completion of either the Thesis or Comprehensive Examination Plan. The student in Theater is required to take an active part in the production program of the Department as partial fulfillment of the degree program. The required courses are 200, 245A-B, and 272A, B, C, which is a 2-unit in-progress course with a grade and units awarded only upon completion of 272C in the third quarter. After being advised, the student will select six courses, including one graduate course in theater history and another in theater production theory as well as four other courses which emphasize production practice or historical study. Students accepted for joint M.A. and Ph.D. programs are required to take 205A, B, and C.

For the M.A. Program in Motion Picture/Television: A minimum of nine courses is required, five of which must be 200 level courses in film and/or television history, theory, and criticism. In addition, one course in research methodology (Theater Arts 200) is required of all students. All six of the above courses must be completed with grades of “B” or better. The specific courses most beneficial to the student's program are selected in consultation with an adviser.

For the M.F.A. Program in Theater: A total number of 18 courses (72 units) is required for the M.F.A. degree. Each specialization has different requirements. Additional courses to those required must be planned and approved by the student's adviser.

Acting: Required courses: 16½, graduate 13½. Courses are 420A, B, C, 421A, B, C, 424A, B, C, D, E, F, 425A, B, C, D, E, F, 472 (½ course to be taken three times), and three adviser-selected courses in theater history and literature.

Design—Costume: Required courses: 16½, all graduate. Courses are: 245A, B, 442A, B, C, 443 (½ course to be taken six times), 444 (to be taken three times), 472 (½ course to be taken three times), 596D (to be taken three times), and 596F.

Design—Scenic: Required courses: 17½, graduate 13½. Courses are: 240, 241, 243A, B, C, 443 (½ course to be taken four times), 472 (½ course to be taken three times), 596D (to be taken three times), and 245A, B or equivalency established by a portfolio or similar evidence to allow for adviser-selected electives. Upper division courses: 140B, 141B, 146B and 149A, B.

Design—Combined Scenic-Costume: Required courses: 25½, graduate 21½. The student undertaking this specialization must meet all the requirements for both the Costume Design specialization and the Scenic Design specialization. This usually necessitates an additional year of study for a total of three years or nine quarters.

Directing: Required courses: 15½, graduate 14½. Courses are: 205A, B or C, 240, 245A, B, 421A, B, C, 460A, B, C, 462, 463, 472 (½ course to be taken three times), and 596C. Upper division course: 132.

Playwriting: Required courses: 11½, graduate 10½. Courses are: 230A, B, C, 430A, B, C, 472 (½ course to be taken three times), and three courses chosen from the following: 123, 162B, 174, 190A, B, 205A, B, 240, 245A, B. Upper division course: 132.

Puppet Theater: Required courses: 12, graduate 8½. Courses are: 205A, B or C, M217, 245A, B, 417, 472 (½ course to be taken three times), and 596C. Upper division courses: 117 (to be taken three times), 162A or B, and 181A.

Theater Management: Required courses: 13, graduate 11. Courses are: Management 257, Management 270, Management 271, 290A, B, 472 (½ course to be taken four times), 596A, 596F, and 245A, B or equivalency established by a portfolio or similar evidence to allow for adviser-selected electives. Upper division courses: 132 and 171A.

Theater Technology: Required courses: 16, graduate 10½. Courses are: 240, 241, 243A (½ course to be taken two times), 472 (½ course to be taken three times), 596D or F (to be taken three times). Upper division courses: 140B, 141B, 144A, B, 146B, 149A, B and 245A, B or equivalency established by a portfolio or similar evidence to allow for adviser-selected electives.

For the M.F.A. Program in Motion Picture/Television: Eighteen courses are required for the degree. Five of these courses must be graduate level. At least three courses must be in the 200 series seminar courses in film history aesthetics or structure.

For the Ph.D. Program in Theater: During the first six quarters (two academic years), students must complete a minimum of 12 graduate courses (200 or 500 level) and two profes-
Thesis Plan

Application to the M.A. student in Theater only: Before beginning work on the thesis, the student must obtain approval of a subject dealing with the history, aesthetics, criticism or techniques of the theater and a general plan of investigation from the M.A. committee. A thesis committee is then formed which consists of three faculty members recommended by the committee and approved by the Chairperson of the Department. The thesis committee is generally established when the student is within one quarter of completing the coursework, at which time the student is eligible to advance to candidacy.

The student is required to present the adviser and the committee with a prospectus of the thesis with a petition to advance to candidacy. Both are used as the basis for approval.

An outside thesis committee member is not required but is considered desirable when the student's thesis topic calls for special expertise from outside the Department.

If a student's thesis fails to pass the committee, the student is allowed to present a rewritten version for approval. The number of times a thesis may be presented depends upon assessments made by the committee.

Comprehensive Examination Plan

For the M.A. Student in Theater: The examination consists of a 50-page research paper which may be associated with 4 units of credit 596A; a 1-hour oral defense of the paper; and a 2-part, 6-hour written examination covering theater history and production practice. This procedure is supervised by a 3-member faculty committee appointed in the same manner and time sequence as the thesis committee. The examination normally occurs during the final quarter of residency at which time the student should have advanced to candidacy.

For the M.A. Student in Motion Picture/Television: The examination consists of two written parts plus an oral, administered by a comprehensive examination committee appointed by the Chairperson of the Film/Television Studies Committee with the approval of the Chairperson of the Department. The first written part consists of three days of examination, four hours each day, and tests a broad range of knowledge in motion picture/television. An oral examination follows the successful evaluation of part one of the written examination. During the examination, the student also proposes the subject and scope of the thesis. When the student has satisfactorily completed the areas of concentration, has chosen a topic for the thesis, and has written an outline for the thesis, the student may present the written examination. The committee, with approval of the Chairperson of the Department, appoints the comprehensive examination committee consisting of three faculty members. On completion of the comprehensive examination committee may reexamine the student's thesis to determine fitness to continue in candidacy.

For the M.F.A. Student in Theater: Generally, the student's faculty committee becomes the comprehensive examination committee with the approval of the Chairperson of the Department and is responsible for administering the Comprehensive Examination.

The Plan is satisfied by the fulfilling of a series of creative projects appropriate to the student's specialization. On completion of the final creative project or last quarter of residency, whichever is last, the student must file for advancement to candidacy. The committee will then review and evaluate the record of each candidate for a degree. A student's participation in the final review will be at the discretion of the committee.

For the M.F.A. Student in Motion Picture/Television: The Comprehensive Plan is satisfied by the fulfilling of projects appropriate to the student's specialization. No later than the beginning of the final quarter of residence, the student must file the appropriate documents for advancement to candidacy and receive approval for the advancement from the M.F.A. committee. The chairperson of the M.F.A. committee, with approval of the Chairperson of the Department, appoints the comprehensive examination committee consisting of three faculty members. On completion of the final creative project the M.F.A. comprehensive examination committee may reexamine the student's thesis to determine fitness to continue in candidacy.

Written and Oral Qualifying Examinations

At the end of the second quarter of residence, the doctoral student must submit himself or herself to a preliminary oral examination to be conducted by a representative committee of the faculty of his or her specialization. Each committee will specify the areas of review and test the student's background preparation and progress to date and determine general fitness to continue in the program. This examination may result in dropping the student from the doctoral program. The committee may reexamine the student at a subsequent time to determine fitness to continue in the program.

After completion of all language and course requirements, approval of a dissertation prospectus, and appointment of a dissertation committee, the student will be required to pass the Written Qualifying Examination set by the faculty. The Written Qualifying Examination will be 12-hours of examination, administered in 4-hour segments during three successive days. Information regarding the examination is...
available from the appropriate Divisional Ph.D. Committee. Students who fail parts or the whole of this examination may be granted by the appropriate committee the privilege of being reexamined in part or in whole. After this examination is satisfactorily passed, the Chairperson of the Department of Theater Arts recommends the formation of a doctoral committee; the committee’s members may be nominated by the candidate, but must be endorsed by the appropriate Divisional Ph.D. committee. A change in membership is a formal procedure that must be endorsed by all members of the doctoral committee and approved by the Chairperson of the Department.

After passing the Written Qualifying Examination, the student will be required to pass the Oral Qualifying Examination conducted by his/her doctoral committee. The Oral Qualifying Examination is open only to the members of the doctoral committee and the student. The student is advanced to candidacy only upon satisfactory completion of the Qualifying Examination.

A dissertation demonstrating the candidate’s ability to carry out independent and significant inquiry in an historical, theoretical, or critical field of Theater Arts is required. Final award of the Ph.D. depends on satisfactory completion of the dissertation. A student who has advanced to candidacy for the degree of Ph.D. in Theater Arts will be awarded the Candidate in Philosophy Degree (C. Phil.) in accordance with the normal provisions approved by the Graduate Council.

**Final Oral Examination**

A Final Oral Examination, held after the completion of the dissertation, may be required at the option of the members of the dissertation committee.

**Time to Degree**

**For the M.A. Student in the Theater**

Normal Progress Toward the Degree: From graduate admission with no deficiencies to award of the Master of Arts degree, a minimum time period of three quarters will be necessary for completion of the required courses, Production requirements, and thesis or Comprehensive Examination. The Department does not permit students to work on a master’s degree and a teaching credential simultaneously.

**For the M.F.A. Student in Motion Picture/Television**

Normal Progress Toward the Degree: Only 8 units of the 596 series may apply toward the total course requirement, and only 4 of these units may apply toward the five minimum graduate requirements. No 598 units may apply toward the total course requirement.

**For the M.F.A. Student in Theater**

Normal Progress Toward the Degree: All areas of specialization, except Directing and the combined Scenic and Costume Design, involve students in their specialized areas for a continuous period of two years (6 quarters). The Directing and Puppetry programs may require an additional quarter or Summer Session. The combined Scenic and Costume Design program involves the students for a full 3-year period (9 quarters). Maximum residency in any M.F.A. program is 10 quarters.

**For the M.A. Student in Motion Picture/Television**

Normal Progress Toward the Degree: From graduate admission to completion of first projects: 2 to 3 quarters;
(2) From graduate admission to completion of required courses: 6 to 9 quarters;
(3) From graduate admission to award of degree: maximum 10 quarters.
Students not making normal progress toward the degree may be dropped from the program. Continuance in the program of students on probation is determined by the Master of Fine Arts committee with the final approval of the Chairperson of the Department.

Caution is stressed regarding the production time, crew and budget considerations plus the considerable expense borne by the student in production. Without these sometimes formidable resources, students become disheartened, ignore their program schedule and otherwise jeopardize their continuance. Extensive planning, care, caution and financial resources are required for the production specialization of this program.

**500 Series Course Limitations**

For the M.A. student in Theater: Only 8 units from the 596 series may apply toward the total course requirement, and only 4 of these units may apply toward the five minimum graduate requirements. No 598 units may apply toward the total course requirement.

**For the M.A. Student in Motion Picture/Television**

Only eight 596A, B, C and 598 quarter units may apply toward the total course requirement, and none of these courses may apply toward the minimum graduate course requirement.

**For the M.F.A. Student in Motion Picture/Television**

Only 16 596 series quarter units may apply toward the total course requirement and the minimum graduate course requirement.

**For the M.F.A. Student in Theater**

Only 16 596 quarter units may apply toward the total course requirement.

**Teaching Experience**

Teaching experience is not a requirement for students in any master’s program.

**For the Ph.D. Student in Both Divisions**

Every student completes Theater Arts 495A or 496 depending on program requirements.
Disqualification and Appeal of Disqualification

Disqualification: A student must maintain the required 3.0 grade point average in all courses and pass required examinations. However, the student’s various creative projects, or courses in research methodology and history seminars may be evaluated as indicative of insufficient talent, development, imagination, or motivation. The student so evaluated will be informed of the recommendation of the appropriate committee, and placed on probation by the Department. During the following quarter, the student must provide sufficient evidence of improvement to remove the probationary status. If evidence of improvement is not presented, the committee will propose to the Chairperson of the Department a recommendation for disqualification and dismissal.

Appeal of Disqualification: The process involves the following steps:

1. The student submits to the Chairperson of the Department of Theater Arts (copy to the chairperson of the appropriate committee) a written appeal stating the specific causes the student believes to be the grounds for reconsideration.

2. The Chairperson of the committee submits to the Chairperson of the Department of Theater Arts a written response (with a copy to the student).

3. The Chairperson of the Department of Theater Arts appoints an ad hoc committee consisting of three tenured members of the faculty. This committee will review the written materials in 1 and 2 above. They will also meet separately with the concerned committee and the student. The ad hoc committee will forward its recommendation to the Chairperson of the Department, reporting in writing its basis for judgment.

4. The Chairperson of the Department advises the student of his/her decision in writing.

5. Further appeal may be made to the Dean of the Graduate Division.

6. A Department faculty representative may be present at each review hearing.

Other Relevant Information

For the M.F.A. Student in Theater

Field Work: Occasionally, students fulfill project requirements in the field. As an example, a student might complete a directing or design project with a community or church organization or a municipal division such as Parks and Recreation.

Internship: Some specialization such as Theater Management and Puppet Theater may take advantage of opportunities offered by professional organizations.

For the M.F.A. Student in Motion Picture/Television

Field work and internships are not required but may be taken as courses which will apply toward the degree.

For the Ph.D. Student in Both Divisions

Neither field work nor internship is required for the Ph.D. degree in Theater Arts.

*Graduate Courses

ALL APPLICANTS PLEASE NOTE: The Motion Picture/Television Division's M.F.A. program is currently being revised and students admitted to the 1981-82 academic year and following are advised to check with the Department for description of such change.

Certain graduate courses concerned with individual student projects may be repeated for credit upon recommendation of the departmental graduate adviser. Not open to undergraduate students. See College of Fine Arts, Unit Requirements.

200. Bibliography and Methods of Research in Theater Arts.

Section 1. Theater.

Section 2. Motion Pictures.

Section 3. Television/Radio.

202A. Seminar in Western Classical Theater. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. An examination of theatrical production and dramatic form in the Greek and Roman periods. This course may be taken for a maximum of 3 courses (12 units).

202B. Seminar in Medieval Theater. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies of theatrical production and dramatic form in the Middle Ages. This course may be taken for a maximum of 3 courses (12 units).

202C. Seminar in Renaissance and Baroque Theater. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1465 to the early 18th century. This course may be taken for a maximum of 3 courses (12 units).

202D. Seminar in Bourgeois and Romantic Theater. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1700 to 1870. This course may be taken for a maximum of 3 courses (12 units).

202E. Seminar on the Modern Consciousness in Theater. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Study of the prototypes of modern experience as encountered in the work of Ibsen and Strindberg. This course may be taken for a maximum of 3 courses (12 units).

202F. Seminar in Modern Realism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies of the theater's response to science and technology, politics, and revolution. This course may be taken for a maximum of 3 courses (12 units).

202G. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

202H. Seminar in African Theater. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies of traditional theater forms such as those indigenous to Ghana, Nigeria, and other African nations and their Diaspora: Haiti, Jamaica and other areas of the Caribbean through an examination of character, structure, performance modes, and archetypes. This course may be taken for a maximum of 3 courses (12 units).

202I. Seminar in East Asian Theater. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected topics in the theater forms of East Asia, including dramatic literature, costume, theater spaces and critical writings. This course may be taken for a maximum of 3 courses (12 units).

202J. Seminar in Islamic Theater. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected topics in the theater forms of South Asia, including dramatic literature, costume, theater spaces and critical writings. This course may be taken for a maximum of 3 courses (12 units).

202K. Seminar in Southeast Asian Theater. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in the theater forms of Southeast Asia, including dramatic literature, costume, theater spaces and critical writings. This course may be taken for a maximum of 3 courses (12 units).

202L. Seminar in Latin American Theater. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected topics in the theater forms of Latin America, including dramatic literature, costume, theater spaces and critical writings. This course may be taken for a maximum of 3 courses (12 units).

202M. Seminar in Middle Eastern Theater. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in the theater spaces and critical writings. This course may be taken for a maximum of 3 courses (12 units).

202N. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

202P. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

202Q. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

202R. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

202S. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

202T. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

202U. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

202V. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

202W. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

202X. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

202Y. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

202Z. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Selected studies in Symbolism and the Avant Garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. This course may be taken for a maximum of 3 courses (12 units).

*For concurrently scheduled courses ("C" prefix) suitable separately students fulfills projects in the field. As an example, a student might complete a directing or design project with a community or church organization or a municipal division such as Parks and Recreation.
205B. The Background of Theatrical Art. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. An analysis of major plays, commentaries, and historical materials from the Renaissance, Baroque and Rococo periods.

205C. The Background of Theatrical Art. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. An analysis of major plays, commentaries, and historical materials from the Romantic, Symbolist, and Symbolist periods.

206A. Seminar in European Motion Picture History. Discussion, three hours, additional hours as required. Prerequisites: course 106B, Graduate Standing, and consent of instructor. Studies in selected historical movements such as expressionism, socialist realism, surrealism, neo-realism, New Wave, etc. This course may be taken for a maximum of 3 courses (12 units).

206C. Seminar in American Motion Picture History. Discussion, three hours, additional hours as required. Prerequisites: course 106A, Graduate Standing and consent of instructor. Study of central topics in American films history. This course may be taken for a maximum of 3 courses (12 units).

208A. Seminar in Film Structure. Discussion, three hours, additional hours as required. Prerequisites: Graduate Standing and consent of instructor. An examination of various film conventions, both fictional and nonfictional, and of the role of structure in the motion picture.

208B. Seminar in Classical Film Theory. Discussion, three hours, additional hours as required. Prerequisites: Graduate Standing and consent of instructor. A study of the principal topics and lines of inquiry that characterize the theoretical writings of Arnheim, Eisenstein, Bazin, Mitty, etc.

208C. Seminar in Contemporary Film Theory. Discussion, three hours, additional hours as required. Prerequisites: course 208B, Graduate Standing and consent of instructor. A study of the redefinition of the aims and methods of film theory through contemporary writings.

209A. Seminar in Documentary Film. Discussion, three hours, additional hours as required. Prerequisites: Graduate Standing and consent of instructor. The nonfiction film and its relation to contemporary culture.

209B. Seminar in Fictional Film. Discussion, three hours, additional hours as required. Prerequisites: Graduate Standing and consent of instructor. Film as fiction and its relation to contemporary culture. May be repeated for a maximum of 2 courses (8 units) credit.

M209C. Ethnographic Film. (Same as Anthropology M247A.) Prerequisites: Graduate Standing and consent of instructor. The ethnographic film as a form of realist cinema and its relation to cultural anthropology. Offered in the Fall Quarter.

Mr. Boehm, Mr. Hawkins, Mr. Moerman

209D. Seminar in the Animated Film. Discussion, three hours; laboratory, three hours. Prerequisite: consent of instructor. A critical study of the animated film—its historical development and its structure, style and use.

210. Seminar in Contemporary Broadcast Media. Discussion, three hours, additional hours as required. Prerequisites: Graduate Standing and consent of instructor. Consideration of issues raised by recent developments in television and radio, commercial and public, associated with innovations in satellite, cable and cartridge systems.

211. Seminar in Historiography. Discussion, three hours. Prerequisite: consent of instructor to Ph.D. students in Motion Picture/Television. Examination of the function and methods of writing film and television history as exemplified by key works in this tradition with attention to central issues of historical thought on the media.

213A. Seminar in Classical Film Criticism. Discussion, three hours, additional hours as required. Prerequisites: Graduate Standing and consent of instructor. An analysis of critical and aesthetic questions of analysis and evaluation in relation to central works of motion picture criticism. Course may be taken for a maximum of 2 courses (8 units).

213B. Seminar in Television Criticism. Discussion, three hours, additional hours as required. Prerequisites: Graduate Standing and consent of instructor. A study of the problems presented by the conceptualization of the form and structure of the short film, with classical and student examples.

214. Research in Technical Theater. Lecture, four hours. Prerequisites: Graduate Standing and consent of instructor. Research in technical processes and equipment in theater.

215. Seminar in Theory and Method. Discussion, three hours. Prerequisite: restricted to Ph.D. students in Motion Picture/Television. An examination of the major theoretical issues that bear on film and television through study of central texts of such traditions as phenomenology, auteurism, semiotics, psychoanalysis, sociology, etc.

216A. Critical and Historical Methods. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Studies in critical theories of theatrical form and structure.

216B. Critical Methods. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Studies in contemporary modes of psychoanalytic and archetypal criticism for the theater.

216C. Critical Methods. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Studies in contemporary modes of psychoanalytic and archetypal criticism for the theater.

217. Seminar in the Puppet Theater. (Same as Folklore and Mythology M219.) Lecture, three hours. Prerequisite: consent of instructor. Studies in the puppet theaters of the world: techniques, literature, aesthetics. Mr. Heiligen

219. Seminar in Film and Society. Discussion, three hours, additional hours as required. Prerequisites: Graduate Standing and consent of instructor. Study of the ways film affects and is affected by social behavior, belief, and value systems; considered in relation to the role of media in society. Course may be taken for a maximum of 2 courses (8 units).

220. Seminar in Television and Society. Discussion, three hours, additional hours as required. Prerequisites: Graduate Standing and consent of instructor. Study of the ways television forms affect and are affected by social behavior, belief, and value systems; study of the technological and economic aspects of the medium. Course may be taken for a maximum of 2 courses (8 units).

221. Seminar in Film Authors. Discussion, three hours, additional hours as required. Prerequisites: Graduate Standing and consent of instructor. Intensive examination of the works of outstanding creators of film. Course may be taken for a maximum of 3 courses (12 units).

222. Seminar in Film Genres. Discussion, three hours, additional hours as required. Prerequisites: Graduate Standing and consent of instructor. Studies of patterns, styles, and themes of such genres as the Western, gangster, war, science fiction, comedy, etc. Course may be taken for a maximum of 3 courses (12 units).

223. Seminar in Visual Perception. Discussion, three hours, additional hours as required. Prerequisites: Graduate Standing and consent of instructor. The aesthetic, psychological, and physiological principles of vision as they relate to the ways in which man "sees" film and television, with emphasis on the ways in which these are different from other visual experiences.

230A-230B-230C. Advanced Playwriting. Lecture, three hours. Prerequisites: course 130A, Graduate Standing and consent of instructor. Guided completion of a full-length play, or study and preparation for the writing of a thesis play.

240. The Contemporary Playhouse. Discussion, four hours. Prerequisites: Graduate Standing and consent of instructor. Advanced study of the concept, form and function of the contemporary playhouse and its equipment.

241. Research in Technical Theater. Lecture, four hours. Prerequisites: Graduate Standing and consent of instructor. Research in technical processes and equipment in theater.
420B. Advanced Techniques in Acting. Lecture/laboratory, six hours. Prerequisites: restricted to M.F.A. acting candidates in Theater and consent of instructor. Extended work in improvisations and exercises to develop the actor’s role. Beginning with monologues the work progresses to two-person scenes. Through these efforts the student will begin to personalize the character’s emotional needs and drives.

420C. Advanced Techniques in Acting. Lecture/laboratory, six hours. Prerequisites: restricted to M.F.A. acting candidates in Theater and consent of instructor. Preparation and presentation of two-person scenes utilizing sensory work and ‘objectives’ on a more refined basis. The student will now be able to find the similarities and differences between himself and the character and be able to play these elements truthfully and spontaneously.

421A. Advanced Projects in Acting. (1 or 2 courses) Lecture/laboratory, six hours. Prerequisites: restricted to M.F.A. acting students in Theater and consent of instructor. Preparation, presentation, and critique of scenes. Systematic role analysis and exercises in acting.

421B. Advanced Projects in Acting. (1 or 2 courses) Lecture/laboratory, six hours. Prerequisites: restricted to M.F.A. acting students in Theater and consent of instructor. Preparation, presentation and critique of scenes. Systematic role analysis and exercises in acting.

421C. Advanced Projects in Acting. (1 or 2 courses) Lecture/laboratory, six hours. Prerequisites: restricted to M.F.A. acting students in Theater and consent of instructor. Class exercises in acting. Preparation and presentation of roles under performance conditions.

422. Advanced Directing of the Actor for Motion Pictures and Television. Laboratory, eight hours. Prerequisites: course 163 and consent of instructor. The Director learns how to build scenes and characters logically and how to sustain these along with emotional and physical continuity. This class utilizes a video-tape recorder in order to simulate the conditions of directing actors before the camera. May be repeated for a maximum of 12 units credit.

424A-424B-424C. Advanced Techniques in Voice. Lecture, one hour; laboratory, three hours. Prerequisite: consent of instructor. Study of the writings on the theory of narrative structure, and their significance for analysis of film forms. Examination of the visual, aural, and economic elements of the Motion Picture/Television industry. May be repeated for a maximum of 24 units.

427. Seminar in Narrative Studies. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. A study of the writings on the theory of narrative structures and their significance for analysis of film forms.

428. Seminar in Instructional Television. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. An historical survey and critical analysis of the writing of original motion picture/television material. May be repeated for a maximum of 24 units.

429. Seminar in Film and Television Curatorship. Discussion, three hours. Prerequisites: Graduate Standing and consent of instructor. Study and practice of issues in archival research. Preparation and presentation of two-person scenes utilizing sensory work and ‘objectives’ on a more refined basis. The student will now be able to find the similarities and differences between himself and the character and be able to play these elements truthfully and spontaneously.

432. Manuscript Evaluation. Lecture, four hours; laboratory, to be arranged. Prerequisites: course 135 and consent of instructor. Advanced problems in the writing of original motion picture/television material. May be repeated for a maximum of 24 units.

437. Nontheatrical Writing for Motion Picture/Television. Discussion, three hours. Prerequisite: consent of instructor. Advanced problems in the field of documentary and special feature programs with emphasis on research and pre-production.

442A-442B-442C. Advanced Problems in Costume Design. Lecture/discussion, four hours. Prerequisite: consent of instructor. Study of costume design for theatrical productions. Development of costumes from theatrical scripts with emphasis upon production styles and character revelation. The scripts vary in period and style to give design practice in the major costume periods and artistic styles. Restricted to M.F.A. candidates.

443. Problems in Design. (½ or 1 course) Lecture/laboratory, four hours. Additional hours as required. Prerequisite: consent of instructor. Study and practice in design techniques for the theater. May be repeated for a maximum of 12 units.

444. The Development of Costume Design. Lecture, discussion, four hours. Prerequisites: restricted to M.F.A. candidates and consent of instructor. A study of the effects of artistic and stylistic ideas of the mode and dress of men and women. May be repeated for a maximum of 12 units.

445. Production Planning in Motion Pictures. (½ or 1 course) Lecture, three hours; laboratory to be arranged. Prerequisite: consent of instructor.

452A. Advanced Motion Picture/Television Sound. Lecture, four hours; laboratory, four hours. Prerequisites: course 452A and consent of instructor. Applications of electronic and acoustic theory to film and television recording and reproduction, including practical demonstrations.

452B. Music Recording Workshop. Lecture, four hours; laboratory, eight hours. Prerequisite: course 452B. Advanced work in the recording of music and sound effects. Advanced exercises in studio music recording techniques, with emphasis on special requirements for motion pictures and television.

452C. Advanced Motion Picture/Television Sound Recording. Laboratory, eight hours. Prerequisites: courses 152B, 452A, and/or consent of instructor. Techniques of recording and execution of re-recording using multi-track pickup recording technology, including supervised operational experience.

457. Design for Television. Lecture, one hour; laboratory, three hours. Prerequisite: consent of instructor. Study and practice in design of television productions. Consideration of style as it relates to all elements of design in live and recorded television programs.

460A. Problems in Advanced Direction for the Stage. Lecture, to be arranged. Prerequisites: restricted to M.F.A. candidates and consent of instructor. Preparation and presentation of a published one-act play or original verse in rehearsal conditions. Discussion and critique of work in progress.
495B. Problems in the Teaching of Theater Arts. Lecture/laboratory, to be arranged. Prerequisites: Graduate Standing and consent of instructor. Demonstration of competence in theater production through successful completion of a major teaching production assignment as technical director or designer.

495C-495D. The Problems in the Teaching of Theater Arts. (0 to 1 course) Laboratory, to be arranged. Prerequisites: Graduate Standing and consent of instructor. Demonstration of competence in theater production through successful completion of a major teaching production assignment as theater director. Course to be conducted as a two-quarter sequence offered in Winter and Spring quarters only. Credit will be granted only upon completion of sequence. In Progress grade only.

496. The Practice of Teaching Theater Arts. (1/2 course) Discussion, two hours. Prerequisite: required once for all Teaching Assistants or Associates in the Department of Theater Arts. Orientation and preparation of graduate students who have the responsibility to assist in the teaching of undergraduate courses in the Department; discussion of problems common to the teaching experience. This 2 unit course will not count toward the M.A., M.F.A., or Ph.D.

498. Professional Internship in Theater Arts. (1 or 2 or 3 courses) Full or part-time at a studio or on a professional project. Prerequisites: Graduate Standing plus advanced standing in the M.F.A. program and consent of instructor. An internship at various film, television or theater facilities acquainting the creative contribution, the organization and the work of professionals in their various specialties. Given only when projects can be scheduled.

501. Cooperative Program. (1/2 to 2 courses) Prerequisites: approval of Graduate Advisor and Graduate Dean. (approval of host campus instructor, Department Chairman and Graduate Dean. The course is used to record the enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. To be graded S/U.

Individual Study and Research

596A. Directed Individual Studies: Research. (1 to 3 courses) Hours to be arranged. Prerequisite: Graduate Standing. May be repeated by consent of instructor.

596B. Directed Individual Studies: Writing. (1 to 3 courses) Hours to be arranged. Prerequisite: Graduate Standing. May be repeated by consent of instructor.

596C. Directed Individual Studies: Directing. (1 to 3 courses) Hours to be arranged. Prerequisite: Graduate Standing. May be repeated by consent of instructor.

596D. Directed Individual Studies: Design. (1 to 3 courses) Hours to be arranged. Prerequisite: Graduate Standing. May be repeated by consent of instructor.

596E. Directed Individual Studies: Acting. (1 to 3 courses) Hours to be arranged. Prerequisite: Graduate Standing. May be repeated by consent of instructor.

596F. Directed Individual Studies: Production. (1 to 3 courses) Hours to be arranged. Prerequisite: Graduate Standing. May be repeated by consent of instructor.

597. Preparation for the Qualifying Examination for the Ph.D. in Theater Arts. (1/2 to 2 courses) May be repeated for a total of three courses.

598. M.A. Thesis in Theatre Arts. (1/2 to 2 courses) Research and writing for the M.A. thesis. Limited to students who have been advanced to candidacy. May be repeated for a total of three courses.

599. Dissertation in Theater Arts. (1/2 to 2 courses) Research and writing for the doctoral dissertation. Limited to students who have been advanced to candidacy. May be repeated for a total of three courses.

Director of Development, Health Sciences and Hospitals, James Osterholt
Assistant Vice Chancellor—Public Communications, Michael T. McManus
Director, Public Information, Chandler Harris
Assistant Vice Chancellor—Administrative Services, Edward F. Cavanaugh
Financial Manager, JoAnn Hankin

Administrative Affairs

Assistant Vice Chancellor—Administration, Allen Solomon
Assistant Vice Chancellor—Business, Harold B. Thompson
Assistant Vice Chancellor—Campus Community Safety, John C. Barber
Assistant Vice Chancellor—Facilities, Robert C. Katona
Assistant Vice Chancellor—Finance, Don C. Rebok
Assistant Vice Chancellor—Staff Personnel, Georg B. Enoch
Staff Affirmative Action Officer, James Lake, Jr.

Director, Internal Audits Division, Harry C. Cordon
Accounting Officer, Edward F. Smith
Director, Contract and Grant Administration, Terence A. Feuerborn
Manager, Labor Relations, Gregory Kramp
Manager, Employee Relations and Development, Jack Powazek
Manager, Compensation and Benefits, Robert Lofelmaer
Manager, Placement, Bonnie L. Bakst
Manager, Hospital and Clinics Personnel, John R. Blackwell
Administrator, Business Enterprises, Sam J. Morabito
Administrator, Business Services, Anthony Stypinski
Administrator, Transportation Services, William P. Forsythe
Director of Academic Computing, William B. Kehl
Director, Administrative Information Services, Ronald Johnson
Director, 1984 Olympic Games Office, Norman P. Miller
Ombudsman, Donald E. Hartsock

Deans of the Graduate Division, Colleges and Schools

Graduate Division
Dean
Victoria A. Fromkin
Emeriti
Gustave O. Arti, Ph.D., LL.D.
Horace W. Magoun, Ph.D.
Associate
Thomas J. LaBelle, Ph.D.
Leo M. Snowiss

College of Fine Arts
Dean
Robert H. Gray, M.F.A.
Emeriti
David F. Jackey, Ph.D.
William W. Melnitz, Ph.D.
Charles Speroni, Ph.D.
Associate
William R. Hutchinson, Ph.D.
Ruth E. Schwartz, Ph.D.

College of Letters and Science
Dean
Emeriti
Paul A. Dodd, Ph.D., L.L.D.
Franklin P. Rolfe, Ph.D.

Divisional—Honors
E. Bradford Burns, Ph.D.
Divisional—Humanities
Philip Levine, Ph.D.
Divisional—Life Sciences
Harold C. Ticho, Ph.D.
Divisional—Physical Sciences
Antony R. Orme, Ph.D.

Divisional—Social Sciences
Associate
Paul S. Farrington, Ph.D.

School of Architecture and Urban Planning
Dean
Harvey S. Perloff, Ph.D.
Associate
Helmut C. Schultz, M.Arch.

School of Dentistry
Dean
James R. Hooley, D.D.S.
Associate
Thomas K. Barber, D.D.S., M.S.
Assistant
Gerald Brundo, D.D.S., M.A.
Robert P. Thye, D.M.D., M.A.
Stuart C. White, D.D.S., Ph.D.

Graduate School of Education
Dean
John I. Goodlad, Ph.D., L.H.D., L.L.D.
Associate
C. Wayne Gordon, Ph.D.
Assistant
Marjorie S. Day, Ph.D.
Lawrence W. Erickson, Ed.D.
Rodney W. Skager, Ph.D.

School of Engineering and Applied Science
Dean
Russell R. O'Neil, Ph.D.
Associate
Alfred C. Ingersoll, Ph.D.
Russell A. Westmann, Ph.D.
Assistant
Alan J. Ardell, Ph.D.
Richard Stern, Ph.D.
Alan N. Willson, Jr., Ph.D.
School of Law
Dean
William D. Warren, A.B., J.D., J.S.D.
Associate
Paul Boland, J.D., L.L.M.
Susan Westerberg-Prager, A.B., M.A., J.D.
Assistant
Michael Rappaport, B.S., J.D.

School of Library and Information Science
Dean
Robert M. Hayes, Ph.D.
Emeriti
Andrew H. Horn, Ph.D.
Lawrence C. Powell, Ph.D., Litt.D., H.H.D.
Associate
Elizabeth R. Eisenbach, M.L.S.

Graduate School of Management
Dean
J. Clayburn LaForce, Jr., Ph.D.
Emeriti
George W. Robbins, M.B.A.
Associate
William H. Broesamle, M.B.A.
Donald Erlenkotter, Ph.D.
Victor C. Tabbush, Ph.D.
Assistant
Alfred E. Osborne, Jr., Ph.D.

School of Medicine
Dean
Sherman M. Mellinkoff, M.D.
Associate
Mitchel D. Covel, M.D.
John Philip Loge, M.D.
Martin A. Pops, M.D.
A.F. Rasmussen, Jr., M.D., Ph.D.
Raymond G. Schultz, M.D.
Assistant
Wiley F. Barber, M.D.
Francis L. Comunale, M.D.
Kathryn F. Fink, Ph.D.
Joshua S. Golden, M.D.
H. Earl Gordon, M.D.
Josephine Isabell-Jones, M.D.
James R. Klinenberg, M.D.
Mary E. Reres, R.N., M.P.N., Ed.D.
Ernest A. Notlmann, Ph.D.
Ernst A. Notlmann, Ph.D.
Joseph Raymond, M.D.
Frederick C. Redlich, M.D.
Martin D. Shickman, M.D.
William H. Swanson, M.D.
Jeremy H. Thompson, Ph.D.
Ronald K. Thompson, M.D.
Jerrold A. Turner, M.D.
Bernice M. Wenzel, Ph.D.

School of Nursing
Dean
Mary E. Reres, R.N., M.P.N., Ed.D.
Emeriti
Lulu Wolf Hassenplug, R.N., M.P.H., Sc.D.
Associate
Phyllis A. Putnam, R.N., Ph.D.
Assistant
Donna F. Ver Steeg, R.N., Ph.D.

School of Public Health
Dean
Roger Detels, M.D., M.S.
Associate
Lawrence R. Ash, Ph.D.

School of Social Welfare
Dean
Maurice F. Connery, D.S.W.

University Professors
Melvin Calvin, University Professor, Berkeley, Director, Laboratory of Chemical Biodynamic
Murray Krieger, University Professor, Irvine, Department of English and Comparative Literature
Josephine Miles, University Professor, Berkeley, Department of English
Julian S. Schwinger, University Professor, Los Angeles, Department of Physics
Glenn Seaborg, University Professor, Berkeley, Associate Director, Lawrence Berkeley Laboratory
Neil Smelser, University Professor, Berkeley, Department of Sociology
Edward Teller, Emeritus University Professor, Livermore, Lawrence Livermore Laboratory
Charles Townes, University Professor, Berkeley, Department of Physics
Sherwood Washburn, University Professor, Berkeley, Department of Anthropology
John R. Whinnery, University Professor, Berkeley, Department of Electrical Engineering and Computer Sciences
Lynn White, Jr., Emeritus University Professor, Los Angeles, Department of History
